CONSUMER EXPECTATIONS SURVEY

Fourth Quarter 2021

Consumer Confidence More Pessimistic in O4 2021. but More Optimistic for Q1 2022 and the Next 12 Months

Nationwide Consumer Outlook

Consumer Based on the Q4 2021 survey results, consumer sentiment in the sentiment country was more pessimistic as the overall confidence index (CI) weakens in declined to -24 percent from -19.3 percent in Q3 2021.² The lower Q4 2021... negative index recorded in Q4 2021 showed that the number of households with pessimistic views increased relative to the number in the previous quarter and continued to surpass those with optimistic views. According to respondents, their weaker outlook during the current quarter was brought about by their expectations of: (a) higher unemployment rate, (b) low income, ongoing COVID-19 pandemic, (c) higher cases, and restrictions/lockdown/travel ban, (d) faster increase in the prices of goods, and (e) less working family member. Some respondents added the occurrence of typhoons in Q4 2021 for their more pessimistic sentiment in the current quarter.³

¹ The Consumer Expectations Survey (CES) is a quarterly survey of a random sample of about 5,000 households in the Philippines. Results of the CES provide advance indication of consumer sentiments for the current and next guarters and the next 12 months, as reflected in the overall CI, as well as in the selected economic indicators. The Q4 2021 CES was conducted during the period 1-13 October.

² The CI is computed as the percentage of households that answered in the affirmative less the percentage of households that answered in the negative with respect to their views on a given indicator. A positive CI indicates a favorable view, except for the inflation rate and the peso-borrowing rate, where a positive CI indicates the opposite.

Three tropical cyclones affected the country during the survey period, namely, Tropical Depression Lanie (4 - 6 October 2021), Severe Tropical Storm Maring (8 - 12 October 2021), and Tropical Depression Nando (9 October 2021) http://pubfiles.pagasa.dost.gov.ph/climps/climateforum/climatereview.pdf.

The sentiment of consumers in the Philippines was comparable to the more pessimistic outlook of consumers in Euro Area. Netherlands, Poland, Taiwan, Turkey, the United Kingdom, and the United States in Q4 2021. Meanwhile, consumer outlook in Australia, Canada, and South Korea was more optimistic.⁴

...but more Meanwhile, consumer sentiment for the next quarter and the optimistic for next 12 months improved as the CI increased to 9.3 percent and the next 23.6 percent from the Q3 2021 survey result of 2.7 percent and quarter and 18.6 percent, respectively. Respondents attributed their the next 12 optimism to the following expectations: (a) availability of more months. jobs and permanent employment, (b) additional and high income, (c) effective government policies and programs, and (d) good governance.

Consumer The more pessimistic consumer sentiment in Q4 2021 was outlook reflected across the three component indicators of consumer weakens confidence, with the economic condition recording the lowest across the CI, followed by family financial situation and family income. three However, for the next quarter and the next 12 months, the component sentiment across the three component indicators was more *indicators...* buoyant as compared with their outlook a quarter ago.

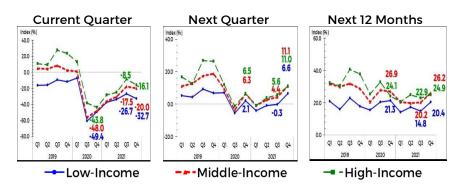

CI of other countries can be accessed via the following links: https://www.conferenceboard.org/data/consumerconfidence.cfm. http://ww.rovmorgan.com/morganpoll/consumer-confidence. http://www.tradingeconomics.com/ and

http://ec.europa.eu/economy_finance/db_indicators/surveys/index_en.htm

Switzerland releases quarterly consumer confidence index. However, Australia, Canada, Columbia, Czech Republic, euro area, Finland, France, Indonesia, Israel, Italy, Japan, Netherlands, Poland, South Korea, Taiwan, Thailand, Turkey, United Kingdom, and the United States record their consumer confidence index monthly. Meanwhile, for cross-country assessment of the consumer sentiment, the latest CI level is compared with the CI level of the previous reference period.

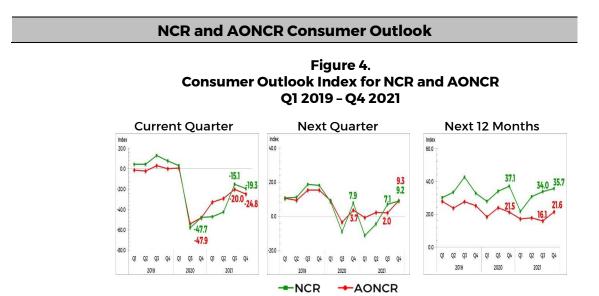

Figure 3. **Consumer Outlook Index by Income Group** Q1 2019 - Q4 2021

...and across Consistent with the national trend, consumer confidence across income income groups⁵ also weakened in the current quarter. Aside from groups in the reasons cited for the more pessimistic outlook in Q4 2021, Q4 2021. consumer confidence of respondents in the high-income group waned amid concern about their job security.

> For the next quarter and the next 12 months, the consumers across income groups were more confident compared with their sentiments in Q3 2021. Noticeably, the next quarter outlook for the low-income group turned positive compared with their outlook over the last three consecutive guarters.

⁵ Low-income group refers to households with monthly family income of less than ₱10,000. Middle-income group refers to households with monthly family income between ₱10,000 and ₱29,999. High-income group refers to households with monthly family income of more than ₱30,000. Starting QI 2019, the monthly family income is estimated using the income of the respondent, spouse, and other family members as well as the OFW remittances received in the last 12 months.

Consumer By geographical location, consumer sentiment in both the National confidence Capital Region (NCR) and the Areas Outside NCR (AONCR) was more in the NCR pessimistic in Q4 2021, which is consistent with the national trend. and the The bearish outlook in both the NCR and the AONCR was evident in AONCR is the responses concerning the three component indicators on more income and the economy. In addition to the reasons cited by *pessimistic* consumers for their weaker outlook in Q4 2021, the NCR respondents in Q4 2021 attributed their weak sentiment to their expectations that income will not increase.

> For the next quarter and the next 12 months, the consumer sentiment in both the NCR and the AONCR was more upbeat compared with the views a quarter ago.

Consumer The households' spending outlook on goods and services for spending is Q1 2022 was less upbeat as the CI declined to 29.6 percent from less upbeat 31.4 percent in the Q3 2021 survey result. This suggests that while for QI 2022. more respondents continue to expect higher spending on basic goods and services, the number that said so decreased compared with a guarter ago, indicating some moderation in spending among many consumers over the next 3 months. By geographical location, spending outlook of AONCR respondents was less favorable but more buoyant for NCR consumers.

> In terms of spending by type of consumer item for Q1 2022, fewer respondents indicated higher expenditure allocation to: food, transportation, medical care, education, recreation and culture, and house rent and furnishing. Meanwhile, the spending outlook on clothing, footwear, restaurants, and cafes turned negative; households' spending on water, electricity, and fuel was steady; while more respondents indicated higher spending for personal care and effects as well as for communication compared with the expense allocation expressed in the Q3 2021 survey.

Expenditures on Big-Ticket Items: Consumer Durables. Motor Vehicle and Housing

Buying The percentage of households in the country that considered sentiment for Q4 2021 as a favorable time to buy big-ticket items was broadly *big-ticket* steady at 13.4 percent relative to the index a quarter ago. The steady items in outlook on buying conditions in Q4 2021 was generally evident Q4 2021 is across the three big-ticket items and areas, both in the NCR and the steady. AONCR, compared with the previous quarter's outlook.

For the next Meanwhile, the percentage of households in the country that 12 months, considered the next 12 months as a favorable time to buy big-ticket buying items grew to 5.1 percent from 4.1 percent in the Q3 2021 survey intentions for result. Moreover, buying intentions of consumers across the three big-ticket big-ticket items were more optimistic compared with their items are intentions a quarter ago. By area, consumers' outlook on buying more upbeat. intentions was more favorable in the AONCR but less upbeat in the NCR, from the previous quarter's survey results.

> The percentage of households that plan to buy/acquire real property within the next 12 months increased to 4.2 percent from 3.2 percent in the Q3 2021 survey results. The higher percentage can be attributed to the increase in the number of households that plan to acquire residential lot (31.5 percent from 21.3 percent in Q3 2021), townhouse (2.8 percent from 1.8 percent in Q3 2021), and agriculture lot (15.8 percent from 12.2 percent in Q3 2021).

> When asked about the price range of real properties they intend to purchase in the next 12 months, majority or 61.9 percent of these households indicated a range of ₱450,000 and below. Meanwhile, 28.6 percent and 9.5 percent of households plan to buy a house and/or lot worth \$450,001 to \$1,700,000, and more than \$1,700,000, respectively.⁶

In Q2 2018, questions on the type and the amount of house and/or lot intended to be bought by households were added. The property strata were based on the Housing and Land Use Regulatory Board Memorandum Circular No. 13 series of 2017.

Savings Behavior

Figure 6. **Percentage of Households with Savings** Q4 2020 - Q4 2021

The In Q4 2021, the percentage of households with savings rose to percentage of 30.2 percent from 25.2 percent in Q3 2021. The increase in the *households* number of savers was observed across all income groups. By with savings geographical area, the number of savers in the NCR was broadly accounts in stable, but increased in the AONCR. Respondents cited that they banks allocate savings for: (a) emergencies, (b) health and medical increases in expenses, (c) education, (d) retirement, (e) purchase of house, Q4 2021. and (f) business capital and investment.

> Respondents with savings kept their money, wholly or partially. in various institutions. Based on the Q4 2021 survey, more than two-thirds (68.9 percent) of the household savers kept their savings in banks, higher than 67.7 percent in the Q3 2021 survey outturn. These showed that the percentage of households with savings accounts in banks increased to 20.8 percent from 17 percent in Q3 2021.7 Meanwhile, 53.9 percent of respondents kept their savings at home and 32.8 percent considered cooperatives, paluwagan, credit/loan associations,⁸ investments, and other institutions (e.g., microfinance and insurance) for safekeeping of their savings.

The percentage of households with savings accounts in banks is computed as the product of the percentage of household with savings and the percentage of households with savings by type of saving institution who answered "banks"

Cooperatives are duly registered associations of at least fifteen (15) persons with a common bond of interest who voluntarily join to achieve a lawful common social and economic end. Associations are organizations of people with a common purpose and having a formal structure. Paluwagan refers to an organization that pools the participants' money, by means of daily, weekly, or monthly collections to be collected by a leader. The participants will cast lots to determine the order by which each of the members will receive the pooled money.

When asked if households would set aside money for savings in Q4 2021, the percentage of respondents that answered affirmatively increased to 34.4 percent from 29.4 percent in Q3 2021. However, the proportion of those that would set aside at least 10 percent of their monthly gross family income for savings declined to 32.4 percent from 35 percent in Q3 2021. In contrast, the percentage of those that would set aside less than 10 percent for their savings rose to 67.6 percent from 65 percent in Q3 2021.9

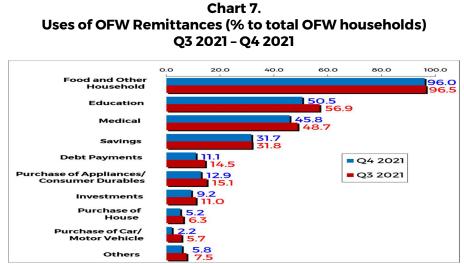

Selected Economic Indicators

depreciate in Q4 2021.

Consumers The survey results showed that consumers anticipated that expect interest interest rates may increase in the current guarter, next guarter, and and the next 12 months. The peso is expected to depreciate in *unemployment* Q4 2021 and Q1 2022, but may appreciate in the next 12 months. rates to Moreover, they also anticipated that the unemployment rate *increase, but* may rise in Q4 2021 but may decline in the next quarter and the the peso to next 12 months.

range of 2 to 4 percent.

Inflation to Households anticipated that the rate of increase in commodity *remain within* prices will remain within the government's inflation target range *the target* of 2 to 4 percent for 2022–at 3.2 percent for the next 12 months.

Expenditures of Overseas Filipino Workers (OFWs)

The percentage of those with less than 10 percent allocation for savings is computed as the summation of the percentage of households who allocated less than 5 percent of income to savings and the percentage of

households who allocated 5 percent to 9 percent of income to savings.

Department of Economic Statistics

household

The number In Q4 2021, 96 percent of the 325 OFW household respondents of OFW indicated that remittance proceeds were used to purchase food *households* and other household needs. The percentage of OFW households that utilizes that apportioned their remittances for the following items their declined: education (50.5 percent). medical expenses remittances (45.8 percent), savings (31.7 percent), purchase of consumer to purchase durables (12.9 percent), debt payments (11.1 percent), investments food and (9.2 percent), purchase of house (5.2 percent) and motor vehicles other (2.2 percent).

needs In terms of the utilization pattern of remittances by area, a larger decreases in percentage of OFW households in the NCR allocated part of their Q4 2021. remittances to food, and other household needs, savings, and purchase of house as opposed to their counterparts in the AONCR.

> Meanwhile, households that received remittances from OFWs in the last 12 months continued to be satisfied with the services of remittance agencies with CI at 91.2 percent, higher than 89.2 percent in Q3 2021. Consumers cited the delay in the release of the remittance as the main reason for the consumers' dissatisfaction with their service. Some remittance agencies were not able to remit funds to their clients on time amid the lack of funds.10

Respondent's and/or Spouse's Debt Situation⁹

last 12 months.

About 1 in In Q4 2021, about 1 in every 4 households, or 24.2 percent, availed of every 4 a loan in the last 12 months, higher than the 22.6 percent recorded *households* in Q3 2021. By income group, the highest percentage of households availed of a that availed of a loan in the last 12 months belonged to low-income loan in the group at 35.3 percent, followed by the high- and middle-income groups at 34.1 percent and 30.6 percent, respectively.

> By geographical area, the percentage of households that availed of a loan in the last 12 months was higher in the AONCR (25.4 percent) than in the NCR (16.9 percent).

> Credit access was easier for the 24.2 percent households that availed of a loan with CI at 93.1 percent from 92.4 percent in Q3 2021. For respondents who found it difficult to apply for a loan, reasons cited include (a) too many/ difficult to complete requirements, (b) long processing time, and (c) difficulty of finding a willing lender and co-maker.

¹⁰ Beginning Q2 2018, question on the experience of OFW households in receiving the money transferred by the OFW was added.

 $^{^{11}}$ Beginning Q2 2018, questions on the respondent and/or spouse debt situation were added.

The loan Most respondents used their loan proceeds in the last 12 months to proceeds in purchase basic goods (55.1 percent of households), followed by the last 12 business start-up/expansion (25.2 percent), payment of other debts months are (12.2 percent), health-related expenses (11 percent), and educationmainly used related expenses (8.2 percent). Further, respondents indicated that to purchase loan proceeds (as share to total outstanding loans) were allotted basic goods. mostly for business start-up and purchase of real estate at 26.9 percent and 18 percent, respectively. This was followed by purchase of basic goods (17.8 percent), purchase of vehicles (10.4 percent), payment of other debts (9.2 percent), and health-related loans (5.7 percent). Meanwhile, 84.6 percent of their loans were paid on schedule, 8.5 percent were behind schedule, while 6.9 percent were ahead of schedule.

> Also, in the last 12 months, the loans availed by majority of households (84.2 percent) were uncollateralized. Meanwhile, households that availed of a secured loan used the following assets as collaterals: (a) ATM account (4 percent), (b) land¹² (1.7 percent), (c) harvest (1.6 percent), and (d) vehicles (1.3 percent).

> Relatives and friends (27.3 percent) remained the top loan providers in Q4 2021, followed by lending companies (21.4 percent), government institutions (10.7 percent), cooperatives (10.5 percent), banks (9.6 percent), and individual money lenders (9.5 percent).

Six percent There are 6 percent and 7.1 percent of households that expressed and 7.1 their intention to apply for a loan in the next quarter and percent next 12 months, respectively. of the

respondents Purchase of basic goods was the top reason of the households that plan to intended to avail of a loan in the next quarter and the apply for a next 12 months. Most of the respondents (87.9 percent for Q1 2022 loan in and 88.1 percent for the next 12 months) will not use collaterals in QI 2022 and their future loan applications. However, should collaterals be the next 12 required, ATM account, land and harvest proceeds were the most months, common collaterals identified by the respondents for the said respectively. periods.

> Households considered relatives and friends as their top potential loan providers in the next quarter and the next 12 months.

¹² Refers to any type of lot, whether agricultural, residential, or commercial, without any structure attached to it.

About the Survey

participated

5,495 The Consumer Expectations Survey (CES) started in Q3 2004 households covering the NCR only. Beginning QI 2007, the BSP expanded the *nationwide* survey's scope to cover the whole country.

in the survey The Q4 2021 CES was conducted during the period 1 - 13 October 2021.¹³ The CES samples were drawn from the Philippine Statistics Authority's (PSA) Master Sample of Households, which is considered as a representative sample of households nationwide. The CES sample households were generated using a stratified multi-stage probability sampling scheme.¹⁴ In Q4 2021 CES, 5,665 households were surveyed - 2,802 (49.5 percent) were from the NCR and 2,863 (50.5 percent) from the AONCR.

> Of the said sample size, 5,495 households responded to the survey, equivalent to a response rate of 97 percent (from 98.1 percent in the Q3 2021 survey). Respondents consisted of 2,721 households in the NCR (with 97.1 percent response rate) and 2,774 households in the AONCR (with 96.9 percent response rate). The middle-income group comprised the largest percentage of respondents (40.9 percent), followed by the low-income group (32.3 percent) and the high-income group (26.8 percent).

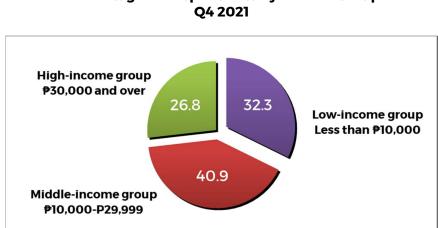

Figure 8. **Percentage of Respondents by Income Group**

¹³ Approval for the conduct of the Q4 2021 CES was issued on 10 January 2019 through PSA Approval Nos. BSP-1901. ¹⁴ The Master Sample was subdivided into Primary Sampling Units (PSU) (i.e., a whole barangay or a portion of a large barangay or combinations of small barangays) and ordered according to the following: (1) North-South/West-East Geographic location; (2) Decreasing Population of Households with Overseas Workers; and (3) Decreasing Wealth index. Sample households were then drawn from each of the systematically selected sample PSUs.

Technical Notes

The overall consumer confidence index is computed as the average of the three indices, namely:

- 1. <u>Economic Condition</u> refers to the perception of the respondent regarding the general economic condition of the country.
- 2. <u>Family's Financial Situation</u> refers to the level of: (a) household income in cash as well as in kind, (b) savings, (c) outstanding debts, (d) investments, and (e) assets.
- 3. <u>Family Income</u> includes primary income and receipts from other sources received by all family members as participants in any economic activity or as recipients of transfers, pensions, grants, and the like.

Details may not add up due to rounding.

Low-income group refers to households with monthly family income of less than P10,000. Middle-income group refers to households with monthly family income between P10,000-P29,999. High-income group refers to households with monthly family income of more than P30,000. Starting Q1 2019, the monthly family income is estimated using income from the respondent, spouse, other family members, and received OFW remittances.

*Due to the implementation of the Community Quarantine nationwide, the conduct of the Q2 2020 CES was cancelled.
