[1] Refer to the annual percentage equivalent of commercial banks' actual monthly interest expenses on peso-savings deposits to the total outstanding levels of these deposits.
[2] Monthly rates reflect the annual percentage equivalent of all commercial banks' actual monthly interest income on their peso-denominated loans to the total outstanding levels of their peso-denominated loans, bills discounted, mortgage contract receivables and restructured loans.
[3] Average of all high/low values.
[4] Beginning 3 June 2016, the BSP shifted its monetary operations to an interest rate corridor (IRC) system. The repurchase (RP) and Special Deposit Account (SDA) windows were replaced by standing overnight lending and overnight deposit facilities, respectively. The reverse repurchase (RRP) facility was modified to a purely overnight RRP. In addition, the term deposit facility (TDF) will serve as the main tool for absorbing liquidity. The Overnight Lending Facility (OLF) and Overnight Deposit Facility (ODF) will serve as upper and lower bound, respectively, of the IRC system.
[5] The weighted average interest rates (WAIR) of BSP rates are based on outstanding balance as of month-end. Blank entries (…) refer to transactions within the month that have matured by month-end, hence there were no outstanding balance and WAIR.
