

Consumer Expectations Survey

Third Quarter 2010

9/16/2010 4:41 PM

Consumer Confidence Improves Appreciably in Q3 2010; Sentiment Remains Strong over the Next 12 Months

Nationwide Consumer Outlook

Overall Consumer Outlook Index
Philippines

Consumer sentiment improves considerably for the quarter and the year ahead.

With continuing sound macroeconomic fundamentals and brighter economic prospects expected to bring about improved household finances, consumer sentiment improved markedly in Q3 2010. While still in the negative territory, the confidence index (CI) increased from -28.7 percent in Q2 2010 to -14.0 percent, the highest reading since the nationwide survey started in 2007. Expectations of good governance was another major reason cited by respondents for their favorable outlook. With consumer spending about 70 percent of GDP, the record high consumer confidence boosted expectations of a more robust economy moving forward.

For the next 3 months, consumer confidence reversed to positive territory after 11 consecutive quarters of recording a negative index. Consumers expected that more favorable macroeconomic conditions would generate better employment and business opportunities, resulting in improved family finances and higher family income. They are equally confident that this upbeat sentiment will be carried over the next 12 months. Improving consumer confidence was likewise observed in India, Indonesia, Singapore, China and Vietnam, partly as concerns over the sovereign debt crisis in some European countries have dissipated.

Consumers expect stronger macroeconomic growth, higher family income and better family finances in the current quarter and the year ahead.

Consumer perception across three dimensions—economic condition of the country, family financial situation and family income—while remaining negative, soared to their highest levels in Q3 2010 since the start of the survey in 2007.

For the next quarter and the year ahead, the optimists outnumbered the pessimists with consumer confidence in all

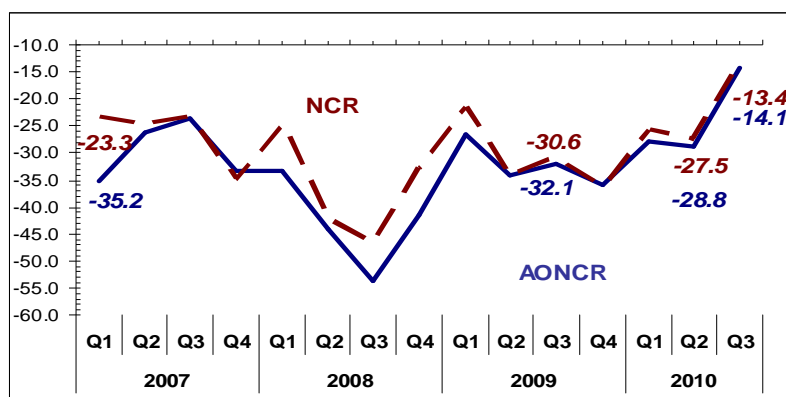

three dimensions registering favorable readings. Consumers were most upbeat in their outlook about the country's economic condition, relative to their outlook for their family income and financial situation.

The high-income group is the most optimistic.

Consumer sentiment across all income groups climbed to their highest levels.¹ The high-income group registered the highest consumer confidence on their family financial situation and family income. The middle-income group is the most optimistic about the economic condition of the country. Consumer confidence of the low-income group remained the weakest among the three groups, even as a big improvement in its outlook was noted across time. For the near term and the year ahead, the same broad trends in consumer confidence by income groups were observed.

NCR and AONCR Consumer Outlook

Current Quarter Consumer Outlook Index for NCR and AONCR

Consumer confidence in both the NCR and AONCR hits record high.

Consumer confidence in both the National Capital Region (NCR) and Areas Outside NCR (AONCR) hit record highs in Q3 2010. This favorable sentiment was sustained for the next quarter and over the next 12 months.

For the current quarter, AONCR respondents have a better outlook than NCR respondents on the country's economic condition, while the reverse holds in their perception about their family financial situation.

For the next quarter outlook and the year ahead, NCR respondents were broadly more optimistic than those residing in AONCR in all the dimensions—economic conditions, family

¹ Low-income refers to households with monthly family income of less than ₱10,000; middle-income group, ₱10,000 – ₱29,999; and high-income group, ₱30,000 and over.

financial situation and family income. A greater number of respondents in NCR, relative to that in AONCR, cited expectations of stronger economic growth due to the reform momentum (especially governance) and due to resilient domestic demand.

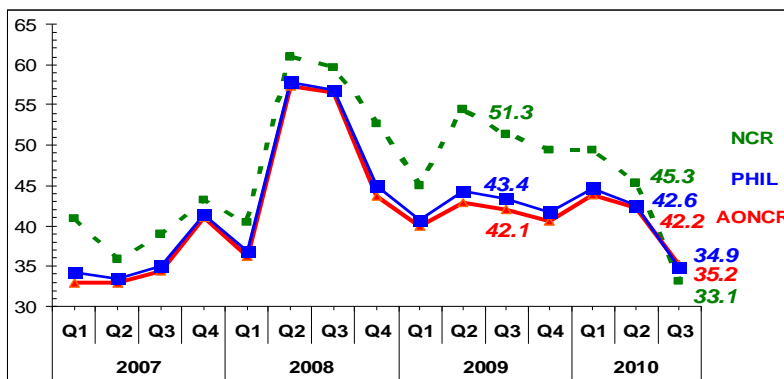

Expenditures on Basic Goods and Services

Expenditures on basic goods and services are expected to be lower for Q4 2010 due to low inflation.

While consumers expected to spend more on basic goods and services in Q4 2010, the number of respondents that anticipated their expenditures to rise declined compared to the previous quarter’s survey results. This development could be driven by the respondents’ expectations of subdued inflation over the course of the next 12 months.

By geographic location, the expenditure outlook of AONCR and NCR consumers followed the pattern at the national level. However, NCR consumers anticipated additional expenditures on clothing and footwear and on hotel and restaurant services in the next quarter, which is consistent with the seasonal rise in demand for these goods during the holiday season.

Confidence Index: Expenditures Next Quarter

Expenditures on Big-ticket items

Buying conditions improve.

Consistent with the improvement in their overall outlook, the percentage of households that considered the current quarter as a favorable time to buy big-ticket items increased relative to a quarter ago. The buoyant outlook was most pronounced on buying conditions for real estate.

By area, consumers’ views on buying conditions in Q3 2010 were more favorable in NCR than in AONCR. Consumers in NCR were more optimistic about buying conditions for all of the three big-ticket items.

Respondents cited the prevailing low interest rate levels and

moderate inflation as the major factors behind their expectations of improved buying conditions.

Buying Intentions

Buying intentions for the next 12 months continue to rise.

The positive outlook of consumers on buying conditions for Q3 2010 spilled over to their buying intentions in the next 12 months. This view is consistent with consumers' expectations that inflation will be contained at lower rates over the course of the next 12 months. The highest increase in buying intention was for housing, followed by consumer durables. This positive trend on buying intentions was observed for both NCR and AONCR respondents. However, consumers in NCR recorded a decline in buying intentions for motor vehicles as they intended to prioritize spending on food and other basic needs (which includes housing).

Selected Economic Indicators

Consumers expect employment, prices, and interest rate to improve over the next 12 months.

Consumers have a more positive view on the general direction of selected economic indicators. The most optimistic view of consumers was on the employment outlook. The unemployment rate index dropped to 7.9 percent from 52.4 percent in Q2 2010, indicating that consumers believe that the unemployment rate will decline considerably in the next 12 months. Similarly, respondents expected inflation to remain low in the next 12 months. Their view could be driven by the prevailing favorable inflation environment. Likewise, more respondents expected interest rates to decline in the next 12 months. Consumers anticipated that the peso would continue to appreciate against the US dollar in the year ahead in line with expectations of continued strong inflows of foreign exchange, particularly from overseas Filipinos' remittances, business process outsourcing services receipts and merchandise export revenues.

Expenditures of Overseas Filipino Workers (OFWs)

OFW households utilize their remittances primarily for food, education, medical expenses, debt payments and savings in Q3 2010.

As expected, most OFW households used remittances in Q3 2010 for food (96.0 percent of the households). Nearly three-fourths of the households surveyed (71.7 percent) used their remittances for education expenses, 61.6 percent for medical expenses and 50.3 percent for debt payments. The percentage of households that allotted portions of remittances to savings continued to increase to 43.0 percent (from a low of 7.2 percent in Q1 2007). The percentage of OFW households that utilized remittances to purchase consumer durables and motor vehicles went up. Similarly, those that apportioned part of their remittances to amortization or full payment for houses purchased increased to 15.5 percent (from 11.9 percent and in the previous

quarter). On the other hand, the percentage of OFW households that allocated portion of their remittances to investment remained steady at 7.0 percent in Q3 2010.

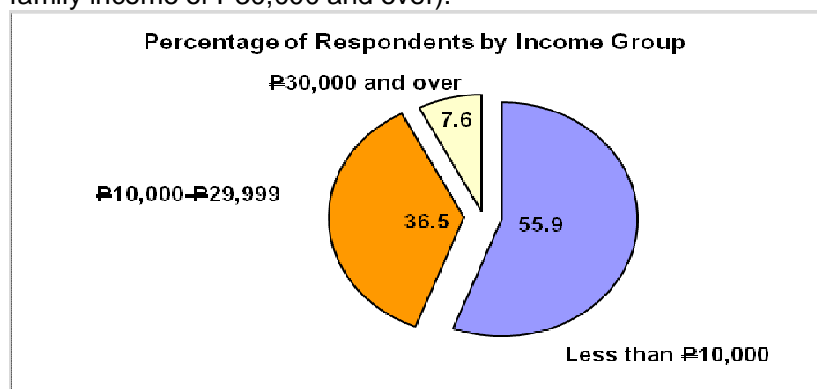

The utilization pattern of remittances was broadly similar for both NCR and AONCR households.

About the Survey

Survey respondents total 5,774 households nationwide.

The Bangko Sentral ng Pilipinas started the Consumer Expectations Survey (CES) in the National Capital Region in Q3 2004. The CES was expanded into a nationwide survey beginning Q1 2007. The CES samples were drawn from the National Statistics Office's (NSO) Master Sample List of Households, which is considered a representative sample of households nationwide. The said master sample was generated using a stratified multi-stage probability sampling scheme. For Q3 2010, the CES was conducted during the period 1-15 July 2010 with a total sample size of 5,774 households, of which 3,101 (53.7 percent) were from the NCR and 2,673 (46.3 percent) from the AONCR. The nationwide total survey response rate for Q3 2010 was 96.6 percent (from 96.0 percent in the last quarter's survey).

The nationwide total survey response rate for Q3 2010 was 96.6 percent (from 96.0 percent in the last quarter's survey). By area, the response rate was 95.9 percent in NCR and 97.4 percent in AONCR. Majority of the respondents (55.9 percent) were from the low-income group (having less than ₱10,000 monthly family income), 36.5 percent were from the middle-income group (₱10,000 - ₱29,999 monthly family income), and 7.6 percent belonged to the high-income group (monthly family income of ₱30,000 and over).
