Note: GDP-related ratios are computed based on the revised National Account series (2000=100)

[1] *Revised series to compute tax effort as percent of GDP (instead of GNP in the old series); to be consistent with international practice adopted by the Department of Finance (DOF)*

[2] *Including Grants*

[3] *Based on the revised data on financing, which are sourced from the National Government Cash Operations of the Bureau of the Treasury (BTr) to conform with the Government Finance Statistics Manual (GFSM) 2014 concept where reporting of debt amortization reflects the actual principal repayments to creditor including those serviced by the Bond Sinking Fund (BSF), while financing includes gross proceeds of liability management transactions such as bond exchange.*

[4] *Refer to accounts not included in the NG budget, e.g., sale, purchase or redemption of government securities, but included in the cash operations report to show the complete relationship in the movements of the cash accounts*

[a] *Refers to the ratio for January to March*

[p] *preliminary*
