1 The Labor Force Survey (LFS) was originally conducted on a quarterly basis (i.e., January, April, July and October), with a sample size of approximately 44,000 households. From April 2016 to October 2019, the LFS adopted the population projections based on the 2010 Census of Population and Housing (CPH) and 2013 Master Sample (MS) Design. Beginning January 2020, the LFS results, including the final 2019 LFS, have been estimated using the 2015 Population Census (POPCEN) and 2013 MS. Starting February 2021, the monthly LFS, with a sample size of approximately 11,000 households, has been conducted in between the regular quarterly LFS.

2 Starting 2014, data were based on the off-line Statistical Performance Reporting System (SPRS). Beginning 2016, data on job openings reported reflect the monthly average instead of cumulative data. Likewise, the Philippine data was estimated as the total of the regional monthly averages.

3 Cases of strikes may be disposed by other means outside the scope of the National Conciliation and Mediation Board.

4 Source of data for both nominal and real wage rates is the National Wages and Productivity Commission. It includes basic minimum wage and cost of living allowance (COLA). Annual figures refer to December data. Figures for regions outside NCR represent the highest nominal regional rates in a given category and their corresponding values in real terms.

5 Starting 10 November 1990, adjustments in the minimum legislated wage rates were being determined by the Regional Tripartite Wages Productivity Board. Real terms were computed using 2018 as base year.
