Q4 2022 (YoY) PHILIPPINE BALANCE SHEET APPROACH

A PRESENTATION OF THE COUNTRY'S FINANCIAL BALANCE SHEETS ON A FROM WHOM-TO-WHOM (WTW) BASIS USING THE AGGREGATE BALANCE SHEET DATA OF EACH SECTOR OF THE ECONOMY

Total Domestic Economy, levels in trillion pesos, share to total in percent
 Details may not add up to 100 percent due to rounding

PHILIPPINE BALANCE SHEET APPROACH¹

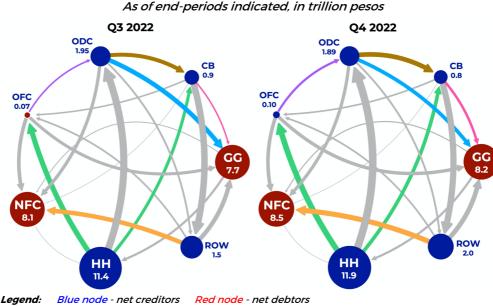

Q42022 Highlights²

Preliminary results of the Q4 2022 Balance Sheet Approach (BSA) indicated that the country's net external liability position widened by 29.9 percent quarter-on-quarter (QoQ) (to P2 trillion in Q4 2022 from P1.5 trillion in Q3 2022) (Annex C - Table 1.1). This was driven mainly by the higher net external liability positions of the non-financial corporations (NFCs) and the general government (GG) as well as the lower net external asset position of the Central Bank (CB).³

The NFCs and the GG continued to be net debtors of the economy as they widened their respective positions. Meanwhile, the households (HHs), the other depository corporations (ODCs), and the CB remained net creditors.⁴ The other financial corporations (OFCs) reverted to a net creditor in Q4 2022 from its net debtor position in Q3 2022.⁵

A comparative illustration of the financial interconnectedness and cross-sectoral dependencies in Q3 2022 and Q4 2022 is presented as network maps in Figure 1.

Figure 1: Network of Balance Sheet Exposures of the Philippine Economy

Notes: The node size reflects the magnitude of a sector's net financial position as of the periods indicated. The arrow width reflects the magnitude of a sector's net exposure to its counterpart. The arrow direction reflects the flow of funds from a sector to its counterpart.

- A presentation of the country's financial balance sheets on a from whom-to-whom (WTW) basis using the aggregate balance sheet data of each sector of the economy. It is a financial stability surveillance tool developed by the International Monetary Fund (IMF), which is used to better monitor the potential vulnerabilities of economic sectors and their interactions with one another. The BSA is also useful in identifying the possible emergence of a financial crisis, specifically those arising from asset-liability mismatches and increasing balance sheet interlinkages.
- ² The sectoral statistics are provided in Annex C. Table 1 contains the comparative statistics as of Q4 2021, Q3 2022, and Q4 2022. Table 2 contains the comparative statistics on the external financial assets and liabilities of the domestic economy and the sectoral gross financial assets and liabilities, by instrument, as of Q4 2021, Q3 2022, and Q4 2022. Table 3 presents the historical series for the net financial positions, gross financial assets, and gross financial liabilities from Q1 2021 to Q4 2022.
- ³ The NFCs, both private and public, are institutional units that are principally engaged in the production of market goods and non-financial services. Meanwhile, the GG covers the Central Government (i.e., National Government [NG] and extrabudgetary units composed of the Philippine National Railways [PNR] and National Irrigation Administration [NIA]), Local Government Units (LGUs), and Social Security Funds (SSFs).
- ⁴ The ODCs are composed of Universal/Commercial Banks (U/KBs), Thrift Banks (TBs), Rural and Cooperative Banks (RCBs), non-banks with quasi-banking functions (NBQBs), non-stock savings and loan associations (NSSLAs), money market funds (MMFs), and offshore banking units (OBUs).
- ⁵ The OFCs include the following: 1) trust entities, 2) private and public insurance companies, 3) pre-need companies, 4) holding companies, 5) government financial institutions (specifically government corporations engaged in financial intermediation), 6) non-money market funds covering unit investment trust funds and investment companies, and 7) other financial intermediaries and auxiliaries (consisting of non-banks without quasi-banking functions).

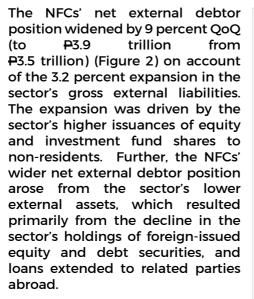

Department of Economic Statistics

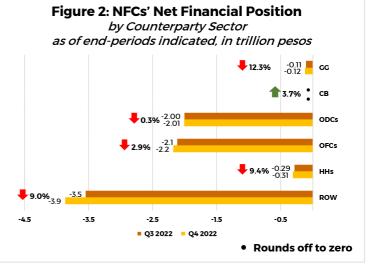

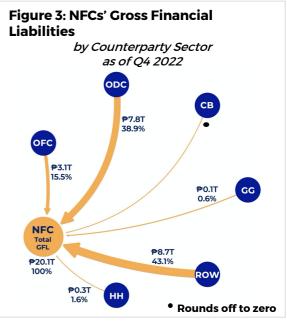

On a year-on-year (YoY) basis, the country's net external liability position soared by 47.7 percent (to P2 trillion from P1.3 trillion) as the increase in external financial liabilities outpaced the growth in external financial assets. The increase in the domestic economy's gross external liabilities was driven mainly by the higher indebtedness of the GG and the NFCs to the rest of the world (ROW) (Annex C – Table 1.3). Meanwhile, the increase in the economy's gross external assets, which was due primarily to the NFCs' higher external claims, was tempered by the decrease in the CB's external assets (Annex C – Table 1.2). As of Q4 2022, the domestic economy's assets and liabilities against the ROW were comprised mostly of loans, equity and investment fund shares, and debt securities (Annex C – Table 2.1).⁶

The key developments and cross-sectoral exposures of the net debtors and net creditors are as follows:

The NFCs continue to rely on crossborder funds. The NFCs remained the largest net debtor as its net financial liability position widened by 5.3 percent (to trillion **₽**8.5 from ₽8.1 trillion) mainly because of the sector's higher net indebtedness against the ROW (Figure 1: larger red node for NFC in O4 2022 and thicker orange arrow from ROW \rightarrow NFC).

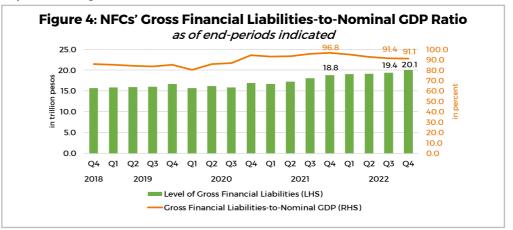

⁶ Investment fund shares are units issued by all kinds of investment funds, including money market funds (MMFs) and non-MMF investment funds, that represent a claim on part of the value of an established investment fund. MMFs are invested primarily in short-term money market instruments such as treasury bills, certificates of deposit and commercial paper. Meanwhile, non-MMFs are invested predominantly in long-term financial assets, such as equity shares, bonds, and mortgage loans, and non-financial assets, such as real estate. Source: Monetary and Financial Statistics Manual and Compilation Guide, International Monetary Fund

The ROW, the ODCs, and the OFCs remained as the NFCs' major sources of funds with a combined share of 97.5 percent of the sector's total liabilities (Figure 3). The NFCs were largely reliant on cross-border funds as almost half (43.1 percent) of the sector's gross financial liabilities consisted of obligations to non-residents.

By instrument, the external obligations of the NFCs were comprised mostly of equity and investment fund shares and loans (48.6 percent and 43.8 percent, respectively).

During the quarter, the economy's growth in nominal terms exceeded the increase in the NFCs' gross financial liabilities. Consequently, the sector's liabilities-to-Gross Domestic Product (GDP) ratio decreased slightly to 91.1 percent (Figure 4).⁷

Consistent with its QoQ net financial position movement, the NFCs' net debtor position widened by 4.9 percent YoY (to \pm 8.5 trillion from \pm 8.1 trillion). This stemmed from its higher net indebtedness to the ODCs, which was partly tempered by its lower net indebtedness to the OFCs. The expansion in the sector's net debt to the ODCs resulted mainly from the rise in bank loans availed to sustain operations amid heightened consumer demand brought about by the improved economic outlook.⁸ Meanwhile, the NFCs' lower net financial liability position to the OFCs stemmed from the increase in the sector's holdings of OFC-issued equity and investment fund shares.

The GG's funding gap increases.

The GC's net debtor position increased by 6.3 percent QoQ (to P8.2 trillion from P7.7 trillion) (Figure 1: larger red node for GG in Q4 2022). This resulted primarily from the sector's higher net indebtedness to the CB (Figure 1: thicker pink arrow from CB \rightarrow GG), which was partly mitigated by the decline in the sector's net debtor position to the ODCs (Figure 1: thinner blue arrow from ODC \rightarrow GG).

The GC's net financial liabilities to the CB expanded by more than fourfold QoQ (to P973.3 billion from P213.4 billion) (Figure 5). This was due to the GC's deposit withdrawal from the CB, amounting to P791.4 billion, which was used to meet the sector's higher operating expenditures during the last quarter of the year.

Department of Economic Statistics

⁷ Liabilities-to-GDP ratio was calculated by dividing the sector's gross financial liabilities by the annualized nominal GDP (i.e., sum of the nominal GDP for the current and immediately preceding three (3) quarters). Nominal GDP was used as the BSA reflects the current values of the assets and liabilities of the institutional sectors as of a given period. Source: National Accounts of the Philippines (NAP) as of 12 May 2023, Philippine Statistics Authority (PSA), and BSP staff estimates

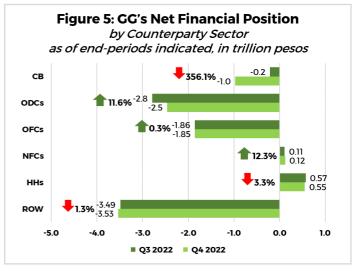

⁸ Source: Q4 2022 Senior Bank Loan Officer Survey (SLOS), Bangko Sentral ng Pilipinas (BSP)

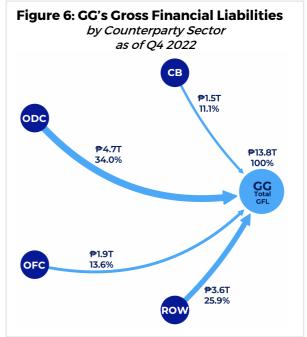

The expansion in the GG's net financial liability position against the CB offset the was by 11.6 percent decrease in the sector's net indebtedness to the ODCs. In O4 2022, the GG's net debtor position to the ODCs declined (to P2.5 trillion from P2.8 trillion) largely on account of the a) increase in the GG's deposits with the ODCs and b) the decline in the ODCs' holdings of government securities (GS).

The GG remained partly insulated from exchange rate fluctuations as 74.1 percent of the GG's liabilities were funded by the domestic sectors.9 By sector, the financial corporations (FCs) held 58.8 percent of the GG's financial liabilities (Figure 6).10 By type of instrument, the sector's debt was comprised mostly of GS and loans (Annex C - Table 2.3).

GS, which made up 84 percent of the sector's total financial liabilities, increased marginally by 0.2 percent and reached P11.6 trillion in Q4 2022 (Figure 7). These were held by the ODCs (39 percent), the OFCs (16.2 percent), the ROW

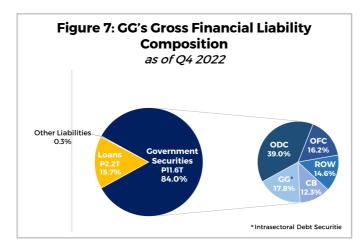

(14.6 percent), and the CB (12.3 percent). Loans, which were owed mostly to external creditors, decreased by 0.6 percent QoQ to P2.2 trillion as the impact of the peso appreciation against the US dollar more than offset the availment of external loans.¹¹

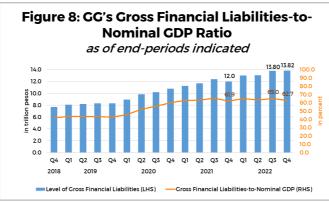

⁹ By sector, 25.9 percent of the GG's total debt was owed to non-residents. By type of currency, 29.6 percent of total GG debt was in foreign currency.

¹⁰ The FCs are comprised of the CB, the ODCs, and the OFCs.

¹¹ The Philippine peso appreciated against the US dollar to reach P55.82 in Q4 2022 from P58.65 in Q3 2022. Source: Philippine Peso per US Dollar Rates, BSP

Notwithstanding the record-high debt levels, the growth in the GDP outpaced the increase in the GG's level of borrowings in Q4 2022. As result. the sector's а liabilities-to-GDP ratio decreased to 62.7 percent 2022 in Q4 from 65 percent in Q3 2022 (Figure 8).¹²

On an annual basis, the GG's net debtor position rose bv 18.7 percent P8.2 trillion (to from P6.9 trillion). This was caused primarily by the increase in loans from the ROW and higher GS issuances, which were bought by the ODCs, the ROW, and the OFCs. Likewise, the GG's deposit withdrawals from the CB resulted to the YoY increase in the sector's net

financial liability position.

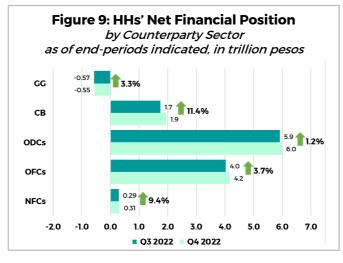

The HHs' financial assets continue to rise.

The HHs continued to be the top net creditor of the economy as the sector's net financial asset position increased by 4.1 percent QoQ (to P11.9 trillion from P11.4 trillion) (Figure 1: larger blue node for HH in Q4 2022), which stemmed from the sector's higher net claims on the CB and the OFCs (Figure 1: thicker green arrows from HH \rightarrow CB and HH \rightarrow OFC).

The sector's net claims against the CB, which were composed mainly of the HHs' currency holdings, rose by 11.4 percent (to P1.9 trillion from P1.7 trillion) (Figure 9). Similarly, the sector's net creditor position with the OFCs grew by 3.7 percent (to P4.2 trillion from P4 trillion), following the increase in the HHs' investments in OFC-issued equity and investment fund shares as well as insurance, pension, and standardized guarantee schemes.

¹² Part of the measurable medium-term macroeconomic and fiscal objectives set forth in the 2022-2028 Medium-Term Fiscal Framework (MTFF) adopted by Congress in Q3 2022 included the target of bringing down the NG debt-to-CDP ratio to less than 60% by 2025. Source: 2022-2028 MTFF, Senate of the Republic of the Philippines

QoQ Following its development, the HHs' net financial asset position expanded YoY by 14.2 percent (to P11.9 trillion from P10.4 trillion). This ensued on account of the sector's higher net claims on the OFCs and the ODCs, which grew by 17.9 percent 10.2 and percent, respectively. The HHs' higher claims from these counterparty sectors were mostly holdinas of equity and investment fund

shares from the OFCs and deposits with the ODCs.

Amid the steady increase in the HHs' assets, the sector's gross financial liabilities, bulk of which were loans from banks and OFCs, registered double-digit YoY growth rates for the last two quarters of 2022 – the fastest recorded since the onset of the pandemic in Q1 2020.¹³ This coincided with the steeper increase in the prices of goods and services as headline inflation accelerated to 7.9 percent in Q4 2022, faster than the 3.6 percent recorded in Q4 2021.¹⁴ Despite the faster increase in its financial liabilities, the HHs' stock financial assets were three times more than the amount of its financial obligations.

The ODCs'The ODCs' net creditor position eased by 2.8 percent QoQ (to P1.89 trillion from
P1.95 trillion) (Figure 1: slightly smaller blue node for ODCs in Q4 2022).position eases.P1.95 trillion) (Figure 1: slightly smaller blue node for ODCs in Q4 2022).The sector's lower net creditor position during the quarter resulted mainly from
its lower net claims on the GG along with its higher net financial liabilities to the
OFCs. However, the QoQ decline in its net creditor position was partly cushioned
by the increase in the sector's net financial assets with the CB.

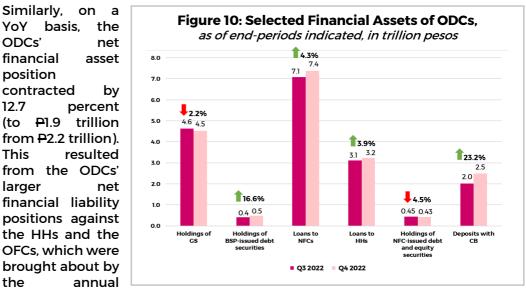

In Q4 2022, the sector's net claims on the GG declined due to the 12.9 percent increase in the GC's deposits in banks. Meanwhile, the ODCs' net debtor position to the OFCs widened on the back of higher deposit placements from the counterparty sector. The OFCs' deposits in banks increased by 30.8 percent QoQ (Figure 1: thicker purple arrow from OFC \rightarrow ODC).

These developments were tempered by the 21.2 percent growth in the sector's net assets with the CB (Figure 1: thicker brown arrow from ODC \rightarrow CB). The ODCs' deposits with the CB, which were mostly placements in the BSP's overnight and term deposit facilities, grew by 23.2 percent QoQ to reach P2.5 trillion from P2 trillion (Figure 10).

¹³ The HHs' gross financial liabilities registered YoY growth rates of 10.3 percent and 11.1 percent in Q4 2022 and Q3 2022, respectively. Meanwhile, the HHs' gross financial assets registered YoY growth rates of 12.9 percent and 12.3 percent in Q4 2022 and Q3 2022, respectively.

¹⁴ Source: Philippine Statistics Authority

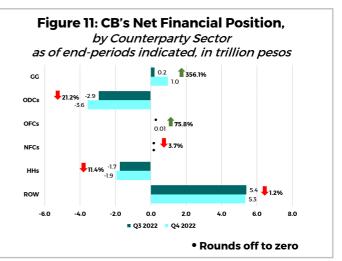

increase in deposits from both sectors. However, the effect of these movements was mitigated by the expansion in the sector's net creditor position against the NFCs as bank lending increased due to higher loan demand.¹⁵

The CB's net creditor position declines on hiaher net liabilities with the ODCs and the HHs.

12.7

the

The CB's net creditor position contracted by 13.5 percent QoQ (to ₽811.4 billion from ₽937.9 billion) (Figure 1: smaller blue node for CB in Q4 2022). This ensued as the CB's net financial liability positions to the ODCs and the HHs increased by 21.2 percent and 11.4 percent, respectively (Figure 11). The CB's higher financial liabilities to these counterparties were due

mainly to the expansion in the deposits of the ODCs and currency holdings of the HHs (70 percent of the sector's total financial obligations combined).

The developments above were mitigated by the 356.1 percent increase in the CB's net financial asset position with the GG, which resulted from the substantial decline in deposits from the NG.

On a YoY basis, the CB's net creditor position grew by 5.2 percent (to P811.4 billion from P771.3 billion) as the NG's deposit withdrawals further reduced the CB's gross liabilities. However, the decrease in the CB's gross financial liabilities was tempered by the YoY decline in the country's gross international reserves, which lowered the sector's external assets.¹⁶

¹⁵ The Philippine Banking System (PBS) loans outstanding to productive sectors (excludes Financial and Insurance Activities and Public Administration and Defense; Compulsory Social Security) grew by 10.3 percent YoY to #8.8T in Q4 2022 from P8T in Q4 2021. Source: PBS Loans Outstanding for Production and Consumption, BSP

¹⁶ The GIR settled at \$96.1B in Q4 2022, lower than the \$108.8B recorded in Q4 2021. Source: BSP
