[1] *Starting January 2006, new classification by sector was implemented. Effective 03 April 2006, PSE shifted to a new methodology in computing the index from full market capitalization to free float market capitalization. Simultaneous with the migration to a free float index is the renaming of the PHISIX to PSEi.*

[2] *Starting 2 December 2013, trading of an Exchange Traded Fund commenced. ETF is an open-end investment company that trades its shares in the stock exchange. An ETF company issues its shares in blocks called "Creation Units" in exchange for a basket of securities comprising the index it wishes to track. Creation is normally done by institutional investors, who break down the block into smaller portions and sell to retail investors in the Exchange.*
