

BANGKO SENTRAL NG PILIPINAS

2021
ANNUAL REPORT
Statistical Bulletin

Who We Are

Our Vision

The BSP aims to be recognized globally as the monetary authority and primary financial system supervisor that supports a strong economy and promotes a high quality of life for all Filipinos.

Our Mission

To promote and maintain price stability, a strong financial system, and a safe and efficient payments and settlements system conducive to a sustainable and inclusive growth of the economy.

Our Core Values

Patriotism. Demonstrating selfless commitment to the service of the Filipino people and the country.

Integrity. Performing our mandate with sincerity, honesty, and uprightness, worthy of respect and emulation from others.

Excellence. Consistently doing our best to master our craft, continually improving our competencies, and learning new things in pursuit of organizational goals, comparable with the best practices of other central banks.

Solidarity. Performing with team spirit; acting and thinking as one in the pursuit of common goals and objectives.

Accountability. Taking full responsibility for one's or group's actions.

About the Bangko Sentral ng Pilipinas

The Congress shall establish an independent central monetary authority... [which] shall provide policy direction in the areas of money, banking, and credit. It shall have supervision over the operations of banks and exercise such regulatory powers as may be provided by law over the operations of finance companies and other institutions performing similar functions.

- **Section 20, Article XII, 1987 Philippine Constitution**

The State shall maintain a central monetary authority that shall function and operate as an independent and accountable body corporate in the discharge of its mandated responsibilities concerning money, banking, and credit. In line with this policy, and considering its unique functions and responsibilities, the central monetary authority established under this Act, while being a government-owned corporation, shall enjoy fiscal and administrative autonomy.

- **Section 1, Article 1, Chapter 1, Republic Act No. 7653 (The New Central Bank Act)**
As amended by Republic Act No. 11211

The BSP's Legal Mandate

Legal Basis of Establishment and Legal Mandate

The BSP is the central bank of the Republic of the Philippines. Section 20, Article XII of the 1987 Constitution mandated Congress to establish an independent central monetary authority tasked to provide policy direction in the areas of money, banking, and credit. Pursuant to this constitutionally mandated responsibility, Congress established the BSP through the enactment of Republic Act No. 7653 in 1993.

Powers and Functions

As the Philippine central monetary authority, the BSP is responsible, among others, for:

- maintaining price stability conducive to a balanced and sustainable growth of the economy and employment;
- promoting and maintaining monetary stability and convertibility of the peso;
- promoting financial stability by closely working with the national government, Department of Finance, Securities and Exchange Commission, Insurance Commission, and Philippine Deposit Insurance Corporation;
- overseeing the payments and settlements system, including critical financial market infrastructures, to promote sound and prudent practices; and
- promoting broad and convenient access to high quality financial services for the interest of the general public.

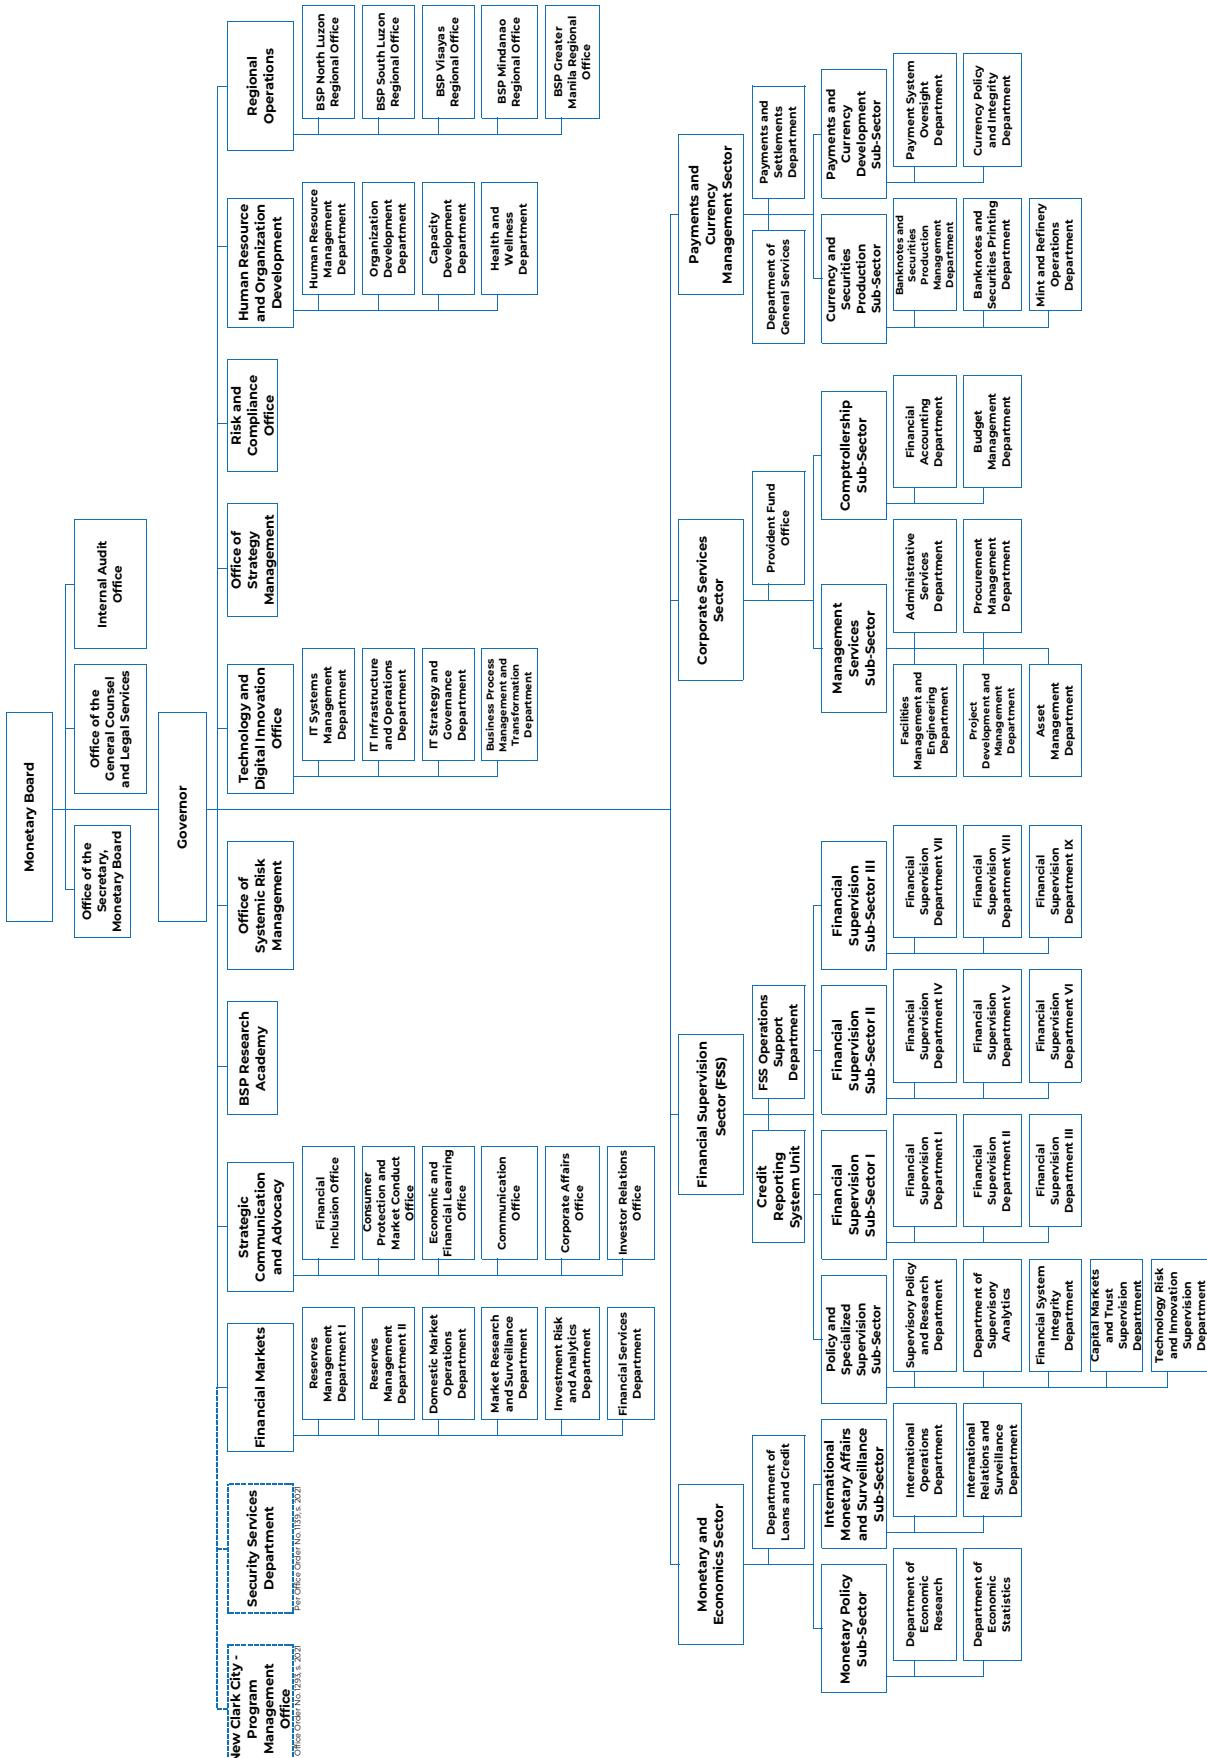

The BSP is also tasked to perform the following functions:

- *Liquidity management.* The BSP formulates and implements monetary policy aimed at influencing money supply, consistent with its primary mandate of maintaining price stability.
- *Currency issuer.* The BSP has the exclusive power to issue the national currency. All notes and coins issued by the BSP are fully guaranteed by the government and are considered legal tender for all private and public debts.
- *Lender of last resort.* The BSP extends discounts, loans, and advances to banking institutions for liquidity purposes.
- *Financial supervision.* The BSP supervises banks and exercises regulatory and examination powers over non-bank institutions performing quasi-banking functions, money service businesses, credit granting businesses, and payment system operators.
- *Management of foreign currency reserves.* The BSP seeks to maintain sufficient international reserves to meet any foreseeable net demands for foreign currencies to preserve the international stability and convertibility of the Philippine peso.
- *Determination of exchange rate policy.* The BSP determines the exchange rate policy of the Philippines. Currently, it adheres to a market-oriented foreign exchange rate policy to ensure orderly conditions in the market.
- *Bond issuer.* As part of monetary policy, the BSP may issue, place, buy, and sell freely negotiable evidences of indebtedness.
- *Banker of the government.* The BSP functions as the banker, financial advisor, and official depository of the government, its political subdivisions and instrumentalities, and government-owned and -controlled corporations.

In 2019, after more than 25 years since the establishment of the BSP, President Rodrigo Roa Duterte signed Republic Act No. 11211, amending the BSP Charter. This law embodies a package of reforms that further aligned the BSP's operations with international standards and global best practices, improved the BSP's corporate viability, and enhanced the BSP's capacity for crafting proactive policies amid rising interlinkages in the financial markets and the broader economy. The supervisory and regulatory powers of the BSP were further enhanced by expanding the coverage of institutions under the BSP's supervision to include money service businesses, credit granting businesses, and payment system operators.

Organizational Structure

As of 31 December 2021

Overview of Functions

The Monetary Board

issues rules and regulations necessary for the effective discharge of the responsibilities and exercise of the powers vested upon the BSP. Its Chairman is the BSP Governor, with five full-time members from the private sector and one member from the Cabinet.

The Governor, as the chief executive officer of the BSP, directs and supervises the operations and internal administration of the BSP.

The BSP is organized into the following functional groups:

Offices under the Monetary Board and the Governor render various administrative and technical support to the Monetary Board and the Governor in the areas of legal services, internal audit, financial market operations, corporate strategy and communication, learning and financial inclusion, financial stability, technology and digital innovation, human resources, research, and enterprise risk management. The Office of the Governor also oversees the operations of the BSP regional offices and branches.

Monetary and Economics Sector is mainly responsible for the operations/activities related to monetary policy formulation, implementation, and assessment.

Financial Supervision Sector is mainly responsible for the regulation of banks and other BSP-supervised financial institutions.

Payments and Currency Management Sector is mainly responsible for maintaining the safety and integrity of Philippine currency and ensuring a well-functioning payments and cash ecosystem that facilitates economic activity and supports long-term economic growth.

Corporate Services Sector is mainly responsible for the effective management of the BSP's financial and physical resources to support the Bank's core functions.

Bella S. Santos
Managing Director

Corporate Services Sector

Maria Almasara Cyd N. Tuaño-Amador
Deputy Governor

Eduardo G. Bobier
Assistant Governor

Vincent Z. Bolivar
Managing Director

Dennis S. Santiago
Managing Director

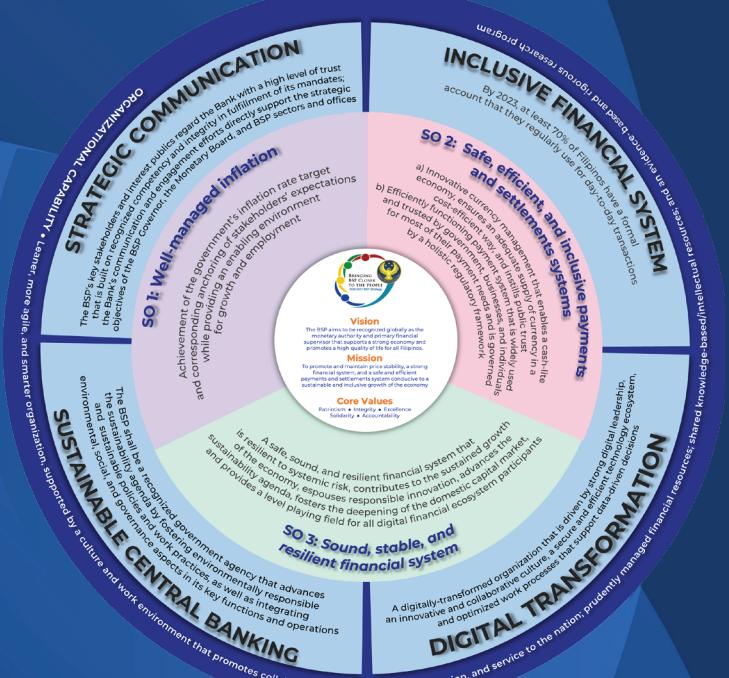

Silvina Q. Mamaril-Roxas
Managing Director

Enrique C. Domingo
Executive Director II

The BSP Strategy for 2020-2023: Bringing the BSP Closer to the People

BSP's Strategy Map

As the Philippines' central monetary authority and primary financial system regulator, the BSP constantly re-examines its impact on its main stakeholders—the Filipino people. Being proactive, the Bank updates strategies in response to changes in the operating environment. The strategy map highlights the BSP's overall focus on stakeholder outcomes. It also marks the united and highly collaborative nature of the organization. The BSP's strategic objectives and programs reflect what matters deeply to its stakeholders. At the center are the vision, mission, and core values—the elements that define the BSP—together with the overall aim of bringing the institution closer to the people.

The BSP's key drivers of success or strategic objectives are based on the three pillars of central banking: (1) price stability through well-managed inflation; (2) a sound, stable, and resilient financial system; and (3) safe, efficient, and inclusive payments and settlements systems. These are bolstered by the strategic programs on digital transformation, sustainable central banking, strategic communication, and an inclusive financial system. To ensure the BSP continues to be a lean, agile, and responsive organization, organizational capability undergirds all the strategic objectives and programs.

The BSP's Strategic Objectives

Strategic Objective 1: Well-Managed Inflation

For the BSP, well-managed inflation means the achievement of the government's annual inflation target set by the Development Budget Coordination Committee while anchoring stakeholders' expectations and providing an enabling environment for growth and employment.

Achieving price stability through well-managed inflation is essential to promoting more sustainable and balanced economic growth, as well as steady improvements in the Filipinos' quality of life. When there is price stability, households and firms can make informed decisions on consumption, investment, saving, and production toward achieving high levels of economic activity and employment.

Strategic Objective 2: Safe, Efficient, and Inclusive Payments and Settlements System

Payments are vital in facilitating productive activities that drive broad-based economic growth and financial inclusion. Digital payments serve as a gateway to using savings, credit, insurance, and investment for wider financial inclusion that helps people improve their lives.

The BSP envisions the national payments system to possess three key features. First, it is a system that would enable a cash-lite economy while ensuring an adequate supply of currency in a cost-efficient way, thereby instilling public trust. Second, it would be widely used and trusted by vast numbers of the public for most of their payment needs. Third, it would be governed by a holistic regulatory framework.

Strategic Objective 3: A Sound, Stable, and Resilient Financial System

The BSP envisions a safe, sound, and stable financial system that is resilient to systemic risks, contributes to the sustained growth of the economy, espouses responsible innovation, advances the sustainability agenda, fosters the deepening of the domestic capital market, and provides a level playing field for all digital financial ecosystem participants. To promote financial stability, the BSP supervises banks and other financial institutions and conducts surveillance activities to ensure their safety and soundness, as well as the resilience of the entire financial system. Attuned to developments in the regulatory space and business environment, the BSP is committed to espousing enabling policies that support responsible innovation and contribute to sustainable economic growth.

The BSP's Strategic Programs

Strategic Program 1: Inclusive Financial System

The pursuit of an inclusive financial system has never been more urgent, with the pandemic ushering in a new way of living. To thrive in the post-COVID-19 economy, people must be able to transact digitally, access affordable financing to revive businesses or pursue new income opportunities, and protect their cash flow through insurance and investment. These are the practical needs of the broader population that an inclusive financial system is designed to deliver—leaving no one behind. The country's transition to a more inclusive and resilient post-pandemic world requires an inclusive financial system.

Strategic Program 2: Strategic Communication

The strategic communication program envisions that key stakeholders and relevant publics regard the BSP with a high level of trust built on recognized competency, credibility, and integrity in the fulfillment of its mandates. This program aims to strengthen public trust by enhancing stakeholder awareness of the BSP, their understanding of its policies and initiatives, and the impact of such policies on their households, communities, and the broader economy. Dialogue and feedback enable the BSP to understand relevant issues, undertake guided actions, and remain responsive to stakeholder interests.

Strategic Program 3: Sustainable Central Banking

The sustainable central banking program envisions the BSP as a government institution recognized for advancing the sustainability agenda by fostering environmentally responsible and sustainable policies and work practices. In addition, the program seeks to integrate environmental, social, and governance aspects in the Bank's key functions and operations. This will enable the BSP to respond appropriately to significant risks to price and financial stability posed by climate, environmental, and social issues.

Strategic Program 4: Digital Transformation

The BSP's digital transformation program envisions a digitally transformed organization that is driven by strong digital leadership, an innovative and collaborative culture, a secure and efficient technology ecosystem, and optimized work processes that support data-driven decisions. This transformation is not only about technology but also considers the areas of people and processes, covering both internal and external stakeholders.

Strategic Program 5: Organizational Capability

Organizational capability supplies the strong foundations for the successful execution of the BSP's strategic initiatives. This strategic program leverages the linkages among the physical, human, financial, and intellectual resources of the BSP and provides solid ground to sustain the achievements of the other core objectives, enabling the Bank to efficiently and effectively serve the Filipino people.

Preface

This publication contains statistical data relating to economic areas covering money, banking, credit, and investment; public finance; foreign exchange transactions; balance of payments and external debt; production, construction, and public utilities; and prices. The series presented in this report may be used as indicators of the impact of policies and measures adopted by the Monetary Board. The data may also support the analysis of the economic and financial developments discussed in the Annual Report.

The statistical series presented in this issue is not intended to duplicate certain statistical data compiled and published by various source agencies.

Sources—The statistics reported herein are derived from government bureaus and offices, financial institutions, and private firms through direct communication with the entities concerned as well as from published statistical reports and bulletins and different departments of the BSP.

Notes—To better understand the series, notes are provided for each of the following sections:

1. Money, credit, and banking
2. Non-bank financial institutions
3. Money market transactions and capital Investments
4. Public finance
5. Foreign exchange transactions
6. Balance of payments and external trade
7. External debt
8. Production, construction, and public utilities
9. Prices

Symbols—The following symbols are used to convey the information in each case:

- Data not available
- . Rounds off to zero
- .. No transaction, no quote, no issue
- ... Blank
- p Preliminary
- r Revised
- e Estimate

Rounding off figures—Any slight discrepancy that may be noticed between the sum of the components and the total, as shown in some tables, may be attributed to the rounding of numbers.

6.19	Exports of Insulated Wire, Cable, and Other Insulated Electric Conductors by Country of Destination, 2011 - 2021	164
6.20	Exports of Printing Machinery Used for Printing by Means of the Printing Type, Blocks, Plates, Cylinders, and Other Printing Components by Country of Destination, 2011 - 2021	165
6.21	Exports of Refined Copper and Copper Alloys, Unwrought by Country of Destination, 2011 - 2021	166
6.22	Exports of Electrical Transformers, Static Converters, and Inductors by Country of Destination, 2011 - 2021	167
6.23	Exports of Nickel Ores and Concentrates by Country of Destination, 2011 - 2021	168
6.24	Exports of Coconut (Copra), Palm Kernel of Babassu Oil, and Fractions Thereof by Country of Destination, 2011 - 2021	169
6.25	Exports of Diodes, Transistors, and Similar Semi-Conductor Devices by Country of Destination, 2011 - 2021	170
6.26	Exports of Electrical Capacitors, Fixed, Variable, or Adjustable (Pre-Set) by Country of Destination, 2011 - 2021	171
6.27	Exports of Parts and Accessories Suitable for Use Solely or Principally with Machines by Country of Destination, 2011 - 2021	172
6.28	Exports of Bananas, Including Plantains, Fresh or Dried by Country of Destination, 2011 - 2021	173
6.29	Exports of Electrical Apparatus for Line Telephony or Line Telegraphy by Country of Destination, 2011 - 2021	174
6.30	Exports of Parts and Accessories of Tractors, Motor Vehicles, Motor Cars, and Special Purpose Motor Vehicles by Country of Destination, 2011 - 2021	175
6.31	Exports by Commodity Group, 2011 - 2021	176
6.32	Exports of Live Animals, Animal, and Vegetable Products, 2011 - 2021	177
6.33	Exports of Prepared Foodstuffs, Beverages, and Tobacco, 2011 - 2021	178
6.34	Exports of Mineral Products, 2011 - 2021	179
6.35	Exports of Products of Chemical or Allied Industries, 2011 - 2021	180
6.36	Exports of Manufactured Goods Classified Chiefly by Materials, 2011 - 2021	181
6.37	Exports of Base Metals and Articles of Base Metal, 2011 - 2021	182
6.38	Exports of Machinery and Mechanical Appliances; Electrical Equipment and Parts Thereof; and Transport Equipment, 2011 - 2021	183
6.39	Exports of Miscellaneous Transactions and Commodities, 2011 - 2021	184
6.40	Leading Imports, 2011 - 2021	185
6.41	Imports of Materials, Accessories, and Supplies Imported on Consignment Basis for Embroidery and/or for Manufacture into Finished Products by Country of Origin, 2011 - 2021	187
6.42	Imports of Petroleum Oils and Oils Obtained from Bituminous Minerals, Other Than Crude by Country of Origin, 2011 - 2021	188
6.43	Imports of Electronic Integrated Circuits and Microassemblies by Country of Origin, 2011 - 2021	189
6.44	Imports of Electrical Apparatus for Line Telephony or Line Telegraphy by Country of Origin, 2011 - 2021	190
6.45	Imports of Coal, Briquettes, Ovoids, and Similar Solid Fuels Manufactured from Coal by Country of Origin, 2011 - 2021	191
6.46	Imports of Parts and Accessories (Other than Covers, Carrying Cases, and the like) by Country of Origin, 2011 - 2021	192
6.47	Imports of Motor Cars and Other Motor Vehicles Principally Designed for the Transport of Persons, Including Station Wagons and Racing Cars by Country of Origin, 2011 - 2021	193
6.48	Imports of Human Blood; Animal Blood Prepared for Therapeutic, Prophylactic, or Diagnostic Uses; Antisera and Other Blood Fractions by Country of Origin, 2011 - 2021	194
6.49	Imports of Petroleum Oils and Oils Obtained from Bituminous Minerals, Crude by Country of Origin, 2011 - 2021	195
6.50	Imports of Wheat and Meslin by Country of Origin, 2011 - 2021	196
6.51	Imports of Motor Vehicles for the Transport of Goods by Country of Origin, 2011 - 2021	197
6.52	Imports of Motorcycles and Cycles Fitted with an Auxiliary Motor, with or without Side-Cars by Country of Origin, 2011 - 2021	198
6.53	Imports of Semi-finished Products of Iron or Non-Alloy Steel by Country of Origin, 2011 - 2021	199
6.54	Imports of Medicaments Consisting of Mixed or Unmixed Products for Therapeutic or Prophylactic Uses by Country of Origin, 2011 - 2021	200
6.55	Imports of Insulated Wire, Cable, and Other Insulated Electric Conductors by Country of Origin, 2011 - 2021	201
6.56	Imports by Commodity Group, 2010 - 2020	202
6.57	Imports of Live Animals, Animal, and Vegetable Products, 2011 - 2021	203
6.58	Imports of Prepared Foodstuffs; Beverages, and Tobacco, 2011 - 2021	204
6.59	Imports of Mineral Products, 2011 - 2021	205
6.60	Imports of Products of the Chemical or Allied Industries, 2011 - 2021	206

6.61	Imports of Manufactured Goods Classified Chiefly by Materials, 2011 - 2021	207
6.62	Imports of Base Metals and Articles of Base Metals, 2011 - 2021	208
6.63	Imports of Machinery and Mechanical Appliances; Electrical Equipment and Parts Thereof, and Transport Equipment, 2011 - 2021	209

	Notes on Production, Construction, and Public Utilities	229
8.1	Agriculture, Fishery, and Forestry Production, 2011 - 2021	230
8.2	Agricultural Land Utilization by Kind of Crops, 2011 - 2021	231
8.3	Logs and Lumber Production, 2011 - 2021	232
8.4	Gold and Silver Production, 2011 - 2021	233
8.5	Permit Valuation of Private Building Construction by Type of Construction in Cities and Municipalities in Metro Manila, 2011 - 2021	234
8.6	Gross Energy Generation by Grid, 2011 - 2021	237
8.7	Gross Energy Generation by Plant Type, 2011 - 2021	238
8.8	MERALCO-Registered Energy Sales, 2011 - 2021	239
8.9	Electricity Consumption of Large Manufacturing Establishments within the Franchise Area of MERALCO, 2011 - 2021	240

9. Prices

	Notes on Prices	241
9.1	Consumer Price Index, Inflation Rate, and Purchasing Power of the Peso (Philippines) (2018=100), 2011 - 2021	244
9.2	Consumer Price Index for All Income Households in the Philippines (2018=100), 2011 - 2021	245
9.3	Consumer Price Index for All Income Households in the National Capital Region (2018=100), 2011 - 2021	246
9.4	Consumer Price Index for All Income Households in Areas Outside the National Capital Region (2018=100), 2011 - 2021	247
9.5	General Retail Price Index in the National Capital Region (2012=100), 2011 - 2021	248
9.6	General Wholesale Price Index in the Philippines (2012=100), 2011 - 2021	249
9.7	Producer Price Index for Manufacturing by Major Industry Group (2018=100), 2011 - 2021	250
9.8	Philippine Stock Market Transactions, 2011 - 2021	252

MONEY, CREDIT, AND BANKING

Depository Corporations (DCs) refer to the Monetary Authorities (MA) and Other Depository Corporations (ODCs).

Monetary Authorities (MA) consist of the BSP and the national government in so far as the latter's monetary functions arising from its holdings of cash and transactions with the International Monetary Fund (IMF) are concerned.

Other Depository Corporations (ODCs) consist of deposit-generating institutions other than the BSP, such as commercial banks, thrift banks, rural banks, non-stock savings and loan associations and non-banks with quasi-banking functions. This is an expansion of the coverage of ODCs from the old series of the Deposit Money Banks (DMBs), which covered only commercial banks and rural banks accepting demand deposits.

Universal and Commercial Banks represent the largest single group, resource-wise, of financial institutions in the country. They offer the widest variety of banking services among financial institutions. In addition to the function of an ordinary commercial bank, universal banks are also authorized to engage in underwriting and other functions of investment houses, and to invest in equities of non-allied undertakings.

Thrift Banks are composed of savings and mortgage banks, private development banks, stock savings and loan associations and microfinance thrift banks. Thrift banks are engaged in accumulating savings of depositors and investing them. They also provide short-term working capital and medium- and long-term financing to businesses engaged in agriculture, services, industry and housing, diversified financial and allied services, and their chosen markets and constituencies, especially small- and medium- enterprises and individuals.

Rural and Cooperative Banks are the more popular type of traditional banks in the countryside. Their role is to promote and expand the rural economy in an orderly and effective manner by providing residents with basic financial services. Rural and cooperative banks help farmers through the stages of production, from buying seedlings to marketing their produce. Rural banks and cooperative banks are differentiated from each other by ownership. While rural banks are privately owned and managed, cooperative banks are organized/owned by cooperatives or federations of cooperatives.

Microfinance Banks are the newest type of banks that offer a broad range of financial services, such as deposits, loans, payment services, and money transfers to the poor and low-income households for their microenterprises and small businesses.

Narrow Money (M1) consists of currency outside depository corporations (currency in circulation) and peso deposits subject to checks of the monetary system (or transferable deposits).

The item "currency in circulation" or currency outside DCs is obtained by deducting cash held in the vaults of the Bureau of the Treasury (BTr) and ODCs from the currency issue of the BSP.

The term "peso deposits subject to check," or transferable deposits, include "managers and cashiers' checks" as well as deposits automatically transferred from savings to demand deposits, but exclude demand deposits by the National Government and ODCs' holdings of "checks and other cash items."

"Interbank deposits" among DCs are excluded in the computation of money supply as the balances are offset in the consolidation process.

M2 consists of M1 and other deposits included in broad money such as savings and time deposits. Savings deposits are interest-bearing deposits, which are withdrawable upon presentation of properly accomplished withdrawal slips together with the corresponding passbooks or by means of negotiable orders of withdrawal (for NOW accounts). Time deposits are interest-bearing deposits with specific maturity dates and evidenced by certificates issued by the bank.

Broad Money Liabilities (M3) consist of national currency outside DCs, transferable deposits, other deposits (peso savings and time deposits), and securities other than shares included in broad money.

Expanded Broad Money Liabilities (M4) consist of broad money liabilities (M3) and transferable and other deposits denominated in foreign currency of residents.

Securities Other Than Shares Included in Broad Money are instruments used as an alternative form of obtaining funds from the public other than deposits through the issuance, endorsement, or acceptance of debt instruments for the borrower's own account. These represent all types of money market borrowings by banks like promissory notes, repurchase agreements, commercial papers/securities, and certificates of assignment/participation with recourse.

Transferable and Other Deposits in Foreign Currency (FCDs) are foreign currency-denominated transferable and other deposits owed to residents.

Liabilities Excluded from Broad-Money covers all domestic direct/negotiated borrowings obtained by the ODCs from other financial intermediaries, private and government firms and individuals for the limited purpose of financing their needs and those of their agents/dealers. Excluded are those obligations/borrowings from the BSP and other local commercial banks. It also includes net other items which represent the difference between all other assets and liabilities, including capital accounts of the BSP and ODCs.

Net Foreign Assets (NFA), as distinguished from domestic accounts, follow the residency criteria consistent with the Monetary and Financial Statistics Manual and Compilation Guide, and the Balance of Payments and International Investment Position Manual, 6th edition of the IMF, as well as the System of National Accounts 2008. The NFA, which refers to transactions with non-residents, represents the difference between foreign assets and foreign liabilities of DCs.

Domestic Claims are the sum of net claims on the national government and claims on other sectors.

Net Claims on National Government consist of domestic securities, loans, and advances held by the national government, net of its deposits.

Claims on Others Sectors consist of domestic securities, loans, and advances held by sectors other than the central government. These sectors include other financial corporations, state and local government, public non-financial corporations, and private corporations.

Reserve Position of Other Depository Corporations

Available Reserves consist of cash in vault, deposit balances with the BSP, and banks' holdings of reserve-eligible government securities and foreign securities. Effective 6 April 2012, cash in vault was excluded as an eligible form of available reserves. Thus, available reserves consist only of deposit balances with the BSP and banks' holdings of market yielding government securities, which are used as liquidity reserves.

Required Reserves pertain to the amount of reserves, that banks (i.e., universal and commercial banks, thrift banks, specialized government banks and rural banks) are required to maintain against their deposits and deposit substitute liabilities. Effective 6 April 2012, reserves were required to be kept in the form of deposits placed in banks' Demand Deposit Accounts (DDAs) with the BSP.

Excess Reserves represent the difference between total available and required reserves. Reserve deficiency occurs when required reserves are greater than total available reserves.

Loans Granted are the amount of loans approved by banks, that have been credited to a borrower's account or made available during the period.

Loans Outstanding are the unpaid balance of loans granted, which may consist of any of the following accounts:

- a. loans and discounts including interbank loans receivable and those under Circular 343/547;
- b. agrarian reform/agricultural credit loans;
- c. development incentive loans under PD 717;
- d. bills purchased consisting of domestic, foreign, and export bills;
- e. restructured loans;
- f. underwriting accounts;
- g. customers' liability on bills/drafts under letters of credit (LC) and trust receipts (TR) and customers' liability for banks' acceptance outstanding;
- h. trading account securities (excluding government securities purchased and sold under repurchase agreement);
- i. credit card receivables; and
- j. microfinance loans.

All categories of loans outstanding of universal banks and commercial banks do not include past due items, items in litigation, and domestic and foreign bills-clean. However, these are included in loans classified by type of debt instruments. Data series are sourced from the Total Credit Reporting System, which is a stand-alone reportorial requirement of the BSP-Department of Economic Statistics for Universal/Commercial Banks.

Effective June 2014, a New Total Credit Reporting System (NTCRS) was implemented as per BSP Circular Letter No. CL-2014-029. This enhancement aims to align the industry classification with the 2009 Philippine Standard Industrial Classification (PSIC).

The total loans outstanding was also reconciled with the banks' Financial Reporting Package (FRP). Due to this enhancement, statistical tables pertaining to Loans Granted and Loans Outstanding by Type of Debt Instrument were discontinued.

Starting 2015 (with comparable data for 2014), loans granted and loans outstanding data from Thrift Banks were based on the NTCRS which replaced the Summary Transaction of Thrift Bank Loan reports from the previous years. Likewise, loans outstanding data are now reconciled with the banks' FRP and aligned with 2009 PSIC. Due to this migration to NTCRS, Private Development Banks (PDBs), Savings and Mortgage Banks (SMBs) and Stock Savings and Loan Associations (SSLAs) statistical tables are now consolidated into Thrift Banks and are presented by Type of Industry, Purpose, and Maturity for both loans granted and loans outstanding.

Definitions/Concepts. For definitions/concepts on the different categories presented in the series, reference should be made to the following:

- a. For universal banks and commercial banks – Revised Guidelines on Encoding the Loans Granted and the Loans Outstanding Data as of 8 October 1998;
- b. For thrift banks – Manual of Instructions for Accomplishing Research Sector Form No.1 (TB), Revised 1991

Loans Classified by Industry refer to the industry that the borrower intends to finance or develop using the proceeds of the loans.

¹ Includes regular and liquidity reserves

² Starting 15 November 1990, which is the effectiveness date of Circular No. 1261, a uniform rate was prescribed regardless of maturities.

³ Refers to the portion which are allowed to be held in the form of market-yielding government securities purchased directly from the BSP. Prior to 31 May 1995, this formed part of the regular reserves. Thereafter, it was added on to the regular reserves and was referred to in later circulars as liquidity reserves.

^a The Circular provided for the (a) unification of the statutory/legal and liquidity reserve requirement, (b) exclusion of cash-in-vault and demand deposits as eligible forms of reserve requirement compliance, and (c) reduction in the unified reserve requirement ratios.

^b Refers to the initial Bangko Sentral issuance that imposed required reserves on Common Trust Funds and Other Similarly Managed Funds pursuant to the provisions of Section 94 of R.A. 7653, otherwise known as The New Central Bank Act.

¹ Consists of savings & mortgage banks, private development banks and the stock savings and loan associations and microfinance thrift banks

² Includes regular and liquidity reserves

³ Starting 15 November 1990, which is the effectivity date of Circular No. 1261, a uniform rate was prescribed regardless of maturities.

⁴ Refers to the portion which are allowed to be held in the form of market-yielding government securities purchased directly from the BSP. Prior to 31 May 1995, this formed part of the regular reserves. Thereafter, it was added to the regular reserves and was later referred to in subsequent circulars as liquidity reserves.

^a Circular No. 267 dated 8 November 2000 (pursuant to MB. Resolution No. 1820 dated 20 October 2000) amended Circular Nos. 260 and 262 to exclude thrift banks from the increase in liquidity reserves which took effect on 13 and 20 October 2000. Thus, liquidity reserves for thrift banks were maintained at its 2 July 1999 levels.

^b The Circular provided for the (a) unification of the statutory/legal and liquidity reserve requirement, (b) exclusion of cash-in-vault and demand deposits as eligible forms of reserve requirement compliance, and (c) reduction in the unified reserve requirement ratios.

^c Refers to the initial issuance that imposed required reserves on Common Trust Funds and Other Similarly Managed Funds pursuant to the provisions of Section 94 of R.A. 7653, otherwise known as The New Central Bank Act.

¹ Includes regular and liquidity reserves.² Imposition of required reserves on Common Trust Funds and Other Similarly Managed Funds started in 4 October 1993, pursuant to the provisions of Section 94 of R.A. 7653, otherwise known as The New Central Bank Act.³ Refers to the portion which are allowed to be held in the form of market-yielding government securities purchased directly from the BSP. Prior to 31 May 1995, this formed part of the regular reserves. Thereafter, it was added on to the regular reserves and was referred to in later circulars as liquidity reserves.^a NBQBs are included in the increase in liquidity reserve requirement effective 21 March 2003, however it was not specifically mentioned in Circular No. 377.^b The Circular provided for the (a) unification of the statutory/legal and liquidity reserve requirement, (b) exclusion of cash-in-vault and demand deposits as eligible forms of reserve requirement compliance, and (c) reduction in the unified reserve requirement ratios.

¹ Pursuant to Circular No. 1083 dated 22 April 2020, loans to MSMEs are utilized as alternative compliance with the reserve requirements effective on 24 April 2020.

RBs and NRBs' loans to large enterprises utilized with the reserve requirements are temporarily reported under this account.

² Pursuant to Circular No. 1087 dated 27 May 2020, loans to large enterprises are utilized as alternative compliance with the reserve requirements effective on 29 May 2020.

^a Data refer to reserve position against deposit liabilities of Universal and Commercial Banks accepting deposits; computed as simple average of weekly transactions.

Liquidity reserves include reserve deposit accounts based on Cr. No. 539 and reserves based on CB Cr. No. 10.

^b Starting 6 April 2012, Circular No. 453 unified Statutory/Legal and Liquidity Reserve Requirement and its subsequent remuneration, exclusion of Cash-In-Vault and demand deposits as eligible forms of reserve requirement, reduction of unified reserve requirement ratios.

^a The Total Credit Report for UKBs and enhanced, through Circular Letter No. CL-2014-029, to reflect the use of the New Total Credit Report (NTCR), which took effect starting with reports as of 30 June 2014 for UKBs and 31 January 2015 for TBS.

The NTCR is aligned with the industry classification of the 2009 Philippine Standard Industrial Classification (PSIC).

¹ On 29 May 2015, Negros Island Region was created through Executive Order No. 183. While NIR was dissolved through Executive Order No. 183, data until 2019 from provinces under NIR were still reported under the said region in the TCRs.

¹ The Total Credit Report for UKBs and TBS was amended and enhanced, through Circular Letter No. CL-2014-029, to reflect the use of the New Total Credit Report (NTCR), which took effect starting with reports as of 30 June 2014 for UKBs and 31 January 2015 for TBS. The NTCR is aligned with the industry classification of the 2009 Philippine Standard Industrial Classification (PSIC).

² On 29 May 2015, Negros Island Region was created through Executive Order No. 1433. While NIR was dissolved through Executive Order No. 1433, data until 2019 from provinces under NIR were still reported under the said region in the TCRs.

¹ Data by region is based on the submitted Branch Regional Information System reports of Universal and Commercial banks.
² Consists of total loans outstanding to residents; non-residents (gross of BSP Reverse Repurchase Agreements), loans of domestic banks' foreign offices; interbank loans inclusive of loans to BSP; and loans and receivables arising from repurchase agreements, certificates of assignment/participation with recourse and securities lending and borrowing transactions. Net of amortization.

³ Consists of loans and receivables - others, net of allowance for credit losses.

⁴ On 29 May 2015, Negros Island Region (NIR) was created through Executive Order No. 183. On 9 August 2017, NIR was dissolved through Executive Order No. 384.

⁵ Related data from 2013 onwards are included in Others as they disclosure and reveal the financial position of individual institutions. This is in view of the prohibitions under Section 27(c) of Republic Act No. 7653 (The New Central Bank Act), which prohibits personnel of the Bangko Sentral ng Pilipinas (BSP) from disclosing or revealing information relating to the condition or business of any institution subject to BSP supervision or examination.

⁶ Includes loans of domestic banks' foreign offices, non-residents, and other loans not elsewhere classified. Data from 2013 onwards includes loans to the ARMM region.

¹ Refers to the number of financial establishments which includes the head offices and branches; excludes the Bangko Sentral ng Pilipinas.

² Consist of life insurance companies, non-life insurance companies, and professional reinsurers which only cover the head offices and their foreign branches.

Sources: Bangko Sentral ng Pilipinas, Insurance Commission

NON-BANK FINANCIAL INSTITUTIONS

Non-bank financial institutions are financial institutions other than banks classified into government and private sectors, with or without quasi-banking functions. They are primarily engaged in long-term financing for expanding and modernizing of productive ventures and, to a minor extent, for facilitating short-term placements in other financial institutions.

- a. **Investment houses** are enterprises engaged in guaranteed underwriting of securities of other persons or enterprises, including securities issued by the government and its instrumentalities.
- b. **Financing companies** are corporations or partnerships primarily organized for the purpose of extending credit facilities to consumers and to industrial, commercial, or agricultural enterprises. This is done by discounting or factoring commercial papers or account receivables, by buying and selling contracts, leases, chattel mortgages, or other evidences of indebtedness, or by leasing motor vehicles, heavy equipment and industrial machinery, business and office machines and equipment, appliances, and other movable property.
- c. **Investment companies** are entities primarily engaged in investing, re-investing, or trading of securities.
- d. **Securities dealers** are institutions organized either as partnerships or corporations that buy and sell securities of another or acquire securities. They resell or offer these securities to the public for their own account. They do not get any commission but they derive income from trading, representing the difference in the buying and selling price of securities.
- e. **Securities brokers** are institutions engaged in the business of undertaking transactions in securities for the account/risk of others.
- f. **Pawnshops** are business establishments engaged in lending money in exchange of personal property delivered as security or pledge.
- g. **Lending investors** are persons who lend money for themselves or others. They use their own capital for the purpose of extending all types of loans, oftentimes without collateral.

- h. **Non-stock savings and loan associations** are non-stock, non-profit corporations engaged in the business of accumulating savings of its members and using such for loans to members, these serve the needs of households by providing them long-term financing for home building and personal finance development. They also engage in a death benefit program meant exclusively for the benefit of their members.
- i. **Private insurance companies** are insurance carriers of all kinds such as life, fire, marine, accident, health, title, financial obligations, casualty, fidelity, and surety; insurance agents' and brokers' organizations servicing insurance carriers; consultants for policyholders; adjusting agencies and independently organized pension (superannuation) funds.
- j. **Government non-bank financial institutions** consist of the Government Service Insurance System (GSIS), Social Security System (SSS), Philippine Guarantee Corporation (PHILGUARANTEE), and Small Business Corporation (SBC).
- k. **Authorized agent banks (AAB) forex corporations** refer to AAB subsidiaries/affiliate forex corporations whose businesses include buying and selling of forex.
- l. **Venture capital corporations (VCCs)** refer to any entity organized jointly by private banks, the NDC, the Technology and Livelihood Resource Center (TLRC), and/or such other government agencies as may be authorized by the appropriate authority. The primary purpose of VCCs is to develop, promote, and assist, through debt or equity financing or any other means, any small- and medium-scale enterprise in the country.
- m. **Credit card companies** are corporations that offer the use of credit card services.
- n. **Electronic money issuers** are entities that provide money transfer or remittance services using electronically stored money value systems and similar digital financial services.
- o. **Remittance agents** are entities that operate a remittance business network. This remittance business involves transferring funds or facilitating the movement of funds or monetary instruments from the sender to a receiver locally and/or internationally by any financial institution.

- p. **Credit granting entities** are those that extend credit through installment or deferred payment sales, such as but not limited to real estate dealers or property developers, car and other vehicle dealers, or appliance stores.
- q. **Trust corporations** are stock corporations created to engage primarily in trust, other fiduciary business, and investment management activities that act as trustees or administer any trust or hold property in trust or on deposit for the use and benefit of others. They also act as financial consultants, investment advisers, and portfolio managers.

MONEY MARKET TRANSACTIONS AND CAPITAL INVESTMENTS

Money Market is a network of institutions and facilities through which short-term funding needs are met.

Interbank Call Loan refers to a loan of a bank from another bank for periods not exceeding 24 hours to cover reserve deficiencies.

Promissory Note is an unconditional promise in writing made by one person to another, signed by the maker, engaging to pay on demand, or at a fixed or determinable future time, a certain sum of money, to order or to bearer including non-negotiable promissory note.

Repurchase Agreement is an agreement to sell, transfer, and convey securities, described therein, for a specific price with a mutual agreement that the same securities shall be sold by a vendee and repurchased by a vendor at some terminable future time and price (Underlying instrument may either be a private or government issue).

Certificate of Assignment (with recourse) is an instrument that evidences the transfer of a right, claim, credit, or interest as evidenced by a document specifically described therein as payable at a specific date and price (Underlying instrument may either be a private or government issue).

Certificate of Participation (with recourse) is an instrument that evidences the share or part interest of the holder thereof in securities, loan agreements, or debt instruments, specifically described therein in consideration of a certain sum of money, payable at a price and definite future time by the issuer or the original debtor (Underlying instrument may either be a private or government issue).

Commercial Paper (non-financial institutions) is a money market instrument issued by non-financial institutions such as public utilities and commercial, industrial, and agricultural enterprises, and sold in the money market without recourse.

Commercial Paper (financial institutions) is a money market instrument issued by financial institutions and sold in the money market without recourse.

Other Government Securities are instruments issued by the government and semi-government entities to financial institutions and subsequently sold in the money market without recourse.

Deposit Substitute refers to an alternative form of obtaining funds from the public other than deposits. It is done through the issuance, endorsement, or acceptance of debt instruments for the borrower's own account, for the purpose of re-lending or purchasing of receivables and other obligations.

Capital Investment is the amount of capital invested by newly-registered organizations composed of corporations, partnerships, and single proprietorships.

Subscribed Capital is a portion of the authorized capital which has been underwritten by the stockholders.

Paid-in Capital is the actual capital paid-in by stockholders or owners to the corporations, partnerships, and cooperative associations at the time of registration, which may be in cash or in property.

Capital Increases are additional funds put into the capital stock of existing business firms.

Capital Withdrawal is the retirement and/or redemption of capital funds of business firms.

PUBLIC FINANCE

National Government (NG) or the term Government is the central authority of the country including all agencies covered by the national budget.

Revenues are gross inflow of economic benefits or service potentials during the reporting period when those inflows result in an increase in net assets/equity, other than increases relating to contributions from owners.

Tax revenues are compulsory charges and levies imposed by the government on goods, services, transactions, individuals, and other entities within its jurisdiction to finance operations. These include taxes on income and profits, property, domestic goods and services, and international trade transactions.

Non-tax revenues are revenues collected from sources other than compulsory tax levies. These include those collected as payment for direct services rendered by government agencies to the public or those arising from the government's regulatory and investment activities.

Expenditures are cash expenses paid out in currency or check by the NG for payment of liabilities arising from budgetary transactions.

Interest payments are disbursements representing payments of interest on domestic and foreign borrowings of the NG. Borrowings may be in the form of loans or securities.

Current operating expenditures are expenditures for the purchase of goods and services for use in regular government operations within a budget year.

Capital outlays are purchases of goods and services in which the benefits extend beyond a budget year and add to the assets of the government.

Equity represents NG investments in the authorized capital stock of government-owned or controlled corporations.

Net lending represents advances by the NG for servicing government-guaranteed corporate debt during the year and net of repayments on such advances. This includes loan proceeds from the program loans lent to the government corporations.

Surplus refers to the excess of total government revenues over total expenditures.

Deficit refers to the excess of total government expenditures over total revenues.

Financing is the means by which government provides funding to cover a budget deficit. In case of a surplus, the excess funds become part of the sources of financing the programmed expenditures.

Borrowings are loans and other funds obtained by the government from domestic and foreign sources that are serviced through principal repayments and interest payments.

Amortizations include repayments of principal for loans that are payable by regular installments and annual contributions to the debt sinking fund for loans that are payable upon maturity.

Change in cash balances refers to the net withdrawal or deposit by the NG on its deposit accounts with the Bangko Sentral ng Pilipinas (BSP) and other depository banks to finance the overall deficit or absorb the overall surplus in NG's financial operations.

Consolidated public sector financial position (CPSFP) is the combined financial position of all government entities.

Public sector consists of the NG, local government units (LGUs), social security funds (SSFs), and government non-financial and financial corporations.

Public sector borrowing requirement (PSBR) refers to the combined surplus/deficit of the NG and monitored non-financial public corporations, as well as adjustments in net lending and equity to government corporations.

Other public sector consists of the combined financial position of other public sector entities, including the Social Security System (SSS), the Government Service Insurance System (GSIS), the Philippine Health Insurance Corporation (PHIC), the BSP, and other government financial institutions (GFI), and LGUs.

Consolidated public sector debt includes all the domestic and foreign liabilities of the general government, public non-financial, and financial corporations, after eliminating the inter- and infra-sector debt holdings.

Public foreign debt is the outstanding debt of the public sector to foreign creditors.

Guaranteed/Contingent debts are debts of GOCCs that the NG guarantees to repay in the event that the GOCCs default on their payments.

¹ Based on the revised data on financing, which are sourced from the National Government Cash Operations Report of the BTr to conform with the GFSM 2014 concept where reporting of debt amortization reflects the actual principal payments to creditor including those serviced by the BSF, while financing includes gross proceeds of liability management transactions such as bond exchange.

2019	9,275	6,308	4,114	166	2,027	2,967
2020	10,119	6,712	5,590	181	941	3,407
2021	11,255	7,315	6,889	208	218	3,940

¹ The series is based on the Outstanding Public Sector Debt statistics released by the DOF on 12 May 2021. The new format adopted by the DOF reflected the following changes made to the compilation:
1) removal of GOCCs' non-interest bearing debt from computation of the nonfinancial public corporations' (14 GOCCs) outstanding debt, and 2) reclassification of NIA and PNR from nonfinancial public corporations to General Government.

² The consolidated public sector consists of the general government sector, nonfinancial public corporations, and financial public corporations, after elimination of intra-debt holdings among these sectors.

³ Includes the National Government (consolidated with BSF), NIA, PNR, SSFs, and LGUs, less intrasector debt holdings

⁴ Includes the following 14 GOCCs: 1) National Power Corporation, 2) Philippine National Oil Company, 3) Metropolitan Waterworks and Sewerage Company, 4) National Development Company, 5) Light Rail Transit Authority, 6) Local Water Utilities Administration, 7) National Electrification Administration, 8) National Housing Authority, 9) Philippine Ports Authority, 10) National Food Authority, 11) Philippine Economic Zone Authority, 12) Home Guaranty Corporations, 13) Bases Conversion Development Authority, and 14) Civil Aviation of the Philippines

⁵ Includes the following public financial corporations: BSP, DBP, LBP, and PHILGUARANTEE

⁶ Consolidated foreign debt

¹ Based on BTr's report. Final holders are tracked to the extent that these are registered with the NRoSS of the BTr.

² Covers government-owned and controlled non-financial and non-bank financial corporations

³ Data include holdings of the BSP and prior to 2004, holdings of clients account.

⁴ Includes SSS, GSIS, HDMF, and own holdings of PDC. Tax-exempt Institutions only trade among themselves.

⁵ Refers to securities custodian, a financial institution accredited by the BSP, that is designated by investor to perform the functions of safekeeping, holding title to the securities in a nominee capacity, reports rendition, market-to-market valuation, collection and payment of dividends, interest earnings or proceeds from the sale/redemption/maturity of securities held under custodianship, and representation of the client in corporate actions, per BSP Circular No. 11/21, Series of 2021

⁶ Refers to the depository account of the PDTC starting February 2013

⁷ Includes BSF, SSF, and Special Guarantee Fund of the BTr, BSP-DLC, PDIC, PCGG, Name on Registry Investors (client's account) and individuals, Securities brokers and other corporate institutions not elsewhere classified

FOREIGN EXCHANGE TRANSACTIONS

Foreign Assets and Liabilities of the Commercial Banking System

Foreign assets of commercial banks consist of foreign exchange holdings and other claims of banks on non-residents.

Foreign liabilities consist of obligations to non-residents denominated in foreign currency.

Net foreign holdings refer to the difference between foreign assets and foreign liabilities.

International Reserves

Gross International Reserves (GIR) are foreign assets that are readily available to and controlled by the BSP for direct financing of payments imbalances and for managing the magnitude of such imbalances. GIR consists of holdings of gold, special drawing rights (SDR), foreign investments, and foreign exchange, including Reserve Position in the Fund (RPF).

Gold holdings were valued in the Philippines at the official rate of \$35 per fine troy ounce up to April 1972 and \$38 per fine troy ounce up to January 1973. Starting in February 1973, gold holdings were valued at \$42 per fine troy ounce. With the second amendment of the IMF Articles of Agreement taking effect in April 1978, the central bank gold transactions were valued at free market rates.

Special Drawing Right (SDR) is an interest-bearing reserve asset created by the IMF in 1969 to supplement its member countries' existing official reserves. The SDR serves as the unit of account of the IMF and some other international organizations. "Holdings of SDRs" by an IMF member are recorded as reserve assets. The value of SDR is based on a basket of five key international currencies (US dollar, Japanese yen, Euro, British pound sterling, and Chinese renminbi). It is not directly determined by the supply and demand in the market. Instead, the IMF sets the value on a daily basis based on the market exchange rates between the currencies included in the SDR basket. The SDR is neither a currency nor a claim on the IMF. It is a potential claim on the freely usable currencies of the IMF members.

SDRs are allocated to member countries in proportion to their IMF quotas. These were made available by the IMF to its members to ensure continued liquidity in the economic system by supplementing the IMF members' foreign exchange reserves.

In conformity with the guidelines outlined in the IMF's Balance of Payments and International Investment Position Manual, 6th edition, the BSP adopted the revised treatment of the "allocation of SDRs" in its

various statistics starting 23 September 2010. Prior to this, the allocation of SDRs was considered a non-transaction item. With the implementation of the BPM6-based treatment, the SDR allocation is now treated as a transaction, particularly as a long-term liability of the receiving IMF member. The SDR allocation is recorded under the Other Investment account of the BOP.

Foreign Investments of the BSP are foreign assets in the form of interest-earning deposits with foreign correspondent banks and foreign securities denominated in the acceptable international reserve currencies of the country. The latter are issued by foreign governments or supranational entities or are guaranteed by foreign governments.

Foreign Exchange is a foreign asset, which consists of demand deposits and foreign currencies on hand, accrued interest receivable, and net receivable due from a broker.

By virtue of relevant BSP issuances¹, aside from the US dollar, the following currencies have been included in the country's international reserves: Japanese yen (Japan), British pound (United Kingdom), Hong Kong dollar (Hong Kong), Swiss franc (Switzerland), Canadian dollar (Canada), Singapore dollar (Singapore), Australian dollar (Australia), Asian Bond Fund 2, SDRs, and euro. The euro consists of currencies of the 11 founding member countries of the European Monetary Union: German mark (Germany), French franc (France), Dutch guilder (the Netherlands), Austrian schilling (Austria), Belgian franc (Belgium), Italian lira (Italy), Finnish markka (Finland), Portuguese escudo (Portugal), Spanish peseta (Spain), Luxembourg franc (Luxembourg), and Irish punt (Ireland). Moreover, effective 13 October 2016, the Monetary Board approved the inclusion of the Chinese renminbi (China) in the official international reserves.

Reserve Position in the Fund (RPF) refers to the country's claim on the IMF's General Resources Account.

¹ Number of months of average imports of goods and payment of services and primary income that can be financed by reserves.

² Based on latest available outstanding short-term external debt.

³ Refers to adequacy of reserves to cover outstanding short-term external debt based on original maturity plus principal payments on medium- and long-term external loans of the public and private sectors falling due in the next 12 months. Figures reflect data based on debt service schedule on debt service schedule on outstanding external debt and outstanding short-term external debt as of 30 June 2022.

Details may not add up to total due to rounding.

BALANCE OF PAYMENTS

The BSP uses the Balance of Payments (BOP) and International Investment Position Manual, 6th edition (BPM6) as the standard framework for compiling relevant statistics. Compliance with this international framework developed by the IMF allows comparability of the country's Balance of Payments statistics with other IMF-member countries. The definition of terms is provided below based on this framework.

Balance of Payments (BOP) is a summary of the economic transactions of a country between residents and non-residents during a period. It consists of the current account, the capital account, and the financial account.

Current Account consists of transactions in goods, services, primary income, and secondary income. This account measures the net transfer of real resources between the domestic economy and the rest of the world.

Goods are physical, produced items over which ownership rights can be established and whose economic ownership can be passed from one institutional unit to another by engaging in transactions. The balance on trade-in goods covers general merchandise, net exports of goods under merchanting, and non-monetary gold.

Services are the result of a production activity that changes the conditions of the consuming units or facilitates the exchange of products or financial assets. This account covers 12 service transactions: manufacturing services on physical inputs owned by others; maintenance and repair services (i.e.; transport services); travel services; construction; insurance and pension services; financial services; charges for the use of intellectual property (i.e.; telecommunications, computer, and information services); other business services; personal, cultural, and recreational services; and government goods and services.

Primary Income Account shows flows for the use of labor and financial resources between resident and non-resident institutional units. Primary income represents the return that accrues to institutional units for their contribution to the production process or for the provision of financial assets and renting natural resources to other institutional units. The main types of primary income are a) compensation of employees; b) dividends; c) reinvested earnings; d) interest; e) investment income attributable to policyholders in insurance, standardized guarantees, and pension funds; f) rent; and g) taxes and subsidies on products and production.

Secondary Income Account shows current transfers between residents and non-residents. These are receipts or provisions in cash or in kind for nothing in return.

Current transfers are classified into personal transfers and other current transfers. **Personal transfers** consist of all current transfers in cash or in kind made or received by resident households to or from non-resident households. **Other current transfers** include a) current taxes on income, and wealth; b) social contributions; c) social benefits; d) net non-life insurance premiums; e) non-life insurance claims; f) current international cooperation; and g) miscellaneous current transfers.

Capital Account covers capital transfers receivable and payable, and acquisition and disposal of non-produced, non-financial assets between residents and non-residents. Capital transfers are transfers in which the ownership of an asset (other than cash or inventories) changes from one party to another; or which obliges one or both parties to acquire or dispose of an asset (other than cash or inventories); or where a liability is forgiven by the creditor. Migrants' transfers, or the personal effects as well as financial assets and liabilities of persons changing residence, are excluded from capital transfers as the change of a person's residence is not a transaction.

Financial Account records transactions between residents and non-residents that involve financial assets and liabilities. The transactions in the functional categories under the financial account are organized according to whether these relate to assets or liabilities. Asset transactions are recorded under net acquisition of financial assets (NAFA) and liability transactions are recorded under net incurrence of liabilities (NIL). The overall balance on the financial account is called net lending (+)/net borrowing (-). When the residents' net acquisition of financial assets is larger than the net incurrence of liabilities, then the financial account balance would be net lending. The opposite case results in net borrowing. Correspondingly, negative values of NAFA indicate withdrawal/disposal of financial assets, and negative values of NIL indicate repayment of liabilities.

Direct investment is a category of cross-border investment associated with a resident in one economy having control or a significant degree of influence on the management of an enterprise that is a resident in another economy. Operationally, direct investment in an enterprise is indicated by ownership of at least 10 percent of equity shares. Less than 10 percent ownership is considered as portfolio investment. Direct investments can be in the form of equity capital, reinvestment of earnings, and debt instruments.

Portfolio Investment is defined as cross-border transactions and positions involving debt or equity securities, other than those included in direct investment or reserve assets. This investment category covers transactions concerning debt and equity securities in which the investor holds less than 10 percent of the total equity of an enterprise.

Financial Derivatives transactions cover largely the settlement of obligations arising from financial derivative contracts. It is a financial instrument that is linked to another specific financial instrument, indicator or commodity, and through which specific financial risks (such as interest rate risk, foreign exchange risk, equity, and commodity price risks) can, in their own right, be traded in financial markets. Transactions and positions in financial derivatives are treated separately from the values of any underlying items to which they are linked.

Other Investment is a residual category that includes positions and transactions other than those included in direct investments, portfolio investments, financial derivatives, employee stock options, and reserve assets. To the extent that the following classes of financial assets and liabilities are not included under direct investment or reserve assets, other investment includes a) other equity; b) currency and deposits; c) loans (including use of IMF credit and loans from the IMF); d) nonlife insurance technical reserves, life insurance and annuities entitlements, pension entitlements, and provisions for calls under standardized guarantees; e) trade credits and advances; f) other accounts receivable/payable; and g) SDR allocations (SDR holdings are included in reserve assets).

Reserve Assets are those external assets that are readily available to and controlled by monetary authorities for meeting balance of payments financing needs, for intervention in exchange markets to affect the currency exchange rate, and for other related purposes (such as maintaining confidence in the currency and the economy, and serving as a basis for foreign borrowing).

Net Unclassified Items (or errors and omissions) is an offsetting account to bring the above-the-line (i.e., current account balance + capital account balance – financial account balance = overall BOP position) and below-the-line items (i.e., change in net international reserve less non-transaction adjustments such as price revaluation = overall BOP position) of the BOP equation into balance. Discrepancy arises because data sources are inadequate or inconsistent with one another in terms of coverage, time of recording, and valuation. A positive discrepancy denotes an understatement of inflows and/or an overstatement of outflows. Conversely, a negative entry denotes an overstatement of inflows and/or understatement of outflows.

Prior to the implementation of BPM6, the Balance of Payments Manual 5th edition (BPM5) was adopted covering data from 1999 to 2004. BOP data earlier than 1999 were based on the National Presentation.

Availability of data from PSA is only until 2006. This is due to the shift from the use of the 1999 Philippine Standard Commodity Classification (PSCC) that has 7-digit commodity classification codes to the 2004 PSCC that has 10-digit commodity classification codes. The system for the generation of price indices is suited only for the 7-digit commodity classification codes. Efforts of the PSA in recent years are focused on the study of chain-type indices to replace these indices.

¹ Preparations not elsewhere specified or included, containing by weight 70% or more of petroleum oils or of oils obtained from bituminous minerals, these oils being the basic constituents of the preparations; waste oils.

² Including line telephone sets with cordless handsets and telecommunication apparatus for carrier-current line systems or for digital line systems; videophones.

³ Suitable for use solely or principally with word processing machines, calculating machines and pocket-size data recording, automatic data processing machines, and other office machines.

⁴ Other than motor vehicles for the transport of ten or more persons, including the driver.

⁵ Including modified immunological products, whether or not obtained by means of biotechnological processes; vaccines, toxins, cultures of micro-organisms (excluding yeasts) and similar products.

⁶ Put up in measured doses or in forms or packings for retail sale.

⁷ Whether or not fitted with connectors; optical fibre cables, made up of individually sheathed fibres, whether or not assembled with electric conductors or fitted with connectors.

¹ The BSP adopted the compilation framework set forth in the sixth edition of the IMF's Balance of Payments and International Investment Position Manual (BPM6) effective 22 March 2013 with the release of the full-year 2012 and revised 2011 BOP statistics. On 21 March 2014, the BSP released the BPM6-based series. In BPM6, net FDI flows refer to non-residents' equity capital (i.e., placements less withdrawals) + reinvestment of earnings + debt instruments, net (i.e., net intercompany loans).

² The BSP shifted to the 2009 Philippine Standard Industrial Classification (PSIC) from the 1994 PSIC starting with the January 2011 report.

³ Covers non-residents investments in non-banks sourced from the Cross-Border Transactions Survey and in local banks; by industry breakdown statistics are not available.

¹ The BSP adopted the compilation framework set forth in the sixth edition of the IMF's Balance of Payments and International Investment Position Manual (BPM6) effective 22 March 2013 with the release of the full-year 2012 and revised 2011 BOP statistics. On 21 March 2014, the BSP released the BPM6-based series. In BPM6, net FDI flows refer to non-residents' equity capital (i.e., placements less withdrawals) + reinvestment of earnings + debt instruments, net (i.e., net intercompany loans).

² The BSP shifted to the 2009 Philippine Standard Industrial Classification (PSIC) from the 1994 PSIC starting with the January 2011 report.

³ Covers non-residents' investments in non-banks sourced from the Cross-Border Transactions Survey and in local banks; by industry breakdown statistics are not available.

¹ The BSP adopted the compilation framework set forth in the sixth edition of the IMF's Balance of Payments and International Investment Position Manual (BPM6) effective 22 March 2013 with the release of the full-year 2012 and revised 2011 BOP statistics. On 21 March 2014, the BSP released the BPM6-based series. In BPM6, net FDI flows refer to non-residents' equity capital (i.e., placements less withdrawals) + reinvestment of earnings + debt instruments, net (i.e., net intercompany loans).

² The United Kingdom (UK) left the European Union (EU) effective 1 January 2021. For comparability across periods, data prior to January 2021 were revised to reflect the UK's exit from the EU.

³ Refers to the new EU member-countries (as of 2004).

⁴ Refers to other Western, Central and Eastern Europe.

⁵ Refers to Western, Central, South & East Asia, except ANIES and ASEAN.

⁶ Refers to other Central & South America.

⁷ Other countries not specified.

⁸ Covers non-residents' equity capital investments in non-banks sourced from the Cross-Border Transactions Survey and in local banks; country breakdown statistics are not available.

⁹ Refers to joint investment projects among two or more foreign investors.

¹ The BSP adopted the compilation framework set forth in the sixth edition of the IMF's Balance of Payments and International Investment Position Manual (BPM6) effective 22 March 2013 with the release of the full-year 2012 and revised 2011 BOP statistics. On 21 March 2014, the BSP released the BPM6-based series. In BPM6, net FDI flows refer to non-residents' equity capital (i.e., placements less withdrawals) + reinvestment of earnings + debt instruments, net (i.e., net intercompany loans).

² The United Kingdom (UK) left the European Union (EU) effective 1 January 2021. For comparability across periods, data prior to January 2021 were revised to reflect the UK's exit from the EU.

³ Refers to the new EU member-countries (as of 2004).

⁴ Refers to other Western, Central and Eastern Europe.

⁵ Refers to Western, Central, South & East Asia, except ANIEs and ASEAN.

⁶ Refers to other Central & South America.

⁷ Other countries not specified.

⁸ Covers non-residents' equity capital investments in non-banks sourced from the Cross-Border Transactions Survey and in local banks; country breakdown statistics are not available.

⁹ Refers to joint investment projects among two or more foreign investors.

¹ The BSP adopted the compilation framework set forth in the sixth edition of the IMF's Balance of Payments and International Investment Position Manual (BPM6) effective 22 March 2013 with the release of the full-year 2012 and revised 2011 BOP statistics. On 21 March 2014, the BSP released the BPM6-based series. In BPM6, net FDI flows refer to non-residents' equity capital (i.e., placements less withdrawals) + reinvestment of earnings + debt instruments, net (i.e., net intercompany loans).

² The United Kingdom (UK) left the European Union (EU) effective 1 January 2021. For comparability across periods, data prior to January 2021 were revised to reflect the UK's exit from the EU.

³ Refers to the new EU member-countries (as of 2004).

⁴ Refers to other Western, Central and Eastern Europe.

⁵ Refers to Western, Central, South & East Asia, except ANIEs and ASEAN.

⁶ Refers to other Central & South America.

⁷ Other countries not specified.

⁸ Covers non-residents' equity capital investments in non-banks sourced from the Cross-Border Transactions Survey and in local banks; country breakdown statistics are not available.

⁹ Refers to joint investment projects among two or more foreign investors.

^r Revised

EXTERNAL DEBT

External debt covers all short-term and medium- and long-term obligations of the BSP, domestic commercial banks, and public and private sectors that are payable to non-residents.

Short-term external obligations are those liabilities with maturities of one year or less, while medium and long-term debt consists of foreign borrowings with maturities of more than one year.

Total external debt is classified by debtor – BSP, banks, and non-banks. External debt of the banking sector includes debt owed by commercial banks, thrift banks, and offshore banking units to non-residents. Meanwhile, external debt of the non-bank sector is comprised of debt of the Republic of the Philippines' national government, local government units, social security agencies, government non-financial corporations, private corporations, and other private non-bank entities.

Total external debt is also classified by type of creditor. Such creditors are banks and financial institutions, multilateral sources, bilateral creditors, suppliers and others. Foreign borrowings from multilateral sources comprise loans from the International Bank for Reconstruction and Development (IBRD), Asian Development Bank (ADB), International Monetary Fund (IMF), International Finance Corporation (IFC), International Development Association (IDA), and International Fund for Agricultural Development (IFAD). Loans extended by the government of foreign countries are classified under bilateral sources.

Others include bonds and liabilities owed to creditors not mentioned above.

In conformity with the guidelines outlined in the Balance of Payments and International Investment Position Manual, 6th edition (BPM6) of the IMF, accumulated Special Drawing Rights (SDR) allocations from the IMF were reflected in external debt data series beginning 1990. Likewise, data beginning 2006 include Hybrid Tier I as part of qualifying capital of banks in line with Monetary Board Resolution No. 1569. Finally, in March 2015, external debt data beginning 2005 were revised to include the previously footnoted items – gross "Due to Head Office/Branches" of Philippine branches of foreign banks and offshore banking units, private sector loans without BSP approval/registration, and private sector obligations under capital lease arrangements – in the official total outstanding figures.

PRODUCTION, CONSTRUCTION AND PUBLIC UTILITIES

Agricultural Crops and Forestry Production volume data are presented on a calendar year basis following the revised format of the Philippine Statistics Authority (PSA). The unit of measure used is thousand metric tons, except for logs which are in cubic meters.

Permit Valuation of Private Building Construction refers to the value declared in the permit of all buildings to be constructed in Metropolitan Manila including residential, non-residential, as well as additions, alterations, and repairs.

Residential buildings include those utilized for living quarters such as apartments, bungalows, and cottages.

Non-residential buildings are those built for commercial, industrial, and agricultural purposes or those not used for living quarters such as office buildings, factories, sheds, warehouses, and plants (including hospitals, recreational, social, educational, charitable, religious, and other similar institutional structures).

Additions, alterations, and repairs include reconstructed buildings actually constructed in Metropolitan Manila. These comprise the number of permits granted or approved by the City Engineer's Office for such purposes.

Gross Energy Generation is the energy/electricity produced by the remaining National Power Corporation (NPC) plants which were transferred to the Power Sector Assets and Liabilities Management Corporation (PSALM) pending the privatization of assets assumed by PSALM from the NPC.

Electricity Consumption refers to the electric power or energy consumed by the end-users to generate desired output (i.e., light, heat, kinetic, etc.), usually measured in kilowatt hours (kWh). The data presented here are in Gigawatt hours (GWh)* and refer to energy consumed by large manufacturing establishments** within the franchise area of Manila Electric Company (Meralco). The franchise area includes the National Capital Region and several cities and municipalities in the surrounding provinces.

Notes:

* 1 Gigawatt hour (GWh) = 1,000,000 kilowatt hours (kWh)

** Large manufacturing establishments have minimum demand of 40 kWh

Notes:

¹ Formerly labeled as "Annual Gross Energy Generation with Purchased Power Plants of NPC by Region"

² Includes PSALM-owned and operated Independent Power Producer (IPP) plants

^a For Luzon and Visayas, it is based on the Metered Quantity (MQ) per issued settlement data by the Wholesale Electricity Spot Market (WESM)

^b Luzon grid excludes energy withdrawal from the market to supply the PSALM billed Station Use of the Caliraya-Botocan-Kalayaan hydroelectric power plants (CBK).

^c For Mindanao, it is based on the meter reading report issued by the National Grid Corporation of the Philippines (NGCP).

^d For Mindanao, it is based on power bills and allocated using the MQ.

Notes:

¹ Includes PSALM-owned and operated Independent Power Producer (IPP) plants. Total energy generated excludes those of gas turbine and natural gas turbine plants since 2011.

² Figures reported include Diesel and Bunker Fired Plant.

^a For Luzon and Visayas, it is based on the Metered Quantity (MQ) per issued settlement data by the Wholesale Electricity Spot Market (WESM).

^b Luzon grid excludes energy withdrawal from the market to supply the PSALM billed Station Use of the Caliraya-Botocan-Kalayaan hydroelectric power plants (CBK).

^c For Mindanao, it is based on the meter reading report issued by the National Grid Corporation of the Philippines (NGCP).

^d For Mindanao, it is based on power bills and allocated using the MQ.

Note:

¹ The data represents metered electricity consumption for establishments that are classified under MERALCO's "General Power" rate schedule or those which have a minimum demand of 40 kilowatts (kW). Hence, the data does not include the energy consumption of small establishments (e.g. sari-sari stores or neighborhood shops, whose consumption approximates those of residential customers) and certain establishments that were formerly directly connected to the transmission system but have since transferred back to MERALCO.

Totals may not add up due to rounding.

PRICES

The Consumer Price Index (CPI) is a general measure of average monthly and annual changes in the retail prices of commodities commonly purchased by households relative to a base year and weighted by the consumption pattern of consumers.

The index adopts 2018 as the base year, replacing the 2012-based CPI series. The weights for the 2018-based CPI were derived from the expenditure data of the 2018 Family Income and Expenditure Survey (FIES) conducted by the Philippine Statistics Authority (PSA). The 2018-based CPI series uses a straightforward computation of monthly average prices of commodities, chain method for elementary item indices, geometric mean method at the lowest level (subclass level) of aggregation of price indices, and weighted arithmetic mean at the higher levels of aggregation of price indices in the CPI series.

The CPI series are computed for the Philippines by region which are then grouped under the National Capital Region (NCR) and Areas Outside the NCR. Data collection and computations are undertaken by the PSA.

2018 CPI WEIGHTS FOR ALL INCOME HOUSEHOLDS

	Philippines	National Capital Region	Areas Outside the NCR
All Items	100.0	20.3	79.7
Food and Non-Alcoholic Beverages	37.7	6.0	31.8
Alcoholic Beverages and Tobacco	2.2	0.4	1.8
Clothing and Footwear	3.1	0.5	2.6
Housing, Water, Electricity, Gas, and Other Fuels	21.4	5.6	15.8
Furnishing, Household Equipment and Routine Household Maintenance	3.2	0.7	2.6
Health	2.9	0.5	2.4
Transport	9.0	1.6	7.4
Information and Communication	3.4	0.9	2.5
Recreation, Sport and Culture	1.0	0.2	0.8
Education Services	2.0	0.5	1.5
Restaurants and Accommodation Services	9.6	2.6	7.0
Financial Services	0.0	0.0	0.0

Inflation Rate is the percentage annual rate of change or the year-on-year change in the CPI. It indicates how fast or slow the CPI increases or decreases.

Purchasing Power of the Peso (PPP) indicates what fraction of the peso in the base period is the value of the peso in the current period or the period under review. It is computed as the reciprocal of the CPI (all items) for the period under review.

General Retail Price Index (GRPI) measures monthly changes in the prices at which retailers dispose of their goods to consumers and end-users relative to a base year.

The GRPI is an indicator used to monitor the economic situation of the retail trade sector. It is also used as a deflator of the national accounts, especially on the retail trade sector, and serves as a basis for forecasting business in the retail trade.

The latest GRPI series adopts 2012 as the base year, replacing the 2000-based series. The short-term relative update method in computing the price relative to the item and geometric mean for the aggregation of the price relatives at the subgroup level is applied in the 2012 GRPI series. For the computation of the monthly average price of the item and aggregation at the higher levels of price indexes, the 2012 GRPI series still adopts the straightforward computation of the monthly average price of the item and weighted arithmetic mean at the higher levels of aggregation of price indexes. The weights utilized are derived from the 2006 Census of Philippine Business and Industry (CPBI) and the 2006 Input-Output table.

Price data used in the GRPI, to a large extent, come from the same sources of data used for the construction of the NCR CPI. These are collected from various retail outlets across NCR. The RPI market basket contains the same food and non-food commodities included in the CPI with an expanded list of construction materials but excludes light, water, rentals, wages, and other service items.

General Wholesale Price Index (GWPI) measures monthly changes in the general price level of commodities that flow into the wholesale trade intermediaries.

The GWPI series adopts 2012 as the base year, replacing the 1998-based series. The short-term relative update method in computing the price relative to the item and geometric mean for the aggregation of the price relatives at the subgroup level is applied in the 2012 GRPI series. For the computation of the monthly average price of the item and aggregation at the higher levels of price indexes, the 2012 GWPI series still adopts the straightforward computation of the monthly average price of the item and weighted arithmetic mean at the higher levels of aggregation of price indexes. The weights utilized are derived from the 2006 CPBI and the 2006 Input-Output table.

The Producers' Price Index (PPI), for manufacturing, is a composite figure of producers' prices of representative commodities included in the market basket. The PPI serves various purposes, the most important of which are the following:

- a) measures monthly or yearly changes in the producers' prices of key commodities in the manufacturing sector;
- b) serves as a deflator to the Value of Production Index (VaPI) in the estimation of the Volume of Production Index (VoPI); and
- c) serves as a deflator in the estimation of manufacturing production in real terms (at constant prices) in the system of national accounts.

The PPI series adopts 2018 as the base year, replacing the 2000-based series.

The major changes in the rebasing are (1) changes in the industry structure or classification and (2) changes in the relevance of the industries as measured by the weights. The industry classification for the 2018-based series follows the 2009 Philippine Standard Industrial Classification (PSIC).

For the rebased series, the weights at the base year were computed based on the results of the 2018 CPBI. The results of the Annual Survey of Philippine Business and Industry (ASPBI) will be used to update the weights annually until the next rebasing.

The Philippine Stock Exchange Index (PSEi) is the main index of the Philippine Stock Exchange (PSE). It is composed of a fixed basket of 30 companies, whose selection is based on a specific criterion. The PSEi provides a snapshot of the market's overall condition by gauging changes in the stock prices of select listed companies. There are six other sub-indices that provide a useful measurement of sectoral performance, namely: Financial Index, Industrial Index, Holding Firms Index, Property Index, Services Index, and Mining & Oil Index.

Oct	109.5	4.0	0.91
Nov	110.2	3.7	0.91
Dec	110.5	3.1	0.90

Note: Beginning 4 February 2022, the base year of the Consumer Price Index (CPI) has been updated from 2012 to 2018. The rebasing of the CPI is done periodically by the PSA: (1) to ensure that the CPI market basket continues to capture goods and services commonly purchased by households over time; (2) to update expenditure patterns of households; and (3) to synchronize its base year with 2018 base year of the Gross Domestic Product and other indices produced by the PSA.

Note: Beginning 4 February 2022, the base year of the Consumer Price Index (CPI) has been updated from 2012 to 2018. The rebasing of the CPI is done periodically by the PSA; (1) to ensure that the CPI market basket continues to capture goods and services commonly purchased by households over time;

(2) to update expenditure patterns of households; and (3) to synchronize its base year with 2018 base year of the Gross Domestic Product and other indices produced by the PSA.

¹ Starting January 2006, new classification by sector has been implemented. Effective 03 April 2006, PSE has shifted to a new methodology in computing the index from full market capitalization. Simultaneous with the migration to a free float index is the renaming of the PHISIX to PSEI.

^a Starting 2 December 2013, trading of an Exchange Traded Fund has commenced. ETF is an open-end investment company that trades its shares in the stock exchange. An ETF company issues its shares in blocks called "Creation Units" in exchange for a basket of securities comprising the index it wishes to track. Creation is normally done by institutional investors, who break down the block into smaller portions and sell to retail investors in the Exchange.
