[1] *Starting January 2006, a new sectoral classification was implemented. Effective 3 April 2006, the PSE shifted to a new methodology in computing the index from full market capitalization to free float market capitalization. Simultaneous with the migration to a free float index is the renaming of the Philippine Stock Exchange Composite Index (PHISIX) to Philippine Stock Exchange index (PSEi).*

[2] *Starting 2 December 2013, trading of an ETF commenced. ETF is an open-end investment company that trades its shares in the stock exchange. An ETF company issues its shares in blocks called "Creation Units" in exchange for a basket of securities comprising the index it wishes to track. Creation is normally done by institutional investors, who break down the block into smaller portions and sell to retail investors in the Exchange.*
