BUSINESS EXPECTATIONS SURVEY REPORT

4th Quarter 2023

Q4 2023 BUSINESS EXPECTATIONS SURVEY

OVERALL BUSINESS OUTLOOK INDEX

Respondents attributed their continued optimism for Q4 2023 to:

Increase in demand for goods and services during the Christmas

Sustained economic recovery to pre-pandemic levels

Expansions in the utilities, trade, financial, and hotels restaurant sub-sectors

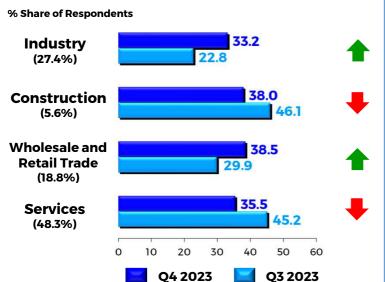

New products and services

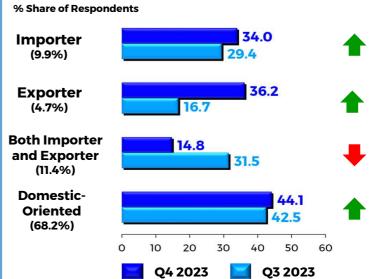

Brisker consumer spending

BUSINESS OUTLOOK INDEX

BY SECTOR BY TYPE OF TRADING GROUP

Business Activity 30.1 **Total Orders** 26.9 **Booked Financial Condition**

SENTIMENT INDICATORS

Starting with the Q3 2023 BES report, respondent firms that reported 0% capacity utilization are included in the computation of the average capacity utilization (ACU) of the industry and construction sectors for the reference quarter. This is in line with the PSA Board Resolution No. 13, Series of 2020, wherein the computation of the ACU rate in the Monthly Integrated Survey of Selected Industries (MISSI) takes into account the impact of establishments that are temporarily closed (i.e., with zero capacity utilization rate).

ECONOMIC INDICATORS

| Indicator | Period | Current | Next | Next 12 |
|--------------------|--------------------|---------|--------------|---------|
| Diffusion Index | | Quarter | Quarter | Months |
| Inflation Rate | Q4 2023 | 49.6 | 24.7 | 14.9 |
| | Q3 2023 | 8.8 | 13.2 | -0.6 |
| Peso Borrowing | Q4 2023 | 25.2 | 17.5 | 14.1 |
| Rate | Q3 2023 | 18.1 | 16.8 | 16.3 |
| Exchange Rate | Q4 2023 | -7.4 | -5.4 | 4.7 |
| (₱/US\$) | Q3 2023 | 10.4 | 14.7 | 12.5 |
| Employment Rate | Q4 2023 Q3 2023 | N.A. | 19.3 20.1 | 29.3 |

Based on the Diffusion Index (DI) of the reference period:

- +/- Inflation Rate more respondents expect that inflation may increase/decrease
- +/- Peso Borrowing Rate more respondents expect that the peso borrowing rate may increase/decrease
- +/- Exchange Rate more respondents expect that the peso may appreciate/depreciate against the US dollar
- +/- Employment Rate more respondents expect that the number of their employees may increase/decrease

SURVEY RESPONSE RATES:

Philippines: 65.1%

NCR: 61.9%

AONCR: 66.9%

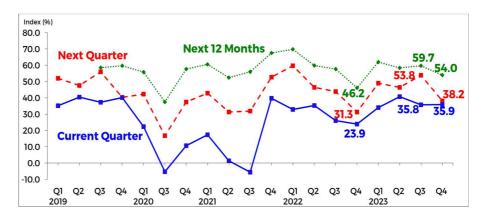

Legend: ↑ Up → Down — Steady (for diffusion indices with less than 1 percent absolute difference) as compared with the previous survey round

Fourth Quarter 2023

Business Confidence Stays Upbeat in Q4 2023 Less Buoyant for Q1 2024 and the Next 12 Months

Overall Business Outlook on the Macroeconomy

Overall Business Confidence Index (CI) Q1 2019 - Q4 2023

The outlook of The business sentiment in the Philippines remained upbeat in businesses stays Q4 2023 as the overall confidence index (CI) stood at 35.9 percent, up upbeat in slightly from 35.8 percent in Q3 2023. This is reflective of the increase in the percentage of optimists, which was barely offset by the increase in the percentage of pessimists (see Table 1).2

Generally, the overall business CI for the country is computed by summing up the products of 1) the weights of the two (2) geographic areas, i.e., National Capital Region (NCR) and Areas Outside the National Capital Region (AONCR), and 2) their respective CIs, i.e., the NCR CI and AONCR CI. The weights of the geographic areas are computed by dividing the number of firms in the NCR and AONCR by the total population of firms used in the survey, i.e., BES Total Firms. The National Capital Region (NCR) is composed of 16 highly urbanized cities and 1 municipality, while Areas Outside the National Capital Region (AONCR) are composed of 16 regions outside the NCR.

The geographic area CI, e.g., NCR CI, is computed by summing up the products of 1) the weights of the four (4) economic sectors in a geographic area and 2) their respective CIs. The weights of the economic sectors in a geographic area are computed by dividing the number of firms in specific geographic area and economic sector, e.g., NCR Industry Sector firms, by the total population of firms in a geographic area, e.g., NCR Total Firms. The four (4) economic sectors are as follows:

- Industry Sector is composed of Manufacturing, Mining and Quarrying, Electricity, Gas and Water, and Agriculture, Fishery and Forestry Sub-sectors
- 2. Construction Sector is made up of firms engaged in general construction and specialized construction activities for buildings and civil engineering works
- Services Sector is composed of Financial Intermediation, Real Estate, Renting and Business Activities, Hotels and Restaurants, Transport, Storage and Communications and Community, Social and Personal Services Sub-sectors
- Wholesale and Retail Trade Sector is made up of businesses engaged in wholesale and retail sale (i.e., sale without transformation) of any type of goods and the rendering services incidental to the sale of these goods.

Similarly, the economic sector CI is generated by summing up the products of 1) the economic sub-sector weights in a geographic area and 2) their respective sub-sector CIs. The weights of the economic sub-sectors in a geographic area are computed by dividing the number of firms in a specific geographic area, economic sector and economic sub-sector, e.g., NCR Industry Sector Manufacturing firms, by the total population of firms in a geographic area and economic sector, e.g., NCR Industry Sector Total firms.

Classification: GENERAL

¹ The Business Expectations Survey (BES) is a quarterly survey of firms drawn at random from the list of Top 7,000 Corporations ranked based on total assets in 2016-2017 from the Bureau van Dijk database. Results of the BES provide advance indication of the direction of the change in overall business activity in the economy and in the various measures of companies' operations as well as in selected economic indicators. The Q2 2023 BES was conducted during the period 5 October to 14 November 2023.

² The business confidence index (CI) is computed as the percentage of firms that answered in the affirmative less the percentage of firms that answered in the negative with regard to their views on the overall business outlook.

The current quarter's CI stayed positive due to the optimistic firms' expectations of: (a) an increase in demand for goods and services during the Christmas season, (b) sustained economic recovery to pre-pandemic levels, (c) business expansions in the utilities, trade, financial, and hotels and restaurant sub-sectors, (d) development and launch of new products and services, and (e) brisker consumer spending on the back of higher remittances and inbound holiday travelers, including Overseas Filipino Workers (OFWs).3 However, the current quarter's CI was tempered by concerns of pessimistic firms over: (a) the negative economic impact of the ongoing conflicts in Gaza and Ukraine, (b) elevated inflation, and (c) higher interest rates.4,

The business outlook of the country's top trading partners was mixed. On one hand, an improvement in the CI was noted in some countries, with businesses in Hong Kong and India posting a more optimistic outlook, while those in the euro area, South Korea, and Taiwan showing less pessimistic expectations. On the other hand, firms in the United States and Vietnam recorded a more pessimistic outlook while those in Australia, China, and Thailand reversed to a pessimistic sentiment.5

for Q1 2024...

...but less buoyant Meanwhile, the country's business confidence for Q1 2024 was less optimistic as the overall CI fell to 38.2 percent from 53.8 percent a quarter ago (see Table 1). The firms' less upbeat outlook for the next quarter stemmed from their expectations of: (a) a decline in consumer spending typically following the holiday season, (b) adverse effects of the Israel-Hamas conflict on supply chains, (c) high inflation, and (d) rising interest rates.6

...and the next For the next 12 months, business confidence was similarly less 12 months. buoyant as the overall CI decreased to 54 percent from 59.7 percent in the previous quarter (see Table 1).7 The firms' less favorable outlook for the next 12 months was attributed primarily to their concerns about the: (a) negative effects of the Israel-Hamas and Ukraine-Russia conflicts on the economy, including higher oil prices, (b) lower demand for goods and services, (c) higher prices of basic goods, (d) increasing interest rates, and (e) higher costs of production and raw materials.8

³ New products and services include software, agricultural machineries and its maintenance services, low-cost housing, telecommunications equipment, loan products, business service activities.

⁴ The Philippine economy may be affected by the Israel-Hamas conflict via lower remittances if it spreads across the Middle East. (https://bit.ly/47H5cyS)

 $^{^5}$ Refers to top trading partners of the Philippines, each accounting for at least 1 percent share of the country's total merchandise trade for the past five years (2018-2022). Hong Kong has quarterly business confidence index. Meanwhile, Australia, China, euro area, South Korea, Taiwan, Thailand, the United States of America and Vietnam record their business confidence index on a monthly basis. For cross-country assessment of the business sentiment, the latest CI level is compared with the CI level of the previous reference period as posted in https://tradingeconomics.com/.

⁶ The impact of the Israel-Hamas conflict may be felt on a global scale if more countries in the Middle East are drawn in. (https://bit.lv/47lgcTO)

⁷ Beginning with the Q3 2019 BES, the questionnaire has been enhanced to include questions on the 12-month outlook of businesses on the macroeconomy, business activity, employment, and expectations on selected economic indicators.

⁸ Lower demand is expected for goods such as packaging materials, auto parts, poultry products, and other consumer goods. Meanwhile, the demand for construction, college education and real estate services is also expected to decline.

Overall Business Outlook Index by Area Q1 2021 - Q4 2023

for all periods.

The outlook of Consistent with the national trend, the overall business outlook in NCR and AONCR both the National Capital Region (NCR) and Areas Outside the NCR firms on the (AONCR) was less buoyant for the next quarter and the next economy 12 months. For the current quarter, the confidence of the firms generally mirrors located in the AONCR was more upbeat, while that of businesses in the national trend NCR was less optimistic (see Table 1).9

for Q4 2023,...

Business For the current quarter, the business outlook across all regions confidence outside the NCR was generally upbeat, except in Regions I, VII and in most regions XII, where sentiment was less optimistic. In particular, the CIs of outside the NCR is Regions II, III, IV, V, VI, VIII, IX, X, and XI were higher compared to the more optimistic previous quarter's survey results. Firms in the said regions cited the following reasons behind their more buoyant outlook for the current quarter: (a) stronger consumer demand during the holidays, (b) sustained post-pandemic economic recovery, (c) business expansions in the trade and financial services industries, (d) launch of new products, and (e) easing inflation. The CIs of firms in Regions I, VII and XII, by contrast, were lower, owing to firms' anticipation of: (a) lower school enrollment turnout, (b) slowdown in business activities due to fewer working days towards the end of the year, and (c) adverse effects of the ongoing international conflicts.

...generally less upbeat for Q1 2024...

For the next quarter, the CIs across all regions outside the NCR were less positive, except in Region IV, where CI was more positive. Looking closely at the regional level, firms in Regions I, II, III, V, VI, VII, VIII, IX, X, XI, and XII were less optimistic for the next quarter due to their concerns on: (a) the negative impact of the Israel-Hamas conflict on the economy, (b) higher inflation, and (c) lower consumer spending after the holiday season. Meanwhile, firms in Region IV were more optimistic due to their expectations of higher rate of school enrollment, and demand for loan products.

⁹ The survey covered all 16 regions of the Philippines. (For the list of regions and the distribution of around 7,000 top corporations by region, please see Annexes A and B).

next 12 months.

...and largely less For the next 12 months, the outlook of firms in regions outside the buoyant for the NCR was generally less optimistic, except in Regions IX and XI, where business sentiment was more upbeat. Firms in all other regions attributed their less buoyant optimism to the: (a) likely adverse impact of the ongoing conflict in Gaza on the domestic economy, and (b) anticipated moderation in sales and income. Meanwhile, the outlook of firms in Regions IX and XI were more upbeat due to expected higher demand for loan products, agrichemicals, tuna for export, tourism, and local infrastructure projects.

Outlook across all Across all types of trading firms (i.e., exporter, importer, types of trading dual-activity, and domestic-oriented), business confidence was firms is generally mostly more optimistic for Q4 2023 (see Table 15).10 The business more upbeat for sentiment of domestic-oriented firms, exporters, and importers was Q4 2023, ... more favorable, while that of the dual-activity firms was less buoyant. Firms, in general, cited the seasonal upturn in the demand for goods and services and increased business activity as the main reasons for their more optimistic outlook in the current quarter. Dual-activity firms, meanwhile, attributed their less upbeat sentiment to possible decline in sales and consumer demand due to high inflation and interest rates.

...but largely less For Q1 2024, business outlook was less buoyant across all types of optimistic for the trading groups, except for exporters, which registered a more near term. upbeat business sentiment. Similarly, for the next 12 months, business outlook was less favorable across all types of trading firms, except for dual-activity firms, which recorded a more optimistic outlook (see Tables 19 and 23).

Outlook across all The business outlook for the current quarter of medium- and sizes of firms is large-sized firms was more upbeat while that of small sized-firms generally more was less buoyant. For Q1 2024, business outlook across all favorable for employment size categories was less optimistic. Similarly, the Q4 2023 but sentiment of businesses for the next 12 months was largely less mostly less upbeat as the CIs of small- and large-sized firms declined while that optimistic for the of the medium-sized firms edged higher from the previous quarter's near term. survey results (see Tables 17, 21, and 24).11

Classification: GENERAL

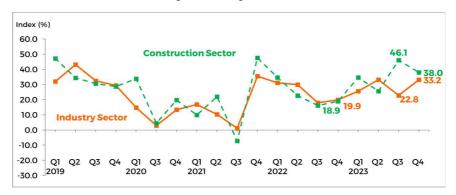

¹⁰ Dual-activity firms refer to companies who engage in both importing and exporting.

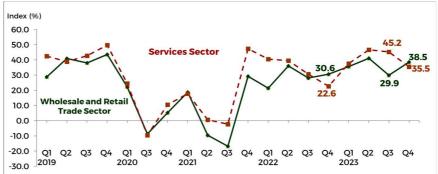

¹¹ Small-sized firms have 1-99 employees, medium-sized firms, 100-499 employees, large-sized firms have 500 or more employees.

Sectoral Outlook

Current Quarter Business Outlook Index by Sector Q1 2019 - Q4 2023

sentiment across all sectors remains optimistic for Q4 2023...

Business For Q4 2023, the positive CIs of the industry, wholesale and retail nt across trade, construction and services sectors reflected continued optimism in the said sectors (see Table 2). In particular, optimism in the industry and wholesale and retail trade sectors improved but mistic for weakened in the construction and services sectors.

The outlook of the industry and wholesale and retail trade sectors was more optimistic as firms anticipated: (a) stronger demand for their products and services during the holiday season, and (b) improved productivity and business activity due to the continued post-pandemic recovery. Meanwhile, the services and construction sectors cited the following as reasons for their less upbeat outlook: (a) lack of new clients and projects, (b) possible oil price hikes due to the ongoing Israel-Hamas and Ukraine-Russian conflicts, and (c) elevated inflation and interest rates.

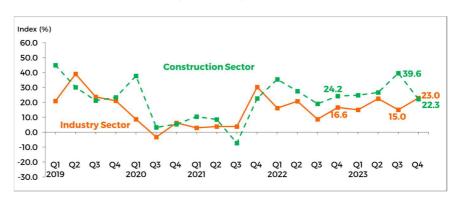

...and largely less upbeat for the near term. The business sentiment for Q1 2024 was less optimistic across all sectors, except the construction sector, which sustained a favorable outlook. The less upbeat sentiment of the industry, services, and wholesale and retail trade sectors were attributed to the: (a) decline in post-holiday consumer spending, (b) likely increase in fuel prices owing to geopolitical conflicts in the Middle East and Eastern Europe, (c) persistently-high inflation, and (d) rising interest rates. Meanwhile, the construction firms' more upbeat outlook for the said period stemmed from their anticipation of further improvement in the business climate and more construction projects.

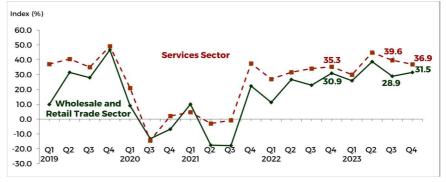

In line with the national trend, the outlook of businesses across all sectors was less favorable for the next 12 months. The weakened optimism among firms across all sectors was due to their expectations of (a) continued increase in prices of basic commodities, (b) potential rise in fuel prices due to the ongoing conflict in the Middle East, and (c) moderation in demand for goods and services (see Table 4).

Business Outlook on Own Operations

Current Quarter Business Activity Index by Sector Q1 2019 - Q4 2023

Firms' outlook on their business mostly more buovant for *O4 2023.*

For the current quarter, the outlook of firms on their own operations across sectors, based on their outlook on volume of business activity operations is and total orders booked, was generally more optimistic. In particular, the increase in the volume of business activity CIs of firms in the industry and wholesale and retail trade sectors offset the lower CIs of businesses in the construction and services sectors. Further, the increase in the CIs pertaining to volume of total orders booked of the industry, services, and wholesale and retail trade sectors outweighed the decline in the CI of the construction sector for Q4 2023.

> In contrast to the current quarter readings, a less favorable outlook on the volume of business activity was recorded for Q1 2024 across all sectors. Similarly, a less optimistic outlook for the volume of business activity was observed for the next 12 months as the less buoyant outlook of firms in the wholesale and retail trade and services sectors outweighed the more favorable outlook of firms in the industry and construction sectors (see Tables 5-7).

❖ Average Capacity Utilization ¹²

higher in Q4 2023.

Capacity The average capacity utilization in the industry and construction utilization of sectors for Q4 2023 increased slightly to 70.9 percent from industry and 70.5 percent in Q3 2023 (see Table 5). In particular, the average construction capacity utilization of the industry sector for Q4 2023 increased firms inches marginally to 69.7 percent (from 69.3 percent in Q3 2023).

Financial Condition and Access to Credit 13

Firms expect For Q4 2023, the cash or liquidity positions of firms may remain tight financial as the financial condition index stayed negative at around -15 percent. conditions and Moreover, businesses anticipated that their access to credit to be access to credit tighter for Q4 2023 as its corresponding index became more negative to be tight in at -3.5 percent from -0.2 percent in the previous quarter. This means Q4 2023. that the number of firms that expect tight access to credit increased and continued to outnumber those that said otherwise, during the current quarter (see Table 5). This is consistent with the results of the Q3 2023 Senior Bank Loan Officers' Survey (SLOS), which indicated that banks foresee an overall net tightening of credit standards for enterprises in Q4 2023.14

¹² For the BES average capacity utilization, firms in the industry and construction sectors were sampled. This differs from the sampling methodology of the MISSI, where a sample of only large manufacturing firms was used. Starting with the Q2 2023 BES report, respondent firms that reported 0% capacity utilization are included in the computation of the average capacity utilization (ACU) of the industry and construction sectors for the reference quarter. This is in line with the PSA Board Resolution No. 13, Series of 2020, wherein the computation of the ACU rate in the Monthly Integrated Survey of Selected Industries (MISSI) takes into account the impact of establishments that are temporarily closed (i.e., with zero capacity utilization rate).

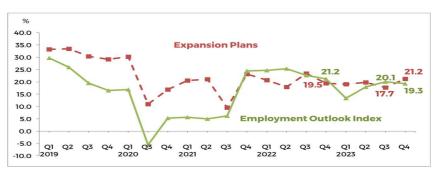

¹³ Financial conditions refer to the firm's general cash position considering the level of cash and other cash items and repayment terms on loans. Access to credit refers to the environment external to the firm, such as the availability of credit in the banking system and other financial institutions.

¹⁴ Results of the Q3 2023 Senior Bank Loan Officers' Survey (SLOS) showed that banks anticipate generally maintained loan standards for firms for Q4 2023 based on the mode of the responses while banks expect net tightening of credit standards for enterprises based on the diffusion index (DI) approach for the same period due to the following factors: (1) deterioration of borrowers' profiles, (2) decline in profitability of banks' portfolios, and (3) banks' reduced tolerance for risk. (https://bit.ly/3tlsWiL)

Employment and Expansion Plans

Next Quarter Employment Outlook and Expansion Plans Q1 2019 - Q4 2023

For Q1 2024, the employment outlook index stays positive and the percentage of firms with expansion plans increases.

The employment outlook index for Q1 2024 and the next 12 months stays positive at 19.3 percent and 29.3 percent, albeit lower than 20.1 percent and 32.3 percent in the Q3 2023 survey results, respectively. The positive, although lower readings in the Q4 2023 survey round suggest that firms may continue to hire more workers for the said periods but to a lesser degree compared with the previous quarter's survey results (see Tables 6 and 7).

Meanwhile, the percentage of businesses in the industry sector with expansion plans increased to 21.2 percent and 25.7 percent for Q1 2024 and the next 12 months (from 17.7 percent and 24.1 percent in the previous quarter's survey results), respectively. The increase in the percentage of firms with expansion plans for the next quarter was driven by the higher percentage of firms in the manufacturing sub-sector with expansion plans, which outweighed the decline in the percentage of firms with expansion plans in the electricity, gas and water, agriculture, fishery and forestry, and mining and quarrying sub-sectors. Likewise, the increase in the percentage of industry firms with expansion plans for the next 12 months emanated from the increase in the percentage of firms with expansion plans in the manufacturing sub-sector, which together with the slightly higher percentage of firms with expansion plans in the mining and quarrying sub-sector, outweighed the decrease in the percentage of firms with expansion plans from the electricity, gas and water, and the agriculture, fishery and forestry sub-sectors (see Tables 8 and 9).

Business Constraints

Domestic competition, insufficient demand and high interest rates are the major risks cited by businesses.

Domestic The major business risks for Q4 2023 as identified by the respondents competition, were (1) stiff domestic competition (55.7 percent of respondents), insufficient (2) insufficient demand (35.2 percent), and (3) high interest rates demand and high interest (25.5 percent). Meanwhile, COVID-19 is no longer viewed as a significant limiting factor to business activity (see Table 10).¹⁵

¹⁵ The number of firms that cited COVID-19 as a limiting factor to their business activity had declined considerably to 9 in Q4 2023 (from 394 in Q3 2020), which accounted for only 0.89 percent (less than 1 percent) of the total number of BES respondents during the said quarter.

❖ Expectations on Key Economic Indicators ¹⁶

interest rates in Q1 2024.

Businesses Businesses expect that the peso may depreciate against the expect a weaker U.S. dollar in Q4 2023 and Q1 2024 but may appreciate in the next peso, and higher 12 months. Meanwhile, firms expect that the inflation and the peso inflation and borrowing rates may rise for all reference periods.

Q4 2023 and Further, firms expect that inflation may remain above the upper end of the National Government's 2-4 percent inflation target range for 2023-2024. In particular, businesses expect that the inflation rate for Q4 2023, Q1 2024, and the next 12 months may average at 6.4 percent, 6.3 percent, and 6.2 percent, respectively. Meanwhile, firms are anticipating that the peso-dollar rate for Q4 2023, Q1 2024, and the next 12 months may average at Php56.20/US\$1, Php56.25/US\$1, and Php56.24/US\$1, respectively (see Tables 11-13).

About the Survey

is 65.1 percent.

Survey The Q4 2023 BES was conducted during the period 5 October response rate 14 November 2023.17 There were 1,548 firms surveyed nationwide, consisting of 583 companies in the NCR and 965 firms in AONCR, covering all 16 regions nationwide. Samples were drawn through stratified random sampling from the Bureau van Dijk (BvD) database of Top 7,000 Corporations ranked based on total assets in 2016-2017.¹⁸

> The nationwide survey response rate for this quarter was slightly higher at 65.1 percent (from 64.9 percent in Q3 2023). The response rate was lower for the NCR at 61.9 percent (from 63.8 percent) but higher for AONCR at 66.9 percent (from 65.5 percent).

> A breakdown of responses by type of business showed that 68.2 percent were domestic-oriented firms, 11.4 percent were both importers and exporters, 9.9 percent were importers, and 4.7 percent were exporters. The remaining 5.8 percent of the respondents did not specify their firm type (see Table 20).¹⁹

> By size of employment, the survey showed that 43.7 percent of respondents were small-sized firms, 33.6 percent were medium-sized, and 13 percent were large firms. The rest of the respondents either did not specify the number of their employees or indicated that their company does not have any employee (see Table 22).

Classification: GENERAL

¹⁶ The expectations on key economic indicators are expressed in terms of confidence indices (CIs), which are computed as the percentage of firms that answered "up" less the percentage of firms that answered "down" with respect to their views on a given key economic indicator. A positive CI indicates a favorable view, except for the inflation rate and the peso-borrowing rate, where a positive CI indicates the opposite.

¹⁷ Approval for the conduct of the Q1 2023-Q4 2025 BES was issued on 29 December 2022 through PSA Approval Nos. BSP-2256-01 to 04 corresponding to the four (4) BES questionnaire versions for firms in the following sectors: (1) Industry, (2) Construction, (3) Services and (4) Wholesale and Retail Trade.

¹⁸ The combined list of top corporations was subdivided into 192 strata classified by region–NCR and AONCR (the other 15 regions of the country)-and by industry sub-group, namely: (a) Group 1: Industry, which consists of manufacturing, mining and quarrying, electricity, gas and water, and agriculture, fishery and forestry, (b) Group II: Construction, (c) Group III: Services, which consists of financial intermediation, real estate, renting and business activities, hotels and restaurants, transport, storage and communications and community, social and personal services, and (d) Group IV: Wholesale and Retail Trade. Beginning Q1 2012, industry classification of companies shifted from the 1994 Philippine Standard Industrial Classification (PSIC) to the 2009 PSIC.

¹⁹ Details may not add up to 100 percent due to rounding.

Note: Unless otherwise stated, all numbers are in diffusion indices, i.e., Confidence Index (CI) is computed as the percentage of firms that answered in affirmative less the percentage of firms that answered in the negative with respect to their views on a given indicator.

¹ Starting Q3 2019, questionnaire was enhanced to include outlook for the next 12 months.

² Starting with the Q2 2023 BES report, respondent firms that reported 0% capacity utilization are included in the computation of the average capacity utilization (ACU) of the industry and construction sectors for the reference quarter. This is in line with the PSA Board Resolution No. 13, Series of 2020, wherein the computation of the ACU rate in the Monthly Integrated Survey of Selected Industries (MISSI) takes into account the impact of establishments that are temporarily closed (i.e., with zero capacity utilization rate). For comparability, the Q1 2023 BES ACU figures were revised to reflect this update.

^{*} Due to the implementation of the Community Quarantine nationwide, the conduct of the Q2 2020 BES was cancelled.

A quarterly survey conducted by the Department of Economic Statistics.

Bangko Sentral ng Pilipinas Manila, Philippines www.bsp.gov.ph

Starting Q3 2019, questionnaire was enhanced to include outlook for the next 12 months.

² From Q3 2021, this category also includes respondent firms which reported that they have no employees.

^{*} Due to the implementation of the Community Quarantine nationwide, the conduct of the Q2 2020 BES was cancelled.
