C5	<p>Inflation rate refers to the average percent change in the prices of goods and services, typically purchased by consumers, over a period of one year. For example, if the inflation rate is 4.1%, products purchased at P100 in the previous year will cost P104.10 for the current year.</p> <p><i>Ang inflation rate ay ang average na porsiyento ng itinaas ng presyo ng mga pangunahing bilihin at serbisyo sa loob ng isang taon. Halimbawa, kung ang inflation rate ay 4.1%, ang mga produktong nabibili sa halagang P100 noong nakaraang taon ay nagkakahalaga nang P104.10 sa kasalukuyan.</i></p>
