¹ With the introduction of the Financial Reporting Package (FRP) in March 2008, data from December 2001 to February 2008 were reformatted to conform to the new format under the FRP. Excludes interbank loans and transactions of local banks' foreign offices.

² Data may include loans to other sectors integrated with agriculture such as trading of agricultural and fishery products and manufacturing of agri-and fishery-based commodities.

³ Includes residential loans

⁴ Excludes residential loans

⁵ In the old series, loans to nonresidents were lodged together with those of residents and classified according to economic sector. Since the old database did not provide for a separate category on loans

to non-residents, the 2007 data of the present series were based on the reports of a few banks which could readily identify and estimate the non-resident account.

Details may not add up to total due to rounding.
