1. **What is the Chiang Mai Initiative Multilateralization?**

The Chiang Mai Initiative Multilateralization or the CMIM is a multilateral arrangement among the finance ministries and central banks of the ASEAN+3 member countries and the Hong Kong Monetary Authority that is governed by a single contractual agreement for the purpose of providing financial support in United States Dollars through currency swap transactions among them. The initial size of the CMIM Arrangement was US$120 billion comprised of contributions from the CMIM Parties. At the 15th ASEAN+3 Finance Ministers and Central Bank Governors Meeting (AFMGM+3) held in Manila on 3 May 2012, the CMIM features were enhanced including the doubling of its size to US$240 billion and the introduction of a crisis prevention function.

The CMIM evolved from the Chiang Mai Initiative (CMI), the first regional currency swap arrangement launched by the ASEAN+3 countries in May 2000. CMI is composed of: (a) the ASEAN Swap Arrangement (ASA) among ASEAN countries; and (b) a network of bilateral swap arrangements (BSAs) among the ASEAN+3 countries.

2. **What are the objectives of the CMIM?**

The CMIM is designed to enhance the effectiveness of the CMI by establishing an advanced framework of the CMI as regional liquidity support arrangement. In particular, the CMIM aims to: (a) address potential and actual BOP and short-term liquidity difficulties in the region; and (b) supplement existing international arrangements.

3. **When did the CMIM take effect?**

The original CMIM was signed on 24 December 2009 and entered into force on 24 March 2010. Meanwhile, the amended CMIM Agreement that will implement the enhanced CMIM features entered into force on 17 July 2014.

4. **What is the effect of the CMIM on the other swap arrangements under the CMI?**

The CMIM replaces the existing network of BSAs among ASEAN+3 member countries. ASEAN+3 member countries, however, are not precluded to enter into separate bilateral currency swap arrangements if the parties consider it necessary to supplement the CMIM. Meanwhile, the ASA has remained in effect even after the operationalization of the CMIM.

---

1. Include the ASEAN countries (Brunei Darussalam, Cambodia, Indonesia, Lao PDR, Malaysia, Myanmar, Philippines, Singapore, Thailand, and Vietnam) and the Plus Three countries (China, Japan, and Korea)

2. The ASA, which involves a total amount of US$2 billion, allows member banks to swap their local currencies with major international currencies, i.e., US Dollar, Japanese Yen and Euro, for an amount up to twice their committed amount under the facility. The ASA was first established on 5 August 1977 by the five founding members of the ASEAN, namely Indonesia, Malaysia, the Philippines, Thailand and Singapore. The Philippines committed to contribute up to US$300 million and could request swap of up to US$600 million worth of Philippine peso.

3. A BSA provides financial assistance in the form of swaps to any ASEAN+3 country participating in the CMI in need of balance of payments (BOP) support or short-term liquidity support. The BSA is intended to complement existing international financial facilities, including those provided by the International Monetary Fund (IMF) and the expanded ASA.
5. **What distinguishes CMIM from the CMI?**

CMIM is a multilateral currency swap arrangement with the total size of US$240 billion, governed by a single contractual agreement, while the CMI is a network of bilateral swap arrangements among the “Plus Three” and ASEAN-5 countries’ authorities. In addition, an independent regional surveillance unit called the ASEAN+3 Macroeconomic Research Office (AMRO) was established to monitor and analyze regional economies and support the CMIM decision-making process.

6. **What are the types of facilities available to CMIM members? How long are the maturity and the supporting periods?**

The CMIM offers a crisis prevention facility called CMIM Precautionary Line (CMIM-PL) and a crisis resolution facility called CMIM Stability Facility (CMIM-SF). Under both facilities, 30 percent of the maximum drawable amount by any member is categorized as quick disbursing while the remaining portion is linked to an IMF program.

The maturity period for the CMIM-PL is six (6) months and one (1) year for the IMF de-linked and IMF linked portions, respectively, for a maximum supporting period of two (2) years. On the other hand, the maturity period for the CMIM-SF is six (6) months and one (1) year for the IMF de-linked and IMF linked portions, for a maximum supporting period of two (2) years and three (3) years, respectively.

7. **What is the level of CMIM contribution of the ASEAN and the Plus Three countries as regional groupings?**

With the total size of US$240 billion, the contribution proportion between ASEAN and the Plus Three countries (with Hong Kong) is at 20:80, i.e., the ten (10) ASEAN member states will collectively contribute US$48 billion, while China, Japan, Korea and Hong Kong will collectively contribute US$192 billion.

8. **How much will the Philippines contribute to the CMIM? How much can it borrow from the CMIM?**

The Philippines, through the BSP has a contribution commitment of US$9.104 billion to the CMIM. The Philippines may be able to borrow up to 2.5 times its contribution commitment to the CMIM, i.e., US$22.76 billion.

9. **Does the contribution to the CMIM involve outright transfer of the committed amount?**

No. The contribution commitment to the CMIM does not involve outright transfer of the committed amount but is instead in the form of a commitment letter.

whereby the central banks/monetary authority of ASEAN+3 countries as well as Hong Kong Monetary Authority issues a promissory note in the amount equivalent to their committed contribution. Under this arrangement, the management and custody of committed reserves remain with the central banks until a swap request has been approved. The amount to be provided by each CMIM Party will only be proportionate to its respective contribution to the CMIM.

10. **What is the importance of the CMIM for: (a) the Philippines; and (b) regional stability?**

The CMIM is important to the Philippines in two ways: (a) as a contributor to the multilateral swap facility, the Philippines will be able to provide liquidity assistance to another CMIM member who is experiencing liquidity difficulty; and (b) as a recipient, the Philippines may be able to borrow up to US$22.76 billion from the facility to help avert an impending or an actual balance of payments problem. From the regional standpoint, the CMIM is a testament to the strong cooperative spirit among ASEAN member states, China, Japan and Korea. Aside from the US dollar swaps that can be tapped by its members should the need arise, CMIM also resulted in the establishment of the ASEAN+3 Macroeconomic Research Office or AMRO which serves as an independent regional surveillance unit that will ensure timely monitoring and analysis of the ASEAN+3 economies. This surveillance mechanism will in turn aid in the early detection of risks, swift implementation of remedial actions, and effective decision-making of the CMIM, which is expected to help promote stability in the region.

11. **What is the activation process under the CMIM?**

Activation of swap transactions under the CMIM may be initiated by any CMIM Party by submitting to the CMIM Coordinating Countries a request for the purchase of US dollars under the CMIM arrangement with its local currency. The Coordinating Countries, in turn, will deliver the swap request notice and other relevant information to the Executive Level Decision Making Body (ELDMB) and convene a meeting to decide on the swap request. Upon approval, CMIM Parties will proceed with the activation of bilateral swap transactions between each of the swap providing parties and the relevant swap requesting party, in accordance with the terms and pro rata allocation provided in the CMIM Agreement. In any event, determinations required in response to a swap request should be completed within two weeks following the delivery of the swap request notice to the members of the ELDMB.

12. **What is AMRO and what will be its role under the CMIM?**

AMRO is the independent regional surveillance unit of the CMIM which was officially incorporated as a company limited by guarantee in Singapore on 20 April 2011. The establishment of AMRO will ensure timely monitoring and

6 ELDMB is composed of the Deputy-level representatives of the ASEAN+3 Finance Ministries and Central Banks and the Hong Kong Monetary Authority.
analysis of the ASEAN+3 economies, which will in turn aid in the early detection of risks, swift implementation of remedial actions, and effective decision-making of the CMIM. This mandate of AMRO was further strengthened when it was converted into an international organization on 9 February 2016 by virtue of the ratification of the AMRO Agreement.

Governance of AMRO is being exercised by the Executive Committee (EC) composed of ASEAN+3 finance and central bank deputies. AMRO operations are headed by the AMRO Director, Chief Economist and two (2) Deputy Directors with strategic/technical guidance from the Advisory Panel (AP). The incumbent Director is Dr. Junhong Chang of China. AMRO's office is located at the Monetary Authority of Singapore complex in Singapore.

During peace time, AMRO will conduct annual consultations with individual member economies and on this basis, prepare consolidated reports focusing on the macroeconomic assessment of the ASEAN+3 region and individual member countries. On the other hand, AMRO will, during crisis time, prepare recommendations on any swap request based on its macroeconomic analysis of the swap requesting member and monitor the use and impact of funds once any swap request is approved.
