Consumer Expectations Survey¹ Third Quarter 2020²

Consumer Confidence Turns Pessimistic for Q3 and Q4 2020; More Optimistic for the Next 12 Months

Nationwide Consumer Outlook

Consumer sentiment falls to a record low for Q3 2020... The country's consumer outlook turned pessimistic for Q3 2020 as the overall confidence index (CI) fell to a record low of -54.5 percent, since the start of the nationwide survey in Q1 2007.³ A negative CI indicates that the number of pessimists outnumbered the number of optimists for Q3 2020. Respondents attributed their negative sentiment for Q3 2020 generally to the COVID-19 pandemic. Other reasons cited by the respondents were the following: (a) high unemployment rate and less working family members, (b) low and reduced income, and (c) faster increase in the prices of goods.⁴

The sentiment of consumers in the Philippines was comparable to the more pessimistic outlook of consumers in Australia, euro area, and France for

¹ The Consumer Expectations Survey (CES) is a quarterly survey of a random sample of about 5,000 households in the Philippines. Results of the CES provide advance indication of consumer sentiments for the current and next quarters and the year-ahead, as reflected in the overall CI, as well as in the selected economic indicators.

² Due to the implementation of the Community Quarantine nationwide from 16 March to 31 May 2020, the conduct of the Q2 2020 CES was cancelled.

³ The CI is computed as the percentage of households that answered in the affirmative less the percentage of households that answered in the negative with respect to their views on a given indicator. A positive CI indicates a favorable view, except for the inflation rate, the peso-borrowing rate, unemployment, and change in prices, where a positive CI indicates the opposite. The overall consumer CI measures the average direction of change in three indicators: overall condition of the economy, household finances, and household income (see Technical Notes on page 10 for the definition of terms).

⁴ The 'high unemployment rate and less working family members' reason cited by respondents was supported by the pronouncement of Labor Secretary Silvestre Bello III on 2 July 2020 that more than 3,000 business establishments have reported a temporary shutdown of operations, while more than 200 have closed down permanently since January 2020, adding that the closures affected some 100,000 workers (<u>https://newsinfo.inquirer.net/1300498/shutdown-of-3k-companies-affects-100k-workers</u>). Further, Cebu Pacific in a statement on 9 July 2020 said that it would lay off more than 800 employees by August 2020 as the coronavirus disease (COVID-19) pandemic continues to negatively impact the airline industry (<u>https://news.abs-cbn.com/business/07/09/20/cebu-pacificto-lay-off-over-800-workers-as-virus-impact-worsened</u>). With regard to the reason on 'faster increase in the prices of goods,' consumers expect a higher inflation rate for Q3 2020 versus the 2.3 percent recorded for April to June 2020.

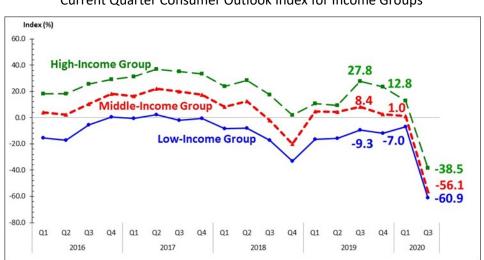

Q3 2020. Meanwhile, consumer outlook in Czech Republic, Indonesia, Japan, Poland, South Korea, Switzerland, Taiwan, Thailand, United Kingdom, and United States were less pessimistic.⁵

...continues to be consumer pessimism continued for the next quarter (Q4 2020) as the CI moved pessimistic for into negative territory at -4.1 percent from the Q1 2020 survey result of 9.2 percent for Q2 2020. Apart from concerns over the COVID-19, consumers also cited anticipation of: (a) high unemployment rate, (b) low, reduced, and no increase in income, and (c) faster increase in the prices of goods as reasons behind their pessimistic outlook for Q4 2020.

Meanwhile, consumers were more optimistic for the next 12 months as the CI increased to 25.5 percent from the Q1 2020 survey result of 19.9 percent for the next 12 months. The consumer outlook was more upbeat for the next 12 months due to expectations of an end in the COVID-19 pandemic or return to normal as well as the consumers' anticipation of the following: (a) availability of more jobs, (b) additional or high income, and (c) stable prices of goods.

Consumer confidence across three component indicators declines for Q3 2020.

Consumer outlook is measured across three component indicators, namely: country's economic condition, family financial situation, and family income. For Q3 2020, consumer sentiment on the three indicators turned pessimistic compared with the Q1 2020 survey results. The CIs on the family's financial situation and family income registered all-time lows since Q1 2007. Likewise, for the next quarter (Q4 2020), consumer sentiment across indicators weakened compared with the outturn in the previous survey round, particularly on the economic condition and family financial situation, where CIs reverted into the negative territory. Meanwhile, consumer confidence for the next 12 months across component indicators was more favorable compared with the Q1 2020 survey results.

Current Quarter Consumer Outlook Index for Income Groups

Switzerland releases quarterly consumer confidence index. However, Australia, Czech Republic, euro area, France, Indonesia, Japan, Poland, South Korea, Taiwan, Thailand, United Kingdom, and the United States record their consumer confidence index on a monthly basis. Meanwhile, for cross-country assessment of the consumer sentiment, the latest CI level is compared with the CI level of the previous reference period.

⁵ Cl of other countries can be accessed via the following links: <u>https://www.conference-board.org/data/consumerconfidence.cfm</u>, <u>http://www.roymorgan.com/morganpoll/consumer-confidence</u>, <u>http://www.tradingeconomics.com/</u> and <u>http://ec.europa.eu/economy_finance/db_indicators/surveys/index_en.htm</u>.

Record-low Cls are registered across income groups for Q3 2020. By income group, the negative all-time low overall CI for Q3 2020 was reflected across income groups, with the low-income group reporting the lowest CI, followed by middle- and high-income groups.⁶ Aside from the reasons cited by the consumers' negative outlook for the current quarter, consumer confidence for the middle-income group turned pessimistic due to expectations of higher household expenses.

For the next quarter, the sentiment of consumers across income groups turned pessimistic, but improved for the next 12 months, compared with the Q1 2020 survey results.

NCR and AONCR Consumer Outlook

Current Quarter Consumer Outlook Index for NCR and AONCR

Consumer confidence in both NCR and AONCR falls to an all-time low for Q3 2020.

By geographical location and consistent with the national trend, consumer confidence in both the National Capital Region (NCR) and Areas Outside NCR (AONCR) registered all-time lows for Q3 2020. Further, negative consumer confidence readings in both the NCR and AONCR were recorded across the three economic indicators for Q3 2020. Notably, the CIs for family financial situation and family income in the NCR as well as the CI for family income in the AONCR posted the lowest reading since Q1 2007.

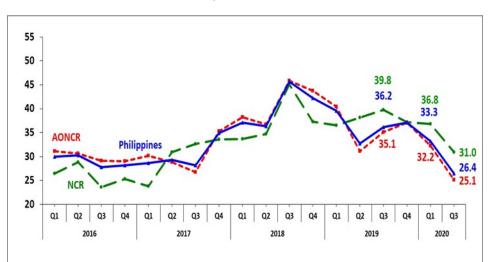

For the next quarter, consumer sentiments of both the NCR and AONCR respondents turned pessimistic compared with the Q1 2020 survey results. Meanwhile, respondents' views in both areas were more optimistic for the next 12 months compared with the previous survey round.

⁶ Low-income group refers to households with monthly family income of less than ₱10,000. Middle-income group refers to households with monthly family income between ₱10,000 and ₱29,999. High-income group refers to households with monthly family income of more than ₱30,000. Starting Q1 2019, the monthly family income is estimated using the income of the respondent, spouse and other family members as well as the OFW remittances received in the last 12 months.

Department of Economic Statistics	

Expenditures on Basic Goods and Services

Confidence Index: Expenditures for the Next Quarter

Consumers' spending outlook for the next quarter hits record low.

The households' spending outlook index on basic goods and services declined to 26.4 percent for Q4 2020, the lowest CI recorded since Q1 2007, indicating a contraction in consumer spending in the next 3 months. This suggests that while more respondents continued to expect higher spending on basic goods and services, the number that said so decreased compared with the Q1 2020 survey results. By geographical location, consumers in both NCR and AONCR may cut back on their spending for Q4 2020.

Across commodity groups, households' spending outlook was mixed. Fewer respondents expected higher spending on: electricity; food, non-alcoholic and alcoholic beverages, and tobacco; water; fuel; personal care and effects; medical care; education, recreation and culture; and house rent and furnishing. However, more respondents expected expenses to increase for transportation but remain steady for communication. Meanwhile, households' spending outlook on restaurants and cafes; and clothing and footwear weakened.

Expenditures on Big-Ticket Items: Consumer Durables, Motor Vehicle and Housing

Buying sentiment for big-ticket items are less upbeat for Q3 2020.
 Q3 2020.
 The percentage of households in the country that considered Q3 2020 as a favorable time to buy big-ticket items declined to 12.8 percent, almost half of the 24.2 percent recorded in Q1 2020. The less optimistic outlook on buying sentiment was evident across the three big-ticket items, namely, consumer durables, motor vehicles, and house and lot. Respondents' waning buying sentiment was attributable to their: (a) shift on spending priority to food and other basic needs of the family (from big-ticket items), (b) ownership of big-ticket items at present, and (c) low/insufficient income. By area, consumers' less favorable views on buying conditions persisted in both the NCR and AONCR.

A quarterly survey conducted by the **Department of Economic Statistics**

Bangko Sentral ng Pilipinas Manila, Philippines www.bsp.gov.ph

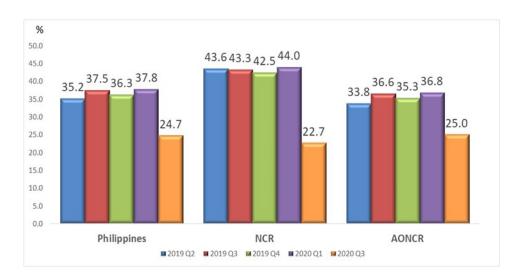

Likewise, buying intentions are less buoyant over the next 12 months.

Savings Behavior⁸

The percentage of households in the country that considered the next 12 months as a favorable time to buy big-ticket items declined to 4.5 percent from 6.5 percent recorded in Q1 2020. Similarly, buying intentions for the three big-ticket items in the next 12 months was observed to be less buoyant. By geographical location, buying intentions across all big-ticket items for consumers in NCR and AONCR generally followed the national trend.

In particular, the percentage of households that plan to buy real property for the next 12 months decreased to a record low of 3.3 percent from 5.9 percent posted in Q1 2020. The lower percentage can be attributed to the decline in the number of households that plan to acquire single detached houses (at 32.6 percent from 43.7 percent in Q1 2020), townhouses (at 4.1 percent from 6.6 percent in Q1 2020), duplexes (at 2 percent from 4.8 percent in Q1 2020), and apartments (at 0.5 percent from 5.1 percent in Q1 2020).

Respondents were also asked about the price of real properties they intend to purchase in the next 12 months. Majority or 70 percent of these households expect to acquire real property worth \$450,000 and below. Meanwhile, 24.7 percent of households expect to buy house and/or lot valued between \$\$450,001 and \$1,700,000 and 5.3 percent may purchase properties at an estimated cost of more than \$1,700,000.⁷

Percentage of Households with Savings

⁸ In Q2 2013, questions on family savings were added to provide supplemental information on households' financial assets and their access to financial institutions.

A quarterly survey conducted by the	Bangko Sentral ng Pilipinas	PILIPINAS
Department of Economic Statistics	Manila, Philippines	
	www.bsp.gov.ph	
		PR THONYO

⁷ In Q2 2018, questions on the type and the amount of house and/or lot intended to be bought by households were added. The property strata were based on the Housing and Land Use Regulatory Board Memorandum Circular No. 13 series of 2017.

The percentage of households with savings for Q3 2020 declines. For Q3 2020, the percentage of households with savings declined to 24.7 percent from 37.8 percent in Q1 2020. The decrease in the number of savers can be seen across income groups, particularly in the middle- and high-income groups, which registered all-time lows since Q1 2007. By geographical area, both the number of savers in NCR and AONCR declined. According to respondents, they saved money for the following reasons: a) emergencies, (b) health and hospitalization, (c) retirement, (d) education, and (e) business capital and investment.

Among the households with savings, the majority or 71.1 percent of savers kept their money in a bank for Q3 2020, though this percentage was lower compared with 73.9 percent in Q1 2020. Banks remained to be the top savings institutions preferred by savers. Meanwhile, 61.8 percent kept their savings at home and 48.9 percent considered other institutions such as cooperatives, paluwagan, other credit/loan associations,⁹ or in investments (e.g., business, insurance, microfinance, and stocks).

When asked if the household would set aside money for savings for Q3 2020, the percentage of respondents that answered affirmatively was at an all-time low of 27.6 percent. Moreover, the proportion of those that would set aside at least 10 percent of their monthly gross family income fell to 33.6 percent from 40.9 percent in Q1 2020. Furthermore, the percentage of those with less than 10 percent allocation for savings rose to 66.4 percent from 59.1 percent in Q1 2020.

Selected Economic Indicators

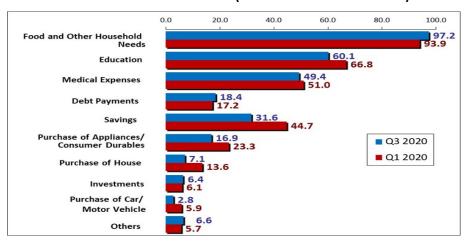

Consumers expect inflation, interest and unemployment rates to increase, and the exchange rate to appreciate for Q3 2020; Inflation to remain within target at 2 to 4 percent The survey results showed that consumers anticipated the interest rates to increase, and the peso to appreciate for the current quarter, in the next quarter and in the next 12 months. Respondents also expected that unemployment rate would rise for the current and next quarters, but would decline over the next 12 months.

Households anticipated that the rate of increase in commodity prices will remain within the government's inflation target range of 2 to 4 percent for 2020 and 2021—at 2.5 percent for Q3 2020, 2.6 percent for Q4 2020, and 2.8 percent for the next 12 months.

⁹ Cooperatives are duly registered associations of at least fifteen (15) persons with a common bond of interest who voluntarily join to achieve a lawful common social and economic end. Associations are organizations of people with a common purpose and having a formal structure. Paluwagan refers to an organization that pools the participants' money, by means of daily, weekly, or monthly collections to be collected by a leader. The participants will cast lots to determine the order by which each of the members will receive the pooled money.

Department of Economic Statistics	Manila, Philippines	
	www.bsp.gov.ph	
		20 * 0

Expenditures of Overseas Filipino Workers (OFWs)

The number of OFW households that utilize their remittances for the purchase of food and other household needs increases for Q3 2020. For Q3 2020, 97.2 percent of the 326 OFW households (from 93.9 percent in Q1 2020) indicated that remittance proceeds are used to purchase food and other household needs. Further, the percentage of OFW households that apportioned their remittances for debt payments (18.4 percent) and investment (6.4 percent) were higher compared with the Q1 2020 survey results. Meanwhile, the proportion of OFW households that allotted part of their remittances for education (60.1 percent), medical expenses (49.4 percent), purchases of consumer durables (16.9 percent), houses (7.1 percent), motor vehicles (2.8 percent) and savings (31.6 percent) declined. The latter registered the biggest decline among these types of remittance use, when compared with the Q1 2020 survey results.

In terms of the utilization pattern of OFW households by area, a larger percentage of OFW households in the NCR allocated part of their remittances to the purchase of consumer durables, houses, medical expenses, and food and other household needs compared with their counterparts in the AONCR.

On the experience of households receiving remittances from OFWs in the last 12 months, 92.8 percent of respondents were satisfied with the service of remittance agencies. Meanwhile, the slow release of remittance from the OFW to the receiver's account was cited as a reason for the dissatisfaction of consumers with the service of remittance agencies.¹⁰

Respondent's and/or Spouse's Debt Situation¹¹

About 1 in every 3 households availed of a loan in the last 12 months...

For Q3 2020, about 1 in every 3 households, or 29 percent, reported that they availed of a loan in the last 12 months. By income group, the highest percentage of households that availed of a loan in the last 12 months came from the low-income group at 42.2 percent, followed by the middle- and high-income groups at 31.1 percent and 26.6 percent, respectively.

¹⁰ Beginning Q2 2018, question on the experience of OFW households in receiving the money transferred by the OFW was added. ¹¹ Beginning Q2 2018, questions on the respondent and/or spouse debt situation were added.

A quarterly survey conducted by the	Bangko Sentral ng Pilipinas	PILIPINAS
Department of Economic Statistics	Manila, Philippines	
	www.bsp.gov.ph	

By geographical area, the percentage of households that availed of a loan in the last 12 months was higher in AONCR (30.5 percent) than in NCR (19.9 percent).

...of which, 87.3 percent On credit access, 87.3 percent of the respondents found it easy to apply for a *experienced ease in debt* loan. However, the remaining 12.7 percent found it difficult it difficult due to the following concerns: (a) numerous requirements, (b) difficulty locating individual money lenders, and (c) COVID-19 pandemic.

For Q3 2020, more than half or 52.4 percent of households that availed of a loan in the last 12 months used their loan proceeds for the purchase of basic goods, followed by business start-up/expansion (24.7 percent) and health-related expenses (10.4 percent).

...and real estate loans account for the biggest share of total outstanding loans of the household respondents.

Real estate loans accounted for the biggest percentage share to total outstanding loans at 27.6 percent, followed by loans on purchase of basic goods tal at 17.6 percent, vehicle loans at 15.9 percent, and business loans at 11.4 percent. Meanwhile, 80.2 percent of the loans were paid on schedule, ts. 16 percent were behind schedule, while 3.7 percent were ahead of schedule.

A greater number of households that availed of loans for Q3 2020 had no collateral (at 86 percent). However, the following collaterals were used by households that availed of loan—"Sangla ATM" (at 3.3 percent), vehicles, e.g., cars and motorcycles (at 1.9 percent), lands¹² and other real properties (both at 1.4 percent), and harvest proceeds (at 1.2 percent).

Relatives and friends were the top loan providers for Q3 2020 (29.4 percent), followed by lending companies (23.2 percent), individual money lenders (13.4 percent), banks (10.7 percent), cooperatives (6.7 percent), and government institutions (6.6 percent).

About 1 in every 16 respondents plan to apply for a loan in Q4 2020 and the next 12 months.

Every 16 For Q4 2020, about 1 in every 16 respondents, or 6.1 percent, expressed their intention to apply for a loan in the next quarter, of which 79.6 percent expect that access to credit will be easy. Similarly, 5.7 percent of the surveyed and the households reported that they would borrow funds in the next 12 months, of which 82.1 percent anticipate easier credit access.

Households indicated that the purchase of basic goods and business start-up/expansion will be the main purpose of loan availment in the next quarter and the next 12 months, respectively. Respondents opined that collaterals will not be used in most of their future loan applications (84.8 percent for Q4 2020 and 78.1 percent for the next 12 months). However, in case a collateral will be required, 3 percent of households indicated that they would use vehicles as a collateral for a loan in the next quarter, while 3.6 percent would use lands for their next 12 months loan. The other types of collaterals mentioned by households were (a) sangla ATM, (b) jewelry, (c) real property, (d) farm animal, (e) harvest, and (f) stock certificate. It may be noted that these types of collaterals amounted to less than 4 percent each in terms of their contribution to the total types of collaterals.

¹² Refers to any type of lot, whether agricultural, residential, or commercial, without any structure attached to it.

A quarterly survey conducted by the	Bangko Sentral ng Pilipinas
Department of Economic Statistics	Manila, Philippines
	www.bsp.gov.ph

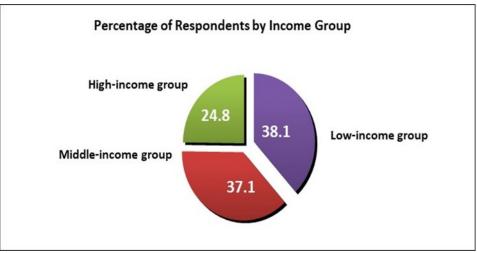

For the next quarter and the next 12 months, the loan principal is expected to be provided by lending companies at 32.1 percent and 30.1 percent, followed by relatives and friends at 24.5 percent and 24.9 percent, respectively.¹³

About the Survey

5,441 households nationwide participated in the survey. The Consumer Expectations Survey (CES) started in Q3 2004 covering the NCR only. Beginning Q1 2007, the BSP expanded the survey's scope to cover the whole country.

The Q3 2020 CES was conducted during the period 1 - 14 July 2020. The CES samples were drawn from the Philippine Statistics Authority's (PSA) Master Sample of Households, which is considered as a representative sample of households nationwide. The CES sample households were generated using a stratified multi-stage probability sampling scheme.¹⁴ For the Q3 2020 CES, 5,563 households were surveyed. Of the said households, 2,835 (51 percent) were from NCR and 2,728 (49 percent) from AONCR.

Of the said sample size, 5,441 households responded to the survey, equivalent to a response rate of 97.8 percent (from 97.3 percent in the Q1 2020 survey). The respondents consist of 2,780 households in NCR (with 98.1 percent response rate) and 2,661 households in AONCR (with 97.5 percent response rate). Most of the respondents were from the low-income group (38.1 percent), followed by the middle-income group (37.1 percent) and the high-income group (24.8 percent).

¹⁴ The Master Sample was subdivided into Primary Sampling Units (PSU) (i.e., a whole barangay or a portion of a large barangay or combinations of small barangays) and ordered according to the following: (1) North-South/West-East Geographic location;
(2) Decreasing Population of Households with Overseas Workers; and (3) Decreasing Wealth index. Sample households were then drawn from each of the systematically selected sample PSUs.

¹³ Examples of lending companies registered in the Securities and Exchange Commission (SEC) in 2020 are 168 Lending Investor Incorporated, 24K Lending Investor Corporation, 4J City Link Lending Incorporated, 5 Star Express Lending Corporation, GECP Lending Corporation, Philcam Lending Investors Incorporated, and South Exchange Credit and Lending Investor Incorporated.

TECHNICAL NOTES

The overall consumer confidence index is computed as the average of the three indices, namely:

- 1. <u>Economic Condition</u> refers to the perception of the respondent regarding the general economic condition of the country.
- 2. <u>Family Financial Situation</u> refers to the level of: a) household income in cash as well as in kind, b) savings, c) outstanding debts, d) investments, and e) assets.
- 3. <u>Family Income</u> includes primary income and receipts from other sources received by all family members as participants in any economic activity or as recipients of transfers, pensions, grants and the like.

Details may not add up due to rounding.

Low-income group refers to households with monthly family income of less than P10,000. Middle-income group refers to households with monthly family income between P10,000-P29,999. High-income group refers to households with monthly family income of more than P30,000. Starting Q1 2019, the monthly family income is estimated

using income from the respondent, spouse, other family members, and received OFW remittances.

*Due to the implementation of the Community Quarantine nationwide, the conduct of the Q2 2020 CES was cancelled.
