 - a. reduce the claim of the instrument in liquidation;
 - b. reduce the amount re-paid when a call is exercised; and
 - c. partially or fully reduce coupon/dividend payments on the instruments.
14. The conversion to common shares or write-off of capital instruments prompted by the breach of the trigger point does not preclude the Bangko Sentral from requiring further conversion or write-off upon the occurrence of the trigger event.

RISK DISCLOSURE REQUIREMENTS ON LOSS ABSORBENCY FEATURES OF CAPITAL INSTRUMENTS

The following are the risk disclosure requirements on the loss absorbency features of Additional Tier 1 (AT1) and Tier 2 (T2) capital instruments eligible under the BASEL III framework which aim to uphold investor protection through enhanced disclosure and transparency.

When marketing, selling and distributing AT1 and T2 instruments eligible as capital under the Basel III framework, banks/QBs must:

- a. Subject investors to a client suitability test to determine their understanding of the specific risks related to these investments and their ability to absorb risks arising from these instruments;
- b. Provide the appropriate Risk Disclosure Statement for the issuance of AT1 and T2 capital instruments. The said disclosure statement shall explain the loss absorbency feature for AT1 and T2 capital instruments as well as the resulting processes that will be effected when the triggers for loss absorbency are breached;
- c. Secure a written certification from each investor stating that;
 - (1) The investor has been provided with a Risk Disclosure Statement which, among others, explains the concept of loss absorbency for AT1 and T2 capital instruments as well as the resulting processes should the case triggers are breached;
 - (2) The investor has read and understood the terms and conditions of the issuances;
 - (3) The investors are aware of the risks associated with the capital instruments; and
 - (4) Said risks include permanent write-down or conversion of the debt instrument into common equity at a specific discount;
- d. Make available to the Bangko Sentral, as may be required, the:
 - (1) Risk Disclosure Statement;
 - (2) Certification cited in Item "c(3)" above duly signed by the investor; and
 - (3) Client Suitability Test of the investor.

**LOSS ABSORBENCY REQUIREMENTS FOR ADDITIONAL TIER 1 CAPITAL
AND TIER 2 CAPITAL AT THE POINT OF NON-VIABILITY**

1. AT1 and AT2 capital instruments are required to have loss absorbency features at the point of non-viability.
2. Upon the occurrence of the trigger event, AT1 and T2 capital instruments should be able to absorb losses either through:
 - a. conversion to common shares; or
 - b. write-off mechanism which allocates losses to the instrument.

3. AT1 and T2 capital instruments will then be converted to common shares or written off upon the occurrence of the trigger event.

The trigger event occurs when a bank/QB is considered non-viable as determined by the Bangko Sentral. Non-viability is defined as a deviation from a certain level of CET1 Ratio, inability of the bank/QB to continue business (CLOSURE) or any other event as determined by the Bangko Sentral, which ever comes earlier.

4. The write-off or conversion to common equity must generate CET1 and Total Capital under the relevant accounting standards. The instrument will only receive recognition in T1 and total capital up to the amount of CET1 generated by a full write-off of the instrument.
5. In the absence of any contractual terms to the contrary, AT1 capital instruments shall be utilized first before T2 capital instruments are converted or written off, until viability of the bank is re-established.
6. In the event that the bank/QB does not have any AT1 instruments, then the conversion/write off shall automatically apply to T2 capital.
7. The bank/QB has the option to choose its main loss absorption mechanism at the point of non-viability which must be explicitly provided in the terms and condition of the issuance of the instruments.

In case the conversion mechanism was chosen as an option, the terms and condition of the issuance shall likewise provide that in case, said conversion cannot be implemented due to certain legal constraints, the write-off mechanism shall take effect.

8. Banks/QBs opting to use the conversion mechanism must address all legal impediments and obtain all prior authorization to ensure immediate recapitalization through conversion when the trigger event occurs. Failure to satisfy these requirements would render the instruments ineligible for inclusion as either AT1 capital or AT2 capital.
9. Banks/QB must make the necessary adjustments to their Articles of Incorporation to accommodate the conversion of capital instruments to common shares for loss absorbency at the point of non-viability. Moreover, banks/QBs must ensure that it has an appropriate buffer of authorized capital stock.
10. Where AT1 or T2 capital instruments provide for conversion into common shares when the trigger event occurs, the issue documentation must include among others:
 - a. the specific number of common shares to be received upon conversion, or specify the conversion formula for determining the number of common shares received; and
 - b. number of shares to be received based on the specified formula.

Provided, That the capital instruments converting into ordinary shares shall have a maximum conversion rate of fifty percent (50%) of the ordinary share price at the time of issue.

11. In issuing AT1 or AT2 capital, the bank may:
 - a. differentiate between/among instruments as to whether the instrument is required to be converted or written off upon the occurrence of the trigger event; and
 - b. provide for a hierarchy as to which instruments will be converted or written off among the AT1 capital instruments as well as among the T2 capital instruments.
12. Where the issue documentation provides for a ranking of the conversion or write-off, the terms attached to such hierarchy must not impede the ability of the capital instrument to be immediately converted or written off, as required.
13. Written commitment to undertake the necessary actions to effect the conversion must be accomplished by the bank/QB. Otherwise, the write-off mechanism will take effect as the main loss absorbency mechanism.

14. Where, upon the occurrence of the trigger event, the conversion cannot be undertaken, the write-off mechanism shall likewise take effect.
15. The write-off mechanism shall have the following effects:
 - a. reduce the claim of the instrument in liquidation;
 - b. reduce the amount re-paid when a call is exercised; and
 - c. partially or fully reduce coupon/dividend payments on the instruments.
16. In case of bank closure prior to the breach of the trigger event, a provision that provides for automatic write-off of AT1 and T2 instruments must be included in the terms and conditions of the issuance.

GROUP TREATMENT

17. The relevant jurisdiction in determining the trigger event is the jurisdiction in which the capital is being given recognition for regulatory purposes. However, the group treatment will only apply to wholly-owned subsidiary banks/QB.
18. Where an issuing bank/QB is a subsidiary of a wider banking group regulated by the Bangko Sentral or its parent wishes the instrument to be included in the capital of the consolidated group in addition to its solo capital, the terms and conditions of the subsidiary bank/QB AT1 and T2 capital instruments must specify an additional trigger event as follows:

AT1 and T2 capital instruments will be converted to common shares or written off once the parent bank is considered non-viable.
19. In case of a Bangko Sentral supervised entity that is a subsidiary of another institution that is not regulated by the Bangko Sentral, if the instruments are to be recognized as capital under Bangko Sentral requirements, in addition to the applicability of the trigger event, said instruments must provide that:
 - a. any supervisor of the parent entity cannot impede the right of Bangko Sentral to require the write-off or conversion of the instruments in relation to the Bangko Sentral supervised entity; and
 - b. any right of write-off or conversion by the parent supervisor must generate CET1 in the Bangko Sentral supervised entity.
20. Further, any common stock paid as compensation to the holders of the instrument must be common stock of either the issuing bank or the parent company of the consolidated group.

RISK DISCLOSURE REQUIREMENTS ON LOSS ABSORBENCY FEATURES OF CAPITAL INSTRUMENTS

- I. When marketing, selling and/or distributing AT1 and T2 instruments eligible as capital under the Basel III framework, in the Philippines, QBs must:
 1. Subject investors to a client suitability test to determine their understanding of the specific risks related to these investments and their ability to absorb risks arising from these instruments;
 2. Provide the appropriate Risk Disclosure Statement for the issuance of AT1 and T2 capital instruments. The said disclosure statement shall explain the loss absorbency features for AT1 and T2 capital instruments as well as the resulting processes that will be effected when the triggers for loss absorbency are breached;
 3. Secure a written certification from each investor stating that:
 - a. The investor has been provided a Risk Disclosure Statement which, among others, explains the concept of loss absorbency for AT1 and T2 capital instruments as well as the resulting processes should the case triggers are breached;
 - b. The investor has read and understood the terms and conditions of the issuance;
 - c. The investor is aware of the risks associated with the capital instruments; and
 - d. Said risks include permanent write-down or conversion of the debt instrument into common equity at a specific discount;
 4. Make available to the Bangko Sentral, as may be required, the:
 - a. Risk disclosure statement;
 - b. Certification cited in Item "3" above duly signed by the investor; and
 - c. Client suitability test of the investor.
- II. For offshore issuances of AT1 and T2 capital instruments, the risk disclosure requirements shall be governed by the applicable rules and regulations of the country where these instruments are issued.

The subsequent sale and/or distribution of AT1 and Tier 2 capital instruments in the Philippines, originally issued overseas, shall comply with all the risk disclosure requirements for issuance in the Philippines.

(Circular Nos. 1051 dated 27 September 2019 and 826 dated 14 February 2014)

**GUIDELINES ON THE CAPITAL TREATMENT OF BANKS' HOLDINGS OF
REPUBLIC OF THE PHILIPPINES GLOBAL BONDS PAIRED WITH WARRANTS**
[Appendix to Secs. 124-Q and 125-Q]

A QB's holdings of ROP Global Bonds that are paired with Warrants (paired Bonds), which give the QB the option or right to exchange its holdings of ROP Global Bonds into Peso-denominated government securities upon occurrence of a predetermined credit event, shall be risk weighted at zero percent (0%): Provided, That the zero percent (0%) risk weight shall be applied only to QB's holdings of paired Bonds equivalent to not more than fifty percent (50%) of the total qualifying capital, as defined under *Appendix Q-45*.

**GUIDELINES ON THE USE OF THE STANDARDIZED APPROACH IN
COMPUTING THE CAPITAL CHARGE FOR OPERATIONAL RISKS
(Appendix to Secs. 124-Q and 125-Q)**

QBs applying for the use of the Standardized Approach (TSA) must satisfy the following requirements/criteria:

General Criteria

1. The use of TSA shall be conditional upon the explicit prior approval of the Bangko Sentral.
2. The Bangko Sentral will only give approval to an applicant QB if at a minimum:
 - a. Its board of directors and senior management are actively involved in the oversight of the operational risk management framework;
 - b. It has an operational risk management system that is conceptually sound and is implemented with integrity; and,
 - c. It has sufficient resources in the use of the approach in the major business lines as well as in the control and audit areas.
3. The above criteria should be supported by a written documentation of the board-approved operational risk management framework of the QB which should cover the following:
 - a. Overall objectives and policies
 - b. Strategies and processes
 - c. Operational risk management structure and organization
 - d. Scope and nature of risk reporting/ assessment systems
 - e. Policies and procedure for mitigating operational risk
4. This operational risk management framework of the QB should be disclosed in its annual report, as provided under *Appendix Q-45*.

Mapping of Gross Income

5. QBs using TSA in computing operational risk capital charge must develop specific written policies and criteria for mapping gross income of their current business lines into the standard business lines prescribed under *Appendix Q-45*. They must also put in place a review process to adjust these policies and criteria for new or changing business activities or products as appropriate.
6. QBs must adopt the following principles for mapping their business activities to the appropriate business lines:
 - (a) Activities or products must be mapped into only one (1) of the eight (8) standard business lines, as follows:
 - (1) Corporate finance- This includes arrangements and facilities [e.g., mergers and acquisitions, underwriting, privatizations, securitization, research, debt (government, high yield), equity, syndications, Initial Public Offering (IPO), secondary private placements] provided to large commercial enterprises, multinational companies, NBFIs, government departments, etc.
 - (2) Trading and sales- This includes treasury operations, buying and selling of securities, currencies and others for proprietary and client account.
 - (3) Retail banking - This includes financing arrangements for private individuals, retail clients and small businesses such as personal loans, credit cards, auto loans, etc. as well as other facilities such as trust and estates and investment advice.
 - (4) Commercial banking –This includes financing arrangements for commercial enterprises, including project finance, real estate, export finance, trade finance, factoring, leasing, guarantees, bills of exchange, etc.
 - (5) Payment and settlement - This includes activities relating to payments and collections, inter-bank funds transfer, clearing and settlement.
 - (6) Agency services - This refers to activities of QBs acting as issuing and paying agents for corporate clients, providing custodial services, etc.

- (7) Asset management - This includes managing funds of clients on a pooled, segregated, retail, institutional, open or closed basis under a mandate.
- (8) Retail brokerage - This includes brokering services provided to customers that are retail investors rather than institutional investors.
 - (a) Any activity or product which cannot be readily mapped into one (1) of the standardized business lines but which is ancillary¹ to a business line shall be allocated to the business line to which it is ancillary. If the activity is ancillary to two or more business lines, an objective criteria or qualification must be made to allocate the annual gross income derived from that activity to the relevant business lines.
 - (b) Any activity that cannot be mapped into a particular business line and is not an ancillary activity to a business line shall be mapped into one (1) of the business lines with the highest associated beta factor eighteen percent (18%). Any ancillary activity to that activity will follow the same business line treatment.
 - (c) QBs may use internal pricing methods to allocate gross income between business lines: *Provided*, That the sum of gross income for the eight business lines must still be equal to the gross income as would be recorded if the QB uses the Basic Indicator Approach (BIA).
 - (d) The process by which QBs map their business activities into the standardized business lines must be regularly reviewed by party independent from that process.
- 7. In computing the gross income of the QB, the amounts of the income accounts reported in the operational risk template² must be equal to the year-end balance reported in the FRP. Any discrepancy must be properly accounted and supported by a reconciliation statement.

Application Process for the Use of TSA

- 8. QBs applying for the use of TSA should submit the following documents to their respective Central Points of Contact (CPCs) of the Bangko Sentral:
 - (a) An application letter signed by the president/CEO of the QB signifying its intention to use TSA in computing the capital charge for operational risk;
 - (b) Written documentation of the Board-approved operational risk management framework as described in paragraph 3.
 - (c) Written policies and criteria for mapping business activities and their corresponding gross income into the standard business lines as described in paragraphs 5 to 7.
 - (d) An overall roll-out plan of the QB including project plans and execution processes, with appropriate time lines.

Initial Monitoring Period

- 9. The Bangko Sentral may require a six (6)-month period of initial monitoring of a QB's TSA before it is used for supervisory capital purposes.

Reversion from TSA to BIA

- 10. A QB which has been approved to use TSA in computing its capital charge or operational risk will not be allowed to revert to the simpler approach, i.e., the BIA. However, if the Bangko Sentral determines that the QB no longer meets the qualifying criteria for TSA, it may require the QB to revert to BIA. The QB shall be required to repeat the whole application process should it opt to return to the use of TSA, but only after a year of using the BIA.

These guidelines shall take effect on 21 July 2007.

¹ Ancillary function is an activity/function that is not the main activity of a given business line but only as a support activity

² Part V of the revised CAR report template

**GUIDELINES ON THE PROHIBITION AGAINST THE USE OF FUNDS FROM NON-RESIDENT SOURCES FOR PLACEMENTS
IN THE BANGKO SENTRAL'S TDF AND ODF¹**
(Appendix to Sec. 601-Q (Prohibition against funds from non-residents being accepted in the TDF and ODF))

The TDF and ODF are monetary instruments deployed by the Bangko Sentral for the purpose of managing domestic liquidity in the financial system. These facilities should not be made available for opportunistic investment activities funded from non-resident sources. Furthermore, placements in the TDF and the ODF are contractual in nature and thus, shall be governed by the intent of the contracting parties. In keeping with the nature of this facility, all eligible banks shall not place in the TDF and in the ODF funds obtained, directly or indirectly, from non-residents.

An eligible QB is required to submit to the Bangko Sentral's Treasury Department a notarized Letter of Undertaking (LOU) (Annex "A") committing it is qualified as a counterparty of the Bangko Sentral TDF and the ODF.

It is the responsibility of an eligible QB to have in place the appropriate internal policies and monitoring and assurance mechanisms consistent with its LOU.

The Bangko Sentral reserves the right to verify compliance with the above conditions. Whenever the Bangko Sentral has reason to believe that an eligible QB is unable or unwilling to comply with the terms and conditions for the access to the TDF or the ODF, the Bangko Sentral may limit, suspend, or deny access by the subject QB to the TDF and/or the ODF.

The eligible QB shall report to the appropriate supervising department of the Bangko Sentral all existing TDF and ODF placements not consistent with these guidelines. Such placements shall not be renewed and shall be terminated upon maturity.

(Circular No. 995 dated 05 February 2018, Circular No. 961 dated 02 June 2017, M-2016-016 dated 18 November 2016 and Circular No. 913 dated 02 June 2016)

¹ The Monetary Board, in its Resolution No. 1945 dated 27 October 2016 approved the discontinuance of access of trust entities to the Bangko Sentral deposit facilities. Trust entities shall no longer have outstanding placement in the ODF and TDF by 30 June 2017.

**BASIC STANDARDS IN THE ADMINISTRATION OF TRUST, OTHER FIDUCIARY
AND INVESTMENT MANAGEMENT ACCOUNTS**
(Appendix to Sec. 401-Q)

I. Introduction

Trust and other fiduciary business and investment management activities have evolved with the changes in the financial market and advancement in technology. These innovations have allowed trust entities to expand the scope of trust products and services offered to customers, thus increasing their exposure to various risks. As trust entities grow more diverse, necessarily policies and procedures as well as risk management practices must keep pace. The basic standards would provide common processes for an efficient operation and administration of trust, other fiduciary and investment management activities across the trust industry.

II. Statement of Policy

It is the policy of the Bangko Sentral to provide adequate level of protection to investors who, under a fiduciary arrangement, engage the services or avail of products of trust entities which are required to observe prudence in the exercise of their fiduciary responsibility. Along this line, the Bangko Sentral prescribes basic standards for the efficient administration and operation of trust and other fiduciary business and investment management activities.

III. Standards

The basic standards in the administration of trust, other fiduciary and investment management accounts are meant to address the significant areas of operations and provide minimum set of requirements and procedures:

A. Account acceptance and review processes

1. Pre-acceptance account review

This review must document that the trust entity can effectively administer the account. It shall be covered by a written policy which shall contain, among other things, the types of trust, other fiduciary and investment management accounts that are desirable and consistent with the trust entity's risk strategies and the specific conditions for accepting new accounts, and approved by the Trust Committee, or the Trust Officer, or subordinate officer of the trust department, authorized by the board of directors or its functional oversight equivalent, in the case of foreign banks and institutions.

The review process entails the thorough and complete review of the client's/account's characteristics and investment profile, including the assets/ properties to be contributed/delivered. Non-financial/non-traditional assets (i.e., real estate and the like) which are more likely to be illiquid shall be carefully reviewed prior to acceptance to ensure that the trust entity only accepts accounts which hold assets it may be able to properly manage.

Prior to the acceptance of a fiduciary account, the trust entity shall review the underlying instrument (trust agreement or contract) for potential conflicts of interest. If such conflict exists, the trust entity shall take appropriate action to address such condition before the account is accepted.

In cases where the trust entity is chosen as a successor trustee or investment manager, the trust entity shall perform a review and evaluation of all assets to be delivered to the trust entity to determine how these would serve the client's objectives, whether the trust entity can properly handle such assets and to assess any possible issue/problem which may arise with respect to such assets before acceptance of such assets and/or assumption of the trust, fiduciary or investment management relationship.

1. Establishment and Post Acceptance Review

Acceptance policies for new accounts shall, at a minimum, include the following processes and/or requirements:

- a. Account opening process¹. This process defines the trust entity's policies and procedures for client/account identification, consistent with the trust entity's KYC policy for compliance with anti-money laundering regulations; identification of the needs of the client; the objective(s) of the engagement; the vehicle to be used; and the account's investment parameters. The trust officer or other authorized personnel of the trust department shall conduct the account opening process for trust, fiduciary and investment management accounts. In the case of UIT Funds, only authorized branch managers/officers as well as UIT marketing personnel, who have all successfully undergone the required certification/accreditation/licensing process, may perform said process for UIT Fund clients. The account opening process shall at least involve the following:
 - (a) As a general rule, client profiling shall be performed for all UIT Fund and regular trust, other fiduciary and investment management accounts via a duly acknowledged Client Suitability Assessment (CSA), which aims to provide the trust entity with information leading to the prudent design of investment packages, suited to a particular client or investment account. The CSA, however, shall not be required for the following trust and other fiduciary accounts:
 - (i) court trust;
 - (ii) legislated and quasi-judicial trust;
 - (iii) trust under indenture;
 - (iv) facility/loan agency;
 - (v) transfer agency;
 - (vi) depository and reorganization;
 - (vii) escrow;
 - (viii) custodianship;
 - (ix) safekeeping; and
 - (x) Institutional trust – pre-need plans.

The profiling process, to be documented through a CSA Form signed by the concerned parties, shall be undertaken on a per client basis, which shall emphasize the level of risk tolerance of the client.

- CSA

The trust entity shall obtain adequate information from the client to determine the appropriateness of the fiduciary product/ service to be provided and ensure the suitability of the investment product/ portfolio/strategy to be recommended to each client. It shall provide prospective clients with client suitability questionnaire and require them to accomplish the same prior to the acceptance of the account and execution of a transaction.

For this purpose, the trust entity shall make an assessment of the client's level of financial sophistication and consider factors relevant to the creation and management of, or participation in, an investment portfolio, such as but not limited to, the specific needs and unique circumstances of the client and/or beneficiary/(ies), basic characteristics of the clients' investment and experience, financial constraints, risk tolerance, tax considerations and regulatory requirements.

The same CSA process shall be applied by the trust entity for directional accounts.

- Minimum information required for CSA:

- i. Personal/Institutional data. Minimum personal/institutional information that are unique to a natural or juridical client, which shall also cover demographics and KYC information; the identity of beneficiaries, where applicable, and approximate portion of total assets administered/managed.
- ii. Investment objective. A clear statement or definition of the client's investment goals/purposes to be achieved through a particular trust, fiduciary or investment product

¹ Trust entities shall be given six (6) months from 01 August 2017 to make appropriate changes in their policies, processes, and procedures in order to comply with the above requirements.

or service. The client may opt to open several accounts, each one (1) with specific investment objectives separate and distinct from the other accounts.

- iii. Investment experience. A list of various types of investment the prospective client is familiar with, acquired from actual/ personal investment experience, or of similar investment circumstances.
- iv. Knowledge and financial situation. For complex transactions where the level of risk involved is greater, the trust entity must take into account the knowledge, experience and financial situation of the client or potential client to assess the level of investment sophistication. This may include the careful assessment whether the specific type of financial instrument/service/ portfolio/strategy is in line with the client's disclosed financial capacity.

Such assessment is necessary as there are significant risks involved on financial investments (e.g., derivatives), the type of transaction (e.g., sale of options), the characteristics of the order (e.g., size or price specifications) or the frequency of the trading.

- v. Investment time frame and liquidity requirement. The trust entity is able to organize the portfolio in a manner that will provide for anticipated liquidity requirement through redemption of principal contribution or earnings.
- vi. Risk tolerance. Allow the trust entity to classify clients in accordance with its own pre-set internal risk classification.

Based on the results of the CSA, classification of clients by the trust entity may include, but need not be limited to the following:

- i. *Conservative.* Client wants an investment strategy where the primary goal is to prevent the loss of principal, and where the client prefers investment grade and highly liquid assets, government securities, Republic of the Philippines' bonds (ROPs), deposits with local banks/branches of foreign banks operating in the Philippines, and/or deposits with financial institutions in any foreign country: *Provided*, That said financial institution has at least an investment grade credit rating from a reputable international credit rating agency. For purposes of investing in a unit investment trust funds (UITFs), a client wants an investment strategy where the primary objective is to prevent the loss of principal and where the fund is invested in securities issued by the National Government and/or deposits with local banks/branches of foreign banks operating in the Philippines and/or with financial institutions in any foreign country: *Provided*, That said financial institution has at least an investment grade credit rating from a reputable international credit rating agency.
- ii. *Moderate.* Client wants a portfolio which may provide potential returns on investment that are higher than the regular traditional deposit products and client is aware that a higher return is accompanied by a higher level of risk. Client is willing to expose the funds to a certain level of risks in consideration for higher returns.
- iii. *Aggressive.* Client wants a portfolio which may provide appreciation of capital over time and client is willing to accept higher risks involving volatility of returns and even possible loss of investment in return for potential higher long-term results.

- Investment policy statement

Trust entity managing discretionary accounts shall have in place a method by which suitability of investment is determined based on the results of the CSA and formulated via an Investment Policy Statement (IPS). It shall communicate to prospective clients the results of the assessment, recommend the investment product/portfolio/strategy, and explain the

reasons why, on the basis of the given information, its recommendation is to the best interest of the client as of a defined timeframe. The trust entity shall make a recommendation only after having reasonably determined that the proposed investment is suitable to the client's and/or beneficiary's risk profile/tolerance, financial situation, investment experience, and investment objectives.

The IPS is a clear reference frame for investment decisions and must be based on the investment objectives and risk tolerance of the client. It must include, at a minimum, a description of the following:

- i. Client's risk tolerance;
- ii. Investment and/or return objectives;
- iii. Liquidity requirements;
- iv. Investment horizon;
- v. Investment strategy and rebalancing;
- vi. Portfolio construction process, including asset allocation and security selection criteria;
- vii. Investment restrictions - identifying any limitation which the client may have for the portfolio such as, but not limited to, single/group exposure limits, investment restrictions (e.g., prohibited investments), and client's consent for taking losses; and
- viii. Investment performance review - indicating proposed market benchmarks and the desired frequency of the performance review reporting.

A trust entity shall review the IPS of each client, offer suggestions on clarifying any necessary changes in the IPS, and discuss with the client various techniques and strategies to be used to meet the client's investment goals. A trust entity shall have a mechanism in place to ensure that this review is done periodically and that only appropriate investments and investment strategies are included in a client's portfolio and are aligned with the IPS.

For UITF, the IPS is equivalent to the investment objective of the fund specifically stated in the Declaration of Trust.

- Option to client to re-classification

Generally, the trust entity shall recommend the investment product/portfolio/strategy suitable to the client based on the results of the CSA. The trust entity may, however, provide a process for allowing clients to invest in investment products/ portfolio/strategy with a higher risk than those corresponding to the CSA profile results. A client who exercises the option to be re-classified outside the CSA process thereby waives some of the protection afforded by these guidelines. Such re-classification may be allowed subject to the observance of the following:

- i. The client shall state in writing to the TE that –
 - He does not agree with or accept the recommendation of the trust entity on the investment product/portfolio/strategy appropriate to the client's profile based on the results of the CSA;
 - He would like to avail of the investment product/portfolio/strategy other than that which is consistent with the results of the CSA;

- He requests/intends to be re-classified, either generally or in respect to a particular investment/service/ transaction/product; and
- He fully understands and is willing to take the risks incidental to the investment product/portfolio/strategy to be availed of.
- ii. The trust entity shall issue a clear written warning to the client of the protections he may lose and conversely, of the risks that he is exposed to.
- iii. The trust entity shall have taken all reasonable steps to ensure that the client meets all relevant requirements as provided for in the trust entity's written policies.

For non-discretionary accounts, the trust entity shall observe the above requirements for every transaction allowing clients to invest in products/portfolio/strategy with a higher risk than those corresponding to their CSA profile results.

- Frequency of CSA and IPS

- i. The CSA shall be performed and the IPS shall be formulated and executed prior to the opening of the account;
- ii. The trust entity shall update the CSA and the IPS at least every three (3) years except in the following instances;
 - Whenever updates are necessitated by the client, upon notice/advise to the trust entity, on account of a change in personal/ financial circumstances or preferences, the trust entity shall adjust/modify its investment strategy/portfolio and recommendation, subject to the conformity of the client;
 - Whenever managed trust, other fiduciary, and investment management accounts express intention to invest in complex investment products such as financial derivatives, the trust entity shall ensure that the CSA and the IPS are updated at least annually. Otherwise, the trust entity shall not make new/additional investments in complex investment products.
- iii. The trust entity shall ensure that periodic written notices given to clients reminding them of such updates are received/acknowledged by clients or their authorized representatives;
- iv. Updated CSA and IPS shall be acknowledged by the client;
- v. The frequency of review shall be included as a provision in the written agreement; and
- vi. The latest CSA and IPS will continue to be applied for any subsequent principal contributions to the account, until these are amended or updated by the client.
 - (a) Identification of degree of discretion granted by client to the trust entity. This process involves the determination of the extent of discretion granted to the trust entity to manage the client's portfolio.
 - (1) Discretionary. The trust entity has authority or discretion to invest the funds/ property of the client in accordance with the parameters set forth by the client; and
 - (2) Non-discretionary. Investment activity of the trust entity is directed by the client or limited only to specific securities or properties and expressly stipulated in the agreement or upon written instruction of the client.

- (b) Documentation. The trust, fiduciary or investment management relationship shall be formally established through a written legal document such as the trust or investment management agreement. The engagement documents shall clearly specify the extent of fiduciary assignments/ responsibilities of the trust entity and articulate the nature and limits of each party's status as trustor/principal or trustee/agent. Policies and procedures shall provide that trust or investment management agreements are signed by the trust officer, or subordinate officer of the trust department, or in the case of UIT Funds, branch managers/officers duly thorized by the board of directors.

The documentation process must also consider the following:

- (1) The Agreement must conform to the requirements provided under Sec. 413-Q (*Minimum documentary requirements*) for trust and other fiduciary accounts and Sec. 415-Q (*Minimum documentary requirements*) for investment management accounts. In addition, the Agreement shall contain the following provisions:
 - (i) A description of the services to be provided;
 - (ii) All charges relating to the services or instruments envisaged and how the charges are calculated;
 - (iii) The obligations of the client with respect to the transactions envisaged, in particular his financial commitments towards the trust entity; and
 - (iv) For engagements involving management of assets or properties, the degree of discretion granted to the trustee or agent must be clearly defined and stated in the agreement;
- (2) The Agreement shall be in plain language understandable by the client and/or personnel of the trust entity responsible for explaining the contents of the agreement to the client.
- (3) For complex investment products, such as financial derivatives instruments or those that use synthetic investment vehicles, the trust entity shall disclose to the client and require client's prior written conformity to the following:

Key features of investment services and financial instruments envisaged, according to the nature of such instruments and services;

 - (i) The type(s) of instruments and transactions envisaged;
 - (ii) The obligations of the trust entity with respect to the transactions envisaged, in particular, its reporting and notice obligations to the clients; and
 - (iii) An appropriate disclosure bringing to the client's attention the risks involved in the transactions envisaged.
- (4) In order to give a fair and adequate description of the investment service or financial instrument, the trust entity shall provide a clearly stated and easily understood Risk Disclosure Statement to its clients, which forms part of or attached to the trust, fiduciary or investment management agreement. The Risk Disclosure Statement shall contain, among other things, the following provisions:
 - (i) Cautionary statement on the general risks of investing or associated with financial intruments, i.e., if the market is not good, an investor may not be able to get back his principal or original investment. Such statement must be given due prominence, and not to be concealed or masked in any way by the wording, design or format of the information provided;

- (ii) If the investment outlet is exposed to any major or specific risks, a description and explanation of such risks shall be clearly stated; and
- (iii) Advisory statement that for complex investment products, said instruments can be subject to sudden and sharp falls in value such that the client may lose its/his entire investment, and, whenever applicable, be obligated to provide extra funding in case it/he is required to pay more later.

Additional risk disclosures may be provided as appropriate.

The trust entity must ensure that the trust, fiduciary and investment management agreements and documents have been reviewed and found to be legally in order.

B. *Account Administration*

It is the fundamental duty of a fiduciary to administer an account solely in the interest of clients. The duty of loyalty is a paramount importance and underlies the entire administration of trust, other fiduciary and investment management accounts. A successful administration will meet the needs of both clients and beneficiaries in a safe and productive manner.

Account administration basically involves three (3) processes, namely; (1) periodic review of existing accounts, (2) credit process and (3) investment process.

(1) *Periodic review of existing accounts*

The board of directors and Trust Committee shall formulate and implement a policy to ensure that a comprehensive review of trust, fiduciary and investment management accounts (including collective investment schemes such as UIT Funds) shall be conducted. The periodic review of managed accounts shall be aligned with the provisions on the review and updating of the CSA and IPS. The board of directors may delegate the conduct of account review to the Trust Officer or Trust Department Committee created for that purpose. The policy shall likewise indicate the scope of the account review depending upon the nature and types of trust, fiduciary and investment management accounts managed.

A comprehensive accounts review, which shall entail an administrative as well as investments review, shall be performed on a periodic basis to ascertain that the account is being managed in accordance with the instrument creating the trust and other fiduciary relationship. The administrative review of an account is taken to determine whether the portfolio/assets are appropriate, individually and collectively, for the account, while an investment review is used to analyze the investment performance of an account and reaffirm or modify the pertinent investment policy statement, including asset allocation guidelines. Whether the administrative and investment review are performed separately or simultaneously, the reviewing authority shall be able to determine if certain portfolio/assets are no longer appropriate for the account, (i.e., not consistent with the requirements of the client) and to take proper action through prudent investment practices to change the structure or composition of the assets.

The periodic review process also involves disclosure of information on the investment portfolio and the relevant investing activities. Regardless of the degree of discretion granted by the client to the trust entity, the former assumes full risk on the investment and related activities, and counterparties. Relevant changes in the trust entity's organization or investment policies that may affect the client's decision to continue the services of the trust entity shall be disclosed to the client.

In the case of non-discretionary public interest accounts such as employee benefit/ retirement or pension funds, due diligence review of the investment portfolio by the trust entity shall include providing investors with appropriate information needed to make an informed investment decision and avoid possible conflict of interest and self-dealing situations.

The trust entity should be able to show (in addition to the specific written directive from the client) what it has done in the exercise of due diligence and prudence on its part to protect the interest of the client and/or beneficiaries, especially for accounts of public interest like retirement/pension fund accounts.

The trust entity shall keep its clients informed of the investment and related activities by rendering periodic reports and financial statements prescribed under Sec. 435 (*To trustor, beneficiary, principal*) and as necessary. The types of reports and statements and the frequency of their submission must be clearly specified in the trust entity's written policies and procedures.

The trust entity shall also establish a system that enables a trust account representative or officer to periodically contact clients and/or beneficiaries to determine whether their financial objectives and circumstances have changed.

(1) Credit process

Each trust entity shall define its credit process in relation to the discharge of the trust entity's investment function. The process ensures credit worthiness of investment undertakings including dealings and relationship with counterparties. It also serves to institutionalize the independence of the credit process of the trust entity. The credit process must at least cover the following:

- a. *Credit policies.* Trust entities must clearly define its credit policies and processes, including the use of internal and external credit rating and approval process relative to the delivery of its instrument function. The trust entity can share credit information with the bank proper subject to proper delineation and documentation. The credit process shall show the following at the minimum:
 - i. Clear credit process flow, from initiation of the lending activities envisioned by the trust entity up to the execution of actual investment;
 - ii. Credit criteria and rating used;
 - iii. Manner by which the trust entity handles the information, including confidential and material data, which is shared between and among the departments, subsidiaries or affiliates of the trust entity; and
 - iv. Clear delineation of duties and responsibilities of each of the departments, subsidiaries and affiliates of the trust entity, where such groups or entities share the credit process.
- b. *Counterparty accreditation process.* The trust entity must clearly define the policies and the processes it will undertake to accredit counterparties, including the bank proper, and its subsidiaries and affiliates, for their investment trading functions. It may use or avail itself of the accreditation process of its bank proper provided there is proper delineation of functions. The counterparty accreditation process shall show the following at the minimum:
 - (i) Clear accreditation process flow from the initiation of credit activities up to the actual usage of lines;
 - (ii) Credit criteria and rating used;
 - (iii) Manner by which the trust entity handles the information, including confidential and material data, which are shared between and among the departments, subsidiaries or affiliates of the trust entity;
 - (iv) Usage, duties and responsibilities of each of the department, subsidiaries and affiliates of the trust entity, where there is sharing of credit lines between and among these concerned groups/entities; and
 - (v) Clear delineation of duties and responsibilities of each of the departments, subsidiaries and affiliates of the trust entity, where such groups or entities share the accreditation credit process.

(2) Investment process

This process defines the investment policies and procedures, including decision-making processes, undertaken by the trust entity in the execution of its fund/asset management function. The primary objective of such process is to create a structure that will assure trust entities observe prudence in investment activities at all levels, preservation of capital, diversification, a reasonable level of risk as well as undivided loyalty to each client and adherence to established structure for the trust entity's investment undertakings. The

investment process covers a broad range of activities; thus, the investment policies shall clearly outline the parameters that, at a minimum, include the following:

- a. *Overall investment philosophy, standards and practices.* A general statement of principles that guides the portfolio manager in the management of investments outlined in the board-approved policy, along with a discussion on the practices and standards to be implemented to achieve the desired result.
- b. *Investment Policies and Processes.* Defines the policies and the processes undertaken to create the portfolio to ensure the proper understanding of the client's preferences.
 - i. *Profiling of client.* Aims to understand the level of maturity of the client relevant to the creation of an appropriate portfolio.
 - ii. *Portfolio construction for custom-made portfolios.* Includes the process of researching and selecting recommended portfolio and setting objectives or strategies for diversification by types and classes of securities into general and specialized portfolios.
 - *Asset allocation.* Outlines the process and criteria for selecting and evaluating different asset classes identified to be appropriate for the client's profile and investment objective. It includes the allocation of desired tenors in conjunction with the client or portfolio profile based on the CSA or IPS. The asset allocation may be based on percentage to total funds managed by the trust entity or stated in absolute amount whichever is preferred by the client.
 - *Security selection.* Policies and procedures on the selection of investment outlets, including investment advisory, must be in place. This involves the selection of issuers for each of the identified asset classes. The process provides for the review of investment performance using risk parameters and comparison to appropriate benchmarks. It shall also identify the documentation required for all investment decisions.
 - *If the trust entity uses approved lists of investments,* there shall be an outline of the criteria for the selection and monitoring of such investments, as well as a description of the overall process for addition to and deletion from the lists.
 - *Benchmark selection/creation.* Selects or crafts the benchmarks to reflect the desired return of the portfolio and to measure the performance of the portfolio manager. The trust entity shall be required to measure performance based on benchmarks to gauge or measure the performance of the account. The trust entity must have clear definition of its benchmarking policy.
 - *Limits.* Identifies any limitations on portfolio management which the client may impose on the trust entity. These limitations have to be specific as to the nature of the portfolio, such as but not limited to, core holdings, investment in competitor companies, and companies engaged in vices.
 - *Risk disclosure statement.* A clear and appropriately worded statement/s to disclose different risks to clients of the various investment undertakings of the investment manager done in behalf of the client.
 - iii. *Internal policies on trade allocation.* Defines the institution's policies in ensuring timely, fair and equitable allocation of investments across investing portfolios.
 - iv. *Diversification of discretionary investments.* The trust entity shall have a policy on the general diversification requirements for asset administration, as well as the process implemented to monitor and control deviations from policy guidelines.
 - v. *A trust entity shall have access to timely and competent economic analyses and forecasts for the capital markets and other products in which its clients will be investing.* Trust entities engaged in more complex transactions may consider providing an economic and securities research unit that continually monitors global trends and capital markets.

This unit provides necessary forecasts of capital market expectations, currency relationships, interest rate movements, commodity prices, and expected returns of asset classes and individual investment instruments, which help the trust entity establish appropriate investment policies and strategies, select appropriate investments, and manage risks effectively.

- vi. The trust entity shall have a process that will confirm trust personnel with investment functions know and follow the board-approved investment policies and processes.
- c. Selection and use of brokers/ dealers. The quality of execution is an important determinant in broker selection. In selecting brokers/dealers, a trust entity must consider the following minimum standards and criteria:
 - i. Execution capability and ability to handle specialized transactions;
 - ii. Commission rates and other compensation;
 - iii. Financial strength, including operating results and adequacy of capital and liquidity;
 - iv. Past record of good and timely delivery and payment on trades;
 - v. Value of services provided, including research; and
 - vi. Available information about the broker from other broker customers, regulators, and self-regulated organizations authorized by the SEC.

The trust entity with large portfolio may opt to evaluate broker performance using a formalized point scoring system. A list of approved brokers shall be made available by the trust entity, reviewed periodically and updated at least annually.

- d. Best practices. The trust entity shall document best practices policies and processes to institutionalize proper safeguards for the protection of its clients and itself. At a minimum, the policies must include the following standards:
 - i. Best execution. The trust entity shall use reasonable diligence to ensure that investment trades are executed in a timely manner and on the best available terms that are favorable to the client under prevailing market conditions as can be reasonably obtained elsewhere with an acceptable counterparty. For related counterparties, no purchase/sale must be made for discretionary accounts without considering at least two (2) competitive quotes from other sources. The policy on best execution must document processes to warrant such execution is readily and operationally verifiable.
 - ii. Chinese wall. A clear policy on Chinese wall aims to protect the institution from conflict of interest arising from varying functions carried by the trust entity in relation to credit (debt), shareholder, and investment position taking. The policy shall state the duties and responsibilities of the trust entity and each department including that of the bank proper and subsidiaries and affiliates should transactions involve the concerned departments and entities.
 - iii. Personnel investment policies. These policies aim to ensure honest and fair discharge of investment trading functions of all qualified personnel. Qualified personnel are those that may have access to information on clients and investment position-taking of clients, investment manager or portfolios. The use of such information may be abused and detrimental to the clients. The policy shall state the duties and responsibilities of each qualified personnel in relation to trading and portfolio management activities including allowed and not allowed transactions as well as sanctions in case of violations.
 - iv. Confidentiality and materiality of Information. The trust entity must keep information about past, current and prospective clients confidential, unless disclosure is authorized in writing by the client or required by law and the information involve illegal activities perpetrated by the client. It must ensure safekeeping of confidential and material information and prevent the abuse of such information to the detriment of the institution or its clients.
 - v. Fair dealing. The trust entity shall document dealing practices to ensure fair, honest and professional practices in accordance with the best interest of the client and counterparties at all times and for the integrity of the market. It must ensure that any representations or other

communications made and information provided to the client are accurate and not misleading. The trust entity must also take care not to discriminate against any client but treat all clients in a fair and impartial manner.

vi. Diligence and reasonable basis. In conducting its investment services, the trust entity shall act with skill, and care and diligence, and in the best interests of its clients and the integrity of the market. The duty of due diligence is intertwined with the duty to maintain independence and objectivity in providing investment recommendations or taking investment actions. When providing advice to a client, the trust entity shall act diligently and make certain that its advice and recommendations to clients are based on thorough analysis and take into account available alternatives.

- The trust entity shall take all reasonable steps to execute promptly client orders in accordance with the instruction of clients.
- The trust entity, when acting for or with clients, shall always execute client orders on the best available terms.
- The trust entity shall ensure that transactions executed on behalf of clients are promptly and fairly allocated to the accounts of the clients on whose behalf the transactions were executed. Where a client opts not to accept the recommendation of the trust entity and chooses to purchase another investment product which is not recommended, the trust entity may proceed with the client's request/instruction, provided it shall document the decision of the client and highlight to him/her that it is his/her responsibility to ensure the suitability of the product selected.

vii. In-House or related party transactions handling. The trust entity shall define the policies in handling related- interest transaction to ensure that the best interest of clients prevails at all times and all dealings are above board. It must conform to the requirements of Secs. 413 and 415 (*Transactions requiring prior authority*) of the MORB.

viii. Valuation. The trust entity shall document the institution's valuation process to show the sources of prices, either market or historical value, and the formula used to derive the NAV of investment portfolios. Valuation shall be understood, compliant with written policies and operating procedures, and used consistently within the trust entity. The trust entity must ensure that the valuation processes of service providers, custodians, and other subcontractors are compatible with those of the trust entity and in compliance with relevant statutory or regulatory valuation standards.

Risk officers shall document the accuracy and reliability of all valuation processes and data sources and ensure that valuations are completed as required by internal policies and procedures and regulatory reporting standards.

e. Conflicts of interests. These may arise when the trust entity exercises any discretion where mutually opposing interests are involved. The most serious conflict of interest is self-dealing, which could include transactions such as an investment in related interests of the trust entity or purchase of securities from or through an affiliate. Such transactions must be fully disclosed and authorized in writing by clients. Because of the complexity and sensitivity of the issue, a trust entity must develop policies and procedures to identify and deal with conflicts of interest situations.

1. Account termination

Accounts may be terminated for a variety of reasons, including the occurrence of a specified event or upon written notice of either the client or the trust entity. The trust or investment management agreement shall provide for the terms and manner of liquidation, return and delivery of assets/ portfolio to the client. Generally, the trust entity's responsibilities include distribution to the client, the successor trustee and/or beneficiaries of the remaining assets held under trusteeship/agency arrangement, preparation and filing of required reports. The trust entity must ensure the risk control processes are observed when terminating accounts just as when accepting them.

The trust entity must have a general policy with respect to the termination of trust accounts, which policy shall take into consideration the general processes to be observed in the return or delivery of different types of assets, the possible modes of distribution, fees to be paid, taxes to be imposed, the documentation required to effect the transfer of assets, the provision of terminal reports, and whenever applicable, the timing of distribution, needs and circumstances of the beneficiaries. Should the trust entity anticipate possible issues or problems with respect to the termination of the account, such as the liquidation of certain assets or the partition or division of assets, these issues shall be disclosed to the client for proper disposition. The policy on the termination of trust, fiduciary and investment management accounts shall likewise include the approval process to be observed for the termination of these accounts as well as the reporting requirements for accounts terminated and closed.

(Circular Nos. 966 dated 11 July 2017)

**RISK MANAGEMENT GUIDELINES FOR TRUST AND OTHER FIDUCIARY BUSINESS AND
INVESTMENT MANAGEMENT ACTIVITIES**
(Appendix to Sec. 401-Q)

I. Introduction

Recent changes in the nature and complexity of fiduciary activities have underscored the need for an effective and sound risk management process. With the deepening of the capital market and the increasing complexity of the financial environment, the risk management practices and techniques employed by financial institutions should continuously improve and adapt to this evolving financial landscape.

These guidelines aim to provide principles-based guidance in the implementation of sound risk management practices for trust, other fiduciary business, and investment management activities. As such, the applicability of these guidelines shall depend on the size, complexity, and risk profile of the institution's fiduciary activities.

II. Statement of Policy

It is the policy of the Bangko Sentral ng Pilipinas to support the development of the Philippine financial market and promote adequate level of protection to investors through, full and fair disclosure on financial instruments covering banking and fiduciary activities. With the continuous emergence of complex financial products, investor protection is a significant concern in building investors' confidence in the Philippine financial market. It is in furtherance of this policy that Bangko Sentral prescribes risk management guidelines for fiduciary activities aligned with the basic standards in the administration of fiduciary products and services by trust entities.

III. Risk Management Principles for Fiduciary Activities

Risk management practices must be designed to ensure that exposures are well within trust entities capacity to manage and risks taken by the trust entity and its clients are consistent with their respective risk tolerance. Risk management practices shall also promote efficiency in the administration and operation of the fiduciary business; ensure adherence and conformity with the terms of the instrument or contract; and maintain absolute separation of property free from any intrusion of conflict of interest.

As fiduciary activities become more diverse and complex, an institutions' ability to effectively identify, measure, monitor and control risks should keep pace and continue to evolve. There is no single risk management framework that would effectively work for all trust entities due to differing size, business model, complexity of activities, and risk profile. Nevertheless, regardless of the structure in place, the framework shall cover the following key elements of sound risk management system:

- a. Active and appropriate oversight by the Board of Directors (BOD)/Trust Committee;
- b. Adequate risk management processes, policies and procedures;
- c. Appropriate risk measurement system, prudent risk limits, monitoring and management information system; and
- d. Comprehensive and effective internal control system, audit, and compliance program.

IV. Risk Associated with Fiduciary Activities

For purposes of these Guidelines, the following definitions of risks are adopted:

1. Credit/counterparty risk is the current and prospective risk to client's earnings or principal contribution arising from an obligor's failure to meet the terms of any contract with the trust entity or otherwise perform as agreed. Credit risk is found in all activities where success depends on counterparty, issuer or borrower performance.

It arises anytime fiduciary funds are extended, committed, invested, or otherwise exposed through actual or implied contractual agreements, and reflected in the client's financial statements. Credit/counterparty risk exists in the loan portfolio and other forms of credit accommodations.

2. Market risk is the current and prospective risk to client's earnings or principal contribution arising from changes in the value of the trust entity's holdings of investment portfolios. Market risk arises from dealing and position-taking activities in interest rate, foreign exchange and equity markets.
3. Liquidity risk is the current and prospective risk to client's earnings or principal contribution arising from a trust entity's inability to recognize or address unplanned changes in client's and/or beneficiary's needs thereby affecting the ability to liquidate assets quickly with minimal loss in value. The trust entity shall determine and maintain adequate level of liquidity in each accounts based on client-defined constraints/circumstances or product specifications.

4. Operational risk is the current and prospective risk to the non-bank financial institution's earnings or capital arising from fraud or error, and the inability of the trust entity to deliver products or services, maintain a competitive position and manage information. Operational risk is evident in each fiduciary product and service offered. As the fiduciary products and services become sophisticated or volume of activities expands, so does the level of operational risk. This risk encompasses product development and delivery, operational processing, systems development, and the internal control environment. Operational risk is present in the day-to-day operations of trust entities and in all aspects of fiduciary activities.

A part of operational risk is legal risk which arises from non-adherence with the terms of the fiduciary agreement and the potential that unenforceable contracts, lawsuits, or adverse judgments can disrupt or otherwise negatively affect the operations of a trust entity.

5. Compliance risk is the current and prospective risk to the NBF's earnings or capital arising from violation of laws, rules and regulations of regulatory authorities, prescribed practices or sound fiduciary principles, internal policies and procedures, and prudent ethical standards. Compliance risk also arises in situations where the laws or rules governing certain fiduciary products or activities of the trust entity may be ambiguous or untested. This risk exposes the trust entity to fines, payment of damages, and the voiding of contracts. Compliance risk can lead to limited business opportunities, reduced expansionary potential, unenforceability of contract or even adversely affect trust entity's reputation.
6. Strategic risk is the current and prospective risk to the non-bank financial institution's earnings and capital arising from adverse business decisions, improper implementation of decisions, or lack of responsiveness to industry changes. Strategic risk is a function of the compatibility of a financial institution's strategic goals, the business strategies developed to achieve those goals, the resources deployed in support of these goals, and the quality of implementation. The trust entity's internal characteristics must be evaluated against the impact of economic, technological, competitive, regulatory, and other environmental changes. Financial success requires a sound strategic planning process embraced by the board and senior management.
7. Reputation risk is the current and prospective risk to the non-bank financial institution's earnings and capital arising from negative publicity regarding the financial institution's fiduciary business practices. The negative public opinion can cause (a) clients to question or doubt the trust entity's integrity to engage in fiduciary activities which can result in the termination of fiduciary relationships, (b) litigation costs to increase, or (c) revenues to decline. Reputation risk affects the trust entity's ability to establish new fiduciary relationships or services, or continue servicing existing relationships. Since public's perception is critical in the fiduciary business, trust entities should exercise an abundance of caution in dealing with clients and the public in general.

V. Risk Management Process

A trust entity shall develop and implement a formal, comprehensive, and effective risk management program that outlines, among other things, the risk management processes that effectively identify, measure, monitor and control risks affecting the clients and the trust entity. These processes shall also recognize and address the differences in the needs, objectives and risk tolerance of the clients and the trust entity. An effective risk management program can serve as an early warning system that enables the trust entity to anticipate and/or pro-actively identify potential problems from arising which may result in unanticipated loss to the clients and the trust entity. A risk management program should:

1. *Identify risk.* Trust entities shall recognize and understand existing exposures or those that may arise from new products/services, acceptance of new clients, and changes in operating environment. They shall establish procedures that identify and address such risks prior to initiation of the activities. Risk identification is a continuing process that should be embedded in all phases of trust entity's activities and shall cover both the individual investment transactions and portfolio activities. Identifying risk also involves the determination of the desired level of exposures both for the trust entity and client after taking into account the willingness and the ability to absorb risks.
2. *Measure risk.* Trust entities shall have appropriate systems or tools in place that could adequately quantify or measure both their client and their own risk exposure/s. It shall be the trust entity's responsibility to ensure that the risk measurement tools can adequately and reliably capture and quantify exposures. Risk measurement tools shall be subjected to independent and periodic validation and review to ensure that they remain reliable and appropriate. Effective risk measurement systems assess the risks of both individual transactions and portfolios and ensure that the sophistication of the risk measurement tools remains proportionate to the complexity of exposures.
3. *Monitor risk.* Trust entities shall monitor risk levels to ensure timely review of risk positions and exceptions. Monitoring reports should be frequent, timely, accurate, and informative and should be distributed to clients/individuals and appropriate level of management to ensure corrective action, when necessary.
4. *Control risk.* Trust entities shall establish and communicate risk limits through policies, standards, and procedures that define responsibility and authority. The types and sophistication of control processes shall be consistent with the risk tolerance standards defined by the board of directors/Trust Committee and the client. Trust entities shall

implement a process for tracking and reporting exposures to monitor the trust entity's compliance with risk tolerance standards.

The risk management process for fiduciary activities should be structured and incorporated in the required basic standards in the administration of fiduciary products and services.

VI. Sound Risk Management System

Consistent with the guidelines on supervision by risk set forth under *Appendix Q-41*, the Bangko Sentral shall assess the suitability and adequacy of a trust entity's risk management system in accordance with the following elements:

A. Active Board and Senior Management Oversight

1. The board of directors and the Trust Committee shall perform their responsibilities in accordance with the applicable provisions of this Manual.
2. Independent Risk Management Function. To uphold the principles of undivided loyalty and impartiality, and discourage possible conflicts of interest, the process of measuring, monitoring, and controlling risks shall be managed as independently as practicable by a body or personnel apart from those individuals who have the authority to initiate transactions. The board-designated body or personnel performing independent risk management on fiduciary activities shall either be part of or directly report to the risk management unit/institution proper to ensure holistic implementation of enterprise-wide risk management framework. Nevertheless, the Board-designated body or personnel tasked to perform risk management function for fiduciary activities is not precluded to freely communicate with the trust officer or relevant trust committee any information relative to the discharge of its function.

B. Adequate Risk Management Processes, Policies and Procedures

The trust entity shall have board-approved written risk management policies and documentation standards which provide detailed guidance for the day-to-day implementation of the trust entity's strategies and generally include risk limits, operating procedures and control processes designed to safeguard the trust entity and its clients from excessive and imprudent risks. Terminologies relevant to trust, other fiduciary and investment management activities shall be specifically defined and clearly described through appropriate sample documents/exhibits to avoid the likelihood of incomplete communication, ambiguities and misinterpretations.

Policies shall provide an outline on the formal process for the board of directors/Management's review (at least annually), amendment and approval. In the case of personnel management, the policies and procedures shall provide for personnel recruitment, training, performance evaluation, and salary administration that must address staffing needs, and compensation programs. Effective risk management requires experienced and competent officers and supporting staff.

Policies and procedures shall delineate lines of responsibility and accountability. Copies of policies and procedures, including updates and changes, shall be promptly transmitted to all concerned personnel who are directly or indirectly involved in fiduciary activities. Policies and procedures shall, at the minimum, include:

1. Scope of fiduciary products and types of services offered to clients with clear description of each product and service;
2. Organizational structure;
3. Authorities and responsibilities of the:
 - a. Board of directors,
 - b. Trust committee,
 - c. Trust investment committee and other related committees,
 - d. Trust officer¹,
 - e. Trust Department/Branch/Unit Heads¹,
 - f. Account officers/marketing personnel, including those assigned in branches¹,
 - g. Trading or dealing officers and staff¹,
 - h. Backroom officers and staff¹,
4. Basic standards in the administration of trust, other fiduciary business and investment management activities;
5. Accounting and records maintenance;
6. Policy review;
7. System of financial and regulatory reporting; and
8. Client-oriented safety nets.

¹ including minimum qualification standards.

C. Appropriate Risk Measurement System, Prudent Risk Limits, Monitoring and Management Information System

The process of measuring, controlling and monitoring fiduciary risks shall be carried out independently by personnel not directly involved in fiduciary activities. Results of this process shall be reported to the board of directors, or to the appropriate Board-level committee, thru the risk management unit/institution proper in a timely and comprehensive manner. In the same manner, the trust officer or relevant trust committee should be apprised of the results of these processes and relevant risk management issues.

Risk Measurement System

In formulating the risk measurement models and methodologies for its fiduciary risk-taking activities, the trust entities shall be guided by the minimum requirements prescribed in *Appendices Q-42 and Q-43*, and the guidelines provided under *Appendix Q-19*, as applicable.

Trust entities are expected to adopt models/methodologies commensurate to the size, complexity and nature of the fiduciary activities undertaken. In addition, the trust entity's risk measurement system shall provide detailed guidelines on the:

- a. Frequency of risk measurement;
- b. Sources of data, i.e., market prices;
- c. Appropriateness of risk measurement tools given the complexity and level of risk assumed (including the reasonableness and validity of assumptions);
- d. Frequency of validation of risk measurement tools;
- e. Ability to measure risk at both transactional and portfolio levels; and
- f. Frequency of review of the risk measurement system by the board of directors and the trust committee.

Trust entities shall develop a liquidity contingency plan for its investment portfolios especially for the UITFs to demonstrate how liquidity funding needs will be handled in times of crises, as well as supplement their market and liquidity risk measurement models with periodic stress testing.

Prudent Risk Limits

Risk limits shall be established, approved and periodically reviewed by the board of directors or trust committee. In setting limits, the risk management policy shall include the determination of the experience, background and authority of individuals involved in setting portfolio limits, and the processes for setting and changing individual and portfolio limits; and shall recognize the restrictions/constraints that the client may impose on the trust entity. The risk management policy should also indicate when excess over approved limits may be allowed and the appropriate approving authority for such excess.

Limits must be documented and promptly communicated to all concerned personnel. Portfolio limits must be reviewed at least annually, but client-set limits must be reviewed at least quarterly to ensure consistency with the investment objectives set by the client and conformity to the terms of the contract.

Risk Monitoring and Management Information System (MIS)

Effective risk monitoring and control is dependent on accurate, timely, reliable, and relevant information processing and reporting systems. Rapid technology advancements create new risk monitoring and control issues, thus, the board of directors should ensure that the impact of emerging technologies on fiduciary activities is properly considered. The board of directors and Trust Committee shall be afforded with adequate information on the trust and investment management activities to properly fulfill their responsibilities. Accordingly, the trust entities shall have policies and procedures in reporting information on fiduciary activities to the board of directors and trust committee specifying, among other things, the type, amount and timing of information reported; methodology to ensure all identified risks are monitored; frequency, timeliness, accuracy and clarity of monitoring reports; report distribution to management and staff; and comparability of output against predetermined limits.

The sophistication of MIS shall be commensurate with the complexity and diversity of the trust entity's operations such that a complex trust entity shall have a more comprehensive MIS.

Because of the cost involved in developing technology, a trust entity may opt to purchase information technology rather than develop its own internal system. Nonetheless, regardless of the source of information system, the board of directors and Trust Committee shall exercise the proper level of control and oversight to appropriately fulfill their fiduciary duties. Service agreements or vendor contracts shall be thoroughly reviewed by legal counsel to ensure that they include appropriate indemnification and recourse language. In addition, contracts shall contain specific language recognizing the authority of the trust entity's regulators to conduct reviews of third-party vendors as part of their overall supervisory activities.

D. Comprehensive and effective internal controls, audit, and compliance program

Internal Control Systems

A comprehensive internal control is the foundation for the safe and sound functioning of a trust entity and its fiduciary risk management system. It shall form an integral part of the trust entity's overall system of controls and shall promote effective fiduciary operations and reliable financial and regulatory reporting, safeguard assets and help ensure compliance with relevant laws, regulations, and institutional policies.

Effectiveness of the internal control system shall be periodically tested by an independent party (preferably the auditor, or at least an individual not involved in the process being reviewed) who shall submit a formal report on the results of such testing/review directly to the board of directors or the audit committee. The review shall cover all material controls and shall consider:

- The change in the nature and extent of significant risks, and the trust entity's ability to respond to such changes;
- The scope and quality of management's ongoing monitoring of risks and of the system of internal control, and the work of its internal audit function;
- The extent and frequency of the communication of results of the monitoring to the board of directors or appropriate committee;
- The incidence of significant control failings or weaknesses that have been identified, and the extent to which they have resulted in losses or potential losses; and
- The effectiveness of the trust entity's reporting processes.

Given the importance of appropriate internal controls to an organization, management's response to results of the test/review should be documented.

The system of internal control shall set forth clear lines of authority and appropriate segregation of operational duties and functions to ensure independence of the control areas from the business lines. An organizational chart shall specify the reporting lines for risk management, compliance, and internal audit groups.

Audit Program

A well-designed and executed internal audit program is essential to effective risk management and provides an independent assessment of the efficiency and effectiveness of the internal control system.

An effective audit program shall be based on an appropriate risk assessment methodology that documents the trust entity's significant fiduciary activities and their associated risks, and internal control systems. Such documentation shall be available for review by the Bangko Sentral. It shall describe the objectives of specific audit activities and list the procedures to be performed during the process.

While the frequency and extent of the internal audit review and testing shall be consistent with the nature, complexity and risk of the trust entity's fiduciary activities, existing Bangko Sentral regulations require the conduct of periodic internal audits of the trust entity at least once every twelve (12) months. The board of directors may also require the adoption of a suitable continuous audit system to supplement or replace the periodic audit. In any case, the audit shall ascertain whether the trust entity's fiduciary activities have been administered in accordance with laws, Bangko Sentral rules and regulations, and sound fiduciary principles.

There shall also be a system that allows sensitive findings (e.g., defined non-observance of the basic principles on fiduciary relationships, unsafe and unsound practices, operational lapses/deficiencies resulting to recognition of material losses) to be reported directly to the board of directors. Moreover, the audit committee and/or board of directors shall review the effectiveness of the internal audit and other control review activities on a regular basis.

Bangko Sentral regulations also require annual external audit of the fiduciary activities of trust entities and of each unit investment trust fund by an independent auditor acceptable to the Bangko Sentral.

Compliance Program

The trust entity shall develop and implement a compliance system for its trust, other fiduciary business and investment management activities, and appoint/designate a compliance officer to oversee its implementation in accordance with Sec. 161-Q (*Compliance program*) and their corresponding subtopics respectively. The Board-designated body or personnel performing independent compliance function on fiduciary activities shall either be part of or directly report to the compliance unit/institution proper to ensure holistic implementation of enterprise-wide compliance program. Nevertheless, the Board-designated body or personnel tasked to implement the compliance program for fiduciary activities is not precluded to freely communicate with the trust officer or relevant trust committee any information relative to the discharge of its function.

The compliance system must provide a written and comprehensive compliance program designed to monitor observance with relevant laws, rules and regulations, internal policies including risk limits, internal control systems, fiduciary principles, and agreements with clients. The compliance system shall be periodically reviewed for relevance, effectiveness and appropriate follow-up.

The board of directors must recognize the scope and implications of applicable laws; approve a compliance program that protects the trust entity from adverse litigation, increased regulatory oversight, and damage to reputation; and ensure that the compliance officer primarily undertakes to oversee and coordinate the implementation of the compliance system.

The extent of formality of the compliance program may vary from one trust entity to another. Nevertheless, an effective compliance programs have common elements that include:

1. A strong commitment from the board of directors and Trust Committee;
2. A formalized program coordinated by a designated compliance officer that includes periodic testing and validation process;
3. Responsibility and accountability from line management;
4. Comprehensive training programs; and
5. Timely reporting and follow-up process.

GUIDELINES ON THE SUBMISSION OF APPLICATION FOR MERGER AND CONSOLIDATION
(Appendix to Sec. 103-Q)

The following guidelines and procedures shall be observed by non-bank financial institutions with quasi-banking functions (NBQBs) in their application for merger/consolidation:

1. The merging/consolidating entities shall comply with the safety and soundness test requirements as follows:
 - a. Compliance, especially by the acquiring NBQB, with major banking laws and regulations; and
 - b. Submission to the Bangko Sentral of a satisfactory action plan, if applicable, to address serious supervisory concerns.
2. Submission of the following documentary requirements simultaneously to the Bangko Sentral and the PDIC for merger/consolidation application involving only NBQBs;
 - a. Articles of Merger or Consolidation duly signed by the President or Vice- President and certified by the secretary or assistant secretary of each of the constituent institutions setting forth the following as required in Section 78 of the Corporation Code:
 - The Plan of Merger or Consolidation;
 - The number of shares outstanding; and
 - The number of shares voting for and against the Plan, respectively.
 - b. Plan of Merger or Consolidation setting forth the following:
 - The names of the constituent institutions;
 - The terms of the merger or consolidation and the mode of carrying the same into effect;
 - A statement of the changes, if any, in the Articles of Incorporation of the surviving institution in the case of merger; and in the case
 - Of consolidation, all the statements required to be set forth in the Articles of Incorporation;
 - Such other provisions with respect to the proposed merger or consolidation as are deemed necessary or desirable.
 - c. Resolution of the Board of Directors of the respective institutions approving the Plan of Merger or Consolidation. The resolution shall be certified under oath by the respective corporate secretaries of the constituent institutions;
 - d. Resolution of the meeting of the stockholders in which at least two-thirds (2/3) of the outstanding capital stock of each corporation have approved the plan of merger or consolidation. The resolution shall be certified under oath by the respective corporate secretaries of the constituent institutions;
 - e. Financial Statements:
 - Latest financial statements and three (3) - year audited financial statements of the merging institutions
 - Three (3) - year financial projections with valid assumptions of the merged or consolidated institutions' balance sheet and income statement.
 - f. List of merger incentives the bank will avail of;
 - g. List of stockholdings of each of the constituent institutions before and after the merger;
 - h. List of directors and officers of each of the merging/consolidating institutions;
 - i. List of proposed officers and directors of the merged or consolidated institution and the summary of their qualifications;
 - j. Organizational chart of the merged or consolidated institution including the number of offices and locations thereof;

- k. Inter-company transactions relative to the submitted Financial Statements;
 - l. Computation of Capital Adequacy Ratio on the submitted financial Statements;
 - m. Viable Operational Plan with the following components:
 - Marketing Strategies
 - Proposed Loan Portfolio Diversification
 - Deposit Generation
 - Proposed Improvements in Accounting System
 - Operational Control
 - Computerization Plan
 - Communication System
 - n. The appraiser's report of reappraisal of NBQB premises, if any, done by an independent and licensed appraiser;
 - o. Proposed increase of capital stock of surviving NBQB;
 - p. Proposed amendments in the Articles of Incorporation of surviving NBQB;
 - q. Director's Certificate (surviving NBQB) on the proposed amendment of the Articles of Incorporation increasing the authorized capital stock; and
 - r. Any other reasonable requirement deemed material in the proper evaluation of the merger or consolidation as may subsequently be requested by the Bangko Sentral and/ or PDIC.
3. For merger/consolidation involving a NBQB, the Bangko Sentral shall wait for PDIC consent before elevating the proposed merger/consolidation to the Monetary Board for approval; and
4. The authority given to merge/ consolidate the constituent entities shall be valid within six (6) months reckoned after Bangko Sentral approval.

GUIDELINES ON THE COLLECTION OF THE ANNUAL SUPERVISORY FEES

(Appendix to Sec. 1101-Q)

The following guidelines shall govern the collection by the Bangko Sentral and the payment by QBs of the Annual Supervisory Fees (ASF).

1. *Notification of amount due for ASF and mode of payment.* The appropriate supervising department of the Bangko Sentral shall send a billing notice to the QB for its ASF payment indicating, among others, the computation of the ASF due, including the two percent (2%) creditable withholding tax (CWT) thereon, if applicable, the period covered by the ASF and the specific date when the ASF will be debited from the QB's demand deposit account (DDA) with the Bangko Sentral.

The Bangko Sentral will not accept checks as mode of ASF payment. QBs, upon receipt of the ASF billing notice from the Bangko Sentral, should maintain adequate balance in their DDA to cover the ASF and other daily obligations and, when necessary, make corresponding deposits to fully cover said obligations. In case of deficiency, the provisions on DDA deficiency in Sec. 1101-Q shall apply.

2. *Exceptions noted on billing notice of ASF.* Upon receipt of the Bangko Sentral Notice of ASF billing, a QB is encouraged to check the accuracy of the billing and to submit any of the noted exceptions therein not later than ten (10) days before the specified date of collection/debit to DDA as indicated in the billing notice. The said exceptions, together with supporting documents, shall be submitted to:

The Director
Department of Supervisory Analytics (DSA)
Bangko Sentral Ng Pilipinas
11th Floor, Multi-Storey Building
BSP Complex, A. Mabini Street
Malate, Manila 1004

Any exceptions received after the cut-off date or any exception not duly substantiated with documents before the cut-off date will be evaluated and considered in the computation of the ASF for the immediate succeeding year.

3. *Withholding tax supervisory fees.* The following shall apply to QBs covered by Sections M and N of BIR Revenue Regulations (R.R.) No. 2-98, as amended by R.R. No. 17-2003 and R.R. No. 2-2006:
 - a. Within seven (7) days from specified date, the QB shall submit a written representation to the Bangko Sentral (at the address indicated in Item "2" hereof), on whether or not it is included among the institutions covered under Sections M or N of R.R. No. 2-98, as amended. If available, a certified true copy of the BIR Notice classifying it under Section M of R.R. No. 2-98, as amended, shall be attached to the written representation. The submission of the written representation or BIR Notice shall no longer be necessary if previously transmitted and received by the Bangko Sentral in connection with previous ASF assessments.
 - b. The ASF, net of the two percent (2%) CWT, shall be debited from their respective DDAs on the specified date referred to in the notice of ASF billing under Item "1".
 - c. Three (3) original signed copies of the BIR Form No. 2307 Certificate of Creditable Tax Withheld at Source, which exclusively pertain to the withholding on ASF shall be submitted to the DSA at the address provided in Item "2" above on specified date. The BIR Form No. 2307 shall accurately indicate, among others, the following details:
 - (1) Payee: Bangko Sentral ng Pilipinas
 - (2) Tax Identification Number: 000-354-790-000
 - (3) Address: A. Mabini St. corner P. Ocampo Sr. St., Malate, Manila
 - (4) Zip Code: 1004
 - (5) The BIR-registered name of the payor- QB, as exactly indicated in the BIR Certificate of Registration (BIR Form No. 2303) of the QB.
 - (6) the amount of income payment pertaining to the gross ASF
 - (7) the tax withheld
 - (8) the period of tax return.

Furthermore, the BIR Form No. 2307 – Certificate of Creditable Tax Withheld at Source covering the withholding on ASF should not include other transactions with Bangko Sentral and should pertain exclusively to the ASF. If the concerned QB has other transactions with Bangko Sentral, a separate BIR Form 2307 for the transaction/s shall be provided to Bangko Sentral.

- d. In case of failure of concerned QB to submit the duly accomplished forms within the deadline stated above or if such forms contain errors and discrepancies that would render the BIR Form No. 2307 invalid for claiming tax credits, the Bangko Sentral shall be constrained to immediately debit an amount equivalent to the two percent (2%) CWT from the DDA of QBs concerned, with no obligation on the part of the Bangko Sentral to reimburse said amount in case of late submission. In case of DDA deficiency, the provisions in Sec. 1101-Q shall apply.

(M-2019-009 dated 8 April 2019, Circular No. 903 dated 29 February 2016, M-2016-001 dated 24 February 2016, Circular No. 890 dated 02 November 2015, M-2015-022 dated 06 May 2015, and M-2014-014 dated 20 March 2014)

GUIDELINES ON BANKS' INTERNAL CAPITAL ADEQUACY ASSESSMENT PROCESS
(Appendix to Sec. 130-Q)

A. Introduction

1. This document sets out the broad guidelines that UBs and KBs (hereinafter referred to as 'banks') should follow in the design and use of their Internal Capital Adequacy Assessment Process (ICAAP). A bank's ICAAP supplements the Bangko Sentral's Risk-Based Capital Adequacy Framework (the Framework) as contained in existing regulations and, thus, must be applied on a group-wide basis, i.e., it should cover all of a bank's subsidiaries and affiliates.
2. Although the Framework prescribes the guidelines for determining banks' minimum regulatory capital requirements in relation to their exposure to credit risk, market risk and operational risk, a bank's Board of Directors and senior management are still ultimately responsible in ensuring that the bank maintains an appropriate level and quality of capital commensurate not just with the risks covered by the Framework, but also with all other material risks to which it is exposed. Hence, a bank must have in place an ICAAP that takes into account all of these risks.

B. Guiding Principles

1. Banks must have a process for assessing their capital adequacy relative to their risk profile (an ICAAP).
2. The ICAAP is the responsibility of banks. Banks are responsible for setting internal capital targets that are consistent with their risk profile, operating environment, and strategic/business plans. The ICAAP should be tailored to a bank's circumstances and needs, and it should use the inputs and definitions that a bank normally uses for internal purposes.
3. Banks' ICAAP (i.e., the methodologies, assumptions and procedures) and other policies supporting it (e.g., capital policy, risk management policy, etc.) should be formally documented, and they should be reviewed and approved by the board. The results of the ICAAP should also be regularly reported to the board.

In addition, the board and senior management are responsible for integrating capital planning and capital management into banks' overall management culture and approach. They should ensure that formal capital planning and management policies and procedures are communicated and implemented group-wide and supported by sufficient authority and resources.

Banks' ICAAP document should be submitted to the appropriate Central Point of Contact Department (CPCD) of the Bangko Sentral every 31 January of each year. A suggested format of the ICAAP submission to the Bangko Sentral is provided in *Annex A of Appendix Q-54*.

4. The ICAAP should form an integral part of banks' risk management processes so as to enable the board and senior management to assess, on an on-going basis, the risks that are inherent in their activities and material to their bank. This could range from using the ICAAP in more general business decisions (e.g. expansion plans) and budgets, to the more specific decisions such as allocating capital to business units, or to having it play a role in the individual credit decision process.
5. The ICAAP should be reviewed by the board and senior management at least annually, or as often as is deemed necessary to ensure that risks are covered adequately and that capital coverage reflects the actual risk profile of their bank. Moreover, any changes in a bank's strategic focus, business plan, operating environment or other factors that materially affect assumptions or methodologies used in the ICAAP should initiate appropriate adjustments to the ICAAP. New risks that occur in the business of a bank should be identified and incorporated into the ICAAP. The ICAAP and its review process should be subject to independent internal or external review. Results thereof should be communicated to the board and senior management.
6. Banks should set capital targets which are consistent with their risk profile, operating environment, and business plans. Banks, however, may take other considerations into account in deciding how much capital to hold, such as external rating goals, market reputation and strategic goals. If these other considerations are included in the process, banks must be able to show to the Bangko Sentral how they influenced their decisions concerning the amount of capital to hold.
7. The ICAAP should capture the risks covered under the Framework – credit risk, market risk, and operational risk. If applicable, banks should disclose major differences between the treatments of these risks in the calculation of minimum regulatory capital requirement under the Framework and under the ICAAP. In addition, the ICAAP should also consider other material risks that banks are exposed to, albeit that there is no standard definition of

materiality. Banks are free to use their own definition, albeit that they should be able to explain this in detail to the Bangko Sentral, including the methods used, and the coverage of all material risks. These other material risks may include any of the following:

- a. Risks not fully captured under the Framework, for example, credit concentration risk, risk posed by non-performing assets, risk posed by contingent exposures, etc.;
 - b. Risks not covered under the Framework. As a starting point, banks may choose to use the other risks identified under Circular No. 510 dated 03 February 2006. Some of these risks are less likely to lend themselves to quantitative approaches, in which cases banks are expected to employ more qualitative methods of assessment and mitigation. Banks should clearly establish for which risks a quantitative measure is warranted, and for which risks a qualitative measure is the correct risk assessment and mitigation tool; and
 - c. Risk factors external to banks. These include risks which may arise from the regulatory, economic or business environment.
8. Banks should have a documented process for assessing risks. This process may operate either at the level of the individual banks within the banking group, or at the banking group level. Banks are likely to find that some risks are easier to measure than others, depending on the availability of information. This implies that their ICAAP could be a mixture of detailed calculations and estimates. It is also important that banks not rely on quantitative methods alone to assess their capital adequacy, but include an element of qualitative assessment and management judgment of inputs and outputs. Non-quantifiable risks should be included if they are material, even if they can only be estimated. This requirement might be eased if banks can demonstrate that they have an appropriate policy for mitigating/managing these risks.
9. The ICAAP should take into account banks' strategic plans and how they relate to macro-economic factors. Banks should develop an internal strategy for maintaining capital levels which can incorporate factors such as loan growth expectations, future sources and uses of funds and dividend policy, and any procyclical variation of minimum regulatory capital requirements.

Banks should also have an explicit, board-approved capital plan which states their objectives and the time horizon for achieving those objectives, and in broad terms the capital planning process and the responsibilities for that process. The plan should also lay out how banks will comply with capital requirements in the future, any relevant limits related to capital, and a general contingency plan for dealing with divergences and unexpected events (for example, raising additional capital, restricting business, or using risk mitigation techniques).

In addition, banks should conduct appropriate scenario/stress tests which take into account, for example, the risks specific to the particular stage of the business cycle. Banks should analyze the impact that new legislation/regulation, actions of competitors or other factors may have on their performance, in order to determine what changes in the environment they could sustain.

10. The results and findings of the ICAAP should feed into banks' evaluation of their strategy and risk appetite. For less sophisticated banks in particular, for which genuine strategic capital planning is likely to be more difficult, the results of the process should mainly influence the bank's management of its risk profile (for example, via changes to its lending behavior or through the use of risk mitigants). The ICAAP should produce a reasonable overall capital number and assessment. Banks should be able to explain to the Bangko Sentral's satisfaction the similarities and differences between its ICAAP and its minimum regulatory capital requirements under the Framework.

C. ICAAP Methodologies

1. While banks may use simple or model-based ICAAP methodologies depending on what they think is appropriate for them (please see Annex B of *Appendix Q-54* for description of the different broad classification of methodologies), at the minimum, the Bangko Sentral expects banks to adopt an ICAAP based on the minimum regulatory capital requirement under the Framework and, where applicable, assess extra capital proportionate to the other risks that are not covered under said Framework. This requires an assessment first of whether the risks covered under the Framework - credit risk, market risk and operational risk - are fully captured, and second, how much capital to allocate against other risks and external factors.
2. Regardless of which methodology a bank decides to adopt, it should compare its actual and future projected capital with the actual and future internal capital need arising from the assessment. The actual calculation and allocation of capital always needs to be supplemented by sufficiently robust qualitative procedures, measures and provisions to identify, manage, control and monitor all risks.

3. The ICAAP will always consist of two parts. One part covers all steps necessary for assessing the risks. The other part covers all steps necessary to assess the actual capital (risk-taking capacity). As these two parts will always meet at the end of the ICAAP and have to be in balance, there is no procedure which says which part has to be assessed first.

4. After choosing its ICAAP methodology, a bank could take its thinking through the following steps in developing the ICAAP:

- a. Risk identification

A bank could prepare a list of all material risks to which it is exposed; for that purpose it may find it useful to identify and consider its largest past losses and whether those losses are likely to recur. The identification of all material risk to which a bank is exposed should be conducted in a forward looking manner.

- b. Capital assessment

For all the risks identified through the process above, a bank could then consider how it would act, and the amount of capital that would be absorbed, in the event that one or more of the risks identified was to materialize.

- c. Forward capital planning

A bank could then consider how its capital need as calculated above might change in line with its business plans over its strategic time horizon, and how it might respond to these changes. In doing so, a bank may want to perform a sensitivity analysis to understand how sensitive its capital is to changes in internal and external factors such as business risks, and changes in economic/business cycles.

- d. ICAAP outcome

Finally, a bank should document the ranges of capital required as identified above and form an overall view on the amount of internal capital which it should hold.

INTERNAL CAPITAL ADEQUACY ASSESSMENT PROCESS (Suggested Format)

The Bangko Sentral expects that there will be a fair degree of variation in the length and format of submissions since banks' business and risk profiles differ. As such the ICAAP document should be proportional to the size, nature and complexity of a bank's business.

This format has been provided as a starting point. Banks are not required to adopt this format. However, adopting this format may be convenient for banks as it covers the minimum issues which typically would be the subject of review by the Bangko Sentral and may therefore make the review process more efficient for both the bank and the Bangko Sentral.

Equally, use of this template is not a substitute for being aware of the relevant rules.

What is an ICAAP document?

An ICAAP document is a bank's explanation to the Bangko Sentral of its internal capital adequacy assessment process. While this may be based on existing internal documentation from numerous sources, the Bangko Sentral will clearly find it helpful to have a summary prepared to communicate the key results and issues to it at a senior level. Since the Bangko Sentral will be basing many of its views on the information contained in the ICAAP document, the bank's board of directors and senior management should have formally approved its contents. As such, the Bangko Sentral would expect the ICAAP document to be in a format that can be easily understood at a high level and to contain all the relevant information that is necessary for the bank and Bangko Sentral to make an informed judgment and decision as to the appropriate capital level and risk management approach.

Where appropriate, technical information on risk measurement and capital methodologies, and all other works carried out to validate the approach (e.g. board papers and minutes, internal or external reviews) could be contained in appendices.

1. EXECUTIVE SUMMARY

The purpose of the Executive Summary is to present an overview of the ICAAP methodology and results. This overview would typically include:

- i. The purpose of the report and which group entities are covered by the ICAAP;
- ii. The main findings of the ICAAP analysis:
 - How much and what composition of internal capital the bank considers it should hold as compared with the capital adequacy requirement under the existing Bangko Sentral Risk-Based Capital Adequacy Framework (the Framework), and
 - The adequacy of the bank's risk management processes given the risks assumed;
- iii. A summary of the financial position of the business, including the strategic position of the bank, its balance sheet strength, and future profitability;
- iv. Brief descriptions of the capital and dividend plan; how the bank intends to manage capital going forward and for what purposes;
- v. Commentary on the most material risks, why the level of risk is acceptable or, if it is not, what mitigating actions are planned;
- vi. Commentary on major issues where further analysis and decisions are required; and
- vii. Who has carried out the assessment, how it has been challenged, and who has approved it.

2. BACKGROUND

This section would cover the relevant organizational structure and business lines, and historical financial data for the bank (e.g., group structure (legal and operational), operating profit, profit before tax, profit after tax, dividends, equity, capital resources held and as compared with regulatory requirements, total loans, total deposits, total assets, etc., and any conclusions that can be drawn from trends in the data which may have implications for the bank's future).

3. CAPITAL ADEQUACY

This section could start with a description of the risk appetite used in the ICAAP. It is vital for the Bangko Sentral to understand whether the bank is presenting its view regarding: (1) the amount of capital required to meet minimum regulatory needs, or (2) the amount of capital that a bank believes it needs to meet its business objectives (e.g., whether the capital required is based on a particular desired credit rating, or includes buffers for strategic purposes, or minimizes the chances of breaching regulatory requirements). A description of the methodology used to assess the bank's capital adequacy should also be included.

The section would then include a detailed review of the capital adequacy of the bank.

The information provided would include:

a. *Timing*

- i. The effective date of the ICAAP calculations together with consideration of any events between this date and the date of submission which would materially impact the ICAAP calculation together with their effects; and
- ii. Details of, and rationale for, the time period over which capital has been assessed.

b. *Risks analyzed*

- i. An identification of the major risks faced in each of the following categories:
 - credit risk;
 - market risk;
 - interest rate risk in the banking book;
 - liquidity risk;
 - operational risk;
 - compliance risk;
 - strategic/business risk; and
 - reputation risk;
- ii. And for each, an explanation of how the risk has been assessed and, where appropriate, the quantitative results of that assessment;
- iii. Where relevant, a comparison of that assessment with the results of the assessment under the Framework (specifically for credit risk, market risk, and operational risk);
- iv. A clear articulation of the bank's risk appetite by risk category if this varies from the assessment; and
- v. Where relevant, an explanation of any other methods apart from capital used to mitigate the risks.

The discussion here would make clear which additional risks the bank considers material to its operation and, thus, would warrant additional capital on top of that required for credit risk, market risk, and operational risk under the Framework.

c. *Methodology and assumptions*

A description of how assessments for each of the major risks have been approached and the main assumptions made.

At a minimum, the Bangko Sentral expects banks to base their ICAAP on the results of the capital adequacy requirement under the Framework and additional risks, where applicable, should be assessed separately.

d. *Capital transferability*

Details of any restrictions that may curtail the management's ability to transfer capital into or out of the business(es) covered, for example, contractual, commercial, regulatory or statutory restrictions that apply.

4. CURRENT AND PROJECTED FINANCIAL AND CAPITAL POSITIONS

This section would explain the current and expected changes to the business profile of the bank, the environment in which it expects to operate, its projected business plans (by appropriate lines of business), and projected financial position for, say three to five years.

The starting balance sheet and date as of which the assessment is carried out would be set out.

The projected financial position might consider both the projected capital available and projected capital resource requirements to support strategic/business initiatives. These might then provide a baseline against which adverse scenarios (please see Capital Planning below) might be compared.

Given these business plans, this section would also discuss the bank's assessment on whether additional capital is necessary on top of that assessed to cover their existing risk exposures, as well as future planned sources of capital.

5. CAPITAL PLANNING

This section would explain how a bank would be affected by an economic recession or downswings in the business or market relevant to its activities. The Bangko Sentral is interested in how a bank would manage its business and capital so as to survive a recession/ market disruption while meeting minimum regulatory standards. The analysis would include financial projections forward for, say, three to five years based on business plans and solvency calculations. Likewise, a bank should disclose here the key assumptions and other factors that would have significant impact on its financial condition, in conducting scenario analyses/ stress testing.

Typical scenarios would include how an economic downturn/market disruption would affect:

- i. the bank's capital resources and future earnings; and
- ii. the bank's capital adequacy requirement under the Framework taking into account future changes in its projected balance sheet.

It would also be helpful if these projections showed separately the effects of management potential actions to change the bank's business strategy and the implementation of contingency plans.

In addition, banks are encouraged to include an assessment of any other capital planning actions that would be necessary to enable it to continue to meet its regulatory capital requirements throughout a recession/market disruption such as new capital injections from related companies or new share issues.

Given the projected capital needs arising from an economic recession or business/market downswings, this section would also discuss the bank's assessment on whether additional capital is necessary on top of that assessed to cover their existing risk exposures and business plans.

6. CHALLENGE AND ADOPTION OF THE ICAAP

This section would describe the extent of challenge and testing of the ICAAP. Banks should describe the review and sign-off procedures used by senior management and the board. It might also be helpful if a copy of any relevant report to senior management or the board and their response were attached.

Details of the reliance placed on any external suppliers would also be detailed here, e.g. for generating economic scenarios.

In addition, a copy of any report obtained from an external reviewer or internal audit would also be included.

7. USE OF THE ICAAP WITHIN THE BANK

This section would describe the extent to which capital management is embedded within the bank including the extent and use of scenario analysis and/or stress testing within the bank's capital management policy, e.g. in business decisions (e.g. expansion plans) and budgets, or in allocating capital to business units, or in individual credit decision process.

Banks should include a statement of the actual operating philosophy on capital management and how this links to the ICAAP. For instance, differences in risk appetite used in the ICAAP as compared to that used for business decisions might be discussed.

Lastly, it would be helpful if details on any anticipated future refinements within the bank's ICAAP (highlighting those aspects which are work-in-progress), as well as any other information that would help the Bangko Sentral review the bank's ICAAP could be provided.

Annex B

ALTERNATIVE INTERNAL CAPITAL ADEQUACY ASSESSMENT PROCESS METHODOLOGIES

This appendix outlines ICAAP methodologies which banks may adopt in lieu of that based on the minimum regulatory capital requirement under the Bangko Sentral Risk-Based Capital Adequacy Framework (the Framework). However, the choice of methodology should clearly be commensurate with banks' ability to collect the necessary information and to calculate the necessary inputs in a reliable manner.

Structured approach - In this case, banks will need to set the internal capital requirement at a starting point of zero capital and then build on capital due to all risks (both those captured under the Framework and those that are not) and external factors. This methodology could be seen as a simple model for calculating economic capital and is not based on the minimum regulatory capital requirement. A sensitivity analysis could form the starting point. The sensitivity analysis should be based on an exceptional but plausible scenario. Risks which are not included in the sensitivity analysis should also be considered in terms of the structured approach.

Allocation-of-risk-taking approach – In this approach, banks might start with its actual capital and break it down to all its material risks. This step in the process requires quantification or at least an estimation method for various risks. The amount of capital provided for each risk category is determined by the current and envisaged amount of risk in each category, a risk buffer and their risk appetite. Banks will decide which type of risk quantification/ estimation method is suitable and sufficient for its particular use. If the allocated capital seems insufficient, either the risk has to be reduced or capital has to be raised. The allocated amounts of the capital will therefore work as a limit system, which assists and facilitates banks in balancing their risk-taking capacity and their risks.

Formal economic capital models – These are expected to be used eventually by banks that use advanced approaches in determining the minimum regulatory capital requirement, or those that have substantial derivatives and structured products transactions (i.e., those that have expanded dealer and/or user capabilities).

GUIDELINES ON THE BANGKO SENTRAL'S SUPERVISORY REVIEW PROCESS
(Appendix to Sec. 130-Q)

A. Introduction

1. The Bangko Sentral's supervisory review process (SRP) in the context of this document involves (1) an evaluation of banks' internal capital adequacy assessment processes (ICAAP) and their output, (2) a dialogue with banks with regard to their ICAAP, and (3) the prudential measures that may be taken to address issues identified. These guidelines should be observed mainly by the appropriate supervising department of the Bangko Sentral and, where appropriate for on-site validation during regulation examination, by the examination personnel. This therefore supplements the existing guidelines set out in the Manual of Examinations, the CAMELS rating, and the Risk Assessment System (RAS). The appropriate supervising department of the Bangko Sentral may draft, for its own use, detailed guidelines on the conduct of the assessment of banks' ICAAP and of the Bangko Sentral- bank dialogue.
2. Although these guidelines are directed mainly at Bangko Sentral supervision and examination personnel, banks will have a clear interest in knowing the approach the Bangko Sentral intends to take in assessing their capital adequacy.

B. Guiding Principles in assessing banks' ICAAP

1. As a first step, the Bangko Sentral should evaluate banks' compliance with the minimum regulatory capital requirements as prescribed under the Framework. This would involve the verification of banks' calculation of their risk weighted assets (RWA) and capital adequacy ratio (CAR). The minimum regulatory capital requirements should always be the starting point in the assessment of banks' capital adequacy. The validated CAR should then be compared with the required capital resulting from the ICAAP.
2. Next, the assessment of banks' ICAAP should include an evaluation of their assumptions, components, methodologies, coverage and outcome. This review should cover both banks' risk management processes and their assessment of adequate capital. The Bangko Sentral should review how banks assess the other risks they are exposed to, especially Elements 2 to 4 listed in Item "C.4" hereof, the controls they have in place to mitigate these risks, as well as the adequacy and composition of capital held against those risks.
3. The Bangko Sentral should then identify existing or potential problems and key risks faced by banks, the deficiencies in their control and risk management frameworks, and the degree of reliance that can be placed on the outputs of their ICAAP. This process will enable the Bangko Sentral to tailor its approach for each individual bank and will provide the foundation for the Bangko Sentral's general approach for each bank and its actions.
4. The Bangko Sentral's evaluation of the adequacy of banks' capital in relation to their risk profile would serve as the basis for assigning a rating for the Capital component of the bank's CAMELS rating. It would also serve as the basis for identifying any prudential measures or other supervisory actions required. For example, where there is an imbalance between business and risk controls, the Bangko Sentral should consider the range of remedial supervisory actions that may be needed to rectify a deficiency in controls and/or perceived shortfalls in capital, either as a long-term requirement(s) or as a short- term action(s).
5. The results of the SRP will be communicated to the board and senior management of banks together with any action that is required of them and any significant action planned by the Bangko Sentral. This may be done as part of the dialogue between the Bangko Sentral and each bank on the ICAAP.
6. In evaluating the ICAAP of branches of foreign banks in the Philippines, the Bangko Sentral will refer to the home supervisor's consolidated assessment of the ICAAP of the head office/parent bank. The Bangko Sentral will also take into account the strength and availability of parental support.

C. Guiding principles on Bangko Sentral-bank dialogue

1. A key element of the SRP is the dialogue between the Bangko Sentral and each bank. The dialogue will inform the Bangko Sentral about the way each bank's ICAAP is structured, and the assumptions and methodologies which are used to assess its risk exposures.
2. The ICAAP document, which banks are required to submit to the Bangko Sentral every January of each year (suggested format is in *Annex A of Appendix Q-54*), will be the basis for the appropriate supervising department of the Bangko Sentral-bank dialogue. This dialogue may feed into the regular examination, and the findings of the regular examination may in turn feed into the dialogue. The Bangko Sentral will determine the nature and depth of the dialogue, based on the type and complexity of the bank.

3. Banks should be able to justify their processes for identifying and measuring their risks as well as how much capital, if any, they allocate against them, taking into account other qualitative mitigants of risk. Banks should be able to explain any differences between their own assessment of capital needs and targets under the ICAAP and the minimum regulatory capital requirements prescribed under the Framework.
4. The dialogue should embrace the following four main elements:
 - a. Element 1: Risks covered under the Framework (i.e., credit risk, market risk, and operational risk);
 - b. Element 2: Risks not fully covered under the Framework (for example, credit concentration risk, risk posed by non-performing assets, risk posed by contingent exposures, etc.);
 - c. Element 3: Risks not covered under the Framework (other risks identified under Circular No. 510 dated 3 February 2006); and
 - d. Element 4: External factors, which include risks which may arise from the regulatory, economic or business environment.
5. Aside from these four main elements, the dialogue should also cover the quality of internal governance of banks, including risk controls, compliance and internal audit, as well as operational and organizational structure.
6. For the SRP to be effective, the Bangko Sentral will need to develop a sufficiently thorough understanding of how the ICAAP is determined and the differences between it and the minimum regulatory capital requirement under the Framework. This would help in evaluating the ICAAP outcome. The SRP emphasizes the importance of analyzing the main elements, and understanding the differences between ICAAP assumptions and minimum regulatory capital requirement assumptions.
7. Once the process has begun, the dialogue will provide the opportunity for iteration between the ICAAP and SRP, with each informing the other, i.e., banks may make changes to the ICAAP in the course of the dialogue, in response to challenge and feedback from the Bangko Sentral, and vice versa. Following the dialogue, the Bangko Sentral will reach an assessment.

D. Guidelines on prudential measures

1. If the Bangko Sentral considers that a bank's ICAAP does not adequately reflect its overall risk profile, or does not result in the bank having adequate capital, then consideration should be given to applying prudential measures.
2. The measures available to the Bangko Sentral include:
 - a. Requiring the bank to improve its internal control and risk management frameworks;
 - b. Requiring the bank to reduce the risk inherent in its activities, products and systems;
 - c. Restricting or limiting the business, operations or network of the bank;
 - d. Limiting or prohibiting the distribution of net profits and requiring that part or all of the net profits be used to increase the capital accounts of the bank; and
 - e. Requiring the bank to increase its capital.
3. The choice of prudential measures should be determined according to the severity and underlying causes of the situation and the range of measures and sanctions available to the Bangko Sentral. Measures can be used individually or in combination. The requirement to increase capital should, however, be imposed on any bank which exhibits an imbalance between its business risks and its internal control and risk frameworks, if that imbalance cannot be remedied by other prudential measures or supervisory actions within an appropriate timeframe.
4. The requirement to increase capital may also be set where the Bangko Sentral judges the existing capital held by a bank to be inherently inadequate for its overall risk profile. It must be acknowledged that there is no 'scientific' method for determining the amount, and that capital is not a long-run substitute for remedying deficiencies in systems and controls. In practice, the process relies heavily on subjective judgment and peer-group consistency to ensure a level playing field and a defense to possible challenge that may be posed by banks.
5. Prudential measures should be communicated promptly and in sufficient detail. In communicating its decision on prudential measures, the Bangko Sentral should:
 - a. Explain in sufficient detail the factors which have led to the risk assessment conclusions;
 - b. Indicate areas of weakness and the timeframe for remedial action;
 - c. Explain the reasons for any additional capital requirement; and
 - d. Indicate what improvements could be made to systems and controls to make them adequate for the risks and activities of the bank, and for this improvement to be reflected in the bank's capital requirements.

**GUIDELINES ON OUTSOURCING OF SERVICES BY ELECTRONIC MONEY ISSUERS (EMIs)
TO ELECTRONIC MONEY NETWORK SERVICE PROVIDERS (EMNSP)
[Appendix to Sec. 702-Q (Outsourcing of services by Electronic Money Issuers (EMIs) to
Electronic Money Network Service Providers (EMNSP)]**

- I. *Statement of policy.* It is the goal of the Bangko Sentral to achieve a truly inclusive financial system. In line with achieving this goal, the Bangko Sentral recognizes the potential of electronic money (e-money) as an instrument to facilitate delivery of financial services affordably to the low-income, unbanked or underserved segments of the population, particularly in non-urbanized areas. The Bangko Sentral likewise recognizes that efficient and effective delivery of financial services may necessitate Electronic Money Issuers (EMI) to develop business models that utilize outsourcing arrangements, considering the specialized operational and technological requirements in an e-money business. Outsourcing, however may introduce an EMI to certain operational and reputational risks that need to be properly managed. The Bangko Sentral hereby issues the following guidelines to govern the outsourcing of E-Money related services.
- II. *Definition.* An Electronic Money Network Service Provider (EMNSP) shall refer to a non-financial institution that provides automated systems, network infrastructure, including a network of accredited agents utilizing the systems, to enable clients of an EMI to perform any or all of the following:
 - a. Convert cash to e-money and monetize e-money;
 - b. Transfer funds from one electronic wallet to another;
 - c. Use e-money as a means of payment for goods and services; and
 - d. Conduct other similar and/or related e-money activities/transactions.
- III. *Application to outsource.* An EMI intending to outsource the services contemplated under Item “2” shall limit itself to an EMNSP as an outsource entity, and shall follow the procedures for outsourcing information technology systems/processes as provided under *Appendix Q-36*. In addition to the documentary requirements under said subtopic., an EMI should also submit a certification signed by its President or any officer of equivalent rank and function certifying that a due diligence review had been conducted and that the selected EMNSP has met the minimum requirements provided under Item “V”.
- IV. *Responsibilities of an EMI.* Relative to the outsourcing of services to an EMNSP, it shall be the responsibility of an EMI to:
 - a. Conduct due diligence review on an EMNSP in accordance with Item “V”;
 - b. Ensure that the relationship/arrangement with an EMNSP is supported by a written contract that should contain, at a minimum, the requirements prescribed under *Appendix Q-36*. The contract should also stipulate that:
 - (1) the EMNSP shall allow the Bangko Sentral to have access and to examine the e-money system, network infrastructure, operation of the network of accredited agents and all operations related to e-money services being outsourced by the EMI for the purpose of assessing the confidentiality, integrity, and reliability of the e-money system and determining compliance with Bangko Sentral rules and regulations;
 - (2) that the EMNSP shall not further outsource or subcontract the activity being outsourced to the EMNSP; and
 - (3) that interconnection by the EMNSP with other networks shall be limited to networks of other EMNSPs and the Bangko Sentral-recognized ATM consortia.
 - c. Ensure that the EMNSP employs a high degree of professional care in performing the outsourced activities as if these were conducted by the EMI itself. This would include, among others, making use of monitoring and control procedures to ensure compliance at all times with applicable Bangko Sentral rules and regulations;
 - d. Ensure that the EMNSP has an accreditation process in the selection of agents participating in the retail network for the conversion of cash to e-money and its monetization and that the EMNSP has instituted mechanism to manage sufficient liquidity in the system/network.
 - e. Ensure that the EMNSP enforces a program that requires all cash-in and cash out agents under its network to undergo AML trainings and re-trainings every two (2) years; and
 - f. Comply with all laws and Bangko Sentral rules and regulations covering the activities outsourced to the EMNSP, especially on compliance with anti-money laundering (AML) requirements.
- V. *Due diligence and continuing operational review.* Prior to entering into an outsourcing arrangement with an EMNSP, an EMI should conduct appropriate due diligence review to assess the capability of an EMNSP in performing the service to be outsourced. The due diligence should take into consideration both qualitative and quantitative factors affecting the

performance of the outsourced service, such as the financial condition and results of operation for the previous year/s, risk management practices, technical expertise which involve monitoring the velocity of e-money transactions and aggregation of monthly limits, among others, market share, reputation (both the company and its stockholders) and compliance with anti-money laundering requirements and Bangko Sentral rules and regulations.

An EMI should make sure that the EMNSP adheres to international standards on IT governance, information security, and business continuity in the performance of its outsourced activities. An EMI should endeavor to obtain independent reviews and market feedback on the EMNSP to supplement its own findings.

Operational review by an EMI of the EMNSP should be undertaken at least on an annual basis as part of risk management. This review should be documented as part of an EMI's monitoring and control process.

VI. *Delineation of responsibilities.* The EMI and EMNSP shall identify, delineate and document the responsibilities and accountabilities of each party as regards the outsourcing arrangement, including planning for contingencies. Notwithstanding any contractual agreement between an EMI and an EMNSP on the sharing of responsibility, the EMI shall be responsible to its customers, without prejudice to further recourse, if any, by the EMI to the EMNSP.

VII. *Confidentiality and security.* An EMI should review and monitor the security practices and control processes of the EMNSP on a regular basis, including commissioning or obtaining periodic expert reports on adequacy of security to maintain the confidentiality and integrity of data, and compliance with internationally-recognized standards in respect to the operations of the EMNSP. Considering that the EMNSP may service more than one EMI, the EMI should ensure that records pertaining to its transactions are segregated from those of other EMIs.

The EMI and EMNSP shall identify circumstances under which each party has the right to change security requirements. An EMNSP should be required to report immediately any security breaches to the EMI.

In addition, the EMI should make sure the EMNSP have documented business continuity plans in place and that said plan is periodically reviewed and tested with no significant test findings. An EMNSP shall provide the EMI with timely and adequate notification on any adverse development that may impact the former's performance and delivery of service to the EMI.

VIII. *EMI-Others intending to be an EMNSP.* An EMI-Others that intend to be an EMNSP because of its specialized technical expertise shall comply with the requirements for an EMNSP. In addition, an EMI-Others shall undertake risk-mitigating measures to ensure that liquid assets, corresponding to the outstanding balance of e-money issued by the EMI-Others and maintained pursuant to Sec. 702-Q, be insulated from risks arising from its liabilities as EMNSP. These measures may include ring fencing the liquid assets through an escrow or trust account in a financial institution acceptable to Bangko Sentral.

IX. *Sanctions.* Violations committed by EMIs pertaining to outsourcing of activities to EMNSP shall be subject to appropriate penalties under Sec. 1102-Q (*Guidelines on the imposition of monetary penalties*) and/or other non-monetary sanctions under Section 37 of RA No. 7653.

X. *Transitory provisions.* EMIs that were granted an authority to outsource their e-money activities to an EMNSP may continue to exercise such authority provided that they have to conform to this guidelines within a six (6)-month period from 04 November 2010.

Guidelines on the Adoption of Philippine Financial Reporting Standards 9 (PFRS 9) Financial Instruments – Impairment
(Appendix to Sec. 171-Q (Philippine Financial Reporting Standards/Philippine Accounting Standards))

Section 1. Expected Credit Loss Model

BSFIs shall adopt the expected credit loss (ECL) model in measuring credit impairment, in accordance with the provisions of PFRS 9. In this respect, BSFIs shall recognize credit impairment/allowance for credit losses even before an objective evidence of impairment becomes apparent. BSFIs shall consider past events, current conditions, and forecasts of future economic conditions in assessing impairment.

- a) BSFIs shall apply the ECL model on credit exposures covered by PFRS 9, which include the following:
- Loans and receivables that are measured at amortized cost;
 - Investments in debt instruments that are measured at amortized cost or at fair value through other comprehensive income (FVOCI); and
 - Credit commitments and financial guarantee contracts that are not measured at fair value through profit or loss (FVTPL)
- b) Credit exposures shall classify into three (3) stages using the following time horizons in measuring ECL:

Stage of credit impairment	Characteristics	Time horizon in measuring ECL
Stage 1	– Credit exposures that are considered “performing” and with no significant increase in credit risk since initial recognition or with low credit risk	Twelve (12) months
Stage 2	– Credit exposures that are considered “under-performing” or not yet non-performing but with significant increase in credit risk since initial recognition	Lifetime
Stage 3	– Credit exposures with objective evidence of impairment, thus, considered as “non-performing”	Lifetime

- c) BSFIs shall promptly recognize and maintain adequate allowance for credit losses at all times. It shall adopt the principles provided under the Enhanced Standards on Credit Risk Management¹ in implementing sound and robust credit risk measurement methodologies that adequately considers ECL. In this respect, the ECL methodology shall not be considered as a separate and distinct process but as an important element of the entire credit risk management process.

Section 2. Twelve (12)-Month ECL

- a) BSFIs shall consider reasonable and supportable information, including forward-looking information that affect credit risk in estimating the twelve (12)-month ECL. BSFIs shall exercise experienced credit judgment and consider both qualitative and quantitative information that may affect the assessment.
- b) Zero allowance for exposures under Stage 1 shall be rare. It shall be expected only for exposures with zero percent (0%) credit risk-weight under the Risk-Based Capital Adequacy Framework, such as Philippine peso-denominated exposures to the Philippine National Government and the Bangko Sentral.

¹ Section 143-Q

Section 3. Lifetime ECL

- a) BSFIs shall evaluate the change in the risk of default occurring over the expected life of the exposures in assessing whether these shall be moved to a lifetime ECL measure.² Although collateral will be used to measure the loss given a default, this should not be primarily used in measuring risk of a default or in transferring to different stages.
- b) BSFIs shall measure lifetime ECL of the following:
 - exposures that have significantly increased their credit risk from origination (Stage 2); and
 - non-performing exposures (Stage 3).

Section 4. Assessment of forward-looking information

BSFIs shall clearly demonstrate how forward-looking information, including macroeconomic factors, have been reflected in the ECL assessment and how these are linked to the credit risk drivers of the exposures. Experienced credit judgment is essential in assessing the soundness of forward-looking information and in ensuring that these are adequately supported.

Section 5. Transfer from Stage 1 to Stage 2 – Assessment of significant increase in credit risk

BSFIs shall transfer credit exposures from Stage 1 to Stage 2 if there is significant increase in credit risk from initial recognition.

- a) BSFIs shall establish well-defined criteria on what constitutes significant increase in credit risk. BSFIs shall consider a wide range of information, which includes among others, information on macroeconomic conditions, economic sector and the geographical region relevant to the borrower, and other factors that are borrower-specific. The criteria on what constitutes significant increase in credit risk shall consider, at a minimum, the list provided in PFRS 9.
- b) BSFIs shall classify exposures to Stage 2 if the exposures have potential weaknesses, based on current and/or forward-looking information, that warrant management's close attention. Said weaknesses, if left uncorrected, may affect the repayment of these exposures. BSFIs shall also classify exposures Stage 2 if there are adverse or foreseen adverse economic or market conditions that may affect the counterparty's ability to meet the scheduled repayments in the future.
- c) The Bangko Sentral shall apply the following indicators of significant increase in credit risk in BSFIs noted to have weak credit loss methodologies:
 - exposures considered especially mentioned under Sec. 143-Q (*Credit Classification and Provisioning*);
 - exposures with missed payment for more than thirty (30) days; and
 - exposures with risk ratings downgraded by at least two (2) grades (e.g., exposure with risk rating of "3" on the origination date was downgraded to risk rating of "5" on the reporting date) for BSFIs with below fifteen (15)-risk rating grades, and three (3) grades for BSFIs with fifteen (15) or above risk rating grades.

Section 6. Transfer from Lifetime ECL to Twelve (12)-month ECL

BSFIs shall transfer the exposures from Stage 3 (non-performing) to Stage 1 (performing) when there is sufficient evidence to support their full collection. Exposures should exhibit both the quantitative and qualitative indicators of probable collection prior their transfer. The quantitative indicator is characterized by payments made within an observation period (e.g., regularly pays during the minimum observation period). The qualitative indicator pertains to the results of assessment of the borrower's financial capacity (e.g., improvement in counterparty's situation).

As a general rule, full collection is probable when payments of interest and/or principal are received for at least six (6) months.

² PFRS 9 paragraph 5.5.9 provides that the assessment should be made in terms of the risk of a default and not on the expected credit loss (i.e., before consideration of the effects of credit risk mitigants such as collaterals or guarantees).

BSFIs shall observe the following guidelines for exposures that were restructured:

- a) Non-performing restructured exposures that have exhibited improvement in creditworthiness of the counterparty may only be transferred from stage 3 to Stage 1 after a total of one (1) year probation period [i.e., six (6) months in Stage 3 before transferring to Stage 2, and another six (6) months in Stage 2 before transferring to Stage 1; or directly from Stage 3 to Stage 1, without passing through Stage 2, after twelve (12) months]; and
- b) Restructured accounts classified as “performing” prior to restructuring shall be initially classified under Stage 2. The transfer from Stage 2 to Stage 1 will follow the six (6)-month rule mentioned in Item “a” of this Section.

Section 7. Multiple exposures to specific counterparties

In measuring the ECL to multiple exposures to a single counterparty or multiple exposures to counterparties belonging to a group of related entities, the following shall apply:

- a) *Exposures to non-retail counterparties.* BSFIs with multiple exposures to a non-retail counterparty shall measure ECL at the counterparty level. In particular, the BSFI shall consider all exposures to a counterparty as subject to lifetime ECL when any of its material exposure is subjected to lifetime ECL;
- b) *Exposures to a retail counterparty.* BSFIs with multiple exposures to a retail counterparty shall measure ECL at the transaction level. In particular, the BSFI may classify one transaction under Stage 1 and another transaction under Stage 3. However, BSFIs are not precluded from taking into account the potential of cross default, such that if one exposure is classified under Stage 3 all the other exposures may be classified under Stage 3; and
- c) *Exposures to counterparties belonging to a group of related entities.* BSFIs with multiple exposures to counterparties that belong to the same group of related entities shall measure ECL at the counterparty level (per entity). BSFIs shall likewise consider the status of the other counterparties belonging to the same group in determining the stage under which the exposures shall be classified.

Section 8. Recognition of Income

For purposes of preparing the prudential reports (e.g., Financial Reporting Package and Capital Adequacy Ratio report), BSFIs shall not recognize interest income on non-performing exposures, except when payment is received.

On the other hand, interest income recognized on non-performing exposures (Stage 3 accounts) for purposes of preparing the audited financial statements (AFS) shall be disclosed in the AFS. This shall likewise be included in the list of reconciling items between the prudential reports and the AFS that is being submitted to the Bangko Sentral.

Section 9. Off-balance sheet financial items

As a general rule, BSFIs shall recognize the ECLs on off-balance sheet exposures as a liability and booked as “Provisions-Others”.

On credit facilities with partial drawdown (e.g., with loan balance and an undrawn commitment), BSFIs shall observe the following rules in accordance with PFRS 7 (*Financial Instruments: Disclosures*):

- a) If the BSFI cannot separately identify the ECL attributable to the drawn and undrawn commitment, the provision for ECL on the off-balance sheet accounts shall be presented together with the allowance for the financial asset (contra-asset); and
- b) If the combined ECL exceeds the gross carrying amount of the financial asset, the ECL should be recognized as “Provisions-Others” (liability).

BSFIs shall look beyond the contractual date when estimating the expected losses of facilities with both loan and undrawn commitment components such as the credit card portfolio.

Section 10. Application to simple BSFIs

BSFIs with simple operations shall adopt simple loan loss methodologies fundamentally anchored on the principle of recognizing ECL. In this respect, BSFIs shall look beyond the past due/missed amortizations in classifying exposures and in providing allowance for credit losses. On the other hand, BSFIs with credit operations that may not economically justify adoption of said simple loan loss estimation methodology that is compliant with PFRS 9 shall, at a minimum, be subject to the regulatory guidelines in setting up allowance for credit losses prescribed under the *Appendix Q-14*.

Section 11. General and Specific Provisions for Loan Accounts

- a) BSFIs shall treat Stage 1 provisions for loan accounts as General Provision (GP), while Stages 2 and 3 provisions shall be treated as Specific Provisions (SP).
- b) BSFIs shall set up general loan loss provision (GLLP) equivalent to one percent (1%) of all outstanding Stage 1 on-balance sheet loans, except for accounts considered as credit risk-free under existing regulations. BSFIs are not required to provide a one percent (1%) GP on other credit exposures covered by PFRS 9 such as off-balance sheet accounts and investments.
- c) Allowance for credit losses for Stages 1, 2 and 3 accounts shall be recognized in the profit or loss statement. In cases when the computed allowance for credit losses on Stage 1 accounts is less than the 1 percent GP required, the deficiency shall be recognized by appropriating the Retained Earnings (RE)³ account. GP recognized in profit or loss as allowance for credit losses for Stage 1 accounts and the amount appropriated in RE shall be considered as Tier 2 capital subject to the limit provided under the Capital Adequacy Ratio (CAR) framework⁴.
- d) BSFIs that use the guidelines provided under *Appendix Q-14* in determining allowance for credit losses shall book the entire amount of GP in profit or loss.
- e) BSFIs shall charge against RE the increase in ECL – SP as of 01 January 2018 as a result of the change in accounting policy.

Section 12. Expectations from Trust Entities

Consistent with the expectations from BSFIs on the adoption of PFRS 9, as provided under Item “d” of the Sec. 171-Q (*Philippine Financial Reporting Standards/ Philippine Accounting Standards*), the board of directors of a trust entity (TE) shall ensure that the TE appropriately and consistently adopts PFRS 9 as part of its reporting governance process.

In this respect, the board of directors shall approve policies and guidelines relative to the impairment of financial assets under management of the TE.

The TE shall adhere to the requirements of PFRS 9 on impairment and the guidelines provided herein, to the extent applicable to the trust operations. Pursuant to Item “c” of Section 1 of these guidelines (*Expected Credit Loss Model*), a TE shall promptly recognize and maintain adequate allowance for credit losses at all times.

Consistent with the provisions under Section 10 of these guidelines (*Application to simple BSFIs*), the following provisions shall apply to TEs:

- a) A TE with simple operations shall adopt simple loan loss methodologies fundamentally anchored on the principle of recognizing ECL. In this respect, the TE shall look beyond the past due/missed amortizations in classifying exposures and in providing allowance for credit losses.
- b) A TE with credit operations that may not economically justify adoption of said simple loan loss estimation methodology that is compliant with PFRS 9 shall, at a minimum, be subject to the regulatory guidelines in setting up allowance for credit losses prescribed under *Appendix Q-14*.

(Circular Nos. 1023 dated 04 December 2018 and 1011 dated 14 August 2018)

³ BSFIs shall use Retained Earnings Reserve – Others as temporary account of Retained Earnings – General Provisions (RE-GP)

⁴ As temporary presentation in CAR reports, the RE included in Common Equity Tier (CET/Core Tier 1 shall be net of RE-GP. In computing Tier 2 Capital, the General Loan Loss Provision (GLLP) shall include the RE-GP. However, the GLLP added back to on-balance sheet assets subject to risk-weight shall not include the RE-GP since when appropriating the RE, total assets is not affected.

REQUIRED CERTIFICATIONS AND EXAMPLES OF SUPPORTING DOCUMENTS FOR THE CONFIRMATION OF ELECTION/APPOINTMENT OF DIRECTORS/OFFICERS OF BANGKO SENTRAL NG PILIPINAS SUPERVISED FINANCIAL INSTITUTIONS (BSFIS)¹

**GUIDELINES ON RECEIVERSHIP AND LIQUIDATION PROCEEDINGS OF NON-BANKS
WITH QUASI-BANKING FUNCTIONS AND TRUST ENTITIES
(Appendix to Sec. 439-Q)**

PART I. GUIDELINES ON RECEIVERSHIP OF NBQBs/TRUST ENTITIES

Introduction. Receivership is defined as the condition when the Monetary Board designates a person, known as a “Receiver”, to take over an institution enumerated under Item “I” of these guidelines and administer and hold the assets of the institution in trust for its creditors and stockholders.

I. Coverage. These Guidelines shall cover institutions which shall refer to any of the following:

- a. Non-banks with quasi-banking license (i.e. Investment houses and Financing companies); and
- b. Trust entities.

II. Legal Bases for Placement under Receivership

- a. Section 30, R.A. No. 7653.
- b. Section 53, R.A. No. 8791.
- c. Section 56, R.A. No. 8791, 2nd par.
- d. Section 91, R.A. No. 8791 in relation to Section 66 of R.A. No. 8791 and Section 36 of R.A. No. 7653

III. Minimum Qualifications of the Receiver. The receiver shall possess at all times the following minimum qualifications:

- a. Must belong to the private sector;
- b. Must have appropriate knowledge, training and competence in the field of banking and finance, receivership, liquidation, rehabilitation/corporate recovery, insolvency, or supervision and regulation of financial institutions;
- c. Must have a minimum of five (5) years’ work experience in any of the following:
 - (i) rehabilitation/corporate recovery, receivership, liquidation, or insolvency involving a business similar in size and complexity as that of the institution under receivership; or
 - (ii) banking and finance or supervision and regulation of financial institutions.
- d. Must pass the “*fit and proper*” rule of the Bangko Sentral on bank directors/officers;
- e. Must be of good moral character, sound judgment and tact in dealing with the transactions of the institution under receivership;
- f. Must not have conflict of interest as defined in these guidelines;
- g. Must not be included in the Bangko Sentral Watchlist Disqualification Files “A” and “B”;
- h. Must be eligible for coverage by a fidelity bond;
- i. Must not have been convicted by, or have no pending criminal or administrative case before a court or administrative body for any offense involving dishonesty or breach of trust such as, but not limited to, estafa, embezzlement, extortion, forgery, malversation, swindling, theft, robbery, falsification, bribery, violation of B.P. Blg. 22, violation of anti-graft and corrupt practices act and prohibited acts and transactions under Section 7 of R.A. No. 6713 (Code of Conduct and Ethical Standards for Public Officials and Employees), violation of banking laws, rules and regulations; and
- j. Must not have been sentenced by a court to serve a maximum term of imprisonment of more than six years, which conviction has become final and executory.

A juridical person may serve as a receiver: *Provided*, that it must designate as its representative/s natural person/s who possess/ess all of the above qualifications. Such juridical entity and the representative/s are solidarily accountable for all the liabilities of the receiver.

The Receiver shall be appointed by the MB and may be replaced at anytime upon written notice by the MB.

The Bangko Sentral may maintain a pool of qualified receivers who shall be subjected to the following selection process:

- (i) The supervising sector shall send invitations citing the minimum requirements for the position, together with a copy of the terms of reference (TOR), to specific persons with reputable track record in handling corporate recoveries, rehabilitation, receivership, liquidation, banking and finance or supervision and regulation of financial institutions.
- (ii) Interested parties shall submit an application for appointment as receiver of an entity, together with the statement that the applicant is agreeable to the TOR prescribed by the Bangko Sentral. The applicant shall also submit his/her/its proposed compensation and other fees.
- (iii) The supervising sector shall evaluate the qualifications submitted by the applicants and shall prepare a short list of those qualified. To be included in the short list, candidates must comply strictly with the minimum qualifications.

The Bangko Sentral-accreditation of the receivers may be renewed every three (3) years. Any person pre-qualified to be included in the pool, may be appointed as Receiver of one (1) or more NBQBs/Trust Entities subject to such conditions as may be imposed by the MB.

The supervising sector, when recommending to the MB the person who shall be appointed as receiver, shall consider, among others, the following:

- (i) Area of expertise of the candidates vis-à-vis the nature of the business of the entity under receivership;
- (ii) Amount of assets of the entity under receivership;
- (iii) Proposed compensation and other fees; and
- (iv) Any information available in the business community and/or in legal/professional organizations regarding the candidate.

IV. Conflict of Interest. Conflict of interest is a situation wherein a person in a fiduciary position has competing professional or personal interests that can make it difficult to fulfill his/her duties impartially, which may include the following:

- a. The person is, or was within two years prior to the date the MB placed the institution under receivership a director, officer, employee, consultant/adviser, external counsel/auditor, creditor, debtor, or stockholder of the institution under receivership;
- b. The person is presently engaged in a competing line of business as the institution under receivership;
- c. The person is related by consanguinity or affinity within the fourth civil degree to such creditor, debtor, stockholder, director, officer of the institution under receivership;
- d. The person has a direct or indirect interest in the institution under receivership or any of its creditors; or
- e. Other cases analogous to the foregoing or where there is a clear showing of a conflict of interest, as may be determined by the MB.

The applicant-receiver shall disclose whether he/she/it possesses any of the foregoing conflict of interest.

V. Powers, Duties and Responsibilities of the Receiver. The receiver has the following principal responsibilities:

- a. Take charge of the institution's assets and liabilities as provided in the Receivership Procedures under *Annex A* of this *Appendix*;
- b. As expeditiously as possible, collect and gather all the assets and administer the same for the benefit of its creditors and exercise the general powers of a receiver under the Revised Rules of Court but shall not, with the exception of administrative expenditures, pay or commit any act that will involve the transfer or disposition of any asset of the institution;
- c. Determine as soon as possible, but not later than ninety (90) days from takeover, whether the institution may be rehabilitated or otherwise placed in such a condition so that it may be permitted to resume business with safety to its clients, creditors and the general public; and
- d. Evaluate and propose rehabilitation plan that may be submitted and make a recommendation to the MB whether the institution should be rehabilitated or liquidated.
- e. Upon approval by the MB of the receiver's recommendation for liquidation, the receiver shall proceed with the liquidation without prejudice to the prerogative of the MB to select a liquidator.

- VI. Designation of Deputy Receiver/s.** The receiver may appoint as many deputies as may be necessary to accomplish the objectives of receivership. The appointed deputies should possess the same qualifications required of a receiver.
- VII. Terms of Receivership.** Unless otherwise provided by competent court, the receiver shall determine within ninety (90) days from takeover, whether the institution may be rehabilitated or liquidated. The said determination to rehabilitate or liquidate the institution shall be subject to prior approval of the MB. The receivership may be terminated either upon receipt of the order of the MB authorizing the institution to resume its operation or order placing it under liquidation.
- VIII. Remuneration of the Receiver.** The receiver, in the performance of his/her/its duties, shall observe due diligence as required under the circumstances, reasonable skills, sound discretion and good faith.

PART II. GUIDELINES ON LIQUIDATION PROCEEDINGS OF NBQBS/TRUST ENTITIES

- 1. Introduction.** Liquidation is the process by which all the assets of an NBQB/Trust Entity are converted into liquid assets (cash) in order to pay for all the claims of creditors of the NBQBs, and the remaining balance, if any, is to be distributed to the stockholders of the corporation. A liquidation proceeding is a proceeding *in rem* so that all other interested persons whether known to the parties or not may be bound by such proceeding.¹

2. Legal Bases for Liquidation Proceedings

- a. Section 30 of Republic Act No. 7653, otherwise known as the New Central Bank Act
- b. Section 56, R.A. No. 8791
- c. Section 91, R.A. No. 8791 in relation to Section 66 of R.A. No. 8791 and Section 36 of R.A. No. 7653
- d. Section 36, R.A. No. 7653

3. Selection of Liquidator

3.1. Minimum Qualifications of the Liquidator.

The liquidator shall possess at all times the following minimum qualifications:

- a. Must belong to the private sector;
- b. Must have appropriate knowledge, training and competence in the field of banking and finance, receivership, liquidation, rehabilitation/corporate recovery, insolvency, or supervision and regulation of financial institutions;
- c. Must have a minimum of five (5) years' work experience in any of the following:
 - (i) rehabilitation/corporate recovery, receivership, liquidation, or insolvency involving a business similar in size and complexity as that of the institution under liquidation; or
 - (ii) banking and finance or supervision and regulation of financial institutions.
- d. Must pass the "*fit and proper*" rule of the Bangko Sentral on bank directors/officers;
- e. Must be of good moral character, sound judgment and tact in dealing with the transactions of the institution under liquidation;
- f. Must not have conflict of interest as defined in these guidelines;
- g. Must not be included in the Bagko Sentral Watchlist Disqualification Files "*A*" and "*B*";
- h. Must be eligible for coverage by a fidelity bond;
- i. Must not have been convicted by, or have no pending criminal or administrative case before a court or administrative body for any offense involving dishonesty or breach of trust such as, but not limited to, estafa, embezzlement, extortion, forgery, malversation, swindling, theft, robbery, falsification, bribery, violation of B.P. Blg. 22, violation of anti-graft and corrupt practices act and prohibited acts and transactions under Section 7 of R.A. No. 6713 (Code of Conduct and Ethical Standards for Public Officials and Employees), violation of banking laws, rules and regulations; and
- j. Must not have been sentenced by a court to serve a maximum term of imprisonment of more than six (6) years, which conviction has become final and executory.

¹ Chua v. NLRC, 1990

A juridical person may serve as a liquidator: *Provided*, That it must designate as its representative/s natural person/s who possess/ess all of the above qualifications. Such juridical entity and the representatives are solidarily accountable for all the liabilities of the liquidator.

The Bangko Sentral may create a pool of pre-qualified liquidators, whose inclusion in the pool is subject to renewal every three (3) years. Any person pre-qualified to be included in the pool, may be appointed as Liquidator of one (1) or more NBQBs/Trust Entities subject to such conditions as may be imposed by the MB.

The Liquidator shall be appointed by the MB and may be replaced at any time upon written notice by the MB.

3.2. Conflict of Interest.

Conflict of interest is a situation wherein a person in a fiduciary position has competing professional or personal interests that can make it difficult to fulfill his/her duties impartially, which may include the following:

- a. The person is, or was within two (2) years prior to the date the Monetary Board placed the NBQB/Trust Entity under liquidation, director, officer, employee, consultant/adviser, external counsel/auditor, creditor, debtor, or stockholder of the said NBQB, or any of its subsidiaries, affiliates or related interests;
- b. The person is presently engaged in a competing line of business as the NBQB/ Trust Entity under liquidation;
- c. The person is related by consanguinity or affinity within the fourth civil degree to such creditor, debtor, stockholder, director, officer, consultant/adviser, or external counsel/auditor of the NBQB/Trust Entity under liquidation;
- d. The person has a direct or indirect interest in the NBQB/Trust Entity under liquidation; or any of its creditors; or
- e. Other cases analogous to the foregoing or where there is a clear showing of conflict of interest, as may be determined by the Monetary Board.

3.3. Selection Process

- a. The supervising sector shall send invitations, together with a copy of the terms of reference (TOR), to specific persons with reputable track record in handling corporate recoveries, rehabilitation, receivership and liquidation citing the minimum requirements for the position.
- b. Interested parties shall submit an application for appointment as liquidator of an entity, together with the statement that the applicant is agreeable to the TOR prescribed by the Bangko Sentral. The applicant shall also submit his/its proposed compensation and other fees.
- c. The supervising sector shall evaluate the qualifications submitted by the applicants and shall prepare a short list of those qualified. To be included in the short list, candidates must comply strictly with the minimum qualifications.

The supervising sector, when recommending to the MB the person who shall be appointed as liquidator, shall consider, among others, the following:

- (i) Area of expertise of the candidates vis-à-vis the nature of the business of the NBQB/Trust Entity under liquidation;
- (ii) Amount of assets of the NBQB under liquidation;
- (iii) Proposed compensation and other fees; and
- (iv) Any information available in the business community and/or in legal/professional organizations regarding the candidate.

The supervising sector shall then recommend to the Monetary Board the person/partnership/firm who/which shall be appointed as liquidator.

4. Terms of Reference of the Bangko Sentral – Appointed Liquidator

4.1. Functions, Responsibilities and Authorities of the Liquidator.

- a. Master Liquidation Plan Implement the Master Liquidation Plan for NBQBs/Trust Entities, as provided under Annex B of this *Appendix*.

b. Liquidation Process

The Bangko Sentral-designated liquidator of the NBQB/Trust Entity shall:

1. Within sixty (60) days upon receipt of the Monetary Board placing the NBQB/Trust Entity under liquidation, file ex parte a Petition for Assistance in the Liquidation of the NBQB/Trust Entity with the proper Regional Trial Court pursuant to the Master Liquidation Plan;
2. Represent and act for and in behalf of the closed NBQB/Trust Entity;
3. Gather and take charge of all the assets which shall include the NBQB/Trust Entity license, records, documents and affairs of the NBQB/Trust Entity, and administer the same for the benefit of its creditors;
4. Collect loans and other claims of the NBQB/Trust Entity, and for this purpose, modify, compromise or restructure the terms and conditions of such loans or claims as may be deemed advantageous to the interest of the creditors and claimants of the closed NBQB/Trust Entity;
5. Convert the assets to money or dispose of the same to creditors and other parties for the purpose of paying debts of the NBQB/Trust Entity in accordance with the preference of credits provided under the Civil Code;
6. Settle the affairs of the NBQB/Trust Entity within a reasonable time preferably within three (3) to five (5) years;
7. Provide for his own organizational support and for other resource back-up facilities to accomplish the liquidation plan, including hiring of counsel;
8. Bring suits to enforce liabilities of the directors, officers, employees, agents of the closed NBQB/Trust Entity and other entities related or connected to the closed NBQB/Trust Entity or to collect, recover and preserve all assets, including assets over which the NBQB/Trust Entity has equitable interest;
9. Incur, disburse, charge and be paid from the funds of the NBQB/Trust Entity, liquidator's fees, salaries/compensation of support personnel and such other necessary expenses incurred in the discharge of the liquidation functions subject to approval by the Liquidation Court; and
10. Perform such other functions necessary in the liquidation of the NBQB/Trust Entity.

c. Safeguards for Preserving the Assets of an Entity during the Liquidation Process.

The liquidator, in the performance of his/her/its duties, shall observe due diligence as required under the circumstances, reasonable skill, sound discretion and good faith. Immediately, administer and preserve the assets of the NBQB/Trust Entity in order to conserve and/or maximize the value of the assets, including assets in the possession or administration of third persons or those previously given as collaterals by the NBQB/ Trust Entity to its creditors. Accordingly, the liquidator shall undertake the following steps:

1. All properties included in the inventory of assets and/or under the custody of the liquidator that are reasonably deemed to have inherent risk, shall be adequately insured;
2. The liquidator shall use all legal means to control the assets, collect all receivables, bring suit to collect claims and resist all unlawful claims against the assets of the entity;
3. Investible funds shall be limited to readily marketable government securities;
4. The liquidator shall convert the assets into money with convenient speed as may be practicable and at maximum recovery obtainable under the circumstances;
5. The liquidator and his staff shall be prohibited from purchasing properties of the NBQB/Trust Entity subject of liquidation;
6. The liquidator shall limit administrative expenses to what is necessary and reasonable;
7. Third parties hired to perform certain activities shall possess the education, experience, training and competence necessary for the job;

8. The liquidator shall maintain appropriate records which may be made available to parties as provided in Section 4.6 below; and
9. The liquidator shall be required to post a surety bond in an amount not less than 10% of the book value of the total assets of the institution as of takeover. Said surety bond shall be renewable every year and the amount of which shall be at least ten percent (10%) of the realizable assets of the preceding quarter.

d. Submission of Status Report.

The liquidator shall submit a semestral status report to the MB, or as often as may be required by the MB. The liquidator shall also submit a status report to the Liquidation Court if so required by the Liquidation Court.

4.2. Compensation and/or Fees of Liquidator

The Liquidator and the Deputy Liquidators shall receive compensations not more than the amount to be fixed by the MB.

All expenses attendant to the liquidation, including the above, shall be borne by or chargeable to the institution concerned.

4.3. Termination of Liquidation Proceedings

The liquidation proceeding shall be deemed closed and terminated upon finality of the order of the Liquidation Court approving the termination of the liquidation proceeding and discharging the Liquidator from any and all liabilities arising from or in connection with the Liquidation of the closed NBQB/Trust Entity.

4.3.1. Disposition of Remaining Non-Cash Assets

In case the NBQB/Trust Entity has remaining non-cash assets, the Liquidator shall recommend to the Court the final disposition of such assets.

4.4. Final Liquidation Report

At the end of the liquidation proceedings, the Liquidator shall submit a final report to the Monetary Board and the Liquidation Court. The Liquidator shall recommend to the Court the issuance of an order terminating the liquidation proceedings.

4.5. Extension or Replacement of Liquidator.

In case the Liquidator fails to terminate the Liquidation proceedings within his term, the Liquidator shall submit a status report and may request for extension of his term or replacement, subject to Bangko Sentral approval. The Liquidator shall manifest to the court such approval for the information of creditors and other stakeholders.

Upon the termination of the liquidation proceedings, the Liquidator shall pursue action in accordance with the preceding Sub-topic.

4.6. Records of the Liquidation Proceedings.

The liquidator shall maintain records of the liquidation proceedings which may be made available to parties duly authorized by him or the Liquidation Court.

After the termination of the liquidation proceedings, the liquidator shall turn over all records to a custodian duly appointed by the Court.

5. **Term of Liquidator.** The Liquidator shall serve for a term of five (5) years unless sooner terminated, revoked or extended by the Monetary Board.

6. **Proceedings in Case of Voluntary Liquidation**

6.1. Grounds. An NBQB/Trust Entity may elect voluntary dissolution under the Corporation Code by any of the following methods:

- a. by two-thirds (2/3) vote of the stockholders and majority vote of the board of directors, where no creditors are prejudiced;

- b. judgment of the Securities and Exchange Commission after hearing the petition for voluntary dissolution, where creditors are prejudiced; or
- c. amending the articles of incorporation to shorten the corporate term, provided all creditors are assured of payment of their claims.

The liquidation of an NBQB/Trust Entity which is voluntarily dissolved may be undertaken by the NBQB/Trust Entity itself through its Board of Directors, or by a Trustee appointed by the NBQB/Trust Entity. If the liquidation cannot be carried out by the Board of Directors or by a Trustee, a Liquidator may be appointed by the Monetary Board. However, in both of the foregoing cases, the following conditions shall apply:

- (i) No voluntary dissolution shall be undertaken by an NBQB/Trust Entity without written notice to the Monetary Board;
- (ii) The notice shall be accompanied by a surrender of license and request for approval of a liquidation plan which lays down the procedures to be adopted in the liquidation of the NBQB/Trust Entity;
- (iii) The liquidation plan shall be implemented by the Board of Directors/ Trustee/Liquidator only upon its approval by the Monetary Board;
- (iv) Within five (5) days from receipt of notice of approval by the Monetary Board of the NBQB/Trust Entity's Liquidation Plan, the Board of Directors shall cause the posting in three (3) public places and publication of the NBQB/Trust Entity's voluntary dissolution once in a newspaper of general circulation; and
- (v) The liquidation shall be terminated within a reasonable time, preferably within five (5) years or sooner.

6.2. Liquidation Process.

The liquidation plan shall, at a minimum, include the following:

- a. Inventory/Appraisal of Assets and Liabilities. A schedule/inventory and status/ appraisal reports of assets and liabilities of the NBQB/Trust Entity.
- b. Notice to Creditors. Notice of the voluntary dissolution to be sent by the Board of Directors/Trustee/ Liquidator by registered mail to all creditors of the NBQB/Trust Entity advising them to file their claims within a set deadline.

Publication of the same notice shall be made in a newspaper of general circulation at least once a week for two (2) consecutive weeks, within thirty (30) days from approval by the Monetary Board of the voluntary dissolution.

- c. Conversion of Assets into Money. Projected timetable to convert assets and manner of conversion, e.g., thru public auction or negotiated sale.
- d. Project of Distribution of Assets and Liquidating Dividends.
- e. Final Notice to Claimants/Creditors. Undertaking of the Board of Directors/ Trustee/Liquidator to advise, within thirty (30) days from conversion into money of all or substantially all of the assets of the NBQB/Trust Entity, by registered mail and by publication in a newspaper of general circulation at least once a month for three consecutive months, that claimants/ creditors have thirty (30) days from last publication within which to claim check payments.
- f. Final Liquidation Report. Submission by the Board of Directors/ Trustee/Liquidator, within thirty (30) days from the deadline given in the final notice to claimants/creditors, of a final liquidation report to the Stockholders, copy furnished the Securities and Exchange Commission and the Monetary Board. The final report shall include, among others, a list of the remaining non-cash assets of and claims against, the NBQB/Trust Entity, if any.

RECEIVERSHIP PROCEDURES FOR NON-BANKS WITH QUASI-BANKING FUNCTIONS (NBQBs) AND TRUST ENTITIES

A. Pre-Takeover Preparations

In preparation for actual takeover, the receiver designated by the Monetary Board ("MB") shall, as much as practicable, see to it that the following procedures are accomplished:

1. Designation of deputy receiver(s) and the formation of a complete receivership team which preferably includes an auditor and a lawyer. The composition of the team shall depend on the size, type of institution and the number of branches;
2. Planning, organization, and coordination of the duties and functions of all members of the team and complete briefing of the mechanics and the strategy of the takeover in a conference called for the purpose;
3. Drawing-up/formulation of policies, guidelines and strategies to ensure the effective implementation of Monetary Board ("MB") resolutions, Bangko Sentral Circulars and other applicable laws in relation to the receivership of the institution;
4. Arrange security measures for the takeover; and
5. Review of the examination papers/ files and other documents pertaining to the institution to be taken over.

B. Actual Takeover

During the actual takeover, the following procedures shall be observed:

1. Serve the letter of authority from the Deputy Governor of the Supervision and Examination Sector on the takeover addressed to the President/Board of Directors of the institution. The receiver/ deputy receiver shall see to it that the official receiving the said letter of authority indicates his designation, date and time of receipt on the duplicate copies of the letter.

In case the management of the institution refuses to allow the takeover, the receiver/deputy receiver shall immediately report the matter to the nearest office of the Philippine National Police and to the MB for further instructions;

2. As soon as the official of the institution receives the letter of authority on takeover, all operations shall be under the direction of the receiver or deputy receiver. The receiver shall suspend all operations except collections of loans and receivables;
3. Post a notice in the most conspicuous place in the institution's premises (usually the main door) informing the public of the placement of the institution under receivership;
4. Adopt appropriate security measures, such as hiring of private security guards, to prevent removal of records and other properties from the premises of the institution;
5. Notify in writing all of the institution's depository banks of the receiver's takeover with instruction not to honor any withdrawal from the institution's deposit accounts without the written approval of the receiver/deputy receiver;
6. Request or secure copies of trial balance, statement of condition and statement of earnings and expenses as of the last working day preceding the actual takeover;
7. Open a new deposit account (preferably a current account-savings account combo) with a reputable bank within the vicinity, in the name of the closed institution, with the Receiver as the authorized signatory and custodian. The Receiver may also maintain the existing account of the institution provided that the Receiver shall be the authorized signatory.
8. Conduct physical inventory and institute appropriate control and custody of all assets, liabilities, records, books of accounts and accountable forms of the institution;
9. Notify in writing the employees of the institution concerning the suspension of their employment contracts. Determine the number of employees to be retained in the receivership operation of the institution, and issue a notice of indefinite leave of absence for those who may not be retained and a confirmation of employment for those to be retained;
10. Deposit all checks and other cash items that were inventoried and subsequent collections to the savings account/current account mentioned in Item No. "7" above; and

11. Reconcile the inventoried properties/assets with the books/records and account for missing items. Demand from the responsible/ accountable officials the turnover of unaccounted items or written explanation under oath for each of the missing items.

The tasks and the procedures listed above need not be followed in the order they were listed. The entire receivership team is expected to exercise sound discretion in giving priorities to more urgent matters. Moreover, the receiver/deputy receiver may adopt other measures/appropriate steps he may deem necessary under given circumstances. Finally, he shall endeavor to effect an orderly and seamless takeover and minimize inconvenience to the institution's management and personnel.

Item Nos. "(1)" to "(9)" above should be, as much as practicable, undertaken on the first day of takeover.

C. Post Takeover

Within fifteen (15) days after the completion of the takeover, the receiver shall submit to the MB, through the Deputy Governor of the appropriate supervising sector of the Bangko Sentral, a report containing the following information:

1. Brief history of the institution;
2. Basis of its placement under receivership;
3. Comparative balances of its account as reflected in the books as of takeover date against the balances obtained per inventory and turnover from the institution's management to the receiver;
4. Inventories mentioned in Item B. 8 above; and
5. Such other information that should be brought to the attention of the MB.

D. Accounting and Reportorial Requirements Accounting

Once takeover is in place, the receivership team shall immediately undertake to:

1. Adopt an effective accounting system.
 - a) Carry in the receiver's books a chart of accounts of the institution, with additional accounts such as Receivership Costs and Fees (for recording of the salaries of the receivership team and those of the institution's employees to be retained, and other authorized expenses incurred by the receiver) and the Receivership Income (which may include rental income, and interest income);
 - b) Supervise the closing of the books as of takeover date and transfer the balances of all real accounts from the institution's books to the new set of books opened by the receiver's team; and
 - c) Record receiver's transactions involving receipt and disbursement of cash in accordance with generally accepted accounting principles.
2. Attend to all requirements of various agencies of the government, such as filing of tax returns and notices or other reportorial requirements of the DOLE, SEC and SSS/GSIS.

Reports

The receiver shall submit a monthly report of the receivership to the MB containing, among others, the following:

- a) Statement of Condition;
- b) Statement of Earnings and Expenses;
- c) Cash receipts and disbursements;
- d) Bank Reconciliation Statements;
- e) Summary of loan collections;
- f) Summary of Assets Acquired; and
- g) Status of Legal Cases

E. Administration of the Assets of the Institution

The receivership team or any member thereof, to be assigned by the receiver relative to the administration of the institution's assets, shall perform the following tasks/duties:

Cash and Deposit in Banks

1. Reconcile the deposit accounts of the institution and prepare/book the necessary adjusting entries.
2. Pay the following receivership expenses:

- a. Salaries and other allowances of officers and employees, including those of the receivership team;
- b. Security and janitorial services;
- c. Rental on institution's premises;
- d. Telephone, light, water and other utility expenses; and
- e. Insurance

Other than the foregoing expenses, no payment shall be made unless it is necessary for the preservation of the institution's assets and the operation of the receiver.

Loans/Receivables and Trading Account Securities

1. Evaluate documents of each loan folder and segregate vital documents from the file;
2. Prepare inventory of missing documents and demand explanations under oath from accountable/responsible officers of the institution;
3. Send demand letters, when due, or notice to borrowers and co-makers of various loan accounts;
4. Ensure that the real estate taxes on properties mortgaged in favor of the institution are updated by the borrowers;
5. Hire legal counsels to enforce collection;
6. Initiate collection proceedings; and
7. Follow-up on execution of judgments when warranted.

Real and Other Properties Acquired

1. Update payment of taxes;
2. Collect the fruits and rentals; and
3. Perform other acts which are necessary in preserving the properties and making them productive;

F. Rehabilitation Proposal

In case a rehabilitation proposal is submitted, the receiver shall undertake to:

1. Evaluate the rehabilitation proposal which shall contain, among others, the following:
 - a) a capital restoration plan that shall include an initial fresh capital infusion of an amount (to be determined by the Receiver) that will render the institution operational;
 - b) a business improvement plan that shall contain set of actions to be taken immediately to bring about an improvement in the entity's operating condition; and
 - c) a corporate governance reforms that shall contain actions to be immediately taken to improve composition of the Board of Directors and to enhance the quality of its oversight over the management and operation of the entity.
2. Submit report on the rehabilitation proposal, together with his evaluations and recommendation(s), to the MB within ninety days (90) from takeover.

G. Termination of Receivership

Unless otherwise provided by competent court, the receiver shall determine within ninety (90) days from takeover, whether the institution may be rehabilitated or liquidated. The said determination to rehabilitate or liquidate the institution shall be subject to prior approval of the MB. The receivership may be terminated either upon receipt of the order of the MB authorizing the institution to resume its operation or order placing it under liquidation.

Upon termination of the receivership, the receiver shall –

1. Submit a report to the MB containing the following:
 - a) MB resolution placing the institution under receivership;
 - b) Summary of total cash realized and disbursed by the receiver;
 - c) Comparative balance sheet statements as of takeover date and as of termination date of the receivership;
 - d) Other information which should be brought to the attention of the MB;
 - e) Recommendation for the discharge of the receivership team from the receivership duties.
2. Prepare an inventory of assets, liabilities and records to be turned over to the new management (if the entity is to be rehabilitated) or to the liquidator (if the entity is to be liquidated).

MASTER LIQUIDATION PLAN FOR NBQBs/TRUST ENTITIES

1. Preparation of Schedules of Assets and Liabilities.

After the turn-over of the affairs of the insolvent NBQB/Trust Entity is completed, the Liquidator shall prepare the schedules of all the assets and liabilities of the entity accompanied by the following basic information:

- a. Statement of condition as of date of order of liquidation
- b. Exceptions/variances noted in the takeover
- c. Work program pursuant to the master liquidation plan

2. Inventory of Asset

The following procedures/guidelines shall be observed by the Liquidator in preparing the inventory of assets:

- 2.1. The inventory shall contain all known assets of the NBQB together with their book value and market value based on the latest available appraisal report.
- 2.2. Supplemental reports shall be submitted for additional assets discovered, if any, and the Liquidator shall take possession thereof.
- 2.3. The schedules/reports shall be the basis for the conversion/disposition of the assets.

3. Conversion of Receivables/Loans, Securities, and Other Receivables into Money

3.1. In case the Liquidator engages the services of private collection agencies to collect all or particular receivables of the entity, such shall be covered by an agreement in writing.

3.2. In case the Liquidator shall undertake the collection of the loan receivables:

- 3.2.1. At least three (3) demand letters shall be sent to borrowers whose accounts are not subject to pending cases in courts, furnishing a copy of said letters to respective co-makers or guarantors, by registered mail with return card or by courier;
- 3.2.2. The Liquidator shall cause the appraisal of collaterals to determine their existence and valuation, where necessary.
- 3.2.3. Settlement proposals which require at least 20% payment of the total obligation and the balance (with interest) payable in equal amortizations within a one-year period may be allowed, provided, any deviation from the aforementioned arrangement shall require approval of the Liquidation Court.
- 3.2.4. For borrowers who ignore demand letters or who fail to settle their accounts in accordance with the agreed payment arrangement, or whose demand letters are returned by the Post Office or by courier, the following courses of action shall be taken:
 - 3.2.4.1. Secured loans – Immediate foreclosure of the mortgaged property shall be instituted.
 - 3.2.4.2. Unsecured loans – The Liquidator shall pursue appropriate legal action.
- 3.2.5. Foreclosure of mortgages may be done either extra-judicially or judicially. The amount of bid shall be the current appraisal value of the property or the total obligation consisting of principal, interest, penalties and other charges, including attorney's fees, other foreclosure and collection expenses incurred, whichever is lower. In case the bid price in foreclosure sale is not sufficient to cover the total loan obligation, the necessary legal remedies shall be instituted against the borrower- mortgagor, with the assistance of the counsel engaged by the Liquidator, to recover the deficiency.
- 3.2.6. The Liquidator is authorized to disburse funds for foreclosure expenses, including legal fees, to be charged against the NBQB/Trust Entity.
- 3.2.7. Booked receivables found to be non-existent and/or uncollectible shall be written-off subject to prior approval of the Liquidation Court.

4. Conversion of Personal and Real Estate Properties

The conversion into money of the personal properties and real estate properties and their improvements shall be made as follows:

- 4.1. These items shall be sold by means of public sealed bidding or on negotiated basis; provided that negotiated sale shall only be resorted to in the event of failure of public sealed bidding.

Negotiated sale shall be governed by Annex B-1.1. Sample form for negotiated offer to purchase is attached as Annex B-1.

- 4.2. Publication of the sale by means of sealed bidding shall be made by the Liquidator once in a national newspaper of general circulation in the Philippines.

- 4.3. In case of properties situated outside National Capital Region, the invitation to bid shall also be published once in a local newspaper of general circulation in the province or city where the property is situated at least fifteen (15) days before the scheduled sale. If there is no newspaper of general circulation in the locality where the property is situated, the invitation to bid shall be posted conspicuously in the city or municipal hall and in other public places, like public market, at least fifteen (15) days before the scheduled sale.

- 4.4. In the case of personal property, the publication of sale in a newspaper may be dispensed with if the value of the property to be sold is insignificant relative to the cost of publication. Instead, notices of sale of these properties shall be posted in government offices and other public places at least fifteen (15) days before the scheduled sale.

- 4.5. In case of sale through sealed bidding, sample invitation to bid is attached as Annex B-2.

- 4.6. The minimum selling price of real and personal properties of the NBQB shall be determined taking into consideration the appraised value based on the appraisal report made not more than two (2) years prior to date of disposition.

- 4.7. The Liquidator may reduce the minimum bid/selling price by not more than 10%, in case of properties that cannot be sold at the stipulated minimum bid/selling price.

- 4.8. The Liquidator shall recommend to the Court the write-off of assets which are ascertained to be worthless.

- 4.9. In case of sale thru sealed bidding of personal and/or real properties, the Liquidator may use the sample bid forms and conditions of bid as shown in Annexes B-3 and B-4, respectively. In the case of partnerships/corporations, the bid form shall be accompanied by an authority/resolution that shall indicate the designated person who shall make a bid and bind the partnership/corporation.

In any case, the higher price obtainable should govern the sale of the assets of the NBQB/Trust Entity.

- 4.10. Prospective bidders are allowed to examine the documents covering the real estate properties and their improvements and to inspect the property and improvements at their site, if desired.

- 4.11. The condition of the bid with respect to the real estate properties and improvements shall form part of the conditions for the sale of such assets.

- 4.12. All bids shall be in Philippine currency and shall be written in words and in figures. In case of conflict between words and figures, the words shall prevail.

- 4.13. Bid proposals together with the minimum 20% of the bid tender in cash or manager's check shall be submitted to the Liquidator in sealed envelopes. Sample Invitation to Bid is shown in Annex B-2. Bidders of real property shall be those qualified to own real property under existing laws.

- 4.14. The Deed of Sale shall be made and executed after the winning bidder pays the entire bid price of the property.

- 4.15. The winning bidder of the real estate property shall be responsible for instituting eviction proceedings against any former owner or present occupant or possessor, if any.

- 4.16. Real and personal properties that cannot be sold shall be subject to such disposition as may be determined by the Liquidator and with the approval of the Liquidation Court.

5. Processing of Claims against the Insolvent NBQB/Trust Entity.

5.1. Posting in the premises of closed NBQB and publication of a "Notice to Creditors" in a newspaper of general circulation once a week for two (2) consecutive weeks advising all creditors to file their claims against the entity. (See Annex B-5 for sample of Notice to Creditors.)

5.2. Distribution of claim forms for creditors to accomplish. (See Sample Claim Form in Annex B-6)

The claimant shall accomplish Claim Form as shown in Annex B-6. In the case of partnerships/corporations, the claim form shall be accompanied by an authority/ resolution that shall indicate the designated person who shall make a claim and bind the partnership/corporation. Claims received shall be stamped "Received", dated and numbered consecutively and recorded in the registry of claims. A copy of the claim received shall be given to the claimant.

5.3. Verification of claims received against the records and books of accounts of the NBQB to ascertain authenticity, determine whether claimants have outstanding liabilities to the NBQB/Trust Entity and whether settlement of the claims shall be in full or pro-rata depending on whether the claim is preferred or ordinary.

5.4. Preparation of an adjustment and verification sheet for each claim. (See Annex B-7)

5.5. Preparation of a Liquidation Certificate (sample is shown in Annex B-8) embodying the conclusive findings arrived at on the adjustment/verification sheet. The order shall be served on the claimant by registered mail with return card/personal service.

6. Payment of Claims

6.1. The net proceeds of the sale may be paid to creditors of the NBQB, taking into consideration the rules on preference of credits. A proposal to this effect shall be submitted to the Liquidation Court, copy furnished the Monetary Board.

6.2. Prepare and submit to the Court for approval a Project of Distribution, in case of 6.1, or Final Distribution (Sample in Annex B-9) as the case may be, which must show, among others, the following:

- Cash
- Assets to be realized
- Cost of liquidation/recoveries, including reasonable expenses and fees of the Liquidator
- List of credits/claims to be paid in accordance with the provisions on preference of credits under Articles 2241 to 2246 of the Civil Code

A copy of the Project of Distribution submitted to the Liquidation Court shall be provided to the Monetary Board for information with the following recommendations:

1. That an authority be secured from the liquidation court, through engaged counsel of the Liquidator, on the disposition of the remaining cash/unclaimed checks;
2. That the report be approved and the court issue an order terminating liquidation proceedings and discharging the Liquidator from his duties; and
3. That in case the NBQB/Trust Entity has remaining non-cash assets, the Liquidator shall seek the Court's approval to turn over said assets to a trustee appointed by the court for proper disposition in accordance with law.

6.3. Individual notices to the claimants as well as Claim for Payment forms shall be sent by way of registered mail. (Samples are shown in Annexes B-10 and B-11).

6.4. Distribute the check payments to claimants in accordance with the Project of Distribution approved by the Court.

- a. Claims shall be paid in check. Claimants shall execute an affidavit proving their right to be paid and an indemnity undertaking (Sample is shown in Annex B-12) to save the Liquidator from any claim or loss that might be caused by reason of such payment.
- b. Remaining assets shall be distributed in accordance with law.

- 6.5. A final report on liquidation shall be submitted by the Liquidator to the Liquidation Court for approval, showing among others, the following:
- a. Summary of the total cash realized and paid out by the Liquidator to approved claimants;
 - b. Statement of remaining cash/ unclaimed checks; and

The Liquidator shall also submit a copy of the final report to the Monetary Board for information. Likewise, the Liquidator shall inform the MB of the action taken by the Court on the final report.

NEGOTIATED OFFER TO PURCHASE FORM

 Date

 The Liquidator

Dear Sir/Madam:

This is to submit my/our offer to purchase the following property/ies of _____ Name of Entity _____ on an **"AS-IS, WHERE-IS"** basis:

TCT No.

Location/Description

Under the following terms:

Offer Price	P _____
Deposit/Downpayment %	P _____
Terms of Payment: Balance payable in _____ months	
To be filled up after payment of Deposit:	OR No. _____
Amount P _____	Date _____

With this offer, I/we bind myself/ourselves to comply with the attached Negotiated Sale Rules and Procedures, which I/we have read, fully comprehended, and signed on each and every page.

Upon approval of my/our offer to purchase, the deposit/downpayment shall form part of the purchase price and the balance shall be paid in accordance with the terms and conditions specified in the Notice of Approval.

My/Our failure to pursue the approved offer to purchase or comply with the conditions thereof would mean forfeiture in favor of the _____ Name of Entity _____ of 50 % of my/our deposit/downpayment.

Should my/our offer be disapproved, I/we am/are entitled to the return of the deposit/downpayment, without interest.

Very truly yours,

 Name/Company Name, if corporate account
 Broker authorized to negotiate with the
 Liquidator:

 Signature over Printed Name of Authorized Signatory

Signature: _____

 Address/Tel. No./Fax No./E-Mail

Name: _____

License No. _____

 Community Tax Certificate No./TIN No.

NEGOTIATED SALE RULES AND PROCEDURES (Attachment to Negotiated Offer to Purchase Form)

I. GENERAL PROVISIONS

In the event of a failure of bidding which shall be announced on the scheduled auction date, the Liquidator may accept within ten (10) calendar days from the date of announcement of failure of bidding, negotiated offers to purchase in the prescribed form with the required downpayment. Thereafter, the Liquidator shall evaluate the offers and conclude the negotiated sale with the complying offeror.

- a. The property shall be sold on "As-Is, Where-Is" basis. The offeror shall acknowledge that he has been given the opportunity to investigate, inspect, and verify the property for sale to ascertain its actual condition and the status of the title to the property before making an offer. The offeror shall also accept the (Name of Entity/Liquidator)'s disclaimer of any warranty, implied or otherwise, that the assets conform precisely to the description indicated in the list of properties for sale.
- b. The buyer shall be responsible, at his own expense, for the eviction of squatters and/or occupants, if any, on the property subject of sale.
- c. Any and all claims, liens, assessments, liabilities and/or damages whatsoever arising from any suit or litigation involving the property shall solely be assumed and borne by the buyer, accruing from the date of signing of the sale documents.
- d. The Liquidator of (Name of Entity) does not warrant (implied or express) that the property conforms precisely to the description indicated in the published list of Properties Available for Sale.
- e. Offers to purchase (Name of Entity) properties are subject to the approval of the Liquidator.

II. PUBLISHED SELLING PRICE

	Cash	Installment
Minimum Deposit/Down Payment	10 % of the offer Price	10% of the offer price upon submission of the offer to purchase.
Payment Terms	Full payment shall be made within 30 calendar days from date of receipt of the Notice of Approval (NOA)	The balance shall be paid in six (6) equal monthly installments without need of demand. The first installment shall commence not later than fifteen (15) days from receipt of the NOA while succeeding installments shall be paid every month thereafter. In case of failure to pay two (2) monthly installments, the remaining balance of the contract price becomes due and demandable within ten (10) days from receipt of notice. In case of failure to pay the same after said period, the Liquidator shall have the right to rescind the contract. Fifty percent (50%) of all payments made shall be forfeited in favor of the entity.

The published Selling Price of the (Name of Entity) property is subject to change without prior notice to conform with the prevailing fair market value of the property. The Liquidator has the discretion to accept or reject an offer already received that was based on an earlier published Selling Price.

III. TERMS OF SALE

- a. The basic terms and conditions of the sale are as follows:
- b. The acceptance of the initial deposit shall not bind the (Name of Entity) to the offer until after receipt by the offeror of the Notice of Approval of the sale from the Liquidator.
- c. The deposit shall be in the form of cash or manager's/cashier's check payable to the (Name of Entity).

IV. SUBMISSION OF OFFER

- a. The offeror shall submit in duplicate the following forms:
 1. Negotiated Offer to Purchase Form; and
 2. Negotiated Sale Rules and Procedures, ***signed on all pages.***

- b. The original copy of the forms shall be submitted to the (Name and Address of Entity). The duplicate copy shall be given back to the offeror properly stamped "RECEIVED" by the Office of the Liquidator.
- c. If the offeror is a representative of an individual, corporation, partnership or any form of entity, the representative must submit together with the required forms, a written authority to represent the individual or Secretary's Certificate for juridical entities.

V. OFFERS COURSED THROUGH BROKERS

- a. Offers coursed through licensed brokers shall be accepted, provided the broker named and so designated in the Negotiated Offer to Purchase Form submitted, has a valid authority issued by the Liquidator. No broker shall be recognized, even if with a valid authority to sell issued by the Liquidator, if the initial negotiation for the purchase of the property was made by the offeror with the Liquidator or any of his deputies without the assistance of a broker.
- b. Real estate brokers are not authorized to collect or receive any payment in behalf of the Liquidator. Any payment made to a broker shall be under the sole and exclusive responsibility and risk of the offeror.

VI. EVALUATION OF OFFERS

- a. The Liquidator shall evaluate the acceptability of offers received.
- b. Acceptance of negotiation offer shall always be for the best interest of the (Name of Entity)/creditors.
- c. Where there are two or more offers for the same property, which shall be opened at the same time after ten (10) days from the date of announcement of failure of bidding, the best offer shall be determined in accordance with the following order of priority:
 - 1. The first priority shall be the highest offered price;
 - 2. In case the same offered price is received, the next consideration shall be the highest down payment;
 - 3. In case the offers received have the same offer price and the same down payment, the shortest payment period shall be accepted;
 - 4. In case offers received have the same offer price, same down payment and same payment period, the offerors concerned shall be asked to resubmit on a designated date and time improved sealed offers to the Liquidator or his representative.

The best offer in accordance with the foregoing shall be announced right after the opening of the offers. Each offeror shall be required to complete the minimum deposit requirement based on the new offer price either in cash or manager's/cashier's check drawn payable to the (Name of Entity), which shall serve as earnest money in case he submits the best offer. The Liquidator shall receive the deposit or earnest money of the best offeror.

VII. NOTICE

- a. A Notice of Approval shall be sent to the buyer whose offer is deemed acceptable to the Liquidator.
- b. The deposit shall form part of the purchase price and the balance shall be paid in accordance with the terms and conditions indicated in the Notice of Approval.
- c. Notice of Disapproval shall be given to those whose offers were rejected and their deposits shall be returned without interest.

The Notice of Approval/Disapproval shall be distributed within seven (7) days from the date the Liquidator has decided on the offers.

VIII. DOCUMENTATION AND RELEASE OF TITLE

- a. If the buyer opts to pay the purchase price in full, a Deed of Absolute Sale shall be executed in favor of the buyer.

The owner's duplicate copy of the Transfer Certificate of Title (CCT or TD) shall thereafter be released to the buyer upon receipt of payment from the buyer of the capital gains tax due and reimbursement of taxes and insurance premium, mentioned in paragraph "c", if applicable.

- b. If the buyer opts to pay in installment, a Contract to Sell shall be executed to document the approved offer to purchase.

Upon full payment of the purchase price, a Deed of Absolute Sale shall be executed in favor of the buyer. The owner's duplicate copy of the Transfer Certificate of Title (CCT or TD) shall thereafter be released to the buyer upon receipt of payment from the buyer of the capital gains tax due and reimbursement of taxes and insurance premium, mentioned in paragraph c, if applicable.

However, in case of failure to pay two (2) monthly installments, the remaining balance of the contract price becomes due and demandable within ten (10) days from receipt of notice. In case of failure to pay the same after said period, the Liquidator shall have the right to rescind the Contract to Sell.

- c. The real estate taxes and insurance premiums paid by the (Name of Entity) shall be assumed by the buyer on a pro rata basis, thus, entitling the (name of entity) to reimbursement of the real estate taxes and insurance premium paid for the remaining days of the year.

Payment of foregoing reimbursement shall be made upon the execution of deed of absolute sale or contract to sell.

IX. OTHER CONDITIONS

a. Withdrawal of Accepted Offer –

Withdrawal of an offer already accepted by the Liquidator shall mean forfeiture in favor of the (Name of Entity) of 50% of the deposit as penalty.

b. Possession and Improvements –

The buyer may be allowed to take physical possession of the property upon downpayment and execution of Contract to Sell. The buyer may be allowed to make or introduce any improvement on the property prior to the full payment with the written consent and subject to the requirements of the Liquidator. Any improvement made contrary to this provision or upon rescission of the contract shall be forfeited in favor of the (Name of Entity) or may be removed without substantial damage to the property, at the expense of the defaulting buyer.

c. Transfer of Rights –

The buyer shall not sell, assign, encumber or in any way dispose of his rights and obligations under the Contract to Sell without prior written consent of the Liquidator.

X. PAYMENT OF TAXES AND FEES

- a. The payment of capital gains tax (CGT) shall be subject to agreement by the parties.

In case the (Name of Entity) shoulders the CGT, the buyer shall, in addition to the purchase price, assume payment of CGT due on the difference between the zonal value and the selling price, in case the zonal value is higher than the selling price.

The amount of CGT which the buyer shall pay or assume shall be delivered to the (Name of Entity) through the Office of the Liquidator.

- b. All other taxes and fees incidental and necessary to the sale and transfer of title shall be assumed by the buyer.

CONDITIONS OF THE BID

I. GENERAL PROVISIONS

- a. The property shall be sold on “As-is, Where-is” basis. The (Name of Entity) sells only whatever rights, interests and participation it has in the properties and the bidder is charged with full knowledge of the nature and extent of these rights, interests and participation.
- b. The offeror acknowledges that he was given the opportunity to investigate, inspect, and verify the property for sale to ascertain its actual condition and the status of the title to the property before making an offer. The offeror also accepts the (Name of Entity)’s disclaimer of any warranty, implied or otherwise, that the assets conform precisely to the description indicated in the list of properties for sale.
- c. The sealed envelope system shall be adopted in the bidding.
- d. No bid documents will be accepted after the deadline set for the acceptance of bids.
- e. All quotations shall be in Philippine pesos.
- f. A bidder may be allowed to withdraw a bid tender before the time of opening of bids, which shall be returned, unopened.
- g. The (Name of Entity) reserves the right to withdraw before the date and time of bidding any or all of the properties offered or to postpone or reset the date of opening of bids without prior notice.
- h. Non-compliance with any of the requirements prescribed hereunder will constitute a ground for disqualification.

II. SUBMISSION OF BIDS

- a. Bid Form –
 1. A bidder shall accomplish a Bid Form for every item or lot as shown in the published “Invitation to Bid”, clearly indicating the following, among others:
 - The bid price for the item/lot in figures and in words;
 - In case of discrepancy between the amount in figures and in words, the amount in words shall prevail;
 - Name and signature of bidder;
 - Business or residence address of the bidder; and
 - Business license number, CTC number, or TIN of the bidder

In case of personal properties except motor vehicles, bids for several items shall be contained in one bid form.
 2. The bidder shall accomplish the Bid Form, in duplicate, preferably typewritten. In case of partnerships, corporations, etc., a Secretary’s Certificate of Authority to bid or equivalent is also be duly initialed by the bidder.
 3. The Bid Form shall be sealed in an envelope with the Code/Property No. as shown in the required. All forms should be properly signed. Erasures or corrections should be avoided and if unavoidable should published “Invitation to Bid” written on the face of the envelope.
 4. The envelope shall contain only one bid form. At the discretion of the Liquidator, he may accept a bid form containing multiple items/lots with their corresponding bid offer prices published in the “invitation to Bid”. It shall also contain all bid documents issued by the (Name of Entity) (i.e., Bid Form and Conditions of the Bid), the Bid Deposit, and other attachments, as may be required.
 5. All documents shall bear the bidder’s signature on each and every page. The signature of the bidder on the original bid form and other bid documents shall constitute acceptance of all conditions embodied therein.
 6. The envelope shall be deposited in the designated box on or before the opening of bids.
- b. Bid Deposit
 1. A Bid Deposit of at least 20% of the bid tender shall be required for every bid.

2. The Bid Deposit shall be in the form of cash, manager's check or cashier's check payable to the _____ (Name of Entity) _____, and should be placed in a sealed envelope separate from all the other required bid documents. Such envelope shall be opened ahead of the bid form.

The submission of the Bid Deposit is a sign of the acceptance of the terms and conditions of the purchase and as a guarantee that the offeror shall, within fifteen (15) calendar days after receipt of the Notice of Award, pay the balance of the bid price.

3. Failure to submit the Bid Deposit in the sealed envelope shall automatically disqualify the bid concerned.

III. OPENING OF BIDS

- a. All bids shall be opened at the time, date and place set in the published "Invitation to Bid" (ITB) under the direction of the Liquidator or his authorized representative. No bid shall be accepted after the set deadline. Every bidder, or his authorized representatives, shall have the right to witness the opening of the bids.
- b. When two or more complying bidders make identical offers constituting the highest bids, public auction viva voce between those who submitted identical bids shall be resorted to at a price not lower than the offered bids.
- c. The Bid Deposit of the highest bidder shall be paid to, and receipted by the Liquidator/Representative.
- d. Bids that are not in the prescribed form, unsigned, or those not accompanied or guaranteed by Bid Deposits at the time of opening of bids are considered defective bids and shall be automatically disqualified. In case there is only one bidder, the Liquidator may accept the lone bid even if defective, subject to correction of the defects.
- e. A bidding may be declared a failure in any of the following cases:
 1. There is no bidding participant; or
 2. All bidders fail to comply with the terms and conditions prescribed in the ITB.
- f. Announcement of bidding results shall be done immediately after the opening of bids.
- g. In the event of a failure of bidding on the scheduled auction date, the Liquidator may accept within 10 calendar days from the date of announcement of failure of bidding, negotiated offers to purchase in the prescribed form with the required down payment. Thereafter, the Liquidator shall evaluate the offers and conclude the negotiated sale with the highest complying offeror.

IV. RIGHT TO REJECT

- a. The Liquidator reserves the right to reject any or all bids, as well as to waive any defect or infirmity in the bids, and to accept such offers as may be considered most advantageous to the _____ (Name of Entity) _____. Failure to comply with any of the terms and conditions mentioned above may cause the rejection of the bid.
- b. The Liquidator also assumes no obligation whatsoever to compensate or indemnify the bidders for any expense, loss or damage that they may incur in the preparation of the bids nor does it guarantee that any award will be made.

V. PAYMENT AND CLAIM OF AWARD

- a. The award to the highest complying bidder shall be subject to the approval of the Liquidator.
- b. The Notice of Award shall be issued to the winning bidders immediately after approval.
- c. The balance of the bid price shall be paid in the form of cash or manager's check payable to the (Name of Entity), within fifteen (15) days from the date of receipt of Notice of Award.
- d. In case of the awardee's failure to pay the full amount within the prescribed period or accept the award or comply with the terms and conditions listed in the Notice of Award, the award shall be cancelled and the Bid Deposit forfeited in favor of the _____ (Name of Entity) _____.

VI. TAXES AND OTHER EXPENSES

- a. The winning bidder shall, in addition to the purchase price, assume payment of the capital gains tax due on the difference between the zonal value and the selling price (in case the zonal value is higher than the selling price), transfer taxes to the City/Municipal Treasurer, and registration fees to the Register of Deeds as well as

documentary stamp taxes and all other assessments or charges that the Republic of the Philippines may impose on the properties from the execution of Deed of Absolute Sale.

- b. The capital gains tax due from the awardee shall be paid to the Liquidator who in turn shall pay the capital gains tax directly to the Bureau of Internal Revenue.
- c. The awardee shall likewise defray all expenses to be incurred in connection with the execution of the sale documents, including notarial fees, and such other expenses that may be necessary for the validity of the instrument and/or other documents that may be executed to implement the sale.
- d. The _____ (Name of Entity) shall also be refunded for unexpired portion of real estate taxes and insurance premiums paid for the transaction year computed from the date of execution of the Deed of Absolute Sale.

VII. DOCUMENTATION AND RELEASE OF TITLE

The _____ (Name of Entity) shall execute a Deed of Absolute Sale upon full payment to the Liquidator of the purchase price and the capital gains tax, if applicable, and shall release the transfer certificate of title of the property to the winning bidder.

VIII. OTHER CONDITIONS

- a. The buyer shall be responsible, at his own expense, for the eviction of squatters and/or occupants, if any, on the property subject of sale.
- b. Any and all claims, liens, assessments, liabilities and/or damages whatsoever arising from any suit or litigation involving the property shall be assumed and borne by the buyer.
- c. The _____ (Name of Entity/Liquidator) does not warrant (implied, express or otherwise), that the property conforms precisely to the description indicated in the published list of Properties Available for Sale.

IT RISK MANAGEMENT STANDARDS AND GUIDELINES

Area: IT Audit

(Appendix to Sec. 147-Q/145-S/142-P/126-N (Purpose and Scope and IT Risk Management System))

1. Introduction

- 1.1. BSFIs must plan, manage and monitor rapidly changing technologies to enable them to deliver and support new products, services, and delivery channels. The rate of these changes and the increasing reliance on IT make the inclusion of IT audit coverage essential to an effective overall audit program. The audit program should address IT risk exposures throughout the organization, including the areas of IT management and strategic planning, IT operations, client/server architecture, local and wide-area networks, telecommunications, physical and information security, electronic products and services, systems development and acquisition, and business continuity planning. IT audit should also focus on how management determines the risk exposure from its operations and controls or mitigates identified risks.
- 1.2. A well-planned, properly structured audit program¹ is essential to evaluate risk management practices, internal control systems and compliance with policies concerning IT-related risks at BSFIs of every size and complexity. Effective audit programs are risk-focused, promote sound IT controls, ensure the timely resolution of audit deficiencies and inform the board of directors of the effectiveness of risk management practices. An effective IT audit function may also allow regulators to place substantial reliance on and reduce the time spent reviewing areas of the BSFIs during examinations. Ideally, the audit program should consist of a full-time, continuous program of internal audit which may be further supported by a well-planned external audit program.

2. ROLES AND RESPONSIBILITIES

- 2.1 Board of Directors (Board) and Senior Management. The BSFI's Board or its Audit Committee has the overall responsibility for establishing and maintaining an independent, competent and effective IT audit function commensurate with the complexity of its IT risk profile. In order to properly oversee the IT audit function, the Board or its Audit Committee should:
 - a. Assign responsibility for IT audit function to an internal audit department or individual with sufficient audit expertise, knowledge base and skill level;
 - b. Ensure that IT audit maintains its professional and organizational independence²; and
 - c. Approve and review an audit program that would guide IT audit engagements.
 - d. Senior management is responsible for supporting IT audit by providing sufficient resources, establishing programs defining and requiring compliance with IT planning practices, operating policies and internal controls. Likewise, senior management should not, in any manner, diminish or interfere with the candor of the audit findings and recommendations.
- 2.2. **Audit Management and Audit Staff.** The internal audit manager is responsible for implementing the Board-approved audit directives. The manager oversees the audit function and provides leadership and direction in communicating and monitoring audit policies, practices, programs, and processes. He should establish clear lines of authority and reporting responsibility for all levels of audit personnel and activities. The internal audit manager should also ensure that members of the audit staff possess the necessary independence, experience, education, training, and skills to properly conduct assigned activities. This can be undertaken by providing auditors with an effective program of continuing education and development. As the information systems of a BSFI become more sophisticated or as more complex technologies evolve, the auditor may need additional training.

The primary role of the internal IT audit staff, on the other hand, is to assess independently and objectively the controls, reliability, and integrity of the BSFI's IT environment. Internal auditors should evaluate IT plans, strategies, policies, and procedures to ensure adequate management oversight. They should assess the day-to-day IT controls to ensure that transactions are recorded and processed in compliance with acceptable accounting methods and standards and are in compliance with policies set forth by the Board and senior management. Auditors also perform operational audits, including system development audits, to ensure that internal controls are in place, policies and procedures are effective, and employees operate in compliance with approved policies. Auditors should identify weaknesses, provide meaningful recommendations and review management's plans for addressing those weaknesses, monitor their resolution, and report to the Board material weaknesses, as necessary.

¹ Audit program encompasses audit policies, procedures, and strategies that govern the audit function, including IT audit

² Independence means self-governance, freedom from conflict of interest and undue influence. The IT auditor should be free to make his or her own decisions, not influenced by the organization being audited, or by its managers and employees

- 2.3 **Operating Management.** Operating management should formally and effectively respond to IT audit or examination findings and recommendations. The audit procedures should clearly identify the methods for following up on noted audit or control exceptions or weaknesses. Operating management is responsible for correcting the root causes of the audit or control exceptions, not just treating the exceptions themselves. Response times for correcting noted deficiencies should be reasonable and may vary depending on the complexity of the corrective action and the risk of inaction.

3. INDEPENDENCE OF THE IT AUDIT FUNCTION

- 3.1 The ability of the internal audit function to achieve desired objectives depends largely on the independence of audit personnel. Hence, the placement of the internal audit function in relation to the BSFI's management structure should be carefully assessed. The degree of auditors' independence, objectivity and impartiality entails the following key elements:
- a. Direct reporting of audit results to the Board or its Audit Committee;
 - b. Full authority vested by the Board to the IT Audit Department/IT auditor to access all records and staff necessary to conduct the audit and require management to address significant findings in a timely manner. Said authority must be clearly specified in an Internal Audit Charter or Audit Program duly approved by the Board or Audit Committee;
 - c. Non-involvement of IT audit personnel in management/operational activities that may compromise or appear to compromise their independence; and
 - d. The Board or Audit Committee should decide on audit personnel performance evaluation and compensation matters.

4. INTERNAL IT AUDIT PROGRAM

- 4.1 A formal audit program or manual consisting of policies and procedures governing the IT audit function should be adopted commensurate with the BSFI's size, complexity, scope of activities and risk profile. The audit program should, at a minimum, encompass the following components:
- a. A mission statement or audit charter¹ outlining the purpose, objectives, organization, authorities, and responsibilities of the internal auditor, audit staff, audit management, and the audit committee;
 - b. A risk assessment process to describe and analyze the risks inherent in a given line of business and drive the scope and frequency of audits. Auditors should update the risk assessment at least annually, or more frequently if necessary, to reflect changes to internal control or work processes;
 - c. An annual audit plan detailing IT audit's budgeting and planning processes to include audit goals, schedules, staffing needs and reporting;
 - d. An audit cycle that identifies the frequency of audits which should be based on a sound risk assessment process;
 - e. Well-planned and properly structured audit work programs² that set out the required scope and resources, including the selection of audit procedures, extent of testing and the basis for conclusions for each audit area;
 - f. Audit report preparation standards that require the use of an approved audit rating system;
 - g. Requirements for audit work paper documentation to ensure clear support for all audit findings and work performed, including work paper retention policies;
 - h. Follow-up processes that require internal auditors to determine the disposition of management actions to correct significant deficiencies;
 - i. Policies on outsourcing of some or all of IT audit function, including technical/highly specialized reviews, to external third parties; and
 - j. Professional development programs for audit staff/personnel to maintain the necessary technical expertise.

¹ Audit charter is a document approved by the Board of Directors that defines the IT audit function's responsibility, authority and accountability

² Work program is a series of specific, detailed steps to achieve an audit objective.

Additionally, the BSFI should consider conducting its internal audit activities in accordance with professional standards, such as the Standards for the Professional Practice of Internal Auditing issued by the Institute of Internal Auditors (IIA), and those issued by the Standards Board of the Information Systems Audit and Control Association (ISACA), whenever possible.

5. IT AUDIT PHASES

- 5.1 **Audit Planning.** The BSFI should develop an overall audit plan¹ for all the audit assignments/engagements covering at least twelve (12) months to ensure adequate coverage of IT risks. The plan should be defined by combining the results of the risk assessments and the resources required to yield the timing and frequency of planned internal audits. The audit plan must be realistic and should cover a time budget for other assignments and activities such as specific examination, consulting/advisory services, training and provision for audit personnel leave of absences.

The audit plan must be formally approved and regularly reviewed by the Board or Audit Committee. The internal auditors should report the status of the planned versus actual audits and any revisions to the annual audit plan on a periodic basis.

For each audit assignment, an audit work program detailing the objectives, scope, nature and extent of audit procedures and outline of audit work should be prepared. This is to ensure that appropriate attention is devoted to important areas of the audit, potential problems are identified and resolved on a timely basis, and the audit engagement is properly organized and managed to be performed in an effective and efficient manner.

- 5.2. **Risk Assessment.** The use of an appropriate risk assessment technique or approach is critical in developing the overall IT audit plan and in planning specific audits. An effective risk assessment methodology should be defined to provide the Board or its Audit Committee with objective information in determining audit priorities for the effective allocation of IT audit resources. The risk assessment for IT audit planning should:

- a. Identify the BSFI's data, application² and operating systems³, technology, facilities, and personnel;
- b. Identify the business activities and processes within each of those categories;
- c. Include profiles of significant business units, departments, and product lines, or systems, and their associated business risks and control features, resulting in a document describing the structure of risk and controls throughout the BSFI; and
- d. Use a measurement or scoring system that ranks and evaluates business and control risks for significant business units, departments, and products.

The results of the risk assessments, in support of the audit plan, must be presented to the Board or Audit Committee for review and approval. A process must be in place to ensure regular monitoring of the results of the risk assessment and updating it at least annually for all significant business units, departments, and products or systems.

A risk scoring model or system may be adopted to provide a sound basis for the risk assessment. Among the major risk factors that may be used in scoring systems include the following: a) Adequacy of internal controls; b) Nature of transactions and operating environment; c) Age of the system or application; d) Physical and logical security of information, equipment, and premises; e) Adequacy of operating management oversight and monitoring; f) Previous regulatory examination and audit results and management's responsiveness in addressing issues; g) Human resources, including the experience of management and staff, turnover, technical competence, management's succession plan, and the degree of delegation; and h) Senior management oversight.

Written guidelines on the use of risk assessment tools and risk factors should be approved and reviewed by the Board or its Audit Committee. IT auditors should use the guidelines to grade or assess major risk areas and to define the range of scores or assessments (e.g., groupings such as high, medium or low risk or numeric risk ratings). At a minimum, the written assessment guidelines should specify the following elements: a) Maximum length for audit cycles based on the risk scores; b) Timing of risk assessments for each department or activity; c) Documentation requirements to support scoring decisions; and d) Guidelines for overriding risk assessments in special cases and the circumstances under which they can be overridden.

¹ Audit plan is a description and schedule of audits to be performed in a certain period of time (ordinarily a year). It includes the areas to be audited, the type of work planned, the high-level objectives and scope of the work and includes other items such as budget, resource allocation, schedule dates, and type of report issued.

² Application system is an integrated set of computer programs designed to serve a well-defined function and having specific input, processing, and output activities (e.g., CASA, general ledger, loans and treasury systems).

³ Operating system is the program that manages all the basic functions and programs in a computer.

5.3 Performance of Audit Work. Depending on the complexity of IT risk profile, IT auditors may perform all or a combination of any of the following IT audit procedures:

- a. **IT General Controls Review** – This entails the review of the adequacy of general controls¹ in place to ensure proper management and monitoring of IT risks/environment and the effective functioning of the BSFI's IT systems and infrastructure. The following areas should be covered, among others: a) IT management and strategic planning; b) IT operations; c) Client/server architecture; d) Local and wide-area networks; e) Telecommunications; and f) Physical and information security.

IT general controls review may be carried out through the audit of each IT unit or department in the institution (e.g., IT Operations, Network and Communications, etc.).

- b. **Application Systems Review** -The purpose of this review is to identify, document, test and evaluate the application controls² that are implemented to ensure the confidentiality, integrity and accuracy of the system processing and the related data. The application-level risks to the system and data addressed by this review are the following, among others: a) System availability risks relating to the lack of system operational capability; b) System security risks relating to unauthorized access to systems and/or data; c) System integrity risks relating to incomplete, inaccurate, untimely or unauthorized processing of data; d) System maintainability risks relating to inability to update the system when required in a manner that continues to provide for system availability, security and integrity; and e) Data risks relating to its completeness, integrity, confidentiality, privacy and accuracy.
- c. **Technical Reviews** -BSFIs with complex IT risk profile such as those providing electronic products and services and web-enabled facilities, also require IT auditors to perform highly technical/specialized reviews such as the conduct of periodic internal vulnerability assessment and penetration testing, computer forensics and review of emerging technologies, e.g., cloud computing, virtualization, mobile computing.

IT auditors frequently use computer-assisted audit techniques (CAATs) to improve audit coverage by reducing the cost of testing and sampling procedures that otherwise would be performed manually. CAATs include many types of tools and techniques, such as generalized audit software, utility software, test data, application software tracing and mapping, and audit expert systems. These tools and techniques can also be used effectively to check data integrity by testing the logical processing of data “through” the system, rather than by relying only on validations of input and output controls.

Audit software programs should remain under the strict control of the audit department. For this reason, all documentation, test material, source listings, source and object program modules, and all changes to such programs, should be strictly controlled. Computer programs intended for audit use should be carefully documented to define their purpose and to ensure their continued usefulness and reliability.

All audit procedures forming part of the assignment should be documented in working papers. These must reflect the examinations that have been made and emphasize the evaluations formulated in the report. The working papers must be drawn up according to a well-determined method. Such method must provide sufficient information to verify whether the assignment was duly performed and to enable others to check the manner in which it was performed.

5.4 Reporting. A written audit report of each assignment is to be issued to the auditee and Audit Committee within a reasonable timeline. The audit report should state the scope, objectives, period of coverage and the nature, timing and extent of the audit work performed. It should state the findings, conclusions and recommendations and any reservations, qualifications or limitations in scope that the IT auditor has with respect to the audit. The IT audit should discuss the draft report contents with management in the subject area prior to finalization and release of the final report. This should be signed, dated and distributed according to the terms of the audit charter/audit program or engagement letter.

5.5 Post-closing/Monitoring Activities

Senior management should ensure that the internal audit department's concerns are appropriately addressed. Therefore, they should approve a procedure established by the internal audit department to ensure the consideration and, if appropriate, timely implementation of audit recommendations.

¹ General controls are controls, other than application controls, that relate to the environment within which application systems are developed, maintained, and operated, and that are therefore applicable to all the applications at an institution. Like application controls, general controls may be either manual or automated. Examples of general controls include the development and implementation of an IT strategy and an IT security policy, the organization of IT staff to separate conflicting duties and planning for disaster prevention and recovery.

² Application controls are controls related to transactions and data within application systems. Application controls ensure the completeness and accuracy of the records and the validity of the entries made resulting from both programmed processing and manual data entry. Examples of application controls include data input validation, agreement of batch totals and encryption of data transmitted.

The IT audit department should monitor the implementation of management's corrective actions for proper disposition of its findings/recommendation. The status of the recommendations is communicated at least on a quarterly basis to the Board or Audit Committee.

6. OTHER IT AUDIT ACTIVITIES/PARTICIPATION

- 6.1 Development, Acquisition, Conversions and Testing.** The BSFI's Board-approved audit policy should include guidelines detailing what involvement internal audit will have in the development, acquisition, conversion, and testing of major applications. This includes describing the monitoring, reporting, and escalation processes (when internal controls are found to be insufficient or when testing is found to be inadequate). For acquisitions with significant IT impacts, participation of IT audit may be necessary early in the due diligence stage.

It is necessary that audit's participation in the development process be independent and objective. Auditors can determine and should recommend appropriate controls to project management. However, such recommendations do not necessarily "pre-approve" the controls, but instead guide the developers in considering appropriate control standards and structures throughout their project.

- 6.2 Review of Technology Service Providers (TSP).** The BSFI should effectively manage its relationships with key TSPs through review and assessment of adequacy of IT controls employed by such TSPs. When circumstances warrant, the BSFI's internal audit function may be utilized to directly audit TSP's operations and controls. In some instances, the services of external auditors may be employed. A BSFI using external audit to complement its own coverage should ensure that the independent auditor is qualified to perform the review, that the scope satisfies its own audit objectives and that any significant reported deficiencies are corrected.

7. OUTSOURCING OF IT AUDIT FUNCTIONS

- 7.1** The Board and senior management of a BSFI that outsources its internal IT audit function should ensure that the structure, scope and management of the outsourcing arrangement provides for an adequate evaluation of the system of internal controls. Management should ensure that there are no conflicts of interest and that the use of these services does not compromise independence.
- 7.2.** When negotiating the outsourcing arrangement with a service provider, the BSFI should carefully consider its current and anticipated business risks in setting each party's internal audit responsibilities. To clearly define the BSFI's duties and those of the audit provider, it should have a written contract, often referred to as an engagement letter¹.

(Circular Nos. 970 dated 22 August 2017 and 958 dated 25 April 2017)

¹ In general, the contract between the institution and the audit provider may or may not be the same as the engagement letter.

IT RISK MANAGEMENT STANDARDS AND GUIDELINES

Area: Information Security

(Appendix to Sec. 147-Q/145-S/142-P/126-N (Purpose and Scope and IT Risk Management System))

1. INTRODUCTION

- 1.1. Information is one of the most important assets of all BSFIs. Timely and reliable information is necessary to process their transactions and support critical decisions. Protection of information assets is also necessary to establish and maintain trust between the BSFIs and their customers, maintain compliance with laws and regulations and protect reputation. Likewise, effective management of information risks and exposures—as well as opportunities—can directly affect the BSFIs' profitability and overall value.
- 1.2. Information security (IS) has become a critical business function and an essential component of governance and management affecting all aspects of the business environment. Effective IS controls are necessary to ensure the confidentiality, integrity and availability of IT resources and their associated data. These assets should be adequately protected from unauthorized access, deliberate misuse or fraudulent modification, insertion, deletion, substitution, suppression or disclosure. To achieve these objectives, BSFIs should establish an IS program to manage the risks identified through their assessment, commensurate with the sensitivity of the information and the complexity of their IT risk profile. Management may consider a variety of policies, procedures, and technical controls and adopt measures that appropriately address identified risks.

2. ROLES AND RESPONSIBILITIES

- 2.1. **Board of Directors (Board) and Senior Management.** The Board, or an appropriate Board committee, is responsible for overseeing the development, implementation, and maintenance of the BSFI's IS program, and making senior management accountable for its actions. The Board should approve written IS policies and receive periodic report on the effectiveness of the IS program. The IS policy should be communicated to all employees and relevant external parties and be reviewed at planned intervals to ensure its continuing suitability, adequacy and effectiveness. The policy should include a formal disciplinary process and the corresponding actions for those who have committed security violations.

Senior management should appoint an information security officer (ISO) who will be responsible and accountable for the organization-wide IS program. The duly appointed ISO should have sufficient knowledge, background, and training, as well as organizational position, to enable him to perform assigned tasks. To ensure appropriate segregation of duties, the ISO should report directly to the Board or to senior management and have sufficient independence to perform his mandate. The ISO should perform the tasks of a risk manager and not a production resource assigned to the IT department. In the case of BSFIs with simple IT risk profile, The ISO function may be assigned to an existing independent officer who meets the above qualifications.

3. INFORMATION SECURITY STANDARDS

- 3.1. **IS Risk Assessment.** The BSFI should conduct periodic security risk assessment to identify and understand risks on confidentiality, integrity and availability of information and IT systems based on a current and detailed knowledge of the BSFI's operating and business environments. The risk assessment should include an identification of information and IT resources to be protected and their potential threats and vulnerabilities. An effective risk assessment process involves three phases, namely: information gathering, analysis, and prioritizing responses. Vendor concerns add additional elements to the process.

Once the risks associated with threats and vulnerabilities have been assessed, probabilities assigned, and risks rated, the BSFI should segregate the risks into those the BSFI is willing to accept and those that should be mitigated. Once the BSFI identifies the risks to mitigate, it can begin to develop its risk mitigation strategy which should be an integral component of the IS program.

3.2. Security Controls Implementation

- 3.2.1. **Asset Classification and Control.** The BSFI should maintain an inventory of all information assets and identify the information owner who shall be responsible in ensuring confidentiality, integrity and protection of these assets. Management should implement an information classification strategy in accordance with the degree of sensitivity and criticality of information assets to the BSFI. To ensure consistent protection of information and other critical data throughout the system, the BSFI should develop guidelines and definitions for each classification and define an appropriate set of controls and procedures for information protection in accordance with the classification scheme.

Protection of information confidentiality should be in place regardless of the media¹ (including paper and electronic media) in which the information is maintained. The BSFI should ensure that all media are adequately protected, and establish secure processes for disposal and destruction of sensitive information in both paper and electronic media.

3.2.2. Physical and Environmental Protection. Physical security measures should be in place to protect computer facilities and equipment from damage or unauthorized access. Critical information processing facilities should be housed in secure areas such as data centers and network equipment rooms with appropriate security barriers and entry controls. Access to these areas should be restricted to authorized personnel only and the access rights should be reviewed and updated regularly. Buildings should give minimum indication of their purpose, with no obvious signs identifying the presence of information processing facilities.

The BSFI should fully consider the environmental threats (e.g., proximity to dangerous factories) when selecting the locations of its data centers.

Moreover, physical and environmental controls should be implemented to monitor environmental conditions which could adversely affect the operation of information processing facilities (e.g., fire, explosives, smoke, temperature, water and dust). Equipment and facilities should be protected from power failures and electrical supply interference by, for example, installing uninterruptible power supply (UPS) and a backup generator.

3.2.3. Security Administration and Monitoring. A security administration function and a set of formal procedures should be established for administering the allocation of access rights to system resources² and application systems, and monitoring the use of system resources to detect any unusual or unauthorized activities.

Proper segregation of duties within the security administration function or other compensating controls (e.g., peer reviews) should be in place to mitigate the risk of unauthorized activities being performed by the security administration function. In those cases where complete segregation of duties is impractical, management should use mitigating controls, such as ensuring a knowledgeable third-party conducts appropriate independent reviews of security administration activities. In smaller institutions, a manager or senior officer who is not involved in the security administration function may conduct this independent review.

Management should employ the “least privilege” principle throughout IT operations. The principle provides that individuals should only have privileges on systems and access to functions that are required to perform their job function and assigned tasks. Individuals with systems and security administrator roles and privileges should have minimal transactional authority. Independent employees should monitor the system and security administrator activity logs for unauthorized activity. Management at smaller institutions should establish compensating controls in these circumstances.

3.2.4. Authentication³ and Access Control. Access rights and system privileges must be based on job responsibility and the necessity to have them to fulfill one’s duties. No person by virtue of rank or position should have any intrinsic right to access confidential data, applications, system resources or facilities. Only employees with proper authorization⁴ should be allowed to access confidential information and use system resources solely for legitimate purposes.

The BSFI should have an effective process to manage user authentication and access control. Appropriate user authentication mechanism commensurate with the classification of information to be accessed should be selected. The grant, modification and removal of user access rights should be approved by the information owner prior to implementation. A user access re-certification process should be conducted periodically to ensure that user access rights remain appropriate and obsolete user accounts have been removed from the systems.

Users who can access internal systems should be required to sign an acceptable-use policy (AUP) before using a system. An AUP is a key control for user awareness and administrative policing of system activities which details the permitted system uses and user activities and the consequences of non-compliance.

¹ Media are physical objects that store data, such as paper, hard disk drives and compact disks.

² System resources are capabilities that can be accessed by a user or program either on the user’s machine or across the network. Capabilities can be services, such as file or print services, or devices, such as routers.

³ Authentication involves verification of identity by a system based on the presentation of unique credentials to that system

⁴ Authorization is the process of giving access to parts of a system, typically based on the business needs and the role of the individual within the system

The BSFI should implement effective password rules to ensure that easy-to-guess passwords are avoided and passwords are changed on a periodic basis. Stronger authentication methods should be adopted for transactions/activities of higher risk (e.g., payment transactions, financial messages and mobile computing).

Default user accounts to new software and hardware should either be disabled, or the authentication to the account should be changed. Additionally, access to these default accounts should be monitored more closely than other accounts. In the same manner, authorization for privileged access should be tightly controlled as it gives the user the ability to override system or application controls. Extra care should be exercised when controlling the use of and access to privileged and emergency IDs. The necessary control procedures include:

- a. Granting of authorities that are strictly necessary to privileged and emergency IDs;
- b. Formal approval by appropriate personnel prior to being released for usage;
- c. Monitoring of activities performed by privileged and emergency IDs (e.g., peer reviews of activity logs);
- d. Proper safeguard of privileged and emergency IDs and passwords (e.g., kept in a sealed envelope and locked up inside the data center); and
- e. Change of privileged and emergency IDs' passwords immediately upon return by the requesters

3.2.5. System Security. The following control procedures and baseline security requirements should be developed to safeguard operating systems, system software and databases¹, among others:

- a. Clear definition of a set of access privilege for different groups of users and access to data and programs is controlled by appropriate methods of identification and authentication of users together with proper authorization;
- b. Secure configuration of operating systems, system software, databases and servers to meet the intended uses with all unnecessary services and programs disabled or removed. Use of security tools should be considered to strengthen the security of critical systems and servers;
- c. Periodic checking of the integrity of static data (e.g., system parameters) to detect unauthorized changes;
- d. Clear establishment of responsibilities to ensure that the necessary patches and security updates developed from time to time by relevant vendors are identified, assessed, tested and applied to the systems in a timely manner;
- e. Adequate documentation of all configurations and settings of operating systems, system software, databases and servers; and
- f. Adequate logging and monitoring of system and user activities to detect irregularities and logs are securely protected from manipulation.

3.2.6. Network Security. Networks provide system access and connectivity between business units, affiliates, service providers, business partners, customers, and the public. This increased connectivity requires additional controls to segregate and restrict access between various groups and information users. The BSFI must evaluate and implement appropriate controls relative to the complexity of its network. An effective approach to adequately secure system and data within the network involves the following, among others:

- a. Grouping of network servers, applications, data, and users into security domains (e.g., untrusted external networks, external service providers, or various internal user systems);
- b. Establishment of appropriate access requirements within and between each security domain;
- c. Implementation of appropriate technological controls to meet access requirements consistently; and
- d. Monitoring of cross-domain access for security policy violations and anomalous activity.

The BSFI should consider the following factors in determining the network security controls appropriate to the institution and each of the security domain, among others:

- a. Criticality of the application and the user group within the domain;
- b. Access points to the domain through various communication channels;
- c. Network protocols and ports used by the applications and network equipment deployed within the domain;
- d. Performance requirement or benchmark;
- e. Nature of domain (i.e., production or testing, internal or external);

¹ Database is an organized collection of information stored on one or more electronic files.

- f. Connectivity between/among various domains; and
- g. Trustworthiness of the domain.

3.2.7. Remote Access. Controls over remote access are required to manage risk brought about by external connections to the BSFI's network and computing resources. In protecting information, the BSFI should establish control procedures covering:

- a. Approval process on user requests;
- b. Authentication controls for remote access to networks, host data and/or systems;
- c. Protection (e.g., against theft and malicious software) of equipment and devices;
- d. Logging and monitoring all remote access communications; and
- e. Provision of more stringent security controls (i.e., data encryption, two-factor authentication process).

3.2.8. Encryption. The BSFI should adopt industry-accepted cryptographic solutions and implement sound key management practices to safeguard the associated cryptographic keys. Sound practices of key management generally include the following, among others:

- a. Provision of a secure control environment for generation, distribution, storage, entry, use and archiving of cryptographic keys to safeguard against modification and unauthorized disclosure. In particular, the use of tamper-resistant storage is recommended to prevent the disclosure of the cryptographic keys; and
- b. Adequate off-site back-up and contingency arrangements for cryptographic keys which are subject to the same security controls as the production cryptographic keys.

3.2.9. Malicious Code¹ Prevention. The BSFI should provide protection against the risk of malicious code by implementing appropriate controls at the host and network level to prevent and detect malicious code, as well as engage in appropriate user education. Procedures and responsibilities should be established to detect, prevent, and recover from attacks. The BSFI should put in place adequate controls, such as:

- a. Prohibiting the download and use of unauthorized files and software, and access to doubtful web sites;
- b. Installation and timely update of anti-virus software² provided by reputable vendors;
- c. Disallowing the download of executable files and mobile codes, especially those with known vulnerabilities (e.g., through the use of corporate firewalls³ and proper configuration of the browser software); and
- d. Prompt and regular virus scanning of all computing devices and mobile users' computers, and procedures for recovering from virus infections.

3.2.10. Personnel Security. The BSFI should have a process to verify job application information on all new employees. Screening procedures, including verification and background checks, should be developed for recruitment of permanent and temporary IT staff, and contractors, particularly for sensitive IT-related jobs or access level.

Management should obtain signed confidentiality, non-disclosure and authorized use agreements before granting new employees and contractors' access to IT systems. Such agreements put all parties on notice that the BSFI owns its information, expects strict confidentiality, and prohibits information sharing outside legitimate business needs.

All employees of the organization and, where relevant, contractors and third-party users, shall receive appropriate IS awareness training and regular updates in organizational policies and procedures relevant to their job function. Security training and awareness promotes a security conscious environment and strengthens compliance with BSFI's security policies, standards, and procedures.

¹ Malicious code refers to any code in any part of a software or script that is intended to cause undesired effects, security breaches or damage to a system. It describes a broad category of system security terms that includes attack scripts, viruses, worms, Trojan horses, backdoors and malicious active content.

² Antivirus software is a computer program that offers protection from viruses by making additional checks of the integrity of the operating system and electronic files. Also known as virus protection software.

³ Firewall is a hardware and/or software that prevents unauthorized data from entering or leaving a secure network. Firewalls can also be used to isolate or protect a particular segment of a network.

3.2.11. Systems Development, Acquisition and Maintenance. A framework should be in place describing the tasks and processes for development or acquisition of new systems, assignment and delineation of responsibilities and accountabilities for system deliverables and project milestones. User functional requirements, systems design and technical specifications and service performance expectations should be adequately documented and approved at appropriate management levels.

The BSFI's development, acquisition, and audit policies should include guidelines describing the involvement of internal audit and information security personnel in the development or acquisition activities as a means of independently verifying the adequacy of the control and security requirements as they are developed and implemented.

Besides business functionalities, security requirements relating to system access control, authentication, transaction authorization, data integrity, system activity logging, audit trail, security event tracking and exception handling should be clearly specified. The information and/or process owners should conform to the security requirements for each new system or system acquisition, accept tests against the requirements, and approve implementation of systems in the production environment.

The BSFI should have an effective process to introduce application and system changes into its respective environments. The process should encompass development, implementation, and testing of changes to both internally developed software and acquired software. Weak procedures can corrupt applications and introduce new security vulnerabilities.

3.2.12. Insurance. While insurance coverage is an effective method to transfer risks from the BSFI to insurance carriers, the same is not a substitute for an effective IS program. When considering supplemental insurance coverage for security incidents, the BSFI should assess the specific threats in light of the impact these incidents will have on its financial, operational, and reputation risk profiles. The BSFI should carefully evaluate the extent and availability of coverage in relation to the specific risks they are seeking to mitigate. In case the BSFI contracts for additional coverage, it should ensure that it is aware of and prepared to comply with any required security controls both at inception of the coverage and over the term of the policy.

3.3. Security Process Monitoring and Updating

3.3.1. Activity Monitoring. The BSFI should gain assurance of the adequacy of its risk mitigation strategy and implementation by monitoring network and host activity to identify policy violations and anomalous behavior. The BSFI's security monitoring should, commensurate with the risk, be able to identify control failures before a security incident occurs, detect an intrusion or other security incident in sufficient time to enable an effective and timely response, and support post-event forensics activities.

The analysis and response to activity and condition monitoring is performed differently at BSFIs of different IT risk profile. A simple BSFI may assign operational personnel to the analysis and response function while a complex BSFI may maintain a security response center that receives and analyzes the data flows as activity occurs. Additionally, BSFIs, regardless of IT risk profile, may outsource various aspects of the analysis and response function, such as activity monitoring. Outsourcing does not relieve the BSFI of the responsibility for ensuring that control failures are identified before a security incident occurs, an intrusion or other security incident is detected in sufficient time to enable an effective and timely response, and post event forensics activities are supported.

3.3.2. IS Incident Management. The BSFI should establish incident response and reporting procedures to handle IS-related incidents. All employees, contractors and third party users shall be required to note and report any observed or suspected security weaknesses in systems. An effective incident response program includes the following components, among others:

- a. A mechanism to log, monitor and quantify the nature, criticality and estimated cost of IS incidents.
- b. Assessment of the nature and scope of the incident and identification of what information has been accessed or misused;
- c. Measures to contain and control the incident to prevent further unauthorized access to or misuse of information, while preserving records and other evidence;
- d. Prompt notification to Bangko Sentral of any confirmed IT-related fraud cases or major security breaches, consistent with existing regulations;
- e. Notification to appropriate law enforcement authorities in situations involving criminal violations requiring immediate attention; and
- f. Notification to customers when warranted.

Log files are critical to the successful investigation and prosecution of security incidents and can potentially contain sensitive information. Therefore, the BSFI should strictly control and monitor access to log files whether on the host or in a centralized logging facility.

Where a follow-up action against a person or organization after an IS incident involves legal action, evidence shall be collected, retained, and presented to conform to the rules for evidence laid down in the relevant jurisdiction.

- 3.3.3. Ongoing risk assessment.** The BSFI should continuously gather and analyze information regarding new threats and vulnerabilities, actual attacks on the institution or others, and the effectiveness of the existing security controls. It should evaluate the information gathered to determine the extent of any required adjustments to the various components of the IS program. Depending on the nature of changing environment, the BSFI needs to reassess the risk and make changes to its security process (e.g., security strategy, controls implementation or security monitoring requirements).

The BSFI should adjust its IS program to reflect the results of ongoing risk assessment and the key controls necessary to safeguard customer information and ensure the proper disposal of customer information. It should adjust the program to take into account changes in IT, sensitivity of its customer information, internal or external threats, and the BSFI's own changing business arrangements such as mergers, acquisitions, alliances and joint ventures, outsourcing arrangements, and changes in customer information systems.

4. ROLES OF IT AUDIT AND SECURITY SPECIALISTS

- 4.1. Audit and Compliance Reviews.** IT auditors are usually charged to assess, on a regular basis, the effectiveness of a BSFI's IS security program. To fulfill this task, they must have an understanding of the protection schemes, the security framework and the related issues, including compliance with applicable laws and regulations.

The BSFI should engage independent security specialists to assess the strengths and weaknesses of critical applications, systems and networks prior to initial implementation.

For BSFIs providing electronic and similar services, annual vulnerability assessment¹ and penetration testing² should be performed by an external party to provide early identification of threats and vulnerabilities so that appropriate security measures can immediately be implemented.

(Circular No. 958 dated 25 April 2017)

¹ *Vulnerability assessment* (also known as vulnerability analysis) is a process that defines, identifies, and classifies the security flaws (vulnerabilities) in a computer, network, or communications infrastructure. In addition, vulnerability assessment can forecast the effectiveness of proposed countermeasures and evaluate their actual effectiveness after they are put into use.

² *Penetration test* is the process of using approved, qualified personnel to conduct real-world attacks against a system so as to identify and correct security weaknesses before they are discovered and exploited by others.

IT RISK MANAGEMENT STANDARDS AND GUIDELINES
Area: Project Management/Development, Acquisition and Change Management
(Appendix to Sec. 147-Q/145-S/142-P/126-N (Purpose and Scope and IT Risk Management System))

1. INTRODUCTION

- 1.1. Because technology is constantly evolving, Management of BSFIs should periodically assess their uses of IT as part of overall business planning. Such an enterprise-wide and ongoing approach should be formalized in the IT strategic plan to help ensure that all major IT projects are consistent with its overall strategic goals.
- 1.2. As part of their strategic goals, BSFIs may need to constantly introduce new or enhanced products and services, improve systems and processes and implement updates and innovations in IT to secure and manage voluminous information and maintain their competitive position. This necessity may oftentimes result to initiating IT projects¹; which may be in the form of internal or external development of software applications or systems, acquisition and/or implementation of new or enhanced hardware, software, infrastructure or services with or without the help of third party providers
- 1.3. IT projects, when managed improperly, often result in late deliveries, cost overruns, or poor quality applications. Inferior applications can result in underused, insecure, or unreliable systems. Retrofitting functional, security, or automated-control² features into applications is expensive, time consuming, and often results in less effective features. Therefore, BSFIs should carefully manage IT-related projects to ensure they meet organizational needs on time and within budget.

2. ROLES AND RESPONSIBILITIES

- 2.1. The size and complexity of a project dictates the required number and qualifications of project personnel. Duties may overlap in smaller organizations or lower-risk projects; however, all projects should include appropriate segregation of duties or compensating controls.
- 2.2. **Board of Directors (Board) and Senior Management.** The BSFI's Board and senior management should review, approve, and monitor IT projects that may have significant impact on its operations, earnings or capital. They are responsible to ensure that IT projects support business objectives and adequate resources are available to complete these projects. Consequently, they should establish adequate policies and strategies to achieve these and ensure that risks related to IT projects are managed appropriately.

Senior management is expected to have more knowledge and involvement in the day-to-day operations of these IT projects to critically evaluate the design and oversee the related operation and activities. They should ensure that IT projects are coordinated and undertaken in adherence to appropriate policies, standards, and risk management controls. They should periodically inform the Board and/or IT Steering Committee of the IT initiatives and the related risks that these may pose to the BSFI. They should also review, approve, document and report deviations from established policies and standards.

- 2.3. **Quality Assurance.** An independent party (e.g., the quality assurance function, the TRM function or the technology audit team), who is not involved in the project development, should conduct a quality assurance review of major IT-related projects, with the assistance of the legal and compliance functions, if necessary. This review is to ensure compliance with the project life cycle³ methodology, other internal policies, control requirements, regulations and applicable laws.

3. PROJECT MANAGEMENT STANDARDS AND METHODOLOGY

- 3.1. **Project Management.** The BSFI should establish a general framework for management of major technology-related projects. This framework should, among other things, specify the project management methodology to be adopted and applied to these projects. The methodology should cover, at a minimum, allocation of responsibilities, activity breakdown, budgeting of time and resources, milestones, check points, key dependencies, quality assurance, risk assessment and approvals.

A BSFI that needs to coordinate multiple IT projects should establish standards for coordinating and managing the projects from an enterprise-wide perspective. The standards should, at a minimum, include guidelines for project prioritization, resource coordination and progress reporting.

¹ An IT project is a task involving the acquisition, development or maintenance of a technology product.

² Automated controls are software routines designed into programs to ensure the validity, accuracy, completeness and availability of input, processed and stored data.

³ Project life cycle refers to a logical sequence of activities to accomplish a project's goals or objectives.

- 3.2. **Project Methodology.** The BSFI should adopt and implement a full project life cycle methodology governing the process of developing, implementing and maintaining major computer systems. In general, this should involve phases of project initiation, feasibility study, requirement definition, system design, program development, system and acceptance testing, training, implementation, operation and maintenance.

The project life cycle methodology should define clearly the roles and responsibilities for the project team and the deliverables¹ from each phase. It also needs to contain a process to ensure that appropriate security requirements are identified when formulating business requirements, built during program development, tested and implemented.

4. PROJECT PLANNING AND INITIATION

- 4.1. A formal project committee, to ensure the development of well-structured applications, should be established with clear details of its terms and reference. The committee should at least consist of the following representatives:
- a. Senior management, to provide strategic direction and ensure full commitment;
 - b. User departments, to ensure that the application design meets their requirements;
 - c. Internal audit department, to act as an independent party to ensure adequate controls are diligently applied at all times. However, internal audit participation should only be on an advisory capacity; and
 - d. IT department, to provide technical knowledge and skills.
- 4.2. A feasibility study should be performed to identify the expected costs and benefits of developing a system, and also to decide either to utilize internal resources or to outsource to a vendor. In case of outsourcing, the responsibility of senior management does not diminish in ensuring that a well-designed application is developed. Senior management maintains the responsibility for ensuring that minimum controls are in place and are in accordance with the BSFI's standards.
- 4.3. When management proposes a new hardware, software or IT solution and/or changes to existing ones, it should ensure that functional, operational and regulatory requirements are accurately identified and clearly detailed in request for proposals (RFP²) or invitations-to-tender (ITT) that it distributes to vendors or third-party service providers (TSP) in the bid solicitation process. Moreover, relevant security requirements should be clearly specified before a new system is developed or acquired. A review should also be conducted to ensure an appropriate balance between security and other objectives (ease-of-use, operational simplicity, ability to upgrade, acceptable cost, etc.) is achieved.
- 4.4. During the development and acquisition of new systems or other major IT projects, project plans should address issues such as – a) business requirements for resumption and recovery alternatives; b) information on back-up and storage; c) hardware and software requirements at recovery locations; d) BCP and documentation maintenance; e) disaster recovery testing; and f) staffing and facilities. Likewise, during maintenance, where there are changes to the operating environment, business continuity considerations should be included in the change control process and implementation phase.
- 4.5. Proper planning should be employed to ensure IT projects meet their objectives. Project control systems should be employed to monitor specific target completion dates for each task of systems development against original targets. Periodic reports to senior management such as, project priorities and status, resource allocations, target deviations and budgets, should be in place to measure project effectiveness.

5. SYSTEMS DEVELOPMENT

- 5.1 Development projects involve the creation of applications, integrated application systems and other critical softwares. Software development projects are completed in-house, through outsourcing, or by a combined approach.

To manage this type of projects, the BSFI should establish development standards that, at a minimum, address project management, system control, and quality assurance issues. Project management standards should address issues such as project management methodologies, risk management procedures, and project approval authorities.

System control standards should address items such as an application's functional, security, and automated control features. Quality assurance standards should address issues such as the validation of project assumptions, adherence to project standards, and testing of a product's performance.

¹ Deliverables are project goals and expectations. They include broadly-defined, project or phase requirements and specifically-defined tasks within project phases.

² RFP is a document that a BSFI sends to a vendor inviting the vendor to submit a bid for hardware, software, services, or any combination of the three. An institution typically issues the RFP in order to assess competing bids.

- 5.2 Development standards should also include procedures for managing internally developed spreadsheets and database reports. BSFIs often rely on the spreadsheets and reports to make important budgeting and asset/liability decisions, but fail to implement adequate testing, documentation, and change-control procedures. Management's reliance on the spreadsheets and reports should dictate the formality of their development procedures, change controls, and backup techniques.
- 5.3 Programming standards should be designed to address issues such as the selection of programming languages and tools, the layout or format of scripted code, interoperability between systems, and the naming conventions of code routines and program libraries. These will enhance the BSFI's ability to decrease coding defects and increase the security, reliability, and maintainability of application programs.

6. SYSTEM ACQUISITION

- 6.1. Software package acquisition is an alternative to in-house systems development and should be subject to broadly similar controls as the project life cycle. A proper software selection analysis should be conducted to ensure that user and business requirements are met. In particular, the process should involve detailed evaluation of the software package and its supplier (e.g., its financial condition, reputation and technical capabilities). If financial stability is in doubt, alternatives should be developed to reduce the adverse impact from loss of a vendor's service.
- 6.2. The contract agreement between the BSFI and vendor should be legally binding. The BSFI should ensure all contract agreements outline all expected service levels and are properly executed to protect its interest. It is also important to ensure that vendor technicians and third-party consultants are subjected to at least, or preferably more stringent policies and controls compared to the in-house staff. In the case where contract personnel are employed, written contracts should also be in effect.

7. CHANGE MANAGEMENT

- 7.1. Change management is the process of planning, scheduling, applying, distributing and tracking changes to application systems, system software (e.g., operating systems and utilities), hardware, network systems, and other IT facilities and equipment. The change management procedures should be formalized, enforced and adequately documented. Authorization and approval are required for all changes and the personnel responsible for program migration should be identified. For the purpose of accountability, proper sign-off should be adequately implemented where formal acknowledgement is obtained from all related parties.
- 7.2. An effective change management process helps to ensure the integrity and reliability of the production environment. To ensure IT-related modifications are appropriately authorized, tested, documented, implemented and disseminated, the change manage process should include the following:
- a. Classification and prioritization of changes and determination of the impact of changes;
 - b. Roles and responsibilities of each relevant party, including IT functions and end-user departments, with adequate segregation of duties. This is to ensure that no single person can effect changes to the production environment without the review and approval of other authorized personnel;
 - c. Program version controls and audit trails;
 - d. Scheduling, tracking, monitoring and implementation of changes to minimize business disruption;
 - e. Process for rolling-back changes to re-instate the original programs, system configuration or data in the event of production release problems; and
 - f. Post implementation verification of the changes made (e.g., by checking the versions of major amendments).
- 7.3. Requested changes should be screened before acceptance to determine alternate methods of making the changes, the cost of changes and time requirements for programming activity. System analysts should assess the impact and validity of the proposed changes and all critical change requests should be set as priority.
- 7.4. The actual cause that led to the request for change should be identified and adequately documented. Formal reports on analysis for problems raised and status of change requests (including closed and outstanding) should be reported to senior management on a periodic basis.
- 7.5. Audit trail of all change requests should be maintained. Programmers' activities should be controlled and monitored, and all jobs assigned should also be closely monitored against target completion dates.

- 7.6. To enable unforeseen problems to be addressed in a timely and controlled manner, the BSFI should establish formal procedures to manage emergency changes. Emergency changes should be approved by the information owner (for application system or production data-related changes) and other relevant parties at the time of change. If the change needs to be introduced as a matter of urgency and it is impracticable to seek the approval of the information owner, endorsement should be sought from the information owner after the implementation as soon as practicable (e.g., on the following business day).
- 7.7. Emergency changes should be logged and backed up (including the previous and changed program versions and data) so that recovery of previous program versions and data files is possible, if necessary. Emergency changes need to be reviewed by independent personnel to ensure that the changes are proper and do not have an undesirable impact on the production environment. They should be subsequently replaced by proper fixes through the normal acceptance testing and change management procedures.
- 7.8. Management should ensure that vendors permitted remote access to network resources are properly authorized. System logs showing activity on the system should be reviewed to ensure that unauthorized remote access has not taken place. Management may institute time of day restrictions for remote access, to limit the duration of time a user can access the network remotely (e.g., only during business hours). Vendors utilizing dial in access should be verified through call back procedures and/or through the use of a modem that can be turned on when authorization has been granted by the system administrator.
- 7.9. Data patching could severely compromise the integrity of the database in production systems and should strictly be avoided. The BSFI should adequately ensure the accuracy and reliability of its database and the integrity of its data. Good project management discipline requires validation of data input, data integrity testing, user sign-off, impact analysis and escalation of decision to senior management should be adopted to ensure accuracy and validity of data before live implementation.

8. SYSTEMS TESTING

- 8.1. A formal acceptance process should be established to ensure that only properly tested and approved systems are promoted to the production environment. System and user acceptance testing should be carried out in an environment separate from the production environment. Production data should not be used in development or acceptance testing unless the data has been desensitized (i.e., not disclosing personal or sensitive information) and prior approval from the information owner has been obtained. Performance testing should also be performed before newly developed systems are migrated to the production environment.
- 8.2. Sufficient testing is important to ensure that design and overall reliability of the application systems are in accordance with original specifications. Tests should be conducted using documented test plans that should encompass all predetermined data or processing problems and business scenarios.
- 8.3. User acceptance testing should be performed in a separate environment. All related users are responsible to ensure that adequate test scenarios are formulated and sufficiently tested. Successful test activities should be formally confirmed and accepted by users, before the modified programs can be transferred to the production environment.

9. SYSTEMS MIGRATION

- 9.1. A secured library for program pending migration to the production environment should be established. The secured library or quarantine area for all amended programs should only be accessible by the personnel who performed the migration process and restricted from the application programmers. This is to mitigate the risk of programmers changing the modified programs after user acceptance testing, but prior to the program migration.
- 9.2. Source compare procedure should be in place to verify changes and to ensure no unauthorized changes have been made. Modified programs should be compared to the authorized change documents to determine that only approved specification changes were implemented.
- 9.3. Updates or a version control for all applications should be maintained. Old versions of source codes¹ should be archived as contingency measure, with a clear indication of the precise date, time and all necessary information while the latest version of the source codes and databases should be strictly protected. Version controls may also be implemented to ensure only authorized programs are migrated to quarantine and production environments.

¹ Source codes are software program instructions written in format (language) readable by humans.

10. SOURCE CODE CONVERSION AND MAINTENANCE

- 10.1. Conversion of source codes into object codes¹ should be adequately controlled in order to mitigate the risks of unauthorized changes and to ensure accurate and complete results. The conversion process should only be performed by designated personnel. In the case where the compiler programs or other systems development tools are used, it should be placed under restricted control and the access and execution rights are strictly monitored.
- 10.2. In cases where core applications are developed by vendors but the source codes were not released to the BSFI, the institution's interest should be protected in the form of a written agreement. The agreement, generally known as escrow agreement, should allow the BSFI to access the source programs under conditions, such as, but not limited to, discontinued product support or financial insolvency by the vendor. A third-party entity should be appointed to retain these programs and documents in escrow. However, it is important for the BSFI to periodically determine that the source code maintained in escrow is up-to-date. If the BSFI decides not to go into a source code escrow agreement, appropriate controls or contingency plans should be established as necessary, to continue adequate operation of the business or process the acquired program is supporting in case it becomes problematic, obsolete, or ceases to function.

11. SYSTEMS DOCUMENTATION

- 11.1. All standards and procedures on systems development and documentation on user manuals should be formally established and properly maintained to ensure consistency of approach. Accessibility to these documents should be strictly confined only to those who are authorized to receive such information in order for them to effectively discharge their duties.
- 11.2. Management should identify the type and level of documentation personnel must produce during each project phase. Project documentation of major IT projects, especially development and acquisition, should include project requests, feasibility studies, project plans, testing plans, etc. System documentation, which focuses on
- 11.3. Documentation standards should identify primary documentation custodians and detail document authoring, approving, and formatting requirements. Personnel should document all changes to system, application, and configuration documentation according to prescribed standards. Additionally, management should control access to documentation libraries with appropriate library and version controls.
- 11.4. All standards and documentation should be kept secured to prevent unauthorized access. The BSFI should maintain a central storage (of either hardcopy or softcopy) of all standards and documentation onsite as well as in an offsite premise for contingency purposes. In the case where the application is developed by a vendor, management should ensure that adequate training and manuals are provided as part of the package, stated in writing and clearly understood by all parties. The BSFI should also ensure complete and updated system documentation is provided.

12. POST-IMPLEMENTATION REVIEW

- 12.1. A post implementation review should be conducted at the end of a project to validate the application's operational performance, after it has begun to operate. The relative success of the project should be gauged by comparing planned and actual cost, benefits and completion time. If the planned objectives do not materialize, reasons should be reviewed and documented in a post implementation evaluation report that should be presented to senior management highlighting any operational or project management deficiencies noted.
- 12.2. The responsibilities for conducting post-implementation review can be assigned to the BSFI's IT audit function. In larger IT organizations, formal quality assurance or change management groups may have primary responsibility for post-implementation reviews. In such cases, the IT auditor may choose not to perform a separate review but instead to participate in establishing the test criteria and evaluating results of any other independent reviews.

13. DISPOSAL

- 13.1. The BSFI may sometimes need to remove surplus or obsolete hardware, software, or data. Primary tasks include the transfer, archiving, or destruction of data records. Management should transfer data from production systems in a planned and controlled manner that includes appropriate backup and testing procedures. The BSFI should maintain archived repository of data in accordance with applicable record retention requirements and system documentation to facilitate reinstallation of a system into production, when necessary. Management should destroy data by overwriting old information or degaussing (demagnetizing) disks and tapes.

¹ Object codes are software program instructions compiled (translated) from source code into machine-readable formats.

14. ROLE OF AUDIT, INFORMATION SECURITY AND QUALITY ASSURANCE OFFICERS

- 14.1. **Audit.** The BSFI's auditors assist user departments, project managers, and system designers in identifying system control requirements and testing the controls during development and after implementation. Please refer to Item "6.1" of *Appendix Q-61* for the detailed guidelines on audit's participation in the development, acquisition, and maintenance of major systems.
- 14.2. **Information Security.** The BSFI should ensure that systems are developed, acquired and maintained with appropriate security controls. To do this, management should ensure that – a) systems are developed and implemented with necessary security features enabled and based on established security control requirements; b) software is trustworthy by implementing appropriate controls in the different project phases; and c) appropriate configuration management and change control processes exist, including an effective patch management process. Management should establish security control requirements based on their risk assessment process evaluating the value of the information at risk and the potential impact of unauthorized access, damage or other threats.
- 14.3. **Quality Assurance.** Independent quality assurance function is a critical part of well-managed IT projects. Comprehensive quality assurance, risk management, and testing standards provide the best means to manage project risks and ensure IT projects, especially software, include expected functionality, security, and operability, as applicable.

(Circular No. 958 dated 25 April 2017)

IT RISK MANAGEMENT STANDARDS AND GUIDELINES

Area: IT Operations

(Appendix to Sec. 147-Q/145-S/142-P/126-N (Purpose and Scope and IT Risk Management System))

1. INTRODUCTION

- 1.1. The evolving role IT plays in supporting the business function has become increasingly complex. IT operations – traditionally housed in a computer data center with user connections through terminals – have become more dynamic and include distributed environments, integrated applications, telecommunication options, internet connectivity, and an array of IT operating platforms¹. With the advent of technology, even small BSFIs have now become increasingly reliant on IT to achieve operational efficiency and deliver innovative products and services. Although some of these BSFIs have developed their products and services in-house, many have relied on vendors and service providers to develop and operate these products and services.
- 1.2. The increasing dependency to IT of BSFIs has consequently resulted to heightened risk exposures arising from their reliance on a variety of IT solutions and services and third-party relationships as well. It is also emphasized that risks involve more than IT and that controls include sound processes and well-trained people. To many BSFIs, effective support and delivery from IT operations has become vital to the performance of most of their critical business lines. This necessitates the adoption of risk management processes that promote sound and controlled operation of IT environments to ensure that IT operations process and store information in a timely, reliable, secure, and resilient manner.

2. ROLES AND RESPONSIBILITIES

- 2.1. **Board of Directors (Board) and Senior Management.** The BSFI's Board and senior management are responsible for overseeing a safe, sound, controlled and efficient IT operating environment that supports the institution's goals and objective. Although they can delegate implementation and oversight of daily operations to IT management, final responsibility for these activities remains with the Board and senior management. Consequently, the Board and senior management are responsible for understanding the risks associated with existing and planned IT operations, determining the risk tolerance of the BSFI, and establishing and monitoring policies for risk management.

On the other hand, IT operations management is primarily responsible in ensuring the BSFI's current and planned infrastructure is sufficient to accomplish the strategic plans of senior management and the Board. To accomplish this objective, operations management should ensure the BSFI has sufficient personnel (in knowledge, experience, and number), system capacity and availability, and storage capacity to achieve strategic objectives. Operations management should select or recommend IT solutions that can meet strategic requirements with reduced resources to control capital expenditures and operating costs.

3. IT OPERATIONS STANDARDS

- 3.1. **Technology Inventory.** To effectively identify, assess, monitor, and manage the risks associated with IT operations, management should have a comprehensive understanding of the BSFI's operations universe. Regardless of size, BSFI management should perform and maintain an inventory of all its IT resources, recognize interdependencies of these systems and understand how these systems support the associated business lines. Management should ensure the inventory is updated on an on-going basis to reflect the BSFI's IT environment at any point in time.

Appropriate documentation of infrastructure and data flow should be in place to facilitate risk identification, application of controls, and ongoing maintenance of information systems. At a minimum, said documentation should include among others, the following components:

- a. Hardware - Inventory should be comprehensive to include BSFI's owned assets and equipment owned by other parties but located within the environment. To the extent possible, hardware items should be marked with a unique identifier, such as a bar code, tamper-proof tag, or other label.

¹ IT operating platform includes the underlying computer system on which application programs run. A platform consists of an operating system, the computer system's coordinating program, which in turn is built on the instruction set for a processor or microprocessor, and the hardware that performs logic operations and manages data movement in the computer.

- b. Software - There are at least three (3) major categories of software the BSFI should include in the software inventory: operating systems, application software, and back-office and environmental applications.
- c. Network Components and Topology¹- Network management should develop and maintain high-level topologies that depict local area networks (LANs²), metropolitan area networks (MANs³) and wide area networks (WANs⁴). The topologies should have sufficient detail to facilitate network maintenance and troubleshooting, facilitate recovery in the event of a disruption and plan for expansion, reconfiguration, or addition of new technology.
- d. Data Flow Diagram - Management should also develop data flow diagrams to supplement its understanding of information flow within and between network segments as well as across the BSFI's perimeter to external parties. Data flow diagrams are also useful for identifying the volume and type of data stored on various media. In addition, the diagrams should identify and differentiate between data in electronic format, and in other media, such as hard copy or optical images.
- e. Media - Descriptive information should identify the type, capacity, and location of the media. It should also identify the location, type, and classification (public, private, confidential, or other) of data stored on the media. Additionally, management should document source systems, data ownership, back up frequency and methodology (tape, remote disk, compact disc (CD), or other), and the location of back-up media if other than at the primary off-site storage facility.

3.2. **Risk Assessment.** Once inventory is complete, management should employ a variety of risk assessment techniques to identify threats and vulnerabilities to its IT operations, covering among others, the following:

- a. Internal and external risks;
- b. Risks associated with individual platforms, systems, or processes as well as those of a systemic nature; and
- c. The quality and quantity of controls. The risk assessment process should be appropriate to the BSFI's IT risk profile. To the extent possible, the assessment process should quantify the probability of a threat or vulnerability and the financial consequences of such an event.

After the BSFI identifies and analyzes the universe of risks, management should prioritize risk mitigation actions based on the probability of occurrence and the financial, reputational or legal impact to the institution. Management should prioritize the risk assessment results based on the business importance of the associated systems. The probability of occurrence and magnitude of impact provide the foundation for establishing or expanding controls for safe, sound, and efficient operations appropriate to the risk tolerance of the BSFI.

3.3. Risk Mitigation & Control Implementation

3.3.1 Policies, Standards and Procedures. Board and management should enact policies, standards and procedures sufficient to address and mitigate the risk exposure of the BSFI. The BSFI should adopt minimum IT standards to establish measurable controls and requirements to achieve policy objectives. Procedures describe the processes used to meet the requirements of the BSFI's IT policies and standards. Management should develop written procedures for critical operations which procedures should be updated and reviewed regularly. The scope of required procedures depends on the size, complexity and the variety of functions performed by the BSFI's IT operations.

¹ A network is a group of two or more computers that are linked together. For example, networks allow users at different branches or different workstations to access the Internet, send and receive email, and share printers, applications, and data. A network topology pictorially describes the arrangement or architecture of a network, including its workstations and connecting communication lines.

² A LAN is a network that connects workstations in a relatively small geographic area, such as a building. Computers connected in a LAN are usually connected by cables, but they can also be connected wirelessly.

³ A MAN is a network that usually spans a city or a large campus. A MAN usually interconnects a number of LANs using a high-capacity backbone technology, such as fiber-optical links, and provides up-link services to WAN and the internet.

⁴ A WAN is a network that connects other networks together. WANs are typically complicated networks covering broad areas (i.e., any network that links across metropolitan, regional, or national boundaries) and allowing many computers and other devices to communicate and share data.

3.3.2 Controls Implementation

3.3.2.1 Environmental Controls. IT equipment should have a continuous uninterruptible power supply (UPS¹). Management should configure the UPS to provide sufficient electricity within milliseconds to power equipment until there is an orderly shutdown or transition to the back-up generator. The back-up generator should generate sufficient power to meet the requirements of mission critical IT and environmental support systems. Similarly, IT operations centers should have independent telecommunication feeds from different vendors. Wiring configurations should support rapid switching from one provider to another without burdensome rerouting or rewiring.

Even small IT operations centers with modest IT equipment can contain a significant amount of computer cabling. Management should physically secure these cables to avoid accidental or malicious disconnection or severing. In addition, management should document wiring strategies and organize cables with labels or color codes to facilitate easy troubleshooting, repair, and upgrade.

Every operations center should have adequate heating, ventilation, and air conditioning (HVAC) systems in order for personnel and equipment to function properly. Organizations should plan their HVAC systems with the requirements of their IT systems in mind. Also, operations personnel should be familiar with written emergency procedures in the event of HVAC system disruption.

Water leaks can cause serious damage to computer equipment and cabling under raised floors. For this reason, operations centers should be equipped with water detectors under raised flooring to alert management of leaks that may not be readily visible. Management should also consider installing floor drains to prevent water from collecting beneath raised floors or under valuable computer equipment.

A variety of strategies are available for fire suppression. Ideally, the fire suppression system should allow operators time to shut down computer equipment and cover it with waterproof covers before releasing the suppressant.

Lastly, Management should consider using video surveillance and recording equipment in all or parts of the facility to monitor activity and deter theft. Management should also use inventory labels, bar codes, and logging procedures to control the inventory of critical and valuable equipment.

3.3.2.2 Preventive Maintenance. All maintenance activities should follow a predetermined schedule. A record of all maintenance activities should be maintained to aid management in reviewing and monitoring employee and vendor performance. Management should schedule time and resources for preventive maintenance and coordinate such schedule with production. During scheduled maintenance, the computer operators should dismount all program and data files and work packs, leaving only the minimum software required for the specific maintenance task on the system. If this is impractical, management should review system activity logs to monitor access to programs or data during maintenance. Also, at least one computer operator should be present at all times when the service representative is in the computer room.

In case a vendor performs computer maintenance online, operators should be aware of the online maintenance schedule so that it does not interfere with normal operations and processing. Operators and information security personnel should adhere to established security procedures to ensure they grant remote access only to authorized maintenance personnel at predetermined times to perform specific tasks.

Operators should maintain a written log of all hardware problems and downtime encountered between maintenance sessions. A periodic report on the nature and frequency of those problems is a necessary

¹ UPS is a device that allows computer to keep running for at least a short time when the primary power source is lost. A UPS may also provide protection from power surges. A UPS contains a battery that "kicks in" when the device senses a loss of power from the primary source allowing the user time to save any data they are working on and to exit before the secondary power source (the battery) runs out. When power surges occur, a UPS intercepts the surge so that it doesn't damage the computer.

management tool, and can be valuable for vendor selection, equipment benchmarking, replacement decisions, or planning increased equipment capacity.

- 3.3.2.3 **Change Management¹ & Control.** Complex BSFIs should have a change management policy that defines what constitutes a “change” and establishes minimum standards governing the change process. Simple BSFIs may successfully operate with less formality, but should still have written change management policies and procedures.

All changes should flow through the oversight function, which may include appropriate representation from business lines, support areas, IT management, information security, and internal audit. In establishing a framework for managing change, a policy should be present describing minimum standards and including such factors as notification, oversight, and control. Control standards should address risk, testing, authorization and approval, timing of implementation, post installation validation, and back-out or recovery.

- 3.3.2.4 **Patch Management².** Management should establish procedures to stay abreast of patches, to test them in a segregated environment, and to install them when appropriate. Change management procedures should require documentation of any patch installations. Management should develop a process for managing version control of operating and application software to ensure implementation of the latest releases. Management should also maintain a record of the versions in place and should regularly monitor the Internet and other resources for bulletins about product enhancements, security issues, patches or upgrades, or other problems with the current versions of the software.

- 3.3.2.5 **Conversions.** Conversions involve major changes to existing systems or applications, or the introduction of systems or data sets which may span multiple platforms. Consequently, they have a higher level of risk requiring additional, specialized controls. Conversions, if improperly handled, may result to corrupt data; hence, strong conversion policies, procedures, and controls are critical. Likewise, since the ramifications of conversion span IT operations, it is important for management to periodically re-evaluate all operations processes and consider the appropriateness of process re-engineering.

- 3.3.2.6 **Network Management Controls.** Network standards, design, diagrams and operating procedures should be formally documented, kept updated, communicated to all relevant network staff and reviewed periodically. Communications facilities that are critical to continuity of network services should be identified. Single points of failure should be minimized by automatic re-routing of communications through alternate routes should critical nodes or links fail.

The network should be monitored on a continuous basis to reduce the likelihood of network traffic overload and detect network intrusions. Powerful network analysis and monitoring tools, such as protocol analyzers, network scanning and sniffer tools, are normally used for monitoring network performance and detecting potential or actual intrusions. These powerful network tools should be protected from unauthorized usage (e.g., viewing of unencrypted sensitive information). The use of network tools should also be tightly restricted to authorized staff only and be subject to stringent approval and review procedures.

- 3.3.2.7 **Disposal of Media.** Management should have procedures for the destruction and disposal of media containing sensitive information. These procedures should be risk-based relative to the sensitivity of the information and the type of media used to store the information. Furthermore, disposal procedures should recognize that records stored on electronic media, including tapes, and disk drives present unique

¹ Change management refers to the broad processes for managing organizational change. Change management encompasses planning, oversight or governance, project management, testing and implementation.

² A patch is a piece of software designed to fix problems with, or update a computer program or its supporting data. This includes fixing security vulnerabilities and other bugs, and improving the usability or performance. Though meant to fix problems, poorly designed patches can sometimes introduce new problems. In some special cases, updates may knowingly break the functionality, for instance, by removing components for that the update provider is no longer licensed. Patch Management is the process of using a strategy and plan of what patches should be applied to which systems at a specified time.

disposal problems in that residual data can remain on the media after erasure. Since data can be recovered, additional disposal techniques should be applied to remove sensitive information.

3.3.2.8 Imaging. Management should ensure there are adequate controls to protect imaging processes, as many of the traditional audit and controls for paper-based systems may be reduced. Management should also consider issues such as converting existing paper storage files, integration of the imaging system into the organization workflow, and business continuity planning needs to achieve and maintain business objectives.

3.3.2.9 Event/Problem Management. Management should ensure appropriate controls are in place to identify, log, track, analyze, and resolve problems that occur during day-to-day IT operations. The event/ problem management process should be communicated and readily available to all IT operations personnel. Management should ensure it trains all operations personnel to act appropriately during significant events. Employees should also receive training to understand event response escalation procedures.

Operations personnel should be properly trained to recognize events that could trigger implementation of the business continuity plan. Although an event may not initially invoke the plan, it may become necessary as conditions and circumstances change. Management should train and test BSFI personnel to implement and perform appropriate business continuity procedures within the timeframes of the BCP. Operations personnel should properly log and record any events that trigger BCP response and document their ultimate resolutions.

3.3.2.10 User Support/Help Desk. User support processes and activities should ensure end users continuously have the resources and services needed to perform their job functions in an efficient and effective manner. In complex BSFIs, the help desk function provides user support, which typically consists of dedicated staff trained in problem resolution, equipped with issue tracking software, and supported with knowledge-based systems that serve as a reference resource to common problems. In simple BSFIs, user support may consist of a single person, a very small group, or a contract with a support vendor.

The help desk should record and track incoming problem reports, whether handled by live operators or automated systems.

Documentation in the tracking system should include such data as user, problem description, affected system (platform, application, or other), prioritization code, current status toward resolution, party responsible for resolution, root cause (when identified), target resolution time, and a comment field for recording user contacts and other pertinent information.

The help desk should evaluate and prioritize issues to ensure the most critical problems receive prompt attention.

Help desk functions may also be supported by knowledge based-systems that provide support staff with action responses to common problems. Strong support functions continually update the knowledge based-systems with information obtained from vendors and from the experiences of help desk staff. Because attrition rates in the help desk function can be high, a knowledge based-system can ensure the BSFI retains knowledge and facilitates the training and development of new employees.

Proper authentication of users is critical to risk management within the user support function. If the help desk uses a single authentication standard for all requests, it should be sufficiently rigorous to cover the highest risk scenarios. However, the BSFI may choose to use different levels of authentication depending upon the problem reported, the type of action requested, or the platform, system, or data involved. If the help desk function is outsourced, management should determine the service provider's information access level, assign the functions it will perform, and ensure that security and confidentiality remain in place.

3.3.2.11 Scheduling. The BSFI should implement policies and procedures for creating and changing job schedules and should supplement them with automated tools when cost effective. Sound scheduling practices and controls prevent degraded processing performance that can affect response time, cause delays in completing tasks, and skew capacity planning. Automated scheduling tools are necessary for large, complex systems to support effective job processing. Smaller and less complex IT systems generally have a standard job stream with little need for change.

3.3.2.12 Systems and Data Back-up. The BSFI should ensure that sufficient number of backup copies of essential business information, software and related hardcopy documentations are available for restoration or critical operations. A copy of these information, documentation and software should also be stored in an off-site premise or backup site and any changes should be done periodically and reflected in all copies.

The BSFI should back-up and store its data and program files in a secure off-site location to allow restoration of systems, applications, and associated data in the event normal processing is disrupted by a disaster or other significant event. A full system backup should be periodically conducted and should at least consist of the updated version of the operating software, production programs, system utilities and all master and transaction files. The frequency of backup should depend on its criticality, but should be performed after critical modification or updates. Management should implement a storage solution that is manageable from an administrative perspective and usable and accessible from the customer and end-user perspectives to enable them to receive current, complete and accurate data. Storage solutions should be appropriately scalable to allow for future growth.

Written standards should document back-up methodologies, delineate responsibilities of appropriate personnel, and ensure uniform performance throughout the institution. Management should maintain inventories of back-up media stored off-site and periodically perform physical inventories to ensure all required back-up materials are available. Procedures should include verifying adherence to the back-up schedule and reviewing actual back-up copies for readability. Similarly, management should periodically test back-up copies by actually using them to restore programs and data.

All backup media should be properly labeled using standard naming conventions. Management should develop a rotation scheme that addresses varying storage durations as well as transportation and storage of multiple formats of media at the off-site storage location. Transportation to the backup site should be done in controlled and secured manner with proper authorization and record. Procedures for disposal of backup media should also be in place.

3.3.2.13 Systems Reliability, Availability and Recoverability

a. System Availability

BSFIs should achieve high systems availability (or near zero system downtime) for critical systems which is associated with maintaining adequate capacity, reliable performance, fast response time, scalability and swift recovery capability. Built-in redundancies for single points of failure should be developed and contingency plans should be tested so that business and operating disruptions can be minimized.

b. Technology Recovery Plan

Business resumption very often relies on the recovery of IT resources that include applications, hardware equipment and network infrastructure as well as electronic records. The technology requirements that are needed during recovery for individual business and support functions should be specified when the recovery strategies for the functions are determined.

Appropriate personnel should be assigned with the responsibility for technology recovery. Alternate personnel needs to be identified for key technology recovery personnel in case of their unavailability to perform the recovery process.

As unavailability of systems may result to disruptive impact on its operations, the BSFI should develop an IT disaster recovery plan to ensure that critical application systems and technology services can be resumed in accordance with the business recovery requirements. In formulating an effective recovery plan, scenario analysis should be included to identify and address various types of contingency scenarios. Scenarios such as major system outages which may be caused by system faults, hardware malfunction, operating errors or security incidents as well as a total inaccessibility of the primary data center should be considered. To strengthen recovery measures relating to large scale disruptions and to achieve risk diversification, rapid operational and backup capabilities at the individual system or application cluster level should be implemented. Recovery and business resumption priorities must be defined accordingly. Specific recovery objectives including recovery time objective¹ (RTO) and recovery point objective² (RPO) should be established for systems and applications.

c. Alternate sites for technology recovery

The BSFI should make arrangements for alternate and recovery sites³ for their business functions and technology in the event the business premises, key infrastructure and systems supporting critical business functions become unavailable. A recovery site geographically separate from the primary site must be established to enable the restoration of critical systems and resumption of business operations should a disruption occur at the primary site. The required speed of recovery will depend on the criticality of resuming business operations, the type of services and whether there are alternative ways and processing means to maintain adequate continuing service levels to satisfy customers. Recovery strategies and technologies such as on-site redundancy and real-time data replication could be explored to enhance the BSFI's recovery capability.

The recovery site could either be an in-house backup premise that has a redundant hardware system located away from the computer center, or a third-party recovery facility provider that requires formal subscription to its service, or a combination of both solutions. The recovery facility should be at a distance that would protect it from damage from any incident occurring at the primary site. Ideally, it should be on different electrical power and telecommunication switches, and free from the same disaster. The BSFI should ensure that the IT systems at the recovery sites are:

- a. Compatible with the BSFI's primary systems (in terms of capacity and capability) to adequately support the critical business functions; and
- b. Continuously updated with current version of systems and application software to reflect any changes to the BSFI's system configurations (e.g., hardware or software upgrades or modifications).

In case where a third-party recovery facility is used, there should be a written contract agreement that is legally binding. The agreement should specifically identify the conditions under which the recovery facility may be used and specify how customers would be accommodated if simultaneous disaster conditions occur to several customers of the recovery facility provider. The recovery facility should allow the BSFI to use its services until it achieves a full recovery from the disaster and resumption of activity at the BSFI's own facility.

The BSFI which outsources critical systems to offshore service providers is heavily dependent on the stability and availability of cross-border network links. To minimize impact to business operations in the event of a disruption (e.g., due to earthquake), cross-border network redundancy with strategies such as engagement of different network service providers and alternate network paths may be instituted.

¹ RTO refers to the required time taken to recover an IT system from the point of disruption.

² RPO refers to the acceptable amount of data loss for an IT system should a disaster occur.

³ Recovery site is an alternate location for processing information (and possibly conducting business) in an emergency.

d. **Disaster Recovery Testing**

The BSFI should always adopt pre-determined recovery actions that have been tested and endorsed by management. The effectiveness of recovery requirements and the ability of BSFI's personnel in executing or following the necessary emergency and recovery procedures should be tested and validated at least annually.

Various scenarios which include total shutdown or inaccessibility of the primary data center, as well as component failure at the individual system or application cluster level should be included in disaster recovery tests. Inter-dependencies between and among critical systems should be included in the tests. BSFIs whose networks and systems are linked to specific service providers and vendors, should consider conducting bilateral or multilateral recovery testing.

Business users should be involved in the design and execution of comprehensive test cases so as to obtain assurance that recovered systems function accordingly. The BSFI should also participate in disaster recovery tests of systems hosted overseas. Periodic testing and validation of the recovery capability of backup media should be carried out and assessed for adequacy and effectiveness. Backup tapes and disks containing sensitive data should be encrypted before they are transported offsite for storage.

3.4. Risk Monitoring

3.4.1 **Service Level Agreement (SLA).** BSFI Management of IT functions should formulate an SLA with business units which will measure the effectiveness and efficiency of delivering IT services. Measurable performance factors include system availability and performance requirements, capacity for growth, and the level of support provided to users, resource usage, operations problems, capacity, response time, personnel activity, as well as business unit and external customer satisfaction. Adequate procedures should be in place to manage and monitor delivery of services.

3.4.2 **Control Self-Assessments¹ (CSAs).** The BSFI may consider the conduct of periodic CSAs to validate the adequacy and effectiveness of the IT control environment. They also facilitate early identification to allow management to gauge performance, as well as the criticality of systems and emerging risks. Depending on the complexity of the BSFI's IT risk profile, the content and format of the CSAs may be standardized and comprehensive or highly customized, focusing on a specific process, system, or functional area. IT operations management may collaborate with the internal audit function in creating the templates used. Typically, the CSA form combines narrative responses with a checklist. The self-assessment form should identify the system, process, or functional area reviewed, and the person(s) completing.

¹ CSA is a technique used to assess risk and control strength and weaknesses against a control framework.

IT RISK MANAGEMENT STANDARDS AND GUIDELINES

Area: IT Outsourcing / Vendor Management

(Appendix to Sec. 147-Q/145-S/142-P/126-N (Purpose and Scope and IT Risk Management System))

1. INTRODUCTION

- 1.1. With globalization and advancement in IT, BSFIs increasingly rely on services provided by other entities to support an array of IT-related functions. The ability to outsource IT systems and process enables a BSFI to manage costs, obtain necessary expertise, expand customer product offerings, and improve services. While outsourcing offers a cost-effective alternative to in-house capabilities, it does not reduce the fundamental risks associated with IT or the business lines that use it. Risks such as loss of funds, loss of competitive advantage, damaged reputation, improper disclosure of information and regulatory action remain. Because the functions are performed by an organization outside the BSFI, the risks may be realized in a different manner than if the functions were inside resulting in the need for well-structured process to properly manage risks and ensure that the interest of customers will not be compromised.

2. ROLES AND RESPONSIBILITIES

- 2.1. Board of Directors (Board) and Senior Management. The responsibility for the oversight and management of outsourcing activities and accountability for all outsourcing decisions continue to rest with the BSFI's Board and senior management. They should establish and approve enterprise-wide policies, appropriate to the IT risk profile of the institution. This framework should govern the end-to-end perspective of outsourcing process and shall provide the basis for management to identify, measure, monitor, and control the risks associated with IT- related outsourcing arrangements.

3. IT OUTSOURCING / VENDOR RISK MANAGEMENT PROGRAM

- 3.1. **Risk Assessment.** Prior to entering into an outsourcing plan, the BSFI should clearly define the business requirements for the functions or activities to be outsourced, assess the risk of outsourcing those functions or activities and establish appropriate measures to manage and control the identified risks. Risk assessment should take into consideration the criticality of the services to be outsourced, the capability of the technology service provider (TSP)¹ and the technology it will use in delivering the outsourced service. Such assessment should be made periodically on existing arrangements as part of the outsourcing program and review process of the BSFI.

- 3.2. **Service Provider Selection.** Before selecting a service provider, the BSFI should perform appropriate due diligence of the provider's financial soundness, reputation, managerial skills, technical capabilities, operational capability and capacity in relation to the services to be outsourced. The depth and formality of the due diligence performed may vary depending on the nature of the outsourcing arrangement and the BSFI's familiarity with the prospective service providers. Contract negotiation should be initiated with the service provider determined to best meet the business requirements of the BSFI.

Due diligence undertaken during the selection process should be documented and reviewed periodically, using the most recent information, as part of the monitoring and control processes of outsourcing.

- 3.3. **Outsourcing Contracts.** The contract is the legally binding document that defines all aspects of the servicing relationship and one of the most important controls in outsourcing process. It should be clearly written and sufficiently detailed to provide assurances for performance, reliability, security, confidentiality and reporting. Before signing a contract, management should:
 - a. Ensure the contract clearly defines the rights and responsibilities of both parties and contains or supported by adequate and measurable service level agreements;
 - b. Ensure contracts with related entities clearly reflect an arms-length relationship and costs and services are on terms that are substantially the same, or at least as favorable to the BSFI, as those prevailing at the time for comparable transactions with non-related third parties;

¹ TSPs include a wide range of entities including but not limited to affiliated entities, non-affiliated entities, and alliances of companies providing technology products and services. These services may include but not limited to the following: a) information and transaction processing and settlement activities that support banking functions; b) electronic banking-related services; c) Internet-related services; d) security monitoring; e) systems development and maintenance; f) aggregation services; and g) digital certification services. Other terms used to describe TSPs include vendors and external/outsourced service providers

- c. Choose the most appropriate pricing method for the BSFI's needs;
- d. Ensure service provider's physical and data security standards meet or exceed the BSFI's standards. Any breach in security should be reported by the service provider to the BSFI;
- e. Engage legal counsel to review the contract; and
- f. Ensure the contract contains the minimum provisions required under existing Bangko Sentral rules and regulations, like access by Bangko Sentral to systems and databases outsourced, and the same does not include any provisions or inducements that may adversely affect the BSFI (i.e. extended terms, significant increases after the first few years, substantial cancellation penalties).

Each agreement should allow for renegotiation and renewal to enable the BSFI to retain an appropriate level of control over the outsourcing and the right to intervene with appropriate measures to meet its legal and regulatory obligations. The agreement should also acknowledge Bangko Sentral's supervisory authority over the BSFI and the right of access to information on the BSFI and the service provider.

Some service providers may contract with third-parties in providing IT services to the BSFI. The extent to which subcontractors perform additional services should be limited to peripheral or support functions while the core services should rest with the main service provider. The BSFI should retain the ability to maintain similar control over its outsourcing risks when a service provider uses subcontractors in the course of rendering the IT-related services. Agreements should have clauses setting out the rules and limitations on subcontracting. To provide accountability, it may be beneficial for the BSFI to include a provision specifying that the contracting service provider shall remain fully responsible with respect to parts of the services which were further outsourced to subcontractors. It should also consider including notification and approval requirements regarding changes to the service provider's significant subcontractors.

An annual review of the outsourcing agreements should be performed to assess whether the agreements should be renegotiated and renewed to bring them in line with current market standards and to cope with changes in their business strategies. When renegotiating contracts, the BSFI should ensure that the provider delivers a level of service that meets the needs of the institution over the life of the contract.

- 3.4. **Service Level Agreement (SLA).** SLAs formalize the performance standards against which the quantity and quality of service should be measured. Management should include SLAs in its outsourcing contracts to specify and clarify performance expectations, as well as establish accountability for the outsourced activity.

The BSFI should link SLA to the provisions in the contract regarding incentives, penalties and contract cancellation in order to protect themselves in the event the service provider failed to meet the required level of performance.

Management should closely monitor the service provider's compliance with key SLA provision on the following aspects, among others:

- a. Availability and timeliness of services;
- b. Confidentiality and integrity of data;
- c. Change control;
- d. Security standards compliance, including vulnerability and penetration management;
- e. Business continuity compliance; and
- f. Help desk support.

SLAs addressing business continuity should measure the service provider's contractual responsibility for backup, record retention, data protection, and maintenance and testing of disaster recovery and contingency plans. Neither contracts nor SLAs should contain any extraordinary provisions that would exempt the service provider from implementing its contingency plans (outsourcing contracts should include clauses that discuss unforeseen events for which the BSFI would not be able to adequately prepare).

3.5. Ongoing Monitoring

- 3.5.1 **Monitoring Program.** As outsourcing relationships and interdependencies increase in materiality and complexity, the BSFI needs to be more proactive in managing its outsourcing relationships. It should establish a monitoring program to ensure service providers deliver the quantity and quality of services required by the contract. The resources to support this program will vary depending on the criticality and complexity of the system, process, or service being outsourced.

The program should employ effective mechanisms to monitor key aspects of the outsourcing relationship and the risk associated with the outsourced activity, particularly the following:

- a. contract/SLA performance;
- b. material problems encountered by the service provider which may impact the BSFI;
- c. financial condition and risk profile; and
- d. business continuity plan, the results of testing thereof and the scope for improving it.

To increase the effectiveness of monitoring mechanisms, management should periodically classify service provider relationships to determine which service providers require closer monitoring. Relationships with higher risk classification should receive more frequent and stringent monitoring for due diligence, performance (financial and/or operational), and independent control validation reviews.

Personnel responsible for monitoring activities should have the necessary expertise to assess the risks and should maintain adequate documentation of the process and results thereof. Management should use such documentation when renegotiating contracts as well as developing business continuity planning requirements.

Reports on the monitoring and control activities of the BSFI should be prepared or reviewed by its senior management and provided to its Board. The BSFI should also ensure that any adverse development arising from any outsourced activity is brought to the attention of the senior management, or the Board, when warranted, on a timely basis. Actions should be taken to review the outsourcing relationship for modification or termination of the agreement.

- 3.5.2 **Financial Condition of Service Providers.** The BSFI should have an on-going monitoring of the financial condition of its service providers as financial problems may jeopardize the quality of its service and possibly the integrity of the data in its possession. In the event management recognizes that the financial condition of the provider is declining or unstable, more frequent financial reviews of said provider are warranted.

- 3.5.3 **General Control Environment of the Service Provider.** The BSFI should also implement adequate measures to ensure service providers are only given access to the information and systems that they need in order to perform their function. Management should restrict their access to BSFI's systems, and appropriate access controls and monitoring should be in place between the service provider's systems and the BSFI.

- 3.6. **Business Continuity Planning Consideration.** The BSFI should integrate the provider's BCP into its own plan, communicate functions to the appropriate personnel, and maintain and periodically review the combined plan. It should ensure that service provider tests its plan annually and notify the institution of any resulting modifications.

- 3.7. **Compliance with Bangko Sentral Regulations.** The BSFI should ensure that appropriate up-to-date records relevant to its outsourcing arrangements are maintained in its premises and kept available for inspection by the Bangko Sentral Examiners. The outsourcing agreement should explicitly provide a clause allowing Bangko Sentral and BSFI's internal and external auditors to review the operations and controls of the service provider as they relate to the outsourced activity.

In addition to the general guidelines on outsourcing contracts stated in Item No. "3.3" of this Appendix, the BSFI's intending to outsource must comply with existing Bangko Sentral rules and regulations on outsourcing.

IT RISK MANAGEMENT STANDARDS AND GUIDELINES

Area: Electronic Banking, Electronic Payment, Electronic Money and Other Electronic Products and Services
(Appendix to Sec. 147-Q/145-S/142-P/126-N (Purpose and Scope and IT Risk Management System))

1. INTRODUCTION

- 1.1. Continuing technological innovation and competition among existing FIs and new entrants have contributed to a wide array of electronic products and services (e-services) available to customers. These products and services have been widely adopted by BSFIs in recent years and are now a component of most institutions' business strategy. Electronic delivery of services can have many benefits for BSFIs and their customers and can also have implications on financial condition, risk profile, and operating performance. The emergence of e-services may contribute to improving the efficiency of the banking and payment system, reducing the cost of retail transactions nationally and internationally and expanding the target customers beyond those in traditional markets. Consequently, BSFIs are therefore becoming more aggressive in adopting electronic capabilities that include sophisticated marketing systems, remote-banking capabilities, and stored value programs.
- 1.2. Notwithstanding the significant benefits of technological innovation, the rapid development of electronic capabilities carries risks as well as benefits and it is important that these risks are recognized and managed by BSFIs in a prudent manner to promote safe and secure e-services and operations. The basic types of risks generated by e-services are not new, the specific ways in which some of the risks arise, as well as the magnitude of their impact may be new for BSFIs and supervisors. While existing risk management guidelines remain applicable to e-services, such guidelines must be tailored, adapted and, in some cases, expanded to address the specific risk management challenges created by the characteristics of such activities. As the industry continues to address technical issues associated with e-services, including security challenges, a variety of innovative and cost efficient risk management solutions are likely to emerge. These solutions are also likely to address issues related to the fact that BSFIs differ in size, complexity and risk management culture and that jurisdictions differ in their legal and regulatory frameworks.

2. ROLES AND RESPONSIBILITIES

- 2.1. **Board of Directors (Board) and Senior Management.** The Board is expected to take an explicit, informed and documented strategic decision as to whether and how the BSFI is to provide e-services to their customers. The Board and senior management should establish effective management oversight of the risks associated with these activities, including the establishment of specific accountability, policies and controls to manage these risks. Senior management oversight processes should operate on a dynamic basis in order to effectively intervene and correct any material systems problems or security breaches that may occur.

The Board should ensure that plans to offer e-services are consistent and clearly integrated within corporate strategic goals. The BSFI should also ensure that it does not offer new e-services or adopt new technologies unless it has the necessary expertise to provide competent risk management oversight. Management and staff expertise should be commensurate with the technical nature and complexity of the BSFI's applications and underlying technologies.

The Board and senior management should ensure that the operational and security risk dimensions of the BSFI's business strategies on e-services are appropriately considered and addressed. The provision of e-services may significantly modify and/or even increase traditional business risks. As such management should take appropriate actions to ensure that the BSFI's existing risk management, security control, due diligence and oversight processes for outsourcing relationships are appropriately evaluated and modified to accommodate e-services.

BSFI management should assess the impact of the implementation and ongoing maintenance of e-services. These areas should be monitored and analyzed on an ongoing basis to ensure that any impact on the BSFI's financial condition and risk profile resulting from e-services is appropriately managed and controlled. Management should evaluate e-services acceptance vis-à-vis the performance to its goals and expectations through periodic review of reports tracking customer usage, problems such as complaints and downtime, unreconciled accounts or transactions initiated through the system, and system usage relative to capacity. Insurance policies may also need to be updated or expanded to cover losses due to system security breaches, system downtime, or other risks from e-services.

- 2.2. **Compliance Officer.** The compliance officer or its equivalent should be aware and informed of all relevant laws and regulatory requirements relative to the offering of e-services, including those of other countries where they also intend to deliver cross-border e-services. BSFI management should ensure that these requirements are complied with to minimize legal and compliance risks and other negative implications.

3. RISK MANAGEMENT SYSTEM

- 3.1. The BSFI should carefully evaluate the offering of a new e-service to customers to ensure that Management fully understands the risk characteristics and that there are adequate staffing, expertise, technology and financial resources to launch and maintain the service. A formal business strategy for introducing new service should be in place and form part of the BSFI's overall strategy. The BSFI should also perform regular assessments to ensure that its controls for managing identified risks remain proper and adequate.
- 3.2. The underlying risk management processes for e-services should be integrated into the BSFI's overall risk management framework and the existing risk management policies and processes should be evaluated to ensure that they are robust enough to cover the new risks posed by current or planned activities. Relevant internal controls and audit as required in BSFI's risk management system should also be enforced and carried out as appropriate for its e-services. Regular review of the relevant policies and controls should be performed to ascertain that these remain appropriate to the risks associated with such activities.
- 3.3. The BSFI should adjust or update, as appropriate, its information security program in the light of any relevant changes in technology, the sensitivity of its customer information and internal or external threats to information. The BSFI should ensure that the related information security measures and internal control are installed, regularly updated, monitored and are appropriate with the risks associated with their products and services.

4. RISK MANAGEMENT CONTROLS

- 4.1. **Security Controls.** The BSFI should recognize that e-services should be secured to achieve a high level of confidence with both customers and business. It is the responsibility of BSFI management to provide adequate assurances that transactions performed and information flowed through the electronic delivery channels are properly protected. For this reason, the BSFI should maintain a strong and comprehensive security control system. As such, in addition to the information security standards in *Appendix Q-62*, the BSFI should also provide the following controls specific for e-services:

- 4.1.1. **Account Origination and Customer Verification.** The BSFI should use reliable methods for originating new customer accounts. Potentially significant risks may arise when it accepts new customers through the internet or other electronic channels. Thus, the BSFI should ensure that in originating new accounts using electronic channels, the KYC requirement which involves a face-to-face process is strictly adhered to.

- 4.1.2. **Authentication¹.** The BSFI should use reliable and appropriate authentication methods to validate and verify the identity and authorization of customers. Authentication is facilitated by the use of factors, which are generally classified into three (3) basic groups:

- a. Knowledge – Something the user knows (e.g., username, password, mobile PIN, card number account number);
- b. Possession – Something the user has (e.g., payment card, token, one-time password); and
- c. Inherence – Something the user is (e.g., biometrics).

As the number of factors increases, the window of compromise becomes more difficult. The use of single factor authentication alone is considered inadequate to address the risks inherent in sensitive communications and/or high-risk transactions. Thus, BSFIs should adopt multi-factor authentication (MFA) or use a minimum of two (2) factors in such instances. This requirement shall apply to online transactions where the risk of compromise is heightened. Sensitive communications and/or high-risk transactions requiring MFA include, among others, the following:

- a. Enrollment in transactional e-services;
- b. Payments and transfers to third parties;
- c. Online remittance, including those for pick-up at the BSFI branches via door-to-door delivery;
- d. Account maintenance, including change in account information and contact details; and
- e. Use of payment cards (e.g., ATM, credit and debit cards) in e-commerce websites.

For transactions that do not require real-time or near real-time authentication/ authorization, BSFIs may also opt to use positive confirmation in lieu of MFA. Positive confirmation refers to any form of communication that will enable the BSFI to timely and accurately verify the identity of the requesting

¹ BSFIs shall comply with the foregoing requirements on customer authentication by 30 September 2017. In this regard, a BSFI should be able to show its plan of actions with specific timelines, as well as the status of initiatives being undertaken to fully comply with the provisions of Item "4.1.2" of this Appendix, upon request of the Bangko Sentral starting May 2017. This transitory period, however, should not excuse BSFIs from immediately complying with the MFA requirements imposed by affiliated payment networks.

customer. The BSFI should use a different communication channel other than the one where the request originated from when confirming sensitive communications and/or high-risk transactions.

The adoption of MFA techniques or positive confirmations for sensitive communications and/or high-risk transactions can increase customer confidence in e-services. In addition, it provides an opportunity for the customers to assist the BSFI in preventing and detecting fraudulent activity. Nevertheless, alternative and less stringent authentication procedures may be considered for the following:

- a. Small-value payment or other low-risk transactions, provided the same are justified by a *transaction risk analysis*¹ and bounded by prudent thresholds established by the BSFI. The BSFI's methodology for setting the threshold should be adequately documented and independently validated at least annually;
- b. Payments and transfers made to pre-enrolled merchants in the bills payment facility and those pre-registered recipients by the customer: *Provided*, That the BSFI employs a robust and reliable enrollment process for third party merchants and recipients; and
- c. Transaction between two (2) accounts of the same customer at the same BSFI.

As authentication methods continue to evolve, the BSFI should monitor, evaluate, and adopt sound industry practices to address current and changing risk factors. The authentication process should be consistent with and support the BSFI's overall security and risk management programs. An effective authentication process should have customer acceptance, reliable performance, scalability to accommodate growth and interoperability with existing systems and future plans as well as appropriate policies, procedures and controls.

(As amended by Circular No. 958 dated 25 April 2017)

4.1.3. Non-Repudiation². As customers and merchants originate an increasing number of transactions, authentication and encryption become increasingly important to ensure non-repudiation of transactions. In such cases, the BSFI should consider implementing non-repudiation controls in the form of digital signatures, collision-free hash value of the entire transaction or unique authorization code that will provide conclusive proof of participation of both the sender and receiver in an online transaction environment. Public key infrastructure³, digital signature⁴, digital certificate⁵ and certification authority⁶ arrangements can be used to impart an enhanced level of security authentication and authorization which can uniquely identify the person initiating transaction, detect unauthorized modifications and prevent subsequent disavowal.

4.1.4. Authorization Controls and Access Privileges. Specific authorization and access privileges should be assigned to all individuals, agents or systems, which conduct activities on e-services. No individual agent or system should have the authority to change his or her own authority or access privileges in the e-services authorization database. Any addition of an individual, agent or system or changes to access privileges should be duly authorized by an authenticated source empowered with adequate authority and subject to suitable and timely oversight and audit trails.

All systems that support e-services should be designed to ensure that they interact with a valid authorization database. Appropriate measures should be in place in order to make authorization databases reasonably resistant to tampering. Authenticated e-services sessions should remain secure throughout the full duration of the session. In the event of a security lapse, the session should require re-authentication. Controls should also be in place to prevent changes to authorization levels during e-services sessions and any attempts to alter authorization should be logged and brought to the attention of management.

No person by virtue of rank or position should have any intrinsic right to access confidential data, applications, system resources or facilities. Only employees with proper authorization and whose official duties necessitate access to such data, applications, system resources or facilities should be allowed to access confidential information and use system resources solely for legitimate purposes.

¹ Transaction risk analysis refers to the evaluation of risk related to a specific transaction taking into account various criteria including, but not limited to, customer behavioral transaction pattern, payee profile, nature of product/service to be acquired and transaction value.

² Non-repudiation is a means of ensuring that a transferred message has been sent and received by the parties claiming to have sent and received the message. Non-repudiation is a way to guarantee that the sender of a message cannot later deny having sent the message and that the recipient cannot deny having received the message.

³ Public Key Infrastructure (PKI) refers to the use of public key cryptography in which each customer has a key pair (i.e., unique electronic value called a public key and a mathematically-related private key). The private key is used to encrypt (sign) a message that can only be decrypted by the corresponding public key or to decrypt message previously encrypted with the public key. The public key is used to decrypt message previously encrypted (signed) using an individual's private key or to encrypt a message so that it can only be decrypted (read) using the intended recipient's private key.

⁴ Digital certificate is a digital code that can be attached to an electronically transmitted message that uniquely identifies the sender. Like a written signature, the purpose of a digital signature is to guarantee that the individual sending the message really is who he or she claims to be.

⁵ Digital Certificate is the electronic equivalent of an ID card that authenticates the originator of digital signature.

⁶ Certification Authority (CA) is the organization that attests using a digital certificate that a particular electronic message comes from a specific individual or system.

4.1.5. **Confidentiality and Integrity of Information, Transactions and Records.** The BSFI should ensure that appropriate measures are in place to ascertain the accuracy, completeness and reliability of e-services transactions, records and information that are either transmitted over the internal and external networks or stored in BSFI's internal systems. Common practices used to maintain data integrity include the following:

- a. E-services transactions should be conducted in a manner that make them highly resistant to tampering throughout the entire process;
- b. E-services records should be stored, accessed and modified in a manner that make them highly resistant to tampering;
- c. E-services transaction and record-keeping processes should be designed in a manner as to make it virtually impossible to circumvent detection of unauthorized changes;
- d. Adequate change control policies,
- e. including monitoring and testing procedures, should be in place to protect against any system changes that may erroneously or unintentionally compromise controls or data reliability; and
- f. Any tampering with e-services transactions or records should be detected by transaction processing, monitoring and record keeping functions.

The BSFI should implement appropriate technologies to maintain confidentiality and integrity of sensitive information, in particular customer information. Cryptographic technologies can be used to protect the confidentiality and integrity of information and should choose cryptographic technologies that are appropriate to the sensitivity and importance of information and the extent of protection needed and, only those that are making use of internationally recognized cryptographic algorithms where the strengths of the algorithms have been subjected to extensive tests. In cases when the information is transmitted over public network, the BSFI should consider the need to apply strong end-to-end encryption to the transmission of sensitive information.

To ensure adequate protection and secrecy of cryptographic keys whether they are master keys, key encrypting keys or data encrypting keys, no single individual should know entirely what the keys are or have access to all the constituents making up these keys. All keys should be created, stored, distributed or changed under the most stringent conditions. Likewise, use of these keys should be logged and provided with timely oversight.

4.1.6. **Application Security.** The BSFI should ensure an appropriate level of application security in its electronic delivery systems. In selecting system development tools or programming languages for developing e-services application systems, it should evaluate the security features that can be provided by different tools or languages to ensure that effective application security can be implemented. In selecting an e-services system developed by a third party, the BSFI should take into account the appropriateness of the application security of the system. It should test new or enhanced applications thoroughly using a general accepted test methodology in a test environment prior to implementation.

Comprehensive and effective validation of input parameters (including user-supplied data and database queries that may be submitted by the users' computers) should be performed on server side. This prevents intentional invalid input parameters from being processed by the e-services system that may result in unauthorized access to data, execution of commands embedded in the parameters or a buffer overflow attack¹. Moreover, e-services systems should operate with the least possible system privileges.

Error messages generated by the application system for e-services customers should not reveal details of the system which are sensitive. Errors should be appropriately logged. Similarly, the HTML² source code on the production web server should not contain sensitive information such as any references or comments that relate to the design features of the web application code.

The mechanism for managing an active e-services session should be secure. Web pages containing sensitive information should not be cached in the temporary files of browsers. The application should ideally prohibit the customers' browsers from memorizing or displaying the user IDs and passwords previously entered by customers and the web pages previously accessed by customers.

When a known vulnerability related to the e-services application system is identified or reported, a review of the relevant program source code should be conducted as appropriate to ensure that the vulnerability is appropriately addressed. A security standard may be defined for the purpose of system development and code review. For third-party developed systems, the patches provided by vendors from time to time should be appropriately applied to these systems.

¹ Buffer overflow attack is a method of overloading a predefined amount of space in a buffer, which can potentially overwrite and corrupt memory in data.

² Hypertext Markup Language (HTML) is a set of codes that can be inserted into text files to indicate special interfaces, inserted images, and links to the hypertext documents.

Hidden directories that contain administrative pages or sensitive information of the web site should either be removed from the production web server or protected by effective authentication and access control mechanisms. Back-up files and common files should be removed from the production servers or the structure of file directories to prevent access by unauthorized users. A periodic security review of the structure of file directories and access controls of the files is necessary to ensure that all sensitive files are appropriately protected and not exposed through the web applications.

- 4.1.7. **Infrastructure and Security Monitoring.** The BSFI should establish an appropriate operating environment that supports and protects systems on e-services. It should proactively monitor systems and infrastructure on an ongoing basis to detect and record any security breaches, suspected intrusions, or weaknesses. The BSFI should ensure that adequate controls are in place to detect and protect against unauthorized access to all critical e-services systems, servers, databases, and applications. The attached *Annex "A"* provides for the minimum security measures for e-services facilities.

The BSFI should put in place effective monitoring mechanisms to detect in a timely manner suspicious online transactions and unusual activities. A sound monitoring system should include audit features that can assist in the detection of fraud, money laundering, compromised passwords or other unauthorized activities. In particular, the monitoring mechanism for personal e-services should be able to detect cases similar to the following:

- a. False or erroneous application information, large check deposits on new e-services accounts, unusual volume or size of funds transfers, multiple new accounts with similar account information or originating from the same internet address, and unusual account activity initiated from a foreign internet address;
- b. Multiple online transfers are made to the same unregistered third-party account within a short period of time especially if the amount transferred is close to the maximum amount allowed or the value exceeds a certain amount; and
- c. Change of a customer's correspondence address shortly followed by transactions which may indicate potential fraudulent activities such as opening of an e-service account online, a request for important documents (e.g., cheque book, new e-banking password, credit card/ATM PIN) to be mailed to that address, increase of fund transfer limits, or a sudden increase of fund transfers made to unregistered third parties.

The BSI's monitoring staff should be promptly alerted by its monitoring mechanism if suspicious online transfers and unusual activities are initiated. In these cases, the BSI should, as soon as practicable, check with the account holders of these transactions or activities. Consideration should also be given to notifying personal customers immediately through an alternative automated channel (such as messages sent to mobile phones or e-mail accounts of customers) of online transfers made to unregistered third parties, online transfers exceeding certain amount limits, or detected unusual activities related to their accounts.

- 4.1.8. **Audit Trail.** The BSFI should ensure that comprehensive logs are maintained to record all critical e-services transactions to help establish a clear audit trail and promote employee and user accountability. Audit logs should be protected against unauthorized manipulation and retained for a reasonable period [e.g., three (3) months] to facilitate any fraud investigation and any dispute resolution if necessary. In instances where processing systems and related audit trails are the responsibility of a third-party service provider, the BSFI should ensure that it has access to relevant audit trails maintained by the service provider in accordance with existing standards. In particular, clear audit trails should exist under the following types of e-services transactions:

- a. the opening, modification or closing of a customer's account;
- b. any transaction with financial consequences;
- c. any authorization granted to a customer to exceed a limit; and
- d. any granting, modification or revocation of systems access right or privileges.

- 4.1.9. **Segregation of Duties.** As in any traditional process, segregation of duties is a basic internal control measure designed to reduce the risk of fraud in operational processes and systems. The BSFI management should ensure that duties are adequately separated and transaction processes are designed in a manner that no single person could initiate, approve, execute and enter transactions into a system that would enable fraudulent actions to be perpetrated and concealed. Segregation should also be maintained between (a) those developing and those administering the systems; and (b) those initiating static data (including web

page content) and those responsible for verifying its integrity. E-services systems should be tested to ensure that segregation of duties cannot be bypassed.

- 4.1.10. **Website Information and Maintenance.** Because the BSFI's website is available on an ongoing basis to the general public, appropriate procedures should be established to ensure accuracy and appropriateness of its information. Key information changes and updates (such as deposit, loan and foreign exchange rates), are normally subject to documented authorization and dual verification. Procedures and controls to monitor and verify website information frequently may help prevent any inadvertent or unauthorized modifications or content that could lead to reputational damage or violations of advertising, disclosure, or other compliance requirements.

In addition, some BSFIs provide various tools and other interactive programs to enable customers to submit online application or provide resources for them to research available options associated with BSFI's products and services on-line. To protect the BSFI from potential liability or reputational harm, it should test or otherwise verify the accuracy and appropriateness of these tools and programs.

The BSFI should carefully consider how links to third-party Internet Web sites are presented. "Hyperlinks¹" may imply an endorsement of third-party products, services, or information that could lead to implicit liability for the BSFI. The BSFI should provide disclaimers when such links take the customer to a third-party web site to ensure that they clearly understand any potential liabilities arising out of any such cross-marketing arrangements or other agreements with third parties. Any links to sites offering non-deposit, investment or insurance products must comply with existing regulations. Links to other sites should be verified regularly for accuracy, functionality, and appropriateness.

The BSFI should manage the risk associated with fraudulent emails or websites which are designed to trick its customers into revealing private details such as account numbers or e-services passwords. To this end, the BSFI should consider educating customers the ways to ensure that they are communicating with the official website and that they will not be required to access the BSFI's transactional e-services portal through hyperlinks embedded in e-mails unless the website is validated by legitimate digital certificate.

Additionally, the BSFI should exercise care in selecting its website name(s) in order to reduce possible confusion with those of other Internet sites. It should periodically scan the Internet to identify sites with similar names and investigate any that appear to be posing as the institution. Suspicious sites should be reported to appropriate law enforcement agencies and regulatory authorities.

4.2. Administrative and Management Controls

- 4.2.1. **Service Availability and Business Continuity.** The BSFI should have the ability to deliver e-services to all end-users and be able to maintain such availability in all circumstances within a reasonable system response time in accordance with its terms and conditions and anticipated customer expectations. Performance criteria for each critical e-service should be established and service levels should be monitored against these criteria. Appropriate measures should be taken to ensure that e-services systems and the interfaces with the internal systems can handle the projected transaction volume and future growth in transactions.

Appropriate business continuity and contingency plans for critical e-services processing and delivery systems should be in place and regularly tested. Contingency plans should set out a process for restoring or replacing e-services processing capabilities, reconstructing supporting transaction information, and include measures to be taken to resume availability of critical e-services systems and applications in the event of a business disruption.

- 4.2.2. **Incident Response and Management.** The BSFI should put in place formal incident response and management procedures for timely reporting and handling of suspected or actual security breaches, fraud, or service interruptions of their e-services during or outside office hours. A communication strategy should be developed to adequately address the reported concerns and an incident response team should be established to manage and respond to the incident in accordance with existing standards enumerated in *Appendix Q-62*.

- 4.2.3. **Outsourcing Management.** Increased reliance upon partners and third party service providers to perform critical e-services functions lessens BSFI management's direct control. Accordingly, a comprehensive process for managing the risks associated with outsourcing and other third-party dependencies is necessary to ensure that:

¹ Hyperlink is an item on a webpage, that, when selected, transfers the user directly to another location in a hypertext document or to another webpage, perhaps on a different machine

- a. The BSFI fully understands the risks associated with entering into an outsourcing or partnership arrangement for its e-services systems or applications;
- b. An appropriate due diligence review of the competency and financial viability of any third-party service provider or partner is conducted prior to entering into any contract for e-services;
- c. The contractual accountability of all parties to the outsourcing or partnership relationship is clearly defined. For instance, responsibilities for providing information to and receiving information from the service provider should be clearly defined;
- d. All outsourced e-services systems and operations are subject to risk management, security and privacy policies that meet the BSFI's own standards;
- e. Periodic independent internal and/or external audits are conducted of outsourced operations to at least the same scope required if such operations were conducted in-house; and
- f. Appropriate contingency plans for outsourced e-services activities exist.
- g. Complete guidelines for managing outsourcing relationships and third party dependencies are enumerated in *Appendix Q-65*.

4.3. Consumer Protection

- 4.3.1. Customer Privacy and Confidentiality. The BSFI should take appropriate measures to ensure adherence to customer privacy requirements applicable to the jurisdictions to which the institution is providing electronic products and services. Misuse or unauthorized disclosure of confidential customer data exposes the entity to both legal and reputation risk. To meet these challenges concerning the preservation of privacy of customer information, the BSFI should make reasonable endeavors to ensure that:
 - a. The BSFI's customer privacy policies and standards take account of and comply with all privacy regulations and laws applicable to the jurisdictions to which it is providing e-services;
 - b. Customers are made aware of the BSI's privacy policies and relevant privacy issues concerning use of e-services;
 - c. Customers may decline ("opt out") from permitting the BSFI to share with a third party for cross-marketing purposes any information about the customer's personal needs, interests, financial position or banking activity; and
 - d. Customer data are not used for purposes beyond which they are specifically allowed or for purposes beyond which customers have authorized. The BSFI's standards for customer data use must be met when third parties have access to customer data through outsourcing relationships.
- 4.3.2. Information Disclosure for E-Services. The BSFI should comply with all legal requirements relating to e-services, including the responsibility to provide its customers with appropriate disclosures and to protect customer data. Failure to comply with these responsibilities could result in significant compliance, legal, or reputation risk for the BSFI.

The BSFI should set out clearly in its terms and conditions the respective rights and obligations between the BSFI and its customers. These terms and conditions should be fair and balanced to both parties. In addition, it is required to provide its customers with a level of comfort regarding information disclosures or transparencies, protection of customer data and business availability that they can expect when using traditional banking services. To minimize operational, legal and reputational risks associated with e-services activities, the BSFI should make adequate disclosures of information and take appropriate measures to ensure adherence to customer privacy and protection requirements. Annex "B" provides for the minimum disclosure requirements of BSFI.

- 4.3.3. Consumer Awareness. Customer education is a key defense against fraud, identity theft and security breach. Therefore, the BSFI should pay special attention to the provision of easy to understand and prominent advice to its customers on security precautions for e-services. To be effective, the BSFI should maintain and continuously evaluate its consumer awareness program. Methods to evaluate a program's effectiveness include tracking the number of customers who report fraudulent attempts to obtain their authentication credentials,

the number of clicks on information security links on websites, the number of inquiries, etc. *Annex “C”* provides for the minimum Consumer Awareness Program that the BSFI should convey to its customers.

- 4.3.4. Complaints Resolution. The BSFI may receive customer complaint either through an electronic medium or otherwise, concerning unauthorized transactions, loss or theft in the e-services account. Therefore, it should ensure that controls are in place to review these notifications and that an investigation is initiated as required. The BSFI should also establish procedures to resolve disputes arising from the use of the e-services.

4.4. Cross-Border E-Banking Activities.

- 4.4.1. Before a BSFI initiates cross-border e-services, its management should conduct appropriate risk assessment and due diligence to ensure that it can adequately manage the attendant risks. It must also comply with any applicable laws and regulations, both the home country as well as those of any foreign country that may assert jurisdiction over e-services that are directed at its residents. Further, the BSFI should ensure that it has an effective and ongoing risk management program for its cross-border e-services activities;
- 4.4.2. Before engaging in transactions involving cross-border e-services with foreign customers, the BSFI should ensure that adequate information is disclosed on its Web site to allow potential customers to make a determination of the BSFI's identity, home country, and whether it has the relevant regulatory license(s) before it establishes the relationship. This information will help improve transparency and minimize legal and reputational risk associated with the offering of cross border e-services.

5. INDEPENDENT ASSESSMENT

- 5.1. An appropriate independent audit function is also an important component of a BSFI's monitoring mechanisms. The audit coverage should be expanded commensurate with the increased complexity and risks inherent in e-services and should include the entire process as applicable (i.e., network configuration and security, interfaces to legacy systems, regulatory compliance, internal controls, support activities performed by third-party providers etc.).
- 5.2. The BSFI should also make arrangements for independent assessments to be conducted on its systems before the launch of the relevant services or major enhancements to existing services. The person(s) (i.e., the assessor) contracted by the BSFI to perform independent assessment should have, and be able to demonstrate, the necessary expertise in the relevant fields. He/she should be independent from the parties that develop or administer the system and should not be involved in the operations to be reviewed or in selecting or implementing the relevant control measures to be reviewed. He/she should be able to report findings freely and directly to the authorized BSFI senior management.
- 5.3. Subsequent to an initial independent assessment, the BSFI should conduct risk assessment at least every two (2) years or when there are substantial changes to determine if further independent assessment should be required and the frequency and scope of such independent assessment. Any substantial changes to the risk profile of the services being provided, significant modifications of the network infrastructure and applications, material system vulnerabilities or major security breaches are to be taken into consideration in the risk assessment.

6. APPLICABILITY

- 6.1. These guidelines are intended for all electronic products and services offered by BSFIs to their customers. These are focused on the risks and risk management techniques associated with electronic delivery channels to protect customers and general public. It should be understood, however, that not all the customer protection issues that have arisen in connection with new technologies are specifically addressed in subject guidelines. Additional issuances may be issued in the future to address other aspects of consumer protection as the financial service environment through e-services evolves.

SECURITY CONTROLS ON SPECIFIC ELECTRONIC SERVICES AND CHANNELS

In providing banking/financial services via electronic channels, such as ATM, internet and mobile devices, the BSFI must consider customer's convenience in using the facilities, including the effectiveness of the display on electronic menu, particularly on customer's instructions selection menu in order to avoid any error and loss in transactions. In electronic services which involve physical equipment like ATMs, the BSFI must implement physical security control on equipments and rooms from the danger of theft, sabotage and other criminal actions by unauthorized parties. It must perform routine monitoring to ensure security and comfort of customers using electronic service.

Automated Teller Machine (ATM)

1. To minimize/prevent ATM frauds and crimes, the BSFI, at a minimum, implement the following security measures with respect to its ATM facilities:
 - a. Locate ATM's in highly visible areas;
 - b. Provide sufficient lighting at and around the ATMs;
 - c. Where ATM crimes (e.g., robbery, vandalism, skimming) are high in a specific area or location, the BSFI should install surveillance camera or cameras which shall view and record all persons entering the facility. Such recordings shall be preserved by the BSFI for at least thirty (30) days;
 - d. Implement ATM programming enhancements like masking/non-printing of card numbers;
 - e. Educate customers by advising them regularly of risks associated with using the ATM and how to avoid these risks;
 - f. Conduct and document periodic security inspection at the ATM location;
 - g. Educate BSFI personnel to be responsive and sensitive to customer concerns; and
 - h. Post a clearly visible sign near the ATM facility which, at a minimum, provides the telephone numbers of the BSFI as well as other BSFI's hotline numbers for other cardholders who are allowed to transact business in the ATM, and police hotlines for emergency cases.
2. The BSFI must study and assess ATM crimes to determine the primary problem areas. Procedures for reporting ATM crimes should also be established. Knowing what crimes have occurred will aid the BSFI in recognizing the particular problem and to what degree it exists so that it can implement the necessary preventive measures. In this connection, all BSFI's are encouraged to share information involving ATM fraud cases to deter and prevent proliferation of the crime.

Online Internet Financial Services

1. Assurance should be provided that online login access and transactions performed over the internet are adequately protected and authenticated. In addition, customers should be adequately educated on security measures that must be put in place to uphold their interests in the online environment.
2. With internet connection to internal networks, financial systems and devices may now be potentially accessed by anyone from anywhere at any time. The BSFI should implement physical and logical access security to allow only authorized personnel to access its systems. Appropriate processing and transmission controls should also be implemented to protect the integrity of systems and data.
3. There should be a mechanism to authenticate official website to protect customers from spoofed or faked websites. The BSFI should determine what authentication technique to adopt to provide protection against these attacks. For wireless applications, it should adopt authentication protocols that are separate and distinct from those provided by the wireless network operator.
4. Monitoring or surveillance systems should be implemented to alert BSFI of any erratic system activities, transmission errors or unusual online transactions. A follow-up process should be established to verify that these issues or errors are adequately addressed subsequently. High resiliency and availability of online systems and supporting systems (such as interface systems, backend host systems and network equipment) should be maintained to meet customers' expectations. Measures to plan and track capacity utilization as well as guard against online attacks should be established.

5. As more customers log into BSFI's website to access their accounts and conduct a wide range of financial transactions for personal and business purposes, a suite of measures must be established to protect customers' interests in using online systems. Furthermore, customers should be educated on the risks of using online financial services before they subscribe to such services. Ongoing education must be available to raise the security awareness of customers to protect their systems and online transactions.

Mobile and Phone Financial Services

1. For electronic services using mobile phone, the BSFI must ensure the security of transactions by implementing the following, among others:
 - a. Employment of a SIM Toolkit with end-to-end encryption feature from hand phones to m-banking servers, to protect data transmission in m-banking; and
 - b. Adoption of dual authentication process (i.e., MPIN) to ensure that the party initiating the transaction is the owner of the device and is authorized to perform such transaction.
2. For phone banking and other financial services, the BSFI must ensure the security of transactions, by implementing the following, among others:
 - a. The service shall not be used for transactions with high value or risk;
 - b. All IVR conversations shall be recorded, including customer's phone number, transaction detail, etc;
 - c. The service shall use reliable and secure authentication methods; and
 - d. The use of customer authentication method such as PIN and password for financial transactions.

Other Mobile Online and Payment Services

1. Mobile online and payment services are extensions of the online financial services which are offered by the BSFI and accessible from the internet via computers, laptops and similar devices. Security measures which are similar to those of online financial and payment systems should also be implemented on the mobile online services and payment systems. A risk assessment should be conducted to identify possible fraud scenarios and appropriate measures should be established to counteract payment card fraud via mobile devices.
2. The BSFI may require customers to download its mobile online services and payment applications directly from third party repositories (e.g., Apple store, Google Play and Windows Market Place) on to mobile devices. Customers must be able to verify the integrity and authenticity of the application prior to its download. The BSFI should also be able to check the authenticity and integrity of the software being used by the customers.
3. As mobile devices are susceptible to theft and loss, there must be adequate protection of sensitive data used for mobile online services and payments. Sensitive data confidentiality and integrity of these data in storage, transmission and during processing.
4. Customers should be educated on security measures to protect their own mobile devices from theft and loss as well as viruses and other errant software which cause malicious damage and harmful consequences.

Point of Sale Devices

1. Point of Sale (POS)/Electronic Data Capture (EDC) enable electronic fund transfer from customer's account to acquirer's or merchant's account for payment of a transaction. The party providing POS terminal must always increase the physical security around the vicinity of such POS terminal and on the POS terminal itself, among others, by using POS terminal that minimizes the possibility of interception on such terminal or in its communication network.
2. The BSFI deploying POS devices at merchant locations must familiarize the merchant with the safe operation of the device. The acquiring institution must ensure that the POS devices as well as other devices that capture information do not expose/store information such as the PIN number or other information classified as confidential. It must also ensure that a customer's PIN number cannot be printed at the point of sale for any reason whatsoever.
3. Operators of point of sale devices are encouraged to work towards interoperability of cards from other schemes.

Electronic Payment Cards (ATM, Credit and Debit Cards)

1. Payment cards allow cardholders the flexibility to make purchases wherever they are. Payment cards exist in many forms; with magnetic stripe cards posing the highest security risks. Sensitive payment card data stored on magnetic stripe cards is

vulnerable to card skimming attacks. Card skimming attacks can happen at various points of the payment card processing, including payment kiosks and POS terminals. In addition to counterfeit/skimmed cards, fraudulent activities associated with payment cards include lost/stolen cards, card-not-received and card-not-present transactions.

2. The BSFI providing payment card services should implement adequate safeguards to protect sensitive payment card data. Sensitive payment card data should be encrypted to ensure the confidentiality and integrity of these data in storage, transmission and during processing. Pending the required adoption of EMV chip-cards by 01 January 2017, all BSFIs engaged in the payment card business should consider implementing the following measures to mitigate exposure from skimming attacks:
 - a. Installation of anti-skimming solutions on ATM and POS machines to detect the presence of foreign devices placed over or near a card entry slot;
 - b. Establishment of detection and alert mechanisms to appropriate personnel for follow-up response and action;
 - c. Implementation of tamper-resistant keypads to ensure that no one can identify which buttons are being pressed by customers;
 - d. Implementation of appropriate measures to prevent shoulder surfing of customers' PINs; and
 - e. Conduct video surveillance of activities at these machines and maintain the quality of CCTV footage.
3. New payment cards sent to customers via courier should only be activated upon obtaining the customer's instruction. Online transactions should only be allowed if authorized by the customers. Authentication of customers' sensitive static information, such as personal identification number (PIN) or passwords, should be performed by the card issuer and not by third party payment processing service providers. Appropriate security mechanisms should also be implemented for card-not-present transactions via internet to reduce fraud risk associated with this type of transaction.
4. To enhance payment card security, cardholders should be notified promptly via transaction alerts on withdrawals/charges exceeding customer-defined thresholds made on their payment cards. The transaction alert should include information such as source and amount of the transaction to assist customers in identifying a genuine transaction.
5. Fraud detection systems with behavioral scoring and correlation capabilities should be implemented to identify and curb fraudulent activities. Risk management parameters should be calibrated according to risks posed by cardholders, nature of transactions or other risk factors to enhance fraud detection capabilities. Follow-up actions for transactions exhibiting behavior which deviates significantly from a cardholder's usual card usage patterns should be instituted. These transactions should be investigated into and the cardholder's authorization obtained prior to completing the transaction.

DISCLOSURE REQUIREMENTS

1. General Requirement

BSFIs offering electronic products and services (e-services) should adopt responsible privacy policies and information practices. They should provide disclosures that are clear and readily understandable, in writing, or in a form the consumers may print and keep.

BSFIs should also ensure that consumers who sign-up for a new e-service are provided with disclosures (e.g., pamphlet) informing him of his rights as a consumer.

At a minimum, the following disclosures should be provided to protect consumers and inform them of their rights and responsibilities:

- a. Information on the duties of the BSFI and customers;
- b. Information on who will be liable for unauthorized or fraudulent transactions;
- c. Mode by which customers will be notified of changes in terms and conditions;
- d. Information relating to how customers can lodge a complaint, and how a complaint may be investigated and resolved;
- e. Disclosures that will help consumers in their decision-making (e.g., PDIC insured, etc.); and
- f. For internet environment, information that prompt in the BSFI’s website to notify customers that they are leaving the BSFI’s website and hence they are not protected by the privacy policies and security measures of the BSFI when they hyperlink to third party’s website.

2. Disclosure Responsibility

- a. Compliance officers should review BSFI’s disclosure statements to determine whether they have been designed to meet the general and specific requirements set in the regulation;
- b. For BSFIs that advertise deposit products and services on-line, they must verify that proper advertising disclosures are made (e.g., whether the product is insured or not by the PDIC; fees and charges associated with the product or services, etc.). Advertisements should be monitored to determine whether they are current, accurate, and compliant;
- c. For BSFIs that issue various products like stored value cards, e-wallets, debit cards and credit cards, they must provide information to consumers regarding the features of each of these products to enable consumers to meaningfully distinguish them. Additionally, consumers would find it beneficial to receive information about the terms and conditions associated with their usage. Example of these disclosures include:
 - PDIC insured or non-insured status of the product;
 - Fees and charges associated with the
 - purchase, use or redemption of the product;
 - Liability for loss;
 - Expiration dates, or limits on redemption; and
 - Toll-free telephone number for customer service, malfunction and error resolution
- d. Whenever e-services are outsourced to third parties or service providers, the BSFI should ensure that the vendors comply with the disclosure requirements of the Bangko Sentral.

ELECTRONIC SERVICES CONSUMER AWARENESS PROGRAM

To ensure security of transactions and personal information in electronic delivery channels, consumers should be oriented of their roles and responsibilities which, at a minimum, include the following:

1. Internet Products and Services
 - a) Secure Login ID and Password or PIN
 - i. Do not disclose Login ID and Password or PIN
 - ii. Do not store Login ID and Password or PIN on the computer.
 - iii. Regularly change password or PIN and avoid using easy-to-guess passwords such as names or birthdays. Password should be a combination of characters (uppercase and lowercase) and numbers and should be at least six (6) digits in length
 - b) Keep personal information private.
 - i. Do not disclose personal information such as address, mother’s maiden name, telephone number, social security number, bank account number or e-mail address — unless the one collecting the information is reliable and trustworthy.
 - c) Keep records of online transactions.

REPORT ON BREACH IN INFORMATION SECURITY
(Appendix to Sec. 147-Q/145-S/142-P/126-N (Reporting and notification standards))

QBs/NBFIs shall report breach in information security, especially incidents involving the use of electronic channels, to the appropriate supervising department of the Bangko Sentral pursuant to the following provisions:

- a. Crimes whether consummated, frustrated or attempted against property/facilities (such as robbery, theft, swindling or estafa, forgery and other deceits) and other crimes involving loss/destruction of QBs/NBFIs property when the amount involved in each crime is P20, 000 or more.

Crimes involving QB/NBFI personnel, regardless of whether or not such crimes involve the loss/destruction of QB/NBFI property, even if the amount involved is less than P20, 000, shall likewise be reported to the Bangko Sentral.

- b. Incidents involving material loss, destruction or damage to the QB/NBFI's property/facilities, other than arising from a crime, when the amount involved per incident is P100, 000.00 or more.

- c. *Definition of terms.* For the purpose of this regulation, the following definitions shall apply:

- (1) Estafa – a crime committed by a person who defrauds another causing the latter to suffer damage by means of any of the following:

- (a) Unfaithfulness or abuse of confidence;
- (b) false pretense; or
- (c) fraudulent acts/means under Articles 315 to 317 of the Revised Penal Code, as amended.

- (2) Theft – a crime committed by a person who, with intent to gain but without violence against or intimidation of persons nor force upon things, shall take personal property of another without the latter's consent pursuant to Article 308 and other pertinent provisions of Chapter III, Title X of the Revised Penal Code, as amended.

- (3) Robbery – a crime committed by a person who, with intent to gain, shall take any personal property belonging to another, by means of violence against or intimidation of any person, or using force upon anything pursuant to Article 295 and other pertinent provisions of Chapter 1, Title X of the Revised Penal Code, as amended.

- (4) Falsification – a crime committed by a person who falsifies a document by:

- a. Counterfeiting or imitating any handwriting, signature or rubric;
- b. Causing it to appear that persons have participated in any act or proceeding when they did not in fact so participate;
- c. Attributing to persons who have participated in an act or proceeding statements other than those in fact made by them;
- d. Making untruthful statements in a narration of facts;
- e. Altering true dates;
- f. Making any alteration or intercalation in a genuine document which changes its meaning;
- g. Issuing in an authenticated form a document purporting to be a copy of an original document when no such original exists, or including in such a copy a statement contrary to, or different from, that of the genuine original; or
- h. Intercalating any instrument or note relative to the issuance thereof in a protocol, registry, or official book and other acts falling under Articles 169, 171 and 172 of the Revised Penal Code, as amended.

- (5) Credit-card related crimes – crimes arising through the use of credit cards.

- (6) Other crimes that may cause loss to the bank – crimes committed that cannot be appropriately classified under any of the above classifications.

- (7) Negligence – the failure to exercise the care which an ordinarily prudent person would use under the circumstances in the discharge of the duty then resting upon him (People v. Aguilar, 2899-R, 18 October 1949).

- (8) Non-crime related loss – Incidents that may cause the QB/NBFI to suffer a loss arising from fortuitous events.
 - (9) Insider – persons involved include stockholders, directors, officers and employees of the QB/NBFI.
 - (10) Outsider – persons involved other than insiders.
 - (11) Perpetrator – a person, whether an insider or outsider, who is responsible for the commission of crime either by direct participation, inducement or cooperation, including accomplices and accessories as defined under Articles 18 and 19 of the Revised Penal Code, as amended.
 - (12) Victim – an insider or outsider other than the perpetrator, who is the aggrieved party to the crime and may as a result of the incident, suffered the loss.
 - (13) Attempted crime – a crime is attempted when the perpetrator commences the commission of the crime directly by overt acts but does not perform all of the acts of execution which constitute the crime by reason of some causes or acts other than his own voluntary desistance under Article 6 of the Revised Penal Code, as amended.
 - (14) Frustrated crime – a crime is classified as frustrated, when the perpetrator performs all the acts of execution which should produce the crime as a consequence but which, nevertheless, do not produce it by reason of causes independent of the will of the perpetrator under Article 6 of the Revised Penal Code, as amended.
 - (15) Consummated crime – a crime is consummated when all the acts of execution which constitute the crime were performed. As a result, the QB/NBFI may have suffered a loss, the recoverable portion of which should be deducted to arrive at the probable loss incurred by the QB/NBFI.
 - (16) Termination of the investigation – an investigation is said to be terminated when all the material facts/information which are sufficient to support a conclusion relative to the matters involved have already been gathered and a finding/conclusion may be made based on the gathered information.
- d. The following guidelines shall be observed in the preparation and submission of the report:
- (1) The Branch or Head Office unit's Report on Crimes and Losses shall be submitted to the Bangko Sentral through the QB/NBFI head office unit and shall be certified correct by the compliance officer. The report shall be assigned a prescribed reference number by the QB/NBFI using the format mm-yyyy-xxx with mm and yyyy as numeric code for the month and year of reporting, respectively, and xxx as sequence no. (e.g. 01-2007-001) which shall be a continuing series until the end of the year.
- The report shall be prepared using the new format SES Form 6G attached as Annex A of Circular No. 587 dated 26 October 2007 in two (2) copies and shall be submitted to the appropriate supervising department of the Bangko Sentral and to the Bangko Sentral Security Coordinator, thru the Director, Security, Investigation and Transport Department (SITD) within ten (10) calendar days from knowledge of the crime/incident;
- (2) Where a thorough investigation and evaluation of facts is necessary to complete the report, an initial report submitted within deadline may be accepted: *Provided*, That a complete report is submitted not later than twenty (20) calendar days from termination of investigation. Moreover, final reports on crimes and losses with incomplete information as required under SES Form 6G shall be considered erroneous reports and the concerned QB/NBFI shall be required to submit amended reports subject to penalties on late reporting for Category B reports under Sec. 172-Q (*Sanctions in case of willful delay in the submission of reports/refusal to permit examination*); and
 - (3) Proof of submission of the report shall be determined by the date of postmark, if the report was sent by mail or by the date received, if handcarried to the appropriate supervising department of the Bangko Sentral and SITD.

FRAMEWORK FOR DEALING WITH DOMESTIC SYSTEMICALLY IMPORTANT BANKS

(Appendix to Sec. 126-Q – (Domestic systemically important banks))

Part I. Introduction

This document outlines the Bangko Sentral's implementing guidelines on the framework for dealing with domestic systemically important banks (D-SIBs) in accordance with the reform packages proposed by the Basel Committee on Banking Supervision (BCBS)¹ and introduced in Basel III: A global regulatory framework for more resilient banks and banking systems.

It is the thrust of the Bangko Sentral to ensure that its capital adequacy framework is consistent with the Basel principles. Hence, the Bangko Sentral is adopting policy measures for D-SIBs, which are essentially aligned with the documents issued by BCBS on global systemically important banks (G-SIBs) and D-SIBs. The broad aim of the policies is to reduce the probability of failure of D-SIBs by increasing their going-concern loss absorbency and to reduce the extent or impact of failure of D-SIBs on the domestic/real economy.

The guidelines shall apply on a consolidated basis² to all UBs and KBs including branches of foreign banks established under R.A. No. 7721 (An Act Liberalizing the Entry and Scope of Operations of Foreign Banks in the Philippines and for Other Purposes), as amended by R.A. 10641.

Submission of data requirements for the identification of D-SIBs shall take effect starting with 2014 data while compliance with the additional higher loss absorbency requirement shall be phased-in from 1 January 2017 with full implementation by 1 January 2019.

Part II. Assessment Methodology

A. Indicator-Based Measurement Approach

1. The systemic importance of a bank is assessed in relation to the impact of its failure on the domestic economy using an indicator-based measurement approach.
2. The impact of a D-SIB's failure to the domestic economy shall be assessed based on bank-specific factors, to wit: (a) size; (b) interconnectedness; (c) substitutability/ financial institution infrastructure; and (d) complexity. Nine (9) indicators related to these categories shall be used to identify D-SIBs. These indicators reflect the factors or criteria which make a bank significant for the stability of the financial system and the economy.
3. The UBs and KBs operating in the Philippines shall be assessed based on the four (4) categories and on data that relate to the consolidated group (i.e., unit of analysis is the consolidated group). For foreign banks, the computation of systemic importance shall be done on the basis of data that relates to their local consolidated balance sheet. Each individual component (category/indicator) is given differential weights (Table 1). In particular, "size" and "interconnectedness" are given forty percent (40%) and thirty percent (30%) weight allocation, respectively, as these categories remain a key measure in determining a bank's systemic importance in the Philippines. Meanwhile, the remaining categories namely, "substitutability/financial institution infrastructure" and "complexity", each received an equal fifteen percent (15%) weight due to the relatively simple and less complex financial markets in the Philippines.

Table 1. Indicator-Based Measurement Approach

Category (and weighting)	Individual Indicator	Indicator Weighting
Size (40%)	Total Exposures as Defined for use in the Basel III Leverage Ratio	40%
Interconnectedness (30%)	Intra-Financial System Assets	11.36%
	Intra-Financial System Liabilities	6.60%
	Securities Outstanding	12.04%

¹ The Basel Committee on Banking Supervision consists of senior representatives of bank supervisory authorities and central banks from Argentina, Australia, Belgium, Brazil, Canada, China, France, Germany, Hong Kong SAR, India, Indonesia, Italy, Japan, Korea, Luxembourg, Mexico, the Netherlands, Russia, Saudi Arabia, Singapore, South Africa, Spain, Sweden, Switzerland, Turkey, the United Kingdom and the United States. It usually meets at the Bank for International Settlements (BIS) in Basel, Switzerland, where its permanent Secretariat is located.

² Consolidated basis shall refer to the combined financial statements of parent bank and subsidiaries consolidated on a line by line basis. Only banks with financial allied subsidiaries, excluding insurance subsidiaries, shall submit the report on consolidated basis.

Substitutability/Financial Institution Infrastructure (15%)	Assets Under Custody	7.80%
	Payments Activity	2.38%
	Underwritten Transactions in Debt and Equity Markets	4.82%
Complexity (15%)	Notional Amount of Over-the-Counter (OTC) Derivatives	6.19%
	Financial Assets Measured at Fair Value Through Profit or Loss (FVPL) and Financial Assets Measured at Fair Value Through Other Comprehensive Income (FVOCI)	8.81%

4. For each bank, the score for a particular indicator is calculated by dividing the individual bank's outstanding amount for that indicator by the aggregate outstanding amount for the indicator summed across all banks in the sample. The resulting percentage is then multiplied by 10,000 to express the indicator score in terms of basis points. The individual bank score is then multiplied by the indicator weighting. The category score for each bank is determined by adding the weighted scores of each indicator within that category. The resulting category score is then multiplied by the category weighting. The overall systemic importance score¹ for each bank is generated by adding the weighted score of each category.
5. The succeeding paragraphs briefly describe each of the four (4) categories used in the assessment methodology. The specific definition of the indicators can be found in Annex I which sets out the data requirements for the identification of D-SIBs. The specific definition of the indicators can be found in Annex A which sets out the data requirements for the identification of D-SIBs. The guidelines and the line item instructions for the reporting template are set out in Annex B.

a. Size

A bank's distress or failure is more likely to damage the local economy or financial markets if its activities comprise a large share of the domestic activity. The larger the bank, the more difficult it is for its activities to be quickly replaced by other banks and for it to be resolved, therefore, the greater the chance that its distress or failure will cause disruption to the financial markets. The distress or failure of a large bank is also more likely to damage confidence in the financial system as a whole. Size is therefore a key measure of systemic importance. One (1) indicator is used to measure size: the measure of total exposures used in the Basel III leverage ratio².

b. Interconnectedness

Financial distress at one institution can materially increase the likelihood of distress at other institutions given the network of contractual obligations in which they operate. A bank's systemic impact is considered to be positively related to its interconnectedness vis-à-vis other financial institutions. Three (3) indicators are used to measure interconnectedness: (i) intra- financial system assets; (ii) intra-financial system liabilities; and (iii) securities outstanding.

c. Substitutability/Financial Institution Infrastructure

The systemic impact of a bank's distress or failure is expected to be negatively related to its degree of substitutability as both a market participant and client service provider, i.e., it is expected to be positively related to the extent to which the bank provides financial institution infrastructure. At the same time, the cost to the failed bank's customers in having to seek the same service from another institution is likely to be higher for a failed bank with relatively greater market share in providing that service. Three (3) indicators are used to measure substitutability/financial institution infrastructure: (i) assets under custody; (ii) payments activity; and (iii) underwritten transactions in debt and equity markets.

¹ The maximum overall systemic importance score that a bank would have if it were the only bank in the sample is 10,000 basis points i.e., 100%

² To be computed based on Bangko Sentral guidelines on leverage ratio.

d. Complexity

The systemic impact of a bank's distress or failure is expected to be positively related to its overall complexity – that is, its business, structural and operational complexity. The more complex a bank is, the greater are the costs and time needed to resolve the bank. Two (2) indicators are used to measure complexity: (i) notional amount of OTC derivatives; and (ii) Financial assets measured at FVPL and financial assets measured at FVOCI.

B. Bucketing Approach

6. Banks with overall systemic importance score (produced by the indicator-based measurement approach) that equals or exceeds a threshold (cut-off level) set by the Bangko Sentral shall be classified as D-SIBs. Supervisory judgment may also be applied when warranted under certain circumstances to add and/or remove banks to/from the list of D-SIBs. This judgment shall be exercised in coordination with the supervising departments of the Financial Supervision Sector (FSS) and in accordance with the principles set out in Item "II.C".
7. Banks designated as D-SIBs shall be grouped into different categories of systemic importance using cluster analysis based on the overall scores produced by the indicator-based measurement approach. The allocation of D-SIBs to different buckets of HLA requirement is based on the relative distribution of their systemic scores.
8. The thresholds for the buckets shall correspond to the gaps identified by a cluster analysis of the scores. The use of cluster analysis in grouping the D-SIBs will ensure a meaningful and objective measurement and classification of the systemic importance of domestic banks.
9. Each year, Bangko Sentral shall run the assessment, and reallocate D-SIBs into the categories of systemic importance based on their overall systemic importance scores. It should be noted that the number of D-SIBs, and their bucket allocations, will evolve over time as banks change their behavior in response to the incentives of the D-SIBs framework as well as other aspects of Basel III and Bangko Sentral regulations.
10. An empty bucket shall be added on top of the highest-numbered populated bucket to provide incentives for banks to avoid becoming more systemically important. If the empty bucket becomes populated in the future, a new empty bucket shall be added with a required higher additional loss absorbency level. The size of the empty bucket shall be determined by the average size of the preceding buckets.

C. Supervisory Judgments

11. As stated earlier, supervisory judgment may be applied to add and/or remove banks to/from the list of D-SIBs. To ensure a high level of transparency and comparability, result of the annual D-SIB assessment shall be in coordination with the supervising departments. It shall be used on exceptional cases and presumed to be rare. The judgment overlay shall comprise well-documented and verifiable quantitative and qualitative information.
12. Qualitative information is intended to capture information that cannot be easily translated or quantified in the form of an indicator. This may include but not limited to the following: major expansion/contraction of a bank's operation; merger and acquisition; major change in the ownership/structure; and niche market or other aspects which are unique to the concerned bank. Qualitative judgments shall also be thoroughly explained and supported by verifiable arguments.

D. Periodic Review and Refinement

13. The assessment methodology provides a framework for periodically reviewing the D-SIBs status of a given bank. Thus, banks have incentives to change their risk profile and business models in ways that reduce their systemic spillover effect. The Bangko Sentral does not intend to develop a fixed list of D-SIBs. Through the criteria discussed above, banks can migrate in and out of D-SIB status, and between categories of systemic importance, over time.
14. The list of D-SIBs shall be assessed/determined annually based on year-end data submitted by each bank and shall be subject to approval of the Monetary Board. The results shall be released every June. Banks identified as D-SIBs shall be informed individually, including the bucket they belong to and the individual score for each indicator.
15. The assessment methodology shall be reviewed every three (3) years in order to capture developments in the banking sector and any progress in methods and approaches for measuring systemic importance.

Part III. Higher Loss Absorbency (HLA) and Interaction with Other Elements of Basel III Framework

16. Banks that will be identified as D-SIBs shall be required to have higher loss absorbency. The HLA requirement is aimed at ensuring that D-SIBs have a higher share of their balance sheets funded by instruments which increase their resilience as a going concern, considering that the failure of a D-SIB is expected to have a greater impact on the domestic financial system and economy.
17. The imposition of HLA shall be based on the degree of domestic systemic importance. This is to provide the appropriate incentives to banks which are subject to the HLA requirements to reduce (or at least not increase) their systemic importance over time.
18. The HLA requirement is to be met with Common Equity Tier 1 (CET1) capital as defined by the Basel III framework and implemented under *Appendix Q-45*. This is to ensure a maximum degree of consistency in terms of effective loss absorbing capacity.
19. Table 2 sets out the buckets to which identified D-SIBs shall be allocated together with the corresponding HLA requirement. The minimum HLA requirement for the lower bucket (bucket 1) shall be one and a half percent (1.5%) of risk-weighted assets at all times. For the higher populated bucket (bucket 2), the HLA requirement shall range from above one and a half percent to two percent (above 1.5% to 2%) of risk-weighted assets. An empty top bucket with HLA requirement of two and a half percent (2.5%) of risk-weighted assets shall also be maintained.

Table 2. Bucketing Approach

Bucket	Minimum additional HLA requirement (CET1 capital as a percentage of risk-weighted assets)
3 (Empty)	2.5%
2	>1.5% to 2.0%
1	1.5%

The differentiated HLA requirement for D-SIBs slotted under bucket 2 shall be based on the ranking of a bank's overall systemic importance score produced by the indicator-based measurement approach. The additional loss absorbency requirement on D-SIBs slotted under bucket 2 shall be calculated as follows:

$$HLA\ requirement = 2.0\ percent - \frac{0.5\ percent}{n} (x - 1)$$

where:

2.0 percent = maximum HLA requirement under bucket 2

0.5 percent = difference in HLA requirement under bucket 2 and bucket 1

n = number of D-SIBs under bucket 2

x = ranking of a D-SIB under bucket 2

The ranking shall be assigned in descending order such that a D-SIB with the highest overall systemic importance score shall be assigned a ranking of "1" while a D-SIB with the lowest overall systemic importance score shall be assigned a ranking of "n".

20. If the empty top bucket should become populated in the future, a new bucket shall be added to maintain incentives for banks to avoid becoming more systemically important. Minimum HLA requirement for the new buckets shall increase in increments of a half percent (0.5%) of risk-weighted assets.
21. The HLA requirement shall be on top of the combined requirement for capital conservation buffer (CCB) and Countercyclical Capital Buffer (CCyB) under *Appendix Q-45*. Table 3 shows a sample total CET1 capital requirement for banks identified as D-SIBs per bucket.

Table 3. Total CET1 Capital Requirement

A. CCyB rate is at 0%

	Bucket		
	3 (Empty)	2*	1
Minimum CET1 Capital Requirement (a)	6%	6%	6%
CCB (b)	2.5%	2.5%	2.5%
CCyB (c)	0%	0%	0%
D-SIB HLA Requirement (d)	2.5%	2%	1.5%
Total Additional CET1 Capital Requirement (b+c+d)	5%	4.5%	4%
Total Required CET1 Capital (a+b+c+d)	11%	10.5%	10%

* Assuming an HLA requirement of two percent (2.0%)

B. CCyB rate is at 2.5%

	Bucket		
	3 (Empty)	2*	1
Minimum CET1 Capital Requirement (a)	6%	6%	6%
CCB (b)	2.5%	2.5%	2.5%
CCyB (c)	2.5%	2.5%	2.5%
D-SIB HLA Requirement (d)	2.5%	2%	1.5%
Total Additional CET1 Capital Requirement (b+c+d)	7.5%	7%	6.5%
Total Required CET1 Capital (a+b+c+d)	13.5%	13%	12.5%

* Assuming an HLA requirement of two percent (2.0%)

To help ensure that the banking sector can meet the higher capital requirements through reasonable earnings retention and capital raising activities, while still supporting lending to the economy, transitional arrangements for the HLA requirement shall be implemented. Thus, in the case of banks included in the first list of D-SIBs (to be released in June 2015 based on December 2014 data), compliance with the HLA requirement shall be phased-in starting 01 January 2017, with full compliance on 01 January 2019 (See Table 4 for the timeline to comply with the HLA requirement). After the phased-in period, banks identified as D-SIBs shall be allowed a period of eighteen (18) months to comply with the required HLA.

Table 4. Timeline of Release of List of D-SIBs and Compliance with the HLA Requirement

Date Cut-Off	Release of D-SIBs List	Compliance Period
Dec-14	Jun-15	Phased-in implementation starting 01 January 2017 until 01 January 2019
Dec-15	Jun-16	Phased-in implementation starting 01 January 2018 until 01 January 2019
Dec-16	Jun-17	01 January 2019 to 31 December 2019
Dec-17	Jun-18	01 January 2020 to 31 December 2020
Dec-18	Jun-19	01 January 2020 to 31 December 2021

22. To determine banks' compliance with the additional CET1 capital requirement for D-SIBs, the minimum ratio shall be complied with by the parent bank and its subsidiary banks and quasi-banks on both solo and consolidated bases.
23. Foreign bank branches operating in the Philippines with head office/consolidated group declared as global systemically important bank (G-SIB) but not declared as D-SIB will not be required to put up in the Philippine branch the required HLA for G-SIB. However, if identified as D-SIB in the Philippines, the required HLA for D-SIBs shall be complied with locally by the Philippine branch.
24. Capital distribution constraints shall be imposed when capital levels fall within certain range as illustrated in Table 5 below. Conversely, a D-SIB shall not be subject to any restriction on distribution if the following conditions are met:
 - a. Has positive retained earnings as of the preceding quarter and has complied with the requirements on declaration of dividends under Section 123-Q;
 - b. Has CET1 capital of more than the total required (minimum CET1 ratio of six percent (6.0%) plus the combined requirement for CCB of two and a half percent (2.5%) and the CCyB at the rate determined by the Monetary Board – zero percent (0%) to two and a half percent (2.5%), and D-SIBs HLA requirement) before the distribution; and
 - c. Has complied with the minimum capital ratios (CET1 ratio of six percent (6%), Tier 1 ratio of seven and a half percent (7.5%) and ten percent (10%) CAR) after the distribution.

Table 5. Restriction on Distributions

A. CCyB rate is 0%

Restriction on Distributions	Level of CET1 Capital	
	Bucket 1	Bucket 2*
No distribution (until the minimum CET1, the combined requirement for CCB and CCyB and more than 50% of D-SIB HLA requirements are met; and conditions "a" and "c" above are complied with)	<=9.25%	<=9.50%
50% of earnings may be distributed (if the minimum CET1, the combined requirement for CCB and CCyB and more than 50% of the D-SIB HLA requirements are met; and conditions "a" and "c" above are complied with)	>=9.25%-10.0%	<=9.50%-10.50%

* Assuming an HLA requirement of two percent (2.0)

B. CCyB rate is at 2.5%

Restriction on Distributions	Level of CET1 Capital	
	Bucket 1	Bucket 2*
No distribution (until the minimum CET1, the combined requirement for CCB and CCyB and more than 50% of D-SIB HLA requirements are met; and conditions "a" and "c" above are complied with)	<=11.75%	<=12.00%
50% of earnings may be distributed (if the minimum CET1, the combined requirement for CCB and CCyB and more than 50% of the D-SIB HLA requirement are met; and conditions "a" and "c" above are complied with)	>11.75% - 12.50%	>12.25% - 13%

* Assuming an HLA requirement of two percent (2%).

During the phased-in implementation period from 2017 to 2019, the general principle above on restriction on distribution shall likewise be applied. Annex C shows the restriction on distributions by year for each bucket during the phased-in implementation from 2017 to 2019 assuming there is no change in the HLA requirement. In case of change in the HLA requirement during the phased-in period, the required HLA shall be distributed equally over the remaining period until the full implementation in 2019.

25. Elements subject to the restriction on distributions include dividends, share buybacks, discretionary payments on other Tier 1 capital instruments and discretionary bonus payments to directors, officers and staff. Payments which do not result in the depletion of CET1 capital are not considered capital distributions.
26. Earnings refer to distributable profits calculated prior to the deduction of elements subject to the restriction on distributions. The earnings is computed after the tax which would have been reported had none of the distributable items been paid.

Part IV. Intensive Supervisory Approach

27. Banks identified as D-SIBs shall include in their ICAAP document concrete and reasonable recovery plans which shall be implemented in case the bank breaches the HLA capital requirement. The recovery plans shall include guidelines and action plans to be taken to restore the D-SIB's financial condition to viable level in cases of significant deterioration in certain scenarios. This shall include specific initiatives appropriate to the Bank's risk profile such as capital raising activities, streamlining of businesses, restructuring and disposal of assets, to improve capital position.
28. Moreover, the banks designated as D-SIBs shall be subject to more intensive supervision, which may include but not limited to, greater intensity of offsite supervision and monitoring, more structured interaction with board and senior management, and higher supervisory expectation on controls for significant businesses/operations, data aggregation capabilities and corporate governance.

(Circular Nos. 1051 dated 27 September 2019 and 1024 dated 06 December 2018)

**OPERATIONAL GUIDELINES ON THE ADMINISTRATION OF THE PERSONAL EQUITY
AND REQUIREMENT ACCOUNT (PERA)
(Appendix to Sec. 1121-Q)**

Pursuant to R.A. No. 9505 also known as the Personal Equity and Retirement Account (PERA) Act of 2008 (PERA Act) and its Implementing Rules and Regulations (PERA Rules), the following operational guidelines on the administration of PERA are hereby issued, certain capitalized terms herein used shall have the definitions ascribed to them in the PERA Rules unless the context otherwise requires.

I. ACCOUNT OPENING

A. Eligibility Review and Pre-acceptance Disclosure

- 1) Only a natural person who has the capacity to contract and has a Tax Identification Number (TIN) can be a contributor.
- 2) The administrator shall –
 - (a) Determine the exclusivity of PERA administration through an on-line validation in the PERA contributors' database (PERA System).
 - (b) Observe the following rules prior to any account opening:
 - i. A contributor shall designate and maintain only one (1) administrator for all his PERA;
 - ii. A contributor may create and maintain a maximum of five (5) PERA at any one time; and
 - iii. Each PERA shall be confined to only one category of investment products. For this purpose, the categories of PERA investment products are as follows:
 - a. unit investment trust fund;
 - b. mutual fund;
 - c. annuity contract;
 - d. insurance pension product;
 - e. pre-need pension plan;
 - f. government securities;
 - g. stock or other security listed and traded in a local exchange;
 - h. exchange-traded bond; or
 - i. any other category of investment product or outlet which the concerned Regulatory Authority may allow for PERA purposes: *Provided*, That the product must be non-speculative, readily marketable, and with a track record of regular income payments to investors.
 - (c) Ensure that the minimum documentary requirements (Annex A) for the proper identification of the Contributor are properly complied with and in adherence with the Anti-Money Laundering (AML) regulations and the PERA Act; and
 - (d) Fully disclose to the potential contributor the following, using the Pre-Acceptance and General Risk Disclosure Statement (PGRDS) (Annex B):
 - i. Nature of a PERA, privileges and conditions of its establishment; emphasis must be placed on the long-term nature of PERA, the conditions for tax exemption and penalties for early withdrawal unless the early withdrawal is allowed under the PERA Act;
 - ii. Category and investor-risk profile classification of PERA investment products available to a Contributor;
 - iii. Risks associated with each category of PERA investment products which shall form part of the General Risk Disclosure Statement;

- iv. Specific obligations and responsibilities of an administrator, investment manager (Advisor) and custodian; and
- v. Prerequisite to appoint a cash custodian and an option to elect an investment manager (Advisor).

B. Account Opening Process

- 1) The administrator shall –
 - (a) Require the contributor to accomplish a PERA Client Suitability Assessment (PCSA) (Annex C) prior to account opening;
 - (b) Formulate an Investment Policy Statement (IPS) which shall serve as a frame of reference for investment decisions of the contributor. The administrator shall inform the contributor of the full range of PERA investment products with emphasis on the specific category of products corresponding to the contributor's risk profile classification as borne by the results of PCSA. The administrator, however, shall provide a process for allowing contributor to invest in PERA investment products not falling within his risk profile classification: *Provided*, That any such investment may be allowed only upon the prior written instruction of the contributor;
 - (c) Execute the PERA Administration Agreement (PAA) (Annex E) and furnish the contributor copies of the PAA along with the PGRDS, PCSA and IPS; and
 - (d) Ensure that the contributor's account opening details are lodged in the PERA System.
- 2) In addition, the administrator shall facilitate the contributor's appointment of a cash custodian and as necessary, a securities custodian.
- 3) In the case of a contributor who opts to engage the services of or has engaged an investment manager (Advisor), he shall provide the administrator with a copy of the PERA investment management (Advisory) agreement (Annex F). The said agreement shall set forth at its minimum, the overall investment philosophy, standards, and practices of the investment manager (Advisor) and the validation by the investment manager (Advisor) of the contributor's PCSA and IPS. The investment decisions made by the investment manager (Advisor) for and on behalf of the contributor shall be in accordance with the authority granted by the contributor in their agreement.
- 4) An entity who is offering a PERA investment product hereinafter referred to as the PERA product provider shall furnish the administrator and/or contributor all relevant documents necessary to facilitate the investment of a contributor in the PERA investment product. Appropriateness of the PERA investment product based on PCSA and IPS of contributor shall be validated by administrator.

II. ACCOUNT ADMINISTRATION

A. Contributions

- 1) The administrator shall –
 - (a) Secure proof of income when a contribution is made and ensure that the maximum aggregate contribution per calendar year as follows has not been exceeded. If in case proof of income is already obtained for a contribution made during the calendar year, the same shall no longer be required for subsequent contributions made during the year:
 - i. P100 thousand or its equivalent in any convertible foreign currency at the prevailing rate for non-overseas Filipino (non-OF); or
 - ii. P200 thousand or its equivalent in any convertible foreign currency at the prevailing rate for OF;

For this purpose, prior to contribution, the status of an OF shall be validated by securing from the OF a sworn certification on his continuing status as an OF for the calendar year;
 - (b) Receive and acknowledge all contributions, initial and subsequent, through the PERA contribution and investment instruction form (PCIIF) (Annex G) which shall also contain the investment directives of the contributor or his designated investment manager (Advisor):
 - i. The administrator shall facilitate and assist the contributor in completing the necessary documents for the chosen PERA investment product/s; and

- ii. The contributor shall be provided with the copies of the PERA investment product documents such as, but not limited to, specific risk disclosure statement if not yet provided by the product provider to the contributor;
- (c) Ensure that all contributions are directly remitted to the cash custodian;
- (d) Maintain a record of all contributions made to the PERA on per account and aggregate basis;
- (e) Ensure that the PCSA and IPS are periodically updated or as often as may be necessary, upon notice to the administrator, on account of change in the contributor's personal/financial circumstances or preferences;
- (f) Apply for certificate of entitlements or tax credit certificate on behalf of the contributor and likewise receive the same from the BIR.

In the case of employer's contribution:

- (g) Accept the contributions of an employer only if:
 - i. Its employees have already opened a PERA;
 - ii. Each employee has accomplished a PCIIF; and
 - iii. The maximum aggregate yearly contribution of the contributor has not been exceeded.
 - (h) Issue to the employer a certificate of the actual amount of qualified employer's contributions which shall serve as its basis for deduction on its gross income; and
 - (i) Secure from the employer a certification on the amount of tax not withheld on compensation/fringe benefits as a result of contributing to the PERA of its employees.
- 2) The cash custodian shall –
- (a) Open a PERA cash account for the contributor which shall be governed by a PERA cash custody agreement (Annex H);
 - (b) Receive and acknowledge all contributions directly remitted by the administrator; and
 - (c) Custodize all funds of the PERA.
- 3) In the case of a contributor who has an investment manager (Advisor), the investment manager (Advisor) shall accomplish the investment instructions portion of the PCIIF for and on behalf of the contributor.

B. Choice of PERA Investment Product

- 1) The administrator shall –
- (a) Execute the contributor's or his investment manager (Advisor)'s instruction as indicated in the PCIIF;
 - (b) Based on the PCIIF, instruct the cash custodian to remit the funds to the chosen PERA product provider;
 - (c) Instruct the PERA product provider to transfer the securities or evidence of investments to the securities custodian and provide details of the PERA cash account of the contributor for the credit of investment proceeds;
 - (d) Maintain a record of all investments including earnings and expenses relative to the PERA.
- 2) The cash custodian shall execute the administrator's instruction as to disposition of the funds.
- 3) The PERA product provider shall –
- (a) Transfer the securities, evidence of deposits or other evidence of investments to the securities custodian chosen by the contributor. In case of self-custody arrangement for securities that are non-transferable, non-negotiable and non-withdrawable, the evidence of investments shall be given to and kept by the contributor;
 - (b) Credit to the contributor's PERA cash account all cash due to the contributor relative to his PERA investment product.
- 4) The securities custodian shall –
- (a) Open a PERA securities account for the contributor which shall be governed by a PERA securities custody agreement (Annex I);
 - (b) Receive and acknowledge all evidence of investments; and
 - (c) Custodize all non-cash assets of the PERA except those under self-custody arrangement.

C. Change of PERA Investment Product

- 1) PERA investment product/s may be changed: *Provided*, That the entire PERA assets arising from the sale shall be transferred to another PERA Investment Product/s within two (2) working days from withdrawal thereof.
- 2) The contributor or his investment manager (Advisor) shall accomplish the PCIIF and submit the same to the administrator.
- 3) The administrator shall –
 - (a) Execute the investment instructions of the contributor or his investment manager (Advisor) as indicated in the PCIIF; and
 - (b) Coordinate with PERA product provider, cash custodian and securities custodian as to disposition of the PERA assets.

D. Suspension or Revocation of Qualification/Accreditation

Common provisions in the event of suspension or revocation of qualification/accreditation:

- 1) The administrator, investment manager (Advisor) or custodian, as the case may be, shall –
 - (a) Notify the contributors by direct written notice to each contributor and through posting of notices in its head office and branches, within three (3) working days from receipt of notice of suspension or revocation from the Bangko Sentral; and
 - (b) Institute a mechanism to monitor and ensure that all contributors have received the notice of suspension or revocation.
- 2) The contributor shall advise the administrator, investment manager (Advisor), or custodian of his choice of a new administrator, investment manager (Advisor), or custodian, as the case may be, within three (3) working days from receipt of the notice of suspension or revocation.

Failure of the contributor within the prescribed period to designate a new administrator or custodian shall authorize his current administrator or custodian to appoint its successor that shall assume all its duties and responsibilities to the contributor.

In the event of suspension or revocation of their qualification/accreditation:

- 1) The former administrator shall –
 - (a) Effect the transfer of PERA assets to the new administrator chosen by the contributor within two (2) working days from receipt of contributor's advice; otherwise, the former administrator shall be personally liable for the early withdrawal penalties which may be imposed by the BIR; and
 - (b) Turn-over to the new administrator the complete and updated files and records (in soft and hard copies) of the contributor's PERA.

While the new administrator shall –

- (i) Ensure the completeness of PERA files and records turned-over by the former administrator that will enable proper performance of its functions; and
 - (ii) Follow all the procedures enumerated in Item "II" (Account Administration) that are necessary to ensure continuity of the PERA.
- 2) The former investment manager (Advisor) shall advise the contributor and his administrator within the above prescribed period; however, in the absence of any advice from the contributor on his choice for a new investment manager (Advisor), the former investment manager (Advisor) shall turn over to the administrator all the contributor's PERA records and documents.
- 3) The former custodian shall advise the contributor and his administrator within the above prescribed period and shall–
 - (a) Turn over to the new custodian all PERA assets in its custody within two (2) working days from receipt of contributor's advice; and
 - (b) Submit to the administrator a report on all financial transactions and documents in its custody relative to the transferred PERA assets within the same period.

While the new custodian shall –

- (a) Receive and acknowledge the PERA assets turned over by the former custodian; and
- (b) Follow all the procedures enumerated in Item “II” (account administration) that are necessary to ensure continuity of the PERA.

E. PERA Records and Reports

1) The administrator shall –

- (a) Possess adequate systems and technological capabilities to ensure proper recording and tracking of contributor’s PERA;
- (b) Maintain separate set of books of accounts for all contributions, investments, earnings, expenses, withdrawals and terminations of the PERA;
- (c) Retain documentary proof of contribution/income/withdrawal/termination subject to validation of the BIR whenever requested;
- (d) Monitor and keep track of the contributor’s tax credits, privileges and other entitlements; and
- (e) Consolidate and reconcile all transactions/documents with the cash and securities custodians.

2) In addition, the administrator shall submit the following reports:

Recipient	Frequency	Particulars
Contributor	As applicable	Sale and purchase of PERA assets
	Quarterly	Summary of the following information: <ul style="list-style-type: none"> i. Total contributions and withdrawals for each PERA, indicating therein the total amount of contributions entitled to tax incentives; ii. Total income earned on the contributions, indicating those entitled to income tax exemption; iii. Total fees and charges assessed and paid by the contributor to administrator, investment manager (Advisor), if any, cash and/or securities custodians; iv. Purchase and sale transactions PERA assets implemented and those pending execution; and v. Valuation of the PERA assets and investments.
Employer of a contributor	Annually	Certification on the actual amount of the qualified employer’s contribution in case when the employer made contributions to the PERA of its employees.
Bangko Sentral	Quarterly	Reports on all PERA assets under its administration which shall form part of the financial reporting package (FRP) of banks and trust entities
Bureau of Internal Revenue (BIR)	As provided	PERA reports as may be acquired by the BIR

Furthermore, the administrator shall perform periodic uploading of transactions details to the PERA System.

- 3) The cash and securities custodians shall submit the following reports to –
 - (a) The contributor and the administrator – a quarterly securities and cash activity report of all financial transactions and documents under their custody within ten (10) days after the end of each quarter; and
 - (b) The Bangko Sentral – quarterly reports on all PERA assets and documents under their custody which shall form part of the financial reporting package of banks and trust entities.
- 4) The investment manager (Advisor) shall provide periodic reports to the contributor as stipulated in the PERA investment management (Advisory) agreement.

F. Valuation of PERA Investment Product

Each PERA investment product shall be valued in accordance with the valuation methodology, standards and reporting requirements as prescribed by the concerned regulatory authority of that PERA investment product; *Provided, That* such valuation methods and standards are in accordance with internationally accepted accounting and valuation standards.

G. Accounts Review

- 1) The administrator shall conduct a periodic administrative review of all PERA under its administration to ensure that –
 - (a) Transactions involving PERA comply with the contributor's or his investment manager (Advisor)'s instructions, contracts, and applicable laws, rules and regulations;
 - (b) Investments of the contributor are aligned with his risk profile and/or IPS, and are authorized by the contributor or his investment manager (Advisor);
 - (c) Books of accounts are correct and updated, and appropriate taxes/penalties are properly accounted and/or paid to the government, when applicable; and
 - (d) PERA assets are kept separate from other assets of the administrator for the purposes of insolvency.
- 2) The administrator or the contributor's investment manager (Advisor), if any, shall conduct at least quarterly an investment performance review of all PERA investment products and/or all PERA assets of the contributor. The results of such review shall be reported to the contributor through his quarterly financial statements, or as frequent as necessary.

H. Collection of Fees

- 1) The administrator, investment manager (Advisor) and cash/securities custodian may charge against the PERA appropriate fees that are commensurate to the services rendered in relation to the contributor's PERA.
- 2) The investment manager (Advisor) and cash/securities custodian shall provide the contributor's administrator with their respective bills for their investment management services and custodial services.
- 3) The administrator may –
 - (a) Correspondingly charge against the PERA of a contributor the appropriate fees such as administration, investment management and custodial fees and report the same to the contributor; and
 - (b) Instruct the cash custodian to pay the administrator, cash/securities custodian and investment manager (Advisor), if any.

III. ACCOUNT WITHDRAWALS, DISTRIBUTIONS AND TERMINATION

A. Early Withdrawal

- 1) The following shall not be subject to early withdrawal penalties:
 - (a) When the contributor had an accident or illness-related hospitalization in excess of thirty (30) days: *Provided, That* there is a notarized doctor's certificate attesting to said event;
 - (b) When the contributor becomes permanently totally disabled as defined under the Employees Compensation Law, Social Security Law or Government Service Insurance System Law: *Provided, That* he has a certification from the pertinent government agency; or
 - (c) Immediate transfer of assets to another eligible PERA investment product and/or another administrator, who have been discredited either by the BIR or the Bangko Sentral, within two (2) working days from withdrawal thereof.

- 2) All other early withdrawals not mentioned above shall be imposed early withdrawal penalties.
- 3) The early withdrawal penalties to be imposed shall be those set forth in BIR Revenue Regulations No. 17-2011 and subsequent BIR issuances.

B. Qualified PERA Distributions

The following are considered qualified PERA distributions and shall be exempt from the payment of income taxes or estate tax, if applicable:

- 1) When the contributor reaches the age of fifty-five (55) years and has made contributions for at least five (5) years:
 - (a) The contributor has the option to receive his PERA assets in lump-sum, pension for a definite period or lifetime pension;
 - (b) Notwithstanding this condition, the contributor may opt to continue his PERA and its tax-privileges; or
- 2) Upon the death of the contributor: *Provided*, That a death certificate was presented:
 - (a) The administrator shall terminate the PERA and release the assets to the contributor's designated beneficiary/ies;
 - (b) In case when there is/are no designated beneficiary/ies, the administrator shall release the PERA assets to the contributor's estate in accordance with the laws on succession and rules of court.

C. Release of PERA Assets

- 1) The administrator shall –
 - (a) Secure from the contributor or his designated beneficiary/ies, when applicable, the duly accomplished PERA Notice of Withdrawal/Termination Form (PNWTF) and other necessary documents;
 - (b) Execute the divestment instructions of the contributor or his designated beneficiary/ies;
 - (c) Instruct the securities custodian to release the evidence of investments to the appropriate parties and remit the divestment proceeds to the cash custodian;
 - (d) Compute the early withdrawal penalties, if any, in accordance with the rules set forth by the BIR which shall be deducted from the divestment proceeds and instruct the cash custodian to remit the early withdrawal penalties to the BIR;
 - (e) Report the withdrawal/termination transactions and submit the necessary documents to the BIR; and
 - (f) Account for the unwithdrawn portion of the PERA, if any.
- 2) The cash custodian shall –
 - (a) Release the divestment proceeds, net of early withdrawal penalties if any, to the contributor or his designated beneficiary/ies; and
 - (b) Remit the early withdrawal penalties to the BIR as instructed by the administrator.

(Circular No. 890 dated dated 02 November 2015)

**PERSONAL EQUITY AND RETIREMENT ACCOUNT (PERA)
Minimum Documentary Requirements for Account Opening**

- 1) Customer information sheet and identification cards as provided under the rules and regulations on anti-money laundering
- 2) Signature cards
- 3) Proof of income earnings for the calendar year or to be earned during the calendar year
 - (a) For Overseas Filipino (OF) who is working or deriving income from abroad:
 - i. Overseas Employment Certificate or its equivalent document issued by the Philippine Overseas Employment Authority; and
 - ii. Any official document showing that he will earn or has earned income in a foreign country in the year of PERA contribution
 - (b) For an individual who has retained or re-acquired his Philippine citizenship under R.A. 9225 otherwise known as the "Citizenship Retention and Reacquisition Retention Act of 2003":
 - i. Identification certificate issued by the Bureau of Immigration, to prove his reacquisition of Philippine citizenship; and
 - ii. Any official document showing that he will earn or has earned income in a foreign country in the year of PERA contribution
- 4) If the PERA will be opened by spouse or child of the Overseas Filipino (OF) in the name of the OF:
 - (a) Authorization to open a PERA account issued by the OF;
 - (b) For the spouse of an OF, Marriage Contract (MC) in security paper issued by the National Statistics Office (NSO) or Certified True Copy of MC issued by the Local Civil Registrar (LCR) and duly authenticated by NSO or Report of Marriage duly authenticated by NSO if married abroad;
 - (c) For the child of an OF, Birth Certificate (BC) in security paper issued by the NSO or Certified True Copy of BC issued by the LCR and duly authenticated by NSO or Report of Birth duly authenticated by NSO if born abroad showing that he/she is a child of and is at least eighteen (18) years old; and
 - (d) Sworn certificate that he is opening account on behalf of his spouse or his parent who has not availed of PERA
- 5) In case when the contributor appoints an investment manager (Advisor):
 - (a) PERA investment management (Advisory) agreement;
 - (b) Details/contact information of investment manager (Advisor);
 - (c) Board resolution appointing authorized signatories of investment manager (Advisor) (if institutional investment manager (Advisor); and
 - (d) Signature cards of authorized signatories.

(Circular No. 890 dated 02 November 2015)

**GUIDELINES AND PROCEDURES GOVERNING THE CONSUMER ASSISTANCE MANAGEMENT SYSTEM
(CAMS) OF BSP-SUPERVISED FINANCIAL INSTITUTIONS**
[Appendix to Sec. 1002-Q]

(As deleted by Circular No. 1048 dated 06 September 2019 and as amended by Circular No. 890 dated 02 November 2015 and 857 dated 21 November 2014)

GUIDELINES ON THE IMPLEMENTATION OF THE BASEL III LEVERAGE RATIO FRAMEWORK ([Appendix to Sec. 127-Q (Basel III Leverage ratio framework)])

The Bangko Sentral will adopt a leverage ratio framework that is designed to act as a credible supplementary measure to the risk-based capital requirements. The leverage ratio intends to:

- Restrict the build-up of leverage in the banking sector to avoid destabilizing deleveraging processes which can damage the broader financial system and the economy; and
- Reinforce the risk-based requirements with a simple, non-risk based “backstop” measure.

This framework is largely based on the document issued by the Basel Committee on Banking Supervision (“Basel Committee” or “BCBS”) released in January 2014 entitled “Basel III Leverage Ratio Framework and Disclosure Requirements”.

A. Definition, Minimum Requirement and Scope of Application

Leverage ratio is defined as the capital measure (the numerator) divided by the exposure measure (the denominator), expressed as a percentage:

$$\text{Basel III Leverage Ratio (\%)} = \frac{\text{Tier I Capital}}{\text{Exposure Measure}}$$

The leverage ratio shall not be less than 5.0 percent and will be applied to all universal and commercial banks (U/KBs) and their subsidiary banks/quasi-banks (QBs) computed on both solo¹ and consolidated² bases, similar with the capital adequacy framework, i.e., computed on a daily basis and reported on a quarterly basis.

1. Capital Measure

The capital measure for the leverage ratio is Tier 1 capital calculated in accordance with *Appendix Q-46*.

Tier 1 capital should be net of regulatory deductions³ applicable to Tier 1 capital. Items that are deducted completely from capital do not contribute to leverage, hence, should also be deducted from the exposure measure.

2. Exposure Measure

a. General Measurement Principles in respect of the Exposure Measure

U/KBs and their subsidiary banks/QBs should generally follow the accounting value of exposure for the purpose of calculating the Exposure Measure for the leverage ratio, except that:

- On-balance sheet, non-derivative exposures are to be included in the Exposure Measure net of specific provisions; and
- Netting of loans and deposits is not allowed.

U/KBs and their subsidiary banks/QBs must not take account of physical or financial collateral, guarantees or other credit mitigation techniques to reduce the Exposure Measure.

b. Total Exposure Measure

The total Exposure Measure is computed as follows:

$$\begin{aligned} \text{Exposure Measure} = & \text{On-balance sheet exposures} \\ & + \\ & \text{Derivative exposures} \\ & + \\ & \text{Securities Financing Transactions (SFT) exposures} \\ & + \\ & \text{Off-balance sheet (OBS) items} \end{aligned}$$

¹ Pertains to the reporting entity's head office and branches

² Pertains to the reporting entity and its financial allied subsidiaries except insurance companies that are required to be consolidated on a line-by-line basis for the purpose of preparing consolidated financial statements

³ Refers to Regulatory Adjustments to CET1 Capital (Items A.2.1 to A.2.24) and Regulatory Adjustments to Additional Tier 1 (AT1) Capital (Items A.5.1 to A.5.8) of Part II (Qualifying Capital) of the BASEL III CAR Template (Version 3)

The methods for calculating the Exposure Measure in respect of the above four main exposure categories are described in greater detail below.

1. On-balance sheet

For the purpose of calculating the Exposure Measure, the on-balance sheet exposure must include all on-balance sheet assets, gross of General Loan Loss Provisions (GLLP).

On-balance sheet derivatives and SFT assets are not to be included under On- Balance sheet exposures as they are subject to different treatment.

2. Derivatives

The Exposure Measure for derivative contracts¹ consists of an exposure arising from the underlying of the derivative contract and a counterparty credit risk (CCR) exposure. In general, the Exposure Measure for derivatives is calculated as follows:

$$\begin{array}{rcl} \text{Exposure Measure for} & & \text{Replacement Cost (RC)} \\ \text{Derivatives} = & & + \\ & & \text{Potential Future Exposure (PFE)} \\ & & \pm \\ & & \text{Adjustments for Written Credit Derivatives} \end{array}$$

Where:

RC = Positive mark-to-market value of the contract (or zero if the mark-to-market value is zero or negative);

PFE² = This represents an add-on arising from the potential exposure over the remaining life of the contract calculated by multiplying the notional principal amount of the contract to the appropriate potential future credit conversion factor; and

Adjustments for Written Credit Derivatives = effective notional amount³ referenced by the written credit derivative

In the computation of the PFE, the following add-on factors shall apply to financial derivatives, based on residual maturity:

Residual Maturity	Interest Rate Contract	Exchange Rate Contract	Equity Contract
One (1) year or less	0.0 percent	1.0 percent	6.0 percent
Over 1 year to five (5) years	0.5 percent	5.0 percent	8.0 percent
Over 5 years	1.5 percent	7.5 percent	10.0 percent

For contracts with multiple exchanges of principal, the factors are to be multiplied by the number of remaining payments in the contract. For contracts that are structured to settle outstanding exposure following specified payment dates and where the terms are reset such that the market value of the contract is zero on these specified dates, the residual maturity would be set equal to the time until the next reset date, and in the case of interest rate contracts with remaining maturities of more than one (1) year that meet these criteria, the potential future CCF is subject to a floor of 0.5 percent.

For credit derivatives, which refer to credit default swaps (CDS), total return swaps (TRS) and credit-linked notes (CLN), two approaches shall be applied, as follows:

- a) For single-name credit derivatives, a 5.0 percent add-on factor for the computation of the potential future credit exposure shall be used by both protection buyers and protection sellers if the reference obligation is rated as investment grade by at least two credit rating agencies i.e. rated Baa or higher

¹ This approach makes reference to the Current Exposure Method (CEM) which is used under the Basel II framework to calculate the CCR exposure amounts associated with derivative exposures. The Basel Committee is considering alternatives to the CEM. If an alternative approach is adopted as a replacement for the CEM, Basel Committee will consider whether that alternative approach is appropriate in the context of the need to capture both types of exposures created by derivatives.

² No potential future credit exposure shall be calculated for single currency floating/floating interest rate swaps, the credit exposure on these contracts would be evaluated solely on the basis of their mark-to-market valuation.

³ For credit derivative contracts where the states notional amount differs from the effective notional amount, banks/non-banks must use the greater of the effective notional amount and the notional amount. The effective notional amount is obtained by adjusting the notional amount to reflect the true exposure of contract that are leveraged or otherwise enhanced by the structure of the transaction.

by Moody's and BBB or higher by Standard & Poor's. A 10.0 percent add-on factor applies to all other reference obligations. However, a protection seller in a CDS shall only be subject to the add-on factor if it is subject to closeout upon the insolvency of the protection buyer while the underlying is still solvent. The add-on in this case should be capped to the amount of unpaid premiums.

- b) With regard to multiple name derivatives, where the credit derivative is a first to default transaction, the add-on will be determined by the lowest credit quality underlying in the basket (i.e., if there are any non-investment grade or unrated items in the basket), the 10.0 percent add-on should be used. For second and subsequent nth-to-default transactions, underlying assets should continue to be allocated according to the credit quality (i.e., the second lowest credit quality will determine the add-on for a second or nth-to-default transaction respectively). On the other hand, where the credit derivative is referenced proportionately to multiple obligations, the add-on factor will follow the add-on factor applicable to the obligation with the biggest share. If the protection is equally proportioned, the highest add-on factor should be used.

Written Credit Derivatives

In addition to the CCR exposure arising from the fair value of the contracts, written credit derivatives¹ create a notional credit exposure arising from the creditworthiness of the reference entity. As such, written credit derivatives shall be treated consistently with cash instruments (i.e., loans, bonds) for the purpose of the exposure measure.

In order to capture the credit exposure to the underlying reference entity, the effective notional amount referenced by a written credit derivative is incorporated into the Exposure Measure. However, the effective notional amount² of a written credit derivative may be reduced by any negative change in fair value amount that has been incorporated into the calculation of Tier 1 capital with respect to the written credit derivative. The resulting amount may be further reduced by the effective notional amount of a purchased credit derivative on the same reference name³, *Provided*; That:

- The credit protection purchased on a reference obligation which ranks pari passu with or is junior to the underlying reference obligation of the written credit derivative in the case of single name credit derivatives; and
- The remaining maturity of the credit protection purchased is equal to or greater than the remaining maturity of the written credit derivative.

The Exposure Measure of a written credit derivative may be overstated by the inclusion in the Exposure Measure of both (1) PFE representing counterparty credit exposure and (2) effective notional amount representing reference entity exposure. To avoid double counting, a PFE of zero is assigned to a written credit derivative whose effective notional amount is already included in the Exposure Measure. Hence, the total exposure measure for written credit derivatives equals RC and its corresponding effective notional amount.

3. Securities Financing Transactions (SFTs)

SFTs are transactions such as repurchase agreements, reverse repurchase agreements, security lending and borrowing and margin lending transactions, where the value of the transactions depends on market valuation and the transactions are often subject to margin agreements.

- a. For bank/non-bank acting as principal, the Exposure Measure calculations for SFTs shall be computed as follows:

$$\text{Exposure Measure for SFTs} = \text{Adjusted SFT Assets} + \text{Counterparty/Credit Risk Exposure (E)}$$

Where:

Adjusted SFT Assets = the gross SFT assets⁴ recognized for accounting purposes (i.e., with no recognition of accounting netting) will be adjusted to exclude the value of any securities received under an SFT, where the bank has recognized the securities as an asset on its balance sheet⁵.

¹ *Written credit derivative* refers to credit default swap, total return swaps and credit-link notes where banks act as guarantor.

² For credit derivative contracts where the stated notional amount differs from the effective notional amount, banks/non-banks must use the greater of the effective notional amount from the notional amount. The effective notional amount is obtained by adjusting the notional amount to reflect the true exposure of contracts that are leveraged or otherwise enhanced by the structure of the transaction.

³ Two reference names are considered identical only if they refer to the same legal entity.

⁴ For SFT assets subject to novation, "gross SFT assets recognized for accounting purposes" are replaced by the final contractual exposures, given that pre-existing contracts have been replaced by new legal obligations through the novation process.

⁵ Gross SFT assets recognized for accounting purposes must not recognize any accounting netting of cash payables against cash receivables (e.g., under the Philippine Accounting Standards).

Counterparty Credit Risk Exposure (E) = the measure of CCR is calculated as the current exposure (i.e., without PFE) with respect of the SFT.

The current exposure for transactions with a counterparty must be calculated on a transaction by transaction basis: that is, each individual SFT is treated as its own netting set, computed as the difference between the fair value of securities and cash lent to a counterparty for a transaction and the fair value of securities and cash received to a counterparty for a transaction. In other words, it shall follow the formula:

$$E = \max, \{0, [Ei - Ci]\}$$

Where:

Ei = cash and the fair value of securities lent to a counterparty for a transaction, and

Ci = cash and the fair value of securities received from a counterparty for a transaction.

- b. If a bank/non-bank acting as an agent in an SFT provides an indemnity or guarantee to a customer or counterparty for any difference between the value of the security or cash the customer has lent and the value of the collateral the borrower has provided, the bank/non-bank should include in its Exposure Measure only the measure for Counterparty Credit Risk Exposure (E). Otherwise, the treatment when the bank is acting as a principal shall be applied.

4. Off-balance sheet (OBS) Items

The leverage ratio exposure measure for Off-balance sheet (OBS) items is generally calculated by multiplying the notional amount of the OBS item by a credit conversion factor (CCF), as follows:

- a. 100 percent CCF - this shall apply to OBS securitization exposures except an eligible liquidity facility or an eligible servicer cash advance facility, direct credit substitutes, e.g., general guarantees of indebtedness (including standby letters of credit serving as financial guarantees for loans and securities) and acceptances (including endorsements with the character of acceptances) as follows:
 - Guarantees issued other than shipside bonds/airway bills; and
 - Financial standby letters of credit
- b. Fifty (50) percent CCF - this shall apply to OBS securitization exposures that qualify as eligible liquidity facilities¹ and certain transaction-related contingent items, performance bonds, bid bonds, warranties and standby letters of credit related to particular transactions) as follows:
 - Performance standby letters of credit (net of margin deposits), established as a guarantee that a business transaction will be performed;
 - Note issuance facilities (NIFs) and revolving underwriting facilities (RUFs); and
 - Other commitments, e.g., formal standby facilities, commitments with an original maturity over one (1) year and Underwritten Accounts Unsold.
- c. Twenty (20) percent CCF - this shall apply to short-term self-liquidating trade letters of credit arising from the movement of goods², e.g., documentary credits collateralized by the underlying shipments, such as:
 - Trade-related guarantees:
 - Shipperside bonds/airway bills
 - Letters of credit – confirmed
 - Sight letters of credit outstanding (net of margin deposit);
 - Usance letters of credit outstanding (net of margin deposit);
 - Deferred letters of credit (net of margin deposit);
 - Revolving letters of credit (net of margin deposit) arising from movements of goods and/or services; and
 - Commitments with an original maturity up to one (1) year.
- d. Ten (10) percent CCF - this shall apply to commitments that are unconditionally cancellable at any time by the bank without prior notice (i.e., Credit Card Lines), undrawn servicer cash advances or facility³ or that effectively provide for automatic cancellation due to deterioration in a borrower's creditworthiness.

¹ These OBS securitization exposures must meet the definition and minimum requirements under Sec. 125-Q.

² Applied to both issuing and confirming banks

³ Issued under Memorandum M-2014-044 dated 24 November 2014

This shall also apply to those not involving credit risk, as follows:

- Spot foreign exchange contracts (bought and sold);
- Late deposits / payments received;
- Inward bills for collection;
- Outward bills for collection;
- Travelers' checks unsold;
- Deficiency claims receivable; and
- Others.

B. Reporting and disclosure requirements

Starting 31 December 2014 and every quarter thereafter until 30 June 2018, banks/QBs concerned shall submit the Basel III Leverage Ratio reporting template on both solo and consolidated bases for monitoring purposes. The report shall use the prescribed forms and shall be submitted to the appropriate supervising department of the Bangko Sentral. The report submission is summarized below:

Report Date	Reference Date	Deadline of Submission
30 September 2017 31 December 2017	31 December 2017	Fifteen (15) banking/business days from end of reference date on solo basis and thirty (30) banking/business days from end of reference date on consolidated basis
31 March 2018	31 March 2018	
30 June 2018	30 June 2018	

Upon migration to a Pillar 1 minimum requirement effective on 01 July 2018, the Basel III Leverage Ratio report shall be submitted along with the Basel III CAR report¹.

The Basel III Leverage Ratio reporting template shall be composed of four (4) parts:

- Part I - Calculation of Basel III Leverage Ratio
- Part II - Derivative Exposures
- Part III - Securities and Financing Transactions
- Part IV - Off-Balance Sheet Items

In addition to the reporting template to be submitted to the Bangko Sentral, banks will be required to publicly disclose their Basel III leverage ratio on both solo and consolidated bases. The public disclosure requirements include:

- a summary comparison table that provides a banks' total accounting assets amounts and leverage ratio exposures;
- a common disclosure template that provides a breakdown of the main leverage ratio regulatory elements;
- a reconciliation requirement that details the source(s) of material differences between banks' total balance sheet assets in their financial statements and on-balance sheet exposures in the common disclosure template; and
- other disclosures (i.e., material period changes in the leverage ratio from the end of the previous reporting period to the end of the current reporting period).

The public disclosure requirements shall be made either through inclusion of the requirements in the bank's/QB's annual reports or published financial statements that are posted in the banks'/QBs' websites. An ongoing archive of all the reconciliation templates, disclosure templates and explanatory tables relating to prior periods must be made available by banks in their website. All disclosures must be made according to the defined templates.

At a minimum, three (3) items must be publicly disclosed in the quarterly published balance sheet: (i) the numerator (Tier 1 capital); (ii) the denominator (exposure measure); and (iii) the Basel III Leverage Ratio.

(Circular Nos. 943 dated 26 January 2017 and 881 dated 09 June 2015)

¹ Issued under Memorandum M-2014-044 dated 24 November 2014

EXAMPLES OF MINIMUM INTERNAL CONTROL MEASURES

[Appendix to Sec. 162-Q (Control activities), Sec. 152-S (Control activities), and Sec. 131-N (Control activities)]

1. Independent balancing

- a. Monthly reconciliation of general ledger balances against respective subsidiary and supporting records and documentation by someone other than the bookkeeper or the person handling the records, or the person directly connected with processing the transactions;
- b. Irregular and unannounced count of teller's/cashier's cash and checks and other cash items and vault cash including Automated Telling Machine's (ATM) cash dispensers by the auditor/control officer or by an officer not connected with cash department or its equivalent;
- c. Monthly reconciliation of due from banks, cash in bank accounts (domestic and foreign) and due from/to head office/ branches by someone other than the person handling the records or posting the general ledger entries;
- d. Periodic verification of securities and collaterals by someone other than their custodian; and
- e. Periodic verification of the accuracy of the interest credits to deposit liabilities accounts.

2. Physical handling of transactions

- a. A person handling cash shall not be permitted to post the ledger records nor should posting the general ledger be performed by an employee who posts the depositor's/investor's/creditor's subsidiary ledgers;
- b. A lending officer shall never be allowed to disburse proceeds of loans, accept payment on loans nor post loan ledgers;
- c. The functions of issuing, recording and signing of drafts/checks shall be separated;
- d. Checks and other cash items shall be maintained either by an employee not handling cash or by the Rack/Distributing Department provided that adequate control as to custody and disposition of funds are properly maintained;
- e. The receipt of statements from depository bank shall be assigned to an employee other than the one connected with the preparation, recording and signing of bank drafts or checks;
- f. Custodians of securities shall not be allowed to handle security transactions;
- g. Collateral appraisal shall be done by an employee/officer who does not approve loans;
- h. Incoming checks and other cash items shall be recorded chronologically in a register by an employee other than the bookkeeper before they are forwarded for posting purposes;
- i. Credit reports shall be obtained by someone other than lending officers;
- j. Mailing of customers' statements and delinquent notices shall be done by an employee other than the one who granted the loan or the one handling the records; and
- k. Dispatching and delivery of current account statements shall be done by someone who is not involved in current account operations.
- l. For QBs, paid checks/drafts should be controlled and maintained by an officer/ employee other than the authorized signatory or the cashier.

3. Joint custody

The following shall be under joint custody:

- a. Cash on hand or in vault and in ATM cash dispensers;
- b. All accountable forms;
- c. Collaterals;
- d. Securities;
- e. Documents of title and/or ownership of properties or fixed assets;

- f. Dormant or inactive deposit ledgers/ EDP print-outs and corresponding signature cards including on-line posting of dormant/ inactive accounts;
- g. Import documents;
- h. Trust receipts;
- i. Collection items;
- j. Duplicate keys, safe deposit spare locks and keys, and keys to unrented safe deposit boxes;
- k. Safekeeping items;
- l. Vault door and safe combinations;
- m. Unissued specimen signature books;
- n. Correspondent's and bank's own telegraphic and/or electronic fund transfer system or cable test keys currently in use;
- o. Test key fixed numbers unissued;
- p. Unissued and captured ATM cards and similar devices;
- q. Access locks and keys to on-line EDP terminals and similar devices; and
- r. Access locks and keys to EDP mainframes and peripherals.

4. Dual Control

The following accounts/transactions shall be under dual control:

- a. Checks, cashier's/ manager's checks, telegraphic transfers (TTs) and electronic fund transfer system (EFTS) – The signature of at least two (2) officers should be required in the issuance of cashier's/ manager's checks and payment orders (incoming and outgoing) of TTs and EFTS. The board of directors may, however, prescribe a predetermined amount by which one (1) senior officer can sign checks or payment orders, subject to appropriate control measures.
- b. Certificates of Time Deposit – The board of directors of a bank is given the discretion to determine the number of signatories for the issuance of certificates of time deposit (CTDs). The internal control measures for the issuance of CTDs include, at a minimum, the following activities:
 - (1) Joint custody of unissued CTD forms;
 - (2) Accounting for all issued/ cancelled CTDs;
 - (3) Signature requirement for the issuance of CTDs;
 - (4) Counterchecking of issued CTDs against the tellers' proof sheets/validated slips; and
 - (5) Recording of CTDs transactions.
- c. Bank Drafts – The signature of two (2) authorized officers should be required in the issuance of bank draft.
- d. Borrowings – The signature of the least two (2) authorized officers should be required.
- e. All transactions giving rise to Due to or Due from accounts and all instruments of remittances evidencing these transactions particularly those involving substantial amounts should be approved by two (2) authorized officers.

5. Number Control

The following are the forms, instruments and accounts that shall be number-controlled:

- a. Bank drafts;
- b. Checks, manager's and cashier's checks;
- c. Promissory notes and other commercial papers;
- d. Savings deposit accounts;
- e. Demand deposit accounts;
- f. CTDs;
- g. Letters of credit;
- h. Collection items;
- i. Official and provisional receipts;
- j. Certificates of stocks;
- k. Loan accounts;
- l. Expense vouchers;
- m. Payment orders (incoming and outgoing) of TTs and EFTS;
- n. Transfer requests through EFT involving bank's accounts abroad;
- o. EDP batch transmittal slips of documents; and
- p. Due to/from head office/branches tickets.

6. Confirmation of accounts

At least once a year, the internal auditing staff shall confirm by direct verification with bank clients, the following:

- a. Balances of loans and credit accommodations of borrowers;
- b. Deposit account balances particularly new deposit accounts, inactive or dormant accounts and closed accounts;
- c. Outstanding balances of borrowings and other liabilities; and
- d. Outstanding balances of receivables/ payables.
- e. For QBs, collaterals securing said accounts.

7. Internal control procedures for dormant/inactive accounts

- a. Definition of dormant or inactive accounts
 - (1) Current or checking accounts showing no activity (deposit or withdrawals) for a period of one (1) year.
 - (2) Savings account showing no activity (deposit or withdrawals) for a period of two (2) years.
- b. Procedures for classification. Banks shall review and segregate dormant accounts as herein defined at least once in every semester.
- c. Internal control measures
 - (1) As a matter of policy, banks shall exert all efforts to prevent checking and savings accounts from becoming dormant. When it becomes apparent that an account is inactive, a short letter should be sent to the depositor encouraging him to use his account. In case of checking accounts, the banks shall ensure that the monthly statement of accounts reach the depositors. If the depositors cannot be located, the following steps should be undertaken:
 - (a) Check any significant changes or fluctuations in the depositors' account balances over a period of time with emphasis on accounts with decreasing balances;
 - (b) Verify apparent reactivation entries, represented either by deposit or withdrawal, that appears to have prevented the account from being classified as dormant; and
 - (c) Investigate any obvious alteration of the ledger records.
 - (2) Entries to dormant account ledgers shall be verified and approved by a designated officer. His initials shall be placed next to the entry on the ledger sheet.
 - (3) Dormant accounts shall be segregated from active account ledgers with a separate subsidiary ledger. Segregated dormant accounts shall be placed under joint custody of two (2) responsible officers/ employees.
 - (4) Signature cards for dormant accounts shall be removed from active files and held under joint custody.
 - (5) All inquiries on dormant accounts shall be coursed to one officer who should obtain sufficient identification from the inquirer to assure that he is entitled to the information.
 - (6) A trial balance of dormant account ledgers shall be taken periodically and balances with the general control account by an employee other than the bookkeeper.
 - (7) Dormant or inactive accounts shall be verified directly with depositors.
 - (8) All transactions affecting dormant accounts shall be subject to audit by the internal auditor.
 - (9) A semestral report on deposit accounts transferred to dormant shall be rendered to bank management.

8. Other Internal Control Measures

- a. Deposit accounts
 - (1) All new current accounts shall be approved by a designated officer.
 - (2) Signature cards and deposit ledger sheets shall be authenticated by some form of validation. Subsequent changes shall also be validated.

- (3) Signature cards and deposit ledger sheets shall be accessible only to authorized persons.
 - (4) Deposit tickets shall be occasionally examined at irregular intervals to determine that postings are made on the actual date deposits are received.
 - (5) Checks shall be cancelled as soon as they have been paid and posted.
 - (6) Reports on closed accounts and returned checks shall be prepared daily.
 - (7) All current account statements shall be mailed or sent electronically via electronic mail (e-mail), or such other electronic means direct to depositors: Provided, That banks using the electronic means of sending the current account statements shall have prior Bangko Sentral- approved internet banking service and shall strictly observe the required retention of electronic data messages or electronic documents under Section 13 of R.A. No. 8792, otherwise known as the "Electronic Commerce Act". Undelivered statements shall be retained by an organizational unit not responsible for demand deposit account processing.
 - (8) An officer shall be designated to attend to customers who report differences on their statements.
 - (9) Checkbooks shall be issued only against requisition forms signed by an authorized signatory to the account.
 - (10) Banks shall adopt a system to establish the identity of their depositors.
- b. For QBs: Investments
- (1) Investment limits and a list of accredited companies as approved by the Board of Directors or by its Credit Committee should be established as a guide for investing in any FI engaged in money market trading.
 - (2) Investments should be secured by assets approved by the Board of Directors or by its Credit Committee.
 - (3) Checks representing placements of investments should be released only upon receipt of either the deposit substitute instrument or the underlying securities or documents of title.
- c. Miscellaneous
- (1) Loan applications and related documents shall be verified to ensure their authenticity particularly the name, residence, employment and current reputation of the borrowers.
 - (2) Tellers/cashiers paying checks to strangers shall obtain positive identification of the person and the account on which the checks are drawn should be verified.
 - (3) No employee shall be permitted to process transaction affecting his own account.
 - (4) Tellers/cashiers and other employees having contact with customers shall be prohibited from preparing deposit ticket, withdrawal slip or other forms for the customer.
 - (5) All banks shall have a sound recruitment policy.
 - (6) In the case of TBs, all accountable officers and employees shall be bonded.
 - (7) All QBs shall secure adequate insurance coverages, fidelity and other indemnity protection.

(Circular Nos. 903 dated 29 February 2016 and 871 dated 05 March 2015)

REGULATORY RELIEF FOR NBQBs AFFECTED BY CALAMITIES

[Footnote to Sec. 172-Q (Sanctions in case of willful delay in the submission of reports/refusal to permit examination), Sec. 303-Q (Past Due Accounts and Non-Performing Loans), and Sec. 215-Q (4257Q)]

The Monetary Board approved the grant of temporary regulatory relief to banks with head offices and/or branches located in the areas listed in Item "I" of Annex A hereof which were devastated by calamities.

The temporary relief shall be in the form of the following whenever applicable:

For TBs/ RBs/Coop Banks/NBQBs

- a. During a temporary grace period for payment or upon their restructuring and subject to reporting to Bangko Sentral, exclusion of the loans of borrowers in affected areas, which should have been reclassified as past due under Sec. 303-Q (*Past Due Accounts and Non-Performing Loans*) on the dates specified in Item "II" of Annex A and those maturing up to the dates indicated in Item "II" of Annex A, from computation of past due loan ratio: *Provided*, That Bangko Sentral documentary requirements for restructuring of loans for this purpose are waived and: *Provided, further*, That bank will adopt appropriate and prudent operational controls;
- b. Reduction of the five percent (5%) general loan loss provision to one percent (1%) for restructured loans of borrowers in affected areas within the inclusive dates specified in Item "II" of Annex A;
- c. Non-imposition of penalties on legal reserve deficiencies of RBs/TBs/Coop Banks/NBQBs with head offices and/or branches in the affected areas incurred within the inclusive dates specified in Item "II" of Annex A: *Provided*, That these reserve deficiencies can be shown to be calamity related as certified by the bank, rather than due to pre-existing condition;
- d. For all types of credits extended to individuals and businesses directly affected by the calamity, allowing, subject to Bangko Sentral prior approval, the booking of allowances for probable losses on a staggered basis over a maximum period of five (5) years on loans outstanding as of dates specified in Item "II" of Annex A;
- e. Non-imposition of monetary penalties for delays in the submission of all supervisory reports due to be submitted within the inclusive dates specified in Item "II" of Annex A;¹
- f. Allowing banks to provide financial assistance to their officers and employees who were affected by the calamity even if not within the scope of the existing Bangko Sentral- approved Fringe Benefit Program (FBP) subject to subsequent submission of request for approval of the amendment to FBP to the appropriate supervision and examination department for regularization²;
- g. In the case of El Niño (2016), Moratorium without penalty on monthly payments due to the Bangko Sentral, for a period of one (1) year from declaration date of a state of calamity, for banks with ongoing rehabilitation; and

For All Rediscounting Banks

- a. Upon application, granting of a 60-day grace period to settle the outstanding rediscounting obligations as of the dates specified in Item "II" of Annex A, with the Bangko Sentral of all rediscounting banks with head office, or with branches or with end-user borrowers in the affected areas except those with serious violations or findings with the appropriate supervising department of the Bangko Sentral;³ and
- b. In addition to above, allow the rediscounting banks to restructure with the Bangko Sentral, on a case-to-case basis the outstanding rediscounted loans of their end-user borrowers affected by the calamity, subject to the terms and conditions stated in the implementing guidelines provided in Item "III" of Annex A.

(M-2014-039 dated 01 October 2014, as amended by Circular Nos. 974 dated 29 September 2017, 945 dated 06 February 2017, M-2017-002 dated 18 January 2017, Circular No. 917 dated 08 July 2016, M-2016-006 dated 17 May 2016, M-2015-039 dated 04 November 2015, M- 2015-009 dated 28 January 2015 and M- 2015-005 dated 20 January 2015)

¹ Not applicable to El Niño (2016)

² Item "f" also covers UBs/KBs affected by Luis, Mario, Ruby, Seniag and Lando.

³ Not applicable to El Niño (2016)

**LIST OF AREAS COVERED BY THE REGULATORY RELIEF; INCLUSIVE DATES OF
COVERAGE; AND IMPLEMENTING GUIDELINES ON THE RESTRUCTURING SCHEME**
*[Footnote to Sec. 172-Q (Sanctions in case of willful delay in the submission of reports/refusal to permit
examination), and Sec. 303-Q (Past Due Accounts and Non-Performing Loans), and Sec. 215-Q (Reserve
deficiencies; sanctions)]*

I. Areas that were Declared under State of Calamity:

LUIS AND MARIO

- a. National Capital Region (NCR): Caloocan City, Las Pinas City, Malabon City, Mandaluyong City, Manila, Marikina City, Pasay City, Pasig City, Quezon City, San Juan City, Valenzuela City, Makati City, Muntinlupa City, Navotas City and Taguig City
- b. Region I: Ilocos Norte, Ilocos Sur, La Union and Pangasinan
- c. Region II: Cagayan, Isabela and Nueva Vizcaya
- d. Region III: Aurora, Bulacan, Nueva Ecija, Pampanga, Tarlac, Zambales and Bataan
- e. Region IV-A: Batangas, Cavite, Laguna and Rizal
- f. Region IV-B: Occidental Mindoro
- g. Region V: Camarines Norte and Camarines Sur
- h. Region VI: Negros Occidental
- i. Region VII: Cebu
- j. Cordillera Administrative Region (CAR): Abra, Benguet, Apayao, Kalinga, Mt. Province and Ifugao

RUBY

- a. NCR: Caloocan City, Las Pinas City, Malabon City, Mandaluyong City, City of Manila, Marikina City, Muntinlupa City, Navotas City, Paranaque City, Pasay City, Pasig City, Quezon City, Taguig City and Valenzuela City
- b. Region III: Bataan
- c. Region IV-A: Batangas, Cavite, Laguna, Quezon and Rizal
- d. Region IV-B: Marinduque, Occidental Mindoro, Oriental Mindoro, Palawan and Romblon
- e. Region V: Albay, Camarines Norte, Camarines Sur, Catanduanes, Masbate and Sorsogon
- f. Region VI: Aklan, Antique, Capiz, Guimaras, Iloilo and Negros Occidental
- g. Region VII: Bohol, Cebu, Negros Oriental and Siquijor

III. Implementing Guidelines on the Restructuring Scheme Covering the Rediscounting Obligations with the Bangko Sentral of Rediscounting Banks in the Areas Affected by Natural Calamities

1. Objectives

The objectives of the loan settlement scheme are, as follows:

- 1.1. To support the recovery efforts of rediscounting banks in the areas affected by the calamity;
- 1.2. To enable the rediscounting banks to liquidate their loan obligations with the Bangko Sentral by way of restructuring; and
- 1.3. To ensure the collection of the rediscounted loans which may become past due in view of the damage caused by the calamity, and maintain if not improve the quality of the loan portfolio of the Bangko Sentral.

2. Qualified Banks

- 2.1. All rediscounting banks with end- user borrowers located in affected areas which have been declared as “under state of calamity” by the proper authorities, i.e., the President of the Philippines or the local sanggunian, upon the recommendation of the National Risk Reduction and Management Council or Region/Local Disaster Risk Reduction and Management Council.
- 2.2. Rediscounting banks with serious violations or findings with the appropriate supervising department of the Bangko Sentral, and/or which are currently under investigation or subject to legal action by the Office of Special Investigation shall not be qualified to avail of the restructuring scheme.
- 2.3. In addition to Item No. “2.2”, the Department of Loans and Credit (DLC) shall evaluate each bank to determine if each would qualify for the restructuring.

3. Terms and Conditions

3.1. **Maturity**

The restructured loan shall have a maximum term of five (5) years;

3.2. **Amount to be restructured**

The amount to be restructured shall be equivalent to the following:

- *Principal.* Unpaid outstanding balance of the principal obligation in the books of account of the Bangko Sentral.
- *Accrued interest.* Unpaid interest due on the outstanding principal obligation as of the end of the applicable repayment or amortization date, preceding the approval of the loan restructuring.

3.3. **Interest rate**

The interest rate to be charged against the outstanding principal balance of the restructured loan shall be based on prevailing rediscount rate. The interest shall be re-priced annually.

3.4. **Maximum bank lending rate**

The restructured interest rate of the bank to its end-user borrowers shall not exceed six percent (6.0%) over and above the applicable interest rate of the Bangko Sentral. Moreover, the bank shall not charge interest on accrued interest.

3.5. **Terms of repayment**

- 3.5.1. **Settlement Value.** The settlement value shall be paid by the bank in equal monthly amortizations: *Provided, That the amortization period shall not exceed five (5) years, to wit:*

- *Principal.* The principal obligation shall be paid in equal monthly amortization plus the applicable re discount rate; and
- *Accrued interest.* The accrued interest on the principal obligation as of the end of the month immediately preceding the approval of the loan settlement scheme shall likewise be paid in equal monthly amortizations. No interest shall be charged on the accrued interest.

3..5.2. **Grace Period.** The bank may be given a grace period of six (6) months within which to pay the first amortization if request for such is specified by the bank in the application for restricting.

3.6. Collaterals.

The following shall be acceptable collaterals

- Deed of Assignment on restructured promissory notes of end-user borrowers;
- Deed of Real Estate Mortgage on bank premises;
- Deed of pledge on government securities; and
- Other collaterals acceptable to the Bangko Sentral

3.7. Required documents.

Qualified banks shall submit the following documents:

- 1.1. Letter of Understanding (LOU), agreeing to the terms and conditions of the restructuring. The LOU shall be executed by the senior officers of the bank, duly designated by its Board of Directors
- 1.2. Surety Agreement executed by the controlling interest (single stockholder, natural or juridical owing more than fifty percent (50.0%) of the voting stocks) obligating himself/herself jointly and severally with the bank to pay monthly amortization, if there is collateral deficiency.

3.8. Default cause

- Failure to pay two (2) or more amortizations shall be considered an event of default and shall render the unpaid balance of the loan, plus accrued interest and penalty charges due thereon, immediately due and demandable;
- A penalty charge of twelve percent (12.0%) per annum shall be assessed on the defaulted amortization payment, reckoned from the amortization due date to date of payment.

The DLC may exercise the option to refer to the Office of Special Investigation or to an external lawyer for appropriate legal action, without further need for demand or notice to the defaulting bank.

4. Application procedures

4.1. Filing of application

The bank shall file with the DLC an application for restructuring of its outstanding rediscounting loans, supported by the following documents:

- Resolution of the Board of Directors a) authorizing the bank to enter into a loan settlement arrangement with the Bangko Sentral, and b) designating authorized senior officers thereof.
- The restructured Promissory Notes of the end-user borrowers and other supporting documents.
- Promissory Note with Trust Receipt Agreement and Deed of Assignment executed by the authorized senior officers of the bank, duly notarized.
- Collaterals under Item 3.6 of the Implementing Guidelines.

4.2. Notice of Approval of Application

The DLC shall notify the bank/QB of the approval of its application to avail of the loan settlement scheme. Upon receipt of said advice, the bank shall:

- Execute the applicable document under Item No. “4.1” of the implementing Guidelines
- Pay the required amortization immediately on the month following the date of approval of the loan restructuring scheme or after the grace period, as applicable, and monthly thereafter until fully paid.

5. Authorized Signatories of the Bangko Sentral

Transaction	Authorized Bangko Sentral Officer
Approval of the application to avail of the loan restructuring scheme	Director, DLC, or in his/ her absence, any of the DLC Deputy Directors
Approval to release the collateral documents	Director, DLC, or in his/ her absence, any of the DLC Deputy Directors
Execution of Cancellation of Deeds of Real Estate Mortgage Assignment or Pledge	Deputy Governor, Monetary and Economics Sector

6. Other Provisions

6.1. Value-Date of the Settlement Scheme

The value-date of the settlement value shall be the end of the month immediately preceding the date of approval of the loan restructuring.

6.2. Effectivity date

The loan restricting scheme shall be made available for a period of six (6) months reckoned from date of receipt of the appropriate supervising department of the Bangko Sentral of the letter-notification from the bank stating the letter's intention to avail of the relief package.

(Cir. 1017 dated 10 October 2018, M-2014-039 dated 01 October 2014, as amended by Circular Nos. 974 dated 29 September 2017, 945 dated 06 February 2017, M-2017-002 dated 20 January 2017, Circular No. 917 dated 08 July 2016, M-2016-006 dated 17 May 2016, M-2015-039 dated 04 November 2015, M-2015-009 dated 28 January 2015 and M-2015-005 dated 20 January 2015)

FORMAT CERTIFICATION ON COMPLIANCE WITH REQUIREMENTS ON DIVIDEND DECLARATION
[(Appendix to Sec. 123-Q (Reporting and verification))]

Name of QB
CERTIFICATION

We, (Name of Officer), President (or Officer of Equivalent Rank) and (Name of Officer), Chief Compliance Officer, in behalf of (Name of QB), with office address at (Head/Principal Office), after having been duly sworn to in accordance with law, hereby certify that the QB's dividend declaration as of (date of dividend declaration), as approved by the board of directors (state resolution number and date), to the bank's stockholders of record as of (record date) amounting to (amount of cash/stock/property dividend declaration) complies with the provisions of Sec. 123-Q.

We further certify that at the time of dividend declaration, the quasi-bank has complied with the following:

- a. Clearing account with the Bangko Sentral is not overdrawn;
- b. Liquidity floor requirement for government funds; *(for banks)*
- c. Minimum capitalization requirement and risk-based capital ratios as provided under applicable and existing capital adequacy framework;¹
- d. The combined requirement for capital conservation buffer and the countercyclical capital buffer, as defined in *Appendix Q-45; (for UBs/KBs grid their subsidiary banks and QBs)* Higher loss absorbency requirement as provided under Sec. 126-Q; *(for identified Domestic Systematically Important Banks and their subsidiary banks and QBs)*;
- e. Has not committed any unsafe or unsound banking practice and/or major acts or omissions as may be determined by the Bangko Sentral;
- f. Has accumulated reserves of P _____ for the retirement of the government preferred stock which is at least equal to the amount prescribed in Subsec. 3136.2 *(for rural and cooperative banks)*;
- g. Has complied with the provisions of Article 86 of R.A. No. 9520, its By-Laws and other applicable laws, rules and regulations on the allocation and distribution of net surplus *(for cooperative banks)*;
- h. Has complied with the provisions of Section 43 (Power to declare dividends) of The Corporation Code of the Philippines (Batas Pambansa Blg. 68), as may be applicable; and
- i. Has complied with the provisions of revised implementing rules and regulations to R.A. No. 7656, 'An Act Requiring Government-Owned and/or Controlled Corporations to Declare Dividends Under Certain Conditions to the National Government, and for Other Purposes' *(for Government-Owned QBs)*.

To the best of our knowledge, the foregoing statements are true and correct.

**REPORTING GUIDELINES AND INSTRUCTIONS ON
REPORTORIAL TEMPLATE ON REPURCHASE AGREEMENTS (REPOS)
[Appendix to Sec. 172-Q (Report on Repurchase Agreements)]**

I. Rationale

The creation and design of this Prudential Reporting Template on Repurchase agreements (Repos) aims to strengthen financial surveillance, particularly in monitoring market trends and vulnerabilities in repo markets, to enable supervisory authorities to formulate effective policy responses to ensure continued functioning and efficiency of the financial system. This prudential reporting template only covers borrowings in the form of repo transactions and excludes Reverse Repurchase Agreements.

II. Definition of Repurchase Agreements for Banks

A repurchase agreement is a contract wherein a QB, in exchange for cash (repo seller/cash borrower), sells the security to another party (repo buyer/cash lender) under a true sale agreement with a simultaneous commitment to repurchase the security at a fixed price at a date certain or on-demand.

Repo sellers/cash borrowers record repos as *"Bills Payable-Repo"*, while repo buyers/cash lenders record repos as *"Loans and Receivables Arising from Repurchase, Certificates of Assignment/Participation with Recourse and Securities Lending and Borrowing Transactions – Matrix of Counterparty and Issuer of Collateral Securities"*.

III. Description, Structure and Purpose of Data Elements

A. Data elements, vulnerability points, and risk detection

The reportorial template is designed to capture timely and comprehensive transactional-level data on repos of QBs in order to gauge systemic and firm-level risk.

The template consists of three (3) schedules, namely:

1. End of Day Balance

The 'End of Day Balance' schedule provides a snapshot of daily repo transactions. It shows the daily movement of repos as well as the fair value of the securities used in the repo transactions. This schedule aims to obtain an aggregated view of repo turnover as well as gearing/leverage on a daily basis.

2. Month-End Balance

The 'Month-End Balance' schedule shows details of outstanding repos as of the end of the month. The information required for outstanding repos include details on the economic terms of the repo transaction, counterparties, and underlying securities.

Transactional details

Transactional details of repos, such as the *outstanding balance*, *repo rate* and *remaining maturity*, are essential to ascertaining the funding/maturity profile of repos of the industry and its exposure to rollover/liquidity and interest rate risk from such funding source. Currency composition of both cash and security components, meanwhile, indicate industry-wide exposure to FX risk related to repos.

Counterparty details

These consist of information on a QB's counterparty (repo buyer/cash lender) and its sectoral profile. These aid in determining credit, cross-border and concentration risk of the financial system when aggregated.

Counterparty information enables the assessment of interconnectedness and the manner by which vulnerabilities in a QB can be transmitted to other QBs or firms.

Security details

The report requires QBs to disclose the *type, quality and fair value of a repo's underlying security*. Said information are indicators of the potential variation in the value of the "repoed" security and concentration in holding of the underlying repo security which may impact on market liquidity of the security. For purposes of determining fair value of securities, banks shall be guided by the Bangko Sentral prescribed marking-to-market guidelines for securities under *Appendix Q-23*.

3. Repo Transactions for the Month

The '*Repo transactions for the Month*' schedule provides information on repo deals that are availed and which subsequently mature or are pre-terminated within the reporting month. The information required to be disclosed on these repo deals include details on the economic terms of the repo transaction, counterparties and underlying securities.

QBs that have no repo deals with their entire repo term (avallment up to maturity/pre-termination) falling within the reporting month need not accomplish this schedule.

B. Data components

1. Components of End of Day Balance Schedule

The following data fields are provided with the following descriptions:

Category	Standardized Data Fields	
	Date Fields	Description
Transaction Details	Date	Refers to a calendar day (yyyy-mm-dd)
	No. of Repo Deals for the Day	
Economic terms of the repo transaction	Availments	Refers to the number of repo deals availed during the day. Repo availments shall include renewals and rollovers.
	Matured/Pre-terminated	Refer to the number of repo deals matured/pre-terminated during the day.
	Amount	
	Bills Payable Repo	
	Beginning Balance	Refers to the ending balance of Bills Payable-Repo of the previous day.
	Avallment for the Day	Refers to the total amount of repo transactions availed during the day.
	Matured/Pre-terminated for the Day	Refers to the total amount of repo transactions which matured or were pre-terminated during the day.
	Other Adjustments/Transactions	Refers to adjustments/transactions affecting repos, other than those pertaining to availments, maturing and pre-terminations. Examples of other adjustments/transactions affecting repos include, but need not be limited to corrections on balances/amortization.
	End of Day Balance	Refers to the ending balance of the Bills Payable -Repo account for the day.
	Fair Value of Security Subject of the Repo	
	Debt Securities	Refers to the mark-to-market (MTM) value of the security, if these are in the form of debt securities, as of the end of the day.

	Equity Securities	Refers to the MTM value of the security, if these are in the form of equity securities, as of the end of the day.
	Total	Refers to the total MTM of securities subject of the repo.

2. Components of Month-End Balance Schedule

Category	Standardized Data Fields	
	Date Fields	Description
Transaction Details	Entry Number	Refers to the unique number that identifies an entry.
Economic terms of the repo transaction	Deal Date	Refers to the date (yyyy-mm-dd) when a repo transaction is availed.
	Maturity Date	Refers to the date (yyyy-mm-dd) when a repo transaction matures. For repos that are on demand, QBs shall indicate "on-demand".
	Market Segment	Refers to the market segment of the repo which can either be: bilateral, tri-party or Central Clearing Counterparty (CCP). CCP refers to repos that are transacted through an entity that interposes itself between counterparties to contracts traded in one(1) or more financial markets, becoming the buyer to every seller and the seller to every buyer and thereby ensuring the performance of open contracts. Bilateral refers to repurchase agreements between two (2) institutions. Tri-party refers to the repurchase agreements between two institutions where securities serving as collateral are held by a third party that provides collateral management and settlement services. ¹
	Financial Market Infrastructures ² such as 1. Tri-party 2. CCP 3. Trade Exchange	Refers to the name of the institution that provides tri-party, CCP or trade exchange services, if applicable.
	Purpose	Refers to the purpose/reason of the financial institution for entering into a repo transaction. This can be, but need not be, limited to any of the following: cash funding requirement securities requirement for market-making hedging collateral transformation business contingency testing others.
	Term	Refers to the length of the contract. (auto-generated by the reporting system)

¹ Source: Committee on Payment and Settlement Systems (CPSS), Principles for Financial Market Infrastructures, April 2012; and Federal Reserve Bank of New York, Paper on Repo and Securities lending, February 2013

² A multilateral system among participating institutions, including the operator of the system, used for the purposes of clearing, settling, or recording payments, securities, derivatives, or other financial transactions. (Source: Ibid.)

	Repo Rate	Refers to the cost incurred by the QB (expressed as a % per annum rate) for borrowing cash, classified either as (1) fixed or (2) floating rate. Note: If the repo rate is floating, report the applicable floating rate as of reporting date.
	Margin	Refers to the amount of margin set aside by the repo seller/cash borrower in accordance with margin parameters agreed by both parties in the repo agreement (expressed in PhP) classified either as (1) cash or (2) security (fair value of the security) as of reporting date.
	Contractual Currency	Refers to the original currency of the repos.
	Booking Details	Refers to RBU, E/FCDU or Foreign Office.
	Bills Payable under Repurchase Agreement	Refers to the amortized cost of repo borrowings in both original currency and peso equivalent, in the case of foreign currency denominated repos ¹ , as of reporting date.
Counterparty Details Data on the individuals or institutional unit to which the entity is exposed.	Resident/Non-resident/Multilateral	A <i>resident</i> refers to an individual or institutional unit that has a center of economic interest in the economic territory of the Philippines. A <i>non-resident</i> refers to an individual or institutional unit that has a center of economic interest outside the economic territory of the Philippines. A <i>multilateral agency</i> refers to an international organization defined in the FRP for banks.
	Geographic Region	Refers to the geographic region of the counterparty. This shall consist of: 1. Northern America 2. Latin America 3. Europe 4. Asia 5. Others
	Country	Refers to the country of the counterparty.
	Sector (General)	Refers to the general sector of the following counterparties: 1. <i>Resident counterparty</i> such as government, Bangko Sentral, banks, private corporations and individuals; 2. <i>Non-resident counterparty</i> such as central government, public sector, banks, private corporations and individuals; or 3. <i>Multilateral agency</i> refers to the World Bank Group comprised of the International Bank for Reconstruction and Development (IBRD) and the International Finance Corporation (IFC),

¹ Circular No. 494 Series of 2005. Peso equivalent shall be derived from the Philippine Dealing System (PDS) Peso/US Dollar closing rate or for third currencies the New York US Dollar/Third Currencies closing rates.

		<p>Asian Development Bank (ADB), African Development Bank (AfDB), the European</p> <p>Bank for Reconstruction and Development (EBRD), the Inter-American Development Bank (IADB), the European Investment Bank (EIB), the Nordic Investment Bank (NIB), the Caribbean Development Bank (CDB), the Council of Europe Development Bank (CEDB) and other entities that may be recognized by the Bangko Sentral as multilateral agencies.</p>
	Sector (Specific)	<p>This refers to the sub-classification of the following sectors of the counterparty:</p> <p><i>For residents Government sector</i></p> <ul style="list-style-type: none"> i. National government ii. LGUs iii. GOCCs <ul style="list-style-type: none"> a. Social Security Institutions b. Other financial institutions c. Financial corporations ii. Non-financial corporations <p><i>For Non-residents Banks</i></p> <ul style="list-style-type: none"> i. OBUs ii. Other banks
	Counterparty Name	Refers to the name of the QB's counterparty as stated in its Articles of Incorporation/Registration, in the case of juridical entities/sole proprietorship, as applicable.
Security Details Information about the security that is the subject of the repo transaction	Security Details	
	ISIN	Refers to the International Securities Identification Number (ISIN) of the security.
	Security Type	Refers to the type of security subject of the repo transaction (i.e., debt securities or equity securities).
	Listing Details	<p>Refers to whether the security is listed on a registered exchange or not.</p> <p>Note: Answerable by YES or NO</p>
	Maturity date	Refers to the maturity date of the security, in the case of debt securities. (yyyy-mm-dd)
	Accounting classification of the securities	<p>Refers to the accounting classification of the underlying securities as booked by the QB. Financial assets are classified according to the following categories:</p> <ul style="list-style-type: none"> 1. HFT, 2. HTM, 3. AFS, 4. INMES, and 5. UDSCL.
	Currency denomination	Refers to the original currency of the security.

	Face Value (Debt security)	Refers to the face value of the security, in the case of debt securities.
	Number of Shares (Equity security)	Refers to the number of shares, in the case of equity securities.
	Total Fair Value	Refers to the MTM value of the security in both original currency and peso equivalent, in the case of foreign Currency denominated repos, as of reporting date.
	Net Carrying Amount	Refers to the net carrying amount of the security recorded as HTM, UDSCL and INMES, which corresponds to the amortized cost of securities less any allowance for specific credit losses, in both original currency and peso equivalent, as of reporting date.
	Security Issuer Details	
	Resident/Non-resident Multilateral	<p>A <i>resident</i> refers to an individual or institutional unit that has a center of economic interest in the economic territory of the Philippines;</p> <p>A <i>non-resident</i> refers to an individual or institutional unit that has a center of economic interest outside the economic territory of the Philippines; and</p> <p>A <i>multilateral agency</i> refers to an international organization as defined in the FRP for banks.</p>
	Geographic Region	<p>Refers to the geographic region of the issuer. This shall consist of:</p> <ol style="list-style-type: none"> 1. Northern America 2. Latin America 3. Europe 4. Asia 5. Others
	Country	Refers to the country of the issuer.
	Sector (General)	<p>Refers to the general sector of the following issuers:</p> <ol style="list-style-type: none"> 1. <i>Resident counterparty</i> such as government, Bangko Sentral, banks, and private corporations. 2. <i>Non-resident counterparty</i> such as central government, public sector, banks, and private corporations. 3. <i>Multilateral agency</i> refers to the World Bank Group comprised of the IBRD and IFC, ADB, AfDB, EBRD, IADB, EIB, NIB; CDB, CEDB and other entities that may be recognized by the Bangko Sentral as multilateral agencies.
	Sector (Specific)	<p>This refers to the sub-classification of the following sectors of the issuer:</p> <p><i>For Residents Government sector</i></p> <ol style="list-style-type: none"> i. National government ii. LGUs iii. GOCCs <ol style="list-style-type: none"> a. Social security Institutions

		b. Other financial institutions c. Non-financial institutions <i>Banks</i> i. UBs/KBs ii. Other banks <i>Private corporations</i> i. Financial corporations ii. Non-financial corporations <i>For Non-residents Banks</i> i. OBUs ii. Other banks
Issuer Details	Issuer Name	Refers to the name of the issuer of the security as stated in its Articles of Incorporation/Registration

4. Components of the Repo Transactions for the Month Schedule

Category	Standardized Data Fields	
	Data Fields	Description
Transaction Details	Entry number	Refers to the unique number that identifies an entry.
	Deal Date	Refers to the date (yyyy-mm-dd) when a repo transaction is availed.
	Maturity Date	Refers to the date (yyyy-mm-dd) when a repo transaction matures. For repos that are on demand, QBs shall indicate "on-demand"
	Market Segment	Refers to the market segment of the repo which can either be: bilateral, tri-party or CCP. CCP refers to repos that are transacted through an entity that interposes itself between counterparties to contracts traded in one (1) or more financial markets, becoming the buyer to every seller and the seller to every buyer and thereby ensuring the performance of open contracts. Bilateral refers to repurchase agreements between two (2) institutions. Tri-party refers to repurchase agreements between two (2) institutions where securities serving as collateral are held by a third party that provides collateral management and settlement services ¹
	Financial Market Infrastructure ² such as 1. Tri-Party 2. CCP 3. Trade Exchange	Refers to the name of the institution that provides tri-party, CCP or trade exchange services, if applicable

¹ Source: Committee on Payment and Settlement Systems (CPSS), Principles for Financial Market Infrastructures, April 2012; and Federal Reserve Bank of New York, Paper on Repo and Securities Lending, February 2013

² A multilateral system among participating institutions, including the operator of the system, used for the purposes of clearing, settling, or recording payments, securities, derivatives, or other financial transactions. (Source: Ibid.)

	Purpose	Refers to the purpose/reason of the financial institution for entering into a repo transaction. This can be but need not be limited to any of the following: <ol style="list-style-type: none"> 1. cash funding requirement 2. securities requirement for market-making 3. hedging 4. collateral transformation 5. business contingency testing 6. others
	Term	Refers to the length of the contract. (auto-generated by the reporting system)
	Repo Rate	Refers to the cost incurred by the QB (expressed as a % per annum rate) for borrowing cash, classified as (1) fixed or (2) floating rate Note: If the repo rate is floating, report the applicable floating rate as of avilment date.
	Margin	Refers to the amount of margin set aside by the repo seller/cash borrower in accordance with margin parameters agreed by both parties in the repo agreement (expressed in PhP) classified either as (1) cash or (2) security (fair value of the security) as of avilment date.
	Contractual Currency	Refers to the original currency of the repo
	Booking Details	Refers to RBU, E/FCDU or Foreign Office
	Bills Payable under Repurchase Agreement	Refers to the amortized cost of repo borrowings in both original currency and peso equivalent, in the case of foreign currency denominated repos ¹ as of <i>avilment date</i> .
Counterparty Details	Resident/Non-Resident/Multilateral	A <i>resident</i> refers to an individual or institutional unit that has a center of economic interest in the economic territory of the Philippines. A <i>non-resident</i> refers to an individual or institutional unit that has a center of economic interest outside the economic territory of the Philippines. A <i>Multilateral agency</i> refers to an international organization defined in the FRP for banks.
	Geographic Region	Refers to the geographic region of the counterparty. This shall consist of: <ol style="list-style-type: none"> 1. Northern America 2. Latin America 3. Europe 4. Asia

¹ Circular No. 494 Series of 2005. Peso equivalent shall be derived from the Philippine Dealing System (PDS) Peso/US Dollar closing rate or for third currencies the New York US Dollar/Third Currencies closing rates.

		5. Others
	Country	Refers to the country of the counterparty.
	Sector (General)	<p>Refers to the general sector of the following counterparties:</p> <ol style="list-style-type: none"> 1. <i>Resident counterparty</i> such as government, Bangko Sentral, banks, private corporations and individuals; 2. <i>Non-resident counterparty</i> such as central government, public sector, banks, private corporations and Individuals; or 3. <i>Multilateral agency</i> refers to the World Bank Group comprised of the IBRD and the IFC, ADB, AfDB, EBRD, IADB, EIB, NIB, CDB, CEDB and other entities that may be recognized by the Bangko Sentral as multilateral agencies.
	Sector (Specific)	<p>This refers to the sub-classification of the following sectors of the counterparty:</p> <p><i>For Residents Government Sector</i></p> <ol style="list-style-type: none"> i. National government ii. LGUs iii. GOCCs <ol style="list-style-type: none"> a. Social Security Institutions b. Other financial institutions c. Non-financial institutions <p><i>Banks</i></p> <ol style="list-style-type: none"> i. UBs/KBs ii. Other banks <p><i>Private Corporations</i></p> <ol style="list-style-type: none"> i. Financial corporations ii. Non-financial corporations <p><i>For Non-Residents Banks</i></p> <ol style="list-style-type: none"> i. OBUs ii. Other banks
	Counterparty Name	Refers to the name of the QB's counterparty as stated in its Articles of Incorporation/Registration, in the case of juridical entities/sole proprietorship, as applicable.
Security Details	Security Details	
Information about the security that is the subject of the repo transaction	ISIN	Refers to the ISIN of the security.
	Security Type	Refers to the type of security subject of the repo transaction (i.e., debt securities or equity securities).

	Listing Details	Refers to whether the security is listed on a registered exchange or not. Note: Answerable by YES or NO
	Maturity Date	Refers to the maturity date of the security, in the case of debt securities (yyyy-mm-dd).
	Accounting Classification of the Securities	Refers to the accounting classification of the underlying securities as booked by the QB. Financial assets are classified according to the following categories: 1. HFT 2. HTM 3. AFS 4. INMES 5. UDSCl
	Currency denomination	Refers to the original currency of the security.
	Face Value (Debt Security)	Refers to the face value of the security, in the case of equity securities.
	Number of Shares (Equity security)	Refers to the number of shares, in the case of equity securities.
	Total Fair Value	Refers to the MTM value of the security in both original currency and peso equivalent, in the case of foreign currency denominated repos, as of avallment date.
	Net Carrying Amount	Refers to the net carrying amount of the security recorded as HTM, UDSCl and INMES, which corresponds to the amortized cost of securities less any allowance for specific credit losses, in both original currency and peso equivalent, as of avallment date.
	Security Issuer Details	
	Resident/Non-resident/Multilateral	A <i>resident</i> refers to an individual or institutional unit that has a center of economic interest in the economic territory of the Philippines; A <i>non-resident</i> refers to an individual or institutional unit that has a center of economic interest outside the economic territory of the Philippines; and A <i>multilateral agency</i> refers to an international organization as defined in the FRP for banks.
	Geographic Region	Refers to the geographic region of the issuer. This shall consist of: 1. Northern America 2. Latin America 3. Europe 4. Asia

		5. Others
	Country	Refers to the country of the issuer
	Sector (General)	<p>Refers to the general sector of the following issuers:</p> <ol style="list-style-type: none"> 1. Resident counterparty such as government, Bangko Sentral, banks, and private corporations. 2. Non-resident counterparty such as central government, public sector, banks and private corporations. 3. Multilateral Agency refers to the World Bank Group comprised of the IBRD and IFC, ADB, AfDB, EBRD, IADB, EIB, NIB, CDB, CEDB and other entities that may be recognized by the Bangko Sentral as multilateral agencies.
	Sector (Specific)	<p>This refers to the sub-classification of the following sectors of the issuer:</p> <p><i>For Residents Government sector</i></p> <ol style="list-style-type: none"> i. National government ii. LGUs iii. GOCCs <ol style="list-style-type: none"> a. Social security Institutions b. Other financial institutions c. Non-financial institutions <p><i>Banks</i></p> <ol style="list-style-type: none"> i. UBs/KBs ii. Other banks <p><i>Private corporations</i></p> <ol style="list-style-type: none"> i. Financial corporations ii. Non-financial corporations <p><i>For Non-residents Banks</i></p> <ol style="list-style-type: none"> i. OBUs ii. Other banks
Issuer Details	Issuer Name	Refers to the name of the issuer of the security as stated in its Articles of Incorporation/Registration.
Pre-termination or Maturity Details	Status	Refers to either a pre-terminated or matured repo transaction.
Information for matured and pre-terminated transactions	Pre-termination Date/Maturity Date	Refers to the date of pre-termination or maturity of the repo transaction.

	Amount Pre-terminated/Matured (Original Currency)	Refers to the outstanding balance of the repo when the transaction was pre-terminated or matured. This is in original currency of the transaction.
	Amount Pre-terminated/Matured (Php Equivalent)	Refers to the outstanding balance of the repo when the transaction was pre-terminated or matured. This is in Php equivalent in the case of foreign currency denominated repos.
	Reason for Pre-termination	Refers to the reason why the transaction was pre-terminated.

Foreign currency-denominated accounts shall be reported, in their peso equivalent using the Philippine Dealing System (PDS) peso/US Dollar closing rate, or, for third currencies, the New York US Dollar/Third Currencies closing rate.

QBs without repo transactions shall submit the Reportorial Template on Repurchase Agreements (Repos) and the Control Prooflist certifying that there is nothing to report for the month.

IV. Effectivity

The Repo reporting template shall take effect as of the reporting period ending 30 June 2017.

(M-2017-020 dated 28 June 2017 and Circular No. 923 dated 31 August 2016)

GUIDELINES ON GRANTING OF LICENSE/AUTHORITY

(Appendix to Sec. 111-Q)

I. Guiding Principle

The Bangko Sentral, the licensing authority, has the power to set criteria and reject applications that do not comply with the criteria/standards set. In this light, the Bangko Sentral is providing the following guidelines on its licensing process to establish accountability and promote transparency to banks and BSFIs wishing to apply for any licenses/authorities within the jurisdiction of the Bangko Sentral. These guidelines also aim to provide more consistency in how risk-focused supervision is applied to licensing process.

The Bangko Sentral will not restrict the scope of risk-taking activities of BSFIs consequent of the licenses and/or authorities granted: *Provided*, That these licenses and/or authorities are in line with their business model and strategic direction: *Provided, further*, That BSFIs demonstrate the capacity and ability to implement these strategies.

As indicated in the new licensing policy, applications for licenses and/or authorities are categorized as follows:

- a. *Type "A"* – applications for licenses and/or authorities where compliance with the defined prudential requirements/criteria described in Sec. 111-Q (*Prudential Criteria*) is a pre-condition for applicants to be considered eligible;
- b. *Type "B"* – applications for licenses and/or authorities processed regardless of risk profile); and
- c. *Type "C"* -activities which no longer require submission of applications and processing but shall be subject to submission of reports/certification/notification within stated deadlines. However, compliance with pre-qualification requirements is subject to post verification and any false information and/or misrepresentation may be a basis for the imposition of appropriate enforcement actions described in Sec. 111-Q (*Enforcement Actions*).

II. Guidelines and procedures

1. *Process flow*. The licensing application process involves four (4) stages, to wit:

- a. *Stage 1. Eligibility test and assessment*. The Bangko Sentral shall consider an applicant's eligibility for licenses/authorities categorized as *Type "A"* in accordance with the standards and/or prudential criteria described in Sec. 111-Q (*Prudential Criteria*) ; and whether approval thereof is consistent with applicable laws, rules, regulations, policies and safety and soundness considerations.

In this regard, BSFIs shall signify to the appropriate supervising department of the Bangko Sentral its interest to apply for a license(s) or authority/ies. However, the Bangko Sentral expects each BSFI to have conducted self-assessment vis-à-vis prudential criteria and/or requirements to determine whether it is eligible and/or qualified to apply for any specific license/authority, prior to signifying its interest.

BSFIs with CAMELS composite rating of below "3", or under PCA or rehabilitation may still be considered eligible, on a case by case basis, upon showing valid justifications and/or verifiable evidence of significant compliance with the comprehensive PCA plan (PCAP)/rehabilitation plan approved by the Bangko Sentral and/or if licenses and/or authorities applied for are vital to the implementation of the PCAP/rehabilitation plan.

- b. *Stage 2. Application*. The BSFI upon receipt of notice and/or confirmation from the Bangko Sentral of its eligibility can now formally submit its application letter together with the documentary requirements, as applicable to the license/authority applied for. Applications with incomplete documentation will be returned without prejudice to re-submission of a complete application and collection of applicable fees.
- c. *Stage 3. Processing*. Upon receipt of a complete application, the appropriate supervising department of Bangko Sentral shall proceed in preparing the memorandum elevating to the appropriate approving authority of the Bangko Sentral its recommended action/s.
- d. *Stage 4. Decision*. Within five (5) working days upon approval and/or confirmation from the appropriate authority of the Bangko Sentral, BSFIs shall expect to be notified of the decision on their request /application.

The Bangko Sentral may request information and/or documents aside from the minimum documentary requirements for each type of license/authority to arrive at an informed decision. It may also conduct limited inspection or validation, when warranted.

The Bangko Sentral may approve any application of an eligible applicant after evaluating the application and considering relevant factors. Likewise, the Bangko Sentral may deny applications if (a) significant supervisory or compliance concerns exist or (b) the applicants fail to provide material information necessary to make an informed decision.

2. *Responsibility*

The Bangko Sentral expects each applicant to prepare accurately and completely each application/certification/reports submitted to the appropriate supervising department of the Bangko Sentral.

By virtue of the application, the applicant authorizes the Bangko Sentral to conduct an on-site evaluation or inspection for the purpose of ascertaining compliance with relevant laws, rules, regulations and/or directives, and/or applicant's risk management capabilities, when warranted.

For this purpose, the applicant shall include in its application letter the authorization in favor of the Bangko Sentral giving its consent to the conduct of on-site verification of the documents and/or representations stated in the application filed in connection with the license or authority applied for.

3. *Fees*

An applicant, depending on its classification and type of license/authority applied for, shall be assessed the following fees per application:

- i. *Processing fee* -shall be charged upon filing of an application and is non-refundable. In case of re submission of application that is returned for incomplete documentation, another processing fee shall be charged anew; and
- ii. *Licensing fee* -shall be charged to certain application upon approval. The licensing fee shall be net of the processing fee.

For banks, assessed fees shall be debited from the applicants' demand deposit account with the Bangko Sentral upon the lapse of fifteen (15) calendar days reckoned from receipt of Bangko Sentral's decision on its request/application. For this purpose, banks shall, upon filing of an application, state in its application letter the authority to debit their demand deposit account with the Bangko Sentral for the applicable fees to the license or authority applied for. Otherwise, assessed fees shall be paid to the Bangko Sentral.

4. *Post decision*

Unless otherwise prescribed by the Bangko Sentral, an applicant may file a new application for a denied and/or withdrawn application after the lapse of six (6) months reckoned from the date of denial/withdrawal: *Provided*, That any weaknesses, deficiencies and/or non-compliance with any laws, rules, regulations and/or directives that made the applicants ineligible have already been satisfactorily addressed.

(Circular No. 947 dated 15 February 2017)

DISCLOSURE REQUIREMENTS IN THE ANNUAL REPORT
(Appendix to Sec. 174-Q [Disclosure requirements in the annual report])

Introduction

This Appendix outlines the guidelines on the minimum disclosure requirements of the Bangko Sentral for the Annual Report of QBs. The guidelines shall take effect for financial year 2017.

Basic Disclosure Requirements

All QBs shall prepare an Annual Report which shall include a discussion and/or analysis of the following minimum information:

1. Corporate Policy

A brief discussion of the following information covering the first page of the Annual Report:

- a. Brief discussion of QB's vision and mission statements
- b. Introduction of the QB's brand that differentiates it from other QBs
- c. Business model of the QB

2. Financial Summary/Financial Highlights

A two (2)-year comparative presentation of selected profitability, capital, performance, and balance sheet data/ratios which will serve as a snapshot of the QB's financial condition to be presented after Item "1" above on Corporate Policy. The QB may use the template below:

Minimum Required Data	Consolidated ¹		Parent Entity (Solo)	
	Current Year	Previous Year	Current Year	Previous Year
Profitability				
Total Net Interest Income				
Total Non-Interest Income				
Total Non-Interest Expenses				
Pre-provision profit				
Allowance for credit losses

Staff				

¹ Consolidated amounts of Parent and Subsidiaries

For QBs with subsidiaries, the Financial Summary/Financial Highlights should be presented side by side on a solo basis (parent) and on a consolidated basis (parent and subsidiaries) as provided under Sec. 173-Q Financial Condition and Results of Operations.

3. Financial Condition and Results of Operation

A report from either the chairman or president/chief executive officer or officer of equivalent rank addressed to the stockholders and other stakeholders of the QB covering the following information:

- a. Review of QB's operations and result of operations for the financial year including details and explanations for any significant change during the year
- b. Highlight of major activities during the year that impact operations, if any
- c. Major strategic initiatives of the QB and its subsidiaries, as applicable
- d. Challenges, opportunities, and responses during the year, if any

4. Financial Results of Major Business Segments, as may be applicable

A summary report from each business segment highlighting the following minimum information:

- a. Summary of financial performance of the business segment for the year
- b. Contribution of business segment to the total revenue of the QB during the year
- c. Significant developments during the year including major activities
- d. Future plans/targets/objectives

5. Risk management framework adopted This section highlight the QB 's board-approved risk management framework and should include at a minimum the following information:

- a. Overall risk management culture and philosophy (discuss the general mission and goal of the QB's risk management practices and the corresponding risk management policy/principles adopted by the QB's board for the attainment of the said mission and goal)
- b. Risk appetite and strategy (describe the risk appetite of the QB and the factors considered in defining the said risk appetite; and discuss the significant risk areas/ exposures of the QB)
- c. Entity-wide risk governance structure and risk management process (define the roles and responsibilities and the reporting lines for the different business units that composed the risk management group/unit. For better appreciation, illustrate in a chart/ table form the risk management structure and organization of the relevant risk management function. Discuss also the scope and nature of risk reporting and/or measurement systems)
- d. AML governance and culture, and description of the overall Money Laundering (ML)/Terrorist Financing (TF) risk management framework to prevent the use of the QB for ML/TF activities

6. Corporate Governance

This section comprehensively discusses the entity's corporate governance framework and corporate culture adopted by the QB and its subsidiaries, as applicable. The following minimum information should be disclosed in this section:

- a. Overall corporate governance structure and practices (describe the overall governance framework adopted by the QB)
- b. Selection process for the board and senior management (describe the QB's process/procedure for identifying, assessing and selecting board and senior management candidates to ensure application of fit and proper standards)
- c. Board's overall responsibility (describe the general responsibility of the board in the approval and oversight of management's implementation of QBs strategic objectives, risk strategy, corporate governance and corporate values, among others)
- d. Description of the major role and contribution of the chairman of the board
- e. Board composition (include the names of the members of the board). For each member, include the following:
 - i. Type of directorship (executive, non-executive, or independent director);
 - ii. The principal stockholder represented if nominee;

- iii. The number of years served as director;
 - iv. Number of direct and indirect shares held; and
 - v. Percentage of shares held to total outstanding shares of the QB.
- f. Board qualification (provide details of the relevant qualifications and experiences of each member of the board of directors, including current directorship and officership in other companies, their age and nationality).
- g. List of board-level committees including membership and function.
- h. Directors' attendance at board and committee meetings (include the total number of board and committee meetings for the election year and the number of board and committee meetings attended by each director¹). A sample template is provided below.

Name of Directors	Board Number of Meetings		(Name of Board Committee) Number of Meetings		Name of Board Committee) Number of Meetings		Name of Board Committee) Number of Meetings		Name of Board Committee) Number of Meetings	
	Attended	%	Attended	%	Attended	%	Attended	%	Attended	%
1										
2										
3										
4										
5										
Total Number of Meetings Held During the Year										

- i. Changes in the board of directors (indicate the changes in the composition of the board of directors that happened during the period including the reason for said change, i.e., resignation, death, removal).
- j. List of executive officers/senior management (disclose the name, position, relevant qualifications/experience, age and nationality of the officer. Senior management refers to the president/CEO or officer of equivalent rank and other persons having authority and responsibility for planning, directing and controlling the activities of the QB).
- k. Performance Assessment Program (describe the process adopted by the QB in assessing the performance of the board and senior management based on established performance standards that are consistent with the QB's strategic objectives).
- l. Orientation and Education Program (disclose the in-house and external training program of the QB for its directors and senior management to ensure that they continuously possess the qualifications for the position).
- m. Retirement and Succession Policy (describe the retirement and succession policy of the QB including the retirement age for the board and senior management; and the term limit for the members of the board).
- n. Remuneration policy
 - i. Remuneration Policy and Structure for executive and non-executive directors (disclose the QB's remuneration policy and the structure of its remuneration package for the board).
 - ii. Remuneration Policy for senior management [disclose the process used for determining the remuneration of the president/CEO or officer of equivalent rank, and the four (4) most highly compensated management officers of the QB].
- o. Policies and procedures on related party transactions (for QBs that are subsidiary of banks only)
 - i. Describe the QB's overarching policies and procedures for managing related party transactions (RPT) as defined under Sec. 135 (*Profit sharing programs*) of the MORB, including managing of conflicts of interest or potential conflicts of interest.

¹ Past and present during the year

- ii. Provide the details of material RPTs as defined under Sec. 135 (*Compensation and other benefits of directors and officers*) of the MORB, including the nature, terms and conditions, as well as original and outstanding individual and aggregate balances, including off-balance sheet commitments.
 - p. Self-Assessment Function
 - i. Describe the structure of the internal audit and compliance functions including its role, mandate/authority, and reporting process.
 - ii. Describe the review process adopted by the board to ensure effectiveness and adequacy of the internal control system.
 - q. Dividend policy (discuss the QB's policies and procedures for declaring dividends and the amount of total dividends declared during the year, if any)
 - r. Corporate Social Responsibility Initiatives (discuss any initiative undertaken or proposed to be undertaken by the QB during the year)
 - s. Consumer Protection Practices¹
 - i. Describe the role and responsibility of the board and senior management for the development of consumer protection strategy and establishment of an effective oversight over the QB's consumer protection programs;
 - ii. Describe the consumer protection risk management system of the QB, i.e., means by which a QB identify, measure, monitor, and control consumer protection risks inherent in its operations; and
 - iii. Describe the consumer assistance management system of the QB which shall include the consumer assistance policies and procedures as well as the corporate structure for handling complaints.
7. Corporate Information
- a. Present the organizational structure, including the name and position of key officers
 - b. List of major stockholders² of the QB, including nationality, percentage of stockholdings and voting status
 - c. List and description of products and services offered
 - d. QB website (as applicable)
 - e. List of QB units (such as branches, and other offices) domestic and abroad including address and contact details (as applicable)
8. Audited Financial Statements (AFS) with Auditor's Opinion The AFS for the calendar or fiscal year including the opinion of the external auditor of the QB should be presented in full in the Annual Report. For QB with subsidiaries, the AFS should be presented side by side on a solo basis (parent) and on a consolidated basis (parent and subsidiaries) as provided under Sec. 173-Q.

(Circular Nos. 1051 dated 27 September 2019 and 956 dated 17 April 2017)

¹ As required under Sec. 1001-Q on Consumer Protection Oversight Function

² Stockholders owning more than twenty percent (20%) of voting shares of stock of a QB or which enables such stockholder to elect, or be elected as, a director of such QB

NATIONAL RETAIL PAYMENT SYSTEM (NRPS) FRAMEWORK

A. NRPS Framework

The NRPS is a policy and regulatory framework that aims to establish a safe, efficient, and reliable electronic retail payment system in the Philippines. Given that retail payment systems contribute to the stability and efficiency of the financial system as a whole, the attainment of the NRPS vision will help achieve higher economic growth and enhance overall competitiveness of our economy.

With the rapid evolution of retail payments due to advancements in technology, retail payments related activities of BSFIs introduced a complex interplay of different types of risks. Thus, while the Bangko Sentral promotes the modernization of the country's retail payment system in accordance with the NRPS Framework, it is critical to ensure that enabling policies and a multifaceted approach to strengthening risk management are timely adopted, and greater attention is devoted to retail payments activities of BSFIs such as clearing and settlement.

In carrying out these activities, BSFIs are expected to adhere to the NRPS Framework and measures aimed at strengthening risk management as set forth in Sec. 803 and this Appendix. Hence, the retail payment system and activities that BSFIs participate in should establish the following:

1. Strengthened risk management through a better, holistic and multi-stakeholder approach to governance, and an enhanced transparency of clearing and settlement transactions classified according to risk profile.
2. Augmented efficiencies and effectiveness in the retail payment system by minimizing duplicative efforts, promoting interoperability among retail payment system participants, standardizing clearing and settlement rules, and harmonizing various initiatives towards the achievement of the shared goals of safe, reliable and efficient retail payment system.
3. Continued compliance with Bangko Sentral rules and regulations particularly on information technology, consumer protection, and AML/CFT.

Retail payments under the NRPS Framework are payments that meet at least one of the following characteristics: (i) the payment is not directly related to a financial market transaction; (ii) the settlement is not time-critical; (iii) the payer, the payee, or both are individuals or non-financial organizations; and (iv) either the payer, the payee, or both are not direct participants in the payment system that is processing the payment. This definition of retail payment includes person-to-person, person-to-business, business-to-person, business-to-business, person/business-to-government, and government-to-person/business payments.¹ On the other hand, large-value payments refer to payments, generally of very large amounts, which are mainly exchanged between banks or between participants of financial markets and that usually require urgent and timely settlement.

The Bangko Sentral, as a central bank, generally plays a variety of essential roles in the payment system by being an operator of the real-time gross settlement system (RTGS), an overseer in core payment arrangements, a user and participant of payment services, and, most critically, a catalyst for payment system reform. It is through the performance of these roles that the Bangko Sentral seeks to acquire a broader and holistic perspective on the role and the status of the payment system in the financial system and the economy in accordance with one of the pillars of central banking of promoting safe and efficient payment systems in the country.

1. Key Principles
 - a. Governance of the payment system shall be separate and distinct from the actual clearing operations to enable the retail payment system participants to effectively and efficiently deploy resources to focused and specialized activities. The governance of the payment system includes the establishment and implementation of standards and rules among payment system participants.
 - b. Sound governance shall be performed by an industry-led self-governing body that is duly recognized and overseen by the Bangko Sentral.
 - c. All qualified BSFIs may apply to be direct clearing participants and, as such, participate in the governance structure.

¹ Developing a comprehensive National Retail Payments Strategy, Financial Infrastructure Systems Policy and Research, World Bank, October 2012, available at http://siteresources.worldbank.org/FINANCIALSECTOR/Resources/Developing_a_comprehensive_national_retail_payments_strategy_for_G_PW_IO_20%2BvL%29.pdf.

- d. All clearing participants shall subscribe to and comply with the PSMB-formulated principles, policies, and business rules that will govern the payments system.
 - e. All clearing shall be done within the NRPS governance structure. Bilateral clearing arrangements outside of the NRPS governance structure are considered as undertakings that carry risks that cannot be identified, measured, monitored and/or controlled, nor can said undertakings be properly considered in attaining a holistic perspective and improving governance of the retail payment system. Hence, bilateral arrangements outside of the NRPS governance structure shall not be allowed and failure to comply therewith shall result in deployment of appropriate supervisory actions from the Bangko Sentral.
 - f. All significant retail payment streams shall be covered by an ACH.
 - g. Non-discriminatory participation shall be espoused in the retail payment system by allowing all qualified direct clearing participants to participate in the formulation of standards and rules, as well as participate in business arrangements.
 - h. A reasonable market-based and transparent pricing mechanism shall be adopted by all BSFIs which are clearing participants. Reasonable service fees shall be allowed only for actual services rendered directly related to the delivery of electronic financial and payment services to clients of a BSFI.
 - i. Bangko Sentral policies and supervisory actions, not directly involving payments governance within the scope of the PSMB, shall be addressed directly to the individual payment system participants as BSFIs.
2. Objectives:
- a. To enable effective and efficient interface and interoperability using shared and resilient infrastructure;
 - b. To foster innovation and new business models;
 - c. To promote fair access and competition amongst NRPS participants;
 - d. To facilitate the provision of a wide range of payment products and services with needed certainty, affordability (based on a reasonable market-based pricing methodology) and trust; and
 - e. To make relevant information on retail payment system available to concerned stakeholders.

The NRPS Framework espouses the cooperation of different competitors, or what is known as "*coopetition*", in the domestic retail payments by delineating areas to be covered between the cooperative and the competitive spheres.

It is recognized that certain areas are dedicated for cooperation and collaboration among BSFIs participating in the retail payment system towards the common goals of safety, efficiency, reliability and resiliency. This cooperative sphere centers on the clearing and settlement activities of BSFIs which shall collaborate through the formulation and implementation of clearing and settlement standards, rules, and agreements under a formal governance structure that conforms to the NRPS principles.

To complement the cooperative sphere is the competitive sphere where the NRPS principles promote competition through innovation in the delivery of quality and cost-effective financial products and services, the creation of new business models customized to the needs of target consumers, and the development of services with a higher level of security, among others. The competitive sphere shall be governed by reasonable, transparent and effective consumer pricing mechanisms to allow BSFIs cost-recovery and fair financial returns. Each BSFI shall be responsible for prescribing its pricing mechanisms for its financial products and services taking into consideration, among others, the nature of the product or service, the market segment to be served and the costs incurred to provide such product or service.

B. Governance - Payment System Management Body (PSMB)

The PSMB is an industry-led self-governing body that is duly recognized and overseen by the Bangko Sentral.

To attain a holistic perspective and multi-stakeholder organized structure that would bring about good governance in the retail payment system, BSFIs shall adhere to the following key principles when engaging in clearing activities and must do so only within the NRPS governance structure.

- 1. Key Principles
 - a. The retail payment transactions covered under the NRPS governance structure shall be as follows:
 - i. For card-based instruments, the card shall be both issued and acquired locally; and
 - ii. For online, mobile, or other electronic payment instructions/instruments, the account of payer (sender) and account of payee (recipient) shall be both maintained with BSFIs that are licensed to offer EFPS.

- b. The PSMB shall be a not-for-profit juridical entity.
 - c. The PSMB shall adopt a Charter in consultation with the Bangko Sentral.
 - d. The PSMB membership criteria shall, at all times, be consistent with the NRPS Framework and Bangko Sentral regulations, in addition to the following principles:
 - i. All qualified direct clearing participants should be members of the PSMB.
 - ii. To be a PSMB member, a BSFI shall be a participant in at least one (1) ACH and actively participate in an ACH within one (1) month of joining the PSMB.
 - iii. Each PSMB member shall be entitled to only one (1) vote.
 - e. The PSMB shall be funded by the members on an agreed basis.
 - f. The PSMB shall be governed by a PSMB board which shall observe the following principles:
 - i. The PSMB board shall have multi-stakeholder representation in accordance with the volume of the risk-taking activities, such as clearing volume, within a specified time frame [e.g., immediately preceding twenty four (24) months]. The basis for computing the clearing volume across all ACHs or payment streams shall include all payment streams with clearing activities as of the date when the election of the PSMB board is called, except if a valid reason is shown to limit the parameters.
 - ii. The PSMB board shall also abide by sound corporate governance practices which may include, but is not limited to, allocating seat/s for independent board member/s or board member/s that represent/s the broader public interest and has/have competence and experience in the payments field.
 - iii. The PSMB board members shall appoint as official representative their chief executive officer (CEO) and designate a formal alternate who can act with full authority (e.g., voting, approval, decision-making, and others).
 - iv. Each PSMB board member shall have one (1) vote.
 - v. No two (2) PSMB board members shall come from the same group of companies where one is majority-owned or controlled by the other company.
 - vi. The Chairperson shall be elected among PSMB board members and shall not serve for two (2) successive terms.
 - g. The PSMB shall be independent from the clearing switch operator/s with respect to business operations.
 - h. All BSFIs that are part of the NRPS governance structure shall subscribe to and comply with the PSMB-formulated principles, policies, and business rules that will govern the payments system provided such PSMB-formulated principles, policies and business rules are in conformity with the NRPS Framework and principles as well as applicable laws and regulations.
2. Objectives
- a. The PSMB will provide sound governance to the retail payment system and serve as a forum of collaboration for ensuring appropriate conditions for retail payments in the country. Towards this end, the PSMB will perform these functions with respect to its members:
 - i. Ensure compliance by PSMB members with criteria, standards and rules promulgated and adopted by the PSMB's membership and PSMB board, as applicable.
 - ii. Set policies and standards on clearing activities of PSMB members.
 - iii. Standardize retail clearing agreements across payment streams, which may include minimum guideline on the content of service level agreements with CSOs.
 - iv. Manage members' conformance to multilateral retail clearing agreements.
 - v. Review applications for establishment of ACHs and to accordingly approve the formation thereof to ensure, among others, that the NRPS principle of a payment stream falling only under one (1) ACH is observed by PSMB members.
 - vi. Prescribe policies and rules to promote visibility of retail clearing and resulting settlement positions to manage risks resulting from or associated with clearing and settlement activities.

- vii. Set forth policies, rules and/or standards to ensure that no anti-competitive activities occur in clearing operations of PSMB members.
- viii. Promote fair access to the payment system amongst PSMB members.
- ix. Enable effective and efficient interface and interoperability using shared and resilient infrastructure.
- x. Establish a dispute resolution mechanism for PSMB members on matters not covered or cannot be resolved under the ACH dispute resolution framework.
- xi. Provide a clearing environment that will support payments innovation and the adoption of new business models by the payment system participants.

C. Automated Clearing House (ACH)

The ACH is a multilateral legally binding agreement amongst clearing participants. The ACH shall govern clearing and settlement determination.

To promote interoperability and standardize clearing and settlement rules and procedures, BSFIs are expected to observe the following key principles in forming and participating in ACHs under the NRPS governance structure.

1. Key Principles

- a. ACHs shall be created and differentiated based on payment streams, which comprise of payment instruments or instructions, business rules, clearing activities and risk considerations which are of similar nature or which create similar risk profiles.
- b. A payment stream can fall under only one (1) ACH.
- c. The formation of and participation in an ACH shall be open to all qualified clearing participants.
- d. The formation of an ACH shall be considered a business arrangement to be agreed upon between participants of an ACH.
- e. An ACH shall engage the services of only one (1) clearing switch operator.
- f. PSMB members may be part of more than one (1) ACH Participant Group and/or participate in more than one (1) ACH, provided the PSMB member meets the requirements for participating in such ACH.
- g. At least two (2) direct clearing participants can initiate the creation of an ACH subject to the recognition of the PSMB Board, or in the absence of a PSMB, the Bangko Sentral.

2. Salient Features

- a. ACH participants shall elect representatives to an ACH Participant Group, which once recognized by the PSMB, shall draw up and implement ACH rules and agreements and contract a qualified clearing switch operator. To assist in drafting the ACH agreements, the Participant Group may nominate a Working Group to formulate draft agreements subject to the former's approval.
- b. The assignment of a new ACH to an existing or new ACH Participant Group shall be approved by the PSMB Board.
- c. Where a new ACH Participant Group has to be formed, it shall be recognized by the PSMB Board once its charter has been accepted by the ACH participants and meets the PSMB criteria for an ACH Participant Group.

D. Clearing Switch Operator (CSO)

The CSO provides clearing switch services.

To augment efficiencies in the retail payment system while ensuring a robust and resilient infrastructure underlying retail payment transactions of BSFIs, BSFIs should observe the following key principles in engaging the services of CSOs relative to the delivery of a retail payment product or service within the NRPS governance structure.

1. Key Principles

- a. The operations of the CSO that services an ACH shall be limited to the provision of clearing and other services that do not compete with services offered by BSFIs participating in the ACH.

- b. Clearing switch operations shall be conducted effectively and efficiently consistent with international standards as this is a critical prerequisite for the functioning of all the various systems supporting and underlying retail payment services.
- c. The CSO shall have a reliable, resilient, robust, and secure infrastructure to ensure consistency and continuity of services under different operating conditions.
- d. The CSO shall be a duly licensed entity in the Philippines. Entities organized under the laws of countries other than the Philippines shall secure a license to do business in the Philippines and comply with the Foreign Investments Act of 1991 as well as other applicable laws and regulations.
- e. A CSO can extend service to multiple ACHs.
- f. Each ACH, through their designated CSO, shall individually settle their clearing results through the RTGS system operated by the Bangko Sentral.

(Circular No. 980 dated 06 November 2017)

GUIDELINES ON EUROPAY, MASTERCARD AND VISA (EMV) IMPLEMENTATION (Appendix to Section 147-Q)

A. Background

In response to the increasing sophistication of frauds perpetrated through magnetic stripe (magstripe), international payment networks have orchestrated the shift towards EMV chip-enabled card. The EMV is an interoperability standard for chip-bearing smart card technology defined by EMVCo in 1994, adoption of which has resulted to significant reduction in card frauds due to skimming¹ and counterfeiting.

To outpace and manage fraudsters' shift towards jurisdictions that are still using magstripe, Bangko Sentral supervised financial institutions (BSFIs) via Circular No. 808 dated 22 August 2013 were required to migrate their entire payment network to the more secure EMV chip-enabled cards.

B. Policy statement

It is the policy of the Bangko Sentral to foster the development of safe, secure, efficient, and reliable retail payment systems, protect the integrity and confidentiality of customer accounts and information and uphold consumer protection.

C. Scope

These guidelines shall govern the migration to and implementation of EMV of all BSFIs with debit card issuing and acquiring functions. For credit card, only cash advance transaction at Automated Teller Machines (ATMs) shall be covered since other credit card transactions are governed by the rules of the international payment networks.

It is incumbent upon all affected BSFIs to ensure that other key players in the domestic payment network comply with these guidelines.

For purposes of the subject guidelines, payment transactions covered are limited to card present and contact transactions in ATMs, POS terminals and other similar devices. Guidelines governing card-not-present as well as contactless transactions shall be issued separately.

D. Definition of Terms

1. *EMV*, which stands for Europay, MasterCard and Visa, is a global standard for credit, debit and prepaid payment cards based on chip card technology. EMV chip-based payment cards, also known as smart cards, contain an embedded microprocessor, a type of small computer. The microprocessor chip contains the information needed to use the card for payment, and is protected by various security features. Chip cards are a more secure alternative to traditional magstripe payment cards.

Implementing EMV shall address the deficiencies inherent in magstripe by reducing fraud arising from counterfeit, lost and stolen card information through the following features:

- a. Authentication of the chip card to ensure that the card is genuine so as to protect against counterfeit fraud for on line-authorized transactions;
 - b. Digitally signing payment data for transaction integrity;
 - c. More robust cardholder verification to protect against lost and stolen card fraud for EMV transactions in all acceptance environments.
2. *Acquiring institution (acquirer)* is a bank or financial institution that processes credit or debit card transactions via ATM or POS terminals.
 3. *Bangko Sentral Supervised Financial Institutions (BSFIs)* include banks, non-banks with quasi-banking function (NBQB), non-bank electronic money issuers and other non-bank institutions which under existing Bangko Sentral rules and regulations and special laws are subject to the Bangko Sentral supervision and/or regulation.

¹ Skimming is the illegal copying of information from the magnetic stripe of a payment card to gain access to accounts.

4. *Co-branded cards* are Philippine-issued cards affiliated with international payment networks.
5. *Debit cards* are payment cards linked to bank deposit or prepaid/electronic money (e-money) accounts.
6. *Domestic payment network* includes BSFIs as well as other key players such as merchants, providers of ATMs, point-of-sale (POS) terminals and similar devices, card vendors, card personalization bureaus and domestic switches responsible for processing and handling domestic transactions.
7. *Domestic switches* refer to BancNet and Megalink.
8. *EMV chip liability shift* means that the liability and responsibility for counterfeit or fraudulent transaction shall shift to the BSFI who is not EMV-compliant.
9. *EMVCo* is the governing body that manages the EMV specification.
10. *Hybrid cards* are payment cards that have both EMV chip and magstripe.
11. *International payment networks* refer to the payment networks that have global establishment. For purposes of subject guidelines, recognized international networks shall refer to Visa, Mastercard, UnionPay, Diners/Discover, American Express, and Japan Credit Bureau (JCB).
12. *Interoperability* refers to the ability of Philippine cardholders to transact at Philippine ATM and POS terminals, regardless of network affiliation or branding of the card.
13. *Issuing institution (issuer)* is a bank or non-bank financial institution that issues payment cards, whether proprietary or co-branded, to consumers.
14. *Payment cards* are cards that can be used by cardholders and accepted by terminals to withdraw cash and/or make payment for purchase of goods or services, fund transfer and other financial transactions. Typically, payment cards are electronically linked deposit, prepaid or loan/credit accounts.
15. *Philippine domestic EMV specification* refers to the specification or standards based on EMV that shall be adopted in the Philippine financial market for the proprietary or non-co-branded cards.
16. *Proprietary cards* are Philippine-issued cards without international payment network affiliation.
17. *Technical fallback* is a state in which a chip cannot be used and another type of entry, such as magstripe, is used to complete a transaction.

E. General Rule

In line with the declaration of policy, BSFIs, in migrating to EMV, shall consider the following:

1. BSFIs shall maintain interoperability of the domestic payment network;
2. The Philippine EMV implementation shall use established EMV specification as follows:
 - a. Issuers of proprietary cards shall use the Philippine domestic EMV specification; and
 - b. Issuers of co-branded cards shall use the EMV specification of their affiliated international payment network.
3. At a minimum, all debit accepting devices shall acquire/accept Philippine issued proprietary cards using the Philippine domestic EMV specification of members/participants of the domestic switches;
4. The domestic payment network shall ensure continued interoperability and acceptance of Philippine EMV issued cards using the Philippine domestic EMV specification on Philippine EMV deployed acceptance devices;² and
5. BSFIs shall strengthen consumer protection by adequately handling and containing consumer concerns and complaints arising from fraudulent schemes done electronically.

² Include EMV-compliant ATMs, POS terminals and other similar devices.

F. The Philippine Domestic EMV Specification

With the main objectives of maintaining interoperability and reducing card fraud, BSFIs shall adopt a Philippine domestic EMV specification for proprietary cards. The domestic EMV specification should:

- Adopt the EMV specification according to EMVCo;
- Apply to ATM and domestic debit POS transactions;
- Support contact transactions;
- Support online card authentication to ensure that transactions are made using a valid card;
- Support online authorization to enable issuer to manage fraud and credit risk at the transaction level;
- Support online PIN cardholder verification method;
- Support technical fallback to magstripe in the interim, as provided in Section I of these guidelines, without prejudice to the issuer's decision to process/approve fallback transactions.

G. Minimum Operational Requirements

1. Issuing institutions shall:

- a. Ensure that they have the technical systems and network necessary to process and handle EMV transactions;
- b. Support EMV data elements in authorization messages;
- c. Define chip cards feature, functionality and interface capability;
- d. Enhance risk management systems to leverage chip;
- e. Determine the card migration strategy;
- f. Update customer support and operational systems to support chip cards;
- g. Be certified for network interfaces and card personalization by a certification body organized by BSFIs pursuant to these guidelines;
- h. Replace card base; and
- i. Educate the consumers.

2. Acquiring institutions shall:

- a. Ensure that card-accepting devices are EMV-certified to support the acquiring and routing of Philippine-issued debit cards using the Philippine domestic EMV specification;
- b. Ensure that PIN-entry devices are Payment Card Industry PIN Transaction Security (PCI-PTS)³ compliant; and
- c. Enable a debit POS environment that supports online PIN for Philippine-issued debit cards.

3. Domestic switches shall:

- a. Establish infrastructure and systems that are EMV-compliant and able to support switched EMV transactions from domestic interconnected networks;
- b. Ensure continued support to existing transaction sets and functions provided to consumers;
- c. Enhance efforts to educate their members on EMV collaboration and seek effective alignment of strategy and design principles; and
- d. Ensure continued ability to support, in the interim, transactions in magstripe format subject to liability shift policies acceptable to the Bangko Sentral, the standards of which shall be covered in subsequent guidelines.

H. Detailed Guidelines, Policies and Processes

BSFIs shall agree on and implement detailed technical and operational requirements, policies and procedures that are acceptable to the Bangko Sentral, the standards of which shall be covered in subsequent guidelines, and aligned with subject EMV Implementation Guidelines, covering but not limited to the following:

1. Philippine Application Identifier (AID);
2. Single Common AID, Single Common Card Personalization Profile and Single Common Terminal Configuration for domestic transactions;
3. Transaction routing;
4. Testing and certification;

³ A security requirement of the Payment Card Industry (PCI) regarding testing of PIN-entry devices using predefined standards to get certification.

5. Dispute and fraud risk management; and
6. Other processes affected by the EMV migration.

I. Hybrid Card, Fallback Function and EMV Liability Shift

While the EMV infrastructure and environment are in the process of achieving full stability, hybrid cards may still be acceptable as a fallback option in cases when the EMV chip or terminal is unable to process domestic chip transactions. In this regard, BSFIs shall formulate a liability shift framework that is acceptable to the Bangko Sentral.

J. Updated EMV Migration Plan

Any changes arising from the aforementioned guidelines shall be incorporated in the EMV Migration Plan and all affected BSFIs shall resubmit their updated plan to the appropriate supervising department of the Bangko Sentral within sixty (60) calendar days from the date of the Circular.

All BSFIs shall support migration to EMV standards. Consequently, all cards issued and card-accepting devices should be EMV-compliant.

EMV CARD FRAUD LIABILITY SHIFT FRAMEWORK (ECFLSF)

I. Introduction

This document outlines the Bangko Sentral's guidelines implementing the EMV Card Fraud Liability Shift Framework (ECFLSF). Pursuant to Sec. 148 (*IT Risk management systems*) and *Appendix 108* of the Manual of Regulations for Banks (MORB), Bangko Sentral Supervised Financial Institutions (BSFIs) should shift from the magnetic stripe (magstripe) technology to EMV-compliant cards, POS terminals and ATMs. The immediate impact and benefit on the adoption of EMV technology is the reduction in card fraud resulting from counterfeit or skimming attacks.

While migration efforts to shift to EMV technology are ongoing, the use of magstripe in payment cards and/or card-accepting devices shall be allowed subject to card fraud liability shift. This means that the BSFIs which have not yet or have partially adopted the EMV technology shall be held responsible for losses associated with the use of a counterfeit card in a card-present environment.

II. Policy statement

It is the policy of the Bangko Sentral to foster the development of safe, secure, efficient and reliable retail payment systems, protect the integrity and confidentiality of customer accounts and information and uphold consumer protection.

Towards this end, the Bangko Sentral requires all concerned BSFIs to migrate to a more secure payment technology and sets forth subject principles for allocation of card fraud liability with the aim of ensuring compliance of the different retail payment system participants with the Bangko Sentral's EMV migration requirement. Pending full migration to the EMV technology, the ECFLSF shall likewise accelerate the dispute resolution and restitution process for customers who have valid claims arising from counterfeit fraud or skimming attacks.

III. Applicability and Scope

These guidelines shall apply to all BSFIs with debit and credit card issuing and acquiring functions and shall govern the allocation of liability associated with fraudulent transactions arising from counterfeit cards beginning 1 January 2017, subject to the conduct of proper investigation by the concerned participant/s of the payment card network. The coverage shall be limited to card-present and contact transactions of Philippine-issued payment cards used domestically in automated teller machines (ATMs), point-of-sale (POS) terminals, and other similar devices routed to either domestic or international payment networks.

Consequently, the ECFLSF shall not apply to card-not-present and contactless transactions. Furthermore, foreign-issued payment cards used domestically and Philippine-issued payment cards used abroad shall not be covered as these are already subject to the existing liability shift and chargeback rules of the international payment networks.

IV. Definition of Terms

For purpose of these guidelines, the following definitions shall apply:

- 1) *Acquiring institution (Acquirer)*, is a bank or non-financial institution that processes credit or debit card transactions via ATMs, POS terminals, and other similar devices.
- 2) *EMV compliant device or terminal* is a device or terminal that has, or is connected to, a contact chip card reader, has an EMV application, certified, and is able to process EMV transactions.
- 3) *Co-branded cards* are Philippine-issued cards affiliated with international payment networks.
- 4) *Counterfeit card* is an imitation or falsification of a genuine magstripe card or EMV chip card with track data copied from a hybrid EMV card.
- 5) *Debit cards* are payment cards linked to bank deposit or prepaid/electronic money (e-money) accounts.
- 6) *Fallback to magstripe transaction occurs* when the chip on the card is not being read by a terminal. This is similar to technical fallback, which is defined in Appendix 108 of the MORB as a state in which the chip cannot be used and another type of entry, such as magstripe, is used to complete a transaction.
- 7) *Hybrid cards* are payment cards that have both EMV chip and magstripe.
- 8) *International payment networks* refer to the payment networks that have global establishment. For purposes of subject guidelines, recognized international networks shall refer to Visa, Mastercard, UnionPay, Diners/Discover, American Express, and Japan Credit Bureau (JCB).

- 9) *Issuing institution (Issuer)* is a bank or non-bank financial institution that issues payment cards, whether proprietary or co-branded, to consumers.
- 10) *Payment cards* are cards that can be used by cardholders and accepted by terminals to withdraw cash and/or make payment for purchase of goods or services, fund transfer and other financial transactions. Typically, payment cards are electronically-linked to deposit, prepaid or loan/credit accounts.

V. Guiding Principles

- 1) The adoption of EMV technology is designed to reduce and mitigate risks arising from counterfeit card fraud. While it remains virtually impossible to create a counterfeit EMV card that can be used to conduct an EMV payment transaction successfully, the presence of magstripe in a hybrid EMV card makes it still vulnerable to counterfeit attacks.
- 2) A BSFI that has enabled the most secure EMV options shall be protected from financial liability arising from losses on counterfeit card fraud. The liability for this type of fraud shall shift to the BSFI which is not or is partially compliant with the EMV migration requirement.
- 3) To resolve the issue on the allocation of card fraud liability using the guidelines described herein, the involved parties (such as issuer, acquirer, and payment network) should, first, characterize the fraud committed, and then, assess the technology being employed, in light of the applicable payment network rules. The party supporting EMV technology will prevail and in case of a technology-tie (neither or both parties are EMV compliant), the liability for fraudulent transactions generally remains with the Issuer.

VI. Allocation of Card Fraud Liability

Allocation of liability for counterfeit card fraud is summarized in the following table:

	Card Capabilities	Acceptance Device Support	Scenario	Liability
1	Magnetic stripe only	Magnetic stripe only	Magnetic card transaction was completed	Issuer
2	Magnetic stripe only	EMV compliant	Magnetic card transaction was completed	Issuer
3	EMV compliant hybrid card	Magnetic stripe only	Magnetic card transaction was completed	Acquirer ¹
4	EMV compliant hybrid card	EMV compliant	Fallback transaction; Magnetic card transaction was completed	Issuer

The information provided above shall be considered as a general guide as each fraudulent transaction shall be separately investigated on. Likewise, the domestic and international payment networks may come up with other scenarios and probable conditions that illustrate how liability is assigned on counterfeit card fraud using different combinations of card and acceptance device capabilities. However, the resolution of such scenarios/conditions should follow the principles espoused in these guidelines.

VII. Consumer Protection and Complaints Handling and Resolution

- 1) The participants in the domestic payment network (such as issuer, acquirer, and payment network) should collaborate and devise detailed rules and procedures including arbitration mechanisms to operationalize the ECFLSF. Accordingly, a body responsible for strictly implementing the above-mentioned detailed rules and procedures on ECFLSF should be constituted.
- 2) Cardholders' complaints and/or requests for chargeback as a result of counterfeit card shall be considered as complex complaint/request defined in *Appendix 110* of the MORB and hence, shall follow the standards provided in such regulations, except for the processing and resolution timeline which should be within 10 days instead of 45 days.
- 3) Issuers and Acquirers should ensure that affiliated international payment networks align their existing liability and chargeback rules with the ECFLSF insofar as Philippine-issued payment cards used in the domestic payment environment are concerned.

¹ When an Acquirer accepts a magstripe card that was counterfeited with track data copied from an EMV compliant hybrid card and the counterfeit card is used at a device/terminal that is not EMV-compliant, resulting in a transaction to be successfully processed, the Acquirer is liable for any chargeback resulting from such fraud.

BASEL III FRAMEWORK ON LIQUIDITY STANDARDS- LIQUIDITY COVERAGE RATIO

(Appendix to Sec. 145-Q on Liquidity Coverage Ratio [LCR], LCR Disclosure Requirements, and Sanctions)

Introduction

This Appendix outlines the Bangko Sentral guidelines implementing a quantitative liquidity regulatory framework consistent with the liquidity coverage ratio (LCR) standard introduced under the Basel III: The Liquidity Coverage Ratio and Liquidity Risk Monitoring Tools, January 2013 by the Basel Committee on Banking Supervision (BCBS)¹.

With this new liquidity standard, the Bangko Sentral aims to further strengthen the risk management of covered banks by enhancing their ability to draw information from their various operations, and assess the impact of external events on the liquidity of financial instruments and on the availability of funding under both normal and stressed conditions. With liquidity risk measurement standards in place, covered banks are expected to manage their liquidity positions more prudently by better aligning their funding models with their risk preferences and incorporating liquidity risk into product pricing. Overall, the new liquidity regime shall give market participants greater confidence in the ability of the banking sector to absorb shocks arising from financial and economic stress, and hence, lowering the probability of acute shortfalls in liquidity.

The liquidity framework is part of the comprehensive set of complementary and mutually reinforcing measures for regulatory reform that are consistent with global standards that have been introduced by the Bangko Sentral to strengthen the risk management of covered banks and the supervision of the banking system. The liquidity standard shall complement existing supervisory guidance on liquidity risk management.

Part I. Liquidity Coverage Ratio (LCR) Framework

I. Definition of terms

For the purpose of the LCR standard, the following terms and phrases shall be understood as follows:

1. *Beneficiary* – refers to a legal entity that receives, or may become eligible to receive, benefits under will, insurance policy, retirement plan, annuity, trust, or other contract.
2. *Cash management operation* – refers to the provision of products and services intended to manage customers' cash flows, assets and liabilities, and for the conduct of financial transactions necessary to the customer's ongoing operations.
3. *Clearing operation* – refers to a service arrangement that enables customers to transfer funds (or securities) indirectly through direct participants in domestic settlement systems to final recipients.
4. *Committed business facilities* – are off- balance sheet facilities or funding commitments issued by covered banks to clients under explicit contractual agreements or obligations to extend funds at a future date that are contractually irrevocable (i.e., "committed") or conditionally revocable. The terms governing the facility prohibit the covered bank from refusing to extend credit or funding to the counterparty, except where certain conditions specified by the terms of the facility- other than customary notice, administrative conditions, or changes in financial condition of the client- have been met.
5. *Correspondent banking* – refers to arrangements under which one (1) covered bank (correspondent) holds deposits owned by other covered banks (respondents) and provides payment and other services in order to settle foreign currency transactions (e.g., so-called nostro and vostro accounts used to settle transactions in a currency other than the domestic currency of the respondent covered bank for the provision of clearing and settlement of payments).
6. *Current market value* – refers to the value of liquid assets included in the stock of HQLA, measured in accordance with the existing guidelines on mark-to-market valuation under *Appendix 28*.
7. *Custody operation* – refers to the provision of safekeeping, reporting, processing of assets or the facilitation of the operational and administrative elements of related activities on behalf of customers in the process of their transacting and retaining financial assets.
8. *Downgrade triggers* – pertain to clauses or provisions in contracts governing derivatives and other transactions that require the posting of additional collateral, drawdown of contingent facilities, or early repayment of existing liabilities upon the covered bank's downgrade by a recognized credit rating organization.

¹ The Basel Committee on Banking Supervision is a committee of banking supervisory authorities that was established by the central bank governors of the Group Ten countries in 1975. It consists of senior representatives of covered bank supervisory authorities and central banks from Argentina, Australia, Belgium, Canada, China, France, Germany, Hong Kong SAR, India, Indonesia, Italy, Japan, Korea, Luxembourg, Mexico, the Netherlands, Russia, Saudi Arabia, Spain, Singapore, South Africa, Sweden, Switzerland, Turkey, the United Kingdom, and the United States. It usually meets at the Bank for International Settlements in Basel, Switzerland where its permanent Secretariat is located.

9. *Financial corporates* – refer to corporations, whether resident or non- resident, that are primarily engaged in financial intermediation or in auxiliary financial activities that are closely related to financial intermediation. These include non-bank financial institutions with quasi- banking functions, securities firms, and insurance companies, among others.
10. *Financial stress* – pertains to a condition where a covered bank cannot meet or has difficulty paying off its financial obligations as brought about by firm-specific and/or market-wide stress events. In such financial circumstance, the covered bank may be having difficulty accessing credit and financing facilities, and has no reasonable alternative other than to monetize its HQLA to the extent necessary to meet obligations such as but not limited to:
 - Servicing of deposit withdrawals;
 - Posting of additional collateral requirements;
 - Servicing of unscheduled drawdowns on committed but unused credit lines and business facilities that are extended to clients;
 - In the interest of mitigating reputational risk, buying back of debt, extending of funds to honor non-contractual obligations, or accommodation of any unexpected liquidity demand from counterparty.
11. *Haircut* – refers to a percentage by which the market value of an asset is reduced. A haircut is applied by a collateral taker as a risk control measure to protect itself from losses resulting from decline in the market value of an asset in the event that it needs to liquidate said collateral.
12. *High-quality liquid asset (HQLA)* – refers to an asset that can be converted easily and immediately into cash at little or no loss of value in private markets to meet the covered banks's liquidity needs during times of stress. To qualify as HQLA, the liquid asset should possess the asset and market liquidity characteristics, and should satisfy the operational requirements for monetization prescribed under the LCR standard. HQLAs shall be categorized as either Level 1 or Level 2 assets. The stock of HQLA makes up the numerator of the LCR.
13. *Inflow/Outflow rates* – pertain to the various percentages that are designed to reflect the observed behavior and characteristics of different assets, funding sources, obligations, and commitments during periods of liquidity stress. Inflow rates provide the assumption at which assets or contractual receivables are expected to flow in during times of stress. Outflow rates assume the level at which funding sources, obligations, and commitments are expected to run off or be drawn down during stress periods.
14. *LCR measurement date* – refers to end-of-month/quarter date which serves as the reference date for the calculation of the LCR.
15. *LCR period* – refers to the thirty (30)- calendar day period following the LCR measurement date, which serves as the standard horizon for HQLA availability and for total net cash outflows calculation.
16. *Liquidity metrics* – refer to a set of market-based indicators which enable assessment of the fundamental attributes of an asset that are generally found to be determinants of liquidity (i.e., measure of asset characteristics), and the essential aspects of the broader market structure within which the asset is traded (i.e., measure of market liquidity). These criteria provide guidance on which specific asset to qualify as liquid and readily marketable within an asset class.
17. *Multilateral organizations* – pertain to the Bank of International Settlements, the International Monetary Fund, the European Central Bank and European Community and the multilateral development banks (MDBs).
18. *Non-financial corporates* – refer to corporations, whether resident or non- resident, whose principal activity is the production of goods or non-financial services.
19. *Non-HQLAs* – pertain to debt securities and equity shares that are neither qualified as Level 1 nor Level 2 assets.
20. *Operational deposit* – refers to a deposit account maintained by a wholesale client for the primary purpose of obtaining a specific operational service from the covered bank as an independent third party intermediary, agent or administrator.
21. *Operational service* – refers to any of the following contractual services performed by the covered bank related to clearing, cash management operations, and custody (but excluding correspondent banking or brokering activities), which effectively facilitate the clients' access and ability to use payment and settlement systems and otherwise make payments:

Clearing

- a. Overnight financing and maintenance of post-settlement balances;
- b. Transmission, reconciliation, and confirmation of payment orders;
- c. Intraday overdraft;
- d. Determination of intraday and final settlement positions;

Cash Management

- e. Payment remittance;
- f. Collection and aggregation of funds;
- g. Payroll administration and control over disbursement of funds;
- h. Administration of payments and cash flows related to the safekeeping of investment assets, not including the purchase or sale of assets;

Custody

- i. Settlement of securities transactions;
 - j. Client subscriptions and redemptions;
 - k. Processing of collateral;
 - l. Transfer of contractual payments, including collection and payment of dividends and other income from financial assets under custodianship; and
 - m. Escrow, funds transfer, stock transfer, and agency services, including payment and settlement services (excluding correspondent banking), payment of fees, taxes, and other expenses
22. *Other contingent funding obligations* – refer to either contractual or non-contractual contingent funding obligations (excluding lending commitments) that are contingent upon a credit or other event that is not always related to the liquidity events simulated in the LCR stress scenario, but may nevertheless have the potential, especially out of reputation risk considerations, to cause significant liquidity drains to the covered bank in times of stress. Non-contractual contingent funding obligations are funding liabilities that are:
- associated with the issuance or sponsorship of products (including structured financial instruments) or provision of services that may require the funding support or extension of funds by the covered bank in times of stress; or
 - embedded in financial products and instruments sold, sponsored, marketed or originated by the covered bank that might prompt the covered bank to repurchase said products and instruments from a customer in order to satisfy or manage the customer's reasonable expectations about the liquidity and marketability of the product or instrument. Failure to do so would likely cause material reputational damage to the covered bank or otherwise impair its ongoing viability.
23. *Philippine National Government (NG)* – refers to the Philippine NG and its agencies such as departments, bureaus, offices, and instrumentalities, but excluding local government units (LGUs) and government-owned and controlled corporations (GOCCs).
24. *Public Sector entities (PSE)* – refer to entities which are regarded as such by a recognized banking supervisory authority in the country in which they are incorporated.
25. *Rehypothecation and/or re-use of collateral* – Rehypothecation refers to the right of financial intermediaries to sell, pledge, invest, or perform transactions with the client assets they hold, thereby allowing them to obtain funding using said client collateral. Re-use of collateral, on the other hand, usually covers a broader context where securities delivered in one transaction are used to collateralize another transaction, including own trades, borrowings or short sellings. The terms rehypothecation and re-use of securities are used interchangeably in this standard.
26. *Retail deposits* – refer to deposit liabilities raised by the covered bank from individual clients including sole proprietorships and partnerships, and those classified as micro and small enterprises (hereinafter called retail clients).
27. *Securities financing transactions (SFTs)* – these involve repurchase (repos), and reverse repurchase (reverse repos) agreements, securities lending and borrowing, or margin lending transactions, where the value of the transactions depends on market valuations and the transactions are often subject to margin agreements.
28. *Secured funding* – refers to any liability and general obligation of the covered bank arising from securities transaction that is covered by collateral in the form of duly constituted mortgage, pledge, or lien on specifically designated asset owned by the covered bank or by its related party that gives the counterparty priority over said asset in case of bankruptcy, insolvency, liquidation, or resolution. This consists of repos, collateral swaps, collateral lending to customers to cover short positions and other similar secured funding arrangements. Forward repos and forward collateral swaps that start previous to and mature within the LCR horizon are included in this category.
29. *Secured lending* – refers to any securities transaction that is subject to a legally binding agreement that gives rise to a cash obligation of a counterparty to a covered bank that is secured under applicable law by a lien on specifically designated asset owned by the counterparty or by its related party, which gives the covered bank, as holder of the lien, priority over said asset in the event the counterparty enters into bankruptcy, insolvency, liquidation, receivership, resolution, or similar proceeding. This will include reverse repos, margin loans, and securities borrowing transactions. Forward reverse repos and forward collateral swaps that start previous to and mature within the LCR horizon are included in this category.

30. *Special purpose entity (SPE)* – as defined in the Basel II Framework, SPE is a corporation, trust, or other entity organized for a specific purpose, the activities of which are limited to those appropriate to accomplish the purpose of the SPE, and the structure of which is intended to isolate the SPE from the credit risk of an originator or seller of exposures. SPEs are commonly used as financing vehicles in which exposures are sold to a trust or similar entity in exchange for cash or other assets funded by debt issued by the trust.
31. *Total expected cash inflows* – pertain to the various types of contractual receivables which outstanding balances as of the LCR measurement date are multiplied by relevant inflow rates. The total inflow amounts are capped at seventy-five percent (75%) of aggregated total expected cash outflows.
32. *Total expected cash outflows* – pertain to the various on- and off-balance sheet funding sources and commitments which outstanding balances as of the LCR measurement date are multiplied by relevant outflow rates. The outflow amounts are aggregated to determine the total expected cash outflows.
33. *Total net cash outflows* – pertains to the sum of the total expected outflow amounts less the sum of the total expected inflow amounts, with the inflow amounts limited to seventy-five percent (75%) of outflow amounts. The calculated amount makes up the denominator of the LCR, thereby establishing the amount of HQLA that a covered bank would be required to hold.
34. *Trust and other fiduciary* – refers to a legal entity or to a specifically designated business unit that is authorized to administer, hold or manage assets for the use or in behalf of a third party. These shall include trust entities as defined under Sec. 403-Q, mutual funds, exchange-traded funds and other collective investment vehicles.
35. *Unencumbered* – means free of legal, regulatory, tax, accounting, contractual or other impediments or practical restrictions on the ability of the covered bank to liquidate, sell, transfer, or assign the asset. Liquid assets may also be considered unencumbered if the potential credit or funding for which the assets are pre-positioned, deposited with or pledged to the Bangko Sentral, to a clearing and settlement system, or to another financial entity is not currently extended to the covered bank or to any of its related parties¹.
36. *Unsecured wholesale funding* – refers to liabilities and general obligations of the covered bank, other than deposits, to wholesale clients that are not collateralized by legal rights to specifically designated assets owned by the covered bank or by its related party. This includes deposit substitutes, unsecured loans and advances, unsecured notes, bonds and other debt securities, and other unsecured funding obligations.
37. *Wholesale deposits* – refer to deposit liabilities raised by the covered bank from legal entities (excluding sole proprietorships and partnerships and those entities classified as micro and small enterprises) (hereinafter called wholesale clients).

II. LCR Calculation

A. General Requirements

1. The LCR is designed to promote the short-term resilience of the liquidity risk profile of a covered bank. To meet funding obligations and draws on contingent liabilities over the next thirty (30) calendar days, the LCR requires the covered bank to hold a stock of unencumbered HQLA equal to or greater than total net cash outflows. Hence, the LCR is calculated as the:

$$\text{LCR} = \frac{\text{Stock of HQLA}}{\text{Total net cash outflows over the next 30 calendar days}}$$

2. The standard requires that, under normal situation, the value of the liquidity ratio be no lower than 100%² on a daily basis because the stock of the unencumbered HQLA is intended to serve as a defense against potential onset of liquidity stress.
3. When calculating the LCR, the covered bank should maintain a consistent categorization of a given entity/counterparty across all HQLA, outflow and inflow categories.
4. To facilitate LCR monitoring and ongoing compliance, the covered bank must maintain a reliable system that has the ability to calculate liquidity positions on a day-to-day basis, regardless of the frequency of mandatory reporting to the Bangko Sentral.

¹ As defined under Sec. 131-Q on Policy Statement and Definition of Terms.

² The 100% threshold is the minimum requirement absent a period of financial stress, and after the phase-in arrangement are complete.

It should capture, at a minimum, specific information related to the covered bank's available unencumbered assets and collaterals, cash flows, and certain market and liquidity indicators prescribed in the standard. It must have the ability to deliver granular and time- sensitive information particularly during periods of stress.

B. Stock of HQLA

(1) HQLA eligibility criteria

5. *Asset and market liquidity characteristics.* To qualify as HQLA, assets should have a high potential to generate funds easily and immediately through outright sale or secured borrowing, during a stress scenario without incurring large discounts due to fire-sales. These assets must be liquid and readily-marketable.
6. The liquidity and ready-marketability of an asset is influenced both by its own specific features and by the characteristics of the broader market structure within which it is traded.
7. To assess the relative liquidity and ready-marketability of assets, particularly those that are classified as Level 2 under this Framework, liquidity metrics such as those set out in *Annex A* may be used. The metrics, including the analytical tools, guidelines and methodologies, data used, and the threshold levels shall be developed in coordination with the banking industry. These shall be subject to review and updating at least annually to reflect prevailing market liquidity conditions.
8. Operational requirements for monetization. Not all assets considered to be liquid and readily-marketable are immediately eligible for the stock as there are other operational restrictions on the availability of HQLA that can prevent timely monetization during a stress period. The immediate availability of the liquid assets for monetization in times of stress as well as the unrestricted use of the funds generated from outright sale or secured borrowing of said assets must also be established in order for the liquid assets to be appropriately considered as HQLA.
9. The following operational requirements are designed to ensure that the stock of HQLA is managed in such a way that the covered bank can, and is able to demonstrate that it can, immediately use the stock of assets as a source of contingent funds that is available for the covered bank to convert into cash through outright sale or repo, to fill funding gaps between cash inflows and outflows at any time during the thirty (30)-day stress period, with no restriction on the use of the liquidity generated:
 - a. *Encumbrance and transferability of the liquid assets*
 - i. The liquid asset must be unencumbered. It should neither be pledged, explicitly or implicitly, to secure, collateralize, or credit-enhance any transaction¹.
 - ii. No operational constraint that may impede the monetization of the liquid asset must be attached to it, such as, but not limited to:
 - (1) Whether the monetization of the asset would directly conflict with another business or risk management strategy of the covered bank. For example, an asset should not be included in the stock if the sale of that asset, without replacement throughout the thirty (30)-day period, would remove a hedge that would create an open risk position to the covered bank in excess of internal limits;
 - (2) Potential differences in financial market conventions in other jurisdictions, where applicable (e.g., settlement period, processing time, etc.) that affect timely monetization of the asset; and
 - (3) Whether the asset is internally designated to cover operational costs (e.g., rents, salaries, facility maintenance, etc.).
 - iii. The liquid asset received, such as those in SFTs or as collateral for derivatives transaction that is not segregated, must not have been rehypothecated and is legally and contractually available for the covered bank's use.
 - iv. Assets or liquidity generated from said assets, which have been received under right of rehypothecation or under brokering agreements, shall be excluded from the covered bank's stock of HQLA if the beneficial owner has the contractual right to withdraw those assets during the LCR period.

¹ If a covered bank has deposited, pre-positioned or pledged Level 1, Level 2 and other assets in a collateral pool and no specific securities are assigned as collateral for any transactions, it may assume that assets are encumbered in order of increasing liquidity value in the LCR, i.e., assets ineligible for the stock of HQLA are assigned first, followed by Level 2 assets, and finally Level 1.

b. *Capability to monetize the HQLA*

- v. The covered bank must implement policies, procedures and appropriate systems that establish the proper authority and operational capacity of a liquidity management function (e.g., the treasurer) to monetize any HQLA at any point in the thirty (30)-day stress period. To ensure effective monetization from an operational perspective, said function must have:
- (1) Continuous authority to invoke the contingency funding plan of the covered bank when deemed necessary;
 - (2) Access to all necessary information to execute monetization of any HQLA;
 - (3) Control to any HQLA at any time. Control must be evidenced either by maintaining the assets in a separate pool managed by the function with the sole intent for use as a source of contingent funds, or by demonstrating that the function can monetize the asset at any point in the thirty (30)-day stress period; and
 - (4) Access and control over the monetization proceeds such that the funds will be available to the function throughout the thirty (30)-day stress period without directly conflicting with another business or risk management strategy of the covered bank.
- vi. The covered bank, as led by the liquidity management function, must demonstrate its operational capability to monetize the HQLA, through repo or outright sale to the market, by:
- (1) Implementing policies that set out the approach to periodic monetization of its HQLA, which are consistent with existing regulatory standards and accounting principles;
 - (2) Establishing and maintaining appropriate procedures and systems to monetize any of the covered bank's HQLA at any time in accordance with the relevant standard settlement periods and procedures for the asset class; and
 - (3) Periodically monetizing a sample of HQLA in order for the covered bank to test its access to the market, the effectiveness of its processes for monetization, the availability of the assets, and to minimize the risk of negative signaling during a period of actual stress.

Such periodic monetization may be carried out through the ordinary business activities of the covered bank or be done without reference to its day-to-day liquidity needs depending on the liquidity profile exhibited by the HQLA.

The asset must be monetized in varying amounts, at varying durations in case of repos, and in various related trading or financing markets in which the covered bank has access to. The cumulative effect of said periodic monetization over any twelve (12) month period must reasonably reflect a representative proportion of the minimum required HQLA, including with respect to asset type, maturity, and counterparty characteristics.

- vii. The covered bank must implement policies and procedures and maintain systems that monitor the current market value, as well as the composition of the stock of HQLA as to:
- (1) Identification by legal entity, location, currency, custodial account, or other relevant identifying factors;
 - (2) Appropriate diversification within asset classes (except for cash, government securities, and accounts with the Bangko Sentral) by asset type, counterparty, issuer, currency, borrowing capacity, or other factors associated with the liquidity risk of the assets; and
 - (3) Continuous qualification as eligible HQLA.

(2) Calculation and composition of HQLA

10. Two (2) categories of eligible assets¹, which must be held by the covered bank on the first day of the thirty (30)-day stress test period irrespective of residual maturity, shall be included in the stock of HQLA. The highest quality liquid assets, the Level 1 assets, shall be included without limit, while other HQLA, the Level 2 assets, can only comprise up to forty percent (40%) of the stock.

¹ To qualify as HQLA, the assets must satisfy the asset and market liquidity characteristics, and the operational requirements for monetization eligibility criteria.

11. The calculation of the stock of HQLA, specifically the forty percent (40%) cap on Level 2 assets, must take into account the required haircuts, as applicable, and the assumed unwinding of all short-term SFTs and collateral swap transactions maturing within thirty (30) calendar days that involve the exchange of HQLA. The details of the adjustment on calculation of the stock of HQLA are provided in *Annex B*.
12. The specific individual assets within an asset class that would be considered as liquid and readily-marketable shall be determined in accordance with the liquidity metrics. However, the designation of these specific individual assets as HQLA is not fixed and absolute as the liquidity characteristics and/or the liquidity derived from these assets that qualify them under this criterion may change over time.
13. If a liquid asset will no longer qualify as HQLA during the immediate LCR period, the covered bank shall be allowed to keep such liquid asset as HQLA during the said LCR period. This would give the covered bank additional time to adjust its stock of HQLA as needed or to replace the liquid asset.
14. For purpose of LCR, assets included in the stock of HQLA should be measured at its current market value¹. However, in case the covered bank hedges the market risk associated with the eligible HQLA, the current market value of the HQLA must be reduced by the outflow amount that would arise if the hedge were to be closed out early (in the event of the asset being sold).
15. For purpose of computing the consolidated LCR, the qualifying HQLA that are held at the branch/es abroad of domestic covered banks or subsidiary level (where applicable) shall be counted towards the stock of HQLA in an amount up to the total net cash outflows of said branch or subsidiary that are included in the consolidated LCR: *Provided*, That the HQLA are freely available and transferrable (i.e., without any regulatory, legal, tax, accounting or other impediment) to the parent covered bank for monetization.

(a) Level 1 Assets

16. Level 1 assets shall not be subject to any haircut under the LCR. These are not limited to the following asset classes:
 - a. Cash on hand;
 - b. Covered bank reserves in the Bangko Sentral;
 - c. Overnight and term deposits² with the Bangko Sentral, including reserve repos where the Bangko Sentral is the counterparty; and
 - d. Eligible securities representing claims on or guaranteed³ by -
 - i. The Philippine National Government (NG) and the Bangko Sentral⁴; or
 - ii. sovereigns, central banks, or PSEs of foreign countries, or by multilateral organizations, that are assigned a 0% risk weight under the Basel II Standardized Approach for credit risk, and are not an obligation by a covered bank or any of a covered bank's financial allied undertakings⁵.

(b) Level 2 Assets

17. Specific haircuts shall be applied to each Level 2 asset held in the stock. Level 2 assets are limited to the following asset classes:

Level 2 Asset	Haircut
a. Eligible securities representing claims on or guaranteed by LGUs, GOCCs, by sovereigns, central banks, or PSEs of foreign countries, or by MDBs, that are assigned with the following risk weight under the Basel II Standardized Approach for credit risk, and are not an obligation by a covered bank or any of a covered bank's financial allied undertakings ⁶ :	
i. Twenty percent (20%)	15%
ii. Fifty percent (50%)	50%

¹ Eligible HQLAs that are recognized at book value or at amortized cost such as securities designated as "held- to-maturity" must be included in the HQLA amount calculation at current market value.

² To the extent allowed to be drawn down in times of stress.

³ Securities which are guaranteed by the Philippine NG but were issued and remain as liabilities of a covered bank will not qualify for the stock of HQLA. The only exception is when the covered bank also qualifies as a GOCC with the highest credit quality, in which case, the securities issued by said covered bank could qualify for Level 2 assets if all necessary conditions are satisfied.

⁴ Issuances in foreign currencies shall be included in the stock to the extent of the covered bank's net cash outflows in that specific foreign currency.

⁵ For LCR purpose, a holding company shall only be deemed a financial corporate and/or a financial allied undertaking if the holding company is primarily engaged in financial intermediation or in auxiliary financial activities that are closely related to financial intermediation.

⁶ For LCR purpose, a holding company shall only be deemed a financial corporate and/or a financial allied undertaking if the holding company is primarily engaged in financial intermediation or in auxiliary financial activities that are closely related to financial intermediation.

b. Eligible corporate debt securities (including commercial papers) ¹ that are assigned with the following long-term credit rating ² by a third party credit assessment agency recognized by the Bangko Sentral ³ , and are not issued by a covered bank or any of a covered bank's financial allied undertakings ⁴ :	
i. At least AA- or its equivalent	15%
ii. Between A+ and BBB- or their equivalent	50%
c. Eligible common equity shares that are included in the main index of an organized exchange, and are not issued by a covered bank or any of a covered bank's financial allied undertakings ⁵ .	50%

Further, the Level 2 assets shall meet the metrics set out in Annex A-1, except for securities representing claims on or guaranteed by sovereigns, central covered banks and MDBs.

C. Total Net Cash Outflows

18. The total net cash outflows, which should include interests and installments that are expected to be received and paid during the LCR period, are calculated as follows:

$\text{Total net cash outflows over the next thirty (30) calendar days} = \text{Total expected cash outflows} - \text{Min} \{ \text{total expected cash inflows; seventy-five percent (75\%) of the total expected cash outflows} \}$

19. a. The bank is not allowed to double count items in the calculation of the LCR. If a liquid asset is included as part of the stock of high-quality liquid assets (HQLA) (which is the numerator), the cash inflows associated with that liquid asset should no longer count as part of the total expected cash inflows (which is part of the denominator).
- b. Cash flows arising from Foreign Exchange (FX) spot transactions that involve the full exchange of principal amounts need not be reported as a cash flow in determining compliance with the LCR in single currency. However, cash flows for FX spot transactions shall be reported in their original currency at gross amounts in determining compliance with the LCR in significant currency.
20. Where there is potential that a liability or obligation could be counted in multiple outflow categories (e.g., committed business facilities granted to cover debt maturing within the thirty (30)-calendar day period), only such liability or obligation that will yield the maximum amount of expected cash outflow must be included in the calculation of total expected cash outflows, except when a specific outflow treatment is clearly prescribed herein.
21. Cash flows arising from purchase/ sale of non-HQLA that are executed but not yet settled at the LCR measurement date shall count towards other cash outflows/ inflows. Outflows and inflows of HQLA- type assets that are or will be excluded from the covered bank's stock of HQLA due to operational requirements are treated like outflows or inflows of non-HQLA.
22. In calculating cash outflows and inflows, if considered to mature within the LCR period, the covered bank shall make the most conservative assumptions for determining the maturity or transaction date for an instrument or transaction:
- a. In general, the maturity of an instrument or obligation that would result in an outflow amount must be assumed to occur on the earliest possible contractual maturity date or the earliest possible date the obligation could be fulfilled; while the maturity of an instrument or transaction that would result in an inflow amount must be assumed to occur on the latest possible contractual maturity date or the latest possible date the transaction could occur;
- b. With respect to any option that would modify the maturity date, either explicit or embedded in the instrument or transaction, the covered bank shall assume that the option would be exercised at the earliest possible date in case of an outflow, and at the latest possible date in case of an inflow. In the event of an actual financial stress, however, the covered bank shall be allowed not to exercise the option

¹ Corporate debt securities (including commercial paper) in this respect include only plain-vanilla assets which valuation is readily available based on standard methods and does not depend on private knowledge, i.e., these do not include complex structured products or subordinated debt.

² In the absence of a long-term rating, a short-term rating equivalent in quality to the long-term rating shall be used. In case the security does not have a credit assessment by a recognized third party credit assessment agency, an internal rating equivalent to the probability of default corresponding to the required long-term credit rating shall be applied. In cases where there are two or more ratings which map into different risk weights, the higher of the two lowest risk weights should be used. External credit assessments for one entity within a corporate group cannot be used to proxy for the credit assessment of other entities within the same group. Such other entities should secure their own ratings.

³ The list of third party credit assessment agencies and the mapping of ratings given by these rating agencies are in Part IV.C of Appendix 59.

⁴ For LCR purpose, a holding company shall only be deemed a financial corporate and/or a financial allied undertaking if the holding company is primarily engaged in financial intermediation or in auxiliary financial activities that are closely related to financial intermediation

⁵ For LCR purpose, a holding company shall only be deemed a financial corporate and/or a financial allied undertaking if the holding company is primarily engaged in financial intermediation or in auxiliary financial activities that are closely related to financial intermediation

and to treat the original maturity date of the instrument or transaction as the maturity for purpose of computing the LCR: *Provided*, That the decision not to exercise the option would not subject the covered bank to any legal or reputational risk;

- c. If an option to adjust the maturity date is subject to a notice period, the covered bank must determine, for cash outflows, the earliest possible contractual maturity date regardless of the notice period; and for cash inflows, the latest possible contractual maturity date based on the borrower using the entire notice period;
- d. In the absence of a specific maturity date, i.e., there is no defined maturity or is an open maturity, the covered bank must consider the instrument or transaction to mature within the LCR period for cash outflows calculation; and after the LCR period for cash inflows calculation.

(3) Cash Outflows

23. When the covered bank, at LCR measurement date and in accordance with trade rules or market conventions, has specifically pre-positioned or deposited cash or any asset with a clearing and settlement system or with another financial institution to cover an obligation or settle a transaction that is set to mature within the LCR period, the cash outflow related to the obligation or transaction shall be excluded from cash outflow calculation: *Provided*, however, That the cash or any asset pre- positioned or deposited is neither treated as cash inflow nor counted in the stock of HQLA.
24. Funds subject to special arrangements whereby cash balances are cleared and transferred into a main account, other than those maintained within the covered bank, at the end of each day or within the LCR period (e.g., the Treasury Single Account System) shall automatically receive a 100% outflow rate.

(a) Deposits

25. Regardless of maturity, all deposits, unless otherwise excluded under the cases specified in the succeeding paragraph, shall be included in the calculation of total expected cash outflows. These accounts are categorized either as retail or wholesale, with wholesale accounts classified as either operational or non-operational, with different outflow rates assigned accordingly. To capture the relative volatility of a deposit account during a period of stress, the outflow rates for retail deposits are calibrated on a per account basis. Wholesale operational and non-operational deposits, on the other hand, receive outflow rates that are based on the established operational relationship of the depositor with the covered bank.
26. A deposit account with residual maturity or withdrawal notice period of greater than thirty (30) calendar days may be excluded from the calculation of the total expected cash outflows under the following circumstances:
 - a. The deposit is contractually pledged to the covered bank as collateral to secure a credit facility or loan, where:
 - i. the loan will not mature or be settled during the LCR period; and
 - ii. the pledge or hold-out arrangement is subject to a legally enforceable contract disallowing withdrawal of the deposit before the loan is fully settled or repaid.

Said exclusion, however, does not apply to a deposit which is pledged against an undrawn facility, in which case the higher expected cash outflow between the undrawn facility or the pledged deposit shall be used; or

- b. The depositor has no contractual or legal discretion to withdraw said deposit or pre- terminate the account within the thirty (30)-day horizon of the LCR (e.g., negotiable certificates of time deposits).

(i) Retail deposits: 5%, 10% or 15% run-off rate

27. Retail deposits shall be assigned with specific run-off rates depending on the outstanding balance per account:

Outstanding Balance Per Account	Run-off Rate
P500,000 and below	5%
P500,000.01 to P4,000,000	10%
Over P4,000,000	15%

(ii) *Wholesale deposits: Operational deposits: 30% run-off rate*

28. Operational deposits, which are maintained by wholesale clients to avail the operational services offered by the covered bank, shall receive a thirty percent (30%) outflow rate.
29. For LCR calculation, all current and savings (CASA) accounts, including negotiable order of withdrawal (NOW) accounts, shall automatically be categorized as operational deposits considering that said accounts are generally characterized by the following:
- The client is reliant on the covered bank as an independent third party that provides the operational service that will fulfill the client's normal business operation, rendering it unlikely for the client to transfer its banking activity to another covered bank within thirty (30) days;
 - The funds held in this account are utilized for the operational needs of the client and no excess balance is assumed to be retained for the purpose of earning interest, or any economic incentive (i.e., rewards, rebates, reduction of fees or charges for other covered bank services, etc.) from the covered bank; and
 - The operational service is usually governed by a legally binding written agreement, which can only be terminated by the client either by giving prior notice of at least thirty (30) days or by paying significant switching costs (such as those related to transaction, information technology, early termination or legal costs) if the operational deposit is withdrawn before thirty (30) days.
30. In the case of the Philippine branch of a foreign covered bank, the amount of "Net Due To Head Office/Branches/Agencies Abroad" account shall be treated as operational deposit for LCR purpose. The "Due From" and "Due To" accounts are essentially clearing accounts through which the head office and branch transactions of the foreign bank are cleared, hence, for LCR purpose, the "Net Due To" balance shall be assumed as operational in nature. However, accumulated "Unremitted Profits" and "Losses in Operation" shall not be included in the LCR calculation considering that these balances are part of regulatory capital for purposes of computing risk-based capital adequacy ratio and adjusted net worth.
31. Deposits received specifically for clearing and settlement of foreign exchange transactions (e.g., amount of funding provided by the Philippine Domestic Dollar Transfer System [PDDTS] participants) shall be classified as operational accounts. These accounts are deemed maintained with the settlement/depository covered bank solely for effecting credits and debits arising from foreign exchange transactions, without having to go through a correspondent covered bank in the country where the foreign currency to be settled originated.

(iii) *Wholesale deposits: Non-Operational deposits: 20%, 40% or 100% run-off rate*

32. The covered bank shall apply a run-off rate of twenty percent (20%) on term and other deposits of wholesale clients not classified as operational, provided the outstanding balance is fully insured by the PDIC. Otherwise, said accounts shall be assigned with the following run-off rates:

Outstanding Balance Per Account	Run-off Rate
Philippine NG; LGUs; GOCCs; Bangko Sentral; sovereigns, central banks, PSEs of foreign countries; MDBs	40%
Non-financial corporates	40%
Other entities not included in the prior categories	100%

33. Irrespective of outstanding balance, the term and other non-operational deposits provided by covered banks, financial corporates, trust and other fiduciaries, beneficiaries, conduits and special purpose vehicles (SPVs), and by affiliated entities of the covered bank shall receive a 100% run-off rate at all times.

(iv) *Deposits received under correspondent banking and brokering services agreements*

34. The criterion for an operational deposit where the client has a substantive dependency on the continued operation of the deposit account, which serves as a practical impediment to closing or moving such account to another covered bank, is not consistently the case with correspondent banking and brokering services activities. Thus, deposits arising from correspondent banking and brokering services will be treated as wholesale non-operational deposit accounts.
35. Customer cash balances arising from the provision of brokering services should be considered separate from any required segregated accounts related to client protection regimes, and should not be netted against other customer exposures included in this LCR standard.

(b) Unsecured wholesale funding

36. The expected cash outflow that will be calculated for other unsecured wholesale funding shall generally comprise of:
- Any obligation or instrument issued by the covered bank that is not eligible as capital, and hence, treated as borrowings which the covered bank expects to fulfill within the LCR period;
 - All unsecured wholesale funding that is callable, or has an earliest contractual maturity date within the next thirty (30) calendar days; and
 - Unsecured wholesale funding with undetermined maturity.
37. A range of outflow rates is assigned to this wholesale fund depending on the assumed stability of the funding in times of stress, i.e., in consideration of the sensitivity of the fund providers to the rate offered and to the credit quality and solvency of the borrowing bank, the type of wholesale client and their level of sophistication. However, this category excludes:
- Debt instruments issued by the covered bank exclusively in the retail market, such that those instruments cannot be bought and held by parties other than retail clients, which shall be treated appropriately under the retail funding category; and
 - Liabilities and obligations related to derivative contracts, which outflow calculation shall be taken up under the derivatives contracts category.
- (i) *Unsecured wholesale funding provided by the Philippine NG, LGUs, GOCCs, Bangko Sentral; by sovereigns, central banks, PSEs of foreign countries; by MDBs and by non-financial corporates: 40% outflow rate*
38. The covered bank shall apply a cash outflow rate of forty percent (40%) on all unsecured funds received from the abovementioned entities.
- (ii) *Unsecured wholesale funding from covered banks, financial corporates and from other wholesale clients: 100% outflow rate*
39. Unsecured funding provided by covered banks, financial corporates, trust and other fiduciaries, beneficiaries, conduits and SPVs, by affiliated entities of the covered bank, and by other entities not included in the prior category shall receive a 100% outflow factor.

(c) Secured funding

40. The cash outflow on secured funding shall be calculated based on the amount of funds raised through the transaction and not on the value of the underlying collateral. In case of collateral swaps or collateral lending transactions, the outflow amount shall be based on the current market value of the asset received.
41. The outflow rates to be applied to outstanding secured funding transactions maturing within the thirty (30)-calendar day period shall depend on the quality of the underlying collateral and/or the counterparty, as follows:

Underlying Collateral and/or Counterparty	Outflow Rate
Level 1 assets <i>OR</i> funding provided by the Bangko Sentral	0%
Level 2 assets with 15% haircut	15%
Non-HQLA <i>AND</i> funding provided by the Philippine NG or by LGUs that are assigned with 20% credit risk weight or lower, or by MDBs	25%
Level 2 assets without 50% haircut	50%
All other maturing secured funding transactions not specified in the prior categories	100%

(d) Derivatives contracts

42. The bank shall calculate expected contractual derivative cash inflows and outflows in accordance with existing valuation methodologies. A 100% outflow factor shall be assigned to net cash outflows within the LCR period from each derivative contract maturing or expected to be pre-terminated within the LCR period.
43. Where derivative payments are collateralized by HQLA, the cash outflows shall be calculated net of any corresponding cash or collateral inflows that would result, all other things being equal, from contractual obligations for cash or collateral to be posted to the bank; Provided, the bank is legally entitled and operationally capable to re-use the collateral in new cash raising transactions once the collateral is received. This is in line with the principle that banks should not double count liquidity inflows and outflows.

44. Options shall be assumed to be exercised when they are "in the money" to the option buyer.
45. Additional cash outflow¹⁴ for liquidity requirements resulting from contingent obligations embedded in derivative contracts, if any, shall be included in the calculation of total expected cash outflows, with outflow rates assigned as follows:
- (i) *Potential valuation changes on posted collateral securing derivative and other transactions: 20% outflow rate*
46. When a mark-to-market exposure from a derivative position is secured by securities other than those that qualify as Level 1 assets, an additional stock of HQLA shall be maintained by the bank posting such collateral to cover the potential loss of market value for these securities. Twenty percent (20%) of the value of such posted collateral, net of collateral received on a counterparty basis, shall be included in the calculation of total expected cash outflows, *Provided*, That the collateral received is not subject to restrictions on re-use or rehypothecation. This 20% shall be calculated based on the amount required to be posted as collateral after applying the relevant haircut prescribed for these assets. Any collateral that is in a segregated margin account can only be used to offset outflows that are associated with payments that are eligible to be offset from that same account.
- (ii) *Market valuation changes on derivative or other transactions: 100% outflow rate*
47. Potential valuation changes of derivative or other transactions, which are subject to collateral requirements, require additional outflows. Using the historical look-back approach, the outflows shall be based on the fluctuations in the total current market value amount of collaterals posted for all derivatives for each day within consecutive periods of thirty (30) days. The amount of additional expected cash outflows shall be equal to the largest difference between the highest and the lowest amount of accumulated collateral posted during any thirty (30)- day period in the last 24 months¹⁵ preceding the date of the LCR calculation. The collateral amounts pledged towards the bank shall not be taken into account.
- (iii) *Downgrade triggers embedded in financing transactions, derivatives and other contracts¹: 100% outflow rate*
48. As covered bank faces potentially substantial liquidity risk exposures to the valuation changes of collaterals posted by the covered bank on its derivatives and other transactions, the increased liquidity needed to cover these market valuation changes should be included in the LCR. Using the historical look-back approach, the collateral outflows shall be based on the fluctuations in the total current market value amount of collaterals posted for all derivatives for each day within consecutive periods of thirty (30) days. The amount of additional expected cash outflows shall be equal to the largest difference between the highest and the lowest amount of accumulated collateral posted during any thirty (30)-day period in the last twenty four (24) months² preceding the date of the LCR calculation. The collateral amounts pledged towards the covered bank shall not be taken into account.
- (iv) *Excess non-segregated collateral held by the covered bank: 100% outflow rate*
49. An additional 100% cash outflow based on the market value of the collateral held must be calculated as part of the total expected cash outflows in cases where the bank holds a collateral that:
- a. Can be contractually called at any time by the counterparty because the collateral posted exceeds the counterparty's current collateral requirement under the contract; and
 - b. Is not segregated from the bank's other assets (such that the bank holding the collateral may have already rehypothecated the asset or counted the same as HQLA).
- (v) *Contractually required collateral which are not yet posted: 100% outflow rate*
50. For a collateral that is contractually due but the posting of which is not yet demanded by the counterparty, the bank shall increase the total expected cash outflows by an amount equivalent to 100% of the market value of the collateral.
- (vi) *Collateral substitution to non-HQLA or lower-quality HQLA³: 100% outflow rate*
51. When a contract for a transaction allows the HQLA collateral received that has not been segregated to be substituted by other collateral without the consent of the bank, an additional outflow shall be included in the calculation of the total expected cash outflows. The basis for calculating the amount of the outflow depends on

¹ This applies to contracts governing derivatives and other transactions that have clauses that require the posting of additional collateral, drawdown of contingent facilities, or early repayment of existing liabilities upon the covered bank's downgrade by a recognized credit rating organization. Contracts that include early termination agreements if a triggering event occurs (e.g., credit rating downgrade) shall not be covered by this requirement.

² The two (2)-year observation period consists of approximately 730 periods of thirty (30)-day, partly overlapping, rolling window.

³ This provision for additional liquidity requirement shall be applicable only when the received HQLA collateral actually counts toward the covered bank's stock of HQLA, and its maturity value after applying the respective haircut is lower than the liquidity value of the potential collateral substitution.

the type of asset that may serve as a potential substitute under the contract. Where the potential substitute collateral is a non-HQLA, the amount of outflow shall be equivalent to 100% of the market value of the HQLA collateral held by the bank. Where the potential substitute is another HQLA but of a lower quality (e.g., a Level 1 asset is potentially substituted by a Level 2 asset), the amount of the outflow shall be equivalent to the market value of the collateral received multiplied by the difference between the haircuts of the collateral received and the potential substitute collateral.

(e) Loss of funding from structured financing instruments (SFIs)

(i) *Asset-backed securities and other SFIs allowed under existing regulations: 100% outflow rate*

52. Under the assumption that the funding required to refinance the bank- issued SFIs will not be available, the covered bank shall assign a 100% outflow rate to the total outstanding amount of these instruments maturing within the thirty (30)-day period.

(ii) *Asset-backed commercial paper, conduits, securities investment vehicles (SIVs) and other such financing facilities allowed under existing regulations: 100% outflow rates*

53. To take account of the potential liquidity risks pertaining to the covered bank's own structured financing facilities that include the issuance of short-term asset-backed commercial paper, the covered bank shall assume that its ability to refinance the outstanding maturing instrument will be uncertain and shall include in the calculation of expected cash outflows 100% of the amount of the maturing debt.

54. In cases where the documentation associated with the financing arrangement contractually includes derivatives or derivative-like components that allow the "return" of assets, or that require the covered bank (as original asset transferor) to provide liquidity, effectively ending the financing arrangement (liquidity puts) within the thirty (30)-day period, the covered bank shall increase its expected cash outflows by another 100% based on the amount of assets that could potentially be returned, or on the liquidity required.

55. Where the structured financing activities of the covered bank are conducted through a special purpose entity (such as a special purpose vehicle, conduit or structured investment vehicle), the covered bank should look through to the maturity of the debt instruments issued by the entity and to any embedded options in financing arrangements that may potentially trigger the "return" of assets or the need for liquidity, irrespective of whether or not the SPV is consolidated.

(f) Drawdowns on committed business facilities

56. For LCR purpose, committed business facilities shall include: (a) lending commitments (e.g., Committed Credit Line for Commercial Paper Issued); (b) direct credit substitutes and transaction- related contingencies that are assigned 100% and fifty percent (50%) credit conversion factors under the Basel II Standardized Approach for credit risk, respectively; and (c) all other committed funding facilities extended by the covered bank excluding credit card lines and trade-related guarantees.

57. For purpose of expected cash outflows calculation, all committed obligations that are assumed to be drawn will remain outstanding at the amounts assigned throughout the duration of the stress test, regardless of maturity. The currently undrawn portion of each committed obligation shall be calculated net of HQLA collateral, if any¹: *Provided*:

- a. The covered bank is legally entitled and operationally capable to re-use the collateral in new cash raising transactions once the facility is drawn; and
- b. There is no undue correlation between the probability of drawing the facility and the market value of the collateral.

The collateral can be netted against the outstanding amount of the committed obligation to the extent that this collateral is not already counted in the stock of HQLA.

58. To calculate the expected cash outflows, the covered bank shall assume the amount of contractual loan drawdowns from irrevocable committed obligations and the estimated drawdowns from conditionally revocable obligations within the thirty (30)-day period using the following drawdown rates against the undrawn portion of these committed obligations:

Counterparties	Drawdown Rate
Retail clients	5%

¹ The HQLA in this case could have already been posted as collateral by the counterparty to secure the facility or is contractually obliged to be posted when the counterparty will draw down the facility.

Philippine NG; LGUs; GOCCs; sovereigns, central banks, PSEs of foreign countries; MDBs	10 %
Non-financial corporates	10%
Covered banks subject to prudential supervision	40%
Financial corporates, trust and other fiduciaries, beneficiaries, SPEs conduits and SPVs (excluding covered bank's own structured financing facilities)	100 %
Other entities not included in the prior categories	100 %

(g) Other contractual obligations within a thirty (30)-day period

59. The covered bank shall calculate additional 100% cash outflows on each of the following contractual obligation to extend funds within the next thirty (30) calendar days:
- Any contractual lending obligations to financial institutions not captured elsewhere in this standard;
 - If the total of all contractual obligations to extend funds to retail and non-financial corporates within the next thirty (30) calendar days (not captured in the prior categories) exceeds fifty percent (50%) of the total contractual inflows due in the next thirty (30) calendar days from these clients, the difference should be reported as a 100% outflow;
 - Forward reverse repos (with a binding obligation to accept) that start within and mature beyond the LCR period, where the cash outflow should be netted against the market value of the collateral received after deducting the applicable haircuts;
 - In case of forward collateral swaps, the net amount between the market values of the assets extended and received after deducting the haircuts applied to the respective assets in the LCR counts towards "other contractual outflows" or "other contractual inflows" depending on which amount is higher;
 - Any other contractual cash outflows such as outflows to cover unsecured collateral borrowings, uncovered short positions¹, dividends or contractual interest payments, with explanation given as to what comprises this bucket. In case, however, the covered bank's short position is being covered by a collateralized securities financing transaction, the covered bank should assume the short position will be maintained throughout the thirty (30)-day period and thus, will receive a 0% outflow rate.
60. Contractual obligations by the covered bank related to operating costs (such as rents, salaries, utilities, and other similar payments) are not included in the calculation of LCR.

(h) Other contingent funding obligations

61. These include products and instruments for which the client or holder has specific expectations regarding the liquidity and marketability of the product or instrument and for which failure to satisfy client expectations in a commercially reasonable manner would likely cause material reputational damage to the covered bank or otherwise impair ongoing viability.
62. Other contingent funding obligations referred to in this category shall consist, among others, of the following:
- Unused portions of commitments to extend credit through credit cards;
 - Guarantees issued related to trade finance obligations directly underpinned by the movement of goods and/or the provision of services;
 - Unconditionally revocable "uncommitted" credit lines and business facilities;
 - Joint ventures or minority investments in entities which are not consolidated for financial reporting purposes but there is expectation that the covered bank will be the main liquidity provider when the entity is in need of funding; and
 - Non-contractual contingent funding obligations related to:
 - debt repurchases of the covered bank's own debt or that of related conduits, SIVs and other such financing facilities;

¹ In the case of a covered bank's short positions, if the short position is being covered by an unsecured security borrowing, the covered bank should assume the unsecured security borrowing of collateral from financial market participants would run-off in full, leading to a 100% outflow of either cash or HQLA to secure the borrowing, or cash to close out the short position by buying back the security.

- ii. structured products where customers anticipate ready marketability;
 - iii. managed funds such as money market funds and other types of collective investment funds that are marketed by the covered bank with the objective of maintaining stable value¹; and
 - iv. outstanding debt securities (unsecured and secured, term as well as short-term) having maturities greater than thirty (30) calendar days, where the covered bank (or its affiliated entity) is the issuer, the market maker or the dealer, or has acted as an originator, sponsor, marketing or selling agent, to cover the potential repurchase of such outstanding securities.
63. To account for the potential liquidity exposure to these contingent liabilities, a minimum of three percent (3%) drawdown based on the contracted amount, on the undrawn portion of the facility, or on the value of the fund or debt instruments, whichever is applicable, shall be calculated as additional expected cash outflows. However, when there is reasonable expectation based on the covered bank's assessment that the contingent outflow will materialize within the LCR period, thereby rendering it necessary for the covered bank to provide funding support or to extend funds; or the Bangko Sentral has determined the covered bank's systems and processes for identifying, measuring and monitoring contingent funding risks to be inadequate and ineffective in assessing the related risks that could potentially materialize, the full amount of the contingent funding obligation will receive a 100% outflow rate.
64. For non-contractual obligations where customer short positions are covered by other customers' collateral that are not qualified as HQLA, a fifty percent (50%) run-off factor of the contingent obligations shall be calculated in the total cash outflows under the assumption that the covered bank may be obligated to find additional sources of funding for these positions in the event of client withdrawals.
65. To estimate the potential liquidity demand associated with these contingent funding obligations, the covered bank must have a robust framework (i.e., procedures, systems and tools) that at a minimum, allows assessment of contingent funding risks, as follows:
- a. Identify the nature of the contingent obligation and credit worthiness of the counterparty, as well as the exposures to business and geographical sectors, as counterparties in the same sectors may be affected by stress at the same time;
 - b. Measure the normal level of cash outflows arising from the relevant off-balance sheet instruments under routine conditions and then estimate the scope of increase in these outflows during periods of stress;
 - c. Analyze the liquidity trigger events and the changes to underlying risk factors (e.g., changes in economic variables or conditions, credit rating downgrades, country risk issues, specific market disruptions and the alteration of contracts by governing legal, accounting, or tax systems and other similar changes) that would result to liquidity draws on these off-balance sheet positions. This analysis should include appropriate assumptions on the behavior of both the covered bank and its counterparties; and
 - d. Determine which among these contingent obligations and counterparties are of particular importance due to their prevalent use of liquidity, both under normal and adverse market conditions.

(4) Cash inflows

66. *Cap on total inflows.* In order to prevent covered banks from relying solely on anticipated inflows to meet their liquidity requirement when there is a possibility that a portion of expected cash inflows may become unavailable in a short-term stressed environment, the amount of inflows that can offset outflows is capped at seventy-five (75%) of total expected cash outflows. This requires that at a minimum, at least one-quarter of the total expected cash outflow amount should be covered by HQLA.
67. When considering available cash inflows, the covered bank should only include inflows (including interest payments and installments) from outstanding exposures that are contractually due within the LCR period, and are fully performing and for which the covered bank has no reason to expect a default within the LCR period.
68. For LCR purpose, the following shall not be counted as cash inflows:
- a. Market value of assets that already qualify in the stock of HQLA;
 - b. Deposits held at other financial institutions for operational purposes, such as for clearing, custody, and cash management purposes, including funds provided for clearing and settlement of foreign exchange

¹ This excludes funds managed by the covered bank's trust department.

transactions (e.g., deposits placed to facilitate PDDTS transactions). These deposits are necessary for operational reasons, and are therefore not available to the depositing bank to repay other outflows.

- c. Amount of “Net Due From Head Office/Branches/Agencies Abroad” account in case of the Philippine branch of a foreign bank;
- d. Payments from loans, receivables and other assets that are considered past due, or that the covered bank has reason to expect will become non-performing exposure within the LCR period;
- e. Potential or contingent inflows from committed credit lines, business or other funding facilities that the covered bank holds at other institutions for its own purposes;
- f. Amounts related to non-financial revenues; and
- g. Amounts payable to the covered bank with respect to any transaction that has no specific contractual maturity date, i.e., no defined maturity or is open maturity, or that matures after the LCR period.

(a) Secured lending, including reserve repos¹ and securities borrowings

69. For secured lending maturing within the LCR period, the covered bank shall calculate the expected cash inflow using the following inflow rates applied to the outstanding amount of the secured lending transaction:

Maturing Secured Lending Transactions Backed by the Following Asset Category	Inflow Rate
Level 1 assets	0 %
Level 2 assets with 15% Haircut	15%
Level 2 assets with 50% Haircut	50%
Margin lending backed by all other collateral	50%
All other collaterals	100%

70. If the collateral obtained through reverse repo, securities borrowing, or collateral swap, which matures within the LCR period, is re-used (i.e., rehypothecated) and is used to cover short positions that could be extended beyond thirty (30) days, the covered bank should assume that such reverse repo or securities borrowing arrangements will be rolled-over. To reflect the need to continue to cover the short position or to re-purchase the relevant securities, no cash inflow will be expected, hence a 0% inflow rate.

(b) Loans, receivables and other credit facilities

71. The covered bank shall be assumed to continue to extend and roll-over loans and other credits to clients, either secured or unsecured, at a certain level even during times of stress. In this view, all payments (including interest payments and installments) shall be assumed to be received by the covered bank at a net inflow rate, as follows:

Counterparties	Inflow Rate
Retail clients	50%
Philippine NG; LGUs; GOCCs; sovereigns, PSEs of foreign countries; MDBs	50%
Non-financial corporate	50%
Covered banks; financial corporates; trust and other fiduciaries; beneficiaries; Bangko Sentral; and central banks of foreign countries	100%
Other entities not included in the prior categories	100%

72. For revolving credit facilities, the covered bank shall assume that the existing loan or financing is rolled over and that no principal or interest payment shall be received from the counterparty. However, in similar arrangements where the covered bank is not under obligation to extend credit and/or the covered bank reserves the right to revoke or withdraw the agreement and the facility in its sole and absolute discretion at any time, the principal and interest payments for the loan shall be assumed to be received by the covered bank at the foregoing net inflow rates.
73. In case of loans with no specific maturity, the covered bank shall include as cash inflows, at the rates prescribed above, the minimum payments of principal, fee or interest associated with the open maturity loan, *Provided*, That such payments are contractually due within the LCR period.

¹ This excludes reverse repo transactions where the Bangko Sentral is the counterparty, as such is already treated as HQLA.

(c) Other cash inflows

74. The following instruments or transactions maturing within the LCR period shall receive a 100% inflow percentage:
- a. Deposits held at other financial institutions for non-operational purposes;
 - b. Deposits pledged against an undrawn credit line or business facility;
 - c. Cash balances arising from the provision of brokering services and similar arrangements;
 - d. Cash balances released from segregated accounts held for the protection of customer trading assets, *Provided*, That these segregated balances are maintained in HQLA;
 - e. Cash inflows associated with non- HQLA, as well with HQLA-type assets that are or will be excluded from the covered bank's stock of HQLA due to operational requirement;
 - f. Forward repos that start within and mature beyond the LCR period, where the cash inflow should be netted against the market value of the collateral extended after deducting the applicable haircuts; and
 - g. The sum of all cash inflows from derivatives transactions calculated in accordance with *paragraphs 42 to 44* under *Section II.C – Total Net Cash Outflows*.

Part II. LCR Disclosure Requirements

1. In the quarterly published balance sheet, the covered bank, at a minimum, must publicly disclosed the: (i) total HQLA; (ii) total net cash outflows; and (iii) LCR ratio, based on the LCR position for the quarter.
2. On the covered bank's website or in its other published reports, the disclosure must be presented in a format following a common template (Annex C), and must contain the following minimum requirements:
 - a. Data must be reported as simple averages of quarterly observations over the last twelve (12) months. The number of data points used in calculating the average figures in the template must also be disclosed.
 - b. Sufficient qualitative discussion around the LCR to facilitate understanding of the results and data must be provided. Where significant to the LCR, the covered bank should discuss:
 - i. the main drivers of the LCR results and the evolution of the contribution of inputs to the LCR's calculation over time;
 - ii. intra-period changes as well as changes over time;
 - iii. the composition of HQLA;
 - iv. concentration of funding sources;
 - v. derivative exposures and potential collateral calls;
 - vi. currency mismatch in the LCR;
 - vii. a description of the degree of centralization of liquidity management and interaction between the covered bank's units; and
 - viii. other inflows and outflows in the LCR calculation that are not captured in the LCR common template but which the covered bank considers to be relevant for its liquidity profile.
3. The covered bank may also present additional information relevant to its business model that may not be adequately captured by the LCR standard. Additional quantitative information shall allow market participants to better understand and analyze any LCR figures disclosed while additional qualitative discussion of LCR results and its related components shall enable them to gain a more thorough understanding of the covered bank's internal liquidity risk management and positions. At the option of the covered bank, the following additional information may be provided:
 - a. Quantitative disclosures:
 - a. concentration limits on collateral pools and sources of funding (both products and counterparties);
 - b. liquidity exposures and funding needs at the level of individual legal entities, foreign branches and subsidiaries, taking into account legal, regulatory and operational limitations on the transferability of liquidity; and
 - c. balance sheet and off-balance sheet items broken down into maturity buckets and the resultant liquidity gaps.
 - b. Qualitative disclosures:
 - a. governance of liquidity risk management, including: risk tolerance; structure and responsibilities for liquidity risk management; internal liquidity reporting; and communication of liquidity risk strategy, policies and practices across business lines and with the board of directors;
 - b. funding strategy, including policies on diversification in the sources and tenor of funding, and whether the funding strategy is centralized or decentralized;
 - c. liquidity risk mitigation techniques;
 - d. an explanation of how stress testing is used; and

- e. an outline of contingency funding plans.
4. The covered bank must also make available on its website, or through publicly available regulatory reports, an archive of all disclosure templates relating to prior reporting periods. Irrespective of the location of the disclosure, the minimum disclosure requirements must be presented in accordance with the format and template defined by this standard.

(Circular Nos. 1035 dated 15 March 2019, 996 dated 08 February 2018, 969 dated 22 August 2017, 930 dated 18 November 2016, and 905 dated 10 March 2016)

LIQUIDITY CHARACTERISTICS, CRITERIA AND METRICS

Characteristics		Criteria	Examples of metrics/measures
Asset characteristics	Asset quality	Probability of default	Ratings
			Spreads
			Price drops during stress
		Flight to quality (performance during distress)	Performance relative to risk-free asset
			Correlation with financial stress
		Volatility	Implied and actual volatility
	Duration/time to maturity		
	Transparency and standardization	Collateral eligibility	Eligible/haircuts at financial market infrastructures
			Across private counterparties
		Standardization	Small number of standardized product types
			Standardized risk modeling
			Well-understood risk properties
		Price transparency	Pre-trade pricing broadly available
			Post-trade pricing broadly available
Market structure characteristics		Trading venues	Electronic (including hybrids)
	Exchange-traded		
	Active and sizeable market	Size	Volumes (number of trades and peso value)
			Outstandings
		Related financing markets	Repo financing available
			Other secured/forward financing
		Related hedging markets	Related hedging markets
			Market participation
Large number of active market maker			
Market liquidity	Liquidity	Depth/price impact of trading	Amihud ratio (price changes relative to volume)
			Autocorrelations of returns
		Breadth	Effective bid-ask spreads (ex post)
			Quoted bid-ask spreads (ex ante)
		Immediacy	Average number of trades per day
			Number of days with zero return/volume

(Circular No. 905 dated 10 March 2016)

LIQUIDITY METRICS FOR LEVEL 2 ASSETS

Pursuant to paragraph 17 of Part I.II of *Appendix 72*, a security must meet the following metrics to be eligible as a Level 2 Asset:

- (a) The security has a long term issuer rating that is investment grade or its equivalent;
- (b) The security is traded in the secondary market with an ample number of market participants on both the buying and selling side of transactions; and
- (c) There is a means to obtain market information on a security (i.e., bid, ask and done price). For peso securities, information on trade volume should also be available.

(Circular No. 996 dated 08 February 2019)

CALCULATION OF THE CAP ON LEVEL 2 ASSETS WITH REGARD TO SHORT-TERM SECURITIES FINANCING TRANSACTIONS

1. The formula for the calculation of the stock of HQLA is as follows:

$$\text{Stock of HQLA} = \text{Unadjusted Level 1 Assets} + \text{Unadjusted Level 2 Assets} - \text{Adjusted for 40\% cap on Level 2 Assets}$$

Where:

$$\text{Adjustment for 40\% cap} = \text{Max} (\text{Adjustment Stock of Level 2 Assets} - 2/3 * \text{Adjusted Stock of Level 1 Assets}, 0)$$

$$\text{Adjusted Level 1 Assets} = \text{Unadjusted Level 1 Assets} + \text{Level 1 assets lent or placed as collateral under short term}^1 \text{ secured funding, secured lending or collateral swap transactions} - \text{Level 1 assets borrowed or received as collateral under short-term}^1 \text{ secured funding, secured lending or collateral swap transactions}$$

$$\text{Adjusted Level 2 Assets} = \text{Unadjusted Level 2 Assets} + \text{Level 2 assets lent or placed as collateral under short-term}^1 \text{ secured funding, secured lending or collateral swap transactions} - \text{Level 2 assets borrowed or received as collateral under short-term}^1 \text{ secured funding, secured lending or collateral swap transactions}$$

Alternatively, the formula can be expressed as:

$$\text{Stock of HQLA} = \text{Unadjusted Level 1 Assets} + \text{Unadjusted Level 2 Assets} - \text{Max} (\text{Adjusted Stock of Level 2 Assets} - 2/3 * \text{Adjusted Level 1 Assets}, 0)$$

2. The calculation of the forty percent (40%) cap on Level 2 assets should take into account the impact on the stock of HQLA of the amounts of Level 1 and Level 2 assets involved in secured funding, secured lending and collateral swap transactions maturing within thirty (30) calendar days. The maximum amount of adjusted Level 2 assets in the stock of HQLA is equal to two-thirds of the adjusted amount of Level 1 assets after haircuts have been applied.
3. The adjusted amount of Level 1 assets is defined as the amount of Level 1 assets that would result after unwinding those short-term secured funding, secured lending and collateral swap transactions involving the exchange of any HQLA for any Level 1 assets (including cash) that meet, or would meet if held unencumbered, the operational requirements for HQLA.
4. The adjusted amount of Level 2 assets is defined as the amount of Level 2 assets that would result after unwinding those short-term secured funding, secured lending and collateral swap transactions involving the exchange of any HQLA for any Level 2 assets that meet, or would meet if held unencumbered, the operational requirements for HQLA.

(Circular No. 905 dated 10 March 2016)

¹ Pertains to maturity date up to and including 30 calendar days.

FORMAT OF SWORN CERTIFICATION OF COMPLIANCE WITH THE LIQUIDITY COVERAGE RATIO (LCR) REQUIREMENTS

(Appendix to Sec. 145-Q on Liquidity Coverage Ratio)

**SWORN CERTIFICATION OF COMPLIANCE WITH
THE LIQUIDITY COVERAGE RATIO (LCR) REQUIREMENTS**

<NAME OF BANK>

C E R T I F I C A T I O N

Pursuant to Section 145-Q (*Liquidity Coverage Ratio*) of the Manual of Regulations for Non-Bank Financial Institutions (MORNBFII), we hereby certify that the Quasi-Bank has fully complied with the minimum LCR requirement on all calendar days of the month ended _____ 20__.

We further certify to the best of our knowledge that the above statement is true and correct.

_____ President/CEO or Country Head TIN: _____	_____ <i>[Other authorized signatories for Category A-1 report]</i> TIN: _____
--	--

_____ <i>[Officer Responsible for the Management of Liquidity]</i> TIN: _____	_____ Compliance Officer TIN: _____
---	---

SUBSCRIBED AND SWORN TO before me this ____ day of _____ 20__, at _____, Philippines affiant/s exhibiting their government-issued identification cards as follows:

NAME	GOVERNMENT-ISSUED ID	DATE OF ISSUE	PLACE OF ISSUE

Witness my hand and notarial seal on the date and place above-written.

NOTARY PUBLIC

Doc. No. ____;
Page No. ____;
Book No. ____;
Series of 20__.

(In case of occurrences of non-compliance/s during the month, the certification should read as follows:)

Pursuant to Section 145-Q (*Liquidity Coverage Ratio*) of the MORNBF, we hereby certify that the Quasi-Bank has fully complied with the minimum LCR requirement on all calendar days of the month ended _____ 20____, except on (*example*):

Dates (Day)	LCR Compliance (%)
11 January 2018 (Thursday)	99.56%
15 January 2018 (Monday)	98.10%
16 January 2018 (Tuesday)	98.97%

A shortfall notice containing the minimum information required under Appendix Q-82 of the MORNBF was submitted to the Bangko Sentral on _____, through the appropriate supervising department of the Bangko Sentral.

We further certify to the best of our knowledge that above statement is true and correct.

_____ President/CEO or Country Head TIN: _____	_____ [Other authorized signatories for Category A-1 report] TIN: _____
_____ [Officer Responsible for the Management of Liquidity] TIN: _____	_____ Compliance Officer TIN: _____

(Circular No.996 dated 8 February 2018)

GUIDELINES ON THE BANGKO SENTRAL IMPLEMENTATION OF THE NSFR

The guidelines on the implementation of the NSFR are aligned with the provisions of the “Basel III: The Net Stable Funding Ratio” document issued by the Basel Committee on Banking Supervision (BCBS). National discretion is exercised in certain areas considering domestic conditions. For purposes of these guidelines, the definitions used in the LCR Framework as provided in *Appendix 72* of the Manual of Regulations for Banks (MORB) shall apply, unless otherwise explicitly provided.

A. Available Stable Funding

1. The available stable funding (ASF) represents the portion of the covered bank’s capital and liabilities that are expected to be reliable sources of funds over a one-year time horizon. The amount of available stable funding is determined by assigning the carrying value of the covered QB’s capital and liabilities to different available stable funding categories, multiplying each category by an available stable funding factor and adding the weighted amounts. The carrying value of the covered QB’s capital and liabilities shall refer to the recorded amount before the application of any regulatory deductions and other adjustments.

Characteristics of Funding Stability

2. Under the NSFR framework, liabilities are accorded with presumed degree of stability as reflected in their corresponding available stable funding factor. The factors are scaled from 100% to zero percent (0%) with 100% representing the most stable account.
3. Three (3) characteristics are identified for funding stability, namely: tenor, type and counterparty:
 - a. *Funding Tenor.* Longer-term liabilities are assumed to be more stable than short term liabilities. As such, funding that matures in more than one (1) year is considered more stable than those maturing in less than a year.
 - b. *Funding type.* The framework recognizes that certain types of funding are inherently more stable than other types without considering the tenor. Retail deposits are generally considered more stable than wholesale deposits.
 - c. *Funding counterparty.* The covered QB’s counterparty influences the stability of funding such that retail customers or counterparties are considered more stable than similar types of funding provided by wholesale customers. Likewise, funds provided by non-financial corporates/entities are considered more stable than those provided by financial corporate/entities.

Maturity of Funding

4. Funding instruments with options to redeem and deposits with withdrawal notice periods shall be assumed to be redeemed through the exercise of an option or withdrawn on the earliest date possible.
5. For long dated liabilities, only the portion of cash flows due beyond six (6) months and one (1) year time horizon shall receive an available stable funding based on residual maturity of six (6) months to less than one (1) year and one (1) year or more, respectively.

ASF Categories

Liabilities and capital with 100% ASF factor

6. Liabilities and capital instruments receiving 100% ASF factor include:
 - a. Total amount of regulatory capital¹ before the application of regulatory adjustments excluding Tier 2 instruments with residual maturities of less than one (1) year or those instruments with explicit or embedded options that, if exercised, would reduce the expected maturities to less than one (1) year.
 - b. Other capital instruments not included above, that have effective residual maturities of one (1) year or more, but excluding any instruments with explicit or embedded options that, if exercised, would reduce the expected maturity to less than one (1) year.
 - c. Secured and unsecured funding with residual maturities of one (1) year or more.
 - d. Wholesale non-operational deposits with residual maturities of one (1) year or more.

¹ Regulatory capital is the sum of Tier 1 and Tier 2 capital before the application of any regulatory deductions and other adjustments.

- e. Retail term deposits with residual maturities of one (1) year or more.

Liabilities with ninety-five percent (95%) ASF factor

7. Retail non-maturity deposits and retail term deposits with residual maturities of less than one (1) year and that have an outstanding balance of P500 thousand and below.

Liabilities with ninety percent (90%) ASF factor

8. Retail non-maturity deposits and retail term with residual maturities of less than one (1) year and that have an outstanding balance of more than P500 thousand

Liabilities with fifty percent (50%) ASF factor

9. Wholesale non-operational deposits with residual maturities of less than one (1) year from the Philippine NG and other sovereigns, LGUs, GOCCs, PSEs of Foreign Countries, and Multilateral Organizations including MDBs.
10. Wholesale non-operational deposits with residual maturities of less than one (1) year from non-financial corporates.
11. Wholesale non-operational deposits with residual maturities of six (6) months to less than one (1) year from the Bangko Sentral, other central banks, banks and financial corporates.
12. Wholesale operational deposits. All CASA including negotiable order of withdrawal accounts are automatically categorized as operational deposits.
13. Secured and unsecured funding with residual maturities of less than one (1) year provided by the NG and other sovereigns, LGUs, GOCCs, PSEs of Foreign Countries, and Multilateral Organizations including MDBs.
14. Secured and unsecured funding with residual maturities of less than one (1) year provided by non-financial corporates.
15. Secured and unsecured funding with residual maturities of six (6) months to less than one (1) year provided by the Bangko Sentral, other central banks, banks and financial corporates.
16. Other sources of funding with residual maturities of six (6) months to less than one (1) year.
17. For foreign bank branches, any balance of "Net due to head office/branches/ agencies abroad" excluding accumulated "unremitted profits" and "losses in operations".

Liabilities and equities with zero percent (0%) ASF factor

18. Wholesale non-operational deposits with residual maturities of less than six (6) months from the Bangko Sentral, other central banks, banks and financial corporates.
19. Secured and unsecured funding with residual maturities of less than six (6) months provided by the Bangko Sentral other central banks, banks and financial corporates.
20. Other sources of funding with residual maturities of less than six (6) months.
21. All other liabilities and equity items not included in the above categories. The liabilities shall include those without a stated maturity such as short positions and open maturity positions. Two (2) exceptions shall be recognized for liabilities without a stated maturity:
- First, deferred tax liabilities, which shall be treated according to the nearest possible date on which such liabilities could be realized; and
 - Second, minority interest, which shall be treated according to the term of the instrument, usually in perpetuity.

These liabilities shall then be assigned either a 100% ASF factor if the effective maturity is one (1) year or greater or fifty percent (50%), if the effective maturity is between six (6) months and less than one (1) year.

22. Trade date payables arising from purchase of financial assets pending actual receipt/settlement of the underlying securities.

B. Required Stable Funding

23. The amount of required stable funding (RDF) represents the amount of funding needed to support a covered QB's assets and OBS exposures based on their liquidity characteristics or liquidity risk profile. RSF is calculated by assigning the carrying value of assets and OBS exposures to the relevant RSF category. The carrying value is then multiplied by the corresponding RSF factor to arrive at the weighted amounts. The carrying value of an asset shall be gross of the GLLP and net of specific provisions.

Considerations for Asset Liquidity

24. Similar to available stable funding, a set of standardized weightings shall be used to determine the amount of stable funding a covered QB must maintain. RSF factors shall be scaled from zero percent (0%) to 100% based on liquidity characteristics of asset and OBS exposures.
25. The RSF factor assigned to each asset represents the amount of a particular asset estimated to be funded, either because the asset will be rolled over or because it could not be monetized through sale or be used as collateral in a secured borrowing transaction, over the course of one (1) year.
26. The following characteristics are considered collectively for each asset, as applicable:
- a. Credit Quality. Asset with higher credit quality are perceived to attract more demand from market participants than those with lower credit quality, and thus more liquid than the latter. Under the framework, assets with lower credit quality shall require more stable funding than those with higher credit quality.
 - b. Tenor. Assets with longer maturities are expected to require more funding than those with shorter maturities. This is in view of the longer time necessary for the asset to be converted to cash or for cash inflows to be realized from the asset. Additionally, assets with longer tenor may liquidate at a discount because of the higher market and credit risks associated with the longer time to wait for cash inflows.
 - c. Counterparty. Relationships with counterparties are critical in continuing business. Covered QBs would generally roll over certain exposures to non-financial counterparties to maintain business relationship and generate additional business in the future.
 - d. Market Characteristics. Assets that have traded in an exchange tend to exhibit a higher degree of liquidity, thus, shall require less stable funding.
 - e. Asset Encumbrance. In general, encumbered assets cannot be monetized during the period they are encumbered. The longer an asset is encumbered, the more stable funding it would require.

27. For purposes of determining the RSF, covered QBs shall include financial instruments, foreign currencies, and commodities for which a purchase order has been executed and shall exclude those for which a sales order has been executed.

Maturity of assets

28. In determining the maturity of an instrument, it shall be assumed that investors will exercise any option to extend maturity. On the other hand, for assets with options exercisable at the discretion of the covered QB, the reputational factors which may limit a covered QB's ability not to exercise the option shall be considered. For amortizing loans, the portion that comes due within the one-year period shall be classified under the less than one (1) year residual maturity category.

Asset Encumbrance

29. The RSF factor for an encumbered asset is either the same as, or higher than the RSF factor for an equivalent unencumbered asset. The specific RSF factors for encumbered assets depend on the remaining period of encumbrance. On-balance sheet assets that are encumbered for one year or more shall have an RSF factor of 100% while assets encumbered for a period of six (6) months to less than one (1) year shall have a fifty percent (50%) RSF factor. Encumbered assets with less than six (6) months remaining in the encumbrance period shall receive the same RSF factor as if the equivalent asset was encumbered.
30. Where beneficial ownership is retained in asset that are encumbered in a repo or other securities financing transactions, and these assets are included in the balance sheet, such assets shall be allocated in their respective RSF category.

RSF Categories

Asset assigned a zero percent (0%) RSF factor

31. Cash on hand, checks and other cash items.
32. Covered QB reserves in the Bangko Sentral and all claims on the Bangko Sentral (including demand). Overnight, and term deposits and reverse repos where the Bangko Sentral is the counterparty) with residual maturities of less than six (6) months.
33. Trade date receivables arising from sale of financial assets pending actual settlement/delivery of the underlying securities.

Assets assigned a five percent (5%) RSF factor

34. Eligible securities representing claims on or guaranteed by the NG, the Bangko Sentral, sovereigns, other central banks and PSEs of Foreign Countries, and Multilateral Organizations including MDBs. These securities are assigned zero percent (0%) risk weight under the standardized approach for credit risk and are not direct obligations of a covered bank or any of a covered QB's financial allied undertakings

Assets assigned a ten percent (10%) RSF factor

35. Loans to banks, financial corporates and other central banks with residual maturities of less than six (6) months and where the loans are secured by Level 1 assets as defined in the LCR rules.

Assets assigned a fifteen percent (15%) RSF factor

36. Eligible securities representing claims on or guaranteed by the LGUs, GOCCs, sovereigns, other central banks, and PSEs of Foreign Countries, and Multilateral Organizations including MDBs. These securities are assigned a twenty percent (20%) risk weight under the standardized approach for credit risk and are not direct obligations of a covered QB or any of a covered QB's financial allied undertakings.
37. Corporate debt securities (including commercial papers) assigned with a credit rating equal or equivalent to at least AA- by a third-party credit assessment agency recognized by the Bangko Sentral, and not issued by a covered QB or any of a covered QB's financial allied undertakings.
38. Loans to banks, financial corporates, and other central banks with residual maturities of less than six (6) months.
39. Non-operational deposits held at other banks with residual maturities of less than six (6) months

Assets assigned a fifty percent (50%) RSF factor

40. Eligible securities representing claims on or guaranteed by the LGUs, GOCCs, sovereigns, other central banks and PSEs of Foreign Countries, and Multilateral Organizations including MDBs. These securities are assigned a fifty percent (50%) risk weight under the standardized approach for credit risk and are not direct obligations of a covered QB or any of a covered QB's financial allied undertakings.
41. Corporate debt securities (including commercial papers) assigned with a credit rating of between A+ and BBB- or equivalent by a third-party credit assessment agency recognized by the Bangko Sentral, and not issued by a covered QB or any of a covered QB's financial allied undertakings.
42. Common equity share that are included in the main index of an organized exchange and not issued by a covered QB or any of a covered QB's financial allied undertakings.
43. Other debt securities with residual maturities of less than one (1) year.
44. Loans to banks, financial corporates, the Bangko Sentral and other central banks, with residual maturities of between six (6) months to less than one (1) year.
45. Non-operational deposits held at other banks with residual maturities of between six (6) month to less than one (1) year.
46. Operational deposits held at other banks.
47. Loans to the NG, LGUs, GOCCs, sovereigns, PSEs of Foreign Countries, and Multilateral Organizations including MDBs with residual maturities of less than one (1) year.

48. Loans to non-financial corporates and micro, small and medium enterprises (MSME) with residual maturities of less than one (1) year.
49. Consumer loans with residual maturities of less than one (1) year.
50. For foreign bank branches, any balance of "Net due from head office/branches/ agencies abroad" excluding accumulated "unremitted profits" and "losses in operation".

Assets assigned a 65.0 percent (65%) RSF factor

51. Loans to the NG, LGUs, GOCCs, sovereigns, PSEs of Foreign Countries, and Multilateral Organizations including MDBs with residual maturities of one (1) year or more and would apply for a fifty percent (50%) or lower risk weight under the standardized approach for credit risk.
52. Loans to non-financial corporates with residual maturities of one (1) year or more and would qualify for a fifty percent (50%) or lower risk weight under the standardized approach for a credit risk.
53. Residential real estate loan with residual maturities of one (1) year or more and would qualify for a risk weight of fifty percent (50%) under the standardized approach for credit risk.

Assets assigned an eighty-five percent (85%) RSF factor

54. Loans to the NG, LGUs, GOCCs, sovereigns, PSEs of Foreign Countries and Multilateral Organizations including MDBs with residual maturities of one year or more and would not qualify for a fifty percent (50%) risk weight under the standardized approach for credit risk.
55. Loans to non-financial corporates and MSMEs with residual maturities of one year or more and would not qualify for a fifty percent (50%) risk weight under the standardized approach for credit risk.
56. Residential real estate loans with residual maturities of one (1) year or more, do not qualify for a risk weight of fifty percent (50%) under the standardized approach for credit risk.
57. Other consumer loans with residual maturities of one (1) year or more.
58. Other traded equity securities and debt securities with residual of one (1) year or more and not issued by a covered QB or any of a covered QB's financial allied undertakings.

Assets assigned a 100% RSF factor

59. Loans to banks, financial corporates, the Bangko Sentral and other central banks, with residual maturities of one (1) year or more.
60. Non-operational deposits held at other banks with residual maturities of one (1) year or more.
61. Non-traded equity shares which are not issued by a covered QB or any of a covered QB's financial allied undertakings.
62. Non-performing loans and securities.
63. Items deducted from regulatory capital; and
64. All other assets.

C. Off-Balance Sheet Exposures

65. For OBS exposures, the covered QB shall apply the RSF factor shown below:

RSF Factor	Off-balance Sheet Items
5%	Guarantees and financial stability letters of credit Irrevocable and conditionally revocable credit and liquidity facilities
1%	Other transaction and trade-related contingent items Unconditionally revocable credit and liquidity facilities
0%	Non contractual obligations

D. Derivatives

66. The amount of the NSFR derivative assets is calculated based on the replacement cost for derivative contracts (obtained by marking to market) where the contract has a positive value. On the other hand, where the contract has a negative value, this shall be reflected as NSFR derivative liabilities. For contracts that inherently require net settlement (e.g., non-deliverable forward exchange contract), the expected derivatives exposure shall be reported on a net basis.
67. NSFR derivative assets are assigned a 100% RSF factor while NSFR derivative liabilities would not be considered a source of stable funding and would be assigned a zero percent (0%) available stable funding factor. When the NSFR derivative assets are greater than the NSFR derivative liabilities, a 100% RSF factor shall be assigned to five percent (5%) of the NSFR derivative liabilities.

FORMAT CERTIFICATION OF COMPLIANCE WITH THE NSFR
(Appendix to Sec. 145-Q on NSFR)

SWORN CERTIFICATION OF COMPLIANCE WITH
THE NET STABLE FUNDING RATIO (NSFR) REQUIREMENTS

<NAME OF QUASI-BANK>

C E R T I F I C A T I O N

Pursuant to Section 145-Q (*Net Stable Funding Ratio*) of the Manual of Regulations for Non-Bank Financial Institutions, we hereby certify that the QB has fully complied with the minimum NSFR requirement on all calendar days of the month/quarter ended _____ 20 ____.

We further certify to the best of our knowledge that above statement is true and correct.

GUIDELINES FOR THE ADMINISTRATION OF THE UNIT INVESTMENT TRUST FUND (UITF) CERTIFICATION PROGRAM

In line with the thrust of the Bangko Sentral to promote the development of the capital markets and to ensure investor protection, UITF Marketing Personnel are required to be certified through a UITF Certification Program (UCP) administered by a reputable financial services industry association/organization (FSIAO) acceptable to the Bangko Sentral.

The UCP is aimed at strengthening the qualification of UITF Marketing Personnel in order to ensure that they can provide sufficient information on UITFs to clients and promote delivery of safe and effective products and services, among others. The requirement is expected to advance the quality of UITF Marketing Personnel and their sales and marketing practices.

In order to ensure that the administration of UCP meets the expectations of the Bangko Sentral, the following guidelines shall be observed:

Section 1: Pre-requisites for the administration of the UCP

1. In order to be recognized by the Bangko Sentral as an administrator of the UCP, the FSIAO should meet the following qualification standard:
 - a. It is formally organized as a FSIAO related to trust, investment funds, collective investment schemes and other related areas;
 - b. It has adequate financial and organizational resources, and the system, to execute the UCP;
 - c. It shall adopt a three-pronged process for the UCP which shall be composed of a qualifying examination, a requirement for continuing education, and the registration and registry to monitor and manage the certified UITF Marketing Personnel;
 - d. It shall adopt an acceptable and relevant curriculum that is aimed at advancing the quality of the UITF marketing personnel; and
 - e. It shall ensure that the UCP guidelines contain, at the minimum, provisions on the governance mechanism, operational requirements, complaints handling, and provisions on Data Privacy and/or confidentiality of information, among others.
2. The FSIAO, through its authorized representative, shall submit to the appropriate supervising department of the Bangko Sentral the following:
 - a. Letter of its intent to administer the UCP;
 - b. By-laws of the association/organization;
 - c. Notarized Secretary's Certificate on Board of Directors/Trustees' resolution approving the application;
 - d. Board-approved UCP guidelines; and
 - e. Certification that it meets the requirements enumerated in these Guidelines.
3. Only the FSIAO that meets the criteria and requirements enumerated in these Guidelines shall be recommended for approval.
4. Upon the recommendation of the appropriate supervising department of the Bangko Sentral, the appropriate approving authority shall act on the FSIA's application. If approved, the authority to administer the UCP shall remain valid until revoked.

Section 2: Administration of the UCP

1. The FSIAO shall be responsible for ensuring that the administration of UCP is properly conducted and in accordance with the Board-approved UCP guidelines.
2. The FSIAO shall maintain the integrity and confidentiality of the UCP.
3. The FSIAO shall report to the Bangko Sentral any significant development and/or concern in the administration of the UCP.

4. In case of significant changes in the UCP guidelines, the FSIAO shall submit to the appropriate supervising department of the Bangko Sentral the revised Board-approved UCP guidelines for clearance.
5. The FSIAO shall ensure that the UCP guidelines are adequately disseminated to the FSIAO's members/member-institutions for information.
6. The FSIAO shall ensure that the UCP guidelines provide adequate transitory arrangements for existing Certified UITF Marketing Personnel, if necessary.
7. The FSIAO shall make the UCP guidelines, including the examination questions, available for review by the Bangko Sentral.
8. The FSIAO shall maintain records of the certified UITF Marketing Personnel which shall be made available to the Bangko Sentral upon request.
9. The FSIAO shall post the list of certified UITF marketing personnel in its website.
10. The appropriate supervising department of the Bangko Sentral shall undertake the monitoring and periodic review of the administration of the FSIAO of the UCP to ensure that the UCP remains relevant and at par with the requirements of the Bangko Sentral.

Section 3. Withdrawal or Suspension of Administration of UCP

1. The Bangko Sentral reserves the right to withdraw or suspend the administration of the UCP of the FSIAO not complying with the provisions enumerated in these Guidelines, after compliance with due process requirements.
2. The FSIAO may likewise voluntarily withdraw the administration of the UCP, subject to the approval of the Bangko Sentral.
3. The FSIAO that intends to withdraw as administrator of the UCP shall ensure proper transition of operational arrangements to minimize or eliminate potential disruption of the UCP administration.
4. The withdrawal or suspension of the FSIAO as administrator of the UCP shall be approved by the appropriate approving authority upon the recommendation of the appropriate supervising department of the Bangko Sentral.

(Circular No. 1018 dated 26 October 2018)

RULES AND PROCEDURES ON ADMINISTRATIVE CASES INVOLVING DIRECTORS AND OFFICERS OF BSFI
(Appendix to Sec. 136-Q on Rules of procedures on administrative cases involving directors
and officers of BSFI)

RULE I-GENERAL PROVISIONS

Section 1. *Title.* - These Rules shall be known as the *Bangko Sentral ng Pilipinas Revised Rules of Procedure on Administrative Cases Involving Directors and Officers of Bangko Sentral - Supervised Financial Institutions.*

Section 2. *Applicability.* - These Rules shall apply to administrative cases filed with the Office of Special Investigation (OSI), Bangko Sentral, involving directors and officers of BSFI in relation to Section 37 of Republic Act No. 7653 (The New Central Bank Act) and Section 16 of Republic Act No. 8791 (The General Banking Law of 2000).

These Rules shall also apply to administrative cases arising out of the fact -finding investigation conducted by OSI.

Complaints against BSFI, as a juridical entity shall not be covered by these Rules.

Supervisory and enforcement actions shall also not be covered by these Rules.

Section 3. *Nature of Proceedings.* - The proceedings under these Rules shall be summary in nature and shall be conducted without necessarily adhering to the technical rules of procedure and evidence applicable to judicial trials .

In the absence of applicable provision in these Rules, and pursuant to the summary nature of these proceedings, the pertinent provisions of the Rules of Court may be applied suppletorily.

Section 4. *Appearance of Counsel.* -The parties, if they so desire, may be assisted or represented by counsel.

Section 5. *Confidentiality of Proceedings.* -Proceedings under these Rules shall be confidential and shall not be disclosed to third parties, except to the extent as may be provided under existing laws. All communications relating to these proceedings shall be made in writing, copy furnished the other party.

RULE II- DEFINITION OF TERMS

Section 6. *Adoption.* - The terms as defined in the Manual of Regulations are hereby adopted in these Rules.

RULE III - PLEADINGS AND NOTICES

Section 7. *Complaint.* - The complaint shall be in writing, and subscribed and sworn to by the complainant. No anonymous complaint shall be entertained.

Section 8. *Where to file.* - The complaint shall be filed with OSI, in as many copies as there are respondents, including two (2) copies for OSI.

Section 9. *Contents of the Complaint.* -The complaint shall contain the ultimate facts of the case, and shall include the following:

- a. The full name and address of the complainant;
- b. The full name and address of the respondent;

- c. The position of the respondent, in the BSFI;
- d. A specification of the charges against the respondent;
- e. A statement of the material facts;
- f. A statement as to whether or not a similar complaint has been filed with the Bangko Sentral, the Supreme Court, the Court of Appeals, any other tribunal or agency;
- g. Except for complaints arising from factual investigation conducted by the OSI or the appropriate supervising sector of the Bangko Sentral a statement that the complaint was previously referred to appropriate supervising department of the Bangko Sentra for appropriate action of the Financial Institution where the bank officer or director complained of belongs, with a copy of the response of said Financial Institution that failed to settle or resolve the complaint, or upon the lapse of thirty (30) calendar days from referral of the complaint by the appropriate supervising department of the Bangko Sentral to the Financial Institution in case of the latter's failure or refusal to respond.

The complaint shall include copies of documents and sworn statements of witnesses, if any, in support of the complaint.

Section 10. *Action on the Complaint.* - Upon a determination that the complaint is sufficient in form and substance, and complies with Rule III, Section 9 of - these Rules, OSI shall issue a notice requiring the respondent to file a sworn answer to the complaint.

However, if the complaint fails to comply with the immediately preceding section, OSI shall dismiss the complaint, without prejudice, or take such appropriate action as may be warranted.

Section 11. *Answer.*- Within ten (10) days from receipt of the notice to file answer and a copy of the complaint, respondent shall submit a sworn answer, copy of which shall be furnished the complainant.

The respondent, in the sworn answer, shall specifically admit or deny all the charges specified in the complaint, including evidence in support thereof.

The failure of the respondent to file an answer within the prescribed period shall be considered as a waiver of the respondent's right to file the same, and the case shall be resolved based solely on the evidence presented by the complainant.

Section 12. *Prohibited Pleadings and Motions.* - The following pleadings or motions are prohibited:

- (i) Motion to dismiss, except on the ground of lack of jurisdiction;
- (ii) Motion for bill of particulars;
- (iii) Motion for the issuance of *subpoena duces tecum* and/or *ad testificandum*, provisional remedies, modes of discovery, and similar reliefs;
- (iv) Dilatory motions for postponement or extension of time; and
- (v) Other pleadings or motions of a similar nature.

RULE IV- MODES OF SERVICE

Section 13. *Modes of Service.* Service of pleadings, motions, orders or processes may be made by personal delivery, registered mail, courier, or other modes of service as defined under this Rule.

Personal service shall be made by delivering to the parties a copy of the pleading, motion, order or process.

Service by registered mail or courier shall be made by sending a copy of the pleading, motion, order or process in a sealed envelope, addressed to the parties' residence, office or regular place of business.

Section 14. *Other modes of service.* - For processes or pleadings other than the notice to file answer and a copy of the complaint, service may also be made by electronic mail or other electronic form that provides a record of delivery .

Section 15. *Completeness of service.* - Personal service is complete upon actual delivery. Service by registered mail shall be deemed complete upon actual receipt by the parties, or after five (5) calendar days from the date of receipt of the first notice of the postmaster, whichever date is earlier.

Service made via courier shall be deemed complete on the date of the actual delivery by the courier.

For other modes of service, the date indicated in the electronic record of delivery or the transmission report shall be the effective date of receipt.

RULE V- JURISDICTION OVER THE RESPONDENT

Section 16. *Acquisition of jurisdiction over the respondent.* - Jurisdiction over the respondent is acquired once service of the notice to file answer and a copy of the complaint is completed.

Should the respondent refuse to receive the notice to file answer and a copy of the complaint, the service may be effected by leaving the same at the respondent's residence, office or regular place of business.

Should the respondent no longer be connected with the BSFI at the time of the filing of the complaint, service may be effected by leaving the notice to file answer and a copy of the complaint at, or sending them to, the respondent's last known address.

RULE VI - PROCEEDINGS BEFORE THE HEARING OFFICER

Section 17. *Submission of Position Papers.*- The Hearing Officer shall direct the parties to simultaneously submit their verified position papers with supporting documents and affidavits, if any, on a date to be set by the Hearing Officer.

Section 18. *Submission of Comment.* - A party may file a comment on the position paper within ten (10) calendar days from receipt thereof.

Section 19. *Issuance of Clarificatory Order.*- The Hearing Officer may issue a clarificatory order to elicit facts or information necessary for the prompt and just resolution of the administrative case.

RULE VII - RESOLUTION OF THE CASE

Section 20. *Submission of Report.* - Within sixty (60) calendar days from issuance of an Order declaring that the case is submitted for resolution, the Hearing Officer shall submit a report to the Monetary Board, which shall contain a recommendation stating clearly and distinctly the findings of facts, determination of issues and conclusions of law on which it is based. The period of time to resolve the case may be extended, for good cause, only upon approval of the General Counsel.

In case the report recommends the dismissal of the Complaint, the Report shall be submitted for approval by the Governor. The dismissal of the Complaint shall not be subject to appeal to the Monetary Board.

Section 21. *Issuance and Finality of Resolution.* -After consideration of the report, the Monetary Board shall issue its resolution which shall become final and executory upon the lapse of fifteen (15) calendar days from receipt thereof by the parties, unless a motion for reconsideration has been timely filed.

Section 22. *Motion for Reconsideration.* -A motion for reconsideration, on the ground of grave errors of fact or law, may be filed by the parties within fifteen (15) calendar days from receipt of the resolution with the Monetary Board.

No second motion for reconsideration shall be allowed.

Section 23. *Enforcement.* - The resolution shall be referred to the department of the Bangko Sentral concerned, for appropriate action.

RULE VIII - APPEAL

Section 24. *Appeal.* - An appeal from the resolution of the Monetary Board may be filed before the Court of Appeals within the period and in the manner provided under Rule 43 of the Rules of Court.

Interlocutory orders of the OSI shall not be subject to appeal to the Governor or the Monetary Board.

Section 25. *Effect of Appeal.* - The appeal shall not stay the enforcement of the resolution sought to be reviewed, unless the Court of Appeals shall direct otherwise upon such terms as it may deem just.

RULE IX- MISCELLANEOUS PROVISIONS

Section 26. *Repeal.* - All existing rules, regulations, orders or circulars or any part thereof inconsistent with these Rules are hereby repealed, amended or modified accordingly.

Section 27. *Separability Clause.* - If any part of these Rules is declared unconstitutional or illegal, the other parts or provisions shall remain valid.

Section 28. *Effectivity.* - These Rules shall take effect on 1 January 2019.

Section 29. *Transitory Provision.* -All pending administrative cases filed with the Supervised Banks Complaints Evaluation Group (SBCEG), Office of the General Counsel and Legal Services, shall be resolved by the SBCEG in accordance with the provisions of Sec. and App, prior to the effectivity of these Rules. Upon the effectivity of these Rules, all pending cases with the SBCEG shall be resolved in accordance with the new Rules in so far as applicable.

(Circular No. 1012 dated 12 September 2018)

GUIDELINES ON LICENSING OF ELECTRONIC PAYMENT AND FINANCIAL SERVICES (EPFS)

(Appendix to Sec. 701-Q)

A BSFI intending to provide EPFS shall comply with the following requirements in conjunction with the Guidelines on the Granting of License/Authority provided in *Appendix 124*.

1. Advanced EPFS

A BSFI that offers advanced EPFS shall undergo the licensing process and provide the documentary requirements, as follows:

Processing and Documentary Requirements	Type A ¹	Type B ²
<p>(1) Eligibility Test and Self-Assessment</p> <p>A BSFI must conduct a self-assessment vis-a-vis the defined prudential criteria described in Sec. 111 (<i>Prudential criteria</i>).</p> <p>Should the BSFI meet the prudential criteria, it shall submit a letter of intent with a certification signed by its president or officer of equivalent rank, and chief compliance officer (CCO) stating that the BSFI satisfies said requirements.</p> <p>If the Bangko Sentral concurs with the certification, the BSFI shall receive a confirmation of eligibility (COE) to offer EPFS.</p>	✓	
<p>(2) Application for the license</p> <p>The BSFI shall formally submit the following application documents to the appropriate department of the Bangko Sentral within six (6) months from the date of the COE.</p>		
(a) Application letter signed by the president or officer of equivalent rank specially indicating the justification/reason for the application to provide EPFS	✓	✓
(b) Notarized Secretary's Certificate (or equivalent document in the case of foreign bank branches) attesting that the Board of Directors (or equivalent management committee in the case of foreign bank branches) has approved the application to provide EPFS	✓	✓
<p>(c) Certification signed by the president (or officer of equivalent rank) and the CCO to the effect that the BSFI has met the following minimum pre-conditions:</p> <p>(i) An adequate risk management process is in place to identify, assess, monitor, and control the risks arising from the proposed EPFS;</p> <p>(ii) Appropriate policies and procedures in the following areas have been adopted to address all security risks and concerns affecting the EPFS platform and application system/s:</p>	✓	✓
<ul style="list-style-type: none"> <i>Authentication</i> – establishes the identity of both the sender and the receiver; uses trusted third parties that verify identities in cyberspace; <i>Non-repudiation</i> – ensures that transactions cannot be repudiated or presents undeniable proof of participation by both the sender and the receiver in a transaction; <i>Authorization</i> – establishes and enforces the access rights of entities (both persons and/or devices) to specifies computing resources and application functions; also locks out unauthorized entities from physical and logical access to the secured systems; 		

¹ This applies to BSFIs that can be assessed against the prudential criteria provided in the Policy and Regulations on Licensing. These applicants must have been examined by the Bangko Sentral.

² This applies to proponents that cannot be assessed against the prudential criteria provided in the Policy and Regulations on Licensing. These include new-established BSFIs and new applicants for an authority to operate as "Electronic Money Issuer-Others".

<ul style="list-style-type: none"> • <i>Integrity</i> – assures that data has not been altered; • <i>Confidentiality</i> – assures that no one except the sender and the receiver of the data can gain access to clear data; and • <i>Availability</i> – assures that the system is operating properly during the time it is expected to be available; <p>(iii) The EPFS system has been tested prior to its implementation and that the test results are satisfactory. As a minimum standard, appropriate system testing and user acceptance testing should have been conducted; and</p> <p>(iv) A documented business continuity planning process covering EPFS, among other areas of operation, has been adopted.</p>		
(d) Details of the features and functionalities of the proposed EPFS, including the security controls and measures	✓	✓
(e) Process flow/brief narration of how transaction and data flow through the network	✓	✓
(f) Diagram of the configuration of the system supporting the proposed EPFS, showing the linkage between the host systems and network infrastructure	✓	✓
(g) Pro-forma client application form and terms and conditions for the availment of and/or use of the EPFS	✓	✓
<p>(h) Brief discussion on the following topics in relation to the particular EPFS being applied for:</p> <ul style="list-style-type: none"> • Oversight management process; • Business continuity plan/disaster recovery plan; • Incident response/problem management; • Consumer protection/awareness program; and • Information security policies and security features of the proposed EPFS 	✓	✓
(i) Results of the user acceptance testing (UAT)	✓	✓
(j) Report on the independent assessment of the proposed EPFS, if applicable.	✓	✓
(k) Articles of Incorporation/By-Laws of the BSFI		✓
(l) Photocopy of the marketing materials for the proposed EPFS		✓
(m) Pro-forma agreements with accredited agents for the delivery/issuance of EPFS;		✓
(n) Anti-money Laundering (AML) Policy/Manual of Procedures; and		✓
(o) Latest Audited/Interim Financial Statements		✓

2. Basic EPFS

The BSFI shall notify the appropriate department of the Financial Supervision Sector (FSS) by submitting the following documents thirty (30) days prior to the launch/implementation of its EPFS:

- (1) Notification letter signed by the institution's president or officer of equivalent rank;
- (2) Details of the features and functionalities of the EPFS, including security controls and measures adopted relative to the offering of the EPFS; and
- (3) Process flow/brief narration of how transaction and data flow through the network including the clearing switch in case the service involves participation in an Automated Clearing House (ACH).

3. Fees

A BSFI applying for an advanced EPFS shall pay processing and licensing fees as shown below:

Type of Fee	Classification				
	Banks			Non-banks	
	Universal and Commercial Banks	Thrift Banks	Rural and Coop. Bank	EMI-Others	Other Financial Inst.
Processing	50,000	20,000	10,000	20,000	10,000
Licensing	100,000	60,000	25,000	60,000	25,000

The assessment and collection of fees shall be made in accordance with the guidelines on fees provided in *Appendix 124*.

(Circular Nos. 1143 dated 12 April 2022 and 1033 dated 22 February 2019)

<Name of BSFI>

**CERTIFICATION ON
COMPLIANCE WITH THE CONDITIONS FOR
PARTICIPATION IN AN AUTOMATED CLEARING HOUSE**

We, <Name of Officer>, President (or Officer of Equivalent Rank) and <Name of Officer>, Compliance Officer, on behalf of the <Name of BSFI>, with head/principal office address at <complete address of Head/Principal Office>, after having been duly sworn to in accordance with law, hereby certify to the best of our knowledge, that <Name of BSFI>:

- a. Has satisfactorily met the prudential criteria provided under Secs. 111-Q /111-S/111-P/101-N/111-T (*Prudential criteria*);
- b. Obtained a satisfactory assessment in the areas of Information Technology (IT), Anti-Money Laundering (AML), and Consumer Protection, as applicable, in the last examination conducted by the Bangko Sentral; and
- c. Is capable of complying with the specific rules applicable to transactions performed under the National Retail Payment System Framework as provided in Secs. 801-Q/501-S/401-P/501-N/404-T (*Specific rules applicable to transactions performed under the NPRS Framework*);

We certify further that <name of BSFI>, as a BSFI licensed to offer electronic payment and financial services (EPFS), has complied with the provisions under Secs. 701-Q/401-S/114-P/401-N (*Compliance with relevant regulations*).

We also certify that all relevant documents in support of the foregoing statements are kept on file and are readily available for verification by examiners of the Bangko Sentral during onsite verification/examination or when a written request is made to verify compliance.

This certification executed on <date of execution> is being submitted in compliance with the requirements of the Bangko Sentral.

MANUAL OF REGULATIONS FOR NON-BANK FINANCIAL INSTITUTIONS

POWERS OF THE BANGKO SENTRAL

001-S EXAMINATION BY THE BANGKO SENTRAL

The head of the appropriate supervising department of the Bangko Sentral, personally or by deputy, shall make at least once a year and at such other times as he or the Monetary Board may deem necessary and expedient, an examination, inspection or investigation of the books and records, business affairs, administration and financial condition of Non-Stock Savings and Loan Associations (NSSLAs).

002-S SUPERVISORY ENFORCEMENT POLICY

The Policy sets forth guidance on the Bangko Sentral's supervision-by-risk framework. It also puts together in a holistic manner all the enforcement tools available to the Bangko Sentral as contained in various laws and rules and regulations¹ and communicates the deployment thereof in a consistent manner by the Bangko Sentral in the course of performing its supervisory function. It further sets out the guiding principles and objectives behind the deployment of such enforcement actions.

Nothing in this Section shall be construed as superseding enforcement actions previously imposed against Bangko Sentral-supervised FIs pursuant to existing laws, Bangko Sentral rules and regulations.

a. Policy statement and rationale

The Bangko Sentral is issuing this Supervisory Enforcement Policy to provide guidance on its supervision-by-risk framework. The Bangko Sentral recognizes that risk-taking is integral to a financial institution's business. The existence of risk is not necessarily a reason for concern so long as Management exhibits the ability to effectively manage that level of risk and operates the financial institution (FI) in a safe and sound manner. Thus, when risk is not properly managed, the Bangko Sentral may deploy a wide range of enforcement actions provided under existing laws, Bangko Sentral rules and regulations, taking into consideration the nature and extent of the supervisory issues and concerns and the level of cooperation provided by Management.

The Bangko Sentral adopts a holistic approach to supervision with the objective of guiding FIs under its supervision to mitigate risk and achieve the desired changes.

Bangko Sentral's risk-based supervision, of which enforcement action is a key part, focuses on the safety and soundness of operations of the FIs. This policy sets forth the expectations of the Bangko Sentral when it deploys enforcement action and the consequences when expected actions are not performed within prescribed timelines.

Thus, this over-arching policy is needed - (a) as a collation of various enforcement actions already present in various laws, rules and regulations; (b) for better guidance of the FIs and the bank supervisors; and (c) as a means to broadcast to the banking/financial industry the consequences of failure to address the Bangko Sentral requirements and supervisory expectations.

b. Objectives of the enforcement policy

The Bangko Sentral's Supervisory Enforcement Policy aims to achieve the following two (2) key objectives:

- (1) Achieving the desired change. Effect a change in the overall condition and governance of Bangko Sentral-supervised FIs consistent with the expectations set under relevant laws and regulations; and
- (2) Mitigating risk. Mitigate risks to the FIs and other stakeholders in order to maintain the stability of the financial system.

c. General principles

The Bangko Sentral, in the deployment of enforcement actions, is guided by the following general principles:

¹ Section 4 of R.A. No. 8791 (General Banking Law of 2000) defines the scope of Bangko Sentral's supervisory powers, which may be grouped into three categories: (i) issuance of rules; (ii) examination and investigation; and (iii) enforcement of Prompt Corrective Action (PCA)

- (1) Root cause diagnosis. The enforcement action addresses the underlying cause of the supervisory issues and concerns.
- (2) Consistently matching the severity of enforcement action to the supervisory issue. The deployment of appropriate enforcement action is commensurate to the severity of the supervisory issues and concerns. The severity of the supervisory issues and concerns is assessed in terms of *prevalence*¹ and *persistence*.
- (3) Successive or simultaneous deployment of enforcement actions. Enforcement actions may be deployed successively or simultaneously taking into account the nature and seriousness of the difficulties encountered by the FIs and the ability and willingness of the FI's Management to address the supervisory issues and concerns.
- (4) Monitorability and follow-through. The Bangko Sentral monitors the FI's progress/compliance with the expected actions to address the supervisory issues, concerns and problems.
- (5) Escalation of enforcement actions. Enforcement actions may be escalated if the desired change is not achieved and the root causes of the FI's issues, concerns and problems are not addressed by the FI within prescribed timelines.

d. Categories of enforcement actions

The three (3) main categories of enforcement action are: (1) corrective actions, (2) sanctions and (3) other supervisory actions. These enforcement actions may be imposed singly or in combination with others.

(1) Corrective actions

Corrective actions are enforcement actions intended to require the FI to address the underlying cause of supervisory issues, concerns and problems. These include the following:

(a) Bangko Sentral Directives

Directives are basically orders and instructions communicated by the appropriate supervising department in Bangko Sentral requiring the FI to undertake a specific positive action or refrain from performing a particular activity within a prescribed timeline.

(b) Letter of Commitment (LOC)

The LOC is an enforcement action where the FI's Board of Directors (Board) is required, upon approval and/or confirmation by the Monetary Board, to make a written commitment to undertake a specific positive action or refrain from performing a particular activity with a given time period.

The LOC is generally used to arrest emerging supervisory concerns before these develop into serious weaknesses or problems, or to address remaining supervisory issues and concerns.

(2) Sanctions

Sanctions that may be imposed on an FI and/or its directors and officers, as provided under existing laws, Bangko Sentral rules and regulations, are subject to the prior approval and/or confirmation by the Monetary Board. Such sanctions include the following:

(a) FIs

- Restrictions on activities and privileges
- Suspension of authorities, privileges and other activities
- Divestment and/or Unwinding
- Monetary sanction - Penalties/Fines Against the FI

(b) Directors and officers

- Reprimand
- Restriction on compensation and benefits
- Divestment

¹ Prevalence pertains to the pervasiveness of the supervisory issues, concerns and problems in relation to their impact on the FI's solvency, asset quality, operating performance and liquidity, among others.

- Suspension
- Disqualification
- Removal
- Monetary penalties/fines

The foregoing sanctions to individuals are without prejudice to the filing of separate civil or criminal actions against them, when appropriate.

(3) Other supervisory actions

Subject to prior Monetary Board approval, the Bangko Sentral, when warranted, may deploy other supervisory actions such as (a) Initiation into the PCA Framework; (b) Issuance of a cease and desist order (CDO) against the FI as well as its directors and officers; (c) Conservatorship; and (d) Placement under receivership.

e. Due process

An integral part of the deployment of enforcement actions is the observance of due process in all cases.

The FI and/or its directors and officers are afforded fair and reasonable opportunity to explain their side and to submit evidence/s in support thereof, which are given due consideration in determining the appropriate enforcement action(s) to be imposed.

(Circular No. 875 dated 15 April 2015)

003-S PROMPT CORRECTIVE ACTION FRAMEWORK

The framework for the enforcement of Prompt Corrective Action (PCA) on banks which is in *Appendix Q-40* shall govern the PCA taken on NSSLAs to the extent applicable, or by analogy.

PART ONE

ORGANIZATION, MANAGEMENT AND ADMINISTRATION

A. ESTABLISHMENT OF NON-STOCK SAVINGS AND LOAN ASSOCIATIONS (NSSLAs)

101-S BASIC LAW GOVERNING NSSLAs

R.A. No. 8367, as amended, also known as the "Revised Non-Stock Savings and Loan Association Act of 1997", regulates the organization and operation of NSSLAs.

102-S SCOPE OF AUTHORITY OF NSSLAs

Policy Statement. The Bangko Sentral adopts the policy of the State to lay down the minimum requirements and the standards under which NSSLAs may organize and operate in a sound and efficient manner.

An NSSLA shall include any non-stock, non-profit corporation engaged in the business of accumulating the savings of its members and using such accumulations for loans to members to service the needs of households by providing long term financing for home building and development and for personal finance. An NSSLA may also engage in a death benefit program meant exclusively for the benefit of its members.

An NSSLA shall accept deposits from and grant loans to its members only. The NSSLAs shall provide assurance to their members and to supervisory authorities that they confine their membership to a well-defined group of persons and not to transact business with the general public.

Membership.

- a. An NSSLA shall confine its membership to well-defined group of persons.

A well-defined group shall consist of any of the following:

- (1) Employees, officers, and trustees of one company, including member-retirees;
- (2) Government employees belonging to the same office, branch, or department, including member-retirees; and
- (3) Immediate members of the families up to the second degree of consanguinity or affinity of those falling under Items "(1)" and "(2)" above.

NSSLAs whose articles of incorporation and by-laws were approved and registered prior to the effectivity of R.A. No. 8367 and which limit and/or allow membership coverage broader or narrower than the foregoing definition, shall be allowed to continue as such.

The Monetary Board may, as circumstances warrant, require NSSLAs mentioned in the immediately preceding paragraph to amend their by-laws to comply with the concept of a *well-defined group*.

- b. In no case shall the total amount of entrance fee exceed one percent (1%) of the amount to be contributed or otherwise paid-in by the particular member: *Provided*, That for new members, the fee shall be based on the amount of contributions computed in accordance with the revaluation of the assets of the NSSLA.

Organizational requirements.¹

- a. *Articles of Incorporation; by-laws.* The articles of incorporation and by-laws of a proposed NSSLA, or any amendment thereto, shall not be registered with the SEC unless accompanied by a certificate of approval from the Monetary Board.
- b. *Application for approval.* The articles of incorporation and by-laws of a proposed NSSLA, both accomplished in the prescribed forms, shall be submitted to the Monetary Board through the appropriate supervising department of the Bangko Sentral together with a covering application for the approval thereof, signed by a majority of the board of trustees and verified by one of them. The application shall include:

¹ Within two (2) months from 17 April 2019, NSSLA shall (i) perform a review of the activities of all their existing service units; and (ii) submit to the appropriate department of the Bangko Sentral a certified list of said existing service units, categorized as branch or satellite office as defined under this Section (*Definition of terms*). NSSLA's management should take appropriate action to ensure that the activities performed in their existing service units are in accordance with the provisions of Sec. 104-S and 105-S.

- (1) The proposed articles of incorporation and by-laws together with the names and addresses of the incorporators, trustees and officers, with a statement of their character, experience, and general fitness to engage in the non-stock savings and loan business;
 - (2) An itemized statement of the estimated receipts and expenditures of the proposed NSSLA for the first year;
 - (3) Filing fee of P1,000; and
 - (4) Such other information as the Monetary Board may require.
- c. *Grounds for disapproval of application.* The Monetary Board may deny the application to organize an NSSLA on the basis of a finding that:
- (1) The NSSLA is being organized for any purpose other than to engage in the business of a legitimate NSSLA;
 - (2) The NSSLA's financial program is unsound;
 - (3) The proposed members are adequately served by one (1) or more existing NSSLAs; and
 - (4) There exist other reasons which the Monetary Board may consider as sufficient ground for such disapproval.
- d. *Certificate of authority to operate; revocation or suspension thereof.* NSSLAs, prior to transacting business, shall procure a certificate of authority to transact business from the Monetary Board. After due notice and hearing, the Monetary Board may revoke or suspend, for such period as it determines, the certificate of authority of any NSSLA, the solvency of which is imperiled by losses or irregularities, or of any NSSLA which willfully violates any provision of R.A. No. 8367, these rules or any pertinent law or regulation.

(Circular No. 993 dated 29 January 2018)

103-S KNOW-YOUR-MEMBER

The NSSLAs shall not be used as a vehicle by unscrupulous persons, its trustees and officers to profit or take advantage of their nature and operations. Thus, the board of trustees (BOT) and management of NSSLAs shall be responsible in putting in place and implementing an effective risk management system, policies, processes and practices towards the effective determination and monitoring of the identity and eligibility of prospective and existing members on a continuing basis. While NSSLAs may create their own systems, the same shall consider the minimum standards set forth under these guidelines.

The membership of persons whose identity and/or membership are questionable and/or ineligible to become members shall cease immediately, and such persons shall solely bear any risk of loss or impairment as a result of their unauthorized membership. This shall be without prejudice to actions that may be taken against the NSSLAs concerned, their trustees, officers, employees and agents/sales representatives for misfeasance or malfeasance, irregularities or omissions, or other similar acts which result in violation of the concept of NSSLAs' well-defined group.

Membership Selection and Screening. An NSSLA shall develop a clearly defined and written selection and screening policies and procedures to ensure compliance with its well-defined group. The selection and screening process employed by NSSLAs should be able to appropriately establish the true identity and eligibility of prospective members. The BOT and senior management of NSSLAs shall be ultimately responsible in the determination of the true identity and eligibility of individuals accepted as members. No reliance shall be made on representations by, nor shall the membership selection and screening process be delegated to or otherwise assumed by, agents or sales representatives engaged by the associations.

- a. *Minimum Documentary Requirements.* An NSSLA shall require a prospective member to submit documents to establish his identity and eligibility. It shall be the responsibility of the BOT and management to enumerate the documentary requirements in their respective policies as well as the consistent and effective implementation thereof. For this purpose, minimum documentary requirements include, among others, the following:

Prospective Employee-Member	Prospective Eligible Immediate Family-Member
Valid identification card ("ID") with photo and signature issued by his/her employer company or department/branch/office of government, and any of the following or their equivalent as proof of eligibility:	Photo and signature bearing valid ID, such as driver's license, passport or similar documents, and the following as proof of eligibility:
<ol style="list-style-type: none"> (1) Certificate of employment*; or (2) Certificate of compensation*; or (3) Endorsement from the company or department/branch/office of government. 	<ol style="list-style-type: none"> (1) NSO-issued marriage certificate for spouse; or (2) NSO-issued birth certificates of the principal member (i.e., the employee-member or member-retiree) and the immediate family. **
*In case of an NSSLA which is allowed to accept retirees as its members, proofs of eligibility	**The extent of the applicable NSO-issued certificates to be submitted shall depend on the degree of kinship,

applicable for a retiree shall be submitted. Member-retiree is not the same as retiree contemplated herein as the former is already a member prior to retirement while the latter is not.	and shall, on their face, be able to establish the degree of relationship.
---	--

In addition to the above requirements, the NSSLAs' BOT and management shall ensure that the following minimum information are obtained and documented in an accomplished membership application form: (a) name of the applicant; (b) complete permanent address; (c) contact numbers; (d) name of and relationship with the principal (i.e., employee-member or member-retiree) in case of immediate family; and (e) specimen signatures.

NSSLAs are not prohibited from requiring additional documents that they deem necessary to establish the identity and eligibility of their prospective members.

- b. *Validation of documents/information.* The information and documents proving the identity and eligibility of prospective members shall be subjected to validation. The conduct of validation procedures is a must for immediate families of employee-member or member-retiree, and may include, but not limited to, the following:
 - (1) Confirming the relationship with the employee-member or retiree-member and/or from duly authenticated official document;
 - (2) Verifying the permanent address through evaluation of documents such as utility bills, bank or credit card statement or other documents showing permanent address or through on-site visitation; and
 - (3) Confirming the submitted proof of employment directly to the employer of the prospective immediate family member.
- c. *Face-to-face contact.* No prospective member shall be accepted without face-to-face contact with the NSSLAs' duly authorized personnel. NSSLAs shall ensure that compliance with this requirement is duly documented. The documentation, at a minimum, shall include the capital contribution account opening and membership application forms, which shall explicitly indicate that face-to-face contact was conducted by and between the member and the specifically named authorized personnel.

Approval. Individual eligible for membership shall become a member of the NSSLAs after the approval of his membership by the BOT. In case of delegated authority as allowed in the NSSLAs by-laws, it shall be subject to the confirmation by the BOT. Prior to the approval or confirmation by the Board, the Association should ensure compliance with the payment of entrance fee and regulatory fixed capital or higher minimum fixed capital prescribed under the NSSLAs' by-laws, as applicable. The Board Resolution on the approval or confirmation with accompanying document on delegated approval of the membership shall be maintained by the Corporate Secretary.

Changes in membership status arising from: (a) retirement of employee-member (i.e., from employee-member to member-retiree); and (b) termination of membership such as due to death, voluntary or involuntary termination by the NSSLAs, shall likewise be subject to approval or confirmation by the BOT, as may be applicable. Such changes in membership status shall be duly supported by documentary proof/s.

Upon approval of membership, NSSLAs shall issue Certificate of Membership (pre-numbered) or Membership ID to the new member. Said documents are not substitutable by passbook or other similar documents as proof of membership."

Membership Registry. The NSSLAs, through the corporate secretary or board-designated person, shall maintain a registry of all its members which shall clearly identify and show the relationships of members.

Proforma of the registry which shall be maintained and timely updated by the Corporate Secretary or board-designated person is shown below:

Names of Employee- or Member-Retiree	Date of Membership	Immediate Family Members	Date of Membership	Relationship (Up to second degree of consanguinity or affinity)
1. Juan dela Cruz - employee/retiree		1. Maria Dela Cruz		spouse

The NSSLAs may adopt a different system, provided that such system shall be able to sufficiently provide the identity and clear relationships of members.

Membership Administration, Record Keeping and Retention. The corporate secretary or board-designated person shall be in-charge in the maintenance and safe storage of all membership identification and eligibility records. Said person shall ensure the integrity of such files.

The original records shall be preserved and safely stored as long as the membership exists. With respect to terminated memberships, the same shall be maintained for at least five (5) years from the date of cessation of membership from the NSSLA unless there is a pending case involved, in which case records shall be maintained until the case is closed with finality. It is understood that original of the records are kept and maintained, and that other forms of the records, e.g., photocopy or scanned copy, may be kept but the originals thereof are made readily available. All records shall be readily available upon request for off-site supervision or during on-site examinations/investigations by the Bangko Sentral or audit by external auditors to verify compliance with the provisions on well-defined group.

Individual membership file shall contain each member's records, which include at the minimum: (a) accomplished membership application form; (b) documentary requirements to establish his identity and eligibility; (c) copy of Board Resolution (BR) of membership approval/confirmation, but alternatively, the BR No. and date of approval may be stamped on the accomplished application form and the BR referred to shall be made readily available; and (d) receipts or proofs for payment of fees required by by-laws and minimum capital contribution.

In case of eligible members who were accepted prior to 24 February 2018, inclusion of the following documents in the file shall be sufficient: (a) accomplished membership application/update form; (b) documentary requirements to establish identity and eligibility; and (c) copy of a proof that capital contribution exist prior to 24 February 2018.

Moreover, membership registry shall be updated to reflect the true status of membership of persons within the well-defined group (e.g., change in status from member-employee to member-retiree, termination of membership). In this regard, the BOT shall establish policies, processes and practices to ensure timely updating of status of membership and membership registry.

The BOT shall prescribe the necessary adequate security measures to ensure the confidentiality of such files.

Orientation of members. To empower members and to address their expectations, the BOT and management of NSSLAs shall ensure that prospective members are provided with adequate orientation prior to the approval of their applications for membership. Such orientation shall cover their rights and privileges, particularly voting rights; expectations on earnings/net income distribution; participation during general membership assemblies; complaints mechanism and disclosure of results of operations, among others.

Sanctions. Any violation of the provisions of this Section and/or the provision on well-defined group under Section 4 of R.A. No. 8367 and/or the By-Laws of the NSSLA shall subject the NSSLA, its trustee/s, officer/s and agent/s to applicable sanctions as the Monetary Board may impose pursuant to R.A. No. 8367 (The Revised Non-Stock Savings and Loan Association Act of 1997), these rules and any pertinent laws or regulations.

Transitory Provisions. For existing members prior to 24 February 2018, NSSLAs shall comply with the foregoing requirements, and attain full compliance with the determination of the identity and eligibility of such members within one (1) year from 24 February 2018. In this regard, an NSSLA shall submit, within thirty (30) days from 24 February 2018, its plan of action/s, duly approved by its BOT, showing measures undertaken or to be undertaken to achieve full compliance with the requirements under this Section with respect to its existing members accepted prior to 24 February 2018.

The membership in the NSSLA of the existing members found to be ineligible by the BOT or thru examination conducted by the Bangko Sentral, pursuant to the provisions of this Section, shall immediately cease, and that members' corresponding outstanding balances shall be subject to an acceptable divestment plan duly approved by the NSSLA's BOT. Provided that, an acceptable divestment plan shall be submitted to the appropriate supervising department of the Bangko Sentral within thirty (30) calendar days from end of the one (1) year period to determine the identity and eligibility of existing members, and the NSSLA concerned shall thereafter submit a detailed quarterly status and monitoring report thereon. *Provided, further* that, non-compliance with the acceptable divestment plan, as determined in off-site monitoring or on-site examinations or investigations conducted by the Bangko Sentral, without justifiable cause/reason, shall subject the NSSLA, its trustees and/or officers to applicable enforcement action.

(Circular No. 993 dated 29 January 2018)

104-S ESTABLISHMENT, RELOCATION OR VOLUNTARY CLOSURE OF NSSLA SERVICE UNITS¹

Policy Statement. The Bangko Sentral aims to promote greater access to financial services and adopt regulations that support sound, stable and prudent operation of NSSLAs in line with their business model. On the other hand, NSSLAs are expected to adhere to the standards of fair and efficient delivery of authorized financial products and services to their members.

¹ Within two (2) months from 17 April 2019, NSSLA shall (i) perform a review of the activities of all their existing service units; and (ii) submit to the appropriate department of the Bangko Sentral a certified list of said existing service units, categorized as branch or satellite office as defined under this Section (*Definition of terms*). NSSLA's management should take appropriate action to ensure that the activities performed in their existing service units are in accordance with the provisions of Sec. 104-S and 105-S.

Towards this end, the following shall govern the establishment, relocation or voluntary closure of service units of NSSLAs.

Definition of terms. For purposes of this Section, the following definitions shall apply:

- a. *Service unit* shall refer to any permanent field office or place of business in the Philippines other than the head office where an NSSLA may perform activities and provide products and services to its members that are within the scope of its authority. A service unit is classified as either a branch or a satellite office.
- b. *Branch* shall refer to a service unit authorized to conduct both cash and non-cash transactions. In this respect, a complete set of books and records shall be maintained in each branch.
- c. *Satellite office* shall refer to a service unit authorized to perform non-cash transactions only and does not maintain a separate book of accounts as its transactions are taken-up in the books of the head office or a branch to which it is attached.

A satellite office shall perform non-cash transactions which cover the following:

- (1) Provide member care services, such as receiving complaints or responding to inquiries/requests;
 - (2) Conduct prequalification activities relating to loan or membership applications;
 - (3) Accept applications for membership, or termination of membership or loan. The evaluation of such applications shall be done at the head office or branch to which the satellites office is attached;
 - (4) Accept checks of members for credit to their savings deposit and/or capital contribution accounts, or for payment of loans;
 - (5) Release checks or equivalent non-cash document to members to facilitate disbursement of loan proceeds; and
 - (6) Update and replace passbook.
- d. *Mobile desk* shall refer to a temporary desk and chair manned by a single NSSLA personnel located within the premises of the mother company where no service unit is established therein.
 - e. *Kiosk* shall refer to a temporary booth in an organized information caravan of a group of NSSLAs.

Pre-requisite for the grant of authority to establish a service unit. NSSLAs may establish a service unit as a strategic measure in the implementation of its business model subject to prudential criteria provided under Sec. 111-S (*Prudential criteria*). No NSSLA operating in the Philippines shall establish a service unit without prior approval of the Bangko Sentral.

An NSSLA authorized to establish service units shall be responsible for all transactions conducted in such service units to the same extent and in the same manner as though such transactions had all been conducted in the head office.

Application for authority to establish a service unit. NSSLAs seeking to establish a service unit shall submit the following documents to the appropriate supervising department of the Bangko Sentral:

- a. Application letter signed by the NSSLA president or officer of equivalent rank. The application shall indicate the number and classification of service unit to be established, the proposed location along with the sketch, and necessary justification. The application for a satellite office shall also indicate the office to which it shall be attached;
- b. Corporate Secretary's Certificate stating that the NSSLA's board of trustees approved the establishment of the service unit; and
- c. Certification/Undertaking signed by the NSSLA president or officer of equivalent rank stating that the NSSLA is compliant with the pre-requisite for the grant of authority to establish a service unit provided under this Section (*Pre-requisite for the grant of authority to establish a service unit*) and that said service unit shall only service the members of the NSSLA.

Any request for conversion of a branch to satellite office or vice-versa shall be considered as an application for establishment of a new service unit, subject to the above requirements: *Provided*, That, the documents shall contain information relevant to the conversion.

Location of service units. As a general rule, service units shall be established within the compound of the mother company: *Provided*, That in case of establishment outside the said compound, the NSSLA shall submit sufficient justification along with proof to support its representations.

Opening of service units. Approved service units shall be opened within one (1) year from the date of Bangko Sentral approval, subject to extension on a case-to-case basis: *Provided*, That the entire period of extension shall not exceed three (3) years reckoned from the date of said approval.

Requirements after opening a service unit. Not later than fifteen (15) business days from the date of opening, the NSSLA, through its chief compliance officer and the head of operations or its equivalent rank, shall:

- a. Notify in writing the appropriate supervising department of the Bangko Sentral of the actual date of opening of the service unit; and
- b. Submit a certification stating that the NSSLA has:
 - (1) Provided adequate personnel complement, internal control measures, physical facilities, information systems and security arrangements, including the installation of security devices and accessibility to persons with disability;
 - (2) Posted the required notices, schedules and other relevant information pertaining to its allowed activities, including the NSSLA's well-defined group coverage, in conspicuous places in the premises of the service unit;
 - (3) Provided efficient means of accounting and reporting as well as communication facilities (to be specified) between the head office, branches and satellite offices;
 - (4) Adopted a manual of operations for the service unit duly approved by the NSSLA's board of trustees; and
 - (5) Complied with the requirements under this Section (*Pre-requisite for the grant of authority to establish a service unit*) as of the time of actual opening.

An NSSLA that fails to comply with any of the requirements under this Section (*Pre-requisite for the grant of authority to establish a service unit*) as of the intended opening date shall refrain from opening the same until it has complied with all the said requirements.

Relocation of service units. Relocation of existing service units is subject to the provisions under this Section (*Location of service units*) and the following procedures:

- a. Submit to the appropriate supervising department of the Bangko Sentral the notice of relocation of service unit signed by the NSSLA president or officer of equivalent rank, together with a certified true copy of the resolution of the NSSLA's board of trustees authorizing said relocation, and an undertaking stating that the NSSLA shall comply with the notification requirement under Item "b" below. The notice shall include the sketch and other information on the new site, manner of occupancy, (e.g., whether lease or purchase) and the timetable for said relocation;
- b. Display posters of notice of relocation in conspicuous places in the premises of the service unit to be relocated and in the official website of the NSSLA (if the NSSLA has an official website), at least forty-five (45) business days prior to relocation; and
- c. Submit to the appropriate supervising department of the Bangko Sentral within five (5) business days from the date of relocation a certification signed by the NSSLA president or officer of equivalent rank, stating that the notification requirement under Item "b" above has been complied with and an undertaking stating that the service unit will only service members of the NSSLA.

Relocation beyond one (1) year from the date of closure shall be deemed permanent closure of the service unit. The opening of the service unit at the new site shall be deemed as an establishment of a new service unit subject to the provisions under this Section (*Pre-requisite for the grant of authority to establish a service unit*).

The foregoing guidelines shall apply only to relocation within a city/municipality. Otherwise, the rules on permanent voluntary closure and establishment of a new service unit shall apply.

Temporary voluntary closure of service units. Temporary voluntary closure of service units for the purpose of undertaking renovations/major repairs of office premises/facilities and for other valid reasons may be allowed: *Provided*, That the service unit shall be reopened within one (1) year from the date of temporary closure and in accordance with the following procedures:

- a. Submit to the appropriate supervising department of the Bangko Sentral a written notice of temporary closure signed by the NSSLA president or officer of equivalent rank, together with a certified true copy of the resolution of the NSSLA's board of trustees stating the justification and authorizing said temporary closure; and an undertaking stating that the NSSLA shall comply with the notification requirements under Item "b" below. The notice shall include information as to the timetable for the said temporary closure and the nearest service unit that will handle the transactions of the service unit to be temporarily closed;
- b. Send notice of temporary closure to the members and creditors of the service unit involved by personal service, or registered mail or other mail couriers, and post said notice in the official website of the NSSLA (if the NSSLA has an official website), upon receipt of acknowledgement of the notice from the Bangko Sentral, but at least two (2) months prior to the intended date of temporary closure. Display posters in conspicuous places in the premises of the service unit to be closed at least two (2) months prior to the date of closure. Information as to the date of the reopening and the address of the service unit that will handle the transactions of the service unit to be temporarily closed shall be indicated in the said notice and posters. Proof of receipt of notice by the members and creditors shall be kept on file and made available upon request of the Bangko Sentral;

- c. Submit to the appropriate supervising department of the Bangko Sentral within five (5) business days from the date of temporary closure of the service unit, a notice of such closure signed by the NSSLA president or officer of equivalent rank, together with a certification stating that the notification requirement under Item “b” above has been complied with; and
- d. Submit to the appropriate supervising department of the Bangko Sentral within five (5) business days from the date of reopening of the service unit, notice of such reopening together with a certification signed by the NSSLA president or officer of equivalent rank, stating that the NSSLA has complied with the requirements under Item “b” of this Section (*Requirements after opening a service unit*).

Temporary voluntary closure of service units beyond one (1) year shall be deemed as permanent voluntary closure, and its re-opening shall be deemed as an establishment of a new service unit, subject to the provisions under this Section (*Pre-requisite for the grant of authority to establish a service unit*).

Permanent voluntary closure of service units. Permanent voluntary closure of any service unit shall be subject to prior approval of the Bangko Sentral and compliance with the following procedures:

- a. Submit to the appropriate supervising department of the Bangko Sentral a request for approval, signed by the NSSLA president or officer of equivalent rank, together with a certified true copy of the resolution of the NSSLA’s board of trustees stating the justification and authorizing the said closure on the date duly indicated;
- b. Send written notice of closure to members and creditors of the service unit involved by personal service, or registered mail/other mail couriers or publish said notice in a newspaper of general circulation, and post the same in the official website of the NSSLA (if NSSLA has an official website), upon receipt of notice of the Bangko Sentral approval, but at least (3) months prior to the intended date of closure. Display posters in conspicuous places in the premises of the service unit to be closed at least three (3) months prior to the closure. Proof of receipt of notice by the members and the creditors shall be kept on file and made available upon request of the Bangko Sentral; and
- c. Submit to the appropriate supervising department of the Bangko Sentral within five (5) business days from date of closure, a certification signed by the NSSLA president or officer of equivalent rank, stating that the closure was implemented and that the notification requirement under Item “b” above has been complied with.

Mobile desks and kiosks. Without prior authority from the Bangko Sentral, NSSLAs may operate mobile desks and kiosks, subject to the following guidelines:

- a. A mobile desk or kiosk shall be used mainly for advertising, marketing or providing information about the NSSLA. Acceptance of application forms shall be allowed provided that the same will be forwarded to the nearest NSSLA branch or head office for processing;
- b. The NSSLA shall notify the appropriate supervising department of the Bangko Sentral, not later than the day of the start of operation of the mobile desks or kiosks. Such notice shall include information on the period of operation, the specific address of operation, justification and proofs to support representation, the branch where application forms will be turned over, and certified true copy of the resolution of the NSSLA’s board of trustees authorizing the operation of the mobile desk or kiosk; and
- c. Within three (3) days from completion of the activity, the NSSLA thru the Compliance Officer and head of operations shall notify the appropriate supervising department of the Bangko Sentral of the termination of operations of the mobile desk or kiosk.

Supervisory enforcement action. The Bangko Sentral may deploy any of its supervisory action to promote adherence to the requirements set forth in the foregoing rules and bring about timely corrective actions and compliance with the Bangko Sentral directives.

For this purpose, the Bangko Sentral may, among others, limit the activities and services offered by a service unit or close any service unit. If any part of the certification submitted by the NSSLA as required in this Section is found to be false, the Bangko Sentral may also, among others, suspend the privilege to establish and/or open approved service units and/or relocate service units and impose sanctions on the certifying officers concerned.

Relocation of Head Offices

Relocation of an NSSLA’s head office shall require prior approval of the Bangko Sentral, and compliance with the following procedures:

- a. Submit to the appropriate supervising department of the Bangko Sentral a request for approval of the relocation of the NSSLA’s head office signed by the NSSLA president or officer of equivalent rank, together with the following documentary requirements:

- (1) A certified true copy of the resolution of the NSSLAs' board of trustees stating the justification and authorizing the relocation of the head office;
 - (2) A certified true copy of the trustees' certificate stating that at least two-third (2/3) votes of members and majority of the trustees approved the proposed amendment to the Articles of Incorporation on the change of address;
 - (3) Description of the building and place of relocation, manner of occupancy, i.e., whether lease or purchase, estimate of the total costs to be incurred in connection with the relocation, and the proposed timetable for such relocation; and
 - (4) Plan for the disposition of the original site.
- b. Send written notice of relocation to members and creditors by registered mail/other mail couriers and post such written notice in the official website of the NSSLAs (if the NSSLAs has an official website) upon receipt of notice of Bangko Sentral approval but at least three (3) months prior to the relocation: *Provided*, That said notification period may be reduced to forty-five (45) calendar days if the proposed relocation site is within the same municipality/city of the head office. Display posters in conspicuous places in the premises of the head office; and
 - c. Submit a notice of relocation to the appropriate supervising department of the Bangko Sentral within five (5) business days from the date of relocation, together with a certification signed by the NSSLAs president or officer of equivalent rank, stating that the notification requirements under Item "b" above have been complied with.

(Circular Nos. 1143 dated 12 April 2022 and 1036 dated 21 March 2019)

105-S BUSINESS NAME¹

NSSLAs organized or operating under R.A. No. 8367 and licensed by the Bangko Sentral shall include in their names the words "Savings and Loan Association". Such NSSLAs shall display in a conspicuous place at their business offices a sign including, among other things, the following words: "Authorized by the Bangko Sentral ng Pilipinas".

Prohibitions.

- a. No person, association, partnership or corporation shall do business as an NSSLAs, or shall use the terms "Savings and Loan Association" or any other title or name tending to give the public impression that it is engaged in the operations and activities of an NSSLAs unless so authorized under R.A. No. 8367 and these regulations.
- b. The use by an NSSLAs of any other name or title or combination of names and titles or any other deviation from the requirements of this Section shall not be authorized except upon prior approval of the Monetary Board.
- c. NSSLAs shall not issue, publish or cause or permit to be issued or published, any advertisement that it is doing or permitted to do business which is prohibited by law to an NSSLAs.
- d. No NSSLAs shall advertise or represent itself to its members or to the public as a bank, or as a trust company.

106-S BUSINESS DAYS AND HOURS

NSSLAs may, with the prior approval of the appropriate supervising department of the Bangko Sentral, adopt such business days and hours as may be convenient for them. NSSLAs shall be open for business during business hours and days except when extraordinary instances caused by unforeseen, unavoidable event directly affect the NSSLAs' ability to open for business. NSSLAs shall post conspicuously at all times in their place of business their schedule of regular business hours and days.

107-S PREMISES AND OTHER FIXED ASSETS

The following rules shall govern the premises and other fixed assets of NSSLAs.

Accounting for non-stock savings and loans associations premises; other fixed assets. NSSLAs premises, furniture, fixture and equipment shall be accounted for using the cost model under PAS 16 "Property, Plant and Equipment".

Reclassification of real and other properties acquired as non-stock savings and loans association premises. Real and Other Properties Acquired (ROPA) reclassified either as Real Property- Land or Real Property-Building shall be booked at their ROPA balance, net of any valuation reserves: *Provided*, That only such acquired asset or a portion thereof that will be immediately used or earmarked for future use may be reclassified and booked as Real Property-Land/Building.

¹ See SEC Circular No. 3 dated 16 February 2006

NSSLAs, prior to the reclassification of their ROPA accounts to Real Property-Land/Building, shall first secure prior Bangko Sentral approval before effecting the reclassification and shall submit, in case of future use, justification and plans for expansion/use.

Batas Pambansa Blg. 344 – An Act to Enhance the Mobility of Disabled Persons by Requiring Certain Buildings, Institutions, Establishments and Public Utilities to Install Facilities and Other Devices. In order to promote the realization of the rights of disabled persons to participate fully in the social life and the development of the societies in which they live and the enjoyment of the opportunities available to other citizens, no license or permit for the construction, repair or renovation of public and private buildings for public use, educational institutions, airports, sports and recreation centers and complexes, shopping centers or establishments, public parking places, workplaces, public utilities, shall be granted or issued unless the owner or operator thereof shall install and incorporate in such building, establishment or public utility, such architectural facilities or structural features as shall reasonably enhance the mobility of disabled persons such as sidewalks, ramps, railings, and the like. If feasible, all such existing buildings, institutions, establishments, or public utilities may be renovated or altered to enable the disabled persons to have access to them.

Republic Act No. 9994 – An Act Granting Additional Benefits and Privileges to Senior Citizens, Further Amending Republic Act No. 7432 of 1992, as Amended by Republic Act No. 9257 of 2003. To be able to give full support to the improvement of the total well-being of the elderly and their full participation in society, and to motivate and encourage them to contribute to nation building, senior citizens shall be provided with express lanes in all branches and offices of NSSLAs. If the provision of express lanes is logistically impossible in any particular branch or office of any NSSLA, said branch or office shall ensure that senior citizens are accorded priority service. The provision of express lanes and/or priority service shall be made known to the general public through a clearly written notice prominently displayed in the transaction counters of all NSSLA branches and/or offices.

B. SPECIAL AUTHORITIES

111-S LICENSING

Statement of Policy and Objectives. Consistent with the mandate of the Bangko Sentral to promote a safe and sound banking system, the licensing process on permissible activities of BSFI is enhanced to align the process with international standards and best practices such as the "Core Principles for Effective Supervision" issued by the Basel Committee on Banking Supervision. The Bangko Sentral will not restrict the scope of risk-taking activities of BSFIs consequent of the licenses and/or authorities granted: *Provided*, That these licenses and/or authorities are in line with their business model and strategic direction: *Provided, further*, That these BSFIs demonstrate the capacity to implement these strategies and the ability to manage risks.

The enhanced policy guidelines set forth the expectations and criteria of the Bangko Sentral with respect to granting of licenses and authorities as well as its right to reject applications if the criteria set forth are not met by the applicant BSFIs ("applicants") or if the information provided is not adequate. The Bangko Sentral also reserves the right to withdraw or revoke the license and/or authority or enforce appropriate actions when an institution no longer meets the criteria or standards required to be met for the exercise of the license and/or authority.

These criteria are intended to incorporate the licensing process into Bangko Sentral's enforcement regime that is anchored on good governance, sound risk management system and effective control systems. Further, these criteria aim to provide more consistency on how the risk-focused supervision function is applied to the licensing process. This enhanced licensing policy aims to ensure that licenses and authorities are granted only to applicants that comply with the standards set.

It is also the thrust of these enhanced policy guidelines on granting licenses/authorities to establish Bangko Sentral's accountability and promote transparency on the licensing process which are consistent with its commitment to deliver prompt and efficient service.

Scope. Applications for licenses and/or authorities shall be categorized as follows:

- a. *Type "A"* - applications for licenses and/or authorities where compliance with the defined prudential requirements/criteria described in this Section (*Prudential Criteria*) is a pre-condition for applicants to be considered eligible;
- b. *Type "B"* - applications for licenses and/or authorities processed regardless of risk profile; and
- c. *Type "C"* - activities which no longer require submission of applications and processing but shall be subject to submission of reports/certification/notification within stated deadlines. However, compliance with pre-qualification requirements is subject to post verification and any false information and/or misrepresentation may be a basis for the imposition of appropriate enforcement actions described in this Section (*Enforcement Action*). The Bangko Sentral shall use this information to continuously tailor its supervisory strategy for the supervised entities and to maintain and continuously update its institutional database.

Prudential criteria. The prudential criteria set forth in this Section shall be used in determining the eligibility of applicants to the licenses and/or authorities granted by the Bangko Sentral. Accordingly, the following minimum conditions must be met:

- a. Applicant domestic banks must have a CAMELS composite rating of at least "3" and a "Management" rating of not lower than "3", branches of foreign banks must have a ROCA rating of at least "3", and BSFIs must have a RAS rating of at least "Acceptable". Whenever applicable, ratings equivalent to cited minimum rating grade requirements under appropriate rating systems (i.e., IT Rating Systems, Trust Rating Systems, among others) shall apply for certain licenses and/or authorities;
- b. Applicants have no major supervisory concerns in governance, risk management systems, and internal controls and compliance system, and characterize/demonstrate the following:

(1) Governance

Applicants must display a culture of good corporate governance appropriate to its size, risk profile and complexity of operations. Board of directors and management, in their respective roles, provide an appropriate level and quality of oversight and support to all of the institution's activities. Sound management practices are observed and demonstrated through (1) active oversight and satisfactory performance by the board of directors and senior management, (2) appropriate policies, processes, and controls relative to the institution's size, complexity and risk profile, (3) maintenance of an independent and effective internal audit and compliance program as well as a sound internal control environment, and (4) effective risk monitoring and management information systems.

Applicants should not be found engaging in an activity which may be considered as conducting business in an unsafe and unsound manner. In cases where weaknesses, violations of law, policy and/or regulation exists, other than those considered unsafe or unsound practices, these should not be material to the safety and soundness of the institution, can be reasonably managed, and are being adequately addressed.

Quality of corporate governance shall be assessed based on the principles and framework set forth in the Guidelines in Assessing the Quality of Corporate Governance in BSFIs;

(2) Risk management system and internal controls

Applicants shall have a comprehensive risk management system approved by its board of directors (or equivalent management committee in the case of foreign bank branches) to identify, measure, evaluate, report and control or mitigate all material risks on a timely basis and to assess the adequacy of their capital in relation to their risk profile and market and macroeconomic conditions and whose sophistication are commensurate to the risks being monitored and controlled. The risk management system must be characterized by a clear delineation of responsibility for risk management, adequate risk measurement systems, appropriate risk limits structure, effective internal controls and complete, timely and efficient risk reporting systems.

Likewise, applicants shall have an effective and adequate system of internal controls for the conduct of their business taking into account their risk profile. These controls deal with organizational structure, accounting policies and processes, checks and balances, safeguarding of assets and investments and appropriate and effective internal audit and compliance functions. Standards and principles as well as the Bangko Sentral's expectations governing internal controls and audit under existing regulations shall apply in assessing the quality and effectiveness of the internal control systems of an applicant; and

(3) Compliance system

Applicants shall have a compliance system, appropriate to its size, risk profile and complexity of operations, designed to specifically identify and mitigate business risks¹ which may erode the franchise value of the institution. Compliance policies and procedures embodied in a Compliance Policy Manual should be sound and effectively implemented. Likewise, compliance monitoring and testing as well as review process should be robust to ensure BSFI conducts its business/operations in accordance with banking laws, rules and regulations and other laws relevant to banking such as securities laws and regulations. BSFI's should not have been found significantly non-compliant with prudential requirements such as SBL, DOSRI limits, capital adequacy ratio requirements, among others.

Standards and principles set forth in the Compliance Rating System framework shall apply in assessing the quality of BSFI's compliance system; and

¹ As defined under Sec. 161-Q (*Compliance function*) *business risk* refers to conditions which may be detrimental to the institution's business model and its ability to generate returns from operations, which in turn erodes its franchise value. Business risk includes reputation, compliance, market conduct and legal risks.

- c. Applicants have complied with directives and/or are not subject of specific directives and/or enforcement actions by the Bangko Sentral.

Applicants shall have corrected any findings of unsafe or unsound practices and have addressed any outstanding explicit directives from the Bangko Sentral and/or other relevant regulatory bodies, prohibiting the conduct of activities related to the licenses and/or authorities being applied, as of the date of application. Applicants with specific prohibitions to conduct certain activities shall not be eligible to apply for that particular license and/or authority.

No application shall be accepted until such time that enforcement actions are formally lifted by the Bangko Sentral and/or other relevant regulatory bodies after applicants have demonstrated to the Bangko Sentral that safety and soundness concerns are satisfactorily addressed and/or until such time applicants become eligible.

Applications of BSFIs under rehabilitation and/or enhanced supervision status¹ shall be dealt with in accordance with the eligibility test described in Section II.1(a) of *Appendix S-10*.

BSFIs granted with licenses/authorities shall continuously comply with the abovementioned standards and requirements even after the license/authority has been granted; otherwise, any deviation or non-compliance may be a basis for the imposition of appropriate enforcement actions described in this Section.

The specific guidelines and procedures on the Bangko Sentral's licensing framework are shown in *Appendix S-10*.

Enforcement actions. In line with the thrust of the Bangko Sentral to incorporate the licensing process into its enforcement regime, the Bangko Sentral reserves the right to deploy, as may be warranted, an adequate range of supervisory tools to ensure that grantees of licenses/authorities are and remain qualified to possess the same, bring about timely corrective actions and compliance with Bangko Sentral directives, and provide safety to depositors, creditors, other stakeholders as well as the public in general.

Enforcement actions that may be imposed include, but are not limited to:

- a. Corrective action

Corrective actions are measures intended to primarily require BSFIs with approved licenses/authorities to rectify any deviations from the standards, principles and conditions expected for the exercise of the license and/or authority. Corrective actions may include, but are not limited to, issuance of directives and warnings.

- b. Sanctions

The Monetary Board may impose any of the sanctions enumerated hereunder or a combination thereof.

- (1) Non-monetary

- (a) *Suspension of activities.* The conduct of activities related to the licenses/authorities granted may be suspended if the Bangko Sentral determines that the concerned BSFI no longer meets the criteria or standards set; or
- (b) *Revocation of licenses/authorities.* The license/authority granted may be revoked in cases where violation, non-compliance with criteria/standards and/or false information are noted which affects the safety and soundness of BSFIs' operations; and/or
- (c) *Administrative sanctions.* The responsible directors/officers who approve transactions and/or decisions that resulted in violations of laws, rules and regulations, orders, and directives issued by the Monetary Board or the Governor may be subject to reprimand, temporary suspension, and/or disqualification of directors/officers.

The Monetary Board is not precluded to impose non-monetary sanctions other than those identified from Items "(a)" to "(c)"; and/or

- (2) Monetary

Monetary penalties may be imposed for any acts, omissions or transactions that are outside the permissible activities of the licenses/authorities granted or are in violation of laws, Bangko Sentral rules and regulations, orders and directives issued by the Bangko Sentral.

¹ Rehabilitation includes BSFIs under the Prompt Corrective Action (PCA), Rehabilitation Program, Letter of Commitment and any other similar cases where BSFIs are expected to comply specific terms and conditions to restore eligibility (safety and sound) status.

Type of license of permissible activities¹. The type of license attached to permissible activities of Bangko Sentral supervised financial institutions (BSFIs) shall be as follows:

Type of License	Permissible Activity	Related Sections
A		
B	Amendment of Articles of Incorporation (AOI) and By-Laws	Sec. 102-S (Organizational requirements)
C	Outsourcing/Insourcing of Banking Functions	Sec. 113-S

Processing and Licensing Fees. All applications shall be charged with the following processing fees pursuant to Section II.3.i of Appendix S-12:

Type of License/ Authority	Processing Fees for Non-Bank Financial Institutions
A	10,000
B	10,000

Certain Type A licenses shall be charged with the following licensing fees upon approval pursuant to Section II.3.ii of Appendix S-12:

Type of License/ Authority	Licensing Fees* for Non-Bank Financial Institutions
A	50,000

*Licensing fee shall be net of the processing fee.

The foregoing tables shall not apply to licensing applications with separate fee structure under specific sections of this Manual.

(Circular Nos. 1143 dated 12 April 2022, 1031 dated 07 February 2019, and 947 dated 15 February 2017)

112-S LICENSING OF AGENTS AND SALES REPRESENTATIVES

No person shall act as an agent or sales representative of an NSSLA or operate an agency without obtaining a license from the Monetary Board. No license is required for a collector of an NSSLA but no person shall hold himself out or act as collector unless he is authorized as a collector in writing by such NSSLA.

113-S GUIDELINES ON OUTSOURCING

The rules on outsourcing of banking functions as shown in Sec. 112 (*Statement of principle on outsourcing*) of the MORB and Appendix Q-36 shall be adopted insofar as they are applicable to NSSLAs.

(Circular No. 1031 dated 07 February 2019)

114-S CREDIT RISK MANAGEMENT; POLICY STATEMENT

(Transferred to Sec. 150-S as per Circular No. 1143 dated 12 April 2022)

C. CAPITALIZATION

121-S CAPITAL OF NSSLAs

Policy Statement. It is the policy of the Bangko Sentral to ensure that NSSLAs operate in a safe and sound manner. Towards this end, the Bangko Sentral shall set prudent and appropriate minimum capital adequacy requirements for NSSLAs that is capable to support the NSSLA as a going concern, commensurate to the risk exposures of the NSSLA and provides loss absorption mechanism, for both expected and unexpected losses.

Minimum capitalization of NSSLAs. The capital of an NSSLA shall comprise of: (1) capital contributions, both fixed capital and capital contribution buffer, (2) retained earnings free, (3) retained earnings reserve, (4) undivided profits, (5) other comprehensive income, and (6) revaluation increment reserves. An NSSLA shall have a minimum capital of ₱1.0 million. Thereafter, an NSSLA shall maintain a minimum capital that would allow it to comply with the capital adequacy ratio requirement as provided under Sec. 122-S.

¹ Transitory Provisions. Applications filed with the Bangko Sentral prior to 6 March 2019 shall not be charged with processing and licensing fees provided under this Section (*Processing and licensing fees*). Applications for Type C licenses received prior to 6 March 2019 shall be deemed to have complied with the notification/certification requirements if after thirty (30) banking days from 6 March 2019, the appropriate supervising department of the FSS does not advise the BSFI concerned of any deficiency on such application.

Capital contributions of members.

Capital contributions represent ownership interest by the members in an NSSLA, including the rights provided in the By-Laws (e.g., voting rights, right to take part in the distribution of the income of the Association, etc.) arising therefrom. As such, it may absorb losses incurred by an NSSLA.

Each capital contribution of a member shall consist of fixed and buffer components, as defined hereunder:

- a. *Fixed-capital contributions* shall refer to the portion of member's capital contributions that must be maintained and once increased and recorded, cannot be reduced for the duration of membership except upon termination of membership.
- b. *Capital contribution buffer* shall refer to the capital contributions in excess of the fixed capital contribution which shall not exceed ten times (10X) thereof.

The capital contribution buffer may be reduced pursuant to the policies set by the Board of Trustees and duly confirmed by majority of the NSSLA's General Assembly.

Each member must own a capital contribution of an NSSLA which shall be under his name in the books of the NSSLA. The capital contributions of members shall be subject to the following requirements:

- a. *Minimum amount of fixed capital contributions.* Every member of an NSSLA shall be required to contribute a fixed capital of at least P1,000.00, which shall be considered as the minimum capital contribution, unless a higher minimum is prescribed under the NSSLA's by-laws.

The payment of minimum capital contribution, including entrance or membership fee, as may be determined by the NSSLA concerned, shall be one of the requisites for membership. All payments which fail to meet the minimum amount of capital contribution shall be treated as payables and presented under "other liabilities" account in the financial reporting package.

- b. *Ceiling in fixed capital contributions.* The total amount that a member may contribute as fixed capital contributions shall be subject to a ceiling which shall be determined by the board of trustees and duly confirmed by the majority of the NSSLA's general assembly. The prescribed ceiling shall be applied uniformly to all members and without prejudice to Bangko Sentral setting lower or higher ceiling.
- c. *Reduction and ceiling of capital contribution buffer.* The NSSLA shall establish and prescribe the conditions and/or circumstances when members' capital contribution buffer may at least be maintained, such as, when the NSSLA is under liquidity stress or is unable to meet the capital-to-risk assets ratio requirement under Sec. 122-S.: *Provided*, That such conditions and/or circumstances shall be disclosed to the members upon their placement of capital contribution buffer and in a manner as may be determined by the Board of Trustees.

The amounts held in excess of the prescribed ceiling on capital contributions buffer (formerly referred as withdrawable capital contributions), i.e., ten times (10X) of fixed capital contributions, as of 22 March 2013 shall be allowed to continue as such but once reduced shall not thereafter be increased beyond the prescribed ceiling.

NSSLA shall encourage their respective members to increase their capital contributions. For this purpose, each NSSLA shall adopt policies and mechanisms towards the attainment thereof. The policies shall include but not limited to the following:

- a. capital contribution build up program or schedule of capital contribution;
- b. restriction on reduction of capital contribution;
- c. ceilings on additional capital contribution; and/or
- d. mode and terms of payment.

Administration of capital contributions of members

- a. An NSSLA shall ensure that each member has a capital contribution account representing the member's capital contribution.
- b. An NSSLA shall issue to its member a member's ownership document evidencing the member's capital contribution (e.g., certificate of capital contribution, passbook, etc.). Such document/s shall contain the capital contribution balance of the member with a breakdown showing separately the fixed and capital contribution buffer balances.
- c. For purposes of identifying and monitoring the fixed capital and capital contribution buffer of a member's capital contribution, NSSLAs shall maintain records/capital contribution account ledger, either in manual or automated form, showing separately the fixed and capital contribution buffer of each member.

- d. The member's ownership documents and the capital contribution account ledger shall be timely updated whenever transaction affecting the fixed and capital contribution buffer balances occurs.
- e. Receipt of funds from persons not belonging to the well-defined group of an NSSLA is strictly prohibited. In cases of violations pertaining to receipts of funds intended as capital contribution and/or deposits from persons not belonging to the well-defined group of an NSSLA, such funds shall not be considered as capital contributions, as herein defined, and/or deposits, as the case may be, and shall be treated as payables and presented under other liabilities in the financial reporting package.

(Circular Nos. 1143 dated 12 April 2022 and 1045 dated 29 August 2019)

122-S CAPITAL-TO-RISK ASSETS RATIO

Capital-to-risk assets ratio (CAR) is an important tool to measure solvency and effectively manage the risk-taking activities of an NSSLA, determine its capacity to absorb unexpected losses, and adequately provide protection to members and creditors.

The CAR, expressed as a percentage of total capital accounts to total risk assets shall not be less than ten percent (10%).

For purposes of computing CAR, the aggregate amount of capital contribution buffer that shall be allowed to form part of an NSSLA's total capital accounts shall be capped at ten times (10X) the aggregate amount of fixed capital contributions.

The total risk asset is defined as total assets minus the following assets:

- a. Cash on hand;
- b. Evidences of indebtedness of the Republic of the Philippines and any other evidences of indebtedness/obligations, the servicing and repayment of which are fully guaranteed by the Republic of the Philippines;
- c. Loans to the extent covered by hold- out on, or assignment of, deposits maintained in the lending NSSLA;
- d. Office premises, depreciated;
- e. Furniture, fixtures and equipment, depreciated;
- f. Real estate mortgage loans guaranteed by the Home Guarantee Corporation to the extent covered by the guarantee; and
- g. Other non-risk items as the Monetary Board may, from time to time, authorize to be deducted from total assets.

The Monetary Board shall prescribe the manner of determining the total assets of such NSSLA for the purpose of this Section, but contingent accounts shall not be included among total assets.

Whenever the capital accounts of an NSSLA are deficient with respect to the preceding paragraph, the Monetary Board, after considering the report of the appropriate supervising department of the Bangko Sentral on the state of solvency of the NSSLA concerned, shall limit or prohibit the distribution of net income and shall require that part or all of net income be used to increase the capital accounts of the NSSLA until the minimum requirement has been met. The Monetary Board may, after considering the aforesaid report of the appropriate supervising department of the Bangko Sentral, and if the amount of the deficiency justifies it, restrict or prohibit the making of new investments of any sort by the NSSLA with the exception of the purchases of evidence of indebtedness included under Item "b" of this Section until the minimum required capital ratio has been restored.

(Circular No. 1045 dated 29 August 2019)

123-S WITHDRAWABLE SHARE RESERVE

NSSLAs shall create a withdrawable share reserve which shall consist of two percent (2%) of the total capital contributions of the members.

An amount corresponding to the withdrawable share reserve shall be set up by the NSSLA, such amount invested in bonds or evidences of indebtedness of the Republic of the Philippines or of its subdivisions, agencies or instrumentalities, the servicing and repayment of which are fully guaranteed by the Republic of the Philippines, and evidences of indebtedness of the Bangko Sentral.

For a uniform interpretation of the provisions of this Section, the following shall serve as guidelines:

- a. The withdrawable share reserve shall be set up from the undivided profits of the NSSLA and shall be funded in the form of cash deposited as a separate account and/or an investment allowed under this Section;
- b. Should there be an increase in the capital contribution, the reserve shall be correspondingly adjusted at the end of each month from undivided profits, if any; and
- c. The reserve shall be adjusted first before the NSSLA shall declare and distribute to its members any portion of its net income at any time of the year.

124-S SURPLUS RESERVE FOR LEDGER DISCREPANCIES

Whenever an NSSLA has a discrepancy between its general ledger accounts and their respective subsidiary ledgers, the board of trustees of the NSSLA shall set up from the undivided profits of the NSSLA, if any, a surplus reserve, in an amount equivalent to the amount of the discrepancy, and this reserve shall not be available for distribution to members or for any other purpose unless and until the discrepancy is accounted for. The board of trustees shall also direct the employee responsible for the discrepancy to account for said discrepancy: *Provided*, That the failure of the employee to do so shall constitute as ground for his dismissal if the discrepancy is of serious or recurring nature.

125-S RESERVE FOR OFFICE PREMISES, FURNITURE, FIXTURES AND EQUIPMENT

NSSLAs shall set aside five percent (5%) of their yearly net income until it amount to at least five percent (5%) of the total assets as a reserve for a building fund to cover the cost of construction or acquisition of office premises, and of the purchase of office furniture, fixtures and equipment.

An NSSLA which, as determined by its board of trustees, has adequate office premises, furniture, fixtures and equipment necessary for the conduct of its business need not set up the reserve: *Provided*, That this fact should be certified by its board of trustees in a resolution to be submitted to the appropriate supervising department of the Bangko Sentral for verification and approval: *Provided, however*, That in case reserves had been set up, the NSSLA so exempted may revert the reserves to free surplus.

126-S NET INCOME DISTRIBUTION

- a. *Amount available for income distribution.* An NSSLA may distribute net income to members out of its adjusted Undivided Profits and the balance of its Surplus Free account as of the calendar year-end or fiscal year-end immediately preceding the date of net income distribution: *Provided*, That in addition to the requirements as provided in this Section, in no case shall the NSSLA distribute any of its net income and/or surplus to its members if its CAR and capital contributions are below the level required under Secs. 121-S and 122-S, respectively.
- b. *Basis for participation in profits.* Member-contributors of an NSSLA may participate in the profits of the NSSLA on the basis of the balances of their capital contributions as determined by the board of trustees: *Provided*, That an NSSLA shall distribute net income to members only once in a calendar or fiscal year adopted by such NSSLA.
- c. *Level of withdrawable share reserve.* No NSSLA shall distribute any of its net income to its members if the withdrawable share reserve required under Sec. 123-S is less than, or by such distribution would be reduced below, the amount specified in said Section. The reserve shall be adjusted first before the NSSLA shall distribute its net income for the year.
- d. *Discrepancies between the general ledger and subsidiary ledger accounts.* The surplus reserves set up as required under Sec. 124-S shall not be reverted to Surplus Free available for distribution to members unless and until the discrepancy between the general ledger accounts and their respective subsidiary ledgers for which the surplus reserve has been set up ceases to exist.
- e. *Other unbooked capital adjustments required by Bangko Sentral, whether or not allowed to be set up on a staggered basis.* The unbooked allowance for credit losses and other unbooked capital adjustments required by the Bangko Sentral based on the latest approved Report of Examination of the NSSLA, whether or not allowed to be set up on a staggered basis, shall be deducted from the amount of net income available for distribution to members.
- f. *Interest and other income earned but not yet collected/received, net of allowance for credit losses.* Accrued interest and other income not yet received but already recorded by an NSSLA from financial assets, net of allowance for credit losses, shall be deducted from the amount of net income available for distribution to members.

Reporting and verification. Declaration of income for distribution to members shall be reported by an NSSLA concerned to the appropriate supervising department of the Bangko Sentral in the prescribed form (Revised BSP Form No. 7-26-25H) within ten (10) business days after date of declaration.

Pending verification of abovementioned report by the appropriate supervising department of the Bangko Sentral, the NSSLA concerned shall not make any announcement or communication on the intended distribution of net income or shall any actual distribution be made thereon.

In any case, the declaration may be announced and the income distributed, if after twenty (20) business days from the date of the report required herein shall have been received by the Bangko Sentral, no advice against such distribution has been received by the NSSLA concerned.

Recording of net income for distribution. The liability for members' share in the net income distribution shall be taken up in the books upon receipt of Bangko Sentral approval thereof, or if no such approval is received, after twenty (20) business days from the date the required Report on Distributable Net Income was received by the appropriate supervising department of the Bangko Sentral whichever comes earlier. A memorandum entry may be made to trustees and for full disclosure purposes, the amount of income for distribution may be disclosed in the financial statements by means of a footnote which should include a statement to the effect that the distribution is subject to review by the Bangko Sentral.

D. CORPORATE GOVERNANCE

Strengthening Corporate Governance. It is the thrust of the Bangko Sentral to continuously strengthen corporate governance in its supervised financial institutions cognizant that this is central in sustaining the resiliency and stability of the financial system. In this light, the Bangko Sentral is aligning its existing regulations with international best practices that promote good corporate governance such as the "Principles for Enhancing Corporate Governance" issued by the Basel Committee on Banking Supervision.

131-S BOARD OF TRUSTEES

For purposes of this Section, the following shall be the definition, qualifications, responsibilities and duties of trustees.

Definition of trustees. Trustees shall include: (1) those who are named as such in the articles of incorporation; (2) those duly elected in subsequent meetings of the NSSLA's members; and (3) those elected to fill vacancies in the board of trustees.

Qualifications of trustees. No person shall be eligible as trustee of an NSSLA unless he is a member of good standing of such NSSLA.

In addition, such person shall have the qualifications and none of the disqualifications as provided in pertinent laws and Bangko Sentral rules. A trustee shall have the following minimum qualifications:

- a. He shall be at least twenty-five (25) years of age at the time of his election or appointment;
- b. He shall be at least a college graduate or have at least five (5) years experience in business, or shall have undergone any Bangko Sentral training in NSSLA or banking operations: *Provided, however,* That an undergraduate eligible to be elected as trustee in the NSSLA's by-laws may be allowed as may be approved by the Bangko Sentral: *Provided, further,* That Bangko Sentral approval shall no longer be required for a re-elected college undergraduate who was previously allowed to sit as trustee: *Provided, finally,* That (1) the previous approval was obtained on or after 01 January 2011; and (2) the trustee has had continuous service within the said NSSLA;
- c. He must have attended a special seminar on corporate governance for board of trustees conducted or accredited by the Bangko Sentral; and
- d. He must be fit and proper for the position of a trustee of the NSSLA. In determining whether a person is fit and proper for the position of a trustee, the following matters must be considered: integrity/probity, physical/mental fitness, competence, relevant education/financial literacy/training, diligence and knowledge/experience.

The members of the board of trustees shall possess the foregoing qualifications for trustees in addition to those required or prescribed under R.A. No. 8791 and other existing applicable laws and regulations.

Powers/responsibilities and duties of trustees. The corporate powers of an NSSLA shall be exercised, its business conducted and all its property controlled and held by its board of trustees. The powers of the board of trustees as conferred by law are original and cannot be revoked by the members. The trustees hold their office charged with the duty to exercise sound and objective judgment for the best interest of the NSSLA.

General responsibility of the board of trustees. The position of an NSSLA trustee is a position of trust. A trustee assumes certain responsibilities to different constituencies or stakeholders, i.e., the NSSLA itself, member-depositors, its clients and other creditors, its management and employees, the regulators, deposit insurer and the public at large. These constituencies or stakeholders have the right to expect that the institution is being run in a prudent and sound manner. The board of trustees is primarily responsible for approving and overseeing the implementation of the NSSLA's strategic objectives, risk strategy, corporate governance and corporate values. Further, the board of trustees is also responsible for monitoring and overseeing the performance of senior management as the latter manages the day-to-day affairs of the institution.

Duties and responsibilities

a. Board of trustees

- (1) *To approve and monitor the implementation of strategic objectives.* Consistent with the institution's strategic objectives, business plans shall be established for the NSSLA including its trust operations, and initiatives thereto shall be implemented with clearly defined responsibilities and accountabilities. These shall take into account the NSSLA's long-term financial interests, its level of risk tolerance and its ability to manage risks effectively. The board shall establish a system for measuring performance against plans through regular monitoring and reviews, with corrective action taken as needed.

The board shall likewise ensure that the NSSLA has beneficial influence on the economy by continuously providing services and facilities which will be supportive of the national economy.

- (2) *To approve and oversee the implementation of policies governing major areas of NSSLA operations.* The board shall approve policies on all major business activities, e.g., investments, loans, asset and liability management, trust, business planning and budgeting. The board shall accordingly define the NSSLA's level of risk tolerance in respect of said activities. A mechanism to ensure compliance with said policies shall also be provided.

The board shall set out matters and authorities reserved to it for decision, which include, among others, major capital expenditures, equity investments and divestments. The board shall also establish the limits of the discretionary powers of each officer, committee, sub-committee and such other groups for purposes of lending, investing or any other financial undertaking that exposes the NSSLA to significant risks.

- (3) *To approve and oversee the implementation of risk management policies.* The board of trustees shall be responsible for defining the NSSLA's level of risk tolerance and for the approval and oversight of the implementation of policies and procedures relating to the management of risks throughout the institution, including its trust operations. The risk management policy shall include:

- (a) a comprehensive risk management approach;
- (b) a detailed structure of limits, guidelines and other parameters used to govern risk-taking;
- (c) a clear delineation of lines of responsibilities for managing risk;
- (d) an adequate system for measuring risk; and
- (e) effective internal controls and a comprehensive risk-reporting process. The board of trustees shall ensure that a robust internal reporting system is in place that shall enable each employee to contribute to the appreciation of the NSSLA's overall risk exposures.

The board of trustees shall ensure that the risk management function is given adequate resources to enable it to effectively perform its functions. The risk management function shall be afforded with adequate personnel, access to information technology systems and systems development resources, and support and access to internal information.

- (4) *To oversee selection and performance of senior management.* It is the primary responsibility of the board of trustees to appoint competent management team at all times, monitor and assess the performance of the management team based on established performance standards that are consistent with the NSSLA's strategic objectives, and conduct regular review of NSSLA's policies with the management team.

The board of trustees shall apply fit and proper standards on key personnel. Integrity, technical expertise and experience in the institution's business, either current or planned, shall be the key considerations in the selection process. And because mutual trust and a close working relationship are important, the members of senior management shall uphold the general operating philosophy, vision and core values of the institution. The board of trustees shall replace members of senior management, when necessary, and have in place an appropriate plan of succession.

- (a) The board of trustees shall regularly monitor the actions of senior management and ensure that these are consistent with the policies that it has approved. It shall put in place formal performance standards to be able to effectively assess the performance of senior management. The performance standards shall be consistent with the NSSLA's strategic objectives and business plans, taking into account the NSSLA's long-term financial interests.

- (b) The board of trustees shall regularly meet with senior management to engage in discussions, question and critically review the reports and information provided by the latter. The board of trustees shall set the frequency of meeting with senior management taking into account the size, complexity of operations and risk profile of the NSSLA.
 - (c) The board of trustees shall regularly review policies, internal controls and self-assessment functions (e.g., internal audit, risk management and compliance) with senior management to determine areas for improvement as well as to promptly identify and address significant risks and issues. The board of trustees shall set the frequency of review taking into account the size, complexity of operations and risk profile of the NSSLA. The board of trustees shall ensure that senior management's expertise and knowledge shall remain relevant given the NSSLA's strategic objectives, complexity of operations and risk profile.
- (5) *To consistently conduct the affairs of the institution with a high degree of integrity.* Since reputation is a very valuable asset, it is in the institution's best interest that in dealings with the public, it observes a high standard of integrity. The board of trustees shall lead in establishing the tone of good governance from the top and in setting corporate values, codes of conduct and other standards of appropriate behavior for itself, the senior management and other employees. The board of trustees shall:
- (a) Articulate clear policies on the handling of any transaction with directors, officers, stockholders, and their related interests (DOSRI) and other related parties ensuring that there is effective compliance with existing laws, rules and regulations at all times and no stakeholder is unduly disadvantaged. In this regard, the board of trustees shall define "related party transaction", which is expected to cover a wider definition than DOSRI under existing regulations and a broader spectrum of transactions (i.e., not limited to credit exposures), such that relevant transactions that could pose material risk or potential abuse to the NSSLA and its stakeholders are captured.
 - (b) Require the NSSLA's members to confirm by majority vote, in the annual members' meeting, the NSSLA's significant transactions with its DOSRI and other related parties.
 - (c) Articulate acceptable and unacceptable activities, transactions and behaviors that could result or potentially result in conflict of interest, personal gain at the expense of the institution, or unethical conduct.
 - (d) Articulate policies that will prevent the use of the facilities of the NSSLA in furtherance of criminal and other improper or illegal activities, such as but not limited to financial misreporting, money laundering, fraud, bribery or corruption.
 - (e) Explicitly discourage the taking of excessive risks as defined by internal policies and establish an employees' compensation scheme effectively aligned with prudent risk taking. The compensation scheme shall be adjusted for all types of risk and sensitive to the time horizon of risk. Further, the grant of compensation in forms other than cash shall be consistent with the overall risk alignment of the NSSLA. The board of trustees shall regularly monitor and review the compensation scheme to ensure that it operates and achieves the objectives as intended.
 - (f) Ensure that employee pension funds are fully funded or the corresponding liability appropriately recognized in the books of the NSSLA at all times. Further, the board of trustees shall ensure that all transactions involving the pension fund are conducted at arm's length terms.
 - (g) Allow employees to communicate, with protection from reprisal, legitimate concerns about illegal, unethical or questionable practices directly to the board of trustees or to any independent unit. Policies shall likewise be set on how such concerns shall be investigated and addressed, for example, by an internal control function, an objective external party, senior management and/or the board itself.
 - (h) Articulate policies in communicating corporate values, codes of conduct and other standards in the NSSLA as well as the means to confidentially report concerns or violations to an appropriate body.
- (6) *To define appropriate governance policies and practices for the NSSLA and for its own work and to establish means to ensure that such are followed and periodically reviewed for ongoing improvement.* The board of trustees, through policies and its own practices, shall establish and actively promote, communicate and recognize sound governance principles and practices to reflect a culture of strong governance in the NSSLA as seen by both internal and external stakeholders.
- (a) The board of trustees shall ensure that the NSSLA's organizational structure facilitates effective decision-making and good governance. This includes clear definition and delineation of the lines of responsibility and accountability, especially between the roles of the Chairman of the board of trustees and Chief Executive Officer/President.

- (b) The board of trustees shall maintain, and periodically update, organizational rules, by-laws, or other similar documents setting out its organization, rights, responsibilities and key activities.
 - (c) The board of trustees shall restructure itself in a way, including in terms of size, frequency of meetings and the use of committees, so as to promote efficiency, critical discussion of issues and thorough review of matters. It shall meet regularly to properly discharge its functions. It shall also ensure that independent views in board meetings shall be given full consideration and all such meetings shall be duly minuted.
 - (d) The board shall conduct and maintain the affairs of the institution within the scope of its authority as prescribed in its charter and in existing laws, rules and regulations. It shall ensure effective compliance with the latter, which include prudential reporting obligations. Serious weaknesses in adhering to these duties and responsibilities may be considered as unsafe and unsound NSSL practice. The board shall appoint a compliance officer who shall be responsible for coordinating, monitoring and facilitating compliance with existing laws, rules and regulations. The compliance officer shall be vested with appropriate authority and provided with appropriate support and resources.
 - (e) The board of trustees shall establish a system of checks and balances which applies in the first instance to the board itself. Among the members of the board, an effective system of checks and balances must exist. The system shall also provide a mechanism for effective check and control by the board over the chief executive officer and key managers and by the latter over the line officers of the NSSL. Checks and balances in the board shall be enhanced by appointing a chairperson who is a non- executive, whenever possible.
 - (f) The board of trustees shall assess at least annually its performance and effectiveness as a body, as well as its various committees, the chief executive officer, the individual trustee, and the NSSL itself, which may be facilitated by the corporate governance committee or external facilitators. The composition of the board shall also be reviewed regularly with the end in view of having a balanced membership. Toward this end, a system and procedure for evaluation shall be adopted which shall include, but not limited to, the setting of benchmark and peer group analysis.
 - (g) The board shall ensure that individual members of the board and the members are accurately and timely informed. It shall provide all its trustees and to the members a comprehensive and understandable assessment of the NSSL's performance, financial condition and risk exposures. All trustees shall have reasonable access to any information about the institution at all times. It shall also provide appropriate information that flows internally and to the public.
- (7) *To constitute committees to increase efficiency and allow deeper focus in specific areas.* The board of trustees shall create committees, the number and nature of which would depend on the size of the NSSL and the board, the complexity of operations, long-term strategies and risk tolerance level of the institution.
- (a) The board of trustees shall approve, review and update periodically, or the respective charters of each committee or other documents that set out its mandate, scope and working procedures.
 - (b) The board of trustees shall appoint members of the committees taking into account the optimal mix of skills and experience to allow the members to fully understand, be critical and objectively evaluate the issues. In order to promote objectivity, the board of trustees, shall appoint independent trustees and non-executive members of the board to the greatest extent possible while ensuring that such mix will not impair the collective skills, experience, and effectiveness of the committees.
 - (c) The board of trustees shall ensure that each committee shall maintain appropriate records (e.g., minutes of meetings or summary of matters reviewed and decisions taken) of their deliberations and decisions. Such records shall document the committee's fulfillment of its responsibilities and facilitate the assessment of the effective dispense of its functions.
 - (d) The board of trustees shall constitute, at a minimum, the audit committee. The audit committee shall be composed of members with accounting, auditing, or related financial management expertise or experience commensurate with the size, complexity of operations and risk profile of the NSSL. To the greatest extent possible, the audit committee shall be composed of a sufficient number of non-executive board members. Further, the chief executive officer, chief financial officer and/or treasurer shall not be appointed as members of the audit committee.

The audit committee provides oversight over the institution's financial reporting policies, practices and control and internal and external audit functions. It shall be responsible for the setting up of the internal audit department and for the appointment of the internal auditor as well as the independent external auditor who shall both report directly to the audit committee. In cases of appointment or dismissal of external auditors, it is encouraged that the decision be made only by independent, non-executive audit committee members. It shall monitor and evaluate the adequacy and effectiveness of the internal control system.

The audit committee shall review and approve the audit scope and frequency. It shall receive key audit reports, and ensure that senior management is taking necessary corrective actions in a timely manner to address the weaknesses, non-compliance with policies, laws and regulations and other issues identified by auditors.

The audit committee shall have explicit authority to investigate any matter within its terms of reference, full access to and cooperation by management and full discretion to invite any trustee or executive officer to attend its meetings, and adequate resources to enable it to effectively discharge its functions. The audit committee shall ensure that a review of the effectiveness of the institution's internal controls, including financial, operational and compliance controls, and risk management, is conducted at least annually.

The audit committee shall establish and maintain mechanisms by which officers and staff shall, in confidence, raise concerns about possible improprieties or malpractices in matters of financial reporting, internal control, auditing or other issues to persons or entities that have the power to take corrective action. It shall ensure that arrangements are in place for the independent investigation, appropriate follow-up action, and subsequent resolution of complaints.

- (8) *To effectively utilize the work conducted by the internal audit and compliance functions and the external auditors.* The board of trustees shall recognize and acknowledge the importance of the assessment of the independent, competent and qualified internal and external auditors and compliance officers in ensuring the safety and soundness of the operations of an NSSLA on a going-concern basis and communicate the same throughout the NSSLA. This shall be displayed by undertaking timely and effective actions on issues identified.

Further, non-executive board members shall meet regularly, other than in meetings of the audit committee, in the absence of senior management, with the external auditor and heads of the internal audit and compliance functions.

b. *Specific duties and responsibilities of a trustee*

- (1) *To remain fit and proper for the position for the duration of his term.* A trustee is expected to remain fit and proper for the position for the duration of his term. He should possess unquestionable credibility to make decisions objectively and resist undue influence. He shall treat board trusteeship as a profession and shall have a clear understanding of his duties and responsibilities as well as his role in promoting good governance. Hence, he shall maintain his professional integrity and continuously seek to enhance his skills, knowledge and understanding of the activities that the trustee is engaged in or intends to pursue as well as the developments in the NSSLA industry including regulatory changes through continuing education or training.
- (2) *To conduct fair business transactions with the NSSLA and to ensure that personal interest does not bias board decisions.* Trustees should, whenever possible, avoid situations that would give rise to a conflict of interest. If transactions with the institution cannot be avoided, it should be done in the regular course of business and upon terms not less favorable to the institution than those offered to others. The basic principle to be observed is that a trustee should not use his position to make profit or to acquire benefit or advantage for himself and/or his related interests. He should avoid situations that would compromise his impartiality.
- (3) *To act honestly and in good faith, with loyalty and in the best interest of the NSSLA, its members, regardless of the amount of their capital contributions, and other stakeholders such as its depositors, investors, borrowers, other clients and the general public.* A trustee must always act in good faith, with the care which an ordinarily prudent man would exercise under similar circumstances. While a trustee should always strive to promote the interest of all members, he should also give due regard to the rights and interests of other stakeholders.
- (4) *To devote time and attention necessary to properly discharge their duties and responsibilities.* Trustees should devote sufficient time to familiarize themselves with the institution's business. They must be constantly aware of the institution's condition and be knowledgeable enough to contribute meaningfully to the board's work. They must attend and actively participate in board and committee meetings, request and review meeting materials, ask questions, and request explanations. If a person cannot give sufficient time and attention to the affairs of the institution, he should neither accept his nomination nor run for election as member of the board.
- (5) *To act judiciously.* Before deciding on any matter brought before the board of trustees, every trustee should thoroughly evaluate the issues, ask questions and seek clarifications when necessary.
- (6) *To contribute significantly to the decision-making process of the board.* Trustees should actively participate and exercise objective independent judgment on corporate affairs requiring the decision or approval of such board.

- (7) *To exercise independent judgment.* A trustee should view each problem/situation objectively. When a disagreement with others occurs, he should carefully evaluate the situation and state his position. He should not be afraid to take a position even though it might be unpopular. Corollarily, he should support plans and ideas that he thinks will be beneficial to the institution.
- (8) *To have a working knowledge of the statutory and regulatory requirements affecting the NSSLA institution, including the content of its articles of incorporation and by-laws, the requirements of the Bangko Sentral and where applicable, the requirements of other regulatory agencies.* A trustee should also keep himself informed of the industry developments and business trends in order to safeguard the institution's competitiveness.
- (9) *To observe confidentiality.* Trustees must observe the confidentiality of non-public information acquired by reason of their position as trustees. They may not disclose said information to any other person without the authority of the board.

132-S OFFICERS

Officers shall include the President, Vice-President, General Manager, Corporate Secretary, Treasurer and others mentioned as officers of the NSSLA, or whose duties as such are defined in the by-laws.

The minimum qualifications for trustees prescribed in Sec. 131-S are also applicable to officers.

Definition of officers. Officers shall include the president, executive vice president, senior vice president, vice president, general manager, secretary, treasurer, and others mentioned as officers of the NSSLA, or those whose duties as such are defined in the by-laws, or are generally known to be the officers of the NSSLA (or any of its branches and offices other than the head office) either through announcement, representation, publication or any kind of communication made by the NSSLA. A person holding the position of chairman, vice-chairman or any other position of the board who also performs functions of management such as those ordinarily performed by regular officers shall also be considered an officer.

Qualifications of officers. An officer shall have the following minimum qualifications:

- a. He shall be at least twenty-one (21) years of age;
- b. He shall be at least a college graduate or have at least five (5) years experience in NSSLA or banking operations or related activities or in a field related to his position and responsibilities, or have undergone training in NSSLA or banking operations acceptable to the appropriate supervising department of the Bangko Sentral;
- c. He must be fit and proper for the position of an officer of the NSSLA. In determining whether a person is fit and proper for the position of an officer, the following matters must be considered: integrity/probity, competence, education, diligence, and experience/training. The foregoing qualifications for officers shall be in addition to those already required or prescribed by R.A. No. 8367, as amended, and other existing applicable laws and regulations.

Duties and responsibilities of officers.

- a. *To set the tone of good governance from the top.* NSSLA officers shall promote the good governance practices within the NSSLA by ensuring that policies on governance as approved by the board of trustees are consistently adopted across the NSSLA.
- b. *To oversee the day-to-day management of the NSSLA.* NSSLA officers shall ensure that NSSLA's activities and operations are consistent with the NSSLA's strategic objectives, risk strategy, corporate values and policies as approved by the board of trustees. They shall establish a NSSLA- wide management system characterized by strategically aligned and mutually reinforcing performance standards across the organization.
- c. *To ensure that duties are effectively delegated to the staff and to establish a management structure that promotes accountability and transparency.* NSSLA officers shall establish measurable standards, initiatives and specific responsibilities and accountabilities for each NSSLA personnel. NSSLA officers shall oversee the performance of these delegated duties and responsibilities and shall ultimately be responsible to the board of trustees for the performance of the NSSLA.
- d. *To promote and strengthen checks and balances systems in the NSSLA.* NSSLA officers shall promote sound internal controls and avoid activities that shall compromise the effective dispensing of their functions. Further, they shall ensure that they give due recognition to the importance of the internal audit, compliance and external audit functions.

Full-time Manager for NSSLAs. NSSLAs with total assets of at least P5.0 million shall maintain a full-time manager to take charge of the operations of the NSSLA. The manager shall possess all the qualifications and shall not have any disqualification under Sec. 132-S (*Qualifications of officers*) and Sec. 135-S (*Persons disqualified to become officers*), respectively.

133-S COMPENSATION OF TRUSTEES, OFFICERS AND EMPLOYEES

No trustee, officer or employee of an NSSLA shall receive from such NSSLA and no NSSLA shall pay to any trustee, officer, or employee of such NSSLA, any commission, emolument, gratuity or reward based on the volume or number of loans made, or based on the interest or fees collected thereon. Nothing in this Section, however, prohibits or limits any of the following:

- a. Receipt or payment of salaries of trustees, officers and employees;
- b. Receipt or payment of commissions to agents whether or not based on the volume or number of loans or on the interest and fees collected thereon; or
- c. Receipt or payment of bonuses of trustees, officers or employees if such bonuses are based on the profits and not on the volume or number of loans made or on the interest or fees collected thereon.

To protect the funds of depositors and creditors, the Monetary Board may regulate/restrict the payment by the NSSLA of compensation, allowances, fees, bonuses, and fringe benefits to its trustees and officers in exceptional cases and when the circumstances warrant, such as, but not limited to the following:

- a. When the NSSLA is found by the Monetary Board to be conducting business in an unsafe or unsound manner;
- b. When the NSSLA is found by the Monetary Board to be in an unsatisfactory financial condition such as, but not limited to, the following cases:
 - (1) Its capital is impaired; and
 - (2) It has suffered continuous losses from operations for the past three (3) years.

In the presence of any one (1) or more of the circumstances mentioned above, the Monetary Board may impose the following restrictions in the compensation and other benefits of trustees and officers:

- a. Except for the financial assistance to meet expenses for the medical, maternity, education and other emergency needs of the trustees or officers or their immediate family, other forms of financial assistance may be suspended.
- b. When the total compensation package including salaries, allowances, fees and bonuses of trustees and officers are significantly excessive as compared with industry averages, the Monetary Board may order their reduction to reasonable levels.

Compensation increases. All increases in compensation, in any form, of all trustees and trustee-officers in excess of ten percent (10%) thereof per annum shall require the approval of the Bangko Sentral.

Liability for loans contrary to law. No NSSLA shall make or purchase any loan or investment not authorized or permitted under R.A. No. 8367, and any trustee, officer or employee, who on behalf of any such NSSLA, knowingly makes or purchases any such loan or investment or who knowingly consents thereto shall be personally liable to the NSSLA for the full amount of any such loan or investment.

134-S SUBMISSION OF BIO-DATA OF TRUSTEES AND OFFICERS

- a. NSSLAs shall submit to the appropriate supervising department of the Bangko Sentral a bio-data with ID picture of their trustees/officers with rank of senior vice president (SVP) and above (or equivalent ranks) upon every election/re-election/appointment/promotion in a prescribed form and for first-time trustees/officers with rank of SVP and above (or equivalent ranks) within a particular NSSLA, the duly notarized authorization form per *Appendix Q-44*, within twenty (20) business days from the date of election/re-election of the trustees/meeting of the board of trustees in which the officers are appointed/promoted in accordance with *Appendix S-2*.

The bio-data shall be updated and submitted in case of change of name due to change in civil status, within twenty (20) business days from the date the change occurred.

For other officers below the rank of SVP, the NSSLA shall not be required to submit their bio-data to the Bangko Sentral.

- b. The NSSLA shall, however, keep a complete record of the bio-data of all its trustees and officers and shall maintain a system of updating said records which shall be made available during on-site examination or when required by the Bangko Sentral for submission for offsite verification.
- c. The NSSLA shall also submit to the appropriate supervising department of the Bangko Sentral a duly notarized list of the incumbent members of the board of trustees and officers (President or equivalent rank, down the line, format attached as *Appendix Q-59*), within twenty (20) business days from the election of the board of trustees as provided in the NSSLA's by-laws, in accordance with *Appendix S-2*.

(Circular No. 887 dated 07 October 2015)

135-S DISQUALIFICATION AND WATCHLISTING OF TRUSTEES AND OFFICERS

The following regulations shall govern the disqualification of NSSLAs' trustees and officers.

Persons disqualified to become trustees. Without prejudice to specific provisions of law prescribing disqualifications for trustees, the following are disqualified from becoming trustees:

- a. *Permanently disqualified.* Trustees/officers/employees permanently disqualified by the Monetary Board from holding a director/trustee position:
 - (1) Persons who have been convicted by final judgment of a court for offenses involving dishonesty or breach of trust such as but not limited to, estafa, embezzlement, extortion, forgery, malversation, swindling, theft, robbery, falsification, bribery, violation of B.P. Blg. 22, violation of Anti- Graft and Corrupt Practices Act and prohibited acts and transactions under Section 7 of R.A. No. 6713 (Code of Conduct and Ethical Standards for Public Officials and Employees);
 - (2) Persons who have been convicted by final judgment of a court sentencing them to serve a maximum term of imprisonment of more than six (6) years;
 - (3) Persons who have been convicted by final judgment of the court for violation of banking/quasi-banking/NSSLA laws, rules and regulations;
 - (4) Persons who have been judicially declared insolvent, spendthrift or incapacitated to contract;
 - (5) Trustees, officers or employees of closed banks/QBs/trust entities who were found to be culpable for such institution's closure as determined by the Monetary Board;
 - (6) Trustees and officers of banks, QBs and trust entities found by the Monetary Board as administratively liable for violation of banking laws, rules and regulations where a penalty of removal from office is imposed, and which finding of the Monetary Board has become final and executory; or
 - (7) Trustees and officers of banks, QBs and trust entities or any person found by the Monetary Board to be unfit for the position of trustees or officers because they were found administratively liable by another government agency for violation of banking laws, rules and regulations or any offense/violation involving dishonesty or breach of trust, and which finding of said government agency has become final and executory.
- b. *Temporarily disqualified.* Trustees/officers/employees disqualified by the Monetary Board from holding a trustee position for a specific/indefinite period of time. Included are:
 - (1) Persons who refuse to fully disclose the extent of their business interest or any material information to the appropriate supervising department of the Bangko Sentral when required pursuant to a provision of law or of a circular, memorandum, rule or regulation of the Bangko Sentral. This disqualification shall be in effect as long as the refusal persists;
 - (2) Trustees who have been absent or who have not participated for whatever reasons in more than fifty percent (50%) of all meetings, both regular and special, of the board of trustees during their incumbency, and trustees who failed to physically attend for whatever reasons in at least twenty-five percent (25%) of all board meetings in any year, except that when a notarized certification executed by the corporate secretary has been submitted attesting that said trustees were given the agenda materials prior to the meeting and that their comments/decisions thereon were submitted for deliberation/discussion and were taken up in the actual board meeting, said trustees shall be considered present in the board meeting. This disqualification applies only for purposes of the immediately succeeding election;
 - (3) Persons who are delinquent in the payment of their obligations as defined hereunder:
 - (a) *Delinquency* in the payment of obligations means that an obligation of a person with an NSSLA where he/she is a trustee or officer, or at least two (2) obligations with other banks/FIs, under different credit lines or loan contracts, are past due pursuant to existing regulations;
 - (b) Obligations shall include all borrowings from a bank/QB/trust entity/NSSLA/other FIs obtained by:
 - (i) A trustee or officer for his own account or as representative or agent of others or where he/she acts as a guarantor, endorser or surety for loans from such FIs;
 - (ii) The spouse or child under the parental authority of the trustee or officer;
 - (iii) Any person whose borrowings or loan proceeds were credited to the account of, or used for the benefit of a trustee or officer;

- (iv) A partnership of which a trustee or officer, or his/her spouse is the managing partner or a general partner owning a controlling interest in the partnership; and
- (v) A corporation, association or firm wholly-owned or majority of the capital of which is owned by any or a group of persons mentioned in the foregoing Items “(i)”, “(ii)” and “(iv)”;

This disqualification shall be in effect as long as the delinquency persists.

- (4) Persons who have been convicted by a court for offenses involving dishonesty or breach of trust such as, but not limited to, estafa, embezzlement, extortion, forgery, malversation, swindling, theft, robbery, falsification, bribery, violation of B.P. Blg. 22, violation of Anti-Graft and Corrupt Practices Act and prohibited acts and transactions under Section 7 of R.A. No. 6713 (Code of Conduct and Ethical Standards for Public Officials and Employees), violation of banking laws, rules and regulations or those sentenced to serve a maximum term of imprisonment of more than six (6) years but whose conviction has not yet become final and executory;
- (5) Trustees and officers of closed banks QBs/trust entities/NSSLAs and other FIs under Bangko Sentral supervision/regulation pending their clearance by the Monetary Board;
- (6) Trustees disqualified for failure to observe/discharge their duties and responsibilities prescribed under existing regulations. This disqualification applies until the lapse of the specific period of disqualification or upon approval by the Monetary Board on recommendation by the appropriate supervising department of the Bangko Sentral of such trustees’ election/re-election;
- (7) Trustees who failed to attend the special seminar on corporate governance for board of trustees required by the Bangko Sentral. This disqualification applies until the trustee concerned had attended such seminar;
- (8) Persons dismissed/terminated from employment for cause. This disqualification shall be in effect until they have cleared themselves of involvement in the alleged irregularity or upon clearance, on their request, from the Monetary Board after showing good and justifiable reasons, or after the lapse of five (5) years from the time they were officially advised by the appropriate supervising department of the Bangko Sentral of their disqualification;
- (9) Those under preventive suspension;
- (10) Persons with derogatory records as certified by, or on the official files of, the judiciary, NBI, PNP, quasi-judicial bodies, other government agencies, international police, monetary authorities and similar agencies or authorities of foreign countries for irregularities or violations of any law, rules and regulations that would adversely affect the integrity of the trustee/officer or the ability to effectively discharge his duties. This disqualification applies until they have cleared themselves of the alleged irregularities/violations or after a lapse of five (5) years from the time the complaint, which was the basis of the derogatory record, was initiated;
- (11) Trustees and officers of banks, QBs and trust entities found by the Monetary Board as administratively liable for violation of banking laws, rules and regulations where a penalty of removal from office is imposed, and which finding of the Monetary Board is pending appeal before the appellate court, unless execution or enforcement thereof is restrained by the court;
- (12) Trustees and officers of banks, QBs and trust entities or any person found by the Monetary Board to be unfit for the position of trustees or officers because they were found administratively liable by another government agency for violation of banking laws, rules and regulations or any offense violation involving dishonesty or breach of trust, and which finding of said government agency is pending appeal before the appellate court, unless execution or enforcement thereof is restrained by the court; and
- (13) Trustees and officers of banks, QB and trust entities found by the Monetary Board as administratively liable for violation of banking laws, rules and regulations where a penalty of suspension from office or fine is imposed, regardless whether the finding of the Monetary Board is final and executory or pending appeal before the appellate court, unless execution or enforcement thereof is restrained by the court. The disqualification shall be in effect during the period of suspension or so long as the fine is not fully paid.

Persons disqualified to become officers.

- a. The disqualifications for trustees mentioned in this Section (*Persons disqualified to become trustees*) shall likewise apply to officers, except those stated in Items “b(2)” and “b(7)”.
- b. The spouses or relatives within the second degree of consanguinity or affinity are prohibited from holding officership positions across the following functional categories within an NSSLA:
 - (1) Decision making and senior management function, e.g., chairman, president, chief executive officer (CEO), chief operating officer (COO), general manager, and chief financial officer (CFO) other than the treasurer or controller;
 - (2) Treasury function, e.g., Treasurer and Vice President – Treasury;

- (3) Recordkeeping and financial reporting functions, e.g., controller and chief accountant;
- (4) Safekeeping of assets, e.g., chief cashier;
- (5) Risk management function, e.g., chief risk officer;
- (6) Compliance function, e.g., compliance officer; and
- (7) Internal audit function, e.g., internal auditor.

The spouse or relative within the second degree of consanguinity or affinity of any person holding the position of manager, cashier, or accountant of a branch or extension office of an NSSLA or their respective equivalent positions is disqualified from holding or being appointed to any of said positions in the same branch or extension office.

- c. Except as may otherwise be allowed under C.A. No. 108, otherwise known as “The Anti-Dummy Law,” as amended, foreigners cannot be officers or employees of NSSLAs; and
- d. Any appointive or elective public official, whether full time or part time, except in cases where such service is incident to financial assistance provided by the government or GOCCs or in cases allowed under existing law.

Disqualification procedures.

- a. The board of trustees and management of every NSSLAs shall be responsible for determining the existence of the ground for disqualification of the NSSLA’s trustee/officer or employee and for reporting the same to the Bangko Sentral. While the concerned NSSLA may conduct its own investigation and impose appropriate sanction/s as are allowable, this shall be without prejudice to the authority of the Monetary Board to disqualify a trustee/officer/employee from being elected appointed as trustee/officer in any FI under the supervision of the Bangko Sentral. Grounds for disqualification made known to the NSSLA shall be reported to the appropriate supervising department of the Bangko Sentral within seventy-two (72) hours from knowledge thereof.
- b. On the basis of knowledge and evidence on the existence of any of the grounds for disqualification mentioned in this Section (*Persons disqualified to become trustees/officers*), the trustee or officer concerned shall be notified in writing either by personal service or through registered mail with registry return receipt card at his/her last known address by the appropriate supervising department of the Bangko Sentral of the existence of the ground for his/her disqualification and shall be allowed to submit within fifteen (15) calendar days from receipt of such notice an explanation on why he/she should not be disqualified and included in the watchlisted file, together with the evidence in support of his/her position. The head of said department may allow an extension on meritorious ground.
- c. Upon receipt of the reply/explanation of the trustee/officer concerned, the appropriate supervising department of the Bangko Sentral shall proceed to evaluate the case. The trustee/officer concerned shall be afforded the opportunity to defend/clear himself/herself.
- d. If no reply has been received from the trustee/officer concerned upon the expiration of the period prescribed under Item “b” above, said failure to reply shall be deemed a waiver and the appropriate supervising department of the Bangko Sentral shall proceed to evaluate the case based on available records/evidence.
- e. If the ground for disqualification is delinquency in the payment of obligation, the concerned trustee or officer shall be given a period of thirty (30) calendar days within which to settle said obligation or, restore it to its current status or, to explain why he/she should not be disqualified and included in the watchlisted file, before the evaluation on his disqualification and watchlisting is elevated to the Monetary Board.
- f. For trustees/officers of closed QBs, trust entities, NSSLAs or other FIs under Bangko Sentral supervision, the appropriate supervising department of the Bangko Sentral shall make appropriate recommendation to the Monetary Board clearing said trustees/officers when there is no pending case/complaint or evidence against them. When there is evidence that a trustees/officer has committed irregularity, the appropriate supervising department of the Bangko Sentral shall make recommendation to the Monetary Board that his/her case be referred to the OSI for further investigation and that he/she be included in the masterlist of temporarily disqualified persons until the final resolution of his/her case. Trustees/officers with pending cases/complaints shall also be included in said masterlist of temporarily disqualified persons upon approval by the Monetary Board until the final resolution of their cases. If the trustee/officer is cleared from involvement in any irregularity, the appropriate supervising department of the Bangko Sentral shall recommend to the Monetary Board his/her delisting. On the other hand, if the trustee officer concerned is found to be responsible for the closure of the institution, the appropriate supervising department of the Bangko Sentral shall recommend to the Monetary Board his/her delisting from the masterlist of temporarily disqualified persons and his/her inclusion in the masterlist of permanently disqualified persons.
- g. If the disqualification is based on dismissal from employment for cause, the appropriate supervising department of the Bangko Sentral shall, as much as practicable, endeavor to establish the specific acts or omissions constituting the offense or the ultimate facts which resulted in the dismissal to be able to determine if the disqualification of the trustee/officer concerned is warranted or not. The evaluation of the case shall be made for the purpose of determining if disqualification would be appropriate and not for the purpose of passing judgment on the findings and decision of the entity concerned. The appropriate supervising department of the Bangko Sentral may decide

to recommend to the Monetary Board a penalty lower than disqualification (e.g., reprimand, suspension, etc.) if, in its judgment the act committed or omitted by the trustee/officer concerned does not warrant disqualification.

- h. All other cases of disqualification, whether permanent or temporary shall be elevated to the Monetary Board for approval and shall be subject to the procedures provided in paragraphs “a”, “b”, “c” and “d” above.
- i. Upon approval by the Monetary Board, the concerned trustee/officer shall be informed by the appropriate supervising department of the Bangko Sentral in writing either by personal service or through registered mail with registry return receipt card, at his/her last known address of his/her disqualification from being elected/appointed as trustee/officer in any FI under the supervision of Bangko Sentral and/or of his/her inclusion in the masterlist of watchlisted persons so disqualified.
- j. The board of trustees of the concerned institution shall be immediately informed of cases of disqualification approved by the Monetary Board and shall be directed to act thereon not later than the following board meeting. Within seventy-two (72) hours thereafter, the corporate secretary shall report to the Governor of the Bangko Sentral through the appropriate supervising department of the Bangko Sentral the action taken by the board on the trustee/officer involved.
- k. Persons who are elected or appointed as trustee or officer in any of the Bangko Sentral supervised institutions for the first time but are subject to any of the grounds for disqualification provided for under this Section (*Persons disqualified to become trustees/officers*), shall be afforded the procedural due process prescribed above.
- l. Whenever a trustee/officer is cleared in the process mentioned under Item “c” above or, when the ground for disqualification ceases to exist, he/she would be eligible to become trustee or officer of any bank, QB, trust entity or any institution under the supervision of the Bangko Sentral only upon prior approval by the Monetary Board. It shall be the responsibility of the appropriate supervising department of the Bangko Sentral to elevate to the Monetary Board the lifting of the disqualification of the concerned trustee/officer and his/her delisting from the masterlist of watchlisted persons.

Effect of non-possession of qualifications or possession of disqualifications. Trustees/officers elected or appointed without possessing the qualifications in Sec. 131-S (*Qualifications of trustees*) or Sec. 132-S (*Qualifications of officers*) or possessing any of the disqualifications as enumerated in this Section (*Persons disqualified to become trustees/officers*), shall vacate their respective positions immediately.

Watchlisting. To provide the Bangko Sentral with a central information file to be used as reference in passing upon and reviewing the qualifications of persons elected or appointed as trustee or officer of an NSSLA, the appropriate supervising department of the Bangko Sentral shall maintain a watchlist of disqualified NSSLA trustees/officers under the following procedures:

- a. **Watchlist categories.** Watchlisting shall be categorized as follows:
 - (1) Disqualification File “A” (Permanent) – Trustees/officers/employees permanently disqualified by the Monetary Board from holding a trustee/officer position in any institution under the supervision/regulation of Bangko Sentral.
 - (2) Disqualification File “B” (Temporary) – Trustees/officers/employees temporarily disqualified by the Monetary Board from holding a trustee/officer position in any institution under the supervision/regulation of Bangko Sentral.
- b. **Inclusion of trustees/officers/employees in the watchlist.** Upon recommendation by the appropriate supervising department of the Bangko Sentral, the inclusion of trustees/officers/employees in watchlist disqualification files “A” and “B” on the basis of decisions, actions or reports of the courts, banks, QBs, other NSSLAs and FIs under Bangko Sentral supervision, Bangko Sentral, NBI or any other administrative agencies shall first be approved by the Monetary Board.
- c. **Notification of trustees/officers/employees.** Upon approval by the Monetary Board, the concerned trustee/officer/employee shall be informed through registered mail, with registry return receipt card at his/her last known address of his/her inclusion in the masterlist of watchlisted persons disqualified to be a trustee/officer in any FI under the supervision of the Bangko Sentral.
- d. **Confidentiality.** Watchlist files shall be for internal use only of the Bangko Sentral and may not be accessed or queried upon by outside parties including banks, QBs, trust corporations, NSSLAs, and such institutions under the supervisory and regulatory powers of the Bangko Sentral except with the authority of the person concerned (without prejudice to the authority of the Governor and the Monetary Board to authorize release of the information) and with the approval of the head of the appropriate supervising department of the Bangko Sentral or Subsector Head or the Deputy Governor of the appropriate sector of the Bangko Sentral, or the Governor, or the Monetary Board.

The Bangko Sentral will disclose information on the person included in its watchlist files only upon submission of a duly notarized authorization from the concerned person and approval of such request by the head of the appropriate supervising department of the Bangko Sentral or Subsector Head or the Deputy Governor of the appropriate sector of the Bangko Sentral, or the Governor or the Monetary Board. The prescribed authorization form to be submitted to the appropriate supervising department of the Bangko Sentral is in *Appendix Q-44*.

NSSLAs can gain access to said information in the said watchlist for the sole purpose of screening their nominees/applicants for trustees/officers and/or confirming their elected trustees and appointed officers. NSSLAs must obtain the said authorization on an individual basis.

- e. *Delisting*. All delistings shall be approved by the Monetary Board upon recommendation of the appropriate supervising department of the Bangko Sentral except in cases of persons known to be dead, where delisting shall be automatic upon proof of death and need not be elevated to the Monetary Board. Delisting may be approved by the Monetary Board in the following cases:

(1) Watchlist – Disqualification File “B” (Temporary) –

- (a) After the lapse of the specific period of disqualification;
- (b) When the conviction by the court for crimes involving dishonesty, breach of trust and/or violation of banking laws becomes final and executory, in which case the trustee/officer/employee is relisted to Watchlist – Disqualification File “A” (Permanent);
- (c) Upon favorable decision or clearance by the appropriate body, i.e., court, NBI, bank, QB, trust entity or such other agency/body where the concerned individual had derogatory record. Trustees/officers/employees delisted from the Watchlist – Disqualification File “B” other than those upgraded to Watchlist – Disqualification File “A” shall be eligible for re-employment with any bank, QB, trust entity, NSSLAs or other FI under Bangko Sentral supervision.

E. RISK MANAGEMENT

141-S SUPERVISION BY RISK

The guidelines on supervision by risk in *Appendix Q-41* which provide guidance on how QBs should identify, measure, monitor and control risks shall govern the supervision by risks of NSSLAs to the extent applicable.

The guidelines set forth the expectation of the Bangko Sentral with respect to the management of risks and are intended to provide more consistency in how the risk-focused supervision function is applied to these risks. The Bangko Sentral will review the risks to ensure that an NSSLAs’ internal risk management processes are integrated and comprehensive. All NSSLAs should follow the guidance in risk management efforts.

142-S RISK MANAGEMENT FUNCTION

The risk management function is generally responsible for:

- a. identifying the key risk exposures and assessing and measuring the extent of risk exposures of the NSSLAs and its trust operations;
- b. monitoring the risk exposures and determining the corresponding capital requirement in accordance with the Basel capital adequacy framework and based on the NSSLAs’ internal capital adequacy assessment on an on-going basis;
- c. monitoring and assessing decisions to accept particular risks whether these are consistent with board approved policies on risk tolerance and the effectiveness of the corresponding risk mitigation measures; and
- d. reporting on a regular basis to senior management and to the board of directors of the results of assessment and monitoring.

Risk management personnel shall possess sufficient experience and qualifications, including knowledge on the NSSLAs business, the developments in the market, industry and product lines, as well as mastery of risk disciplines. They shall have the ability and willingness to challenge business lines regarding all aspects of risk arising from the NSSLAs’ activities.

Chief Risk Officer (CRO). NSSLAs may appoint a CRO, or any equivalent position, who shall be independent from executive functions and business line responsibilities, operations and revenue-generating functions. This independence shall be displayed in practice at all times as such, the CRO shall report directly to the board of trustees or to the risk oversight committee without any impediment.

The CRO shall have sufficient stature, authority and seniority within the NSSLA. This will be assessed based on the ability of the CRO to influence decisions that affect the NSSLA's exposure to risk. The CRO shall have the ability, without compromising his independence, to engage in discussion with the board of trustees, chief executive officer and other senior management on key risk issues and to access such information as he deems necessary to form his or her judgment. The CRO shall meet with the board of directors/risk oversight committee on a regular basis and such meetings shall be duly minuted and adequately documented.

CROs shall be appointed and replaced with prior approval of the board of trustees. In cases, when the CRO will be replaced, the NSSLA shall report the same to the appropriate supervising department of the Bangko Sentral within five (5) days from the time it has been approved by the board of trustees.

143-S MARKET RISK MANAGEMENT

The guidelines on market risk management for QBs as shown in *Appendix Q-42* shall govern the market risk management of NSSLAs to the extent applicable.

The guidelines set forth the expectations of the Bangko Sentral with respect to the management of market risk and are intended to provide more consistency in how the risk- focused supervision is applied to this risk. NSSLAs are expected to have an integrated approach to risk management to identify, measure, monitor and control risks. Market risk should be reviewed together with other risks to determine overall risk profile.

The Bangko Sentral is aware of the increasing diversity of financial products and that industry techniques for measuring and managing market risk are continuously evolving. As such, the guidelines are intended for general application; specific application will depend to some extent on the size, complexity and range of activities undertaken by NSSLAs.

144-S LIQUIDITY RISK MANAGEMENT

The guidelines on liquidity risk management for QBs as shown in *Appendix Q-43* shall govern the liquidity risk management of NSSLAs to the extent applicable.

The guidelines set forth the expectations of the Bangko Sentral with respect to the management of liquidity risk and are intended to provide more consistency in how the risk-focused supervision function is applied to this risk. NSSLAs are expected to have an integrated approach to risk management to identify, measure, monitor and control risks. Liquidity risk should be reviewed together with other risks to determine overall risk profile.

These guidelines are intended for general application; specific application will depend on the size and sophistication of a particular NSSLA and the nature and complexity of its activities.

145-S INFORMATION TECHNOLOGY RISK MANAGEMENT (ITRM)

The enhanced guidelines on ITRM keep abreast with the aggressive and widespread adoption of technology in the financial service industry and consequently strengthen existing Bangko Sentral framework for IT risk supervision. ITRM should be considered a component and integrated with the institutions' risk management program. The guidelines likewise provide practical plans to address risks associated with emerging trends in technology and growing concerns on cyber security.

Policy statement. The rapid pace of digital innovation has significantly reshaped the financial services landscape. BSFIs employ advances in technology to sharpen business insights, enhance operational efficiencies, and deliver innovative financial products and services in line with emerging market trends and evolving client needs. Technological developments also enable greater access to financial services that promote an inclusive and responsive digital financial ecosystem. As technological innovations become more deeply entrenched in business models, infrastructure, and delivery channels, system-related failures and malfunctions can create major operational disruptions in BSFIs. Social media platforms may further complicate matters as news of disruptions as well as customer complaints can spread at unprecedented speeds. Further, cyber-threats and attacks confronting the financial services industry pose added risks that can undermine public trust and confidence in the financial system.

In line with their growing technology usage and dependence at the back of a dynamic operating and cyber-threat environment, BSFIs should establish robust and effective technology risk management processes, governance structures, and cybersecurity controls. This is to ensure that the benefits derived from technological innovations can be fully optimized without compromising financial stability, operational resilience, and consumer protection.

Purpose and scope. The enhanced guidelines aim to provide guidance in managing risks associated with use of technology. The guidelines outlined are based on international standards and recognized principles of international practice for ITRM and shall serve as Bangko Sentral's baseline requirement for all BSFIs.

The guidelines shall apply to BSFIs which include banks, non-banks with quasi-banking function (NBQB), non-bank electronic money issuers and other non-bank institutions which under existing Bangko Sentral rules and regulations and special laws are subject to Bangko Sentral supervision and/or regulation. Moreover, subject guidelines shall also apply to BSFIs with offshore data processing as may be appropriate to their situation. The framework covers different facets of ITRM, some of which are supplemented with detailed guidelines in *Appendices Q-61 to Q-66*.

The Bangko Sentral shall keep the Appendices updated and, in the future, issue additional regulations on new and emerging products, services, delivery channels, and other significant applications of technology.

Subject guidelines, including the *Appendices Q-61 to Q-66*, are not “one-size-fits-all” and implementation of these need to be risk-based and commensurate with size, nature and types of products and services and complexity of IT operations of the individual BSFIs. BSFIs shall exercise sound judgment in determining applicable provisions relevant to their risk profile.

IT profile classification. To ensure that IT risk management system, governance structure and processes are commensurate with the attendant IT risks, the Bangko Sentral shall determine the IT profile of all BSFIs and classify them as "Complex", "Moderate" or "Simple". The *IT profile* refers to the inherent risk of a BSFI before application of any mitigating controls, and is assessed taking into consideration the following factors:

- a. *IT infrastructure and operations.* Inherent IT risks of a BSFI largely depend on the degree of automation of core processes and applications, the size of branch networks, and the characteristics of its IT organization. BSFIs with larger branch networks and more complex organizational structures usually require a higher degree of reliance on IT systems/infrastructure, which in turn, carry higher levels of inherent IT risks. Interconnectivity risks also play a factor in determining IT risk levels since added connections to third party networks increase complexity as well as exposure to potential information security/cybersecurity risks. These include participation in electronic payment systems and interconnections with other financial institutions, business partners, customers, and third party service providers, among others.
- b. *Digital/Electronic financial products and services.* Digital/electronic financial products and services provided to the BSFI's corporate and retail clients, by their very nature, can have a direct impact on IT risks, including information security/cybersecurity risks. This is because these products and services are normally provided via the internet or public networks which are inherently risky. Digital/electronic financial products and services include ATM debit, prepaid and credit cards and e-channels such as ATM terminals, point-of-sale (POS) terminals, internet banking and mobile banking facilities, among others. BSFIs that are more aggressive in providing such services are expected to have greater IT risks.
- c. *IT projects and initiatives.* The extent and nature of the BSFI's IT projects prospectively impact IT risk exposure and complexity. For instance, developing or acquiring a new core banking system is considered a major project, that if not adequately managed and overseen, may heighten inherent IT risks. Also, IT projects and initiatives entail the use of current resources in terms of funding and manpower that might affect existing IT operations and risk profile.
- d. *Outsourced services.* While outsourcing in general does not diminish the BSFI's responsibility over the function/service outsourced, outsourcing poses an added dimension to IT and information security risks. For this reason, outsourcing arrangements require a higher degree of oversight, due diligence, and risk management controls. Outsourcing core IT services and functions via cloud computing platforms may further intensify IT and information security risks.
- e. *Systemic importance.* The systemic importance of a BSFI is a critical determinant in assessing inherent IT and information security/cybersecurity risks since BSFIs identified as "Domestic Systemically Important Banks" or D-SIBs are essentially larger in size and have more complex operations and product offerings. Moreover, cyber-attacks against D-SIBs can have serious implications to financial and economic stability that may undermine public trust and confidence in the financial system.
- f. *Threats.* The volume, type, and severity of cyber-attacks and fraud targeting a specific BSFI affects IT and cybersecurity risk profiles. Some BSFIs may be more prone to attacks compared to others by virtue of their asset size, customer base, systemic importance, and other factors. Thus, BSFIs that are likely targets of these types of threats should have greater degree of cyber-preparedness and resilience.

A general description for each IT profile classification is outlined as follows:

IT Profile Classification	General Description/Attributes
---------------------------	--------------------------------

Complex	A BSFI with complex IT profile uses technology extensively in supporting mission-critical business processes and delivering financial products and services. It has ubiquitous branch network in the country and offers a wide array of digital/electronic financial products and services to a large number of corporate and retail clients. It is highly interconnected with external third party stakeholders and actively participates in electronic payment systems and networks, usually involving large-value transfers. Business strategies and objectives are largely anchored on IT platforms, digital innovation, and technology-based solutions. It is also aggressively utilizing/exploring emerging technologies such as cloud computing, social media and big data technologies.
Moderate	A BSFI classified as moderate uses technology to some extent, but not as aggressively as those classified as complex. Its branch network, IT organization and structure, and extent of IT projects are also relatively less significant than those of complex BSFIs. IT applications and systems are integrated but primarily support traditional banking products and services. It may offer basic digital/electronic products and services, such as ATM terminals/card-based products, to a limited number of clients.
Simple	A BSFI classified as simple generally has very limited use of technology with minimal interconnectivity to its clients and other institutions. Likewise, branch network or geographic presence is confined to a specific locality. IT applications and systems are stand-alone or are not fully integrated and e-banking products and services are rarely offered. A simple BSFI also has few IT personnel and customer base.

The IT profile of rural banks, cooperative banks, NBFIs, and non-bank institutions shall be classified as "Simple", unless notified by the Bangko Sentral of a higher classification. For other BSFIs, the Bangko Sentral shall notify in writing their assigned classification within a reasonable timeline from 5 December 2017. The Bangko Sentral-assigned classification shall remain effective until such time that the Bangko Sentral informs the concerned BSFI of a change in classification.

The Bangko Sentral assessment and classification process should not preclude BSFIs from assessing their own IT profile classification on an ongoing basis. All BSFIs are required to have periodic and rigorous self-assessment exercises using more robust data sets and variables as part of their information security risk management system.

IT rating system. The Bangko Sentral, in the course of its on-site examination activities, shall evaluate BSFIs' ITRM system and measure the results based on Bangko Sentral's IT rating system. A composite rating is assigned based on a "1" to "4" numerical scale, as follows:

4	BSFIs with this rating exhibit strong performance in every respect. Noted weaknesses in IT are minor in nature and can be easily corrected during the normal course of business.
3	BSFIs with this rating exhibit satisfactory performance but may demonstrate modest weaknesses in operating performance, monitoring, management processes or system development.
2	BSFIs with this rating exhibit less than satisfactory performance and require considerable degree of supervision due to a combination of weaknesses that may range from moderate to severe.
1	BSFIs with this rating exhibit deficient IT environment that may impair the future viability of the entity, thereby requiring immediate remedial action.

Definition of terms. In these guidelines, terms are used with the following meanings:

- a. *Advanced persistent threat or APT* shall refer to a sophisticated form of attack that involves coordinating multiple methods of identifying and exploiting a target's vulnerabilities over an extended period to do harm.
- b. *Card skimming* shall refer to the illegal copying of information from the magnetic stripe of a credit or ATM card to gain access to accounts.
- c. *Cloud computing* shall refer to a model for enabling ubiquitous, convenient, and on-demand network access to a shared pool of configurable computing resources that can be rapidly provisioned and released with minimal management effort or service provider interaction.
- d. *Compromised state* shall refer to a state wherein someone or something has maliciously broken into networks, systems and computers which raises doubt as to the integrity of information assets, such as, but not limited to, program files, image files, and operating system files.

- e. *Cyber-threat* shall refer to a deliberate act of omission or commission by any person carried out using the internet and/or other electronic channels, in order to communicate false or fraudulent representations to prospective victims, to conduct fraudulent transactions, or to illegally obtain proprietary data or information related to the institution, their customers and other stakeholders. Cyber-threat can be used synonymously with cyber-fraud, cyber-attack or cyber--related incidents.
- f. *Cybersecurity* shall refer to technologies, processes, and practices designed to protect a BSFI's information assets and consumers by preventing, detecting, and responding to cyber-attacks.
- g. *Data breach* shall refer to an incident in which sensitive, protected or confidential data or information has potentially been viewed, stolen, leaked, used, or destroyed by unauthorized persons.
- h. *Defense-in-depth* shall refer to a security strategy or design of deploying security controls over multiple or various layers across the network, systems, and applications such that a failure in one control would be compensated by another control in the next layer. This approach effectively delays or disrupts an attacker's ability to progress within the attack sequence.
- i. *Distributed Denial of Service (DDoS)* shall refer to a type of attack which makes use of the capacity limitation of enterprise networks, systems or ingress with extreme traffic loads.
- j. *Hacking* shall refer to unauthorized access into or interference in networks, systems and computers without the knowledge and consent of the system/information owner.
- k. *Information security program (ISP)* shall refer to information security policies, standards and procedures, security operations, technologies, organizational structures, and information security awareness and training programs aimed at protecting a BSFI's information assets and supporting infrastructure from internal and external threats.
- l. *Information security strategic plan (ISSP)* shall refer to the roadmap to guide a BSFI in transforming the current state of security to the desired state taking into account business goals and strategies.
- m. *Information security risk management (ISRM)* shall refer to the process of identifying, assessing, mitigating, managing, and monitoring information security risks, including cyber-risk, to ensure these are within acceptable levels. It should be integrated into the BSFI's ISP and enterprise-wide risk management system.
- n. *Malware* shall refer to malicious software that compromises the confidentiality, availability or integrity of information systems, networks or data. Examples of malware include ransomware, trojans, adware, botnets, bugs, and spyware, among others.
- o. *Pharming* shall refer to a form of cyber-attack that redirects a website traffic to another fake website to obtain user credentials and information.
- p. *Phishing* shall refer to the use of electronic communications such as e-mail to masquerade with trusted identity to capture sensitive information to gain access to accounts. It involves tricking customers into giving sensitive information through fraudulent emails or websites.
- q. *Reportable Major Cyber-related Incidents* shall refer to any cyber-related incidents that meet the criteria for reporting/notification to the Bangko Sentral as laid out in Item "a(2)(a)" of this Section (*Reporting and notification standards*).
- r. *Security Operations center (SOC)* shall refer a unit or function that provides centralized visibility, continuous monitoring, and rapid response and recovery procedures on security incidents and events.
- s. *Spearphishing* shall refer to a more advanced type of phishing attack which is customized to a particular target (e.g., executives, privileged users, etc.).
- t. *Threat Actor* shall refer to a person, group or nation/state/government that carries out or intends to carry out damaging acts against another party. An advanced threat actor shall refer to a person, organized group, or nation/state/government that (a) possesses superior capabilities, resources and skills to launch sophisticated cyber-attacks; or (b) seeks military and/or intelligence information for cyber-espionage purposes.
- u. *Threat intelligence* shall refer to the process of gathering and analyzing information about the proficiencies, tactics, and motives of malicious actors/attackers that enables a BSFI to institute appropriate countermeasures quickly.

Description of IT-related risks. As BSFIs increase their reliance on IT to deliver products and services, inappropriate usage of IT resources may have significant risk exposures. While IT does not trigger new types of risks, it brings in new dimensions to traditional banking risks (i.e., strategic risk, credit risk, market risk, liquidity risk and operational risk) that require new or enhanced control activities (e.g., a failure of a credit risk measurement application is an IT failure and, therefore, a systems failure in the sense of operational risk). Moreover, IT is an implied part of any system of internal controls, regardless of the type of risk and, consequently, forms an important element in organization-wide risk management. Among the risks associated with the use of IT are the following:

- a. *Operational risk* is the risk to earnings and capital arising from problems with service or product delivery. This risk is a function of internal controls, IT systems, employee integrity and operating processes. Operational risk exists in all products and services;
- b. *Strategic risk* is the risk to earnings and capital arising from adverse business decisions on IT-related investments or improper implementation of those decisions. The risk is a function of the compatibility of an organization's strategic goals, the business strategies developed to achieve those goals, the resources deployed against these goals and the quality of implementation. The resources needed to carry out business strategies are both tangible and intangible which include communication channels, operating systems, delivery networks and managerial capacities and capabilities;
- c. *Reputation risk* is the risk to earnings and capital arising from negative public opinion. This affects the institution's ability to establish new relationships or services or continue servicing existing relationships. The risk can expose the institution to litigation, financial loss or damage to its reputation; and
- d. *Compliance risk* is the risk to earnings and capital arising from the violations of, or non-conformance with laws, rules and regulations, prescribed practices or ethical standards. Compliance risk also arises in situations where the laws and rules governing certain products activities of the BSFI's clients may be ambiguous or untested. Compliance risk exposes the institution to monetary penalties, non-monetary sanctions and possibility of contracts being annulled or declared unenforceable.

IT Risk Management System (ITRMS). As BSFIs become more dependent on IT systems and processes, technology risks and information security issues have become progressively more complex and pressing in recent years. Information security is just as important as the new technologies being installed by BSFIs. As progress in technology shifts to higher gear, the trend in cyber-attacks, intrusions, and other form of incidents on computer systems shows that it will not only persist but will continue to increase in frequency and spread in magnitude.

Management of IT risks and information security issues becomes a necessity and an important part of BSFIs' risk management system. BSFIs are therefore required to establish a robust ITRM system covering four (4) key components: 1) IT governance, 2) risk identification and assessment, 3) IT controls implementation, and 4) risk measurement and monitoring.

- a. *IT Governance.* This is an integral part of BSFIs' governance framework and consists of the leadership and organizational structures and processes that ensure the alignment of IT strategic plan with BSFIs' business strategy, optimization of resources management, IT value delivery, performance measurement and the effective and efficient use of IT to achieve business objectives and effective IT risk management implementation. BSFIs must establish an effective IT governance framework covering the following:
 - (1) *Oversight and organization of IT functions.* Accountability is a key concern of IT governance and this can be obtained with an organizational structure that has well-defined roles for the responsibility of information, business processes, applications, IT infrastructure, etc.

The Board of Directors is ultimately responsible for understanding the IT risks confronted by a BSFI and ensuring that they are properly managed, whereas the Senior Management is accountable for designing and implementing the ITRMS approved by the Board. For Complex BSFIs, the Board may delegate to an IT Steering Committee (ITSC) or its equivalent IT oversight function to cohesively monitor IT performance and institute appropriate actions to ensure achievement of desired results. The ITSC, at a minimum, should have as members a non-executive Board director who oversees the institution's IT function, the head of IT group/department, and the highest rank officer who oversees the business user groups. The head of control groups should participate in ITSC meetings in advisory capacity only.

A charter should be ratified by the Board to clearly define the roles and responsibilities of the ITSC. Formal minutes of meeting should be maintained to document its discussions and decisions. The ITSC should regularly provide adequate information to the Board regarding IT performance, status of major IT projects or other significant issues to enable the Board to make well-informed decisions about the BSFIs' IT operations.

BSFIs should develop an IT strategic plan that is aligned with the institution's business strategy. This should be undertaken to manage and direct all IT resources in line with the business strategy and priorities. IT strategic plan should focus on long term goals covering three (3)- to five (5)-year horizon and should be

sufficiently supplemented by tactical IT plans which specify concise objectives, action plans and tasks that are understood and accepted by both business and IT. The IT strategic plan should be formally documented, endorsed by the Board and communicated to all stakeholders. It should be reviewed and updated regularly for new risks or opportunities to maximize the value of IT to the institution.

BSFIs should also create an organization of IT functions that will effectively deliver IT services to business units. For “Complex” BSFIs, a full-time IT Head or equivalent rank should be designated to take the lead in key IT initiatives and oversee the effectiveness of the IT organization. In addition to managing the delivery of day-to-day IT services, the IT Head should also oversee the IT budget and maintain responsibility for performance management, IT acquisition oversight, professional development and training. The IT Head should be a member of executive management with direct involvement in key decisions for the BSFI and usually reports directly to the President or Chief Executive Officer.

A clear description of roles and responsibilities for individual IT functions should be documented and approved by the Board. Proper segregation of duties within and among the various IT functions should be implemented to reduce the possibility for an individual to compromise a critical process. A mechanism should be in place to ensure that personnel are performing only the functions relevant to their respective jobs and positions. In the event that an institution finds it difficult to segregate certain IT control responsibilities, it should put in place adequate compensating controls (e.g., peer reviews) to mitigate the associated risks.

- (2) *IT policies, procedures and standards.* IT controls, policies, and procedures are the foundation of IT governance structure. It helps articulate the rules and procedures for making IT decisions, and helps to set, attain, and monitor IT objectives.

BSFIs should adopt and enforce IT-related policies and procedures that are well-defined and frequently communicated to establish and delineate duties and responsibilities of personnel for better coordination, effective and consistent performance of tasks, and quicker training of new employees. Management should ensure that policies, procedures, and systems are current and well-documented. The ITSC should review IT policies, procedures, and standards at least on an annual basis. Any updates and changes should be clearly documented and properly approved. IT policies and procedures should include at least the following areas:

- IT Governance/Management;
- Development and Acquisition;
- IT Operations;
- Communication networks;
- Information security;
- Electronic Banking/Electronic Products and Services; and
- IT Outsourcing/Vendor Management.

For simple BSFIs, some of the above areas (i.e., development, electronic banking, etc.) may not be applicable, thus sound judgment should be employed to ensure that the BSFI’s IT policies and procedures have adequately covered all applicable areas.

- (3) *IT audit.* Audit plays a key role in assisting the Board in the discharge of its corporate governance responsibilities by performing an independent assessment of technology risk management process and IT controls.

Auditors provide an assurance that important control mechanisms are in place for detecting deficiencies and managing risks in the implementation of IT. They should be qualified to assess the specific risks that arise from specific uses of IT. BSFIs should establish effective audit programs that cover IT risk exposures throughout the organization, risk-focused, promote sound IT controls, ensure the timely resolution of audit deficiencies and periodic reporting to the Board on the effectiveness of institution’s IT risk management, internal controls, and IT governance. Regardless of size and complexity, the IT audit program should cover the following:

- Independence of the IT audit function and its reporting relationship to the Board or its Audit Committee;
- Expertise and size of the audit staff relative to the IT environment;
- Identification of the IT audit universe, risk assessment, scope, and frequency of IT audits;
- Processes in place to ensure timely tracking and resolution of reported weaknesses; and
- Documentation of IT audits, including work papers, audit reports, and follow-up.

In case in-house IT audit expertise is not available, such as for a simple BSFI, the IT audit support may be performed by external specialists and auditors of other institutions consistent with existing Bangko Sentral rules and regulations on outsourcing. (Detailed guidelines/standards on IT Audit are shown in *Appendix Q-61*).

- (4) *Staff competence and training.* The rapid development in technology demands appropriate, skilled personnel to remain competent and meet the required level of expertise on an ongoing basis.

BSFIs should have an effective IT human resources management plan that meets the requirements for IT and the business lines it supports. Management should allocate sufficient resources to hire and train employees to ensure that they have the expertise necessary to perform their job and achieve organizational goals and objectives.

Management needs to ensure that staffing levels are sufficient to handle present and expected work demands, and to cater reasonably for staff turnover. Appropriate succession and transition strategies for key officers and personnel should be in place to provide for a smooth transition in the event of turnover in vital IT management or operations functions.

- (5) *Management Information Systems (MIS)*. The BSFIs' IT organization often provides an important support role for their MIS. Accurate and timely MIS reports are an essential component of prudent and reasonable business decisions. At the most senior levels, MIS provides the data and information to help the Board and management make strategic decisions. At other levels, MIS allows management to monitor the institution's activities and distribute information to other employees, customers, and members of management.

Advances in technology have increased the volume of information available to management and directors for planning and decision-making. However, if technology is not properly managed, the potential for inaccurate reporting and flawed decision making increases. Because report generation systems can rely on manual data entry or extract data from many different financial and transaction systems, management should establish appropriate control procedures to ensure information is correct, relevant, and adequately protected. Since MIS can originate from multiple equipment platforms and systems, the controls should ensure all information systems have sufficient and appropriate controls to maintain the integrity of the information and the processing environment. Sound fundamental principles for MIS review include proper internal controls, operating procedures, safeguards, and audit coverage.

- (6) *IT risk management function*. Management of risk is a cornerstone of IT Governance. BSFIs should have a policy requiring the conduct of identification, measurement, monitoring and controlling of IT risks for each business function/service on a periodic basis. BSFIs should define and assign these critical roles to a risk management unit or to a group of persons from different units collectively performing the tasks defined for this function.

The function should have a formal technology risk acknowledgement and acceptance process by the owner of risk to help facilitate the process of reviewing, evaluating and approving any major incidents of non-compliance with IT control policies. The process can be supported by the following:

- (a) a description of risk being considered for acknowledgement by owner of risk and an assessment of the risk that is being accepted;
- (b) identification of mitigating controls;
- (c) formulation of a remedial plan to reduce risk; and
- (d) approval of risk acknowledgement from the owner of the risk and senior management.

ITRM processes should be integrated into the enterprise-wide risk management processes to allow BSFIs to make well-informed decisions involving business plans and strategies, risk responses, risk tolerance levels and capital management, among others.

- b. *Risk identification and assessment*. BSFIs should maintain a risk assessment process that drives response selection and controls implementation. An effective IT assessment process begins with the identification of the current and prospective IT risk exposures arising from the institution's IT environment and related processes. The assessments should identify all information assets, any foreseeable internal and external threats to these assets, the likelihood of the threats, and the adequacy of existing controls to mitigate the identified risks. Management should continually compare its risk exposure to the value of its business activities to determine acceptable risk levels. Once management understands the institution's IT environment and analyzes the risk, it should rank the risks and prioritize its response. The probability of occurrence and the magnitude of impact provide the foundation for reducing risk exposures or establishing mitigating controls for safe, sound, and efficient IT operations appropriate to the complexity of the organization. Periodic risk assessment process should be done at the enterprise-wide level and an effective monitoring program for the risk mitigation activities should be manifested through mitigation or corrective action plans, assignment of responsibilities and accountability and management reporting.
- c. *IT controls implementation*. Controls comprise of policies, procedures, practices and organizational structures designed to provide reasonable assurance that business objectives will be achieved and undesired events will be mitigated. Management should establish an adequate and effective system of internal controls based on the degree of exposure and the potential risk of loss arising from the use of IT. Controls for IT environment generally should address the overall integrity of the environment and should include clear and measurable performance goals, the allocation of specific responsibilities for key project implementation, and independent mechanisms that will both measure risks and minimize excessive risk-taking. BSFI Management should implement satisfactory

control practices that address the following as part of its overall IT risk mitigation strategy: 1) Information security; 2) Project management/development and acquisition and change management; 3) IT operations; 4) IT outsourcing/Vendor management; and 5) Electronic banking, Electronic payments, Electronic money and other Electronic products and services.

- (1) *Information security.* Information is a vital asset of a BSFI that must be adequately protected and managed to preserve its confidentiality, integrity and availability. Considering the crucial role information plays in supporting business goals and objectives, driving core operations and critical decision-making, information security is intrinsically linked to the overall safety and soundness of BSFIs. Thus, the BSFI needs to put in place a robust, resilient and enterprise-wide framework for ISRM supported by effective information security governance and oversight mechanisms. Information security risk exposures must be managed to within acceptable levels through a dynamic interplay of people, policies and processes, and technologies and must be integrated with the enterprise-wide risk management system.

Management should adopt a holistic, integrated and cyclical approach to managing information security risks. An ISRM framework should be in place encompassing key elements and phases with effective governance mechanisms to oversee the entire process. The framework represents a continuing cycle that should evolve over time taking into account changes in the operating and business environment as well as the overall cyber-threat landscape.

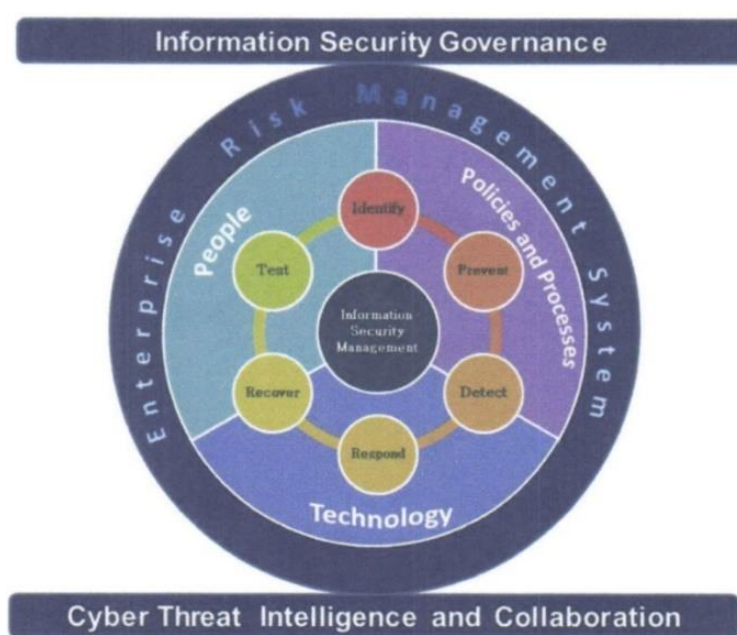

Figure 1. Information Security Risk Management Framework

The ISRM framework is based upon the following underlying fundamental principles and concepts:

- (a) *Strong leadership and effective Information Security (IS) governance and oversight.* The BSFI's Board and Senior Management set the overall tone and strategic direction for information security by providing strong leadership, effective information security governance and oversight. They should take the lead in establishing an information security culture that regards security as an intrinsic part of the BSFI's core business and operations. Instilling a strong security culture ensures that security controls, processes, and measures are deeply embedded into the institution's lines of business, products, services and processes, including its employees and external relationships. The Board and Senior Management should adopt the right mindset and understand the crucial role of information security in supporting/achieving business goals and objectives. Towards this end, they should oversee the development of an information security strategic plan (ISSP) to clearly articulate security strategies and objectives aligned with business plans.

The BSFI should maintain a comprehensive, well-designed and effective information security program (ISP) that is commensurate with its operational and IT profile complexity. To ensure its effectiveness and sustainability, the ISP should have strong support from the Board and Senior Management as well as cooperation of all concerned stakeholders. Management should see to it that adequate resources, organizational functions/capabilities, policies, standards, and procedures as well as the supporting infrastructure commensurate with the BSFI's IT risk complexity and appetite are available and optimized to effectively implement the ISSP and ISP. Lastly, the Board and Senior Management should appoint a Chief Information Security Officer (CISO), a senior level executive with sufficient authority within the institution, who will be responsible and accountable for the organization-wide ISP.

- (b) *Integrated, holistic and risk-based approach.* The ISRM should form an integral part of the BSFI's ISP and enterprise risk management system. It encompasses the people, policies and processes, and technology elements in the organization that should be harmonized to support information security goals and objectives. Information security is not achieved by merely focusing on technology or one aspect and no one element is superior over the other. Each of these elements must work together to achieve the desired security posture and manage information security risks to acceptable levels. In line with the increasing interconnectivity of BSFIs and other industry players, the ISRM should also consider security controls and requirements over third party service providers, customers, banks, and other third party stakeholders which are linked or have access to the BSFI's network and systems. This is because threat actors may launch their attacks on the BSFI through these third party networks.

Likewise, the ISRM including cyber-risk management programs should be commensurate with the inherent risks involved. This means that the BSFI's information security controls and maturity levels should be commensurate with its operations and complexity of IT profile. In this regard, in determining whether a certain control requirement is applicable to the BSFI, it shall first assess the complexity of its IT profile pursuant to this Section (*IT profile classification*). BSFIs with complex IT profile are expected to implement the more advanced security control measures and be at the higher levels of the information security/cyber-maturity curve. BSFIs may also refer to leading standards and frameworks issued by standard-setting bodies¹ on information security and cybersecurity in designing their ISRM.

- (c) *Continuing cycle.* The ISRM involves a continuing cycle consisting of the following six (6) major phases:

- (i) *Identify.* The starting point of the cycle is the identification of the BSFI's information security as well as cyber-related risks. Under this phase, management needs to identify its business processes and functions, information assets classified as to sensitivity and criticality, threats and vulnerabilities, interconnections, and security architecture. Identification of these factors facilitates BSFI's understanding and assessment of its inherent information security and cyber risks which are key inputs in determining, designing, and implementing the appropriate risk treatment options.
- (ii) *Prevent.* After identifying these key factors and assessing the information security and cyber risks, the prevent phase comes into play where adequate protection mechanisms and controls are designed and implemented. These include measures ranging from baseline to advanced tools and approaches such as defense-in-depth, malware prevention, access controls and cybersecurity awareness programs, among others. These preventive controls are generally categorized into three (3) types, as follows:
- (aa) *Administrative controls* - refer to the policies, standards, and procedures in place which articulate Management's intent, expectations, and direction on information security. It also includes security trainings and awareness programs and personnel security practices designed to prevent unwarranted employee behavior.
- (bb) *Physical and environmental controls* - pertain to the security controls and measures implemented to protect physical infrastructure such as data centers, computer facilities, and equipment from damage, unauthorized access or environmental hazards.
- (cc) *Technical controls* - refer to the logical security controls, security tools, and technologies to ensure that the confidentiality, integrity, and availability objectives for information assets are achieved.
- (iii) *Detect.* Detection capabilities should also be in place as prevention alone is not sufficient. As demonstrated in recent cyber-attacks, the ability of an institution to quickly detect anomalous activities and evaluate the scope of an attack is an important aspect in significantly reducing negative impacts. Management should design and implement effective detection controls over the BSFI's networks, critical systems and applications, access points, and confidential information.
- (iv) *Respond.* The response phase is triggered upon confirmation of an occurrence of a cyber-attack or security incident affecting the BSFI and its customers. With the growing incidence of sophisticated cybercrimes and threats, the BSFI should be prepared to respond quickly considering that cyber-attacks are no longer a remote possibility. Therefore, it should develop comprehensive, updated, and tested incident response plans supported by well-trained incident responders, investigators, and forensic data collectors. Through adequate response capabilities, the BSFI should be able to minimize and contain the damage and impact arising from security incidents, immediately restore critical systems and services, and facilitate investigation to determine root causes.

¹ US National Institute of Standards and Technology (NIST), ISO/IEC, ISACA and Committee on Payments and Market Infrastructures (CPMI), among others

- (v) *Recover*. This phase encompasses both the resumption of activities at a level which is considered "good enough for a certain period of time" and full recovery, i.e., an eventual return to full service. Management should be able to establish back-up facilities and recovery strategies to ensure the continuity of critical operations. During the recovery phase, it should ensure that information processed using back-up facilities and alternate sites still meet acceptable levels of security. To achieve cyber resilience, the BSFI should consider information security incidents and cyber-related attack scenarios in its business continuity management and recovery processes.
 - (vi) *Test*. The BSFI needs to continually assess and test controls and security measures implemented under the prevent, detect, respond, and recover phases to ensure that these are effective and working as intended. Likewise, a comprehensive, systematic and layered testing and assurance program covering security processes and technologies should be in place. This is to ensure that the ISRM is on track in providing appropriate level of information security commensurate to the BSFI's IT profile complexity. This phase also ensures that both the ISSP and ISP remain effective vis-a-vis the fast-evolving cyber- threat landscape.
- (d) *Cyber threat intelligence and collaboration*. In response to the growing cyber-threat landscape, BSFIs need to step up their information security posture and resilience beyond their respective networks. Likewise, BSFIs need to enhance situational awareness that would provide a keen sense of the threat landscape as it relates to their IT risk and cyber-risk profiles, operating complexities, and business models. Further, BSFIs need to collaborate with each other, including regulators, law enforcement agencies, and other third party stakeholders for a collective, coordinated, and strategic response through information sharing and collaboration. Information sharing allows BSFIs to enhance threat intelligence that enables quick identification, prevention and response to emerging and persistent threats. (Detailed guidelines/standards on information security are shown in *Appendix Q-62*).
- (2) *Project management/development and acquisition and change management*. BSFIs should establish a framework for management of IT-related projects. The framework should clearly specify the appropriate project management methodology that will govern the process of developing, implementing and maintaining major IT systems. The methodology, on the other hand, should cover allocation of responsibilities, activity breakdown, budgeting of time and resources, milestones, checkpoints, key dependencies, quality assurance, risk assessment and approvals, among others. In the acquisition and/or development of IT solutions, BSFIs should ensure that business and regulatory requirements are satisfied. (Detailed guidelines/standards on Project Management/Development and Acquisition and Change Management are shown in *Appendix Q-63*).
- (3) *IT operations*. IT has become an integral part of the day-to-day business operation, automating and providing support to nearly all of the business processes and functions within the institution. Therefore, the IT systems should be reliable, secure and available when needed which translates to high levels of service and dependency on IT to operate.

One of the primary responsibilities of IT operations management is to ensure the institution's current and planned infrastructure is sufficient to accomplish its strategic plans. BSFI management should ensure that IT operates in a safe, sound, and efficient manner throughout the institution. Given that most IT systems are interconnected and interdependent, failure to adequately supervise any part of the IT environment can heighten potential risks for all elements of IT operations and the performance of the critical business lines of the BSFIs. Such scenario necessitates the coordination of IT controls throughout the institution's operating environment. (Detailed guidelines/standards on IT Operations are shown in *Appendix Q-64*).

- (4) *IT outsourcing/vendor management program*. IT outsourcing refers to any contractual agreement between a BSFI and a service provider or vendor for the latter to create, maintain, or reengineer the institution's IT architecture, systems and related processes on a continuing basis. A BSFI may outsource IT systems and processes except those functions expressly prohibited by existing regulations. The decision to outsource should fit into the institution's overall strategic plan and corporate objectives and said arrangement should comply with the provisions of existing Bangko Sentral rules and regulations on outsourcing. Although the technology needed to support business objectives is often a critical factor in deciding to outsource, managing such relationships should be viewed as an enterprise-wide corporate management issue, rather than a mere IT issue.

While IT outsourcing transfers operational responsibility to the service provider, the BSFIs retain ultimate responsibility for the outsourced activity. Moreover, the risks associated with the outsourced activity may be realized in a different manner than if the functions were inside the institution resulting in the need for controls designed to monitor such risks. BSFI management should implement an effective outsourcing oversight program that provides the framework for management to understand, monitor, measure, and control the risks associated with outsourcing. BSFIs outsourcing IT services should have a comprehensive outsourcing risk management process which provides guidance on the following areas: 1) risk assessment; 2) selection of service providers; 3) contract review; and 4) monitoring of service providers. Detailed guidelines/standards on IT Outsourcing/Vendor Management and on the adoption of outsourced cloud computing model are shown in *Appendix Q-65*.

- (5) *Electronic products and services.* The evolution in technology revolutionized the way banking and financial products and services are delivered. Physical barriers were brought down enabling clients to access their accounts, make transactions or gather information on financial products and services anywhere they are, at any time of the day and at their own convenience. As development in technology continues to accelerate, innovative electronic products and services are foreseen to bring more accessibility and efficiency. However, BSFIs may be confronted with challenges relating to capacity, availability and reliability of the electronic services. Likewise, fraudulent activities via electronic channels are also rising in number.

BSFIs should protect customers from fraudulent schemes done electronically. Otherwise, consumer confidence to use electronic channels as safe and reliable method of making transactions will be eroded. To mitigate the impact of cyber fraud, BSFIs should adopt aggressive security posture such as the following:

- (a) The entire ATM system shall be upgraded/converted to allow adoption of end-to-end Triple DES (3DES) encryption standards by 01 January 2015. The 3DES encryption standards shall cover the whole ATM network which consists of the host processors, switches, host security module (HSM), automated teller machines (ATMs), point-of-sale (POS) terminals and all communication links connected to the network;
- (b) ATMs to be installed after 14 September 2013 should be 3DES compliant; and
- (c) ATMs, POS terminals and payment cards are also vulnerable to skimming attacks due to the lack of deployment of globally recognized EMV enabled technology by BSFIs. Magnetic stripe only ATMs, POS Terminals and cards are largely defenseless against modern fraud techniques. Therefore, all concerned BSFIs should shift from magnetic stripe technology to EMV chip-enabled cards, POS Terminals and ATMs. The entire payment card network should be migrated to EMV by 01 January 2017. This requirement shall cover both issuing and acquiring programs of concerned BSFIs. A written and Board-approved EMV migration plan should be submitted to Bangko Sentral within six (6) months from 22 August 2013. Likewise, the detailed guidelines covering subject EMV requirement shall be issued separately.

The guidelines on EMV Implementation are shown in *Appendix S-12*. The guidelines on EMV Card Fraud Liability Shift Framework (ECFLSF) are in *Appendix S-12*. Detailed guidelines/standards on Electronic Products and Services are shown in *Appendix Q-66*.

- d. *Risk measurement and monitoring.* BSFI Management should monitor IT risks and the effectiveness of established controls through periodic measurement of IT activities based on internally established standards and industry benchmarks to assess the effectiveness and efficiency of existing operations. Timely, accurate, and complete risk monitoring and assessment reports should be submitted to management to provide assurance that established controls are functioning effectively, resources are operating properly and used efficiently and IT operations are performing within established parameters. Any deviation noted in the process should be evaluated and management should initiate remedial action to address underlying causes. The scope and frequency of these performance measurement activities will depend on the complexity of the BSFI's IT risk profile and should cover, among others, the following:

- (1) *Performance vis-à-vis approved IT strategic plan.* As part of both planning and monitoring mechanisms, BSFI management should periodically assess its uses of IT as part of overall business planning. Such an enterprise-wide and ongoing approach helps to ensure that all major IT projects are consistent with the BSFI's overall strategic goals. Periodic monitoring of IT performance against established plans shall confirm whether IT strategic plans remain in alignment with the business strategy and the IT performance supports the planned strategy.
- (2) *Performance benchmarks/service levels.* BSFIs should establish performance benchmarks or standards for IT functions and monitor them on a regular basis. Such monitoring can identify potential problem areas and provide assurance that IT functions are meeting the objectives. Areas to consider include system and network availability, data center availability, system reruns, out of balance conditions, response time, error rates, data entry volumes, special requests, and problem reports.

Management should properly define services and service level agreements (SLA) that must be monitored and measured in terms understandable to the business units. SLA with business units and IT department should be established to provide a baseline to measure IT performance.

- (3) *Quality assurance/quality control.* BSFI should establish quality assurance (QA) and quality control (QC) procedures for all significant activities, both internal and external, to ensure that IT is delivering value to business in a cost effective manner and promotes continuous improvement through ongoing monitoring. QA activities ensure that product conforms to specification and is fit for use while QC procedures identify weaknesses in work products and to avoid the resource drain and expense of redoing a task. The personnel performing QA and QC reviews should be independent of the product/process being reviewed and use quantifiable indicators to ensure objective assessment of the effectiveness of IT activities in delivering IT capabilities and services.

- (4) *Policy compliance.* BSFIs should develop, implement, and monitor processes to measure IT compliance with their established policies and standards as well as regulatory requirements. In addition to the traditional reliance on internal and third party audit functions, BSFIs should perform self-assessments on a periodic basis to gauge performance which often lead to early identification of emerging or changing risks requiring policy changes and updates.
- (5) *External assessment program.* Complex BSFIs may also seek regular assurance that IT assets are appropriately secured and that their IT security risk management framework is effective. This may be executed through a formal external assessment program that facilitates a systematic assessment of the IT security risk and control environment over time.

Reporting and notification standards. In line with the increased reliance on and adoption of technology by BSFIs, along with growing concerns on cybersecurity, BSFIs should submit regular and event-driven reports covering technology-related information as well as incidence of major cyber-attacks and operational disruptions. This will enable the Bangko Sentral to have an enhanced visibility on the changing IT risk landscape and to proactively ensure that the impact and risks arising from cyber-related incidents and operational disruptions are minimized and contained to avert potential systemic risks to the financial system.

a. Reporting requirement. BSFIs are required to submit to the Bangko Sentral the following reports/information:

- (1) Periodic reports. BSFIs shall submit an Annual IT Profile, as listed in *Appendix S-2*, electronically to the appropriate supervising department of the Bangko Sentral within twenty-five (25) calendar days from the end of reference year.
- (2) Event-driven reports. BSFIs shall notify the Bangko Sentral upon discovery of any of the following:
 - (a) Reportable Major Cyber-related Incidents. These cover all events which may seriously jeopardize the confidentiality, integrity or availability of critical information, data or systems of BSFIs, including their customers and other stakeholders. Reporting of such incidents to the Bangko Sentral should form part of the incident management plan of BSFIs.

An incident is considered a reportable major cyber-related incident, if after assessing the nature of the incident or attack, the BSFI has determined that the same:

- (i) resulted in an unauthorized access and infiltration into the BSFI's internal network (i.e., hacking, advanced persistent threats, presence of malware);
 - (ii) involved a system-level compromise (i.e., attacks on BSFI's core systems, as opposed to phishing attempts of individual clients);
 - (iii) affected a significant number of customer accounts simultaneously;
 - (iv) involved significant data loss or massive data breach;
 - (v) indicated spearphishing attacks targeting the BSFIs' directors, senior executives, officers, or privileged users;
 - (vi) resulted in the unavailability of critical systems/services (e.g., Distributed Denial of Service (DDoS) attack resulting in service outage);
 - (vii) inflicted material financial losses to the BSFIs, their customers and other stakeholders; or
 - (viii) has been suspected to be perpetrated by an advanced threat actor.
- (b) Disruptions of financial services and operations. These include disruption of critical operations which lasts for more than two (2) hours due to internal and external threats, which may be natural, man-made or technical in origin. Such scenarios usually involve loss of personnel, technology, alternate site, and service providers. Causes of such interruptions include, but are not limited to, fire, earthquakes, flood, typhoon, long-term power outage, technical malfunctions, pandemics and other threats.

Security events/attacks which are normally prevented by security systems/devices need not be reported to the Bangko Sentral, except if the same involve significant financial value and/or multitude of customer accounts beyond BSFI's reasonable threshold levels. For instance, an attempt to fraudulently transfer funds involving large sums of money requires immediate notification to the Bangko Sentral as this can be a signal of impending attacks to other BSFIs.

b. Procedure for event-driven reporting. The following procedures shall be followed by BSFIs in reporting reportable major cyber-related incidents and/or disruptions of financial services and operations stated in Item "a(2)" of this Section (*Reporting and notification standards*):

- (1) The BSFIs' Compliance Officer and/or BSFI-designated Officer shall notify the appropriate supervising department of the Bangko Sentral within two (2) hours from discovery of the reportable major cyber-related incidents and/or disruptions of financial services and operations stated in Item "a(2)" of this Section (*Reporting and notification standards*), in accordance with *Appendix S-2*.

- (2) The BSFIs shall disclose, at the minimum, the nature of the incident and the specific system or business function involved.
- (3) Within twenty-four (24) hours from the time of the discovery of the reportable major cyber-related incident and/or disruption, a follow-up report should be sent to the appropriate supervising department of the Bangko Sentral through e-mail indicating the following, as applicable:
 - (a) nature of the incident;
 - (b) manner and time of initial detection;
 - (c) impact of the incident based on initial assessment (e.g., length of downtime, number of affected customers/accounts, number of complaints received, value of transactions involved);
 - (d) initial response or actions taken/to be taken (e.g., conduct of root cause analysis) with respect to the incident; and
 - (e) information if the incident resulted in activation of the Business Continuity Plan (BCP) and/or Crisis Management Plan (CMP).
- c. Verification of root cause. Depending on the nature and severity of the reported incident/disruption, the Bangko Sentral may require BSFIs to provide additional information or updates until the matter is satisfactorily resolved. Likewise, the Bangko Sentral may conduct special examination or overseeing inspection, if necessary, to verify root cause of the incident, assess the impact to the BSFI and the financial system as a whole, identify areas for improvement to prevent recurrence of the incident, and promote enterprise and industry-wide operational resilience.
- d. Compliance with reporting of crimes and losses. Compliance with event-driven report requirement shall not excuse BSFIs from complying with the existing rules on the reporting of crimes and losses under Sec. 173 of the MORB and *Appendix S-3*. Likewise, any cyber-related incident which does not qualify as a reportable major cyber-related incident and other disruptions arising from crimes and losses must be reported to the Bangko Sentral in accordance with the aforesaid regulations. Operational risk events which are covered under Item “a(2)” on the event-driven reporting and notification requirements shall no longer require separate reporting and notification pursuant to Sec. 146-Q (*Notification/Reporting to Bangko Sentral*).
- e. Information gathering. Should the conduct of in-depth studies and research on certain technology development or key area of concern relating to technology risk and cybersecurity be warranted, the Bangko Sentral, from time to time, may request BSFIs to submit specific data and information thereon through surveys, questionnaires or other means.

Sanctions and penalties. BSFIs should make available all policies and procedures and other documents/requirements related to the foregoing during on-site examination as well as provide copies thereof to the Bangko Sentral when a written request is made to determine their compliance with this Section.

Consistent with Sec. 002-S, the Bangko Sentral may deploy enforcement actions to promote adherence with the requirements set forth in this Section and bring about timely corrective actions. Any violation of the provisions of this Section, its appendices and annexes, shall subject the BSFI and/or its directors, officers, and/or employees to the monetary and non-monetary sanctions, as provided under existing laws, Bangko Sentral rules and regulations. Enforcement actions shall be imposed on the basis of the overall assessment of BSFIs’ ITRMS. Whenever a BSFI’s ITRMS is rated “1” pursuant to this Section, the following additional sanctions may be imposed:

- a. Non-compliance with the requirements in Item “b” of this Section (*Reporting and notification standards*) will be subject to “High” penalty level monetary sanctions pursuant to Sec. 811-S. Consistent with Sec.002-S, the Bangko Sentral may deploy applicable enforcement actions on the BSFI and/or its directors, officers, and/or employees for violations on this requirement.
- b. Annual IT Profile and other periodic reports which have been considered as erroneous, delayed or unsubmitted shall be subject to the penalties for *Category B* reports under Sec. 171 of the MORB.

On the requirement to adopt multi-factor authentication techniques for sensitive communications and/or high risk transactions pursuant to Item “4.1.2” of *Appendix Q-66*, the Bangko Sentral may issue directives to improve authentication and authorization procedures for sensitive communications and/or high risk transactions, or impose sanctions to limit the level of or suspend any electronic products and services that are not compliant with such requirements.

(Circular Nos. 1051 dated 27 September 2019, 1019 dated 31 October 2018, 982 dated 9 November 2017, and 958 dated 25 April 2017)

BSFIs can be adversely affected by disruption of critical operations due to internal and external threats, which may be natural, man-made or technical in origin. Extreme events may cause major disruptions whose impact are very broad in scope, duration or both and can pose a substantial risk to the continued operation of BSFIs. Because BSFIs play a crucial role in the financial system and economy as a whole, it is important to ensure that their operations can withstand the effects of major disruptions. Thus, BSFIs need to have a comprehensive business continuity management (BCM) process as an integral part of their operational risk management system. A well-designed BCM process enables BSFIs to resume critical operations swiftly and minimize operational, financial, legal, reputational, and other material risks arising from a disruption. This also helps mitigate systemic risks as well as maintain public trust and confidence in the financial system.

Purpose, applicability, and scope. The guidelines aim to promote sound management of business continuity risks. These align existing regulations, to the extent possible, with leading standards and recognized principles on BCM, and shall serve as the Bangko Sentral's baseline requirement for all BSFIs.

The guidelines shall apply to BSFIs which include banks, non-banks with quasi-banking function (NBQB), non-bank electronic money issuers and other non-bank institutions which under existing Bangko Sentral rules and regulations and special laws are subject to Bangko Sentral supervision and/or regulation. Moreover, subject guidelines shall also apply to BSFIs with offshore data processing as may be appropriate to their situation.

Definition of terms. In these guidelines, terms are used with the following meanings:

- a. *Alternate and business recovery sites* shall refer to standby facilities for use during disruption of critical operations to ensure business continuity. These provide work space and/or the necessary technology environment needed to process business-critical information. Organizations may have more than one (1) alternate site. In some cases, alternate sites may involve facilities that are used for normal day-to-day operations but which are able to accommodate additional business processes when a primary location becomes inoperable. Examples of alternate sites include relocation and disaster recovery sites, whether managed directly or maintained by a third party for a BSFI or for use by multiple organizations.
- b. *Business continuity* shall refer to a state of continued, uninterrupted operation of a business.
- c. *BCM* shall refer to an enterprise-wide framework encompassing policies, standards, facilities, personnel and practices that provides for continuous functioning of the institution during disruptions. It is proportionate to the BSFI's internal and external risk exposures and tailored to the nature, scale, and complexity of its business.
- d. *Business continuity plan (BCP)/plan* shall refer to a documented plan detailing the orderly and expeditious process of recovery, resumption, and restoration of business functions in the event of disruptions. It should be able to cover and establish linkages among its multiple components, such as communication plan, crisis management plan, contingency funding plan, and technology recovery plan.
- e. *Business impact analysis (BIA)* shall refer to the process of identifying and measuring (quantitatively and qualitatively) the business impact or loss of business processes in the event of a disruption. It is used to identify recovery priorities, recovery resource requirements, essential staff, and dependencies (internal and external) to be incorporated in the plan.
- f. *Crisis* shall refer to a situation that requires urgent action due to its disruptive impact on the BSFI's core activities or business and operating environment.
- g. *Crisis management plan (CMP)* shall refer to a documented plan detailing the actions to be taken when a crisis strikes a BSFI and designed to maintain order amidst the confusion surrounding such situations. During and immediately after a crisis, the members of the crisis management team will convene and activate the plan to attain control over the crisis and minimize its impact to operations.
- h. *Critical process* shall refer to any activity, function or service, which when lost would materially affect the continued operation of the BSFI.
- i. *Cyber resilience* shall refer to an organization's ability to anticipate, handle, adapt to, and/or recover from evolving cyber threats.
- j. *Events* shall refer to disruption scenarios such as loss of people, technology, alternate site, and service providers.
- k. *Pandemic* shall refer to epidemics or outbreaks in humans of infectious diseases that have the ability to spread rapidly over large areas, possibly worldwide.

¹ BSFIs shall comply with the foregoing standards on BCM within a period of one (1) year from 11 April 2017. In this regard, a BSFI should be able to show its plan of actions with specific timelines, as well as the status of initiatives being undertaken to fully comply with the provisions of Sec. 146-S starting July 2017, upon request of the Bangko Sentral.

- l. *Recovery point objective (RPO)* shall refer to acceptable amount of data loss should a disruption occur without severe impact on the recovery of operations.
- m. *Recovery time objective (RTO)* shall refer to the period of time following an incident within which a product, system or business process must be resumed or resources must be recovered.
- n. *Resilience* shall refer to the ability of an organization to anticipate, handle, adapt to and/or recover from a disruption and resume operations.
- o. *Risk assessment* shall refer to the process involving the identification and assessment of potential threats and vulnerabilities that could severely interrupt a BSFI's business activities and the corresponding likelihood and magnitude of impact on business processes.
- p. *Technology recovery plan (TRP)/Disaster recovery plan (DRP)* shall refer to a documented plan detailing the technology strategy and requirements during recovery for business and support functions. The relevant regulations are in Item "3.3.2.13" of Appendix Q-64.

Roles and responsibilities.

- a. *Board of directors and senior management.* The BSFI's board and senior management are responsible for overseeing the implementation of a sound BCM process, which involves the creation and promotion of an organizational culture that places high priority on business continuity. This should be reinforced by providing sufficient financial and human resources associated with the BSFI's business continuity initiatives. Senior management should establish BCM policies, standards, and processes, which must be duly endorsed to and approved by the board.

Awareness training and periodic reporting to board and senior management on matters related to business continuity are equally important to ensure their continuing commitment and support. At a minimum, periodic management reports should include the following: (a) implementation status of the BCP; (b) incident reports; (c) plan test results; (d) changes to the plan; and (e) related action items to strengthen the BSFI's ability to recover during disruptions.

- b. *BCM coordinator/unit.* Coordination and supervision of all business continuity activities should be assigned to a competent individual and/or unit with technical knowledge and experience consistent with the nature and complexity of the BSFI's business activities. A complex¹ BSFI may need a BCM unit with a team of departmental liaisons throughout the organization. For a simple BSFI, an individual BCM coordinator may suffice. While the BCM coordinator/unit may recommend initiatives or activities to be prioritized, the board and senior management are ultimately responsible for understanding the critical business processes and subsequently establishing plans to meet business process requirements in a safe and sound manner.
- c. *BSFI personnel.* BSFI personnel should understand their roles and responsibilities on the prevention of crisis and recovery of business operations during disruptions. Business and support functions should allocate responsibilities for managing disruptions and provide clear guidance regarding the succession of authority to account for unavailability of key personnel in the event of a disruption.
- d. *Audit.* An independent review of the BSFI's BCM framework and corresponding plans should be periodically performed with frequency based on a sound risk assessment process. This is to ensure that significant policy revisions resulting from changes in the operating environment, lessons learned from plan tests, and internal and regulatory audit recommendations have been considered. Moreover, plan testing exercises should be independently observed, verified, and evaluated to ensure reasonableness and validity of the testing process and the accuracy of test results.

Business continuity management framework. BSFIs should adopt a cyclical, process-oriented BCM framework, which, at a minimum, should include five (5) phases, namely: BIA and risk assessment, strategy formulation, plan development, plan testing, and personnel training and plan maintenance. This framework represents a continuous cycle that should evolve over time based on changes in business and operating environment, audit recommendations, and test results. This framework should cover each business function and the technology that supports it. Other related policies, standards, and processes should also be integrated in the overall BCM framework.

¹ Pursuant to Sec. 147-Q, BSFIs are classified as "simple" but maybe re-classified as "complex" depending on extent or degree of reliance of core business functions or technology.

Figure 1. Business Continuity Management Process

- a. **Business impact analysis and risk assessment.** A comprehensive BIA and risk assessment should be undertaken to serve as the foundation in the development of the plan. The BIA entails determining and assessing the potential impact of disruptions to critical business functions, processes, and their interdependencies through work-flow analyses, enterprise-wide interviews, and/or inventory questions. Accordingly, the BSFI should determine the recovery priority, RTO, RPO, and the minimum level of resources required to ensure continuity of its operations consistent with the criticality of business function and technology that supports it. The BSFI should then conduct risk assessment incorporating the results of the BIA and evaluating the probability and severity of a wide-range of plausible threat scenarios in order to come up with recovery strategies that are commensurate with the nature, scale, and complexity of its business functions.

Domestic systemically important banks (D-SIBs). To minimize the extent or impact of a D-SIB's failure in the financial system, BSFI identified as D-SIBs by the Bangko Sentral, pursuant to Sec. 126-Q (*Domestic systemically important banks*), should set the RTO for each of their critical processes to a maximum of four (4) hours from the point of disruption. For non-D-SIB BSFI, the RTO of critical processes should be primarily driven by their BIA and risk assessment.

- b. **Strategy formulation.** Recovery and resumption strategies to achieve the agreed time-frame and deliver the minimum required services as identified in the BIA should be defined, approved, and tested. The minimum requirements for the provision of essential business and technology service levels during disruptions should be established by concerned business and support functions.
 - (1) **Recovery strategy.** As business resumption relies primarily on the recovery of technology resources, adequate provisions should be in place to ensure systems availability and recoverability during disruptions as prescribed under *Appendix Q-64*. Recovery strategies should be able to meet the agreed requirements between business units and support functions for the provision of essential business and technology service levels.
 - (2) **Continuity of operations/business resumption strategy.** The business continuity models adopted by the BSFI to handle prolonged disruptions should be based on the risk assessment of its business environment and the characteristics of its operations. The resumption strategies and resource requirements should be approved by the board as recommended by senior management or the relevant board committees to ensure alignment with corporate goals and business objectives.
- c. **Plan development.** Plans are an important, tangible evidence of the BSFI's business continuity initiatives. The objective of the plan is to provide detailed guidelines and procedures on response and management of a crisis, recovery of critical business services and functions and to ultimately resume to normal operations. The plan should be formulated on an enterprise-wide basis, reviewed and approved by the board and senior management at least annually and disseminated to all concerned employees. The plan should include provisions for both short-term and prolonged disruptions.

A well-written plan should describe the various types of events or scenarios that could prompt BCP activation. It should include, at a minimum, the following components:

- (1) Escalation, declaration and notification procedures;

- (2) Responsibilities and procedures to be followed by each continuity or recovery teams and their members. The procedures should enable the BSFI to respond swiftly to a crisis (i.e., a crisis management plan) and to recover and resume the critical processes outlined in the plan within the stipulated time frame during disruptions;
- (3) A list of resources required to recover critical processes in the event of a major disruption. This would include, but not limited to: (a) key recovery personnel; (b) computer hardware and software; (c) communication systems; (d) office equipment; and (e) vital records and data;
- (4) Relevant information about the alternate and recovery sites; and
- (5) Procedures for restoring normal business operations. This should include the orderly entry of all business transactions and records during disruption into the relevant systems up to completion of all verification and reconciliation procedures.

Communication is a critical aspect of a BCP. In this respect, the BSFI should include a communication plan for notifying all relevant internal and external stakeholders (e.g., employees, customers, vendors, regulators, counterparties, and key service providers, media and the public) following a disruption. The BSFI should maintain an up-to-date call tree and contact list of key personnel and service providers, including communication flow and channels for internal and external stakeholders. Clear and effective communication will facilitate escalation for appropriate management action and instruction to all concerned and help manage reputation risks. The BSFI should consider alternate methods of communication and preparation of pre-determined messages tailored to a number of plausible disruption scenarios to ensure various stakeholders are timely, consistently, and effectively informed.

A crisis management plan should be included in the BCP to assist senior management in dealing with and containing an emergency and avoid spillover effects to the business. Senior management should identify potential crisis scenarios and develop corresponding crisis management procedures. This includes identifying a mix of individuals from various departments who are authorized to make instantaneous decisions during crisis situations. This team shall be responsible for the actual declaration of an event, activation of the plan, and internal and external communication process.

When outsourcing plan development, management should ensure that the chosen service provider has the expertise required to analyze the business needs of the BSFI and that the arrangement conforms with legal and regulatory requirements. The service provider should be able to design executable strategies relevant to the BSFI's risk environment and design education and training programs necessary to achieve successful BCP deployment.

d. *Plan testing*

- (1) *Types of testing methods.* Plan testing is a vital element of the BCM. It ensures that the plan remains accurate, relevant, and operable. Tests should be conducted periodically, with the nature, scope, and frequency determined by the criticality of the applications, business processes, and support functions. In some cases, plan tests may be warranted due to changes in BSFI's business, responsibilities, systems, software, hardware, personnel, facilities, or the external environment.

Testing methods can vary from simple to complex each bearing its own characteristics, objectives, and benefits. Types of testing methods in order of increasing complexity include:

- (a) *Tabletop exercise/structured walk-through test* – the primary objective is to ensure that critical personnel from all areas are familiar with the plan and that it accurately reflects the BSFI's ability to recover from a disruption.
- (b) *Walk-through drill/simulation test* – similar to a tabletop exercise but with a more focused application. During this test, participants choose a specific scenario to which relevant plan provisions shall be applied.
- (c) *Communication/call tree test* – an exercise that validates the capability of crisis management teams to respond to specific events and the effectiveness of the call tree notification process in disseminating information to employees, vendors, and key clients.
- (d) *Alternate site test/exercise* – tests the capability of staff, systems, and facilities, located at alternate sites to effectively support production processing and workloads.
- (e) *Component test/exercise* – A testing activity designed to validate the continuity of individual systems, processes, or functions, in isolation.
- (f) *Functional drill/parallel test* – test to determine capability of alternate site and BSFI employees to support strategy as defined in the plan, which involves actual mobilization of personnel, establishing communications, and recovery processing.

- (g) *Enterprise-wide full-interruption/full-scale test* – the most comprehensive type of test encompassing the entire organization and requires activation of all the components of the plan at the same time to simulate a real-life emergency and processing data and transactions using back-up media at the recovery site.
- (2) *Test policy/plan*. Testing should be viewed as a continuously evolving cycle. The BSFI should incorporate the results of BIA and risk assessment and work towards a testing strategy that increases in scope and complexity to address a variety of threat scenarios. Test scenarios should vary from isolated system failures to wide-scale disruptions and promote testing its primary and alternate facilities, as well as with key counterparties and third-party service providers.

A testing policy should define roles and responsibilities for the implementation and evaluation of the testing program. Test plans with pre-determined goals and test criteria should be developed for each testing activity. It should clearly define the objectives of testing, identify the functions, systems, or processes to be tested and the criteria for assessing what constitutes a successful test. Formal testing documentation (i.e., test plans, test scenarios, test procedures, test results) should be prepared to ensure thoroughness and effectiveness of testing and properly maintained for audit and review purposes.

- (3) *Annual enterprise-wide business continuity testing*. The BSFI must conduct an enterprise-wide business continuity test at least annually, or more frequently depending on changes in the operating environment, to ensure its plan's relevance, effectiveness, and operational viability. The scope of testing should be comprehensive to cover the major components of the plan as well as coordination and interfaces among important parties.
 - (4) *Analysis and report of test result*. Plan tests, including successes, failures, and lessons learned, should be thoroughly analyzed to promote continuous BCM improvement. Exceptions noted should be documented and corrective actions should be closely monitored to ensure that they are implemented in a timely manner by concerned parties, including the board and senior management, business line management, risk management, IT management, and other internal stakeholders.
- e. *Personnel training and plan maintenance*.
- (1) *Training Program*. A business continuity training program should be provided to all concerned employees to promote awareness, familiarity, and understanding of their roles and responsibilities in the event of a disruption. The training program should be offered on a continuing basis for existing and new employees and should be updated to address changes to the plan.
 - (2) *Plan maintenance*. Plans and results of BIA and risk assessment should be reviewed and updated on an ongoing basis (at least annually or when necessary) so that they remain consistent with the BSFI's current operations and business strategies. BCM-related documents (i.e., BCP, test program, policy guidelines, and program requirements) should be subject to change management process to ensure these are updated with proper approval and documentation with respect to any significant changes in the business environment or as a result of audit findings.

Other policies, standards and processes. The following policies, standards and processes should be integrated into the BCM process:

- a. *Pandemic planning*. Similar to natural disasters or technical disruptions, pandemics may also interrupt a BSFI's business activities. However, the difficulty in determining a pandemic's scope and duration present additional challenges in ensuring resilience and continuity of a BSFI's operations.

Generally, pandemic plans are integrated in the BSFI's BCP and follow the same BCM process with additional considerations, such as:

- (1) *Business impact analysis and risk assessment*. The BCM process should consider pandemics as early as the BIA and risk assessment phase. The BIA and risk assessment should be updated to incorporate complexities that may arise from pandemics, such as (1) increasing level of absenteeism based on a pandemic's severity; and (2) the need for another layer of contingency plans as regular disaster or emergency response methods are no longer feasible.
- (2) *Strategy formulation*. To complement strategies for natural and technical disruptions, the following should be given due consideration when planning for pandemics:
 - (a) *Trigger events* – Trigger events and strategies should be defined depending on the nature of a pandemic. Pandemic planning should have the flexibility to accommodate varying degrees of epidemic or outbreak as pandemics normally occur in waves or phases and of varying severity.

- (b) *Remote access capability* – In the event of a pandemic, enabling remote access may be one of the primary strategies available to a BSFI. To support a telecommuting strategy, the BSFI should ensure adequate capacity, bandwidth and authentication mechanisms in its technological infrastructure against expected network traffic or volume of transactions.
 - (c) *External parties* – With pandemics not limited to the BSFI, establishing working relationships with external parties is an essential component. In addition to the communication plan for all relevant internal and external stakeholders, the BSFI should establish open relationships and communication channels with local public health and emergency response teams or other government authorities. The BSFI should inform concerned parties of any potential outbreaks and, at the same time, be aware of any developments in the expected scope and duration of a pandemic.
 - (d) *Employee awareness* – As information becomes available from reputable sources or local agencies, the BSFI should ensure that steps to limit or reduce the risk of being affected by the pandemic are cascaded to its employees.
- (3) *Plan development.* Pandemic plans should be commensurate to the nature, size and complexity of a BSFI's business activities and have sufficient flexibility to address the various scenarios that may arise. At a minimum, the pandemic plan should include:
- (a) Strategy that is scalable dependent on the extent and depth of the outbreak;
 - (b) Preventive measures, including monitoring of current environment and hygiene tools available to employees;
 - (c) Communication plan with internal and external stakeholders, including concerned local public health teams and government agencies; and
 - (d) Tools, systems and procedures available to ensure continuity of its critical operations even with the unavailability of BSFI's staff for prolonged periods.
- (4) *Plan testing.* Test policy/plan should include strategies to assess capability to continue critical operations, systems and applications even in the event of a severe pandemic. When regular tests are unable to cover pandemic scenarios, separate pandemic plan tests should be carried out.
- (5) *Personnel training and plan maintenance.* The plan should be updated as developments and information become available. As needed, employee training programs should cover pandemic risks, including the roles and responsibilities of each employee during pandemic situations.
- b. *Cyber resilience.* Cyber-threats and attacks against the financial services industry have become increasingly widespread, sophisticated and coordinated. Recent cyber-attacks worldwide highlight, not only the degree of disruption to a BSFI's operations, but also the extent of reputational damage which could undermine public trust and confidence. As such, the BSFI should consider the potential impact of these cyber events into its BCM process and institute adequate cyber resilience capabilities.
- Given the unique characteristics of cyber-threats and attacks, traditional back-up and recovery arrangements adopted by the BSFI may no longer be sufficient and even increase the damage to the BSFI's network, operations and critical information assets. In worst case scenarios, back-up systems and alternate recovery sites are likewise affected rendering both sites inoperable. To ensure cyber resilience, the BSFI should take into consideration a wide-range of cyber-threat scenarios perpetrated from diverse threat sources (e.g., skilled hackers, insiders, state-sponsored groups) which seek to compromise the confidentiality, availability and integrity of its information assets and networks. Defensive strategies and innovative recovery arrangements should be explored that are commensurate with the BSFI's cyber-security risk exposures and aligned with its information security program in accordance with *Appendix Q-62*.
- c. *Information security.* Mitigation strategies should consider security controls to manage risks that may arise once an event triggers plan activation. Security during disasters and disruptions is an important consideration to manage risks arising from the change in working environment. The relevant guidelines/standards on information security that may be considered in strategy formulation and/or in choosing alternate sites are in *Appendix Q-62*.
 - d. *Interdependencies.* An effective plan coordinates across its many internal and external components, identifies potential process or system dependencies, and mitigates risks from interdependencies. The BSFI may have very complex operating and recovery environment wherein interdependencies need to be duly considered, such as telecommunications, third party service providers, and recovery site. Given the critical resources and services that are being shared with the BSFI or other entities, additional mitigating controls and recovery strategies need to be integrated in the plan.
 - e. *Liquidity risk management.* Sound liquidity risk management practices enable a BSFI to maintain availability of funds even in times of financial stress or adverse changes in market conditions. In the event of a business disruption, sound liquidity risk management practices should similarly apply. The BSFI should ensure it has

sufficient liquidity to support its recovery strategies and continue supporting the delivery of basic banking services to the clients pending full business resumption. Guidelines on liquidity risk management are in *Appendix Q-43*.

- f. *Project management.* Senior Management should ensure that availability and business continuity requirements are considered at the planning and development stages of new business products and services and other critical technology processes, such as systems development and acquisition, and change management.
- g. *Event/problem management.* Operations personnel should be properly trained to recognize events that could trigger implementation of the plan. Although an event may not initially activate the plan, it may become necessary as conditions and circumstances change. Management should train and test BSFI personnel to implement and perform appropriate business continuity procedures within the timeframes of the plan.
- h. *Outsourcing.* When a BSFI enters into an outsourcing arrangement, it should put due consideration on the business continuity and disaster recovery arrangements of the service provider to ensure continuity of operations. Detailed guidelines/standards on business continuity considerations for outsourcing arrangements are in *Appendix Q-65*.
- i. *Insurance.* Insurance is an option available to a BSFI for recovery of losses that cannot be completely prevented and the expenses related to recovering from a disruption. The BSFI should regularly review the adequacy and coverage of its insurance policies in reducing any foreseeable risks caused by disruptive events, such as loss of offices, critical facilities and equipment, and casualty. Insurance policies may also need to address the BSFI's legal responsibilities for failing to deliver services to its customers and counterparties. To facilitate the claims process, the BSFI should create and retain a comprehensive hardware and software inventory list in a secure off-site location and detailed expenses should be documented to support insurance claims.

Supervisory enforcement actions. BSFIs should make available all policies and procedures and other documents/information related to the foregoing during on-site examination as well as provide copies thereof to the regulator when a written request is made to determine compliance.

Consistent with Sec. 002-S, the Bangko Sentral may deploy enforcement actions to promote adherence with the requirements set forth in this Section and bring about timely corrective actions. The Bangko Sentral may issue directives to improve the BCM process, or impose sanctions to limit the level of or suspend any business activity that has adverse effects on the safety and soundness of the BSFI, among others. Monetary and non-monetary sanctions, as provided under existing laws, Bangko Sentral rules and regulations, may likewise be imposed on a BSFI and/or its directors, officers and/or employees for violation of this Section.

(Circular Nos. 1051 dated 27 September 2019 and 951 dated 20 March 2017)

147-S SOCIAL MEDIA RISK MANAGEMENT¹

Social media, a low-cost solution capable of disseminating real-time information via the internet, presents vast opportunities for growth, customer engagement and business benefits as usage, customer reach and adoption scale up and become widespread and ubiquitous. Considering these potential benefits alongside exponential growth in the number of social media users and its massive reach, BSFIs have started to leverage on social media platform/s to promote their business and improve customer interaction experience to help drive business objectives/strategies.

Similar to any new technology, however, social media introduces a new attack vector which may expose BSFIs to compliance, legal, reputational, strategic, and operational risks. Risks in social media include susceptibility to account take-over, malware distribution, brand bashing, inadvertent disclosure of sensitive information and privacy violation, among other possible threats. As such, BSFIs should adopt an appropriate risk management system, commensurate to the extent and degree of their social media usage, to effectively identify, measure, manage and monitor risks arising from the use of social media platforms. This should form an integral part of their operational risk management system.

Applicability and scope. The guidelines underscore the importance of having a well-defined social media risk management strategy in supporting BSFI's overall business goals and objectives. These guidelines align existing regulations, to the extent possible, with leading standards and recognized principles. They outline the minimum standards/basic principles that shall govern the BSFI's framework to aid in the sound management of risks associated with the use of social media for official purpose or employees' personal use, within and outside the organization.

It is not intended to provide procedural specifics or a "one-size-fits-all" solution for carrying out compliance and risk management responsibilities. Each BSFI is therefore expected to establish its own risk management strategy; suitable to its size, risk tolerance level, and the nature and scope of social media activities engaged in.

¹ BSFIs shall comply with the foregoing standards on social media risk management within a period of six (6) months from 04 April 2017. In this regard, a BSFI should be able to show, upon request of the Bangko Sentral, its plan of actions with specific timelines, as well as the status of initiatives being undertaken to fully comply with the provisions of this Section.

The guidelines shall apply to all BSFIs which include banks, NBQB, non-bank electronic money issuers, and other non-bank institutions which under existing Bangko Sentral rules and regulations and special laws are subject to Bangko Sentral supervision and/or regulation.

Definition of terms. In these guidelines, terms are used with the following meanings:

- a. *Attack vector* shall refer to the path or means by which an attacker can gain access to a computer system in order to deliver a malicious code (e.g., virus, worms, trojans).
- b. *Non-technical controls* shall refer to management, administration, and operational controls employed that are manual and procedural in nature (e.g., security-related policies and procedures; operational procedures; personnel, physical, and environmental security controls; performance management and measurement).
- c. *Risk assessment* shall refer to the process involving the identification and assessment of potential threats and vulnerabilities related to the use of social media and determination of the likelihood that the threat will occur as well as the corresponding impact to the business should the threat occur.
- d. *Social media* shall refer to online communication channels dedicated to community-based content generation and sharing, interaction, and collaboration.
- e. *Social media platform* shall refer to any form of interactive communication medium wherein users can generate and disseminate content (e.g., text, images, audio, video) through social networks using the internet. Examples of popular social media platform categories include the following:
 - (1) Social networking (e.g., Facebook, LinkedIn)
 - (2) Micro-blogging (e.g., Twitter, Tumblr)
 - (3) Blogging (e.g., Wordpress, Blogger)
 - (4) Photo Sharing (e.g., Flickr, Instagram, Pinterest)
 - (5) Video Sharing (e.g., Youtube, Vimeo, Vine)
 - (6) Crowdsourcing (e.g., Ushahidi, Inc.)
- f. *Technical controls* shall refer to the controls incorporated into the computer hardware, software, or firmware to aid in the effective implementation of policies and standards (e.g., access control, authentication, web scanner/crawler).

Social media risk management system. BSFIs should establish an appropriate framework that will result in sound social media governance and risk management. At a minimum, the framework shall include the following elements:

- a. Clearly defined governance structure indicating the roles and responsibilities of the board of directors and senior management in setting the direction on the BSFI's use of social media, including its alignment to the BSFI's strategic goals/plans; establishing adequate standards, policies, procedures, and controls; and implementing ongoing risk assessment of social media-related activities.

The board of directors shall be primarily responsible for defining the BSFI's risk tolerance level, understanding the nature and degree of risks the BSFI will be exposed to, and ensuring that these risks are properly addressed. Moreover, the board of directors, as part of its duties, shall approve and oversee the design and implementation of the social media strategy; related standards, policies and procedures; and means to ensure compliance with said standards and/or policies as well as applicable laws and regulations. Senior management, on the other hand, shall be responsible for the implementation of the social media risk management system approved by the board of directors.

The governance process should also include reporting mechanisms to the board of directors and/or senior management to enable periodic evaluation of the effectiveness of the BSFI's social media strategy/program, in terms of achieving its stated objectives, and measures put in place to manage the risks related to its use.

- b. Policies and procedures governing the following, among others:
 - (1) Scope and definition of social media;
 - (2) Social media regulatory landscape reflecting applicable laws, rules and regulations for compliance;
 - (3) Individuals and/or composition of the team/s who will be responsible for the creation, maintenance, and monitoring of the BSFI's proprietary social media sites/pages. Their corresponding roles and accountabilities should also be clearly defined;
 - (4) Content management and approval process;

- (5) Ongoing assessment, management, and monitoring of risks associated with social media-related activities;
 - (6) Acceptable use as well as prohibitions/restrictions on the business/official use of social media platforms. These guidelines shall likewise apply to the employees¹ personal use of social media, insofar as it may impact the BSFI's operations, reputation and/or compliance with applicable laws and regulations. These should cover matters such as, but not limited to, expectations, ethical behavior, types/nature and extent of BSFI and/or customer-related information that can be posted, statements that can or cannot be made about or in behalf of the institution, comments that should not be made about a competitor, and corresponding sanctions/penalties for inappropriate use of social media and committing non-permissible activities;
 - (7) Use and monitoring of the BSFI's proprietary social media sites/pages to ensure compliance with applicable laws, regulations and internal policies;
 - (8) Monitoring and recording of suspicious transactions and customer activities on the BSFI's proprietary social media sites/pages;
 - (9) Adoption of technical and non-technical controls to address risks associated with the use of social media platform/s including methodologies to manage risks from online postings, edits, replies and retention;
 - (10) Due diligence process for selecting, managing and continuous monitoring of third-party service providers (TSP) that administer the BSFI's social media site(s)/page(s). In addition, the specific roles and responsibilities of the TSP, including liabilities and accountabilities for errors, omissions, fraud, and other instances, resulting from the TSP's actions, which may adversely affect the BSFI, should also be defined;
 - (11) Social media crisis management plan and escalation procedures;
 - (12) Enterprise-wide employee training and awareness programs covering relevant topics such as the BSFI's social media use policies, employee roles and responsibilities and non-permissible activities;
 - (13) Records retention of social media data; and
 - (14) Communication of the BSFI's official social media sites/pages to its customers to avoid confusion and being misled to unofficial sites.
- c. Specific roles and responsibilities of the risk management, consumer protection, audit and compliance functions to ensure that social media risks are adequately managed and integrated in the BSFI's enterprise-wide risk management systems.

BSFIs that do not utilize social media should nevertheless have clear policies and measures in place to address the potential reputation risks that may arise within the various social media platforms and provide guidance on employee use of social media.

Compliance with relevant regulations. BSFIs, in formulating and implementing their social media policies, should ensure compliance with the applicable requirements of Bangko Sentral rules and regulations on financial consumer protection, especially those relating to disclosures and transparency in advertising and promotional materials, protection of client information, effective recourse, and financial education and awareness. They should likewise conform with the relevant provisions of Bangko Sentral outsourcing framework should they decide to outsource the conduct of social media-related activities to a service provider.

The use of social media platforms, including information gathered therein, for the conduct of account origination activities should comply with applicable rules and regulations, especially on the provisions relating to customer identification procedures under the existing anti-money laundering rules and regulations. In the event that BSFIs opt to use social media for processing financial transactions, the applicable Bangko Sentral rules and regulations on electronic payment and financial services and technology risk management should likewise be observed to ensure security, reliability and authenticity of such transactions.

The regulations mentioned herein are not exhaustive. It is the BSFI's responsibility to ensure that all applicable laws and regulations relevant to the activities it will choose to engage in using social media will be adequately complied with. Moreover, the BSFI is expected to stay abreast of and continuously adapt to changes in the regulatory requirements.

Supervisory enforcement actions. BSFIs should make available all policies and procedures and other documents/information related to the foregoing during the on-site examination as well as provide copies thereof when a written request is made to determine compliance.

¹ Include the BSFI's employees, contractual employees and/or project hires, and third-party service providers.

Consistent with Sec. 002-S, the Bangko Sentral may deploy enforcement actions to promote adherence with the requirements set forth in this Section and bring about timely corrective actions. The Bangko Sentral may issue directives to improve the social media risk management system or impose monetary and non-monetary sanctions on a BSFI and/or its directors, officers and/or employees.

(Circular Nos. 1033 dated 22 February 2019 and 949 dated 15 March 2017)

150-S CREDIT RISK MANAGEMENT; POLICY STATEMENT

It is the policy of the Bangko Sentral to ensure that NSSLAs under its supervision have adequate and effective credit risk management systems commensurate to their lending operations. Towards this end, the following guidelines on credit risk management set forth the expectations of the Bangko Sentral with respect to the comprehensive management of credit risk. The guidelines convey the principles and sound practices that shall be embedded in the credit risk management framework of NSSLAs and shall cover the following areas:

- a. establishing an appropriate credit risk environment;
- b. operating under a sound credit granting process; and
- c. maintaining appropriate credit administration, measurement, monitoring and control processes over credit risk.

While NSSLAs may employ different approaches in the management of their credit risk, the Bangko Sentral expects that all these areas are effectively addressed.

Evaluation of credit risk management system. The Bangko Sentral shall evaluate the NSSLAs' credit risk management systems. It will not restrict the credit risk-taking activities of NSSLAs: *Provided*, That extension of credit is made to eligible members and credit risk is effectively managed. Consistent with the credit risk management guidelines, the Bangko Sentral expects that an NSSLA:

- a. Understands, identifies, measures, monitors and controls all risks attendant to the NSSLA's credit risk-related activities;
- b. Adopts a credit risk management system that provides assurance to the members, other stakeholders and the supervisory authority that good quality of the credit portfolio is maintained and that the NSSLA operates in a safe and sound manner; and
- c. Maintains capital commensurate with the risk exposure assumed.

Otherwise, the Bangko Sentral may direct the NSSLAs to reduce its exposure to an appropriate level and/or to strengthen its risk management system.

In evaluating the above parameters, the Bangko Sentral shall consider the following factors:

- a. The NSSLA's business strategies, operating environment and the competencies of its trustees, officers and personnel; and
- b. The major sources of the NSSLA's credit risk exposure and the complexity and level of risk posed by the assets and liabilities.

A. Establishing an Appropriate Credit Risk Environment

Role of the Board and Senior Management

- a. **Board of Trustees.** The board of trustees shall ensure that it fully understand all the risks attendant to the NSSLA's credit activities and shall be responsible for the approval and regular review of credit risk strategy and credit policy, as well as the oversight of the implementation of a comprehensive and effective credit risk management system appropriate for the size, complexity and scope of operations of an NSSLA. The board shall ensure that the system provides for adequate policies, processes and procedures to identify, measure, monitor and control all credit risks inherent in an NSSLA's products and activities, both at the individual and portfolio levels on a consistent and continuing basis; and that an independent assessment of the system is periodically performed, the results of which shall be reported to it or to a board-level committee for appropriate action.
- b. **Senior Management.** Senior management shall be responsible for ensuring that the credit risk-taking activities of an NSSLA are aligned with the credit risk strategy approved by the board of trustees. It shall also be responsible for developing and implementing an NSSLA's credit policies and procedures that lay down the conditions and guidelines for an effective credit risk management process, as well as proper channels of communication to ensure that these policies are clearly communicated and adhered to by all levels within the NSSLA.

NSSLAs shall conduct their lending operations with independence and fairness relative to their dealings with members, agents and entities employing their members or paymaster/cashier/treasurer of such entities, as the case may be.

For new products and activities, the board of trustees and senior management shall ensure that it fully understand the risk involved therein and put in place adequate policies, procedures and controls to identify, measure, monitor and manage risks before being introduced or undertaken.

Credit risk management structure. Senior management or an appropriate level of management shall implement a board-approved credit risk management structure that clearly delineates lines of authority, and establishes accountabilities and responsibilities of individuals involved in the different phases of the credit risk management process.

Depending on the size, complexity and scope of credit activities, and in addition to the roles and responsibilities of the board and senior management, an NSSLAs' credit risk management organization may be broadly classified into the following functional lines of activities to properly segregate accountabilities, ensure that no individual is assigned conflicting responsibilities, and effectively monitor and control the risks being taken:

- a. Front Office: credit origination, classification, provision of allowances for losses including changes thereon, when necessary and the monitoring of credit exposures of member-borrowers on a day-to-day basis;
- b. Back Office: credit administration, including, among others: ensuring complete documentation, credit disbursement and recording of payments received; maintenance of credit and collateral files; and compilation of management information reports; and
- c. Middle Office: credit review, problem loan management, and risk management/control.¹

The structure shall likewise provide for independent audit of the credit risk management system of the NSSLAs. The scope of internal audit shall include, among others, the evaluation of the independence and overall effectiveness of the credit review function.

For simple NSSLAs²: (1) the problem loan management function may still be performed by the credit originating function and/or unit responsible for monitoring the quality of such credit; and (2) the independent credit review function may be concurrently performed by qualified personnel fulfilling other independent control oversight functions (e.g., compliance, internal audit).

All personnel or staff involved in the credit risk management process shall be qualified, competent and have the necessary training and experience to exercise prudent judgment in assessing, managing and/or controlling credit risk, and a solid understanding of an NSSLAs' strategic direction, policies, procedures, risk tolerance and limits. Their qualification standards, roles and responsibilities shall be clearly defined in the credit operating policies and procedures manual of the NSSLAs. The board and senior management shall ensure that adequate resources and appropriate level of staffing are allocated to execute all kinds of credit activities.

Credit policies, processes and procedures. NSSLAs shall have in place sound, comprehensive and clearly defined credit policies, processes and procedures consistent with prudent standards, practices, applicable laws and relevant regulatory requirements adequate for their size, complexity and scope of operations. The board-approved policies, processes and procedures shall cover all phases of the credit risk management system.

The credit policy shall:

- a. Articulate the credit culture which reflects the NSSLAs' values, beliefs and behaviors;
- b. Be periodically reviewed and changes thereon must be approved by the board; and
- c. Have appropriate line of accountability.

These policies, processes and procedures shall be documented in sufficient detail, and periodically reviewed and updated to take into account new activities and products, as well as new lending approaches. To promote constant awareness and guidance within the NSSLAs, these shall be communicated and disseminated to all levels of the NSSLAs.

B. Operating Under a Sound Credit Granting Process

Credit granting and loan evaluation/analysis process and underwriting standards. Consistent with safe and sound lending practice, NSSLAs shall grant credit to eligible members in allowable amounts and periods of time, and after ascertaining that the member-borrowers are capable of fulfilling their commitment to the NSSLAs. Towards this end, an NSSLAs shall establish well-defined credit-granting criteria and underwriting standards, which shall duly consider the purpose and structure of the credit, source of repayment and collection cycle.

¹ The risk management function shall report directly to the Risk Management Committee (RMC) or appropriate board-level committee or the board.

² Simple NSSLAs shall refer to NSSLAs which, due to operational limitations, are not classified as Complex NSSLAs. Complex NSSLAs shall refer to institutions declared by the Bangko Sentral as such with total assets of at least P5 billion and having at least any one (1) of the following characteristics: (1) Extensive membership base such as those which membership extends to employees/retirees of two or more companies/agencies/institutions, and/or their relatives, and/or with serious issue on the "well-defined" group requirement under R.A. No. 8367 (Revised NSSLAs Act of 1997); or (2) Use of non-conventional business model, such as those using non-traditional delivery platform such as electronic platforms and agents.

An NSSLA shall conduct its credit assessment in a holistic and prudent manner, taking into account all relevant factors that could influence the prospect for the loan to be repaid according to its terms and conditions. This shall include an appropriate consideration of the member-borrowers' existing debt obligations with the NSSLA and other financial institutions/credit granting entities and repayment history, as well as an assessment of whether the loan can be expected to be repaid without causing undue hardship and over-indebtedness. NSSLAs shall ensure that their credit policies and underwriting standards still consider reasonable cost of living, while the terms and conditions of the loans do not prejudice members' welfare.

NSSLAs shall factor into their credit-granting decisions, the likelihood of providing allowance for credit losses and holding adequate capital to absorb unexpected losses for credits with apparent weaknesses.

NSSLAs may utilize collaterals (e.g., real estate, capital contribution, deposits), and other financial instruments (e.g., insurance) to help mitigate risk in credit exposures. However, these shall not substitute for a comprehensive assessment of the member-borrower's creditworthiness or fully compensate for insufficient information. NSSLAs shall establish:

- a. adequate policies in determining the acceptability of various forms of credit risk mitigants and appropriate collateral value limits;
- b. procedures for regularly assessing the value of physical collaterals and availability of financial guarantees; and
- c. a process to ensure that said collaterals are, and continue to be, enforceable, realizable and marketable.

Credit approval process. The approval process for new credits as well as the amendment, renewal and restructuring of existing credit exposures shall be aligned with the credit risk management structure and clearly articulated in an NSSLA's written credit policy. It shall also include an escalation process where approval for restructuring of credits, policy exceptions or excesses in internal limits, is escalated to units/officer with higher authorities, as approved by the board of trustees.

The said policies must also cover the escalation processes and procedures, including approving authorities, in resolving cases of re-billing and handling of accounts falling under extra-ordinary circumstances that may adversely affect the quality of the individual loan account and total loan portfolio.

Renewal. NSSLAs shall put in place policies and procedures on renewal of loans. A loan renewal shall supersede the original loan. Credits and other accommodations shall only be renewed:

- a. Upon re-establishment of the creditworthiness of the borrower using the same credit-granting criteria for the evaluation and approval of new loans; and
- b. When the corresponding accrued interest receivable has been paid.

C. Maintaining an Appropriate Credit Administration Process

Credit Administration. NSSLAs shall have in place a system for the ongoing administration of their various credit portfolios. Credit administration refers to activities that support and control extension and maintenance of credit. NSSLAs shall ensure the efficiency and effectiveness of the following credit administration functions:

- a. **Credit documentation.** Policies and procedures shall be put in place to ensure completeness of documentation, including a file documentation tickler system, execution of the loan transaction, and enforceability of documents.

For each loan granted by an NSSLA, a promissory note must be executed by the member-borrower in favor of the NSSLA expressing particulars such as the amount of the loan, date granted, due date, interest rate and other similar information. In addition, member-borrowers must execute an authorization requiring the payroll or its equivalent to make deduction from their salary the amount specified in the contractual obligation and remit such deduction to the NSSLA;

- b. **Disbursement.** Proper approval shall be obtained and complete documentation shall be ensured prior to disbursement. Exceptions, if any, shall be duly approved;
- c. **Billing and repayment.** Payments received shall be properly recorded. Measures shall be in place to ensure that late payments are tracked and collected; and
- d. **Maintenance of credit files.** Credit files shall include sufficient and updated information necessary to ascertain the financial condition of the member-borrower and include documents covering the history of an NSSLA's relationship with the borrower. All loan and collateral documents shall be kept in a secured area in NSSLA premises under joint custody.

For billing and repayment, on the basis of properly executed authorization to deduct from member-borrowers, the billing policies shall expressly provide information on the methodologies, timing and frequency, and bases of billing through the salary or pension remittance systems. In the case of loans payable over-the-counter or means other than through salary-deduction scheme, the policies shall also provide for the mechanics and requisites thereof, specifically on the use of collection agents/representatives or its equivalent.

For each loan granted, the NSSLA expects repayment based on terms agreed upon with member-borrowers. Upon receipt of the first amortization, it is assumed that the succeeding periodic amortizations are collected continuously thereafter. Accordingly, normal collection period (NCP) shall be defined as the period from the date of loan release to the date the NSSLA is able to collect the first periodic amortization of a loan payable by installment, or full settlement in the case of loans payable by balloon payment. The NCP shall be incorporated in the NSSLA's credit policies and considered in its loan review and monitoring system in order to reflect the true status of loan accounts and ensure that adequate loss provisioning is provided.

For repayments remitted through payroll or pension systems, the NCP shall be set by the NSSLA's board of trustees based on the recent collection history (e.g., last three years) and/or remittance periods specified in contracts with private companies or government units required to deduct and remit amounts due from employee- or retiree-members of such NSSLAs. This should be supported by documentary evidences that sufficiently justify the length of time identified as the NCP. In no case, however, shall the NCP exceed four (4) months from the date of release of the loan. For over-the-counter payments, the cure period as specified under Sec. 307-S (*Accounts considered past due*) shall apply instead of the NCP.

However, when repayments of loans through payroll/pension systems are beyond the established NCP and/or there are shortfalls in contracted amortizations, the NSSLA needs to determine whether these situations may be considered as extra-ordinary circumstances. Extra-ordinary circumstances are triggered by events or conditions beyond the control¹ of the NSSLA; the effect of which may apply to a specific product or group of members rather than on an individual basis; and there is reasonable basis to assess that the member-borrowers' repayment capacity is not impaired.

For these extra-ordinary circumstances, the board of trustees shall adopt and implement:

- a. Policies and mechanism towards the proper identification and declaration of situations considered as extra-ordinary given their operating environment;
- b. Commensurate policies and processes of measuring, monitoring and controlling the risks falling under extra-ordinary circumstance; and
- c. Effective Management Information System (MIS) towards adequate and timely generation of data, reports and feedback on extra-ordinary accounts.

The Board and Management are expected to adequately support by documentary evidences the identification of extra-ordinary circumstances and that the loans are not impaired. The Bangko Sentral is not precluded from validating the said identification and non-impairment for the purpose of ascertaining the condition of the loans.

Occurrence of events beyond the control of the NSSLA which have indications that member-borrowers' repayment capacity is compromised and may result in impairment of loans (e.g., member-borrower's absence without official leave, termination from employment, early retirement, etc.) shall not be considered as falling under extra-ordinary circumstances. In which case, the loans shall be subject to appropriate work-out strategy, adverse classification and loss provisioning.

D. Maintaining an Appropriate Credit Measurement, Monitoring and Control Process

Credit Risk Measurement. NSSLAs shall adopt sound and appropriate risk measurement methodologies which shall provide a framework to control and monitor the quality of credit as well as total loan portfolio. To ensure adherence to the NSSLA's risk tolerance, it shall implement an internal credit grading system that enables the identification of the credit behavior and measurement of the risk profile of member-borrowers.

NSSLAs shall develop a contingency plan for scenarios and outcomes that involve credit risk in excess of the NSSLAs' established risk tolerance. This plan may include increasing monitoring, limiting portfolio growth and exit strategies for both significant individual transactions and key portfolio segments.

Credit Risk Management Information and Reporting Systems. NSSLAs shall render accurate, reliable and timely information and reports relating to credit risk management. Thus, adequate management information and reporting systems shall be in place to support the identification, measurement and monitoring of credit risk and the overall effectiveness risk management process. The information generated from such systems shall enable the board and all levels of management to fulfill their respective oversight roles, including determining the level of capital commensurate with the credit risk exposure of the NSSLA.

- a. At a minimum, an effective MIS shall enable NSSLAs to:
 - (1) Provide adequate information on the quality and composition of the credit portfolio (including off-balance sheet accounts);

¹ For example, collective delay in remittance due to payroll or pension system issues, unilateral move by employers or by law to increase net-take home pay requirements

- (2) Determine accurately the level of credit risk exposures of an NSSLA through its various activities (e.g. renewal and extension of loans, collection process, status of delinquent accounts, write-offs, provisioning, among others);
 - (3) Timely identify and monitor credit risk concentrations, exposures approaching risk limits, exceptions to credit risk limits and overrides to ensure that policy and underwriting deviations as well as breaches and other potential problems are promptly reported to the board and management for appropriate corrective action;
 - (4) Aggregate credit exposures to individual borrowers and family group; and
 - (5) Permit additional analysis of the credit portfolio, including stress testing;
- b. Maintain a database for research and use of analytical techniques, report exposures, track quality and account performances, and maintain limits; The credit policy shall clearly define the types of information and reports to be generated, frequency of reporting, deadline of submission, and the users/recipients of and personnel responsible for the preparation of such information and reports; and
 - c. NSSLAs shall provide sufficient controls to ensure the integrity of the MIS. Reports shall be periodically reviewed to ensure adequacy of scope and reliability and accuracy of the information generated. Internal audit shall also periodically assess the controls over MIS.

Credit Monitoring. To ensure that timely and adequate board/management action is taken to maintain the quality of the NSSLA's credit portfolio and other risk assets, and that adequate loss provisioning is set up and maintained at a level sufficient to absorb the loss inherent in the credit accounts, an NSSLA shall establish an effective monitoring system appropriate to its risk profile. The said system, which shall be clearly articulated in the policies and procedures, shall consist of processes and information systems to effectively monitor the condition and quality of individual loan/risk asset and the entire portfolio, and determine the appropriate allowance for credit losses (ACL).

This shall include criteria that identify and report problem credits to reasonably assure that they are appropriately monitored as well as administered and provided for.

The system should be able to, among others, provide measures to ensure that: a. the board and management are kept informed of the current financial condition of the member-borrowers and the various credit portfolios; b. loan covenants are consistently adhered to; c. cash flow projections meet repayment requirements; d. prudential and internal limits are not exceeded; and e. potential problem credits and other transactions are identified. Exceptions, breaches and potential problems noted shall be promptly reported to board/management for corrective action, possible classification and/or provisioning and more frequent monitoring.

NSSLAs shall monitor compliance with prudential and internal limits on a regular basis. Substantial exposures, as the NSSLA may set, shall be subject to more intensive monitoring. For this purpose, NSSLAs shall maintain a central liability ledger system for each borrower. This system shall allow monitoring of: a. exposures against prescribed and internal limits on a daily basis; b. asset quality indicators (e.g., non-performing loans, collateral values, etc.); and c. trends in loan growth to identify potential weaknesses in the portfolio.

Credit Review Process

- a. NSSLAs shall implement an independent and objective credit review process to determine: (1) that credits are granted in accordance with the NSSLA's policies and procedures; (2) overall asset growth and quality (e.g., PD/NPL, write-offs and recoveries), including appropriateness of classification and adequacy of booked loss reserves and loan-loss provisioning consistent with the minimum standards required in Appendix S-9; (3) trends in the portfolio (segmentation as to loans to employee-members, retiree-members and immediate family-members); and (4) emerging problems (e.g., risk concentration, risk migration, and deficiencies in credit administration, measurement and monitoring processes).
- b. NSSLAs may employ an appropriate sampling methodology to determine the scope of credit review. At a minimum, credit review shall be conducted on all individual borrowers with substantial exposures, and on a group basis to factor in the connections among related parties in a borrowing group. Credit review for credits that are similar in purpose or risk characteristics may be performed on a portfolio basis. The portfolio sample selected for review shall provide reasonable assurance that all major credit risk issues have been assessed and valid conclusions can be drawn. Moreover, sampling methodology shall be documented and periodically reviewed to ensure its quality and minimize bias.
- c. Credit review shall also evaluate credit administration function and ensure that credit files are complete and updated, and that all loan approvals and other necessary documents have been obtained.

- d. Credit reviews shall be performed at least annually, and more frequently for substantial exposures, new accounts and classified accounts. Assessments shall be promptly discussed with the officers responsible for the credit activities and escalated to senior management.
- e. Results of the credit review shall be regularly and promptly reported to the board of trustees or the proper board-level committee for their appropriate action. The board shall mandate and track the implementation of corrective action/s in instances of unresolved deficiencies and breaches in policies and procedures. Deficiencies shall be addressed in a timely manner and monitored until resolved/corrected.

Credit Classification and Provisioning

- a. *Classification of Loans and Other Credit Accommodations*¹. NSSLAs shall have in place a reliable credit classification system to promptly identify credit exposures with potential or existing problem and determine appropriate ACL. All credit classifications, not only those reflecting severe credit deterioration, shall be considered in determining the appropriate ACL.

During a transitory period of three (3) years from 25 September 2019, NSSLAs shall be subject to the regulatory guidelines in setting up ACL prescribed in *Appendix S-8*.

- (1) All NSSLAs shall map their classification of loans and other credit accommodations against the regulatory classification criteria provided below. However, NSSLAs are encouraged and not precluded from using additional criteria provided they are consistent with the regulatory classification, as follows:
 - (a) *Pass*. These are loans and other credit accommodations that do not have a greater-than-normal credit risk. The member-borrowers has the apparent ability and willingness to satisfy their obligations in full.
 - (b) *Epecially Mentioned (EM)*. These are loans and other credit accommodations that have potential weaknesses that deserve management's close attention. If left uncorrected, such weakness(es) may affect the repayment of the loan. Some degree of structural weakness may be found in virtually any aspect of the loan arrangement or type of loan, and the presence of one (or more) need not be indicative of an overall credit weakness deserving criticism. Instead, the NSSLA must evaluate the relative importance of such factors in the context of the member-borrower's overall financial capacity and relationship with the NSSLA. Basic characteristics include, but are not limited to, any of the following:
 - (i) Deficiencies in underwriting, documentation, structure and/or credit administration that can compromise an NSSLA's ability to control credit relationship if economic or other events adversely affect the borrower;
 - (ii) Continuous renewal without reduction in principal, except when the capacity to pay of the borrower has been clearly re-established;
 - (iii) Adverse economic or market conditions, that in the future may affect the member-borrower's ability to meet scheduled repayments. Loans and other credit accommodations affected by these characteristics may retain the EM classification in the next examination should the same adverse conditions persist: *Provided*, That the loans remain current; or
 - (iv) Intermittent delays or inadequate repayment of principal, interest or periodic amortizations of loans and other credit accommodations granted by the NSSLA or by other financial institutions, where such information is available.
 - (c) *Substandard*. These are loans and other credit accommodations that have well-defined weakness(es), which may jeopardize repayment/liquidation in full, either in respect of the cash flow or financial position, which may include adverse trends or developments that affect willingness or repayment ability of the member-borrower. Basic characteristics include any of the following:
 - (i) Weak financial condition and results of operation of the employer that leads to the member-borrower's inability to generate sufficient cash flow for debt servicing;
 - (ii) Past due secured loans and other credit accommodations where properties offered as collateral have been found with defects as to ownership or with other adverse information;
 - (iii) Breach of any key financial covenants/agreements that will adversely affect the capacity to pay of the borrower; or
 - (iv) Classified "Epecially Mentioned" as of the last credit review without adequate corrective action.

¹ Other credit accommodations include accounts receivables, sales contract receivables, accrued interest receivables and advances.

- (d) *Doubtful*. These are loans and other credit accommodations that exhibit more severe weaknesses than those classified as “Substandard”, whose characteristics on the basis of currently known facts, conditions and values make collection or liquidation highly improbable, however the exact amount remains undeterminable as yet. Classification as “Loss” is deferred because of specific pending factors that may strengthen the assets. Some basic characteristics include any of the following:
 - (i) Secured loans and other credit accommodations where property/ies offered as collateral are (aa) either subject to an adverse claim rendering settlement of the loan through foreclosure doubtful, or (bb) whose value have materially declined without the borrower offering additional collateral for the loan/s to cover the deficiency; or
 - (ii) Loans and other credit accommodations wherein the possibility of loss is extremely high but because of certain important and reasonable pending factors that may work to the advantage and strengthening of the loan, its classification as an estimated loss is deferred until the next credit review.
- (e) *Loss*. These are loans and other credit accommodations that are considered uncollectible or worthless and of such little value that their continuance as bankable assets is not warranted although the loans may have some recovery or salvage value. This shall be viewed as a transitional category for loans and other credit accommodations that have been identified as requiring write-off during the current reporting period even though partial recovery may be obtained in the future. Their basic characteristics include any of the following:
 - (i) When the borrower’s and co-makers’/guarantors’ whereabouts are unknown, or they are insolvent, or their earning power is permanently impaired; or
 - (ii) Where the collateral securing the loans are without recoverable value.
- (2) Split classification may apply for non-performing secured loans and other credit accommodations, depending on the recoverability and liquidity of the collateral. The secured portion may be classified as “substandard” or “doubtful”, as appropriate, while the unsecured portion shall be classified as “loss” if there is no other source of payment other than the collateral.
- (3) NSSLAs may upgrade a classified loan or restore it to a “pass” rating: *Provided*, That it does so on the basis of a written policy on the upgrading of classification or rating and the credit review function is reliable and effective. Such policy shall include a comprehensive analysis of the repayment capability/financial strength of the borrower and the corrective actions made on the weaknesses noted to support the upgrade in classification. Upgrading may be supported by the following developments:
 - (a) When all arrears or missed payments on principal and interests including penalties have been cleared rendering the account to be fully compliant with the original terms of the loan;
 - (b) Upon establishing that the weaknesses were substantially addressed and that the borrower has exhibited a sustained trend of improvement and willingness and capability to fully pay its loans and advances in a timely manner to justify the upgrade;
 - (c) Offering of new or additional collateral security; or
 - (d) In the case of restructured loans, the classification shall only be upgraded after establishing a satisfactory track record of at least six (6) consecutive payments of the required amortization of principal and interest, or until the borrower has sufficiently exhibited that the loan will be fully repaid (continued collection in accordance with the terms of the loans is expected) and the loan meets the criteria of lower loan classification.
- b. *Transitory period to develop loan loss estimation methodology.*

After three (3) years from 25 September 2019, NSSLAs may develop and adopt a sound loan loss estimation methodology that: (1) can reasonably estimate provisions for loans and other credit accommodations and risk assets in a timely manner, using their experience and research and this guidance to ensure that the ACL¹ are adequate and (2) is fundamentally anchored on the principle of recognizing expected credit loss (ECL) in accordance with the provisions of Philippine Financial Reporting Standards 9 (PFRS 9). In such case, NSSLAs shall refer to *Appendix Q-57*. Otherwise, NSSLAs shall remain subject to the regulatory guidelines in setting up ACL prescribed in *Appendix S-8*.

¹ ACL represents the aggregate amount of individual and collectively assessed probable credit losses.

c. *Loan Loss Estimation Methodology, Provisioning and ACL*

- (1) An NSSLA's loan loss methodology shall consider the following:
- (a) Written policies and procedures for the credit risk management systems and controls inherent in the methodology, including roles and responsibilities of the NSSLA's board of trustees and senior management;
 - (b) A detailed analysis of the entire loan portfolio performed on a regular basis;
 - (c) Accounting of the NSSLA's lending activities which adequately consider a realistic view of the uncertainty and risks inherent in these activities. Loan accounting policies and practices shall be selected and applied in a consistent way that reasonably assures that loan and loan loss provision information is reliable and verifiable;
 - (d) Identification of loans to be evaluated individually and segmentation of the remaining portfolio into groups of loans with similar credit risk characteristics for collective assessment.
- (i) *Individually assessed loans.* NSSLAs shall establish a materiality threshold for significant credit exposures that will warrant an individual assessment, which threshold shall be regularly reviewed.

The loan loss estimates shall reflect consideration of the facts and circumstances that affect the repayment of each individual loan as of the evaluation date. The following factors are relevant in estimating loan losses for individually assessed loans:

- (aa) Significant financial difficulty of the borrower;
- (bb) Probable bankruptcy or other financial reorganization of the borrower;
- (cc) Breach of contract, such as a default or delinquency in interest or principal payments; or
- (dd) Concession granted by the NSSLA, for economic or legal reasons relating to the borrower's financial difficulty, which would not otherwise be considered.

The methodology shall include procedures describing the determination and measurement of the amount of any impairment, the impairment measurement techniques available and steps performed to determine which technique is most appropriate in a given situation; or

- (ii) *Collectively assessed loans.* NSSLAs may use different methods to group loans for the purpose of assessing credit risk and valuation considering the following characteristics: loan type, product type, market segment, credit risk grading and classification, collateral type, geographical location and past-due status. Estimated credit losses shall reflect consideration of the NSSLA's historical net charge-off rate¹ of the groups, adjusted for changes in trends, conditions and other relevant factors that affect repayment of the loans in such groups as of the evaluation date, and applied consistently over time;
- (e) The quality and net realizable values of physical collateral and other guarantees and credit risk mitigants incorporated in the loan agreement, where applicable;
 - (f) Address the methods used to validate models, if any, for credit risk assessment;
 - (g) The analyses, estimates, reviews and other provisioning methodology functions shall be performed by competent and well-trained personnel and be well documented, with clear explanations of the supporting analyses and rationale; and
 - (h) Use experienced credit judgment. Assessment of expected losses shall be based not only on prescriptive rules or formula but must be complemented with experienced credit judgment by the appropriate levels of management. The scope for actual discretion shall be prudently within the following constraints:
 - (i) Experienced credit judgments shall be subject to established policies and procedures;
 - (ii) With approved and documented analytical framework for assessing loan quality applied consistently over time;
 - (iii) Estimates shall be based on reasonable and verifiable assumptions and supported by adequate documentation; and
 - (iv) Assumptions concerning the impact on borrowers of changes in general economic activity, both favorable and unfavorable, shall be made with sufficient prudence.

¹ The historical net charge-off rate is generally based on the annualized historical gross loan charge-offs, less recoveries, recorded by the NSSLA.

The method of determining loan loss provisions shall reasonably assure the timely recognition of loan losses. While historical loss experience and recent economic conditions are reasonable starting point for the institution's analysis, these factors are not, by themselves, sufficient basis to determine the appropriate level of aggregate loan loss provisions. Management shall also consider any current factors that are likely to cause loan losses to differ from historical loss experience, including changes in the following:

- (i) Lending policies and procedures, including underwriting standards and collection, charge-off, and recovery practices;
- (ii) National and local economic and business conditions and developments, including the condition of various market segments;
- (iii) Trend, volume and severity of past due loans and loans graded as low quality, as well as trends in the volume of impaired loans, troubled debt restructurings and other loan modifications;
- (iv) The experience, ability, and depth of management and staff of lending operations/department/unit;
- (v) Changes related to new market segments and products;
- (vi) Quality of the NSSLA's loan review system and the degree of oversight by senior management and board of trustees;
- (vii) The existence and effect of any concentrations of credit, and changes in the level of such concentrations; and
- (viii) Credit risk profile of the loan portfolio as a whole as well as the effect of external factors such as competition and legal and regulatory requirements on the level of estimated credit losses in the NSSLA's current portfolio.

Experienced credit judgment shall also be used to determine an acceptable period that will yield reliable historical loss rates, as loss rate periods shall not be restricted to a fixed time period to determine the average historical loss experience for any group of loans with similar credit risk characteristics. An NSSLA shall maintain sufficient historical loss data over a full credit cycle to provide robust and meaningful statistical loan loss estimates for establishing the level of collective impairment losses for each group of loans with similar credit risk characteristics. When applying experienced credit judgment, an NSSLA shall provide a sound rationale for excluding any historical loss data that is deemed not representative of the performance of the portfolio.

- (i) NSSLAs shall set up general loan loss provision (GLLP) equivalent to one percent (1%) of the outstanding balance of assessed loans for which no specific provisions are made and/or for which the estimated loan losses are less than one percent (<1%), less loans which are considered non-risk under existing laws, rules and regulations.
- (j) NSSLAs shall ensure the adequacy of the ACL for the entire loan portfolio. They shall have a policy for the regular review of the ACL, which shall be conducted at least semi-annually after considering results of the credit review, level of classified loans, delinquency reports, historical losses and market conditions. Failure to make adequate provisions for estimated future losses, if any, may result in material misrepresentation of an NSSLA's financial condition.

Credit Workout and Remedial Management of Problem Credits. NSSLAs shall develop and maintain a disciplined and vigorous process for the early identification and intervention for potential or existing problem credits. The process shall ensure that timely and adequate management action is taken to maintain the quality of the credit portfolio, prevent further deterioration, and minimize the likelihood of future losses.

- a. Problem credits refer to credits that display signs of potential problems and/or well-defined weaknesses such as those not performing according to the terms of the contract, or with credit quality impairment, or deficiencies relating to their approval and/or conduct that are not in keeping with sound and prudent credit policies. These shall include past due loans, non-performing loans and restructured loans.
- b. NSSLAs shall adopt appropriate and cost effective workout, restructuring or remedial management policies, processes and strategies to revive and recover problem credits. The strategies shall take into account the specific condition of the obligor and the NSSLA's interest, and shall be approved by the board of trustees or management, in accordance with internal policy.

- c. At a minimum, the policies and strategies shall cover the following areas:
 - (1) authority and responsibilities of officers and staff in managing problem credits;
 - (2) collection strategy to be adopted for different types of loans;
 - (3) restructuring and handling of restructured accounts and/or loans for workout;
 - (4) supervision and monitoring of loan recovery performance;
 - (5) management and disposal of real and other properties acquired (ROPA), including appraisal process;
 - (6) management information system to support the reporting, monitoring and decision making processes;
 - (7) defined timelines and provision for regular monitoring; and
 - (8) other strategies, such as the use of collection agencies, and criteria for hiring a consultant on problem credits.
- d. Restructuring strategies
 - (1) Restructuring may be resorted to for the purpose of lessening the financial difficulty of the borrower towards full settlement of his obligation, and restructuring agreements shall always take into account the borrower's capacity to pay his obligation and available credit enhancements such as financial guarantees and physical collateral. Thus, NSSLAs shall have full discretion on whether to restructure loans in order to provide flexibility in arranging the repayment of such loans without impairing or endangering the NSSLAs' interest.
 - (2) Accounts shall not be restructured unless the financial capacity of the obligor to repay has been re-established, the events or crises that triggered the financial stress had been identified, and the nature and extent of protection of the NSSLAs' exposure had been determined, to justify the need for restructuring.
 - (3) At a minimum, the classification and provisioning of a loan, prior to the execution of the restructuring agreement shall be retained until the borrower has sufficiently exhibited that the loan will be fully repaid.
 - (4) A second restructuring of a loan shall be allowed only if there are reasonable justifications: *Provided*, That it shall be considered a non-performing loan and classified, at least, "*Substandard*". The restoration to a performing loan status and/or upgrading of loan classification, e.g., from "*Substandard*" to "*Especially Mentioned*", may be allowed if circumstances warrant an upgrading in accordance with this Section (*Credit workout and remedial management of problem credits*).
 - (5) When restructuring of exposures is pursued, this shall not be under terms more favorable than those transacted with others and shall be approved by the board, excluding the trustee-borrower, if any.
 - (6) Physical collaterals offered, such as real estate, shall be appraised by an independent appraisal company (not a subsidiary or an affiliate of the NSSLAs) acceptable to the Bangko Sentral at the time of restructuring and every year thereafter to ensure that current market values are being used. A credit exposure benchmark of ₱1.0 million for simple FIs and ₱5.0 million for all other NSSLAs shall be observed, such that physical collaterals for credit exposures beyond this amount will require an independent appraisal.
- e. Problem credits, including restructured accounts, shall be subjected to more frequent review and monitoring. Regular reports on the status of loan accounts and progress of any remedial plan shall be submitted to management to facilitate an informed decision whether escalated remedial actions are called for.

Writing Off Problem Credits. Policies for writing off problem credits must be approved by the board of trustees in accordance with existing rules and regulations, and shall incorporate, at a minimum, well-defined criteria (i.e., circumstances, conditions and historical write-off experience) under which credit exposures may be written off. Procedures shall explicitly narrate and document the necessary operational steps and processes to execute the policies.

Policies and procedures shall be periodically reviewed and if necessary, revised in a timely manner to address material internal changes (e.g., change in business focus) or external circumstances (e.g., changes in economic conditions).

NSSLAs shall write-off problem credits, regardless of amount, against ACL or current operations within a reasonable period as soon as such problem credits are determined to be worthless as defined in the NSSLAs' written policies.

Policies shall define and establish the reasonable period of time within which to write-off loans already classified as "loss". There shall be no undue delay in implementing write-offs. Notice for write-off of problem credits shall be submitted in the prescribed form (*Appendix S-14*) to the appropriate supervising department of the Bangko Sentral within forty-five (45) calendar days after every write-off, with a sworn statement signed by the President of the NSSLAs or officer of equivalent rank that the write-off did not include transactions with trustees and officers, direct or indirect, and was undertaken in accordance with board-approved internal credit policy.

An effective monitoring and reporting system shall be in place to monitor debts written off and future recoveries. Progress on recovery shall be periodically reported to the board of trustees. A database of loan accounts written off shall be maintained and must be periodically reviewed for updates on individual loan borrower's information, including the effects of write-offs to membership eligibility.

Enforcement Actions. The Bangko Sentral reserves the right to deploy its range of supervisory enforcement actions to promote adherence to standards and principles set forth in these guidelines, bring about timely corrective actions and compliance with Bangko Sentral directives and ensure that NSSLAs operate in a sound, lawful and orderly manner. Non-observance of the provisions of this Section may subject the NSSLAs, its trustees and officers to appropriate sanctions.

Enforcement actions shall be based on a holistic assessment to determine if NSSLAs adopt appropriate credit risk management practices and/or maintain capital commensurate with the risk assumed based on existing rules and regulations. These may include, but are not limited to, the following:

- a. **Corrective Actions.** These are measures intended to primarily require NSSLAs to rectify any deviations from the standards and principles expected in the conduct of their credit risk-taking activities to address the negative impact of such deviation. Corrective actions generally include issuance of specific directives to address supervisory concerns within a reasonable timeframe.
- b. **Sanctions.** The Monetary Board (MB) may impose sanctions on an NSSLAs and/or its Board, trustees and officers, as provided under existing laws, Bangko Sentral rules and regulations proportionate to the gravity/seriousness of offense.
- c. **Other Enforcement Actions.** Subject to prior MB approval, the Bangko Sentral, when warranted, may deploy other enforcement actions such as:
 - (1) Initiation into the prompt corrective action (PCA) framework whenever grounds for PCA exist;
 - (2) Requiring the NSSLAs to gross up the amount of required allowance for credit losses based on the examination of a representative sample of loans, if in the course of the Bangko Sentral examination, a high incidence of non-reporting/concealment of past due and/or problem loans is noted; or
 - (3) Other appropriate non-monetary enforcement actions that the MB may impose.

Transitory Provision. NSSLAs shall be given six (6) months from 25 September 2019 to: (1) perform a gap analysis of their current credit practices and processes vis-à-vis the standard provided in this Section and (2) submit an action plan to the Bangko Sentral for addressing such gaps duly approved by the board of trustees to achieve full compliance within a reasonable period of time but in no case longer than two (2) years from 25 September 2019.

All action plans shall be subject to acceptance through the Sub-Sector Head of the appropriate sub-sector of the Bangko Sentral. Should an NSSLAs fail to submit aforesaid action plan within the specified period or the same is deemed not acceptable, it shall be subject to the immediate application of the supervisory standards of this Section.

Any NSSLAs that fails to comply with the foregoing shall be subject to the imposition of appropriate monetary and/or non-monetary sanctions.

(Circular Nos. 1143 dated 12 April 2022 and 1046 dated 29 August 2019)

F. COMPLIANCE, INTERNAL CONTROL AND AUDIT

151-S COMPLIANCE FRAMEWORK

It is the policy of the Bangko Sentral to promote the safety and soundness of operations and activities of Compliance Risk Management. Toward this end, the trustees and officers of the NSSLAs, who are expected to conduct and manage the affairs of the NSSLAs in a lawful and orderly manner, shall establish a dynamic and responsive compliance risk management system, prescribed in this Section, as an integral part of the culture and risk governance framework of the NSSLAs. In this respect, the compliance risk management system shall be the responsibility and shared accountability of all personnel, officers, and the board of trustees.

The compliance risk management system shall be designed to specifically identify and mitigate risks that may erode the franchise value of the NSSLAs, such as risk of legal or regulatory sanctions, material financial loss, or loss to reputation, an NSSLAs may suffer as a result of its failure to comply with laws, rules and regulations, and codes of conduct applicable to its activities. Said risk may also arise from failure to manage conflict of interest, treat members fairly, comply with agreements with and internal policies of the finance centers and/or mother company, or effectively manage risks arising from money laundering and terrorist financing activities.

As such, a compliance risk management system found to be materially inadequate may be construed as an act, practice or omission prejudicial to the interest of members.

Compliance function. The compliance function shall have a formal status within the organization. It shall be established by a charter or other formal document approved by the board of trustees that defines the compliance function's standing, authority, and independence. The compliance function shall have the right to obtain access to information necessary to carry out its responsibilities, conduct investigations of possible breaches of the compliance policy, and shall have direct access to the board of trustees or appropriate board-level committee.

The compliance function shall facilitate effective management of compliance risk by:

- a. Advising the board of trustees and senior management on relevant laws, rules and regulations, and standards, including keeping them informed on developments in the area;
- b. Apprising NSSLA personnel on compliance issues, and acting as a contact point within the NSSLA for compliance queries from NSSLA personnel;
- c. Establishing written guidance to staff on the appropriate implementation of laws, rules and regulations, and standards through policies and procedures and other documents contained in compliance manuals, internal codes of conduct, and practice guidelines;
- d. Identifying, documenting, and assessing the compliance risks associated with the NSSLA's business activities, including new products and business units;
- e. Assessing the appropriateness of the NSSLA's compliance procedures and guidelines, promptly following up any identified deficiencies, and where necessary, formulating proposals for amendments;
- f. Monitoring and testing compliance by performing sufficient and representative compliance testing; and
- g. Maintaining a constructive working relationship with the Bangko Sentral and other regulators.

Compliance program. The compliance program shall set out the planned activities of the compliance function, such as the review of the implementation of specific policies and procedures; conduct of compliance risk assessment and compliance testing; educating staff on compliance matters; and monitoring compliance risk exposures. The program shall espouse a risk based approach and shall have appropriate coverage across businesses and units. For this purpose, the compliance program shall be updated on a regular basis or at least annually.

Chief Compliance Officer (CCO). The CCO should have the necessary qualifications, experience, and professional background and should have a sound understanding of relevant laws and regulations and their potential impact on the NSSLA's operations. The CCO should be up-to-date with the developments in laws, rules and regulations maintained through continuous training. The CCO shall serve on a full-time basis and shall functionally report to the board of trustees or board-level committee.

NSSLAs operating on a business model deemed "simple"¹ by the Bangko Sentral, by virtue of their scale and complexity of activities, may designate its Internal Auditor to serve as the CCO in concurrent capacity. "Simple" NSSLAs may also designate a non-executive trustee to serve in a concurrent capacity as the CCO or Internal Auditor but not as both CCO and Internal Auditor.

An appointed CCO has the burden to prove that he/she possesses all the minimum qualifications and none of the disqualifications of an officer. The CCO shall submit to the Bangko Sentral proof of such qualifications². Non-submission of complete documentary requirements within the prescribed period shall be construed as his/her failure to establish his/her qualifications for the positions and results in his/her removal as CCO. The Bangko Sentral shall also consider its own records in determining the qualifications of CCO.

The CCO shall oversee the identification and management of the NSSLA's compliance risk and shall supervise the compliance function staff. The CCO is expected to liaise with the Bangko Sentral on compliance related issues and shall also be responsible for ensuring the integrity and accuracy of all documentary submissions to the Bangko Sentral. The CCO shall functionally meet/report to the board of trustees or board-level committee and such meetings shall be duly minuted and adequately documented. In this regard, the board of trustees/board-level committee shall review and approve the performance and compensation of the CCO, and budget of the compliance function.

¹ Simple NSSLAs shall refer to NSSLAs which, due to operational limitations, are not classified as Complex NSSLAs.

Complex NSSLAs shall refer to institutions declared by the Bangko Sentral as such with total assets of at least P5 billion and having at least any one (1) of the following characteristics: (1) Extensive membership base such as those which membership extends to employees/retirees of two or more companies/agencies/institutions, and/or their relatives, and/or with serious issue on the "well-defined" group requirement under R.A. No. 8367; or (2) Use of non-conventional business model, such as those using non-traditional delivery platform such as electronic platforms and agents.

² Using the list in *Appendix Q-58* as a guide

Responsibilities of the board of trustees and senior management. Aside from the duties and responsibilities of the board of trustees mentioned under Sec. 131-S, the board of trustees shall, among others, ensure that it is aware of and understands the relevant laws, rules and regulations affecting the NSSLA's operations; approve and regularly review the compliance risk strategy and policy; and ensure that the compliance function has proper status in the organization, has adequate staff and resources, and carry out its responsibilities independently, objectively and effectively.

The board of trustees shall ensure that a compliance program is defined for the NSSLA and that compliance issues are resolved expeditiously. For this purpose, a board-level committee such as Audit Committee, chaired by a non-executive trustee, shall oversee the compliance program.

Senior management, with the CCO as lead operating officer, shall be responsible for the consistent implementation and adherence of personnel among others, to the pre-defined compliance standards. Senior management, through the CCO, should periodically report to the board of trustees or board-level committee matters that affect the design and implementation of the compliance program. Any changes, updates and amendments to the compliance program must be approved by the board of trustees. However, any material breaches of the compliance program shall be reported to and promptly addressed by the CCO within the mechanisms defined by the compliance manual.

Outsourcing of compliance risk assessment and testing. The review, assessment and testing of the compliance program may be outsourced to qualified third parties. The handling and management of this outsourcing arrangement shall be governed by Sec. 113-S.

(Circular No. 1016 dated 5 October 2018)

152-S INTERNAL CONTROL FRAMEWORK

Internal control is a process designed and effected by the board of trustees, senior management, and all levels of personnel to provide reasonable assurance on the achievement of objectives through efficient and effective operations; reliable, complete and timely financial and management information; and compliance with applicable laws, regulations, supervisory requirements, and the organization's policies and procedures.

NSSLAs shall have in place adequate and effective internal control framework for the conduct of their business taking into account their size, risk profile and complexity of operations. The internal control framework shall embody management oversight and control culture; risk recognition and assessment; control activities; information and communication; and monitoring activities and correcting deficiencies.

Management oversight and control culture. Consistent with the principles provided under Sec. 131-S (*Powers/responsibilities and duties of trustees*) and Sec. 132-S (*Duties and responsibilities of officers*), the board of directors and senior management shall be responsible for promoting high ethical and integrity standards; establishing the appropriate culture that emphasizes, demonstrates and promotes the importance of internal control; and designing and implementing processes for the prevention and detection of fraud.

- a. The board of trustees shall be ultimately responsible for ensuring that senior management establishes and maintain an adequate, effective and efficient internal control framework commensurate with the size, risk profile and complexity of operations of the NSSLA. The board of trustees shall also ensure that the internal audit function has an appropriate stature and authority within the NSSLA and is provided with adequate resources to enable it to effectively carry-out its assignments with objectivity.

Further, the board of trustees shall, on a periodic basis:

- (1) conduct discussions with management on the effectiveness of the internal control system;
 - (2) review of evaluations made by the audit committee on the assessment of effectiveness of internal control made by management, internal auditors and external auditors;
 - (3) ensure that management has promptly followed up on recommendations and concerns expressed by auditors and supervisory authorities on internal control weaknesses; and
 - (4) review and approve the remuneration of the head and personnel of the internal audit function. Said remuneration shall be in accordance with the NSSLA's remuneration policies and practices and shall be structured in such a way that these do not create conflicts of interest or compromise independence and objectivity.
- b. The audit committee shall be responsible for overseeing senior management in establishing and maintaining an adequate, effective and efficient internal control framework. It shall ensure that systems and processes are designed to provide assurance in areas including reporting, monitoring compliance with laws, regulations and internal policies, efficiency and effectiveness of operations and safeguarding of assets.

The audit committee shall oversee the internal audit function and shall be responsible for:

- (1) monitoring and reviewing the effectiveness of the internal audit function;
- (2) approving the internal audit plan, scope and budget;
- (3) reviewing the internal audit reports and the corresponding recommendations to address the weaknesses noted, discussing the same with the head of the internal audit function and reporting significant matters to the board of directors;
- (4) ensuring that the internal audit function maintains an open communication with senior management, the audit committee, external auditors, and the supervisory authority;
- (5) reviewing discoveries of fraud and violations of laws and regulations as raised by the internal audit function;
- (6) reporting to the board of directors the annual performance appraisal of the head of the internal audit function;
- (7) recommending for approval of the board of directors the annual remuneration of the head of the internal audit function and key internal auditors;
- (8) appointing, reappointing or removing the head of the internal audit function and key internal auditors; and
- (9) selecting and overseeing the performance of the internal audit service providers.

In particular, the audit committee shall be responsible for:

- (1) ensuring the independence of the internal audit service provider;
 - (2) reporting to the board of directors on the status of accomplishments of the outsourced internal audit activities, including significant findings noted during the conduct of the internal audit;
 - (3) ensuring that the internal audit service provider comply with sound internal auditing standards such as the Institute of Internal Auditors' *International Standards for the Professional Practice of Internal Auditing* and other supplemental standards issued by regulatory authorities/government agencies, as well as with relevant code of ethics;
 - (4) ensuring that the audit plan is aligned with the overall plan strategy and budget of the NSSLA and is based on robust risk assessment; and
 - (5) ensuring that the internal audit service provider has adequate human resources with sufficient qualifications and skills necessary to accomplish the internal audit activities.
- c. Senior management shall be responsible for maintaining, monitoring and evaluating the adequacy and effectiveness of the internal control system on an ongoing basis, and for reporting on the effectiveness of internal controls on a periodic basis. Management shall develop a process that identifies, measures, monitors and controls risks that are inherent to the operations of the NSSLA; maintain an organizational structure that clearly assigns responsibility, authority and reporting relationships; ensure that delegated responsibilities are effectively carried out; implement internal control policies and ensure that activities are conducted by qualified personnel with the necessary experience and competence. Management shall ensure that NSSLA personnel undertake continuing professional development and that there is an appropriate balance in the skills and resources of the front office, back office, and control functions. Moreover, Management shall promptly inform the internal audit function of the significant changes in the NSSLA's risk management systems, policies and processes.
- d. All personnel need to understand their roles and responsibilities in the internal control process. They should be fully accountable in carrying out their responsibilities effectively and they should communicate to the appropriate level of management any problem in operations, action or behavior that is inconsistent with documented internal control processes and code of ethics.

Risk recognition and assessment. An effective internal control system shall identify, evaluate and continually assess all material risks that could affect the achievement of the NSSLA's performance, information and compliance objectives. The potential for fraud shall be considered in assessing the risks to the achievement of said objectives. Further, the risk assessment shall cover all risks facing the NSSLA, which include, among others, credit; country and transfer; market; interest rate; liquidity; operational; compliance; legal; and reputational risks.

Effective risk assessment identifies and considers both internal (e.g., complexity of the organization's structure, nature of the NSSLA's activities and personnel profile) and external (e.g., economic conditions, technological developments and changes in the industry) factors that could affect the internal control framework. The risk assessment shall be conducted at the level of individual business units and across all NSSLA activities/groups/units and subsidiaries, in the case of a parent FI. Internal controls shall be revised to address any new or previously uncontrolled or unidentified risks.

Control activities. Control activities shall form part of the daily activities of the NSSLA and all levels of personnel in the NSSLA. Control activities are designed and implemented to address the risks identified in the risk assessment process. These involve the establishment of control policies and procedures, and verification that these are being complied with.

NSSLAs shall have in place control activities defined at every business level, which shall include a system that provides for top and functional level reviews; checking compliance with exposure limits and follow-up on noncompliance; a system of approvals and authorizations, which shall include the approval process for new products and services; and a system of verification and reconciliation.

Control activities complement existing policies, procedures and other control systems in place such as, among others, having clearly defined organizational structure and reporting lines, and arrangements for delegating authority; adequate accounting policies, records and processes; robust physical and environmental controls for tangible assets and access controls to information assets; and appropriate segregation of conflicting functions.

- a. *Clear arrangements for delegating authority.* The functions and scope of authority and responsibility of each personnel should be adequately defined, documented and clearly communicated. The extent to which authorities may be delegated and the corresponding accountabilities of the personnel involved shall be approved by the appropriate level of management or the board of directors.
- b. *Adequate accounting policies, records and processes.* NSSLAs shall maintain adequate financial policies, records and processes. These records shall be kept up-to-date and contain sufficient detail to establish an audit trail. Further, NSSLAs shall conduct independent balancing and reconciliation of records and reports to ensure the integrity of the reported data and balances. NSSLAs shall also put in place a reliable information system that covers all of its significant activities which shall allow the board of directors and management access to data and information relevant to decision making such as, among others, financial, operations, risk management, compliance and market information. Moreover, these systems shall be secured, monitored independently and supported by adequate contingency arrangements.
- c. *Robust physical and environmental controls to tangible assets and access controls to information assets.* NSSLAs shall adopt policies and practices to safeguard their tangible and information assets. These shall include, but shall not be limited to:
 - (1) Identifying officers with authorities to sign for and on behalf of the NSSLA. Signing authorities shall be approved by the board of trustees and the extent of authority at each level shall be clearly defined;
 - (2) Implementing joint custody on certain assets. Joint custody shall mean the processing of transactions in the presence, and under the direct observation of a second person. Both persons shall be equally accountable for the physical protection of the items and records involved: *Provided*, That persons who are related to each other within the third degree of consanguinity or affinity shall not be made joint custodians;
 - (3) Adopting dual control wherein the work of one (1) person is to be verified by a second person to ensure that the transaction is properly authorized, recorded and settled;
 - (4) Incorporating sequence number control in the accounting system which shall also be used in promissory notes, checks and other similar instruments. Management shall also put in place appropriate controls to monitor the usage, safekeeping and recording of accountable forms;
 - (5) Restricting access to information assets by classifying information as to degree of sensitivity and criticality and identifying information owners or personnel with authorities to access particular classifications based on job responsibilities and the necessity to fulfill one's duties; and
 - (6) Implementing authentication and access controls prior to granting access to information such as, among others, implementing password rules. This shall be supplemented by appropriate monitoring mechanisms that will allow audit of use of information assets.
- d. *Segregation of conflicting functions.* NSSLAs shall ensure that areas of potential conflicts of interest shall be identified, minimized and subjected to independent monitoring. Further, appropriate segregation of functions shall be observed in identified areas that may pose potential conflict of interest. Moreover, periodic reviews of responsibilities and functions shall be conducted to ensure that personnel are not in a position to conceal inappropriate actions.

Examples of internal control measures are in *Appendix Q-72*.

Information and communication. An effective internal control system requires that there are adequate and comprehensive internal financial, operational and compliance data, as well as external information about events and conditions that are relevant to decision making. Information shall be reliable, timely, accessible, and provided in a consistent format. NSSLAs shall have in place a reliable management information system that covers significant activities of the NSSLAs and has the capability to generate relevant and quality information to support the functioning of internal control.

NSSLAs shall also establish effective channels of communication to ensure that all personnel fully understand and adhere to policies and procedures and control measures relevant to their duties and responsibilities and that relevant information is reaching the appropriate personnel. Management shall also ensure that all personnel are cognizant of their duty to promptly report any deficiency to appropriate levels of management or to the board of trustees, where required. These shall enable them to quickly respond to changing conditions and avoid unnecessary costs.

Monitoring activities and correcting deficiencies. The overall effectiveness of the internal controls shall be monitored on an ongoing basis. Monitoring functions and activities shall be adequately defined by management, integrated in the operating environment and should produce regular reports for review. In this regard, all levels of review shall be adequately documented and results thereof reported on a timely basis to the appropriate level of management.

Evaluations of the effectiveness of the internal control system and the corresponding monitoring activities may be done by personnel from the same operational area in the form of self-assessment or from other areas such as internal audit: *Provided, That*, self-assessment done by business units shall be subject to independent validation.

Evaluations done shall be adequately documented and internal control deficiencies and weaknesses identified shall be reported on a timely basis to the appropriate level of management or the board of trustees, where necessary, and addressed promptly.

Bonding of Officers and Employees. All officers and employees of an NSSLAs who, in the regular discharge of their duties have access to money or negotiable securities shall, before entering upon such duties, furnish to the employing NSSLAs a good and sufficient bond and providing for indemnity to the NSSLAs against the loss of money or securities, by reason of their dishonesty. The bond of the cashier, assistant cashier, treasurer, and other employees having money accountability shall not be less than their average daily accountability. The bond must be issued by a reputable bonding company duly licensed by the Insurance Commission and approved by the Bangko Sentral. Capital contribution or a cash bond deposited with the NSSLAs or with a bank, may also be allowed.

(Circular No. 871 dated 05 March 2015)

153-S INTERNAL AUDIT FUNCTION

Internal audit is an independent, objective assurance and consulting function established to examine, evaluate and improve the effectiveness of internal control, risk management and governance systems and processes of an organization, which helps management and the board of trustees in protecting the NSSLAs and its reputation. The internal audit function shall both assess and complement operational management, risk management, compliance and other control functions. In this respect, internal audit shall be conducted in frequencies commensurate with the assessed levels of risk in specific NSSLAs areas.

- a. *Permanency of the internal audit function.* Each NSSLAs shall have a permanent internal audit function. In the case of group structures involving a parent NSSLAs and subsidiary or affiliate BSFI, the internal audit function shall either be established in each of the BSFI or centrally by the parent NSSLAs.
- b. *Internal audit function in group structures.* In case each BSFI belonging to group structures has its own internal audit function, said internal audit function shall be accountable to the financial institution's own board of directors and shall likewise report to the head of the internal audit function of the parent bank within a reasonable period and frequency prescribed by the board of directors of the parent NSSLAs.

On the other hand, in case the parent NSSLAs's internal audit function shall cover the internal audit activities in the subsidiary or affiliate BSFI, the board of directors of the parent NSSLAs shall ensure that the scope of internal audit activities is adequate considering the size, risk profile and complexity of operations of the subsidiary or affiliate concerned.

The establishment of internal audit function centrally by the parent bank in group structures shall not fall under the outsourcing framework as provided under Sec. 112 (*Statement of Principle on Outsourcing*) of the MORB. In this respect, the head of the internal audit function of the parent bank shall define the internal audit strategies, methodology, scope and quality assurance measures for the entire group: *Provided, That* this shall be done in consultation and coordination with the respective board of directors and of the subsidiary or affiliate BSFI: *Provided, further, That* the board of directors of the subsidiary or affiliate BSFI, shall remain ultimately responsible for the performance of the internal audit activities.

- c. *Outsourcing of internal audit activities.* NSSLA may outsource, in accordance with existing Bangko Sentral regulations on outsourcing, internal audit activities covering all areas of its operations: *Provided*, That the board of trustees of the NSSLA shall remain ultimately responsible for the conduct of effective internal audit: *Provided, further*, That The internal audit activity shall not be outsourced to the NSSLA's own external auditor/audit firm nor to internal audit service provider that was previously engaged by the NSSLA in the same area intended to be covered by the internal audit activity that will be outsourced, without a one-year "cooling off" period.

Qualifications of the head of the internal audit function. The head of the internal audit function must have an unassailable integrity, relevant education/experience/training, and has an understanding of the risk exposures of the NSSLA, as well as competence to audit all areas of its operations. He must also possess the following qualifications:

- a. The head of the internal audit function of a UB or a KB must be a Certified Public Accountant (CPA) or a Certified Internal Auditor (CIA) and must have at least five (5) years experience in the regular audit (internal or external) of a UB or KB as auditor-in-charge, senior auditor or audit manager. He must possess the knowledge, skills, and other competencies to examine all areas in which the institution operates. Professional competence as well as continuing training and education shall be required to face up to the increasing complexity and diversity of the institution's operations.
- b. The head of the internal audit function of a complex TB, RB and Coop Bank; QB and; trust entity must be a graduate of any accounting, business, finance or economics course with technical proficiency on the conduct of internal audit and must have at least five (5) years experience in the regular audit (internal or external) of a TB, national Coop Bank, QB or trust entity or, at least three (3) years experience in the regular audit (internal or external) of a UB or KB.
- c. The head of the internal audit function of a simple or non-complex TB, RB and Coop Bank; and NSSLA must be a graduate of any accounting, business, finance or economics course with technical proficiency on the conduct of internal audit and must have at least two (2) years experience in the regular audit (internal or external) of a UB, KB, TB, RB, Coop Bank, QB or NSSLA.

A qualified head of the internal audit function of a UB or a KB shall be qualified to audit TBs, RB, Coop Banks, QBs, trust entities, NSSLAs, subsidiaries and affiliates engaged in allied activities, and other financial institutions under Bangko Sentral supervision. A qualified internal auditor of a complex TB, RB, and Coop Bank; QB and; trust entity shall likewise be qualified to audit non-complex TB, RB and Coop Bank and NSSLA.

The head of the internal audit function shall be appointed/reappointed or replaced with prior approval of the audit committee. In cases, when the head of the internal audit function will be replaced, the NSSLA shall report the same and the corresponding reason for replacement, to the appropriate supervising department of the Bangko Sentral within five (5) days from the time it has been approved by the board of directors.

Duties and responsibilities of the head of the internal audit function or the chief audit executive.

- a. To demonstrate appropriate leadership and have the necessary skills to fulfill his responsibilities for maintaining the unit's independence and objectivity;
- b. To be accountable to the board of trustees or audit committee on all matters related to the performance of its mandate as provided in the internal audit charter. The head of the internal audit function shall submit a report to the audit committee or board of trustees on the status of accomplishments of the internal audit unit, including findings noted during the conduct of the internal audit as well as status of compliance of concerned departments/units;
- c. To ensure that the internal audit function complies with sound internal auditing standards such as the Institute of Internal Auditors' *International Standards for the Professional Practice of Internal Auditing* and other supplemental standards issued by regulatory authorities/government agencies, as well as with relevant code of ethics;
- d. To develop an audit plan based on robust risk assessment, including inputs from the board of trustees, audit committee and senior management and ensure that such plan is comprehensive and adequately covers regulatory matters. The head of the internal audit function shall also ensure that the audit plan, including any revisions thereto, shall be approved by the audit committee; and
- e. To ensure that the internal audit function has adequate human resources with sufficient qualifications and skills necessary to accomplish its mandate. In this regard, the head of the internal audit function shall periodically assess and monitor the skill-set of the internal audit function and ensure that there is an adequate development program for the internal audit staff that shall enable them to meet the growing technical complexity of NSSLA operations.

Professional competence and ethics of the internal audit function. The internal audit function shall be comprised of professional and competent individuals who collectively have the knowledge and experience necessary in the conduct of an effective internal audit on all areas of NSSLA's operations. The skill set of the internal audit staff shall be complemented with appropriate audit methodologies and tools as well as sufficient knowledge of auditing techniques in the conduct of audit activities.

All internal audit personnel shall act with integrity in carrying-out their duties and responsibilities. They should respect the confidentiality of information acquired in the course of the performance of their duties and should not use it for personal gain or malicious actions. Moreover, internal audit personnel shall avoid conflicts of interest. Internally-recruited internal auditors shall not engage in auditing activities for which they have had previous responsibility before a one-year “cooling off” period has elapsed. The internal audit personnel shall adhere at all times to the NSSLA’s Code of Ethics as well as to an established code of ethics for internal auditors such as that of the Institute of Internal Auditors.

Independence and objectivity of the internal audit function. The internal audit function must be independent of the activities audited and from day-to-day internal control process. It must be free to report audit results, findings, opinions, appraisals and other information through clear reporting line to the board of trustees or audit committee. It shall have authority to directly access and communicate with any officer or employee, to examine any activity or entity of the NSSLA, as well as to access any records, files or data whenever relevant to the exercise of its assignment.

If independence or objectivity of internal audit function is impaired, in fact or appearance, the details of the impairment must be disclosed to the audit committee. Impairment to organizational independence and individual objectivity may include, but is not limited to, personal conflict of interest, scope limitations, restrictions on access to records, personnel, and properties, and resource limitations, such as funding.

The internal audit function shall inform senior management of the results of its audits and assessment. Senior management may consult the internal auditor on matters related to risks and internal controls without tainting the latter’s independence: *Provided*, That the internal auditor shall not be involved in the development or implementation of policies and procedures, preparation of reports or execution of activities that fall within the scope of his review.

Staff of the internal audit function shall be periodically rotated, whenever practicable, and without jeopardizing competence and expertise to avoid unwarranted effects of continuously performing similar tasks or routine jobs that may affect the internal auditor’s judgment and objectivity.

Internal audit charter. NSSLAs shall have an internal audit charter approved by the board of trustees. The internal audit charter shall be periodically reviewed by the head of the internal audit function and any changes thereto shall be approved by the board of trustees.

The internal audit charter shall establish, among others, the following:

- a. Purpose, stature and authority, and responsibilities of the internal audit function as well as its relations with other control functions in the NSSLA. The charter shall recognize the authority of the internal audit function, to initiate direct communication with any NSSLA personnel; to examine any activity or entity; and to access any records, files, data and physical properties of the NSSLA, in performing its duties and responsibilities;
- b. Standards of independence, objectivity, professional competence and due professional care, and professional ethics;
- c. Guidelines or criteria for outsourcing internal audit activities to external experts;
- d. Guidelines for consulting or advisory services that may be provided by the internal audit function;
- e. Responsibilities and accountabilities of the head of the internal audit function;
- f. Requirement to comply with sound internal auditing standards such as the Institute of Internal Auditor’s *International standards for the Professional Practice of Internal Auditing* and other supplemental standards issued by regulatory authorities/government agencies, as well as with relevant code of ethics; and
- g. Guidelines for coordination with the external auditor and supervisory authority.

Scope. All processes, systems, units, and activities, including outsourced services, shall fall within the overall scope of the internal audit function. The scope of internal audit shall cover, among others, the following:

- a. Evaluation of the adequacy, efficiency and effectiveness of internal control, risk management and governance systems in the context of current and potential future risks;
- b. Review of the reliability, effectiveness and integrity of management and financial information systems, including the electronic information system and electronic banking services;
- c. Review of the systems and procedures of safeguarding the NSSLA’s physical and information assets;
- d. Review of compliance of trading activities with relevant laws, rules and regulations;
- e. Review of the compliance system and the implementation of established policies and procedures; and

- f. Review of areas of interest to regulators such as, among others monitoring of compliance with relevant laws, rules and regulations, including but not limited to the assessment of the adequacy of capital and provisions; liquidity level; regulatory and internal reporting.

(Circular No. 871 dated 05 March 2015)

154-S FRAMEWORK ON THE SELECTION OF EXTERNAL AUDITORS

Policy Statement. The Bangko Sentral considers the external auditing profession as a partner in promoting the integrity of financial reports and transparency in the financial system. In this light, the Bangko Sentral is issuing this framework on the selection of external auditors (individual practitioners and audit firms) for Bangko Sentral Supervised Financial Institutions (BSFIs) in line with its cooperative arrangements with the Securities and Exchange Commission (SEC), Insurance Commission (IC), and Philippine Deposit Insurance Corporation (PDIC), under the auspices of the Financial Sector Forum (FSF).

Appointment of External Auditors of BSFIs

- a. BSFIs shall engage the services of an external auditor included in the List of Selected External Auditors for BSFIs. In this respect, a BSFI shall only appoint an external auditor belonging to the same category or from categories higher than the category of the BSFI concerned as provided in this section: *Provided*, That the Monetary Board may require the BSFI to appoint an external auditor from higher categories as part of the Bangko Sentral's supervisory action on the BSFI. The external auditor appointed by the BSFI shall likewise audit the BSFI's trust department as well as its subsidiaries and affiliates engaged in allied activities, as applicable.
- b. External Auditors shall be classified into three categories and shall extend their services to BSFIs belonging to the same category or from categories lower than the category of the external auditor, as follows:
 - (1) Group A
 - (a) UBs/KBs
 - (b) Foreign banks and branches or subsidiaries of foreign banks
 - (c) Banks, trust departments and trust corporations with additional derivatives authority, pursuant to Sec. 613 of the MORB
 - (2) Group B
 - (a) TBs
 - (b) NBFIs with quasi-banking license
 - (c) Trust departments and trust corporations
 - (3) Group C
 - (a) RBs and Coop Banks
 - (b) Non-stock Savings and Loan Associations
 - (c) Pawnshops
 - (d) Remittance and Transfer Companies (RTCs)/Money Changers/Foreign Exchange Dealers (MCs/FXDs), including Virtual Currency Exchanges and Electronic Money Issuers
 - (e) Credit Card Issuers/Acquirers

The above categories shall include their subsidiaries and affiliates engaged in allied activities and other financial institutions subject to Bangko Sentral's consolidated supervision.

- c. External auditors applying for first time inclusion or renewal of inclusion in the List of Selected External Auditors for BSFIs shall submit their application to the SEC. The application shall be subject to the requirements set out by the SEC as agreed upon by the Bangko Sentral, SEC, IC and PDIC.
- d. The inclusion in the List of Selected External Auditors for BSFIs shall be valid for five (5) years or for a shorter period prescribed by the financial sector supervisors.
- e. The Bangko Sentral shall periodically evaluate the performance of the external auditor through an assessment of the quality of the BSFI's audited financial statements and its compliance with the requirements provided under this Section. The results of assessment shall serve as basis for the continuing inclusion of external auditors in the List of Selected External Auditors for BSFIs.

- f. The external auditor, including the engagement and quality control partners of the audit firm, of the BSFI shall be rotated in accordance with the relevant provisions of the Code of Ethics for Professional Accountants in the Philippines as adopted by the Philippine Board of Accountancy.

Audit Engagement and Reportorial Requirements

- a. The BSFI's Audit Committee/board of directors/board of trustees shall ensure that the scope of external audit work appropriately covers areas relevant to BSFI's operations and risk exposures. These include the following:
- (1) Review of the adoption of applicable reporting framework as well as the assessment of the accuracy, adequacy, and reliability of accounting records and financial reports;
 - (2) Assessment of the propriety and adequacy of disclosures in the financial statements;
 - (3) Assessment of the adequacy and effectiveness of internal controls and risk management systems;
 - (4) Assessment of the quality of capital in relation to risk exposures; and
 - (5) Evaluation of the quality of corporate governance.

- b. The engagement contract of BSFIs with the external auditor shall include, at a minimum, the following provisions:
- (1) That disclosure of information, such as those enumerated under Item "c" of this Section (Audit engagement and reportorial requirements), by the external auditor to the Bangko Sentral and/or other financial sector supervisors shall not constitute a breach of confidentiality on the part of the external auditor nor shall it be a ground for civil, criminal, or disciplinary proceedings against the external auditor;
 - (2) That the external auditor shall be allowed read-only access to the Bangko Sentral's Report of Examination on the BSFI and that the external auditor shall appropriately consider the contents thereof and maintain its confidentiality; and
 - (3) That the BSFI concerned and external auditor shall comply with all the requirements under this Section.

The engagement contract shall be made available by the BSFI to the Bangko Sentral upon request.

- c. The external auditor shall report to the appropriate supervising department of the Bangko Sentral within fifteen (15) calendar days upon discovery of any matter adversely affecting the condition or soundness of the BSFI, such as, but not limited to the following cases:
- (1) Any material finding involving fraud or error;
 - (2) Actual or potential losses, the aggregate of which amounts to at least ten percent (10%) of the consolidated total assets of the BSFI;
 - (3) Significant doubt as to the ability of the BSFI to continue as a going concern;
 - (4) Material breach of laws or Bangko Sentral rules and regulations such as but not limited to prescribed capital and liquidity ratios, significant deficiency in allowance for credit losses, material weaknesses in fair value measurement methodology, and significant vulnerabilities to money laundering and combating the financing of terrorism;
 - (5) Material internal control weaknesses which may lead to financial reporting problems; and
 - (6) Findings on matters of corporate governance that may require urgent action by the Bangko Sentral.

Where a thorough investigation or evaluation of facts is necessary on the noted case, an initial report shall be submitted within the prescribed timeline: *Provided*, That a complete report is submitted not later than fifteen (15) calendar days from completion of investigation or evaluation.

In case there are no matters to report, the external auditor shall submit to the appropriate supervising department of the Bangko Sentral, not later than 120 calendar days after the close of the calendar year or the fiscal year adopted by the BSFI, a certification that there is none to report.

- d. The board of directors and management of the BSFI shall be primarily responsible for the financial statements submitted to the Bangko Sentral. External auditors are expected to conduct the audit of financial statements in accordance with the provisions of the Philippine Standards on Auditing.
- e. The external auditor shall directly inform the appropriate supervising department of the Bangko Sentral of the pre-termination of the engagement contract or his/her resignation/replacements as external auditor as well as the reasons thereto, within fifteen (15) calendar days of the pre-termination of the contract or his/her resignation/replacement.

Supervisory Enforcement Action

The Bangko Sentral reserves the right to deploy its range of supervisory enforcement actions to promote adherence with the requirements set forth in this Section and bring about timely corrective actions. For this purpose, the Bangko Sentral may issue directives or impose sanctions on BSFIs and/or its directors/trustees who approved the appointment of the external auditor, who/which are not in the List of Selected External Auditors for BSFIs, and/or for non-compliance with the provisions of this Section. The Bangko Sentral may likewise shorten the period of validity of inclusion of an external auditor in the List of Selected External Auditors for BSFIs, suspend, or delist external auditors from its List of Selected External Auditors for BSFIs based on the results of assessment of the quality of audited financial statements (AFS) as well as non-compliance with the provisions of this Section. The guidelines on the supervision/delisting of external auditor in the list of selected external auditors for BSFIs is prescribed in *Appendix S-7*.

Transitory provisions

- a. External auditors whose inclusion in the List of Selected External Auditors for BSFIs is valid to cover the audit of 2018 financial statements are hereby given one (1) year extension on their inclusion in the List of Selected External Auditors for BSFIs allowing them to engage in the audit of the 2019 financial statements.
- b. All applications (new and renewal) for inclusion in the List of Selected External Auditors for BSFIs to cover in the audit of 2020 financial statements and thereafter shall be filed with the SEC starting June 2019.

(Circular No. 1040 dated 20 May 2019)

G. REPORTING GOVERNANCE

161-S FINANCIAL RECORDS

NSSLAs shall have a true and accurate account, record or statement of their daily transactions. The making of any false entry or the willful omission of entries relevant to any transaction is a ground for the Monetary Board for the imposition of administrative sanctions under Section 37 of R.A. No. 7653, without prejudice to the criminal liability of the director or officer responsible therefore under Sections 35 and 36 of No. 7653 and/or the applicable provisions of the Revised Penal Code. Records shall be up to-date and shall contain sufficient detail so that an audit trail is established.

Uniform System of Accounts. NSSLAs are required to pattern their charts of accounts and recording systems after the Uniform System of Accounts prescribed for NSSLAs including reportorial and publication requirements. The voucher system of accounting or the ticket system, or such other accounting system acceptable to the Bangko Sentral as well as the prescribed chart of accounts shall be adopted for use by NSSLAs.

Philippine Financial Reporting Standards/Philippine Accounting Standards (PFRS)

Policy Statement. It is the thrust of the Bangko Sentral to align its financial reporting requirements with standards and practices that are widely accepted internationally to promote fairness, transparency, and accountability in the financial industry. In this light, the Bangko Sentral is issuing guidelines governing the adoption of the PFRS, aimed at ensuring consistency of application and comparability of financial reports across the industry.

- a. *Adoption of PFRS.* Non-Stock Savings and Loan Association (NSSLAs) shall adopt the PFRS in recording transactions and in the preparation of financial statements and reports to the Bangko Sentral. However, in cases where there are differences between Bangko Sentral regulations and PFRS as when more than one (1) options are allowed, or certain maximum or minimum limits are prescribed by PFRS, the option or limit prescribed by the Bangko Sentral shall be adopted by NSSLAs.
- b. *Preparation of prudential reports.* For prudential reporting, NSSLAs shall adopt the PFRS in the following cases:
 - (1) Preparation of solo financial statements as provided in *Appendix S-15*.
 - (2) Recognition of allowance for credit losses (ACL). NSSLAs shall at all times recognize adequate and timely ACL and shall adopt the principles provided under the Enhanced Standards on Credit Risk Management under Sec. 114-S as well as the provisions of *Appendix S-8* in measuring credit losses.
- c. *Preparation of Audited Financial Statements (AFS).* AFS shall be PFRS-compliant and shall be submitted to the Bangko Sentral in accordance with the provisions of Sec. 163-S (*Audited financial statements of NSSLAs*). NSSLAs shall submit to the Bangko Sentral adjusting entries reconciling the balances in the financial statements for prudential reporting with that in the AFS.

- d. *Guidelines on the adoption of PFRS 9 Financial Instruments.* NSSLAs should have adopted, as part of the PFRS framework, PFRS 9: Financial Instruments upon its mandatory effectivity date of 01 January 2018.

For this purpose, NSSLAs shall be governed by the following:

- (1) Consistent with the duties and responsibilities of the board of trustees (board) provided under Sec. 131-S (*General responsibility of the board of trustees; and Duties and responsibilities*), the board, shall ensure that the NSSLAs appropriately and consistently adopts PFRS 9 as part of its reporting governance process. In this respect, the board shall assess the impact of PFRS 9 on business strategies and risk management systems and ensure availability of sufficient resources, including capacity building initiatives, in adopting the standard.

The board shall approve policies and guidelines relative to the adoption of PFRS 9, which shall cover responsibilities of the different units in the NSSLAs as well as the extent of participation or involvement of third parties in the adoption process. The board shall likewise ensure that adequate control measures are in place to ensure the integrity of reports.

- (2) Management shall implement the policies set by the board related to the adoption of PFRS 9 and ensure that sound professional judgment is exercised in implementing the provisions of the standard. Management shall provide feedback to the board on the effectiveness of implementation of PFRS 9.
- (3) NSSLAs shall be guided by the provisions of *Appendix S-16* on “Guidelines on the Adoption of Philippine Financial Reporting Standards 9 (PFRS 9) – Classification and Measurement” and *Appendix S-8* on “Impairment” in implementing the provisions of PFRS 9.

- e. *Supervisory Enforcement Action.* Consistent with the provisions of Sec. 002-Q, the Bangko Sentral reserves the right to deploy its range of supervisory tools and enforcement actions to promote adherence to the standards and principles set forth in these guidelines, bring about timely corrective actions and compliance with the Bangko Sentral directives and ensure that NSSLAs operate in a sound, lawful and orderly manner. In this respect, the Bangko Sentral may issue directives or impose sanctions on the NSSLAs and/or its trustees, officers and/or employees concerned for noted supervisory issues on the adoption of PFRS 9.

Prudential reports affected by non-adherence to the provisions of this Section (*Philippine Financial Reporting Standards*) shall be subject to penalties/sanctions provided under Sec. 162-S (*Sanctions and procedures for filing and payment of fines*).

- f. *Transitory Provisions.* NSSLAs shall observe the following transition rules:

- (1) NSSLAs shall apply PFRS 9, retrospectively, in accordance with the transition requirements and guidance provided under PFRS 9 and Philippine Accounting Standards (PAS) 8 “*Changes in Accounting Policies, Changes in Accounting Estimates and Errors*”. NSSLAs shall be guided by the provisions of PAS 8 if the retrospective application is impracticable.
- (2) An NSSLAs is expected to comply with the reportorial and disclosure requirements of the Securities and Exchange Commission on the adoption of PFRS 9.

Financial Reporting Package¹

In line with the adoption of the PFRS, NSSLAs are required to adopt the Manual of Accounts prescribed under the Financial Reporting Package for Non-Stock Savings and Loan Associations (FRPNSSLA) for prudential reporting purposes². The general features as well as the implementing guidelines of the FRPNSSLA is provided in *Appendix S-15*.

The FRPNSSLA shall become effective starting with the reporting quarter-ending 31 March 2020, and shall be submitted to the appropriate supervising department of the Bangko Sentral in the manner prescribed under *Appendix S-2*. Said report shall be classified as Category A-1 Report.

(Circular Nos. 1047 dated 29 August 2019, 915 dated 05 July 2016, and 912 dated 27 May 2016)

¹ *Transitory Provisions.* Parallel runs of the FRPNSSLA and the existing Consolidated Statement of Condition and Consolidated Statement of Income and Expenses shall be conducted on a quarterly basis for the reporting periods ending 30 September and 31 December 2019. During the parallel runs covering the said reporting periods, the Consolidated Statement of Condition and Consolidated Statement of Income and Expenses shall be electronically transmitted by NSSLAs to the Bangko Sentral on or before the end of the immediately following month while the FRPNSSLA shall be submitted to the Bangko Sentral within forty-five (45) calendar days after the end of reference quarter. If the 45th calendar day falls on a Saturday, Sunday or Holiday, or on a day which business operations of the Bangko Sentral is suspended, the following business days shall apply. During the reporting periods wherein the parallel runs shall be conducted, existing penalties under Sec. 162-S (*Sanctions and procedures for filing and payment of fines*) shall not be imposed for late and/or erroneous submission of FRPNSSLA while said penalties shall continue to be imposed for late and/or erroneous submission of the Consolidated Statement of Condition and Consolidated Statement of Income and Expenses. Upon effectivity of the FRPNSSLA, the penalties prescribed under Sec. 162-S (*Sanctions and procedures for filing and payment of fines*) shall be imposed for late and/or erroneous submission of FRPNSSLA.

² Refer to FRP for NSSLAs

NSSLAs shall submit to the appropriate supervising department of the Bangko Sentral the reports in prescribed form listed in *Appendix S-2*.

Categories and signatories of reports. For purposes of designating the signatories of reports, certain weekly, monthly, quarterly, semi-annual, and annual statements/reports required to be submitted to the Bangko Sentral are hereby grouped into *Categories A-1, A-2, A-3 and Category B*, as enumerated in *Appendix S-4*.

Category A-1 reports shall be signed by the NSSLAs' chief executive officer (who may be the president or chairman of the board, or designated in the by-laws), or in his absence, by the executive vice president or the officer duly authorized under a resolution approved by the board of trustees and by the chief finance officer (i.e., controller or chief accountant, who shall likewise be duly authorized by the NSSLAs' board of trustees in a format prescribed in *Appendix S-4*.

Category A-2 reports of the head office of the NSSLAs shall be signed by the NSSLAs' president or senior vice-president/equivalent position. Offices/units (such as branch) reports in this category shall be signed by their respective managers/officers-in-charge. Likewise, the signing authority in this category shall be contained in a resolution approved by the board of trustees in the format prescribed in *Appendix S-4*.

Category A-3 and B reports are those required to be submitted to the Bangko Sentral and are not included in Categories A-1 and A-2. They shall be signed by officers or their alternates, who shall be duly designated by the board of trustees. A copy of the board resolution with format as prescribed in *Appendix S-4*, covering the initial designation and subsequent changes in signatories and alternates, shall be submitted to the appropriate supervising department of the Bangko Sentral within three (3) days from the date of resolution.

If a report is submitted to the Bangko Sentral under the signature of an officer who is not listed or included in any of the resolutions mentioned above, the appropriate supervising department of the Bangko Sentral shall refuse to acknowledge the report as valid or consider the report as not having been submitted at all. If such a report is not resubmitted by the NSSLAs under the signature of a duly authorized signing officer, administrative sanctions/penalties shall be imposed on the erring NSSLAs for the late reporting or failure to submit the required report, as the case may be.

Manner of filing. The submission of the reports shall be effected by filing them personally with the appropriate supervising department of the Bangko Sentral or with the Bangko Sentral Regional Offices or by sending them registered mail or special delivery, unless otherwise specified in the circular or memorandum of the Monetary Board or the Bangko Sentral.

Report on Crimes/Losses (RCL). NSSLAs shall electronically submit an RCL within ten (10) calendar days from knowledge of the crime/incident.

Sanctions and procedures for filing and payment of fines. Failure to submit the above reports on or before the specified dates shall subject the person responsible or entity concerned to the penalties provided by law.

For willful delay in the submission of reports, the following rules shall apply:

a. *Definition of Terms.* The following definitions shall apply:

- (1) *Report* shall refer to all written reports/statements required of an NSSLAs to be submitted to the Bangko Sentral periodically or within a specified period.
- (2) *Willful delay in the submission of reports* shall refer to the failure of any NSSLAs to submit on time the report defined in Item "(1)" above. Failure to submit a report on time due to fortuitous events, such as fire and other natural calamities and public disorders, shall not be considered as willful delay.
- (3) *Examination* shall include, but need not be limited to, the verification, review, audit, investigation and inspection of the books and records, business affairs, administration and financial condition of any NSSLAs including the reproduction of the records as well as the taking possession of the books and records and keeping them under Bangko Sentral custody after giving proper receipts therefore. It shall also include the interview of the directors and personnel of any NSSLAs.
- (4) *Refusal to permit examination* shall mean any act or omission which impedes, delays or obstructs the duly authorized Bangko Sentral officer/examiner/employee from conducting an examination, including the act of refusing to honor a letter of authority to examine presented by any officer/examiner/employee of the Bangko Sentral.

- b. *Fines for willful delay in submission of reports.* NSSLAs incurring willful delay in the submission of required reports shall pay a fine in accordance with the following schedule:

(1) For Categories A-1, A-2 and A-3 reports	
Per day of default until the report is filed	P180
(2) For Category B reports	
Per day of default until the report is filed	60

Delay or default shall start to run on the day following the last day required for the submission of reports. However, should the last day of filing fall on a non-working day in the locality where the reporting NSSLAs is situated, delay or default shall start to run on the day following the next working day. The due date/deadline for submission of reports to Bangko Sentral as prescribed under this Section governing the frequency and deadlines indicated in *Appendix S-2* shall be automatically moved to the next business day whenever a half-day suspension of business operations in government offices is declared due to an emergency such as typhoon, floods, etc.

For the purpose of establishing delay or default, the date of acknowledgment by the appropriate supervising department of the Bangko Sentral or the Regional Offices/Units appearing on the copies of such reports filed or submitted or the date of mailing postmarked on the envelope/the date of registry or special delivery receipt, as the case may be, shall be considered as the date of filing.

Delayed schedules/attachments and amendments shall be considered late reporting subject to above penalties.

- c. *Sanctions for willful refusal to permit examination/making of false statement*

- (1) Any NSSLAs which shall willfully refuse to permit examination shall pay a fine of P3,000 daily from the day of refusal and for as long as such refusal lasts.

The provisions of Section 34 of R. A. No. 7653 shall apply to any agent, manager, or other officer-in-charge of any NSSLAs who willfully refuses any lawful examination into the affairs of such NSSLAs.

The willful making of a false statement or misleading statement on a material fact to appropriate supervising department of the Bangko Sentral charged with the regulation of NSSLAs or to his examiner shall be punished in accordance with Section 36 of R. A. No. 7653.

- (2) *Procedures in imposing the fine*

(a) The Banko Sentral officer/examiner/employee shall report the refusal of the NSSLAs to permit examination to the head of the appropriate supervising department of the Bangko Sentral, who shall forthwith make a written demand upon the NSSLAs concerned for such examination. If the NSSLAs continues to refuse said examination without any satisfactory explanation therefor, the Bangko Sentral officer/examiner/employee concerned shall submit a report to that effect to the appropriate department head.

(b) The fine shall be imposed starting on the day following the receipt by the appropriate supervising department of the written report submitted by the Bangko Sentral officer/examiner/employee concerned regarding the continued refusal of the NSSLAs to permit the desired examination.

- d. *Manner of payment or collection of fines.* The regulations embodied in Sec. 811-S (*Fines and other charges*) shall be observed in the collection of the fines from NSSLAs.
- e. *Appeal to the Monetary Board.* NSSLAs may appeal to the Monetary Board a ruling of the appropriate department imposing a fine.
- f. *Other penalties.* The foregoing penalties shall not preclude the application of, or shall be without prejudice to, other administrative sanctions as well as to the filing of criminal case as provided for in the other provisions of the law, as may be warranted by the nature of the offense.

(Circular No. 1104 dated 27 November 2020)

163-S AUDITED FINANCIAL STATEMENTS

External Auditor. NSSLAs except those with total resources of P10.0 million or less, shall engage the services of an independent Certified Public Accountant to audit their books of accounts at least once a year, or as often as necessary.

Financial Audit. NSSLAs shall cause an annual financial audit by an external auditor acceptable to the Bangko Sentral not later than thirty (30) calendar days after the close of the calendar year or the fiscal year adopted by the NSSLA. Report of such audit shall be submitted to the board of directors and the appropriate supervising department of the Bangko Sentral not later than 120 calendar days after the close of the calendar year or the fiscal year adopted by the NSSLA. The report to the Bangko Sentral shall be accompanied by the: (1) certification by the external auditor on the: (a) dates of start and termination of audit; (b) date of submission of the financial audit report and certification under oath stating that no material weakness or breach in the internal control and risk management systems was noted in the course of the audit of the NSSLA to the board of directors; and (c) the absence of any direct or indirect financial interest and other circumstances that may impair the independence of the external auditor; (2) reconciliation statement between the AFS and the balance sheet and income statement for NSSLA submitted to the Bangko Sentral including copies of adjusting entries on the reconciling items; and (3) other information that may be required by the Bangko Sentral.

In addition, the external auditor shall be required by the NSSLA to submit to the board of directors, a LOC indicating any material weakness or breach in the institution's internal control and risk management systems within thirty (30) calendar days after submission of the financial audit report. If no material weakness or breach is noted to warrant the issuance of an LOC, a Certification under oath stating that no material weakness or breach in the internal control and risk management systems was noted in the course of the audit of the NSSLA shall be submitted in its stead, together with the financial audit report.

Material weakness shall be defined as a significant control deficiency, or combination of deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be detected or prevented by the entity's internal control. A material weakness does not mean that a material misstatement has occurred or will occur, but that it could occur. A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with GAAP. The term more than remote likelihood shall mean that future events are likely to occur or are reasonably possible to occur.

The board of directors, in a regular or special meeting, shall consider and act on the financial audit report and the certification under oath submitted in lieu of the LOC and shall submit, within thirty (30) banking days after receipt of the reports, a copy of its resolution to the appropriate supervising department of the Bangko Sentral. The resolution shall show, among other things, the action(s) taken on the reports and the names of the directors present and absent.

The board shall likewise consider and act on the LOC and shall submit, within thirty (30) banking days after receipt thereof, a copy of its resolution together with said LOC to the appropriate supervising department of the Bangko Sentral. The resolution shall show the action(s) taken on the findings and recommendations and, the names of the directors present and absent, among other things.

The LOC shall be accompanied by the certification of the external auditor of the date of its submission to the board of directors.

NSSLAs under Bangko Sentral supervision which are under the concurrent jurisdiction of the COA shall be exempt from the aforementioned annual financial audit by an acceptable external auditor: *Provided*, That when warranted by supervisory concern such as material weakness/breach in internal control and/or risk management systems, the Monetary Board may, upon recommendation of the appropriate supervising department of the Bangko Sentral, require the financial audit to be conducted by an external auditor acceptable to the Bangko Sentral, at the expense of the institution concerned: *Provided, further*, That when circumstances such as, but not limited to, loans from multilateral financial institutions, privatization, or public listing warrant, the financial audit of the concerned institution by an acceptable external auditor may also be allowed.

NSSLAs under the concurrent jurisdiction of the Bangko Sentral and COA shall, however, submit a copy of the AAR of the COA to the appropriate supervising department of the Bangko Sentral within forty (40) calendar days after receipt of the AAR by the board of directors. The AAR shall be accompanied by the: (1) certification by the institution concerned on the date of receipt of the AAR by the board of directors; (2) reconciliation statement between the AFS in the AAR and the balance sheet and income statement of the NSSLA submitted to the Bangko Sentral, including copies of adjusting entries on the reconciling items; and (3) other information that may be required by the Bangko Sentral.

The board of directors of said institutions, in a regular or special meeting, shall consider and act on the AAR, as well as on the comments and observations and shall submit, within thirty (30) banking days after receipt of the report, a copy of its resolution to the appropriate supervising department of the Bangko Sentral. The resolution shall show the action(s) taken on the report, including the comments and observations and the names of the directors present and absent, among other things.

NSSLAs as well as external auditors shall strictly observe the requirements in the submission of the financial audit report and reports required to be submitted under *Appendix Q-32*.

The audited annual financial statements required to be submitted shall in all respect be PFRS/PAS compliant: *Provided*, That NSSLAs shall submit to the Bangko Sentral adjusting entries reconciling the balances in the financial statements for prudential reporting with that in the audited annual financial statements.

The reports and certifications of institutions concerned, schedules and attachments required under this Section shall be considered *Category B* reports, delayed submission of which shall be subject to the penalties under Sec. 162-S (*Sanctions and procedures for filing and payment of fines*).

Audited Financial Statements of NSSLAs. The following rules shall govern the utilization and submission of AFS of NSSLAs.

For purposes of this Section, AFS shall include the balance sheets, income statements, statements of changes in equity, statements of cash flows and notes to financial statements which shall include among other information, disclosure of the volume of past due loans as well as loan loss provisions. On the other hand, financial audit report shall refer to the AFS and the opinion of the auditor. The AFS of NSSLAs with subsidiaries shall be presented side by side on a solo basis (parent) and on a consolidated basis (parent and subsidiaries).

Posting of audited financial statements. NSSLAs shall post in conspicuous places in their head offices, all their branches and other offices, as well as in their respective websites, their latest financial audit report.

(Circular Nos. 1144 dated 12 April 2022 and 911 dated 02 May 2016)

164-S PUBLICATION REQUIREMENTS

NSSLAs shall, within 120 calendar days after the close of the calendar year or their fiscal year, as the case may be, furnish the Monetary Board and post in any of the NSSLAs' bulletin boards or in any other conspicuous place a copy of their financial statements showing, in such form and detail as the Monetary Board shall require, the amount and character of the assets and liabilities of the NSSLAs at the end of the preceding calendar/fiscal year. The Monetary Board may, in addition to the foregoing, require the disclosure of such other information as it shall deem necessary for the protection of the members of the NSSLAs.

(Circular No. 1047 dated 29 August 2019)

H. ACTS OR PRACTICES PREJUDICIAL TO THE INTEREST OF MEMBERS

171-S RULES GOVERNING PREJUDICIAL ACTS, PRACTICES OR OMISSIONS

In line with the policy of the State to regulate and supervise the activities of Non-Stock Savings and Loan Associations (NSSLAs) through issuance of minimum requirements and standards resulting in judicious utilization of credit; to place their operations on a sound, stable and efficient basis so they may provide for the establishment of additional savings and credit facilities in a fair manner to their members; to curtail or prevent acts, practices or omissions of these NSSLAs which are prejudicial to their members' interest; and to maximize the protection of members of NSSLAs against misfeasance and malfeasance of the trustees and officers thereof, the following rules and regulations on prejudicial acts or practices are hereby issued.

Acts, practices or omissions considered prejudicial to the interest of members.

- a. In determining whether a particular act, practice or omission prejudicial to the interest of members, the Monetary Board, upon report of the head of appropriate supervising department of the Bangko Sentral, based on the finding in an examination or a complaint, shall consider the following circumstances:
 - (1) The act, practice or omission is contrary to the generally accepted standards of prudent operation resulting in, or may result in abnormal risk, damage or loss to the NSSLAs; or
 - (2) The act, practice or omission unduly burdens the members of the NSSLAs and/or provide unwarranted benefit, advantage or preference to any party; or
 - (3) The act, practice or omission has resulted or may result in material loss, damage or undue injury to members.
- b. Acts, practices or omissions which may be considered as prejudicial to the interest of members include, but are not limited to, the following:
 - (1) Charging of unreasonably high service fees in the grant of loans. For this purpose, service fee is considered unreasonably high if the service fee rate exceeds fifty percent (50%) of the annual nominal interest rate charged on a loan. If the service fee rate is not indicated in the loan document, reference shall be made to the ratio of service fee to the principal loan granted;
 - (2) Recognizing as income unused insurance premiums instead of refunding and/or crediting the same to borrowers;
 - (3) Non-disclosure to borrowers of borrowing costs such as, but not limited to, service fees and costs related to services rendered by agents/sales representatives and consultants in the financials and management reports;

- (4) Adopting and implementing policies that are discriminatory such as, but not limited to, limiting the capital contributions of members that has the effect of concentrating control to a particular family. For this purpose, a family refers to the employee-member and/or retiree-member and their relatives up to second degree of consanguinity or affinity;
- (5) Granting of unauthorized compensation, in any form, to trustees and/or officers. Compensation shall be considered unauthorized when not allowed in the By-Laws or not approved by authorized bodies such as the members in a general assembly or the Board of Trustees.
- (6) Granting new or additional loans to borrowers who have insufficient paying capacity or poor credit history;
- (7) Collecting payments from members even after full payment of their loans, including failure to refund over-collections to members;
- (8) Charging and/or paying material unauthorized disbursements, including expenses, or engaging in the practice of charging and/or paying unauthorized disbursements even if not material but when aggregated, result in material financial loss to the NSSLA; or
- (9) Allowing the use of NSSLA's properties or privileges without due compensation.

The foregoing list is not exclusive. The Monetary Board may consider any other acts, practices, or omissions as prejudicial to the interest of members.

Enforcement actions. Based on the seriousness and materiality of the prejudicial acts, practices or omissions, the NSSLA, its trustees and officers shall be subject to administrative sanctions under Section 37 of R.A. No. 7653 or "The New Central Bank Act" and/or other applicable enforcement actions. The Monetary Board, pursuant to its authority under Section 22 of R.A. No. 8367 and subject to due notice and hearing, may order the suspension or revocation of an NSSLA's license to operate as such if the prejudicial acts, practices or omissions amount to willful violation of this Section, the provisions of R.A. No. 8367 or any other rule or regulation promulgated thereunder.

For this purpose, the act, practice or omission is deemed willful if, despite Bangko Sentral directive to stop the said act, practice, or omission, the NSSLA and/or its trustees and/or officers, continue to commit the same or related acts. As used herein, the term "related acts" refer to specific acts which result in the same prejudicial act, practice or omission.

Moreover, the above is without prejudice to the filing of appropriate criminal charges against culpable persons as provided for under Section 23(c) of R.A. No. 8367.

(Circular Nos. 1013 dated 17 September 2018 and 933 dated 16 December 2016)

I. REVOCATION AND SUSPENSION OF LICENSE

181-S VOLUNTARY DISSOLUTION

NSSLAs contemplating to dissolve shall give written notice thereof to the Monetary Board through the appropriate supervising department of the Bangko Sentral at least thirty (30) days before taking steps to effect dissolution.

182-S REVOCATION/SUSPENSION OF LICENSE OF NSSLAs

In reference to Section 22 of R.A. No. 8367 or the "Revised Non-Stock Savings and Loan Association Act of 1997", the Monetary Board, upon due notice and hearing, has the authority to either revoke or suspend the license of any NSSLA for such period as it deems necessary, based on any of the following grounds:

a. *Suspension of license:*

- (1) Repeated violations [uncorrected similar examination findings for the last two examinations, regular or special] of any of the provisions of R.A. No. 8367, and/or any rules or regulations promulgated to implement said law, or Bangko Sentral directives and/or instructions; and
- (2) Paid-up capital is impaired by continuing losses for the last two (2) fiscal years.

Lifting of the suspension of license shall be approved by the Monetary Board upon recommendation of the appropriate supervising department of the Bangko Sentral.

b. *Revocation of license:*

- (1) When the solvency of the NSSLA is imperiled by losses and irregularities;
- (2) When the NSSLA willfully violates any provision of R.A. No. 8367, any rule or regulation promulgated to implement said law and Bangko Sentral directives and/or instructions;
- (3) When the NSSLA is conducting business in an unsafe and unsound manner;
- (4) When it is unable to pay its liabilities as they become due in the ordinary course of business;
- (5) When it has insufficient realizable assets, as determined by the Bangko Sentral, to meet its liabilities;
- (6) When it cannot continue in business without involving probable losses to its members or creditors; and
- (7) When it has willfully violated a cease and desist order of the Monetary Board involving acts or transactions which amount to fraud or a dissipation of assets of the institution.

As to the effects of the revocation/suspension of license of the NSSLA, the NSSLA is prohibited from engaging in the business of accumulating the savings of its members and using such accumulations for loans to its members, subject to applicable sanctions and penalties provided by law in case of violation thereof. After the cessation of its operations due to revocation of its license, the NSSLA should proceed with its dissolution, in accordance with the provisions under the Corporation Code. The dissolution of a corporation involves the termination of its corporate existence, at least, as far as the right to go on doing ordinary business is concerned, and the winding up of its affairs, the payments of its debts and distribution of its assets among the members or stakeholders or other persons involved. The board of trustees of the corporation also has the option of adopting a plan for the distribution of its assets, as stated under Section 95 of the Corporation Code.

After the revocation/suspension of its license, the Monetary Board may direct the board of trustees of the NSSLA to proceed with the voluntary dissolution of the corporation. In the event that the board of trustees refuses to effectuate such dissolution, the Monetary Board may refer the matter to the Solicitor General for the filing of a *quo warranto* case against the corporation in accordance with the provisions of the Corporation Code.

PART TWO

DEPOSIT AND BORROWING OPERATIONS

A. DEPOSITS

201-S DEMAND DEPOSITS

No NSSLAs shall have or carry upon its books for any person any demand, commercial or checking account, or any credit to be withdrawn upon the presentation of any negotiable check or draft.

202-S SAVINGS DEPOSITS

Definition. *Savings deposits* are deposits evidenced by a passbook consisting of funds deposited to the credit of one (1) or more individuals with respect to which the depositor may withdraw anytime, unless prior notice in writing of an intended withdrawal is required by the NSSLAs.

Minimum Deposit. Savings deposits with NSSLAs may be opened with a minimum deposit of ₱100.

Withdrawals. Withdrawal from a savings deposit shall be made through the presentation to the NSSLAs of a duly accomplished withdrawal slip together with the depositor's passbook.

NSSLAs shall reserve the right to require the depositor to give prior written notice of withdrawal of not more than thirty (30) days.

NSSLAs may limit the number of withdrawals that a depositor may make: *Provided*, That the number of the withdrawals allowed shall not be less than three (3) times a month. A service charge to be determined by the board of trustees of the NSSLAs and approved by the Bangko Sentral, may be charged by the NSSLAs for every withdrawal made in excess of the maximum number allowed in any one (1) month.

203-S TIME DEPOSITS

Minimum term and size of time deposits; Withdrawal of time deposits.

- a. *Term* – No time deposit shall be accepted for a term of less than thirty (30) days.
- b. *Minimum Size* – NSSLAs shall not require a minimum amount of time deposit greater than ₱1,000.
- c. *Withdrawals* – The withdrawal of a time deposit can be made only by presentation of the certificate of time deposit on the day of or after its maturity.

B. INTEREST AND FEES

211-S INTEREST ON SAVINGS DEPOSITS

Savings deposits of NSSLAs shall not be subject to any interest rate ceiling.

212-S INTEREST ON TIME DEPOSITS

Interest on time deposits shall not be subject to any interest rate ceiling.

Time of payment. Interest on time deposits may be paid at maturity or upon withdrawal or in advance: *Provided*, however, That interest paid in advance shall not exceed the interest for one (1) year.

Treatment of matured time deposits. A time deposit not withdrawn or renewed on its due date shall be treated as a savings deposit and shall earn an interest from maturity to the date of actual withdrawal or renewal at a rate applicable to savings deposits.

213-S FEES ON DORMANT SAVINGS DEPOSITS¹

Dormant savings deposits. Savings deposit shall be classified as dormant if no deposit or withdrawal has been made for the last two (2) years. A monthly dormancy fee, not exceeding thirty pesos (₱30.00), may only be imposed five (5) years

¹ Effective 25 April 2017.

after the last activity, provided the NSSLAs notified its member of the dormancy and the possible imposition of a dormancy fee at least sixty (60) days prior to the:

- a. dormancy of the account; and
- b. imposition of the fee.

Individual notifications shall be sent to the client's last known postal address/e-mail address/contact number either through postal or registered mail, courier delivery, electronic mail, text messages, telephone calls or other alternative modes of communication, as may be elected by the client.

(Circular No. 928 dated 24 October 2016)

C. DEPOSIT OPERATIONS

221-S OPENING AND OPERATION OF DEPOSIT ACCOUNTS

The following are basic provisions on the opening and operation of deposit accounts of NSSLAs.

Who may open deposit accounts. Only members who have contributed P1,000 or more to the capital of the NSSLAs may open deposit accounts with NSSLAs. A natural person, although lacking capacity to contract, may nevertheless open a savings or time deposit account for himself, provided he has sufficient discretion. However, he cannot withdraw therefrom, except through, or with the assistance of a guardian authorized to act for him. Parents may deposit for their minor children, and guardians for their wards.

Notwithstanding the provisions of the preceding paragraph, the cashier, bookkeeper and their assistants, and other employees of an NSSLAs whose duties entail the handling of cash or checks are prohibited from opening savings deposit accounts with the head office or branch of the NSSLAs in which they are assigned as such.

Identification of member-depositors. NSSLAs shall be responsible for the proper identification of their member-depositors.

Number of deposit accounts. A member-depositor may open and have more than one (1) savings deposit in his own name in the same capacity, and he may open and have various deposits in different capacities such as guardian, agent, or trustee for others.

Signature card. A signature card bearing at least three (3) specimen signatures of each member-depositor shall be required upon opening of a deposit account.

Passbook and certificate of time deposit. A savings deposit passbook, signed by the receiving teller and an authorized officer, shall be issued to a member-depositor showing, among other things, his name and address, account number, date, amount of deposit, interest credits and balance. NSSLAs shall pre-number their savings deposit passbooks. In the case of a time deposit, a certificate of time deposit signed by two (2) authorized officers, shall be issued to the member-depositor containing, among other things, his name, amount of deposit, date when the deposit was made, its due date and interest rate.

Deposits in checks and other cash items. Checks and other cash items may be accepted for deposit by NSSLAs: *Provided*, That withdrawals from such deposits shall not be made until the check or other cash item is collected.

D. BORROWINGS

231-S CONDITIONS AND LIMITS

An NSSLAs may borrow money or incur such obligation up to not more than twenty percent (20%) of the total assets of the NSSLAs, from any public lending institution, and from private banking institutions, and such private lending institutions as may be approved by the Monetary Board: *Provided*, That the proceeds of such loan shall be used exclusively to meet the normal credit requirements of its members. The Monetary Board may, in meritorious cases, raise the ceiling on the borrowing capacity of an NSSLAs to not more than thirty percent (30%) of its total assets. NSSLAs organized by employees of an entity or a corporation may borrow funds from said entity or corporation, but not vice-versa.

E. OTHER LIABILITIES

241-S DISCLOSURE OF REMITTANCE CHARGES AND OTHER RELEVANT INFORMATION¹

It is the policy of the Bangko Sentral to promote the efficient delivery of competitively-priced remittance services by banks and other remittance service providers by promoting competition and the use of innovative payment systems, strengthening the financial infrastructure, enhancing access to formal remittance channels in the source and destination countries, deepening the financial literacy of consumers, and improving transparency in remittance transactions, consistent with sound practices.

Towards this end, NBFIs under Bangko Sentral supervision, including FXDs/MCs and RAs, providing overseas remittance services shall disclose to the remittance sender and to the recipient/beneficiary, the following minimum items of information regarding remittance transactions, as defined herein:

- a. *Transfer/remittance fee* - charge for processing/sending the remittance from the country of origin to the country of destination and/or charge for receiving the remittance at the country of destination;
- b. *Exchange rate* - rate of conversion from foreign currency to local currency, e.g., peso-dollar rate;
- c. *Exchange rate differential/spread* - foreign exchange mark-up or the difference between the prevailing Bangko Sentral reference/guiding rate and the exchange/ conversion rate;
- d. *Other currency conversion charges* - commissions or service fees, if any;
- e. *Other related charges* - e.g., surcharges, postage, text message or telegram;
- f. *Amount/currency paid out in the recipient country* - exact amount of money the recipient should receive in local currency or foreign currency; and
- g. *Delivery time to recipients/ beneficiaries* - delivery period of remittance to beneficiary stated in number of days, hours or minutes.

Non-bank remittance service providers shall likewise post said information in their respective websites and display them prominently in conspicuous places within their premises and/or remittance/service centers.

In case of domestic remittance transactions, all fees to the transactions shall be charged upfront by all NBFIs under Bangko Sentral supervision from the sender/ remitter's end, with appropriate disclosure to the sender/remitter of the components of the fees being charged. This does not preclude the Bangko Sentral-supervised NBFI and/or other participants to the domestic remittance transaction from charging service fees. *Domestic remittance transaction*, for this purpose, is a transfer of funds between a sender/remitter and a beneficiary who are both within the Philippines, and is not covered by electronic payment transaction as defined under the NRPS framework.

(Circular Nos. 980 dated 6 November 2017 and 952 dated 22 March 2017)

¹ The BSFIs shall have until 27 April 2017 to comply with the provision of this Section.

PART THREE

LOANS AND INVESTMENTS

A. GENERAL PROVISIONS ON LENDING OPERATIONS

301-S GRANT OF LOANS AND OTHER CREDIT ACCOMMODATIONS

Limitations on lending authority. NSSLAs shall not commit to make any loan for amounts in excess of the total of the following amounts:

- a. Amount of cash available for loan purposes;
- b. Amount of cash which can be readily realized upon the sale or redemption of permissible investments made by NSSLAs; and
- c. Amount of credit available for loan purposes from government or private NSSLAs.

Maximum loan maturity. No loan granted by NSSLAs shall have a maturity date of more than five (5) years, except loans on the security of unencumbered real estate for the purpose of home building and home development which may be granted with maturities not exceeding twenty-five (25) years and medium or long-term loans to finance agricultural projects.

(Circular No. 1046 dated 29 August 2019)

302-S “TRUTH IN LENDING ACT” DISCLOSURE REQUIREMENTS

NSSLAs are required to strictly adhere to the provisions of R. A. No. 3765, otherwise known as the “Truth in Lending Act,” and shall make the disclosure of the true and effective cost of borrowing an integral part of every credit transaction contract.

- a. *Transactions covered.*
 - (1) Any loan, mortgage, deed of trust, advance and discount;
 - (2) Any conditional sales contract, any contract to sell, or sale or contract of sale of property or services, either for present or future delivery, under which, part or all of the price is payable subsequent to the making of such sale or contract;
 - (3) Any option, demand, lien, pledge, or other claim against, or for delivery of, property or money;
 - (4) Any purchase, or other acquisition of, or any credit upon the security of any obligation or claim arising out of any of the foregoing; and
 - (5) Any transaction or series of transactions having a similar purpose or effect.
- b. *Transactions not covered.* Considering that the specific purpose of the law is the full disclosure of the true cost of credit, the following categories of credit transactions are outside the scope of the above regulations:
 - (1) Credit transactions which do not involve the payment of any finance charge by the debtor; and
 - (2) Credit transactions in which the debtor is the one specifying a definite and fixed set of credit terms such as bank deposits, insurance contracts, sale of bonds, etc.

Definition of terms.

- a. *Creditor* (who shall furnish the information) means any person engaged in the business of extending credit (including any person who as a regular business practice makes loans or sells or rents property or services on a time, credit, or installment basis, either as principal or as agent), who requires as an incident to the extension of credit, the payment of a finance charge.

The term *creditor* shall include, but shall not be limited to, banks and banking institutions, insurance and bonding companies, savings and loan associations, credit unions, financing companies, installment houses, real estate dealers, lending investors, pawnshops, and any other person or entity engaged in the business of extending credit who requires as an incident to the extension of credit, the payment of a finance charge.

- b. *Person* means any individual, corporation, partnership, NSSLA, or other organized group of persons, or the legal successor or representative of the foregoing, and includes the Philippine Government or any agency thereof, or any other government, or any of its political subdivisions, or any agency of the foregoing.

- c. *Cash price or delivered price* (in case of trade transactions) is the amount of money which would constitute full payment upon delivery of the property (except money) or service purchased at the creditor's place of business. In the case of financial transactions, cash price represents the amount of money received by the debtor upon consummation of the credit transaction, net of finance charges collected at the time the credit is extended (if any).
- d. *Down payment* represents the amount paid by the debtor at the time of the transaction in partial payment for the property or service purchased.
- e. *Trade-in* represents the value of an asset, agreed upon by the creditor and debtor, given at the time of the transaction in partial payment for the property or service purchased.
- f. *Non-finance charges* correspond to the amounts advanced by the creditor for items normally associated with the ownership of the property or of the availment of the service purchased which are not incident to the extension of credit. For example, in the case of the purchase of an automobile on credit, the creditor may advance the insurance premium as well as the registration fee for the account of the debtor.
- g. *Amount to be financed* consists of the cash price plus non-finance charges less the amount of the down payment and value of the trade-in.
- h. *Finance charge* includes interest, fees, service charges, discounts, and such other charges incident to the extension of credit.
- i. *Simple annual rate* is the uniform percentage which represents the ratio between the finance charge and the amount to be financed under the assumption that the loan is payable in one (1) year with single payment upon maturity and there are no up-front deductions to principal.

For loans with terms different from the above assumptions, the effective annual interest rate shall be calculated and disclosed to the borrower as the relevant true cost of the loan comparable to the concept of simple annual rate.

For loans with contractual interest rates stated on monthly basis, the effective interest rate may be expressed as a monthly rate.

In accordance with the Philippine Accounting Standards (PAS) definition, *effective interest rate* is the rate that exactly discounts estimated future cash flows through the life of the loan to the net amount of loan proceeds. For consistency, methodology and standards for discounted cash flow models shall be prescribed to be used for the purpose.

Information to be disclosed. The following are the minimum information required to be disclosed to NSSLAs borrowers (sample form in *Appendix S-5*):

- a. The total amount to be financed;
- b. The finance charges expressed in terms of pesos and centavos;
- c. The net proceeds of the loan; and
- d. The percentage that the finance charge bears to the total amount to be financed expressed as a simple annual rate or an effective annual interest rate as described in Item "h" of this Section (*Definition of terms*). Effective annual interest rate may also be quoted as a monthly rate in parallel with the quotation of the contractual rate.

NSSLAs are required to furnish each borrower a copy of the disclosure statement, prior to the consummation of the transaction.

Inspection of contracts covering credit transactions. NSSLAs shall keep in their office or place of business copies of contracts covering all credit transactions entered into by them which involve the extension of credit to another and the payment of finance charges therefor. Such copies shall be available for inspection or examination by the appropriate supervising department of the Bangko Sentral.

Dissemination of relevant information. NSSLAs shall ensure that all persons to whom credit is extended are well informed of the salient provisions of Republic Act No. 3765, otherwise known as the "Truth in Lending Act" as contained in the revised format of disclosure statement in *Appendix S-5* through any acceptable medium of communication such as, but not limited to, posters, brochures, pamphlets, leaflets, educational videos, corporate websites, infographics and social media platforms. Said information must be conspicuously displayed and made available at all times, in physical or electronic format, to all persons to whom credit is extended by NSSLAs subject to the consumer protection standards and social media risk management guidelines. Such medium of communication shall include an explicit notification that the disclosure statement in writing is a required attachment to the credit transaction contract which NSSLAs shall provide all persons to whom credit is extended with a copy of said disclosure statement prior to the consummation of the credit transaction.

Sanctions and penal provisions. Non-compliance with any of the provisions of this Section shall be subject to the appropriate monetary penalties under Sec. 811-S (*Guidelines on the imposition of monetary penalties*) depending on the severity of non-disclosure, number of loans and amount involved in the violation. In addition to sanctions under R.A. No. 3765, the following sanctions may be imposed:

- a. *First offense.* Reprimand on the erring officer/s;
- b. *Second offense.* Reprimand on the entire board of trustees; and
- c. *Subsequent offense/s:*
 - (1) Suspension of the erring officer/s and/or entire board of trustees; and
 - (2) Restriction on lending activities.

This is without prejudice to other penalties and sanctions provided under Sections 36 and 37 of R.A. No. 7653.

(Circular Nos. 1052 dated 2 October 2019 and 988 dated 20 December 2017)

303-S SECURED LOANS

Loans by an NSSLA may be secured by any or all of the following:

- a. Mortgages on registered real estate;
- b. Chattel mortgages on harvested or stored crops of non-perishable character;
- c. Chattel mortgages on livestock, tools, equipment or machinery, supplies or materials, merchandise and other personal properties;
- d. Assignment of quedans which gives the right of disposal of readily marketable products;
- e. Time and/or savings deposits and/or capital contribution;
- f. Pledge of bonds, stock and other securities of GOCCs and other bonds, stocks or securities which are non-speculative in nature;
- g. Land transfer certificates issued by the government to tenant farmers, under the agrarian reform program to the extent of sixty percent (60%) of the value of the farm holdings: *Provided*, That a certification shall be first secured from the office of the Registry of Deeds to the effect that the Land Transfer Certificate being presented is valid; and
- h. Other securities as may be approved by the Monetary Board.

304-S POLICIES ON SALARY-BASED GENERAL-PURPOSE CONSUMPTION LOANS¹

Policy statement. The Bangko Sentral recognizes the helpful role of salary-based, consumer lending schemes in allowing an individual borrower to manage his/her cash flows provided these are granted under sound credit standards and fair consumer practices. The Bangko Sentral likewise encourages competition and transparency to promote efficient and innovative delivery of financial services and fair dealing with customers.

Definition; Transactions covered; Exclusions; Report.

- a. **Definition.** *Salary-based general-purpose consumption loans.* Refer to unsecured loans for a broad range of consumption purposes, granted to individuals mainly on the basis of regular salary, pension or other fixed compensation, where repayment would come from such future cash flows, either through salary deductions, debits from the borrower's deposit account, mobile payments, pay-through collections, over-the-counter payments or other type of payment arrangement agreed upon by the borrower and lender.
- b. **Transactions Covered.** Salary-based general-purpose consumption loans may include credit accommodations for education, hospitalization, emergency, travel, household and other personal consumption needs.
- c. **Exclusions.** Credit cards, motor vehicles and other personal loans which are covered by other existing applicable regulations are excluded from the coverage of this Section.
- d. **Report.** For the purpose of reporting in the Financial Reporting Package, financial assistance under an approved fringe benefit program should be reported/classified according to the purpose of the financial assistance (e.g., housing/real estate, motor vehicle, salary-based general-purpose consumption, etc.)

¹ This Section shall apply to all salary-based general purpose consumption loans as defined herein including those outstanding prior to 26 September 2015-

Credit granting.

- a. Policies of financial institutions (FIs) shall be consistent with best practices and sound credit processes prescribed under Bangko Sentral regulations, including a comprehensive assessment of the borrower's creditworthiness, and shall not be reliant on mere formula such as those automatically granted based on certain multiples of monthly salary or other regular compensation.
- b. Individual borrowing capacity should be prudently assessed considering reasonable estimates of total personal and household indebtedness as well as disposable income available for family and personal needs after considering debt servicing.
- c. Original loan term shall not exceed three (3) years but may have longer maturity in meritorious cases provided that in no case shall maturity exceed five (5) years.

No loan renewal shall be granted without re-assessing borrowing capacity and establishing continuing creditworthiness. Further, no loan renewal shall be allowed without payment of accrued interest receivable and substantial reduction in principal.

- d. In the case of loan "takeout" from another FI, the FI taking out the loan(s) should ensure that the loan from the originating FI has been fully settled. FIs are expected to institute adequate controls over loan "takeout" such as: (a) directly releasing the loan proceeds to the FIs where the loan will be taken out; and (b) obtaining a copy of the official receipt evidencing full settlement of account from the originating FI, among others.

Consumer protection. FIs are required to strictly adhere to Bangko Sentral regulations on Financial Consumer Protection as prescribed under Part Seven entitled Bangko Sentral Regulations on Financial Consumer Protection.

Sanctions. The Monetary Board may, at its evaluation and discretion, impose sanctions on an FI and/or its Board, directors and officers, proportionate to the gravity/seriousness of the offense in cases of persistent non-observance of the provisions contained herein.

(Circular Nos. 903 dated 29 February 2016, 886 dated 08 September 2015, and 837 dated 18 June 2014)

305-S POLICY ON LOAN LIMIT TO A SINGLE BORROWER (SBL)

Policy on Loan Limit to a Single Borrower (SBL). The NSSLAs have shown continued growth in terms of size and complexity of overall operations, offering wider range of credit facilities to meet the increasing demand for financial products and services of their members. While the Bangko Sentral recognizes that the NSSLAs have to adequately serve their members' financial needs, their lending operations shall be bound by the standards and expectations set forth in the NSSLA Law and its implementing rules and regulations. Consistent with policies to encourage judicious utilization of credit among the members and to lay down the minimum requirements and standards under which NSSLAs may organize and operate, the following rules on loan limit to a single borrower are hereby adopted to:

- a. ensure adherence, consistency and uniformity of application of determination of loan limit;
- b. prevent practices prejudicial to the members or over-indebtedness; and
- c. achieve the objectives consistent with the nature of operation of NSSLAs as self-help institutions.

Loan limit to a single borrower. An NSSLA may grant loans but shall not exceed the member's deposits and capital contributions, plus twelve (12) months of his regular salary as the NSSLA may allow or up to seventy percent (70%) of the fair market value (FMV) of any property acceptable as collateral on first mortgage that he may offer as security.

It shall be the primary responsibility of the NSSLA, its trustees and officers to ensure compliance with the SBL. The Board of Trustees (BOT) shall adopt appropriate policies and procedures, including a system to reasonably monitor compliance, which shall be integrated in the NSSLA's applicable risk management system, e.g., credit, compliance, and/or operational risk management systems.

For this purpose, accurate and adequate records in support thereof shall be made available for verification by the Bangko Sentral.

SBL guidelines. For purposes of implementing the foregoing, the following guidelines shall apply:

- a. **Timing of determining the limit.** The SBL shall be determined at the time of approval of a loan and/or its renewal/restructuring/extension or its equivalent.
- b. **Amount of the loans.** The amount of loans to be used in determining compliance with the SBL of a member shall be the sum of gross amount of the new loan he applied for and the total outstanding balance of his existing loans with the NSSLA.

- c. **SBL in formula.** The SBL shall be computed, as follows:

SBL =	Basic limit	Sum of deposits and capital contributions (including the fixed and capital contribution buffer or other names they shall be called)
	Plus	
	Variable limit	Twelve (12) months regular salary, as the NSSLA may allow, or seventy percent (70%) of FMV of the property acceptable as collateral on first mortgage offered as security

In determining the variable limit, the seventy percent (70%) of FMV parameter shall apply only when a collateral on first mortgage is offered as security to the new loan. Without such offering of collateral for a new loan, the variable limit shall be the twelve (12) months regular salary as herein defined: *Provided*, That notwithstanding the offering of a collateral, whenever the twelve (12) months regular salary is higher than the amount equivalent to seventy percent (70%) of FMV, the said twelve (12) months regular salary may be considered as the variable limit.

- d. **Twelve (12) months regular salary.** The phrase *twelve (12) months regular salary* cited under Section 7, R.A. No. 8367 shall refer to the total amount of regular salary of a member for a period not exceeding twelve (12) months. The following shall be considered in the policies, procedures and processes to be adopted by an NSSLA in determining the total amount of regular salary of a member:

- (1) Determination of salary. In determining the amount of salary, reference shall be made to the proof establishing the same. In general, salary is evidenced by a pay slip or its equivalent. Salary of an employee-member include the basic salary and other benefits, such as 13th month pay and bonuses mandated under the collective bargaining agreement: *Provided*, That in the case of a member-retiree, it shall refer to his retirement pension.
- (2) Test of regularity. A salary shall be considered regular if the payment, not the amount, is assured as established by way of a company or national policy, law, tradition or collective bargaining agreement.

In general, a member sources his regular salary from a single employer or payor. However, where an employee-member is employed in more than one (1) company, or a member-retiree is employed in a company, his total regular salary for a period not exceeding twelve (12) months may cover such other sources of regular salary as may be allowed by the NSSLA concerned, taking into consideration its risk appetite and adequacy of its risk management system in place.

- e. **Utilization of deposits and capital contributions.** The outstanding balances of deposits and capital contributions owned and registered in the name of a qualified member-borrower at the time of approval of his loan and/or the renewal/restructuring/extension thereof or its equivalent shall be utilized in determining his SBL. In case of co-owned deposit or capital contribution accounts, the NSSLA may require a declaration from the co-owners of a specific account to certify their respective shares or ownership, in order to correctly determine the members' SBL. In the absence of said declaration, his percentage share equivalent to the amount of the co-owned account divided by the number of co-owners, shall be included in the computation of the SBL.
- f. **FMV.** For purposes of complying with the variable limit of seventy percent (70%) of FMV of property acceptable as collateral on first mortgage offered as security of a loan, the following guidelines shall apply:
- (1) Properties with market value of at least ₱5 million or more should be appraised by independent appraisers. An in-house appraisal of all collaterals referred herein shall be made every other year: *Provided*, That immediate re-appraisal shall be conducted on such collaterals which materially decline in value; and
 - (2) Those below ₱5 million may be appraised in-house; *Provided*, That appropriate policies and procedures are adopted to ensure the reliability thereof: *Provided, further*, That an NSSLA is not precluded from engaging the services of an independent appraiser for properties with market value of less than ₱5 million.
- g. **Documentary and other requirements.** The determination of and adherence to the SBL shall be duly documented to provide audit trail. The variables used in the determination thereof shall be duly supported.

For the purpose of verifying compliance with the SBL, the Bangko Sentral has the authority to disregard unsupported amounts and/or any variable in the computation of the SBL.

- h. **Certification of compliance.** NSSLAs shall submit within 15 days after end of each reference quarter, to the appropriate supervising department of the Bangko Sentral, a notarized certification stating that the NSSLA concerned has complied with the SBL requirement. The certification shall be executed by the NSSLA president.
- i. **Enforcement actions.** The Bangko Sentral may deploy its range of supervisory actions to promote adherence to standards and principles set forth in this Section, to bring about timely corrective actions and compliance with Bangko Sentral directives and ensure that NSSLAs operate in sound, lawful and orderly manner. Non-observance of the provisions of this Section, may subject the NSSLA, its trustees and officers to appropriate sanctions. Any administrative sanctions imposed by the Bangko Sentral shall be without prejudice to the imposition of penalties under Section 23 of R.A. No. 8367 against the NSSLA, its trustees, officers and/or employees and agents, and criminal charges against such persons under applicable laws.

(Circular No. 1026 dated 6 December 2018)

306-S INTEREST AND OTHER CHARGES

The following rules shall govern the rates of interest and other charges on loans granted by NSSLAs.

Interest in the absence of stipulation. The rate of interest for the loan or forbearance of any money, goods or credit and the rate allowed in judgments, in the absence of express contract as to such rate of interest, shall be six percent (6%) per annum.

Escalation clause; when allowable. Parties to an agreement pertaining to a loan or forbearance of money, goods or credits may stipulate that the rate of interest agreed upon may be increased in the event that the applicable maximum rate of interest is increased by the Monetary Board: *Provided*, That such stipulations are valid only if there is also a stipulation in the agreement that the rate of interest agreed upon shall be reduced in the event that the applicable maximum rate of interest is reduced by law or by the Monetary Board: *Provided, further*, That the adjustment in the rate of interest agreed upon shall take effect on or after the effectivity of the increase or decrease in the maximum rate of interest.

Accrual of interest earned on loans and other credit accommodations. Accrual of interest earned on non-performing loans and other credit accommodations shall not be allowed.

Method of computing interest. NSSLAs shall only charge interest based on the outstanding balance of a loan at the beginning of an interest period.

For a loan where the principal is payable in installments, interest per installment period shall be calculated based on the outstanding balance of the loan at the beginning of each installment period.

Towards this end, all loan-related documents shall show repayment schedules in a manner consistent with this provision. Marketing materials and presentations shall likewise be consistent with this provision.

(Circular No. 1046 dated 29 August 2019)

307-S PAST DUE ACCOUNTS AND NON-PERFORMING LOANS¹

The following regulations shall guide BSFIs in determining their past due accounts and non-performing loans.

Definition of terms. For purposes of this Section, the following definitions shall apply:

- a. *Restructured loans* shall refer to loans and other credit accommodations the original contractual terms and conditions of which have been modified in accordance with a formal restructuring agreement that sets forth a revised schedule of payments for the purpose of lessening the financial difficulty of the borrower and maximizing collection and realizable economic value on an obligation within a reasonable period of time. The modification may include, but is not limited to, change in principal due, maturity, interest rate and other charges, collateral, or other terms and conditions.
- b. *Items in litigation* shall refer to loans or other credit accommodations for which cases, such as collection or foreclosure, have been filed in court or sheriff's office, as the case may be. The loan or other credit accommodation shall remain in this account during the pendency of the proceedings, until full payment, restructuring of the obligation, foreclosure of the collateral, or such other disposition is made as would cause such proceedings to cease.

¹ Effective from 10 February 2017 up to 31 December 2017, BSFIs shall make the necessary revisions in their management information and reporting systems relating to past due and non-performing loans. Effective 01 January 2018, past due and NPLs shall be mandatorily reported in accordance with the requirements of this Section.

Accounts considered past due. As a general rule, loans, investments, receivables, or any financial asset, including restructured loans, shall be considered past due when any principal and/or interest or installment due, or portions thereof, are not paid at their contractual due date, in which case, the total outstanding balance thereof shall be considered as past due. However, NSSLAs may provide a cure period on a credit product-specific basis for loans with over-the-counter payment arrangement, not to exceed thirty (30) calendar days within which to allow the borrowers to catch up on their late payment without being considered as past due: *Provided*, That any cure period policy shall be based on verifiable collection experience and reasonable judgment that support tolerance of occasional payment delays: *Provided*, further, That the observance of a cure period policy shall not preclude the timely adverse classification of an account that has developed material credit weakness/es, and that NSSLAs shall regularly review the reasonableness of its cure period policy.

Non-performing loans. Loans, investments, receivables, or any financial asset shall be considered non-performing, even without any missed contractual payments, when it is considered impaired under existing accounting standards¹, classified as doubtful or loss, in litigation, and/or there is evidence that full repayment of principal and interest is unlikely without foreclosure of collateral, if any. All other loans, even if not considered impaired, shall be considered non-performing if any principal and/or interest are unpaid for more than ninety (90) days from contractual due date, or accrued interests for more than ninety (90) days have been capitalized, refinanced, or delayed by agreement.

Microfinance and other small loans with similar credit characteristics shall be considered non-performing after contractual due date or after it has become past due.

Restructured loans shall be considered non-performing. However, if prior to restructuring, the loans were categorized as performing, such classification shall be retained.

Non-performing loans, investments, receivables, or any financial asset (and/or any replacement loan) shall remain classified as such until (a) there is sufficient evidence to support that full collection of principal and interests is probable and payments of interest and/or principal are received for at least six (6) months; or (b) written-off.

Updating of information provided to credit information bureaus. NSSLAs which have provided adverse information, such as the past due or litigation status of loan accounts, to credit information bureaus, or any organization performing similar functions, shall submit monthly reports to these bureaus or organizations on the full payment or settlement of the previously reported accounts within five (5) business days from the end of the month when such full payment was received. For this purpose, it shall be the responsibility of the reporting NSSLAs to ensure that their disclosure of any information about their borrowers/clients is with the consent of borrowers concerned.

(Circular Nos. 1046 dated 29 August 2019 and 941 dated 20 January 2017)

308-S LOAN PORTFOLIO AND OTHER RISK ASSETS REVIEW SYSTEM

(Deleted by Circular No. 1046 dated 29 August 2019)

309-S RESTRUCTURED LOANS

(Deleted by Circular No. 1046 dated 29 August 2019)

310-S ACQUIRED ASSETS IN SETTLEMENT OF LOANS

The following rules shall govern assets acquired in settlement of loans.

Posting and Maintaining Acquired Assets. NSSLAs shall post at all times in a conspicuous place in the premises of their head office and each of their service unit a list of acquired assets together with the corresponding lowest price at which the NSSLA is willing to sell such property. Any real property acquired shall be disposed of by the NSSLA within a period of five (5) years: *Provided, however*, That the NSSLA may, after said period, continue to hold the property for its own use, subject to the limitations of Section 18(b) of R.A. No. 8367.

Booking

- a. Real and Other Properties Acquired (ROPA) in settlement of loans through foreclosure or dation in payment shall be booked under the ROPA account as follows:
 - (1) Upon entry of judgment in case of judicial foreclosure;
 - (2) Upon execution of the Sheriff's Certificate of Sale in case of extrajudicial foreclosure; and
 - (3) Upon notarization of the Deed of Dacion in case of dation in payment (*dacion en pago*).

¹ Applicable accounting standard is PAS 39 until 31 December 2017 and International Financial Reporting Standards (IFRS) 9 starting 01 January 2018. A financial asset or a group of financial assets is impaired when there is objective evidence that its recoverable value is less than its carrying amount, as a result of one or more loss events that occurred after the initial recognition of the asset and that the loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. It may not be possible to identify a single, discrete event that caused the impairment. Rather, the combined effect of several events may have caused the impairment.

ROPA shall be booked initially at the carrying amount of the loan (i.e., outstanding loan balance adjusted for any unamortized premium or discount less allowance for credit losses computed based on Philippine Accounting Standard (PAS) 39 provisioning requirements, which take into account the fair value of the collateral) plus booked accrued interest less allowance for credit losses (computed based on PAS 39 provisioning requirements) plus transaction costs incurred upon acquisition (such as non-refundable capital gains tax and documentary stamp tax paid in connection with the foreclosure/purchase of the acquired real estate property).

- b. The carrying amount of ROPA shall be allocated to land, building, other non-financial assets and financial assets (e.g., deposits or capital contribution in the NSSLA) based on their fair values, which allocated carrying amounts shall become their initial costs.
- c. The non-financial assets portion of ROPA shall remain in ROPA and shall be accounted for as follows:
 - (1) Land and building shall be accounted for using the cost model under PAS 40 "Investment Property";
 - (2) Buildings shall be depreciated over the remaining useful life of the assets, which shall not exceed ten (10) years from the date of acquisition; and
 - (3) Land and buildings shall be subject to the impairment provisions of PAS 36 "Impairment".
- d. Financial assets shall be accounted for in accordance with the provisions of PAS 39.
- e. Claims arising from deficiency judgments rendered in connection with the foreclosure of mortgaged properties shall be judged under the real account "Deficiency Judgment Receivable"; while probable claims against the borrower arising from the foreclosure of mortgages properties shall be lodged under the contingent account "Deficiency Claims Receivable".
- f. Before foreclosing or acquiring any property in settlement of loans, it must be properly appraised to determine its true economic value. If the amount of ROPA to be booked exceeds P5.0 million, the appraisal must be conducted by an independent appraiser acceptable to the Bangko Sentral. An in-house appraisal of all ROPAs shall be made at least every other year: *Provided*, That immediate re-appraisal shall be conducted on ROPAs which materially decline in value.

The provisions of this Section shall be applied to all outstanding ROPAs and sales contract receivables (SCR): *Provided*, That for properties acquired before 01 January 2005, the carrying amount of the acquired properties when initially booked under ROPA shall be the cost subject to depreciation and impairment testing, which shall be reckoned from the time of acquisition.

Sales contract receivable

- a. SCR shall be recorded based on the present value of the installments receivables discounted at the imputed rate of interest. Discount shall be accreted over the life of the SCR by crediting interest income using the effective interest method. Any difference between the present value of the SCR and the derecognized assets shall be recognized in profit or loss at the date of sale in accordance with the provisions of PAS 18 "Revenue": *Provided*, *furthermore*, That SCR shall be subject to impairment provision of PAS 39.

The provision of this Section (*Sales contract receivable*) shall be applied to all outstanding ROPAs and SCRs: *Provided*, That for properties acquired before 01 January 2005, the carrying amount of the acquired properties when initially booked under ROPA shall be the cost subject to depreciation and impairment testing, which shall be reckoned from the time of acquisition.

- b. SCRs which meet all the requirements/conditions enumerated below are considered performing assets and not subject to classification:
 - (1) That there has been a down payment or installment payments on the principal of at least twenty percent (20%) of the agreed selling price;
 - (2) That payment of the principal must be in equal installments or in diminishing amounts and with maximum intervals of one (1) year;
 - (3) That any grace period in the payment of principal shall not be more than one (1) year; and
 - (4) That there is no installment payment in arrear either on principal or interest: *Provided*, That an SCR account classified "Substandard" may only be upgraded to pass/unclassified/performing status after a satisfactory track record of at least three (3) consecutive payments of the required amortization of principal and/or interest has been established.

The Bangko Sentral however, reserves the right to require that specific provision on ROPA and SCR be made, if based on its assessment, the NSSLA is unable to make the necessary impairment provisioning.

(Circular Nos. 1143 dated 12 April 2022 and 1046 dated 29 August 2019)

B. LOANS/CREDIT ACCOMMODATIONS TO TRUSTEES, OFFICERS, STOCKHOLDERS AND THEIR RELATED INTERESTS

321-S GENERAL POLICY

The transactions of all trustees or officers with the NSSLA shall not be under terms more favorable than those transacted with other members.

322-S DIRECT/INDIRECT BORROWINGS; CEILINGS

No NSSLA shall directly or indirectly make any loan to any trustee or officer of such NSSLA, either for himself or as agent or as partner of another, except with the written approval of the majority of the trustees of the NSSLA, excluding the trustee concerned: *Provided*, That the aggregate loans to such trustees and officers shall not exceed twenty percent (20%) of the total capital contributions of the NSSLA.

323-S RECORDS; REPORTS

In all cases of accommodations granted to trustees and officers under Sec. 322-S, the written approval of the majority of the trustees of the NSSLA, excluding the trustee concerned, shall be entered upon the records of the NSSLA and a copy of such entry shall be transmitted forthwith to the appropriate supervising department of the Bangko Sentral within twenty (20) business days from the date of approval.

324-S SANCTIONS

The office of any trustee or officer of an NSSLA who violates the provisions of these rules on accommodations granted to trustee and officers shall immediately become vacant and said trustees or officer shall be punished by imprisonment of not more than one (1) year nor more than ten (10) years and by a fine of not less than P5,000 nor more than P50,000 pursuant to Section 15 of R.A. No. 8367.

(Circular No. 1143 dated 12 April 2022)

C. INVESTMENTS

331-S FUND INVESTMENTS

Consistent with the policies under the NSSLA Law (Republic Act No. 8367), NSSLAs shall primarily utilize the accumulated savings of its members for loans to service household needs of such members. However, temporary excess funds may be placed in safe and liquid investment outlets pending their deployment to support core operations. Excess funds generated from deposits and withdrawable capital contributions which the NSSLAs are unable to utilize for prudent lending activities may be returned to their contributing members at the discretion of the board, provided that, the association, thereafter, remains compliant with the required capital-to-risk assets ratio and two percent withdrawable share reserve on total capital contributions.

The responsibility for supervising the NSSLAs investment account rests solely with the board of trustees. They have a fiduciary duty to the members and depositors, and are charged with an implied trust to use funds only for permitted purposes. They should ensure that risks in the investment portfolio should be minimized to ensure that liquidity and marketability are maintained. They must recognize that the investment account is primarily a secondary reserve for liquidity rather than a vehicle to generate speculative profits.

It is therefore imperative that the board of trustees adopt policies that clearly define the investment strategy and provide guidance to management on the direction and the level of risk the NSSLA is prepared to assume over its investments. It is through established objectives, strategies and policies that the board can actively monitor the appropriateness of NSSLA's risk profile and perform overall oversight function over its investment activities. A written investment policy duly approved by the Board shall contain at the minimum, the following:

- a. An explicit statement that outlines the investment objectives, which shall be consistent with applicable law;
- b. Types of permissible investments taking into consideration the safety and liquidity of such investments;
- c. Approval authorities (placement and termination) and corresponding limits;
- d. Concentration limits;
- e. Procedures on monitoring the status of investments and the frequency of reporting to the Board of Trustees;
- f. Procedures to safekeep all relevant records and documents of the investment; and
- g. Periodic review and updating of the investment policy.

An NSSLA may invest its funds in any or all of the following:

- a. In sound non-speculative enterprises, as well as in bonds, securities, and other obligations issued by the Government of the Philippines, or any of its political subdivisions, instrumentalities, or corporations including government-owned or controlled corporations (hereinafter referred to as the “government”), subject to the following conditions:
 - (1) The credit needs of the members shall be served/satisfied first;
 - (2) Investment other than those bonds, securities, and other obligations issued by the Government should meet all of the following criteria:
 - (a) Safe. The value of the investment is protected and/or guaranteed, i.e., the full amount invested can be collected with certainty;
 - (b) Readily marketable. The security is quoted in an active market and can readily be bought and sold. It can readily be converted into cash, or exchanged with ease in the market;
 - (c) High grade. The security must have the highest credit rating¹ given by a reputable credit rating agency recognized by Bangko Sentral²; and
 - (d) Locally issued. Peso-denominated and issued by corporations created or organized in the Philippines under its laws; and
 - (3) The total aggregate amount of investment shall not exceed ten percent (10%) of the NSSLA’s total assets. Investments in excess of ten percent (10%) shall require prior approval of the Bangko Sentral and shall be subject to regular review during general examination if the limit approved is still appropriate in the circumstance.

Transitory provision. NSSLAs with outstanding investments that: (1) exceed the aggregate allowable limit except those previously authorized by Bangko Sentral; and/or (2) are not compliant with any of the conditions/provisions set forth in this Section, shall be given ninety (90) days from 27 February 2018 to propose an action plan duly approved by the Board of Trustees to achieve full compliance.

The action plan, which is subject to monitoring by the Bangko Sentral, shall provide for the details of the outstanding investments of the NSSLAs with corresponding divestment timelines for those which are not compliant with any of the conditions/provisions of this Section. Non-compliance with the action plan without justifiable cause/reason shall subject the Association and/or the responsible trustees/officers to applicable sanction/s.

- b. In real property, in an aggregate amount not exceeding at any one time five percent (5%) of the total assets of such NSSLA; and
- c. In furniture, fixtures, furnishings and equipment, and leasehold improvements for its offices, in amount not exceeding at any one time ten percent (10%), of its total capital contribution.

(Circular No. 994 dated 29 January 2018)

332-S MARKING TO MARKET OF FINANCIAL INSTRUMENTS

Financial instruments that are required to be classified and measured at fair value, within the scope of PFRS 9 under *Appendix S-16*, shall be marked-to-market in accordance with the provisions of PFRS 13 on Fair Value Measurement and the related rules and regulations issued by the Securities and Exchange Commission (SEC). Investments in debt instruments shall be marked-to-market following the guidelines set out in *Appendix Q-23*.

NSSLAs and the concerned officers found to have violated the provisions of these regulations shall be subject to enforcement actions under Sec. 161-S (*PFRS/PAS*).

(Circular No. 1047 dated 29 August 2019)

¹ With credit rating of “AAA” or its equivalent for long-term issuances and 1 (Best grade) or its equivalent for short-term issuances.

² The provisions of Sec. 1131 (*Recognition of PhilRatings as domestic credit rating agency for bank supervisory purposes*) and Sec. 1132 (*Recognition of Fitch Singapore Pte., Ltd. as International credit rating agency for bank supervisory purposes*) of the MORB, shall apply for purposes of identifying reputable credit rating agencies recognized by Bangko Sentral.

PART FOUR

ELECTRONIC SERVICES AND OPERATIONS

401-S ELECTRONIC PAYMENT AND FINANCIAL SERVICES

The guidelines concerning electronic payment and financial services, as may be applicable, are found in Sec. 701-Q.

Requirements for the grant of authority to offer EPFS. Pursuant to Sec. 111-S on the Bangko Sentral Policy and Regulations on Licensing, BSFIs that intend to offer EPFS shall obtain the appropriate authority/license, as follows:

Classification	Category of License/Authority
Advanced EPFS	Type A ¹ /B ²
Basic EPFS	Type C

BSFIs shall observe the “Guidelines on Licensing of Electronic Payment and Financial Services” shown in *Appendix Q-79*.

Reportorial requirements. BSFIs shall provide the Bangko Sentral with the required data and updates on their EPFS.

- a. **Required Reports.** The following reports shall be submitted to the appropriate supervising department of the Bangko Sentral in the manner prescribed under *Appendix S-2*:

- (1) EPFS Transactions and Indicators; and
- (2) Changes and Enhancements in EPFS

- b. **Sanctions.** Failure to comply with the reportorial requirements shall subject the concerned BSFI to applicable sanctions for “Erroneous/Delayed/Erroneous and Delayed/Unsubmitted reports” as prescribed under Sec. 162-S.

Enforcement action. Failure to comply with the provisions of this Section shall cause the concerned BSFI to be subject to enforcement action in accordance with Sec. 002-Q and/or Sec. 111-S (*Enforcement actions*).

(Circular Nos. 1143 dated 12 April 2022 and 1033 dated 22 February 2019)

402-S ISSUANCE AND OPERATIONS OF ELECTRONIC MONEY

The following guidelines shall govern the issuance of electronic money (e-money) and the operations of electronic money issuers (EMIs).

Policy statement. It is the policy of the Bangko Sentral to foster the development of efficient and convenient retail payment and fund transfer mechanism in the Philippines. The availability and acceptance of e-money as a retail payment medium will be promoted by providing the necessary safeguards and controls to mitigate the risks associated in an e-money business.

Definitions.

E-money shall mean monetary value as represented by a claim on its issuer, that is –

- a. electronically stored in an instrument or device;
- b. issued against receipt of funds of an amount not lesser in value than the monetary value issued;
- c. accepted as a means of payment by persons or entities other than the issuer;
- d. withdrawable in cash or cash equivalent; and
- e. issued in accordance with this Section.

Electronic money issuer shall be classified as follows:

- a. Banks (hereinafter called EMI- Bank);
- b. NBFI supervised by the Bangko Sentral (hereinafter called EMI-NBFI); and
- c. Non-bank institutions registered with the Bangko Sentral as a money transfer agent under Sec. 108-N (*Money Service Business Operations*) of the MORNBF (hereinafter called EMI-Others).

¹ This applies to BSFIs that *can* be assessed against the prudential criteria provided in the Policy and Regulations on Licensing. These applicants must have been examined by the Bangko Sentral.

² This applies to proponents that *cannot* be assessed against the prudential criteria provided in the Policy and Regulations on Licensing. These include newly-established BSFIs and new applicants for an authority to operate as “Electronic Money Issuer-Others”.

For purposes of this Section:

- a. *Electronic instruments or devices* shall mean cash cards, e-wallets accessible via mobile phones or other access device, stored value cards, and other similar products.
- b. E-money issued by NSSLAs shall not be considered as deposits.

Prior Bangko Sentral approval NSSLAs planning to be an EMI-NBFI shall comply with the requirements of Sec. 401-S and with Sec. 173-Q, when applicable.

Common provisions. In addition to the provisions under Sec. 701-Q (*Compliance with relevant regulations*), EMIs shall comply with the following requirements:

- a. E-money instrument issued shall be subject to aggregate monthly load limit of P100,000 unless a higher amount has been approved by the Bangko Sentral. In case an EMI issues several e-money instruments to a person (e-money holder), the total amount loaded in all the e-money instruments shall be consolidated in determining compliance with the aggregate monthly load limit;
- b. EMIs shall put in place a system to maintain accurate and complete record of e-money instruments issued, the identity of e-money holders, and the individual and consolidated balances thereof. The system must have the capability to monitor the movement of e-money transactions and link e-money instruments issued to common e-money holders. The susceptibility of a system to intentional or unintentional misreporting of transaction and balances shall be sufficient ground for imposition by the Bangko Sentral of sanctions, as may be applicable.
- c. E-money may only be redeemed at face value. It shall not earn interest nor rewards and other similar incentives convertible to cash, nor be purchased at a discount. E-money is not considered a deposit, hence, it is not insured with the PDIC.
- d. EMIs shall not ensure that e-money instruments clearly identify the issuer who is ultimately responsible to the e-money holders. This shall be communicated to the client who shall acknowledge the same in writing.
- e. It is the responsibility of EMIs to ensure that their distributors/e-money agents comply with all applicable requirements of the Anti-Money Laundering laws, rules and regulations.
- f. EMIs shall provide an acceptable redress mechanism to address the complaints of its customers.
- g. EMIs shall disclose in writing and its customers shall signify agreement to the information embodied in Item “c” above upon their participation in the e-money system. In addition, it shall provide clear guidance in English and Filipino on consumers’ right of redemption, including conditions and fees for redemption, if any. Information on available redress procedures for complaints together with the address and contact information of the issuer shall also be provided.
- h. Prior to the issuance of e-money, EMIs should ensure that the following minimum systems and controls are in place:
 - (1) Sound and prudent management, administrative and accounting procedures and adequate internal control mechanisms;
 - (2) Properly-designed computer systems which are thoroughly tested prior to implementation;
 - (3) Appropriate security policies and measures intended to safeguard the integrity, authenticity and confidentiality of data and operating processes;
 - (4) Adequate business continuity and disaster recovery plan; and
 - (5) Effective audit function to provide periodic review of the security control environment and critical systems.
- i. EMIs shall provide the SDC quarterly statements containing, among others, information on investments, volume of transactions, total outstanding e-money balances, and liquid assets in such forms as may be prescribed later on.
- j. EMIs shall notify the Bangko Sentral in writing of any change or enhancement in the e-money facility thirty (30) days prior to implementation. If said change or enhancement requires prior Bangko Sentral approval, the same shall be evaluated accordingly. Any change or enhancement that shall expand the scope or change the nature of the e-money instrument shall be subject to prior approval of the Deputy Governor of the appropriate sector of the Bangko Sentral. These changes or enhancements may include the following:
 - (1) Additional capabilities of the e-money instrument/s, like access to new channels (e.g., inclusion of internet channel in addition to merchant Point of Sale terminals);
 - (2) Change in technology service providers and other major partners in the e-money business (excluding partner merchants), if any; and
 - (3) Other changes or enhancements.

Quasi-bank license requirement. EMI-NBFIs and EMI-Others that engage in lending activities must secure a quasi-banking license from the Bangko Sentral.

Sanctions. Monetary penalties and other sanctions for the following violations committed by EMI-NBFIs shall be imposed:

Nature of Violation/Exception	Sanction/Penalties
1. Issuing e-money without prior Bangko Sentral approval	Applicable penalties under Sections 36 & 37 of R.A. No. 7653; Watchlisting of owners/partners/principal officers
2. Violation of any of the provisions of R.A. No. 9160 (Anti-Money Laundering Law of 2001 as amended by R.A. No. 9194) and its implementing rules and regulations	Applicable penalties prescribed under the Act
3. Violation/s of this Section	Penalties and sanctions under the abovementioned laws and other applicable laws, rules and regulations

In addition, the susceptibility of a system to intentional or unintentional misreporting of transactions and balances shall be sufficient ground for appropriate Bangko Sentral action or imposition of sanctions, whenever applicable.

Outsourcing of services by Electronic Money Issuers (EMIs) to Electronic Money Network Service Providers (EMNSP).

The guidelines on outsourcing of services by Electronic Money Issuers (EMIs) to Electronic Money Network Service Providers (EMNSP) are shown in *Appendix Q-56*.

Sanctions. Violations committed by EMIs pertaining to outsourcing activities to EMNSP shall be subject to appropriate monetary penalties under Sec. 811-S and/or other non-monetary sanctions under Section 37 of RA No. 7653.

(Circular Nos. 1033 dated 22 February 2019 and 988 dated 20 December 2017)

PART FIVE

REGULATIONS ON PAYMENT SYSTEMS

501-S NATIONAL RETAIL PAYMENT SYSTEM (NRPS) FRAMEWORK

Adoption of NRPS Framework. It is the policy of the Bangko Sentral to promote the establishment of a safe, efficient, and reliable retail payment system in the Philippines. Towards this end, the Bangko Sentral adopts the National Retail Payment System (NRPS) Framework consistent with Bangko Sentral regulations on risk management in light of the complex interplay of different types of risk arising from the rapid evolution of retail payment activities of Bangko Sentral supervised financial institutions (BSFIs). The NRPS vision will help achieve higher economic growth and enhance the overall competitiveness of our economy.

In carrying out retail payment-related activities, BSFIs shall adhere to the NRPS Framework as set forth in this Section and *Appendix S-11*. This framework requires BSFIs to ensure that the retail payment systems they participate in demonstrate sound risk management, and effective and efficient interoperability. BSFIs shall comply with Bangko Sentral rules and regulations, particularly on information technology, consumer protection, and anti-money laundering/combating the financing of terrorism (AML/CFT).

Definition of terms.

- a. *Automated Clearing House (ACH)* – a multilateral agreement among ACH participants governing the clearing and settlement of payment orders for a specific payment stream.
- b. *ACH Participant* – a financial institution duly licensed by the Bangko Sentral that is a Payment System Management Body (PSMB) member, and undertakes clearing in and is a signatory to at least one (1) ACH.
- c. *ACH Participant Group (ACH-PG)* – a group organized by ACH participants for a payment stream or a group of similar payment streams for the purpose of approving and implementing the clearing rules and agreements applicable to a specific payment stream. It also liaises and consults with other parties in relation to clearing.
- d. *Channel* – the means by which an electronic financial product or service is delivered, *e.g.*, internet, phone, ATM.
- e. *Clearing* – the process of transmitting, reconciling and, in some cases, confirming payment orders prior to settlement, and the establishment of the final obligations for settlement.
- f. *Clearing Switch Operator (CSO)* – provides clearing switch services.
- g. *Direct clearing participant* – a financial institution that is: (a) duly licensed by the Bangko Sentral and is authorized to provide electronic financial and payment services; (b) engaged in holding of funds of customers in the form of accounts (bank account or electronic money account); (c) clears transactions through an ACH and is the participant ultimately responsible for obligations generated from cleared transactions; and (d) has a demand deposit account with the Bangko Sentral and a PhilPaSS member, or is sponsored into settlement by a qualified sponsor which is a member of PhilPaSS and maintains a DDA with the Bangko Sentral, to settle its clearing obligations.
- h. *Electronic payment* – synonymous to electronic fund transfer (EFT); refers to transfers of funds between two transaction accounts in the same or different BSFIs which are initiated and received using electronic devices and channels to transmit payment instructions. This excludes domestic remittance transaction under existing Bangko Sentral regulations.
- i. *Fund* – any unit of value that forms the consideration or object of transactions.
- j. *Interoperability* - enables financial products and services belonging to a particular scheme or business model to be used or interoperated between other schemes or business models usually of another institution. While interoperability often times require technical compatibility between systems, it can only take effect once commercial/business interconnectivity agreements have been completed.
- k. *National Retail Payment System (NRPS)* – a policy and regulatory framework that aims to establish a safe, efficient, and reliable retail payment system in the Philippines.
- l. *Payment instrument* – any instrument, whether tangible or intangible, that enables a person to transfer funds.
- m. *Payment order* – an order or message requesting the transfer of funds to the order of the payee.

- n. *Payment system* – the set of payment instruments, processes, procedures and participants that ensures the circulation of money or movement/transfer of funds.
- o. *PSMB* – a private industry-led self-governing body that is duly recognized by the Bangko Sentral to develop and enforce rules and agreements pertaining to members' clearing and settlement activities in accordance with the NRPS Framework and applicable Bangko Sentral regulations. The body shall be comprised of retail payment industry participants which are direct clearing participants. This body shall be a juridical entity that is not-for-profit and with the power to set and implement rules pertaining to members' clearing activities.
- p. *Point of Interaction (POI)* – a hardware and/or software whereby a customer or user is able to query or initiate a transaction from his account. Examples of POI include kiosk, smart device, etc.
- q. *Retail payments* – payments that meet at least one of the following characteristics: (i) the payment is not directly related to a financial market transaction; (ii) the settlement is not time-critical; (iii) the payer, the payee, or both are individuals or non-financial organizations; and (iv) either the payer, the payee, or both are not direct participants in the payment system that is processing the payment. This definition of retail payment includes person-to-person, person-to-business, business-to-person, business-to-business, person/business-to-government, and government-to-person/business payments.¹
- r. *Settlement* – an act that discharges obligations in respect of fund transfers between two (2) or more parties.
- s. *Sponsored into Settlement Member* – PSMB members who undertake settlement in at least one (1) ACH by engaging the settlement services of an ACH participant that can directly settle transactions through PhilPaSS.
- t. *Settlement sponsor bank or Sponsoring bank* – PSMB members who undertake settlement directly through PhilPaSS.
- u. *Working Group* – In the context of an ACH, it is a group organized for a specific payment stream under an ACH Participant Group. The ACH Working Group is responsible for drawing up, reviewing or revising the rules and agreements applicable to a specific ACH.

Purpose and scope. The NRPS Framework shall apply to all BSFIs which meet regulatory requirements and the criteria set on a per Automated Clearing House (ACH) basis under the NRPS framework.

The NRPS framework covers all retail payment-related activities, mechanisms, institutions and users. It applies to all domestic payments which are denominated in Philippine Peso (Php), and which may be for payments of goods and services, domestic remittances or fund transfers.

Retail payments under the NRPS Framework are payments that meet at least one of the following characteristics:

- a. the payment is not directly related to a financial market transaction;
- b. the settlement is not time-critical;
- c. the payer, the payee, or both are individuals or non-financial organizations; and
- d. either the payer, the payee, or both are not direct participants in the payment system that is processing the payment.

NRPS key principles. Under the NRPS framework, sound governance shall be performed by a payment system management body (PSMB), an industry-led self-governing body that is duly recognized and overseen by the Bangko Sentral. In the absence of a PSMB which conforms to the NRPS principles in *Appendix S-11*, the functions of providing sound governance to the retail payment system participated in by BSFIs shall be discharged by the Bangko Sentral. Clearing switch operators shall not participate in the governance of the payment system.

All clearing shall be done within the NRPS governance structure, wherein exclusive bilateral clearing arrangements are not allowed.

Non-discriminatory participation shall be espoused in the retail payment system. Hence, all BSFIs are highly encouraged to join the NRPS governance structure provided they meet the qualification criteria.

A reasonable market-based and transparent pricing mechanism shall be adopted by all BSFIs participating in the NRPS governance structure.

Further details on the key principles are embodied in the NRPS Framework shown in *Appendix S-11*.

¹ Developing a comprehensive National Retail Payments Strategy, Financial Infrastructure Service line Payment Systems Policy and Research, World Bank, October 2012, available at http://siteresources.worldbank.org/FINANCIALSECTOR/Resources/Developing_a_comprehensive_national_retail_payments_strategy_for_GPW_10_20%28v1%29.pdf.

Specific rules applicable to transactions performed under the NRPS framework. The following rules shall apply to retail payment transactions which are cleared and settled in accordance with the NRPS Framework:

- a. Minimum requirements to offer Electronic Payment and Financial Services (EPFS). EPFS shall require notification to or approval by the Bangko Sentral in accordance with Sec. 401-S. To offer EPFS, BSFIs shall conform to the following requirements:
 - (1) BSFIs shall make electronic payments available in all its delivery channels whenever applicable;
 - (2) BSFIs shall enable its clients to move/receive funds to/from accounts with other BSFIs, or, at a minimum, receive funds. Movement of funds between BSFIs shall be carried out through participation in an ACH;
 - (3) BSFIs shall immediately credit the account of its clients after receipt of clearing advice; and
 - (4) BSFIs shall conform to Sec. 401-S, the IT Risk Management Standards and Guidelines on electronic banking, electronic payment, electronic money and other electronic products and services provided in *Appendix Q-66*.
- b. Fees on transactions. The BSFI's board of directors shall adopt a policy on the imposition of any fee on electronic payment transactions. The policy shall include the basis and quantitative support for the setting of fees and rationalization of the fee structure or amount. Imposition of fees for transactions performed by BSFIs that meet the requirements in Item "a" of this Section (*Specific rules applicable to transactions performed under the NRPS framework*) shall be consistent with the following:
 - (1) On consumer pricing-
 - (a) BSFIs shall adopt reasonable and fair market-based pricing models, which do not arise from agreements with other BSFIs to fix the price of product or service delivery.
 - (b) The service fees for electronic payments are expected to be lower than the fees collected from transactions made manually or over-the-counter (OTC) as electronic payments are considered to provide more efficient and cost-effective means of delivering service.
 - (c) The recipient shall not pay for electronic crediting to recipient's account and the recipient shall receive the amount in full. Such account to account fund transfers shall not be considered as domestic remittance transactions under Sec. 241-S.
 - (2) The BSFI shall disclose to the Bangko Sentral the details of all fees that will be charged to the client. This will be posted in an electronic bulletin board of fees for transactions performed under the NRPS framework. The bulletin board shall be maintained by the Bangko Sentral in its website for enhanced transparency and competitiveness.
- c. Anti-Money Laundering Requirements. All BSFIs shall observe applicable AML/CFT requirements under Part Six for all transactions performed under the NRPS framework. As part of on-going monitoring of customers and their transactions, the following rules shall apply to transactions performed under the NRPS framework by BSFIs that meet the requirements in Item "a" of this Section (*Specific rules applicable to transactions performed under the NRPS framework*):
 - (1) The *originating institution (OI)* shall be responsible for monitoring, including appropriate watchlist screening or monitoring, its own client's transactions. It is the responsibility of the OI to ensure that the account name of the source account and the amount are consistent with the Sender Name and the amount indicated in the Payment Instruction sent by the OI.
 - (2) The *receiving institution (RI)* shall be responsible for monitoring, including appropriate watchlist screening or monitoring, its own client's transactions. It is the responsibility of the RI to ensure that the actual account number credited and the amount are consistent with the Beneficiary Account Number and the amount indicated in the Payment Instruction received by the RI.
 - (3) On the basis of the above, account number matching will suffice for domestic account-to-account electronic payments. OIs and RIs shall ensure that customers are informed that account number matching will suffice to implement a transaction, and OIs and RIs shall be held free and harmless from liability for their reliance on account number matching.
- d. BSFIs participating in the NRPS governance structure are required to comply with existing regulations of the Bangko Sentral.

Reports. BSFIs participating in the NRPS governance structure shall comply with regular reporting requirements, which will be covered by a separate issuance.

Examination of BSFIs. BSFIs shall make available all policies, procedures and other documents/information related to this Section during the on-site examination, as well as provide copies thereof when a written request is made by the Bangko Sentral.

Sanctions. Consistent with Sec. 002-S, the Bangko Sentral may deploy enforcement actions to promote adherence to the requirements set forth in this Section and bring about timely corrective actions. The Bangko Sentral may issue directives to enforce compliance with the NRPS Framework or impose sanctions to limit the level of or suspend any business activity that has adverse effects on the safety and soundness of the BSFI, among others.

Any violation of this Section shall subject the BSFI and/or its directors, officers and/or employees to the monetary and non-monetary sanctions under Section 37 of Republic Act (R.A.) No. 7653, including but not limited to the following depending on the gravity of the violation committed and the circumstances attendant thereto:

- a. Suspension of offering new electronic financial products and services;
- b. Suspension/revocation of authority to provide electronic financial products and services; and
- c. Suspension/revocation of authority to settle through the Philippine Payments and Settlements System.

(Circular Nos. 1033 dated 22 February 2019, 1022 dated 26 November 2018, and 980 dated 6 November 2017)

502-S SETTLEMENT OF INSTANT RETAIL PAYMENT

Policy Statement. It is the thrust of the Bangko Sentral to ensure efficiency of payment systems in the country. In line with this thrust, the Bangko Sentral requires BSP-Supervised Financial Institutions (BSFIs) participating in an automated clearing house (ACH) for instant retail payments to ensure that this ACH provides for certainty of settlement of the multilateral clearing obligations of the clearing participants. The settlement scheme agreed upon by the clearing participants shall form an integral part of the comprehensive credit risk management for instant retail payment services.

For the purpose of this Section, an instant retail payment, otherwise known as fast payment, is defined as an electronic payment in which the transmission of the payment message and the availability of “final” funds to the payee occur in real time or near-real time on as near to a 24-hour and seven-day (24/7) basis as possible¹. Moreover, as used in this Section, clearing participants shall refer to direct clearing participants.

Minimum requirements for the operation of a settlement mechanism for instant retail payments. The settlement mechanism for instant payments shall meet the following minimum requirements:

- a. A clearing participant or its settlement sponsor shall maintain with the Bangko Sentral a demand deposit account (DDA) which shall be used specifically for the settlement of the clearing participant’s net clearing obligations arising from instant retail payments;
- b. The clearing participant or its settlement sponsor shall prefund the settlement of its net clearing obligation through the DDA stated above, ensuring that such account can sufficiently cover said obligation at any point during a settlement cycle. When prefunding, the clearing participant/settlement sponsor shall consider increasing the fund in its account for longer settlement cycles such as during weekends and holidays;
- c. The clearing participants shall agree on thresholds which shall be the bases of the Clearing Switch Operator (CSO) to execute a notification process that enables the clearing participants to efficiently monitor movements in their instant retail payment positions, and at the same time alerts them to place additional funds in their DDAs particularly when the ultimate threshold is breached;
- d. The service contract between the clearing participants and the CSO shall include, at a minimum, the following provisions:
 - (1) The CSO shall record the clearing participants’ DDA balances obtained from the Bangko Sentral at the start of every settlement cycle and monitor the clearing participants’ net clearing obligations against their respective account balances;
 - (2) Should the instant retail payments position (Funds in the DDA minus net clearing obligation/withdrawal from the DDA) of any of the clearing participants breach their agreed-upon thresholds, the CSO shall immediately send an electronic notification to the concerned clearing participant; and
 - (3) Any instant retail payment which is not fully covered by the corresponding DDA or which will result in a negative instant retail payments position shall be rejected by the CSO. A clearing participant with an instant retail payments position of zero shall be suspended from carrying out further outgoing instant payment transactions until said participant registers a positive position on account of its incoming payment transactions and/or subsequent deposits into its DDA;

¹ Based on the paper “Fast payments – Enhancing the speed and availability of retail payments” of the Committee on Payments and Market Infrastructures, Bank for International Settlements

- e. Should the clearing participants determine that the funds in their DDAs for instant retail payments are excessive after taking into account their highest potential clearing obligations, the clearing participants shall be allowed to withdraw from their DDAs to enable them to make optimal use of their funds; and
- f. The Bangko Sentral shall not be precluded from deploying applicable regulatory enforcement actions to concerned clearing participants notwithstanding the inclusion of sanctions in the ACH for non-compliance with the clearing participants' agreed-upon settlement mechanism.

Risk management. In view of the risks involved in the prescribed settlement mechanism for instant retail payments, including the possibility that a rejected payment transaction of a client due to prefunding issues may give rise to serious reputational damages to the concerned clearing participant, the BSFIs participating in the instant retail payment ACH shall ensure that they have the necessary operational and liquidity risk management measures in place. Such measures shall be designed in accordance with the guidelines provided under Sec. 146-Q on Operational Risk Management, and Sec. 144-S on Liquidity Risk Management.

Supervisory enforcement action. Consistent with Section 002-Q, the Bangko Sentral may deploy enforcement actions to promote compliance with the requirements set forth in this Section and ensure timely implementation of preventive or corrective measures as needed. As part of its enforcement actions, the Bangko Sentral may issue directives or impose sanctions which limit the level of or suspend any business activity that adversely affects the safety and soundness of a BSFI.

(Circular No. 1000 dated 23 April 2018)

503-S PARTICIPATION IN AUTOMATED CLEARING HOUSES (ACHS)

BSFIs that have been licensed to offer funds transfer services shall make these services interoperable by participating in an ACH. Prior to its participation, a BSFI shall observe the following guidelines:

- a. Secure a Confirmation of Eligibility (COE) by submitting to the Bangko Sentral through the appropriate supervising department of the Bangko Sentral a letter of intent to participate in an identified ACH. This letter shall be accompanied by a certification (*Annex A of Appendix Q-89*) signed by the president (or any officer of equivalent rank and function) and chief compliance officer (CCO).

If the BSFI is not yet a member of the Payment System Management Body (PSMB), it shall also indicate in its letter that it intends to become a member of this body;

- b. Submit the following minimum documentary requirements to the PSMB duly recognized by the Bangko Sentral.
 - (1) Valid COE. A COE shall be valid for a period of six (6) months from date of issuance;
 - (2) Corporate Secretary's Certificate (or equivalent document in the case of foreign bank branches) on the approval of the board of directors (or equivalent management committee in the case of foreign bank branches) of the participation of the BSFI in the ACH; and
 - (3) Copy of the agreement with the bank sponsoring the BSFI into settlement, if applicable; and
- c. Comply with any other requirements set by the PSMB or provided in the ACH.

(Circular No. 1033 dated 22 February 2019)

PART SIX

ANTI-MONEY LAUNDERING REGULATIONS

601-S ANTI-MONEY LAUNDERING REGULATIONS

Covered persons, including their subsidiaries and affiliates, shall comply with the provisions of Part Nine of the Q-Regulations, R.A. No. 9160 (Anti-Money Laundering Act of 2001), as amended, and its IRR.

Sanctions and penalties.

- a. Whenever a covered person violates the provisions of Section 9 of R.A. No. 9160, as amended, or of this Section, the officer(s) or other persons responsible for such violation shall be punished by a fine of not less than P50 thousand nor more than P200 thousand or by imprisonment of not less than two (2) years nor more than ten (10) years, or both, at the discretion of the court pursuant to Section 36 of R.A. No. 7653, otherwise known as "The New Central Bank Act".
- b. Without prejudice to the criminal sanctions prescribed above against the culpable persons, the Monetary Board may, at its discretion, impose upon any covered institution, its directors and/or officers for any violation of Section 9 of R.A. No. 9160, as amended, the administrative sanctions provided under Section 37 of R.A. No. 7653.

(Circular No. 950 dated 15 March 2015)

602-S VALID IDENTIFICATION CARDS FOR FINANCIAL TRANSACTIONS

The provisions of Part Nine of the Q-Regulations on valid identification documents shall apply.

PART SEVEN

FINANCIAL CONSUMER PROTECTION

701-S FINANCIAL CONSUMER PROTECTION FRAMEWORK¹

Policy Statement. The Framework is in line with the responsibility of the Bangko Sentral under Section 3 of Republic Act No. 7653, as amended by Republic Act No. 11211, to promote broad and convenient access to high quality financial services and consider the interest of the general public. Bangko Sentral aims to ensure that financial service providers conduct ethical business practices and do not engage in practices that may cause harm to the consumer as well as consider consumer outcomes in the conduct of their business. Practices that harm consumers introduce risks not only at the level of the financial institution but also to the overall health of the financial sector particularly through decreased public trust and confidence. A well-informed and protected consumer can better benefit from the financial services received and be a more responsible client.

The Framework establishes the guidelines and expectations from Bangko Sentral supervised financial institutions (BSFIs) to institutionalize consumer protection as an integral component of corporate governance and culture as well as risk management. The objective of the Framework is for BSFIs to manage the risks of financial loss that are detrimental to the financial consumers or consumer protection risks inherent to the BSFIs' operations that, if not properly managed, would affect other relevant risks, such as compliance, reputational, legal, operational and credit risks.

Scope and Applicability. The Framework applies to all BSFIs in the conduct of their business. The BSFIs' adoption of the Framework shall be proportionate to their asset size, structure, nature of products and services, and complexity of operations.

Consumer protection risk management system (CPRMS). A BSFI should have a CPRMS that is integrated into the BSFI's enterprise-wide risk management processes and risk governance framework. The CPRMS includes the governance structure, policies, processes, measurement and control procedures to ensure that consumer protection risks are identified, measured, monitored, and mitigated. A carefully devised, implemented, and monitored CPRMS provides the foundation for ensuring the BSFI's adherence to consumer protection standards of conduct and compliance with consumer protection laws, rules and regulations, thereby, ensuring that identified risks to the BSFI and associated risk of financial harm or loss to consumers are properly managed.

Consumer Protection Oversight.

- a. **Responsibilities of the Board of Director (Board).** The Board shall be primarily responsible for approving and overseeing the implementation of the BSFI's CPRMS. The Board's responsibilities shall include the following:
 - (1) Approve the CPRMS and consumer assistance mechanism (CAM) that takes into consideration the BSFI's business model, market, product lines, and relationships with third parties that may give rise to consumer protection risks;
 - (2) Promote a culture of ethical behavior and adherence to the highest standards of fair and responsible dealing with consumers;
 - (3) Ensure that adequate information and actions taken are reported on a regular basis in terms of the measurement of consumer protection related risks, reports from the CAM as well as other material consumer related developments that will impact the BSFI;
 - (4) Ensure the adequate provision of resources and effective implementation of personnel training and competency requirements;
 - (5) Approve remuneration and compensation packages structured to encourage responsible business conduct, fair treatment and avoidance/mitigation of conflicts of interest; and
 - (6) Review periodically the implementation and effectiveness of the CPRMS including how findings are reported and whether the audit mechanisms are in place to enable adequate oversight, and put in place a regular mechanism to review the relevance of the CPRMS in case of changes in the BSFI business model and/or operating environment.

¹ BSFIs shall be given six (6) months from 26 September 2019 to: (1) perform a gap analysis of their current consumer protection practices vis-i-vis this Section and (2) propose an action plan duly approved by the Board of Directors to achieve full compliance within a reasonable period of time but in no case longer than one (1) year from 26 September 2019.

- b. *Responsibilities of Senior Management.* The Senior Management shall be responsible for ensuring that the practices of the BSFIs are aligned with the approved consumer protection policies and risk management system and consistently displayed throughout the BSFI's place of business particularly across all business units that deal directly with consumers. In this regard, the Senior Management shall:
- (1) Ensure that approved CPRMS and CAM policies and procedures are clearly documented, properly understood and appropriately implemented across all levels and business units.
 - (2) Establish an effective monitoring and management information system to regularly measure, aggregate, and analyze consumer related issues to determine the level of consumer protection risk. An appropriate and clear reporting and escalation mechanism should also be integrated in the risk governance framework. The management information system shall be able to:
 - (a) Provide adequate information on the performance and quality of the BSFI's CAM that allows for identification of emerging consumer issues and root cause analysis;
 - (b) Determine the level of consumer protection risk exposure through assessment of its implementation of the Consumer Protection Standards of Conduct (i.e. transparency and disclosure, protection of client information, fair treatment, effective recourse and financial learning and awareness);
 - (c) Identify and monitor, in a timely manner, consumer protection risk exposures approaching risks of loss to financial consumers, legal and reputational risk as well as other related risks; and
 - (d) Identify and assess emerging or increasing consumer risks that affect the BSFI such as through social media monitoring and market monitoring.
 - (3) Ensure that adequate systems and controls are in place to promptly identify issues that affect the consumer across all phases of the relationship with the consumer;
 - (4) Ascertain that weaknesses in the consumer protection practices or consumer protection emerging risks are addressed and corrective actions are taken in a timely manner; and
 - (5) Ensure observance of expectations and requirements prescribed under relevant regulations on compliance and internal audit.

(Circular Nos. 1048 dated 6 September 2019, 972 dated 22 August 2017, 890 dated 02 November 2015, and 857 dated 21 November 2014)

702-S POLICIES AND PROCEDURES, CONSUMER PROTECTION STANDARDS OF CONDUCT

The CPRMS and CAM should ensure systematic application of policies and procedures, including the Consumer Protection Standards of Conduct (Standards). The Standards should reflect the core principles, which BSFIs must observe at all times in their dealings with financial consumers: *Provided, further,* That these Standards should be embedded into the corporate culture of the BSFI, enhancing further its defined governance framework while addressing conflicts that are inimical to the interests of the financial consumer.

Disclosure and transparency.¹

The BSFI demonstrates adherence to appropriate and adequate disclosure and transparency when:

- a. The manner of disclosure, whether in advertising materials, terms and conditions, and other forms of communication, are clear, concise, accurate, understandable and not misleading.
- b. Information are disclosed before, during and after a sale of a financial product or service and during key stages of the relationship with the consumer; especially if there are any changes in the terms and conditions.
- c. Terms and Conditions contain all significant provisions of the financial product or service giving prominence to key features/facts. It includes the following with specific details relating to the type of product or service being offered:
 - (1) Information on risks, return, possible warnings, any waiver of rights and limitations of liabilities, consumer's rights and responsibilities, consequences of failure to meet obligations, rights and responsibilities of the BSFI, involvement of authorized agents, any conflict of interest by BSFI staff, cancellation and product portability, among others;

¹ This Section should be read in conjunction with existing regulations related to disclosure and transparency of key information on loan and investment products and services, regulations on the conduct of treasury and trust activities of BSFIs and regulations governing fees on retail bank product/services and dormant deposit accounts.

- (2) The full price or cost to the consumer including all interest, fees, charges, and penalties. The terms and conditions must clearly state whether interest, fees, charges, and penalties can change over time. The method for computing said interest, fees, charges, and penalties shall be disclosed consistent with existing regulations; and
 - (3) For more complex products, such as investment products, the key features as well as costs and risks shall be highlighted in a key facts statement or Product Highlight Sheet (PHS). The PHS shall enable comparison with other products and shall be provided at no additional cost. Before the consumer signs any contract, the BSFI should ensure that the consumer has freely signed a statement to the effect that the consumer has duly received, read, and understood the PHS.
- d. Advertising materials are not false, misleading, or contain deceptive statements or omit key information that may materially and/or adversely affect the decision of the consumer to avail of a service or acquire a product. BSFIs are responsible for all the statements made in said advertising materials.
 - e. The terms and conditions, advertising materials and other communications contain the following:
 - (1) Contact and information of the BSFI's internal complaints handling unit; and
 - (2) Statement that the BSFI is a regulated entity and contact information of the regulator.
 - f. Communication of the BSFI staff is conducted in such a manner that clients can understand the terms of the contract and their rights and obligations, taking into consideration client segments that may have financial literacy limitations.
 - g. Adequate time is given to consumers to review, ask questions and receive information to fully understand the terms and conditions prior to signing the contract or executing the transaction. BSFI should ensure that documents signed by the consumer are completely filled out and have no blank terms. The consumer should be given a copy of each of the documents he/she signed (including, but not limited to the contract) with all terms and conditions. The consumer should also be provided with proof of the transaction, whether printed or in electronic copy at the option of the consumer, immediately after the transaction has been completed.
 - h. Statements of Account or Billing Statements are provided regularly in a convenient manner to the consumer, or through the channel through which the product was sold, commensurate to the type of product and terms.
 - i. Notifications in writing (or electronic form) and through other channels are provided to the consumer with regard to any of the key features and terms of the product, the nature and extent of the change and its potential impact on the consumer. This notification requirement also apply to similar changes to any condition/s specified in the contract. Nonetheless, this does not cover financial products that have been identified at the inception to be subject to floating interest rate all throughout their life cycle as long as basis has not changed.

The principles of the above standards for disclosure and transparency shall be applicable even to products and services offered electronically as well as to products catering to different market segments with particular consideration for segments that may have limited financial literacy.

Protection of client Information.¹ Financial consumers have the right to expect that their financial transactions, as well as relevant personal information disclosed in the course of a transaction, are kept confidential and are secured. Towards this end, BSFIs must ensure that they have well-articulated information security guidelines, well-defined protocols, a secure database, and periodically re-validated procedures in handling the personal information of their financial consumers. This should be an end-to-end process that should cover, among others, the array of information that will be pre-identified and collected, the purpose and manner of gathering each information, the Information Technology (IT)-security infrastructure of the BSFI, and the protocols for disclosure, both within the BSFI and especially to third parties.

The BSFI demonstrates the ability to protect client information if it is able to:

- a. Have a written privacy policy to safeguard its customers' personal information. This policy should govern the gathering, processing, use, distribution, storage, and eventual disposal of client information and the identification of levels of permissible access to consumer's data for employees. The BSFI should ensure that privacy policies and sanctions for violations are implemented and strictly enforced.
- b. Ensure that privacy policies are regularly communicated throughout the organization.
- c. Have appropriate systems in place to protect the confidentiality and security of the personal data of its customers against any threat or hazard to the security or integrity of the information and against unauthorized access. This includes a written information security plan that describes its program to protect customer personal information. The plan must be appropriate to its size and complexity, nature and scope of its activities, and the sensitivity of consumer information it handles.

¹ This Section should be read in conjunction with existing regulations on IT Risk Management System and laws and regulations on data privacy.

- d. Have a strong IT System in place to protect the confidentiality, security, accuracy, and integrity of customer's personal information. This includes network and software design, as well as information processing, database storage, transmission, retrieval, and disposal. Security must be maintained throughout the life-cycle of customer information, from data entry to disposal, and provide clear policies and procedures on data breaches including mechanisms to compensate consumers.
- e. Subject to the provisions of existing laws and regulations on data privacy, send written communication to its consumers informing and explaining how it will use and share the consumer's personal information.
- f. Obtain the consumers' written consent, unless in situations allowed as an exception by law or Bangko Sentral-issued regulations on confidentiality of consumer's information, before sharing consumers' personal information with third parties such as credit bureau, collection agencies, marketing and promotional partners, financial technologies that use a varied range of consumer data and other relevant external parties.
- g. Provide access to consumers to the information shared and allow consumers to challenge the accuracy and completeness of the information and have these amended as appropriate.

Fair treatment. This principle ensures that financial consumers are treated fairly, honestly, and professionally at all stages of its relationship with the BSFI. BSFIs shall adopt mechanisms to safeguard the interest of their consumers which shall include rules regarding ethical staff behavior, acceptable selling practices, fair and equitable terms and conditions, provision of products and services appropriate to the capacity and risk appetite of the consumers, among others, and incorporate the same in their policies and procedures, control functions and agreements with outsourced third parties.

The BSFI demonstrates the principle of fair treatment towards financial consumers if the policies and practices observe the following:

- a. Terms and conditions are not unfair in that there is significant imbalance in the parties' rights and obligations arising under the contract, to the detriment of the consumer.
- b. Product and services are offered with skill, due care and diligence and shall consider the consumers' financial situation, needs, capabilities and overall risk profile. Adequate product suitability and affordability mechanisms shall be in place subject to existing rules and regulations. If the requested products are of higher risk rating than a consumer's risk tolerance assessment results, the BSFI should draw the consumer's attention to the risk mismatch and provide a written disclosure of consequences which is accepted by the client. Product bundling should also take into consideration the product suitability and should not unduly limit consumer choice.
- c. Adequate product approval are in place to ensure that products and services are fit for the targeted consumer. Product development, review, distribution and after sales process shall take into consideration the risks to consumers.
- d. BSFIs do not unduly limit a consumer's ability to cancel or transfer the product to another provider as disclosed in the terms and conditions. As may be appropriate, BSFIs shall provide the consumer who is a natural person with a cooling off period subject to the following conditions:
 - (1) The "cooling-off" period shall be for a reasonable number of days, of at least two (2) banking days, immediately following the submission of any agreement or contract, particularly for financial instruments with a remaining term of at least one (1) year: *Provided*, That consumers with aggregate investment size of P500 thousand and above are excluded from invoking the cooling off period: *Provided, further*, That securities "traded" or "to be traded" are exempt from the coverage of the cooling-off period.
 - (2) Consumers may be permitted to cancel the agreement without penalty of any kind upon his or her written notice to the BSFI during the cooling-off period. The BSFI may however collect or recover reasonable amount of processing fees. Conditions and fees for products with automatic right to cooling off must be appropriately determined, discussed and explained to consumers.
- e. BSFI staff treats consumers with professional competence and in a manner that is fair and responsible. The BSFI shall:
 - (1) Incorporate in its Code of Conduct (Code) the values and standards that uphold protection of consumers and embed the Consumer Protection Standards of Conduct; and have process in place to detect, respond to and enforce sanctions on violations thereof.
 - (2) Align its recruitment and training policies around professional, fair and responsible treatment of clients, for instance:
 - (a) BSFI staff receives adequate training suitable for the complexity of the products or services they sell and are able to explain the key features of the product, including statutory and regulatory requirements.

- (b) BSFI staff does not use deceptive or high pressure/aggressive sales techniques and should not force clients to sign contracts or rush into a financial deal without the benefit of shopping around.
 - (c) BSFI staff involved in collections, as well as agents contracted for the purpose, receives training in acceptable debt collection practices and loan recovery procedures consistent with existing relevant regulations.
 - (d) BSFI staff does not employ practices that discriminate or take advantage of difficulties faced by, vulnerable groups such as the low-income earners, and persons with disability.
 - (e) Establish policies and procedures that aim to protect consumers' deposits and other assets against internal or external fraud or misuse and have mechanisms in place to manage and resolve actual conflicts of interest with respect to compensation policies that arise in the interaction between their staff and agents and their consumers and potential consumers.
- (3) Include ethical behavior, professional conduct, and quality of interaction with consumers as part of staff performance evaluations.
 - (4) Ensure that the remuneration structure for staff of BSFI and authorized agent is in a manner that encourages responsible business conduct, fair treatment and avoidance/mitigation of conflicts of interest.
 - (5) Perform appropriate due diligence before selecting the authorized agents/outsourced parties taking into account the agents' integrity, professionalism, financial soundness, operational capability and capacity, and compatibility with the FI's corporate culture and implement controls to monitor the agents' performance on a continuous basis.

Effective recourse. Financial consumers should be provided with accessible, affordable, independent, fair, accountable, timely, and efficient means for resolving complaints with their financial transactions. BSFIs should have in place mechanisms for complaint handling and redress, and may employ various modalities or technological innovations.

The BSFI demonstrates the ability to provide effective recourse if it is able to:

- a. Establish an effective Consumer Assistance Management System (CAMS) designed to receive, record, evaluate, resolve, monitor and report consumer complaints, concerns, inquiries or requests to be implemented by a designated officer, unit, group or department commensurate to the size, structure, nature of products and services, and complexity of operations, ensuring that there is no conflict of interest.
- b. Establish, maintain and implement internal policies and practices for a reasonable and prompt handling of consumer concern.
- c. Make available a wide range of channels in which consumers can conveniently lodge their complaints, inquiries and requests; and put in place a dedicated helpdesk or hotline for the said purpose.
- d. Maintain a management information system for the complaints from consumers that allows for consolidation, comparison and analysis on a regular basis including investigating whether complaints indicate an isolated issue or a more widespread issue for consumers. This analysis and reports of consumer complaints must have clear reporting and escalation structure within the BSFI's risk governance framework. The complaints reports shall be submitted in accordance with the existing regulations.
- e. Establish clear policies on investigation, resolution and restitution of complaints and making the process clear to the consumer.
- f. Ensure that information on the consumer assistance channels and applicable timelines for handling concerns are published in the following:
 - (1) Terms and Conditions of a BSFI's product or service;
 - (2) Various channels of service delivery; and
 - (3) Conspicuous places within the premises of BSFIs and their branches/other offices.
- g. Provide for adequate resources to handle financial consumer complaints efficiently and effectively. Staff handling complaints should have appropriate experience, knowledge, and expertise. Depending on the BSFI's size and complexity of operation, a Senior staff member should be appointed to be in charge of the complaint handling process.

Financial education and awareness. Financial education initiatives give consumers the knowledge, skills, and confidence to understand and evaluate the information they receive and empower them to make informed financial decisions.

Because BSFIs deal directly with financial consumers, they have the reach, expertise, and established relationships ideal to deliver financial education, distinct and separate from information about their products. BSFIs should provide basic information on consumers' and the BSFI's rights and responsibilities.

BSFIs should demonstrate efforts at financial education, which may include digital literacy for products offered electronically, with the presence of programs whether as specific initiatives or as aspects embedded in their regular interface with consumers.

(Circular Nos. 1048 dated 06 September 2019, 1003 dated 16 May 2018, 930 dated 18 November 2016, 898 dated 14 January 2016, 890 dated 02 November 2015, and 857 dated 21 November 2014)

703-S ENFORCEMENT ACTIONS

Consistent with Sec. 002-Q, the Bangko Sentral may deploy enforcement actions to promote adherence to the Bangko Sentral Regulations on Financial Consumer Protection.

(Circular Nos. 1048 dated 06 September 2019, 890 dated 02 November 2015, and 857 dated 21 November 2014)

PART EIGHT

OTHER NSSLA REGULATIONS

A. OTHER APPLICABLE REGULATIONS

801-S OTHER REGULATIONS APPLICABLE TO NSSLAs

Other rules and regulations applicable to the examination of thrift banks, insofar as they are applicable and not inconsistent with these rules shall apply to NSSLAs.

B. FEES/CHARGES

811-S FINES AND OTHER CHARGES

The following regulations shall govern imposition of monetary penalties on NSSLAs, their trustees and/or officers and payment of such penalties or fines and other charges by NSSLAs.

Guidelines on the imposition of monetary penalties.

a. Policy statement

The Bangko Sentral recognizes the need to impose monetary penalties as one of the possible sanctions to hold BSFIs, and/or their trustees and/or officers accountable for their conduct and to deter the future commission of violations.

This Section sets forth the guidelines in the imposition of monetary penalties as may be warranted under the circumstances based on the following general principles laid down in the Bangko Sentral Supervisory Enforcement Policy provided under Sec. 002-S taking into consideration their impact on the BSFI's financial condition:

- (1) Root cause diagnosis;
- (2) Consistently matching the severity of enforcement action to the supervisory issue;
- (3) Successive or simultaneous deployment of enforcement actions;
- (4) Monitorability and follow through; and
- (5) Escalation of enforcement actions.

Accordingly, the Bangko Sentral may impose monetary penalties, singly or together with non-monetary sanctions, if appropriate, even at the outset or as an escalated sanction.

b. The following are the guidelines on the imposition of monetary penalties on BSFIs, and/or their directors and/or officers and the payment of such monetary penalties and other charges:

- (1) BSFIs, and/or their directors and/or officers shall be imposed the monetary penalties prescribed under applicable laws or other Bangko Sentral rules and regulations.

In the absence of provision on monetary penalty for the violation/offense, BSFIs and/or their directors and/or officers may be imposed a maximum monetary penalty of P30,000.00 per calendar day for each violation/offense in accordance with the following schedule:

Asset Size \ Penalty Level ¹	Up to P200 million	Above P200 million but not exceeding P500 million	Above P500 million but not exceeding P1 billion	Above P1 billion but not exceeding P10 billion	Above P10 billion but not exceeding P50 billion	Above P50 billion
High	5,000	10,000	15,000	20,000	25,000	30,000
Low	2,500	5,000	7,500	10,000	12,500	15,000

¹ "High" penalty level is generally imposed on serious offenses/violations such as unsafe or unsound practices; fraudulent acts; and major acts or omissions defined as the bank/s/individual/s failure to comply with the requirements of banking laws, rules and regulations, as well as Monetary Board directives/instructions which have/may have a material adverse impact on bank's solvency, liquidity or profitability. This penalty level may also be imposed as an escalated monetary penalty to violations previously meted with "low" penalty level.

"Low" penalty level is imposed on all other acts or omissions that cannot be classified under serious offenses/violations as described above.

The Bangko Sentral may use a penalty rate prescribed under the next higher range of asset size after considering the following attendant circumstances: (a) the harm caused or potential harm caused to the BSFI and/or its stakeholders; (b) the seriousness of the violation or irregularity; and (c) the intentionality and frequency: *Provided*, That the resulting penalty will have no adverse impact on the BSFI's operations, liquidity and/or capitalization.

If the monetary penalty is less than the gain derived or loss avoided by the BSFIs and/or trustee and/or officer in committing the violation/s, the Bangko Sentral may assess total monetary penalties equivalent to the gain derived or loss avoided.

The appropriate supervising department shall notify the BSFI/trustee or officer concerned of the violation and the corresponding amount of monetary penalty, together with a directive for the BSFI/trustee or officer concerned to explain within fifteen (15) banking/business days from receipt of the letter why the assessed monetary penalty should not be imposed against it/him/her. The recommendation to impose monetary penalties shall be approved by the Governor or the Monetary Board, as the case may be. The decision of the Governor/Monetary Board shall be communicated to the BSFI/trustee or officer concerned.

However, the Bangko Sentral is not precluded from imposing non-monetary sanctions along with monetary penalties if circumstances so warrant.

- (2) *Basis for the computation of the period or duration of penalty.* The computation of the period or duration of all penalties shall be based on calendar days.

For this purpose, the terms “per banking day”, “per business day”, “per day” and/or “a day” as used in this Manual, and other Bangko Sentral rules and regulations shall mean “per calendar day” and/or “calendar day” as the case may be.

- (3) *Request for Reconsideration or Appeal.* A request for reconsideration on the monetary penalty approved by the Monetary Board is allowed. The BSFI/trustee or officer concerned shall be notified of the decision of the Governor/Monetary Board thereon. An appeal from the decision of the Governor on the request for reconsideration may be made to the Monetary Board.

A request for reconsideration or appeal shall be filed within fifteen (15) calendar days from receipt of the notice of the decision of the Governor/Monetary Board.

- (4) *Payment of Monetary Penalties.* BSFIs, and/or their directors and/or officers shall pay the monetary penalties within fifteen (15) calendar days from receipt of the notice of the decision of the Governor/Monetary Board or receipt of the notice of the decision denying the appeal or request for reconsideration, where applicable.

In the case of BSFIs, penalties which remain unpaid after due date shall be automatically debited against their corresponding demand deposit account (DDA) with the Bangko Sentral.

In the case of trustees and/or officers, their employer BSFI shall advance the payment of the penalty to the Bangko Sentral in their behalf on or before due date through automatic debit of its DDA with the Bangko Sentral. In case the trustee and/or officer is no longer connected with the BSFI, payment thereof shall be for the account of the trustee and/or officer who shall pay directly to the Bangko Sentral in the form of cash or check or such other acceptable means of payment and in accordance with the provisions of Sec. 1102-Q (*Check/demand draft payments to the Bangko Sentral*).

For uniform implementation of the above regulations, the procedural guidelines embodied in *Appendix Q-26* shall be observed.

- (5) *Additional Charge for Late Payment of Monetary Penalty.* Late payment of monetary penalty shall be subject to an additional charge of six percent (6%) per annum to be computed from the time said penalty becomes due and payable up to the time of actual payment.

(Circular No. 988 dated 20 December 2017)

812-S ANNUAL SUPERVISORY FEES

The prescribed rate of annual supervisory fees for an NSSLA shall be one-sixty-fifth of one percent (1/65 of 1%) of its *Average Assessable Assets (AAA)* of the immediately preceding year but shall not exceed the maximum amount provided below:

Total AAA of NSSLA	Maximum Amount of Annual Fees
>P1.0 billion	P500,000.00
>P750.0million -P1.0 billion	P400,000.00

>P500.0million -P750.0 million	P200,000.00
>P250.0million -P500.0 million	P100,000.00
>P100.0million -P250.0 million	P 50,000.00
Up to P100.0Million	P 10,000.00

Provided, That the minimum amount of annual fees of NSSLAs with AAA of up to P100.0 million shall be P10,000.00.

The annual supervisory fee shall be payable within thirty (30) days from receipt of the billing statement from the Bangko Sentral. Failure to pay the annual fee within the prescribed period shall subject the NSSLA to administrative sanctions.

For purposes of computing the annual supervisory fees, AAA shall be the summation of end-of-quarter total assessable assets (end-of-quarter total assets per balance sheet, after deducting cash on hand and amounts due from banks) divided by the number of quarters in operation during the particular assessment period.

(M-010 dated 8 April 2019)

C. SUNDRY PROVISIONS

821-S CONFIDENTIAL INFORMATION

No trustee, officer or employee of NSSLAs or of the Bangko Sentral shall disclose any information relating to member-borrowers and their applications or to the operations of the NSSLAs unless permitted by the Monetary Board of the Bangko Sentral: *Provided, however*, That in the case of NSSLAs under examination, the head of the appropriate supervising department of the Bangko Sentral may furnish findings of examination to the office or firm where such NSSLAs do business.

All deposits of whatever nature with NSSLAs are considered absolutely confidential in nature, and may not be examined, inquired or looked into by any person, government official, bureau or office, except upon written permission of the depositor, or in cases of impeachment, or upon order of competent court in cases of bribery or dereliction of duty of public officials or in cases where the money deposited or invested is the subject matter of litigation.

No official or employee of NSSLAs shall disclose to any person any information concerning said deposits, except in cases mentioned in the preceding paragraph. Any official or employee of NSSLAs who violates this Section shall be punished under R.A. No. 1405, as amended.

822-S PHILIPPINE AND FOREIGN CURRENCY NOTES AND COINS

The rules and regulations that shall govern the treatment and disposition of counterfeit Philippine and foreign currency notes and coins, the reproduction and/or use of facsimiles of legal tender Philippine currency notes and coins, the replacement and redemption of legal tender Philippine currency notes and coins considered mutilated or unfit for circulation, and the treatment and disposition of Philippine currency notes and coins called in for replacement are provided in Sec. 1111-Q.

(Circular Nos. 890 dated 02 November 2015 and 829 dated 13 March 2014)

SAFEGUARDS IN BONDING OF NSSLA ACCOUNTABLE OFFICERS AND EMPLOYEES
(Appendix to Sec. 152-S on Bonding of Officers and Employees)

1. *The Teller.* He should not be allowed to accumulate more than a specific maximum amount to be determined by the association but in no case to exceed ₱10,000 in cash at any given time while in the performance of his duties. The procedures in this regard are as follows:
 - a. *Cash.* All cash in excess of the maximum amount determined by the association shall be turned over to the cashier. When deposits received by a teller will increase his cash in excess of the maximum limit, the teller shall immediately make a cash turn-over of, at least, the excess. Thus, although his transactions during the day may total more than the maximum limit, the amount of money directly in his custody at any given time will never exceed the limit.
 - b. *Checks and Other Cash Items (COCIs).* All COCIs received by a teller should be stamped as “non-negotiable.” The stamping should be made diagonally on the face of the check. Thus, all checks that are received by the tellers lose their further negotiability. There should, however, be an agreement with the association’s depository banks whereby they will accept for deposit only to the account of the association the COCI previously stamped by the tellers as “non- negotiable.” Therefore, only the association and nobody else can further negotiate these checks, and only the association’s depository bank will accept them and solely for deposit to its account. Thus, even in the remote possibility that someone presents a COCI stolen from the association to one of its depository banks, it will not be accepted for encashment.
2. *The COCIs Clerk.* In view of the fact that all COCIs received by the tellers are stamped “non-negotiable” as detailed above, the COCIs clerk who records and processes these checks carries no accountabilities whatsoever. From the moment that a check is received up to the moment that it is deposited to the account of the association with one of its depository banks, that check is just a piece of paper to be processed and recorded. It will only reassume its negotiability upon its receipt by the association’s depository bank. In cases, however, where checks are received by mail, the COCIs clerk shall be charged with the duty of stamping the checks as “non-negotiable.”
3. As an added precautionary measure, the manager/accountant/loan officer should check from time to time whether all COCIs received are stamped “non-negotiable.” In the event that a COCI is not so stamped and it results in financial loss on the part of the association, the employee charged with the duty to stamp and who failed to do so, shall be held personally responsible, together with the manager/accountant/loan officer, for the loss.

REPORTING GUIDELINES ON CRIMES/LOSSES
(Appendix to Sec. 162-S on Reports)

1. NSSLAs shall report on the following matters through the appropriate supervising department of the Bangko Sentral:
 - a. Crimes whether consummated, frustrated or attempted against property/facilities (such as robbery, theft, swindling or estafa, forgery and other deceits) and other crimes involving loss/ destruction of property of the NSSLA when the amount involved in each crime is ₱20,000 or more.

Crimes involving NSSLA personnel, regardless of whether or not such crimes involve the loss/destruction of property of the NSSLA, even if the amount involved is less than those above specified, shall likewise be reported to the Bangko Sentral.
 - b. Incidents involving material loss, destruction or damage to the institution's property/facilities, other than arising from a crime, when the amount involved per incident is ₱20,000 or more.
2. The following guidelines shall be observed in the preparation and submission of the report.
 - a. The report shall be prepared in two (2) copies and shall be submitted within five (5) business days from knowledge of the crime or incident, the original to the appropriate supervising department of the Bangko Sentral and the duplicate to the Bangko Sentral Security Coordinator, thru the Director, Security Investigation and Transport Department.
 - b. Where a thorough investigation and evaluation of facts is necessary to complete the report, an initial report submitted within the five (5)-business day deadline may be accepted: *Provided*, That a complete report is submitted not later than fifteen (15) business days from termination of investigation.

GUIDELINES ON PRESCRIBED REPORTS SIGNATORIES AND SIGNATORY AUTHORIZATION
(Appendix to Sec. 162-S on Reports)

Category A-1 reports shall be signed by the chief executive officer, or in his absence, by the executive vice-president, and by the comptroller, or in his absence, by the chief accountant, or by officers holding equivalent positions. The designated signatories in this category, including their specimen signatures, shall be contained in a resolution approved by the board of trustees in the format prescribed in this Appendix.

Category A-2 reports of head offices shall be signed by the president, executive vice-presidents, vice-presidents or officers holding equivalent positions. Such reports of other offices/units (such as branches) shall be signed by their respective managers/officers in-charge. Likewise, the signing authority in this category shall be contained in a resolution approved by the board of trustees in the format prescribed in this Appendix.

Categories A-3 and B reports shall be signed by officers or their alternates, who shall be duly designated by the board of trustees. A copy of the board resolution, with format as prescribed in this Appendix.

Copies of the board resolutions on the report signatory designations shall be submitted to the appropriate supervising department of the Bangko Sentral within three (3) business days from the date of resolution.

FORMAT OF RESOLUTION FOR SIGNATORIES OF CATEGORY A-1 REPORTS

Resolution No. _____

Whereas, it is required under Sec. 162-S (*Categories and signatories of reports*) that Category A-1 reports be signed by the Chief Executive Officer, or in his absence, by the Executive Vice-President, and by the Comptroller, or in his absence, by the Chief Accountant, or by officers holding equivalent positions.

Whereas, it is also required that aforesaid officers of the institution be authorized under a resolution duly approved by the institution's Board of Trustees;

Whereas, we, the members of the Board of Trustees of _____ (Name of Institution), are conscious that, in designating the officials who would sign said Category A-1 reports, we are actually empowering and authorizing said officers to represent and act for or in behalf of the Board of Trustees in particular and _____ (Name of Institution) in general; Whereas, this Board has full faith and confidence in the institution's Chief Executive Officer, Executive Vice-President, Comptroller and Chief Accountant, as the case may be, and, therefore, assumes responsibility for all the acts which may be performed by aforesaid officers under their delegated authority;

Now, therefore, we, the members of the Board of Trustees, resolve, as it is hereby resolved that:

- | | | | |
|----|-----------|-----------------------------|-----------------------------|

ABSTRACT OF "TRUTH IN LENDING ACT" (Republic Act No. 3765)
(Appendix to Sec. 302-S on Posters)

Section 1. This Act shall be known as the "Truth in Lending Act."

Section 2. Declaration of Policy. It is hereby declared to be the policy of the State to protect its citizens from a lack of awareness of the true cost of credit to the user by assuring a full disclosure of such cost with a view of preventing the uninformed use of credit to the detriment of the national economy.

xxx xxx xxx

Section 3. As used in this Act, the term –

xxx xxx xxx

- (3) "Finance charge" includes interest, fees, service charges, discounts, and such other charges incident to the extension of credit as the Board may by regulation prescribe.

xxx xxx xxx

Section 4. Any creditor shall furnish to each person to whom credit is extended, prior to the consummation of the transaction a clear statement in writing setting forth, to the extent applicable and in accordance with rules and regulations prescribed by the Board, the following information:

- (1) the cash price or delivered price of the property or service to be acquired;
- (2) the amounts, if any, to be credited as down payment and/or trade-in;
- (3) the difference between the amounts set forth under clauses "(1)" and "(2)";
- (4) the charges, individually itemized, which are paid or to be paid by such person in connection with the transaction but which are not incident to the extension of credit;
- (5) the total amount to be financed;
- (6) the finance charge expressed in terms of pesos and centavos; and
- (7) the percentage that the finance charge bears to the total amount to be financed expressed as a simple annual rate on the outstanding unpaid balance of the obligation.

xxx xxx xxx

Section 6. (a) Any creditor who in connection with any credit transaction fails to disclose to any person any information in violation of this Act or any regulation issued thereunder shall be liable to such person in the amount of ₱100 or in an amount equal to twice the finance charge required by such creditor in connection with such transaction, whichever is the greater, except that such liability shall not exceed ₱2,000 on any credit transaction.

xxx xxx xxx

- (c) Any person who willfully violates any provision of this Act or any regulation issued thereunder shall be fined by not less than P1,000 nor more than P5,000 or imprisonment for not less than 6 months nor more than one year or both.

xxx xxx xxx

- (d) Any final judgment hereafter rendered in any criminal proceeding under this Act to the effect that a defendant has willfully violated this Act shall be prima facie evidence against such defendant in an action or proceeding brought by any other party against such defendant under this Act as to all matters respecting which said judgment would be an estoppel as between the parties thereto.

Sec. 7. This Act shall become effective upon approval.

Approved, 22 June 1963.

GUIDELINES ON THE SUSPENSION/DELISTING OF EXTERNAL AUDITOR IN THE LIST OF SELECTED EXTERNAL AUDITORS FOR BANGKO SENTRAL SUPERVISED FINANCIAL INSTITUTIONS (BSFIs)
(Appendix to Sec. 154-S on Framework on the Selection of External Auditors)

Section 1. Grounds for Suspension/Delisting of External Auditors

An external auditor included in the List of Selected Auditors for BSFIs shall be suspended or delisted by the Bangko Sentral, without prejudice to the imposition of other sanctions by the Securities and Exchange Commission (SEC)¹, under any of the following grounds:

- a. Gross negligence in the conduct of the audit or failure to comply with the Philippine Standards on Auditing and such other issuances of the Auditing and Assurance Standards Council;
- b. Issuance of an unqualified opinion which is not supported by full compliance by the auditee with the applicable financial reporting framework due to material deficiencies or misstatements in the financial statements;
- c. Conduct of an audit despite the lack or eventual loss of independence as provided for under the Code of Ethics for Professional Accountants in the Philippines;
- d. Conduct of any non-audit services for his statutory audit clients, if he has not undertaken the safeguards to reduce the threat to his independence;
- e. Any material misrepresentation in the reports submitted to the Bangko Sentral;
- f. Failure to comply with the provisions set forth under Sec. 154-S;
- g. Refusal for no valid reason, upon lawful order of the Bangko Sentral, to submit requested documents in connection with an ongoing investigation. The external auditor shall, however, be made aware of such investigation; and
- h. Failure to obtain from the Securities and Exchange Commission an accreditation appropriate to the client's category provided under Sec. 154-S on the appointment of external auditor.

Section 2. Procedures and Effects of Delisting/Suspension

- a. On the basis of the results of the assessment of the quality of audited financial statements and evidence on the existence of the grounds for suspension or delisting under Section 1 above, the external auditor shall be notified in writing by the appropriate supervising department of the Bangko Sentral of the existence of the ground for his/her suspension or delisting in the List of Selected External Auditors for BSFIs and shall be allowed to submit within fifteen (15) calendar days from receipt of such notice an explanation on why he/she should not be suspended/delisted, together with the evidence in support of his/her position.

An external auditor shall only be suspended or delisted after due notice and opportunity to defend/clear himself/herself.

- b. Failure of the external auditor concerned to reply within the period prescribed under Item "a" above, shall be considered as a waiver on his/her part of the opportunity to defend/clear himself/herself. In this respect, the appropriate supervising department of the Bangko Sentral shall proceed with the evaluation of the case based on available records/evidence.
- c. Upon approval by the Monetary Board, the external auditor concerned shall be informed in writing by the appropriate supervising department of the Bangko Sentral of his/her suspension or delisting in the List of Selected External Auditors for BSFIs.
- d. A suspended or delisted external auditor shall be automatically included in the Bangko Sentral's Watchlist Disqualification File "B" (temporary).
- e. The Securities and Exchange Commission shall be immediately informed of the suspension or delisting of the external auditor.
- f. Suspended external auditors may re-apply for inclusion in the List of the Selected External Auditors for BSFIs after the lapse of five (5) years from the date of effectivity of the suspension.

(Circular No. 1040 dated 20 May 2019)

¹ Accrediting Agency duly designated by the member-agency of the Financial Sector Forum, comprising of the Bangko Sentral ng Pilipinas, Securities and Exchange Commission, Insurance Commission, and Philippine Deposit Insurance Corporation.

**GUIDELINES ON THE ADOPTION OF PHILIPPINE FINANCIAL REPORTING STANDARDS (PFRS) 9 –
IMPAIRMENT AND IN SETTING UP OF ALLOWANCE FOR CREDIT LOSSES**
[Appendix to Sec. 114-S (Credit classification and provisioning)]

NSSLAs with the capacity to adopt loan loss methodologies fundamentally anchored on the principle of recognizing expected credit loss (ECL) in accordance with the provisions of PFRS 9 may opt to develop the same. In this respect, these NSSLAs shall refer to the *Appendix Q-57* for guidance and compliance.

However, NSSLAs with credit operations that may not economically justify adoption of said loan loss estimation methodology shall, at a minimum, be subject to the following guidelines:

Section 1. Stages of Credit Impairment

- a) Credit impairment is recognized in three stages under PFRS9:

Stage of credit impairment	Characteristics
Stage 1	- Credit exposures that are considered “performing” and with no significant increase in credit risk since initial recognition or with low credit risk
Stage 2	- Credit exposures that are considered “under-performing” or not yet non-performing but with significant increase in credit risk since initial recognition
Stage 3	- Credit exposures with objective evidence of impairment, thus, considered as “non-performing”
	-

- b) NSSLAs shall promptly recognize and maintain adequate allowance for credit losses at all times. It shall adopt the principles provided under the enhanced guidelines on sound credit risk management practices for NSSLAs¹ in implementing sound and robust credit risk measurement methodologies that adequately considers ECL. In this respect, the ECL methodology shall not be considered as a separate and distinct process but as an important element of the entire credit risk management process.

As a general rule, Especially Mentioned and Substandard – Underperforming [e.g., substandard accounts that are unpaid or with missed payment of less than ninety (90) days] shall be considered as Stage 2 accounts, while Substandard Non-performing, Doubtful, and Loss accounts shall be considered as Stage 3 accounts.

Section 2. Individually Assessed Credit Exposures²

1. Loans and other credit exposures with unpaid principal and/or interest shall be classified and provided with allowance for credit losses (ACL) based on the number of days of missed payments as follows:

For unsecured loans and other credit exposures:

No. of Days Unpaid/with Missed Payment	Classification	Minimum ACL	Stage
31 – 90 days	Substandard (underperforming)	10%	2
91 – 120 days	Substandard (non-performing)	25%	3
121 – 180 days	Doubtful	50%	3
181 days and over	Loss	100%	3

For secured loans and other credit exposures:

No. of Days Unpaid/with Missed Payment	Classification	Minimum ACL	Stage
31 – 90 days*	Substandard (underperforming)	10%	2
91 – 180 days*	Substandard (non-performing)	10%	3

¹ Sec. 114-S

² Other credit exposures include exposures under the scope of PFRS 9, such as investments in debt securities measured at fair value through other comprehensive income and amortized cost, loan commitments, sales contract receivables, accounts receivables, accrued interest receivables, and advances.

No. of Days Unpaid/with Missed Payment	Classification	Minimum ACL	Stage
181 – 365 days	Substandard (non-performing)	25%	3
Over a year – 5 years	Doubtful	50%	3
Over 5 years	Loss	100%	3

* When there is imminent possibility of foreclosure and expectation of loss, ACL shall be increased to 25%.

Provided, That where the quality of physical collaterals or financial guarantees securing the loans and advances are determined to be insufficient, weak or without recoverable values, such loans and advances shall be treated as if these are unsecured.

- Loans and other credit exposures that exhibit the characteristics for classified accounts described under Sec. 114-S (*Credit classification and provisioning*) shall be provided with ACL as follows:

Classification	Minimum ACL	Stage
Especially Mentioned	5%	2
Substandard – Secured	10%	2 or 3 ¹
Substandard – Unsecured	25%	2 or 3 ²
Doubtful	50%	3
Loss	100%	3

- Unsecured loans and other credit accommodations classified as “Substandard” in the last two (2) internal credit reviews which have been continuously renewed/extended without reduction in principal and is not in process of collection, shall be downgraded to “Doubtful” classification and provided with a fifty percent (50%) allowance for credit losses.
- Loans and other credit accommodations under litigation which have been classified as “Pass” prior to the litigation process shall be classified as “Substandard” and provided with twenty percent (20%) allowance for credit losses.
- Loans and other credit accommodations that were previously classified as “Pass” but were subsequently restructured shall have a minimum classification of Especially Mentioned (EM) and provided with a five percent (5%) allowance for credit losses, except for loans which are considered non- risk under existing laws, rules and regulations.
- Classified loans and other credit accommodations that were subsequently restructured shall retain their classification and provisioning until the borrower has sufficiently exhibited that the loan will be fully repaid.

Section 3. Collectively Assessed Loans² and Other Credit Exposures

- Current “Pass” loans and other credit exposures should be provided with a reasonable level of collective allowance, using historical loss experience adjusted for current conditions
- Loans and other credit exposures with unpaid principal and/or interest shall be classified and provided with ACL based on the number of days of missed payments as follows:

For unsecured loans and other credit exposures:

No. of Days Unpaid/with Missed Payment*	Classification	Minimum ACL	Stage
1 – 30 days	Especially Mentioned	2%	2
31 – 60 days / 1 st restructuring	Substandard	25%	2 or 3 ³
61 – 90 days	Doubtful	50%	3 ⁴
91 days and over / 2 nd restructuring	Loss	100%	3

* Par for microfinance loans

¹ The stage depends on whether the accounts are classified as non-performing (Stage 3) or underperforming (Stage 2).

² This includes microfinance loans, micro enterprises and small business loans and consumer loans such as salary loans, credit card receivables, auto loans, housing loans and other consumption loans, and other loan types which fall below the FI's materiality threshold for individual assessment.

³ The stage depends on whether the accounts are classified as non-performing (Stage 3) or underperforming (Stage 2).

⁴ Secs. 304/303-Q/N (*Non-performing Loans*) provides that doubtful accounts are considered as non-performing hence, shall be classified under Stage 3 notwithstanding the number of missed amortizations.

For secured and other credit exposures:

No. of Days Unpaid/with Missed Payment	Classification	ACL %		Stage
		Other types of collateral	Secured by real estate	
31 – 90 days	Substandard (underperforming)	10	10	2
91 – 120 days	Substandard (non-performing)	25	15	3
121 – 360 days	Doubtful	50	25	3
361 days – 5 years	Loss	100	50	3
Over 5 years	Loss	100	100	3

Provided, that where the quality of physical collaterals or financial guarantees securing the loans and advances are determined to be insufficient, weak or without recoverable values, such loans and advances shall be treated as if these are unsecured.

Section 4. General and Specific Provisions for Loan Accounts

- a) NSSLAs shall treat Stage 1 provisions for loan accounts as General Provision (GP), while Stages 2 and 3 provisions shall be treated as Specific Provisions (SP).
- b) NSSLAs shall set up general loan loss provision (GLLP) equivalent to 1 percent (1%) of all outstanding Stage 1 on-balance sheet loans, except for accounts considered as credit risk-free under existing regulations. NSSLAs are not required to provide a 1 percent (1%) GP on other credit exposures covered by PFRS 9 such as off-balance sheet accounts and investments.
- c) Allowance for credit losses for Stages 1, 2, and 3 accounts shall be recognized in the profit or loss statement. NSSLAs that shall use the guidelines provided under this Appendix (S-8) in determining allowance for credit losses shall book the entire amount of General Provision (GP), in profit or loss.

**GUIDELINES AND PROCEDURES GOVERNING THE CONSUMER ASSISTANCE MANAGEMENT SYSTEM
(CAMS) OF BSP-SUPERVISED FINANCIAL INSTITUTIONS
(Appendix to Sec. 702-S on Effective Recourse)**

(As deleted by Circular No. 1048 dated 06 September 2019, and as amended by Circular No. 857 dated 21 November 2014)

GUIDELINES ON GRANTING OF A LICENSE/AUTHORITY
(Appendix to Sec. 111-S on Licensing)

I. Guiding principle

The Bangko Sentral, the licensing authority, has the power to set criteria and reject applications that do not comply with the criteria/standards set. In this light, the Bangko Sentral is providing the following guidelines on its licensing process to establish accountability and promote transparency to banks and BSFIs wishing to apply for any licenses/authorities within the jurisdiction of the Bangko Sentral. These guidelines also aim to provide more consistency in how risk-focused supervision is applied to licensing process.

The Bangko Sentral will not restrict the scope of risk-taking activities of BSFIs consequent of the licenses and/or authorities granted: *Provided*, That these licenses and/ or authorities are in line with their business model and strategic direction: *Provided, further*, That BSFIs demonstrate the capacity and ability to implement these strategies.

As indicated in the new licensing policy, applications for licenses and/or authorities are categorized as follows:

1. *Type "A"* – applications for licenses and/or authorities where compliance with the defined prudential requirements/criteria described in Sec. 111-S (*Prudential criteria*) is a pre-condition for applicants to be considered eligible;
2. *Type "B"* – applications for licenses and/or authorities processed regardless of risk profile; and
3. *Type "C"* - activities which no longer require submission of applications and processing but shall be subject to submission of reports/certification/ notification within stated deadlines. However, compliance with pre-qualification requirements is subject to post verification and any false information and/or misrepresentation may be a basis for the imposition of appropriate enforcement actions described in Sec. 111-S (*Enforcement actions*).

II. Guidelines and procedures

1. *Process flow.* The licensing application process involves four (4) stages, to wit:
 - a. *Stage 1. Eligibility test and assessment.* The Bangko Sentral shall consider an applicant's eligibility for licenses/authorities categorized as *Type "A"* in accordance with the standards and/or prudential criteria described in Sec. 111-S (*Prudential criteria*); and whether approval thereof is consistent with applicable laws, rules, regulations, policies and safety and soundness considerations.

In this regard, BSFIs shall signify to the appropriate supervising department of the Bangko Sentral its interest to apply for a license(s) or authority/ies. However, the Bangko Sentral expects each BSFI to have conducted self-assessment vis-à-vis prudential criteria and/or requirements to determine whether it is eligible and/or qualified to apply for any specific license/authority, prior to signifying its interest.

BSFIs with CAMELS composite rating of below "3", or under PCA or rehabilitation may still be considered eligible, on a case by case basis, upon showing valid justifications and/or verifiable evidence of significant compliance with the comprehensive PCA plan (PCAP)/rehabilitation plan approved by the Bangko Sentral and/or if licenses and/or authorities applied for are vital to the implementation of the PCAP/rehabilitation plan.

- b. *Stage 2. Application.* The BSFI upon receipt of notice and/or confirmation from the Bangko Sentral of its eligibility can now formally submit its application letter together with the documentary requirements, as applicable to the license/authority applied for. Applications with incomplete documentation will be returned without prejudice to re-submission of a complete application and collection of applicable fees.
 - c. *Stage 3. Processing.* Upon receipt of a complete application, the appropriate supervising department of the Bangko Sentral shall proceed in preparing the memorandum elevating to the appropriate approving authority of the Bangko Sentral its recommended action/s.
 - d. *Stage 4. Decision.* Within five (5) working days upon approval and/or confirmation from the appropriate authority of the Bangko Sentral, BSFIs shall expect to be notified of the decision on their request/application.

The Bangko Sentral may request information and/or documents aside from the minimum documentary

requirements for each type of license/authority to arrive at an informed decision. It may also conduct limited inspection or validation, when warranted.

The Bangko Sentral may approve any application of an eligible applicant after evaluating the application and considering relevant factors. Likewise, the Bangko Sentral may deny applications if (a) significant supervisory or compliance concerns exist or (b) the applicants fail to provide material information necessary to make an informed decision.

2. *Responsibility*

The Bangko Sentral expects each applicant to prepare accurately and completely each application/certification/reports submitted to the appropriate supervising department of the Bangko Sentral.

By virtue of the application, the applicant authorizes the Bangko Sentral to conduct an on-site evaluation or inspection for the purpose of ascertaining compliance with relevant laws, rules, regulations and/ or directives, and/or applicant's risk management capabilities, when warranted.

For this purpose, the applicant shall include in its application letter the authorization in favor of the Bangko Sentral giving its consent to the conduct of on-site verification of the documents and/or representations stated in the application filed in connection with the license or authority applied for.

3. *Fees*

An applicant, depending on its classification and type of license/authority applied for, shall be assessed the following fees per application:

- a. *Processing fee* - shall be charged upon filing of an application and is non-refundable. In case of re-submission of application that is returned for incomplete documentation, another processing fee shall be charged anew; and
- b. *Licensing fee* - shall be charged to certain application upon approval. The licensing fee shall be net of the processing fee.

For banks, assessed fees shall be debited from the applicants' demand deposit account with the Bangko Sentral upon the lapse of fifteen (15) calendar days reckoned from receipt of Bangko Sentral's decision on its request/application. For this purpose, banks shall, upon filing of an application, state in its application letter the authority to debit their demand deposit account with the Bangko Sentral for the applicable fees to the license or authority applied for. Otherwise, assessed fees shall be paid to the Bangko Sentral.

4. *Post decision*

Unless otherwise prescribed by the Bangko Sentral, an applicant may file a new application for a denied and/or withdrawn application after the lapse of six (6) months reckoned from the date of denial/withdrawal: *Provided*, That any weaknesses, deficiencies and/or non-compliance with any laws, rules, regulations and/or directives that made the applicants ineligible have already been satisfactorily addressed.

(Circular No. 947 dated 15 February 2017)

NATIONAL RETAIL PAYMENT SYSTEM (NRPS) FRAMEWORK
(Appendix to Section 501-S)

A. NRPS Framework

The NRPS is a policy and regulatory framework that aims to establish a safe, efficient, and reliable electronic retail payment system in the Philippines. Given that retail payment systems contribute to the stability and efficiency of the financial system as a whole, the attainment of the NRPS vision will help achieve higher economic growth and enhance overall competitiveness of our economy.

With the rapid evolution of retail payments due to advancements in technology, retail payments related activities of BSFIs introduced a complex interplay of different types of risks. Thus, while the Bangko Sentral promotes the modernization of the country's retail payment system in accordance with the NRPS Framework, it is critical to ensure that enabling policies and a multifaceted approach to strengthening risk management are timely adopted, and greater attention is devoted to retail payments activities of BSFIs such as clearing and settlement.

In carrying out these activities, BSFIs are expected to adhere to the NRPS Framework and measures aimed at strengthening risk management as set forth in Sec. 803 and this Appendix. Hence, the retail payment system and activities that BSFIs participate in should establish the following:

1. Strengthened risk management through a better, holistic and multi-stakeholder approach to governance, and an enhanced transparency of clearing and settlement transactions classified according to risk profile.
2. Augmented efficiencies and effectiveness in the retail payment system by minimizing duplicative efforts, promoting interoperability among retail payment system participants, standardizing clearing and settlement rules, and harmonizing various initiatives towards the achievement of the shared goals of safe, reliable and efficient retail payment system.
3. Continued compliance with Bangko Sentral rules and regulations particularly on information technology, consumer protection, and AML/CFT.

Retail payments under the NRPS Framework are payments that meet at least one of the following characteristics: (i) the payment is not directly related to a financial market transaction; (ii) the settlement is not time-critical; (iii) the payer, the payee, or both are individuals or non-financial organizations; and (iv) either the payer, the payee, or both are not direct participants in the payment system that is processing the payment. This definition of retail payment includes person-to-person, person-to-business, business-to-person, business-to-business, person/business-to-government, and government-to-person/business payments.¹ On the other hand, large-value payments refer to payments, generally of very large amounts, which are mainly exchanged between banks or between participants of financial markets and that usually require urgent and timely settlement.

The Bangko Sentral, as a central bank, generally plays a variety of essential roles in the payment system by being an operator of the real-time gross settlement system (RTGS), an overseer in core payment arrangements, a user and participant of payment services, and, most critically, a catalyst for payment system reform. It is through the performance of these roles that the Bangko Sentral seeks to acquire a broader and holistic perspective on the role and the status of the payment system in the financial system and the economy in accordance with one of the pillars of central banking of promoting safe and efficient payment systems in the country.

1. Key Principles
 - a. Governance of the payment system shall be separate and distinct from the actual clearing operations to enable the retail payment system participants to effectively and efficiently deploy resources to focused and specialized activities. The governance of the payment system includes the establishment and implementation of standards and rules among payment system participants.
 - b. Sound governance shall be performed by an industry-led self-governing body that is duly recognized and overseen by the Bangko Sentral.
 - c. All qualified BSFIs may apply to be direct clearing participants and, as such, participate in the governance structure.

¹ Developing a comprehensive National Retail Payments Strategy, Financial Infrastructure Systems Policy and Research, World Bank, October 2012, available at http://siteresources.worldbank.org/FINANCIALSECTOR/Resources/Developing_a_comprehensive_national_retail_payments_strategy_for_G_PW_IO_20%2Bv1%29.pdf.

- d. All clearing participants shall subscribe to and comply with the PSMB-formulated principles, policies, and business rules that will govern the payments system.
- e. All clearing shall be done within the NRPS governance structure. Bilateral clearing arrangements outside of the NRPS governance structure are considered as undertakings that carry risks that cannot be identified, measured, monitored and/or controlled, nor can said undertakings be properly considered in attaining a holistic perspective and improving governance of the retail payment system. Hence, bilateral arrangements outside of the NRPS governance structure shall not be allowed and failure to comply therewith shall result in deployment of appropriate supervisory actions from the Bangko Sentral.
- f. All significant retail payment streams shall be covered by an ACH.
- g. Non-discriminatory participation shall be espoused in the retail payment system by allowing all qualified direct clearing participants to participate in the formulation of standards and rules, as well as participate in business arrangements.
- h. A reasonable market-based and transparent pricing mechanism shall be adopted by all BSFIs which are clearing participants. Reasonable service fees shall be allowed only for actual services rendered directly related to the delivery of electronic financial and payment services to clients of a BSFI.
- i. Bangko Sentral policies and supervisory actions, not directly involving payments governance within the scope of the PSMB, shall be addressed directly to the individual payment system participants as BSFIs.

2. Objectives:

- a. To enable effective and efficient interface and interoperability using shared and resilient infrastructure;
- b. To foster innovation and new business models;
- c. To promote fair access and competition amongst NRPS participants;
- d. To facilitate the provision of a wide range of payment products and services with needed certainty, affordability (based on a reasonable market-based pricing methodology) and trust; and
- e. To make relevant information on retail payment system available to concerned stakeholders.

The NRPS Framework espouses the cooperation of different competitors, or what is known as "*coopetition*", in the domestic retail payments by delineating areas to be covered between the cooperative and the competitive spheres.

It is recognized that certain areas are dedicated for cooperation and collaboration among BSFIs participating in the retail payment system towards the common goals of safety, efficiency, reliability and resiliency. This cooperative sphere centers on the clearing and settlement activities of BSFIs which shall collaborate through the formulation and implementation of clearing and settlement standards, rules, and agreements under a formal governance structure that conforms to the NRPS principles.

To complement the cooperative sphere is the competitive sphere where the NRPS principles promote competition through innovation in the delivery of quality and cost-effective financial products and services, the creation of new business models customized to the needs of target consumers, and the development of services with a higher level of security, among others. The competitive sphere shall be governed by reasonable, transparent and effective consumer pricing mechanisms to allow BSFIs cost-recovery and fair financial returns. Each BSFI shall be responsible for prescribing its pricing mechanisms for its financial products and services taking into consideration, among others, the nature of the product or service, the market segment to be served and the costs incurred to provide such product or service.

B. Governance - Payment System Management Body (PSMB)

The PSMB is an industry-led self-governing body that is duly recognized and overseen by the Bangko Sentral.

To attain a holistic perspective and multi-stakeholder organized structure that would bring about good governance in the retail payment system, BSFIs shall adhere to the following key principles when engaging in clearing activities and must do so only within the NRPS governance structure.

1. Key Principles

- a. The retail payment transactions covered under the NRPS governance structure shall be as follows:
 - i. For card-based instruments, the card shall be both issued and acquired locally; and
 - ii. For online, mobile, or other electronic payment instructions/instruments, the account of payer (sender) and account of payee (recipient) shall be both maintained with BSFIs that are licensed to offer EFPS.

- b. The PSMB shall be a not-for-profit juridical entity.
 - c. The PSMB shall adopt a Charter in consultation with the Bangko Sentral.
 - d. The PSMB membership criteria shall, at all times, be consistent with the NRPS Framework and Bangko Sentral regulations, in addition to the following principles:
 - i. All qualified direct clearing participants should be members of the PSMB.
 - ii. To be a PSMB member, a BSFI shall be a participant in at least one (1) ACH and actively participate in an ACH within one (1) month of joining the PSMB.
 - iii. Each PSMB member shall be entitled to only one (1) vote.
 - e. The PSMB shall be funded by the members on an agreed basis.
 - f. The PSMB shall be governed by a PSMB board which shall observe the following principles:
 - i. The PSMB board shall have multi-stakeholder representation in accordance with the volume of the risk-taking activities, such as clearing volume, within a specified time frame [e.g., immediately preceding twenty-four (24) months]. The basis for computing the clearing volume across all ACHs or payment streams shall include all payment streams with clearing activities as of the date when the election of the PSMB board is called, except if a valid reason is shown to limit the parameters.
 - ii. The PSMB board shall also abide by sound corporate governance practices which may include, but is not limited to, allocating seat/s for independent board member/s or board member/s that represent/s the broader public interest and has/have competence and experience in the payments field.
 - iii. The PSMB board members shall appoint as official representative their chief executive officer (CEO) and designate a formal alternate who can act with full authority (e.g., voting, approval, decision-making, and others).
 - iv. Each PSMB board member shall have one (1) vote.
 - v. No two (2) PSMB board members shall come from the same group of companies where one is majority-owned or controlled by the other company.
 - vi. The Chairperson shall be elected among PSMB board members and shall not serve for two (2) successive terms.
 - g. The PSMB shall be independent from the clearing switch operator/s with respect to business operations.
 - h. All BSFIs that are part of the NRPS governance structure shall subscribe to and comply with the PSMB-formulated principles, policies, and business rules that will govern the payments system provided such PSMB-formulated principles, policies and business rules are in conformity with the NRPS Framework and principles as well as applicable laws and regulations.
2. Objectives
- a. The PSMB will provide sound governance to the retail payment system and serve as a forum of collaboration for ensuring appropriate conditions for retail payments in the country. Towards this end, the PSMB will perform these functions with respect to its members:
 - i. Ensure compliance by PSMB members with criteria, standards and rules promulgated and adopted by the PSMB's membership and PSMB board, as applicable.
 - ii. Set policies and standards on clearing activities of PSMB members.
 - iii. Standardize retail clearing agreements across payment streams, which may include minimum guideline on the content of service level agreements with CSOs.
 - iv. Manage members' conformance to multilateral retail clearing agreements.
 - v. Review applications for establishment of ACHs and to accordingly approve the formation thereof to ensure, among others, that the NRPS principle of a payment stream falling only under one (1) ACH is observed by PSMB members.

- vi. Prescribe policies and rules to promote visibility of retail clearing and resulting settlement positions to manage risks resulting from or associated with clearing and settlement activities.
- vii. Set forth policies, rules and/or standards to ensure that no anti-competitive activities occur in clearing operations of PSMB members.
- viii. Promote fair access to the payment system amongst PSMB members.
- ix. Enable effective and efficient interface and interoperability using shared and resilient infrastructure.
- x. Establish a dispute resolution mechanism for PSMB members on matters not covered or cannot be resolved under the ACH dispute resolution framework.
- xi. Provide a clearing environment that will support payments innovation and the adoption of new business models by the payment system participants.

C. Automated Clearing House (ACH)

The ACH is a multilateral legally binding agreement amongst clearing participants. The ACH shall govern clearing and settlement determination.

To promote interoperability and standardize clearing and settlement rules and procedures, BSFIs are expected to observe the following key principles in forming and participating in ACHs under the NRPS governance structure.

1. Key Principles

- a. ACHs shall be created and differentiated based on payment streams, which comprise of payment instruments or instructions, business rules, clearing activities and risk considerations which are of similar nature or which create similar risk profiles.
- b. A payment stream can fall under only one (1) ACH.
- c. The formation of and participation in an ACH shall be open to all qualified clearing participants.
- d. The formation of an ACH shall be considered a business arrangement to be agreed upon between participants of an ACH.
- e. An ACH shall engage the services of only one (1) clearing switch operator.
- f. PSMB members may be part of more than one (1) ACH Participant Group and/or participate in more than one (1) ACH, provided the PSMB member meets the requirements for participating in such ACH.
- g. At least two (2) direct clearing participants can initiate the creation of an ACH subject to the recognition of the PSMB Board, or in the absence of a PSMB, the Bangko Sentral.

2. Salient Features

- a. ACH participants shall elect representatives to an ACH Participant Group, which once recognized by the PSMB, shall draw up and implement ACH rules and agreements and contract a qualified clearing switch operator. To assist in drafting the ACH agreements, the Participant Group may nominate a Working Group to formulate draft agreements subject to the former's approval.
- b. The assignment of a new ACH to an existing or new ACH Participant Group shall be approved by the PSMB Board.
- c. Where a new ACH Participant Group has to be formed, it shall be recognized by the PSMB Board once its charter has been accepted by the ACH participants and meets the PSMB criteria for an ACH Participant Group.

D. Clearing Switch Operator (CSO)

The CSO provides clearing switch services.

To augment efficiencies in the retail payment system while ensuring a robust and resilient infrastructure underlying retail payment transactions of BSFIs, BSFIs should observe the following key principles in engaging the services of CSOs relative to the delivery of a retail payment product or service within the NRPS governance structure.

1. Key Principles

- a. The operations of the CSO that services an ACH shall be limited to the provision of clearing and other services that do not compete with services offered by BSFIs participating in the ACH.
- b. Clearing switch operations shall be conducted effectively and efficiently consistent with international standards as this is a critical prerequisite for the functioning of all the various systems supporting and underlying retail payment services.
- c. The CSO shall have a reliable, resilient, robust, and secure infrastructure to ensure consistency and continuity of services under different operating conditions.
- d. The CSO shall be a duly licensed entity in the Philippines. Entities organized under the laws of countries other than the Philippines shall secure a license to do business in the Philippines and comply with the Foreign Investments Act of 1991 as well as other applicable laws and regulations.
- e. A CSO can extend service to multiple ACHs.
- f. Each ACH, through their designated CSO, shall individually settle their clearing results through the RTGS system operated by the Bangko Sentral.

(Circular No. 980 dated 06 November 2017)

GUIDELINES ON EUROPAY, MASTERCARD AND VISA (EMV) IMPLEMENTATION
(Appendix to Sec. 145-S)

A. Background

In response to the increasing sophistication of frauds perpetrated through magnetic stripe (magstripe), international payment networks have orchestrated the shift towards EMV chip-enabled card. The EMV is an interoperability standard for chipbearing smart card technology defined by EMVCo in 1994, adoption of which has resulted to significant reduction in card frauds due to skimming¹ and counterfeiting.

To outpace and manage fraudsters' shift towards jurisdictions that are still using magstripe, Bangko Sentral supervised financial institutions (BSFIs) via Circular No. 808 dated 22 August 2013 were required to migrate their entire payment network to the more secure EMV chip-enabled cards.

B. Statement of Policy

It is the policy of the Bangko Sentral to foster the development of safe, secure, efficient, and reliable retail payment systems, protect the integrity and confidentiality of customer accounts and information and uphold consumer protection.

C. Scope

These guidelines shall govern the migration to and implementation of EMV of all BSFIs with debit card issuing and acquiring functions. For credit card, only cash advance transaction at Automated Teller Machines (ATMs) shall be covered since other credit card transactions are governed by the rules of the international payment networks.

It is incumbent upon all affected BSFIs to ensure that other key players in the domestic payment network comply with these guidelines.

For purposes of the subject guidelines, payment transactions covered are limited to card present and contact transactions in ATMs, POS terminals and other similar devices. Guidelines governing card-not-present as well as contactless transactions shall be issued separately.

D. Definition of Terms

1. *EMV*, which stands for Europay, MasterCard and Visa, is a global standard for credit, debit and prepaid payment cards based on chip card technology. EMV chip-based payment cards, also known as smart cards, contain an embedded microprocessor, a type of small computer. The microprocessor chip contains the information needed to use the card for payment, and is protected by various security features. Chip cards are a more secure alternative to traditional magstripe payment cards.

Implementing EMV shall address the deficiencies inherent in magstripe by reducing fraud arising from counterfeit, lost and stolen card information through the following features:

- a. Authentication of the chip card to ensure that the card is genuine so as to protect against counterfeit fraud for on line-authorized transactions;
 - b. Digitally signing payment data for transaction integrity;
 - c. More robust cardholder verification to protect against lost and stolen card fraud for EMV transactions in all acceptance environments.
2. *Acquiring institution (acquirer)* is a bank or financial institution that processes credit or debit card transactions via ATM or POS terminals.
 3. *Bangko Sentral Supervised Financial Institutions (BSFIs)* include banks, non-banks with quasi-banking function (NBQB), non-bank electronic money issuers and other non-bank institutions which under existing Bangko Sentral rules and regulations and special laws are subject to Bangko Sentral supervision and/or regulation.
 4. *Co-branded cards* are Philippine-issued cards affiliated with international payment networks.

¹ Skimming is the illegal copying of information from the magnetic stripe of a payment card to gain access to accounts.

5. *Debit cards* are payment cards linked to bank deposit or prepaid/electronic money (e-money) accounts.
6. *Domestic payment network* includes BSFIs as well as other key players such as merchants, providers of ATMs, point-of-sale (POS) terminals and similar devices, card vendors, card personalization bureaus and domestic switches responsible for processing and handling domestic transactions.
7. *Domestic switches* refer to BancNet and Megalink.
8. *EMV chip liability shift* means that the liability and responsibility for counterfeit or fraudulent transaction shall shift to the BSFI who is not EMV-compliant.
9. *EMVCo* is the governing body that manages the EMV specification.
10. *Hybrid cards* are payment cards that have both EMV chip and magstripe.
11. *International payment networks* refer to the payment networks that have global establishment. For purposes of subject guidelines, recognized international networks shall refer to Visa, Mastercard, UnionPay, Diners/Discover, American Express, and Japan Credit Bureau (JCB).
12. *Interoperability* refers to the ability of Philippine cardholders to transact at Philippine ATM and POS terminals, regardless of network affiliation or branding of the card.
13. *Issuing institution (issuer)* is a bank or non-bank financial institution that issues payment cards, whether proprietary or co-branded, to consumers.
14. *Payment cards* are cards that can be used by cardholders and accepted by terminals to withdraw cash and/or make payment for purchase of goods or services, fund transfer and other financial transactions. Typically, payment cards are electronically linked deposit, prepaid or loan/credit accounts.
15. *Philippine domestic EMV specification* refers to the specification or standards based on EMV that shall be adopted in the Philippine financial market for the proprietary or non-co-branded cards.
16. *Proprietary cards* are Philippine-issued cards without international payment network affiliation.
17. *Technical fallback* is a state in which a chip cannot be used and another type of entry, such as magstripe, is used to complete a transaction.

E. General Rule

In line with the declaration of policy, BSFIs, in migrating to EMV, shall consider the following:

1. BSFIs shall maintain interoperability of the domestic payment network;
2. The Philippine EMV implementation shall use established EMV specification as follows:
 - a. Issuers of proprietary cards shall use the Philippine domestic EMV specification; and
 - b. Issuers of co-branded cards shall use the EMV specification of their affiliated international payment network.
3. At a minimum, all debit accepting devices shall acquire/accept Philippine issued proprietary cards using the Philippine domestic EMV specification of members/participants of the domestic switches;
4. The domestic payment network shall ensure continued interoperability and acceptance of Philippine EMV issued cards using the Philippine domestic EMV specification on Philippine EMV deployed acceptance devices;¹ and
5. BSFIs shall strengthen consumer protection by adequately handling and containing consumer concerns and complaints arising from fraudulent schemes done electronically.

¹ Include EMV-compliant ATMs, POS terminals and other similar devices.

F. The Philippine Domestic EMV Specification

With the main objectives of maintaining interoperability and reducing card fraud, BSFIs shall adopt a Philippine domestic EMV specification for proprietary cards. The domestic EMV specification should:

- Adopt the EMV specification according to EMVCo;
- Apply to ATM and domestic debit POS transactions;
- Support contact transactions;
- Support online card authentication to ensure that transactions are made using a valid card;
- Support online authorization to enable issuer to manage fraud and credit risk at the transaction level;
- Support online PIN cardholder verification method;
- Support technical fallback to magstripe in the interim, as provided in Section I of these guidelines, without prejudice to the issuer's decision to process/approve fallback transactions.

G. Minimum Operational Requirements

1. Issuing institutions shall:
 - a. Ensure that they have the technical systems and network necessary to process and handle EMV transactions;
 - b. Support EMV data elements in authorization messages;
 - c. Define chip cards feature, functionality and interface capability;
 - d. Enhance risk management systems to leverage chip;
 - e. Determine the card migration strategy;
 - f. Update customer support and operational systems to support chip cards;
 - g. Be certified for network interfaces and card personalization by a certification body organized by BSFIs pursuant to these guidelines;
 - h. Replace card base; and
 - i. Educate the consumers.
2. Acquiring institutions shall:
 - a. Ensure that card-accepting devices are EMV-certified to support the acquiring and routing of Philippine-issued debit cards using the Philippine domestic EMV specification;
 - b. Ensure that P|N-entry devices are Payment Card Industry PIN Transaction Security (PCI-PTS)¹ compliant; and
 - c. Enable a debit POS environment that supports online PIN for Philippine-issued debit cards.
3. Domestic switches shall:
 - a. Establish infrastructure and systems that are EMV-compliant and able to support switched EMV transactions from domestic interconnected networks;
 - b. Ensure continued support to existing transaction sets and functions provided to consumers;
 - c. Enhance efforts to educate their members on EMV collaboration and seek effective alignment of strategy and design principles; and
 - d. Ensure continued ability to support, in the interim, transactions in magstripe format subject to liability shift policies acceptable to Bangko Sentral, the standards of which shall be covered in subsequent guidelines.

H. Detailed Guidelines, Policies and Processes

BSFIs shall agree on and implement detailed technical and operational requirements, policies and procedures that are acceptable to the Bangko Sentral, the standards of which shall be covered in subsequent guidelines, and aligned with subject EMV Implementation Guidelines, covering but not limited to the following:

1. Philippine Application Identifier (AID);
2. Single Common AID, Single Common Card Personalization Profile and Single Common Terminal Configuration for domestic transactions;
3. Transaction routing;

¹ A security requirement of the Payment Card Industry (PCI) regarding testing of PIN-entry devices using predefined standards to get certification.

4. Testing and certification
5. Dispute and fraud risk management; and
6. Other processes affected by the EMV migration.

I. Hybrid Card, Fallback Function and EMV Liability Shift

While the EMV infrastructure and environment are in the process of achieving full stability, hybrid cards may still be acceptable as a fallback option in cases when the EMV chip or terminal is unable to process domestic chip transactions. In this regard, BSFIs shall formulate a liability shift framework that is acceptable to the Bangko Sentral.

J. Updated EMV Migration Plan

Any changes arising from the aforementioned guidelines shall be incorporated in the EMV Migration Plan and all affected BSFIs shall resubmit their updated plan to Bangko Sentral's Core Information Technology Specialist Group (CITSG) within sixty (60) calendar days from the date of the Circular.

All BSFIs shall support migration to EMV standards. Consequently, all cards issued and card-accepting devices should be EMV-compliant.

(Circular No. 1019 dated 31 October 2018)

EMV CARD FRAUD LIABILITY SHIFT FRAMEWORK (ECFLSF)

(Appendix to Sec. 145-S)

I. Introduction

This document outlines the Bangko Sentral's guidelines implementing the EMV Card Fraud Liability Shift Framework (ECFLSF). Pursuant to Sec. 148 (*IT Risk management systems*) and *Appendix 113* of the MORB, Bangko Sentral Supervised Financial Institutions (BSFIs) should shift from the magnetic stripe (magstripe) technology to EMV-compliant cards, POS terminals and ATMs. The immediate impact and benefit on the adoption of EMV technology is the reduction in card fraud resulting from counterfeit or skimming attacks.

While migration efforts to shift to EMV technology are ongoing, the use of magstripe in payment cards and/or card-accepting devices shall be allowed subject to card fraud liability shift. This means that the BSFIs which have not yet or have partially adopted the EMV technology shall be held responsible for losses associated with the use of a counterfeit card in a card-present environment.

II. Statement of Policy

It is the policy of the Bangko Sentral to foster the development of safe, secure, efficient and reliable retail payment systems, protect the integrity and confidentiality of customer accounts and information and uphold consumer protection.

Towards this end, the Bangko Sentral requires all concerned BSFIs to migrate to a more secure payment technology and sets forth subject principles for allocation of card fraud liability with the aim of ensuring compliance of the different retail payment system participants with the Bangko Sentral's EMV migration requirement. Pending full migration to the EMV technology, the ECFLSF shall likewise accelerate the dispute resolution and restitution process for customers who have valid claims arising from counterfeit fraud or skimming attacks.

III. Applicability and Scope

These guidelines shall apply to all BSFIs with debit and credit card issuing and acquiring functions and shall govern the allocation of liability associated with fraudulent transactions arising from counterfeit cards beginning 1 January 2017, subject to the conduct of proper investigation by the concerned participant/s of the payment card network. The coverage shall be limited to card-present and contact transactions of Philippine-issued payment cards used domestically in automated teller machines (ATMs), point-of-sale (POS) terminals, and other similar devices routed to either domestic or international payment networks.

Consequently, the ECFLSF shall not apply to card-not-present and contactless transactions. Furthermore, foreign-issued payment cards used domestically and Philippine-issued payment cards used abroad shall not be covered as these are already subject to the existing liability shift and chargeback rules of the international payment networks.

IV. Definition of Terms

For purpose of these guidelines, the following definitions shall apply:

- 1) *Acquiring institution (Acquirer)*, is a bank or non-financial institution that processes credit or debit card transactions via ATMs, POS terminals, and other similar devices.
- 2) *EMV compliant device or terminal* is a device or terminal that has, or is connected to, a contact chip card reader, has an EMV application, certified, and is able to process EMV transactions.
- 3) *Co-branded cards* are Philippine-issued cards affiliated with international payment networks.
- 4) *Counterfeit card* is an imitation or falsification of a genuine magstripe card or EMV chip card with track data copied from a hybrid EMV card.
- 5) *Debit cards* are payment cards linked to bank deposit or prepaid/electronic money (e-money) accounts.
- 6) *Fallback to magstripe transaction occurs* when the chip on the card is not being read by a terminal. This is similar to technical fallback, which is defined in *Appendix 113* of the MORB as a state in which the chip cannot be used and another type of entry, such as magstripe, is used to complete a transaction.
- 7) *Hybrid cards* are payment cards that have both EMV chip and magstripe.

- 8) *International payment networks* refer to the payment networks that have global establishment. For purposes of subject guidelines, recognized international networks shall refer to Visa, Mastercard, UnionPay, Diners/Discover, American Express, and Japan Credit Bureau (JCB).
- 9) *Issuing institution (Issuer)* is a bank or non-bank financial institution that issues payment cards, whether proprietary or co-branded, to consumers.
- 10) *Payment cards* are cards that can be used by cardholders and accepted by terminals to withdraw cash and/or make payment for purchase of goods or services, fund transfer and other financial transactions. Typically, payment cards are electronically-linked to deposit, prepaid or loan/credit accounts.

V. Guiding Principles

- 1) The adoption of EMV technology is designed to reduce and mitigate risks arising from counterfeit card fraud. While it remains virtually impossible to create a counterfeit EMV card that can be used to conduct an EMV payment transaction successfully, the presence of magstripe in a hybrid EMV card makes it still vulnerable to counterfeit attacks.
- 2) A BSFI that has enabled the most secure EMV options shall be protected from financial liability arising from losses on counterfeit card fraud. The liability for this type of fraud shall shift to the BSFI which is not or is partially compliant with the EMV migration requirement.
- 3) To resolve the issue on the allocation of card fraud liability using the guidelines described herein, the involved parties (such as issuer, acquirer, and payment network) should, first, characterize the fraud committed, and then, assess the technology being employed, in light of the applicable payment network rules. The party supporting EMV technology will prevail and in case of a technology-tie (neither or both parties are EMV compliant), the liability for fraudulent transactions generally remains with the Issuer.

VI. Allocation of Card Fraud Liability

Allocation of liability for counterfeit card fraud is summarized in the following table:

	Card Capabilities	Acceptance Device Support	Scenario	Liability
1	Magnetic stripe only	Magnetic stripe only	Magnetic card transaction was completed	Issuer
2	Magnetic stripe only	EMV compliant	Magnetic card transaction was completed	Issuer
3	EMV compliant hybrid card	Magnetic stripe only	Magnetic card transaction was completed	Acquirer ¹
4	EMV compliant hybrid card	EMV compliant	Fallback transaction; Magnetic card transaction was completed	Issuer

The information provided above shall be considered as a general guide as each fraudulent transaction shall be separately investigated on. Likewise, the domestic and international payment networks may come up with other scenarios and probable conditions that illustrate how liability is assigned on counterfeit card fraud using different combinations of card and acceptance device capabilities. However, the resolution of such scenarios/conditions should follow the principles espoused in these guidelines.

VII. Consumer Protection and Complaints Handling and Resolution

- 1) The participants in the domestic payment network (such as issuer, acquirer, and payment network) should collaborate and devise detailed rules and procedures including arbitration mechanisms to operationalize the ECFLSF. Accordingly, a body responsible for strictly implementing the above-mentioned detailed rules and procedures on ECFLSF should be constituted.

¹ When an Acquirer accepts a magstripe card that was counterfeited with track data copied from an EMV compliant hybrid card and the counterfeit card is used at a device/terminal that is not EMV-compliant, resulting in a transaction to be successfully processed, the Acquirer is liable for any chargeback resulting from such fraud.

- 2) Cardholders' complaints and/or requests for chargeback as a result of counterfeit card shall be considered as complex complaint/request defined in *Appendix 115* of the MORB and hence, shall follow the standards provided in such regulations, except for the processing and resolution timeline which should be within 10 days instead of 45 days.
- 3) Issuers and Acquirers should ensure that affiliated international payment networks align their existing liability and chargeback rules with the ECFLSF insofar as Philippine-issued payment cards used in the domestic payment environment are concerned.

(Circular No. 1019 dated 31 October 2018)

Guidelines on Submission of Information Technology (IT) Profile Report

In order to build the baseline information of IT systems of Philippine banks and to risk profile the complexity of IT operations based on technology-related products and services offered, delivery channels, and processes involved, all banks are required to accomplish and submit annually an IT Profile Report as of 31 December of the reference year.

In accordance with Sec. 148 of the Manual of Regulations of Banks (MORB) on Technology Risk Management, the following shall be observed in the submission of the IT Profile Report:

1. The IT Profile reporting template can be accessed at <http://www.bsp.gov.ph/frp/templates>. Reports shall be submitted on an annual basis within twenty-five (25) calendar days from the end of reference year. (Attached as Annex A is sample format of IT Profile Report.)

2. The IT Profile report shall be submitted electronically to the following e-mail addresses:

E-mail Address	Type of Reporting Institution
sdckb-itprofile@bsp.gov.ph	Universal/Commercial Banks (U/KBs)
sdctb-itprofile@bsp.gov.ph	Thrift Banks (TBs)
sdcrb-itprofile@bsp.gov.ph	Rural/Cooperative Banks (R/CBs)

3. The following format shall be used for the subject of the e-mail: "ITPROFILE <bankname>, <reference period>", e.g.:

To	: sdctb-itprofile@bsp.gov.ph
cc	:
Subject	: ITPROFILE <bankname>, 31 December 20yy

4. The certification, duly notarized and signed by the authorized official of the reporting institution, shall be sent within the prescribed submission deadline to the Director of the Department of Supervisory Analytics (DSA) via facsimile at (632) 708-7554 or 708-7558.
5. Within the same period prescribed in Item 1, Institutions that are unable to transmit their IT Profile Report electronically may submit the same report in compact disc (CD), together with the aforementioned certification through messengerial or postal services. Said report shall be submitted to the following:

The Director
Department of Supervisory Analytics
Bangko Sentral ng Pilipinas
11th Floor, Multi-Storey Building
BSP Complex, A. Mabini Street
Malate, Manila 1004

6. The IT Profile Report template and other relevant attachments are also available upon request at the Bangko Sentral Department of Supervisory Analytics through the above-mentioned e-mail addressed and/or postal address.

Guidelines on the Electronic Submission of the Report on Crimes and/or Losses (RCL)

Pursuant to existing regulations prescribing the reporting of cyber related fraud as well as other crime related incidents to the BSP and in line with on-going initiatives of maximizing available Information Technology infrastructure for regulatory reporting, the following guidelines shall be observed in submitting the RCL:

1. Reportable incidents shall be transmitted electronically using the data entry template (DET) prescribed for the updated RCL. The prescribed DET and its supporting Control Prooflist (CP) for the Initial Report and Final Report, respectively, and the User Guide as relevant reference for accomplishing the DET can be downloaded from http://www.bsp.gov.ph/ses/reporting_templates or requested directly from the Department of Supervisory Analytics (DSA). The Control Prooflist for the initial and final RCL need not be notarized.
2. The updated RCL reporting structure and its corresponding DET considered the reportable cyber fraud incidents as well as other incidents required under Secs. 148 (*Reports*) and 173 (*Report on crimes/losses*).
3. The DET for the RCL (DET-RCL) together with the corresponding scanned CP in Portable Document Format (PDF) duly notarized and signed by the authorized official of the reporting bank shall be electronically transmitted within the existing deadline prescribed for Initial Report and Final Report, as the case may be, to the following prescribed e-mail addresses:

Type of Institution	E-mail Address
Universal and Commercial Banks	sdckb-rcl@bsp.gov.ph
Thrift Banks	sdctb-rcl@bsp.gov.ph
Rural and Cooperative Banks	sdcrb-rcl@bsp.gov.ph

4. The following format shall be used for the subject of the e-mail:

<report name>space<bank name>space<control no.>space<report status>, e.g.:

To : sdctb-rcl@bsp.gov.ph (example for thrift banks)
Subject : RCL <Bank A> 102016-0001 INITIAL

using the following required format for the filenames:

<reference no.>_<report status>. <file extension>, e.g.:

- RCL_000250_102016-0001_INITIAL.xls and
- RCL_000250_102016-0001_INITIAL.pdf

5. Each email transmission shall correspond to only one (1) DET-RCL file as multiple RCL cases in a single email transmission will be automatically rejected, thus considered unsubmitted. Each DET-RCL transmission shall be accompanied by its corresponding CP as described in item 3. DET-RCL files which are transmitted without the required CP shall be deemed unsubmitted.
6. Hard copy submission of the RCL shall no longer be accepted. Nevertheless, within the same prescribed period, banks that are unable to transmit electronically may submit their DET-RCL and its accompanying CP in compact discs (CD) through messengerial or postal services. The DET-RCL and its accompanying CP shall be submitted to:

The Director
Department of Supervisory Analytics
Bangko Sentral ng Pilipinas
11th Floor, Multi-Storey Building
BSP Complex, A. Mabini Street
Malate, Manila 1004

7. Report submissions that do not conform to the above prescribed procedures shall not be accepted and will be considered non-compliant with the Bangko Sentral reporting standards as provided under Sec. 171. It likewise follows that only files prescribed by the Bangko Sentral for the RCL shall be accepted as compliant with the existing reportorial requirements subject to validation and applicable penalties for erroneous, delayed, or unsubmitted reporting.

Financial Reporting Package for Non-Stock Savings and Loan Associations (FRPNSSLA) ***[Appendix to Sec. 161-S (Financial Reporting Package)]***

The FRPNSSLA is a set of financial statements for prudential reporting purposes composed of the Balance Sheet, Income Statement and Supporting Schedules. The FRPNSSLA is primarily designed to align the Bangko Sentral reportorial requirements with the provisions of the Philippine Financial Reporting Standards (PFRS). It is also designed to meet the statistical requirements of the Bangko Sentral.

Organization of the Instructions of the FRPNSSLA

The instruction is divided into the following sections:

1. The General Instructions, which describe the overall reporting requirements;
2. Manual of Accounts, which provides in the order presented in the Balance Sheet and the Income Statement the definitions of the accounts in the FRPNSSLA;
3. Line Item Instructions for the Balance Sheet, Income Statement and Supporting Schedules; and
4. Report Formats.

In determining the required treatment of particular transactions or in determining the definitions of the various items, the General Instructions, Manual of Accounts and Line Item Instructions must be used jointly. A single section does not necessarily give the complete instructions for completing all items of the reports.

GENERAL INSTRUCTIONS

Who must Report on What Forms/Schedules

All Non-Stock Savings and Loan Associations (NSSLAs) are required to prepare the Financial Reporting Package. The FRPNSSLA shall be prepared on a solo basis. Solo basis shall refer to the combined financial statements of the head office and branches/other offices of the NSSLA.

Solo income statement shall be prepared quarterly on a cumulative basis, i.e., first quarter report shall cover results of operations during the first quarter, second quarter report shall cover results of operations during the first and second quarters, etc.

Schedules that do not apply to a particular NSSLA should only be left blank when submitted.

Frequency of Reporting

The FRPNSSLA shall be prepared and submitted quarterly within thirty (30) calendar days after the end of the reference quarter. If the 30th calendar day falls on a Saturday, Sunday, or Holiday, or on a day which business operations of the Bangko Sentral is suspended, the following business day shall apply.

Amounts Reported

All amounts reported in the FRPNSSLA must be in absolute figures including two decimal places, except for "Losses" columns/rows which shall be reported in negative figures, i.e., enclosed in parentheses.

(Circular Nos. 1143 dated 12 April 2022 and 1047 dated 29 August 2019)

**Guidelines on the Adoption of Philippine Financial Reporting Standards
(PFRS 9) – Classification and Measurement
[Appendix to Sec. 161-S (PFRS)]**

Section 1. Classification and Measurement of Financial Assets and Financial Liabilities

Non Stock Savings and Loan Associations (NSSLAs) shall classify and measure financial assets and financial liabilities, in accordance with the provisions of PFRS 9. In this respect, NSSLAs shall observe the following:

- A. **Classification of Financial Assets** - Financial assets shall be classified based on their contractual cash flow characteristics and the business model for holding the instruments.

Financial assets that are debt instruments. Financial assets that are debt instruments shall be classified under any of the following categories:

- a) **Financial Assets at Fair Value through Other Comprehensive Income (FVOCI).** A financial asset measured at FVOCI shall meet both of the following conditions:

- The financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

- b) **Financial assets measured at amortized cost.** A financial asset that is a debt instrument, other than those that are designated at fair value through profit or loss, which meet both of the following conditions:

- The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

- B. **Classification of Financial Liabilities** - Financial liabilities shall be classified and subsequently measured at amortized cost using the effective interest method.

Section 2. Business Model in Managing Financial Assets

Business model pertains to the manner by which a portfolio of financial assets will be managed to generate cash flows such as by collecting contractual cash flows or by both collecting contractual cash flows and selling the financial assets, among others. NSSLAs shall determine the business model for a portfolio of financial assets based on scenarios that are reasonably expected to occur, taking into consideration the expected changes to asset allocations or to balance sheet structure as a result of business strategies. In this respect, these scenarios do not include “worst case” or “stress case” scenarios.

- a) The criteria that will be used in determining the business model for managing financial assets shall be applied to a portfolio of financial assets and not on an instrument-by-instrument basis.
- b) Business models for managing financial assets shall be observed through specific activities being undertaken by the NSSLA to achieve their stated objectives. An NSSLA shall exercise sound judgment and shall use all relevant evidences available at the date of assessment in determining the business model for managing portfolios of financial assets. Such relevant evidences include but are not limited to:
- Risks affecting the performance of financial assets and the business model and how these risks will be managed;
 - Frequency, volume, timing and nature of sales in prior periods, the reasons for such sales, and expectations about future sales activity;
 - The manner by which business model and the financial assets held within it are evaluated and reported to the NSSLA’s board of trustees and senior management; and
 - The basis for compensation of concerned personnel and/officers (e.g., whether the compensation is based on the fair value of the assets managed or the contractual cash flows collected).

- c) Business models for managing financial assets shall be approved by the board of trustees and shall be adequately documented. The documentation for each business model shall include, among others, detailed description of specific business objectives (whether to hold in order to collect contractual cashflows and to sell or to collect contractual cashflows only); cases of sales and/or derecognition of financial assets and conditions for changes in business model that are considered consistent with the provisions of PFRS 9; and appropriate level of authority designated to approve determination of business model of specific portfolios of financial assets as well as the sales, derecognition, and changes in business model of financial assets.
- d) Changes in business model are expected to be rare and shall be determined as a result of external or internal changes which are significant to the NSSLA's operations and evident to external parties. Change in intention related to the management of particular financial assets does not constitute a change in business model. The change in business model shall be approved by the appropriate level of authority based on sound justifications and in accordance with accounting standards. The qualitative and quantitative impact of the change in business model shall be adequately documented and appropriately disclosed in the audited financial statements in line with the disclosure of risk management policies on the relevant risk exposure.
- e) All affected financial assets shall be reclassified when, and only when, a NSSLA changes its business model for managing financial assets in accordance with the provisions of Item "(d)". Financial liabilities are not allowed to be reclassified.

If cash flows are realized in a way that is different from the expectations at the date at which the NSSLA assessed the business model, it does not constitute a change in the classification of the remaining financial assets as long as the NSSLA considered all relevant and objective information available when it initially made the business model assessment.

In cases where an NSSLA changes a business model, the financial assets within the said model shall not be reclassified within the reporting period that the change in business model was made. The reclassification in this case shall only take effect in the next financial reporting month. In this respect, any previously recognized gains, losses or interest shall not be restated.

Section 3. Contractual Cash Flow Characteristics

- a) In order for a financial asset to be classified and measured at amortized cost or FVOCI, the contractual terms of the financial asset must give rise on specific dates to cash flows that are SPPI on the principal amount outstanding.
- b) The cashflows that are considered SPPI are consistent with basic lending arrangement where the principal is the fair value of the financial asset at initial recognition and the interest represents consideration for the time value of money, credit risk, profit margin and other basic lending risks and costs associated with holding the financial asset for a particular period of time.
- c) An NSSLA shall determine if the contractual cashflows are SPPI in accordance with the provisions of PFRS 9. In this respect, an NSSLA shall assess the contractual terms of a financial instrument before investing in the same and determine if such instrument introduces exposure to risks or volatility that is unrelated to a basic lending arrangement.
- d) Policies and procedures shall include guidelines in performing the SPPI assessment, and shall identify the units responsible for conducting and reviewing the propriety of the assessment as well as the documentation supporting the classification of financial assets.

Section 4. Supervisory Expectations on Classification and Measurement of Financial Assets and Financial Liabilities

- a) The business model for managing financial assets shall be assessed in line with the NSSLA's internal risk management policies such as credit, market and liquidity risk management. For instance, financial assets which were classified and measured at amortized cost mostly relate to the management of credit risk and/or interest rate risk since there is no intent to sell the financial asset prior to maturity.
- b) The business model for managing financial assets shall be assessed based on the objective information on the activities undertaken for the portfolios of financial assets.
- c) The manner by which the performance of financial assets is measured given a specific business model shall be assessed. Key performance indicators should be consistent with the specific business models for portfolios of financial assets. For instance, performance of financial assets classified at amortized cost may be measured through (net) interest income since the objective is to generate accrual income from long-term investments. The results of the impairment testing and credit review of accounts may likewise be considered.
- d) Bases for incentives or compensation granted to personnel involved in managing specific portfolios of financial assets shall be evaluated in line with the expected activities under a specific business model.

- e) The roles and responsibilities of units involved in the management, monitoring, and reporting of performance of financial assets for specific business models shall be clearly defined. The Bangko Sentral shall assess the effective implementation of the lines of defense, which shall include the evaluation of the propriety of segregation of functions.

The delineation of the roles and responsibilities of the lines of defense shall be evaluated as well as the effectiveness of the scope and frequency of their review. These lines of defense are expected to evaluate consistency of internal policies and practices with the provisions of PFRS 9 and adherence of the NSSLA with established policies.

- f) The review of the lines of defense shall cover, among others, the assessment of the following:
- i. Comprehensiveness of reports submitted to the board or senior management. These should include the risks that may affect the performance of the business model; consistency of the performance of the financial assets held within the business model against strategic and financial objectives; and results of internal and external validation on management and monitoring of business model.
 - ii. Propriety of sales or derecognition of financial assets based on the business model for managing the same. For instance, the NSSLA decides to sell a portion of a portfolio of financial assets held and measured at amortized cost, a review should be conducted to ascertain whether the business models has not changed as a result of such sale. In case of change in business model, the self-assessment functions shall look into the circumstances that triggered the decisions to change, consistency of said decision with internal policies and principles of the standard, propriety of the governance process, and adequacy of documentation.

MANUAL OF REGULATIONS FOR NON-BANK FINANCIAL INSTITUTIONS

POWERS OF THE BANGKO SENTRAL

001-P EXAMINATION BY THE BANGKO SENTRAL

The head of the appropriate supervising department of the Bangko Sentral and his duly designated representatives are authorized to conduct an examination, inspection, or investigation of books, records, business affairs, administration, and financial condition of any pawnshop, whenever said official deems it necessary for the effective implementation of P.D. No. 114, and other pertinent rules and regulations. Said official and his duly designated representatives may administer oaths to any director, officer, or employee of the pawnshop.

If, upon such examination, inspection, or investigation, the official or his deputies shall establish that the pawnshop is violating or is not complying with the requirements of P.D. No. 114 and of the provisions of other pertinent rules and regulations, said official shall immediately inform the Monetary Board of his findings and recommendations, and the Monetary Board shall take appropriate action to stop such violation or non-compliance, and punish the pawnshop and/or the persons responsible.

Any business establishment which represents itself as a pawnshop and/or regularly grant loans against pawns/collaterals physically delivered to the establishment or is suspected to be a pawnshop or found to be operating as a pawnshop illegally shall be reported to the office of the city or municipal mayor where the establishment is located, for appropriate action, without prejudice to whatever legal action under Section 18 of P.D. No. 114 that may be taken against the owners and operators of the establishment.

Refusal to permit examination. Refusal to permit examination shall mean any act or omission which impedes, delays or obstructs the duly authorized Bangko Sentral officer/examiner/employee from conducting an examination or visitorial inspection, including the act of refusing to accept or honor a letter of authority to examine presented by any duly authorized officer/examiner/employee of the Bangko Sentral and the act of refusing to present pawnshop's records upon request.

(Circular Nos. 961 dated 02 June 2017 and 938 dated 23 December 2016)

002-P SUPERVISORY ENFORCEMENT POLICY

The Policy sets forth guidance on the Bangko Sentral's supervision-by-risk framework. It also puts together in a holistic manner all the enforcement tools available to the Bangko Sentral as contained in various laws and rules and regulations¹ and communicates the deployment thereof in a consistent manner by the Bangko Sentral in the course of performing its supervisory function. It further sets out the guiding principles and objectives behind the deployment of such enforcement actions.

Nothing in this Section shall be construed as superseding enforcement actions previously imposed against Bangko Sentral-supervised FIs pursuant to existing laws, Bangko Sentral rules and regulations.

a. *Policy statement and rationale*

The Bangko Sentral is issuing this Supervisory Enforcement Policy to provide guidance on its supervision-by-risk framework. The Bangko Sentral recognizes that risk-taking is integral to a financial institution's business. The existence of risk is not necessarily a reason for concern so long as Management exhibits the ability to effectively manage that level of risk and operates the financial institution (FI) in a safe and sound manner. Thus, when risk is not properly managed, the Bangko Sentral may deploy a wide range of enforcement actions provided under existing laws, Bangko Sentral rules and regulations, taking into consideration the nature and extent of the supervisory issues and concerns and the level of cooperation provided by Management.

The Bangko Sentral adopts a holistic approach to supervision with the objective of guiding FIs under its supervision to mitigate risk and achieve the desired changes.

¹ Section 4 of R.A. No. 8791 (General Banking Law of 2000) defines the scope of Bangko Sentral's supervisory powers, which may be grouped into three categories: (i) issuance of rules; (ii) examination and investigation; and (iii) enforcement of Prompt Corrective Action (PCA)

Bangko Sentral's risk-based supervision, of which enforcement action is a key part, focuses on the safety and soundness of operations of the FIs. This policy sets forth the expectations of the Bangko Sentral when it deploys enforcement action and the consequences when expected actions are not performed within prescribed timelines.

Thus, this over-arching policy is needed - (a) as a collation of various enforcement actions already present in various laws, rules and regulations; (b) for better guidance of the FIs and the bank supervisors; and (c) as a means to broadcast to the banking/financial industry the consequences of failure to address the Bangko Sentral requirements and supervisory expectations.

b. Objectives of the enforcement policy

The Bangko Sentral's Supervisory Enforcement Policy aims to achieve the following two (2) key objectives:

- (1) Achieving the desired change. Effect a change in the overall condition and governance of Bangko Sentral-supervised FIs consistent with the expectations set under relevant laws and regulations; and
- (2) Mitigating risk. Mitigate risks to the FIs and other stakeholders in order to maintain the stability of the financial system.

c. General principles

The Bangko Sentral, in the deployment of enforcement actions, is guided by the following general principles:

- (1) Root cause diagnosis. The enforcement action addresses the underlying cause of the supervisory issues and concerns.
- (2) Consistently matching the severity of enforcement action to the supervisory issue. The deployment of appropriate enforcement action is commensurate to the severity of the supervisory issues and concerns. The severity of the supervisory issues and concerns is assessed in terms of *prevalence*¹ and *persistence*.
- (3) Successive or simultaneous deployment of enforcement actions. Enforcement actions may be deployed successively or simultaneously taking into account the nature and seriousness of the difficulties encountered by the FIs and the ability and willingness of the FI's Management to address the supervisory issues and concerns.
- (4) Monitorability and follow-through. The Bangko Sentral monitors the FI's progress/compliance with the expected actions to address the supervisory issues, concerns and problems.
- (5) Escalation of enforcement actions. Enforcement actions may be escalated if the desired change is not achieved and the root causes of the FI's issues, concerns and problems are not addressed by the FI within prescribed timelines.

d. Categories of enforcement actions

The three (3) main categories of enforcement action are: (1) corrective actions, (2) sanctions and (3) other supervisory actions. These enforcement actions may be imposed singly or in combination with others.

(1) Corrective actions

Corrective actions are enforcement actions intended to require the FI to address the underlying cause of supervisory issues, concerns and problems. These include the following:

(a) Bangko Sentral Directives

¹ Prevalence pertains to the pervasiveness of the supervisory issues, concerns and problems in relation to their impact on the FI's solvency, asset quality, operating performance and liquidity, among others.

Directives are basically orders and instructions communicated by the appropriate supervising department in Bangko Sentral requiring the FI to undertake a specific positive action or refrain from performing a particular activity within a prescribed timeline.

(b) Letter of Commitment (LOC)

The LOC is an enforcement action where the FI's Board of Directors (Board) is required, upon approval and/or confirmation by the Monetary Board, to make a written commitment to undertake a specific positive action or refrain from performing a particular activity with a given time period.

The LOC is generally used to arrest emerging supervisory concerns before these develop into serious weaknesses or problems, or to address remaining supervisory issues and concerns.

(2) Sanctions

Sanctions that may be imposed on an FI and/or its directors and officers, as provided under existing laws, Bangko Sentral rules and regulations, are subject to the prior approval and/or confirmation by the Monetary Board. Such sanctions include the following:

(a) FIs

- Restrictions on activities and privileges
- Suspension of authorities, privileges and other activities
- Divestment and/or Unwinding
- Monetary sanction - Penalties/Fines Against the FI

(b) Directors and officers

- Reprimand
- Restriction on compensation and benefits
- Divestment
- Suspension
- Disqualification
- Removal
- Monetary penalties/fines

The foregoing sanctions to individuals are without prejudice to the filing of separate civil or criminal actions against them, when appropriate.

(3) Other supervisory actions

Subject to prior Monetary Board approval, the Bangko Sentral, when warranted, may deploy other supervisory actions such as (a) Initiation into the PCA Framework; (b) Issuance of a cease and desist order (CDO) against the FI as well as its directors and officers; (c) Conservatorship; and (d) Placement under receivership.

e. Due process

An integral part of the deployment of enforcement actions is the observance of due process in all cases.

The FI and/or its directors and officers are afforded fair and reasonable opportunity to explain their side and to submit evidence/s in support thereof, which are given due consideration in determining the appropriate enforcement action(s) to be imposed.

(Circular No. 875 dated 15 April 2015)

PART ONE

PAWNSHOP BUSINESS -ORGANIZATION, MANAGEMENT AND ADMINISTRATION

A. ESTABLISHMENT AND ORGANIZATION OF PAWNSHOPS

101-P BASIC LAW GOVERNING PAWNSHOPS

P.D. No. 114, known as the Pawnshop Regulation Act, regulates the establishment and operation of pawnshops.

Scope of authority of pawnshops. A duly organized and licensed pawnshop has, in general, the power to engage in the business of lending money on the security of personal property within the framework and limitations of P.D. No. 114 and the following regulations, subject to the regulatory and supervisory powers of the Bangko Sentral.

Definition of terms.

- a. *Pawnshop operator* shall refer to a person or a juridical entity authorized by the Bangko Sentral to engage in pawnshop business.
- b. *Pawnshop business* shall refer to the business of lending money on personal property that is physically delivered to the control and possession of the pawnshop operator as loan collateral. The term shall be synonymous, and may be used interchangeably, with *pawnbroker* or *pawnbrokerage*.
- c. *Pawnshop office* shall refer to the area where the pawning business is conducted.
- d. *Pawner* shall refer to the borrower from a pawnshop.
- e. *Pawnee* shall refer to the pawnshop or pawnbroker.
- f. *Pawn* is the personal property delivered by the pawner to the pawnee as security for a loan.
- g. *Pawn ticket* is the pawnbroker's receipt for a pawn.
- h. *Property* shall include only such personal property which can be physically delivered to the control and possession of the pawnee.

(Circular Nos. 961 dated 02 June 2017 and 938 dated 23 December 2016)

102-P FORM OF ORGANIZATION

A pawnshop may be established as a single proprietorship, a partnership or corporation.

Only Filipino citizens may establish and own a pawnshop organized as a single proprietorship.

If a pawnshop is organized as a partnership, at least seventy percent (70%) of its capital shall be owned by Filipino citizens. Pawnshops established as partnerships prior to 29 January 1973, with non-Filipino partners whose aggregate holdings amount to more than thirty percent (30%) of the capital may retain the percentage of their aggregate holdings as of 29 January 1973, and said percentage shall not be increased, but may be reduced, and once reduced shall not be increased thereafter beyond thirty percent (30%) of the capital stock of such pawnshop.

In the case of a pawnshop organized as a corporation, at least seventy percent (70%) of the voting stock therein shall be owned by citizens of the Philippines, or if there be no capital stock, at least seventy percent (70%) of the members entitled to vote shall be citizens of the Philippines.

Pawnshops registered as a corporation with foreign equity participation in excess of thirty percent (30%) of the voting stock, or members entitled to vote, of the pawnshop may retain the percentage of foreign equity as of 29 January 1973, and said percentage shall not be increased, but may be reduced and once reduced, shall not be increased thereafter beyond thirty percent (30%) of the voting stock, or number of members entitled to vote, of such pawnshop.

The percentage of foreign-owned voting stock in a pawnshop corporation shall be determined by the citizenship of its individual stockholders. If the voting stock in a pawnshop corporation is held by another corporation, the percentage of foreign ownership in that pawnshop, shall be computed on the basis of the foreign citizenship of the individuals owning voting stocks in, or members entitled to vote of, the stockholder corporation.

(Circular No. 938 dated 23 December 2016)

103-P AUTHORITY TO OPERATE FROM THE BANGKO SENTRAL

Pursuant to Section 6 of P.D. No. 114, an operator securing Bangko Sentral's Authority to Operate a pawnshop business shall file an application with the appropriate supervising department of the Bangko Sentral. The application shall be signed by the proprietor/managing partner/president or officer of equivalent rank and shall be accompanied by the documents listed in *Appendix P-1*.

In considering the application to operate a pawnshop business, the Bangko Sentral shall take into account the fitness and propriety of the pawnshop operator and/or its incorporators/directors/trustees/partners/officers. In determining whether a person is fit and proper to be an operator of a pawnshop business, regard shall be given to the following: integrity/probity, market reputation, competence, and financial capacity.

Classification of pawnshop operator license. The following are the powers and scope of authorities of pawnshop operators, depending on the type of license issued by the Bangko Sentral:

Type	Description
"A"	Pawnshop business with not more than ten (10) offices.
"B"	a. Pawnshop business with more than ten (10) offices; or b. Pawnshop business with money changing/foreign exchange dealing
"C"	Pawnshop business with corollary remittance activity requiring Bangko Sentral registration, with or without money changing/foreign exchange dealing.
"D"	Virtual pawnshop operators or those engaged in pawnshop business through electronic pawning (e-pawning) which refer to systems and processes that enable customers to pawn their personal property through electronic channels.

The Bangko Sentral shall not issue the "B", "C" and "D" pawnshop operator licenses to single-proprietorship or partnership form of pawnshop operators.

All pawnshop businesses are allowed to act as Remittance Sub-Agents as defined in Sec. 901-N (*Definition of terms*).

Mandatory training requirement. The proprietors¹, partners, directors, president or officer of equivalent rank and function, and over-all head of the pawnshop operation and the head of the compliance unit shall attend, before the start of operations, a seminar on AML/combating the financing of terrorism (CFT) laws, rules and regulations, conducted by the Bangko Sentral, AMLC, or any reputable training provider².

Corporate governance. A pawnshop operator organized as a corporation shall comply with the SEC requirements on corporate governance, if applicable, and as proof of compliance, the said corporate pawnshop operator shall submit to the Bangko Sentral a notarized certification to that effect.

Filing/licensing fees. An operator securing Bangko Sentral's Authority to Operate a pawnshop business shall pay a filing fee of P1,000.00 upon filing of an application and is non-refundable.

Upon approval of the application, as the case may be, the following licensing fee, depending on the type of license being applied for, shall be charged:

License	Fee
"A"	₱5,000
"B"	₱25,000
"C"	₱50,000
"D"	₱50,000

The amount of licensing fee to be assessed to the applicant shall be net of the filing fee paid.

The Bangko Sentral reserves the right to collect other reasonable fees/charges to cover the cost of processing the applications of pawnshops.

(Circular Nos. 1039 dated 3 May 2019, 961 dated 02 June 2017, and 938 dated 23 December 2016)

¹ Refer to owner of single proprietorship pawnshops

² Refers to an entity which has an adequate track record of successfully conducting training programs preferably on financial institution-oriented courses, including AML/CFT training. For this purpose, the Pawnshop shall be responsible in ascertaining whether the training provider is reputable as herein defined.

104-P REGISTRATION WITH THE CITY/MUNICIPALITY

The pawnshop operator shall secure a business permit from the city or municipality wherein a pawnshop office is to be established and operated, in accordance with the requirements of the pertinent ordinance in that city or municipality.

Notification. A pawnshop operator is allowed to establish and operate more than one (1) pawnshop office: *Provided, however,* That it shall be the responsibility of the pawnshop operator to notify the appropriate supervising department of the Bangko Sentral regarding new pawnshop office/s operated during the month within five (5) working days from end of the reference month.

Such notification shall include the exact address of the pawnshop office and the starting date of its actual operations and must be signed by the proprietor/managing partner/president or an officer of equivalent rank and function.

(Circular Nos. 1039 dated 3 May 2018, 961 dated 02 June 2017, and 938 dated 23 December 2016)

105-P REGISTERED/BUSINESS NAME

No person or entity shall advertise, use signage or hold itself out as being engaged in the business of a pawnshop or use in its business name the words "pawnshop", "pawnbrokerage", or words of similar import, or transact in any manner the business of a pawnshop unless so authorized to operate as such by the Bangko Sentral.

Change of registered/business name. A pawnshop shall not change its registered/business name without submitting the following documents to the appropriate supervising department of the Bangko Sentral within ten (10) working days before effecting such change:

- a. Certificate of Registration from DTI or SEC, as the case may be, indicating the new registered/business name; and
- b. Original Bangko Sentral Authority to Operate issued under the old name.

A new Bangko Sentral Authority to Operate shall be issued indicating the new registered/business name of the pawnshop.

The metal plate/s issued by the Bangko Sentral to the pawnshop under its original name shall be surrendered for the issuance of new metal plate/s indicating the new registered/business name. The Bangko Sentral reserves the right to collect a reasonable amount to cover the cost of production/issuance of the metal plate/s.

Use of registered/business name in signage, pawn tickets and other forms. The following guidelines shall be observed with respect to the use of the registered/business name in the signage, pawn ticket and other forms of a pawnshop:

- a. As a general rule, the registered name appearing in the Certificate of Registration from the DTI or SEC, as the case may be, shall be used consistently in the pawnshop's signage and in all documents including pawn tickets, official receipts, stationery and other similar documents of the pawnshop.
- b. A pawnshop that uses or will use a name that is different from its registered name or that uses or will use a name already registered and being used by another pawnshop shall indicate parenthetically under such name, the registered name of the pawnshop with the DTI or SEC, as the case may be, with the words "*owned and operated by*" before the registered name in the pawnshop's pawn tickets, official receipts, stationery and other similar documents.
- c. A pawnshop that is a subsidiary or affiliate of another pawnshop shall likewise indicate such relationship in the pawn tickets, official receipts, stationery and other similar documents.

A *subsidiary* is a corporation more than fifty percent (50%) of the voting stock of which is owned by another corporation; while an *affiliate* is a corporation less than fifty percent (50%) of the voting stock of which is owned by another corporation.

- d. The exact address of the pawnshop shall be indicated consistently in all pawnshop documents (e.g., pawn tickets, official receipts, stationery and other similar documents) and in the business permit issued by the city or municipality.

(Circular No. 974 dated 29 September 2017, 961 dated 02 June 2017, M-2017-003 dated 27 January 2017, and Circular No. 938 dated 23 December 2016)

106-P COMMENCEMENT OF PAWNSHOP OPERATIONS

A pawnshop operator shall commence actual pawnshop business operations within six (6) months from the date of issuance of the Authority to Operate. Failure to commence actual pawnshop business operations within the aforementioned six (6)-month period shall render the Bangko Sentral Authority to Operate as automatically cancelled.

The pawnshop operator shall notify the Bangko Sentral in writing of the start of operations within five (5) business days from the actual start of operations.

(Circular Nos. 961 dated 02 June 2017 and 938 dated 23 December 2016)

107-P BUSINESS DAYS AND HOURS

Pawnshops shall be open for business at least five (5) days a week and for at least six (6) hours a day. The business hours and business days shall be posted conspicuously at all times within the premises of the pawnshop.

(Circular Nos. 961 dated 02 June 2017 and 938 dated 23 December 2016)

108-P TRANSFER/RELOCATION/CLOSURE OF PAWNSHOP OFFICE

Consistent with the requirements stated in Section 16 of P.D. No. 114, no pawnshop shall transfer or relocate its place of business within three (3) months following the maturity of any loan or pledge, or before any pawn shall have been sold or disposed of as provided under P.D. No. 114 and these regulations. The requirement for the publication of notice mandated under the same section of P.D. No. 114 shall be strictly observed for such transfer/relocation of the pawnshop's place of business.

A notice of transfer shall be submitted to the appropriate supervising department of the Bangko Sentral within five (5) working days after the effectivity of such transfer. The metal plate issued for the transferred/relocated pawnshop office shall also be surrendered to the Bangko Sentral for the issuance of a new metal plate. The Bangko Sentral reserves the right to collect a reasonable amount to cover the cost of production/issuance of said metal plate.

Voluntary Closure of a Pawnshop Office. Voluntary closure of a pawnshop office may be effected only after compliance with the requirements under Section 16 of P.D. No. 114.

A notice of closure of pawnshop office shall be submitted to the appropriate supervising department of the Bangko Sentral within five (5) working days after the effectivity of such closure. The metal plate issued to such pawnshop office shall also be surrendered to the Bangko Sentral.

(Circular Nos. 961 dated 02 June 2017 and 938 dated 23 December 2016)

B. SPECIAL AUTHORITIES

111-P LICENSING

Consistent with the mandate of the Bangko Sentral to promote a safe and sound banking system, the licensing process on permissible activities of BSFI is enhanced to align the process with international standards and best practices such as the "Core Principles for Effective Supervision" issued by the Basel Committee on Banking Supervision. The Bangko Sentral will not restrict the scope of risk-taking activities of BSFIs consequent of the licenses and/or authorities granted: *Provided*, That these licenses and/or authorities are in line with their business model and strategic direction: *Provided, further*, That these BSFIs demonstrate the capacity to implement these strategies and the ability to manage risks.

The enhanced policy guidelines set forth the expectations and criteria of the Bangko Sentral with respect to granting of licenses and authorities as well as its right to reject applications if the criteria set forth are not met by the applicant BSFIs ("applicants") or if the information provided is not adequate. The Bangko Sentral also reserves the right to withdraw or revoke the license and/or authority or enforce appropriate actions when an institution no longer meets the criteria or standards required to be met for the exercise of the license and/or authority.

These criteria are intended to incorporate the licensing process into Bangko Sentral's enforcement regime that is anchored on good governance, sound risk management system and effective control systems. Further, these criteria aim to provide more consistency on how the risk-focused supervision function is applied to the licensing process. This enhanced licensing policy aims to ensure that licenses and authorities are granted only to applicants that comply with the standards set.

It is also the thrust of these enhanced policy guidelines on granting licenses/authorities to establish Bangko Sentral's accountability and promote transparency on the licensing process which are consistent with its commitment to deliver prompt and efficient service.

Scope. Applications for licenses and/or authorities shall be categorized as follows:

- a. *Type "A"* -applications for licenses and/or authorities where compliance with the defined prudential requirements/criteria described in this Section is a pre-condition for applicants to be considered eligible;

- b. *Type "B"* -applications for licenses and/or authorities processed regardless of risk profile; and
- c. *Type "C"* -activities which no longer require submission of applications and processing but shall be subject to submission of reports/certification/notification within stated deadlines. However, compliance with pre-qualification requirements is subject to post verification and any false information and/or misrepresentation may be a basis for the imposition of appropriate enforcement actions described in this Section. The Bangko Sentral shall use this information to continuously tailor its supervisory strategy for the supervised entities and to maintain and continuously update its institutional database.

Prudential criteria. The prudential criteria set forth in this Section shall be used in determining the eligibility of applicants to the licenses and/or authorities granted by the Bangko Sentral. Accordingly, the following minimum conditions must be met:

- a. Applicant domestic banks must have a CAMELS composite rating of at least "3" and a *"Management"* rating of not lower than "3", branches of foreign banks must have a ROCA rating of at least "3", and BSFIs must have a RAS rating of at least *"Acceptable"*. Whenever applicable, ratings equivalent to cited minimum rating grade requirements under appropriate rating systems (i.e., IT Rating Systems, Trust Rating Systems, among others) shall apply for certain licenses and/or authorities;
- b. Applicants have no major supervisory concerns in governance, risk management systems, and internal controls and compliance system, and characterize/demonstrate the following:

(1) Governance

Applicants must display a culture of good corporate governance appropriate to its size, risk profile and complexity of operations. Board of directors and management, in their respective roles, provide an appropriate level and quality of oversight and support to all of the institution's activities. Sound management practices are observed and demonstrated through (a) active oversight and satisfactory performance by the board of directors and senior management, (b) appropriate policies, processes, and controls relative to the institution's size, complexity and risk profile, (c) maintenance of an independent and effective internal audit and compliance program as well as a sound internal control environment, and (d) effective risk monitoring and management information systems.

Applicants should not be found engaging in an activity which may be considered as conducting business in an unsafe and unsound manner. In cases where weaknesses, violations of law, policy and/or regulation exists, other than those considered unsafe or unsound practices, these should not be material to the safety and soundness of the institution, can be reasonably managed, and are being adequately addressed.

Quality of corporate governance shall be assessed based on the principles and framework set forth in the Guidelines in Assessing the Quality of Corporate Governance in BSFIs;

(2) Risk management system and internal controls

Applicants shall have a comprehensive risk management system approved by its board of directors (or equivalent management committee in the case of foreign bank branches) to identify, measure, evaluate, report and control or mitigate all material risks on a timely basis and to assess the adequacy of their capital in relation to their risk profile and market and macroeconomic conditions and whose sophistication are commensurate to the risks being monitored and controlled. The risk management system must be characterized by a clear delineation of responsibility for risk management, adequate risk measurement systems, appropriate risk limits structure, effective internal controls and complete, timely and efficient risk reporting systems.

Likewise, applicants shall have an effective and adequate system of internal controls for the conduct of their business taking into account their risk profile. These controls deal with organizational structure, accounting policies and processes, checks and balances, safeguarding of assets and investments and appropriate and effective internal audit and compliance functions. Standards and principles as well as the Bangko Sentral's expectations governing internal controls and audit under existing regulations shall apply in assessing the quality and effectiveness of the internal control systems of an applicant; and

(3) Compliance system

Applicants shall have a compliance system, appropriate to its size, risk profile and complexity of operations, designed to specifically identify and mitigate business risks¹ which may erode the franchise value of the

¹ As defined under Sec. 161-Q, *business risk* refers to conditions which may be detrimental to the institution's business model and its ability to generate returns from operations, which in turn erodes its franchise value. Business risk includes reputation, compliance, market conduct and legal risks.

institution. Compliance policies and procedures embodied in a Compliance Policy Manual should be sound and effectively implemented. Likewise, compliance monitoring and testing as well as review process should be robust to ensure BSFI conducts its business/operations in accordance with banking laws, rules and regulations and other laws relevant to banking such as securities laws and regulations. BSFI's should not have been found significantly non-compliant with prudential requirements such as SBL, DOSRI limits, capital adequacy ratio requirements, among others.

Standards and principles set forth in the Compliance Rating System framework shall apply in assessing the quality of BSFI's compliance system; and

- c. Applicants have complied with directives and/or are not subject of specific directives and/or enforcement actions by the Bangko Sentral.

Applicants shall have corrected any findings of unsafe or unsound practices and have addressed any outstanding explicit directives from the Bangko Sentral and/or other relevant regulatory bodies, prohibiting the conduct of activities related to the licenses and/or authorities being applied, as of the date of application. Applicants with specific prohibitions to conduct certain activities shall not be eligible to apply for that particular license and/or authority.

No application shall be accepted until such time that enforcement actions are formally lifted by the Bangko Sentral and/or other relevant regulatory bodies after applicants have demonstrated to the Bangko Sentral that safety and soundness concerns are satisfactorily addressed and/or until such time applicants become eligible.

Applications of BSFIs under rehabilitation and/or enhanced supervision status¹ shall be dealt with in accordance with the eligibility test described in Sec. II.1(a) of *Appendix P-5*.

BSFIs granted with licenses/authorities shall continuously comply with the abovementioned standards and requirements even after the license/authority has been granted; otherwise, any deviation or non-compliance may be a basis for the imposition of appropriate enforcement actions described in this Section.

The specific guidelines and procedures on the Bangko Sentral's licensing framework are shown in *Appendix P-5*.

Enforcement actions. In line with the thrust of the Bangko Sentral to incorporate the licensing process into its enforcement regime, the Bangko Sentral reserves the right to deploy, as may be warranted, an adequate range of supervisory tools to ensure that grantees of licenses/authorities are and remain qualified to possess the same, bring about timely corrective actions and compliance to Bangko Sentral directives, and provide safety to depositors, creditors, other stakeholders as well as the public in general.

Enforcement actions that may be imposed include, but are not limited to:

- a. Corrective action

Corrective actions are measures intended to primarily require BSFIs with approved licenses/authorities to rectify any deviations from the standards, principles and conditions expected for the exercise of the license and/or authority. Corrective actions may include, but are not limited to, issuance of directives and warnings.

- b. Sanctions

The Monetary Board may impose any of the sanctions enumerated hereunder or a combination thereof.

- (1) Non-monetary

- (a) *Suspension of activities.* The conduct of activities related to the licenses/authorities granted may be suspended if the Bangko Sentral determines that the concerned BSFI no longer meets the criteria or standards set; or
- (b) *Revocation of licenses/authorities.* The license/authority granted may be revoked in cases where violation, non-compliance with criteria/standards and/or false information are noted which affects the safety and soundness of BSFIs' operations; and/or

¹ Rehabilitation includes BSFIs under the Prompt Corrective Action (PCA), Rehabilitation Program, Letter of Commitment and any other similar cases where BSFIs are expected to comply specific terms and conditions to restore eligibility (safety and sound) status.

- (c) *Administrative sanctions.* The responsible directors/officers who approve transactions and/or decisions that resulted in violations of laws, rules and regulations, orders, and directives issued by the Monetary Board or the Governor may be subject to reprimand, temporary suspension, and/or disqualification of directors/officers.

The Monetary Board is not precluded to impose non-monetary sanctions other than those identified from Items "(a)" to "(c)"; and/or

(2) Monetary

Monetary penalties may be imposed for any acts, omissions or transactions that are outside the permissible activities of the licenses/authorities granted or are in violation of laws, Bangko Sentral rules and regulations, orders and directives issued by the Bangko Sentral.

Type of license of permissible activities¹. The type of license attached to permissible activities of Bangko Sentral supervised financial institutions (BSFIs) shall be as follows:

Type of License	Permissible Activity	Related Sections
A		
B		
C	Outsourcing/Insourcing of Banking Functions	Sec. 112-P

Processing and Licensing Fees. All applications shall be charged with the following processing fees pursuant to Section II.3.i of *Appendix P-5*:

Type of License/ Authority	Processing Fees for Non-Bank Financial Institutions
A	10,000
B	10,000

Certain Type A licenses shall be charged with the following licensing fees upon approval pursuant to Section II.3.ii of *Appendix P-5*:

Type of License/ Authority	Licensing Fees* for Non-Bank Financial Institutions
A	50,000

*Licensing fee shall be net of the processing fee.

The foregoing tables shall not apply to licensing applications with separate fee structure under specific sections of this Manual.

(Circular Nos. 1143 dated 12 April 2022, 1031 dated 07 February 2019 and 947 dated 15 February 2017)

112-P GUIDELINES ON OUTSOURCING

The rules on outsourcing of banking functions as shown in Sec. 112 (*Statement of Principle on outsourcing*) of the MORB and *Appendix Q-36* shall be adopted insofar as they are applicable to pawnshops.

(Circular No. 1031 dated 07 February 2019 and 938 dated 23 December 2016)

113-P ENGAGING IN COROLLARY BUSINESS ACTIVITIES

A pawnshop may engage in corollary businesses as may be registered with Bangko Sentral: *Provided*, That such pawnshop shall maintain records of such business that allows distinction from the pawnshop operation.

Allowable corollary business activities of pawnshops shall include money changing and/or performing as remittance agent, as may be registered with the Bangko Sentral. Pawnshops may also engage in other business activities such as acting as bills payment agent for utility companies and other entities, ticketing agent for airline companies, and other similar business activities: *Provided*, That the appropriate supervising department of the Bangko Sentral shall be notified within five (5) working days from the date of actual engagement of the pawnshop in such business activity.

(Circular Nos. 961 dated 02 June 2017 and 938 dated 23 December 2016)

¹ Transitory Provisions. Applications filed with the Bangko Sentral prior to 6 March 2019 shall not be charged with processing and licensing fees provided under this Section (*Processing and licensing fees*). Applications for Type C licenses received prior to 6 March 2019 shall be deemed to have complied with the notification/certification requirements if after thirty (30) banking days from 6 March 2019, the appropriate supervising department of the FSS does not advise the BSFI concerned of any deficiency on such application.

114-P ELECTRONIC PAYMENT AND FINANCIAL SERVICES

The guidelines concerning electronic payment and financial services as may be applicable, as found in Sec. 701-Q, shall be adopted by pawnshops.

Requirements for the grant of authority to offer EPFS. Pursuant to Sec. 111-P on the Bangko Sentral Policy and Regulations on Licensing, BSFIs that intend to offer EPFS shall obtain the appropriate authority/license, as follows:

Classification	Category of License/Authority
Advanced EPFS	Type A ¹ /B ²
Basic EPFS	Type C

BSFIs shall observe the “Guidelines on Licensing of Electronic Payment and Financial Services” shown in *Appendix Q-89*.

Reportorial Requirements. BSFIs shall provide the Bangko Sentral with the required data and updates on their EPFS.

- a. **Required Reports.** The following reports shall be submitted to the appropriate supervising department of the Bangko Sentral in the manner prescribed under *Appendix P-7*:

- (1) EPFS Transactions and Indicators; and
- (2) Changes and Enhancements in EPFS

- b. **Sanctions.** Failure to comply with the reportorial requirements shall subject the concerned BSFI to applicable sanctions for “Erroneous/Delayed/Erroneous and Delayed/Unsubmitted reports” as prescribed under Sec. 161-P.

Enforcement action. Failure to comply with the provisions of this Section shall cause the concerned BSFI to be subject to enforcement action in accordance with Sec.111-P (*Enforcement actions*).

(Circular Nos. 1143 dated 12 April 2022, 1033 dated 22 February 2019, 961 dated 02 June 2017, and 938 dated 23 December 2016)

C. CAPITALIZATION

121-P MINIMUM PAID-IN CAPITAL OF PAWNSHOPS

Every pawnshop operator shall have a minimum paid-in capital in cash as follows:

Type of License	Amount of Capital
"A"	₱100,000
"B"	1,000,000
"C"	50,000,000
"D"	50,000,000

Capital build-up program. Pawnshops established and operating prior to 28 January 2017 shall comply with the minimum capitalization and borrowing limits prescribed under this Section and Sec. 201-P. Any pawnshop that does not meet these requirements shall submit an acceptable plan of compliance, for a period not to exceed one (1) year from date of submission, to the Bangko Sentral along with the application for an Authority to Operate under Sec. 103-P within six (6) months from 28 January 2017. Any delay in the submission of such plan shall be subject to appropriate sanctions.

(Circular Nos. 961 dated 02 June 2017 and 938 dated 23 December 2016)

122-P TRANSFER OF OWNERSHIP

No pawnshop operator organized as sole proprietorship shall transfer ownership over the pawnshop business without securing prior Bangko Sentral approval. The pawnshop operator shall file the documents listed in *Appendix P-2* before transferring the ownership of the pawnshop business.

The owners/stockholders of a pawnshop operator organized as a partnership or corporation may transfer the ownership of the pawnshop business to another. However, a copy of the contract/agreement/arrangement shall be submitted to the appropriate supervising department of the Bangko Sentral before effecting the transfer if such transaction, in itself or in relation with other/previous transactions, will:

¹ This applies to BSFIs that *can* be assessed against the prudential criteria provided in the Policy and Regulations on Licensing. These applicants must have been examined by the Bangko Sentral.

² This applies to proponents that *cannot* be assessed against the prudential criteria provided in the Policy and Regulations on Licensing. These include newly-established BSFIs and new applicants for an authority to operate as “Electronic Money Issuer-Others”.

- a. result in ownership or control of more than twenty percent (20%) interest in a pawnshop organized as a partnership or more than twenty percent (20%) of the voting shares of stock of a pawnshop organized as a corporation by any person whether natural or juridical, or which will enable such person to elect, or be elected as, a director of such pawnshop; or
- b. effect a change in the majority ownership or control of the interests in a pawnshop organized as a partnership or the voting shares of stock of the pawnshop organized as a corporation from one (1) group of persons to another group.

(Circular No. 938 dated 23 December 2016)

D. CORPORATE GOVERNANCE

131-P DEFINITIONS, QUALIFICATIONS, AND DUTIES AND RESPONSIBILITIES OF PROPRIETOR/PARTNERS/DIRECTORS/OFFICERS

The following shall be the definitions and qualifications, duties and responsibilities of proprietor/partners/directors/officers.

Definitions.

- a. *Proprietor* is the person who owns the pawnshop business and named as such in the Certificate of Registration issued by the DTI and in the business permit issued by the city/municipality where the pawnshop business is established or operating.
- b. *Partners* are the persons named in the articles of partnership.
- c. *Incorporators* are those mentioned as such in the articles of incorporation as originally forming and composing the corporation and who are signatories thereof.
- d. *Directors* – Directors shall include:
 - (1) directors who are named as such in the articles of incorporation;
 - (2) directors duly elected in subsequent meetings of the pawnshop's stockholders; and
 - (3) those elected to fill vacancies in the board of directors.

The number of members of the board of directors, pursuant to Section 10 of Batas Pambansa No. 68, shall be at least five (5), and a maximum of fifteen (15) directors.

- e. *Officers/Managers* -are those persons whose duties as such are defined in the by-laws (for corporations) or those who are generally known to be the officers of the pawnshop either thru announcement, representation, publication or any kind of communication made by the pawnshop. The term officer shall include, but not limited to the following: the proprietor, managing partner, president, and manager or officer-in-charge of head office or branch.

General qualifications. Any person can be a proprietor, partner, or director, president or officer of equivalent rank and function, and over-all head of the pawnshop operation and the head of the compliance unit of pawnshops provided he/she:

- a. Must have complied with the AML/CFT training as prescribed under Sec. 103-P (*Mandatory training requirements*); and
- b. Must not be included in the Bangko Sentral Watchlist Files.

An NBI clearance shall also be required for any newly accepted/elected/appointed partner, director, president or officer of equivalent rank and function, and over-all head of the pawnshop operation and the head of the compliance unit of pawnshop.

(Circular Nos. 1039 dated 3 May 2019, 974 dated 29 September 2017, 961 dated 02 June 2017, M-2017-003 dated 27 January 2017, and Circular No. 938 dated 23 December 2016)

132-P DISQUALIFICATION AND WATCHLISTING OF DIRECTORS AND OFFICERS

The following regulations shall govern the disqualification of pawnshop directors and officers.

Persons disqualified from becoming directors. Without prejudice to specific provisions of law prescribing disqualifications for directors/trustees, the following are disqualified from becoming directors of pawnshops:

- a. *Permanently disqualified.*

Directors/trustees/officers/employees permanently disqualified by the Monetary Board from holding a director position:

- (1) Persons who have been convicted by final judgment of a court for offenses involving dishonesty or breach of trust such as, but not limited to, estafa, embezzlement, extortion, forgery, malversation, swindling, theft, robbery, falsification, bribery, violation of B.P. Blg. 22, violation of Anti-Graft and Corrupt Practices Act and Prohibited Acts and Transactions under Section 7 of R.A. No. 6713 (Code of Conduct and Ethical Standards for Public Officials and Employees);
- (2) Persons who have been convicted by final judgment of the court sentencing them to serve a maximum term of imprisonment of more than six (6) years;
- (3) Persons who have been convicted by final judgment of the court for violation of banking laws, rules and regulations;
- (4) Persons who have been judicially declared insolvent, spendthrift or incapacitated to contract;
- (5) Directors, officers or employees of closed BSFIs who were found to be culpable for such institution's closure as determined by the Monetary Board;
- (6) Directors and officers of BSFIs found by the Monetary Board as administratively liable for violation of banking or other relevant laws, rules and regulations where a penalty of removal from office is imposed, and which finding of the Monetary Board has become final and executory; or
- (7) Directors and officers of BSFIs or any person found by the Monetary Board to be unfit for the position of director or officer because they were found administratively liable by another government agency for violation of banking or other relevant laws, rules and regulations or any offense/violation involving dishonesty or breach of trust, and which finding of said government agency has become final and executory.

b. *Temporarily disqualified.*

Directors/officers/employees disqualified by the Monetary Board from holding a director/trustee position for a specific/indefinite period of time. Included are:

- (1) Persons who refuse to fully disclose the extent of their business interest or any material information to the appropriate supervising department of the Bangko Sentral when required pursuant to a provision of law or of a circular, memorandum or rule or regulation of the Bangko Sentral. This disqualification shall be in effect as long as the refusal persists;
- (2) Directors who have been absent or who have not participated for whatever reasons in more than fifty percent (50%) of all meetings, both regular and special, of the board of directors during their incumbency, or any twelve (12)-month period during said incumbency. This disqualification applies only for purposes of the immediately succeeding election;
- (3) Persons who are delinquent in the payment of their obligations as defined hereunder:
 - (a) *Delinquency in the payment of obligations* means that an obligation of a person with the institution where he/she is a director or officer, or at least two (2) obligations with other FIs, under different credit lines or loan contracts, are past due pursuant to Secs. 304 (*Past Due Account and Non-Performing Loans*), Sec. 303-Q (Section deleted), 309-S (*Past Due Accounts and Non-Performing Loans*) and 304-P (*Past Due Accounts; Renewal*);
 - (b) *Obligations* shall include all borrowings from any FI obtained by:
 - (i) A director/trustee or officer for his own account or as representative or agent of others or where he/she acts as guarantor, endorser or surety for loans from such FIs;
 - (ii) The spouse or child under the parental authority of the director/trustee or officer;
 - (iii) Any person whose borrowings or loan proceeds were credited to the account of, or used for the benefit of a director/trustee or officer;
 - (iv) A partnership of which a director/trustee or officer, or his/her spouse is the managing partner or a general partner owning a controlling interest in the partnership; and
 - (v) A corporation, association or firm wholly-owned or majority of the capital of which is owned by any or a group of persons mentioned in the foregoing Items "(i)", "(ii)" and "(iv)".

This disqualification shall be in effect as long as the delinquency persists.

- (4) Persons who have been convicted by a court for offenses involving dishonesty or breach of trust such as, but not limited to, estafa, embezzlement, extortion, forgery, malversation, swindling, theft, robbery, falsification, bribery, violation of B.P. Blg. 22, violation of Anti-Graft and Corrupt Practices Act and

Prohibited Acts and Transactions under Section 7 of R.A. No. 6713 (Code of Conduct and Ethical Standards for Public Officials and Employees), violation of banking laws, rules and regulations or those sentenced to serve a maximum term of imprisonment of more than six (6) years but whose conviction has not yet become final and executory;

- (5) Directors/trustees and officers of closed institutions under the supervisory and regulatory powers of the Bangko Sentral pending their clearance by the Monetary Board;
- (6) Directors/trustees disqualified for failure to observe/discharge their duties and responsibilities prescribed under existing regulations. This disqualification applies until the lapse of the specific period of disqualification or upon approval by the Monetary Board or the appropriate supervising department of the Bangko Sentral of such directors'/trustees' election/re-election;
- (7) Persons dismissed/terminated from employment in the institutions under the supervision of the Bangko Sentral. This disqualification shall be in effect until they have been cleared themselves of involvement in the alleged irregularity or upon clearance, on their request, from the Monetary Board after showing good and justifiable reasons;
- (8) Those under preventive suspension;
- (9) Persons with derogatory records as certified by, or on the official files of, the judiciary, NBI, PNP, quasi-judicial bodies, other government agencies, international police, monetary authorities and similar agencies or authorities of foreign countries for irregularities or violations of any law, rules and regulations that would adversely affect the integrity of the director/officer or the ability to effectively discharge his duties. This disqualification applies until they have cleared themselves of the alleged irregularities/violations or after a lapse of five (5) years from the time the complaint, which was the basis of the derogatory record, was initiated;
- (10) Directors and officers of BSFIs found by the Monetary Board as administratively liable for violation of banking or other relevant laws, rules and regulations where a penalty of removal from office is imposed, and which finding of the Monetary Board is pending appeal before the appellate court, unless execution or enforcement thereof is restrained by the court;
- (11) Directors and officers of BSFIs or any person found by the Monetary Board to be unfit for the position of director or officer because they were found administratively liable by another government agency for violation of banking or other relevant laws, rules and regulations, or any offense/violation involving dishonesty or breach of trust, and which finding of said government agency is pending appeal before the appellate court, unless execution or enforcement thereof is restrained by the court; or
- (12) Directors and officers of BSFIs found by the Monetary Board as administratively liable for violation of banking or other relevant laws, rules and regulations where a penalty of suspension from office or fine is imposed, regardless whether the finding of the Monetary Board is final and executory or pending appeal before the appellate court, unless execution or enforcement thereof is restrained by the court. The disqualification shall be in effect during the period of suspension or so long as the fine is not fully paid.

Persons disqualified from becoming officers.

- a. The disqualifications for directors mentioned in this Section shall likewise apply to officers, except those stated in Item "b.(2)".
- b. Except as may be authorized by the Monetary Board or the Governor, the spouse or a relative within the second degree of consanguinity or affinity of any person holding the position of chairman, president, executive vice president or any position of equivalent rank, general manager, treasurer, chief cashier or chief accountant is disqualified from holding or being elected or appointed to any of said positions in the same pawnshop and the spouse or relative within the second degree of consanguinity or affinity of any person holding the position of manager, cashier, or accountant of a branch or office of a pawnshop is disqualified from holding or being appointed to any of said positions in the same branch or office.

Disqualification procedures.

- a. The board of directors/trustees and management of every pawnshop shall be responsible for determining the existence of the ground for disqualification of the pawnshop's directors/trustees/officer or employee and for reporting the same to the Bangko Sentral. While the concerned pawnshop may conduct its own investigation and impose appropriate sanction/s as are allowable, this shall be without prejudice to the authority of the Monetary Board to disqualify a pawnshop director/trustee/officer/employee from being elected/appointed as

director/trustee/officer in any FI under the supervision of the Bangko Sentral. Grounds for disqualification made known to the institution shall be reported to the appropriate supervising department of the Bangko Sentral within seventy-two (72) hours from knowledge thereof.

- b. On the basis of knowledge and evidence on the existence of any of the grounds for disqualification mentioned in this Section, the director or officer concerned shall be notified in writing either by personal service or through registered mail with registry return receipt card at his/her last known address by the appropriate supervising department of the Bangko Sentral of the existence of the ground for his/her disqualification and shall be allowed to submit within fifteen (15) calendar days from receipt of such notice an explanation on why he/she should not be disqualified and included in the watchlisted file, together with the evidence in support of his/her position. The head of said department may allow an extension on meritorious ground.
- c. Upon receipt of the reply/explanation of the director/trustee/officer concerned, the appropriate supervising department of the Bangko Sentral shall proceed to evaluate the case. The director/trustee/officer concerned shall be afforded time/period to defend/clear himself/herself.
- d. If no reply has been received from the director/trustee/officer concerned upon the expiration of the period prescribed under Item “b” above, said failure to reply shall be deemed a waiver and the appropriate supervising department of the Bangko Sentral shall proceed to evaluate the case based on available records/evidence.
- e. If the grounds for disqualification is delinquency in the payment of obligation, the concerned director/trustee or officer shall be given a period of thirty (30) calendar days within which to settle said obligation or, restore it to current status or, to explain why he/she should not be disqualified and included in the watchlisted file, before the evaluation on his disqualification and watchlisting is elevated to the Monetary Board.
- f. For directors/trustees/officers of closed pawnshops, the appropriate supervising department of the Bangko Sentral shall make appropriate recommendation to the Monetary Board clearing said directors/trustees/officers when there is no pending case/complaint or evidence against them. When there is evidence that a director/trustee/officer has committed irregularity, the appropriate supervising department of the Bangko Sentral shall make recommendation to the Monetary Board that his/her case be referred to the Office of Special Investigation (OSI) for further investigation and that he/she be included in the master list of temporarily disqualified persons until the final resolution of his/her case. Directors/trustees/officers with pending cases/complaints shall also be included in said master list of temporarily disqualified persons upon approval by the Monetary Board until the final resolution of their cases. If the director/trustee/officer is cleared from involvement in any irregularity, the appropriate supervising department of the Bangko Sentral shall recommend to the Monetary Board his/her delisting. On the other hand, if the director/trustee/officer concerned is found to be responsible for the closure of the institution, the appropriate supervising department of the Bangko Sentral shall recommend to the Monetary Board his/her delisting from the disqualified persons and his/her inclusion in the master list of permanently disqualified persons.
- g. If the disqualification is based on dismissal from employment for cause, the appropriate supervising department of the Bangko Sentral shall, as much as practicable, endeavor to establish the specific acts or omissions constituting the offense of the ultimate facts which resulted in the dismissal to be able to determine if the disqualification of the director/trustee/officer concerned is warranted or not. The evaluation of the case shall be made for the purpose of determining if disqualification would be appropriate and not for the purpose of passing judgment on the findings and decision of the entity concerned. The appropriate supervising department of the Bangko Sentral may decide to recommend to the Monetary Board a penalty lower than disqualification (e.g., reprimand, suspension, etc.) if, in its judgment the act committed or omitted by the director/trustee/officer concerned does not warrant disqualification.
- h. All other cases of disqualification, whether permanent or temporary, shall be elevated to the Monetary Board for approval and shall be subject to the procedures provided in Items “a”, “b”, “c” and “d” above.
- i. Upon approval by the Monetary Board, the concerned directors/trustees/officers shall be informed by the appropriate supervising department of the Bangko Sentral in writing either by personal service or through registered mail with registry return receipt card, at his/her last known address of his/her disqualification from being elected/appointed as director/trustee/officer in any FI under the supervision of Bangko Sentral and/or of his/her inclusion in the master list of watchlisted persons so disqualified.
- j. The board of directors/trustees of the concerned institution shall be immediately informed of cases of disqualification approved by the Monetary Board and shall be directed to act thereon not later than the following board meeting. Within seventy-two (72) hours thereafter, the corporate secretary shall report to the Governor of the Bangko Sentral through the appropriate supervising department of the Bangko Sentral the action taken by the board on the director/trustee/officer involved.

- k. Persons who are elected or appointed as director/trustee or officer in any of the BSFIs for the first time but are subject to any of the grounds for disqualification provided for under this Section shall be afforded the procedural due process prescribed above.
- l. Whenever a director/trustee/officer is cleared in the process mentioned under Item “c” above or, when the ground for disqualification ceases to exist, he/she would be eligible to become director/trustee or officer of any bank, QB, trust entity or any institution under the supervision of the Bangko Sentral only upon prior approval by the Monetary Board. It shall be the responsibility of the appropriate supervising department of the Bangko Sentral to elevate to the Monetary Board the lifting of the disqualification of the concerned director/trustee/officer and his/her delisting from the masterlist of watchlisted persons.

Effect of possession of disqualifications. Directors/trustees/officers elected or appointed possessing any of the disqualifications as enumerated herein, shall vacate their respective positions immediately.

Watchlisting. To provide the Bangko Sentral with a central information file to be used as reference in passing upon and reviewing the qualifications of persons elected or appointed as directors/trustees or officer of an institution under the supervisory and regulatory powers of the Bangko Sentral, the Bangko Sentral shall maintain a watchlist of disqualified directors/trustees/officers under the following procedures:

- a. *Watchlist categories.* Watchlisting shall be categorized as follows:
 - (1) Disqualification File “A” (Permanent)—Directors/trustees/officers/employees permanently disqualified by the Monetary Board from holding a director/trustee/officer position.
 - (2) Disqualification File “B” (Temporary) – Directors/trustees/officers/employees temporarily disqualified by the Monetary Board from holding a director/trustee/officer position.
- b. *Inclusion of directors/trustees/officers/employees in the watchlist.* Upon recommendation by the appropriate supervising department of the Bangko Sentral, the inclusion of directors/trustees/officers/employees in watchlist disqualification files “A” and “B” on the basis of decisions, actions or reports of the courts, institutions under the supervisory and regulatory powers of the Bangko Sentral, NBI or other administrative agencies shall first be approved by the Monetary Board.
- c. *Notification of directors/trustees/officers/employees.* Upon approval by the Monetary Board, the concerned director/trustee/officer/employee shall be informed through registered mail, with registry return receipt card, at his last known address of his inclusion in the masterlist of watchlisted persons disqualified to be a director/trustee/officer in any institution under the supervisory and regulatory powers of the Bangko Sentral.
- d. *Confidentiality.* Watchlisting shall be for internal use only and may not be accessed or queried upon by outside parties including such institutions under the supervisory and regulatory powers of the Bangko Sentral, except with the authority of the person concerned and with the approval of the Deputy Governor of the appropriate sector of the Bangko Sentral, the Governor, or the Monetary Board.

The Bangko Sentral will disclose information on its watchlist files only upon submission of a duly accomplished and notarized authorization from the concerned person and approval of such request by the Deputy Governor of the appropriate sector of the Bangko Sentral or the Governor or the Monetary Board. The prescribed authorization form to be submitted to the appropriate supervising department of the Bangko Sentral is in *Appendix Q-44 of the Q Regulations*.

Pawnshops can gain access to information in the said watchlist for the sole purpose of screening their applicants for hiring and/or confirming their elected directors and appointed officers. Pawnshops must obtain the said authorization on an individual basis.

- e. *Delisting.* All delistings shall be approved by the Monetary Board upon recommendation of the appropriate supervising department of the Bangko Sentral except in cases of persons known to be dead where delisting shall be automatic upon proof of death and need not be elevated to the Monetary Board. Delisting may be approved by the Monetary Board in the following cases:

Watchlist -Disqualification File “B” (Temporary) –

- (1) After the lapse of the specific period of disqualification;
- (2) When the conviction by the court for crimes involving dishonesty, breach of trust and/or violation of banking laws becomes final and executory, in which case the director/trustee/officer/employee is relisted to Watchlist-Disqualification File “A” (Permanent); or

- (3) Upon favorable decision or clearance by the appropriate body, i.e., court, NBI, institutions under the supervisory and regulatory powers of the Bangko Sentral, or such other agency/body where the concerned individual had derogatory record.

Directors/trustees/officers/employees delisted from the Watchlist –Disqualification File “B” other than those upgraded to Watchlist-Disqualification File “A” shall be eligible for re-employment with any institution under the supervisory and regulatory powers of the Bangko Sentral.

Applicability of this Section to the managing proprietor and managing partner of a pawnshop (in the case of a sole proprietorship/partnership). The foregoing disqualification and watchlisting provisions shall apply, where practicable, to the managing proprietor or managing partner of a pawnshop that is a sole proprietorship or partnership, in which case, the Bangko Sentral shall initiate the disqualification proceedings against the managing proprietor/managing partner. For this purpose, a *managing proprietor* or *managing partner* shall refer to a person directly involved in the operation of a pawnshop business.

In case the disqualification shall cause the dissolution of the proprietorship or partnership, the Authority to Operate shall be cancelled and the pawnshop shall be removed from the Bangko Sentral Registry of Pawnshops.

Issuance of Metal Plate. A metal plate bearing the unique registration number of the pawnshop head office shall be issued to the pawnshop operator. The Bangko Sentral reserves the right to collect a reasonable amount to cover the cost of the production/issuance of the metal plate.

(Circular No. 1039 dated 3 May 2019, 974 dated 29 September 2017, and M-2017-003 dated 27 January 2017)

E. RISK MANAGEMENT

141-P RISK MANAGEMENT SYSTEM

All pawnshops shall develop sound risk management policies and practices to ensure that risks associated with the operations of a pawnshop business are identified, assessed, monitored, mitigated and controlled as well as to ensure the effective implementation of these regulations.

The risk management system framework stated under Part One – E, Risk Management of the MORNBF-I Regulations shall govern all pawnshops to the extent applicable.

(Circular Nos. 961 dated 02 June 2017 and 938 dated 23 December 2016)

142-P INFORMATION TECHNOLOGY RISK MANAGEMENT (ITRM)

The enhanced guidelines on ITRM of NBFIs as shown in Sec. 147-Q shall be adopted insofar as they are applicable to pawnshops.

Policy statement. The rapid pace of digital innovation has significantly reshaped the financial services landscape. BSFIs employ advances in technology to sharpen business insights, enhance operational efficiencies, and deliver innovative financial products and services in line with emerging market trends and evolving client needs. Technological developments also enable greater access to financial services that promote an inclusive and responsive digital financial ecosystem. As technological innovations become more deeply entrenched in business models, infrastructure, and delivery channels, system-related failures and malfunctions can create major operational disruptions in BSFIs. Social media platforms may further complicate matters as news of disruptions as well as customer complaints can spread at unprecedented speeds. Further, cyber-threats and attacks confronting the financial services industry pose added risks that can undermine public trust and confidence in the financial system.

In line with their growing technology usage and dependence at the back of a dynamic operating and cyber-threat environment, BSFIs should establish robust and effective technology risk management processes, governance structures, and cybersecurity controls. This is to ensure that the benefits derived from technological innovations can be fully optimized without compromising financial stability, operational resilience, and consumer protection.

IT Profile Classification. To ensure that IT risk management system, governance structure and processes are commensurate with the attendant IT risks, the Bangko Sentral shall determine the IT profile of all BSFIs and classify them as "Complex", "Moderate" or "Simple". The *IT profile* refers to the inherent risk of a BSFI before application of any mitigating controls, and is assessed taking into consideration the following factors:

- a. *IT infrastructure and operations.* Inherent IT risks of a BSFI largely depend on the degree of automation of core processes and applications, the size of branch networks, and the characteristics of its IT organization. BSFIs with larger branch networks and more complex organizational structures usually require a higher degree of reliance on IT systems/infrastructure, which in turn, carry higher levels of inherent IT risks. Interconnectivity risks also

play a factor in determining IT risk levels since added connections to third party networks increase complexity as well as exposure to potential information security/cybersecurity risks. These include participation in electronic payment systems and interconnections with other financial institutions, business partners, customers, and third party service providers, among others.

- b. *Digital/Electronic financial products and services.* Digital/electronic financial products and services provided to the BSFI's corporate and retail clients, by their very nature, can have a direct impact on IT risks, including information security/cybersecurity risks. This is because these products and services are normally provided via the internet or public networks which are inherently risky. Digital/electronic financial products and services include ATM debit, prepaid and credit cards and e-channels such as ATM terminals, point-of-sale (POS) terminals, internet banking and mobile banking facilities, among others. BSFIs that are more aggressive in providing such services are expected to have greater IT risks.
- c. *IT projects and initiatives.* The extent and nature of the BSFI's IT projects prospectively impact IT risk exposure and complexity. For instance, developing or acquiring a new core banking system is considered a major project, that if not adequately managed and overseen, may heighten inherent IT risks. Also, IT projects and initiatives entail the use of current resources in terms of funding and manpower that might affect existing IT operations and risk profile.
- d. *Outsourced services.* While outsourcing in general does not diminish the BSFI's responsibility over the function/service outsourced, outsourcing poses an added dimension to IT and information security risks. For this reason, outsourcing arrangements require a higher degree of oversight, due diligence, and risk management controls. Outsourcing core IT services and functions via cloud computing platforms may further intensify IT and information security risks.
- e. *Systemic importance.* The systemic importance of a BSFI is a critical determinant in assessing inherent IT and information security/cybersecurity risks since BSFIs identified as "Domestic Systemically Important Banks" or D-SIBs are essentially larger in size and have more complex operations and product offerings. Moreover, cyber-attacks against D-SIBs can have serious implications to financial and economic stability that may undermine public trust and confidence in the financial system.
- f. *Threats.* The volume, type, and severity of cyber-attacks and fraud targeting a specific BSFI affects IT and cybersecurity risk profiles. Some BSFIs may be more prone to attacks compared to others by virtue of their asset size, customer base, systemic importance, and other factors. Thus, BSFIs that are likely targets of these types of threats should have greater degree of cyber-preparedness and resilience.

A general description for each IT profile classification is outlined as follows:

IT Profile Classification	General Description/Attributes
Complex	A BSFI with complex IT profile uses technology extensively in supporting mission-critical business processes and delivering financial products and services. It has ubiquitous branch network in the country and offers a wide array of digital/electronic financial products and services to a large number of corporate and retail clients. It is highly interconnected with external third party stakeholders and actively participates in electronic payment systems and networks, usually involving large-value transfers. Business strategies and objectives are largely anchored on IT platforms, digital innovation, and technology-based solutions. It is also aggressively utilizing/exploring emerging technologies such as cloud computing, social media and big data technologies.
Moderate	A BSFI classified as moderate uses technology to some extent, but not as aggressively as those classified as complex. Its branch network, IT organization and structure, and extent of IT projects are also relatively less significant than those of complex BSFIs. IT applications and systems are integrated but primarily support traditional banking products and services. It may offer basic digital/electronic products and services, such as ATM terminals/card-based products, to a limited number of clients.
Simple	A BSFI classified as simple generally has very limited use of technology with minimal interconnectivity to its clients and other institutions. Likewise, branch network or geographic presence is confined to a specific locality. IT applications and systems are stand-alone or are not fully integrated and e-banking products and services are rarely offered. A simple BSFI also has few IT personnel and customer base.

The IT profile of rural banks, cooperative banks, NBFIs, and non-bank institutions shall be classified as "Simple", unless notified by the Bangko Sentral of a higher classification. For other BSFIs, the Bangko Sentral shall notify in writing their assigned classification within a reasonable timeline from the effectivity of this Circular. The Bangko Sentral-assigned classification shall remain effective until such time that the Bangko Sentral informs the concerned BSFI of a change in classification.

The Bangko Sentral assessment and classification process should not preclude BSFIs from assessing their own IT profile classification on an ongoing basis. All BSFIs are required to have periodic and rigorous self-assessment exercises using more robust data sets and variables as part of their information security risk management system.

Definition of Terms. In these guidelines, terms are used with the following meanings:

- a. *Advanced persistent threat or APT* shall refer to a sophisticated form of attack that involves coordinating multiple methods of identifying and exploiting a target's vulnerabilities over an extended period to do harm.
- b. *Card skimming* shall refer to the illegal copying of information from the magnetic stripe of a credit or ATM card to gain access to accounts.
- c. *Cloud computing* shall refer to a model for enabling ubiquitous, convenient, and on-demand network access to a shared pool of configurable computing resources that can be rapidly provisioned and released with minimal management effort or service provider interaction.
- d. *Cyber-threat* shall refer to a deliberate act of omission or commission by any person carried out using the internet and/or other electronic channels, in order to communicate false or fraudulent representations to prospective victims, to conduct fraudulent transactions, or to illegally obtain proprietary data or information related to the institution, their customers and other stakeholders. Cyber-threat can be used synonymously with cyber-fraud, cyber-attack or cyber- related incidents.
- e. *Cybersecurity* shall refer to technologies, processes, and practices designed to protect a BSFI's information assets and consumers by preventing, detecting, and responding to cyber-attacks.
- f. *Defense-in-depth* shall refer to a security strategy or design of deploying security controls over multiple or various layers across the network, systems, and applications such that a failure in one control would be compensated by another control in the next layer. This approach effectively delays or disrupts an attacker's ability to progress within the attack sequence.
- g. *Distributed denial of service (DDoS)* shall refer to a type of attack which makes use of the capacity limitation of enterprise networks, systems or ingress with extreme traffic loads.
- h. *Information security program (ISP)* shall refer to information security policies, standards and procedures, security operations, technologies, organizational structures, and information security awareness and training programs aimed at protecting a BSFI's information assets and supporting infrastructure from internal and external threats.
- i. *Information security strategic plan (ISSP)* shall refer to the roadmap to guide a BSFI in transforming the current state of security to the desired state taking into account business goals and strategies.
- j. *Information security risk management (ISRM)* shall refer to the process of identifying, assessing, mitigating, managing, and monitoring information security risks, including cyber-risk, to ensure these are within acceptable levels. It should be integrated into the BSFI's ISP and enterprise-wide risk management system.
- k. *Malware* shall refer to malicious software that compromises the confidentiality, availability or integrity of information systems, networks or data. Examples of malware include ransomware, trojans, adware, botnets, bugs, and spyware, among others.
- l. *Phishing* shall refer to the use of electronic communications such as e-mail to masquerade with trusted identity to capture sensitive information to gain access to accounts. It involves tricking customers into giving sensitive information through fraudulent emails or websites.
- m. *Security operations center (SOC)* shall refer a unit or function that provides centralized visibility, continuous monitoring, and rapid response and recovery procedures on security incidents and events.
- n. *Threat intelligence* shall refer to the process of gathering and analyzing information about the proficiencies, tactics, and motives of malicious actors/attackers that enables a BSFI to institute appropriate countermeasures quickly.

Risk Management System (ITRMS). As BSFIs become more dependent on IT systems and processes, technology risks and information security issues have become progressively more complex and pressing in recent years. Information security is just as important as the new technologies being installed by BSFIs. As progress in technology shifts to higher gear, the trend in cyber-attacks, intrusions, and other form of incidents on computer systems shows that it will not only persist but will continue to increase in frequency and spread in magnitude.

Management of IT risks and information security issues becomes a necessity and an important part of BSFIs' risk management system. BSFIs are therefore required to establish a robust ITRM system covering four (4) key components: 1) IT governance, 2) risk identification and assessment, 3) IT controls implementation, and 4) risk measurement and monitoring.

- a. *IT Governance.* This is an integral part of BSFIs' governance framework and consists of the leadership and organizational structures and processes that ensure the alignment of IT strategic plan with BSFIs' business strategy, optimization of resources management, IT value delivery, performance measurement and the effective and efficient use of IT to achieve business objectives and effective IT risk management implementation. BSFIs must establish an effective IT governance framework covering the following:

- (1) *Oversight and organization of IT functions.* Accountability is a key concern of IT governance and this can be obtained with an organizational structure that has well-defined roles for the responsibility of information, business processes, applications, IT infrastructure, etc.

The Board of Directors is ultimately responsible for understanding the IT risks confronted by a BSFI and ensuring that they are properly managed, whereas the Senior Management is accountable for designing and implementing the ITRMS approved by the Board. For Complex BSFIs, the Board (ITSC) or its equivalent IT oversight function to cohesively monitor IT performance and institute appropriate actions to ensure achievement of desired results. The ITSC, at a minimum, should have as members a non-executive Board director who oversees the institution's IT function, the head of IT group/department, and the highest rank officer who oversees the business user groups. The head of control groups should participate in ITSC meetings in advisory capacity only.

A charter should be ratified by the Board to clearly define the roles and responsibilities of the ITSC. Formal minutes of meeting should be maintained to document its discussions and decisions. The ITSC should regularly provide adequate information to the Board regarding IT performance, status of major IT projects or other significant issues to enable the Board to make well-informed decisions about the BSFIs' IT operations.

BSFIs should develop an IT strategic plan that is aligned with the institution's business strategy. This should be undertaken to manage and direct all IT resources in line with the business strategy and priorities. IT strategic plan should focus on long term goals covering three (3)-to five (5)-year horizon and should be sufficiently supplemented by tactical IT plans which specify concise objectives, action plans and tasks that are understood and accepted by both business and IT. The IT strategic plan should be formally documented, endorsed by the Board and communicated to all stakeholders. It should be reviewed and updated regularly for new risks or opportunities to maximize the value of IT to the institution.

BSFIs should also create an organization of IT functions that will effectively deliver IT services to business units. For "Complex" BSFIs, a full-time IT Head or equivalent rank should be designated to take the lead in key IT initiatives and oversee the effectiveness of the IT organization. In addition to managing the delivery of day-to-day IT services, the IT Head should also oversee the IT budget and maintain responsibility for performance management, IT acquisition oversight, professional development and training. The IT Head should be a member of executive management with direct involvement in key decisions for the BSFI and usually reports directly to the President or Chief Executive Officer.

A clear description of roles and responsibilities for individual IT functions should be documented and approved by the Board. Proper segregation of duties within and among the various IT functions should be implemented to reduce the possibility for an individual to compromise a critical process. A mechanism should be in place to ensure that personnel are performing only the functions relevant to their respective jobs and positions. In the event that an institution finds it difficult to segregate certain IT control responsibilities, it should put in place adequate compensating controls (e.g., peer reviews) to mitigate the associated risks.

- (2) *IT policies, procedures and standards.* IT controls, policies, and procedures are the foundation of IT governance structure. It helps articulate the rules and procedures for making IT decisions, and helps to set, attain, and monitor IT objectives.

BSFIs should adopt and enforce IT-related policies and procedures that are well-defined and frequently communicated to establish and delineate duties and responsibilities of personnel for better coordination, effective and consistent performance of tasks, and quicker training of new employees. Management should ensure that policies, procedures, and systems are current and well-documented. The ITSC should review IT policies, procedures, and standards at least on an annual basis. Any updates and changes should be clearly documented and properly approved. IT policies and procedures should include at least the following areas:

- IT Governance/Management;
- Development and Acquisition;
- IT Operations;

- Communication networks;
- Information security;
- Electronic Banking/Electronic
- Products and Services; and
- IT Outsourcing/Vendor Management
- For simple BSFIs, some of the above areas (i.e. development, electronic banking, etc.) may not be applicable, thus sound judgment should be employed to ensure that the BSFI's IT policies and procedures have adequately covered all applicable areas.

- (3) *IT audit.* Audit plays a key role in assisting the Board in the discharge of its corporate governance responsibilities by performing an independent assessment of technology risk management process and IT controls.

Auditors provide an assurance that important control mechanisms are in place for detecting deficiencies and managing risks in the implementation of IT. They should be qualified to assess the specific risks that arise from specific uses of IT. BSFIs should establish effective audit programs that cover IT risk exposures throughout the organization, risk-focused, promote sound IT controls, ensure the timely resolution of audit deficiencies and periodic reporting to the Board on the effectiveness of institution's IT risk management, internal controls, and IT governance. Regardless of size and complexity, the IT audit program should cover the following:

- Independence of the IT audit function and its reporting relationship to the Board or its Audit Committee;
- Expertise and size of the audit staff relative to the IT environment;
- Identification of the IT audit universe, risk assessment, scope, and frequency of IT audits;
- Processes in place to ensure timely tracking and resolution of reported weaknesses; and
- Documentation of IT audits, including work papers, audit reports, and follow-up.

In case in-house IT audit expertise is not available, such as for a simple BSFI, the IT audit support may be performed by external specialists and auditors of other institutions consistent with existing Bangko Sentral rules and regulations on outsourcing. (Detailed guidelines/standards on IT Audit are shown in *Appendix Q-61*).

- (4) *Staff competence and training.* The rapid development in technology demands appropriate, skilled personnel to remain competent and meet the required level of expertise on an ongoing basis. BSFIs should have an effective IT human resources management plan that meets the requirements for IT and the business lines it supports. Management should allocate sufficient resources to hire and train employees to ensure that they have the expertise necessary to perform their job and achieve organizational goals and objectives.

Management needs to ensure that staffing levels are sufficient to handle present and expected work demands, and to cater reasonably for staff turnover. Appropriate succession and transition strategies for key officers and personnel should be in place to provide for a smooth transition in the event of turnover in vital IT management or operations functions.

- (5) *Management Information Systems (MIS).* The BSFIs' IT organization often provides an important support role for their MIS. Accurate and timely MIS reports are an essential component of prudent and reasonable business decisions. At the most senior levels, MIS provides the data and information to help the Board and management make strategic decisions. At other levels, MIS allows management to monitor the institution's activities and distribute information to other employees, customers, and members of management.

Advances in technology have increased the volume of information available to management and directors for planning and decision-making. However, if technology is not properly managed, the potential for inaccurate reporting and flawed decision making increases. Because report generation systems can rely on manual data entry or extract data from many different financial and transaction systems, management should establish appropriate control procedures to ensure information is correct, relevant, and adequately protected. Since MIS can originate from multiple equipment platforms and systems, the controls should ensure all information systems have sufficient and appropriate controls to maintain the integrity of the information and the processing environment. Sound fundamental principles for MIS review include proper internal controls, operating procedures, safeguards, and audit coverage.

- (6) *IT risk management function.* Management of risk is a cornerstone of IT Governance. BSFIs should have a policy requiring the conduct of identification, measurement, monitoring and controlling of IT risks for each business function/service on a periodic basis. BSFIs should define and assign these critical roles to a risk management unit or to a group of persons from different units collectively performing the tasks defined for this function.

The function should have a formal technology risk acknowledgement and acceptance process by the owner of risk to help facilitate the process of reviewing, evaluating and approving any major incidents of non-compliance with IT control policies. The process can be supported by the following:

- a description of risk being considered for acknowledgement by owner of risk and an assessment of the risk that is being accepted;
- identification of mitigating controls;
- formulation of a remedial plan to reduce risk; and
- approval of risk acknowledgement from the owner of the risk and senior management.

ITRM processes should be integrated into the enterprise-wide risk management processes to allow BSFIs to make well-informed decisions involving business plans and strategies, risk responses, risk tolerance levels and capital management, among others.

- b. *Risk identification and assessment.* BSFIs should maintain a risk assessment process that drives response selection and controls implementation. An effective IT assessment process begins with the identification of the current and prospective IT risk exposures arising from the institution's IT environment and related processes. The assessments should identify all information assets, any foreseeable internal and external threats to these assets, the likelihood of the threats, and the adequacy of existing controls to mitigate the identified risks. Management should continually compare its risk exposure to the value of its business activities to determine acceptable risk levels.

Once management understands the institution's IT environment and analyzes the risk, it should rank the risks and prioritize its response. The probability of occurrence and the magnitude of impact provide the foundation for reducing risk exposures or establishing mitigating controls for safe, sound, and efficient IT operations appropriate to the complexity of the organization. Periodic risk assessment process should be done at the enterprise wide level and an effective monitoring program for the risk mitigation activities should be manifested through mitigation or corrective action plans, assignment of responsibilities and accountability and management reporting.

- c. *IT controls implementation.* Controls comprise of policies, procedures, practices and organizational structures designed to provide reasonable assurance that business objectives will be achieved and undesired events will be mitigated. Management should establish an adequate and effective system of internal controls based on the degree of exposure and the potential risk of loss arising from the use of IT. Controls for IT environment generally should address the overall integrity of the environment and should include clear and measurable performance goals, the allocation of specific responsibilities for key project implementation, and independent mechanisms that will both measure risks and minimize excessive risk-taking. BSFI Management should implement satisfactory control practices that address the following as part of its overall IT risk mitigation strategy: 1) Information security; 2) Project management/development and acquisition and change management; 3) IT operations; 4) IT outsourcing/Vendor management; and 5) Electronic banking, Electronic payments, Electronic money and other Electronic products and services.

- (1) *Information security.* Information is a vital asset of a BSFI that must be adequately protected and managed to preserve its confidentiality, integrity and availability. Considering the crucial role information plays in supporting business goals and objectives, driving core operations and critical decision-making, information security is intrinsically linked to the overall safety and soundness of BSFIs. Thus, the BSFI needs to put in place a robust, resilient and enterprise- wide framework for ISRM supported by effective information security governance and oversight mechanisms. Information security risk exposures must be managed to within acceptable levels through a dynamic interplay of people, policies and processes, and technologies and must be integrated with the enterprise-wide risk management system.

Management should adopt a holistic, integrated and cyclical approach to managing information security risks. An ISRM framework should be in place encompassing key elements and phases with effective governance mechanisms to oversee the entire process. The framework represents a continuing cycle that should evolve over time taking into account changes in the operating and business environment as well as the overall cyber-threat landscape.

Figure 1. Information Security Risk Management Framework

The ISRM framework is based upon the following underlying fundamental principles and concepts:

- (a) *Strong leadership and effective Information Security (IS) governance and oversight.* The BSFI's Board and Senior Management set the overall tone and strategic direction for information security by providing strong leadership, effective information security governance and oversight. They should take the lead in establishing an information security culture that regards security as an intrinsic part of the BSFI's core business and operations. Instilling a strong security culture ensures that security controls, processes, and measures are deeply embedded into the institution's lines of business, products, services and processes, including its employees and external relationships. The Board and Senior Management should adopt the right mindset and understand the crucial role of information security in supporting/achieving business goals and objectives. Towards this end, they should oversee the development of an information security strategic plan (ISSP) to clearly articulate security strategies and objectives aligned with business plans.

The BSFI should maintain a comprehensive, well-designed and effective information security program (ISP) that is commensurate with its operational and IT profile complexity. To ensure its effectiveness and sustainability, the ISP should have strong support from the Board and Senior Management as well as cooperation of all concerned stakeholders. Management should see to it that adequate resources, organizational functions/capabilities, policies, standards, and procedures as well as the supporting infrastructure commensurate with the BSFI's IT risk complexity and appetite are available and optimized to effectively implement the ISSP and ISP. Lastly, the Board and Senior Management should appoint a Chief Information Security Officer (CISO), a senior level executive with sufficient authority within the institution who will be responsible and accountable for the organization-wide ISP.

- (b) *Integrated, holistic and risk-based approach.* The ISRM should form an integral part of the BSFI's ISP and enterprise risk management system. It encompasses the people, policies and processes, and technology elements in the organization that should be harmonized to support information security goals and objectives. Information security is not achieved by merely focusing on technology or one aspect and no one element is superior over the other. Each of these elements must work together to achieve the desired security posture and manage information security risks to acceptable levels. In line with the increasing interconnectivity of BSFIs and other industry players, the ISRM should also consider security controls and requirements over third party service providers, customers, banks, and other third party stakeholders which are linked or have access to the BSFI's network and systems. This is because threat actors may launch their attacks on the BSFI through these third party networks

Likewise, the ISRM including cyber-risk management programs should be commensurate with the inherent risks involved. This means that the BSFI's information security controls and maturity levels should be commensurate with its operations and complexity of IT profile. In this regard, in determining whether a certain control requirement is applicable to the BSFI, it shall first assess the complexity of its IT profile pursuant to this Section. BSFIs with complex IT profile are expected to implement the more advanced security control measures and be at the higher levels of the information security/cyber-maturity curve. BSFIs may also refer to leading standards and frameworks issued by standard-setting bodies¹ on information security and cyber security in designing their ISRM.

- (c) *Continuing cycle.* The ISRM involves a continuing cycle consisting of the following six (6) major phases:
 - (i) *Identify.* The starting point of the cycle is the identification of the BSFI's information security as well as cyber-related risks. Under this phase, management needs to identify its business processes and functions, information assets classified as to sensitivity and criticality, threats and vulnerabilities, interconnections, and security architecture. Identification of these factors facilitates BSFI's understanding and assessment of its inherent information security and cyber risks which are key inputs in determining, designing, and implementing the appropriate risk treatment options.
 - (ii) *Prevent.* After identifying these key factors and assessing the information security and cyber risks, the prevent phase comes into play where adequate protection mechanisms and controls are designed and implemented. These include measures ranging from baseline to advanced tools and approaches such as defense-in-depth, malware prevention, access controls and cybersecurity awareness programs, among others. These preventive controls are generally categorized into three (3) types, as follows:
 - (aa) *Administrative controls* -refer to the policies, standards, and procedures in place which articulate Management's intent, expectations, and direction on information security. It also includes security trainings and awareness programs and personnel security practices designed to prevent unwarranted employee behavior.

¹ US National Institute of Standards and Technology (NIST), ISO/IEC, ISACA and Committee on Payments and Market Infrastructures (CPMI), among others.

- (bb) *Physical and environmental controls* -pertain to the security controls and measures implemented to protect physical infrastructure such as data centers, computer facilities, and equipment from damage, unauthorized access or environmental hazards.
- (cc) *Technical controls* -refer to the logical security controls, security tools, and technologies to ensure that the confidentiality, integrity, and availability objectives for information assets are achieved.
- (iii) *Detect*. Detection capabilities should also be in place as prevention alone is not sufficient. As demonstrated in recent cyber- attacks, the ability of an institution to quickly detect anomalous activities and evaluate the scope of an attack is an important aspect in significantly reducing negative impacts. Management should design and implement effective detection controls over the BSFI's networks, critical systems and applications, access points, and confidential information.
- (iv) *Respond*. The response phase is triggered upon confirmation of an occurrence of a cyber-attack or security incident affecting the BSFI and its customers. With the growing incidence of sophisticated cybercrimes and threats, the BSFI should be prepared to respond quickly considering that cyber-attacks are no longer a remote possibility. Therefore, it should develop comprehensive, updated, and tested incident response plans supported by well-trained incident responders, investigators, and forensic data collectors. Through adequate response capabilities, the BSFI should be able to minimize and contain the damage and impact arising from security incidents, immediately restore critical systems and services, and facilitate investigation to determine root causes.
- (v) *Recover*. This phase encompasses both resumption of activities at a level which is considered "good enough for a certain period of time" and full recovery, i.e., an eventual return to full service. Management should be able to establish back-up facilities and recovery strategies to ensure the continuity of critical operations. During the recovery phase, it should ensure that information processed using back-up facilities and alternate sites still meet acceptable levels of security. To achieve cyber resilience, the BSFI should consider information security incidents and cyber-related attack scenarios in its business continuity management and recovery processes.
- (vi) *Test*. The BSFI needs to continually assess and test controls and security measures implemented under the prevent, detect, respond, and recover phases to ensure that these are effective and working as intended. Likewise, a comprehensive, systematic and layered testing and assurance program covering security processes and technologies should be in place. This is to ensure that the ISRM is on track in providing appropriate level of information security commensurate to the BSFIs' IT profile complexity. This phase also ensures that both the ISSP and ISP remain effective vis-a-vis the fast-evolving cyber- threat landscape.
- (d) *Cyber threat intelligence and collaboration*. In response to the growing cyber-threat landscape, BSFIs need to step up their information security posture and resilience beyond their respective networks. Likewise, BSFIs need to enhance situational awareness that would provide a keen sense of the threat landscape as it relates to their IT risk and cyber-risk profiles, operating complexities, and business models. Further, BSFIs need to collaborate with each other, including regulators, law enforcement agencies, and other third party stakeholders for a collective, coordinated, and strategic response through information sharing and collaboration. Information sharing allows BSFIs to enhance threat intelligence that enables quick identification, prevention and response to emerging and persistent threats. (Detailed guidelines/standards on information security are shown in *Appendix Q-62*)

(Circular Nos. 1051 dated 27 September 2019, 982 dated 9 November 2017, 961 dated 02 June 2017, 958 dated 25 April 2017, and 938 dated 23 December 2016)

143-P BUSINESS CONTINUITY MANAGEMENT¹

BSFIs can be adversely affected by disruption of critical operations due to internal and external threats, which may be natural, man-made or technical in origin. Extreme events may cause major disruptions whose impact are very broad in scope, duration or both and can pose a substantial risk to the continued operation of BSFIs. Because BSFIs play a crucial role in the financial system and economy as a whole, it is important to ensure that their operations can withstand the effects of major disruptions. Thus, BSFIs need to have a comprehensive business continuity management (BCM) process as an integral part of their operational risk management system. A well-designed BCM process enables BSFIs to resume critical operations swiftly and minimize operational, financial, legal, reputational, and other material risks arising from a disruption. This also helps mitigate systemic risks as well as maintain public trust and confidence in the financial system.

¹ BSFIs shall comply with the foregoing standards on BCM within a period of one (1) year from 11 April 2017. In this regard, a BSFI should be able to show its plan of actions with specific timelines, as well as the status of initiatives being undertaken to fully comply with the provisions of Sec. 143-P starting July 2017, upon request of the Bangko Sentral.

Purpose, applicability, and scope. The guidelines aim to promote sound management of business continuity risks. These align existing regulations, to the extent possible, with leading standards and recognized principles on BCM, and shall serve as the Bangko Sentral's baseline requirement for all BSFIs.

The guidelines shall apply to BSFIs which include banks, non-banks with quasi-banking function (NBQB), non-bank electronic money issuers and other non-bank institutions which under existing Bangko Sentral rules and regulations and special laws are subject to Bangko Sentral supervision and/or regulation.

Moreover, subject guidelines shall also apply to BSFIs with offshore data processing as may be appropriate to their situation.

Definition of terms. In these guidelines, terms are used with the following meanings:

- a. *Alternate and business recovery sites* shall refer to standby facilities for use during disruption of critical operations to ensure business continuity. These provide work space and/or the necessary technology environment needed to process business-critical information. Organizations may have more than one (1) alternate site. In some cases, alternate sites may involve facilities that are used for normal day-to-day operations but which are able to accommodate additional business processes when a primary location becomes inoperable. Examples of alternate sites include relocation and disaster recovery sites, whether managed directly or maintained by a third party for a BSFI or for use by multiple organizations.
- b. *Business continuity* shall refer to a state of continued, uninterrupted operation of a business.
- c. *BCM* shall refer to an enterprise-wide framework encompassing policies, standards, facilities, personnel and practices that provides for continuous functioning of the institution during disruptions. It is proportionate to the BSFI's internal and external risk exposures and tailored to the nature, scale, and complexity of its business.
- d. *Business continuity plan (BCP)/plan* shall refer to a documented plan detailing the orderly and expeditious process of recovery, resumption, and restoration of business functions in the event of disruptions. It should be able to cover and establish linkages among its multiple components, such as communication plan, crisis management plan, contingency funding plan, and technology recovery plan.
- e. *Business impact analysis (BIA)* shall refer to the process of identifying and measuring (quantitatively and qualitatively) the business impact or loss of business processes in the event of a disruption. It is used to identify recovery priorities, recovery resource requirements, essential staff, and dependencies (internal and external) to be incorporated in the plan.
- f. *Crisis* shall refer to a situation that requires urgent action due to its disruptive impact on the BSFI's core activities or business and operating environment.
- g. *Crisis management plan (CMP)* shall refer to a documented plan detailing the actions to be taken when a crisis strikes a BSFI and designed to maintain order amidst the confusion surrounding such situations. During and immediately after a crisis, the members of the crisis management team will convene and activate the plan to attain control over the crisis and minimize its impact to operations.
- h. *Critical process* shall refer to any activity, function or service, which when lost would materially affect the continued operation of the BSFI.
- i. *Cyber resilience* shall refer to an organization's ability to anticipate, handle, adapt to, and/or recover from evolving cyber threats.
- j. *Events* shall refer to disruption scenarios such as loss of people, technology, alternate site, and service providers.
- k. *Pandemic* shall refer to epidemics or outbreaks in humans of infectious diseases that have the ability to spread rapidly over large areas, possibly worldwide.
- l. *Recovery point objective (RPO)* shall refer to acceptable amount of data loss should a disruption occur without severe impact on the recovery of operations.
- m. *Recovery time objective (RTO)* shall refer to the period of time following an incident within which a product, system or business process must be resumed or resources must be recovered.
- n. *Resilience* shall refer to the ability of an organization to anticipate, handle, adapt to and/or recover from a disruption and resume operations.
- o. *Risk assessment* shall refer to the process involving the identification and assessment of potential threats and vulnerabilities that could severely interrupt a BSFI's business activities and the corresponding likelihood and magnitude of impact on business processes.

- p. *Technology recovery plan (TRP)/Disaster recovery plan (DRP)* shall refer to a documented plan detailing the technology strategy and requirements during recovery for business and support functions. The relevant regulations are in Item "3.3.2.13" of *Appendix Q-64*.

Roles and responsibilities.

- a. *Board of directors and Senior management.* The BSFI's board and senior management are responsible for overseeing the implementation of a sound BCM process, which involves the creation and promotion of an organizational culture that places high priority on business continuity. This should be reinforced by providing sufficient financial and human resources associated with the BSFI's business continuity initiatives. Senior management should establish BCM policies, standards, and processes, which must be duly endorsed to and approved by the board.

Awareness training and periodic reporting to board and senior management on matters related to business continuity are equally important to ensure their continuing commitment and support. At a minimum, periodic management reports should include the following:

- (1) implementation status of the BCP;
 - (2) incident reports;
 - (3) plan test results;
 - (4) changes to the plan; and
 - (5) related action items to strengthen the BSFI's ability to recover during disruptions.
- b. *BCM coordinator/unit.* Coordination and supervision of all business continuity activities should be assigned to a competent individual and/or unit with technical knowledge and experience consistent with the nature and complexity of the BSFI's business activities. A complex¹ BSFI may need a BCM unit with a team of departmental liaisons throughout the organization. For a simple BSFI, an individual BCM coordinator may suffice. While the BCM coordinator/unit may recommend initiatives or activities to be prioritized, the board and senior management are ultimately responsible for understanding the critical business processes and subsequently establishing plans to meet business process requirements in a safe and sound manner.
- c. *BSFI personnel.* BSFI personnel should understand their roles and responsibilities on the prevention of crisis and recovery of business operations during disruptions. Business and support functions should allocate responsibilities for managing disruptions and provide clear guidance regarding the succession of authority to account for unavailability of key personnel in the event of a disruption.
- d. *Audit.* An independent review of the BSFI's BCM framework and corresponding plans should be periodically performed with frequency based on a sound risk assessment process. This is to ensure that significant policy revisions resulting from changes in the operating environment, lessons learned from plan tests, and internal and regulatory audit recommendations have been considered. Moreover, plan testing exercises should be independently observed, verified, and evaluated to ensure reasonableness and validity of the testing process and the accuracy of test results.

Business Continuity Management Framework. BSFIs should adopt a cyclical, process-oriented BCM framework, which, at a minimum, should include five (5) phases, namely: BIA and risk assessment, strategy formulation, plan development, plan testing, and personnel training and plan maintenance. This framework represents a continuous cycle that should evolve over time based on changes in business and operating environment, audit recommendations, and test results. This framework should cover each business function and the technology that supports it. Other related policies, standards, and processes should also be integrated in the overall BCM framework.

Figure 1. Business Continuity Management Process

¹ Pursuant to Sec. 147-Q, BSFIs are classified as "simple" but maybe re-classified as "complex" depending on extent or degree of reliance of core business functions to technology.

- a. *Business impact analysis and risk assessment.* A comprehensive BIA and risk assessment should be undertaken to serve as the foundation in the development of the plan. The BIA entails determining and assessing the potential impact of disruptions to critical business functions, processes, and their interdependencies through work-flow analyses, enterprise-wide interviews, and/or inventory questions. Accordingly, the BSFI should determine the recovery priority, RTO, RPO, and the minimum level of resources required to ensure continuity of its operations consistent with the criticality of business function and technology that supports it. The BSFI should then conduct risk assessment incorporating the results of the BIA and evaluating the probability and severity of a wide-range of plausible threat scenarios in order to come up with recovery strategies that are commensurate with the nature, scale, and complexity of its business functions.

Domestic systemically important banks (D-SIBs). To minimize the extent or impact of a D-SIB's failure in the financial system, BSFIs identified as D-SIBs by the Bangko Sentral, pursuant to Sec. 126-Q, should set the RTO for each of their critical processes to a maximum of four (4) hours from the point of disruption. For non-D-SIB BSFIs, the RTO of critical processes should be primarily driven by their BIA and risk assessment.

- b. *Strategy formulation.* Recovery and resumption strategies to achieve the agreed time-frame and deliver the minimum required services as identified in the BIA should be defined, approved, and tested. The minimum requirements for the provision of essential business and technology service levels during disruptions should be established by concerned business and support functions.
- (1) *Recovery strategy.* As business resumption relies primarily on the recovery of technology resources, adequate provisions should be in place to ensure systems availability and recoverability during disruptions as prescribed under *Appendix Q-64*. Recovery strategies should be able to meet the agreed requirements between business units and support functions for the provision of essential business and technology service levels.
- (2) *Continuity of operations/business resumption strategy.* The business continuity models adopted by the BSFI to handle prolonged disruptions should be based on the risk assessment of its business environment and the characteristics of its operations. The resumption strategies and resource requirements should be approved by the board of directors as recommended by senior management or the relevant board committees to ensure alignment with corporate goals and business objectives.
- c. *Plan development.* Plans are an important, tangible evidence of the BSFI's business continuity initiatives. The objective of the plan is to provide detailed guidelines and procedures on response and management of a crisis, recovery of critical business services and functions and to ultimately resume to normal operations. The plan should be formulated on an enterprise-wide basis, reviewed and approved by the board and senior management at least annually and disseminated to all concerned employees. The plan should include provisions for both short-term and prolonged disruptions.

A well-written plan should describe the various types of events or scenarios that could prompt BCP activation. It should include, at a minimum, the following components:

- (1) Escalation, declaration and notification procedures;
- (2) Responsibilities and procedures to be followed by each continuity or recovery teams and their members. The procedures should enable the BSFI to respond swiftly to a crisis (i.e., a crisis management plan) and to recover and resume the critical processes outlined in the plan within the stipulated time frame during disruptions;
- (3) A list of resources required to recover critical processes in the event of a major disruption. This would include, but not limited to:
- (a) key recovery personnel;
 - (b) computer hardware and software;
 - (c) communication systems;
 - (d) office equipment; and
 - (e) vital records and data;
- (4) Relevant information about the alternate and recovery sites; and
- (5) Procedures for restoring normal business operations. This should include the orderly entry of all business transactions and records during disruption into the relevant systems up to completion of all verification and reconciliation procedures.

Communication is a critical aspect of a BCP. In this respect, the BSFI should include a communication plan for notifying all relevant internal and external stakeholders (e.g., employees, customers, vendors, regulators, counterparties, and key service providers, media and the public) following a disruption. The BSFI should maintain an up-to-date call tree and contact list of key personnel and service providers, including

communication flow and channels for internal and external stakeholders. Clear and effective communication will facilitate escalation for appropriate management action and instruction to all concerned and help manage reputation risks. The BSFI should consider alternate methods of communication and preparation of predetermined messages tailored to a number of plausible disruption scenarios to ensure various stakeholders are timely, consistently, and effectively informed.

A crisis management plan should be included in the BCP to assist senior management in dealing with and containing an emergency and avoid spillover effects to the business. Senior management should identify potential crisis scenarios and develop corresponding crisis management procedures. This includes identifying a mix of individuals from various departments who are authorized to make instantaneous decisions during crisis situations. This team shall be responsible for the actual declaration of an event, activation of the plan, and internal and external communication process.

When outsourcing plan development, management should ensure that the chosen service provider has the expertise required to analyze the business needs of the BSFI and that the arrangement conforms with legal and regulatory requirements. The service provider should be able to design executable strategies relevant to the BSFI's risk environment and design education and training programs necessary to achieve successful BCP deployment.

d. *Plan testing*

- (1) *Types of testing methods.* Plan testing is a vital element of the BCM. It ensures that the plan remains accurate, relevant, and operable. Tests should be conducted periodically, with the nature, scope, and frequency determined by the criticality of the applications, business processes, and support functions. In some cases, plan tests may be warranted due to changes in BSFI's business, responsibilities, systems, software, hardware, personnel, facilities, or the external environment.

Testing methods can vary from simple to complex each bearing its own characteristics, objectives, and benefits. Types of testing methods in order of increasing complexity include:

- (a) *Tabletop exercise/structure d walk-through test* – the primary objective is to ensure that critical personnel from all areas are familiar with the plan and that it accurately reflects the BSFI's ability to recover from a disruption.
 - (b) *Walk-through drill/simulation test* – similar to a tabletop exercise but with a more focused application. During this test, participants choose a specific scenario to which relevant plan provisions shall be applied.
 - (c) *Communication/call tree test* – an exercise that validates the capability of crisis management teams to respond to specific events and the effectiveness of the call tree notification process in disseminating information to employees, vendors, and key clients.
 - (d) *Alternate site test/exercise* -tests the capability of staff, systems, and facilities, located at alternate sites to effectively support production processing and workloads.
 - (e) *Component test/exercise* -A testing activity designed to validate the continuity of individual systems, processes, or functions, in isolation.
 - (f) *Functional drill/parallel test* – test to determine capability of alternate site and BSFI employees to support strategy as defined in the plan, which involves actual mobilization of personnel, establishing communications, and recovery processing.
 - (g) *Enterprise-wide full-interruption/full-scale test* – the most comprehensive type of test encompassing the entire organization and requires activation of all the components of the plan at the same time to simulate a real-life emergency and processing data and transactions using back-up media at the recovery site.
- (2) *Test policy/plan.* Testing should be viewed as a continuously evolving cycle. The BSFI should incorporate the results of BIA and risk assessment and work towards a testing strategy that increases in scope and complexity to address a variety of threat scenarios. Test scenarios should vary from isolated system failures to wide-scale disruptions and promote testing its primary and alternate facilities, as well as with key counterparties and third-party service providers.

A testing policy should define roles and responsibilities for the implementation and evaluation of the testing program. Test plans with pre-determined goals and test criteria should be developed for each testing activity. It should clearly define the objectives of testing, identify the functions, systems, or processes to be tested and the criteria for assessing what constitutes a successful test. Formal testing documentation (i.e., test plans, test scenarios, test procedures, test results) should be prepared to ensure thoroughness and effectiveness of testing and properly maintained for audit and review purposes.

- (3) *Annual enterprise-wide business continuity testing.* The BSFI must conduct an enterprise-wide business continuity test at least annually, or more frequently depending on changes in the operating environment, to ensure its plan's relevance, effectiveness, and operational viability. The scope of testing should be comprehensive to cover the major components of the plan as well as coordination and interfaces among important parties.
 - (4) *Analysis and report of test result.* Plan tests, including successes, failures, and lessons learned, should be thoroughly analyzed to promote continuous BCM improvement. Exceptions noted should be documented and corrective actions should be closely monitored to ensure that they are implemented in a timely manner by concerned parties, including the board and senior management, business line management, risk management, IT management, and other internal stakeholders.
- e. *Personnel training and plan maintenance.*
- (1) *Training program.* A business continuity training program should be provided to all concerned employees to promote awareness, familiarity, and understanding of their roles and responsibilities in the event of a disruption. The training program should be offered on a continuing basis for existing and new employees and should be updated to address changes to the plan.
 - (2) *Plan maintenance.* Plans and results of BIA and risk assessment should be reviewed and updated on an ongoing basis (at least annually or when necessary) so that they remain consistent with the BSFI's current operations and business strategies. BCM-related documents (i.e., BCP, test program, policy guidelines, and program requirements) should be subject to change management process to ensure these are updated with proper approval and documentation with respect to any significant changes in the business environment or as a result of audit findings.

Other policies, standards and processes. The following policies, standards and processes should be integrated into the BCM process:

- a. *Pandemic planning.* Similar to natural disasters or technical disruptions, pandemics may also interrupt a BSFI's business activities. However, the difficulty in determining a pandemic's scope and duration present additional challenges in ensuring resilience and continuity of a BSFI's operations.

Generally, pandemic plans are integrated in the BSFI's BCP and follow the same BCM process with additional considerations, such as:

- (1) *Business impact analysis and risk assessment.* The BCM process should consider pandemics as early as the BIA and risk assessment phase. The BIA and risk assessment should be updated to incorporate complexities that may arise from pandemics, such as (a) increasing level of absenteeism based on a pandemic's severity; and (b) the need for another layer of contingency plans as regular disaster or emergency response methods are no longer feasible.
- (2) *Strategy formulation.* To complement strategies for natural and technical disruptions, the following should be given due consideration when planning for pandemics:
 - (a) *Trigger events* – Trigger events and strategies should be defined depending on the nature of a pandemic. Pandemic planning should have the flexibility to accommodate varying degrees of epidemic or outbreak as pandemics normally occur in waves or phases and of varying severity.
 - (b) *Remote access capability* – In the event of a pandemic, enabling remote access may be one of the primary strategies available to a BSFI. To support a telecommuting strategy, the BSFI should ensure adequate capacity, bandwidth and authentication mechanisms in its technological infrastructure against expected network traffic or volume of transactions.
 - (c) *External parties* – With pandemics not limited to the BSFI, establishing working relationships with external parties is an essential component. In addition to the communication plan for all relevant internal and external stakeholders, the BSFI should establish open relationships and communication channels with local public health and emergency response teams or other government authorities. The BSFI should inform concerned parties of any potential outbreaks and, at the same time, be aware of any developments in the expected scope and duration of a pandemic.
 - (d) *Employee awareness* – As information becomes available from reputable sources or local agencies, the BSFI should ensure that steps to limit or reduce the risk of being affected by the pandemic are cascaded to its employees.

- (3) *Plan development.* Pandemic plans should be commensurate to the nature, size and complexity of a BSFI's business activities and have sufficient flexibility to address the various scenarios that may arise. At a minimum, the pandemic plan should include:
 - (a) Strategy that is scalable dependent on the extent and depth of the outbreak;
 - (b) Preventive measures, including monitoring of current environment and hygiene tools available to employees;
 - (c) Communication plan with internal and external stakeholders, including concerned local public health teams and government agencies; and
 - (d) Tools, systems and procedures available to ensure continuity of its critical operations even with the unavailability of BSFI's staff for prolonged periods.
 - (4) *Plan testing.* Test policy/plan should include strategies to assess capability to continue critical operations, systems and applications even in the event of a severe pandemic. When regular tests are unable to cover pandemic scenarios, separate pandemic plan tests should be carried out.
 - (5) *Personnel training and plan maintenance.* The plan should be updated as developments and information become available. As needed, employee training programs should cover pandemic risks, including the roles and responsibilities of each employee during pandemic situations.
- b. *Cyber resilience.* Cyber-threats and attacks against the financial services industry have become increasingly widespread, sophisticated and coordinated. Recent cyber-attacks worldwide highlight, not only the degree of disruption to a BSFI's operations, but also the extent of reputational damage which could undermine public trust and confidence. As such, the BSFI should consider the potential impact of these cyber events into its BCM process and institute adequate cyber resilience capabilities.
- Given the unique characteristics of cyber-threats and attacks, traditional back-up and recovery arrangements adopted by the BSFI may no longer be sufficient and even increase the damage to the BSFI's network, operations and critical information assets. In worst case scenarios, back-up systems and alternate recovery sites are likewise affected rendering both sites inoperable. To ensure cyber resilience, the BSFI should take into consideration a wide-range of cyber-threat scenarios perpetrated from diverse threat sources (e.g., skilled hackers, insiders, state-sponsored groups) which seek to compromise the confidentiality, availability and integrity of its information assets and networks. Defensive strategies and innovative recovery arrangements should be explored that are commensurate with the BSFI's cyber-security risk exposures and aligned with its information security program in accordance with *Appendix Q-62*.
- c. *Information security.* Mitigation strategies should consider security controls to manage risks that may arise once an event triggers plan activation. Security during disasters and disruptions is an important consideration to manage risks arising from the change in working environment. The relevant guidelines/standards on information security that may be considered in strategy formulation and/or in choosing alternate sites are in *Appendix Q-62*.
 - d. *Interdependencies.* An effective plan coordinates across its many internal and external components, identifies potential process or system dependencies, and mitigates risks from interdependencies. The BSFI may have very complex operating and recovery environment wherein interdependencies need to be duly considered, such as telecommunications, third party service providers, and recovery site. Given the critical resources and services that are being shared with the BSFI or other entities, additional mitigating controls and recovery strategies need to be integrated in the plan.
 - e. *Liquidity risk management.* Sound liquidity risk management practices enable a BSFI to maintain availability of funds even in times of financial stress or adverse changes in market conditions. In the event of a business disruption, sound liquidity risk management practices should similarly apply. The BSFI should ensure it has sufficient liquidity to support its recovery strategies and continue supporting the delivery of basic banking services to the clients pending full business resumption. Guidelines on liquidity risk management are in *Appendix Q-43*.
 - f. *Project management.* Senior management should ensure that availability and business continuity requirements are considered at the planning and development stages of new business products and services and other critical technology processes, such as systems development and acquisition, and change management.
 - g. *Event/problem management.* Operations personnel should be properly trained to recognize events that could trigger implementation of the plan. Although an event may not initially activate the plan, it may become necessary as conditions and circumstances change. Management should train and test BSFI personnel to implement and perform appropriate business continuity procedures within the timeframes of the plan.
 - h. *Outsourcing.* When a BSFI enters into an outsourcing arrangement, it should put due consideration on the business continuity and disaster recovery arrangements of the service provider to ensure continuity of operations. Detailed guidelines/standards on business continuity considerations for outsourcing arrangements are in *Appendix Q-65*.

- i. **Insurance.** Insurance is an option available to a BSFI for recovery of losses that cannot be completely prevented and the expenses related to recovering from a disruption. The BSFI should regularly review the adequacy and coverage of its insurance policies in reducing any foreseeable risks caused by disruptive events, such as loss of offices, critical facilities and equipment, and casualty. Insurance policies may also need to address the BSFI's legal responsibilities for failing to deliver services to its customers and counterparties. To facilitate the claims process, the BSFI should create and retain a comprehensive hardware and software inventory list in a secure off-site location and detailed expenses should be documented to support insurance claims.

Supervisory enforcement actions. BSFIs should make available all policies and procedures and other documents/information related to the foregoing during on-site examination as well as provide copies thereof to the regulator when a written request is made to determine compliance.

Consistent with Sec. 002-P, the Bangko Sentral may deploy enforcement actions to promote adherence with the requirements set forth in this Section and bring about timely corrective actions. The Bangko Sentral may issue directives to improve the BCM process, or impose sanctions to limit the level of or suspend any business activity that has adverse effects on the safety and soundness of the BSFI, among others. Monetary and non-monetary sanctions, as provided under existing laws, Bangko Sentral rules and regulations, may likewise be imposed on a BSFI and/or its directors, officers and/or employees for violation of subject Section.

(Circular Nos. 1051 dated 27 September 2019 and 951 dated 20 March 2017)

144-P SOCIAL MEDIA RISK MANAGEMENT¹

Social media, a low-cost solution capable of disseminating real-time information via the internet, presents vast opportunities for growth, customer engagement and business benefits as usage, customer reach and adoption scale up and become widespread and ubiquitous. Considering these potential benefits alongside exponential growth in the number of social media users and its massive reach, BSFIs have started to leverage on social media platform/s to promote their business and improve customer interaction experience to help drive business objectives/strategies.

Similar to any new technology, however, social media introduces a new attack vector which may expose BSFIs to compliance, legal, reputational, strategic, and operational risks. Risks in social media include susceptibility to account take-over, malware distribution, brand bashing, inadvertent disclosure of sensitive information and privacy violation, among other possible threats. As such, BSFIs should adopt an appropriate risk management system, commensurate to the extent and degree of their social media usage, to effectively identify, measure, manage and monitor risks arising from the use of social media platforms. This should form an integral part of their operational risk management system.

Applicability and scope. The guidelines underscore the importance of having a well-defined social media risk management strategy in supporting BSFI's overall business goals and objectives. These guidelines align existing regulations, to the extent possible, with leading standards and recognized principles. They outline the minimum standards/basic principles that shall govern the BSFI's framework to aid in the sound management of risks associated with the use of social media for official purpose or employees' personal use, within and outside the organization.

It is not intended to provide procedural specifics or a "one-size-fits-all" solution for carrying out compliance and risk management responsibilities. Each BSFI is therefore expected to establish its own risk management strategy; suitable to its size, risk tolerance level, and the nature and scope of social media activities engaged in.

The guidelines shall apply to all BSFIs which include banks, non-banks with quasi-banking function (NBQB), non-bank electronic money issuers, and other non-bank institutions which under existing Bangko Sentral rules and regulations and special laws are subject to Bangko Sentral supervision and/or regulation.

Definition of terms. In these guidelines, terms are used with the following meanings:

- a. **Attack vector** shall refer to the path or means by which an attacker can gain access to a computer system in order to deliver a malicious code (e.g., virus, worms, trojans).
- b. **Non-technical controls** shall refer to management, administration, and operational controls employed that are manual and procedural in nature (e.g., security-related policies and procedures; operational procedures; personnel, physical, and environmental security controls; performance management and measurement).
- c. **Risk assessment** shall refer to the process involving the identification and assessment of potential threats and vulnerabilities related to the use of social media and determination of the likelihood that the threat will occur as well as the corresponding impact to the business should the threat occur.

¹ BSFIs shall comply with the foregoing standards on social media risk management within a period of six (6) months from 04 April 2017. In this regard, a BSFI should be able to show, upon request of the Bangko Sentral, its plan of actions with specific timelines, as well as the status of initiatives being undertaken to fully comply with the provisions of this Section.

- d. *Social media* shall refer to online communication channels dedicated to community-based content generation and sharing, interaction, and collaboration.
- e. *Social media platform* shall refer to any form of interactive communication medium wherein users can generate and disseminate content (e.g., text, images, audio, video) through social networks using the internet. Examples of popular social media platform categories include the following:
 - (1) Social networking (e.g., Facebook, LinkedIn)
 - (2) Micro-blogging (e.g., Twitter, Tumblr)
 - (3) Blogging (e.g., Wordpress, Blogger)
 - (4) Photo Sharing (e.g., Flickr, Instagram, Pinterest)
 - (5) Video Sharing (e.g., Youtube, Vimeo, Vine)
 - (6) Crowdsourcing (e.g., Ushahidi, Inc.)
- f. *Technical controls* shall refer to the controls incorporated into the computer hardware, software, or firmware to aid in the effective implementation of policies and standards (e.g., access control, authentication, web scanner/crawler).

Social media risk management system. BSFIs should establish an appropriate framework that will result in sound social media governance and risk management. At a minimum, the framework shall include the following elements:

- a. Clearly defined governance structure indicating the roles and responsibilities of the board of directors and senior management in setting the direction on the BSFI's use of social media, including its alignment to the BSFI's strategic goals/plans; establishing adequate standards, policies, procedures, and controls; and implementing ongoing risk assessment of social media-related activities.

The board of directors shall be primarily responsible for defining the BSFI's risk tolerance level, understanding the nature and degree of risks the BSFI will be exposed to, and ensuring that these risks are properly addressed. Moreover, the board of directors, as part of its duties, shall approve and oversee the design and implementation of the social media strategy; related standards, policies and procedures; and means to ensure compliance with said standards and/or policies as well as applicable laws and regulations. Senior management, on the other hand, shall be responsible for the implementation of the social media risk management system approved by the board of directors.

The governance process should also include reporting mechanisms to the board of directors and/or senior management to enable periodic evaluation of the effectiveness of the BSFI's social media strategy/program, in terms of achieving its stated objectives, and measures put in place to manage the risks related to its use.

- b. Policies and procedures governing the following, among others:
 - (1) Scope and definition of social media;
 - (2) Social media regulatory landscape reflecting applicable laws, rules and regulations for compliance;
 - (3) Individuals and/or composition of the team/s who will be responsible for the creation, maintenance, and monitoring of the BSFI's proprietary social media sites/pages. Their corresponding roles and accountabilities should also be clearly defined; Content management and approval process;
 - (4) Ongoing assessment, management, and monitoring of risks associated with social media-related activities;
 - (5) Acceptable use as well as prohibitions/restrictions on the business/official use of social media platforms. These guidelines shall likewise apply to the employees'¹ personal use of social media, insofar as it may impact the BSFI's operations, reputation and/or compliance with applicable laws and regulations. These should cover matters such as, but not limited to, expectations, ethical behavior, types/nature and extent of BSFI and/or customer-related information that can be posted, statements that can or cannot be made about or in behalf of the institution, comments that should not be made about a competitor, and corresponding sanctions/penalties for inappropriate use of social media and committing non-permissible activities;
 - (6) Use and monitoring of the BSFI's proprietary social media sites/pages to ensure compliance with applicable laws, regulations and internal policies;
 - (7) Monitoring and recording of suspicious transactions and customer activities on the BSFI's proprietary social media sites/pages;

¹ Include the BSFI's employees, contractual employees and/or project hires, and third-party service providers.

- (8) Adoption of technical and non-technical controls to address risks associated with the use of social media platform/s including methodologies to manage risks from online postings, edits, replies and retention;
 - (9) Due diligence process for selecting, managing and continuous monitoring of third-party service providers (TSP) that administer the BSFI's social media site(s)/page(s). In addition, the specific roles and responsibilities of the TSP, including liabilities and accountabilities for errors, omissions, fraud, and other instances, resulting from the TSP's actions, which may adversely affect the BSFI, should also be defined;
 - (10) Social media crisis management plan and escalation procedures;
 - (11) Enterprise-wide employee training and awareness programs covering relevant topics such as the BSFI's social media use policies, employee roles and responsibilities and non-permissible activities;
 - (12) Records retention of social media data; and
 - (13) Communication of the BSFI's official social media sites/pages to its customers to avoid confusion and being misled to unofficial sites.
- c. Specific roles and responsibilities of the risk management, consumer protection, audit and compliance functions to ensure that social media risks are adequately managed and integrated in the BSFI's enterprise-wide risk management systems.

BSFIs that do not utilize social media should nevertheless have clear policies and measures in place to address the potential reputation risks that may arise within the various social media platforms and provide guidance on employee use of social media.

Compliance with relevant regulations. BSFIs, in formulating and implementing their social media policies, should ensure compliance with the applicable requirements of Bangko Sentral rules and regulations on financial consumer protection, especially those relating to disclosures and transparency in advertising and promotional materials, protection of client information, effective recourse, and financial education and awareness. They should likewise conform with the relevant provisions of Bangko Sentral outsourcing framework should they decide to outsource the conduct of social media-related activities to a service provider.

The use of social media platforms, including information gathered therein, for the conduct of account origination activities should comply with applicable rules and regulations, especially on the provisions relating to customer identification procedures under the existing anti-money laundering rules and regulations. In the event that BSFIs opt to use social media for processing financial transactions, the applicable Bangko Sentral rules and regulations on electronic payment and financial services and technology risk management should likewise be observed to ensure security, reliability and authenticity of such transactions.

The regulations mentioned herein are not exhaustive. It is the BSFI's responsibility to ensure that all applicable laws and regulations relevant to the activities it will choose to engage in using social media will be adequately complied with. Moreover, the BSFI is expected to stay abreast of and continuously adapt to changes in the regulatory requirements.

Supervisory enforcement actions. BSFIs should make available all policies and procedures and other documents/information related to the foregoing during the on-site examination as well as provide copies thereof when a written request is made to determine compliance.

Consistent with Sec. 002-P, the Bangko Sentral may deploy enforcement actions to promote adherence with the requirements set forth in this Section and bring about timely corrective actions. The Bangko Sentral may issue directives to improve the social media risk management system or impose monetary and non-monetary sanctions on a BSFI and/or its directors, officers and/or employees.

(Circular No. 1033 dated 22 February 2019 and 949 dated 15 March 2017)

F. INTERNAL CONTROL

151-P INTERNAL CONTROL FRAMEWORK

Pawnshops shall adopt an internal control system appropriate to the size and complexity of its business.

Every pawnshop shall adopt minimum internal control measures to safeguard the assets of the pawnshop. Such measures may include but is not limited to, dual control, check and balance and internal audit. No employee shall be permitted to process a transaction affecting his own account.

The following shall be the minimum internal control standards that pawnshops are expected to observe in their operations.

Proper accounting records.

- a. All pawnshops shall maintain proper and adequate accounting records which include reconciliation of due to/from head office/branches, if the pawnshop has several offices.
- b. Records should be kept up-to-date and shall contain sufficient detail so that an audit trail is established.

Number control. The following forms, instruments and accounts must be number-controlled:

- a. Pawn tickets;
- b. Official receipts; and
- c. Expense vouchers.

Safekeeping of records and insurance of premises. Vital records for the current year must be kept inside the safe or vault when not in use. Vital records are pawn ticket duplicates, loan paid and loan extended registers or loan paid and extended vouchers. Other pawnshop records/documents may be placed in filing cabinets/shelves outside the vault or safe but within the pawnshop premises.

For this purpose, a pawnshop's vault, i.e., its walls, ceiling and floor, shall be made of steel-reinforced concrete or such other equally safe materials/specifications. Vault doors shall be made of steel or other drill and torch-resistant materials.

Safes should be sufficiently heavy or be securely anchored to the floor of the premises.

Vital records kept in electronic media including back-up copies thereof shall be kept in safes or vaults designed to protect them from damage due to fire or other fortuitous events.

The pawnshop premises and furniture, fixtures and equipment of pawnshops must be insured against fire.

Bonding of accountable officers/employees. In order to safeguard pawnshop's assets (pawned items) and mitigate the risk of loss arising from malfeasance or fraudulent practices of their employees, pawnshop operators shall adopt any of the following measures:

- a. Bonding of accountable officers/employees with reputable insurance/surety companies accredited by the Insurance Commission; or
- b. Equivalent self-insurance mechanism acceptable to Bangko Sentral.

(Circular Nos. 974 dated 29 September 2017, 961 dated 02 June 2017, M-2017-003 dated 27 January 2017, and Circular No. 938 dated 23 December 2016)

152-P FRAMEWORK ON THE SELECTION OF EXTERNAL AUDITORS

Policy Statement. The Bangko Sentral considers the external auditing profession as a partner in promoting the integrity of financial reports and transparency in the financial system. In this light, the Bangko Sentral is issuing this framework on the selection of external auditors (individual practitioners and audit firms) for Bangko Sentral Supervised Financial Institutions (BSFIs) in line with its cooperative arrangements with the Securities and Exchange Commission (SEC), Insurance Commission (IC), and Philippine Deposit Insurance Corporation (PDIC), under the auspices of the Financial Sector Forum (FSF).

Appointment of External Auditors of BSFIs

- a. BSFIs shall engage the services of an external auditor included in the List of Selected External Auditors for BSFIs. In this respect, a BSFI shall only appoint an external auditor belonging to the same category or from categories higher than the category of the BSFI concerned as provided in this section: *Provided*, That the Monetary Board may require the BSFI to appoint an external auditor from higher categories as part of the Bangko Sentral's supervisory action on the BSFI. The external auditor appointed by the BSFI shall likewise audit the BSFI's trust department as well as its subsidiaries and affiliates engaged in allied activities, as applicable.
- b. External Auditors shall be classified into three categories and shall extend their services to BSFIs belonging to the same category or from categories lower than the category of the external auditor, as follows:
 - (1) Group A
 - (a) Universal/Commercial Banks
 - (b) Foreign banks and branches or subsidiaries of foreign banks
 - (c) Banks, trust departments and trust corporations with additional derivatives authority, pursuant to Sec. 613 of the MORB.

(2) Group B

- (a) Thrift Banks
- (b) Non-bank financial institutions with quasi-banking license
- (c) Trust departments and trust corporations

(3) Group C

- (a) Rural and Cooperative Banks
- (b) Non-stock Savings and Loan Associations
- (c) Pawnshops
- (d) Remittance and Transfer Companies (RTCs)/Money Changers/Foreign Exchange Dealers (MCs/FXDs), including Virtual Currency Exchanges and Electronic Money Issuers
- (e) Credit Card Issuers/Acquirers

The above categories shall include their subsidiaries and affiliates engaged in allied activities and other financial institutions subject to Bangko Sentral's consolidated supervision.

- c. External auditors applying for first time inclusion or renewal of inclusion in the List of Selected External Auditors for BSFIs shall submit their application to the SEC. The application shall be subject to the requirements set out by the SEC as agreed upon by the Bangko Sentral, SEC, IC and PDIC.
- d. The inclusion in the List of Selected External Auditors for BSFIs shall be valid for five (5) years or for a shorter period prescribed by the financial sector supervisors.
- e. The Bangko Sentral shall periodically evaluate the performance of the external auditor through an assessment of the quality of the BSFI's audited financial statements and its compliance with the requirements provided under this Section. The results of assessment shall serve as basis for the continuing inclusion of external auditors in the List of Selected External Auditors for BSFIs.
- f. The external auditor, including the engagement and quality control partners of the audit firm, of the BSFI shall be rotated in accordance with the relevant provisions of the Code of Ethics for Professional Accountants in the Philippines as adopted by the Philippine Board of Accountancy.

Audit Engagement and Reportorial Requirements

- a. The BSFI's Audit Committee/board of directors/board of trustees shall ensure that the scope of external audit work appropriately covers areas relevant to BSFI's operations and risk exposures. These include the following:
 - (1) Review of the adoption of applicable reporting framework as well as the assessment of the accuracy, adequacy, and reliability of accounting records and financial reports;
 - (2) Assessment of the propriety and adequacy of disclosures in the financial statements;
 - (3) Assessment of the adequacy and effectiveness of internal controls and risk management systems;
 - (4) Assessment of the quality of capital in relation to risk exposures; and
 - (5) Evaluation of the quality of corporate governance.
- b. The engagement contract of BSFIs with the external auditor shall include, at a minimum, the following provisions:
 - (1) That disclosure of information, such as those enumerated under Item "c" of this Section (*Audit engagement and reportorial requirements*), by the external auditor to the Bangko Sentral and/or other financial sector supervisors shall not constitute a breach of confidentiality on the part of the external auditor nor shall it be a ground for civil, criminal, or disciplinary proceedings against the external auditor;
 - (2) That the external auditor shall be allowed read-only access to the Bangko Sentral's Report of Examination on the BSFI and that the external auditor shall appropriately consider the contents thereof and maintain its confidentiality; and
 - (3) That the BSFI concerned and external auditor shall comply with all the requirements under this Section.

The engagement contract shall be made available by the BSFI to the Bangko Sentral upon request.

- c. The external auditor shall report to the appropriate supervising department of the Bangko Sentral within fifteen (15) calendar days upon discovery of any matter adversely affecting the condition or soundness of the BSFI, such as, but not limited to the following cases:
 - (1) Any material finding involving fraud or error;

- (2) Actual or potential losses, the aggregate of which amounts to at least ten percent (10%) of the consolidated total assets of the BSFI;
- (3) Significant doubt as to the ability of the BSFI to continue as a going concern;
- (4) Material breach of laws or Bangko Sentral rules and regulations such as but not limited to prescribed capital and liquidity ratios, significant deficiency in allowance for credit losses, material weaknesses in fair value measurement methodology, and significant vulnerabilities to money laundering and combating the financing of terrorism;
- (5) Material internal control weaknesses which may lead to financial reporting problems; and
- (6) Findings on matters of corporate governance that may require urgent action by the Bangko Sentral.

Where a thorough investigation or evaluation of facts is necessary on the noted case, an initial report shall be submitted within the prescribed timeline: *Provided*, That a complete report is submitted not later than fifteen (15) calendar days from completion of investigation or evaluation.

In case there are no matters to report, the external auditor shall submit to the appropriate supervising department of the Bangko Sentral, not later than 120 calendar days after the close of the calendar year or the fiscal year adopted by the BSFI, a certification that there is none to report.

- d. The board of directors and management of the BSFI shall be primarily responsible for the financial statements submitted to the Bangko Sentral. External auditors are expected to conduct the audit of financial statements in accordance with the provisions of the Philippine Standards on Auditing.
- e. The external auditor shall directly inform the appropriate supervising department of the Bangko Sentral of the pre-termination of the engagement contract or his/her resignation/replacements as external auditor as well as the reasons thereto, within fifteen (15) calendar days of the pre-termination of the contract or his/her resignation/replacement.

Supervisory Enforcement Action

The Bangko Sentral reserves the right to deploy its range of supervisory enforcement actions to promote adherence with the requirements set forth in this Section and bring about timely corrective actions. For this purpose, the Bangko Sentral may issue directives or impose sanctions on BSFIs and/or its directors/trustees who approved the appointment of the external auditor, who/which are not in the List of Selected External Auditors for BSFIs, and/or for non-compliance with the provisions of this Section. The Bangko Sentral may likewise shorten the period of validity of inclusion of an external auditor in the List of Selected External Auditors for BSFIs, suspend, or delist external auditors from its List of Selected External Auditors for BSFIs based on the results of assessment of the quality of audited financial statements (AFS) as well as non-compliance with the provisions of this Section. The guidelines on the supervision/delisting of external auditor in the list of selected external auditors for BSFIs is prescribed in *Appendix P-13*.

Transitory provisions

- a. External auditors whose inclusion in the List of Selected External Auditors for BSFIs is valid to cover the audit of 2018 financial statements are hereby given one (1) year extension on their inclusion in the List of Selected External Auditors for BSFIs allowing them to engage in the audit of the 2019 financial statements.
- b. All applications (new and renewal) for inclusion in the List of Selected External Auditors for BSFIs to cover in the audit of 2020 financial statements and thereafter shall be filed with the SEC starting June 2019.

(Circular No. 1040 dated 20 May 2019)

G. REPORTING GOVERNANCE

161-P RECORDS AND REPORTS

Pawnshops shall maintain records and submit required reports to the Bangko Sentral.

Maintenance of records. The accounting period of pawnshops shall be on calendar year basis.

The accounting records of pawnshops shall consist of records of original entry and books of final entry. The records of original entry shall consist of pawn tickets, official receipts, vouchers and other supporting documents. The books of final entry shall consist of the general ledger, subsidiary ledgers and registers of loans extended and loans paid.

A pawnshop that uses a computerized system may record its loan transactions in individual loan extended vouchers which shall contain the same information and/or equivalent controls necessary to comply with Section 11 of P.D. No. 114 in lieu of the loans extended and loans paid registers.

The Description of Loan Registers of Pawnshops provided in Item “b” of *Appendix P-6* shall be followed.

- a. *Uniform system of accounts.* Pawnshops shall strictly adopt/implement the Uniform System of Accounts prescribed for pawnshops in the recording of daily transactions including reportorial requirements.

The Uniform Chart of Accounts for Pawnshops is provided in Item “a” of *Appendix P-6*.

- b. *Philippine Financial Reporting Standards (PFRS)/Philippine Accounting Standards (PAS).* All records and reports of pawnshops shall conform to the PFRS/PAS.
- c. *Retention of records.* Pawnshop records, ledgers, books and documents (including those in electronic media):
 - (1) shall not be destroyed or disposed of for at least five (5) years;
 - (2) shall have backup hard and/or soft copy to allow reconstruction of records in case of loss or destruction due to fire and other fortuitous events; and
 - (3) shall be made available for Bangko Sentral examination upon request.

Reporting obligations to the Bangko Sentral. Pawnshop operators shall submit to the appropriate supervising department of the Bangko Sentral the reports listed in *Appendix P-7* in the forms as may be prescribed by the Deputy Governor of the appropriate sector of the Bangko Sentral.

Any change in, or amendment to, the articles of incorporation/co-partnership, by-laws or material documents required to be submitted to the Bangko Sentral shall be reported by submitting copies of the amended articles of incorporation, by-laws or material document to the appropriate supervising department of the Bangko Sentral within fifteen (15) days following such change.

- a. *Categories of and signatories to reports.* Reports required to be submitted to the Bangko Sentral are classified into *Categories A-1, A-2, A-3 and B* reports as indicated in the list of reports required to be submitted to the Bangko Sentral in *Appendix P-7*.

The pawnshop operator, or his/her duly designated representative, shall sign the reports required to be submitted to the Bangko Sentral: *Provided*, That in case of duly designated representatives, the pawnshop operator shall retain responsibility for the accuracy and timeliness of the report. Reports submitted in electronic media shall be subject to the same requirements or equivalent controls.

A report submitted to the Bangko Sentral under the signature of an officer who is not authorized in accordance with the requirements in this guidelines shall be considered as not being submitted.

- b. *Manner of filing.* The submission of the reports shall be effected through modalities acceptable to the Bangko Sentral.

Report on Crimes/Losses. Pawnshop operators shall submit a report on crimes and losses within five (5) working days from the date of the incident or discovery and in accordance with the guidelines in *Appendix P-8*.

Pawnshop operators shall hire, and/or engage the services of, external auditors, who will assist in the preparation, and/or render an opinion on the fairness, of the pawnshop’s financial statements. For holders of “B”, “C” and “D” pawnshop operator license issued by the Bangko Sentral they shall engage the services of an external auditor included in List of Selected External Auditors for BSFIs. In this respect, the provisions under Sec. 152-P shall be adopted.

(Circular Nos. 1040 dated 20 May 2019, 974 dated 29 September 2017, 961 dated 02 June 2017, M-2017-003 dated 27 January 2017, and Circular No. 938 dated 23 December 2016)

162-P AUDITED FINANCIAL STATEMENTS STATEMENTS AND ANNUAL REPORT

Pawnshop operators shall submit a copy of the AFS to the Bangko Sentral not later than 30 June following the reference calendar year.

(Circular Nos. 1144 dated 12 April 2022, 974 dated 29 September 2017, and M-2017-003 dated 27 January 2017)

H. SURRENDER/REVOCATION OF LICENSE

171-P SURRENDER OF PAWNSHOP OPERATOR LICENSE DUE TO CLOSURE OF BUSINESS

The surrender of pawnshop operator license may be effected only after the operator has complied with the requirements under Section 16 of P.D. No. 114 and the requirement in *Appendix P-3*.

(Circular Nos. 961 dated 02 June 2017 and 938 dated 23 December 2016)

172-P REVOCATION OF AUTHORITY TO OPERATE

In addition to Sec. 121-P (*Capital build-up program*), the Bangko Sentral may revoke an Authority to Operate if it is determined that:

- a. The operator, in case of pawnshops organized as sole proprietorship, no longer complies with the minimum criteria of a “fit and proper” person;
- b. The operator contravened any of the conditions of its authority;
- c. The operator has ceased to carry on pawnshop business operations;
- d. Chronic failure/refusal of the operator to address compliants from the customers/public;
- e. Failure to pay the annual supervision fees for the three (3) consecutive years; and/or
- f. Failure to submit required reports for three (3) consecutive years.

(Circular Nos. 961 dated 02 June 2017 and 938 dated 23 December 2016)

PART TWO

BORROWING OPERATIONS

201-P MAXIMUM BORROWINGS

The maximum borrowings of a pawnshop business, expressed as a percentage of total borrowings to pledge loans, shall not exceed fifty percent (50%): *Provided*, That borrowings shall not be from more than nineteen (19) creditors.

Borrowings for purposes of acquiring fixed assets used for business operations shall not be included in the abovementioned limit.

(Circular Nos. 961 dated 02 June 2017 and 938 dated 23 December 2016)

PART THREE

PAWNING OPERATIONS

A. GENERAL PROVISIONS ON LENDING OPERATIONS

301-P GRANT OF LOANS

The following regulations shall be observed in the grant of loans by pawnshops.

General guidelines. A pawnshop shall extend a loan only if such is secured by personal property that could be physically delivered to the control and possession of the pawnshop.

Before accepting articles as pawn, the pawnshop must ascertain whether the pawner is the true and absolute owner of the article offered as pawn. In the conduct of business, a pawnshop shall be guided by the standard of diligence that is expected of “a good father of a family”.

(Circular Nos. 961 dated 02 June 2017 and 938 dated 23 December 2016)

302-P LOAN LIMIT

Pawnshops may grant such amount of loans as may be agreed upon between the parties. The amount of loan shall in no case be less than thirty percent (30%) of the appraised value of the security offered, unless the pawner manifests in writing that he is applying for a lesser amount. Pawnshops shall not under-appraise the security offered for the loan to circumvent the restriction prescribed by this Section.

(Circular Nos. 961 dated 02 June 2017 and 938 dated 23 December 2016)

303-P INTEREST AND SURCHARGES

The rate of interest including surcharges on any loan or forbearance of money extended by a pawnshop shall be in accordance with market conditions. However, such interest rate should not be iniquitous, unconscionable, or contrary to morals, if not against the law as may be determined by the Court. These shall also be properly declared in accordance with the Truth in Lending Act.

No pawnshop shall collect interest on loans in advance for a period longer than the original term agreed upon as indicated in the pawn ticket.

In the absence of express contract as to such rate of interest, the rate of interest for the loan or forbearance of money or credit extended by a pawnshop shall be six percent (6%) per annum.

Other charges. In addition to interest, pawnshops may impose a maximum service charge of five pesos (P5.00), but in no case to exceed one percent (1%) of the principal loan. Other charges may be imposed provided these are fair and reasonable and are properly disclosed.

Dissemination of relevant information. Pawnshops shall ensure that all persons to whom credit is extended are well informed of the salient provisions of R.A. No. 3765, otherwise known as the “Truth in Lending Act” as contained in the revised format of disclosure statement in *Appendix P-12* through any acceptable medium of communication such as, but not limited to, posters, brochures, pamphlets, leaflets, educational videos, corporate websites, infographics and social media platforms. Said information must be conspicuously displayed and made available at all times, in physical or electronic format, to all persons to whom credit is extended by Pawnshops subject to the consumer protection standards and social media risk management guidelines. Such medium of communication shall include an explicit notification that the disclosure statement in writing is a required attachment to the credit transaction contract which Pawnshops shall provide all persons to whom credit is extended with a copy of said disclosure statement prior to the consummation of the credit transaction.

(Circular Nos. 1052 dated 2 October 2019, 961 dated 02 June 2017, and 938 dated 23 December 2016)

304-P PAST DUE ACCOUNTS; RENEWAL

A loan may be renewed for such amount and period as may be agreed upon between the pawnshop and the pawner, subject to the same conditions provided in this Part for new loans.

No loan shall be renewed or its maturity date extended unless a new pawn ticket as defined in Sec. 101-P (*Definition of terms*) shall be issued indicating the new term of the loan agreed upon by the pawnshop and the pawner.

Right of pawner to redeem pawn within ninety (90) days from maturity. A pawner who fails to pay or renew his loan with a pawnshop on the date it falls due shall have ninety (90) days from the date of maturity of the loan within which to redeem the pawn by paying the principal amount of the loan plus the amount of interest that shall have accrued thereon. The amount of interest due and payable after the maturity date of the loan shall be computed upon redemption based on the sum of the principal loan and interest earned as of the date of maturity.

In case of a pawned article that is subject to quick obsolescence, i.e., electronic gadgets, the pawner and the pawnee may agree on a shorter redemption period but the same shall not be less than thirty (30) days.

The following guidelines shall govern the redemption of pawns within ninety (90) days from maturity:

- a. On or before the expiration of the maturity date, a pawnshop shall notify a pawner in writing that the pawn shall be sold or otherwise disposed of in the event the pawner fails to redeem the pawn within the ninety (90)-day grace period, specifying in the same notification the date, hour and place where the sale shall take place.

The notice shall be sent through the mode of notification agreed upon by the pawner and the pawnshop as indicated at the back of the pawn ticket at the time the loan was granted which may be through text/SMS message, electronic mail, fax or by mail to the residential address. If sent through text/SMS, the pawnshop shall obtain a report from the appropriate Telecommunications Company (TELCO) indicating that a text/SMS message was sent to the mobile phone number given by the pawner. The report of the TELCO shall be made available to Bangko Sentral upon request. In case no specific mode of notification is agreed upon and indicated at the back of the pawn ticket, the mode of notification shall be by ordinary mail. Pawnshops shall exert reasonable effort to notify the pawner and put on record if it is unable to do so. Pawnshops shall maintain proof of the notice to pawner.

- b. If upon the expiration of the ninety (90)-day grace period, the pawner fails to redeem his pawn, the pawnshop may sell or dispose of the pawn: *Provided, however,* That the pawnshop has published a notice of public auction of unredeemed articles held as security for loans in at least two (2) newspapers circulated in the city or municipality where the pawnshop has its place of business and such publication was done at least six (6) days prior to the date set for the public auction.

The notice shall be in English, and in either Filipino or the local dialect and shall contain the following:

- (1) Name and address of the pawnshop; and
- (2) Date, hour and place of the auction sale.

In remote areas where newspapers are neither published nor circulated, the publication requirement shall be complied with by posting notices at the city hall or municipal building of the city or municipality and in two (2) other conspicuous public places where the pawnshop has its place of business.

(Circular Nos. 974 dated 22 August 2017, 961 dated 02 June 2017, M-2017-003 dated 27 January 2017, and Circular No. 938 dated 23 December 2016)

B. LOAN COLLATERAL/SECURITY

311-P ACCEPTABLE SECURITY AND SAFEKEEPING OF PAWNS

Only personal property that is capable of being physically delivered to the control and possession of the pawnshop shall be accepted as security for loans. Certain specified chattels, such as guns, knives, or similar weapons, whose reception in pawn is expressly prohibited by other laws, decrees, or regulations, shall not be accepted by pawnshops as security for loans.

The pawnshop shall be liable for any pawned item lost or destroyed arising out of their negligence, fault, delay in delivery or willful violation of the loan agreement.

Prohibitions. Pawnshop operators shall not:

- a. Use pawned articles for themselves or allow employees to use said articles for any purpose without the express consent or authority of the pawner unless continued use is necessary to preserve the pawn; or
- b. Re-pledge/re-pawn the pawner article.

(Circular Nos. 961 dated 02 June 2017 and 938 dated 23 December 2016)

312-P REDEMPTION OF PAWNS

A pawnshop shall not release any pawn without first requiring the pawner to present and surrender the corresponding pawn ticket. If the pawn ticket was lost and could not be presented or surrendered, the pawnshop shall require the owner-pawner to execute and submit an affidavit of loss and shall ascertain the identity of the pawner, to ensure that the pawned item is released only to the owner-pawner.

The pawnshop shall return the pawn in the same condition when they were first pawned by pawner, upon full settlement of the loan.

(Circular No. 961 dated 02 June 2017, M-2017-003 dated 27 January 2017, and Circular No. 938 dated 23 December 2016)

313-P PAWN TICKET

Pawnshops shall, at the time of the loan, deliver to each pawner a pawn ticket which shall contain the following:

- a. The business/registered name, address, telephone number, and tax identification number of the pawnshop. The business name indicated in the pawn ticket shall be in accordance with the provision of Sec. 105-P (*Registered/Business Name*);
- b. Name and address of the pawner;
- c. Date the loan was granted;
- d. Amount of the principal loan and net proceeds;
- e. Effective interest rate in percent, indicating if monthly or annually;
- f. Service charge in amount;
- g. Penalty interest in percent, if any;
- h. Appraised value of pawn;
- i. Maturity date;
- j. Description of the pawn; and
- k. Expiry date of the redemption period.

Aside from the memorandum book, or its equivalent, required under Section 11 of P.D. No. 114 and the pawn ticket, no other document or instrument shall be used/issued by a pawnshop for any loan granted by it to a pawner/borrower.

A pawn ticket shall be issued for each pawned article received from the pawner.

Stipulations in pawn ticket. The contents of the pawn ticket shall be in accordance to the requirements of Section 12 of P.D. 114, the standard format and terms and conditions of which are prescribed in *Appendix P-4*.

Pawnshops may incorporate additional stipulations/information in the pawn ticket (*Appendix P-4*) without prior approval of the Bangko Sentral.

(Circular Nos. 961 dated 02 June 2017, M-2017-003 dated 27 January 2017, and Circular Nos. 938 dated 23 December 2016)

C. PUBLIC AUCTIONS

321-P PUBLIC AUCTION OF PAWNS

No pawnshop shall sell or otherwise dispose of any article or thing received as security for a loan except by public auction at any of the following places:

- a. Pawnshop's place of business; or
- b. Any public place within the territorial limits of the municipality or city where the pawnshop conducts its business.

The auction shall be conducted under the control and direction of a duly licensed auctioneer. In cities and municipalities where there is no duly licensed auctioneer, the public auction may be conducted by a notary public of the city or province where the pawnshop has its place of business.

The Auction Sheet/Book containing entries of auctioned pawned articles duly signed by the auctioneer or notary public under oath shall be maintained by the pawnshop.

(Circular Nos. 961 dated 02 June 2017 and 938 dated 23 December 2016)

PART FOUR

REGULATIONS ON PAYMENT SYSTEMS

401-P NATIONAL RETAIL PAYMENT SYSTEM

Adoption of National Retail Payment System (NRPS) Framework. It is the policy of the Bangko Sentral to promote the establishment of a safe, efficient, and reliable retail payment system in the Philippines. Towards this end, the Bangko Sentral adopts the National Retail Payment System (NRPS) Framework consistent with Bangko Sentral regulations on risk management in light of the complex interplay of different types of risk arising from the rapid evolution of retail payment activities of Bangko Sentral supervised financial institutions (BSFIs). The NRPS vision will help achieve higher economic growth and enhance the overall competitiveness of our economy.

In carrying out retail payment-related activities, BSFIs shall adhere to the NRPS Framework as set forth in this Section and *Appendix P-9*. This framework requires BSFIs to ensure that the retail payment systems they participate in demonstrate sound risk management, and effective and efficient interoperability. BSFIs shall comply with Bangko Sentral rules and regulations, particularly on information technology, consumer protection, and anti-money laundering/combating the financing of terrorism (AML/CFT).

Definition of terms.

- a. *Automated Clearing House (ACH)* – a multilateral agreement among ACH participants governing the clearing and settlement of payment orders for a specific payment stream.
- b. *ACH Participant* – a financial institution duly licensed by the Bangko Sentral that is a PSMB member, and undertakes clearing in and is a signatory to at least one (1) ACH.
- c. *ACH Participant Group (ACH-PG)* – a group organized by ACH participants for a payment stream or a group of similar payment streams for the purpose of approving and implementing the clearing rules and agreements applicable to a specific payment stream. It also liaises and consults with other parties in relation to clearing.
- d. *Channel* – the means by which an electronic financial product or service is delivered, e.g., internet, phone, ATM.
- e. *Clearing* – the process of transmitting, reconciling and, in some cases, confirming payment orders prior to settlement, and the establishment of the final obligations for settlement.
- f. *Clearing Switch Operator (CSO)* – provides clearing switch services.
- g. *Direct clearing participant* – a financial institution that is: (a) duly licensed by the Bangko Sentral and is authorized to provide electronic financial and payment services; (b) engaged in holding of funds of customers in the form of accounts (bank account or electronic money account); (c) clears transactions through an ACH and is the participant ultimately responsible for obligations generated from cleared transactions; and (d) has a demand deposit account with the Bangko Sentral and a PhilPaSS member, or is sponsored into settlement by a qualified sponsor which is a member of PhilPaSS and maintains a DDA with the Bangko Sentral, to settle its clearing obligations.
- h. *Electronic payment* – synonymous to electronic fund transfer (EFT); refers to transfers of funds between two transaction accounts in the same or different BSFIs which are initiated and received using electronic devices and channels to transmit payment instructions. This excludes domestic remittance transaction under existing Bangko Sentral regulations.
- i. *Fund* – any unit of value that forms the consideration or object of transactions.
- j. *Interoperability* – enables financial products and services belonging to a particular scheme or business model to be used or interoperated between other schemes or business models usually of another institution. While interoperability often times require technical compatibility between systems, it can only take effect once commercial/business interconnectivity agreements have been completed.
- k. *National Retail Payment System (NRPS)* – a policy and regulatory framework that aims to establish a safe, efficient, and reliable retail payment system in the Philippines.
- l. *Payment instrument* – any instrument, whether tangible or intangible, that enables a person to transfer funds.
- m. *Payment order* – an order or message requesting the transfer of funds to the order of the payee.
- n. *Payment system* – the set of payment instruments, processes, procedures and participants that ensures the circulation of money or movement/transfer of funds.

- o. *Payment System Management Body (PSMB)* – a private industry-led self-governing body that is duly recognized by the Bangko Sentral to develop and enforce rules and agreements pertaining to members' clearing and settlement activities in accordance with the NRPS Framework and applicable Bangko Sentral regulations. The body shall be comprised of retail payment industry participants which are direct clearing participants. This body shall be a juridical entity that is not-for-profit and with the power to set and implement rules pertaining to members' clearing activities.
- p. *Point of Interaction (POI)* – a hardware and/or software whereby a customer or user is able to query or initiate a transaction from his account. Examples of POI include kiosk, smart device, etc.
- q. *Retail payments* – payments that meet at least one of the following characteristics: (i) the payment is not directly related to a financial market transaction; (ii) the settlement is not time-critical; (iii) the payer, the payee, or both are individuals or non-financial organizations; and (iv) either the payer, the payee, or both are not direct participants in the payment system that is processing the payment. This definition of retail payment includes person-to-person, person-to-business, business-to-person, business-to-business, person/business-to-government, and government-to-person/ business payments.¹
- r. *Settlement* – an act that discharges obligations in respect of fund transfers between two (2) or more parties.
- s. *Sponsored into Settlement Member* – PSMB members who undertake settlement in at least one (1) ACH by engaging the settlement services of an ACH participant that can directly settle transactions through PhilPaSS.
- t. *Settlement sponsor bank or Sponsoring bank* – PSMB members who undertake settlement directly through PhilPaSS.
- u. *Working Group* – In the context of an ACH, it is a group organized for a specific payment stream under an ACH Participant Group. The ACH Working Group is responsible for drawing up, reviewing or revising the rules and agreements applicable to a specific ACH.

Purpose and scope. The NRPS Framework shall apply to all BSFIs which meet regulatory requirements and the criteria set on a per Automated Clearing House (ACH) basis under the NRPS framework.

The NRPS framework covers all retail payment-related activities, mechanisms, institutions and users. It applies to all domestic payments which are denominated in Philippine Peso (Php), and which may be for payments of goods and services, domestic remittances or fund transfers.

Retail payments under the NRPS Framework are payments that meet at least one of the following characteristics:

- a. the payment is not directly related to a financial market transaction;
- b. the settlement is not time-critical;
- c. the payer, the payee, or both are individuals or non-financial organizations; and
- d. either the payer, the payee, or both are not direct participants in the payment system that is processing the payment.

NRPS key principles. Under the NRPS framework, sound governance shall be performed by a payment system management body (PSMB), an industry-led self-governing body that is duly recognized and overseen by the Bangko Sentral. In the absence of a PSMB which conforms to the NRPS principles in *Appendix P-9*, the functions of providing sound governance to the retail payment system participated in by BSFIs shall be discharged by the Bangko Sentral. Clearing switch operators shall not participate in the governance of the payment system.

All clearing shall be done within the NRPS governance structure, wherein exclusive bilateral clearing arrangements are not allowed.

Non-discriminatory participation shall be espoused in the retail payment system. Hence, all BSFIs are highly encouraged to join the NRPS governance structure provided they meet the qualification criteria.

A reasonable market-based and transparent pricing mechanism shall be adopted by all BSFIs participating in the NRPS governance structure.

Further details on the key principles are embodied in the NRPS Framework shown in *Appendix P-9*.

¹ Developing a comprehensive National Retail Payments Strategy, Financial Infrastructure Service line Payment Systems Policy and Research, World Bank, October 2012, available at http://siteresources.worldbank.org/FINANCIALSECTOR/Resources/Developing_a_comprehensive_national_retail_payments_strategy_for_GPW_10_20%28v1%29.pdf.

Specific rules applicable to transactions performed under the NRPS framework. The following rules shall apply to retail payment transactions which are cleared and settled in accordance with the NRPS Framework:

- a. Minimum requirements to offer Electronic Payment and Financial Services (EPFS). EPFS shall require notification to or approval by the Bangko Sentral in accordance with Sec. 114-P. To offer EPFS, BSFIs shall conform to the following requirements:
 - (1) BSFIs shall make electronic payments available in all its delivery channels whenever applicable;
 - (2) BSFIs shall enable its clients to move/receive funds to/from accounts with other BSFIs, or, at a minimum, receive funds. Movement of funds between BSFIs shall be carried out through participation in an ACH;
 - (3) BSFIs shall immediately credit the account of its clients after receipt of clearing advice; and
 - (4) BSFIs shall conform to Sec. 114-P the IT Risk Management Standards and Guidelines on electronic banking, electronic payment, electronic money and other electronic products and services provided in *Appendix Q-66*.
- b. Fees on transactions. The BSFI's board of directors shall adopt a policy on the imposition of any fee on electronic payment transactions. The policy shall include the basis and quantitative support for the setting of fees and rationalization of the fee structure or amount. Imposition of fees for transactions performed by BSFIs that meet the requirements in Item "a" of this Section shall be consistent with the following:
 - (1) On consumer pricing-
 - (a) BSFIs shall adopt reasonable and fair market-based pricing models, which do not arise from agreements with other BSFIs to fix the price of product or service delivery.
 - (b) The service fees for electronic payments are expected to be lower than the fees collected from transactions made manually or over-the-counter (OTC) as electronic payments are considered to provide more efficient and cost-effective means of delivering service.
 - (c) The recipient shall not pay for electronic crediting to recipient's account and the recipient shall receive the amount in full. Such account to account fund transfers shall not be considered as domestic remittance transactions under Sec. 251-Q.
 - (2) The BSFI shall disclose to the Bangko Sentral the details of all fees that will be charged to the client. This will be posted in an electronic bulletin board of fees for transactions performed under the NRPS framework. The bulletin board shall be maintained by the Bangko Sentral in its website for enhanced transparency and competitiveness.
- c. Anti-Money Laundering Requirements. All BSFIs shall observe applicable AML/CFT requirements under Part Five of P Regulations for all transactions performed under the NRPS framework. As part of on-going monitoring of customers and their transactions, the following rules shall apply to transactions performed under the NRPS framework by BSFIs that meet the requirements in Item "a" of this Section:
 - (1) The *originating institution (OI)* shall be responsible for monitoring, including appropriate watchlist screening or monitoring, its own client's transactions. It is the responsibility of the OI to ensure that the account name of the source account and the amount are consistent with the Sender Name and the amount indicated in the Payment Instruction sent by the OI.
 - (2) The *receiving institution (RI)* shall be responsible for monitoring, including appropriate watchlist screening or monitoring, its own client's transactions. It is the responsibility of the RI to ensure that the actual account number credited and the amount are consistent with the Beneficiary Account Number and the amount indicated in the Payment Instruction received by the RI.
 - (3) On the basis of the above, account number matching will suffice for domestic account-to-account electronic payments. OIs and RIs shall ensure that customers are informed that account number matching will suffice to implement a transaction, and OIs and RIs shall be held free and harmless from liability for their reliance on account number matching.
- d. BSFIs participating in the NRPS governance structure are required to comply with existing regulations of the Bangko Sentral.

Reports. BSFIs participating in the NRPS governance structure shall comply with requirements, which will be covered by a separate issuance.

Examination of BSFIs. BSFIs shall make available all policies, procedures and other documents/information related to this Section during the on-site examination, as well as provide copies thereof when a written request is made by the Bangko Sentral.

Sanctions. Consistent with Sec. 002-P, the Bangko Sentral may deploy enforcement actions to promote adherence to the requirements set forth in this Section and bring about timely corrective actions. The Bangko Sentral may issue directives to enforce compliance with the NRPS Framework or impose sanctions to limit the level of or suspend any business activity that has adverse effects on the safety and soundness of the BSFI, among others.

Any violation of this Section shall subject the BSFI and/or its directors, officers and/or employees to the monetary and non-monetary sanctions under Section 37 of Republic Act (R.A.) No. 7653, including but not limited to the following depending on the gravity of the violation committed and the circumstances attendant thereto:

- a. Suspension of offering new electronic financial products and services;
- b. Suspension/revocation of authority to provide electronic financial products and services; and
- c. Suspension/revocation of authority to settle through the Philippine Payments and Settlements System.

(Circular Nos. 1033 dated 22 February 2019, 1022 dated 26 November 2018, and 980 dated 6 November 2017)

402-P SETTLEMENT OF INSTANT RETAIL PAYMENTS

Policy Statement. It is the thrust of the Bangko Sentral to ensure efficiency of payment systems in the country. In line with this thrust, the Bangko Sentral requires BSP-Supervised Financial Institutions (BSFIs) participating in an automated clearing house (ACH) for instant retail payments to ensure that this ACH provides for certainty of settlement of the multilateral clearing obligations of the clearing participants. The settlement scheme agreed upon by the clearing participants shall form an integral part of the comprehensive credit risk management for instant retail payment services.

For the purpose of this Section, an instant retail payment, otherwise known as fast payment, is defined as an electronic payment in which the transmission of the payment message and the availability of “final” funds to the payee occur in real time or near-real time on as near to a 24-hour and seven-day (24/7) basis as possible¹. Moreover, as used in this Section, clearing participants shall refer to direct clearing participants.

Minimum requirements for the operation of a settlement mechanism for instant retail payments. The settlement mechanism for instant payments shall meet the following minimum requirements:

- a. A clearing participant or its settlement sponsor shall maintain with the Bangko Sentral a demand deposit account (DDA) which shall be used specifically for the settlement of the clearing participant’s net clearing obligations arising from instant retail payments;
- b. The clearing participant or its settlement sponsor shall prefund the settlement of its net clearing obligation through the DDA stated above, ensuring that such account can sufficiently cover said obligation at any point during a settlement cycle. When prefunding, the clearing participant/settlement sponsor shall consider increasing the fund in its account for longer settlement cycles such as during weekends and holidays;
- c. The clearing participants shall agree on thresholds which shall be the bases of the Clearing Switch Operator (CSO) to execute a notification process that enables the clearing participants to efficiently monitor movements in their instant retail payment positions, and at the same time alerts them to place additional funds in their DDAs particularly when the ultimate threshold is breached;
- d. The service contract between the clearing participants and the CSO shall include, at a minimum, the following provisions:
 - (1) The CSO shall record the clearing participants’ DDA balances obtained from the Bangko Sentral at the start of every settlement cycle and monitor the clearing participants’ net clearing obligations against their respective account balances;
 - (2) Should the instant retail payments position (Funds in the DDA minus net clearing obligation/withdrawal from the DDA) of any of the clearing participants breach their agreed-upon thresholds, the CSO shall immediately send an electronic notification to the concerned clearing participant; and
 - (3) Any instant retail payment which is not fully covered by the corresponding DDA or which will result in a negative instant retail payments position shall be rejected by the CSO. A clearing participant with an instant retail payments position of zero shall be suspended from carrying out further outgoing instant payment transactions until said participant registers a positive position on account of its incoming payment transactions and/or subsequent deposits into its DDA;
- e. Should the clearing participants determine that the funds in their DDAs for instant retail payments are excessive after taking into account their highest potential clearing obligations, the clearing participants shall be allowed to withdraw from their DDAs to enable them to make optimal use of their funds; and

¹ Based on the paper “Fast payments – Enhancing the speed and availability of retail payments” of the Committee on Payments and Market Infrastructures, Bank for International Settlements

- f. The Bangko Sentral shall not be precluded from deploying applicable regulatory enforcement actions to concerned clearing participants notwithstanding the inclusion of sanctions in the ACH for non-compliance with the clearing participants' agreed-upon settlement mechanism.

Risk management. In view of the risks involved in the prescribed settlement mechanism for instant retail payments, including the possibility that a rejected payment transaction of a client due to prefunding issues may give rise to serious reputational damages to the concerned clearing participant, the BSFIs participating in the instant retail payment ACH shall ensure that they have the necessary operational and liquidity risk management measures in place. Such measures shall be designed in accordance with the guidelines provided under Sec. 146-Q on Operational Risk Management, and Sec. 145-Q on Liquidity Risk Management.

Demand deposits for instant payments as eligible reserves. The DDAs maintained with the Bangko Sentral for the settlement of net clearing obligations arising from instant retail payment transactions shall form part of the banks'/QBs' reserves against deposit and deposit substitute liabilities pursuant to Sec. 212-Q.

Supervisory enforcement action. Consistent with Sec. 002-P, the Bangko Sentral may deploy enforcement actions to promote compliance with the requirements set forth in this Section and ensure timely implementation of preventive or corrective measures as needed. As part of its enforcement actions, the Bangko Sentral may issue directives or impose sanctions which limit the level of or suspend any business activity that adversely affects the safety and soundness of a BSFI.

(Circular No. 1000 dated 23 April 2018)

403-P PARTICIPATION IN AUTOMATED CLEARING HOUSES (ACHs)

BSFIs that have been licensed to offer funds transfer services shall make these services interoperable by participating in an ACH. Prior to its participation, a BSFI shall observe the following guidelines:

- a. Secure a Confirmation of Eligibility (COE) by submitting to the Bangko Sentral through the appropriate supervising department of the Bangko Sentral a letter of intent to participate in an identified ACH. This letter shall be accompanied by a certification (*Annex A of Appendix Q-89*) signed by the president (or any officer of equivalent rank and function) and chief compliance officer (CCO).

If the BSFI is not yet a member of the Payment System Management Body (PSMB), it shall also indicate in its letter that it intends to become a member of this body;

- b. Submit the following minimum documentary requirements to the PSMB duly recognized by the Bangko Sentral.
- (1) Valid COE. A COE shall be valid for a period of six (6) months from date of issuance;
 - (2) Corporate Secretary's Certificate (or equivalent document in the case of foreign bank branches) on the approval of the board of directors (or equivalent management committee in the case of foreign bank branches) of the participation of the BSFI in the ACH; and
 - (3) Copy of the agreement with the bank sponsoring the BSFI into settlement, if applicable; and
- c. Comply with any other requirements set by the PSMB or provided in the ACH.

(Circular No. 1033 dated 22 February 2019)

PART FIVE

ANTI-MONEY LAUNDERING REGULATIONS

501-P ANTI-MONEY LAUNDERING REGULATIONS

Pawnshops, including their subsidiaries and affiliates, if any, shall comply with the provisions of Part 8 of Q-Regulations, R.A. No. 9160 (Anti-Money Laundering Act of 2001), as amended, and its Revised Implementing Rules and Regulations (RIRRs).

(Circular Nos. 1039 dated 3 May 2019, 961 dated 02 June 2017, and 938 dated 23 December 2016)

PART SIX

BANGKO SENTRAL REGULATIONS ON FINANCIAL CONSUMER PROTECTION

601-P BANGKO SENTRAL REGULATIONS ON FINANCIAL CONSUMER PROTECTION¹

Pawnshops shall adopt a system for promptly addressing the complaints of their customers.

The Financial Consumer Protection Framework of the Bangko Sentral as stated under Part Ten of this Manual on Q-Regulations shall be adopted insofar as these are applicable to pawnshop operations.

Consistent with Sec. 002-Q, the Bangko Sentral may deploy enforcement action to promote adherence to the Bangko Sentral Regulations on Financial Consumer Protection.

(Circular Nos. 1143 dated 12 April 2022, 1048 dated 06 September 2019, 961 dated 02 June 2017, 938 dated 23 December 2016, 890 dated 02 November 2015, and 857 dated 21 November 2014)

602-P CONSUMER PROTECTION STANDARDS

Pawnshops shall post conspicuously at the pawnshop's premises an abstract containing the following:

Interest rates. The annual effective interest rate in percent, specifying therein if such interest rate is yearly or monthly, as well as other charges, if any, to be paid by the pawner.

Ninety (90)-day grace period. A pawner has ninety (90) days from maturity date to redeem the pawn by paying the principal and interest.

Insurance. The pawnshop's policy regarding the insurance of pawned items.

(Circular Nos. 961 dated 02 June 2017, 938 dated 23 December 2016, and 857 dated 21 November 2014)

¹ BSFIs shall be given six (6) months from 26 September 2019 to: (1) perform a gap analysis of their current consumer protection practices vis-i-vis this Section and (2) propose an action plan duly approved by the Board of Directors to achieve full compliance within a reasonable period of time but in no case longer than one (1) year from 26 September 2019.

PART SEVEN

MISCELLANEOUS

701-P GENERAL PROVISION ON SANCTIONS

Any violation of the provisions of these regulations shall be subject to the administrative penalties under Section 37 of R.A. No. 7653, as implemented by Sec. 002-P or the Bangko Sentral Supervisory Enforcement Policy, in relation to Section 17 of P.D. No. 114. Any administrative sanctions imposed by the Bangko Sentral shall be without prejudice to the imposition of penalties under Section 18 of P.D. No. 114 and other applicable laws against the pawnshop, its proprietor, partners, directors, stockholders, president, officers and/or employees.

(Circular Nos. 961 dated 02 June 2017 and 938 dated 23 December 2016)

702-P ANNUAL SUPERVISION FEES

The annual supervision fess (ASF) of five hundred pesos (P500.00) per pawnshop office shall be paid by pawnshops not later than 31 March of every year.

Beginning year 2017, the total amount of ASF due from a pawnshop operator shall be based on the number of pawnshop offices as at the end of December of the immediately preceding year.

For purposes of this Section, the Bangko Sentral shall issue the guidelines in the collection of the annual supervision fees.

(Circular Nos. 961 dated 02 June 2017 and 938 dated 23 December 2016)

703-P PHILIPPINE AND FOREIGN CURRENCY NOTES AND COINS

The rules and regulations that shall govern the treatment and disposition of counterfeit Philippine and foreign currency notes and coins, the reproduction and/or use of facsimiles of legal tender Philippine currency notes and coins, the replacement and redemption of legal tender Philippine currency notes and coins considered mutilated or unfit for circulation, and the treatment and disposition of Philippine currency notes and coins called in for replacement are provided in Sec. 1111-Q.

(Circular Nos. 961 dated 02 June 2017, 938 dated 23 December 2016, 890 dated 02 November 2015 and 829 dated 13 March 2014)

LIST OF APPENDICES

FOR AN AUTHORITY TO OPERATE A PAWNSHOP BUSINESS
(Appendix to Sec. 103-P)**

The notarized Application for an Authority to Operate a new pawnshop business shall be accompanied by the following documents:

1. Notarized Deed of Undertaking (*Appendix P-1-a*);
2. Compliance with fitness and propriety requirements by the proprietor, partners, directors, president or officer of equivalent rank and function, and over-all head of the pawnshop operation and the head of the compliance unit, as the case maybe. For this purpose, applicants shall be required to submit the following:
 - a. Personal Data and Authorization Form (*Appendix P-1-b*);
 - b. NBI Clearance, or its equivalent, if issued in foreign jurisdictions; and
 - c. Proof of attendance to the mandatory training on anti-money laundering/ combating the financing of terrorism;
3. Business license/permit for the current period¹; and
4. Proof of provisional registration with the Anti-Money Laundering Council Secretariat.

(Circular Nos. 1039 dated 3 May 2019 and 938 dated 23 December 2016)

¹ The entity name, business address and activity(ies) indicated therein should be consistent with the business registration with the DTI/SEC, as applicable. The details in said business permit shall be used as basis in the issuance of Certificate of Authority.

REPUBLIC OF THE PHILIPPINES)
 _____ CITY) S.S.

DEED OF UNDERTAKING

I/We (the Proprietor/Partners/Members of the Board of Directors) and key executive officers of (Name of Institution), a legal entity duly authorized to operate under the laws of the Philippines, with principal place of business at _____, by these presents do hereby obligate ourselves, individually and collectively, to undertake and ensure:

1. Strict compliance with all the requirements, rules and regulations of the Bangko Sentral regarding the licensing and operations of pawnshop business as provided under Presidential Decree (P.D.) No. 114, Manual of Regulations for Non-Bank Financial Institutions (MORNBFi) – Pawnshop (P) Regulations and other applicable laws, rules and regulations;
2. Full compliance with the minimum capitalization and borrowing limits as prescribed under Secs. 121-P and 201-P of the MORNBFi;
3. Adequate compliance with the provisions of Republic Act (R.A.) No. 9160, as amended [The Anti-Money Laundering (AML) Act of 2001], R.A. 10168 (The Terrorism Financing Prevention and Suppression Act of 2012) and their implementing rules and regulations particularly in conducting customer due diligence procedures, covered and suspicious transaction reporting, and record keeping and retention;
4. Exclusive use of bank account/s in the name of the licensed entity/pawnshop in its official business transactions and to provide a certified list of all bank account/s supported by confirmation from depository bank/s which shall be subject to Bangko Sentral examination for AML/combating the financing of terrorism (CFT) purposes;
5. Compliance with the disclosure requirement on the entity/pawnshop beneficial owner/s;
6. Full responsibility over its offices'/branches' compliance with all the requirements, rules and regulations of the Bangko Sentral on matters relating to license, registration and notification requirements;
7. Submission of all documentary requirements and securing approval from the appropriate supervising department the Bangko Sentral before effecting the following: (a) transfer of ownership; (b) change of registered business name; and (c) surrender of pawnshop operator license due to closure of business;
8. Notification to the appropriate supervising department of the Bangko Sentral within the prescribed deadline of the following events: (a) commencement of pawnshop operations; (b) newly-established pawnshop office; (c) transfer/relocation of business; and (d) voluntary closure of pawnshop office;
9. Strict compliance with the requirements of maintenance of records and submission of required reports;
10. Maintenance of an internal control system commensurate to the nature, size and complexity of the business, and development of sound risk management policies and practices to ensure that risks associated with the operations of a pawnshop business are identified, assessed, monitored, mitigated and controlled;
11. Adoption of minimum standards of consumer protection in the areas of disclosure and transparency, protection of client information, fair treatment, effective recourse and financial education pursuant to Secs. 601-P, 602-P and 144-P (*Compliance with relevant regulations*) of the MORNBFi, as may be applicable;
12. Hiring, and/or engaging the services of external auditors/auditing firm, who will assist in the preparation, and/or rendering an opinion on the fairness of the pawnshop's financial statements, and that the external auditors/audit firm contracted are included in the Bangko Sentral List of Selected External Auditors for Supervised and/or Regulated Institutions, as may be applicable based on the type of pawnshop license granted;
13. Attendance of the proprietor, partners, directors, president or officer of equivalent rank and function and head of the pawnshop operation and the compliance unit to a seminar on AML/CFT laws, rules and regulations, before start of operations, conducted by the Bangko Sentral, AML Council Secretariat or any reputable training provider.

For this purpose, (Name of Institution), shall be responsible in ascertaining whether the external training provider has an adequate track record of successfully conducting training programs preferably on financial institution-oriented courses including, but not limited to, AML/CFT training;

14. Timely renewal of the business permits of all of its offices, which indicate the line of business, from the city or municipality having territorial jurisdiction over the place of establishment and operation of the respective offices; and
15. Responsibility over violations of any of the aforementioned laws, rules and regulations, subject to the applicable sanctions prescribed under Sections 36 and 37 of R.A. No. 7653, as amended, in relation to Section 17 of P.D. No. 114.

**DOCUMENTARY REQUIREMENTS FOR TRANSFER OF OWNERSHIP OF A
PAWNSHOP BUSINESS OPERATED BY A SOLE PROPRIETOR
(Appendix to Sec. 122-P on Transfer of Ownership)**

The transferor pawnshop operator shall file the following documents with the appropriate supervising department of the Bangko Sentral at least ten (10) working days before transferring the ownership of the pawnshop business:

- a. Notarized statement by proprietor stating that:
 - (1) The pawnshop's books of accounts, records and documents shall be preserved for five (5) years from the date of last entries before the transfer of ownership.
 - (2) All unused accountable forms such as official receipts and pawn tickets have been destroyed to prevent their unauthorized use.
 - (3) The transferor pawnshop operator shall be liable for all claims arising from transactions of the pawnshop prior to the effective date of transfer, unless the transferee pawnshop operator assumes such liability, in which case, such transferee pawnshop operator shall submit a notarized statement to that effect.
 - (4) All outstanding pawns have been redeemed or sold at public auction, or otherwise disposed of in accordance with law; or the owners of outstanding pawns have been notified by registered mail on the transfer of ownership of the pawnshop.
- b. Original Bangko Sentral Authority to Operate issued to the transferor pawnshop operator, or an affidavit in case of loss.
- c. Payment of Bangko Sentral assessment on the pawnshop, if any, such as for non-submission or delayed submission of required reports and/or annual supervisory fees.

If the transferee shall continue the operation of the pawnshop, he shall comply with the provisions of Sec. 102-P (Form of organization) of these regulations. The transferee shall also submit a copy of the duly executed contract effecting the transfer of ownership.

(Circular No. 938 dated 23 December 2016)

**DOCUMENTARY REQUIREMENTS FOR THE SURRENDER OF
PAWNSHOP OPERATOR LICENSE**
(Appendix to Sec. 172-P on Surrender of Pawnshop Operator License Due to Closure of Business)

The following requirements must be submitted to the appropriate supervising department of the Bangko Sentral for the surrender of the pawnshop operator license at least thirty (30) calendar days prior to the intended closure of business:

- a. Notarized statement stating that:
 - (1) The pawnshop's books of accounts, reports, records and documents shall be preserved for at least five (5) years from date of last entry;
 - (2) All unused accountable forms have been destroyed to prevent their unauthorized use;
 - (3) Pawnshop operator shall be held liable for present or future claims arising from its pawnbroking transactions; and
 - (4) All outstanding pawns have been redeemed/sold at public auction, or otherwise disposed of, in accordance with law.
- b. Original Bangko Sentral Authority to Operate issued to the pawnshop operator; and
- c. The metal plate/s issued by the Bangko Sentral to the pawnshop.

Remittance of penalties or Bangko Sentral assessments on the pawnshop, if any, such as for non-submission/delayed submission of required reports.

(Circular No. 938 dated 23 December 2016)

STANDARD PAWN TICKET FORMAT

Date Loan Granted:		Per annum <input type="checkbox"/> Per Month <input type="checkbox"/> (Others) <input type="checkbox"/>	
Maturity Date:			
Expiry Date of Redemption:		Penalty Interest, if any:	
Description of the Pawn:			

B. Back of pawn ticket:

TERMS AND CONDITIONS OF STANDARD PAWN TICKET

1. The pawner hereby accepts the pawnshop's appraisal as proper.
2. The pawnshop hereby agrees not to collect advance interest for a period of more than one (1) year.
3. This loan is renewable for such amount and period as may be agreed upon between the pawnshop and the pawner subject to the same requirements for a new loan.
4. Upon maturity of this loan, as indicated above, the pawner still has ninety (90) days from maturity date within which to redeem the pawn by paying the principal loan plus the interest that shall have accrued thereon.
5. The amount of interest due and payable after the maturity date of the loan up to the redemption period shall be computed upon redemption at the rate of interest provided above based on the sum of the principal loan and interest earned as of the date of maturity. Any additional penalty and/or interest shall also be computed in the same manner.
6. The pawnshop shall notify the pawner of any change in its business address/location.
7. The pawner shall advise the pawnshop of any change of address/contact number/e-mail address.
8. The pawnshop shall send a reminder to the pawner in the preferred mode of notification given above, or at the new address/mobile phone number or e-mail address, if such was provided by the pawner on or before the maturity date. The pawnshop shall have the right to sell dispose of the pawn if the pawner fails to redeem it within the ninety (90)-day grace period.
9. This ticket shall be surrendered at maturity date upon payment of the loan. In case of loss or destruction of this ticket, the pawner hereby undertakes to personally present an affidavit to the pawnshop before the redemption period expires. The pawnshop has two (2) days to decide whether to accept (1) the affidavit in place of the original pawn ticket; or (2) to issue a substitute pawn ticket, thereby cancelling the original.
10. The pawner shall not assign, sell or in any other way alienate the pawn securing this loan without prior written consent of the pawnshop. If the pawnshop agrees, the terms and conditions of this contract remain enforceable.

11. In case of pre-payment of this loan by pawnor, the interest collected in advance shall accrue in full to the pawnshop.
12. The pawnor shall not be entitled to the excess of the public auction sale price over the amount of principal, interest and service fee; neither shall the pawnshop be entitled to recover the deficiency from the pawnor.

GUIDELINES ON GRANTING OF A LICENSE/AUTHORITY
(Appendix to Sec. 111-P on Licensing)

I. Guiding principle

The Bangko Sentral, the licensing authority, has the power to set criteria and reject applications that do not comply with the criteria/standards set. In this light, the Bangko Sentral is providing the following guidelines on its licensing process to establish accountability and promote transparency to banks and BSFIs wishing to apply for any licenses/authorities within the jurisdiction of the Bangko Sentral. These guidelines also aim to provide more consistency in how risk-focused supervision is applied to licensing process.

The Bangko Sentral will not restrict the scope of risk-taking activities of BSFIs consequent of the licenses and/or authorities granted: *Provided*, That these licenses and/ or authorities are in line with their business model and strategic direction: *Provided, further*, That BSFIs demonstrate the capacity and ability to implement these strategies.

As indicated in the new licensing policy, applications for licenses and/or authorities are categorized as follows:

- a. *Type "A"* – applications for licenses and/or authorities where compliance with the defined prudential requirements/criteria described in Sec. 111-P (*Prudential criteria*) is a pre- condition for applicants to be considered eligible;
- b. *Type "B"* – applications for licenses and/or authorities processed regardless of risk profile; and
- c. *Type "C"* - activities which no longer require submission of applications and processing but shall be subject to submission of reports/certification/notification within stated deadlines. However, compliance with pre-qualification requirements is subject to post verification and any false information and/or misrepresentation may be a basis for the imposition of appropriate enforcement actions described in Sec. 111-P (*Enforcement actions*).

II. Guidelines and procedures

1. *Process flow*. The licensing application process involves four (4) stages, to wit:

- a. *Stage 1. Eligibility test and assessment*. The Bangko Sentral shall consider an applicant's eligibility for licenses/authorities categorized as *Type "A"* in accordance with the standards and/or prudential criteria described in Sec. 111-P (*Prudential criteria*); and whether approval thereof is consistent with applicable laws, rules, regulations, policies and safety and soundness considerations.

In this regard, BSFIs shall signify to the appropriate supervising department of the Bangko Sentral its interest to apply for a license(s) or authority/ies. However, the Bangko Sentral expects each BSFI to have conducted self-assessment vis-à-vis prudential criteria and/or requirements to determine whether it is eligible and/or qualified to apply for any specific license/authority, prior to signifying its interest.

BSFIs with CAMELS composite rating of below "3", or under PCA or rehabilitation may still be considered eligible, on a case by case basis, upon showing valid justifications and/or verifiable evidence of significant compliance with the comprehensive PCA plan (PCAP)/rehabilitation plan approved by the Bangko Sentral and/or if licenses and/or authorities applied for are vital to the implementation of the PCAP/rehabilitation plan.

- b. *Stage 2. Application*. The BSFI upon receipt of notice and/or confirmation from the Bangko Sentral of its eligibility can now formally submit its application letter together with the documentary requirements, as applicable to the license/authority applied for. Applications with incomplete documentation will be returned without prejudice to re-submission of a complete application and collection of applicable fees.
- c. *Stage 3. Processing*. Upon receipt of a complete application, the appropriate supervising department of the Bangko Sentral shall proceed in preparing the memorandum elevating to the appropriate approving authority of the Bangko Sentral its recommended action/s.
- d. *Stage 4. Decision*. Within five (5) working days upon approval and/or confirmation from the appropriate authority of the Bangko Sentral, BSFIs shall expect to be notified of the decision on their request / application.

The Bangko Sentral may request information and/or documents aside from the minimum documentary requirements for each type of license/authority to arrive at an informed decision. It may also conduct limited inspection or validation, when warranted.

The Bangko Sentral may approve any application of an eligible applicant after evaluating the application and considering relevant factors. Likewise, the Bangko Sentral may deny applications if (a) significant supervisory or compliance concerns exist or (b) the applicants fail to provide material information necessary to make an informed decision.

2. *Responsibility*

The Bangko Sentral expects each applicant to prepare accurately and completely each application/certification/reports submitted to the appropriate supervising department of the Bangko Sentral.

By virtue of the application, the applicant authorizes the Bangko Sentral to conduct an on-site evaluation or inspection for the purpose of ascertaining compliance with relevant laws, rules, regulations and/or directives, and/or applicant's risk management capabilities, when warranted.

For this purpose, the applicant shall include in its application letter the authorization in favor of the Bangko Sentral giving its consent to the conduct of on-site verification of the documents and/or representations stated in the application filed in connection with the license or authority applied for.

3. *Fees*

An applicant, depending on its classification and type of license/authority applied for, shall be assessed the following fees per application:

- a. *Processing fee* - shall be charged upon filing of an application and is non-refundable. In case of re-submission of application that is returned for incomplete documentation, another processing fee shall be charged anew; and
- b. *Licensing fee* - shall be charged to certain application upon approval. The licensing fee shall be net of the processing fee.

For banks, assessed fees shall be debited from the applicants' demand deposit account with the Bangko Sentral upon the lapse of fifteen (15) calendar days reckoned from receipt of Bangko Sentral's decision on its request/application. For this purpose, banks shall, upon filing of an application, state in its application letter the authority to debit their demand deposit account with the Bangko Sentral for the applicable fees to the license or authority applied for. Otherwise, assessed fees shall be paid to the Bangko Sentral.

4. *Post decision*

Unless otherwise prescribed by the Bangko Sentral, an applicant may file a new application for a denied and/or withdrawn application after the lapse of six (6) months reckoned from the date of denial/withdrawal: *Provided*, That any weaknesses, deficiencies and/or non-compliance with any laws, rules, regulations and/or directives that made the applicants ineligible have already been satisfactorily addressed.

(Circular No. 947 dated 15 February 2017)

**CHART OF ACCOUNTS AND DESCRIPTION
OF LOAN REGISTER OF PAWNSHOPS
(Appendix to Sec. 161-P on Records and Reports)**

A. *General Ledger.* The General Ledger is the controlling record of all subsidiary ledger accounts. The general ledger accounts shall be grouped as follows:

1. *Assets* - Asset accounts shall consist of the following:

- a. Cash on hand and in banks;
- b. Pledge loans;
- c. Land;
- d. Building;
- e. Furniture and fixtures;
- f. Office equipment;
- g. Leasehold improvements;
- h. Investment in securities; and
- i. Other assets.

Other assets shall include all assets not included in any of the above classification, such as prepaid expenses, advances, accounts receivables.

2. *Liabilities* - Liabilities represent obligations of the pawnshop, such as:

- a. Loans payable;
- b. Accounts payable; and
- c. Other liabilities.

Other liabilities are liabilities not included in the above classification, such as SSS premiums and medicare, tax withheld, accruals.

3. *Capital* - Capital at the end of the year is the excess of assets over liabilities, or the sum of paid-in capital, surplus or retained earnings accounts and net income for the year. The accounts under this group shall consist of the following:

- a. Capital/capital stock;
- b. Drawings;
- c. Retained earnings; and
- d. Net income for the year.

4. *Income* - This account represents the "general ledger control" account for all income of the pawnshop. An "Income Subsidiary Ledger" shall be maintained and the total of this ledger shall equal the balance of "Income Control" account of the general ledger at all times.

The "Income Subsidiary Ledger" shall contain the following accounts:

- a. Interests - pledge loans;
- b. Service charges;
- c. Gain or loss at auction sale;
- d. Interests on securities; and
- e. Other income.

5. *Expenses* - The expenses account shall include the following:

- a. Salaries and allowances;
- b. Interest on borrowed money;
- c. Rental;
- d. Depreciation;
- e. Light and water;
- f. Taxes and licenses;
- g. SSS contribution;
- h. Costs of telephone, postage and/or telegram;
- i. Stationery and/or supplies; and

- j. Miscellaneous expenses.

B. *Registers.* The following registers shall be maintained to trace loan transactions.

1. *Loans Extended Register* – Every pawnbroker shall keep a "Loans Extended Register" in which shall be entered in ink, at the time of each loan or pledge transaction, an accurate account and description in English, with corresponding translation in the local dialect, the following minimum data:
 - a. Date of transaction;
 - b. Number of pawn ticket;
 - c. Amount of money loaned or principal;
 - d. Rate of interest to be paid, in percent;
 - e. Service charge collected;
 - f. Description of pawn;
 - g. Appraised value of pawn;
 - h. Name of pawnier;
 - i. Address of pawnier;
 - j. Description of the pawnier, including:
 - (1) Nationality;
 - (2) Sex; and
 - (3) General appearance; and
 - k. Signature or thumbmark of the pawnier and the name of the pawnier written by and signature of the witness to the thumbmarking.
2. *Loans Paid Register* - A "Loans Paid Register" shall be maintained in which shall be entered in ink, the principal and interest payments of loans. It shall contain the following minimum data:
 - a. Date of payment;
 - b. Number of pawn ticket;
 - c. Name of pawnier;
 - d. Principal amount;
 - e. Amount of interest paid; and
 - f. Signature or thumbmark of the pawnier and the name of the pawnier written by and signature of the witness to the thumbmarking.

A pawnshop that uses a computerized system may record its loan transactions in individual loan extended vouchers which shall contain the same information enumerated above in lieu of the loan extended and loans paid registers. Such pawnshops shall periodically compile or bind the loan extended vouchers and shall be made available for Bangko Sentral examination upon request.

(Circular No. 974 dated 29 September 2017 and M-2017-003 dated 27 January 2017)

LIST OF REPORTS REQUIRED FROM PAWNSHOPS
(Appendix to Sec. 161-P)

<u>Category</u>	<u>Form No.</u>	<u>MOR Ref.</u>	<u>Report Title</u>	<u>Frequency</u>	<u>Submission Deadline</u>	<u>Submission Procedure</u>

B	Unnumbered	Sec. 142-P (Cir. No. 1019 dated 31 October 2018)	Reportable Major Cyber-Related Incidents	As incidents occur	Within two (2) hours upon discovery Within twenty-four (24) hours from discovery	citsg@bsp.gov.ph ¹ citsg@bsp.gov.ph
B	Unnumbered	Sec. 142-P (Cir. No. 1019 dated 31 October 2018)	Disruptions of financial services and operations	As disruptions occur	Within two (2) hours upon discovery Within twenty-four (24) hours from discovery	citsg@bsp.gov.ph citsg@bsp.gov.ph

¹ For speedy identification, the email transmission should use the following required format as the subject:

<EDRN>underscore<eventtype>underscore<bank/NBQB name>underscore<reportstatus>underscore<yyyymmdd>

EDRN refers to event driven reporting and notification. The event type will either be “**Cyber**” for major cyber-related reportable incidents or “**Disruption**” for disruptions of financial services and operations. The report status refer to either “**IM-Notice**”, for the immediate notification upon discovery of the incidents or “**Follow2**” for the follow-up report indicating the details as prescribed in the preceding section, e.g.,:

To: citsg@bsp.gov.ph
Subject: EDRN_Cyber_Bank A_IM-Notice_20180731

REPORTING GUIDELINES ON CRIMES/LOSSES
(Appendix to Sec. 161-P on Records and Reports)

1. Pawnshops shall report on the following matters through the appropriate supervising department of the Bangko Sentral:

- a. Crimes whether consummated, frustrated or attempted against pawned articles/property/facilities (such as robbery, theft, swindling or estafa, forgery and other deceits) and other crimes involving loss/ destruction of pawn/property of the pawnshop: *Provided*, That if no pawned article is involved, the amount involved in each crime is ₱20,000 or more.

Crimes involving the pawnshop personnel, regardless of whether or not such crimes involve the loss/destruction of pawned articles/property of the pawnshop, even if the amount involved is less than those above specified, shall likewise be reported to the Bangko Sentral.

- b. Incidents involving material loss, destruction or damage to the institution's pawned articles/property/facilities, other than arising from a crime: *Provided*, That if no pawned article is involved, the amount involved per incident is ₱20,000 or more.

2. The following guidelines shall be observed in the preparation and submission of the report:

- a. The report shall be prepared in two (2) copies and shall be submitted to the appropriate supervising department of the Bangko Sentral within five (5) business days from the date of incident or discovery.

The following information/documents shall be submitted together with the report:

- (1) Notarized list of lost pawned articles, indicating the pawn ticket number, name of the pawner, date loan granted, brief description of pawn, and amount of loan;
 - (2) Police report on the investigation of the fire/robbery incident;
 - (3) Proof of notification in writing to all concerned pawners about the incident; and
 - (4) Plan of settlement of pawners' claim for lost pawned items, if any.
- b. Where a thorough investigation and evaluation of facts is necessary to complete the report, an initial report submitted within the five (5) business day deadline may be accepted: *Provided*, That a complete report is submitted not later than fifteen (15) business days from termination of investigation.

(Circular No. 974 dated 29 September 2017 and M-2017-003 dated 27 January 2017)

NATIONAL RETAIL PAYMENT SYSTEM (NRPS) FRAMEWORK
(Appendix to Sec. 401-P)

A. NRPS Framework

The NRPS is a policy and regulatory framework that aims to establish a safe, efficient, and reliable electronic retail payment system in the Philippines. Given that retail payment systems contribute to the stability and efficiency of the financial system as a whole, the attainment of the NRPS vision will help achieve higher economic growth and enhance overall competitiveness of our economy.

With the rapid evolution of retail payments due to advancements in technology, retail payments related activities of BSFIs introduced a complex interplay of different types of risks. Thus, while the Bangko Sentral promotes the modernization of the country's retail payment system in accordance with the NRPS Framework, it is critical to ensure that enabling policies and a multifaceted approach to strengthening risk management are timely adopted, and greater attention is devoted to retail payments activities of BSFIs such as clearing and settlement.

In carrying out these activities, BSFIs are expected to adhere to the NRPS Framework and measures aimed at strengthening risk management as set forth in Sec. 803 and this Appendix. Hence, the retail payment system and activities that BSFIs participate in should establish the following:

1. Strengthened risk management through a better, holistic and multi-stakeholder approach to governance, and an enhanced transparency of clearing and settlement transactions classified according to risk profile.
2. Augmented efficiencies and effectiveness in the retail payment system by minimizing duplicative efforts, promoting interoperability among retail payment system participants, standardizing clearing and settlement rules, and harmonizing various initiatives towards the achievement of the shared goals of safe, reliable and efficient retail payment system.
3. Continued compliance with Bangko Sentral rules and regulations particularly on information technology, consumer protection, and AML/CFT.

Retail payments under the NRPS Framework are payments that meet at least one of the following characteristics: (i) the payment is not directly related to a financial market transaction; (ii) the settlement is not time-critical; (iii) the payer, the payee, or both are individuals or non-financial organizations; and (iv) either the payer, the payee, or both are not direct participants in the payment system that is processing the payment. This definition of retail payment includes person-to-person, person-to-business, business-to-person, business-to-business, person/business-to-government, and government-to-person/business payments.¹ On the other hand, large-value payments refer to payments, generally of very large amounts, which are mainly exchanged between banks or between participants of financial markets and that usually require urgent and timely settlement.

The Bangko Sentral, as a central bank, generally plays a variety of essential roles in the payment system by being an operator of the real-time gross settlement system (RTGS), an overseer in core payment arrangements, a user and participant of payment services, and, most critically, a catalyst for payment system reform. It is through the performance of these roles that the Bangko Sentral seeks to acquire a broader and holistic perspective on the role and the status of the payment system in the financial system and the economy in accordance with one of the pillars of central banking of promoting safe and efficient payment systems in the country.

1. Key Principles
 - a. Governance of the payment system shall be separate and distinct from the actual clearing operations to enable the retail payment system participants to effectively and efficiently deploy resources to focused and specialized activities. The governance of the payment system includes the establishment and implementation of standards and rules among payment system participants.
 - b. Sound governance shall be performed by an industry-led self-governing body that is duly recognized and overseen by the Bangko Sentral.
 - c. All qualified BSFIs may apply to be direct clearing participants and, as such, participate in the governance structure.

¹ Developing a comprehensive National Retail Payments Strategy, Financial Infrastructure Systems Policy and Research, World Bank, October 2012, available at http://siteresources.worldbank.org/FINANCIALSECTOR/Resources/Developing_a_comprehensive_national_retail_payments_strategy_for_G_PW_IO_20%2Bv1%29.pdf.

- d. All clearing participants shall subscribe to and comply with the PSMB-formulated principles, policies, and business rules that will govern the payments system.
- e. All clearing shall be done within the NRPS governance structure. Bilateral clearing arrangements outside of the NRPS governance structure are considered as undertakings that carry risks that cannot be identified, measured, monitored and/or controlled, nor can said undertakings be properly considered in attaining a holistic perspective and improving governance of the retail payment system. Hence, bilateral arrangements outside of the NRPS governance structure shall not be allowed and failure to comply therewith shall result in deployment of appropriate supervisory actions from the Bangko Sentral.
- f. All significant retail payment streams shall be covered by an ACH.
- g. Non-discriminatory participation shall be espoused in the retail payment system by allowing all qualified direct clearing participants to participate in the formulation of standards and rules, as well as participate in business arrangements.
- h. A reasonable market-based and transparent pricing mechanism shall be adopted by all BSFIs which are clearing participants. Reasonable service fees shall be allowed only for actual services rendered directly related to the delivery of electronic financial and payment services to clients of a BSFI.
- i. Bangko Sentral policies and supervisory actions, not directly involving payments governance within the scope of the PSMB, shall be addressed directly to the individual payment system participants as BSFIs.

2. Objectives:

- a. To enable effective and efficient interface and interoperability using shared and resilient infrastructure;
- b. To foster innovation and new business models;
- c. To promote fair access and competition amongst NRPS participants;
- d. To facilitate the provision of a wide range of payment products and services with needed certainty, affordability (based on a reasonable market-based pricing methodology) and trust; and
- e. To make relevant information on retail payment system available to concerned stakeholders.

The NRPS Framework espouses the cooperation of different competitors, or what is known as "*coopetition*", in the domestic retail payments by delineating areas to be covered between the cooperative and the competitive spheres.

It is recognized that certain areas are dedicated for cooperation and collaboration among BSFIs participating in the retail payment system towards the common goals of safety, efficiency, reliability and resiliency. This cooperative sphere centers on the clearing and settlement activities of BSFIs which shall collaborate through the formulation and implementation of clearing and settlement standards, rules, and agreements under a formal governance structure that conforms to the NRPS principles.

To complement the cooperative sphere is the competitive sphere where the NRPS principles promote competition through innovation in the delivery of quality and cost-effective financial products and services, the creation of new business models customized to the needs of target consumers, and the development of services with a higher level of security, among others. The competitive sphere shall be governed by reasonable, transparent and effective consumer pricing mechanisms to allow BSFIs cost-recovery and fair financial returns. Each BSFI shall be responsible for prescribing its pricing mechanisms for its financial products and services taking into consideration, among others, the nature of the product or service, the market segment to be served and the costs incurred to provide such product or service.

B. Governance - Payment System Management Body (PSMB)

The PSMB is an industry-led self-governing body that is duly recognized and overseen by the Bangko Sentral.

To attain a holistic perspective and multi-stakeholder organized structure that would bring about good governance in the retail payment system, BSFIs shall adhere to the following key principles when engaging in clearing activities and must do so only within the NRPS governance structure.

Key Principles

- a. The retail payment transactions covered under the NRPS governance structure shall be as follows:
 - i. For card-based instruments, the card shall be both issued and acquired locally; and
 - ii. For online, mobile, or other electronic payment instructions/instruments, the account of payer (sender) and account of payee (recipient) shall be both maintained with BSFIs that are licensed to offer EFPS.

- b. The PSMB shall be a not-for-profit juridical entity.
 - c. The PSMB shall adopt a Charter in consultation with the Bangko Sentral.
 - d. The PSMB membership criteria shall, at all times, be consistent with the NRPS Framework and Bangko Sentral regulations, in addition to the following principles:
 - i. All qualified direct clearing participants should be members of the PSMB.
 - ii. To be a PSMB member, a BSFI shall be a participant in at least one (1) ACH and actively participate in an ACH within one (1) month of joining the PSMB.
 - iii. Each PSMB member shall be entitled to only one (1) vote.
 - e. The PSMB shall be funded by the members on an agreed basis.
 - f. The PSMB shall be governed by a PSMB board which shall observe the following principles:
 - i. The PSMB board shall have multi-stakeholder representation in accordance with the volume of the risk-taking activities, such as clearing volume, within a specified time frame [e.g., immediately preceding twenty four (24) months]. The basis for computing the clearing volume across all ACHs or payment streams shall include all payment streams with clearing activities as of the date when the election of the PSMB board is called, except if a valid reason is shown to limit the parameters.
 - ii. The PSMB board shall also abide by sound corporate governance practices which may include, but is not limited to, allocating seat/s for independent board member/s or board member/s that represent/s the broader public interest and has/have competence and experience in the payments field.
 - iii. The PSMB board members shall appoint as official representative their chief executive officer (CEO) and designate a formal alternate who can act with full authority (e.g., voting, approval, decision-making, and others).
 - iv. Each PSMB board member shall have one (1) vote.
 - v. No two (2) PSMB board members shall come from the same group of companies where one is majority-owned or controlled by the other company.
 - vi. The Chairperson shall be elected among PSMB board members and shall not serve for two (2) successive terms.
 - g. The PSMB shall be independent from the clearing switch operator/s with respect to business operations.
 - h. All BSFIs that are part of the NRPS governance structure shall subscribe to and comply with the PSMB-formulated principles, policies, and business rules that will govern the payments system provided such PSMB-formulated principles, policies and business rules are in conformity with the NRPS Framework and principles as well as applicable laws and regulations.
1. Objectives
- a. The PSMB will provide sound governance to the retail payment system and serve as a forum of collaboration for ensuring appropriate conditions for retail payments in the country. Towards this end, the PSMB will perform these functions with respect to its members:
 - i. Ensure compliance by PSMB members with criteria, standards and rules promulgated and adopted by the PSMB's membership and PSMB board, as applicable.
 - ii. Set policies and standards on clearing activities of PSMB members.
 - iii. Standardize retail clearing agreements across payment streams, which may include minimum guideline on the content of service level agreements with CSOs.
 - iv. Manage members' conformance to multilateral retail clearing agreements.
 - v. Review applications for establishment of ACHs and to accordingly approve the formation thereof to ensure, among others, that the NRPS principle of a payment stream falling only under one (1) ACH is observed by PSMB members.

- vi. Prescribe policies and rules to promote visibility of retail clearing and resulting settlement positions to manage risks resulting from or associated with clearing and settlement activities.
- vii. Set forth policies, rules and/or standards to ensure that no anti-competitive activities occur in clearing operations of PSMB members.
- viii. Promote fair access to the payment system amongst PSMB members.
- ix. Enable effective and efficient interface and interoperability using shared and resilient infrastructure.
- x. Establish a dispute resolution mechanism for PSMB members on matters not covered or cannot be resolved under the ACH dispute resolution framework.
- xi. Provide a clearing environment that will support payments innovation and the adoption of new business models by the payment system participants.

C. Automated Clearing House (ACH)

The ACH is a multilateral legally binding agreement amongst clearing participants. The ACH shall govern clearing and settlement determination.

To promote interoperability and standardize clearing and settlement rules and procedures, BSFIs are expected to observe the following key principles in forming and participating in ACHs under the NRPS governance structure.

1. Key Principles

- a. ACHs shall be created and differentiated based on payment streams, which comprise of payment instruments or instructions, business rules, clearing activities and risk considerations which are of similar nature or which create similar risk profiles.
- b. A payment stream can fall under only one (1) ACH.
- c. The formation of and participation in an ACH shall be open to all qualified clearing participants.
- d. The formation of an ACH shall be considered a business arrangement to be agreed upon between participants of an ACH.
- e. An ACH shall engage the services of only one (1) clearing switch operator.
- f. PSMB members may be part of more than one (1) ACH Participant Group and/or participate in more than one (1) ACH, provided the PSMB member meets the requirements for participating in such ACH.
- g. At least two (2) direct clearing participants can initiate the creation of an ACH subject to the recognition of the PSMB Board, or in the absence of a PSMB, the Bangko Sentral.

2. Salient Features

- a. ACH participants shall elect representatives to an ACH Participant Group, which once recognized by the PSMB, shall draw up and implement ACH rules and agreements and contract a qualified clearing switch operator. To assist in drafting the ACH agreements, the Participant Group may nominate a Working Group to formulate draft agreements subject to the former's approval.
- b. The assignment of a new ACH to an existing or new ACH Participant Group shall be approved by the PSMB Board.
- c. Where a new ACH Participant Group has to be formed, it shall be recognized by the PSMB Board once its charter has been accepted by the ACH participants and meets the PSMB criteria for an ACH Participant Group.

D. Clearing Switch Operator (CSO)

The CSO provides clearing switch services.

To augment efficiencies in the retail payment system while ensuring a robust and resilient infrastructure underlying retail payment transactions of BSFIs, BSFIs should observe the following key principles in engaging the services of CSOs relative to the delivery of a retail payment product or service within the NRPS governance structure.

1. Key Principles

- a. The operations of the CSO that services an ACH shall be limited to the provision of clearing and other services that do not compete with services offered by BSFIs participating in the ACH.
- b. Clearing switch operations shall be conducted effectively and efficiently consistent with international standards as this is a critical prerequisite for the functioning of all the various systems supporting and underlying retail payment services.
- c. The CSO shall have a reliable, resilient, robust, and secure infrastructure to ensure consistency and continuity of services under different operating conditions.
- d. The CSO shall be a duly licensed entity in the Philippines. Entities organized under the laws of countries other than the Philippines shall secure a license to do business in the Philippines and comply with the Foreign Investments Act of 1991 as well as other applicable laws and regulations.
- e. A CSO can extend service to multiple ACHs.
- f. Each ACH, through their designated CSO, shall individually settle their clearing results through the RTGS system operated by the Bangko Sentral.

(Circular No. 980 dated 06 November 2017)

GUIDELINES ON EUROPAY, MASTERCARD AND VISA (EMV) IMPLEMENTATION **(Appendix to Sec. 142-P)**

A. Background

In response to the increasing sophistication of frauds perpetrated through magnetic stripe (magstripe), international payment networks have orchestrated the shift towards EMV chip-enabled card. The EMV is an interoperability standard for chipbearing smart card technology defined by EMVCo in 1994, adoption of which has resulted to significant reduction in card frauds due to skimming¹ and counterfeiting.

To outpace and manage fraudsters' shift towards jurisdictions that are still using magstripe, Bangko Sentral supervised financial institutions (BSFIs) via Circular No. 808 dated 22 August 2013 were required to migrate their entire payment network to the more secure EMV chip-enabled cards.

B. Statement of Policy

It is the policy of the Bangko Sentral to foster the development of safe, secure, efficient, and reliable retail payment systems, protect the integrity and confidentiality of customer accounts and information and uphold consumer protection.

C. Scope

These guidelines shall govern the migration to and implementation of EMV of all BSFIs with debit card issuing and acquiring functions. For credit card, only cash advance transaction at Automated Teller Machines (ATMs) shall be covered since other credit card transactions are governed by the rules of the international payment networks.

It is incumbent upon all affected BSFIs to ensure that other key players in the domestic payment network comply with these guidelines.

For purposes of the subject guidelines, payment transactions covered are limited to card present and contact transactions in ATMs, POS terminals and other similar devices. Guidelines governing card-not-present as well as contactless transactions shall be issued separately.

D. Definition of Terms

1. *EMV*, which stands for Europay, MasterCard and Visa, is a global standard for credit, debit and prepaid payment cards based on chip card technology. EMV chip-based payment cards, also known as smart cards, contain an embedded microprocessor, a type of small computer. The microprocessor chip contains the information needed to use the card for payment, and is protected by various security features. Chip cards are a more secure alternative to traditional magstripe payment cards.

Implementing EMV shall address the deficiencies inherent in magstripe by reducing fraud arising from counterfeit, lost and stolen card information through the following features:

- a. Authentication of the chip card to ensure that the card is genuine so as to protect against counterfeit fraud for on line-authorized transactions;
 - b. Digitally signing payment data for transaction integrity;
 - c. More robust cardholder verification to protect against lost and stolen card fraud for EMV transactions in all acceptance environments.
2. *Acquiring institution (acquirer)* is a bank or financial institution that processes credit or debit card transactions via ATM or POS terminals.
 3. *Bangko Sentral Supervised Financial Institutions (BSFIs)* include banks, non-banks with quasi-banking function (NBQB), non-bank electronic money issuers and other non-bank institutions which under existing Bangko Sentral rules and regulations and special laws are subject to Bangko Sentral ng Pilipinas supervision and/or regulation.

¹ Skimming is the illegal copying of information from the magnetic stripe of a payment card to gain access to accounts.

4. *Co-branded cards* are Philippine-issued cards affiliated with international payment networks.
5. *Debit cards* are payment cards linked to bank deposit or prepaid/electronic money (e-money) accounts.
6. *Domestic payment* network includes BSFIs as well as other key players such as merchants, providers of ATMs, point-of-sale (POS) terminals and similar devices, card vendors, card personalization bureaus and domestic switches responsible for processing and handling domestic transactions.
7. *Domestic switches* refer to BancNet and Megalink.
8. *EMV chip* liability shift means that the liability and responsibility for counterfeit or fraudulent transaction shall shift to the BSFI who is not EMV-compliant.
9. *EMVCo* is the governing body that manages the EMV specification.
10. *Hybrid cards* are payment cards that have both EMV chip and magstripe.
11. *International payment* networks refer to the payment networks that have global establishment. For purposes of subject guidelines, recognized international networks shall refer to Visa, Mastercard, UnionPay, Diners/Discover, American Express, and Japan Credit Bureau (JCB).
12. *Interoperability* refers to the ability of Philippine cardholders to transact at Philippine ATM and POS terminals, regardless of network affiliation or branding of the card.
13. *Issuing institution (issuer)* is a bank or non-bank financial institution that issues payment cards, whether proprietary or co-branded, to consumers.
14. *Payment cards* are cards that can be used by cardholders and accepted by terminals to withdraw cash and/or make payment for purchase of goods or services, fund transfer and other financial transactions. Typically, payment cards are electronically linked deposit, prepaid or loan/credit accounts.
15. *Philippine domestic EMV specification* refers to the specification or standards based on EMV that shall be adopted in the Philippine financial market for the proprietary or non-co-branded cards.
16. *Proprietary cards* are Philippine-issued cards without international payment network affiliation.
17. *Technical fallback* is a state in which a chip cannot be used and another type of entry, such as magstripe, is used to complete a transaction.

E. General Rule

In line with the declaration of policy, BSFIs, in migrating to EMV, shall consider the following:

1. BSFIs shall maintain interoperability of the domestic payment network;
2. The Philippine EMV implementation shall use established EMV specification as follows:
 - a. Issuers of proprietary cards shall use the Philippine domestic EMV specification; and
 - b. Issuers of co-branded cards shall use the EMV specification of their affiliated international payment network.
3. At a minimum, all debit accepting devices shall acquire/accept Philippine issued proprietary cards using the Philippine domestic EMV specification of members/participants of the domestic switches;
4. The domestic payment network shall ensure continued interoperability and acceptance of Philippine EMV issued cards using the Philippine domestic EMV specification on Philippine EMV deployed acceptance devices;² and

² Include EMV-compliant ATMs, POS terminals and other similar devices.

5. BSFIs shall strengthen consumer protection by adequately handling and containing consumer concerns and complaints arising from fraudulent schemes done electronically.

F. The Philippine Domestic EMV Specification

With the main objectives of maintaining interoperability and reducing card fraud, BSFIs shall adopt a Philippine domestic EMV specification for proprietary cards. The domestic EMV specification should:

- Adopt the EMV specification according to EMVCo;
- Apply to ATM and domestic debit POS transactions;
- Support contact transactions;
- Support online card authentication to ensure that transactions are made using a valid card;
- Support online authorization to enable issuer to manage fraud and credit risk at the transaction level;
- Support online PIN cardholder verification method;
- Support technical fallback to magstripe in the interim, as provided in Section I of these guidelines, without prejudice to the issuer's decision to process/approve fallback transactions.

G. Minimum Operational Requirements

1. Issuing institutions shall:
 - a. Ensure that they have the technical systems and network necessary to process and handle EMV transactions;
 - b. Support EMV data elements in authorization messages;
 - c. Define chip cards feature, functionality and interface capability;
 - d. Enhance risk management systems to leverage chip;
 - e. Determine the card migration strategy Bangko Sentral
 - f. Update customer support and operational systems to support chip cards;
 - g. Be certified for network interfaces and card personalization by a certification body organized by BSFIs pursuant to these guidelines;
 - h. Replace card base; and
 - i. Educate the consumers.
2. Acquiring institutions shall:
 - a. Ensure that card-accepting devices are EMV-certified to support the acquiring and routing of Philippine-issued debit cards using the Philippine domestic EMV specification;
 - b. Ensure that P|N-entry devices are Payment Card Industry PIN Transaction Security (PCI-PTS)³ compliant; and
 - c. Enable a debit POS environment that supports online PIN for Philippine-issued debit cards.
3. Domestic switches shall:
 - a. Establish infrastructure and systems that are EMV-compliant and able to support switched EMV transactions from domestic interconnected networks;
 - b. Ensure continued support to existing transaction sets and functions provided to consumers;
 - c. Enhance efforts to educate their members on EMV collaboration and seek effective alignment of strategy and design principles; and
 - d. Ensure continued ability to support, in the interim, transactions in magstripe format subject to liability shift policies acceptable to Bangko Sentral, the standards of which shall be covered in subsequent guidelines.

H. Detailed Guidelines, Policies and Processes

BSFIs shall agree on and implement detailed technical and operational requirements, policies and procedures that are acceptable to the Bangko Sentral, the standards of which shall be covered in subsequent guidelines, and aligned with subject EMV Implementation Guidelines, covering but not limited to the following:

³ A security requirement of the Payment Card Industry (PCI) regarding testing of PIN-entry devices using predefined standards to get certification.

1. Philippine Application Identifier (AID);
2. Single Common AID, Single Common Card Personalization Profile and Single Common Terminal Configuration for domestic transactions;
3. Transaction routing;
4. Testing and certification
5. Dispute and fraud risk management; and
6. Other processes affected by the EMV migration.

I. Hybrid Card, Fallback Function and EMV Liability Shift

While the EMV infrastructure and environment are in the process of achieving full stability, hybrid cards may still be acceptable as a fallback option in cases when the EMV chip or terminal is unable to process domestic chip transactions. In this regard, BSFIs shall formulate a liability shift framework that is acceptable to the Bangko Sentral.

J. Updated EMV Migration Plan

Any changes arising from the aforementioned guidelines shall be incorporated in the EMV Migration Plan and all affected BSFIs shall resubmit their updated plan to Bangko Sentral's Core Information Technology Specialist Group (CITSG) within sixty (60) calendar days from the date of the Circular.

All BSFIs shall support migration to EMV standards. Consequently, all cards issued and card-accepting devices should be EMV-compliant.

(Circular No. 1019 dated 31 October 2018)

EMV CARD FRAUD LIABILITY SHIFT FRAMEWORK (ECFLSF)
(Appendix to Sec. 142-P)

I. Introduction

This document outlines the Bangko Sentral's guidelines implementing the EMV Card Fraud Liability Shift Framework (ECFLSF). Pursuant to Sec. 148 (*IT Risk management systems*) and Appendix 108 of the Manual of Regulations for Banks (MORB), Bangko Sentral Supervised Financial Institutions (BSFIs) should shift from the magnetic stripe (magstripe) technology to EMV-compliant cards, POS terminals and ATMs. The immediate impact and benefit on the adoption of EMV technology is the reduction in card fraud resulting from counterfeit or skimming attacks.

While migration efforts to shift to EMV technology are ongoing, the use of magstripe in payment cards and/or card-accepting devices shall be allowed subject to card fraud liability shift. This means that the BSFIs which have not yet or have partially adopted the EMV technology shall be held responsible for losses associated with the use of a counterfeit card in a card-present environment.

II. Statement of Policy

It is the policy of the Bangko Sentral to foster the development of safe, secure, efficient and reliable retail payment systems, protect the integrity and confidentiality of customer accounts and information and uphold consumer protection.

Towards this end, the Bangko Sentral requires all concerned BSFIs to migrate to a more secure payment technology and sets forth subject principles for allocation of card fraud liability with the aim of ensuring compliance of the different retail payment system participants with the Bangko Sentral's EMV migration requirement. Pending full migration to the EMV technology, the ECFLSF shall likewise accelerate the dispute resolution and restitution process for customers who have valid claims arising from counterfeit fraud or skimming attacks.

III. Applicability and Scope

These guidelines shall apply to all BSFIs with debit and credit card issuing and acquiring functions and shall govern the allocation of liability associated with fraudulent transactions arising from counterfeit cards beginning 1 January 2017, subject to the conduct of proper investigation by the concerned participant/s of the payment card network. The coverage shall be limited to card-present and contact transactions of Philippine-issued payment cards used domestically in automated teller machines (ATMs), point-of-sale (POS) terminals, and other similar devices routed to either domestic or international payment networks.

Consequently, the ECFLSF shall not apply to card-not-present and contactless transactions. Furthermore, foreign-issued payment cards used domestically and Philippine-issued payment cards used abroad shall not be covered as these are already subject to the existing liability shift and chargeback rules of the international payment networks.

IV. Definition of Terms

For purpose of these guidelines, the following definitions shall apply:

- 1) *Acquiring institution (Acquirer)*, is a bank or non-financial institution that processes credit or debit card transactions via ATMs, POS terminals, and other similar devices.
- 2) *EMV compliant device or terminal* is a device or terminal that has, or is connected to, a contact chip card reader, has an EMV application, certified, and is able to process EMV transactions.
- 3) *Co-branded cards* are Philippine-issued cards affiliated with international payment networks.
- 4) *Counterfeit card* is an imitation or falsification of a genuine magstripe card or EMV chip card with track data copied from a hybrid EMV card.
- 5) *Debit cards* are payment cards linked to bank deposit or prepaid/electronic money (e-money) accounts.

- 6) *Fallback to magstripe transaction occurs* when the chip on the card is not being read by a terminal. This is similar to technical fallback, which is defined in Appendix 108 of the MORB as a state in which the chip cannot be used and another type of entry, such as magstripe, is used to complete a transaction.
- 7) *Hybrid cards* are payment cards that have both EMV chip and magstripe.
- 8) *International payment networks* refer to the payment networks that have global establishment. For purposes of subject guidelines, recognized international networks shall refer to Visa, Mastercard, UnionPay, Diners/Discover, American Express, and Japan Credit Bureau (JCB).
- 9) *Issuing institution (Issuer)* is a bank or non-bank financial institution that issues payment cards, whether proprietary or co-branded, to consumers.
- 10) *Payment cards* are cards that can be used by cardholders and accepted by terminals to withdraw cash and/or make payment for purchase of goods or services, fund transfer and other financial transactions. Typically, payment cards are electronically-linked to deposit, prepaid or loan/credit accounts.

V. Guiding Principles

- 1) The adoption of EMV technology is designed to reduce and mitigate risks arising from counterfeit card fraud. While it remains virtually impossible to create a counterfeit EMV card that can be used to conduct an EMV payment transaction successfully, the presence of magstripe in a hybrid EMV card makes it still vulnerable to counterfeit attacks.
- 2) A BSFI that has enabled the most secure EMV options shall be protected from financial liability arising from losses on counterfeit card fraud. The liability for this type of fraud shall shift to the BSFI which is not or is partially compliant with the EMV migration requirement.
- 3) To resolve the issue on the allocation of card fraud liability using the guidelines described herein, the involved parties (such as issuer, acquirer, and payment network) should, first, characterize the fraud committed, and then, assess the technology being employed, in light of the applicable payment network rules. The party supporting EMV technology will prevail and in case of a technology-tie (neither or both parties are EMV compliant), the liability for fraudulent transactions generally remains with the Issuer.

VI. Allocation of Card Fraud Liability

Allocation of liability for counterfeit card fraud is summarized in the following table:

	Card Capabilities	Acceptance Device Support	Scenario	Liability
1	Magnetic stripe only	Magnetic stripe only	Magnetic card transaction was completed	Issuer
2	Magnetic stripe only	EMV compliant	Magnetic card transaction was completed	Issuer
3	EMV compliant hybrid card	Magnetic stripe only	Magnetic card transaction was completed	Acquirer ¹
4	EMV compliant hybrid card	EMV compliant	Fallback transaction; Magnetic card transaction was completed	Issuer

The information provided above shall be considered as a general guide as each fraudulent transaction shall be separately investigated on. Likewise, the domestic and international payment networks may come up with other scenarios and probable conditions that illustrate how liability is assigned on counterfeit card fraud using different combinations of card and acceptance device capabilities. However, the resolution of such scenarios/conditions should follow the principles espoused in these guidelines.

¹ When an Acquirer accepts a magstripe card that was counterfeited with track data copied from an EMV compliant hybrid card and the counterfeit card is used at a device/terminal that is not EMV-compliant, resulting in a transaction to be successfully processed, the Acquirer is liable for any chargeback resulting from such fraud.

VII. Consumer Protection and Complaints Handling and Resolution

- 1) The participants in the domestic payment network (such as issuer, acquirer, and payment network) should collaborate and devise detailed rules and procedures including arbitration mechanisms to operationalize the ECFLSF. Accordingly, a body responsible for strictly implementing the above-mentioned detailed rules and procedures on ECFLSF should be constituted.
- 2) Cardholders' complaints and/or requests for chargeback as a result of counterfeit card shall be considered as complex complaint/request defined in Appendix 110 of the MORB and hence, shall follow the standards provided in such regulations, except for the processing and resolution timeline which should be within 10 days instead of 45 days.
- 3) Issuers and Acquirers should ensure that affiliated international payment networks align their existing liability and chargeback rules with the ECFLSF insofar as Philippine-issued payment cards used in the domestic payment environment are concerned.

Guidelines on the Suspension/Delisting of External Auditor in the List of Selected External Auditors for Bangko Sentral Supervised Financial Institutions (BSFIs)

Section 1. Grounds for Delisting/Suspension of External Auditors

An external auditor included in the List of Selected External Auditors for BSFIs shall be suspended or delisted by the Bangko Sentral, without prejudice to the imposition of other sanctions by the Securities and Exchange Commission (SEC)¹, under any of the following grounds:

- a. Gross negligence in the conduct of the audit or failure to comply with the Philippine Standards on Auditing and such other issuances of the Auditing and Assurance Standards Council;
- b. Issuance of an unqualified opinion which is not supported by full compliance by the auditee with the applicable financial reporting framework due to material deficiencies or misstatements in the financial statements;
- c. Conduct of an audit despite the lack or eventual loss of independence as provided for under the Code of Ethics for Professional Accountants in the Philippines;
- d. Conduct of any non-audit services for his statutory audit clients, if he has not undertaken the safeguards to reduce the threat to his independence;
- e. Any material misrepresentation in the reports submitted to the Bangko Sentral;
- f. Failure to comply with the provisions set forth under Sec. 152-P;
- g. Refusal for no valid reason, upon lawful order of the Bangko Sentral, to submit requested documents in connection with an ongoing investigation. The external auditor shall, however, be made aware of such investigation; and
- h. Failure to obtain from the Securities and Exchange Commission an accreditation appropriate to the client's category provided under Sec. 152-P on the appointment of external auditor.

Section 2. Procedures and Effects of Delisting/Suspension

- a. On the basis of the results of the assessment of the quality of audited financial statements and evidence on the existence of the grounds for suspension or delisting under Section 1 above, the external auditor shall be notified in writing by the appropriate department of the Financial Supervision Sector (FSS) of the existence of the ground for his/her suspension or delisting in the List of Selected External Auditors for BSFIs and shall be allowed to submit within fifteen (15) calendar days from receipt of such notice an explanation on why he/she should not be suspended/delisted, together with the evidence in support of his/her position.

An external auditor shall only be suspended or delisted after due notice and opportunity to defend/clear himself.

- b. If no reply has been received from the external auditor concerned upon the expiration of the period prescribed under Item "a" above, said failure to reply shall be deemed a waiver on his/her part and the appropriate department of FSS shall proceed to evaluate the case based on available records/evidence.
- c. Upon approval by the Monetary Board, the external auditor concerned shall be informed by the appropriate department of the FSS in writing of his/her suspension or delisting in the List of Selected External Auditors for BSFIs.
- d. Suspended or delisted external auditor shall be automatically included in the Bangko Sentral's Watchlist Disqualification File "B" (temporary).
- e. The Securities and Exchange Commission shall be immediately informed of the suspension or delisting of the external auditor.

Suspended external auditors may re-apply for inclusion in the List of the Selected External Auditors for BSFIs after the lapse of five years from the date of effectivity of the suspension.

(Circular No. 1040 dated 20 May 2019)

POWERS OF THE BANGKO SENTRAL

001-N SUPERVISORY ENFORCEMENT POLICY

The Policy sets forth guidance on the Bangko Sentral's supervision-by-risk framework. It also puts together in a holistic manner all the enforcement tools available to the Bangko Sentral as contained in various laws and rules and regulations¹ and communicates the deployment thereof in a consistent manner by the Bangko Sentral in the course of performing its supervisory function. It further sets out the guiding principles and objectives behind the deployment of such enforcement actions.

Nothing in this Section shall be construed as superseding enforcement actions previously imposed against Bangko Sentral-supervised FIs pursuant to existing laws, Bangko Sentral rules and regulations.

a. *Policy statement and rationale*

The Bangko Sentral is issuing this Supervisory Enforcement Policy to provide guidance on its supervision-by-risk framework. The Bangko Sentral recognizes that risk-taking is integral to a financial institution's business. The existence of risk is not necessarily a reason for concern so long as Management exhibits the ability to effectively manage that level of risk and operates the financial institution (FI) in a safe and sound manner. Thus, when risk is not properly managed, the Bangko Sentral may deploy a wide range of enforcement actions provided under existing laws, Bangko Sentral rules and regulations, taking into consideration the nature and extent of the supervisory issues and concerns and the level of cooperation provided by Management.

The Bangko Sentral adopts a holistic approach to supervision with the objective of guiding FIs under its supervision to mitigate risk and achieve the desired changes.

Bangko Sentral's risk-based supervision, of which enforcement action is a key part, focuses on the safety and soundness of operations of the FIs. This policy sets forth the expectations of the Bangko Sentral when it deploys enforcement action and the consequences when expected actions are not performed within prescribed timelines.

Thus, this over-arching policy is needed - (a) as a collation of various enforcement actions already present in various laws, rules and regulations; (b) for better guidance of the FIs and the bank supervisors; and (c) as a means to broadcast to the banking/financial industry the consequences of failure to address the Bangko Sentral requirements and supervisory expectations.

b. *Objectives of the enforcement policy*

The Bangko Sentral's Supervisory Enforcement Policy aims to achieve the following two (2) key objectives:

- (1) Achieving the desired change. Effect a change in the overall condition and governance of Bangko Sentral-supervised FIs consistent with the expectations set under relevant laws and regulations; and
- (2) Mitigating risk. Mitigate risks to the FIs and other stakeholders in order to maintain the stability of the financial system.

c. *General principles*

The Bangko Sentral, in the deployment of enforcement actions, is guided by the following general principles:

- (1) Root cause diagnosis. The enforcement action addresses the underlying cause of the supervisory issues and concerns.
- (2) Consistently matching the severity of enforcement action to the supervisory issue. The deployment of appropriate enforcement action is commensurate to the severity of the supervisory issues and concerns. The severity of the supervisory issues and concerns is assessed in terms of *prevalence*² and *persistence*.
- (3) Successive or simultaneous deployment of enforcement actions. Enforcement actions may be deployed successively or simultaneously taking into account the nature and seriousness of the difficulties encountered by the FIs and the ability and willingness of the FI's Management to address the supervisory issues and concerns.

¹ Section 4 of R.A. No. 8791 (General Banking Law of 2000) defines the scope of Bangko Sentral's supervisory powers, which may be grouped into three categories: (i) issuance of rules; (ii) examination and investigation; and (iii) enforcement of Prompt Corrective Action (PCA)

² Prevalence pertains to the pervasiveness of the supervisory issues, concerns and problems in relation to their impact on the FI's solvency, asset quality, operating performance and liquidity, among others.

- (4) Monitorability and follow-through. The Bangko Sentral monitors the FI's progress/compliance with the expected actions to address the supervisory issues, concerns and problems.
- (5) Escalation of enforcement actions. Enforcement actions may be escalated if the desired change is not achieved and the root causes of the FI's issues, concerns and problems are not addressed by the FI within prescribed timelines.

d. Categories of enforcement actions

The three (3) main categories of enforcement action are: (1) corrective actions, (2) sanctions and (3) other supervisory actions. These enforcement actions may be imposed singly or in combination with others.

(1) Corrective actions

Corrective actions are enforcement actions intended to require the FI to address the underlying cause of supervisory issues, concerns and problems. These include the following:

(a) Bangko Sentral Directives

Directives are basically orders and instructions communicated by the appropriate supervising department in Bangko Sentral requiring the FI to undertake a specific positive action or refrain from performing a particular activity within a prescribed timeline.

(b) Letter of Commitment (LOC)

The LOC is an enforcement action where the FI's Board of Directors (Board) is required, upon approval and/or confirmation by the Monetary Board, to make a written commitment to undertake a specific positive action or refrain from performing a particular activity with a given time period.

The LOC is generally used to arrest emerging supervisory concerns before these develop into serious weaknesses or problems, or to address remaining supervisory issues and concerns.

(2) Sanctions

Sanctions that may be imposed on an FI and/or its directors and officers, as provided under existing laws, Bangko Sentral rules and regulations, are subject to the prior approval and/or confirmation by the Monetary Board. Such sanctions include the following:

(a) FIs

- Restrictions on activities and privileges
- Suspension of authorities, privileges and other activities
- Divestment and/or Unwinding
- Monetary sanction - Penalties/Fines Against the FI

(b) Directors and officers

- Reprimand
- Restriction on compensation and benefits
- Divestment
- Suspension
- Disqualification
- Removal
- Monetary penalties/fines

The foregoing sanctions to individuals are without prejudice to the filing of separate civil or criminal actions against them, when appropriate.

(3) Other supervisory actions

Subject to prior Monetary Board approval, the Bangko Sentral, when warranted, may deploy other supervisory actions such as (a) Initiation into the PCA Framework; (b) Issuance of a cease and desist order (CDO) against the FI as well as its directors and officers; (c) Conservatorship; and (d) Placement under receivership.

e. Due process

An integral part of the deployment of enforcement actions is the observance of due process in all cases.

The FI and/or its directors and officers are afforded fair and reasonable opportunity to explain their side and to submit evidence/s in support thereof, which are given due consideration in determining the appropriate enforcement action(s) to be imposed.

(Circular No. 875 dated 15 April 2015)

002-N PROMPT CORRECTIVE ACTION FRAMEWORK

The framework for the enforcement of PCA on banks which is in *Appendix Q-40*, shall govern the PCA taken on FIs to the extent applicable, or by analogy.

PART ONE

ORGANIZATION, MANAGEMENT AND ADMINISTRATION

A. SPECIAL AUTHORITIES

101-N GRANT OF LICENSES AND AUTHORITIES

Consistent with the mandate of the Bangko Sentral to promote a safe and sound banking system, the licensing process on permissible activities of Bangko Sentral-supervised financial institutions (BSFIs) is enhanced to align the process with international standards and best practices such as the "Core Principles for Effective Supervision" issued by the Basel Committee on Banking Supervision. The Bangko Sentral will not restrict the scope of risk-taking activities of BSFIs consequent of the licenses and/or authorities granted: *Provided*, That these licenses and/or authorities are in line with their business model and strategic direction: *Provided, further*, That these BSFIs demonstrate the capacity to implement these strategies and the ability to manage risks.

The enhanced policy guidelines set forth the expectations and criteria of the Bangko Sentral with respect to granting of licenses and authorities as well as its right to reject applications if the criteria set forth are not met by the applicant BSFIs ("applicants") or if the information provided is not adequate. The Bangko Sentral also reserves the right to withdraw or revoke the license and/or authority or enforce appropriate actions when an institution no longer meets the criteria or standards required to be met for the exercise of the license and/or authority.

These criteria are intended to incorporate the licensing process into Bangko Sentral's enforcement regime that is anchored on good governance, sound risk management system and effective control systems. Further, these criteria aim to provide more consistency on how the risk-focused supervision function is applied to the licensing process. This enhanced licensing policy aims to ensure that licenses and authorities are granted only to applicants that comply with the standards set.

It is also the thrust of these enhanced policy guidelines on granting licenses/authorities to establish Bangko Sentral's accountability and promote transparency on the licensing process which are consistent with its commitment to deliver prompt and efficient service.

Scope. Applications for licenses and/or authorities shall be categorized as follows:

- a. *Type "A"* -applications for licenses and/or authorities where compliance with the defined prudential requirements/criteria described in Sec. 101-N is a pre-condition for applicants to be considered eligible;
- b. *Type "B"* -applications for licenses and/or authorities processed regardless of risk profile; and
- c. *Type "C"* -activities which no longer require submission of applications and processing but shall be subject to submission of reports/certification/notification within stated deadlines. However, compliance with pre-qualification requirements is subject to post verification and any false information and/or misrepresentation may be a basis for the imposition of appropriate enforcement actions described in Sec. 101-N. The Bangko Sentral shall use this information to continuously tailor its supervisory strategy for the supervised entities and to maintain and continuously update its institutional database.

Prudential criteria. The prudential criteria set forth in this Section shall be used in determining the eligibility of applicants to the licenses and/or authorities granted by the Bangko Sentral. Accordingly, the following minimum conditions must be met:

- a. Applicant domestic banks must have a CAMELS composite rating of at least "3" and a "Management" rating of not lower than "3", branches of foreign banks must have a ROCA rating of at least "3", and BSFIs must have a RAS rating of at least "Acceptable". Whenever applicable, ratings equivalent to cited minimum rating grade requirements under appropriate rating systems (i.e., IT Rating Systems, Trust Rating Systems, among others) shall apply for certain licenses and/or authorities;
- b. Applicants have no major supervisory concerns in governance, risk management systems, and internal controls and compliance system, and characterize/demonstrate the following:

- (1) Governance

Applicants must display a culture of good corporate governance appropriate to its size, risk profile and complexity of operations. Board of directors and management, in their respective roles, provide an appropriate level and quality of oversight and support to all of the institution's activities. Sound management practices are observed and demonstrated through (a) active oversight and satisfactory performance by the board of directors and senior management, (b) appropriate policies, processes, and controls relative to the

institution's size, complexity and risk profile, (c) maintenance of an independent and effective internal audit and compliance program as well as a sound internal control environment, and (d) effective risk monitoring and management information systems.

Applicants should not be found engaging in an activity which may be considered as conducting business in an unsafe or unsound manner. In cases where weaknesses, violations of law, policy and/or regulation exists, other than those considered unsafe or unsound activities, these should not be material to the safety and soundness of the institution, can be reasonably managed, and are being adequately addressed.

Quality of corporate governance shall be assessed based on the principles and framework set forth in the Guidelines in Assessing the Quality of Corporate Governance in BSFIs;

(2) Risk management system and internal controls

Applicants shall have a comprehensive risk management system approved by its board of directors (or equivalent management committee in the case of foreign bank branches) to identify, measure, evaluate, report and control or mitigate all material risks on a timely basis and to assess the adequacy of their capital in relation to their risk profile and market and macroeconomic conditions and whose sophistication are commensurate to the risks being monitored and controlled. The risk management system must be characterized by a clear delineation of responsibility for risk management, adequate risk measurement systems, appropriate risk limits structure, effective internal controls and complete, timely and efficient risk reporting systems.

Likewise, applicants shall have an effective and adequate system of internal controls for the conduct of their business taking into account their risk profile. These controls deal with organizational structure, accounting policies and processes, checks and balances, safeguarding of assets and investments and appropriate and effective internal audit and compliance functions. Standards and principles as well as the Bangko Sentral's expectations governing internal controls and audit under existing regulations shall apply in assessing the quality and effectiveness of the internal control systems of an applicant; and

(3) Compliance system

Applicants shall have a compliance system, appropriate to its size, risk profile and complexity of operations, designed to specifically identify and mitigate business risks¹ which may erode the franchise value of the institution. Compliance policies and procedures embodied in a Compliance Policy Manual should be sound and effectively implemented. Likewise, compliance monitoring and testing as well as review process should be robust to ensure BSFI conducts its business/operations in accordance with banking laws, rules and regulations and other laws relevant to banking such as securities laws and regulations. BSFIs should not have been found significantly non-compliant with prudential requirements such as Single Borrower's Limit, DOSRI limits, capital adequacy ratio requirements, among others.

Standards and principles set forth in the Compliance Rating System framework shall apply in assessing the quality of BSFI's compliance system; and

c. Applicants have complied with directives and/or are not subject of specific directives and/or enforcement actions by the Bangko Sentral.

Applicants shall have corrected any findings of unsafe or unsound activities and have addressed any outstanding explicit directives from the Bangko Sentral and/or other relevant regulatory bodies, prohibiting the conduct of activities related to the licenses and/or authorities being applied, as of the date of application. Applicants with specific prohibitions to conduct certain activities shall not be eligible to apply for that particular license and/or authority.

No application shall be accepted until such time that enforcement actions are formally lifted by the Bangko Sentral and/or other relevant regulatory bodies after applicants have demonstrated to the Bangko Sentral that safety and soundness concerns are satisfactorily addressed and/or until such time applicants become eligible.

Applications of BSFIs under rehabilitation and/or enhanced supervision status² shall be dealt with in accordance with the eligibility test described in Section II.1(a) of *Appendix N-14*.

¹ As defined under Sec. 161-Q, *business risk* refers to conditions which may be detrimental to the institution's business model and its ability to generate returns from operations, which in turn erodes its franchise value. Business risk includes reputational, compliance, market conduct and legal risks.

² Rehabilitation includes BSFIs under the Prompt Corrective Action (PCA), Rehabilitation Program, Letter of Commitment and any other similar cases where BSFIs are expected to comply with specific terms and conditions to restore eligibility (safety and sound) status.

BSFIs granted with licenses/authorities shall continuously comply with the abovementioned standards and requirements even after the license/authority has been granted; otherwise, any deviation or non-compliance may be a basis for the imposition of appropriate enforcement actions described in Sec. 101-N.

The specific guidelines and procedures on the Bangko Sentral's licensing framework are shown in *Appendix N-14*.

Enforcement actions. In line with the thrust of the Bangko Sentral to incorporate the licensing process into its enforcement regime, the Bangko Sentral reserves the right to deploy, as may be warranted, an adequate range of supervisory tools to ensure that grantees of licenses/authorities are and remain qualified to possess the same, bring about timely corrective actions and compliance with Bangko Sentral directives, and provide safety to depositors, creditors, other stakeholders as well as the public in general.

Enforcement actions that may be imposed include, but are not limited to:

- a. *Corrective action.* Corrective actions are measures intended to primarily require BSFIs with approved licenses/authorities to rectify any deviations from the standards, principles and conditions expected for the exercise of the license and/or authority. Corrective actions may include, but are not limited to, issuance of directives and warnings.
- b. *Sanctions.* The Monetary Board may impose any of the sanctions enumerated hereunder or a combination thereof.

(1) Non-monetary

- (a) *Suspension of activities.* The conduct of activities related to the licenses/authorities granted may be suspended if the Bangko Sentral determines that the concerned BSFI no longer meets the criteria or standards set; or
- (b) *Revocation of licenses/authorities.* The license/authority granted may be revoked in cases where violation, non-compliance with criteria/standards and/or false information are noted which affects the safety and soundness of banks' operations; and/or
- (c) *Administrative sanctions.* The responsible directors/officers who approve transactions and/or decisions that resulted in violations of laws, rules and regulations, orders, and directives issued by the Monetary Board or the Governor may be subject to reprimand, temporary suspension, and/or disqualification of directors/officers.

The Monetary Board is not precluded to impose non-monetary sanctions other than those identified from Items "(a)" to "(c)"; and/or

(2) Monetary

Monetary penalties may be imposed for any acts, omissions or transactions that are outside the permissible activities of the licenses/authorities granted or are in violation of laws, Bangko Sentral rules and regulations, orders and directives issued by the Bangko Sentral.

Type of license of permissible activities¹. The type of license attached to permissible activities of Bangko Sentral supervised financial institutions (BSFIs) shall be as follows:

Type of License	Permissible Activity	Related Sections
A		
	Trust and Other Fiduciary Business	Sec. 1003-N
B		
C	Outsourcing/Insourcing of Banking Functions	Sec. 102-N

¹ Transitory Provisions. Applications filed with the Bangko Sentral prior to 6 March 2019 shall not be charged with processing and licensing fees provided under this Section (*Processing and licensing fees*). Applications for Type C licenses received prior to 6 March 2019 shall be deemed to have complied with the notification/certification requirements if after thirty (30) banking days from 6 March 2019, the appropriate supervising department of the FSS does not advise the BSFI concerned of any deficiency on such application.

Processing and Licensing Fees. All applications shall be charged with the following processing fees pursuant to Section II.3.i *Appendix N-14*:

Type of License/ Authority	Processing Fees for Non-Bank Financial Institutions
A	10,000
B	10,000

Certain Type A licenses shall be charged with the following licensing fees upon approval pursuant to Section II.3.ii of *Appendix N-14*:

Type of License/ Authority	Licensing Fees* for Non-Bank Financial Institutions
A	50,000

*Licensing fee shall be net of the processing fee.

The foregoing tables shall not apply to licensing applications with separate fee structure under specific sections of this Manual.

(Circular Nos. 1143 dated 12 April 2022, 1031 dated 07 February 2019 and 947 dated 15 February 2017)

102-N GUIDELINES ON OUTSOURCING

The rules on outsourcing of banking functions as shown under Sec. 112 (*Statement of Principle on Outsourcing*) of the MORB and *Appendix Q-36* shall likewise apply to NBFIs.

(Circular No. 1031 dated 07 February 2019 and 899 dated 18 January 2016)

B. CORPORATE GOVERNANCE

111-N DIRECTORS AND OFFICERS

- a. FIs shall submit to the appropriate supervising department of the Bangko Sentral a bio-data with ID picture of their directors/officers with rank of senior vice president (SVP) and above (or equivalent ranks) upon every election/re-election/appointment/promotion in a prescribed form and for first-time directors/officers with rank of senior vice president and above (or equivalent ranks) within a particular FI, the duly notarized authorization form per *Appendix Q-44*, within twenty (20) business days from the date of election/re-election of the directors/meeting of the board of directors in which the officers are appointed/promoted, in accordance with *Appendix N-1*.

The bio-data shall be updated and submitted in cases of change of name due to change in civil status and change of residential address, within twenty (20) business days from the date the change occurred.

For other officers below the rank of SVP, the FI shall not be required to submit their bio-data to the Bangko Sentral.

- b. The FI shall, however, keep a complete record of the bio-data of all its directors and officers and shall maintain a system of updating said records which shall be made available during on-site examination or when required by the Bangko Sentral for submission for off-site verification.
- c. The FI shall also submit to the appropriate supervising department of the Bangko Sentral, a duly notarized list of the incumbent members of the board of directors and officers (President or equivalent rank, down the line), within twenty (20) business days from the annual election of the board of directors as provided in the FI's by-laws, in accordance with *Appendix N-1*.

(Circular Nos. 1003 dated 16 May 2018 and 887 dated 07 October 2015)

112-N INTERLOCKING DIRECTORSHIPS AND/OR OFFICERSHIPS

In order to safeguard against the excessive concentration of economic power, unfair competitive advantage or conflict of interest situations to the detriment of others through the exercise by the same person or group of persons of undue influence over the policy making and/or management functions of similar FIs while at the same time allowing banks, QBs and NBFIs without quasi-banking functions to benefit from organizational synergy or economies of scale and effective sharing of managerial and technical expertise, the following regulations shall govern interlocking directorships and/or officerships within the financial system consisting of banks, QBs and NBFIs.

For purposes of this Section, *QBs* shall refer to investment houses, finance companies, trust entities and all other *QBs* while *NBFIs* shall refer to investment houses, finance companies, trust entities, insurance companies, securities dealers/brokers, credit card companies, NSSLAs, holding companies, investment companies, government *NBFIs*, asset management companies, insurance agencies/brokers, venture capital corporations, FX dealers, money changers, lending investors, pawnshops, fund managers, mutual building and loan associations, remittance agents and all other *NBFIs* without quasi-banking functions.

a. *Interlocking directorships.*

While concurrent directorship may be the least prejudicial of the various relationships cited in this Section to the interests of the *FIs* involved, certain measures are still necessary to safeguard against the disadvantages that could result from indiscriminate concurrent directorship.

- (1) Except as may be authorized by the Monetary Board or as otherwise provided hereunder, there shall be no concurrent directorships between *QBs* or between a *QB* and a bank; and
- (2) Without the need for prior approval of the Monetary Board, concurrent directorships between entities not involving an investment house shall be allowed in the following cases:
 - (a) A bank and one (1) or more of its subsidiary bank/s, *QB*/s, and *NBFI*/s; and
 - (b) A *QB* and an *NBFI*.

For purposes of the foregoing, a husband and his wife shall be considered as one (1) person.

b. *Interlocking directorships and officerships.*

In order to prevent any conflict of interest resulting from the exercise of directorship coupled with the reinforcing influence of an officer's decision-making and implementing powers, the following rules shall be observed.

- (1) Except as may be authorized by the Monetary Board or as otherwise provided hereunder, there shall be no concurrent directorship and officership between *QBs*, or between a *QB* and a bank, and between a *QB* and an *NBFI*.
- (2) Without the need for prior approval of the Monetary Board, concurrent directorship and officership between a bank and one (1) or more of its subsidiary bank/s, *QB*/s, and *NBFI*/s, other than investment house/s, shall be allowed.

c. *Interlocking officerships*

A concurrent officership in different *FIs* may present more serious problems of self-dealing and conflict of interest. Multiple positions may result in poor governance or unfair competitive advantage. Considering the full-time nature of officer positions, the difficulties of serving two (2) offices at the same time, and the need for effective and efficient management, the following rules shall be observed:

As a general rule, there shall be no concurrent officerships, including secondments, between *QBs* or between a *QB* and a bank or between a *QB* and an *NBFI*. For this purpose, *secondment* shall refer to the transfer/detachment of a person from his regular organization for temporary assignment elsewhere where the seconded employee remains the employee of the home employer although his salaries and other remuneration may be borne by the host organization.

However, subject to prior approval of the Monetary Board, concurrent officerships, including secondments, may be allowed in the following cases:

- (1) Between a *QB*, other than an investment house, and not more than two (2) of its subsidiary bank/s, *QB*/s, and *NBFI*/s, other than investment house/s;
- (2) Between two (2) *QBs*, or between a *QB*, other than an investment house, and a bank, or between a *QB* and an *NBFI*: *Provided*, That at least twenty percent (20%) of the equity of each of the banks, *QBs* or *NBFIs* is owned by a holding company or a *QB*/bank and the interlocking arrangement is necessary for the holding company or the *QB*/bank to provide technical expertise or managerial assistance to its subsidiaries/affiliates;
- (3) Between a *QB* and not more than two (2) of its subsidiary *QB*/s, and *NBFI*/s;
- (4) Between a bank and not more than two (2) of its subsidiary bank/s, *QB*/s, and *NBFIs*, other than investment house/s;

- (5) Between a bank and not more than two (2) of its subsidiary QB/s, and NBFIs.

Aforementioned concurrent officerships may be allowed, subject to the following conditions:

- (a) that the positions do not involve any functional conflict of interests;
 - (b) that any officer holding the positions of president, chief executive officer, chief operating officer or chief financial officer may not be concurrently appointed to any of said positions or their equivalent;
 - (c) that the officer involved, or his spouse or any of his relatives within the first degree of consanguinity or affinity or by legal adoption, or a corporation, association or firm wholly or majority-owned or controlled by such officer or his relatives enumerated above, does not own in his/its own capacity more than twenty percent (20%) of the subscribed capital stock of the entities in which the QB has equity investments; and
 - (d) that where any of the positions involved is held on full-time basis, adequate justification shall be submitted to the Monetary Board; or
- (6) Concurrent officership positions in the same capacity which do not involve management functions, i.e., internal auditors, corporate secretary, assistant corporate secretary and security officer, between a QB and one (1) or more of its subsidiary QB/s and NBFIs, or between a bank and one (1) or more of its subsidiary QB/s and NBFIs, or between QB/s and/or NBFIs or between bank/s, QB/s and NBFIs, other than investment house/s: *Provided*, That in the last two instances, at least twenty percent (20%) of the equity of each of the banks, QBs and NBFIs is owned by a holding company or by any of the banks/QBs within the group.
- (7) Concurrent officership positions as corporate secretary or assistant corporate secretary between QB/s and/or NBFIs or between bank/s, QB/s and NBFIs, other than IH/s, outside of those covered by Item “c(6)” of this Section: *Provided*, That proof of disclosure to and consent from all of the involved FIs, on the concurrent officership positions, shall be submitted to the Bangko Sentral.

For purposes of this Section, members of a group or committee, including sub-groups or sub-committees, whose duties include functions of management such as those ordinarily performed by regular officers, shall likewise be considered as officers.

It shall be the responsibility of the Corporate Governance Committee to conduct an annual performance evaluation of the board of directors and senior management. When a director or officer has multiple positions, the Committee should determine whether or not said director or officer is able to and has been adequately carrying out his/her duties and, if necessary, recommend changes to the board based upon said performance/review.

Representatives of government. The provisions of this Section shall apply to persons appointed to such positions as representatives of the government or government-owned or controlled entities holding voting shares of stock of NBFIs unless otherwise provided under existing laws.

(Circular Nos. 953 dated 27 March 2017 and 851 dated 30 September 2014)

113-N DISQUALIFICATION OF DIRECTORS AND OFFICERS

The following regulations shall govern the disqualification of directors and officers of institutions under the supervisory and regulatory powers of the Bangko Sentral other than banks, QBs, NSSLAs and pawnshops.

Persons disqualified to become directors. Without prejudice to specific provisions of law prescribing disqualifications for directors, the following are disqualified from becoming directors:

a. *Permanently disqualified*

Directors/trustees/officers/employees permanently disqualified by the Monetary Board from holding a director/trustee position:

- (1) Persons who have been convicted by final judgment of the court for offenses involving dishonesty or breach of trust such as estafa, embezzlement, extortion, forgery, malversation, swindling and theft;
- (2) Persons who have been convicted by final judgment of the court for violation of banking laws;
- (3) Persons who have been judicially declared insolvent, spend thrift or incapacitated to contract; or
- (4) Directors, trustees, officers or employees of closed institutions under the supervisory and regulatory powers of the Bangko Sentral who were responsible for such institutions' closure as determined by the Monetary Board.

b. *Temporarily disqualified*

Directors/trustees/officers/employees disqualified by the Monetary Board from holding a director/trustee position for a specific/indefinite period of time. Included are:

- (1) Persons who refuse to fully disclose the extent of their business interest to the appropriate supervising department of the Bangko Sentral when required pursuant to a provision of law or of a circular, memorandum or rule or regulation of the Bangko Sentral. This disqualification shall be in effect as long as the refusal persists;
- (2) Directors who have been absent or who have not participated for whatever reasons in more than fifty percent (50%) of all meetings, both regular and special, of the board of directors during their incumbency, or any twelve (12)-month period during said incumbency. This disqualification applies for purposes of the succeeding election;
- (3) Persons who are delinquent in the payment of their obligations as defined hereunder:
 - (a) *Delinquency in the payment of obligations* means that an obligation of a person with the institution where he/she is a director or officer, or at least two (2) obligations with other FIs, under different credit lines or loan contracts, are past due pursuant to Sec. 304 of the MORB;
 - (b) *Obligations* shall include all borrowings from any FI obtained by:
 - (i) A director, trustee or officer for his own account or as the representative or agent of others or where he/she acts as a guarantor, endorser or surety for loans from such FIs;
 - (ii) The spouse or child under the parental authority of the director, trustee or officer;
 - (iii) Any person whose borrowings or loan proceeds were credited to the account of, or used for the benefit of a director, trustee or officer;
 - (iv) A partnership of which a director, trustee or officer, or his/her spouse is the managing partner or a general partner owning a controlling interest in the partnership; and
 - (v) A corporation, association or firm wholly-owned or majority of the capital of which is owned by any or a group of persons mentioned in the foregoing Items "(i)", "(ii)" and "(iv)";

This disqualification shall be in effect as long as the delinquency persists.

- (4) Persons convicted for offenses involving dishonesty, breach of trust or violation of banking laws but whose conviction has not yet become final and executory;
- (5) Directors, trustees and officers of closed institutions under the supervisory and regulatory powers of the Bangko Sentral pending their clearance by the Monetary Board;
- (6) Directors and trustees disqualified for failure to observe/discharge their duties and responsibilities prescribed under existing regulations. This disqualification applies until the lapse of the specific period of disqualification or upon approval by the Monetary Board on recommendation by the appropriate supervising department of the Bangko Sentral of such directors' election/re-election;
- (7) Persons dismissed from employment for cause. This disqualification shall be in effect until they have cleared themselves of involvement in the alleged irregularity or upon clearance, on their request, from the Monetary Board after showing good and justifiable reasons, or after the lapse of five (5) years from the time they were officially advised by the appropriate supervising department of the Bangko Sentral of their disqualification;
- (8) Those under preventive suspension; and
- (9) Persons with derogatory records with the NBI, court, police, Interpol and monetary authority (central bank) of other countries (for foreign directors and officers) involving violation of any law, rule or regulation of the Government or any of its instrumentalities adversely affecting the integrity and/or ability to discharge the duties of a director/trustee/officer. This disqualification applies until they have cleared themselves of involvement in the alleged irregularity.

Persons disqualified to become officers.

- a. The disqualifications for directors mentioned in Sec. 113-N shall likewise apply to officers, except those stated in Item "b(2)".
- b. The spouses or relatives within the second degree of consanguinity or affinity are prohibited from holding officership positions across the following functional categories within an NBF:

- (1) Decision making and senior management function, e.g., chairman, president, chief executive officer (CEO), chief operating officer (COO), general manager, and chief financial officer (CFO) other than the treasurer or controller;
- (2) Treasury function, e.g., Treasurer and Vice President – Treasury;
- (3) Recordkeeping and financial reporting functions, e.g., controller and chief accountant;
- (4) Safekeeping of assets, e.g., chief cashier;
- (5) Risk management function, e.g., chief risk officer;
- (6) Compliance function, e.g., compliance officer; and
- (7) Internal audit function, e.g., internal auditor.

The spouse or relative within the second degree of consanguinity or affinity of any person holding the position of manager, cashier, or accountant of a branch or extension office of an NBFIs or their respective equivalent positions is disqualified from holding or being appointed to any of said positions in the same branch or extension office.

Disqualification procedures.

- a. The board of directors and management of every institution shall be responsible for determining the existence of the ground for disqualification of the institution's director/officer or employee and for reporting the same to the Bangko Sentral. While the concerned institution may conduct its own investigation and impose appropriate sanction/s as are allowable, this shall be without prejudice to the authority of the Monetary Board to disqualify a director/officer/employee from being elected/appointed as director/officer in any FI under the supervision of the Bangko Sentral. Grounds for disqualification made known to the institution shall be reported to the appropriate supervising department of the Bangko Sentral within seventy-two (72) hours from knowledge thereof.
- b. On the basis of knowledge and evidence on the existence of any of the grounds for disqualification mentioned in Sec. 113-N, the director or officer concerned shall be notified in writing either by personal service or through registered mail with registry return receipt card at his/her last known address by the appropriate supervising department of the Bangko Sentral of the existence of the ground for his/her disqualification and shall be allowed to submit within fifteen (15) calendar days from receipt of such notice an explanation on why he/she should not be disqualified and included in the watchlisted file, together with the evidence in support of his/her position. The head of said department may allow an extension on meritorious ground.
- c. Upon receipt of the reply/explanation of the director/officer concerned, the appropriate supervising department of the Bangko Sentral shall proceed to evaluate the case. The director/officer concerned shall be afforded the opportunity to defend/clear himself/herself.
- d. If no reply has been received from the director/officer concerned upon the expiration of the period prescribed under Item "b" above, said failure to reply shall be deemed a waiver and the appropriate supervising department of the Bangko Sentral shall proceed to evaluate the case based on available records/evidence.
- e. If the ground for disqualification is delinquency in the payment of obligation, the concerned director or officer shall be given a period of thirty (30) calendar days within which to settle said obligation or, restore it to its current status or, to explain why he/she should not be disqualified and included in the watchlisted file, before the evaluation on his disqualification and watchlisting is elevated to the Monetary Board.
- f. For directors/officers of closed banks, the appropriate supervising department of the Bangko Sentral shall make appropriate recommendation to the Monetary Board clearing said directors/officers when there is no pending case/complaint or evidence against them. When there is evidence that a director/officer has committed irregularity, the appropriate supervising department of the Bangko Sentral shall make recommendation to the Monetary Board that his/her case be referred to the OSI for further investigation and that he/she be included in the masterlist of temporarily disqualified persons until the final resolution of his/her case. Directors/officers with pending cases/complaints shall also be included in said masterlist of temporarily disqualified persons upon approval by the Monetary Board until the final resolution of their cases. If the director/officer is cleared from involvement in any irregularity, the appropriate supervising department of the Bangko Sentral shall recommend to the Monetary Board his/her delisting. On the other hand, if the director/officer concerned is found to be responsible for the closure of the institution, the appropriate supervising department of the Bangko Sentral shall recommend to the Monetary Board his/her delisting from the masterlist of temporarily disqualified persons and his/her inclusion in the masterlist of permanently disqualified persons.
- g. If the disqualification is based on dismissal from employment for cause, the appropriate supervising department of the Bangko Sentral shall, as much as practicable, endeavor to establish the specific acts or omissions constituting the offense or the ultimate facts which resulted in the dismissal to be able to determine if the disqualification of the director/officer concerned is warranted or not. The evaluation of the case shall be made for the purpose of determining if disqualification would be appropriate and not for the purpose of passing judgment on the findings and decision of the entity concerned. The appropriate supervising department of the Bangko Sentral may decide to recommend to the Monetary Board a penalty lower than disqualification (e.g., reprimand, suspension, etc.) if, in its judgment the act committed or omitted by the director officer concerned does not warrant disqualification.

- h. All other cases of disqualification, whether permanent or temporary shall be elevated to the Monetary Board for approval and shall be subject to the procedures provided in paragraphs “a”, “b”, “c” and “d” above.
- i. Upon approval by the Monetary Board, the concerned director/officer shall be informed by the appropriate supervising department of the Bangko Sentral in writing either by personal service or through registered mail with registry return receipt card, at his/her last known address of his/her disqualification from being elected/appointed as director/officer in any FI under the supervision of Bangko Sentral and/or of his/her inclusion in the masterlist of watchlisted persons so disqualified.
- j. The board of directors of the concerned institution shall be immediately informed of cases of disqualification approved by the Monetary Board and shall be directed to act thereon not later than the following board meeting. Within seventy-two (72) hours thereafter, the corporate secretary shall report to the Governor of the Bangko Sentral through the appropriate supervising department of the Bangko Sentral the action taken by the board on the director/officer involved.
- k. Persons who are elected or appointed as director or officer in any of the Bangko Sentral-supervised institutions for the first time but are subject to any of the grounds for disqualification provided for under Sec. 113-N, shall be afforded the procedural due process prescribed above.
- l. Whenever a director/officer is cleared in the process mentioned under Item “c” above or, when the ground for disqualification ceases to exist, he/she would be eligible to become director or officer of any bank, QB, trust entity or any institution under the supervision of the Bangko Sentral only upon prior approval by the Monetary Board. It shall be the responsibility of the appropriate supervising department of the Bangko Sentral to elevate to the Monetary Board the lifting of the disqualification of the concerned director/officer and his/her delisting from the masterlist of watchlisted persons.

Effect of possession of disqualifications. Directors/officers elected or appointed possessing any of the disqualifications as enumerated herein, shall vacate their respective positions immediately.

Watchlisting. To provide the Bangko Sentral with a central information file to be used as reference in passing upon and reviewing the qualifications of persons elected or appointed as trustee or officer of an institution under the supervisory and regulatory powers of the Bangko Sentral, the appropriate supervising department of the Bangko Sentral shall maintain a watchlist of disqualified directors/trustees/officers under the following procedures:

- a. **Watchlist categories.** Watchlisting shall be categorized as follows:
 - (1) Disqualification File “A” (Permanent) – Directors/trustees/officers/employees permanently disqualified by the Monetary Board from holding a director/trustee/officer position.
 - (2) Disqualification File “B” (Temporary) – Directors/trustees/officers/employees temporarily disqualified by the Monetary Board from holding a director/trustee/officer position.
- b. **Inclusion of directors/trustees/officers/employees in the watchlist.** Upon recommendation by the appropriate supervising department of the Bangko Sentral, the inclusion of directors/trustees/officers/employees in watchlist disqualification files “A” and “B” on the basis of decisions, actions or reports of the courts, institutions under the supervisory and regulatory powers of the Bangko Sentral, NBI or any other administrative agencies shall first be approved by the Monetary Board.
- c. **Notification of directors/trustees/officers/employees.** Upon approval by the Monetary Board, the concerned director/trustee/officer/employee shall be informed through registered mail, with registry return receipt card, at his last known address of his inclusion in the masterlist of watchlisted persons disqualified to be a director/trustee/officer in any institution under the supervisory and regulatory powers of the Bangko Sentral.
- d. **Confidentiality.** Watchlist files shall be for internal use only of the Bangko Sentral and may not be accessed or queried upon by outside parties including QBs, NBFIs with trust authority, trust corporations and such institutions under the supervisory and regulatory powers of the Bangko Sentral, except with the authority of the person concerned (without prejudice to the authority of the Governor and the Monetary Board to authorize release of the information) and with the approval of the concerned supervising Department Head or supervising Subsector Head or the Deputy Governor, supervising or the Governor, or the Monetary Board.

The Bangko Sentral will disclose information on the person included in its watchlist files only upon submission of a duly notarized authorization from the concerned person and approval of such request by the concerned supervising Department Head or supervising Subsector Head or the Deputy Governor, supervising or the Governor or the Monetary Board. The prescribed authorization form to be submitted to the appropriate supervising department of the Bangko Sentral is in *Appendix Q-44*.

FIs can gain access to said information in the said watchlist for the sole purpose of screening their nominees/applicants for directors/officers and/or confirming their elected directors and appointed officers. FIs must obtain the said authorization on an individual basis.

- e. *Delisting.* All delistings shall be approved by the Monetary Board upon recommendation of the appropriate supervising department of the Bangko Sentral except in cases of persons known to be dead where delisting shall be automatic upon proof of death and need not be elevated to the Monetary Board. Delisting may be approved by the Monetary Board in the following cases:

(1) Watchlist -Disqualification File “B” (Temporary) –

- (a) After the lapse of the specific period of disqualification;
- (b) When the conviction by the court for crimes involving dishonesty, breach of trust and/or violation of banking laws becomes final and executory, in which case the director/trustee/officer/employee is relisted to Watchlist – Disqualification File “A” (Permanent); or
- (c) Upon favorable decision or clearance by the appropriate body, i.e., court, NBI, institutions under the supervisory and regulatory powers of the Bangko Sentral, or such other agency/body where the concerned individual had derogatory record.

Directors/trustees/officers/employees delisted from the Watchlist – Disqualification File “B” other than those upgraded to Watchlist – Disqualification File “A” shall be eligible for re-employment with any institution under the supervisory and regulatory powers of the Bangko Sentral.

C. RISK MANAGEMENT SYSTEM

121-N SUPERVISION BY RISKS

The guidelines on supervision by risk in *Appendix Q-41* which provide guidance on how QBs should identify, measure, monitor and control risks shall govern the supervision by risks of FIs to the extent applicable.

The guidelines set forth the expectations of the Bangko Sentral with respect to the management of risks and are intended to provide more consistency in how the risk-focused supervision function is applied to these risks. The Bangko Sentral will review the risks to ensure that an FI’s internal risk management processes are integrated and comprehensive. All FIs should follow the guidance in risk management efforts.

122-N CREDIT RISK MANAGEMENT

It is the policy of the Bangko Sentral to ensure that BSFIs under its supervision have adequate and effective credit risk management systems commensurate to their credit risk-taking activities. Towards this end, the following guidelines on credit risk management set forth the expectations of the Bangko Sentral with respect to the comprehensive management of credit risk. The guidelines further articulate sound principles and practices that shall be embedded in the credit risk management framework of BSFIs and shall cover the following areas: a) establishing an appropriate credit risk environment; b) operating under a sound credit granting process; and c) maintaining appropriate credit administration, measurement, monitoring and control processes over credit risk. While FIs may employ different approaches in the management of their credit risk, the Bangko Sentral expects that all these areas are effectively addressed.

For purposes of these guidelines, FIs refer to UBs, KBs, TBs, RB and Coop Banks and their respective credit-granting financial subsidiaries (if any) as well as stand-alone QBs.

Evaluation of credit risk management system. The Bangko Sentral shall evaluate the FI’s credit risk management system not only at the level of individual legal entities but also across the subsidiaries within the consolidated banking organization. It will not restrict the scope of the credit risk-taking activities of an FI, so long as the FI is authorized to engage in such activities and:

- Understands, measures, monitors and controls the risk assumed;
- Adopts risk management practices whose sophistication and effectiveness are commensurate to the risk being taken; and
- Maintains capital commensurate with the risk exposure assumed.

If the Bangko Sentral determines that an FI’s risk exposures are excessive relative to the FI’s capital, or that the risk assumed is not well-managed, the Bangko Sentral will direct the FI to reduce its exposure to an appropriate level and/or to strengthen its risk management systems. In evaluating the above parameters, the Bangko Sentral expects FIs to have sufficient knowledge, skills and appropriate system and technology necessary to understand and effectively manage their credit risk exposures.

The principles set forth in the credit risk management guidelines shall be used in determining the adequacy and effectiveness of an FI's credit risk management process and adequacy of capital relative to exposure. The Bangko Sentral shall consider the following factors:

- a. The FI's business strategies, operating environment, and the competencies of its officers and personnel; and
- b. The major sources of credit risk exposure and the complexity and level of risk posed by the assets, liabilities, and off-balance sheet activities.

I. Establishing an Appropriate Credit Risk Environment

Role of the board and senior management

- a. *Board of directors.* The board of directors shall be responsible for the approval and regular review of credit risk strategy and credit policy, as well as the oversight of the implementation of a comprehensive and effective credit risk management system appropriate for the size, complexity and scope of operations of an FI. The board shall ensure that the system provides for adequate policies, procedures and processes to identify, measure, monitor and control all credit risks inherent in an FI's products and activities, both at the individual and portfolio levels on a consistent and continuing basis; and that an independent assessment of the system is periodically performed, the results of which shall be reported to it or to a board-level committee for appropriate action.
- b. *Senior management.* Senior management shall be responsible for ensuring that the credit risk-taking activities of an FI are aligned with the credit risk strategy approved by the board of directors. It shall also be responsible for developing and implementing an FI's credit policies and procedures that lay down the conditions and guidelines for an effective credit risk management process, as well as proper channels of communication to ensure that these policies are clearly communicated and adhered to by all levels of the organization.

Credit risk management structure

- a. Senior management or an appropriate level of management shall implement a board-approved credit risk management structure that clearly delineates lines of authority, establish accountabilities and responsibilities of individuals involved in the different phases of the credit risk management process.
- b. Depending on the size, complexity and scope of credit activities, and in addition to the roles and responsibilities of the board and senior management, an FI's credit risk management organization may be broadly classified into three (3) functional lines of activities: the front, back and middle offices, to properly segregate accountabilities, ensure that no individual is assigned conflicting responsibilities, and effectively monitor and control the risks being taken.
- c. The front office function performs credit originating; recommends internal credit ratings, classifications and allowances for losses including changes thereon, when necessary; and the on-going monitoring of credit exposures of borrowers on a day-to-day basis.
- d. The back office provides support in the overall credit administration, including, among others: ensuring complete documentation, credit disbursement and recording of payments received; maintenance of credit and collateral files; and compilation of management information reports.
- e. The middle office performs risk management and control functions that are independent from the credit originating and administration functions. The risk management function provides meaningful inputs in policy formulation and limits setting; designs and implements the FI's internal credit risk rating system; and performs periodic exposure and exception monitoring. The risk management function shall report directly to the Risk Management Committee (RMC) or appropriate board-level committee or the board.
- f. An independent credit review is a function within the middle office that performs an unbiased assessment of the quality of individual credits and the aggregate credit portfolio, including appropriateness of credit risk rating, classification and adequacy of allowance for loan losses. In the case of simple FIs, such independent credit review function may be concurrently performed by qualified personnel fulfilling other independent control oversight functions (e.g., compliance, internal audit).
- g. The workout or problem loan management is another function within the middle office that is independent from the credit originating function to ensure that problem loans are managed effectively to minimize potential losses. For simple FIs, however, the function may still be performed by the credit originating function and/or unit responsible for monitoring the quality of such credit.
- h. The structure shall likewise provide for independent audits, i.e., internal audit and compliance, to conduct independent credit and compliance audits of the credit risk management system of the FI. The scope of internal audit shall include the evaluation of the independence and overall effectiveness of the credit review function.

- i. Regardless of the organizational structure that an FI adopts, the board shall ensure that the aforementioned key functions are considered and independence and control oversight functions are effective to avoid or address any potential conflict of interest.
- j. Personnel or staff involved in all phases of the credit risk management process shall be qualified, competent and have the necessary training and experience to exercise prudent judgment in assessing, managing and/or controlling credit risk, and a solid understanding of an FI's strategic direction, policies, procedures, risk tolerance and limits. Their qualification standards, roles and responsibilities shall be clearly defined in the credit operating policies and procedures manual of the FI. The board and senior management shall ensure that adequate resources and appropriate level of staffing are allocated to execute all kinds of credit activities.

Credit risk strategy. The credit risk strategy must reflect the FI's profitability and portfolio growth targets, and must be consistent with the credit risk tolerance and overall corporate strategy and business goals of the FI.

- a. In formulating the credit risk strategy, the FI shall articulate the desired market segments and types of credit exposures (e.g., commercial credits, retail credits, real estate, investments, trading products, credit commitments and/or guarantees); specific characteristics of clients, economic sector, geographical location; the portfolio mix that reflects the acceptable level of diversification and concentration; and consider the risk/reward trade-off by factoring in, to the greatest extent possible, price and non-price (e.g. collateral, restrictive covenants, etc.) terms as well as likely downside scenarios and their possible impact on the obligors.

The FI shall likewise define acceptable and unacceptable types of credits, clients, activities, transactions and behaviors that could result or potentially result in conflict of interest, personal gain at the expense of the FI, or unethical conduct.

- b. The credit risk strategy shall consider the cyclical aspects of the economy and the varying effects of the economic cycle on the credit portfolio of the FI.

Credit policies, processes and procedures. FIs shall have in place a sound, comprehensive and clearly defined credit policies, processes and procedures consistent with prudent standards, practices, and relevant regulatory requirements adequate for the size, complexity and scope of an FI's operations. The board-approved policies, processes and procedures shall cover all phases of the credit risk management system.

- a. FIs shall establish appropriate processes and procedures to implement the credit policy and strategy. These processes and procedures, as well as the credit policy, shall be documented in sufficient detail, effectively communicated throughout the organization to provide guidance to staff, and periodically reviewed and updated to take into account new activities and products, as well as new lending approaches. Subsequent major changes must be approved by the board.
- b. The credit policy shall likewise provide for the maintenance of an audit trail documenting that the credit risk management process was properly observed and identifying the unit, individual(s) and/or committee(s) providing input into the process.
- c. The credit culture, which reflects the FI's credit values, beliefs and behaviors, shall likewise be articulated in the credit policy and communicated to credit officers and staff at all levels through the strategic plan. The credit practices shall be assessed periodically to ensure that the officers and staff conform to the desired standard and value.

II. Operating under a Sound Credit Granting Process

Credit approval process. The approval process for new credits as well as the amendment, renewal and refinancing of existing credit exposures shall be aligned with the credit risk management structure and clearly articulated in an FI's written credit policy. The process shall include the different levels of appropriate approving authority and the corresponding approving authority limits, which shall be commensurate with the risks of the credit exposures, as well as expertise of the approving individuals involved. It shall also include an escalation process where approval for restructuring of credits, policy exceptions or excesses in internal limits is escalated to units/officer with higher authorities. Further, there shall be proper coordination of relevant units and individuals and sufficient controls to ensure acceptable credit quality at origination.

Credit granting and loan evaluation/analysis process and underwriting standards. Consistent with safe and sound banking practice, an FI shall grant credits only in amounts and for the periods of time essential for the effective completion of the activity to be financed and after ascertaining that the obligor¹ is capable of fulfilling his commitments to the FI. Towards this end, an FI shall establish well-defined credit-granting criteria and underwriting standards, which shall include a clear indication of the FI's target market and a thorough understanding of the obligor or counterparty, as well as the purpose and structure of the credit and its source of repayment.

¹ Obligor refers to an individual or entity that owes another person or entity a certain debt or duty. For purposes of these guidelines, obligor can also be used interchangeably with borrower or debtor.

- a. FIs shall conduct comprehensive assessments of the creditworthiness of their obligors, and shall not put undue reliance on external credit assessments. Credit shall be granted on the basis of the primary source of loan repayment or cash flow, integrity and reputation of the obligor or counterparty as well as their legal capacity to assume the liability.
- b. Depending on the type of credit exposure and the nature of the credit relationship, the factors to be considered and documented in approving credits shall include, but are not limited to, the following:
 - (1) The purpose of the credit which shall be clearly stated in the credit application and in the contract between the FI and the obligor;
 - (2) The current risk profile (including the nature and aggregate amounts of risks, risk rating or credit score, pricing information) of the borrower, collateral, other credit enhancements and its sensitivity to economic and market developments;
 - (3) The sources of repayment, repayment history and current capacity to repay based on financial analysis from historical financial trends and indicators such as equity, profitability, turnover, leverage, and debt servicing ability via cash flow projections, under various scenarios;
 - (4) For commercial credits, the borrower's business expertise, its credit relationships including its shareholders and company directors, as applicable, and the status of the borrower's economic sector and its track record vis-à-vis industry peers;
 - (5) The proposed terms and conditions of the credit (i.e., type of financing, tenor, repayment structure, acceptable collateral) including covenants designed to limit changes in the future risk profile of the obligor;
 - (6) Use of credit reports; and
 - (7) Where applicable, the adequacy, valuation and enforceability of collateral or guarantees.
- c. In performing the financial analysis, FIs shall use, to the extent available, credible audited financial statements and other relevant documents and sources. FIs may opt to use financial information/data from other sources provided that the process for arriving at such disposition and an evaluation of how much reliance or value was attached into the financial information used is clearly articulated and documented.
- d. When participating in loan syndications, an FI shall not place undue reliance on the credit analysis done by the lead underwriter and shall perform its own analysis and review of syndicate terms. It shall analyze the risk and return on syndicated loans in the same manner as directly sourced loans and ensure that the loan is consistent with its credit risk strategy.
- e. When an FI purchases securities issued by an obligor that is different from the counterparty (e.g. asset swaps), it shall also analyze issuer risk. For treasury and capital market activities, the structure of products and transactions shall be analyzed to determine the source and volatility of credit exposure.
- f. When granting consumer credits, an FI shall conduct its credit assessment in a holistic and prudent manner, taking into account all relevant factors that could influence the prospect for the loan to be repaid according to its terms and conditions. This shall include an appropriate consideration of the potential obligor's other debt obligations and repayment history and an assessment of whether the loan can be expected to be repaid from the potential obligor's own resources without causing undue hardship and over-indebtedness. Adequate checkings, including with relevant credit bureaus, shall be made to verify the obligor's credit applications and repayment records.
- g. FIs shall factor into their credit-granting decisions the likelihood of providing allowance for identified and expected losses and holding adequate capital to absorb unexpected losses for credits with apparent weaknesses.
- h. FIs may utilize physical collateral (like real estate), financial guarantees and other instruments to help mitigate risk in credit exposures. However, these shall not substitute for a comprehensive assessment of the obligor or fully compensate for insufficient information.
- i. FIs shall establish adequate policies in determining the acceptability of various forms of credit mitigants and appropriate collateral value limits; procedures for regularly assessing the value of physical collaterals and availability of financial guarantees; and a process to ensure that these are, and continue to be, enforceable, realizable and marketable. Finally, FIs need to consider that the realizable value of the physical collateral or the quality of financial guarantees and other credit mitigants may be impaired by the same factors that have led to the diminished recoverability of the credit.

In the case of guarantees, the level of coverage being provided in relation to the credit quality, financial and legal capacity of the guarantor shall be evaluated.

For credit exposures secured by deposits, FIs shall likewise require obligors to provide a written waiver of his rights under existing laws to the confidentiality of his deposits, and make this available for inspection and/or examination by the appropriate supervising department of the Bangko Sentral.

- j. Netting arrangements also mitigate risks, especially in interbank and off-balance sheet transactions. In order to actually reduce risk, such agreements need to be sound and legally enforceable in all relevant jurisdictions.
- k. For more complex credit risk exposures, (e.g., asset securitization, credit derivatives, credit-linked notes, credit granted internationally, etc.), a more sophisticated tool shall be used for identifying, measuring, monitoring and controlling credit, country and transfer risks. Each complex credit risk product or activity, especially those that are new to banking, shall be subject to a thorough analysis in addition to the regular assessment that is done with traditional credit-granting activities.
- l. For new products and activities, the credit risk shall be appropriately identified and managed through a formal risk assessment program. FIs shall ensure that they fully understand the risk involved in new products and activities and put in place adequate policies, procedures and controls before being introduced or undertaken.

Renewal or extension of maturity date of credits. FIs shall adopt and adhere to the following explicit standards that control the use of renewals and extensions of maturity date of credits:

- a. Credits and other accommodations shall only be renewed or its maturity date extended:
 - (1) Upon re-establishment of the creditworthiness of the obligor using the same credit-granting criteria for the evaluation and approval of new loans; and
 - (2) When the corresponding accrued interest receivable has been paid.
- b. A policy on clean-up of principal, either partial or full, shall be established and appropriate controls put in place to prevent continuous renewal or extension over a long period of time without reduction in principal; otherwise, such credits and other accommodations shall be subject to classification and allowance for credit losses.
- c. Specific and reasonable standards shall be provided for renewals or extensions of certain types of credit exposures that take into consideration the following factors:
 - (1) Borrower's normal operating, trade or production cycle, in the case of credit exposures for working capital, trade financing, production, and/or other similar purposes to ensure a realistic repayment schedule;
 - (2) Transaction history such as frequency of renewal or extension, rate of utilization of facilities granted, and business requirements;
 - (3) Status of collateral and other guarantees in the case of secured credit exposures, including requiring the FI to re-appraise the property especially when there is a material change in market conditions or in the physical aspects of the property that threatens the collateral protection; and
 - (4) Age of the account, utilization rate, average balance carried, delinquency status, payment history, and account profitability (if available) in the case of retail credits.

Credit limits, large exposures, and credit risk concentrations An FI is exposed to various forms of credit risk concentration which if not properly managed, monitored and controlled may cause significant losses that could threaten its financial strength and undermine public confidence in the FI. Concentration risk can arise from excessive exposures to individual obligors, groups of connected counterparties and groups of counterparties with similar characteristics (e.g., counterparties in specific geographical locations, economic or industry sectors) or entities in a foreign country or a group of countries with strongly interrelated economies.

While concentration of credit risks is inherent in banking and cannot be totally eliminated, this can be mitigated by adopting policies and processes that would limit and control credit exposures and employing portfolio diversification strategies. Policies and procedures may include, but are not limited to the following:

- a. Policies and procedures for identifying, reviewing, managing and reporting large exposures and concentration risks of the FI.
- b. Segmenting its portfolio into the following diverse categories or such other segmentations consistent with the FI's credit strategy:

- (1) Various types of borrowers/counterparties or loan category (e.g., government, banks and other FIs, corporate and individual borrowers, including exchanges, electronic communication networks or ECNs and clearing houses);
 - (2) A group of connected borrowers/counterparties (includes aggregating exposures to groups of accounts exhibiting financial or economic interdependence, including corporate or non-corporate, where they are under common ownership or control or with strong connecting links, e.g. common management, familial ties);
 - (3) Individual industry sectors;
 - (4) Geographic regions or countries;
 - (5) Loan structure, collateral, and tenor; and
 - (6) Various types of investments, including other credit instruments in the trading books and off-balance sheet transactions.
- c. Defining limit structure on each of the foregoing categories. Limits shall meaningfully aggregate credit exposures, both in the banking, trading book and on and off the balance sheet and shall be reasonable in relation to the FI's level of risk tolerance, historical loss experience, capital and resources. Such limits can be based in part on the internal risk rating assigned to the obligor or counterparty.
 - d. Procedures shall ensure that limits are not exceeded and are clearly communicated, periodically reviewed and modified, as appropriate. Should exceptions to policy be allowed, the circumstances under which limits may be exceeded and the party authorized to approve such excesses shall be clearly articulated in the credit policy.

Credits granted to related parties. Consistent with sound corporate governance practices, the board and senior management shall articulate and implement clear policies in handling transactions with directors, officers, stockholders, their related interests (DOSRI), the FI's subsidiaries and affiliates, and other related parties, ensuring that there is effective compliance with existing laws, rules, and regulations at all times and that no stakeholder is unduly disadvantaged.

- a. All extensions of credit must be made on an arm's-length basis, in accordance with the FI's credit-granting criteria and in the regular course of business, and upon terms not less favorable to the FI than those offered to non-related borrowers.
- b. FI policies shall cover standards that require directors and/or officers to avoid placing themselves in a position that creates conflict of interest or the appearance of conflict of interest. The board and management shall likewise establish and implement policies that require full disclosure of personal interests that they may have in credit transactions. Directors and officers with personal interest in a transaction shall not participate in any deliberation, approval, or voting on the matter.

III. Maintaining an Appropriate Credit Administration, Measurement, and Monitoring

Credit administration. FIs shall have in place a system for the ongoing administration of their various credit portfolios. *Credit administration* refers to the back office activities that support and control extension and maintenance of credit. FIs shall ensure the efficiency and effectiveness of the following credit administration functions:

- a. Credit documentation. Procedures shall be put in place to ensure completeness of documentation in accordance with policy including a file documentation tickler system;
- b. Disbursement. Proper approval shall be obtained and complete documentation ensured prior to disbursement. Exceptions, if any, shall be duly approved;
- c. Billing and repayment. Payments received shall be properly recorded. Measures shall be in place to ensure that late payments are tracked and collected; and
- d. Maintenance of credit files. Credit files shall include sufficient and updated information necessary to ascertain the financial condition of the obligor or counterparty and include documents covering the history of an FI's relationship with the obligor. All loan and collateral documents shall be kept in a secured area under joint custody.

Credit risk measurement, validation and stress testing. FIs shall adopt sound and appropriate risk measurement methodologies which shall provide a framework to control and monitor the quality of credit as well as total loan portfolio.

- a. *Internal credit risk rating system* FIs shall develop and utilize an internal risk rating system appropriate to the nature, size and complexity of the FI's activities in order to help the board and senior management differentiate risks across the individual credits and groups and to facilitate informed decision making.

FIs shall have sophisticated rating systems involving sufficiently granular rating grades. Simple FIs may adopt simpler systems. In all cases, however, FIs shall demonstrate the influence of the internal risk rating system in the following important functions: i) credit approval and underwriting; ii) loan pricing; iii) relationship management and credit administration; iv) allowance for credit losses and capital adequacy; and v) portfolio management and board reporting.

Internal risk rating systems shall generally observe the following standards:

- (1) It must be operationally integrated into the FI's internal credit risk management process. Its output shall accordingly be an integral part of the process of evaluation and review of prospective and existing exposures. Credit underwriting criteria shall become progressively more stringent as credit rating declines;
- (2) It must be fully documented and shall address topics such as coverage, rating criteria, responsibilities of parties involved in the ratings process, definition of what constitutes a rating exception, parties that have authority to approve exceptions, frequency of rating reviews, and management oversight of the rating process. In addition, FIs must document the rationale for its choice of rating criteria and must be able to provide analyses demonstrating that the rating criteria and procedures are likely to result in ratings that meaningfully differentiate risk;
- (3) All credit exposures shall be rated for risk. Where individual credit risk ratings are not assigned, e.g., small-denomination performing loans, FIs shall assign the portfolio of such exposures a composite credit risk rating that adequately defines its risk, i.e., repayment capacity and/or loss potential;
- (4) The board shall receive sufficient information to oversee management's implementation of the process. Migration analysis/transition matrix of ratings shall be regularly reported to show the actual performance of the rating system over time;
- (5) The risk rating system shall encompass an adequate number of ratings. FIs shall ensure that "pass" credits are sufficiently differentiated and more precisely defined. There shall be a proper process to map the internal rating system to regulatory classification. The FI shall readjust the mapping after every review of its internal risk rating methodology. For FIs whose internal rating systems have several pass grades, special mention loans may pertain to several risk ratings while substandard, doubtful and loss generally correspond to the lowest three risk ratings;
- (6) Risk ratings must be reasonable, timely and dynamic. Ratings shall be reviewed at least annually and shall be modified whenever the borrower's creditworthiness changes;
- (7) The rating criteria shall reflect an established blend of qualitative (e.g., the quality of management, willingness to repay, etc.) and quantitative (e.g., cash flow, profitability, and leverage) factors. The criteria for assigning each rating shall be clearly defined;
- (8) The rating policy shall indicate a time horizon for the risk rating. Generally, the time horizon used for probability of default estimation is one year. However, FIs may use a different time horizon to cover one business cycle;
- (9) Ratings shall reflect the risks posed by both the borrower's expected performance and the transaction's structure. The ratings output of internal credit risk rating systems must contain both a borrower and a facility dimension. The borrower dimension shall focus on factors that affect the inherent credit quality of each borrower. The facility dimension, on the other hand, shall focus on security/collateral arrangements and other similar risk influencing factors of each transaction;
- (10) The rating assigned to a credit shall be well supported and documented in the credit file; and
- (11) Rating histories on individual accounts shall be maintained, which shall include the ratings of the account, the dates the ratings were assigned, the methodology and key data used to derive the ratings and the analyst who gave the ratings. The identity of borrowers and facilities that default, and the timing and circumstances of such defaults, must be retained. FIs must also retain data on the realized default rates associated with rating grades and ratings migration in order to eventually track the predictive power of the risk rating system.

As used in these standards, a default is considered to have occurred in the following cases:

- (a) If a credit obligation is considered non-performing under existing rules and regulations;
- (b) If a borrower/obligor has sought or has been placed in bankruptcy, has been found insolvent, or has ceased operations in the case of businesses;

- (c) If the bank sells a credit obligation at a material credit-related loss, i.e., excluding gains and losses due to interest rate movements. Banks' board-approved internal policies that govern the use of their internal rating systems must specifically define when a material credit-related loss¹ occurs; and
 - (d) If a credit obligation of a borrower/obligor is considered to be in default, all credit obligations of the borrower/obligor with the same bank shall also be considered to be in default.
- b. *Credit scoring model.* FIs may use a credit scoring model in measuring credit risk for pools of loans that are similar in purpose, risk characteristics and/or general exposure to groups, industries or geographical locations granted in small denomination: *Provided*, That the FI ensures that the credit scoring model sufficiently captures the credit behavior and other characteristics of the targeted borrowers. These loans include retail loans, loans to micro and small enterprises, microfinance loans and unsecured small business loans, and consumer loans (i.e., housing loans, car or auto loans, loans for the purchase of appliance and furniture and fixtures, loans for payment of educational and hospital bills, salary loans and loans for personal consumption, including credit card loans). Risks for these types of portfolio are generally measured at portfolio level.
 - c. *Other credit risk measurement/methodologies.* FIs may likewise adopt other appropriate credit risk measurement methodologies/models to estimate expected losses from credit portfolio.
 - d. *Validation of internal rating systems.* Validation is a process to assess the performance of risk component measurement systems consistently and meaningfully, to ensure that the realized risk measures are within an expected range. It not only increases the reliability of a model, but also promotes improvements and a clearer understanding of a model's strengths and weaknesses among management and user groups.

FIs shall establish comprehensive policies and procedures on effective validation of the rating system (e.g. review of model design/developmental evidence, backtesting, benchmarking and assessment of the discriminatory power of the ratings) and rating process (e.g. review of data quality, internal reporting, problem handling and how the rating system is used by the credit officers). This shall be adequately documented and results reported to appropriate levels of the FI. The process shall likewise be subject to periodic review by qualified, independent individuals.

Moreover, FIs shall periodically conduct back-testing in evaluating the quality of their credit risk assessment models and establish internal tolerance limits for differences between expected and actual outcomes and processes for updating limits as conditions warrant. The policy shall also include remedial actions to be taken when risk tolerances are exceeded.

- e. *Stress testing.* When appropriate, an FI shall conduct stress testing and scenario analysis of its credit portfolio including off-balance sheet exposures, both at an individual and group levels to assess the impact of market dislocations and changes in economic conditions or key risk factors on its profile and earnings.
 - (1) Whether stress tests are performed manually, or through automated modeling techniques, FIs shall ensure that:
 - (a) Policies and processes –
 - (i) Are adequate and clearly documented, rational, easily understood and approved by the board and senior management; and
 - (ii) Includes methodology for constructing appropriate and plausible single and multi-factor stress tests, and possible events, scenarios, or future changes in economic conditions that could have adverse impact on credit exposures, and assess the FI's ability to withstand such changes;
 - (b) The inputs are reliable and relate directly to the subject portfolios;
 - (c) The process includes frequency of test and procedures for convening periodic meetings to identify the principal risk factors affecting the portfolio, setting loss limits and the authority for setting these limits, and monitoring stress loss limits;
 - (d) Assumptions are well documented and conservative;
 - (e) Models (if any) are subject to a comprehensive validation process;
 - (f) Exceptions to limits and stress testing results are reported to the senior management and board of directors for appropriate remedial actions; and

¹ This refers to economic loss, thus shall include discount effects, as well as direct and indirect costs associated with collecting on the credit obligation. The FIs' board-approved internal policies that govern the use of their internal rating systems must include specific policies and procedures that shall be followed in the determination of economic loss.

- (g) Results are discussed and actions and resolutions made arising from the discussion.
- (2) The linkages between different categories of risk that are likely to emerge in times of crisis shall be fully identified. In case of adverse circumstances, there may be a substantial correlation of various risks, especially credit, liquidity, and market risk.
- f. FIs shall develop a contingency plan for scenarios and outcomes that involve credit risk in excess of the FI's established risk tolerances. This plan may include increasing monitoring, limiting portfolio growth, and hedging or exit strategies for both significant individual transactions and key portfolio segments.

Credit risk management information and reporting systems. FIs shall render accurate, reliable and timely information and reports. Thus, adequate management information and reporting systems shall be in place to identify and measure credit risk inherent in all on-and off-balance sheet activities and ensure the overall effectiveness of the risk management process. The information generated from such systems shall enable the board and all levels of management to fulfill their respective oversight roles, including determining the level of capital commensurate to the credit risk exposure of the FI.

- a. At a minimum, an effective management information system (MIS) shall enable FIs to:
 - (1) Provide adequate information on the quality and composition of the credit portfolio (including off-balance sheet accounts);
 - (2) Determine accurately the level of credit risk exposures of an FI through its various activities (e.g. renewal and extension of loans, collection process, status of delinquent accounts, write-offs, provisioning, among others);
 - (3) Timely identify and monitor credit risk concentrations, exposures approaching risk limits, exceptions to credit risk limits and overrides to ensure that policy and underwriting deviations as well as breaches and other potential problems are promptly reported to the board and management for appropriate corrective action;
 - (4) Aggregate credit exposures to individual borrowers and counterparties as well as to a group of accounts under common ownership or control;
 - (5) Permit additional analysis of the credit portfolio, including stress testing; and
 - (6) Maintain a database for research and use of analytical techniques, report exposures, track quality and account performances, and maintain limits.
- b. The credit policy shall clearly define the types of information and reports to be generated, frequency of reporting, deadline of submission, and the users/recipients of and personnel responsible for the preparation of such information and reports.
- c. FIs shall provide sufficient controls to ensure integrity of the MIS. Reports shall be periodically reviewed to ensure adequacy of scope and reliability and accuracy of the information generated. Internal audit shall also periodically assess the controls over MIS.

Credit monitoring. FIs shall develop and implement comprehensive processes, procedures and information systems to effectively monitor the condition and quality of individual credits and group of credits across the FIs' various portfolios. These shall include criteria that identify and report problem credits to reasonably assure that they are appropriately monitored as well as administered and provided for.

- a. The system shall be able to, among others, provide measures to ensure that the board and management are kept informed of the current financial condition of the borrower and the various credit portfolios; loan covenants are consistently adhered to; cash flow projections meet repayment requirements; prudential and internal limits are not exceeded; portfolios are stress-tested; and potential problem credits and other transactions are identified. Exceptions, breaches and potential problems noted shall be promptly reported to management for corrective action, possible classification and/or provisioning and more frequent monitoring.
- b. Personnel or unit assigned to monitor, on an ongoing basis, credit quality and underlying physical collateral and financial guarantees shall ensure that relevant information is communicated to those personnel or unit assigned to provide internal credit risk ratings.
- c. FIs shall perform post-validation of the actual use of funds to determine that credits were drawn down for their intended purposes. Should funds be diverted for purposes other than what has been applied for and approved, the FI shall immediately re-evaluate its approval or if necessary, terminate the credit accommodation and demand immediate repayment of the obligation.

- d. FIs shall monitor individual and aggregate exposures against prudential and internal limits on a regular basis. Large exposures shall be subject to more intensive monitoring.
- e. FIs shall develop a system that allows monitoring of asset quality indicators (e.g. non-performing loans, collateral values, etc.) and trends in loan growth to identify potential weaknesses in the portfolio.

IV. Maintaining an Appropriate Credit Control Process

Credit review process

- a. FIs shall implement an independent and objective credit review process to determine that credits are granted in accordance with the FI's policies; assess the overall asset quality, including appropriateness of classification and adequacy of loan-loss provisioning; determine trends; and identify problems (e.g., risk concentration, risk migration, deficiencies in credit administration and monitoring processes).
- b. FIs may employ an appropriate sampling methodology to determine the scope of credit review. At a minimum, credit review shall be conducted on all individual obligors with substantial exposures, and on a consolidated group basis to factor in the business connections among related entities in a borrowing group. Credit review for credits that are similar in purpose or risk characteristics may be performed on a portfolio basis. The portfolio sample selected for review shall provide reasonable assurance that all major credit risk issues have been assessed and valid conclusions can be drawn. Moreover, sampling methodology shall be documented and periodically reviewed to ensure its quality and minimize bias.
- c. Credit review shall also evaluate credit administration function and ensure that credit files are complete and updated, and all loan approvals and other necessary documents have been obtained.
- d. Credit reviews shall be performed at least annually, and more frequently for substantial exposures, new accounts and classified accounts. Assessments shall be promptly discussed with the officers responsible for the credit activities and escalated to senior management.
- e. Results of the credit review shall be promptly reported to the board of directors or the appropriate board-level committee for their appropriate action. The board shall mandate and track the implementation of corrective action in instances of unresolved deficiencies and breaches in policies and procedures. Deficiencies shall be addressed in a timely manner and monitored until resolved/corrected.

Credit classification and provisioning.

- a. *Classification of loans and other credit accommodations*¹. FIs shall have in place a reliable credit classification system to promptly identify deteriorating credit exposures and determine appropriate allowance for credit losses. Classification can be done on the basis of internal credit risk rating system, including payment delinquency status. All credit classifications, not only those reflecting severe credit deterioration, shall be considered in determining the appropriate allowance for credit losses.
- (1) All FIs shall map their classification of loans and other credit accommodations against the regulatory classification criteria provided below. However, FIs are encouraged and not precluded from using additional criteria appropriate to their internal credit risk rating system provided they are consistent with the regulatory classification as follows:
- (a) *Pass*. These are loans and other credit accommodations that do not have a greater-than-normal credit risk. The borrower has the apparent ability and willingness to satisfy his obligations in full and therefore no loss in ultimate collection is anticipated.
 - (b) *Especially mentioned (EM)*. These are loans and other credit accommodations that have potential weaknesses that deserve management's close attention. If left uncorrected, these weaknesses may affect the repayment of the loan. Some degree of structural weakness may be found in virtually any aspect of the loan arrangement or type of loan, and the presence of one (or more) need not be indicative of an overall credit weakness deserving criticism. Instead, the FI must evaluate the relative importance of such factors in the context of the borrower's overall financial strength, the condition of the borrower's industry or market, and the borrower's total relationship with the FI. Basic characteristics include, but are not limited to, any of the following:
 - (i) Deficiencies in underwriting, documentation, structure and/or credit administration that can compromise an FI's ability to control credit relationship if economic or other events adversely affect the borrower;

¹ Other credit accommodations include other credits such as accounts receivables, sales contract receivables, accrued interest receivables and advances.

- (ii) Continuous renewal/extension without reduction in principal, except when the capacity to pay of the borrower has been clearly re-established;
 - (iii) Adverse economic or market conditions, that in the future may affect the borrower's ability to meet scheduled repayments. Loans and other credit accommodations affected by these characteristics may retain the EM classification in the next examination should the same adverse conditions persist, provided that the loans remain current; or
 - (iv) Intermittent delays or inadequate repayment of principal, interest or periodic amortizations of loans and other credit accommodations granted by the FI or by other FIs, where such information is available.
- (c) *Substandard*. These are loans and other credit accommodations that have well-defined weakness(es), that may jeopardize repayment/liquidation in full, either in respect of the business, cash flow or financial position, which may include adverse trends or developments that affect willingness or repayment ability of the borrower. Basic characteristics include any of the following:
- (i) Weak financial condition and results of operation that leads to the borrower's inability to generate sufficient cash flow for debt servicing, except for start-up firms which shall be evaluated on a case-to-case basis;
 - (ii) Past due secured loans and other credit accommodations where properties offered as collateral have been found with defects as to ownership or with other adverse information;
 - (iii) Breach of any key financial covenants/agreements that will adversely affect the capacity to pay of the borrower; or
 - (iv) Classified "*Especially Mentioned*" as of the last credit review without adequate corrective action.
- (d) *Doubtful*. These are loans and other credit accommodations that exhibit more severe weaknesses than those classified as "*Substandard*", whose characteristics on the basis of currently known facts, conditions and values make collection or liquidation highly improbable, however, the exact amount remains undeterminable as yet. Classification as "*Loss*" is deferred because of specific pending factors which may strengthen the assets. Some basic characteristics include any of the following:
- (i) Secured loans and other credit accommodations where properties offered as collateral are either subject to an adverse claim rendering settlement of the loan through foreclosure doubtful or whose values have materially declined without the borrower offering additional collateral for the loan/s to cover the deficiency; or
 - (ii) Loans and other credit accommodations wherein the possibility of loss is extremely high but because of certain important and reasonable pending factors (i.e., merger, acquisition, or liquidation procedures, capital infusion, perfecting liens on additional collateral, and refinancing plans) that may work to the advantage and strengthening of the asset, its classification as an estimated loss is deferred until the next credit review.
- (e) *Loss*. These are loans and other credit accommodations which are considered uncollectible or worthless and of such little value that their continuance as bankable assets is not warranted although the loans may have some recovery or salvage value. This shall be viewed as a transitional category for loans and other credit accommodations which have been identified as requiring write-off during the current reporting period even though partial recovery may be obtained in the future. Their basic characteristics include any of the following:
- (i) When the borrower's and co-makers'/guarantors' whereabouts are unknown, or they are insolvent, or their earning power is permanently impaired; or
 - (ii) Where the collaterals securing the loans are without recoverable values.
- (2) Split classification may apply for non-performing secured loans and other credit accommodations, depending on the recoverability and liquidity of the collateral. The secured portion may be classified as "*Substandard*" or "*Doubtful*", as appropriate, while the unsecured portion shall be classified "*Loss*" if there is no other source of payment other than the collateral.
- (3) In the case of syndicated loans, each participating FI shall maintain credit information on the borrower, and grade and make provision for its portion of the syndicated loan in accordance with the requirements of these guidelines. The lead FI shall provide participating FIs with the credit information on the borrower upon request by the participating FI and inform the latter if the loan will be classified so as to achieve uniform classification of the syndicated loan.

- (4) FIs may upgrade a classified loan or restore it to a pass rating; *Provided*, That it does so on the basis of a written policy on the upgrading of classification or rating and the credit review function is reliable and effective. Such policy shall include a comprehensive analysis of the repayment capability/financial strength of the borrower and the corrective actions made on the weaknesses noted to support the upgrade in classification. Upgrading may be supported by the following developments:
- (a) When all arrears or missed payments on principal and interests including penalties have been cleared rendering the account to be fully compliant with the original terms of the loan;
 - (b) Upon establishing that the weaknesses were substantially addressed and that the borrower has exhibited a sustained trend of improvement and willingness and capability to fully pay its loans and advances in a timely manner to justify the upgrade;
 - (c) Offering of new or additional collateral security; or
 - (d) In the case of restructured loans, the classification shall only be upgraded after establishing a satisfactory track record of at least six (6) consecutive payments of the required amortization of principal and interest, or until the borrower has sufficiently exhibited that the loan will be fully repaid (continued collection in accordance with the terms of the loans is expected) and the loan meets the criteria of lower loan classification.

b. *Loan loss estimation methodology, provisioning and allowance for credit losses*

- (1) All FIs shall develop and document a sound loan loss methodology that can reasonably estimate provisions for loans and other credit accommodations and risk assets in a timely manner, using their experience and research and this guidance to ensure that the specific and collective allowance for credit losses¹ (ACL) are adequate and approximates the expected losses in their credit portfolio.

An FI's loan loss methodology shall consider the following:

- (a) Written policies and procedures for the credit risk systems and controls inherent in the methodology, including roles and responsibilities of the FI's board of directors and senior management;
- (b) A detailed analysis of the entire loan portfolio, including off-balance sheet facilities, performed on a regular basis;
- (c) A realistic view of its lending activities and adequately consider uncertainty and risks inherent in those activities in preparing accounting information. Loan accounting policies and practices shall be selected and applied in a consistent way that reasonably assures that loan and loan loss provision information is reliable and verifiable;
- (d) Identification of loans to be evaluated individually and segmentation of the remaining portfolio into groups of loans with similar credit risk characteristics for collective assessment.
 - (i) *Individually assessed loans.* FIs shall establish a materiality threshold for significant credit exposures that will warrant an individual assessment, which threshold shall be regularly reviewed.

The loan loss estimates shall reflect consideration of the facts and circumstances that affect the repayment of each individual loan as of the evaluation date. The following factors are relevant in estimating loan losses for individually assessed loans:

- (aa) Significant financial difficulty of the borrower;
- (bb) Probable bankruptcy or other financial reorganization of the borrower;
- (cc) Breach of contract, such as a default or delinquency in interest or principal payments; or
- (dd) Concession granted by the FI, for economic or legal reasons relating to the borrower's financial difficulty, which would not otherwise be considered.

The methodology shall include procedures describing the determination and measurement of the amount of any impairment, the impairment measurement techniques available and steps performed to determine which technique is most appropriate in a given situation.

- (ii) *Collectively assessed loans.* FIs may use different methods to group loans for the purpose of assessing credit risk and valuation. More sophisticated credit risk assessment models or methodologies for estimating expected future cash flows, including credit risk grading processes,

¹ ACL represents the aggregate amount of individual and collectively assessed probable credit losses.

may combine several of the following characteristics: loan type, product type, market segment, estimated default probabilities or credit risk grading and classification, collateral type, geographical location and past-due status.

Estimated credit losses shall reflect consideration of the FI's historical net charge-off rate¹ of the groups, adjusted for changes in trends, conditions and other relevant factors that affect repayment of the loans in these groups as of the evaluation date, and applied consistently over time;

- (e) Methods used to determine whether and how loans individually evaluated, but not considered to be individually impaired, shall be grouped with other loan (excluding individually assessed loans that are impaired) that share similar credit risk characteristics for collective impairment evaluation;
- (f) The quality and net realizable values of physical collateral and other financial guarantees and credit risk mitigants incorporated in the loan agreement, where applicable;
- (g) Address the methods used to validate models for credit risk assessment;
- (h) The analyses, estimates, reviews and other provisioning methodology functions shall be performed by competent and well-trained personnel and be well documented, with clear explanations of the supporting analyses and rationale; and
- (i) *Use experienced credit judgment.* Assessment of expected losses shall not be based solely on prescriptive rules or formula but must be enhanced with experienced credit judgment by the appropriate levels of management² inasmuch as historical loss experience or observable data may be limited or not fully relevant to current circumstances. However, the scope for actual discretion shall be prudently within the following constraints:
 - (i) Experienced credit judgments shall be subject to established policies and procedures;
 - (ii) With approved and documented analytical framework for assessing loan quality applied consistently over time;
 - (iii) Estimates shall be based on reasonable and verifiable assumptions and supported by adequate documentation; and
 - (iv) Assumptions concerning the impact on borrowers of changes in general economic activity, both favorable and unfavorable, shall be made with sufficient prudence.

The method of determining loan loss provisions shall reasonably assure the timely recognition of loan losses. While historical loss experience and recent economic conditions are a reasonable starting point for the institution's analysis, these factors are not, by themselves, sufficient basis to determine the appropriate level of aggregate loan loss provisions. Management shall also consider any current factors that are likely to cause loan losses to differ from historical loss experience, including changes in the following:

- Lending policies and procedures, including underwriting standards and collection, charge-off, and recovery practices;
- International, national and local economic and business conditions and developments, including the condition of various market segments;
- Trend, volume and severity of past due loans and loans graded as low quality, as well as trends in the volume of impaired loans, troubled debt restructurings and other loan modifications;
- The experience, ability, and depth of lending management and staff;
- Changes related to new market segments and products;
- Quality of the FI's loan review system and the degree of oversight by senior management and board of directors;
- The existence and effect of any concentrations of credit, and changes in the level of such concentrations; and

¹ The historical net charge-off rate is generally based on the annualized historical gross loan charge-offs, less recoveries, recorded by the FI.

² There may be instances when no adjustments are needed to the data in the recognition and measurement of loan losses because the data are consistent with current conditions.

- Credit risk profile of the loan portfolio as a whole as well as the effect of external factors such as competition and legal and regulatory requirements on the level of estimated credit losses in the FI's current portfolio.

Experienced credit judgment shall also be used to determine an acceptable period that will yield reliable historical loss rates as loss rate periods shall not be restricted to a fixed time period to determine the average historical loss experience for any group of loans with similar credit risk characteristics. An FI shall maintain sufficient historical loss data over a full credit cycle to provide robust and meaningful statistical loan loss estimates for establishing the level of collective impairment losses for each group of loans with similar credit risk characteristics. When applying experienced credit judgment, an FI shall provide a sound rationale for excluding any historical loss data that is deemed not representative of the performance of the portfolio.

- (2) FIs with credit operations that may not economically justify a more sophisticated loan loss estimation methodology or whose practices fell short of expected standards shall, at a minimum, be subject to the regulatory guidelines in setting up allowance for credit losses prescribed in *Appendix N-11: Provided*, That the FIs notify the appropriate supervising department of the Bangko Sentral of this preference. Nevertheless, such FIs shall still use experienced credit judgment, subject to the criteria prescribed in this Section, in determining the ACL.
- (3) FIs shall set up general loan loss provision equivalent to one percent (1%) of the outstanding balance of individually and collectively assessed loans for which no specific provisions are made and/or for which the estimated loan losses are less than one percent (<1%), less loans which are considered non-risk under existing laws, rules and regulations.
- (4) FIs shall ensure the adequacy of the individual and collective ACL for the entire loan portfolio. They shall have a policy for the regular review of the ACL, which shall be conducted at least semi-annually after considering results of the credit review, level of classified loans, delinquency reports, historical losses and market conditions. Failure to make adequate provisions for estimated future losses results in material misrepresentation of an FI's financial condition.

Credit workout and remedial management of problem credits FIs shall develop and maintain a disciplined and vigorous process for the early identification and intervention for potential or existing problem credits. The process shall ensure that timely and adequate management action is taken to maintain the quality of the credit portfolio, prevent further deterioration, and minimize the likelihood of future losses.

- a. *Problem credits* refer to credits that display signs of potential problems and/or well-defined weaknesses such as those not performing according to the terms of the contract, or with credit quality impairment, or deficiencies relating to their approval and/or conduct that are not in keeping with sound and prudent credit policies. These shall include past due loans, non-performing loans and restructured loans.
- b. FIs shall adopt appropriate and cost effective workout, restructuring or remedial management policies, processes and strategies to revive and recover problem credits. The strategies shall take into account the specific condition of the obligor and the FI's interest, and shall be approved by the board of directors or management, in accordance with internal policy.
- c. At a minimum, the policies and strategies shall cover the following areas:
 - (1) authority and responsibilities of officers and staff in managing problem credits;
 - (2) collection strategy to be adopted for different types of loans;
 - (3) restructuring and handling of restructured accounts and/or loans for workout;
 - (4) supervision and monitoring of loan recovery performance;
 - (5) management and disposal of ROPA, including appraisal process;
 - (6) management information system to support the reporting, monitoring and decision making processes;
 - (7) defined timelines and provision for regular monitoring; and
 - (8) other strategies, such as the use of collection agencies, and criteria for hiring a consultant on problem credits.
- d. Restructuring strategies
 - (1) Restructuring may be resorted to for the purpose of lessening the financial difficulty of the obligor towards full settlement of his obligation, and restructuring agreements shall always take into account the borrower's capacity to pay his obligation and available credit enhancements such as financial guarantees and physical collateral. Thus, except in special cases which also require approval by the Monetary Board, such as loans funded by foreign currency obligations, FIs shall have full discretion on whether to restructure loans in order to provide flexibility in arranging the repayment of such loans without impairing or endangering the FI's interest.

- (2) Accounts shall not be restructured unless the financial capacity of the obligor to repay has been re-established, the events or crises that triggered the financial stress had been identified, and the nature and extent of protection of the FI's exposure had been determined, to justify the need for restructuring.
 - (3) At a minimum, the classification and provisioning of a loan, prior to the execution of the restructuring agreement shall be retained until the borrower has sufficiently exhibited that the loan will be fully repaid.
 - (4) A second restructuring of a loan shall be allowed only if there are reasonable justifications: *Provided*, That it shall be considered a non-performing loan and classified, at least, "*Substandard*". The restoration to a performing loan status and/or upgrading of loan classification, e.g., from "*Substandard*" to "*Especially Mentioned*", may be allowed if circumstances warrant an upgrading in accordance with this Section.
 - (5) When restructuring of exposures to DOSRI and other related parties is pursued, this shall be upon terms not less favorable to the FI than those offered to others and shall be approved by the board, excluding the concerned director.
 - (6) Physical collaterals offered, such as real estate, shall be appraised by an independent appraisal company (not a subsidiary or an affiliate of the FI) acceptable to the Bangko Sentral at the time of restructuring and every year thereafter to ensure that current market values are being used. A credit exposure benchmark of P1.0 million for simple FIs and P5.0 million for all other FIs shall be observed, such that physical collaterals for credit exposures beyond this amount will require an independent appraisal.
- e. Problem credits, including restructured accounts, shall be subjected to more frequent review and monitoring. Regular reports on the status of loan accounts and progress of any remedial plan shall be submitted to senior management to facilitate an informed decision whether escalated remedial actions are called for.

Writing off problem credits. Policies for writing off problem credits must be approved by the board of directors in accordance with defined policies, and shall incorporate, at a minimum, well-defined criteria (i.e., circumstances, conditions and historical write-off experience) under which credit exposures may be written off. Procedures shall explicitly narrate and document the necessary operational steps and processes to execute the policies.

Policies and procedures shall be periodically reviewed and if necessary, revised in a timely manner to address material internal changes (e.g., change in business focus) or external circumstances (e.g., changes in economic conditions).

FIs shall write off problem credits, regardless of amount, against ACL or current operations within a reasonable period as soon as such problem credits are determined to be worthless as defined in the FIs' written policies. However, problem credits to DOSRI shall be written off only upon prior approval of the Monetary Board.

Policies shall define and establish the reasonable period of time within which to write off loans already classified as "*Loss*". There shall be no undue delay in implementing write-offs. Notice of write-off of problem credits shall be submitted in the prescribed form to the appropriate supervising department of the Bangko Sentral within thirty (30) business days after every write-off with a sworn statement signed by the President of the FI or officer of equivalent rank that write-off did not include transactions with DOSRI and was undertaken in accordance with board-approved internal credit policy.

An effective monitoring and reporting system shall be in place to monitor debts written off and future recoveries. Progress on recovery shall be periodically reported to the board and senior management. A database of loan accounts written off shall be maintained and must be periodically reviewed for updates on individual loan obligor's information.

Enforcement actions. The Bangko Sentral reserves the right to deploy its range of supervisory tools to promote adherence to standards and principles set forth in these guidelines, bring about timely corrective actions and compliance with Bangko Sentral directives and ensure that FIs continuously observe the said standards. Persistent non-observance of the provisions of Sec. 122-N, which may lead to material misstatement of the financial condition or illiquidity of the FI, may be a ground for declaration of unsafe or unsound activities under Section 56 of R. A. No. 8791 and subject the FI to appropriate sanctions.

Enforcement actions shall be based on a holistic assessment to determine if FIs adopt appropriate risk management practices and maintain capital commensurate with the risk assumed based on existing rules and regulations. These may include, but are not limited to, the following:

- a. **Corrective actions.** These are measures intended to primarily require FIs to rectify any deviations from the standards and principles expected in the conduct of its credit risk-taking activities to address the negative impact of such deviation. Corrective actions generally include issuance of specific directives to address supervisory concerns within a reasonable timeframe.
- b. **Sanctions.** The Monetary Board may impose sanctions on an FI and/or its Board, directors and officers, as provided under existing laws, Bangko Sentral rules and regulations proportionate to the gravity/seriousness of offense.

- c. *Other enforcement actions.* Subject to prior Monetary Board approval, the Bangko Sentral, when warranted, may deploy other enforcement actions such as:
 - (1) Initiation into the prompt corrective action (PCA) framework whenever grounds for PCA exist;
 - (2) Issuance of cease and desist order (CDO) in case of persistence of unsafe/unsound banking and/or violation of any banking law or any order, instruction or regulation issued by the Monetary Board or any order, instruction or ruling issued by the Governor;
 - (3) Additional capital infusion in case hazardous lending practices resulted in excessive provisions for credit losses leading to capital deficiency;
 - (4) Requiring the FI to gross up the amount of required allowance for credit losses based on the examination of a representative sample of loans, if in the course of the Bangko Sentral examination, a high incidence of non-reporting/concealment of past due and/or problem loans is noted; or
 - (5) Other appropriate non-monetary enforcement actions that the Monetary Board may impose.

(Circular No. 855 dated 29 October 2014)

123-N MARKET RISK MANAGEMENT

The guidelines on market risk management for QBs as shown in *Appendix Q-43* shall govern the market risk management of FIs to the extent applicable.

The guidelines set forth the expectations of the Bangko Sentral with respect to the management of market risk and are intended to provide more consistency in how the risk-focused supervision is applied to this risk. FIs are expected to have an integrated approach to risk management to identify, measure, monitor and control risks. Market risk should be reviewed together with other risks to determine overall risk profile.

The Bangko Sentral is aware of the increasing diversity of financial products and that industry techniques for measuring and managing market risk are continuously evolving. As such, the guidelines are intended for general application; specific application will depend to some extent on the size, complexity and range of activities undertaken by individual FIs.

124-N LIQUIDITY RISK MANAGEMENT

The guidelines on liquidity risk management for QBs as shown in *Appendix Q-44* shall govern the liquidity risk management of BSFIs to the extent applicable.

The guidelines set forth the expectations of the Bangko Sentral with respect to the management of liquidity risk and are intended to provide more consistency in how the risk-focused supervision function is applied to this risk. BSFIs are expected to have an integrated approach to risk management to identify, measure, monitor and control risks. Liquidity risk should be reviewed together with other risks to determine overall risk profile.

These guidelines are intended for general application; specific application will depend on the size and sophistication of a particular BSFI and the nature and complexity of its activities.

125-N OPERATIONAL RISK MANAGEMENT¹

It is the thrust of the Bangko Sentral to promote the adoption of effective risk management systems to sustain the safe and sound operations of its supervised financial institutions (BSFIs). Cognizant that operational risk is inherent in all activities, products and services, and is closely tied in with other types of risks (e.g., credit, liquidity and market risks), the Bangko Sentral is issuing these guidelines to clearly set out its expectations and define the minimum prudential requirements on operational risk management. These guidelines align existing regulations to the extent possible, with international standards² and best practices. Bangko Sentral expects its BSFIs to adopt an operational risk management framework, as part of the enterprise-wide risk management system, that is suited to their size, complexity of operations, and risk profile.

Definition of operational risk. *Operational risk* refers to the risk of loss resulting from inadequate or failed internal processes, people and systems; or from external events. This definition includes legal risk, but excludes strategic and reputational risk. Operational risk is inherent in all activities, products and services, and cuts across multiple activities and business lines within the financial institution and across the different entities in a banking group or conglomerate where the financial institution belongs.

¹ BSFIs shall comply with the foregoing standards on operational risk management within a period of two (2) years from 05 February 2016. In this regard, a BSFI should be able to show its plan of actions with specific timelines, as well as the status of initiatives being undertaken to fully comply with the provisions of Sec. 125-N.

² Embodied in the relevant documents issued by the Basel Committee on Banking Supervision.

Duties and responsibilities.

- a. *Board of directors.* Consistent with the principles embodied under Sec. 132, the duties and responsibilities of the board of directors in relation to the effective management of risk include the establishment of a comprehensive and effective operational risk management framework as part of the enterprise-wide risk management system. In this regard, the board of directors shall:
- (1) Ensure that it is aware of and understands the nature and complexity of the major operational risks in the BSFI's business and operating environment, including risks arising from transactions or relationships with third parties, vendors, suppliers including outsourced service providers, and clients of services provided. This should include understanding of both the financial and non-financial impact of operational risk to which the BSFI is exposed to;
 - (2) Approve the operational risk management framework which shall form part of the BSFI's enterprise-wide risk management system and shall cover all business lines and functions of the BSFI, including outsourced services and services provided to external parties. The operational risk management framework should include an enterprise-wide definition of operational risk, which should be consistent with the definition under Sec. 125-N, governance, and reporting structures including the roles and responsibilities of all personnel, feedback mechanism, as well as standards and tools for operational risk management. In this respect, the board shall:
 - (a) Define the operational risk management strategy and ensure that it is aligned with the BSFI's overall business objectives. Relative to this, the board should set and provide clear guidance on the BSFI's operational risk appetite (i.e., the level of operational risk the BSFI is willing to take and able to manage in pursuit of its business objectives as well as the type of risks that are not acceptable to the board and management), which should consider all material risk exposures as well as the BSFI's financial condition and strategic direction;
 - (b) Approve appropriate thresholds or limits to ensure that the level of operational risk is maintained within tolerance and at prudent levels and supported by adequate capital. Relative to this, the board shall approve policy on resolving limit breaches which should cover escalation procedures for approving or investigating breaches, approving authorities, and requirements in reporting to the appropriate level of management or the board;
 - (c) Ensure that operational risk is appropriately considered in the capital adequacy assessment process;
 - (d) Ensure that it receives adequate information on material developments in the operational risk profile of the BSFI, including pertinent information on the current and emerging operational risk exposures and vulnerabilities as well as information on the effectiveness of the operational risk management framework. The board must challenge the quality and comprehensiveness of the operational risk information it receives. It should also be satisfied with the reliability of the said information and the monitoring system for operational risk;
 - (e) Ensure that business objectives, risk appetite, the operational risk management framework, and the respective roles and responsibilities of personnel and officers at all levels in terms of implementing the operational risk management framework, are properly disseminated, clearly communicated/discussed, and understood by personnel concerned;
 - (f) Provide senior management with clear guidance and direction regarding the principles underlying the operational risk management framework. The board shall ensure that senior management appropriately implements policies, processes and procedures, and provides feedback on the operational risk management process. In this regard, the board shall establish a feedback and reporting system that will allow employees to raise their concerns without fear of negative consequences; and
 - (g) Ensure that the operational risk management framework is subject to effective and comprehensive independent review, on a periodic basis, by operationally independent, appropriately trained, and competent staff to ensure that it remains commensurate with the BSFI's risk profile and continues to be adequate and effective in managing operational risk. The review should take into account the changes in business and operating environment, material changes in systems, business activity or volume of transactions, quality of control environment, effectiveness of risk management or mitigation strategies, loss experience, and the frequency, volume or nature of breaches in limits or any policy.
 - (3) Provide adequate oversight on all outsourcing activities and ensure effective management of risks arising from these activities. In this regard, the board of directors shall approve a framework governing outsourcing activities, which includes a system to evaluate the risk and materiality of all existing and prospective outsourcing engagements and the policies that apply to such arrangements;

- (4) Ensure observance of expectations and requirements prescribed under relevant laws, rules and regulations, industry-set standards, and policies on internal control, internal audit, and disclosure;
- (5) Promote a culture of high standards of ethical behavior. The board shall adopt a code of conduct of ethical behaviors with corresponding disciplinary actions for non-compliance, which should cover, among others, guidance and protocols on conflicts of interest situations, safeguarding of confidential information, and use of sensitive information. The board should likewise institute tools, methodologies, and practices in order to ensure compliance and adherence to the standards by all employees including the senior officers and the board itself. In this regard, employees should be required to acknowledge in writing that they have read, understood, and will observe the code of conduct;
- (6) Ensure that business and risk management activities, including the operational risk management function, are carried out by adequate and qualified staff with the necessary experience, technical capabilities, and competence. Moreover, the board shall ensure that employees and officers in all areas of operations have a high degree of integrity.

For this purpose, the board shall approve appropriate hiring and selection policies and processes, adopt a continuing professional development program, and institutionalize a framework for continuing assessment of fitness and propriety of employees. These policies, processes and programs should reinforce the conduct and values being promoted in the organization.

Further, the board shall oversee the design and implementation of remuneration policies. It shall ensure that the remuneration policies do not encourage excessive risk-taking or provide incentives to people to perform contrary to the desired risk management values. It shall also ensure that remuneration policies are appropriate and aligned with the BSFI's long-term strategic direction and risk appetite, as well as with relevant legal or regulatory requirements;

- (7) Ensure that all units in the organization have adequate resources, including personnel complement, and are supported by appropriate technological systems. The use of technological systems must be commensurate to the activities being undertaken; and
 - (8) Oversee implementation of a sound business continuity management framework. The board should create and promote an organizational culture that places high priority on business continuity. This shall include providing sufficient financial and human resources associated with the BSFI's business continuity initiatives.
- b. *Senior management.* Senior management shall be responsible for the implementation and consistent adherence by all personnel to the operational risk management framework approved by the board of directors. In this respect, senior management shall:
- (1) Translate the approved operational risk management framework into specific policies and processes covering all businesses and functions of the BSFI, including outsourced services and services provided to external parties. Said policies should be clearly documented, approved by the board of directors and communicated to personnel at all levels. Policies should include, among others:
 - (a) Definition of operational risk and operational risk loss. This should be supported by common operational risk taxonomy that includes the operational risk event type and causes of losses to facilitate the consistent identification of operational risks across the BSFI as well as the management of operational risk in an integrated manner;
 - (b) Appropriate governance and oversight structures, reporting lines, and accountabilities for managing operational risks;
 - (c) Clear description of risk limits and thresholds that correspond to the BSFI's approved operational risk appetite and tolerance;
 - (d) Risk mitigation strategies and tools for maintaining risks within the thresholds and limits set;
 - (e) Approach to operational risk identification, assessment, monitoring and reporting that utilizes appropriate operational risk management tools. This should include an outline of the reporting framework and types of data/information to be included in the risk management reports; and
 - (f) Requirement for the conduct of independent review of the framework as well as its implementation, on a periodic basis, and whenever there are material changes in the BSFI's operational risk profile.

- (2) Communicate individual roles and responsibilities of personnel. It is important that personnel at all levels understand their respective roles in the operational risk management process. In this regard, senior management should clearly assign authority, responsibility, and reporting relationships to encourage and maintain accountability, and ensure that the necessary resources are available to manage operational risk effectively;
 - (3) Establish systems to report, track, escalate, and resolve issues; and set the frequency of operational risk management reporting considering the level and type of risks involved as well as the pace and nature of the operating environment of the BSFI;
 - (4) Assess the appropriateness of the operational risk management process in light of the changing business environment and nature of risks arising from business activities or functions;
 - (5) Ensure that sufficient number of personnel, technical support, and other resources are devoted for operational risk management such that the BSFI's activities are conducted by qualified personnel with the necessary experience and technical capabilities. It shall also ensure that personnel responsible for monitoring and enforcing compliance with the BSFI's operational risk policy as well as the compliance and internal audit units have authority independent from the units they review and are knowledgeable about the different areas of operations; and
 - (6) Establish policies, standards and processes for an effective business continuity management.
- c. *Business units.* Business line management and personnel, as the first line of defense, are responsible on a day-to-day basis for identifying, managing and reporting operational risks inherent in the products, activities, processes and systems for which they are accountable. In this regard, business line management shall ensure that:
- (1) Internal controls and practices within their business lines are consistent with the enterprise-wide policies and procedures to support the management of operational risk;
 - (2) Business line specific policies, processes, and procedures are adequate and effectively implemented, and personnel are adequate and competent to manage operational risk for all material products, activities, and processes;
 - (3) Operational risk management framework within each business line reflects the scope of that business line and its inherent operational complexity and operational risk profile;
 - (4) Risk mitigation strategies and processes as approved by the board and senior management are established and executed;
 - (5) Internal controls, and operational risk mitigation strategies and processes are periodically reviewed within the business units to effectively manage operational risks within approved risk tolerance, and consistent with enterprise-wide policies and procedures established. There must be clear expectations and processes established to ensure prompt escalation and actions to address any gap or issue identified; and
 - (6) Operational risk-related information (e.g., loss events, incidents, et. al.) are adequately and timely communicated/coordinated to Operational Risk Management Function (ORMF) for risk monitoring and reporting, in addition to the usual reporting to senior management and/or board.

Roles and Functions.

- a. *Operational Risk Management Function.* BSFIs are not required to create an ORMF. However, the board of directors is expected to discuss operational risk issues during its board meetings with discussions adequately documented in the minutes of meetings. The board of directors of NBFIs and trust corporations may, at its own discretion, or as directed by the appropriate supervising department of the Bangko Sentral, create a Risk Management Unit (RMU) or assign specific personnel under said unit to handle operational risk concerns. The specific personnel or RMU shall directly report to the head of the RMU or to the board-level Risk Oversight Committee (ROC), as appropriate. The ROC or the board shall be responsible for assessing the annual performance of the unit taking into account how said unit carried out its duties and responsibilities. The ORMF shall be supported by a board-approved charter that defines its stature, authority, and independence.

The ORMF shall primarily assist management in meeting its responsibility to understand and manage operational risk exposures and ensure the development and consistent implementation of operational risk policies, processes, and procedures throughout the institution. In this regard, the ORMF shall:

- (1) Recommend to the board of directors and senior management appropriate policies and procedures relating to operational risk management and controls;

- (2) Design and implement the operational risk assessment methodology tools and risk reporting system of the institution;
- (3) Coordinate risk management activities across the institution;
- (4) Consolidate all relevant operational risk information/reports to be elevated/presented to the board and senior management;
- (5) Provide operational risk management training and advice to business units on operational risk management issues; and
- (6) Coordinate with compliance function, internal audit, and external audit on operational risk matters.

ORMF personnel should have technical proficiency, appropriate educational background, and exposure to enable them to effectively perform the unit's mandate. BSFIs shall have in place a training program to keep its personnel up-to-date on different operational risk issues and challenges.

- b. *Compliance function.* The compliance function shall conduct an independent assessment of the compliance with relevant laws, rules and regulations, as well as internal policies of the institution, and determine areas that may potentially result in risk of loss due to inadequate or failed internal processes, systems, and people. The latter includes inappropriate conduct/behavior of personnel, officers, and the board, that may lead to fraud or any form of business disruption. The compliance function shall assess whether the identified operational risk exposure by the business units or by the function itself shall affect the franchise value of the institution. In this regard, it shall advise and assist management in establishing guidance on the appropriate implementation of relevant laws, rules and regulations, and internal policies.
- c. *Internal audit.* Internal audit shall conduct an independent assessment of the operational risk management framework, including the implementation of operational risk management policies and procedures. The board of directors, either directly or indirectly through the board-level Audit Committee shall ensure that the scope and frequency of audit is appropriate to the risk exposures. Any operational risk issue identified and reported in the audit process should be addressed by senior management in a timely and effective manner, or raised to the attention of the board as appropriate.

Operational risk management framework. BSFIs shall have in place an appropriate operational risk management framework, as part of the enterprise-wide risk management system, that is effective and efficient in identifying, assessing, monitoring and controlling/mitigating operational risk. They shall ensure that their operational risk management framework is commensurate with the complexity of their operations, range of products and services, organizational structure, and risk profile.

- a. *Risk identification and assessment.* Risk identification and assessment are fundamental elements of an effective operational risk management system. Effective risk identification shall consider both internal factors (such as BSFI structure, nature of activities, the quality of human resources, organizational changes and employee turnover, among others) and external factors (such as changes in the broader environment and the industry, advances in technology, and developments in political, legal, and economic factors, among others). Risk identification and assessment allow the BSFI to better understand its risk profile and allocate risk management resources and strategies more effectively. Since the business lines are expected to have the best knowledge of their risk exposures and processes, these units should play a major role in the identification and assessment of operational risk.
- (1) BSFIs shall consider the following loss event-type categories as part of their risk identification and assessment processes:
 - (a) Internal fraud, e.g., intentional misreporting of positions, employee theft, and insider trading on an employee's own account;
 - (b) External fraud, e.g., robbery, forgery, check kiting, and damage from computer hacking;
 - (c) Employment practices and workplace safety, e.g., workers compensation claims, violation of health and safety rules, organized labor activities, discrimination claims, and general liability;
 - (d) Clients, products and business practices, e.g., fiduciary breaches, misuse of confidential customer information, improper trading activities on the BSFI's account, money laundering, and sale of unauthorized products;
 - (e) Damage to physical assets, e.g., terrorism, vandalism, earthquakes, fires and floods;
 - (f) Business disruption and system failures, e.g., hardware and software failures, telecommunication problems, and utility outages; and

- (g) Execution, delivery, and process management, e.g., data entry errors, collateral management failures, incomplete legal documentation, unapproved access given to client accounts, non-client counterparty misperformance, and vendor disputes.
- (2) BSFIs shall adopt tools and mechanisms that are appropriate to their size, complexity of operations and risk profile to properly identify and assess operational risk. The tools that may be used for identifying and assessing operational risk may include, but not limited to:
- i. *Results of internal/external audit and supervisory issues raised in the Bangko Sentral Report of Examination (ROE)* – Internal audit surfaces issues on effectiveness of internal control, risk management, and governance systems and processes of an organization, while external audit focuses on control weaknesses and susceptibility of the BSFI to material misstatements in the financial statements. On the other hand, the Bangko Sentral ROE highlights deficiencies in the risk management systems and governance processes as well as issues on compliance with relevant laws, rules and regulations, which could have adverse effects on the safety and soundness of the BSFI;
 - ii. *Internal loss data collection and analysis* – Internal operational loss data provides meaningful information for assessing BSFI's exposure to operational risk and the effectiveness of internal controls. Analysis of loss events can provide insights into the causes of large losses and information on whether control failures are isolated or pervasive. BSFIs may consider mapping internal loss data to the following business lines:
 - (i) Corporate finance;
 - (ii) Trading and sales;
 - (iii) Retail banking;
 - (iv) Commercial banking;
 - (v) Payment and settlement;
 - (vi) Agency services;
 - (vii) Asset management; and
 - (viii) Retail brokerage.

Loss events linked to credit and market risk may also relate to operational issues and should be segmented in order to obtain a more comprehensive view of the BSFI's operational risk exposure;

- iii. *Risk Self Assessments (RSA)/Risk Control Self Assessments (RCSA)* – RSA is a tool to assess processes underlying BSFI's operations against a library of potential threats and vulnerabilities including their potential impact. A similar approach, RCSA, typically evaluates inherent risk (the risk before controls are considered), the effectiveness of the control environment, and residual risk (the risk exposure after controls are considered). Scorecards on RCSAs may be developed by allocating weights to residual risks to provide a means of translating the RCSA output into metrics that will give a relative ranking of the control environment;
- iv. *Business process mappings* – These help identify key steps in business processes, activities, and organizational functions as well as the key risk points in the BSFI's overall business process. Process maps can reveal individual risks, risk interdependencies, and areas of control or risk management weakness. They can also help prioritize subsequent management action;
- v. *Risk and performance indicators* – Risk and performance indicators, such as Key Risk Indicators (KRIs) and Key Performance Indicators (KPIs), provide an insight into a BSFI's emerging risk exposure. KRIs are used to monitor the main drivers of exposure associated with key risks that contribute to early detection of heightened risk, ongoing monitoring of their movements, and preemptive reactions as necessary. KPIs, on the other hand, provide insight into the status of operational processes, which may in turn provide insights into operational weaknesses, failures, and potential loss. Risk and performance indicators are often used with escalation triggers to warn when risk levels approach or exceed acceptable ranges and prompt mitigation plans;
- vi. *Scenario analysis* – This refers to the process of obtaining expert opinion of business line and risk managers to identify potential operational risk events and assess the potential outcome. Scenario analysis is an effective tool when considering potential sources of significant operational risk and the need for additional risk management controls or mitigation solutions. Given the subjectivity of the scenario process, a robust governance framework is essential to ensure the integrity and consistency of the process;
- vii. *Model measurement* – Larger BSFIs may deem it useful to quantify their operational risk exposures by using the output of the risk assessment tools as inputs into a model that estimates operational risk exposure. The results of the model can be used in an economic capital process and can be allocated to business lines to link risk and return; and

viii. *Comparative analysis* – Comparative analysis consists of comparing the results of the various assessment tools to provide a more comprehensive view of the BSFI's operational risk profile.

Comparison of external loss data, if available, such as industry experiences, vis-à-vis BSFI's internal loss data can also be made to explore possible weaknesses in the financial institution's control environment and enable it to consider previously unidentified risk exposures.

In choosing among these tools, each BSFI must carefully consider what is proportionate to its size, risk profile, and complexity of operations. Data/information gathered from these tools should enable BSFIs to make a thorough causal analysis, identify control gaps, and consequently adopt appropriate corrective actions.

BSFIs are expected to adopt at the minimum, the (i) results of internal/external audit and supervisory issues raised in the Bangko Sentral ROE; and (ii) internal loss data collection and analysis.

- (3) BSFIs shall develop databases to accumulate at least a five (5)-year history of operational risk losses which can be fed back into the operational risk management process. Apart from capturing events that resulted to actual loss, BSFIs shall also gather potential loss or near-misses¹. Said database of loss events provides basis for analysis which can help direct corrective action to improve the control environment, as well as determine risk mitigating actions. BSFIs should assess the depth of its data collection which is vital in understanding the risk environment. The loss event database shall at a minimum disclose the following:

- (a) Short description of the event;
- (b) Loss event type category;
- (c) Department/Unit/Branch sustaining the loss;
- (d) Business line classification;
- (e) Date of occurrence;
- (f) Date of discovery;
- (h) Date of booking of actual losses;
- (i) Actual loss amount or potential loss amount, if a near-miss event;
- (j) Amount recovered and date of recovery;
- (k) Causes of the event (e.g., control weaknesses identified)
- (l) Consequence of the loss event (e.g., market loss, fees paid to a counterparty, a lawsuit or damage to the BSFI's reputation); and
- (m) Action(s) taken.

BSFIs shall define appropriate thresholds for internal loss data collection and must be able to justify the same. Thresholds should be reasonable and should not omit any operational loss event data that is material for operational risk exposure and for effective risk management. BSFIs shall ensure that the choice of threshold should not adversely impact the credibility and accuracy of operational risk measurement.

- (4) BSFIs shall determine based on the results of the risk assessment process whether the risks are within the scope of its operational risk management strategy and policies. It shall identify the risk exposures that are unacceptable or are outside its risk appetite and/or risk management capacity, and design and prioritize appropriate risk mitigation and corrective actions with clear accountabilities, roles and responsibilities for implementation within reasonable timelines.
- (5) BSFIs shall continually assess its operational risk exposures in order to gain broader recognition and understanding of their effects. It shall consider the following factors in the assessment:
- (a) Expected and unexpected changes to the BSFI's operating environment;
 - (b) Actual operational loss events that could have resulted in substantial losses/damage but were avoided (e.g., near misses) or recovered;
 - (c) Reported external operational losses and incidents which have damaged investor confidence and caused serious reputational harm;
 - (d) Areas of concern or unusual volumes or high number of exceptions; and
 - (e) Results of internal assessment of risks and controls.
- (6) BSFIs shall ensure that their risk management and control infrastructure keep pace with the growth of or changes in their business activities, i.e., when they engage in any new activity; introduce a new product; enter new or unfamiliar markets; implement new business processes or technology systems; establish subsidiaries/branches that are geographically remote from the head office; and/or embark on an aggressive growth strategy by acquiring problem BSFIs to rapidly increase branch network during a short period of time. BSFIs should have relevant policies and procedures that address the process for review

¹ *Potential loss* is an initial estimate of the loss that the bank may have sustained at the time of discovery of the event. *Near miss* is an adverse operational risk event which was not prevented by internal controls but did not result in an actual adverse impact (financial or reputational) due to chance, recovery or other external factors.

and approval of new products, activities, processes and systems. The review and approval process shall consider the following:

- (a) Inherent risks in the new product, service, or activity;
 - (b) Changes to the BSFI's operational risk profile, appetite and tolerance, including the impact on existing products or activities;
 - (c) Necessary controls, risk management processes, and risk mitigation strategies;
 - (d) Any residual risk; and
 - (e) Procedures and metrics to measure, monitor, and manage the risk of the new product or activity.
- b. *Risk monitoring and reporting.* BSFIs shall implement a process to regularly monitor their operational risk profiles and material exposures to losses on a continuing basis. The process shall take into account both qualitative and quantitative assessment of exposure to all types of operational risk, assess the quality and appropriateness of corrective or mitigating actions, and ensure that adequate controls and systems are in place to identify and address problems before they become major concerns.
- (1) Risk monitoring should be an integral part of a BSFI's activities, the frequency of which should reflect the risks involved in these activities as well as the frequency and nature of changes in the operating environment. The results of the monitoring activities, findings of compliance, internal audit and risk management functions, management letters issued by external auditors, and reports generated by supervisory authorities, as appropriate, should be included in regular reports to the board and the senior management to ensure that timely and appropriate measures are undertaken to address the issues/findings.
 - (2) Management shall ensure that regular reports on operational risk are received on a timely basis and in a form and format that will aid in the monitoring and control of their business areas. The board should receive sufficient high-level information to enable it to understand the BSFI's overall operational risk profile and focus on the material and strategic implications for the business.
 - (3) Management reports should contain relevant internal financial, operational, and compliance data, as well as external market information about events and conditions that are relevant to decision making. They should aim to provide information such as:
 - (a) The critical operational risks facing, or potentially facing, the BSFI (e.g., as shown in KRIs and their trend data, changes in risk and control self-assessments, comments in audit/compliance review reports, etc.);
 - (b) Major risk events/loss experience, issues identified and intended remedial actions;
 - (c) The status and/or effectiveness of actions taken; and
 - (d) Exception reporting (covering among others authorized and unauthorized deviations from the BSFI's operational risk policy and likely or actual breaches in pre-defined thresholds for operational exposures and losses).
 - (4) Reports should be analyzed with a view to improving existing management performance as well as developing new risk management policies, procedures and practices. Moreover, to ensure the usefulness and reliability of the reports received, management should regularly verify the timeliness, accuracy, and relevance of reporting systems and internal controls in general.
 - (5) Management should keep track of the information provided in the reports, particularly the loss data, to establish a framework for systematically tracking and recording the frequency, severity and other relevant information on loss events.
- c. *Risk control and mitigation.* Strong control environment is key to effective risk control and mitigation. In this respect, BSFIs are expected to adhere to the standards set forth under pertinent provisions of Secs. 131-N and 132-N on Internal Control and Internal Audit.

BSFIs shall decide whether to use appropriate procedures to control and/or mitigate the risks, or bear the significant risks that have been identified. In those instances where internal controls do not adequately address risk and accepting the risk is not a reasonable option, BSFIs may seek to transfer the risk to another party such as through insurance. Relative thereto, the board shall determine the maximum loss exposure the BSFI is willing to take and has the capacity to assume, and should perform an annual review of the BSFI's risk and insurance management program.

BSFIs, however, should not consider risk transfer tools as substitute but as complementary tools to sound controls and risk management system. Management shall also assess the extent to which risk mitigation tools such as insurance reduces risk, transfer the risk to another business sector or area, or create a new risk (e.g., counterparty risk).

Management of human resource-related risk. One of the major sources of operational risk is “people risk”. In this regard, BSFIs shall embed in their enterprise-wide risk management framework measures to identify, measure, monitor, and control human resource related risks. BSFIs shall ensure that there are adequate policies and risk management and control measures in the following areas:

- a. *Recruitment and selection.* The board shall establish efficient process that will facilitate timely recruitment and selection of personnel from a broad pool of candidates with appropriate educational background, skills, experience and competencies to fulfill the duties and responsibilities of the function. Management shall also ensure that the BSFI’s culture, values and expectations on behavior are compatible with those of its employees so that there is unity of direction and purpose.
- b. *Performance management.* The board shall establish effective performance management framework that will ensure that personnel’s performance is at par with the standards set by the board/senior management. Results of performance evaluation should be linked to other human resource activities such as training and development, remuneration, and succession planning. These should likewise form part of the assessment of the continuing fitness and propriety of personnel in carrying out their respective duties and responsibilities.

The assessment of continuing fitness and propriety of personnel should take into account factors that may affect the performance of an individual. For instance, the financial circumstances of an employee who will be responsible for the custody of, or handling of cash related transactions, shall be taken into consideration in the evaluation of his continuing qualification.

- c. *Training and development.* The board shall establish training and development programs that will ensure continuing development of employees’ knowledge, competence, and skill. Results of gaps assessment in the performance evaluation/appraisal process can be used in the creation of training and development programs for employees.
- d. *Remuneration and compensation.* The board shall establish sound remuneration and compensation policies that can be used by the institution to attract/recruit and retain highly qualified workplace. Said policies should appropriately motivate personnel and discourage excessive risk taking. This can be achieved through timely assessment of performance and competencies based on set standards. Results of performance assessment/appraisal can be used in the organization’s remuneration decisions.
- e. *Succession planning.* The board shall establish an effective succession planning program. The program should include a system for identifying and developing potential successors for key and/or critical positions in an organization, through systematic evaluation process and training. This will require identifying critical skills and competencies; assessing gaps; and designing developing, and delivering training and development programs to build or improve critical skills and competencies. The program should be adequately documented to facilitate monitoring and assessment of its implementation.
- f. *Adequacy of complement.* The board shall establish effective strategic manpower planning to ensure that there is adequate and right manpower complement to meet the strategic goals and operational plans of the organization.
- g. *Disciplinary actions.* The board, officers and all employees are expected to conform to prescribed ethical culture and guidelines, meet performance standards, and to behave ethically/appropriately in the workplace. Disciplinary or corrective actions may be taken to improve/arrest unacceptable behavior or performance. Disciplinary action must be in accordance with the laws and the applicable rules.
- h. *Separation from service.* The board shall establish policies and procedures governing the separation of employees from service (e.g., termination, dismissal, retrenchment, retirement, or resignation), which should include transfer of accountabilities and/or salient information (e.g., client data, business strategies and formula, other trade secrets, etc.) to the successor, and clearance requirements. Policies may also include “non-compete” clauses, in accordance with existing laws.

The Human Resource Department shall assist the board in fulfilling its oversight responsibilities in the areas of recruitment, manpower planning, personnel development, performance appraisal, remuneration, termination, retrenchment and other key human resource issues.

Management of information technology-related risk. BSFIs shall refer to Sec. 126-N for the management of information technology-related risk.

Management of integrity of prudential reports or reports submitted to Bangko Sentral. BSFI shall adopt a prudential reporting framework that ensures the integrity of information submitted to the Bangko Sentral. They shall establish a system for ensuring effective compliance with the standards prescribed by the Bangko Sentral on acceptable reporting quality. BSFIs shall likewise maintain adequate documentation of the processes and procedures covering the prudential reporting framework and conduct a periodic review of their continuing relevance.

Management should be cognizant of relevant guidelines that may be issued by the Bangko Sentral relative to issues on the integrity and accuracy of prudential reports. Persistent concerns on the integrity and accuracy of prudential reports including failure to comply with the directives of the Bangko Sentral in this respect may be considered by the Bangko Sentral as conducting business in an unsafe or unsound manner, subject to applicable provision of laws and regulations.

Management of legal risk exposures. BSFIs shall adopt a system for identifying and assessing legal risks related to business line functions as well as products and services offered. This shall include a process for assessing the BSFI's rights and obligations in contractual relationships and in ensuring that all agreements/contracts entered into by the BSFI conform with legal and regulatory requirements and that no party is unduly disadvantaged. This shall also include the assessment of trends of customer complaints to determine potential legal risk exposures.

There should be a system in place to manage outstanding legal cases involving the BSFI or any of its directors and officers, with respect to suits filed in line with the performance of their duties. Said system should cover a periodic review of the status of cases, an assessment of potential outcome including probable liability or receivable, and regular reporting of the same to the appropriate level of management and the board.

Management of operational risk arising from financial inclusion initiatives. BSFIs that provide financial services to the unserved and underserved sector generally handle small and voluminous transactions, which have inherently high operational risk. Incremental operational risk also comes from the higher number of personnel or from the use of technology-based platform to effectively and efficiently deliver financial services. BSFIs are expected to identify and understand the distinct operational risk arising from the products and services they offer or innovative delivery channels they use. They should also be cognizant of potential transformation or transfer or risk exposures. In this regard, BSFIs shall adopt an operational risk management framework appropriate to the nature and scale of their operations. Said framework shall consider the principles embodied in this Section designed to suit the BSFI's business model and ensure sustained delivery of financial services to the unserved and underserved sector.

Notification/Reporting to Bangko Sentral. BSFIs shall notify the appropriate supervising department of the Bangko Sentral, within ten (10) calendar days from the date of discovery, of any operational risk event¹ that may result in any of the following:

- a. Significant operational losses or exposures;
- b. Activation of business continuity plan; or
- c. Any material change in business and operating environment.

Upon receipt of notification, the Bangko Sentral may require, if warranted, the reporting BSFI to submit a report detailing the causes and impact of such events and an acceptable action plan to address the issue and any other weakness identified.

Supervisory Enforcement Actions. Consistent with Sec. 002-Q, the Bangko Sentral may deploy enforcement actions to promote adherence with the requirements set forth in this Section and bring about timely corrective actions. The Bangko Sentral may issue directives to improve the operational risk management system, or impose sanctions to limit the level of or suspend any business activity that has adverse effects on the safety or soundness of the BSFI, among others. Sanctions may likewise be imposed on a BSFI and/or its directors, officers and/or employees.

(Circular Nos. 930 dated 18 November 2016 and 900 dated 18 January 2016)

126-N INFORMATION TECHNOLOGY RISK MANAGEMENT²

The enhanced guidelines on ITRM keep abreast with the aggressive and widespread adoption of technology in the financial service industry and consequently strengthen existing Bangko Sentral framework for IT risk supervision. ITRM should be considered a component and integrated with the institutions' risk management program. The guidelines likewise provide practical plans to address risks associated with emerging trends in technology and growing concerns on cyber security.

Policy statement. The rapid pace of digital innovation has significantly reshaped the financial services landscape. BSFIs employ advances in technology to sharpen business insights, enhance operational efficiencies, and deliver innovative financial products and services in line with emerging market trends and evolving client needs. Technological developments also enable greater access to financial services that promote an inclusive and responsive digital financial ecosystem. As technological innovations become more deeply entrenched in business models, infrastructure, and delivery channels, system-related failures and malfunctions can create major operational disruptions in BSFIs. Social media platforms may further complicate matters as news of disruptions as well as customer complaints can spread at unprecedented speeds. Further, cyber-threats and attacks confronting the financial services industry pose added risks that can undermine public trust and confidence in the financial system.

¹ As enumerated under item "a.(1)" of Sec. 125-N on Operational risk management framework.

² BSFIs shall comply with the enhanced Guidelines on Information Security Management within a period of one (1) year from the effectivity date of Circular No. 982 Series of 2017. In this regard, a BSFI should be able to show its plan of actions with specific timelines, as well as the status of initiatives being undertaken to fully comply with the provision of this circular, upon request of the Bangko Sentral starting December 2017.

In line with their growing technology usage and dependence at the back of a dynamic operating and cyber-threat environment, BSFIs should establish robust and effective technology risk management processes, governance structures, and cybersecurity controls. This is to ensure that the benefits derived from technological innovations can be fully optimized without compromising financial stability, operational resilience, and consumer protection.

Purpose and scope. The enhanced guidelines aim to provide guidance in managing risks associated with use of technology. The guidelines outlined are based on international standards and recognized principles of international practice for ITRM and shall serve as Bangko Sentral's baseline requirement for all BSFIs.

The guidelines shall apply to BSFIs which include banks, non-banks with quasi-banking function (NBQB), non-bank electronic money issuers and other non-bank institutions which under existing Bangko Sentral rules and regulations and special laws are subject to Bangko Sentral supervision and/or regulation. Moreover, subject guidelines shall also apply to BSFIs with offshore data processing as may be appropriate to their situation. The framework covers different facets of ITRM, some of which are supplemented with detailed guidelines in *Appendices Q-61, Q-62, Q-63, Q-64, Q-65 and Q-66*. The Bangko Sentral shall keep the Appendices updated and, in the future, issue additional regulations on new and emerging products, services, delivery channels, and other significant applications of technology.

Subject guidelines, including the *Appendices Q-61, Q-62, Q-63, Q-64, Q-65 and Q-66*, are not "one-size-fits-all" and implementation of these need to be risk-based and commensurate with the size, nature and types of products and services and complexity of IT operations of the individual BSFIs. BSFIs shall exercise sound judgment in determining applicable provisions relevant to their risk profile.

IT Profile Classification. To ensure that IT risk management system, governance structure and processes are commensurate with the attendant IT risks, the Bangko Sentral shall determine the IT profile of all BSFIs and classify them as "Complex", "Moderate" or "Simple". The IT profile refers to the inherent risk of a BSFI before application of any mitigating controls, and is assessed taking into consideration the following factors:

- a. *IT infrastructure and operations.* Inherent IT risks of a BSFI largely depend on the degree of automation of core processes and applications, the size of branch networks, and the characteristics of its IT organization. BSFIs with larger branch networks and more complex organizational structures usually require a higher degree of reliance on IT systems/infrastructure, which in turn, carry higher levels of inherent IT risks. Interconnectivity risks also play a factor in determining IT risk levels since added connections to third party networks increase complexity as well as exposure to potential information security/cybersecurity risks. These include participation in electronic payment systems and interconnections with other financial institutions, business partners, customers, and third party service providers, among others.
- b. *Digital/Electronic financial products and services.* Digital/electronic financial products and services provided to the BSFI's corporate and retail clients, by their very nature, can have a direct impact on IT risks, including information security/cybersecurity risks. This is because these products and services are normally provided via the internet or public networks which are inherently risky. Digital/electronic financial products and services include ATM debit, prepaid and credit cards and e-channels such as ATM terminals, point-of-sale (POS) terminals, internet banking and mobile banking facilities, among others. BSFIs that are more aggressive in providing such services are expected to have greater IT risks.
- c. *IT projects and initiatives.* The extent and nature of the BSFI's IT projects prospectively impact IT risk exposure and complexity. For instance, developing or acquiring a new core banking system is considered a major project that if not adequately managed and overseen, may heighten inherent IT risks. Also, IT projects and initiatives entail the use of current resources in terms of funding and manpower that might affect existing IT operations and risk profile.
- d. *Outsourced services.* While outsourcing in general does not diminish the BSFI's responsibility over the function/service outsourced, outsourcing poses an added dimension to IT and information security risks. For this reason, outsourcing arrangements require a higher degree of oversight, due diligence, and risk management controls. Outsourcing core IT services and functions via cloud computing platforms may further intensify IT and information security risks.
- e. *Systemic importance.* The systemic importance of a BSFI is a critical determinant in assessing inherent IT and information security/cybersecurity risks since BSFIs identified as "Domestic Systemically Important Banks" or D-SIBs are essentially larger in size and have more complex operations and product offerings. Moreover, cyber-attacks against D-SIBs can have serious implications to financial and economic stability that may undermine public trust and confidence in the financial system.
- f. *Threats.* The volume, type, and severity of cyber-attacks and fraud targeting a specific BSFI affects IT and cybersecurity risk profiles. Some BSFIs may be more prone to attacks compared to others by virtue of their asset size, customer base, systemic importance, and other factors. Thus, BSFIs that are likely targets of these types of threats should have greater degree of cyber-preparedness and resilience.

A general description for each IT profile classification is outlined as follows:

IT Profile Classification	General Description/Attributes
Complex	A BSFI with highly complex IT profile uses technology extensively in supporting mission-critical business processes and delivering financial products and services. It has ubiquitous branch network in the country and offers a wide array of digital/electronic financial products and services to a large number of corporate and retail clients. It is highly interconnected with external third party stakeholders and actively participates in electronic payment systems and networks, usually involving large-value transfers. Business strategies and objectives are largely anchored on IT platforms, digital innovation, and technology-based solutions. It is also aggressively utilizing/exploring emerging technologies such as cloud computing, social media and big data technologies.
Moderate	A BSFI classified as moderately complex uses technology to some extent, but not as aggressively as those classified as highly complex. Its branch network, IT organization and structure, and extent of IT projects are also relatively less significant than those of highly complex BSFIs. IT applications and systems are integrated but primarily support traditional banking products and services. It may offer basic digital/electronic products and services, such as ATM terminals/card-based products, to a limited number of clients.
Simple	A BSFI classified as simple generally has very limited use of technology with minimal interconnectivity to its clients and other institutions. Likewise, branch network or geographic presence is confined to a specific locality. IT applications and systems are stand-alone or are not fully integrated and e-banking products and services are rarely offered. A simple BSFI also has few IT personnel and customer base.

The IT profile of rural banks, cooperative banks, NBFIs, and non-bank institutions shall be classified as “Simple”, unless notified by the Bangko Sentral of a higher classification. For other BSFIs, the Bangko Sentral shall notify in writing their assigned classification within a reasonable timeline from the effectivity of this Circular. The Bangko Sentral-assigned classification shall remain effective until such time that the Bangko Sentral informs the concerned BSFI of a change in classification.

The Bangko Sentral assessment and classification process should not preclude BSFIs from assessing their own IT profile classification on an ongoing basis. All BSFIs are required to have periodic and rigorous self-assessment exercises using more robust data sets and variables as part of their information security risk management system.

IT Rating System. The Bangko Sentral, in the course of its on-site examination activities, shall evaluate BSFIs’ ITRM system and measure the results based on Bangko Sentral’s IT rating system. A composite rating is assigned based on a “1” to “4” numerical scale, as follows:

4	BSFIs with this rating exhibit strong performance in every respect. Noted weaknesses in IT are minor in nature and can be easily corrected during the normal course of business.
3	BSFIs with this rating exhibit satisfactory performance but may demonstrate modest weaknesses in operating performance, monitoring, management processes or system development.
2	BSFIs with this rating exhibit less than satisfactory performance and require considerable degree of supervision due to a combination of weaknesses that may range from moderate to severe.
1	BSFIs with this rating exhibit deficient IT environment that may impair the future viability of the entity, thereby requiring immediate remedial action.

Definition of terms. In these guidelines, terms are used with the following meanings:

- Advanced persistent threat or APT* shall refer to a sophisticated form of attack that involves coordinating multiple methods of identifying and exploiting a target's vulnerabilities over an extended period to do harm.
- Card skimming* shall refer to the illegal copying of information from the magnetic stripe of a credit or ATM card to gain access to accounts.

- c. *Cloud computing* shall refer to a model for enabling ubiquitous, convenient, and on-demand network access to a shared pool of configurable computing resources that can be rapidly provisioned and released with minimal management effort or service provider interaction.
- d. *Compromised State* A state wherein someone or something has maliciously broken into networks, systems and computers which raises doubt as to the integrity of information assets, such as, but not limited to, program files, image files, and operating system files.
- e. *Cyber-threat* shall refer to a deliberate act of omission or commission by any person carried out using the internet and/or other electronic channels, in order to communicate false or fraudulent representations to prospective victims, to conduct fraudulent transactions, or to illegally obtain proprietary data or information related to the institution, their customers and other stakeholders. Cyber-threat can be used synonymously with cyber-fraud, cyber-attack or cyber--related incidents.
- f. *Cybersecurity* shall refer to technologies, processes, and practices designed to protect a BSFI's information assets and consumers by preventing, detecting, and responding to cyber-attacks.
- g. *Data Breach* An incident in which sensitive, protected or confidential data or information has potentially been viewed, stolen, leaked, used, or destroyed by unauthorized persons.
- h. *Defense-in-depth* shall refer to a security strategy or design of deploying security controls over multiple or various layers across the network, systems, and applications such that a failure in one control would be compensated by another control in the next layer. This approach effectively delays or disrupts an attacker's ability to progress within the attack sequence.
- i. *Distributed denial of Service (DDoS)* shall refer to a type of attack which makes use of the capacity limitation of enterprise networks, systems or ingress with extreme traffic loads.
- j. *Hacking* Unauthorized access into or interference in networks, systems and computers without the knowledge and consent of the system/information owner.
- k. *Information security program (ISP)* shall refer to information security policies, standards and procedures, security operations, technologies, organizational structures, and information security awareness and training programs aimed at protecting a BSFI's information assets and supporting infrastructure from internal and external threats.
- l. *Information security strategic plan (ISSP)* shall refer to the roadmap to guide a BSFI in transforming the current state of security to the desired state taking into account business goals and strategies.
- m. *Information security risk management (ISRM)* shall refer to the process of identifying, assessing, mitigating, managing, and monitoring information security risks, including cyber-risk, to ensure these are within acceptable levels. It should be integrated into the BSFI's ISP and enterprise-wide risk management system.
- n. *Malware* shall refer to malicious software that compromises the confidentiality, availability or integrity of information systems, networks or data. Examples of malware include ransomware, trojans, adware, botnets, bugs, and spyware, among others.
- o. *Pharming* A form of cyber-attack that redirects a website traffic to another fake website to obtain user credentials and information.
- p. *Phishing* shall refer to the use of electronic communications such as e-mail to masquerade with trusted identity to capture sensitive information to gain access to accounts. It involves tricking customers into giving sensitive information through fraudulent emails or websites.
- q. *Reportable Major Cyber-related Incidents* Any cyber-related incidents that meet the criteria for reporting/notification to the Bangko Sentral as laid out in Item a(2)(a) of the Reports under Sec 126-N.
- r. *Security operations center (SOC)* shall refer to a unit or function that provides centralized visibility, continuous monitoring, and rapid response and recovery procedures on security incidents and events.
- s. *Spearphishing* A more advanced type of phishing attack which is customized to a particular target (e.g., executives, privileged users, etc.).
- t. *Threat Actor* A person, group or nation/state/government that carries out or intends to carry out damaging acts against another party. An advanced threat actor shall refer to a person, organized group, or nation/state/government that (a) possesses superior capabilities, resources and skills to launch sophisticated cyber-attacks; or (b) seeks military and/or intelligence information for cyber-espionage purposes.

- u. Threat intelligence shall refer to the process of gathering and analyzing information about the proficiencies, tactics, and motives of malicious actors/attackers that enables a BSFI to institute appropriate countermeasures quickly.

Description of IT-related risks. As BSFIs increase their reliance on IT to deliver products and services, inappropriate usage of IT resources may have significant risk exposures. While IT does not trigger new types of risks, it brings in new dimensions to traditional banking risks (i.e., strategic risk, credit risk, market risk, liquidity risk and operational risk) that require new or enhanced control activities (e.g., a failure of a credit risk measurement application is an IT failure and, therefore, a systems failure in the sense of operational risk). Moreover, IT is an implied part of any system of internal controls, regardless of the type of risk and, consequently, forms an important element in organization-wide risk management. Among the risks associated with the use of IT are the following:

- a. *Operational risk* is the risk to earnings and capital arising from problems with service or product delivery. This risk is a function of internal controls, IT systems, employee integrity and operating processes. Operational risk exists in all products and services;
- b. *Strategic risk* is the risk to earnings and capital arising from adverse business decisions on IT-related investments or improper implementation of those decisions. The risk is a function of the compatibility of an organization's strategic goals, the business strategies developed to achieve those goals, the resources deployed against these goals and the quality of implementation. The resources needed to carry out business strategies are both tangible and intangible which include communication channels, operating systems, delivery networks and managerial capacities and capabilities;
- c. *Reputational risk* is the risk to earnings and capital arising from negative public opinion. This affects the institution's ability to establish new relationships or services or continue servicing existing relationships. The risk can expose the institution to litigation, financial loss or damage to its reputation; and
- d. *Compliance risk* is the risk to earnings and capital arising from the violations of, or non-conformance with laws, rules and regulations, prescribed practices or ethical standards. Compliance risk also arises in situations where the laws and rules governing certain products activities of the BSFI's clients may be ambiguous or untested. Compliance risk exposes the institution to monetary penalties, non-monetary sanctions and possibility of contracts being annulled or declared unenforceable.

IT Risk Management System (ITRMS). As BSFIs become more dependent on IT systems and processes, technology risks and information security issues have become progressively more complex and pressing in recent years. Information security is just as important as the new technologies being installed by BSFIs. As progress in technology shifts to higher gear, the trend in cyber-attacks, intrusions, and other form of incidents on computer systems shows that it will not only persist but will continue to increase in frequency and spread in magnitude.

Management of IT risks and information security issues becomes a necessity and an important part of BSFIs' risk management system. BSFIs are therefore required to establish a robust ITRM system covering four (4) key components: 1) IT governance, 2) risk identification and assessment 3) IT controls implementation, and 4) risk measurement and monitoring.

- a. *IT Governance.* This is an integral part of BSFIs' governance framework and consists of the leadership and organizational structures and processes that ensure the alignment of IT strategic plan with BSFIs' business strategy, optimization of resources management, IT value delivery, performance measurement and the effective and efficient use of IT to achieve business objectives and effective IT risk management implementation. BSFIs must establish an effective IT governance framework covering the following:
 - (1) *Oversight and organization of IT functions.* Accountability is a key concern of IT governance and this can be obtained with an organizational structure that has well-defined roles for the responsibility of information, business processes, applications, IT infrastructure, etc.

The Board of Directors is ultimately responsible for understanding the IT risks confronted by a BSFI and ensuring that they are properly managed, whereas the Senior Management is accountable for designing and implementing the ITRMS approved by the Board. For Complex BSFIs, the Board may delegate to an IT Steering Committee (ITSC) or its equivalent IT oversight function to cohesively monitor IT performance and institute appropriate actions to ensure achievement of desired results. The ITSC, at a minimum, should have as members a non-executive Board director who oversees the institution's IT function, the head of IT group/department, and the highest rank officer who oversees the business user groups. The head of control groups should participate in ITSC meetings in advisory capacity only.

A charter should be ratified by the Board to clearly define the roles and responsibilities of the ITSC. Formal minutes of meeting should be maintained to document its discussions and decisions. The ITSC should regularly provide adequate information to the Board regarding IT performance, status of major IT projects or other significant issues to enable the Board to make well-informed decisions about the BSFIs' IT operations.

BSFIs should develop an IT strategic plan that is aligned with the institution's business strategy. This should be undertaken to manage and direct all IT resources in line with the business strategy and priorities. IT strategic plan should focus on long term goals covering three (3)-to five (5)-year horizon and should be sufficiently supplemented by tactical IT plans which specify concise objectives, action plans and tasks that are understood and accepted by both business and IT. The IT strategic plan should be formally documented, endorsed by the Board and communicated to all stakeholders. It should be reviewed and updated regularly for new risks or opportunities to maximize the value of IT to the institution.

BSFIs should also create an organization of IT functions that will effectively deliver IT services to business units. For "Complex" BSFIs, a full-time IT Head or equivalent rank should be designated to take the lead in key IT initiatives and oversee the effectiveness of the IT organization. In addition to managing the delivery of day-to-day IT services, the IT Head should also oversee the IT budget and maintain responsibility for performance management, IT acquisition oversight, professional development and training. The IT Head should be a member of executive management with direct involvement in key decisions for the BSFI and usually reports directly to the President or Chief Executive Officer.

A clear description of roles and responsibilities for individual IT functions should be documented and approved by the Board. Proper segregation of duties within and among the various IT functions should be implemented to reduce the possibility for an individual to compromise a critical process. A mechanism should be in place to ensure that personnel are performing only the functions relevant to their respective jobs and positions. In the event that an institution finds it difficult to segregate certain IT control responsibilities, it should put in place adequate compensating controls (e.g. peer reviews) to mitigate the associated risks.

- (2) *IT policies, procedures and standards.* IT controls, policies, and procedures are the foundation of IT governance structure. It helps articulate the rules and procedures for making IT decisions, and helps to set, attain, and monitor IT objectives.

BSFIs should adopt and enforce IT-related policies and procedures that are well-defined and frequently communicated to establish and delineate duties and responsibilities of personnel for better coordination, effective and consistent performance of tasks, and quicker training of new employees. Management should ensure that policies, procedures, and systems are current and well-documented. The ITSC should review IT policies, procedures, and standards at least on an annual basis. Any updates and changes should be clearly documented and properly approved. IT policies and procedures should include at least the following areas:

- IT Governance/Management;
- Development and Acquisition;
- IT Operations;
- Communication networks;
- Information security;
- Electronic Banking/Electronic Products and Services; and
- IT Outsourcing/Vendor Management.

For simple BSFIs, some of the above areas (i.e., development, electronic banking, etc.) may not be applicable, thus sound judgment should be employed to ensure that the BSFI's IT policies and procedures have adequately covered all applicable areas.

- (3) *IT audit.* Audit plays a key role in assisting the Board in the discharge of its corporate governance responsibilities by performing an independent assessment of technology risk management process and IT controls.

Auditors provide an assurance that important control mechanisms are in place for detecting deficiencies and managing risks in the implementation of IT. They should be qualified to assess the specific risks that arise from specific uses of IT. BSFIs should establish effective audit programs that cover IT risk exposures throughout the organization, risk-focused, promote sound IT controls, ensure the timely resolution of audit deficiencies and periodic reporting to the Board on the effectiveness of the institution's IT risk management, internal controls, and IT governance. Regardless of size and complexity, the IT audit program should cover the following:

- Independence of the IT audit function and its reporting relationship to the Board or its Audit Committee;
- Expertise and size of the audit staff relative to the IT environment;
- Identification of the IT audit universe, risk assessment, scope, and frequency of IT audits;
- Processes in place to ensure timely tracking and resolution of reported weaknesses; and
- Documentation of IT audits, including work papers, audit reports, and follow-up.

In case in-house IT audit expertise is not available, such as for a simple BSFI, the IT audit support may be performed by external specialists and auditors of other institutions consistent with existing Bangko Sentral rules and regulations on outsourcing. (Detailed guidelines/standards on IT Audit are shown in *Appendix Q-61*).

- (4) *Staff competence and training.* The rapid development in technology demands appropriate, skilled personnel to remain competent and meet the required level of expertise on an ongoing basis.

BSFIs should have an effective IT human resources management plan that meets the requirements for IT and the business lines it supports. Management should allocate sufficient resources to hire and train employees to ensure that they have the expertise necessary to perform their job and achieve organizational goals and objectives.

Management needs to ensure that staffing levels are sufficient to handle present and expected work demands, and to cater reasonably for staff turnover. Appropriate succession and transition strategies for key officers and personnel should be in place to provide for a smooth transition in the event of turnover in vital IT management or operations functions.

- (5) *Management Information Systems (MIS).* The BSFIs' IT organization often provides an important support role for their MIS. Accurate and timely MIS reports are an essential component of prudent and reasonable business decisions. At the most senior levels, MIS provides the data and information to help the Board and management make strategic decisions. At other levels, MIS allows management to monitor the institution's activities and distribute information to other employees, customers, and members of management.

Advances in technology have increased the volume of information available to management and directors for planning and decision-making. However, if technology is not properly managed, the potential for inaccurate reporting and flawed decision making increases. Because report generation systems can rely on manual data entry or extract data from many different financial and transaction systems, management should establish appropriate control procedures to ensure information is correct, relevant, and adequately protected. Since MIS can originate from multiple equipment platforms and systems, the controls should ensure all information systems have sufficient and appropriate controls to maintain the integrity of the information and the processing environment. Sound fundamental principles for MIS review include proper internal controls, operating procedures, safeguards, and audit coverage.

- (6) *IT risk management function.* Management of risk is a cornerstone of IT Governance. BSFIs should have a policy requiring the conduct of identification, measurement, monitoring and controlling of IT risks for each business function/service on a periodic basis. BSFIs should define and assign these critical roles to a risk management unit or to a group of persons from different units collectively performing the tasks defined for this function.

The function should have a formal technology risk acknowledgement and acceptance process by the owner of risk to help facilitate the process of reviewing, evaluating and approving any major incidents of non-compliance with IT control policies. The process can be supported by the following:

- a description of risk being considered for acknowledgement by owner of risk and an assessment of the risk that is being accepted;
- identification of mitigating controls;
- formulation of a remedial plan to reduce risk; and
- approval of risk acknowledgement from the owner of the risk and senior management.

ITRM processes should be integrated into the enterprise-wide risk management processes to allow BSFIs to make well-informed decisions involving business plans and strategies, risk responses, risk tolerance levels and capital management, among others.

- b. *Risk identification and assessment.* BSFIs should maintain a risk assessment process that drives response selection and controls implementation. An effective IT assessment process begins with the identification of the current and prospective IT risk exposures arising from the institution's IT environment and related processes. The assessments should identify all information assets, any foreseeable internal and external threats to these assets, the likelihood of the threats, and the adequacy of existing controls to mitigate the identified risks. Management should continually compare its risk exposure to the value of its business activities to determine acceptable risk levels. Once management understands the institution's IT environment and analyzes the risk, it should rank the risks and prioritize its response. The probability of occurrence and the magnitude of impact provide the foundation for reducing risk exposures or establishing mitigating controls for safe, sound, and efficient IT operations appropriate to the complexity of the organization. Periodic risk assessment process should be done at the enterprise-wide level and an effective monitoring program for the risk mitigation activities should be manifested through mitigation or corrective action plans, assignment of responsibilities and accountability and management reporting.

- c. *IT controls implementation.* Controls comprise of policies, procedures, practices and organizational structures designed to provide reasonable assurance that business objectives will be achieved and undesired events will be mitigated. Management should establish an adequate and effective system of internal controls based on the degree of exposure and the potential risk of loss arising from the use of IT. Controls for IT environment generally should address the overall integrity of the environment and should include clear and measurable performance goals, the allocation of specific responsibilities for key project implementation, and independent mechanisms that will both measure risks and minimize excessive risk-taking. BSFI Management should implement satisfactory control practices that address the following as part of its overall IT risk mitigation strategy: 1) Information security; 2) Project management/development and acquisition and change management; 3) IT operations; 4) IT outsourcing/Vendor management; and 5) Electronic banking, Electronic payments, Electronic money and other Electronic products and services.
- (1) *Information security.* Information is a vital asset of a BSFI that must be adequately protected and managed to preserve its confidentiality, integrity and availability. Considering the crucial role information plays in supporting business goals and objectives, driving core operations and critical decision-making, information security is intrinsically linked to the overall safety and soundness of BSFIs. Thus, the BSFI needs to put in place a robust, resilient and enterprise- wide framework for ISRM supported by effective information security governance and oversight mechanisms. Information security risk exposures must be managed to within acceptable levels through a dynamic interplay of people, policies and processes, and technologies and must be integrated with the enterprise-wide risk management system.

Management should adopt a holistic, integrated and cyclical approach to managing information security risks. An ISRM framework should be in place encompassing key elements and phases with effective governance mechanisms to oversee the entire process. The framework represents a continuing cycle that should evolve over time taking into account changes in the operating and business environment as well as the overall cyber-threat landscape.

Figure 1. Information Security Risk Management Framework

The ISRM framework is based upon the following underlying fundamental principles and concepts:

- (a) *Strong leadership and effective Information Security (IS) governance and oversight.* The BSFI's Board and Senior Management set the overall tone and strategic direction for information security by providing strong leadership, effective information security governance and oversight. They should take the lead in establishing an information security culture that regards security as an intrinsic part of the BSFI's core business and operations. Instilling a strong security culture ensures that security controls, processes, and measures are deeply embedded into the institution's lines of business, products, services and processes, including its employees and external relationships. The Board and Senior Management should adopt the right mindset and understand the crucial role of information security in supporting/achieving business goals and objectives. Towards this end, they should oversee the development of an information security strategic plan (ISSP) to clearly articulate security strategies and objectives aligned with business plans.

The BSFI should maintain a comprehensive, well-designed and effective information security program (ISP) that is commensurate with its operational and IT profile complexity. To ensure its effectiveness and sustainability, the ISP should have strong support from the Board and Senior Management as well as cooperation of all concerned stakeholders. Management should see to it that adequate resources, organizational functions/capabilities, policies, standards, and procedures as well as the supporting infrastructure commensurate with the BSFI's IT risk complexity and appetite are available and optimized

to effectively implement the ISSP and ISP. Lastly, the Board and Senior Management should appoint a Chief Information Security Officer (CISO), a senior level executive with sufficient authority within the institution, who will be responsible and accountable for the organization-wide ISP.

- (b) *Integrated, holistic and risk-based approach.* The ISRM should form an integral part of the BSFI's ISP and enterprise risk management system. It encompasses the people, policies and processes, and technology elements in the organization that should be harmonized to support information security goals and objectives. Information security is not achieved by merely focusing on technology or one aspect and no one element is superior over the other. Each of these elements must work together to achieve the desired security posture and manage information security risks to acceptable levels. In line with the increasing interconnectivity of BSFIs and other industry players, the ISRM should also consider security controls and requirements over third party service providers, customers, banks, and other third party stakeholders which are linked or have access to the BSFI's network and systems. This is because threat actors may launch their attacks on the BSFI through these third party networks.

Likewise, the ISRM including cyber-risk management programs should be commensurate with the inherent risks involved. This means that the BSFI's information security controls and maturity levels should be commensurate with its operations and complexity of IT profile. In this regard, in determining whether a certain control requirement is applicable to the BSFI, it shall first assess the complexity of its IT profile pursuant to Sec. 126-N. BSFIs with complex IT profile are expected to implement the more advanced security control measures and be at the higher levels of the information security/cyber-maturity curve. BSFIs may also refer to leading standards and frameworks issued by standard-setting bodies¹ on information security and cybersecurity in designing their ISRM.

- (c) *Continuing cycle.* The ISRM involves a continuing cycle consisting of the following six (6) major phases:
 - (i) *Identify.* The starting point of the cycle is the identification of the BSFI's information security as well as cyber-related risks. Under this phase, management needs to identify its business processes and functions, information assets classified as to sensitivity and criticality, threats and vulnerabilities, interconnections, and security architecture. Identification of these factors facilitates BSFI's understanding and assessment of its inherent information security and cyber risks which are key inputs in determining, designing, and implementing the appropriate risk treatment options.
 - (ii) *Prevent.* After identifying these key factors and assessing the information security and cyber risks, the prevent phase comes into play where adequate protection mechanisms and controls are designed and implemented. These include measures ranging from baseline to advanced tools and approaches such as defense-in-depth, malware prevention, access controls and cybersecurity awareness programs, among others. These preventive controls are generally categorized into three (3) types, as follows:
 - (aa) *Administrative controls* – refer to the policies, standards, and procedures in place which articulate Management's intent, expectations, and direction on information security. It also includes security practices designed to prevent unwarranted employee behavior.
 - (bb) *Physical and environmental controls* – pertains to the security controls and measures implemented to protect physical infrastructure such as data centers, computer facilities, and equipment from damage, unauthorized access or environmental hazards.
 - (cc) *Technical controls* -refer to the logical security controls, security tools, and technologies to ensure that the confidentiality, integrity, and availability objectives for information assets are achieved.
 - (iii) *Detect.* Detection capabilities should also be in place as prevention alone is not sufficient. As demonstrated in recent cyber-attacks, the ability of an institution to quickly detect anomalous activities and evaluate the scope of an attack is an important aspect in significantly reducing negative impacts. Management should design and implement effective detection controls over the BSFI's networks, critical systems and applications, access points, and confidential information.
 - (iv) *Respond.* The response phase is triggered upon confirmation of an occurrence of a cyber-attack or security incident affecting the BSFI and its customers. With the growing incidence of sophisticated cybercrimes and threats, the BSFI should be prepared to respond quickly considering that cyber-attacks are no longer a remote possibility. Therefore, it should develop comprehensive, updated, and tested incident response plans supported by well-trained incident responders, investigators, and forensic data collectors. Through adequate response capabilities, the BSFI should be able to minimize and contain the damage and impact arising from security incidents, immediately restore critical systems and services, and facilitate investigation to determine root causes.

¹ US National Institute of Standards and Technology (NIST), ISO/IEC, ISACA and Committee on Payments and Market Infrastructures (CPMI), among others.

- (v) *Recover*. This phase encompasses both the resumption of activities at a level which is considered "good enough for a certain period of time" and full recovery, i.e., an eventual return to full service. Management should be able to establish back-up facilities and recovery strategies to ensure the continuity of critical operations. During the recovery phase, it should ensure that information processed using back-up facilities and alternate sites still meet acceptable levels of security. To achieve cyber resilience, the BSFI should consider information security incidents and cyber-related attack scenarios in its business continuity management and recovery processes.
 - (vi) *Test*. The BSFI needs to continually assess and test controls and security measures implemented under the prevent, detect, respond, and recover phases to ensure that these are effective and working as intended. Likewise, a comprehensive, systematic and layered testing and assurance program covering security processes and technologies should be in place. This is to ensure that the ISRM is on track in providing appropriate level of information security commensurate to the BSFI's IT profile complexity. This phase also ensures that both the ISSP and ISP remain effective vis-a-vis the fast-evolving cyber-threat landscape.
- (d) *Cyber threat intelligence and collaboration*. In response to the growing cyber-threat landscape, BSFIs need to step up their information security posture and resilience beyond their respective networks. Likewise, BSFIs need to enhance situational awareness that would provide a keen sense of the threat landscape as it relates to their IT risk and cyber-risk profiles, operating complexities, and business models. Further, BSFIs need to collaborate with each other, including regulators, law enforcement agencies, and other third party stakeholders for a collective, coordinated, and strategic response through information sharing and collaboration. Information sharing allows BSFIs to enhance threat intelligence that enables quick identification, prevention and response to emerging and persistent threats. (Detailed guidelines/standards on information security are shown in *Appendix Q-62*).
- (2) *Project management/development and acquisition and change management*. BSFIs should establish a framework for management of IT-related projects. The framework should clearly specify the appropriate project management methodology that will govern the process of developing, implementing and maintaining major IT systems. The methodology, on the other hand, should cover allocation of responsibilities, activity breakdown, budgeting of time and resources, milestones, checkpoints, key dependencies, quality assurance, risk assessment and approvals, among others. In the acquisition and/or development of IT solutions, BSFIs should ensure that business and regulatory requirements are satisfied. (Detailed guidelines/standards on Project Management/Development and Acquisition and Change Management are shown in *Appendix Q-63*).
- (3) *IT operations*. IT has become an integral part of the day-to-day business operation, automating and providing support to nearly all of the business processes and functions within the institution. Therefore, the IT systems should be reliable, secure and available when needed which translates to high levels of service and dependency on IT to operate.

One of the primary responsibilities of IT operations management is to ensure the institution's current and planned infrastructure is sufficient to accomplish its strategic plans. BSFI management should ensure that IT operates in a safe, sound, and efficient manner throughout the institution. Given that most IT systems are interconnected and interdependent, failure to adequately supervise any part of the IT environment can heighten potential risks for all elements of IT operations and the performance of the critical business lines of the BSFIs. Such scenario necessitates the coordination of IT controls throughout the institution's operating environment. (Detailed guidelines/standards on IT Operations are shown in *Appendix Q-64*)

- (4) *IT outsourcing/vendor management program*. IT outsourcing refers to any contractual agreement between a BSFI and a service provider or vendor for the latter to create, maintain, or reengineer the institution's IT architecture, systems and related processes on a continuing basis. A BSFI may outsource IT systems and processes except those functions expressly prohibited by existing regulations. The decision to outsource should fit into the institution's overall strategic plan and corporate objectives and said arrangement should comply with the provisions of existing Bangko Sentral rules and regulations on outsourcing. Although the technology needed to support business objectives is often a critical factor in deciding to outsource, managing such relationships should be viewed as an enterprise-wide corporate management issue, rather than a mere IT issue.

While IT outsourcing transfers operational responsibility to the service provider, the BSFIs retain ultimate responsibility for the outsourced activity. Moreover, the risks associated with the outsourced activity may be realized in a different manner than if the functions were inside the institution resulting in the need for controls designed to monitor such risks. BSFI management should implement an effective outsourcing oversight program that provides the framework for management to understand, monitor, measure, and control the risks associated with outsourcing. BSFIs outsourcing IT services should have a comprehensive outsourcing risk management process which provides guidance on the following areas: 1) risk assessment; 2)

selection of service providers; 3) contract review; and 4) monitoring of service providers. Detailed guidelines/standards on IT Outsourcing/Vendor Management and on the adoption of outsourced cloud computing model are shown in *Appendix Q-65*.

- (5) *Electronic products and services*. The evolution in technology revolutionized the way banking and financial products and services are delivered. Physical barriers were brought down enabling clients to access their accounts, make transactions or gather information on financial products and services anywhere they are, at any time of the day and at their own convenience. As development in technology continues to accelerate, innovative electronic products and services are foreseen to bring more accessibility and efficiency. However, BSFIs may be confronted with challenges relating to capacity, availability and reliability of the electronic services. Likewise, fraudulent activities via electronic channels are also rising in number.

BSFIs should protect customers from fraudulent schemes done electronically. Otherwise, consumer confidence to use electronic channels as safe and reliable method of making transactions will be eroded. To mitigate the impact of cyber fraud, BSFIs should adopt aggressive security posture such as the following:

- (a) The entire ATM system shall be upgraded/converted to allow adoption of end-to-end Triple DES (3DES) encryption standards by 01 January 2015. The 3DES encryption standards shall cover the whole ATM network which consists of the host processors, switches, host security module (HSM), automated teller machines (ATMs), point-of-sale (POS) terminals and all communication links connected to the network; and
- (b) ATMs to be installed after 14 September 2013 should be 3DES compliant; and
- (c) ATMs, POS terminals and payment cards are also vulnerable to skimming attacks due to the lack of deployment of globally recognized EMV enabled technology by BSFIs. Magnetic stripe only ATMs, POS Terminals and cards are largely defenseless against modern fraud techniques. Therefore, all concerned BSFIs should shift from magnetic stripe technology to EMV chip-enabled cards, POS Terminals and ATMs. The entire payment card network should be migrated to EMV by 01 January 2017. This requirement shall cover both issuing and acquiring programs of concerned BSFIs. A written and Board-approved EMV migration plan should be submitted to Bangko Sentral within six (6) months from 22 August 2013. The guidelines on EMV Implementation are shown in *Appendix N-17*. The guidelines on EMV Card Fraud Liability Shift Framework (ECFLSF) are in *Appendix N-18*.

The guidelines on EMV implementation are shown in *Appendix N-17*. The guidelines on EMV Card Fraud Liability Shift Framework (ECFLSF) are shown in *Appendix N-18*. Detailed guidelines/standards on Electronic Products and Services are shown in *Appendix Q-66*.

- d. *Risk measurement and monitoring*. BSFI Management should monitor IT risks and the effectiveness of established controls through periodic measurement of IT activities based on internally established standards and industry benchmarks to assess the effectiveness and efficiency of existing operations. Timely, accurate, and complete risk monitoring and assessment reports should be submitted to management to provide assurance that established controls are functioning effectively, resources are operating properly and used efficiently and IT operations are performing within established parameters. Any deviation noted in the process should be evaluated and management should initiate remedial action to address underlying causes. The scope and frequency of these performance measurement activities will depend on the complexity of the BSFI's IT risk profile and should cover, among others, the following:

- (1) *Performance vis-à-vis approved IT strategic plan*. As part of both planning and monitoring mechanisms, BSFI management should periodically assess its uses of IT as part of overall business planning. Such an enterprise-wide and ongoing approach helps to ensure that all major IT projects are consistent with the BSFI's overall strategic goals. Periodic monitoring of IT performance against established plans shall confirm whether IT strategic plans remain in alignment with the business strategy and the IT performance supports the planned strategy.
- (2) *Performance benchmarks/service levels*. BSFIs should establish performance benchmarks or standards for IT functions and monitor them on a regular basis. Such monitoring can identify potential problem areas and provide assurance that IT functions are meeting the objectives. Areas to consider include system and network availability, data center availability, system reruns, out of balance conditions, response time, error rates, data entry volumes, special requests, and problem reports.

Management should properly define services and service level agreements (SLA) that must be monitored and measured in terms understandable to the business units. SLA with business units and IT department should be established to provide a baseline to measure IT performance.

- (3) *Quality assurance/quality control*. BSFI should establish quality assurance (QA) and quality control (QC) procedures for all significant activities, both internal and external, to ensure that IT is delivering value to business in a cost effective manner and promotes continuous improvement through ongoing monitoring. QA

activities ensure that product conforms to specification and is fit for use while QC procedures identify weaknesses in work products and to avoid the resource drain and expense of redoing a task. The personnel performing QA and QC reviews should be independent of the product/process being reviewed and use quantifiable indicators to ensure objective assessment of the effectiveness of IT activities in delivering IT capabilities and services.

- (4) *Policy compliance.* BSFIs should develop, implement, and monitor processes to measure IT compliance with their established policies and standards as well as regulatory requirements. In addition to the traditional reliance on internal and third party audit functions, BSFIs should perform self-assessments on a periodic basis to gauge performance which often lead to early identification of emerging or changing risks requiring policy changes and updates.
- (5) *External assessment program.* Complex BSFIs may also seek regular assurance that IT assets are appropriately secured and that their IT security risk management framework is effective. This may be executed through a formal external assessment program that facilitates a systematic assessment of the IT security risk and control environment over time.

Reporting and notification standards. In line with the increased reliance on and adoption of technology by BSFIs, along with growing concerns on cybersecurity, BSFIs should submit regular and event-driven reports covering technology-related information as well as incidence of major cyber-attacks and operational disruptions. This will enable the Bangko Sentral to have an enhanced visibility on the changing IT risk landscape and to proactively ensure that the impact and risks arising from cyber-related incidents and operational disruptions are minimized and contained to avert potential systemic risks to the financial system.

a. Reporting requirement. BSFIs are required to submit to the Bangko Sentral the following reports/information:

- (1) Periodic reports. BSFIs shall submit an Annual IT Profile, as listed in *Appendix 7*, electronically to the appropriate supervising department of the Bangko Sentral within twenty-five (25) calendar days from the end of reference year.
- (2) Event-driven reports. BSFIs shall notify the Bangko Sentral upon discovery of any of the following:
 - (a) Reportable Major Cyber-related Incidents. These cover all events which may seriously jeopardize the confidentiality, integrity or availability of critical information, data or systems of BSFIs, including their customers and other stakeholders. Reporting of such incidents to the Bangko Sentral should form part of the incident management plan of BSFIs.

An incident is considered a reportable major cyber-related incident, if after assessing the nature of the incident or attack, the BSFI has determined that the same:

- (i) resulted in an unauthorized access and infiltration into the BSFI's internal network (i.e., hacking, advanced persistent threats, presence of malware);
 - (ii) involved a system-level compromise (i.e., attacks on BSFI's core systems, as opposed to phishing attempts of individual clients);
 - (iii) affected a significant number of customer accounts simultaneously;
 - (iv) involved significant data loss or massive data breach;
 - (v) indicated spearphishing attacks targeting the BSFIs' directors, senior executives, officers, or privileged users;
 - (vi) resulted in the unavailability of critical systems/services (e.g., Distributed Denial of Service (DDoS) attack resulting in service outage);
 - (vii) inflicted material financial losses to the BSFIs, their customers and other stakeholders; or
 - (viii) has been suspected to be perpetrated by an advanced threat actor.
- (b) Disruptions of financial services and operations. These include disruption of critical operations which lasts for more than two (2) hours due to internal and external threats, which may be natural, man-made or technical in origin. Such scenarios usually involve loss of personnel, technology, alternate site, and service providers. Causes of such interruptions include, but are not limited to, fire, earthquakes, flood, typhoon, long-term power outage, technical malfunctions, pandemics and other threats.

Security events/attacks which are normally prevented by security systems/devices need not be reported to the Bangko Sentral, except if the same involve significant financial value and/or multitude of customer accounts beyond BSFI's reasonable threshold levels. For instance, an attempt to fraudulently transfer funds involving large sums of money requires immediate notification to the Bangko Sentral as this can be a signal of impending attacks to other BSFIs.

- b. Procedure for event-driven reporting. The following procedures shall be followed by BSFIs in reporting reportable major cyber-related incidents and/or disruptions of financial services and operations stated in Item “a(2)” of this Section:
 - (1) The BSFIs’ Compliance Officer and/or BSFI-designated Officer shall notify the appropriate supervising department of the Bangko Sentral within two (2) hours from discovery of the reportable major cyber-related incidents and/or disruptions of financial services and operations stated in Item “a(2)” of this Section, in accordance with *Appendix N-1*.
 - (2) The BSFIs shall disclose, at the minimum, the nature of the incident and the specific system or business function involved.
 - (3) Within twenty-four (24) hours from the time of the discovery of the reportable major cyber-related incident and/or disruption, a follow-up report should be sent to the appropriate supervising department of the Bangko Sentral through e-mail indicating the following, as applicable:
 - (a) nature of the incident;
 - (b) manner and time of initial detection;
 - (c) impact of the incident based on initial assessment (e.g., length of downtime, number of affected customers/accounts, number of complaints received, value of transactions involved);
 - (d) initial response or actions taken/to be taken (e.g., conduct of root cause analysis) with respect to the incident; and
 - (e) information if the incident resulted in activation of the Business Continuity Plan (BCP) and/or Crisis Management Plan (CMP).
- c. Verification of root cause. Depending on the nature and severity of the reported incident/disruption, the Bangko Sentral may require BSFIs to provide additional information or updates until the matter is satisfactorily resolved. Likewise, the Bangko Sentral may conduct special examination or overseeing inspection, if necessary, to verify root cause of the incident, assess the impact to the BSFI and the financial system as a whole, identify areas for improvement to prevent recurrence of the incident, and promote enterprise and industry-wide operational resilience.
- d. Compliance with reporting of crimes and losses. Compliance with event-driven report requirement shall not excuse BSFIs from complying with the existing rules on the reporting of crimes and losses under Sec. 173 and *Appendix Q-5/S-3*. Likewise, any cyber-related incident which does not qualify as a reportable major cyber-related incident and other disruptions arising from crimes and losses must be reported to the Bangko Sentral in accordance with the aforesaid regulations. Operational risk events which are covered under Item a(2) on the event-driven reporting and notification requirements shall no longer require separate reporting and notification pursuant to Sec. 125-N (*Notification/reporting to Bangko Sentral*).

Information gathering. Should the conduct of in-depth studies and research on certain technology development or key area of concern relating to technology risk and cybersecurity be warranted, the Bangko Sentral, from time to time, may request BSFIs to submit specific data and information thereon through surveys, questionnaires or other means.

Sanctions and penalties. BSFIs should make available all policies and procedures and other documents/requirements related to the foregoing during on-site examination as well as provide copies thereof to the Bangko Sentral when a written request is made to determine their compliance with this Section.

Consistent with Sec. 002-Q, the Bangko Sentral may deploy enforcement actions to promote adherence with the requirements set forth in Sec. 126-N and bring about timely corrective actions. Any violation of the provisions of this Section, its appendices and annexes, shall subject the BSFI and/or its directors, officers, and/or employees to the monetary and non-monetary sanctions, as provided under existing laws, Bangko Sentral rules and regulations. Enforcement actions shall be imposed on the basis of the overall assessment of BSFIs’ ITRMS. Whenever a BSFI’s ITRMS is rated “1” pursuant to Sec. 126-N, the following additional sanctions may be imposed:

- a. Non-compliance with the requirements in Item b of Reports of Sec. 126-N will be subject to “High” penalty level monetary sanctions pursuant to Sec. 126-N. Consistent with Sec. 002-Q, the Bangko Sentral may deploy applicable enforcement actions on the BSFI and/or its directors, officers, and/or employees for violations on this requirement.
- b. Annual IT Profile and other periodic reports which have been considered as erroneous, delayed or unsubmitted shall be subject to the penalties for *Category B* reports under Sec. 171 (*Sanctions on Reports for Non-compliance with the Reporting Standards*) of the MORB.

On the requirement to adopt multi-factor authentication techniques for sensitive communications and/or high risk transactions pursuant to Item “4.1.2” of *Appendix Q-66*, the Bangko Sentral may issue directives to improve authentication and authorization procedures for sensitive communications and/or high risk transactions, or impose sanctions to limit the level of or suspend any electronic products and services that are not compliant with such requirements.

(Circular Nos. 1051 dated 27 September 2019, 1019 dated 31 October 2018, 982 dated 09 November 2017, and 958 dated 25 April 2017)

BSFIs can be adversely affected by disruption of critical operations due to internal and external threats, which may be natural, man-made or technical in origin. Extreme events may cause major disruptions whose impact are very broad in scope, duration or both and can pose a substantial risk to the continued operation of BSFIs. Because BSFIs play a crucial role in the financial system and economy as a whole, it is important to ensure that their operations can withstand the effects of major disruptions. Thus, BSFIs need to have a comprehensive business continuity management (BCM) process as an integral part of their operational risk management system. A well-designed BCM process enables BSFIs to resume critical operations swiftly and minimize operational, financial, legal, reputational, and other material risks arising from a disruption. This also helps mitigate systemic risks as well as maintain public trust and confidence in the financial system.

Purpose, applicability, and scope. The guidelines aim to promote sound management of business continuity risks. These align existing regulations, to the extent possible, with leading standards and recognized principles on BCM, and shall serve as the Bangko Sentral's baseline requirement for all BSFIs.

The guidelines shall apply to BSFIs which include banks, NBQB, non-bank electronic money issuers and other non-bank institutions which under existing Bangko Sentral rules and regulations and special laws are subject to Bangko Sentral supervision and/or regulation. Moreover, subject guidelines shall also apply to BSFIs with offshore data processing as may be appropriate to their situation.

Definition of terms. In these guidelines, terms are used with the following meanings:

- a. *Alternate and business recovery sites* shall refer to standby facilities for use during disruption of critical operations to ensure business continuity. These provide work space and/or the necessary technology environment needed to process business-critical information. Organizations may have more than one (1) alternate site. In some cases, alternate sites may involve facilities that are used for normal day-to-day operations but which are able to accommodate additional business processes when a primary location becomes inoperable. Examples of alternate sites include relocation and disaster recovery sites, whether managed directly or maintained by a third party for a BSFI or for use by multiple organizations.
- b. *Business continuity* shall refer to a state of continued, uninterrupted operation of a business.
- c. *BCM* shall refer to an enterprise-wide framework encompassing policies, standards, facilities, personnel and practices that provides for continuous functioning of the institution during disruptions. It is proportionate to the BSFI's internal and external risk exposures and tailored to the nature, scale, and complexity of its business.
- d. *Business continuity plan (BCP)/Plan* shall refer to a documented plan detailing the orderly and expeditious process of recovery, resumption, and restoration of business functions in the event of disruptions. It should be able to cover and establish linkages among its multiple components, such as communication plan, crisis management plan, contingency funding plan, and technology recovery plan.
- e. *Business impact analysis (BIA)* shall refer to the process of identifying and measuring (quantitatively and qualitatively) the business impact or loss of business processes in the event of a disruption. It is used to identify recovery priorities, recovery resource requirements, essential staff, and dependencies (internal and external) to be incorporated in the plan.
- f. *Crisis* shall refer to a situation that requires urgent action due to its disruptive impact on the BSFI's core activities or business and operating environment.
- g. *Crisis management plan (CMP)* shall refer to a documented plan detailing the actions to be taken when a crisis strikes a BSFI and designed to maintain order amidst the confusion surrounding such situations. During and immediately after a crisis, the members of the crisis management team will convene and activate the plan to attain control over the crisis and minimize its impact to operations.
- h. *Critical process* shall refer to any activity, function or service, which when lost would materially affect the continued operation of the BSFI.
- i. *Cyber resilience* shall refer to an organization's ability to anticipate, handle, adapt to, and/or recover from evolving cyber threats.
- j. *Events* shall refer to disruption scenarios such as loss of people, technology, alternate site, and service providers.

¹ BSFIs shall comply with the foregoing standards on BCM within a period of one (1) year from 11 April 2017. In this regard, a BSFI should be able to show its plan of actions with specific timelines, as well as the status of initiatives being undertaken to fully comply with the provisions of Sec. 127-N starting July 2017, upon request of the Bangko Sentral.

- k. *Pandemic* shall refer to epidemics or outbreaks in humans of infectious diseases that have the ability to spread rapidly over large areas, possibly worldwide.
- l. *Recovery point objective (RPO)* shall refer to acceptable amount of data loss should a disruption occur without severe impact on the recovery of operations.
- m. *Recovery time objective (RTO)* shall refer to the period of time following an incident within which a product, system or business process must be resumed or resources must be recovered.
- n. *Resilience* shall refer to the ability of an organization to anticipate, handle, adapt to and/or recover from a disruption and resume operations.
- o. *Risk assessment* shall refer to the process involving the identification and assessment of potential threats and vulnerabilities that could severely interrupt a BSFI's business activities and the corresponding likelihood and magnitude of impact on business processes.
- p. *Technology recovery plan (TRP)/disaster recovery plan (DRP)* shall refer to a documented plan detailing the technology strategy and requirements during recovery for business and support functions. The relevant regulations are in Item "3.3.2.13" of Appendix Q-64.

Roles and responsibilities.

- a. *Board of directors and senior management.* The BSFI's board and senior management are responsible for overseeing the implementation of a sound BCM process, which involves the creation and promotion of an organizational culture that places high priority on business continuity. This should be reinforced by providing sufficient financial and human resources associated with the BSFI's business continuity initiatives. Senior management should establish BCM policies, standards, and processes, which must be duly endorsed to and approved by the board.

Awareness training and periodic reporting to board and senior management on matters related to business continuity are equally important to ensure their continuing commitment and support. At a minimum, periodic management reports should include the following: (1) implementation status of the BCP; (2) incident reports; (3) plan test results; (4) changes to the plan; and (5) related action items to strengthen the BSFI's ability to recover during disruptions.

- b. *BCM coordinator/unit.* Coordination and supervision of all business continuity activities should be assigned to a competent individual and/or unit with technical knowledge and experience consistent with the nature and complexity of the BSFI's business activities. A complex¹ BSFI may need a BCM unit with a team of departmental liaisons throughout the organization. For a simple BSFI, an individual BCM coordinator may suffice. While the BCM coordinator/unit may recommend initiatives or activities to be prioritized, the board and senior management are ultimately responsible for understanding the critical business processes and subsequently establishing plans to meet business process requirements in a safe and sound manner.
- c. *BSFI personnel.* BSFI personnel should understand their roles and responsibilities on the prevention of crisis and recovery of business operations during disruptions. Business and support functions should allocate responsibilities for managing disruptions and provide clear guidance regarding the succession of authority to account for unavailability of key personnel in the event of a disruption.
- d. *Audit.* An independent review of the BSFI's BCM framework and corresponding plans should be periodically performed with frequency based on a sound risk assessment process. This is to ensure that significant policy revisions resulting from changes in the operating environment, lessons learned from plan tests, and internal and regulatory audit recommendations have been considered. Moreover, plan testing exercises should be independently observed, verified, and evaluated to ensure reasonableness and validity of the testing process and the accuracy of test results.

Business continuity management framework. BSFIs should adopt a cyclical, process-oriented BCM framework, which, at a minimum, should include five (5) phases, namely: BIA and risk assessment, strategy formulation, plan development, plan testing, and personnel training and plan maintenance. This framework represents a continuous cycle that should evolve over time based on changes in business and operating environment, audit recommendations, and test results. This framework should cover each business function and the technology that supports it. Other related policies, standards, and processes should also be integrated in the overall BCM framework.

¹ Pursuant to Sec. 147-Q on IT profile classification, BSFIs are classified as "simple" but maybe re-classified as "complex" depending on extent or degree of reliance of core business function to technology.

Figure 1. Business Continuity Management Process

- a. **Business impact analysis and risk assessment.** A comprehensive BIA and risk assessment should be undertaken to serve as the foundation in the development of the plan. The BIA entails determining and assessing the potential impact of disruptions to critical business functions, processes, and their interdependencies through work-flow analyses, enterprise-wide interviews, and/or inventory questions. Accordingly, the BSFI should determine the recovery priority, RTO, RPO, and the minimum level of resources required to ensure continuity of its operations consistent with the criticality of business function and technology that supports it. The BSFI should then conduct risk assessment incorporating the results of the BIA and evaluating the probability and severity of a wide-range of plausible threat scenarios in order to come up with recovery strategies that are commensurate with the nature, scale, and complexity of its business functions.

Domestic systemically important banks (D-SIBs). To minimize the extent or impact of a D-SIB's failure in the financial system, BSFIs identified as D-SIBs by the Bangko Sentral, pursuant to Sec. 126-Q, should set the RTO for each of their critical processes to a maximum of four (4) hours from the point of disruption. For non-D-SIB BSFIs, the RTO of critical processes should be primarily driven by their BIA and risk assessment.

- b. **Strategy formulation.** Recovery and resumption strategies to achieve the agreed time-frame and deliver the minimum required services as identified in the BIA should be defined, approved, and tested. The minimum requirements for the provision of essential business and technology service levels during disruptions should be established by concerned business and support functions.
 - (1) **Recovery strategy.** As business resumption relies primarily on the recovery of technology resources, adequate provisions should be in place to ensure systems availability and recoverability during disruptions as prescribed under *Appendix Q-64*. Recovery strategies should be able to meet the agreed requirements between business units and support functions for the provision of essential business and technology service levels.
 - (2) **Continuity of operations/business resumption strategy.** The business continuity models adopted by the BSFI to handle prolonged disruptions should be based on the risk assessment of its business environment and the characteristics of its operations. The resumption strategies and resource requirements should be approved by the board as recommended by senior management or the relevant board committees to ensure alignment with corporate goals and business objectives.
- c. **Plan development.** Plans are an important, tangible evidence of the BSFI's business continuity initiatives. The objective of the plan is to provide detailed guidelines and procedures on response and management of a crisis, recovery of critical business services and functions and to ultimately resume to normal operations. The plan should be formulated on an enterprise-wide basis, reviewed and approved by the board and senior management at least annually and disseminated to all concerned employees. The plan should include provisions for both short-term and prolonged disruptions.

A well-written plan should describe the various types of events or scenarios that could prompt BCP activation. It should include, at a minimum, the following components:

- (1) Escalation, declaration and notification procedures;
- (2) Responsibilities and procedures to be followed by each continuity or recovery teams and their members. The procedures should enable the BSFI to respond swiftly to a crisis (i.e., a crisis management plan) and to recover and resume the critical processes outlined in the plan within the stipulated time frame during disruptions;

- (3) A list of resources required to recover critical processes in the event of a major disruption. This would include, but not limited to: (a) key recovery personnel; (b) computer hardware and software; (c) communication systems; (d) office equipment; and (e) vital records and data;
- (4) Relevant information about the alternate and recovery sites; and
- (5) Procedures for restoring normal business operations. This should include the orderly entry of all business transactions and records during disruption into the relevant systems up to completion of all verification and reconciliation procedures.

Communication is a critical aspect of a BCP. In this respect, the BSFI should include a communication plan for notifying all relevant internal and external stakeholders (e.g., employees, customers, vendors, regulators, counterparties, and key service providers, media and the public) following a disruption. The BSFI should maintain an up-to-date call tree and contact list of key personnel and service providers, including communication flow and channels for internal and external stakeholders. Clear and effective communication will facilitate escalation for appropriate management action and instruction to all concerned and help manage reputational risks. The BSFI should consider alternate methods of communication and preparation of pre-determined messages tailored to a number of plausible disruption scenarios to ensure various stakeholders are timely, consistently, and effectively informed.

A crisis management plan should be included in the BCP to assist senior management in dealing with and containing an emergency and avoid spillover effects to the business. Senior management should identify potential crisis scenarios and develop corresponding crisis management procedures. This includes identifying a mix of individuals from various departments who are authorized to make instantaneous decisions during crisis situations. This team shall be responsible for the actual declaration of an event, activation of the plan, and internal and external communication process.

When outsourcing plan development, management should ensure that the chosen service provider has the expertise required to analyze the business needs of the BSFI and that the arrangement conforms with legal and regulatory requirements. The service provider should be able to design executable strategies relevant to the BSFI's risk environment and design education and training programs necessary to achieve successful BCP deployment.

d. *Plan testing*

- (1) *Types of testing methods.* Plan testing is a vital element of the BCM. It ensures that the plan remains accurate, relevant, and operable. Tests should be conducted periodically, with the nature, scope, and frequency determined by the criticality of the applications, business processes, and support functions. In some cases, plan tests may be warranted due to changes in BSFI's business, responsibilities, systems, software, hardware, personnel, facilities, or the external environment.

Testing methods can vary from simple to complex each bearing its own characteristics, objectives, and benefits. Types of testing methods in order of increasing complexity include:

- (a) *Tabletop exercise/structured walk-through test* – the primary objective is to ensure that critical personnel from all areas are familiar with the plan and that it accurately reflects the BSFI's ability to recover from a disruption.
- (b) *Walk-through drill/simulation test* – similar to a tabletop exercise but with a more focused application. During this test, participants choose a specific scenario to which relevant plan provisions shall be applied.
- (c) *Communication/Call tree test* – an exercise that validates the capability of crisis management teams to respond to specific events and the effectiveness of the call tree notification process in disseminating information to employees, vendors, and key clients.
- (d) *Alternate site test/exercise* -tests the capability of staff, systems, and facilities located at alternate sites to effectively support production processing and workloads.
- (e) *Component test/exercise* -A testing activity designed to validate the continuity of individual systems, processes, or functions, in isolation.
- (f) *Functional drill/parallel test* – test to determine capability of alternate site and BSFI employees to support strategy as defined in the plan, which involves actual mobilization of personnel, establishing communications, and recovery processing.
- (g) *Enterprise-wide full-interruption/full-scale test* – the most comprehensive type of test encompassing the entire organization and requires activation of all the components of the plan at the same time to simulate a real-life emergency and processing data and transactions using back-up media at the recovery site.

- (2) *Test policy/plan.* Testing should be viewed as a continuously evolving cycle. The BSFI should incorporate the results of BIA and risk assessment and work towards a testing strategy that increases in scope and complexity to address a variety of threat scenarios. Test scenarios should vary from isolated system failures to wide-scale disruptions and promote testing its primary and alternate facilities, as well as with key counterparties and third-party service providers.

A testing policy should define roles and responsibilities for the implementation and evaluation of the testing program. Test plans with pre-determined goals and test criteria should be developed for each testing activity. It should clearly define the objectives of testing, identify the functions, systems, or processes to be tested and the criteria for assessing what constitutes a successful test. Formal testing documentation (i.e., test plans, test scenarios, test procedures, test results) should be prepared to ensure thoroughness and effectiveness of testing and properly maintained for audit and review purposes.

- (3) *Annual enterprise-wide business continuity testing.* The BSFI must conduct an enterprise-wide business continuity test at least annually, or more frequently depending on changes in the operating environment, to ensure its plan's relevance, effectiveness, and operational viability. The scope of testing should be comprehensive to cover the major components of the plan as well as coordination and interfaces among important parties.
- (4) *Analysis and report of test result.* Plan tests, including successes, failures, and lessons learned, should be thoroughly analyzed to promote continuous BCM improvement. Exceptions noted should be documented and corrective actions should be closely monitored to ensure that they are implemented in a timely manner by concerned parties, including the board of directors and senior management, business line management, risk management, IT management, and other internal stakeholders.

e. *Personnel training and plan maintenance.*

- (1) *Training program.* A business continuity training program should be provided to all concerned employees to promote awareness, familiarity, and understanding of their roles and responsibilities in the event of a disruption. The training program should be offered on a continuing basis for existing and new employees and should be updated to address changes to the plan.
- (2) *Plan maintenance.* Plans and results of BIA and risk assessment should be reviewed and updated on an ongoing basis (at least annually or when necessary) so that they remain consistent with the BSFI's current operations and business strategies. BCM-related documents (i.e., BCP, test program, policy guidelines, and program requirements) should be subject to change management process to ensure these are updated with proper approval and documentation with respect to any significant changes in the business environment or as a result of audit findings.

Other policies, standards and processes. The following policies, standards and processes should be integrated into the BCM process:

- a. *Pandemic planning.* Similar to natural disasters or technical disruptions, pandemics may also interrupt a BSFI's business activities. However, the difficulty in determining a pandemic's scope and duration present additional challenges in ensuring resilience and continuity of a BSFI's operations.

Generally, pandemic plans are integrated in the BSFI's BCP and follow the same BCM process with additional considerations, such as:

- (1) *Business impact analysis and risk assessment.* The BCM process should consider pandemics as early as the BIA and risk assessment phase. The BIA and risk assessment should be updated to incorporate complexities that may arise from pandemics, such as (a) increasing level of absenteeism based on a pandemic's severity; and (b) the need for another layer of contingency plans as regular disaster or emergency response methods are no longer feasible.
- (2) *Strategy formulation.* To complement strategies for natural and technical disruptions, the following should be given due consideration when planning for pandemics:
- (a) *Trigger events* – Trigger events and strategies should be defined depending on the nature of a pandemic. Pandemic planning should have the flexibility to accommodate varying degrees of epidemic or outbreak as pandemics normally occur in waves or phases and of varying severity.
- (b) *Remote access capability* – In the event of a pandemic, enabling remote access may be one of the primary strategies available to a BSFI. To support a telecommuting strategy, the BSFI should ensure adequate capacity, bandwidth and authentication mechanisms in its technological infrastructure against expected network traffic or volume of transactions.

- (c) *External parties* – With pandemics not limited to the BSFI, establishing working relationships with external parties is an essential component. In addition to the communication plan for all relevant internal and external stakeholders, the BSFI should establish open relationships and communication channels with local public health and emergency response teams or other government authorities. The BSFI should inform concerned parties of any potential outbreaks and, at the same time, be aware of any developments in the expected scope and duration of a pandemic.
 - (d) *Employee awareness* – As information becomes available from reputable sources or local agencies, the BSFI should ensure that steps to limit or reduce the risk of being affected by the pandemic are cascaded to its employees.
- (3) *Plan development.* Pandemic plans should be commensurate to the nature, size and complexity of a BSFI's business activities and have sufficient flexibility to address the various scenarios that may arise. At a minimum, the pandemic plan should include:
 - (a) Strategy that is scalable dependent on the extent and depth of the outbreak;
 - (b) Preventive measures, including monitoring of current environment and hygiene tools available to employees;
 - (c) Communication plan with internal and external stakeholders, including concerned local public health teams and government agencies; and
 - (d) Tools, systems and procedures available to ensure continuity of its critical operations even with the unavailability of BSFI's staff for prolonged periods.
- (4) *Plan testing.* Test policy/plan should include strategies to assess capability to continue critical operations, systems and applications even in the event of a severe pandemic. When regular tests are unable to cover pandemic scenarios, separate pandemic plan tests should be carried out.
- (5) *Personnel training and plan maintenance.* The plan should be updated as developments and information become available. As needed, employee training programs should cover pandemic risks, including the roles and responsibilities of each employee during pandemic situations.
- b. *Cyber resilience.* Cyber-threats and attacks against the financial services industry have become increasingly widespread, sophisticated and coordinated. Recent cyber-attacks worldwide highlight, not only the degree of disruption to a BSFI's operations, but also the extent of reputational damage which could undermine public trust and confidence. As such, the BSFI should consider the potential impact of these cyber events into its BCM process and institute adequate cyber resilience capabilities.

Given the unique characteristics of cyber-threats and attacks, traditional back-up and recovery arrangements adopted by the BSFI may no longer be sufficient and even increase the damage to the BSFI's network, operations and critical information assets. In worst case scenarios, back-up systems and alternate recovery sites are likewise affected rendering both sites inoperable. To ensure cyber resilience, the BSFI should take into consideration a wide-range of cyber-threat scenarios perpetrated from diverse threat sources (e.g., skilled hackers, insiders, state-sponsored groups) which seek to compromise the confidentiality, availability and integrity of its information assets and networks. Defensive strategies and innovative recovery arrangements should be explored that are commensurate with the BSFI's cyber-security risk exposures and aligned with its information security program in accordance with *Appendix Q-62*.

- c. *Information security.* Mitigation strategies should consider security controls to manage risks that may arise once an event triggers plan activation. Security during disasters and disruptions is an important consideration to manage risks arising from the change in working environment. The relevant guidelines/standards on information security that may be considered in strategy formulation and/or in choosing alternate sites are in *Appendix Q-62*.
- d. *Interdependencies.* An effective plan coordinates across its many internal and external components, identifies potential process or system dependencies, and mitigates risks from interdependencies. The BSFI may have very complex operating and recovery environment wherein interdependencies need to be duly considered, such as telecommunications, third party service providers, and recovery site. Given the critical resources and services that are being shared with the BSFI or other entities, additional mitigating controls and recovery strategies need to be integrated in the plan.
- e. *Liquidity risk management.* Sound liquidity risk management practices enable a BSFI to maintain availability of funds even in times of financial stress or adverse changes in market conditions. In the event of a business disruption, sound liquidity risk management practices should similarly apply. The BSFI should ensure it has sufficient liquidity to support its recovery strategies and continue supporting the delivery of basic banking services to the clients pending full business resumption. Guidelines on liquidity risk management are in *Appendix Q-43*.

- f. *Project management.* Senior management should ensure that availability and business continuity requirements are considered at the planning and development stages of new business products and services and other critical technology processes, such as systems development and acquisition, and change management.
- g. *Event/problem management.* Operations personnel should be properly trained to recognize events that could trigger implementation of the plan. Although an event may not initially activate the plan, it may become necessary as conditions and circumstances change. Management should train and test BSFI personnel to implement and perform appropriate business continuity procedures within the timeframes of the plan.
- h. *Outsourcing.* When a BSFI enters into an outsourcing arrangement, it should put due consideration on the business continuity and disaster recovery arrangements of the service provider to ensure continuity of operations. Detailed guidelines/standards on business continuity considerations for outsourcing arrangements are in *Appendix Q-65*.
- i. *Insurance.* Insurance is an option available to a BSFI for recovery of losses that cannot be completely prevented and the expenses related to recovering from a disruption. The BSFI should regularly review the adequacy and coverage of its insurance policies in reducing any foreseeable risks caused by disruptive events, such as loss of offices, critical facilities and equipment, and casualty. Insurance policies may also need to address the BSFI's legal responsibilities for failing to deliver services to its customers and counterparties. To facilitate the claims process, the BSFI should create and retain a comprehensive hardware and software inventory list in a secure off-site location and detailed expenses should be documented to support insurance claims.

Supervisory enforcement actions. BSFIs should make available all policies and procedures and other documents/information related to the foregoing during on-site examination as well as provide copies thereof to the regulator when a written request is made to determine compliance.

Consistent with Sec. 002-Q, the Bangko Sentral may deploy enforcement actions to promote adherence with the requirements set forth in Sec. 127-N and bring about timely corrective actions. The Bangko Sentral may issue directives to improve the BCM process, or impose sanctions to limit the level of or suspend any business activity that has adverse effects on the safety and soundness of the BSFI, among others. Monetary and non-monetary sanctions, as provided under existing laws, Bangko Sentral rules and regulations, may likewise be imposed on a BSFI and/or its directors, officers and/or employees for violation of subject Sec. 127-N.

(Circular No. 951 dated 20 March 2017)

128-N SOCIAL MEDIA RISK MANAGEMENT¹

Social media, a low-cost solution capable of disseminating real-time information via the internet, presents vast opportunities for growth, customer engagement and business benefits as usage, customer reach and adoption scale up and become widespread and ubiquitous. Considering these potential benefits alongside exponential growth in the number of social media users and its massive reach, BSFIs have started to leverage on social media platform/s to promote their business and improve customer interaction experience to help drive business objectives/strategies.

Similar to any new technology, however, social media introduces a new attack vector which may expose BSFIs to compliance, legal, reputational, strategic, and operational risks. Risks in social media include susceptibility to account take-over, malware distribution, brand bashing, inadvertent disclosure of sensitive information and privacy violation, among other possible threats. As such, BSFIs should adopt an appropriate risk management system, commensurate to the extent and degree of their social media usage, to effectively identify, measure, manage and monitor risks arising from the use of social media platforms. This should form an integral part of their operational risk management system.

Applicability and scope. The guidelines underscore the importance of having a well-defined social media risk management strategy in supporting BSFI's overall business goals and objectives. These guidelines align existing regulations, to the extent possible, with leading standards and recognized principles. They outline the minimum standards/basic principles that shall govern the BSFI's framework to aid in the sound management of risks associated with the use of social media for official purpose or employees' personal use, within and outside the organization.

It is not intended to provide procedural specifics or a "one-size-fits-all" solution for carrying out compliance and risk management responsibilities. Each BSFI is therefore expected to establish its own risk management strategy; suitable to its size, risk tolerance level, and the nature and scope of social media activities engaged in.

The guidelines shall apply to all BSFIs which include banks, NBQB, non-bank electronic money issuers, and other non-bank institutions which under existing Bangko Sentral rules and regulations and special laws are subject to Bangko Sentral supervision and/or regulation.

¹ BSFIs shall comply with the foregoing standards on social media risk management within a period of six (6) months from 04 April 2017. In this regard, a BSFI should be able to show, upon request of the Bangko Sentral, its plan of actions with specific timelines, as well as the status of initiatives being undertaken to fully comply with the provisions of this Section.

Definition of terms. In these guidelines, terms are used with the following meanings:

- a. *Attack vector* shall refer to the path or means by which an attacker can gain access to a computer system in order to deliver a malicious code (e.g., virus, worms, trojans).
- b. *Non-technical controls* shall refer to management, administration, and operational controls employed that are manual and procedural in nature (e.g., security-related policies and procedures; operational procedures; personnel, physical, and environmental security controls; performance management and measurement).
- c. *Risk assessment* shall refer to the process involving the identification and assessment of potential threats and vulnerabilities related to the use of social media and determination of the likelihood that the threat will occur as well as the corresponding impact to the business should the threat occur.
- d. *Social media* shall refer to online communication channels dedicated to community-based content generation and sharing, interaction, and collaboration.
- e. *Social media platform* shall refer to any form of interactive communication medium wherein users can generate and disseminate content (e.g., text, images, audio, video) through social networks using the internet. Examples of popular social media platform categories include the following:
 - (1) Social networking (e.g., Facebook, LinkedIn)
 - (2) Micro-blogging (e.g., Twitter, Tumblr)
 - (3) Blogging (e.g., Wordpress, Blogger)
 - (4) Photo Sharing (e.g., Flickr, Instagram, Pinterest)
 - (5) Video Sharing (e.g., Youtube, Vimeo, Vine)
 - (6) Crowdsourcing (e.g., Ushahidi, Inc.)
- f. *Technical controls* shall refer to the controls incorporated into the computer hardware, software, or firmware to aid in the effective implementation of policies and standards (e.g., access control, authentication, web scanner/crawler).

Social media risk management system. BSFIs should establish an appropriate framework that will result in sound social media governance and risk management. At a minimum, the framework shall include the following elements:

- a. Clearly defined governance structure indicating the roles and responsibilities of the board of directors and senior management in setting the direction on the BSFI's use of social media, including its alignment to the BSFI's strategic goals/plans; establishing adequate standards, policies, procedures, and controls; and implementing ongoing risk assessment of social media-related activities.

The board of directors shall be primarily responsible for defining the BSFI's risk tolerance level, understanding the nature and degree of risks the BSFI will be exposed to, and ensuring that these risks are properly addressed. Moreover, the board of directors, as part of its duties, shall approve and oversee the design and implementation of the social media strategy; related standards, policies and procedures; and means to ensure compliance with said standards and/or policies as well as applicable laws and regulations. Senior management, on the other hand, shall be responsible for the implementation of the social media risk management system approved by the board of directors.

The governance process should also include reporting mechanisms to the board of directors and/or senior management to enable periodic evaluation of the effectiveness of the BSFI's social media strategy/program, in terms of achieving its stated objectives, and measures put in place to manage the risks related to its use.

- b. Policies and procedures governing the following, among others:
 - (1) Scope and definition of social media;
 - (2) Social media regulatory landscape reflecting applicable laws, rules and regulations for compliance;
 - (3) Individuals and/or composition of the team/s who will be responsible for the creation, maintenance, and monitoring of the BSFI's proprietary social media sites/pages. Their corresponding roles and accountabilities should also be clearly defined;
 - (4) Content management and approval process;
 - (5) Ongoing assessment, management, and monitoring of risks associated with social media-related activities;
 - (6) Acceptable use as well as prohibitions/restrictions on the business/official use of social media platforms.

These guidelines shall likewise apply to the employees'¹ personal use of social media, insofar as it may impact the BSFI's operations, reputation and/or compliance with applicable laws and regulations. These should cover matters such as, but not limited to, expectations, ethical behavior, types/nature and extent of BSFI and/or customer-related information that can be posted, statements that can or cannot be made about or in behalf of the institution, comments that should not be made about a competitor, and corresponding sanctions/penalties for inappropriate use of social media and committing non-permissible activities;

- (7) Use and monitoring of the BSFI's proprietary social media sites/pages to ensure compliance with applicable laws, regulations and internal policies;
 - (8) Monitoring and recording of suspicious transactions and customer activities on the BSFI's proprietary social media sites/pages;
 - (9) Adoption of technical and non-technical controls to address risks associated with the use of social media platform/s including methodologies to manage risks from online postings, edits, replies and retention;
 - (10) Due diligence process for selecting, managing and continuous monitoring of third-party service providers (TSP) that administer the BSFI's social media site(s)/page(s). In addition, the specific roles and responsibilities of the TSP, including liabilities and accountabilities for errors, omissions, fraud, and other instances, resulting from the TSP's actions, which may adversely affect the BSFI, should also be defined;
 - (11) Social media crisis management plan and escalation procedures;
 - (12) Enterprise-wide employee training and awareness programs covering relevant topics such as the BSFI's social media use policies, employee roles and responsibilities and non-permissible activities;
 - (13) Records retention of social media data; and
 - (14) Communication of the BSFI's official social media sites/pages to its customers to avoid confusion and being misled to unofficial sites.
- c. Specific roles and responsibilities of the risk management, consumer protection, audit and compliance functions to ensure that social media risks are adequately managed and integrated in the BSFI's enterprise-wide risk management systems.

BSFIs that do not utilize social media should nevertheless have clear policies and measures in place to address the potential reputational risks that may arise within the various social media platforms and provide guidance on employee use of social media.

Compliance with relevant regulations. BSFIs, in formulating and implementing their social media policies, should ensure compliance with the applicable requirements of Bangko Sentral rules and regulations on financial consumer protection, especially those relating to disclosures and transparency in advertising and promotional materials, protection of client information, effective recourse, and financial education and awareness. They should likewise conform with the relevant provisions of Bangko Sentral outsourcing framework should they decide to outsource the conduct of social media-related activities to a service provider.

The use of social media platforms, including information gathered therein, for the conduct of account origination activities should comply with applicable rules and regulations, especially on the provisions relating to customer identification procedures under the existing anti-money laundering rules and regulations. In the event that BSFIs opt to use social media for processing financial transactions, the applicable Bangko Sentral rules and regulations on electronic payment and financial services and technology risk management should likewise be observed to ensure security, reliability and authenticity of such transactions.

The regulations mentioned herein are not exhaustive. It is the BSFI's responsibility to ensure that all applicable laws and regulations relevant to the activities it will choose to engage in using social media will be adequately complied with. Moreover, the BSFI is expected to stay abreast of and continuously adapt to changes in the regulatory requirements.

Supervisory enforcement actions. BSFIs should make available all policies and procedures and other documents/information related to the foregoing during the on-site examination as well as provide copies thereof when a written request is made to determine compliance.

Consistent with Sec. 002-Q, the Bangko Sentral may deploy enforcement actions to promote adherence with the requirements set forth in Sec. 128-N and bring about timely corrective actions. The Bangko Sentral may issue directives to improve the social media risk management system or impose monetary and non-monetary sanctions on a BSFI and/or its directors, officers and/or employees.

(Circular No. 1033 dated 22 February 2019 and 949 dated 15 March 2017)

¹ Include the BSFI's employees, contractual employees and/or project hires, and third-party service providers.

D. INTERNAL CONTROL AND AUDIT

131-N INTERNAL CONTROL FRAMEWORK

Internal control is a process designed and effected by the board of directors, senior management, and all levels of personnel to provide reasonable assurance on the achievement of objectives through efficient and effective operations; reliable, complete and timely financial and management information; and compliance with applicable laws, regulations, supervisory requirements, and the organization's policies and procedures.

FIs shall have in place adequate and effective internal control framework for the conduct of their business taking into account their size, risk profile and complexity of operations. The internal control framework shall embody management oversight and control culture; risk recognition and assessment; control activities; information and communication; and monitoring activities and correcting deficiencies.

Management oversight and control culture. Consistent with the principles provided under Sec. 132 of the MORB, the board of directors and senior management shall be responsible for promoting high ethical and integrity standards; establishing the appropriate culture that emphasizes, demonstrates and promotes the importance of internal control; and designing and implementing processes for the prevention and detection of fraud.

- a. The board of directors shall be ultimately responsible for ensuring that senior management establishes and maintains an adequate, effective and efficient internal control framework commensurate with the size, risk profile and complexity of operations of the FI. The board of directors shall also ensure that the internal audit function has an appropriate stature and authority within the FI and is provided with adequate resources to enable it to effectively carry-out its assignments with objectivity.

Further, the board of directors shall, on a periodic basis:

- (1) conduct discussions with management on the effectiveness of the internal control system;
 - (2) review evaluations made by the audit committee on the assessment of effectiveness of internal control made by management, internal auditors and external auditors;
 - (3) ensure that management has promptly followed up on recommendations and concerns expressed by auditors and supervisory authorities on internal control weaknesses; and
 - (4) review and approve the remuneration of the head and personnel of the internal audit function. Said remuneration shall be in accordance with the FI's remuneration policies and practices and shall be structured in such a way that these do not create conflicts of interest or compromise independence and objectivity.
- b. The audit committee shall be responsible for overseeing senior management in establishing and maintaining an adequate, effective and efficient internal control framework. It shall ensure that systems and processes are designed to provide assurance in areas including reporting, monitoring compliance with laws, regulations and internal policies, efficiency and effectiveness of operations and safeguarding of assets.

The audit committee shall oversee the internal audit function and shall be responsible for:

- (1) monitoring and reviewing the effectiveness of the internal audit function;
- (2) approving the internal audit plan, scope and budget;
- (3) reviewing the internal audit reports and the corresponding recommendations to address the weaknesses noted, discussing the same with the head of the internal audit function and reporting significant matters to the board of directors;
- (4) ensuring that the internal audit function maintains an open communication with senior management, the audit committee, external auditors, and the supervisory authority;
- (5) reviewing discoveries of fraud and violations of laws and regulations as raised by the internal audit function;
- (6) reporting to the board of directors the annual performance appraisal of the head of the internal audit function;
- (7) recommending for approval of the board of directors the annual remuneration of the head of the internal audit function and key internal auditors;
- (8) appointing, reappointing or removing the head of the internal audit function and key internal auditors; and

- (9) selecting and overseeing the performance of the internal audit service providers.

In particular, the audit committee shall be responsible for:

- (1) ensuring the independence of the internal audit service provider;
 - (2) reporting to the board of directors on the status of accomplishments of the outsourced internal audit activities, including significant findings noted during the conduct of the internal audit;
 - (3) ensuring that the internal audit service provider comply with sound internal auditing standards such as the Institute of Internal Auditors' *International Standards for the Professional Practice of Internal Auditing* and other supplemental standards issued by regulatory authorities/government agencies, as well as with relevant code of ethics;
 - (4) ensuring that the audit plan is aligned with the overall plan strategy and budget of the FI and is based on robust risk assessment; and
 - (5) ensuring that the internal audit service provider has adequate human resources with sufficient qualifications and skills necessary to accomplish the internal audit activities.
- c. Senior management shall be responsible for maintaining, monitoring and evaluating the adequacy and effectiveness of the internal control system on an ongoing basis, and for reporting on the effectiveness of internal controls on a periodic basis. Management shall develop a process that identifies, measures, monitors and controls risks that are inherent to the operations of the FI; maintain an organizational structure that clearly assigns responsibility, authority and reporting relationships; ensure that delegated responsibilities are effectively carried out; implement internal control policies and ensure that activities are conducted by qualified personnel with the necessary experience and competence. Management shall ensure that FI personnel undertake continuing professional development and that there is an appropriate balance in the skills and resources of the front office, back office, and control functions. Moreover, Management shall promptly inform the internal audit function of the significant changes in the FI's risk management systems, policies and processes.
- d. All personnel need to understand their roles and responsibilities in the internal control process. They should be fully accountable in carrying out their responsibilities effectively and they should communicate to the appropriate level of management any problem in operations, action or behavior that is inconsistent with documented internal control processes and code of ethics.

Risk recognition and assessment. An effective internal control system shall identify, evaluate and continually assess all material risks that could affect the achievement of the FI's performance, information and compliance objectives. The potential for fraud shall be considered in assessing the risks to the achievement of said objectives. Further, the risk assessment shall cover all risks facing the FI, which include, among others, credit; country and transfer; market; interest rate; liquidity; operational; compliance; legal; and reputational risks.

Effective risk assessment identifies and considers both internal (e.g., complexity of the organization's structure, nature of the FI's activities and personnel profile) and external (e.g., economic conditions, technological developments and changes in the industry) factors that could affect the internal control framework. The risk assessment shall be conducted at the level of individual business units and across all FI activities/groups/units and subsidiaries, in the case of a parent FI. Internal controls shall be revised to address any new or previously uncontrolled or unidentified risks.

Control activities. Control activities shall form part of the daily activities of the FI and all levels of personnel in the FI. Control activities are designed and implemented to address the risks identified in the risk assessment process. These involve the establishment of control policies and procedures, and verification that these are being complied with.

FIs shall have in place control activities defined at every business level, which shall include a system that provides for top and functional level reviews; checking compliance with exposure limits and follow-up on noncompliance; a system of approvals and authorizations, which shall include the approval process for new products and services; and a system of verification and reconciliation.

Control activities complement existing policies, procedures and other control systems in place such as, among others, having clearly defined organizational structure and reporting lines, and arrangements for delegating authority; adequate accounting policies, records and processes; robust physical and environmental controls for tangible assets and access controls to information assets; and appropriate segregation of conflicting functions.

- a. *Clear arrangements for delegating authority.* The functions and scope of authority and responsibility of each personnel should be adequately defined, documented and clearly communicated. The extent to which authorities may be delegated and the corresponding accountabilities of the personnel involved shall be approved by the appropriate level of management or the board of directors.

- b. *Adequate accounting policies, records and processes.* FIs shall maintain adequate financial policies, records and processes. These records shall be kept up-to-date and contain sufficient detail to establish an audit trail. Further, FIs shall conduct independent balancing and reconciliation of records and reports to ensure the integrity of the reported data and balances. FIs shall also put in place a reliable information system that covers all of its significant activities which shall allow the board of directors and management access to data and information relevant to decision making such as, among others, financial, operations, risk management, compliance and market information. Moreover, these systems shall be secured, monitored independently and supported by adequate contingency arrangements.
- c. *Robust physical and environmental controls to tangible assets and access controls to information assets.* FIs shall adopt policies and practices to safeguard their tangible and information assets. These shall include, but shall not be limited to:
 - (1) identifying officers with authorities to sign for and on behalf of the FI. Signing authorities shall be approved by the board of directors and the extent of authority at each level shall be clearly defined;
 - (2) implementing joint custody on certain assets. Joint custody shall mean the processing of transactions in the presence, and under the direct observation of a second person. Both persons shall be equally accountable for the physical protection of the items and records involved: *Provided*, That persons who are related to each other within the third degree of consanguinity or affinity shall not be made joint custodians;
 - (3) adopting dual control wherein the work of one (1) person is to be verified by a second person to ensure that the transaction is properly authorized, recorded and settled;
 - (4) incorporating sequence number control in the accounting system which shall also be used in promissory notes, checks and other similar instruments. Management shall also put in place appropriate controls to monitor the usage, safekeeping and recording of accountable forms;
 - (5) restricting access to information assets by classifying information as to degree of sensitivity and criticality and identifying information owners or personnel with authorities to access particular classifications based on job responsibilities and the necessity to fulfill one's duties; and
 - (6) implementing authentication and access controls prior to granting access to information such as, among others, implementing password rules. This shall be supplemented by appropriate monitoring mechanisms that will allow audit of use of information assets.
- d. *Segregation of conflicting functions.* FIs shall ensure that areas of potential conflicts of interest shall be identified, minimized and subjected to independent monitoring. Further, appropriate segregation of functions shall be observed in identified areas that may pose potential conflict of interest. Moreover, periodic reviews of responsibilities and functions shall be conducted to ensure that personnel are not in a position to conceal inappropriate actions.

Examples of internal control measures are in *Appendix Q-72*.

Information and communication. An effective internal control system requires that there are adequate and comprehensive internal financial, operational and compliance data, as well as external information about events and conditions that are relevant to decision making. Information shall be reliable, timely, accessible, and provided in a consistent format. FIs shall have in place a reliable management information system that covers significant activities of the FI and has the capability to generate relevant and quality information to support the functioning of internal control.

FIs shall also establish effective channels of communication to ensure that all personnel fully understand and adhere to policies and procedures and control measures relevant to their duties and responsibilities and that relevant information is reaching the appropriate personnel. Management shall also ensure that all personnel are cognizant of their duty to promptly report any deficiency to appropriate levels of management or to the board of directors, where required. These shall enable them to quickly respond to changing conditions and avoid unnecessary costs.

Monitoring activities and correcting deficiencies. The overall effectiveness of the internal controls shall be monitored on an ongoing basis. Monitoring functions and activities shall be adequately defined by management, integrated in the operating environment and should produce regular reports for review. In this regard, all levels of review shall be adequately documented and results thereof reported on a timely basis to the appropriate level of management.

Evaluations of the effectiveness of the internal control system and the corresponding monitoring activities may be done by personnel from the same operational area in the form of self-assessment or from other areas such as internal audit: *Provided*, That, self-assessment done by business units shall be subject to independent validation.

Evaluations done shall be adequately documented and internal control deficiencies and weaknesses identified shall be reported on a timely basis to the appropriate level of management or the board of directors, where necessary, and addressed promptly.

(Circular No. 871 dated 05 March 2015)

132-N INTERNAL AUDIT FUNCTION

Internal audit is an independent, objective assurance and consulting function established to examine, evaluate and improve the effectiveness of internal control, risk management and governance systems and processes of an organization, which helps management and the board of directors in protecting the FI and its reputation. The internal audit function shall both assess and complement operational management, risk management, compliance and other control functions. In this respect, internal audit shall be conducted in frequencies commensurate with the assessed levels of risk in specific FI areas.

- a. *Permanency of the internal audit function.* Each FI shall have a permanent internal audit function. In the case of group structures involving a parent bank and subsidiary or affiliate BSFI, the internal audit function shall either be established in each of the BSFI or centrally by the parent bank.
- b. *Internal audit function in group structures.* In case each Bangko Sentral-supervised financial institution belonging to group structures has its own internal audit function, said internal audit function shall be accountable to the financial institution's own board of directors and shall likewise report to the head of the internal audit function of the parent bank within a reasonable period and frequency prescribed by the board of directors of the parent bank.

On the other hand, in case the parent bank's internal audit function shall cover the internal audit activities in the subsidiary or affiliate BSFI institution, the board of directors of the parent bank shall ensure that the scope of internal audit activities is adequate considering the size, risk profile and complexity of operations of the subsidiary or affiliate concerned.

The establishment of internal audit function centrally by the parent bank in group structures shall not fall under the outsourcing framework as provided under Sec. 112 of the MORB. In this respect, the head of the internal audit function of the parent bank shall define the internal audit strategies, methodology, scope and quality assurance measures for the entire group: *Provided*, That this shall be done in consultation and coordination with the respective board of directors and of the subsidiary or affiliate BSFI: *Provided, further*, That the board of directors of the subsidiary or affiliate BSFI shall remain ultimately responsible for the performance of the internal audit activities.

- c. *Outsourcing of internal audit activities.* FIs may outsource, in accordance with the Bangko Sentral regulations on outsourcing, internal audit activities covering all areas of its operations: *Provided*, That the board of directors of the FI shall remain ultimately responsible for the conduct of effective internal audit: *Provided, further*, That the internal audit activity shall not be outsourced to the FI's own external auditor/audit firm nor to internal audit service provider that was previously engaged by the FI in the same area intended to be covered by the internal audit activity that will be outsourced, without a one-year "cooling off" period.

Qualifications of the head of the internal audit function. The head of the internal audit function must have an unassailable integrity, relevant education/experience/training, and has an understanding of the risk exposures of the FI, as well as competence to audit all areas of its operations. He must also possess the following qualifications:

- a. The head of the internal audit function of a UB or a KB must be a Certified Public Accountant (CPA) or a Certified Internal Auditor (CIA) and must have at least five (5) years experience in the regular audit (internal or external) of a UB or KB as auditor-in-charge, senior auditor or audit manager. He must possess the knowledge, skills, and other competencies to examine all areas in which the institution operates. Professional competence as well as continuing training and education shall be required to face up to the increasing complexity and diversity of the institution's operations.
- b. The head of the internal audit function of a complex TB, RB and Coop Bank; QB and trust entity must be a graduate of any accounting, business, finance or economics course with technical proficiency on the conduct of internal audit and must have at least five (5) years experience in the regular audit (internal or external) of a TB, national Coop Bank, QB or trust entity or, at least three (3) years experience in the regular audit (internal or external) of a UB or KB.
- c. The head of the internal audit function of a simple or non-complex TB, RB and Coop Bank; and NSSLA must be a graduate of any accounting, business, finance or economics course with technical proficiency on the conduct of internal audit and must have at least two (2) years experience in the regular audit (internal or external) of a UB, KB, TB, RB, Coop Bank, QB or NSSLA.

A qualified head of the internal audit function of a UB or a KB shall be qualified to audit TBs, RB, Coop Banks, QBs, trust entities, NSSLAs, subsidiaries and affiliates engaged in allied activities, and other financial institutions under Bangko Sentral supervision. A qualified internal auditor of a complex TB, RB, and Coop Bank; QB and trust entity shall likewise be qualified to audit non-complex TB, RB and Coop Bank and NSSLAs.

The head of the internal audit function shall be appointed/reappointed or replaced with prior approval of the audit committee. In cases, when the head of the internal audit function will be replaced, the FI shall report the same and the corresponding reason for replacement, to the appropriate supervising department of the Bangko Sentral within five (5) days from the time it has been approved by the board of directors.

Duties and responsibilities of the head of the internal audit function or the chief audit executive.

- a. To demonstrate appropriate leadership and have the necessary skills to fulfill his responsibilities for maintaining the unit's independence and objectivity;
- b. To be accountable to the board of directors or audit committee on all matters related to the performance of its mandate as provided in the internal audit charter. The head of the internal audit function shall submit a report to the audit committee or board of directors on the status of accomplishments of the internal audit unit, including findings noted during the conduct of the internal audit as well as status of compliance of concerned departments/units;
- c. To ensure that the internal audit function complies with sound internal auditing standards such as the Institute of Internal Auditors' *International Standards for the Professional Practice of Internal Auditing* and other supplemental standards issued by regulatory authorities/government agencies, as well as with relevant code of ethics;
- d. To develop an audit plan based on robust risk assessment, including inputs from the board of directors, audit committee and senior management and ensure that such plan is comprehensive and adequately covers regulatory matters. The head of the internal audit function shall also ensure that the audit plan, including any revisions thereto, shall be approved by the audit committee; and
- e. To ensure that the internal audit function has adequate human resources with sufficient qualifications and skills necessary to accomplish its mandate. In this regard, the head of the internal audit function shall periodically assess and monitor the skill-set of the internal audit function and ensure that there is an adequate development program for the internal audit staff that shall enable them to meet the growing technical complexity of FI's operations.

Professional competence and ethics of the internal audit function. The internal audit function shall be comprised of professional and competent individuals who collectively have the knowledge and experience necessary in the conduct of an effective internal audit on all areas of FI's operations. The skill set of the internal audit staff shall be complemented with appropriate audit methodologies and tools as well as sufficient knowledge of auditing techniques in the conduct of audit activities.

All internal audit personnel shall act with integrity in carrying-out their duties and responsibilities. They should respect the confidentiality of information acquired in the course of the performance of their duties and should not use it for personal gain or malicious actions. Moreover, internal audit personnel shall avoid conflicts of interest. Internally-recruited internal auditors shall not engage in auditing activities for which they have had previous responsibility before a one-year "cooling off" period has elapsed. The internal audit personnel shall adhere at all times to the FI's Code of Ethics as well as to an established code of ethics for internal auditors such as that of the Institute of Internal Auditors.

Independence and objectivity of the internal audit function. The internal audit function must be independent of the activities audited and from day-to-day internal control process. It must be free to report audit results, findings, opinions, appraisals and other information through clear reporting line to the board of directors or audit committee. It shall have authority to directly access and communicate with any officer or employee, to examine any activity or entity of the bank, as well as to access any records, files or data whenever relevant to the exercise of its assignment.

If independence or objectivity of internal audit function is impaired, in fact or appearance, the details of the impairment must be disclosed to the audit committee. Impairment to organizational independence and individual objectivity may include, but is not limited to, personal conflict of interest, scope limitations, restrictions on access to records, personnel, and properties, and resource limitations, such as funding.

The internal audit function shall inform senior management of the results of its audits and assessment. Senior management may consult the internal auditor on matters related to risks and internal controls without tainting the latter's independence: *Provided*, That the internal auditor shall not be involved in the development or implementation of policies and procedures, preparation of reports or execution of activities that fall within the scope of his review.

Staff of the internal audit function shall be periodically rotated, whenever practicable, and without jeopardizing competence and expertise to avoid unwarranted effects of continuously performing similar tasks or routine jobs that may affect the internal auditor's judgment and objectivity.

Internal audit charter. FIs shall have an internal audit charter approved by the board of directors. The internal audit charter shall be periodically reviewed by the head of the internal audit function and any changes thereto shall be approved by the board of directors. The internal audit charter shall establish, among others, the following:

- a. Purpose, stature and authority, and responsibilities of the internal audit function as well as its relations with other control functions in the FI. The charter shall recognize the authority of the internal audit function, to initiate direct communication with any FI personnel; to examine any activity or entity; and to access any records, files, data and physical properties of the FI, in performing its duties and responsibilities;
- b. Standards of independence, objectivity, professional competence and due professional care, and professional ethics;
- c. Guidelines or criteria for outsourcing internal audit activities to external experts;
- d. Guidelines for consulting or advisory services that may be provided by the internal audit function;
- e. Responsibilities and accountabilities of the head of the internal audit function;
- f. Requirement to comply with sound internal auditing standards such as the Institute of Internal Auditor's *International Standards for the Professional Practice of Internal Auditing* and other supplemental standards issued by regulatory authorities/government agencies, as well as with relevant code of ethics; and
- g. Guidelines for coordination with the external auditor and supervisory authority.

Scope. All processes, systems, units, and activities, including outsourced services, shall fall within the overall scope of the internal audit function. The scope of internal audit shall cover, among others, the following:

- a. Evaluation of the adequacy, efficiency and effectiveness of internal control, risk management and governance systems in the context of current and potential future risks;
- b. Review of the reliability, effectiveness and integrity of management and financial information systems, including the electronic information system and electronic banking services;
- c. Review of the systems and procedures of safeguarding the bank's physical and information assets;
- d. Review of compliance of trading activities with relevant laws, rules and regulations;
- e. Review of the compliance system and the implementation of established policies and procedures; and
- f. Review of areas of interest to regulators such as, among others monitoring of compliance with relevant laws, rules and regulations, including but not limited to the assessment of the adequacy of capital and provisions; liquidity level; regulatory and internal reporting.

(Circular No. 871 dated 05 March 2015)

133-N FRAMEWORK ON THE SELECTION OF EXTERNAL AUDITORS

Policy Statement. The Bangko Sentral considers the external auditing profession as a partner in promoting the integrity of financial reports and transparency in the financial system. In this light, the Bangko Sentral is issuing this framework on the selection of external auditors (individual practitioners and audit firms) for Bangko Sentral Supervised Financial Institutions (BSFIs) in line with its cooperative arrangements with the Securities and Exchange Commission (SEC), Insurance Commission (IC), and Philippine Deposit Insurance Corporation (PDIC), under the auspices of the Financial Sector Forum (FSF).

Appointment of External Auditors of BSFIs

- a. BSFIs shall engage the services of an external auditor included in the List of Selected External Auditors for BSFIs. In this respect, a BSFI shall only appoint an external auditor belonging to the same category or from categories higher than the category of the BSFI concerned as provided in this section: *Provided*, That the Monetary Board may require the BSFI to appoint an external auditor from higher categories as part of the Bangko Sentral's supervisory action on the BSFI. The external auditor appointed by the BSFI shall likewise audit the BSFI's trust department as well as its subsidiaries and affiliates engaged in allied activities, as applicable.

- b. External Auditors shall be classified into three categories and shall extend their services to BSFIs belonging to the same category or from categories lower than the category of the external auditor, as follows:
 - (1) Group A
 - (a) UBs/KBs
 - (b) Foreign banks and branches or subsidiaries of foreign banks
 - (c) Banks, trust departments and trust corporations with additional derivatives authority, pursuant to Sec. 613 of the MORB
 - (2) Group B
 - (a) TBs
 - (b) NBFIs with quasi-banking license
 - (c) Trust departments and trust corporations
 - (3) Group C
 - (a) RBs and Coop Banks
 - (b) Non-stock Savings and Loan Associations
 - (c) Pawnshops
 - (d) Remittance and Transfer Companies (RTCs)/Money Changers/Foreign Exchange Dealers (MCs/FXDs), including Virtual Currency Exchanges and Electronic Money Issuers
 - (e) Credit Card Issuers/Acquirers

The above categories shall include their subsidiaries and affiliates engaged in allied activities and other financial institutions subject to Bangko Sentral's consolidated supervision.

- c. External auditors applying for first time inclusion or renewal of inclusion in the List of Selected External Auditors for BSFIs shall submit their application to the SEC. The application shall be subject to the requirements set out by the SEC as agreed upon by the Bangko Sentral, SEC, IC and PDIC.
- d. The inclusion in the List of Selected External Auditors for BSFIs shall be valid for five (5) years or for a shorter period prescribed by the financial sector supervisors.
- e. The Bangko Sentral shall periodically evaluate the performance of the external auditor through an assessment of the quality of the BSFI's audited financial statements and its compliance with the requirements provided under this Section. The results of assessment shall serve as basis for the continuing inclusion of external auditors in the List of Selected External Auditors for BSFIs.
- f. The external auditor, including the engagement and quality control partners of the audit firm, of the BSFI shall be rotated in accordance with the relevant provisions of the Code of Ethics for Professional Accountants in the Philippines as adopted by the Philippine Board of Accountancy.

Audit Engagement and Reportorial Requirements

- a. The BSFI's Audit Committee/board of directors/board of trustees shall ensure that the scope of external audit work appropriately covers areas relevant to BSFI's operations and risk exposures. These include the following:
 - (1) Review of the adoption of applicable reporting framework as well as the assessment of the accuracy, adequacy, and reliability of accounting records and financial reports;
 - (2) Assessment of the propriety and adequacy of disclosures in the financial statements;
 - (3) Assessment of the adequacy and effectiveness of internal controls and risk management systems;
 - (4) Assessment of the quality of capital in relation to risk exposures; and
 - (5) Evaluation of the quality of corporate governance.
- b. The engagement contract of BSFIs with the external auditor shall include, at a minimum, the following provisions:
 - (1) That disclosure of information, such as those enumerated under Item "c" of this Section (*Audit engagement and reportorial requirements*), by the external auditor to the Bangko Sentral and/or other financial sector supervisors shall not constitute a breach of confidentiality on the part of the external auditor nor shall it be a ground for civil, criminal, or disciplinary proceedings against the external auditor;
 - (2) That the external auditor shall be allowed read-only access to the Bangko Sentral's Report of Examination on the BSFI and that the external auditor shall appropriately consider the contents thereof and maintain its confidentiality; and

- (3) That the BSFI concerned and external auditor shall comply with all the requirements under this Section.

The engagement contract shall be made available by the BSFI to the Bangko Sentral upon request.

- c. The external auditor shall report to the appropriate supervising department of the Bangko Sentral within fifteen (15) calendar days upon discovery of any matter adversely affecting the condition or soundness of the BSFI, such as, but not limited to the following cases:
- (1) Any material finding involving fraud or error;
 - (2) Actual or potential losses, the aggregate of which amounts to at least ten percent (10%) of the consolidated total assets of the BSFI;
 - (3) Significant doubt as to the ability of the BSFI to continue as a going concern;
 - (4) Material breach of laws or Bangko Sentral rules and regulations such as but not limited to prescribed capital and liquidity ratios, significant deficiency in allowance for credit losses, material weaknesses in fair value measurement methodology, and significant vulnerabilities to money laundering and combating the financing of terrorism;
 - (5) Material internal control weaknesses which may lead to financial reporting problems; and
 - (6) Findings on matters of corporate governance that may require urgent action by the Bangko Sentral.

Where a thorough investigation or evaluation of facts is necessary on the noted case, an initial report shall be submitted within the prescribed timeline: *Provided*, That a complete report is submitted not later than fifteen (15) calendar days from completion of investigation or evaluation.

In case there are no matters to report, the external auditor shall submit to the appropriate supervising department of the Bangko Sentral, not later than 120 calendar days after the close of the calendar year or the fiscal year adopted by the BSFI, a certification that there is none to report.

- d. The board of directors and management of the BSFI shall be primarily responsible for the financial statements submitted to the Bangko Sentral. External auditors are expected to conduct the audit of financial statements in accordance with the provisions of the Philippine Standards on Auditing.
- e. The external auditor shall directly inform the appropriate supervising department of the Bangko Sentral of the pre-termination of the engagement contract or his/her resignation/replacements as external auditor as well as the reasons thereto, within fifteen (15) calendar days of the pre-termination of the contract or his/her resignation/replacement.

Supervisory Enforcement Action

The Bangko Sentral reserves the right to deploy its range of supervisory enforcement actions to promote adherence with the requirements set forth in this Section and bring about timely corrective actions. For this purpose, the Bangko Sentral may issue directives or impose sanctions on BSFIs and/or its directors/trustees who approved the appointment of the external auditor, who/which are not in the List of Selected External Auditors for BSFIs, and/or for non-compliance with the provisions of this Section. The Bangko Sentral may likewise shorten the period of validity of inclusion of an external auditor in the List of Selected External Auditors for BSFIs, suspend, or delist external auditors from its List of Selected External Auditors for BSFIs based on the results of assessment of the quality of audited financial statements (AFS) as well as non-compliance with the provisions of this Section. The guidelines on the supervision/delisting of external auditor in the list of selected external auditors for BSFIs is prescribed in *Appendix N-5*.

Transitory provisions

- a. External auditors whose inclusion in the List of Selected External Auditors for BSFIs is valid to cover the audit of 2018 financial statements are hereby given one (1) year extension on their inclusion in the List of Selected External Auditors for BSFIs allowing them to engage in the audit of the 2019 financial statements.
- b. All applications (new and renewal) for inclusion in the List of Selected External Auditors for BSFIs to cover in the audit of 2020 financial statements and thereafter shall be filed with the SEC starting June 2019.

(Circular No. 1040 dated 20 May 2019)

FIs shall cause an annual financial audit by an external auditor acceptable to the Bangko Sentral not later than thirty (30) calendar days after the close of the calendar year or the fiscal year adopted by the FI. Report of such audit shall be submitted to the board of directors and the appropriate supervising department of the Bangko Sentral not later than 120 calendar days after the close of the calendar year or the fiscal year adopted by the FI. The report to the Bangko Sentral shall be accompanied by the:

- a. certification by the external auditor on the: (a) dates of start and termination of audit; (b) date of submission of the financial audit report and certification under oath stating that no material weakness or breach in the internal control and risk management systems was noted in the course of the audit of the FI to the board of directors; and (c) the absence of any direct or indirect financial interest and other circumstances that may impair the independence of the external auditor;
- b. reconciliation statement between the AFS and the balance sheet and income statement for FI and trust department submitted to the Bangko Sentral including copies of adjusting entries on the reconciling items; and
- c. other information that may be required by the Bangko Sentral.

In addition, the external auditor shall be required by the FI to submit to the board of directors, a LOC indicating any material weakness or breach in the institution's internal control and risk management systems within thirty (30) calendar days after submission of the financial audit report. If no material weakness or breach is noted to warrant the issuance of an LOC, a Certification under oath stating that no material weakness or breach in the internal control and risk management systems was noted in the course of the audit of the FI shall be submitted in its stead, together with the financial audit report.

Material weakness shall be defined as a significant control deficiency, or combination of deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be detected or prevented by the entity's internal control. A material weakness does not mean that a material misstatement has occurred or will occur, but that it could occur. A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles. The term more than remote likelihood shall mean that future events are likely to occur or are reasonably possible to occur.

The board of directors, in a regular or special meeting, shall consider and act on the financial audit report and the certification under oath submitted in lieu of the LOC and shall submit, within thirty (30) banking days after receipt of the reports, a copy of its resolution to the appropriate supervising department of the Bangko Sentral. The resolution shall show, among other things, the action(s) taken on the reports and the names of the directors present and absent.

The board shall likewise consider and act on the LOC and shall submit, within thirty (30) banking days after receipt thereof, a copy of its resolution together with said LOC to the appropriate supervising department of the Bangko Sentral. The resolution shall show the action(s) taken on the findings and recommendations and, the names of the directors present and absent, among other things.

The LOC shall be accompanied by the certification of the external auditor of the date of its submission to the board of directors.

Government-owned or -controlled FIs, including their subsidiaries under Bangko Sentral supervision which are under the concurrent jurisdiction of the COA shall be exempt from the aforementioned annual financial audit by an acceptable external auditor: *Provided*, That when warranted by supervisory concern such as material weakness/breach in internal control and/or risk management systems, the Monetary Board may, upon recommendation of the appropriate supervising department of the Bangko Sentral, require the financial audit to be conducted by an external auditor acceptable to the Bangko Sentral, at the expense of the institution concerned: *Provided, further*, That when circumstances such as, but not limited to, loans from multilateral FIs, privatization, or public listing warrant, the financial audit of the concerned institution by an acceptable external auditor may also be allowed.

FIs under the concurrent jurisdiction of the Bangko Sentral and COA shall, however, submit a copy of the AAR of the COA to the appropriate supervising department of the Bangko Sentral within forty (40) calendar days after receipt of the AAR by the board of directors. The AAR shall be accompanied by the: (1) certification by the institution concerned on the date of receipt of the AAR by the board of directors; (2) reconciliation statement between the AFS in the AAR and the balance sheet and income statement of the FI and trust department submitted to the Bangko Sentral, including copies of adjusting entries on the reconciling items; and (3) other information that may be required by the Bangko Sentral.

The board of directors of said institutions, in a regular or special meeting, shall consider and act on the AAR, as well as on the comments and observations and shall submit, within thirty (30) banking days after receipt of the report, a copy of its resolution to the appropriate supervising department of the Bangko Sentral. The resolution shall show the action(s) taken on the report, including the comments and observations and the names of the directors present and absent, among other things.

FIs as well as external auditors shall strictly observe the requirements in the submission of the financial audit report and reports required to be submitted under *Appendix Q-32*.

The audited annual financial statements required to be submitted shall in all respect be PFRS/PAS compliant: *Provided*, That FIs shall submit to the Bangko Sentral adjusting entries reconciling the balances in the financial statements for prudential reporting with that in the audited annual financial statements.

The reports and certifications of institutions concerned, schedules and attachments required under this Section shall be considered Category *B* reports, delayed submission of which shall be subject to the penalties under Sec. 143-N.

Audited financial statements of non-bank financial institutions. The following rules shall govern the utilization and submission of AFS of NBFIs.

For purposes of this Section, AFS shall include the balance sheets, income statements, statements of changes in equity, statements of cash flows and notes to financial statements which shall include among other information, disclosure of the volume of past due loans as well as loan-loss provisions. On the other hand, financial audit report shall refer to the AFS and the opinion of the auditor. The AFS of NBFIs with subsidiaries shall be presented side by side on a solo basis (parent) and on a consolidated basis (parent and subsidiaries).

Posting of audited financial statements. FIs shall post in conspicuous places in their head offices, all their branches and other offices, as well as in their respective websites, their latest financial audit report.

(Circular No. 911 dated 02 May 2016)

E. REPORTING GOVERNANCE

141-N PHILIPPINE FINANCIAL REPORTING STANDARDS

Statement of Policy. It is the thrust of the Bangko Sentral to align its financial reporting requirements with standards and practices that are widely accepted internationally to promote fairness, transparency, and accountability in the financial industry. In this light, the Bangko Sentral is issuing guidelines governing the adoption of the PFRS, aimed at ensuring consistency of application and comparability of financial reports across the industry.

- a. ***Adoption of PFRS.*** Bangko Sentral Supervised Financial Institutions (BSFIs) shall adopt PFRS in recording transactions and in the preparation of financial statements and reports to the Bangko Sentral. However, in cases where there are differences between Bangko Sentral regulations and PFRS as when more than one (1) option are allowed or certain maximum or minimum limits are prescribed by PFRS, the option or limit prescribed by the Bangko Sentral shall be adopted by BSFIs. These include the accounting treatment of “Government Grants”.

Government grants extended in the form of loans bearing nil or below-market rate of interest shall be measured upon initial recognition at its fair value (i.e. the present value of the future cash flows of the financial instrument discounted using the market interest rate). The difference between the fair value and the net proceeds of the loan shall be recorded under “Unearned Income-Others”, and shall be recognized as income on a systematic basis over the period of the loan necessary to match with the related cost for which the grants are intended to compensate.

- b. ***Preparation of prudential reports.*** For prudential reporting, BSFIs shall adopt in all respect the PFRS except in the following cases:
 - (1) In preparing consolidated financial statements, only investments in financial allied subsidiaries except insurance subsidiaries shall be consolidated with the financial statements of the parent bank on a line-by-line basis; while insurance and non-financial allied subsidiaries shall be accounted for using the equity method. Investments in financial/non-financial allied/non-allied associates and joint ventures shall be accounted for using the equity method in accordance with the provisions of Philippine Accounting Standards (PAS) 28 “Investments in Associates and Joint Ventures”.

In preparing solo/separate financial statements, investments in financial/non-financial allied/non-allied subsidiaries/associates, including insurance subsidiaries/associates, shall be accounted for using the equity method as described in PAS 28.

- (2) BSFIs shall recognize adequate and timely allowance for credit losses at all times. In this respect, BSFIs shall adopt the principles provided under the Enhanced Standards on Credit Risk Management under Sec. 122-N as well as the provisions of *Appendix N-16* in measuring credit losses.
- c. *Preparation of Audited Financial Statements (AFS).* AFS shall in all respect be PFRS compliant and shall be submitted to the Bangko Sentral in accordance with the provisions of Sec. 134-N.

BSFIs shall submit to the Bangko Sentral adjusting entries reconciling the balances in the financial statements for prudential reporting with those in the AFS.

- d. *Guidelines on the adoption of PFRS 9 Financial Instruments.* BSFIs shall adopt, as part of the PFRS framework, PFRS 9: Financial Instruments upon its mandatory effectivity date of 01 January 2018.

For this purpose, BSFIs shall be governed by the following:

- (1) Consistent with the duties and responsibilities of the board of directors provided under Sec. 132-Q, the board of directors or any equivalent governing body in the case of branches of foreign banks, shall ensure that the BSFI appropriately and consistently adopts PFRS 9 as part of its reporting governance process. In this respect, the board shall assess the impact of PFRS 9 on business strategies and risk management systems and ensure availability of sufficient resources, including capacity building initiatives, in adopting the standard.

The board shall approve policies and guidelines relative to the adoption of PFRS 9, which shall cover responsibilities of the different units in the BSFI (e.g., Treasury, Risk Management, Financial Controllorship) as well as the extent of participation or involvement of third parties in the adoption process. The board shall likewise ensure that adequate control measures are in place to ensure the integrity of reports.

- (2) Management shall implement the policies set by the board related to the adoption of PFRS 9 and ensure that sound professional judgment is exercised in implementing the provisions of the standard. Management shall provide feedback to the board on the effectiveness of implementation of PFRS 9.
- (3) BSFIs shall be guided by the provisions of Appendix 27/Appendix Q-22 on “Guidelines on the Adoption of Philippine Financial Reporting Standards 9 (PFRS 9) – Classification and Measurement” and Appendix N-16 on “Impairment” in implementing the provisions of PFRS 9.
- e. *Enforcement Actions.* Consistent with Sec. 127-N, the Bangko Sentral reserves the right to deploy its range of supervisory tools and enforcement actions to promote adherence with the requirements set out in this Section and bring about timely corrective actions to ensure appropriate and consistent adoption of PFRS. In this respect, the Bangko Sentral may issue directives or impose sanctions on the BSFI and/or its directors, officers and/or employees concerned for noted supervisory issues on the adoption of PFRS 9.

Prudential reports affected by non-adherence to the provisions of this Section shall be subject to penalties/sanctions provided under Sec. 143-N.

- f. *Transitory Provisions.* BSFIs shall observe the following transition rules:

- (1) BSFIs shall apply PFRS 9, retrospectively, in accordance with the transition requirements and guidance provided under PFRS 9 and PAS 8 “*Changes in Accounting Policies, Changes in Accounting Estimates and Errors*”. BSFIs shall be guided by the provisions of PAS 8 if the retrospective application is impracticable.
- (2) A BSFI that applied the earlier versions of PFRS 9 (2009), PFRS 9 (2010) or PFRS 9 (2013) shall be allowed to reclassify its financial assets provided that the reclassification requirements under the standard are met.
- (3) A BSFI is expected to comply with the reportorial and disclosure requirements of the Securities and Exchange Commission on the adoption of PFRS 9.

(Circular Nos. 1023 dated 4 December 2018, 1011 dated 14 August 2018, 915 dated 05 July 2016, and 912 dated 27 May 2016)

142-N ACCOUNTING FOR FINANCIAL INSTITUTION PREMISES; OTHER FIXED ASSETS

FI premises, furniture, fixture and equipment shall be accounted for using the cost model under PAS 16 “Property, Plant and Equipment.”

143-N REPORTS

NBFIs without quasi-banking functions but are subsidiaries/affiliates of banks and QBs and investment houses without quasi-banking functions but with trust operations shall submit to the appropriate supervising department of the

Bangko Sentral the reports listed in *Appendix N-1* in the forms as may be prescribed by the Deputy Governor of the appropriate sector of the Bangko Sentral.

Any change in, or amendment to, the articles of incorporation, by-laws or material documents required to be submitted to the Bangko Sentral shall be reported by submitting copies of the amended articles of incorporation, by-laws, or material documents to the appropriate supervising department of the Bangko Sentral within fifteen (15) days following such change.

Categories and signatories of reports. Reports required to be submitted to the Bangko Sentral are classified into *Categories A-2* and *B* reports as indicated in the list of reports required to be submitted to the Bangko Sentral in *Appendix N-1*.

Appendix N-2 prescribes the signatories for each report category and the requirements on signatory authorization. Reports submitted by NBFIs in computer media shall be subject to the same requirements.

A report submitted to the Bangko Sentral under the signature of an officer who is not authorized in accordance with the requirements in this Section shall be considered as not having been submitted.

Manner of filing. The submission of the reports shall be effected by filing them personally with the appropriate supervising department of the Bangko Sentral or with the Bangko Sentral Regional Offices/Units, or by sending them by registered mail or special delivery through private couriers unless otherwise specified in the circular or memorandum of the Bangko Sentral.

Sanctions in case of willful delay in the submission of reports.

- a. **Definition of terms.** For purposes of this Section, the following definitions shall apply:
 - (1) *Report* shall refer to any report or statement required of an NBF to be submitted to the Bangko Sentral periodically or within a specified period.
 - (2) *Willful delay in the submission of reports* shall refer to the failure of an NBF to submit a report on time. Failure to submit a report on time due to fortuitous events, such as fire and other natural calamities and public disorders, including strike or lockout affecting an NBF as defined in the Labor Code or national emergency affecting operations of NBFs, shall not be considered as willful delay.
- b. **Fines for willful delay in submission of reports.** NBFs incurring willful delay in the submission of required reports shall pay a fine in accordance with the following schedule:
 - I. For Categories A-2 reports
Per day of default
until the report is filed P300
 - II. For Category B reports
Per day of default
until the report is filed P 60

Delay or default shall start to run on the day following the last day required for the submission of reports. However, should the last day of filing fall on a non-working day in the locality where the reporting FI is situated, delay or default shall start to run on the day following the next working day. The due date/deadline for submission of reports to Bangko Sentral as prescribed under Sec. 143-N governing the frequency and deadlines indicated in *Appendix N-1* shall be automatically moved to the next business day whenever a half-day suspension of business operations in government offices is declared due to an emergency such as typhoon, floods, etc.

For purposes of establishing delay or default, the date of acknowledgment by the appropriate supervising department of the Bangko Sentral or the Bangko Sentral Regional Offices/Units appearing on the copies of such reports filed or submitted, or the date of mailing postmarked on the envelope/the date of registry/special delivery receipt, as the case may be, shall be considered as the date of filing by the NBF.

- c. **Manner of payment or collection of fines** – NBFs shall, within fifteen (15) calendar days from receipt of the statement of account from the appropriate department of the Bangko Sentral, pay the fines imposed thereon for willful delay on the submission of reports.

(Circular No. 880 dated 22 May 2015)

144-N PUBLICATION REQUIREMENTS

The quarterly CSOC of a trust entity and its subsidiaries and affiliates shall be published side by side with the statement of condition of its head office and its branches/other offices as of such dates as the Bangko Sentral may require within twenty (20) working days from receipt of call letter, in any newspaper of general circulation in the country in the prescribed format.

The CSOC of a QB/trust entity and its subsidiaries and associates shall conform with the guidelines of PAS 27 "Consolidated and Separate Financial Statements", except that for purposes of consolidated financial statements, only investments in financial allied subsidiaries except insurance subsidiaries shall be consolidated on a line-by-line basis; while insurance and non-financial allied subsidiaries shall be accounted for using the equity method. Financial/non-financial allied/non-allied associates shall be accounted for using the equity method in accordance with the provisions of PAS 28 "Investments in Associates". For purposes of separate financial statements, investments in financial/non-financial allied/non-allied subsidiaries/associates, including insurance subsidiaries/associates, shall be accounted for using the equity method.

PART TWO

BORROWING OPERATIONS

201-N QUASI-BANKING FUNCTIONS

Borrowing by NBFIs from twenty (20) or more lenders for the purpose of relending or purchase of receivables or other obligations, which constitutes quasi-banking functions, shall be subject to prior Bangko Sentral authority on performance of quasi-banking functions under Bangko Sentral regulations.

Quasi-banking functions. *Quasi-banking functions* shall consist of the following:

- a. Borrowing funds for the borrower's own account;
- b. Twenty (20) or more lenders at any one (1) time;
- c. Methods of borrowing: issuance, endorsement, or acceptance of debt instruments of any kind, other than deposits, such as:
 - (1) acceptances;
 - (2) promissory notes;
 - (3) participations;
 - (4) certificates of assignment or similar instruments with recourse;
 - (5) trust certificates;
 - (6) repurchase agreements; and
 - (7) such other instruments as the Monetary Board may determine; and
- d. Purpose:
 - (1) relending, or
 - (2) purchasing receivables or other obligations.

As used in the definition of *quasi-banking functions*, the following terms and phrases shall be understood, as follows:

Borrowing shall refer to all forms of obtaining or raising funds through any of the methods and for any of the purposes provided in Item "c" and "d" above whether the borrower's liability thereby is treated as real or contingent.

For the borrower's own account shall refer to the assumption of liability in one's own capacity and not in representation, or as an agent or trustee, of another.

Lenders shall refer to individuals and corporate entities that are not banks, quasi-banks or other financial intermediaries as provided under Sec. 101-Q (*Financial intermediaries*).

Purchasing of receivables or other obligations shall refer to the acquisition of claims collectible in money or securities of any amount and maturity from domestic or foreign sources.

Relending shall refer to the extension of loans by an institution with antecedent borrowing transactions. Relending shall be presumed in the absence of express stipulation, when the institution is regularly engaged in lending.

Regularly engaged in lending shall refer to the practice of extending loans, advances, discounts or rediscounts as a matter of business, i.e., continuous or consistent lending as distinguished from isolated lending transactions.

The following guidelines shall govern lender count on borrowings or funds mobilized by NBFIs not performing quasi-banking functions:

- a. For purposes of ascertaining the number of lenders/placers to determine whether or not an NBFI is engaged in quasi-banking functions, the names of payees on the face of each debt instrument shall serve as the primary basis for counting the lenders/placers except when proof to the contrary is adduced such as the official receipts or documents other than the debt instrument itself. In such case the actual/real lenders/placers as appearing in such proof, shall be the basis for counting the number of lenders/placers.

In a debt instrument issued to two (2) or more named payees under an *and/or* and *or* arrangement, the number of payees appearing on the instrument shall be the basis for counting the number of lenders/placers: *Provided, however*, That a debt instrument issued in the name of a husband and wife followed by the word *spouses*, whether under an *and*, *and/or* or *or* arrangement or in the name of a designated payee under an *in trust for* (ITF) arrangement shall be counted as one borrowing/placement.

- b. Each debt instrument payable to bearer shall be counted as one (1) lender/placer, except when the NBFIs can prove that there is only one (1) owner for several debt instruments so payable.
- c. Two (2) or more debt instruments issued to the same payee, irrespective of the date and amount shall be counted as one (1) borrowing or placement.
- d. Debt instruments underwritten by investment houses or traded by securities dealers/brokers whether on a firm, standby or best efforts basis shall be counted on the basis of the number of purchasers thereof and shall not be treated as having been issued solely to the underwriter or trader: *Provided, however,* That in case of unsold debt instruments in a firm commitment underwriting, the underwriter shall be counted as a lender.
- e. Each buyer, assignee, and/or indorsee shall be counted in determining the number of lenders/placers of funds mobilized through sale, assignment, and/or indorsement of securities or receivables on a without recourse basis whenever the terms and/or attendant documentation, practice, or circumstances indicate that the sale, assignment, and/or indorsement thereof legally obligates the NBFIs not performing quasi-banking functions to repurchase or reacquire the securities/receivables sold, assigned, indorsed or to pay the buyer, assignee, or indorsee at some subsequent time.
- f. Funds obtained by way of advances from stockholders, directors, or officers, regardless of nature, shall be considered borrowed funds or funds mobilized and such stockholders, directors or officers shall be counted in determining the number of lenders/placers.

Transactions not considered quasi-banking. The following shall not constitute quasi-banking:

- a. Borrowing by commercial, industrial and other non-financial companies, through the means listed in Sec. 201-N for the limited purpose of financing their own needs or the needs of their agents or dealers; and
- b. The mere buying and selling without recourse of instruments mentioned in Sec. 201-N: *Provided, That:*

- (1) The institution selling without recourse shall indicate or stamp in conspicuous print on the instrument/s, as well as on the confirmation of sale, the phrase *without recourse* or *sans recourse* and the following statement:

(Name of non-bank) assumes no liability for the payment,
directly or indirectly, of this instrument.

- (2) In the absence of the phrase *without recourse* or *sans recourse* and the above-required accompanying statement, the instrument so issued, endorsed or accepted shall automatically be considered as falling within the purview of the rules on quasi-banking:

Provided, further, That any of the following practices or practices similar and/or tantamount thereto in connection with a without recourse transaction renders such transaction as with recourse and within the purview of the rules on quasi-banking.

- (a) Issuance of postdated checks by a financial intermediary, whether for its own account or as an agent of the debt instrument issuer, in payment of the debt instrument sold, assigned or transferred without recourse;
- (b) Issuance by a financial intermediary of any form of guaranty on sale transactions or on negotiations or assignment of debt instruments without recourse; or
- (c) Payment with the funds of the financial intermediary which assigned, sold or transferred the debt instrument without recourse, unless the financial intermediary can show that the issuer has with the said financial intermediary funds corresponding to the amount of the obligation.

Any investment house violating the provisions of this Section shall be subject to the sanctions provided in Sections 12 and 16 of P.D. No. 129, as amended.

Delivery of securities.

- a. Securities sold on a without recourse basis allowed under item "b" of Sec. 101-Q on transactions not considered quasi-banking shall be delivered directly to the purchaser or to the purchaser's designated Bangko Sentral accredited securities custodian or SEC authorized central securities depository in accordance with the guidelines set forth in *Appendix Q-38*. The securities custodian shall hold the securities in the name of the buyer: *Provided, That* a QB/non-bank financial institution (NBFIs)/other entity authorized by the Bangko Sentral to perform custodianship function or an SEC-authorized central securities depository may not be allowed to be custodian/depository of securities issued or sold by said custodian or central securities depository, by entities belonging to the same financial conglomerate or banking group as that of the custodian or depository, or of securities in bearer form.

The delivery shall be effected upon payment and shall be evidenced by a securities delivery receipt duly signed by the authorized officer of the custodian/central securities depository and delivered to the purchaser.

Sanctions. Violation of any provision of Item “a” shall be subject to the following sanctions/penalties:

(1) *Monetary penalties*

First offense – Fine of P10,000 a day for each violation reckoned from the date the violation was committed up to the date it was corrected.

Subsequent offenses – Fine of P20,000 a day for each violation reckoned from the date the violation was committed up to the date it was corrected.

(2) *Other sanctions*

First offense – Reprimand for the directors/officers responsible for the violation.

Subsequent offense –

- (a) Suspension for ninety (90) days without pay of directors/officers responsible for the violation;
 - (b) Suspension or revocation of the accreditation to perform custodianship function;
 - (c) Suspension or revocation of the authority to engage in quasi-banking function; and/or
 - (d) Suspension or revocation of the authority to engage in trust and other fiduciary business.
- b. The guidelines to implement the delivery by the seller of securities to the buyer or to his designated securities custodian or central securities depository are shown in *Appendix Q-37*.

The guidelines on the delivery of government securities to the investor’s principal securities account with the RoSS are in *Appendix Q-38*.

Sanctions. Violation of any of the provisions of *Appendix Q-38* shall be subject to the sanctions/penalties under Sec. 1002-N.

(Circular Nos. 1061 dated 25 November 2019 and 873 dated 25 March 2015)

202-N DISCLOSURE OF REMITTANCE CHARGES AND OTHER RELEVANT INFORMATION¹

It is the policy of the Bangko Sentral to promote the efficient delivery of competitively-priced remittance services by banks and other remittance service providers by promoting competition and the use of innovative payment systems, strengthening the financial infrastructure, enhancing access to formal remittance channels in the source and destination countries, deepening the financial literacy of consumers, and improving transparency in remittance transactions, consistent with sound practices.

Towards this end, NBFIs under Bangko Sentral supervision, including FXDs/MCs and RAs, providing overseas remittance services shall disclose to the remittance sender and to the recipient/beneficiary, the following minimum items of information regarding remittance transactions, as defined herein:

- a. *Transfer/remittance fee*-charge for processing/sending the remittance from the country of origin to the country of destination and/or charge for receiving the remittance at the country of destination;
- b. *Exchange rate*-rate of conversion from foreign currency to local currency, e.g., peso-dollar rate;
- c. *Exchange rate differential/spread*-foreign exchange mark-up or the difference between the prevailing Bangko Sentral reference/guiding rate and the exchange conversion rate;
- d. *Other currency conversion charges*-commissions or service fees, if any;
- e. *Other related charges*-e.g., surcharges, postage, text message or telegram;
- f. *Amount/currency paid out in the recipient country*-exact amount of money the recipient should receive in local currency or foreign currency; and
- g. *Delivery time to recipients/beneficiaries*-delivery period of remittance to beneficiary stated in number of days, hours or minutes.

Non-bank remittance service providers shall likewise post said information in their respective websites and display them prominently in conspicuous places within their premises and/or remittance/service centers.

In case of domestic remittance transactions, all fees to the transactions shall be charged upfront by all NBFIs under Bangko Sentral supervision from the sender/remitter’s end, with appropriate disclosure to the sender/remitter of the components of the fees being charged. This does not preclude the Bangko Sentral-supervised NBFI and/or other

¹ The NBFIs shall have until 27 April 2017 to comply with the provision of this Section.

participants to the domestic remittance transaction from charging service fees. Domestic remittance transaction, for this purpose, is a transfer of funds between a sender/remitter and a beneficiary who are both within the Philippines, and is not covered by electronic payment transaction as defined under the NRPS Framework.

(Circular Nos. 980 dated 6 November 2017 and 952 dated 22 March 2017)

PART THREE

LOANS, INVESTMENTS AND SPECIAL CREDITS

301-N GRANT OF LOANS AND OTHER CREDIT ACCOMMODATIONS

In addition to the principles and standards provided under Sec. 122-N, the following regulations shall be observed in the grant of loans and other credit accommodations.

Additional requirements. FIs shall require submission and maintain on file updated ITRs of the borrower, and his co-maker, if applicable, duly stamped as received by the BIR together with supporting financial statements, as applicable. FIs shall likewise require borrowers to execute a waiver of confidentiality of client information and/or an authority of the FI to conduct random verification with the BIR in order to establish authenticity of these documents.

Should the document(s) submitted prove to be spurious or incorrect in material detail, the FI may terminate any loan or other credit accommodation granted on the basis of said document(s) and shall have the right to demand immediate repayment or liquidation of the obligation.

The required submission of such documents shall not cover the following credit exposures:

- (1) *Microfinance loans* as defined under Sec. 314 of the MORB;
- (2) Loans to registered BMBEs;
- (3) Interbank loans;
- (4) Loans secured by hold-outs on or assignment of deposits or other assets considered non-risk by the Monetary Board;
- (5) Loans to individuals who are not required to file ITRs under BIR regulations, as follows:
 - (a) Individuals whose gross compensation income does not exceed their total personal and additional exemptions, or whose compensation income derived from one (1) employer does not exceed P60,000 and the income tax on which has been correctly withheld;
 - (b) Those whose income has been subjected to final withholding tax;
 - (c) Senior citizens not required to file a return pursuant to R.A. No. 7432, as amended by R.A. No. 9257, in relation to the provisions of the NIRC or the Tax Reform Act of 1997; and
 - (d) An individual who is exempt from income tax pursuant to the provisions of the NIRC and other laws, general or special;
- (6) Loans to borrowers, whose only source of income is compensation and the corresponding taxes on which has been withheld at source: *Provided*, That the borrowers submitted, in lieu of the ITR, a copy of their Employer's Certificate of Compensation Payment/Tax Withheld (BIR Form 2316) or their payslips for at least three (3) months immediately preceding the date of loan application;
- (7) Loans and other credit accommodations not exceeding P3.0 million; or
- (8) Loans to start up enterprise borrowers during the first three (3) years of their operations or banking relationship.

Prohibited use of loan proceeds. NBFIs are prohibited from requiring their borrowers to acquire shares of stock of the lending NBFI out of the loan or other credit accommodation proceeds from the same NBFI.

Signatories. NBFIs shall require that loans and other credit accommodations be made under the signature of the principal borrower and, in the case of unsecured loans and other credit accommodations to an individual borrower, at least one (1) co-maker, except that a co-maker is not required when the principal borrower has the financial capacity and a good track record of paying his obligations.

Accrual of interest earned on loans and other credit accommodations. Accrual of interest earned on non-performing loans and other credit accommodations shall not be allowed.

Accrued interest receivable shall be classified in accordance with their respective loan accounts and provided with *Allowance for Uncollected Interest on Loans*.

Minimum required disclosure. NBFIs shall provide a table of the applicable fees, penalties and interest rates on loan transactions, including the period covered by and the manner of and reason for the imposition of such penalties, fees and interest, fees and applicable conversion reference rates for third currency transactions, in plain sight and language, on materials for marketing loans such as brochures, flyers, primers and advertising materials, on loan application forms, and on billing statements: *Provided*, That these disclosures are in addition to the full disclosure of the fees, charges and interest rates in the terms and conditions of the loan agreement found elsewhere on the application form and billing statement: *Provided, further*, That such table of fees, penalties and interest rates shall be printed in plain language and in bold black letters against a light or white background, and using the minimum Arial 12 theme font and size, or its equivalent in readability, and on the first page, if the applicable document has more than one (1) page.

Unfair collection practices. NBFIs, collection agencies, counsels and other agents may resort to all reasonable and legally permissible means to collect amounts due them under the loan agreement: *Provided*, That in the exercise of their rights and performance of duties, they must observe good faith and reasonable conduct and refrain from engaging in unscrupulous or untoward acts. Without limiting the general application of the foregoing, the following conduct is a violation of this Section:

- a. the use or threat of violence or other criminal means to harm the physical person, reputation, or property of any person;
- b. the use of obscenities, insults, or profane language which amount to a criminal act or offense under applicable laws;
- c. disclosure of the names of borrowers who allegedly refuse to pay debts, except as allowed under Sec. 301-N on Confidentiality of Information;
- d. threat to take any action that cannot legally be taken;
- e. communicating or threat to communicate to any person credit information which is known to be false, including failure to communicate that a debt is being disputed;
- f. any false representation or deceptive means to collect or attempt to collect any debt or to obtain information concerning a borrower; and
- g. making contact at unreasonable/inconvenient times or hours which shall be defined as contact before 6:00 A.M. or after 10:00 P.M., unless the account is past due for more than sixty (60) days or the borrower has given express permission or said times are the only reasonable or convenient opportunities for contact.

NBFIs shall inform their borrowers in writing of the endorsement of the collection of their account to a collection agency/agent, or the endorsement of their account from one (1) collection agency/agent to another, at least seven (7) days prior to the actual endorsement. The notification shall include the full name of the collection agency and its contact details: *Provided*, That the required notification in writing shall be included in the terms and conditions of the loan agreement. NBFIs shall adopt policies and procedures to ensure that personnel handling the collection of accounts, whether these are in-house collectors, or third-party collection agents, shall disclose his/her full name/true identity to the borrower.

Confidentiality of Information. NBFIs shall keep strictly confidential the data on the borrower or consumer, except under the following circumstances:

- a. disclosure of information is with the consent of the borrower or consumer;
- b. release, submission or exchange of customer information with other financial institutions, credit information bureaus, lenders, their subsidiaries and affiliates;
- c. upon orders of court of competent jurisdiction or any government office or agency authorized by law, or under such conditions as may be prescribed by the Monetary Board;
- d. disclosure to collection agencies, counsels and other agents of the NBFIs to enforce its rights against the borrower;
- e. disclosure to third party service providers solely for the purpose of assisting or rendering services to the NBFI in the administration of its lending business; and
- f. disclosure to third parties such as insurance companies, solely for the purpose of insuring the NBFI from borrower default or other credit loss, and the borrower from fraud or unauthorized charges.

Sanctions. Any violation of the provisions of Sec. 301-N on Additional Requirements, Prohibited Use of Loan Proceeds and Signatories shall be subject to the sanctions provided under Sections 36 and 37 of R.A. No. 7653.

Violation of the provisions of Sec. 301-N on Minimum Required Disclosure, Unfair Collection Practices and Confidentiality of Information shall be subject to any or all of the following sanctions depending upon their severity:

- a. *First offense.* Reprimand for the directors/officers responsible for the violation;
- b. *Second offense.* Disqualification of the NBFI concerned from the credit facilities of the Bangko Sentral except as may be allowed under Section 84 of R. A. No. 7653;

c. *Subsequent offense/s:*

- (1) Prohibition on the NBFI concerned from the extension of additional credit accommodation against personal security; and
- (2) Penalties and sanctions provided under Sections 36 and 37 of R. A. No. 7653.

Dissemination of Relevant Information. FIs shall ensure that all persons to whom credit is extended are well informed of the salient provisions of R.A. No. 3765, otherwise known as the “Truth in Lending Act” as contained in the revised format of disclosure statement in *Appendix N-19* through any acceptable medium of communication such as, but not limited to, posters, brochures, pamphlets, leaflets, educational videos, corporate websites, infographics and social media platforms. Said information must be conspicuously displayed and made available at all times, in physical or electronic format, to all persons to whom credit is extended by FIs subject to the consumer protection standards and social media risk management guidelines. Such medium of communication shall include an explicit notification that the disclosure statement in writing is a required attachment to the credit transaction contract which FIs shall provide all persons to whom credit is extended with a copy of said disclosure statement prior to the consummation of the credit transaction.

(Circular Nos. 1052 dated 2 October 2019, 1011 dated 14 August 2018, and 855 dated 29 October 2014)

302-N UPDATING OF INFORMATION PROVIDED TO CREDIT INFORMATION BUREAUS

FIs which have provided adverse information, such as the past due or litigation status of loan accounts, to credit information bureaus, or any organization performing similar functions, shall submit monthly reports to these bureaus or organizations on the full payment or settlement of the previously reported accounts within five (5) business days from the end of the month when such full payment was received. For this purpose, it shall be the responsibility of the reporting FIs to ensure that their disclosure of any information about their borrowers/clients is with the consent of borrowers/clients concerned.

303-N PAST DUE ACCOUNTS AND NON-PERFORMING LOANS¹

The following regulations shall guide BSFIs in determining their past due accounts and non-performing loans.

Definition of terms. For purposes of this Section, the following definitions shall apply:

- a. *Restructured loans* shall refer to loans and other credit accommodations the original contractual terms and conditions of which have been modified in accordance with a formal restructuring agreement that sets forth a revised schedule of payments for the purpose of lessening the financial difficulty of the borrower and maximizing collection and realizable economic value on an obligation within a reasonable period of time. The modification may include, but is not limited to, change in principal due, maturity, interest rate and other charges, collateral, or other terms and conditions.
- b. *Items in litigation* shall refer to loans or other credit accommodations for which cases, such as collection or foreclosure, have been filed in court or sheriff’s office, as the case may be. The loan or other credit accommodation shall remain in this account during the pendency of the proceedings, until full payment, restructuring of the obligation, foreclosure of the collateral, or such other disposition is made as would cause such proceedings to cease.

Accounts considered past due. As a general rule, loans, investments, receivables, or any financial asset, including restructured loans, shall be considered past due when any principal and/or interest or installment due, or portions thereof, are not paid at their contractual due date, in which case, the total outstanding balance thereof shall be considered as past due. However, BSFIs may provide a cure period on a credit product-specific basis, not to exceed thirty (30) days within which to allow the obligors or borrowers to catch up on their late payment without being considered as past due: *Provided*, That any cure period policy shall be based on verifiable collection experience and reasonable judgment that support tolerance of occasional payment delays: *Provided, further*, That the observance of a cure period policy shall not preclude the timely adverse classification of an account that has developed material credit weakness/es, and that BSFIs shall regularly review the reasonableness of its cure period policy. For microfinance and other small loans that feature high frequency payments, the cure period allowable by policy shall not exceed ten (10) days.

Non-performing loans. Loans, investments, receivables, or any financial asset shall be considered non-performing, even without any missed contractual payments, when it is considered impaired under existing accounting standards², classified as doubtful or loss, in litigation, and/or there is evidence that full repayment of principal and interest is unlikely without foreclosure of collateral, if any. All other loans, even if not considered impaired, shall be considered non-performing if any

¹ Effective from 10 February 2017 up to 31 December 2017, BSFIs shall make the necessary revisions in their management information and reporting systems relating to past due and non-performing loans. Effective 01 January 2018, past due and NPLs shall be mandatorily reported in accordance with the requirements of this Section.

² Applicable accounting standard is PAS 39 until 31 December 2017 and International Financial Reporting Standards (IFRS) 9 starting 01 January 2018. A financial asset or a group of financial assets is impaired when there is objective evidence that its recoverable value is less than its carrying amount, as a result of one or more loss events that occurred after the initial recognition of the asset and that the loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. It may not be possible to identify a single, discrete event that caused the impairment. Rather, the combined effect of several events may have caused the impairment.

principal and/or interest are unpaid for more than ninety (90) days from contractual due date, or accrued interests for more than ninety (90) days have been capitalized, refinanced, or delayed by agreement.

Microfinance and other small loans with similar credit characteristics shall be considered non-performing after contractual due date or after it has become past due.

Restructured loans shall be considered non-performing. However, if prior to restructuring, the loans were categorized as performing, such classification shall be retained.

Non-performing loans, investments, receivables, or any financial asset (and/or any replacement loan) shall remain classified as such until (a) there is sufficient evidence to support that full collection of principal and interests is probable and payments of interest and/or principal are received for at least six (6) months; or (b) written-off.

(Circular No. 941 dated 20 January 2017)

304-N SECURED LOANS AND OTHER CREDIT ACCOMMODATIONS

A loan may be considered secured by collateral to the extent the estimated value of net proceeds at disposition of such collateral can be used without legal impediment to settle the principal and accrued interest of such loan: *Provided*, That such collateral must have an established market and the valuation methodology used is sound, and *Provided, further*, That in the case of real estate collateral, the maximum collateral value shall be sixty percent (60%) of its value as appraised by an appraiser acceptable to the Bangko Sentral.

A loan may also be considered as secured to the extent covered by a third party financial guarantee or surety arrangement where the credit enhancement provider is itself considered to be of high credit quality (credit rating of at least AA or equivalent) or is recognized by the Bangko Sentral as eligible guarantor under existing regulations.

Finally, a loan may be secured by a combination of acceptable collateral and guarantee arrangements as defined above, provided such arrangements are independent of one another for credit enhancement purposes.

(Circular Nos. 914 dated 23 June 2016 and 855 dated 29 October 2014)

305-N AGRICULTURAL VALUE CHAIN FINANCING FRAMEWORK¹

The Bangko Sentral supports the promotion of agricultural value chain financing as an effective and organized approach to channel financing to the agriculture and fisheries sectors and promote financial inclusion. By encouraging the linking of various actors/players in an agricultural value chain, credit risk of participating smallholder farmers/fisherfolks can be reduced. As a result, this type of financing would facilitate and allow small farmers/fisherfolks to have, if not more, access to credit. This is expected to further improve productivity in the agriculture and fisheries sectors and at the same time uplift the lives of these marginalized farmers/fisherfolks.

The provisions covering the agricultural value chain financing framework shall be implemented in consonance with Sec. 122-N.

Definition of terms. For purposes of this Section, the following definitions shall apply:

- a. *Value chain* - refers to a set of actors/players, e.g., producers (farmers/fisherfolks), traders, suppliers, processors, aggregators, who conduct linked sequence of value-adding activities involved in bringing a product from its raw material stage to the final consumers;
- b. *Value chain finance* - refers to the financial flows to those actors/players from both within the value chain and financial flows to those actors/players from the outside as a result of their being linked within a value chain;
- c. *Agricultural value chain analysis* - refers to the assessment of actors/players, e.g., from input suppliers to producers to processors and to traders, their interests and the factors influencing the performance of a particular value chain, e.g., palay, corn, livestock, marine products, as a whole, as opposed to only examining targeted sections of the chain; it also includes understanding the nature of the chain, identifying the weakest and strongest links along the chain and the business models as shown in *Appendix N-13*; and
- d. *Value chain aggregator* - refers to any value chain actor/player or any entity outside the value chain which initiates the formalization and/or organization of a value chain and/or which offers services that aim to strengthen existing value chains.

¹ The following provisions in Sec. 305-N on Definition of Terms, Features of Agricultural Value Chain Financing Program and Regulatory Incentives covering the agricultural value chain financing framework shall be implemented in consonance with Sec. 122-N.

Features of agricultural value chain financing program. Consistent with existing provisions on sound credit risk management practices, the Bangko Sentral hereby recognizes agricultural value chain financing programs that have the following features:

- a. *Agricultural value chain policy and procedures.* The BSFIs shall put in place adequate policies and procedures which cover the identification of value chains, comprehensive value chain analysis, and the design of appropriate financial products and services, among others;
- b. *Types of credit products.* BSFIs can design and/or offer appropriate financial products either to a specific actor/player or to various actors/players of the value chain model simultaneously. In addition to the traditional loans and discounts that BSFIs are currently offering, the following products and financial services may also be made available to agricultural value chain actors/players:
 - (1) *Trade-receivables finance* - a BSFI advances working capital to agribusiness (supplier, processor, marketing and export) companies against accounts receivable or confirmed orders to producers. Receivables financing takes into account the strength of the buyer's purchases and repayment history;
 - (2) *Factoring* - a financial transaction whereby a business sell its accounts receivable or contracts of sales of goods at a discount to an appropriate BSFI, called a factor, who pays the business minus a factor discount and collects the receivables when due; and
 - (3) *Warehouse receipts* - farmers and other value chain enterprises receive a receipt from a certified warehouse that can be used as collateral to access a loan from an appropriate BSFI against the security of goods in an independently controlled warehouse.
- c. *Loan disbursement.* Loan releases may take the following forms depending on the role that the borrower takes in the value chain and the risks to be addressed by the BSFI:
 - (1) *Cash disbursements* - the most common practice which may be completed in one transaction or in installments;
 - (2) *Loan proceeds transfer to suppliers* - under this scheme the BSFI prefers to deal with the supplier directly to control loan utilization and, therefore, prefer to transfer the loan proceeds straight to the supplier upon full acceptance of the buyer (borrower). In case the supplier is a related party, the BSFI shall ensure that the term and conditions of the loan are not less favorable to the borrower than those offered by other lenders; and
 - (3) *Anchor firm (institutional buyer) triggered loan release* - loan release to the borrower will be endorsed by the anchor firm to ensure the adoption of the technology protocol required by the buyer (anchor firm). This would optimize productivity by the farmer-borrower and the technology adopted conforms with the requirements of the buyer; thus, reduce rejects on the deliveries of the produce.
- d. *Disaster contingency mechanism.* In light of the vulnerability of the agriculture and fisheries sectors which could result to significant credit losses to financial institutions, if not managed well, the BSFI may put in place a disaster contingency mechanism that anticipates such events and provides response mechanisms to mitigate the impact of such inherent risks. The disaster contingency mechanism can provide timely relief to a borrower to facilitate recovery. This mechanism shall be adequately documented with clear policies and guidelines.

Provided such built-in contingency mechanism is prudently designed, its activation shall not automatically trigger adverse loan classification and past due loan recognition so as to manage credit losses to the BSFI and minimize burden on the client. Any new financing granted under such schemes will also not be adversely classified. However, such credit should be closely monitored and appropriate corrective measure should be taken once it becomes clear that recoverability is impaired.
- e. *Other features.* The following activities may also be allowed:
 - (1) Director/s, officer/s and/or stockholder/s of BSFIs engaged in agricultural value chain financing may own and/or control: (i) private entities that would act as aggregators to facilitate the formation of value chains, and (ii) economically-linked entities that are also actors/players in the value chain: *Provided*, That all transactions with such entities shall be in the ordinary course of business and not undertaken on more favorable economic terms to such related parties than similar transactions with non-related parties under similar circumstances. These transactions shall comply and adhere to existing regulations pertaining to DOSRI loans and/or related-party transactions; and
 - (2) The BSFI, if necessary, may initiate the formulation of formal agreement(s) with qualified value chain actors/players to protect the interests of all parties involved.

Regulatory incentives. To encourage BSFIs to engage in agricultural value chain financing, the following incentives shall apply; provided in, Sec. 305-N on the Features of Agricultural Value Chain Financing Program is complied with:

- a. Loans granted to agricultural value chain actor(s)/player(s), who are qualified borrowers under Sec. 331 of the MORB, shall be considered as either direct or allowable alternative compliance to the mandatory agriculture and agrarian reform credit allocation; and
- b. Increase in SBL for an additional twenty-five percent (25%) for loans, other credit accommodations and guarantees granted to entities, which act as value chain aggregators of the lending banks' clients, and/or economically-linked entities that are also actors/players in the value chain; *Provided*, That the additional twenty-five percent (25%) will apply only to non-director/s, officer/s, stockholder/s, and related interest/s (DOSRI)/related party transaction (RPT) loans: *Provided, further*, That such increase in the SBL for an additional twenty-five percent (25%) shall only be a period of three (3) years starting 02 April 2016¹, subject to review after said period.

(Circular No. 908 dated 14 March 2016)

306-N INVESTMENTS IN DEBT AND MARKETABLE EQUITY SECURITIES

The classification, accounting procedures, valuation, sales and transfers of investments in debt securities and marketable equity securities shall be in accordance with the guidelines in *Appendices Q-22 and Q-23*.

Penalties and sanctions. The following penalties and sanctions shall be imposed on FIs and concerned officers found to violate the provisions of these regulations:

- a. Fines of P2,000/day to be imposed on NBFIs for each violation, reckoned from the date the violation was committed up to the date it was corrected; and
- b. Sanctions to be imposed on concerned officers:
 - (1) First offense – reprimand the officers responsible for the violation; and
 - (2) Subsequent offenses – suspension of ninety (90) days without pay for officers responsible for the violation.

Marking to market of financial instruments. Financial instruments that are required to be classified and measured at fair value, within the scope of Philippine Financial Reporting Standards (PFRS) 9 under *Appendix Q-23*, shall be marked-to-market in accordance with the provisions of PFRS 13 on Fair Value Measurement and the related rules and regulations issued by the Securities and Exchange Commission. The marked-to-market guidelines for debt and equity securities are set out in *Appendix Q-23*.

BSFIs and the concerned officers found to have violated the provisions of these regulations shall be subject to the enforcement actions under Sec. 141-N.

(Circular No. 1021 dated 15 November 2018)

¹ Effectivity 4 April 2016.

PART FOUR

ELECTRONIC SERVICES AND OPERATIONS

401-N ELECTRONIC PAYMENT AND FINANCIAL SERVICES

The guidelines concerning electronic payment and financial services, as may be applicable, are found in Sec. 701-Q.

Requirements for the grant of authority to offer EPFS. Pursuant to Sec. 101-N on the Bangko Sentral Policy and Regulations on Licensing, BSFIs that intend to offer EPFS shall obtain the appropriate authority/license, as follows:

Classification	Category of License/Authority
Advanced EPFS	Type A ¹ /B ²
Basic EPFS	Type C

BSFIs shall observe the “Guidelines on Licensing of Electronic Payment and Financial Services” shown in *Appendix Q-89*.

Reportorial requirements. BSFIs shall provide the Bangko Sentral with the required data and updates on their EPFS.

- a. **Required Reports.** The following reports shall be submitted to the appropriate supervising department of the Bangko Sentral in the manner prescribed under *Appendix N-1*:

- (1) EPFS Transactions and Indicators; and
- (2) Changes and Enhancements in EPFS

- b. **Sanctions.** Failure to comply with the reportorial requirements shall subject the concerned BSFI to applicable sanctions for “Erroneous/Delayed/Erroneous and Delayed/Unsubmitted reports” as prescribed under Sec. 143-N.

Enforcement action. Failure to comply with the provisions of this Section shall cause the concerned BSFI to be subject to enforcement action in accordance with Sec. 002-Q and Sec. 101-N (*Enforcement actions*).

(Circular Nos. 1143 dated 12 April 2022 and 1033 dated 22 February 2019)

402-N ISSUANCE AND OPERATIONS OF ELECTRONIC MONEY

The following guidelines shall govern the issuance of electronic money (e-money) and the operations of electronic money issuers (EMIs).

Policy statement. It is the policy of the Bangko Sentral to foster the development of efficient and convenient retail payment and fund transfer mechanisms in the Philippines. The availability and acceptance of e-money as a retail payment medium will be promoted by providing the necessary safeguards and controls to mitigate the risks associated in an e-money business.

Definitions.

E-money shall mean monetary value as represented by a claim on its issuer, that is –

- a. electronically stored in an instrument or device;
- b. issued against receipt of funds of an amount not lesser in value than the monetary value issued;
- c. accepted as a means of payment by persons or entities other than the issuer;
- d. withdrawable in cash or cash equivalent; and
- e. issued in accordance with this Section.

Electronic money issuer shall be classified as follows:

- a. Banks (hereinafter called EMI-Bank);
- b. NBFIs supervised by the Bangko Sentral (hereinafter called EMI-NBFI); and
- c. Non-bank institutions registered with the Bangko Sentral as a money transfer agent under Sec. 901-N (hereinafter called EMI-Others).

¹ This applies to BSFIs that *can* be assessed against the prudential criteria provided in the Policy and Regulations on Licensing. These applicants must have been examined by the Bangko Sentral.

² This applies to proponents that *cannot* be assessed against the prudential criteria provided in the Policy and Regulations on Licensing. These include newly-established BSFIs and new applicants for an authority to operate as “Electronic Money Issuer-Others”.

For purposes of this Section:

- a. *Electronic instruments or devices* shall mean cash cards e-wallets accessible via mobile phones or other access device, stored value cards, and other similar products.
- b. E-money issued by NBFIs shall not be considered as deposits.

Prior Bangko Sentral approval. NBFIs planning to be an EMI-NBFI shall comply with the requirements of Sec. 401-N and Sec. 102-N, when applicable.

NBFIs planning to be an EMI-Others shall register with the Bangko Sentral as a money transfer agent in accordance with the provisions of Sec. 901-N. To qualify for registration, they have to comply with the following requirements:

- a. They must be a stock corporation with a minimum paid-up capital of P100 million;
- b. They shall engage only in the business of e-money and other activities related or incidental to the business of e-money, such as money transfer/remittance. An existing entity engaged in activities not related to the business of e-money but wishing to act as EMI-Others must do so through a separate entity duly incorporated exclusively for such purpose;
- c. They shall not engage in the extension of credit, unless they comply with the provisions of this Section (*Quasi-bank license requirement*);
- d. To further protect the e-money holders and ensure that e-money redemptions are adequately met at all times, the entity should have sufficient liquid assets equal to the amount of outstanding e-money issued. The liquid assets should remain unencumbered and may take any of the following forms:
 - (1) bank deposits separately maintained for liquidity purposes;
 - (2) government securities set aside for the purpose; and
 - (3) such other liquid assets as the Bangko Sentral may allow.

Records pertaining to the above liquid assets shall be made available for inspection by Bangko Sentral at any time and the confidentiality of bank deposits and government securities shall be waived.

- e. The Bangko Sentral shall be allowed access to review the e-money systems and databases of the entity. Whenever the circumstances warrant, such access shall extend to the agents, partners, service providers or outsourced entities of the EMI-Others in view of their participation in the e-money business; and
- f. EMI-Others shall submit to the SDC, its AFS within thirty (30) days from date of report of its external auditors.

In case the NBFI is already registered with the Bangko Sentral as a money transfer agent, it is required to meet the additional requirements mentioned above to qualify as EMI-Others.

Common provisions. In addition to the provisions under Sec. 701-Q (*Compliance with relevant regulations*), EMIs shall comply with the following requirements:

- a. E-money instrument issued shall be subject to aggregate monthly load limit of P100,000 unless a higher amount has been approved by Bangko Sentral. In case an EMI issues several e-money instruments to a person (e-money holder), the total amount loaded in all the e-money instruments shall be consolidated in determining compliance with the aggregate monthly load limit;
- b. EMIs shall put in place a system to maintain accurate and complete record of e-money instruments issued, the identity of e-money holders, and the individual and consolidated balances thereof. The system must have the capability to monitor the movement of e-money transactions and link e-money instruments issued to common e-money holders. The susceptibility of a system to intentional or unintentional misreporting of transaction and balances shall be sufficient ground for imposition by the Bangko Sentral of sanctions, as may be applicable.
- c. E-money may only be redeemed at face value. It shall not earn interest nor rewards and other similar incentives convertible to cash, nor be purchased at a discount. E-money is not considered a deposit hence it is not insured with the PDIC.
- d. EMIs shall ensure that e-money instruments clearly identify the issuer who is ultimately responsible to the e-money holders. This shall be communicated to the client who shall acknowledge the same in writing.
- e. It is the responsibility of EMIs to ensure that their distributors/e-money agents comply with all applicable requirements of the Anti-Money Laundering laws, rules and regulations.

- f. EMIs shall provide an acceptable redress mechanism to address the complaints of its customers.
- g. EMIs shall disclose in writing and its customers shall signify agreement to the information embodied in Item “c” above upon their participation in the e-money system. In addition, it shall provide clear guidance in English and Filipino on consumers’ right of redemption, including conditions and fees for redemption, if any. Information on available redress procedures for complaints together with the address and contact information of the issuer shall also be provided.
- h. Prior to the issuance of e-money, EMIs should ensure that the following minimum systems and controls are in place:
 - (1) Sound and prudent management, administrative and accounting procedures and adequate internal control mechanisms;
 - (2) Properly-designed computer systems which are thoroughly tested prior to implementation;
 - (3) Appropriate security policies and measures intended to safeguard the integrity, authenticity and confidentiality of data and operating processes;
 - (4) Adequate business continuity and disaster recovery plan; and
 - (5) Effective audit function to provide periodic review of the security control environment and critical systems.
- i. EMIs shall provide the SDC quarterly statements containing, among others, information on investments, volume of transactions, total outstanding e-money balances, and liquid assets in such forms as may be prescribed later on.
- j. EMIs shall notify Bangko Sentral in writing of any change or enhancement in the e-money facility thirty (30) days prior to implementation. If said change or enhancement requires prior Bangko Sentral approval, the same shall be evaluated accordingly. Any change or enhancement that shall expand the scope or change the nature of the e-money instrument shall be subject to prior approval of the Deputy Governor of the appropriate supervising department of the Bangko Sentral. These changes or enhancements may include the following:
 - (1) Additional capabilities of the e-money instrument/s, like access to new channels (e.g., inclusion of internet channel in addition to merchant Point of Sale terminals);
 - (2) Change in technology service providers and other major partners in the e-money business (excluding partner merchants), if any; and
 - (3) Other changes or enhancements.

Quasi-bank license requirement. EMI-NBFIs and EMI-Others that engage in lending activities must secure a quasi-banking license from the Bangko Sentral.

Sanctions. Monetary penalties and other sanctions for the following violations committed by EMI-NBFIs shall be imposed:

Nature of Violation/Exception	Sanction/Penalties
1. Issuing e-money without prior Bangko Sentral approval	Applicable penalties under Sections 36 & 37 of R.A. No. 7653; Watchlisting of owners/partners/principal officers
2. Violation of any of the provisions of R.A. No. 9160 (Anti-Money Laundering Law of 2001 as amended by R.A. No. 9194) and its implementing rules and regulations	Applicable penalties prescribed under the Act
3. Violation/s of this Section	Penalties and sanctions under the abovementioned laws and other applicable laws, rules and regulations

In addition, the susceptibility of a system to intentional or unintentional misreporting of transactions and balances shall be sufficient ground for appropriate Bangko Sentral action or imposition of sanctions, whenever applicable.

Outsourcing of services by Electronic Money Issuers (EMIs) to Electronic Money Network Service Providers (EMNSP). The guidelines on outsourcing of services by EMIs to EMNSP are shown in *Appendix Q-56*.

Sanctions. Violations committed by EMIs pertaining to outsourcing activities to EMNSP shall be subject to appropriate monetary penalties under Sec. 1102-Q and/or other non-monetary sanction under Section 37 of R.A. No. 7653.

(Circular Nos. 1033 dated 22 February 2019 and 988 dated 20 December 2017)

PART FIVE

REGULATIONS ON PAYMENT SYSTEMS

501-N NATIONAL RETAIL PAYMENT SYSTEM

Adoption of NRPS Framework. It is the policy of the Bangko Sentral to promote the establishment of a safe, efficient, and reliable retail payment system in the Philippines. Towards this end, the Bangko Sentral adopts the National Retail Payment System (NRPS) Framework consistent with Bangko Sentral regulations on risk management in light of the complex interplay of different types of risk arising from the rapid evolution of retail payment activities of Bangko Sentral supervised financial institutions (BSFIs). The NRPS vision will help achieve higher economic growth and enhance the overall competitiveness of our economy.

In carrying out retail payment-related activities, BSFIs shall adhere to the NRPS Framework as set forth in this Section and *Appendix N-15*. This framework requires BSFIs to ensure that the retail payment systems they participate in demonstrate sound risk management, and effective and efficient interoperability. BSFIs shall comply with Bangko Sentral rules and regulations, particularly on information technology, consumer protection, and anti-money laundering/combating the financing of terrorism (AML/CFT).

Definition of terms.

- a. *Automated Clearing House (ACH)* – a multilateral agreement among ACH participants governing the clearing and settlement of payment orders for a specific payment stream.
- b. *ACH Participant* – a financial institution duly licensed by the Bangko Sentral that is a PSMB member, and undertakes clearing in and is a signatory to at least one (1) ACH.
- c. *ACH Participant Group (ACH-PG)* – a group organized by ACH participants for a payment stream or a group of similar payment streams for the purpose of approving and implementing the clearing rules and agreements applicable to a specific payment stream. It also liaises and consults with other parties in relation to clearing.
- d. *Channel* – the means by which an electronic financial product or service is delivered. *E.g.*, internet, phone, ATM.
- e. *Clearing* – the process of transmitting, reconciling and, in some cases, confirming payment orders prior to settlement, and the establishment of the final obligations for settlement.
- f. *Clearing Switch Operator (CSO)* – provides clearing switch services.
- g. *Direct clearing participant* – a financial institution that is: (a) duly licensed by the Bangko Sentral and is authorized to provide electronic financial and payment services; (b) engaged in holding of funds of customers in the form of accounts (bank account or electronic money account); (c) clears transactions through an ACH and is the participant ultimately responsible for obligations generated from cleared transactions; and (d) has a demand deposit account with the Bangko Sentral and a PhilPaSS member, or is sponsored into settlement by a qualified sponsor which is a member of PhilPaSS and maintains a DDA with the Bangko Sentral, to settle its clearing obligations.
- h. *Electronic payment* – synonymous to electronic fund transfer (EFT); refers to transfers of funds between two transaction accounts in the same or different BSFIs which are initiated and received using electronic devices and channels to transmit payment instructions. This excludes domestic remittance transaction under existing Bangko Sentral regulations.
- i. *Fund* – any unit of value that forms the consideration or object of transactions.
- j. *Interoperability* – enables financial products and services belonging to a particular scheme or business model to be used or interoperated between other schemes or business models usually of another institution. While interoperability often times require technical compatibility between systems, it can only take effect once commercial/business interconnectivity agreements have been completed.
- k. *National Retail Payment System (NRPS)* – a policy and regulatory framework that aims to establish a safe, efficient, and reliable retail payment system in the Philippines.
- l. *Payment instrument* – any instrument, whether tangible or intangible, that enables a person to transfer funds.
- m. *Payment order* – an order or message requesting the transfer of funds to the order of the payee.

- n. *Payment system* – the set of payment instruments, processes, procedures and participants that ensures the circulation of money or movement/transfer of funds.
- o. *Payment System Management Body (PSMB)* – a private industry-led self-governing body that is duly recognized by the Bangko Sentral to develop and enforce rules and agreements pertaining to members' clearing and settlement activities in accordance with the NRPS Framework and applicable Bangko Sentral regulations. The body shall be comprised of retail payment industry participants which are direct clearing participants. This body shall be a juridical entity that is not-for-profit and with the power to set and implement rules pertaining to members' clearing activities.
- p. *Point of Interaction (POI)* – a hardware and/or software whereby a customer or user is able to query or initiate a transaction from his account. Examples of POI include kiosk, smart device, etc.
- q. *Retail payments* – payments that meet at least one of the following characteristics: (i) the payment is not directly related to a financial market transaction; (ii) the settlement is not time-critical; (iii) the payer, the payee, or both are individuals or non-financial organizations; and (iv) either the payer, the payee, or both are not direct participants in the payment system that is processing the payment. This definition of retail payment includes person-to-person, person-to-business, business-to-person, business-to-business, person/business-to-government, and government-to-person/business payments.¹
- r. *Settlement* – an act that discharges obligations in respect of fund transfers between two (2) or more parties.
- s. *Sponsored into Settlement Member* – PSMB members who undertake settlement in at least one (1) ACH by engaging the settlement services of an ACH participant that can directly settle transactions through PhilPaSS.
- t. *Settlement sponsor bank or Sponsoring bank* – PSMB members who undertake settlement directly through PhilPaSS.
- u. *Working Group* – In the context of an ACH, it is a group organized for a specific payment stream under an ACH Participant Group. The ACH Working Group is responsible for drawing up, reviewing or revising the rules and agreements applicable to a specific ACH.

Purpose and scope. The NRPS Framework shall apply to all BSFIs which meet regulatory requirements and the criteria set on a per Automated Clearing House (ACH) basis under the NRPS framework.

The NRPS framework covers all retail payment-related activities, mechanisms, institutions and users. It applies to all domestic payments which are denominated in Philippine Peso (Php), and which may be for payments of goods and services, domestic remittances or fund transfers.

Retail payments under the NRPS Framework are payments that meet at least one of the following characteristics:

- a. the payment is not directly related to a financial market transaction;
- b. the settlement is not time-critical;
- c. the payer, the payee, or both are individuals or non-financial organizations; and
- d. either the payer, the payee, or both are not direct participants in the payment system that is processing the payment.

NRPS key principles. Under the NRPS framework, sound governance shall be performed by a payment system management body (PSMB), an industry-led self-governing body that is duly recognized and overseen by the Bangko Sentral. In the absence of a PSMB which conforms to the NRPS principles in *Appendix N-15*, the functions of providing sound governance to the retail payment system participated in by BSFIs shall be discharged by the Bangko Sentral. Clearing switch operators shall not participate in the governance of the payment system.

All clearing shall be done within the NRPS governance structure, wherein exclusive bilateral clearing arrangements are not allowed.

Non-discriminatory participation shall be espoused in the retail payment system. Hence, all BSFIs are highly encouraged to join the NRPS governance structure provided they meet the qualification criteria.

A reasonable market-based and transparent pricing mechanism shall be adopted by all BSFIs participating in the NRPS governance structure.

Further details on the key principles are embodied in the NRPS Framework shown in *Appendix N-15*.

¹ Developing a comprehensive National Retail Payments Strategy, Financial Infrastructure Service Line Payment Systems Policy and Research, World Bank, October 2012, available at http://siteresources.worldbank.org/FINANCIALSECTOR/Resources/Developing_a_comprehensive_national_retail_payments_strategy_for_GPW_10_20%28v1%29.pdf.

Specific rules applicable to transactions performed under the NRPS framework. The following rules shall apply to retail payment transactions which are cleared and settled in accordance with the NRPS Framework:

- a. Minimum requirements to offer Electronic Payment and Financial Services (EPFS). EPFS shall require notification to or approval by the Bangko Sentral in accordance with Sec. 401-N. To offer EPFS, BSFIs shall conform to the following requirements:
 - (1) BSFIs shall make electronic payments available in all its delivery channels whenever applicable;
 - (2) BSFIs shall enable its clients to move/receive funds to/from accounts with other BSFIs, or, at a minimum, receive funds. Movement of funds between BSFIs shall be carried out through participation in an ACH;
 - (3) BSFIs shall immediately credit the account of its clients after receipt of clearing advice; and
 - (4) BSFIs shall conform to Sec. 401-N, the IT Risk Management Standards and Guidelines on electronic banking, electronic payment, electronic money and other electronic products and services provided in *Appendix Q-66*.
- b. Fees on transactions. The BSFI's board of directors shall adopt a policy on the imposition of any fee on electronic payment transactions. The policy shall include the basis and quantitative support for the setting of fees and rationalization of the fee structure or amount. Imposition of fees for transactions performed by BSFIs that meet the requirements in Item "a" of this Section shall be consistent with the following:
 - (1) On consumer pricing-
 - (a) BSFIs shall adopt reasonable and fair market-based pricing models, which do not arise from agreements with other BSFIs to fix the price of product or service delivery.
 - (b) The service fees for electronic payments are expected to be lower than the fees collected from transactions made manually or over-the-counter (OTC) as electronic payments are considered to provide more efficient and cost-effective means of delivering service.
 - (c) The recipient shall not pay for electronic crediting to recipient's account and the recipient shall receive the amount in full. Such account to account fund transfers shall not be considered as domestic remittance transactions under Sec. 202-N.
 - (2) The BSFI shall disclose to the Bangko Sentral the details of all fees that will be charged to the client. This will be posted in an electronic bulletin board of fees for transactions performed under the NRPS framework. The bulletin board shall be maintained by the Bangko Sentral in its website for enhanced transparency and competitiveness.
- c. Anti-Money Laundering Requirements. All BSFIs shall observe applicable AML/CFT requirements under Part Six of the MORNBI for all transactions performed under the NRPS framework. As part of on-going monitoring of customers and their transactions, the following rules shall apply to transactions performed under the NRPS framework by BSFIs that meet the requirements in Item "a" above:
 - (1) The *originating institution (OI)* shall be responsible for monitoring, including appropriate watchlist screening or monitoring, its own client's transactions. It is the responsibility of the OI to ensure that the account name of the source account and the amount are consistent with the Sender Name and the amount indicated in the Payment Instruction sent by the OI.
 - (2) The *receiving institution (RI)* shall be responsible for monitoring, including appropriate watchlist screening or monitoring, its own client's transactions. It is the responsibility of the RI to ensure that the actual account number credited and the amount are consistent with the Beneficiary Account Number and the amount indicated in the Payment Instruction received by the RI.
 - (3) On the basis of the above, account number matching will suffice for domestic account-to-account electronic payments. OIs and RIs shall ensure that customers are informed that account number matching will suffice to implement a transaction, and OIs and RIs shall be held free and harmless from liability for their reliance on account number matching.
- d. BSFIs participating in the NRPS governance structure are required to comply with existing regulations of the Bangko Sentral.

Reports. BSFIs participating in the NRPS governance structure shall comply with requirements, which will be covered by a separate issuance.

Examination of BSFIs. BSFIs shall make available all policies, procedures and other documents/information related to this Section during the on-site examination, as well as provide copies thereof when a written request is made by the Bangko Sentral.

Sanctions. Consistent with Sec. 002-Q, the Bangko Sentral may deploy enforcement actions to promote adherence to the requirements set forth in Sec. 501-N and bring about timely corrective actions. The Bangko Sentral may issue directives to enforce compliance with the NRPS Framework or impose sanctions to limit the level of or suspend any business activity that has adverse effects on the safety and soundness of the BSFI, among others.

Any violation of this Section shall subject the BSFI and/or its directors, officers and/or employees to the monetary and non-monetary sanctions under Section 37 of Republic Act (R.A.) No. 7653, including but not limited to the following depending on the gravity of the violation committed and the circumstances attendant thereto:

- a. Suspension of offering new electronic financial products and services;
- b. Suspension/revocation of authority to provide electronic financial products and services; and
- c. Suspension/revocation of authority to settle through the Philippine Payments and Settlements System.

(Circular Nos. 1033 dated 22 February 2019, 1022 dated 26 November 2018, and 980 dated 6 November 2017)

502-N SETTLEMENT OF INSTANT RETAIL PAYMENT

Policy Statement. It is the thrust of the Bangko Sentral to ensure efficiency of payment systems in the country. In line with this thrust, the Bangko Sentral requires Bangko Sentral-Supervised Financial Institutions (BSFIs) participating in an automated clearing house (ACH) for instant retail payments to ensure that this ACH provides for certainty of settlement of the multilateral clearing obligations of the clearing participants. The settlement scheme agreed upon by the clearing participants shall form an integral part of the comprehensive credit risk management for instant retail payment services.

For the purpose of this Section, an instant retail payment, otherwise known as fast payment, is defined as an electronic payment in which the transmission of the payment message and the availability of “final” funds to the payee occur in real time or near-real time on as near to a 24-hour and seven-day (24/7) basis as possible¹. Moreover, as used in this Section, clearing participants shall refer to direct clearing participants.

Minimum requirements for the operation of a settlement mechanism for instant retail payments. The settlement mechanism for instant payments shall meet the following minimum requirements:

- a. A clearing participant or its settlement sponsor shall maintain with the Bangko Sentral a demand deposit account (DDA) which shall be used specifically for the settlement of the clearing participant’s net clearing obligations arising from instant retail payments;
- b. The clearing participant or its settlement sponsor shall prefund the settlement of its net clearing obligation through the DDA stated above, ensuring that such account can sufficiently cover said obligation at any point during a settlement cycle. When prefunding, the clearing participant/settlement sponsor shall consider increasing the fund in its account for longer settlement cycles such as during weekends and holidays;
- c. The clearing participants shall agree on thresholds which shall be the bases of the Clearing Switch Operator (CSO) to execute a notification process that enables the clearing participants to efficiently monitor movements in their instant retail payment positions, and at the same time alerts them to place additional funds in their DDAs particularly when the ultimate threshold is breached;
- d. The service contract between the clearing participants and the CSO shall include, at a minimum, the following provisions:
 - (1) The CSO shall record the clearing participants’ DDA balances obtained from the Bangko Sentral at the start of every settlement cycle and monitor the clearing participants’ net clearing obligations against their respective account balances;
 - (2) Should the instant retail payments position (Funds in the DDA minus net clearing obligation/withdrawal from the DDA) of any of the clearing participants breach their agreed-upon thresholds, the CSO shall immediately send an electronic notification to the concerned clearing participant; and
 - (3) Any instant retail payment which is not fully covered by the corresponding DDA or which will result in a negative instant retail payments position shall be rejected by the CSO. A clearing participant with an instant retail payments position of zero shall be suspended from carrying out further outgoing instant payment transactions until said participant registers a positive position on account of its incoming payment transactions and/or subsequent deposits into its DDA;

¹ Based on the paper “Fast payments-Enhancing the speed and availability of retail payments” of the Committee on Payments and Market Infrastructures, Bank for International Settlements

- e. Should the clearing participants determine that the funds in their DDAs for instant retail payments are excessive after taking into account their highest potential clearing obligations, the clearing participants shall be allowed to withdraw from their DDAs to enable them to make optimal use of their funds; and
- f. The Bangko Sentral shall not be precluded from deploying applicable regulatory enforcement actions to concerned clearing participants notwithstanding the inclusion of sanctions in the ACH for non-compliance with the clearing participants' agreed-upon settlement mechanism.

Risk management. In view of the risks involved in the prescribed settlement mechanism for instant retail payments, including the possibility that a rejected payment transaction of a client due to prefunding issues may give rise to serious reputational damages to the concerned clearing participant, the BSFIs participating in the instant retail payment ACH shall ensure that they have the necessary operational and liquidity risk management measures in place. Such measures shall be designed in accordance with the guidelines provided under Sec. 125-N on Operational Risk Management, and Sec. 124-N on Liquidity Risk Management.

Supervisory enforcement action. Consistent with Section 002-Q, the Bangko Sentral may deploy enforcement actions to promote compliance with the requirements set forth in this Section and ensure timely implementation of preventive or corrective measures as needed. As part of its enforcement actions, the Bangko Sentral may issue directives or impose sanctions which limit the level of or suspend any business activity that adversely affects the safety and soundness of a BSFI.

(Circular No. 1000 dated 23 April 2018)

503-N PARTICIPATION IN AUTOMATED CLEARING HOUSES (ACHS)

BSFIs that have been licensed to offer funds transfer services shall make these services interoperable by participating in an ACH. Prior to its participation, a BSFI shall observe the following guidelines:

- a. Secure a Confirmation of Eligibility (COE) by submitting to the Bangko Sentral through the appropriate supervising department of the Bangko Sentral a letter of intent to participate in an identified ACH. This letter shall be accompanied by a certification (*Annex A of Appendix Q-89*) signed by the president (or any officer of equivalent rank and function) and chief compliance officer (CCO).

If the BSFI is not yet a member of the Payment System Management Body (PSMB), it shall also indicate in its letter that it intends to become a member of this body;

- b. Submit the following minimum documentary requirements to the PSMB duly recognized by the Bangko Sentral.
 - (1) Valid COE. A COE shall be valid for a period of six (6) months from date of issuance;
 - (2) Corporate Secretary's Certificate (or equivalent document in the case of foreign bank branches) on the approval of the board of directors (or equivalent management committee in the case of foreign bank branches) of the participation of the BSFI in the ACH; and
 - (3) Copy of the agreement with the bank sponsoring the BSFI into settlement, if applicable; and
- c. Comply with any other requirements set by the PSMB or provided in the ACH.

(Circular No. 1033 dated 22 February 2019)

PART SIX

ANTI-MONEY LAUNDERING REGULATIONS

601-N ANTI-MONEY LAUNDERING REGULATIONS

Covered persons, including their subsidiaries and affiliates, shall comply with the provisions of Part 9 of Q-Regulations, R.A. No. 9160 [Anti-Money Laundering Act (AMLA) of 2001], as amended, and its Implementing Rules and Regulations (IRR).

Sanctions and penalties. The provisions of Part 9 of the Q-Regulations on sanctions and penalties are applicable for violation of the provisions of the AMLA.

(Circular No. 950 dated 15 March 2017)

602-N VALID IDENTIFICATION CARDS FOR FINANCIAL TRANSACTIONS

The provisions of Part 9 of the Q-Regulations on valid identification documents shall apply to all types of financial transactions by NBFIs, including financial transactions involving OFWs.

PART SEVEN

FINANCIAL CONSUMER PROTECTION

701-N FINANCIAL CONSUMER PROTECTION FRAMEWORK¹

Policy Statement. The Framework is in line with the responsibility of the Bangko Sentral under Section 3 of R.A. No. 7653, as amended by R.A. No. 11211, to promote broad and convenient access to high quality financial services and consider the interest of the general public. Bangko Sentral aims to ensure that financial service providers conduct ethical business practices and do not engage in practices that may cause harm to the consumer as well as consider consumer outcomes in the conduct of their business. Practices that harm consumers introduce risks not only at the level of the financial institution but also to the overall health of the financial sector particularly through decreased public trust and confidence. A well-informed and protected consumer can better benefit from the financial services received and be a more responsible client.

The Framework establishes the guidelines and expectations from Bangko Sentral supervised financial institutions (BSFIs) to institutionalize consumer protection as an integral component of corporate governance and culture as well as risk management. The objective of the Framework is for BSFIs to manage the risks of financial loss that are detrimental to the financial consumers or consumer protection risks inherent to the BSFIs' operations that, if not properly managed, would affect other relevant risks, such as compliance, reputational, legal, operational and credit risks.

Scope and Applicability. The Framework applies to all BSFIs in the conduct of their business. The BSFIs' adoption of the Framework shall be proportionate to their asset size, structure, nature of products and services, and complexity of operations.

Consumer protection risk management system (CPRMS). A BSFI should have a CPRMS that is integrated into the BSFI's enterprise-wide risk management processes and risk governance framework. The CPRMS includes the governance structure, policies, processes, measurement and control procedures to ensure that consumer protection risks are identified, measured, monitored, and mitigated. A carefully devised, implemented, and monitored CPRMS provides the foundation for ensuring the BSFI's adherence to consumer protection standards of conduct and compliance with consumer protection laws, rules and regulations, thereby, ensuring that identified risks to the BSFI and associated risk of financial harm or loss to consumers are properly managed.

Consumer Protection Oversight.

- a. **Responsibilities of the Board of Director (Board).** The Board shall be primarily responsible for approving and overseeing the implementation of the BSFI's CPRMS. The Board's responsibilities shall include the following:
 - (1) Approve the CPRMS and consumer assistance mechanism (CAM) that takes into consideration the BSFI's business model, market, product lines, and relationships with third parties that may give rise to consumer protection risks;
 - (2) Promote a culture of ethical behavior and adherence to the highest standards of fair and responsible dealing with consumers;
 - (3) Ensure that adequate information and actions taken are reported on a regular basis in terms of the measurement of consumer protection related risks, reports from the CAM as well as other material consumer related developments that will impact the BSFI;
 - (4) Ensure the adequate provision of resources and effective implementation of personnel training and competency requirements;
 - (5) Approve remuneration and compensation packages structured to encourage responsible business conduct, fair treatment and avoidance/mitigation of conflicts of interest; and
 - (6) Review periodically the implementation and effectiveness of the CPRMS including how findings are reported and whether the audit mechanisms are in place to enable adequate oversight, and put in place a regular mechanism to review the relevance of the CPRMS in case of changes in the BSFI business model and/or operating environment.

¹ BSFIs shall be given six (6) months from 26 September 2019 to: (1) perform a gap analysis of their current consumer protection practices vis-i-vis this Section and (2) propose an action plan duly approved by the Board of Directors to achieve full compliance within a reasonable period of time but in no case longer than one (1) year from 26 September 2019.

- b. *Responsibilities of Senior Management.* The Senior Management shall be responsible for ensuring that the practices of the BSFIs are aligned with the approved consumer protection policies and risk management system and consistently displayed throughout the BSFI's place of business particularly across all business units that deal directly with consumers. In this regard, the Senior Management shall:
- (1) Ensure that approved CPRMS and CAM policies and procedures are clearly documented, properly understood and appropriately implemented across all levels and business units.
 - (2) Establish an effective monitoring and management information system to regularly measure, aggregate, and analyze consumer related issues to determine the level of consumer protection risk. An appropriate and clear reporting and escalation mechanism should also be integrated in the risk governance framework. The management information system shall be able to:
 - (a) Provide adequate information on the performance and quality of the BSFI's CAM that allows for identification of emerging consumer issues and root cause analysis;
 - (b) Determine the level of consumer protection risk exposure through assessment of its implementation of the Consumer Protection Standards of Conduct (i.e. transparency and disclosure, protection of client information, fair treatment, effective recourse and financial learning and awareness);
 - (c) Identify and monitor, in a timely manner, consumer protection risk exposures approaching risks of loss to financial consumers, legal and reputational risk as well as other related risks; and
 - (d) Identify and assess emerging or increasing consumer risks that affect the BSFI such as through social media monitoring and market monitoring.
 - (3) Ensure that adequate systems and controls are in place to promptly identify issues that affect the consumer across all phases of the relationship with the consumer;
 - (4) Ascertain that weaknesses in the consumer protection practices or consumer protection emerging risks are addressed and corrective actions are taken in a timely manner; and
 - (5) Ensure observance of expectations and requirements prescribed under relevant regulations on compliance and internal audit.

(Circular Nos. 1048 dated 6 September 2019, 972 dated 22 August 2017, 890 dated 02 November 2015, and 857 dated 21 November 2014)

702-N POLICIES AND PROCEDURES, CONSUMER PROTECTION STANDARDS OF CONDUCT

The CPRMS and CAM should ensure systematic application of policies and procedures, including the Consumer Protection Standards of Conduct (Standards). The Standards should reflect the core principles, which BSFIs must observe at all times in their dealings with financial consumers: *Provided, further*, That these Standards should be embedded into the corporate culture of the BSFI, enhancing further its defined governance framework while addressing conflicts that are inimical to the interests of the financial consumer.

Disclosure and transparency.¹ BSFIs must ensure that their consumers have a reasonable holistic understanding of the products and services, which they may be acquiring or availing. In this context, full disclosure and utmost transparency, to the extent allowed under applicable laws and regulations, are the critical elements that empower the consumer to make comparison and informed financial decisions. This is made possible by providing the consumer with ready access to information that accurately represents the nature and structure of the product or service, its terms and conditions, as well as its fundamental benefits and risks.

The BSFI demonstrates adherence to appropriate and adequate disclosure and transparency when:

- a. The manner of disclosure, whether in advertising materials, terms and conditions, and other forms of communication, are clear, concise, accurate, understandable and not misleading.
- b. Information are disclosed before, during and after a sale of a financial product or service and during key stages of the relationship with the consumer; especially if there are any changes in the terms and conditions.
- c. Terms and Conditions contain all significant provisions of the financial product or service giving prominence to key features/facts. It includes the following with specific details relating to the type of product or service being offered:

¹ This Section should be read in conjunction with existing regulations related to disclosure and transparency of key information on loan and investment products and services, regulations on the conduct of treasury and trust activities of BSFIs and regulations governing fees on retail bank product/services and dormant deposit accounts.

- (1) Information on risks, return, possible warnings, any waiver of rights and limitations of liabilities, consumer's rights and responsibilities, consequences of failure to meet obligations, rights and responsibilities of the BSFI, involvement of authorized agents, any conflict of interest by BSFI staff, cancellation and product portability, among others;
 - (2) The full price or cost to the consumer including all interest, fees, charges, and penalties. The terms and conditions must clearly state whether interest, fees, charges, and penalties can change over time. The method for computing said interest, fees, charges, and penalties shall be disclosed consistent with existing regulations; and
 - (3) For more complex products, such as investment products, the key features as well as costs and risks shall be highlighted in a key facts statement or Product Highlight Sheet (PHS). The PHS shall enable comparison with other products and shall be provided at no additional cost. Before the consumer signs any contract, the BSFI should ensure that the consumer has freely signed a statement to the effect that the consumer has duly received, read, and understood the PHS.
- d. Advertising materials are not false, misleading, or contain deceptive statements or omit key information that may materially and/or adversely affect the decision of the consumer to avail of a service or acquire a product. BSFIs are responsible for all the statements made in said advertising materials.
 - e. The terms and conditions, advertising materials and other communications contain the following:
 - (1) Contact and information of the BSFI's internal complaints handling unit; and
 - (2) Statement that the BSFI is a regulated entity and contact information of the regulator.
 - f. Communication of the BSFI staff is conducted in such a manner that clients can understand the terms of the contract and their rights and obligations, taking into consideration client segments that may have financial literacy limitations.
 - g. Adequate time is given to consumers to review, ask questions and receive information to fully understand the terms and conditions prior to signing the contract or executing the transaction. BSFI should ensure that documents signed by the consumer are completely filled out and have no blank terms. The consumer should be given a copy of each of the documents he/she signed (including, but not limited to the contract) with all terms and conditions. The consumer should also be provided with proof of the transaction, whether printed or in electronic copy at the option of the consumer, immediately after the transaction has been completed.
 - h. Statements of Account or Billing Statements are provided regularly in a convenient manner to the consumer, or through the channel through which the product was sold, commensurate to the type of product and terms.
 - i. Notifications in writing (or electronic form) and through other channels are provided to the consumer with regard to any of the key features and terms of the product, the nature and extent of the change and its potential impact on the consumer. This notification requirement also apply to similar changes to any condition/s specified in the contract. Nonetheless, this does not cover financial products that have been identified at the inception to be subject to floating interest rate all throughout their life cycle as long as basis has not changed.

The principles of the above standards for disclosure and transparency shall be applicable even to products and services offered electronically as well as to products catering to different market segments with particular consideration for segments that may have limited financial literacy.

Protection of client Information.¹ Financial consumers have the right to expect that their financial transactions, as well as relevant personal information disclosed in the course of a transaction, are kept confidential and are secured. Towards this end, BSFIs must ensure that they have well-articulated information security guidelines, well-defined protocols, a secure database, and periodically re-validated procedures in handling the personal information of their financial consumers. This should be an end-to-end process that should cover, among others, the array of information that will be pre-identified and collected, the purpose and manner of gathering each information, the Information Technology (IT)-security infrastructure of the BSFI, and the protocols for disclosure, both within the BSFI and especially to third parties.

The BSFI demonstrates the ability to protect client information if it is able to:

- a. Have a written privacy policy to safeguard its customers' personal information. This policy should govern the gathering, processing, use, distribution, storage, and eventual disposal of client information and the identification of levels of permissible access to consumer's data for employees. The BSFI should ensure that privacy policies and sanctions for violations are implemented and strictly enforced.
- b. Ensure that privacy policies are regularly communicated throughout the organization.

¹ This Section should be read in conjunction with existing regulations on IT Risk Management System and laws and regulations on data privacy.

- c. Have appropriate systems in place to protect the confidentiality and security of the personal data of its consumers against any threat or hazard to the security or integrity of the information and against unauthorized access. This includes a written information security plan that describes its program to protect consumer personal information. The plan must be appropriate to its size and complexity, nature and scope of its activities, and the sensitivity of customer information it handles.
- d. Have a strong IT System in place to protect the confidentiality, security, accuracy, and integrity of customer's personal information. This includes network and software design, as well as information processing, database storage, transmission, retrieval, and disposal. Security must be maintained throughout the life-cycle of consumer information, from data entry to disposal, and provide clear policies and procedures on data breaches including mechanisms to compensate consumers.
- e. Subject to the provisions of existing laws and regulations on data privacy, send written communication to its consumers informing and explaining how it will use and share the consumer's personal information.
- f. Obtain the consumers' written consent, unless in situations allowed as an exception by law or Bangko Sentral-issued regulations on confidentiality of consumer's information, before sharing consumers' personal information with third parties such as credit bureau, collection agencies, marketing and promotional partners, financial technologies that use a varied range of consumer data and other relevant external parties.
- g. Provide access to consumers to the information shared and allow consumers to challenge the accuracy and completeness of the information and have these amended as appropriate.

Fair treatment. This principle ensures that financial consumers are treated fairly, honestly, and professionally at all stages of its relationship with the BSFI. BSFIs shall adopt mechanisms to safeguard the interest of their consumers which shall include rules regarding ethical staff behavior, acceptable selling practices, fair and equitable terms and conditions, provision of products and services appropriate to the capacity and risk appetite of the consumers, among others, and incorporate the same in their policies and procedures, control functions and agreements with outsourced third parties.

The BSFI demonstrates the principle of fair treatment towards financial consumers if the policies and practices observe the following:

- a. Terms and conditions are not unfair in that there is significant imbalance in the parties' rights and obligations arising under the contract, to the detriment of the consumer.
- b. Product and services are offered with skill, due care and diligence and shall consider the consumers' financial situation, needs, capabilities and overall risk profile. Adequate product suitability and affordability mechanisms shall be in place subject to existing rules and regulations. If the requested products are of higher risk rating than a consumer's risk tolerance assessment results, the BSFI should draw the consumer's attention to the risk mismatch and provide a written disclosure of consequences which is accepted by the client. Product bundling should also take into consideration the product suitability and should not unduly limit consumer choice.
- c. Adequate product approval are in place to ensure that products and services are fit for the targeted consumer. Product development, review, distribution and after sales process shall take into consideration the risks to consumers.
- d. BSFIs do not unduly limit a consumer's ability to cancel or transfer the product to another provider as disclosed in the terms and conditions. As may be appropriate, BSFIs shall provide the consumer who is a natural person with a cooling off period subject to the following conditions:
 - (1) The "cooling-off" period shall be for a reasonable number of days, of at least two (2) banking days, immediately following the submission of any agreement or contract, particularly for financial instruments with a remaining term of at least one (1) year: *Provided*, That consumers with aggregate investment size of P500 thousand and above are excluded from invoking the cooling off period: *Provided, further*, That securities "traded" or "to be traded" are exempt from the coverage of the cooling-off period.
 - (2) Consumers may be permitted to cancel the agreement without penalty of any kind upon his or her written notice to the BSFI during the cooling-off period. The BSFI may however collect or recover reasonable amount of processing fees. Conditions and fees for products with automatic right to cooling off must be appropriately determined, discussed and explained to consumers.
- e. BSFI staff treats consumers with professional competence and in a manner that is fair and responsible. The BSFI shall:
 - (1) Incorporate in its Code of Conduct (Code) the values and standards that uphold protection of consumers and embed the Consumer Protection Standards of Conduct; and have process in place to detect, respond to and enforce sanctions on violations thereof.

- (2) Align its recruitment and training policies around professional, fair and responsible treatment of clients, for instance:
 - (a) BSFI staff receives adequate training suitable for the complexity of the products or services they sell and are able to explain the key features of the product, including statutory and regulatory requirements.
 - (b) BSFI staff does not use deceptive or high pressure/aggressive sales techniques and should not force clients to sign contracts or rush into a financial deal without the benefit of shopping around.
 - (c) BSFI staff involved in collections, as well as agents contracted for the purpose, receives training in acceptable debt collection practices and loan recovery procedures consistent with existing relevant regulations.
 - (d) BSFI staff does not employ practices that discriminate or take advantage of difficulties faced by, vulnerable groups such as the low-income earners, and persons with disability.
 - (e) Establish policies and procedures that aim to protect consumers' deposits and other assets against internal or external fraud or misuse and have mechanisms in place to manage and resolve actual conflicts of interest with respect to compensation policies that arise in the interaction between their staff and agents and their consumers and potential consumers.
- (3) Include ethical behavior, professional conduct, and quality of interaction with consumers as part of staff performance evaluations.
- (4) Ensure that the remuneration structure for staff of BSFI and authorized agent is in a manner that encourages responsible business conduct, fair treatment and avoidance/mitigation of conflicts of interest.
- (5) Perform appropriate due diligence before selecting the authorized agents/outsource parties taking into account the agents' integrity, professionalism, financial soundness, operational capability and capacity, and compatibility with the FI's corporate culture and implement controls to monitor the agents' performance on a continuous basis.

Effective recourse. Financial consumers should be provided with accessible, affordable, independent, fair, accountable, timely, and efficient means for resolving complaints with their financial transactions. BSFIs should have in place mechanisms for complaint handling and redress, and may employ various modalities or technological innovations.

The BSFI demonstrates the ability to provide effective recourse if it is able to:

- a. Establish an effective Consumer Assistance Management System (CAMS) designed to receive, record, evaluate, resolve, monitor and report consumer complaints, concerns, inquiries or requests to be implemented by a designated officer, unit, group or department commensurate to the size, structure, nature of products and services, and complexity of operations, ensuring that there is no conflict of interest.
- b. Establish, maintain and implement internal policies and practices for a reasonable and prompt handling of consumer concern.
- c. Make available a wide range of channels in which consumers can conveniently lodge their complaints, inquiries and requests; and put in place a dedicated helpdesk or hotline for the said purpose.
- d. Maintain a management information system for the complaints from consumers that allows for consolidation, comparison and analysis on a regular basis including investigating whether complaints indicate an isolated issue or a more widespread issue for consumers. This analysis and reports of consumer complaints must have clear reporting and escalation structure within the BSFI's risk governance framework. The complaints reports shall be submitted in accordance with the existing regulations.
- e. Establish clear policies on investigation, resolution and restitution of complaints and making the process clear to the consumer.
- f. Ensure that information on the consumer assistance channels and applicable timelines for handling concerns are published in the following:
 - (1) Terms and Conditions of a BSFI's product or service;
 - (2) Various channels of service delivery; and
 - (3) Conspicuous places within the premises of BSFIs and their branches/other offices.
- g. Provide for adequate resources to handle financial consumer complaints efficiently and effectively. Staff handling complaints should have appropriate experience, knowledge, and expertise. Depending on the BSFI's size and complexity of operation, a Senior staff member should be appointed to be in charge of the complaint handling process.

Financial education and awareness. Financial education initiatives give consumers the knowledge, skills, and confidence to understand and evaluate the information they receive and empower them to make informed financial decisions.

Because BSFIs deal directly with financial consumers, they have the reach, expertise, and established relationships ideal to deliver financial education, distinct and separate from information about their products. BSFIs should provide basic information on consumers' and the BSFI's rights and responsibilities.

BSFIs should demonstrate efforts at financial education, which may include digital literacy for products offered electronically, with the presence of programs whether as specific initiatives or as aspects embedded in their regular interface with consumers.

(Circular Nos. 1048 dated 06 September 2019, 1003 dated 16 May 2018, 930 dated 18 November 2016, 898 dated 14 January 2016, 890 dated 02 November 2015, and 857 dated 21 November 2014)

703-N ENFORCEMENT ACTIONS

Consistent with Sec. 002-Q, the Bangko Sentral may deploy enforcement actions to promote adherence to the Bangko Sentral Regulations on Financial Consumer Protection.

(Circular Nos. 1048 dated 06 September 2019, 890 dated 02 November 2015, and 857 dated 21 November 2014)

PART EIGHT

OTHER REGULATIONS

801-N FORWARD AND SWAP TRANSACTIONS

Non-Bank BSP Supervised Entities (NBBSEs) that may subsequently be authorized to engage in FX forwards and swaps as dealers shall be covered by the provisions under Sec. 621-Q.

802-N PHILIPPINE AND FOREIGN CURRENCY NOTES AND COINS

The rules and regulations that shall govern the treatment and disposition of counterfeit Philippine and foreign currency notes and coins, the reproduction and/or use of facsimiles of legal tender Philippine currency notes and coins, the replacement and redemption of legal tender Philippine currency notes and coins considered mutilated or unfit for circulation, and the treatment and disposition of Philippine currency notes and coins called in for replacement are provided in Sec. 1111-Q.

(Circular Nos. 890 dated 02 November 2015 and 829 dated 13 March 2014)

803-N PERSONAL EQUITY AND RETIREMENT ACCOUNT (PERA) MARKET PARTICIPANTS AND PERA INVESTMENT PRODUCTS

The guidelines on the qualification/accreditation of PERA Market Participants and PERA Investment Products which are being issued pursuant to R.A. No. 9505, also known as the PERA Act of 2008 (PERA Act), and its implementing Rules and Regulations (the PERA Rules) are provided in Sec. 1121-Q.

(Circular Nos. 890 dated 02 November 2015 and 860 dated 28 November 2014)

804-N BATAS PAMBANSA BLG. 344 – AN ACT TO ENHANCE THE MOBILITY OF DISABLED PERSONS BY REQUIRING CERTAIN BUILDINGS, INSTITUTIONS, ESTABLISHMENTS AND PUBLIC UTILITIES TO INSTALL FACILITIES AND OTHER DEVICES

In order to promote the realization of the rights of disabled persons to participate fully in the social life and the development of the societies in which they live and the enjoyment of the opportunities available to other citizens, no license or permit for the construction, repair or renovation of public and private buildings for public use, educational institutions, airports, sports and recreation centers and complexes, shopping centers or establishments, public parking places, workplaces, public utilities, shall be granted or issued unless the owner or operator thereof shall install and incorporate in such building, establishment or public utility, such architectural facilities or structural features as shall reasonably enhance the mobility of disabled persons such as sidewalks, ramps, railings and the like. If feasible, all such existing buildings, institutions, establishments, or public utilities may be renovated or altered to enable the disabled persons to have access to them.

805-N REPUBLIC ACT NO. 9994 – AN ACT GRANTING ADDITIONAL BENEFITS AND PRIVILEGES TO SENIOR CITIZENS, FURTHER AMENDING REPUBLIC ACT NO. 7432 OF 1992, AS AMENDED BY REPUBLIC ACT NO. 9257 OF 2003

To be able to give full support to the improvement of the total well-being of the elderly and their full participation in society, and to motivate and encourage them to contribute to nation building, senior citizens shall be provided with express lanes in all branches and offices of NBFIs. If the provision of express lanes is logistically impossible in any particular branch or office of any NBFI, said branch or office shall ensure that senior citizens are accorded priority service. The provision of express lanes and/or priority service shall be made known to the general public through a clearly written notice prominently displayed in the transaction counters of all NBFI branches and/or offices.

806-N FINES AND OTHER CHARGES

The following regulations shall govern imposition of monetary penalties on NBFIs, their directors and/or officers and the payment of such penalties or fines and other charges by these entities.

Guidelines on the imposition of monetary penalties; payment of penalties or fines. The following are the guidelines on the imposition of monetary penalties on NBFIs, their directors and/or officers and the payment of such penalties or fines and other charges by these entities:

- a. *Definition of terms.* For purposes of the imposition of monetary penalties, the following definitions are adopted:
 - (1) *Continuing offenses/violations* are acts, omissions or transactions entered into, in violation of laws, Bangko Sentral rules and regulations, Monetary Board directives, and orders of the Governor which persist from the time the particular acts were committed or omitted or the transactions were entered into until the same

were corrected/rectified by subsequent acts or transactions. They shall be penalized on a per calendar day basis from the time the acts were committed/omitted or the transactions were effected up to the time they were corrected/rectified.

- (2) *Transactional offenses/violations* are acts, omissions or transactions entered into in violation of laws, Bangko Sentral rules and regulations, Monetary Board directives, and orders of the Governor which cannot be corrected/rectified by subsequent acts or transactions. They shall be meted with one (1)-time monetary penalty on a per transaction basis.
 - (3) *Continuing penalty* refers to the monetary penalty imposed on continuing offenses/violations on a per calendar day basis reckoned from the time the offense/violation occurred or was committed until the same was corrected/rectified.
 - (4) *Transactional penalty* refers to a one (1)-time penalty imposed on a transactional offense/violation.
- b. *Basis for the computation of the period or duration of penalty.* The computation of the period or duration of all penalties shall be based on calendar days. For this purpose the terms “*per banking day*”, “*per business day*”, “*per day*” and/or “*a day*” as used in this Manual, and other Bangko Sentral rules and regulations shall mean “*per calendar day*” and/or “*calendar day*” as the case may be.
 - c. *Additional charge for late payment of monetary penalty.* Late payment of monetary penalty shall be subject to an additional charge of six percent (6%) per annum to be reckoned from the business day immediately following the day said penalty becomes due and payable up to the day of actual payment. The penalty approved by the Governor/MB to be imposed on the NBFI, its directors and/or officers shall become due and payable fifteen (15) calendar days from receipt of the Statement of Account from the Bangko Sentral. For banks which maintain DDA with the Bangko Sentral, penalties which remain unpaid after the lapse of the fifteen (15) day period shall be automatically debited against their corresponding DDA on the following business day without additional charge. If the balance of the concerned NBFI’s DDA is insufficient to cover the amount of the penalty, said penalty shall already be subject to an additional charge of six percent (6%) per annum to be reckoned from the business day immediately following the end of said fifteen (15)-day period up to the day of actual payment.
 - d. *Appeal or request for reconsideration.* A one (1)-time appeal or request for reconsideration on the monetary penalty approved by the Governor/Monetary Board to be imposed on the NBFI, its directors and/or officers shall be allowed: *Provided*, That the same is filed with the appropriate supervising department of the Bangko Sentral within fifteen (15) calendar days from receipt of the Statement of Account billing letter. The appropriate supervising department of the Bangko Sentral shall evaluate the appeal or request for reconsideration of the NBFI individual and make recommendations thereon within thirty (30) calendar days from receipt thereof. The appeal or request for reconsideration on the monetary penalty approved by the Governor/Monetary Board shall be elevated to the Monetary Board for resolution/decision. The running of the penalty period in case of continuing penalty and/or the period for computing additional charge shall be interrupted from the time the appeal or request for reconsideration was received by the appropriate supervising department of the Bangko Sentral up to the time that the notice of the Monetary Board decision was received by the NBFI/individual concerned.

PART NINE

REGULATIONS SPECIFIC TO MONEY SERVICE BUSINESS OPERATIONS

901-N MONEY SERVICE BUSINESS OPERATIONS

The following rules and regulations shall govern the operations and reporting obligations of non-bank entities engaged in remittance, money changing, and/or foreign exchange dealing, pursuant to Section 3 of R.A. 7653, as amended, (The New Central Bank Act), Section 3, in relation to Section 11 of R.A. No. 9160 [The Anti-Money Laundering Act (AMLA) of 2001], Section 3(c) of R.A. No. 10168 (The Terrorism Financing Prevention and Suppression Act of 2012), and their implementing rules and regulations, and Section 80 of R.A. No. 7653 (The New Central Bank Act), as amended (The New Central Bank Act).

Definition of terms.

- a. *Remittance and Transfer Company (RTC)* – refers to any entity that provides Money or Value Transfer Service (MVTS). *MVTS* refers to financial services that involve the acceptance of cash, cheques, other monetary instruments or other stores of value and the payment of a corresponding sum in cash or other form to a beneficiary by means of a communication, message, transfer, or through a clearing network. This includes the following:
- (1) *Remittance Agent (RA)* – refers to any entity that operates a remittance business network which includes any or combination of the following:
- (a) *Remittance Direct Agent (RDA)* – refers to any entity that is covered by a direct contracted remittance agreement or similar agreement to act in behalf of a third party engaged in remittance business.
- (b) *Remittance Network Provider (RNP)* – refers to any entity that provides a network of Remittance Sub-Agents to perform remittance services to RTC.
- (c) Such other similar entities as may be determined by the Monetary Board.

For the purpose of this Section, entities functioning as an RA as herein defined shall be registered as such, notwithstanding whether they are also acting as Remittance Sub-Agent (RSA).

- (2) *Remittance Platform Provider (RPP)* – refers to any entity that provides a shared or common platform/IT infrastructure and maintains settlement accounts in order to provide funds for remittance transactions within its network.

Foreign RPP shall do business in the Philippines through its locally incorporated subsidiary: *Provided*, That an existing foreign RPP doing business in the Philippines shall have two (2) years within which to incorporate a local subsidiary: *Provided, further*, That in the meantime that the foreign RPP does not have a locally incorporated subsidiary, it shall constitute a resident agent which shall, among others, be liable for all its obligations in the Philippines.

- (3) *E-Money Issuer (EMI)* – refers to any entity authorized by the Bangko Sentral under Sec. 702 of the MORB which provides money transfer or remittance services using electronic stored money value system and similar digital financial services.
- b. *Remittance Sub-Agent (RSA)* – refers to any person authorized by the RTC to perform certain relevant undertakings in the remittance business. This includes any person that is allowed by an RDA, RANP, and/or EMI to do any part of the remittance business in their behalf.

An RSA shall no longer be required to register with the Bangko Sentral. However, the RTC shall comply with the notification requirements as provided in Sec. 901-N (*Notification requirements*, Item “(b)”).

- c. *Money Changer (MC)/Foreign Exchange Dealer (FXD)* – refers to any entity who engages in money changing/foreign exchange dealing business. This includes authorized agent banks’ subsidiary/affiliate forex corporations (AAB-forex corps), among others.
- d. *Remittance business* – refers to the transferring of funds or facilitating the movement of funds or monetary instruments from the sender or originator to a receiver or beneficiary locally and/or internationally and undertaken by any financial institution.
- e. *Money changing/Foreign exchange dealing* – refers to the buying or selling of currencies in exchange for another currency.
- f. *Monetary instrument* – refers to:
- (1) Coins or currency of legal tender of the Philippines, or of any other country;

- (2) Drafts, checks, and notes; and
 - (3) Other similar instruments where title thereto passes to another by endorsement, assignment or delivery.
- g. *Head office* – refers to the principal or main place of business of an RTC/MC/FXD.
 - h. *Branch* – refers to any company-owned office or place of business other than the Head Office of an RTC/MC/FXD.
 - i. *RSA office* – for purposes of this Section, it shall be considered as an extension office of an RTC. It includes the head office and branches of an RSA.
 - j. *Offices* – refer collectively to the head office, branches and RSA office where money changing/foreign exchange dealing and/or remittance transactions shall be conducted.

Requirements for registration. RTCs/MCs/FXDs shall be registered with the Bangko Sentral before they can operate. All existing RTCs/MCs/FXDs shall apply/re-apply for registration.

- a. *Registration of RTCs/MCs/FXDs.* For registration purposes, RTCs/MCs/FXDs shall be classified into six (6) categories with the following criteria:

Type	Classification	Benchmark Capital
A	Large-Scale Operator-Remittance Agent with or without money changing/foreign exchange dealing operations with average monthly network volume of transactions of at least P75.00 million	At least P50.00 million
B	Small-Scale Operator-Remittance Agent with or without money changing/foreign exchange dealing operations with average monthly network volume of transactions of less than P75.00 million	Less than P50.00 million
C	E-Money Issuer as authorized under Sec. 702 of MORB	P100.00 million
D	Remittance Platform Provider	P10.00 million
E	Large-Scale Operator-Money Changer/Foreign Exchange Dealer with average monthly network volume of transactions of at least P50.00 million	At least P10.00 million
F	Small-Scale Operator – Money Changer/Foreign Exchange Dealer with average monthly network volume of transactions of less than P50.00 million	Less than P10.00 million

RTCs/MCs/FXDs shall submit the Application for Registration and Notarized Deed of Undertaking (*Appendix N-8*) to the appropriate supervising department of the Bangko Sentral.

RTCs/MCs/FXDs shall adhere to the registration procedures contained in *Appendix N-7*.

- b. *Issuance of Bangko Sentral Certificate of Registration (COR) and Metal Plate.* RTCs/MCs/FXDs shall be issued with the corresponding COR upon fulfillment of the registration requirements. Within three (3) months from the date of issuance of the COR, a Bangko Sentral-registered RTC/MC/FXD shall commence operations.

However, the Bangko Sentral shall not issue a COR in cases of the following:

- (1) Failure to provide the complete required documents; and
- (2) Any of the RTC/MC/FXD's proprietors, or any of its partners, directors, or principal officers, as applicable, is not fit and proper.

In considering the application for COR, the Bangko Sentral shall take into account the fitness and propriety of the proprietor, partner, directors, or principal officers. In determining whether a person is fit and proper, regard shall be given to the following: integrity/probity, market reputation, competence, and financial capacity.

A metal plate bearing the unique registration number of the RTC/MC/FXD shall be issued to each RTC/MC/FXD head office. The Bangko Sentral reserves the right to collect reasonable amount to cover the cost of production/issuance of the metal plate.

- c. *Accreditation of RSA.* Duly registered RTCs may accredit their own RSAs: *Provided, That:* (i) the engagement of RSA's remittance services is directly related to the accomplishment of RTC's business plan/strategy; and (ii) appropriate risk management policies and procedures pertaining to the aforementioned engagement are in place.

The RSA shall be considered as part of the network of its accrediting RTC. RSAs are also subject to effective continuing oversight of their RTCs. RTC shall conduct appropriate due diligence in the accreditation of its RSAs and shall be responsible for the RSAs' compliance with all applicable anti-money laundering (AML)/combating the financing of terrorism (CFT) rules and regulations.

Relative to the engagement of RSA, the policies and procedures, at a minimum, shall contain the following:

- (1) Selection criteria and process in the accreditation of an RSA. The selection criteria shall take into account, among others, the necessary permits/authorization to perform the remittance business, and the fitness and propriety of the proprietor, partners, directors, or principal officers of an RSA. In determining whether a person is fit and proper, regard shall be given to the following: integrity/probity, market reputation, competence, and financial capacity;
- (2) Regular operational review on RSA's compliance with applicable laws, rules and regulations, especially on compliance with AML/CFT and consumer protection requirements and performance in carrying out remittance activities; and
- (3) Delisting of an RSA or termination of a remittance contract.

A relationship or remittance arrangement with an RSA shall be supported by a notarized remittance agreement. The contract shall clearly identify the roles and duties of each party including, among others, the responsibilities to comply with relevant Bangko Sentral rules and regulations particularly on AML/CFT and consumer protection requirements. It should also stipulate therein that the RSA shall allow the Bangko Sentral to have access on the remittance system, records and other relevant information.

The RTC shall ensure that its RSA offices shall maintain a signage posted conspicuously in their premises, indicating that the RSA is an accredited agent of the RTC.

- d. *Mandatory training requirement.* The proprietors, partners, directors, president or officer of equivalent rank and function, over-all head of the money service business operation and the head of the compliance unit shall attend a seminar on AML/CFT laws, rules and regulations, before start of operations, conducted by the Bangko Sentral, Anti-Money Laundering Council (AMLC), or any reputable training provider².

Notification requirements. RTCs/MCs/FXD shall inform the appropriate supervising department of the Bangko Sentral of the following events:

- a. *Commencement of operations.* RTC/MC/FXD shall notify within five (5) business days from the start of operations of its head office.
- b. *New offices.* RTC shall submit a list of all its new branches and accredited RSAs on a monthly basis within five (5) business days from end of the reference month.
- c. *New/Terminated tie-up partner/s.* RTC shall submit a list of all its new and terminated local/foreign remittance tie-up partners during the month within five (5) business days from the end of the reference month.

The relationship or remittance arrangement with the tie-up partner/s shall be supported by remittance agreement/s which shall be notarized or consularized if originated/signed abroad. RTC shall ascertain that its tie-up partner is authorized to engage in remittance business by the appropriate supervising/licensing authority and is compliant with the AML/CFT laws of the country where it operates. All remittance agreements shall be made readily available during examination or upon request of the Bangko Sentral without delay.

- d. *Change of tie-up partner/s.* RTC shall notify within five (5) business days from the addition and/or termination of tie-up partner/s and shall submit the following documents, if applicable:
 - (1) Notarized tie-up agreement/s which shall be consularized if originated/signed abroad; and
 - (2) Proof that the RTC or counterparty is authorized to engage in the remittance business and is subject to the anti-money laundering laws of the country where it operates.
- e. *Transfer of location.* RTC/MC/FXD shall notify within five (5) business days from actual date of transfer.

¹ Refers to an entity which has an adequate track record of successfully conducting training programs preferably on financial institution-oriented courses, including AML/CFT training. For this purpose, the RTC/MC/FXD shall be responsible in ascertaining whether the training provider is reputable as herein defined.

- f. *Closure of office.* RTC/MC/FXD shall notify within five (5) business days from the actual date of closure.
- g. *Closure of business.* RTC/MC/FXD shall notify within five (5) business days from the actual date of closure and shall submit the following documents:
 - (1) Certification by the owner or partnership/board resolution, as the case may be, authorizing/attesting the closure of RTC/MC/FXD; and
 - (2) Original copy of Bangko Sentral COR issued to RTC/MC/FXD.

Change of registered/business name. RTC/MC/FXD shall not change its registered/business name without submitting to the appropriate supervising department of the Bangko Sentral the following documents:

- a. COR from the Department of Trade and Industry (DTI), Securities and Exchange Commission (SEC) or Cooperative Development Authority (CDA), as the case may be, indicating the new business/registered name; and
- b. Original copy of Bangko Sentral COR issued under the old name.

The Bangko Sentral shall issue a new COR indicating the new registered/business name of the RTC/MC/FXD.

Change of ownership or control. RTC/MC/FXD shall obtain prior approval from the Bangko Sentral for any change in: ownership of a sole proprietorship or partnership; or control of a corporation. *Control* shall refer to any transaction involving voting shares of stock of an RTC/MC/FXD that will result in ownership or control of at least twenty percent (20%) of voting shares of stock of RTC/MC/FXD by any person, whether natural or juridical, or which will enable such person to elect, or be elected as, a director of such RTC/MC/FXD. RTC/MC/FXD shall submit the names of its proposed new owner/s or controlling shareholder for evaluation. Failure to seek prior approval may result in cancellation of registration.

Reports.

- a. *Required reports.* RTCs/MCs/FXDs shall maintain records and submit the following required reports, duly certified by the proprietor/managing partner/president or any officer of equivalent rank, to the appropriate supervising department of the Bangko Sentral:
 - (1) Semestral report of operating, and closed/delisted RTC/MC/FXD offices which shall be submitted within ten (10) business days from the end of the reference semester;
 - (2) Audited financial statements (AFS) which shall be submitted not later than 30 June following the reference calendar year. The AFS for entities with total assets of at least fifty (50) million pesos shall be opined upon by any of the Bangko Sentral-selected external auditors;
 - (3) Quarterly reports on the total value of money changing/foreign exchange transactions which shall be submitted within ten (10) business days from the end of the reference quarter; and
 - (4) Quarterly reports on the total value of foreign and domestic remittance transactions which shall be submitted within ten (10) business days from the end of the reference quarter.

RTCs/MCs/FXDs shall adhere to the guidelines issued by the Bangko Sentral on the manner of submission of reports in forms as may be determined and required by the Deputy Governor, of the appropriate sector of the, Bangko Sentral.

- b. *Delayed/erroneous/unsubmitted report.* Violation of the foregoing reporting requirements consisting of erroneous, delayed or unsubmitted reports, shall subject the RTC/MC/FXD concerned to the appropriate penalties after observance of due process.

A submitted report that, upon validation by the Bangko Sentral, is found to be non-compliant with the reporting requirements prescribed herein or in subsequent guidelines shall be considered as willful failure or refusal to comply with a regulation and shall be classified as “*Erroneous*”. On the other hand, a report that was able to comply with the reporting requirements or guidelines of this regulation after the submission deadline for said report may be considered as willful delay and shall be classified as “*Delayed*”. Finally, a report that was not able to comply with the reporting requirements or guidelines of this regulation by the time the next report becomes due or upon the lapse of thirty (30) business days from the report’s submission deadline, whichever comes first, may be considered as willful failure or refusal to comply with a regulation and shall be classified as “*Unsubmitted*”.

The reports required under this Section shall be considered *Unsubmitted* after the lapse of thirty (30) business days from the submission deadline.

Internal control. RTCs/MCs/FXDs shall maintain an internal control system commensurate to the nature, size and complexity of their respective businesses.

Fees. Registration and annual service fees shall be paid by RTCs/MCs/FXD to the Bangko Sentral.

- a. *Registration fee.* The one-time, non-refundable registration fee for RTCs/MCs/FXD shall be as follows:

Type	Registration Fee
A	P100,000
B	P20,000
C	P100,000
D	P100,000
E	P100,000
F	P20,000

Further, except for EMLs, a non-refundable supplemental registration fee of P1,000 shall be paid for each office other than the head office.

- b. *Annual service fee.* RTCs/MCs/FXD shall pay, not later than March of every year, commencing in 2018 the following as annual service fee for continued registration:

Type	Annual Service Fee
A	P100,000
B	P20,000
C	P300,000 and/or as determined by the Monetary Board
D	P100,000
E	P100,000
F	P20,000

- c. *Processing fee for replacement of Bangko Sentral COR.* A non-refundable processing fee of P1,000 shall be assessed for replacement of Bangko Sentral COR for whatever reason.

Transactional requirements for RTCs/MCs/FXD.

- a. *Regulation on large value pay-outs.* Large value pay-outs of more than P500,000 or its foreign currency equivalent, in any single transaction with customers or counterparties, shall only be made via check payment or direct credit to deposit accounts.
- b. *Sale of foreign currencies.* MCs/FXD, except AAB-forex corps, shall be allowed to sell foreign currencies in an amount not exceeding USD10,000 or its equivalent and not to exceed USD50,000 or its equivalent per month per customer. Exemption or higher limits may be granted by the appropriate supervising department of the Bangko Sentral if justified by the business model of the MC/FXD. The MCs/FXD shall also require an accomplished application form and submission/presentation of supporting documents listed in Item "A" of *Appendix N-10* for the sale of foreign exchange in the amount exceeding USD10,000 or its equivalent for non-trade current account purposes. For sale of foreign exchange for all other purposes, FXDs/MCs shall require submission of an accomplished application form and supporting documents listed in Items "B to D" of *Appendix N-10*, regardless of the amount involved.

Sanctions. Monetary penalties and other sanctions committed by erring RTCs/MCs/FXD shall be imposed for the following violations:

Nature of Violation/Exception	Possible Sanctions/Penalties
a. Operating without prior Bangko Sentral registration	<ul style="list-style-type: none"> Applicable penalty prescribed under Section 36 of R.A. No. 7653 (New Central Bank Act) Disqualification from registration
b. Violation of any of the provisions of R.A. No. 9160 (Anti-Money Laundering Act of 2001, as amended) and its revised implementing rules and regulations	<ul style="list-style-type: none"> Written reprimand Disqualification from holding any position in any Bangko Sentral supervised or regulated institution Applicable penalty prescribed under the Act Cancellation of registration
c. Violation of any provisions/requirements of this Section	<ul style="list-style-type: none"> Penalties and sanctions under applicable laws, rules, and regulations Cancellation of registration

Nature of Violation/Exception	Possible Sanctions/Penalties
d. Erroneous/delayed/unsubmitted report	<ul style="list-style-type: none"> Monetary penalty of P60 for each occurrence (in case of Erroneous report) or for each day (in case of Delayed or Unsubmitted reports) which will accumulate until such time the report has been determined compliant with the reporting requirements prescribed herein or in subsequent guidelines

For a report initially considered *Erroneous* but subsequently complied with the reporting requirements or guidelines within the prescribed deadline, the penalty shall be derived by multiplying the penalty of P60 against the number of times the subject report was submitted before being considered compliant.

For *Delayed reports*, the penalty of P60 shall be multiplied by the number of calendar days delayed. If the report is initially considered *Erroneous* but was able to comply with the reporting requirements or guidelines but after the prescribed deadline (i.e., *Delayed*), the penalty shall be the sum of the penalty for being *Erroneous* before deadline and the penalty for being *Delayed* as previously described.

For *Unsubmitted reports*, computation of the penalty shall be based on three times (3x) the number of days applied for determining a report to be unsubmitted [i.e., Thirty (30) days].

Transitory provisions. All Bangko Sentral Certificate of Registration (CORs) issued prior to 10 February 2017, to Remittance and Transfer Companies (RTCs)/Money Changers (MCs)/Foreign Exchange Dealers (FXDs) shall remain effective until 30 April 2018. Thereafter, they shall be considered automatically cancelled.

(Circular Nos. 1039 dated 3 May 2019, 991 dated 26 January 2018, 968 dated 10 August 2017, and 942 dated 20 January 2017)

902-N VIRTUAL CURRENCY EXCHANGES

It is the policy of the Bangko Sentral to provide an environment that encourages financial innovation while at the same time ensure that the Philippines shall not be used for money laundering (ML) or terrorist financing (TF) activities and that the financial system and financial consumers are adequately protected. Thus, the Bangko Sentral recognizes that Virtual Currency (VC) systems have the potential to revolutionize delivery of financial services, particularly for payments and remittance, in view of their ability to provide faster and more economical transfer of funds, both domestic and international, and may further support financial inclusion. These benefits, however, should be considered along with the corresponding risks in VCs considering the higher degree of anonymity involved, the velocity of transactions, volatility of prices and global accessibility. In particular, VCs pose ML and TF risks, information technology risks, and consumer protection and financial stability concerns, among others.

The Bangko Sentral does not intend to endorse any VC, such as bitcoin, as a currency since it is neither issued or guaranteed by a central bank nor backed by any commodity. Rather, the Bangko Sentral aims to regulate VCs when used for delivery of financial services, particularly, for payments and remittances, which have material impact on Anti-Money Laundering (AML) and combating the financing of terrorism (CFT), consumer protection and financial stability.

This Section shall govern the operations and reporting obligations of VC exchanges in the Philippines.

Scope. These guidelines shall cover VC exchanges in the Philippines offering services or engaging in activities that provide facility for the conversion or exchange of fiat currency to VC or vice versa. The Bangko Sentral recognizes that once fiat currency is exchanged or converted into VC, it becomes easily transferrable, facilitating expedient movement or transfer of funds and payment services, among others. In this manner, they are considered similar to remittance and transfer companies, as provided for under Section 3 in relation to Section 11 of R.A. No. 9160 or the Anti-Money Laundering Act of 2001, as amended, and its RIRR, as well as implementing regulations issued by the Bangko Sentral.

Definition of terms. The terms as used in this Section shall be defined, as follows:

- VC refers to any type of digital unit that is used as a medium of exchange or a form of digitally stored value created by agreement within the community of VC users. VCs are not issued nor guaranteed by any jurisdiction and do not have legal tender status. VCs shall be broadly construed to include digital units of exchange that (1) have a centralized repository or administrator; (2) are decentralized and have no centralized repository or administrator; or (3) may be created or obtained by computing or manufacturing effort. It shall not be construed to include e-money as defined under Sec. 702 of the MORB, digital units used solely within online gaming platforms and are not convertible to fiat currency or real-world goods or services, digital units with stored value redeemable exclusively in goods or services and limited to transactions involving a defined merchant such as rewards programs;

- b. *VC exchange service* refers to the conversion or exchange of fiat currency or other value into VC, or the conversion or exchange of VC into fiat currency or other value;
- c. *Fiat currency* refers to government-issued currency that is designated as legal tender in its country of issuance through government decree, regulation, or law;
- d. *RTC* refers to any entity that provides money or value transfer service;
- e. *MVTS* refers to financial services that involve the acceptance of cash, cheques, other monetary instrument or other stores of value and the payment of a corresponding sum in cash or other form to a beneficiary by means of a communication, message, transfer or through a clearing network; and
- f. *VC exchange* refers to any entity that offers services or engages in activities that provide facility for the conversion or exchange of fiat currency to VC or vice versa.

It is understood that duly registered VC exchanges may perform other MVTS, but other RTCs may not engage in VC exchange services unless registered as an RTC operating as a VC exchange.

Requirements for the issuance of a certificate of registration. A VC exchange shall obtain COR to operate as a remittance and transfer company, pursuant to and upon compliance with the requirements of Sec. 901-N.

A VC exchange shall adhere to the registration procedures under *Appendix N-7* and submit the Application for Registration and Notarized Deeds of Undertaking (*Appendices N-8 and N-9*) to the appropriate supervising department of the Bangko Sentral.

The provisions of Sec. 901-N on issuance of Bangko Sentral COR, accreditation of remittance sub-agents, registration with the AMLC Secretariat and mandatory training shall also apply to VC exchanges.

Registration and annual service fees. A VC exchange shall pay the registration and annual service fees as provided under Sec. 901-N.

Transactional requirements for VC exchanges. Large value pay-outs of more than P500,000 or its foreign currency equivalent, in any single transaction with customers or counterparties, shall only be made via check payment or direct credit to deposit accounts.

Technology risk management. Depending on the complexity of VC operations and business models adopted, a VC exchange shall put in place adequate risk management and security control mechanisms to address, manage and mitigate technology risks associated with VCs. For VC exchanges providing wallet services for holding, storing and transferring VCs, an effective cybersecurity program encompassing storage and transaction security requirements as well as sound key management practices must be established to ensure the integrity and security of VC transactions and wallets. For those with simple VC operations, installation of up-to-date anti-malware solutions, conduct of periodic back-ups and constant awareness of the emerging risks and other cyber-attacks involving VCs may suffice.

Internal control. All VC exchanges shall maintain an internal control system commensurate to the nature, size and complexity of their respective businesses.

Notification and reporting requirements.

- a. *Required reports.* A VC exchange is required to comply with the notification and reporting requirements under Sec. 901-N.

In addition, a VC exchange shall maintain records and submit the following reports to the appropriate supervising department of the Bangko Sentral:

Nature of Report	Frequency	Due Date
1. AFS (audited by any of the Bangko Sentral-selected external auditors)	Annually	Not later than 30 June following the reference calendar year
2. Quarterly Report on Total Volume and Value of VCs transacted*	Quarterly	Ten (10) business days from end of reference quarter
3. List of operating offices and websites	Semestral	Ten (10) business days from the end of the reference semester

*Duly certified by the Proprietor/Managing Partner/President or any officer of equivalent rank

A VC exchange shall adhere to the guidelines issued by the Bangko Sentral on the manner of submission of reports in forms as may be determined and required by the Deputy Governor, of the appropriate sector of the Bangko Sentral.

- b. *Delayed/Erroneous/Unsubmitted Report*. Violation of the foregoing reporting requirements, consisting of erroneous, delayed or unsubmitted reports, shall subject the VC exchange concerned to the appropriate penalties after observance of due process.

Submission of a report that, upon validation by the Bangko Sentral, is found to be non-compliant with the reporting requirements prescribed herein or in subsequent guidelines may be considered as willful failure or refusal to comply with a regulation and the report shall be classified as “*Erroneous*”. On the other hand, submission of a report that was able to comply with the reporting requirements or guidelines after the submission deadline, and within thirty (30) business days therefrom, may be considered as willful delay and the report shall be classified as “*Delayed*”. Finally, non-submission of a report or submission of a report, that is found to be non-compliant with the reporting requirements or guidelines, by the time the next report becomes due or upon the lapse of thirty (30) business days from the submission deadline, whichever comes first, may be considered as willful failure or refusal to comply with a regulation and the report shall be classified as “*Unsubmitted*”.

Sanctions. Appropriate monetary penalties, sanctions and other enforcement action/s shall be imposed for the following violation/s:

Nature of Violation/Exception	Possible Sanctions/Penalties
a. Operating without prior Bangko Sentral registration	<ul style="list-style-type: none"> Applicable penalty prescribed under Section 36 of R.A. No. 7653 (New Central Bank Act) Disqualification from registration
b. Violation of any of the provisions of R.A. No. 9160 (Anti-Money Laundering Act of 2001), as amended, and its RIRR	<ul style="list-style-type: none"> Written reprimand Disqualification from holding any position in any Bangko Sentral-supervised or regulated institution Applicable penalty prescribed under the AMLA, as amended Cancellation of registration
c. Erroneous/delayed/unsubmitted report	<ul style="list-style-type: none"> Monetary penalty of P60 for each occurrence (in case of <i>Erroneous</i> report) or for each day (in case of <i>Delayed</i> or <i>Unsubmitted</i> reports) which will accumulate until such time the report has been determined compliant with the reporting requirements prescribed herein or in subsequent guidelines; and/or Cancellation of registration
d. Violation of any provisions/requirements of this Section	<ul style="list-style-type: none"> Penalties and sanctions under applicable laws, rules, and regulations Cancellation of registration

For a report initially considered *Erroneous* but subsequently determined to be compliant with the reporting requirements or guidelines within the prescribed deadline, the penalty shall be derived by multiplying the penalty of P60 with the number of times the subject report was submitted before being considered compliant.

For *Delayed* reports, the penalty of P60 shall be multiplied by the number of calendar days delayed. If the report is initially considered *Erroneous* but was able to comply with the reporting requirements or guidelines but after the prescribed deadline (i.e., *Delayed*), the penalty shall be the sum of the penalty for being *Erroneous* before deadline and the penalty for being *Delayed* as previously described.

For *Unsubmitted* reports, computation of the penalty shall be based on three times (3x) the number of days applied for determining a report to be unsubmitted [i.e., Thirty (30) days].

(M-2019-006 dated 14 March 2019, Circular No. 1039 dated 3 May 2019, and 944 dated 06 February 2017)

PART TEN

OTHER REGULATIONS APPLICABLE TO SPECIFIC TYPES OF NON-BANK FINANCIAL INSTITUTIONS

1001-N MINIMUM CAPITAL FOR INVESTMENT HOUSES

Investment houses not performing quasi-banking functions shall also be subject to the minimum capital requirement in Sec. 121-Q.

1002-N SECURITIES CUSTODIANSHIP AND SECURITIES REGISTRY OPERATIONS

The following rules and regulations shall govern securities custodianship and securities registry operations of NBFIs under Bangko Sentral regulations.

The guidelines to implement the delivery of securities are provided in *Appendix Q-37*.

Violation of any provision of the guidelines in *Appendix Q-37* shall be subject to the sanctions/penalties under this Section on Sanctions.

Policy statement. It is the policy of the Bangko Sentral to promote the protection of investors in order to gain their confidence and encourage their participation in the development of the domestic capital market. Therefore, the following rules and regulations are promulgated to enhance transparency of securities transactions with the end in view of protecting investors.

Applicability of this regulation. This regulation shall govern securities custodianship and securities registry operations of banks and NBFIs under Bangko Sentral supervision. It shall cover all their transactions in securities as defined in Section 3 of the SRC, whether exempt or required to be registered with the SEC, that are sold, borrowed, purchased, traded, held under custody or otherwise transacted in the Philippines where at least one (1) of the parties is a bank or an NBFI under Bangko Sentral supervision. However, this regulation shall not cover the operations of stock and transfer agents duly registered with the SEC pursuant to the provisions of SRC Rule 36-4.1 and whose only function is to maintain the stock and transfer book for shares of stock.

Prior Bangko Sentral approval. NBFIs under Bangko Sentral supervision may act as securities custodian and/or registry only upon prior Monetary Board approval.

Application for authority. A Bangko Sentral-supervised entity desiring to act as securities custodian and/or registry shall file an application with the appropriate supervising department of the Bangko Sentral. The application shall be signed by the highest ranking officer of the NBFI and shall be accompanied by a certified true copy of the resolution of the NBFI's board of directors authorizing the NBFI to engage in securities custodianship and/or registry.

Pre-qualification requirements for a securities custodian/registry.

- a. The securities custodian must be a NBFI under Bangko Sentral supervision that is authorized to engage in investment management (for IHs with QB authority only) or trust business. The securities registry must be a NBFI under Bangko Sentral supervision whether or not authorized to engage in investment management (for IHs with QB authority) or trust business;
- b. It must have complied with the minimum capital accounts required under existing regulations not lower than an adjusted capital of P300.0 million or such amounts as may be required by the Monetary Board in the future;
- c. It must have a CAMELS composite rating of at least "4" (as rounded off) in the last regular examination;
- d. It must have in place a comprehensive risk management system approved by its board of directors appropriate to its operations characterized by a clear delineation of responsibility for risk management, adequate risk measurement systems, appropriately structured risk limits, effective internal control and complete, timely and efficient risk reporting systems. In this connection, a manual of operations (which includes custody and/or registry operations) and other related documents embodying the risk management system must be submitted to the appropriate supervising department of the Bangko Sentral at the time of application for authority and within thirty (30) days from updates;
- e. It must have adequate technological capabilities and the necessary technical expertise to ensure the protection, safety and integrity of client assets, such as:
 - (1) It can maintain an electronic registry dedicated to recording of accountabilities to its clients; and

- (2) It has an updated and comprehensive computer security system covering system, network and telecommunication facilities that will:
 - (a) limit access only to authorized users;
 - (b) preserve data integrity; and
 - (c) provide for audit trail of transactions.
- f. It has complied, during the period immediately preceding the date of application, with the following:
 - (1) ceilings on credit accommodation to DOSRI; and
 - (2) single borrower's limit.
- g. It has no reserve deficiencies during the eight (8) weeks immediately preceding the date of application;
- h. It has set up the prescribed allowances for probable losses, both general and specific, as of date of application;
- i. It has not been found engaging in unsafe or unsound activities during the last six (6) months preceding the date of application;
- j. It has generally complied with laws, rules and regulations, orders or instructions of the Monetary Board and/or Bangko Sentral Management;
- k. It has submitted additional documents/information which may be requested by the appropriate supervising department of the Bangko Sentral, such as, but not limited to:
 - (1) Standard custody/registry agreement and other standard documents;
 - (2) Organizational structure of the custody/registry business;
 - (3) Transaction flow; and
 - (4) For those already in the custody or registry business, a historical background for the past three (3) years;
- l. It shall be conducted in a separate unit headed by a qualified person with at least two (2) years experience in custody/registry operations; and
- m. It can interface with the clearing and settlement system of any recognized exchange in the country capable of achieving a real time gross settlement of trades.
- n. A securities custodian which provides the value-added service of securities lending involving securities that are sold, offered for sale or distributed within the Philippines must be a duly-licensed lending agent registered with the SEC.

Functions and responsibilities of a securities custodian. A securities custodian shall have the following basic functions and responsibilities:

- a. Safekeeps the securities of the client;
- b. Holds title to the securities in a nominee capacity;
- c. Executes purchase, sale and other instructions;
- d. Performs at least a monthly reconciliation to ensure that all positions are properly recorded and accounted for;
- e. Confirms tax withheld;
- f. Represents clients in corporate actions in accordance with the direction provided by the securities owner;
- g. Conducts mark-to-market valuation and statement rendition;
- h. Does earmarking of encumbrances or liens such as, but not limited to, Deeds of Assignment and court orders; and
- i. Acts as a collecting and paying agent in respect of dividends, interest earnings or proceeds from the sale/redemption/maturity of securities held under custodianship: *Provided*, That the custodian shall immediately make known to the securities owner all collections received and payments made with respect to the securities under custody.

- j. In addition to the above basic functions, it may perform the value-added service of securities lending as agent: *Provided*, That it complies with the pre-qualification requirements under Item “n” of Sec. 1002-N: *Provided, further*, That the securities lending service shall be covered by a Securities Lending Authorization Agreement (SLAA) which shall be attached to the custody contract.

A securities custodian which renders the value-added service of securities lending involving securities that are sold, offered and distributed within the Philippines shall comply with the pertinent rules and regulations of the SEC on securities lending and borrowing operations.

Functions and responsibilities of a securities registry.

- a. Maintains an electronic registry book;
- b. Delivers confirmation of transactions and other documents within agreed trading periods;
- c. Issues registry confirmations for transfers of ownership as it occurs;
- d. Prepares regular statement of securities balances at such frequency as may be required by the owner on record but not less frequent than every quarter; and
- e. Follows appropriate legal documentation to govern its relationship with the Issuer.

Protection of securities of the customer. A custodian must incorporate the following procedures in the discharge of its functions in order to protect the securities of the customer:

- a. Administration of securities custodianship accounts. Securities custodianship accounts must be administered in the entity’s Trust Unit.
- b. Accounting and recording for securities. Custodians must employ accounting and safekeeping procedures that fully protect customer securities. It is essential that custodians segregate customer securities from one another and from its proprietary holdings to protect the same from the claims of its general creditors.

Securities held under custodianship shall be recorded in the books of the custodian at the face value of said securities in the other fiduciary sub-account “*Custodianship*”.

- c. Documentation. The appropriate documentation for custodianship shall be made and it shall clearly define, among others, the authority, role, responsibilities, fees and provision for succession in the event the custodian can no longer discharge its functions. It shall be accepted in writing by the counterparties.

The governing custodianship agreement shall be pre-numbered and this number shall be referred to in all amendments and supplements thereto.

- d. Confirmation of custody. The custodian shall issue a custody confirmation to the purchaser or borrower of securities to evidence receipt or transfer of securities as they occur. It shall contain, as a minimum, the following information on the securities under custody:

- (1) Owner of securities;
- (2) Issuer;
- (3) Securities type;
- (4) Identification or serial numbers;
- (5) Quantity;
- (6) Face value; and
- (7) Other information, which may be requested by the parties.

- e. Periodic reporting. The custodian shall prepare at least quarterly (or as frequent as the owner of securities will require) securities statements delivered to the registered owner’s address on record. Said statement shall present detailed information such as, but not limited to, inventory of securities, outstanding balances, and market values.

Independence of the registry and securities custodian. A Bangko Sentral-accredited securities registry must be a third party that does not belong to the same financial conglomerate or banking group as that of the issuer of securities. A Bangko Sentral-accredited custodian must be a third party that does not belong to the same financial conglomerate or banking group as that of the issuer or seller of securities held under custody. An NBFI accredited by Bangko Sentral as securities custodian may, however, continue holding securities it sold under the following cases:

- a. where the purchaser is a related entity acting in its own behalf and not as agent or representative of another;
- b. where the purchaser is a non-resident with existing global custody agreement governed by foreign laws and conventions wherein the NBFI is designated as custodian or sub-custodian; and

- c. upon approval by the Bangko Sentral, where the purchaser is an insurance company whose custody arrangement is either governed by a global custody agreement where the NBFI is designated as custodian or sub-custodian or by a direct custody agreement with features at par with the standards set under this Section drawn or prepared by the parent company owning more than fifty percent (50%) of the capital stock of the purchaser and executed by the purchaser itself and its custodian.

Purchases by non-residents and insurance companies that are exempted from the independence requirement of this Section shall, however, be subject to all other provisions of this Section.

Registry of Scripless Securities of the Bureau of the Treasury. The RoSS, operated by the Bureau of the Treasury, which is acting as a registry for government securities is deemed to be automatically accredited for purposes of this Section and is likewise exempted from the independence requirement under Sec. 1002-N. Securities registered under the RoSS shall be delivered in accordance with the guidelines set forth in *Appendices Q-37 and Q-38*.

Confidentiality. A Bangko Sentral-accredited securities custodian/registry shall not disclose to any unauthorized person any information relative to the securities under its custodianship/registry. The management shall likewise ensure the confidentiality of client accounts of the custody or registry unit from other units within the same organization.

Compliance with anti-money laundering laws/regulations. For purposes of compliance with the requirements of R.A. No. 9160, otherwise known as the “Anti-Money Laundering Act of 2001,” as amended, particularly the provisions regarding customer identification, record keeping and reporting of suspicious transactions, a Bangko Sentral-accredited custodian may rely on referral by the seller/issuer of securities: *Provided*, That it maintains a record of such referral together with the minimum identification, information/documents required under the law and its implementing rules and regulations.

A Bangko Sentral accredited custodian must maintain accounts only in the true and full name of the owners of the security. However, said securities owners may be identified by number or code in reports and correspondences to keep his identity confidential.

Securities subject to pledge and/or deed of assignment as of 14 October 2004 (date of Circular 457), may be held by a lending NBFI up to the original maturity of the loan or full payment thereof, whichever comes earlier.

Basic security deposit. Securities held under custodianship whether booked in the Trust Department or carried in the regular books of the NBFI shall be subject to a security deposit for faithful performance of duties at the rate of 1/25 of one percent (1%) of the total face value or P500,000 whichever is higher.

However, securities held under custodianship where the custodian also performs securities lending as agent shall be subject to a higher basic security deposit of one percent (1%) of the total face value of securities held under custodianship.

Compliance shall be in the form of eligible government securities deposited with the Bangko Sentral, pursuant to existing regulations governing security for the faithful performance of trust and other fiduciary business under Sec. 416-Q.

Required Report. An accredited securities custodian shall comply with reportorial requirements, prescribed under Item “b” of Sec. 416-Q (*Compliance with the basic security deposit requirement*)

Sanctions. Without prejudice to the penal and administrative sanctions provided for under Sections 36 and 37, respectively, of the R.A. No. 7653, violation of any provision of this Section shall be subject to the following sanctions penalties:

- a. First offense –
 - (1) Fine of up to P10,000 a day for the institution for each violation reckoned from the date the violation was committed up to the date it was corrected; and
 - (2) Reprimand for the directors/officers responsible for the violation.
- b. Second offense –
 - (1) Fine of up to P20,000 a day for the institution for each violation reckoned from the date the violation was committed up to the date it was corrected; and
 - (2) Suspension for ninety (90) days without pay of directors/officers responsible for the violation.
- c. Subsequent offenses–
 - (1) Fine of up to P30,000 a day for the institution for each violation from the date the violation was committed up to the date it was corrected;

- (2) Suspension or revocation of the authority to act as securities custodian and/or registry; and
- (3) Suspension for 120 days without pay of the directors/officers responsible for the violation.

(Circular Nos. 1143 dated 12 April 2022, 1032 dated 15 February 2019, 998 dated 1 March 2018, and 873 dated 25 March 2015)

1003-N TRUST AND OTHER FIDUCIARY ACTIVITIES

Trust operations and investment management activities of NBFIs not performing quasi-banking functions shall be subject to the applicable regulations on such activities of NBFIs performing quasi-banking functions in Part IV of the Q-Regulations, to the regulations in the other parts of the Q-Regulations addressed also to trust entities and to the regulations implementing the Truth in Lending Act in Sec. 305-Q.

Sanctions. Pursuant to Section 91 of R.A. No. 8791, the Monetary Board may impose sanctions and monetary penalty for any violation of the provisions of the Q-Regulations pertaining to trust entities and the regulations implementing the Truth in Lending Act in 305-Q. This is without prejudice to the imposition of other sanctions as the Monetary Board may consider warranted that may include the suspension or revocation of an institution's authority to engage in trust and other fiduciary business or in investment management activities, and such other sanctions as may be provided by law. If the offender is a director or officer of the trust entity, the Monetary Board may also suspend or remove such director or officer. If the violation is committed by a corporation, such corporation may be dissolved by *quo warranto* proceedings instituted by the Solicitor General.

The guidelines for the imposition of monetary penalty shown under Sec. 1102-Q shall govern the imposition of monetary penalty for violations/offenses with administrative sanctions falling under Section 37 of R.A. No. 7653 on NBFIs not performing quasi-banking functions, their directors and/or officers.

(Circular No. 988 dated 20 December 2017, as amended by Circular No. 1031 dated 7 February 2019)

1004-N RULES OF PROCEDURE ON ADMINISTRATIVE CASES INVOLVING DIRECTORS AND OFFICERS OF TRUST ENTITIES

The rules of procedure on administrative cases involving directors and officers of QBs in Sec. 137-Q shall apply to directors and officers of trust entities.

1005-N ACTING AS TRUSTEE ON ANY MORTGAGE OR BOND ISSUANCE BY ANY MUNICIPALITY, GOCC, OR ANY BODY POLITIC

- a. *Applicability.* NBFIs duly accredited by the Bangko Sentral may act as trustee on any mortgage or bond issued by any municipality, GOCC, or any body politic.
- b. *Application for accreditation.* An NBFI desiring to act as trustee on any mortgage or bond issued by any municipality, GOCC, or any body politic shall file an application for accreditation with the appropriate supervising department of the Bangko Sentral. The application shall be signed by the president or officer of equivalent rank of the NBFI and shall be accompanied by the following documents:
 - (1) certified true copy of the resolution of the institution's board of directors authorizing the application; and
 - (2) a certification signed by the president or officer of equivalent rank that the institution has complied with all the qualification requirements for accreditation.
- c. *Qualification requirements.* An NBFI applying for accreditation to act as trustee on any mortgage or bond issued by any municipality, GOCC, or any body politic must comply with the requirements in *Appendix N-6*.
- d. *Independence of the trustee.* An NBFI is prohibited from acting as trustee of a mortgage or bond issuance if any elective or appointive official of the LGU, GOCC, or body politic which issued said mortgage or bond and/or his related interests own such number of shares of the NBFI that will allow him or his related interests to elect at least one (1) member of the board of directors of such NBFI or is directly or indirectly the registered or beneficial owner of more than ten percent (10%) of any class of its equity security.
- e. *Investment and management of the funds.* A domestic NBFI designated as trustee of a mortgage or bond issuance may hold and manage, in accordance with the provisions of the trust indenture or agreement, the proceeds of the mortgage or bond issuance and such assets and funds of the issuing municipality, GOCC, or body politic as may be required to be delivered to the trustee under the trust indenture/agreement, subject to the following conditions/restrictions:
 - (1) Pending the utilization of such funds pursuant to the provisions of the trust indenture/agreement, the same shall only be (i) deposited in any bank authorized to accept deposits from the Government or government entities: *Provided*, That the depository bank is not a subsidiary or affiliate of the trustee NBFI, or (ii) invested in peso-denominated treasury bills acquired/purchased from any securities dealer/entity, other than the trustee or any of its unit/department, its subsidiary or affiliate.

- (2) Investments of funds constituting or forming part of the sinking fund created as the primary source for the payment of the principal and interests due the mortgage or bonds shall also be limited to deposits in any bank authorized to accept deposits from the Government or government entities and investments in government securities that are consistent with such purpose which must be acquired/purchased from any securities dealer/entity, other than the trustee or any of its unit/department, its subsidiary or affiliate.
- f. *Waiver of confidentiality.* An NBFi designated as trustee of any mortgage or bond issued by any municipality, GOCC, or any body politic shall submit to the appropriate supervising department of the Bangko Sentral a waiver of the confidentiality of information under Sections 2 and 3 of R.A. No. 1405, as amended, duly executed by the issuer of the mortgage or bond in favor of the Bangko Sentral.
- g. *Reportorial requirements.* An NBFi authorized by the Bangko Sentral to act as trustee of the proceeds of mortgage or bond issuance of a municipality, GOCC, or body politic shall comply with reportorial requirements that may be prescribed by the Bangko Sentral.
- h. *Applicability of the rules and regulations on trust, other fiduciary business and investment management activities.* The provisions of the Rules and Regulations on Trust, Other Fiduciary Business and Investment Management Activities not inconsistent with the provisions of this Section shall form part of these rules.
- i. *Sanctions.* Without prejudice to the penal and administrative sanctions provided for under Sections 36 and 37, respectively, of R.A. No. 7653, violation of any provision of this Section shall be subject to the following sanctions/penalties depending on the gravity of the offense:
- (1) *First offense –*
- (a) Fine of up to P10,000 a day for the institution for each violation reckoned from the date the violation was committed up to the date it was corrected; and
- (b) Reprimand for the directors/officers responsible for the violation.
- (2) *Second offense –*
- (a) Fine of up to P20,000 a day for the institution for each violation reckoned from the date the violation was committed up to the date it was corrected;
- (b) Suspension for ninety (90) days without pay for directors/officers responsible for the violation; and
- (c) Revocation of the authority to act as trustee on any mortgage or bond issuance by any municipality, GOCC, or body politic.
- (3) *Subsequent offense –*
- (a) Fine of up to P30,000 a day for the institution for each violation reckoned from the date the violation was committed up to the date it was corrected;
- (b) Suspension or revocation of the trust license;
- (c) Suspension for 120 days without pay of the directors/officers responsible for the violation.

1006-N BANK DOSRI RULES AND REGULATIONS APPLICABLE TO GOVERNMENT BORROWINGS IN GOVERNMENT-OWNED OR -CONTROLLED FINANCIAL INSTITUTIONS

The provisions of Secs. 341 to 349 of the MORB, to the extent applicable, shall also apply to loans, other credit accommodations, and guarantees granted to the National Government or Republic of the Philippines, its political subdivisions and instrumentalities as well as GOCCs, subject to the following clarifications:

- a. Loans, other credit accommodations, and guarantees to the Republic of the Philippines and/or its agencies/departments/bureaus shall be considered: (1) non-risk; and (2) not subject to any ceiling;
- b. Loans, other credit accommodations, and/or guarantees to: (1) GOCCs; and (2) corporations where the Republic of the Philippines, its agencies/departments/bureaus, and/or GOCCs own at least twenty percent (20%) of the subscribed capital stock shall be considered indirect borrowings of the Republic of the Philippines and shall form part of the individual ceiling as well as the aggregate ceiling: *Provided*, That the following loans, other credit accommodations, and/or guarantees to GOCCs and corporations where the Republic of the Philippines, its agencies/departments/bureaus, and/or GOCCs own at least twenty percent (20%) of the subscribed capital stock, shall be excluded from the thirty percent (30%) ceiling on unsecured loans under Secs. 344 and 345 of the MORB:
- (1) Loans, other credit accommodations, and/or guarantees for the purpose of undertaking priority infrastructure projects consistent with the Medium-Term Development Plan/Medium-Term Public Investment Program of the National Government, duly certified as such by the Secretary of Socio-Economic Planning;

- (2) Loans, other credit accommodations, and/or guarantees granted to participating financial institutions (PFIs) in the lending programs of the government wherein the funds borrowed are intended for relending to other PFIs or end-user borrowers; and
 - (3) Loans, other credit accommodations, and/or guarantees granted for the purpose of providing (i) wholesale and retail loans to the agricultural sector and MSMEs; and/or (ii) rediscounting and guarantee facilities for loans granted to the said sector or enterprises;
- c. Loans, other credit accommodations, and/or guarantees granted to state universities and colleges (SUCs) shall be excluded from the thirty percent (30%) ceiling on unsecured loans under Secs. 344 and 345 of the MORB;
- d. In view of the fiscal autonomy granted under R.A. No. 7653 and the independence prescribed under the Constitution, the Bangko Sentral shall be considered an independent entity, hence, not a related interest of the Republic of the Philippines and/or its agencies/departments/bureaus. Loans, other credit accommodations and guarantees of the Bangko Sentral shall be considered: (1) non-risk; and (2) not subject to any ceiling;
- e. LGUs shall be considered separate from the Republic of the Philippines, other government entities, and from one another due to the full autonomy in the exercise of their proprietary functions and in the management of their economic enterprises granted to them under the Local Government Code of the Philippines, subject to certain limitations provided by law, hence, not a related interest of the Republic of the Philippines and/or its agencies/departments/bureaus;
- f. Local Water Districts (LWDs), although GOCCs shall be considered separate from the Republic of the Philippines, other government entities, and from one another due to their fiscal independence from the National Government, hence, not related interests of the Republic of the Philippines and/or its agencies/department/bureaus, for purposes of these regulations;
- g. A director who acts as a government representative in the lending institution shall not be excluded in the deliberation as well as in the determination of majority of the directors in cases of loans, other credit accommodations, and guarantees to the Republic of the Philippines and/or its agencies/departments/bureaus; and
- h. A director of the lending institution shall be excluded in the deliberation as well as in the determination of majority of the directors in cases of loans, other credit accommodations, and guarantees to the borrowing government entity other than the Republic of the Philippines, its agencies, departments or bureaus where said director is also a director, officer or stockholder under existing DOSRI regulations.

GUIDELINES ON PRESCRIBED REPORTS SIGNATORIES AND SIGNATORY AUTHORIZATION
(Appendix to Sec. 143-N on Reports)

Category A-2 reports of head offices shall be signed by the president, executive vice-presidents, vice-presidents or officers holding equivalent positions. Such reports of other offices/units (such as branches) shall be signed by their respective managers/officers in-charge. Likewise, the signing authority in this category shall be contained in a resolution approved by the board of directors in the format prescribed in *Appendix N-3*.

Category B reports shall be signed by officers or their alternates, who shall be duly designated in a resolution approved by the board of directors in the format as prescribed in *Appendix N-4*.

Copies of the board resolutions on the report signatory designations shall be submitted to the appropriate supervising department of the Bangko Sentral within three (3) days from the date of resolution.

FORMAT OF RESOLUTION FOR SIGNATORIES OF CATEGORY A-2 REPORTS
(Appendix to Sec. 143-N on Categories and signatories of reports)

Resolution No. _____

Whereas, it is required under Sec. 143-N (*Categories and signatories of reports*) that Category A-2 reports of head offices be signed by the president, executive vice-presidents, vice-presidents or officers holding equivalent positions, and that such reports of other offices be signed by the respective managers/officers-in-charge;

Whereas, it is also required that aforesaid officers of the institution be authorized under a resolution duly approved by the institution's Board of Directors;

Whereas, we, the members of the Board of Directors of (Name of Institution), are conscious that, in designating the officials who would sign said Category A-2 reports, we are actually empowering and authorizing said officers to represent and act for or in behalf of the Board of Directors in particular and (Name of Institution) in general;

Whereas, this Board has full faith and confidence in the institution's President (and/or the Executive Vice-President, etc., as the case may be) and, therefore, assumes responsibility for all the acts which may be performed by aforesaid officers under their delegated authority;

Now, therefore, we, the members of the Board of Directors, resolve, as it is hereby resolved that:

Name of Officer	Specimen Signature	Position Title	Report No.
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____

are hereby authorized to sign the Category A-2 reports of

(Name of Institution)

Done in the City of _____, Philippines, this ____ day of _____, 20 ____.

**GUIDELINES ON THE SUSPENSION/DELISTING OF EXTERNAL AUDITOR IN THE LIST OF SELECTED
EXTERNAL AUDITORS FOR BANGKO SENTRAL SUPERVISED FINANCIAL INSTITUTIONS (BSFIs)**
(Appendix to Sec. 133-N on Framework on the Selection of External Auditors)

Section 1. Grounds for Suspension/Delisting of External Auditors

An external auditor included in the List of Selected Auditors for BSFIs shall be suspended or delisted by the Bangko Sentral, without prejudice to the imposition of other sanctions by the Securities and Exchange Commission (SEC)¹, under any of the following grounds:

- a. Gross negligence in the conduct of the audit or failure to comply with the Philippine Standards on Auditing and such other issuances of the Auditing and Assurance Standards Council;
- b. Issuance of an unqualified opinion which is not supported by full compliance by the auditee with the applicable financial reporting framework due to material deficiencies or misstatements in the financial statements;
- c. Conduct of an audit despite the lack or eventual loss of independence as provided for under the Code of Ethics for Professional Accountants in the Philippines;
- d. Conduct of any non-audit services for his statutory audit clients, if he has not undertaken the safeguards to reduce the threat to his independence;
- e. Any material misrepresentation in the reports submitted to the Bangko Sentral;
- f. Failure to comply with the provisions set forth under Sec. 133-N;
- g. Refusal for no valid reason, upon lawful order of the Bangko Sentral, to submit requested documents in connection with an ongoing investigation. The external auditor shall, however, be made aware of such investigation; and
- h. Failure to obtain from the Securities and Exchange Commission an accreditation appropriate to the client's category provided under Sec. 133-N on the appointment of external auditor.

Section 2. Procedures and Effects of Delisting/Suspension

- a. On the basis of the results of the assessment of the quality of audited financial statements and evidence on the existence of the grounds for suspension or delisting under Section 1 above, the external auditor shall be notified in writing by the appropriate supervising department of the Bangko Sentral of the existence of the ground for his/her suspension or delisting in the List of Selected External Auditors for BSFIs and shall be allowed to submit within fifteen (15) calendar days from receipt of such notice an explanation on why he/she should not be suspended/delisted, together with the evidence in support of his/her position.

An external auditor shall only be suspended or delisted after due notice and opportunity to defend/clear himself/herself.

- b. Failure of the external auditor concerned to reply within the period prescribed under Item "a" above, shall be considered as a waiver on his/her part of the opportunity to defend/clear himself/herself. In this respect, the appropriate supervising department of the Bangko Sentral shall proceed with the evaluation of the case based on available records/evidence.
- c. Upon approval by the Monetary Board, the external auditor concerned shall be informed in writing by the appropriate supervising department of the Bangko Sentral of his/her suspension or delisting in the List of Selected External Auditors for BSFIs.
- d. A suspended or delisted external auditor shall be automatically included in the Bangko Sentral's Watchlist Disqualification File "B" (temporary).
- e. The Securities and Exchange Commission shall be immediately informed of the suspension or delisting of the external auditor.
- f. Suspended external auditors may re-apply for inclusion in the List of the Selected External Auditors for BSFIs after the lapse of five (5) years from the date of effectivity of the suspension.

(Circular No. 1040 dated 20 May 2019)

¹ Accrediting Agency duly designated by the member-agency of the Financial Sector Forum, comprising of the Bangko Sentral ng Pilipinas, Securities and Exchange Commission, Insurance Commission, and Philippine Deposit Insurance Corporation.

**QUALIFICATION REQUIREMENTS
FOR A BANK/NON-BANK FINANCIAL INSTITUTION APPLYING FOR
ACCREDITATION TO ACT AS TRUSTEE ON ANY MORTGAGE OR BOND
ISSUED BY ANY MUNICIPALITY, GOVERNMENT-OWNED OR
CONTROLLED CORPORATION, OR ANY BODY POLITIC
(Appendix to Sec. 1005-N)**

A bank/NBFI applying for accreditation to act as trustee on any mortgage or bond issued by any municipality, government- owned or controlled corporation, or any body politic must comply with the following requirements:

- a. It must be a bank or NBFI under Bangko Sentral supervision;
- b. It must have a license to engage in trust and other fiduciary business;
- c. It must have complied with the minimum capital accounts required under existing regulations, as follows:

UBs and KBs	The amount required under existing regulations or such amount as may be required by the Monetary Board in the future.
Branches of Foreign Banks	The amount required under Foreign Banks existing regulations.
Thrift Banks	₱650.0 million or such amounts as may be required by the Monetary Board in the future.
NBFIs	Adjusted capital of at least ₱300.0 million or such amount as may be required by the Monetary Board in the future.
- d. Its risk-based capital adequacy ratio is not lower than twelve percent (12%) at the time of filing the application;
- e. The articles of incorporation or governing charter of the institution shall include among its powers or purposes, acting as trustee or administering any trust or holding property in trust or on deposit for the use, or in behalf of others;
- f. The by-laws of the institution shall include among others, provisions on the following:
 - (1) The organization plan or structure of the department, office or unit which shall conduct the trust and other fiduciary business of the institution;
 - (2) The creation of a trust committee, the appointment of a trust officer and subordinate officers of the trust department; and
 - (3) A clear definition of the duties and responsibilities as well as the line and staff functional relationships of the various units, officers and staff within the organization.
- g. The bank's operation during the preceding calendar year and for the period immediately preceding the date of application has been profitable;
- h. It has not incurred net weekly reserve deficiencies during the eight (8) weeks period immediately preceding the date of application;
- i. It has generally complied with banking laws, rules and regulations, orders or instructions of the Monetary Board and/or Bangko Sentral Management in the last two preceding examinations prior to the date of application, particularly on the following:
 - (1) election of at least two (2) independent director;
 - (2) attendance by every member of the board of directors in a special seminar for board of directors conducted or accredited by the Bangko Sentral;
 - (3) the ceilings on credit accommodations to DOSRI;
 - (4) liquidity floor requirements for government deposits;
 - (5) single borrower's loan limit; and
 - (6) investment in bank premises and other fixed assets.
- j. It maintains adequate provisions for probable losses commensurate to the quality of its assets portfolio but not lower than the required allowance for credit losses as determined by the Bangko Sentral;

- k. It does not have float items outstanding for more than sixty (60) calendar days in the "Due From/To Head Office/Branches/Other Offices" accounts and the "Due from Bangko Sentral" account exceeding one percent (1%) of the total resources as of date of application;
- l. It has established a risk management system appropriate to its operations characterized by clear delineation of responsibility for risk management, adequate risk measurement systems, appropriately structured risk limits, effective internal controls and complete, timely and efficient risk reporting system;
- m. It has a CAMELS Composite Rating of at least "3" in the last regular examination with management rating of not lower than "3"; and
- n. It is a member of the PDIC in good standing (for banks only).

Compliance with the foregoing as well as with other requirements under existing regulations shall be maintained up to the time the trust license is granted. A bank that fails in this respect shall be required to show compliance for another test period of the same duration.

REGISTRATION PROCEDURES FOR RTC/MC/FXD
(Appendix to Sec. 901-N on Requirements for registration)

Registration constitutes a two-stage process. Stage 1 is a preliminary screening process for Bangko Sentral to determine if applicant is eligible for registration. In Stage 2, the eligible applicant is invited to submit supporting documents to complete the registration process.

A. First Stage

The new applicant shall submit the following for evaluation:

1. Application letter;
2. Business plan including target markets; and
3. List of owners/controlling shareholders, directors, and principal officers, as applicable.

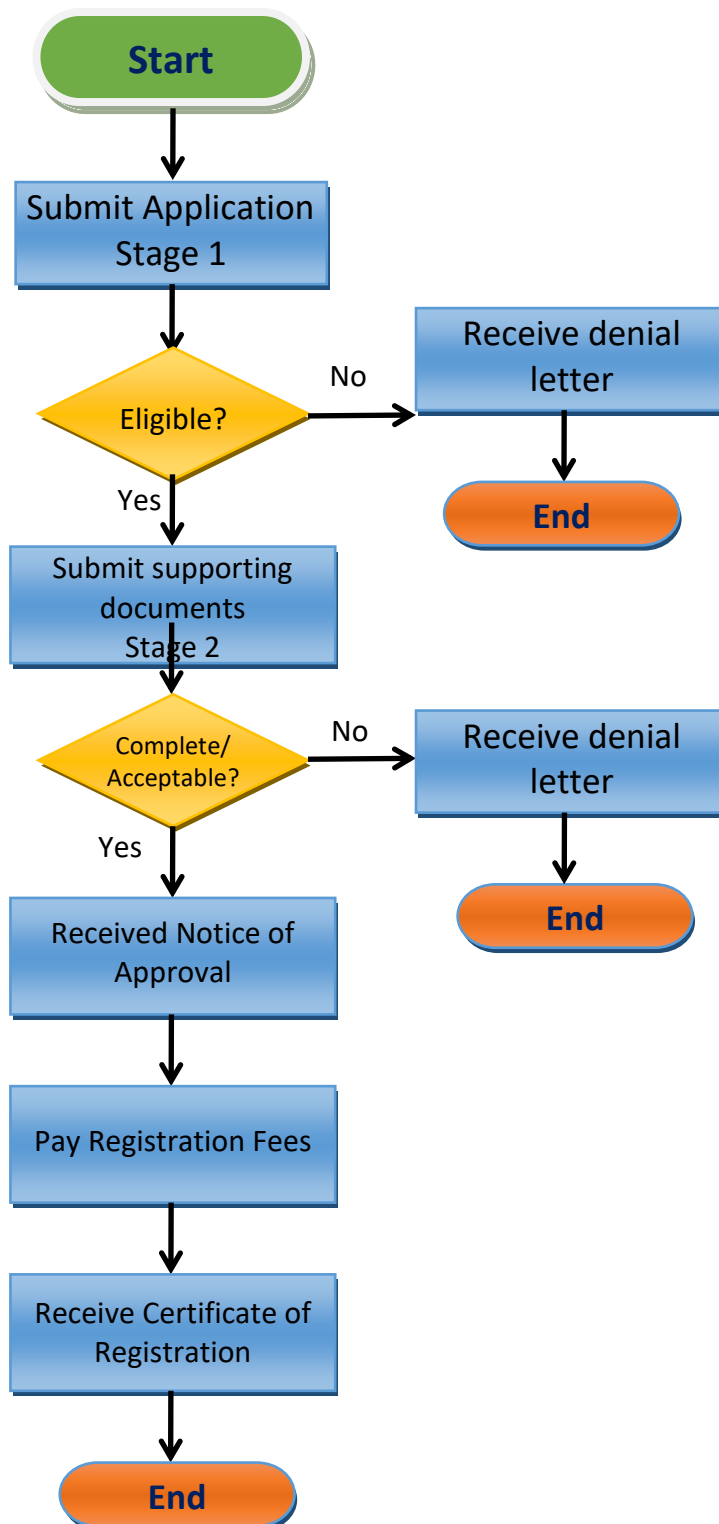

B. Second Stage

If the applicant is deemed eligible in Stage 1, the applicant shall be invited to submit a notarized Application for Registration to Operate a Money Service Business, accompanied by the following documents:

1. Notarized Deed of Undertaking (*Appendix N-8*);
2. Compliance with fitness and propriety requirements by the proprietor, partners, directors, president or officer of equivalent rank and function, and over-all head of the money service business operation and the head of the compliance unit, as the case maybe. For this purpose, applicants shall be required to submit the following:
 - a. Personal Data and Authorization Form (*Appendix N-9*);
 - b. NBI Clearance, or its equivalent, if issued in foreign jurisdiction; and
 - c. Proof of attendance to the mandatory training on anti-money laundering/combating the financing of terrorism;
3. Business license/permit for the current period¹; and
4. Proof of provisional registration with the Anti-Money Laundering Council Secretariat.

(Circular Nos. 1039 dated 3 May 2019 and 942 dated 20 January 2017)

¹ The entity name, business address and activity(ies) indicated therein should be consistent with the business registration with the DTI/SEC/CDA, as applicable. The details in said business permit shall be used as basis in the issuance of Certificate of Registration.

DEED OF UNDERTAKING

I/We (the Proprietor/Partners/Members of the Board of Directors) and key executive officers of (Name of Institution), a legal entity duly authorized to operate under the laws of the Philippines, with principal place of business at _____, by these presents, do hereby obligate ourselves, individually and collectively, to undertake and ensure:

1. Strict compliance with all the requirements, rules and regulations of the Bangko Sentral regarding the registration and operations of money service business, as well as the provisions of Republic Act (R.A.) No. 9160 [The Anti-Money Laundering Act (AMLA) of 2001], as amended, R.A. No. 10168 (The Terrorism Financing Prevention and Suppression Act of 2012) and their implementing rules and regulations;
2. Responsibility for any violation of the provisions of R.A. No. 9160 (The AMLA of 2001), as amended, R.A. No. 10168 (The Terrorism Financing Prevention and Suppression Act of 2012), and their implementing rules and regulations, and for possible sanctions prescribed under Section 36 of R.A. No. 7653, as amended, (The New Central Bank Act) and other applicable laws, rules and regulations;
3. Financial capacity to organize and operate a money service business and full compliance with the minimum capitalization prescribed under Sec. 901-N (*Requirements for registration*);
4. Compliance with the requirements on customer due diligence, covered and suspicious transaction reporting, and record keeping and retention;
5. Development, adoption and dissemination to all employees concerned of a Money Laundering and Terrorist Financing Prevention Program (MTPP);
6. Exclusive use of bank account/s in the name of the registered entity in its official business transactions and to provide a certified list of all bank account/s supported by confirmation from depository bank/s which shall be subject to Bangko Sentral inspection/ examination for anti-money laundering (AML)/combating the financing of terrorism (CFT) purposes;
7. Notification of the appropriate supervising department of the Bangko Sentral within the prescribed deadline of the following events: (a) commencement of operations; (b) change of registered/business name; (c) new office/s; (d) new/terminated tie-up partner/s; (e) transfer of location of office/s; (f) additional money service business; (g) closure of office/s; and (h) closure of business;
8. Prior approval from the appropriate supervising department of the Bangko Sentral for any change in ownership or control;
9. Strict compliance with the requirements of maintenance of records and submission of required reports;
10. Maintenance of an internal control system commensurate to the nature, size and complexity of the business;
11. Adoption of minimum standards of consumer protection in the areas of disclosure and transparency, protection of client information, fair treatment, effective recourse and financial education pursuant to the MORNBF - N Regulations;
12. Compliance with the applicable provisions of the Information Technology Risk Management Framework of the MORNBF - N Regulations;
13. Payment to the Bangko Sentral of the following fees: (a) registration fee; (b) annual service fee; (c) metal plate; and (d) processing fee for the replacement of Bangko Sentral Certificate of Registration;
14. Strict compliance with the transactional requirements on the large value pay-outs and the sale of foreign currencies, and obtaining prior approval from the appropriate supervising department of the Bangko Sentral before transacting higher limits on the sale of foreign currencies;

15. Strict compliance with possible monetary sanctions/penalties and other sanctions as imposed by the Bangko Sentral;
16. Submission of the complete list of our foreign or local counterparties, including their contact details (i.e., business address, contact person and its numbers) *(this provision is applicable to Remittance and Transfer Company [RTC] only)*;
17. Contracting with counterparty(ies) that is/are licensed/authorized/ registered to engage in remittance business and is/are subject to the AML/CFT laws of the country where it operates *(this provision is applicable to RTC only)*;
18. Responsibility for the Remittance Sub-Agent's compliance with all applicable AML/CFT laws, rules and regulations (this provision is applicable to RTC only);
19. Timely renewal of the business permits of all of its offices, which indicate the line of business, from the city or municipality having territorial jurisdiction over the place of establishment and operation of the respective offices; and
20. Attendance of the proprietor, partners, directors, president or officer of equivalent rank and function and head of the money service business operation and the compliance unit to a seminar on AML/CFT laws, rules and regulations, before start of operations, conducted by the Bangko Sentral, AML Council Secretariat, or any reputable training provider.

For this purpose, [Name of Institution] shall be responsible in ascertaining whether the external training provider has an adequate track record of successfully conducting training programs preferably on financial institution-oriented courses including, but not limited to, AML/CFT training.

BASIC GUIDELINES IN SETTING UP OF ALLOWANCE FOR CREDIT LOSSES
(Appendix to Sec. 122-N (Credit classification and provisioning))

BSFIs with credit operations that may not economically justify a more sophisticated loan loss estimation methodology or where practices fall short of expected standards shall, at a minimum, be subject to the following guidelines:

As a general rule, Especially Mentioned and Substandard – Underperforming [e.g., substandard accounts that are unpaid or with missed payment of less than ninety (90) days] shall be considered as Stage 2 accounts, while Substandard Non-performing, Doubtful, and Loss accounts shall be considered as Stage 3 accounts.

I. Individually Assessed Credit Exposures¹

- Loans and other credit exposures with unpaid principal and/or interest shall be classified and provided with allowance for credit losses (ACL) based on the number of days of missed payments as follows:

For unsecured loans and other credit exposures:

No. of Days Unpaid/with Missed Payment	Classification	Minimum ACL	Stage
31 – 90 days	Substandard (underperforming)	10%	2
91 – 120 days	Substandard (non-performing)	25%	3
121 – 180 days	Doubtful	50%	3
181 days and over	Loss	100%	3

For secured loans and other credit exposures:

No. of Days Unpaid/with Missed Payment	Classification	Minimum ACL	Stage
31 – 90 days*	Substandard (underperforming)	10%	2
91 – 180 days*	Substandard (non-performing)	10%	3
181 – 365 days	Substandard (non-performing)	25%	3
Over a year – 5 years	Doubtful	50%	3
Over 5 years	Loss	100%	3

** When there is imminent possibility of foreclosure and expectation of loss, ACL shall be increased to 25%.*

Provided, That where the quality of physical collaterals or financial guarantees securing the loans and advances are determined to be insufficient, weak or without recoverable values, such loans and advances shall be treated as if these are unsecured.

- Loans and other credit exposures that exhibit the characteristics for classified accounts described under Sec. 122-N (Credit classification and provisioning) shall be provided with ACL as follows:

Classification	Minimum ACL	Stage
Especially Mentioned	5%	2
Substandard – Secured	10%	2 or 3 ²
Substandard – Unsecured	25%	2 or 3 ²
Doubtful	50%	3
Loss	100%	3

- Unsecured loans and other credit accommodations classified as “Substandard” in the last two (2) internal credit reviews which have been continuously renewed/extended without reduction in principal and is not in process of

¹ Other credit exposures include exposures under the scope of PFRS 9, such as investments in debt securities measured at fair value through other comprehensive income and amortized cost, loan commitments, sales contract receivables, accounts receivables, accrued interest receivables, and advances.

² The stage depends on whether the accounts are classified as non-performing (Stage 3) or underperforming (Stage 2).

collection, shall be downgraded to “Doubtful” classification and provided with a fifty percent (50%) allowance for credit losses;

4. Loans and other credit accommodations under litigation which have been classified as “Pass” prior to the litigation process shall be classified as “Substandard” and provided with twenty percent (25%) allowance for credit losses.
5. Loans and other credit accommodations that were previously classified as “Pass” but were subsequently restructured shall have a minimum classification of EM and provided with a five percent (5%) allowance for credit losses, except for loans which are considered non- risk under existing laws, rules and regulations.
6. Classified loans and other credit accommodations that were subsequently restructured shall retain their classification and provisioning until the borrower has sufficiently exhibited that the loan will be fully repaid.

II. Collectively Assessed Loans¹ and Other Credit Exposures

1. Current “Pass” loans and other credit accommodations should be provided with a reasonable level of collective allowance, using historical loss experience adjusted for current conditions.
2. Loans and other credit exposures with unpaid principal and/or interest shall be classified and provided with ACL based on the number of days of missed payments as follows:

For unsecured loans and other credit exposures:

No. of Days Unpaid/with Missed Payment*	Classification	Minimum ACL	Stage
1 – 30 days	Especially Mentioned	2%	2
31 – 60 days / 1 st restructuring	Substandard	25%	2 or 3 ²
61 – 90 days	Doubtful	50%	3 ³
91 days and over / 2 nd restructuring	Loss	100%	3

* Par for microfinance loans

For secured and other credit exposures:

No. of Days Unpaid/with Missed Payment	Classification	ACL %		Stage
		Other types of collateral	Secured by real estate	
31 – 90 days	Substandard (underperforming)	10	10	2
91 – 120 days	Substandard (non-performing)	25	15	3
121 – 360 days	Doubtful	50	25	3
361 days – 5 years	Loss	100	50	3
Over 5 years	Loss	100	100	3

Provided, That where the quality of physical collaterals or financial guarantees securing the loans and advances are determined to be insufficient, weak or without recoverable values, such loans and advances shall be treated as if these are unsecured.

¹ This includes microfinance loans, micro enterprises and small business loans and consumer loans such as salary loans, credit card receivables, auto loans, housing loans and other consumption loans, and other loan types which fall below the FI’s materiality threshold for individual assessment

² The stage depends on whether the accounts are classified as non-performing (Stage 3) or underperforming (Stage 2).

³ Sec. 304(Accounts considered non-performing)/303-Q/303-N(Non-performing loans) provides that doubtful accounts are considered as non-performing hence, shall be classified under Stage 3 notwithstanding the number of missed amortizations.

AGRICULTURE VALUE CHAIN - BUSINESS MODELS
(Appendix to Sec. 305-N on Agricultural Value Chain Financing Framework)

The agriculture value chain business models are characterized by the main driver of the value chain, and its rationale or objectives. The following are the typical organizational models for smallholder production:

Model	Driver of organization	Rationale
Producer-driven (Association)	<ul style="list-style-type: none"> - small-scale producers, especially when formed into groups such as associations or cooperatives; 	<ul style="list-style-type: none"> - access to new markets; - obtain higher market price; - stabilize and secure market position
Buyer-driven	<ul style="list-style-type: none"> - processors; - exporters; - retailers; - traders, wholesalers and other traditional market actors 	<ul style="list-style-type: none"> - assure supply; - increase supply volumes; - supply more discerning customers - meeting market niches and interests
Facilitator-driven	<ul style="list-style-type: none"> - NGOs and other support agencies; - National and local governments 	<ul style="list-style-type: none"> - 'make markets work for the poor'; - Regional and local development
Integrated	<ul style="list-style-type: none"> - lead firms; - supermarkets; - multi-nationals 	<ul style="list-style-type: none"> - new and higher value markets; - low prices for good quality; - market monopolies

GUIDELINES ON GRANTING OF A LICENSE/AUTHORITY

(Appendix to Sec. 101-N)

I. Guiding principle

The Bangko Sentral, the licensing authority, has the power to set criteria and reject applications that do not comply with the criteria/standards set. In this light, the Bangko Sentral is providing the following guidelines on its licensing process to establish accountability and promote transparency to banks and BSFIs wishing to apply for any licenses/authorities within the jurisdiction of the Bangko Sentral. These guidelines also aim to provide more consistency in how risk-focused supervision is applied to licensing process.

The Bangko Sentral will not restrict the scope of risk-taking activities of BSFIs consequent of the licenses and/or authorities granted: *Provided*, That these licenses and/or authorities are in line with their business model and strategic direction: *Provided, further*, That BSFIs demonstrate the capacity and ability to implement these strategies.

As indicated in the new licensing policy, applications for licenses and/or authorities are categorized as follows:

- a. *Type "A"* – applications for licenses and/or authorities where compliance with the defined prudential requirements/criteria described in Sec. 101-N is a pre-condition for applicants to be considered eligible;
- b. *Type "B"* – applications for licenses and/or authorities processed regardless of risk profile; and
- c. *Type "C"* – activities which no longer require submission of applications and processing but shall be subject to submission of reports/certification/notification within stated deadlines. However, compliance with pre-qualification requirements is subject to post verification and any false information and/or misrepresentation may be a basis for the imposition of appropriate enforcement actions described in Sec. 101-N.

II. Guidelines and procedures

1. *Process flow.* The licensing application process involves four (4) stages, to wit:

- a. *Stage 1. Eligibility test and assessment.* The Bangko Sentral shall consider an applicant's eligibility for licenses/authorities categorized as *Type "A"* in accordance with the standards and/or prudential criteria described in Sec. 101-N (*Prudential criteria*); and whether approval thereof is consistent with applicable laws, rules, regulations, policies and safety and soundness considerations.

In this regard, BSFIs shall signify to the appropriate supervising department of the Bangko Sentral its interest to apply for a license(s) or authority/ies. However, the Bangko Sentral expects each BSFI to have conducted self-assessment vis-à-vis prudential criteria and/or requirements to determine whether it is eligible and/or qualified to apply for any specific license/authority, prior to signifying its interest.

BSFIs with CAMELS composite rating of below "3", or under PCA or rehabilitation may still be considered eligible, on a case by case basis, upon showing valid justifications and/or verifiable evidence of significant compliance with the comprehensive PCA plan (PCAP)/rehabilitation plan approved by the Bangko Sentral and/or if licenses and/or authorities applied for are vital to the implementation of the PCAP/rehabilitation plan.

- b. *Stage 2. Application.* The BSFI upon receipt of notice and/or confirmation from the Bangko Sentral of its eligibility can now formally submit its application letter together with the documentary requirements, as applicable to the license/authority applied for. Applications with incomplete documentation will be returned without prejudice to re-submission of a complete application and collection of applicable fees.
- c. *Stage 3. Processing.* Upon receipt of a complete application, the appropriate supervising department of the Bangko Sentral shall proceed in preparing the memorandum elevating to the appropriate approving authority of the Bangko Sentral its recommended action/s.
- d. *Stage 4. Decision.* Within five (5) working days upon approval and/or confirmation from the appropriate authority of the Bangko Sentral, BSFIs shall expect to be notified of the decision on their request/application.

The Bangko Sentral may request information and/or documents aside from the minimum documentary requirements for each type of license/authority to arrive at an informed decision. It may also conduct limited inspection or validation, when warranted.

The Bangko Sentral may approve any application of an eligible applicant after evaluating the application and considering relevant factors. Likewise, the Bangko Sentral may deny applications if (a) significant supervisory or compliance concerns exist or (b) the applicants fail to provide material information necessary to make an

informed decision.

2. *Responsibility*

The Bangko Sentral expects each applicant to prepare accurately and completely each application/certification/reports submitted to the appropriate supervising department of the Bangko Sentral.

By virtue of the application, the applicant authorizes the Bangko Sentral to conduct an on-site evaluation or inspection for the purpose of ascertaining compliance with relevant laws, rules, regulations and/or directives, and/or applicant's risk management capabilities, when warranted.

For this purpose, the applicant shall include in its application letter the authorization in favor of the Bangko Sentral giving its consent to the conduct of on-site verification of the documents and/or representations stated in the application filed in connection with the license or authority applied for.

3. *Fees*

An applicant, depending on its classification and type of license/authority applied for, shall be assessed the following fees per application:

- i. *Processing fee* -shall be charged upon filing of an application and is non-refundable. In case of re-submission of application that is returned for incomplete documentation, another processing fee shall be charged anew; and
- ii. *Licensing fee* -shall be charged to certain application upon approval.

The licensing fee shall be net of the processing fee.

For banks, assessed fees shall be debited from the applicants' demand deposit account with the Bangko Sentral upon the lapse of fifteen (15) calendar days reckoned from receipt of Bangko Sentral's decision on its request/application. For this purpose, banks shall, upon filing of an application, state in its application letter the authority to debit their demand deposit account with the Bangko Sentral for the applicable fees to the license or authority applied for. Otherwise, assessed fees shall be paid to the Bangko Sentral.

4. *Post decision*

Unless otherwise prescribed by the Bangko Sentral, an applicant may file a new application for a denied and/or withdrawn application after the lapse of six (6) months reckoned from the date of denial/withdrawal: *Provided*, That any weaknesses, deficiencies and/or non-compliance with any laws, rules, regulations and/or directives that made the applicants ineligible have already been satisfactorily addressed.

(Circular No. 947 dated 15 February 2017)

NATIONAL RETAIL PAYMENT SYSTEM (NRPS) FRAMEWORK
[Appendix to Sec. 501-N (Adoption of NPRD Framework)]

A. NRPS Framework

The NRPS is a policy and regulatory framework that aims to establish a safe, efficient, and reliable electronic retail payment system in the Philippines. Given that retail payment systems contribute to the stability and efficiency of the financial system as a whole, the attainment of the NRPS vision will help achieve higher economic growth and enhance overall competitiveness of our economy.

With the rapid evolution of retail payments due to advancements in technology, retail payments related activities of BSFIs introduced a complex interplay of different types of risks. Thus, while the Bangko Sentral promotes the modernization of the country's retail payment system in accordance with the NRPS Framework, it is critical to ensure that enabling policies and a multifaceted approach to strengthening risk management are timely adopted, and greater attention is devoted to retail payments activities of BSFIs such as clearing and settlement.

In carrying out these activities, BSFIs are expected to adhere to the NRPS Framework and measures aimed at strengthening risk management as set forth in Sec. 803 and this Appendix. Hence, the retail payment system and activities that BSFIs participate in should establish the following:

1. Strengthened risk management through a better, holistic and multi-stakeholder approach to governance, and an enhanced transparency of clearing and settlement transactions classified according to risk profile.
2. Augmented efficiencies and effectiveness in the retail payment system by minimizing duplicative efforts, promoting interoperability among retail payment system participants, standardizing clearing and settlement rules, and harmonizing various initiatives towards the achievement of the shared goals of safe, reliable and efficient retail payment system.
3. Continued compliance with Bangko Sentral rules and regulations particularly on information technology, consumer protection, and AML/CFT.

Retail payments under the NRPS Framework are payments that meet at least one of the following characteristics: (i) the payment is not directly related to a financial market transaction; (ii) the settlement is not time-critical; (iii) the payer, the payee, or both are individuals or non-financial organizations; and (iv) either the payer, the payee, or both are not direct participants in the payment system that is processing the payment. This definition of retail payment includes person-to-person, person-to-business, business-to-person, business-to-business, person/business-to-government, and government-to-person/business payments.¹ On the other hand, large-value payments refer to payments, generally of very large amounts, which are mainly exchanged between banks or between participants of financial markets and that usually require urgent and timely settlement.

The Bangko Sentral, as a central bank, generally plays a variety of essential roles in the payment system by being an operator of the real-time gross settlement system (RTGS), an overseer in core payment arrangements, a user and participant of payment services, and, most critically, a catalyst for payment system reform. It is through the performance of these roles that the Bangko Sentral seeks to acquire a broader and holistic perspective on the role and the status of the payment system in the financial system and the economy in accordance with one of the pillars of central banking of promoting safe and efficient payment systems in the country.

1. Key Principles
 - a. Governance of the payment system shall be separate and distinct from the actual clearing operations to enable the retail payment system participants to effectively and efficiently deploy resources to focused and specialized activities. The governance of the payment system includes the establishment and implementation of standards and rules among payment system participants.
 - b. Sound governance shall be performed by an industry-led self-governing body that is duly recognized and overseen by the Bangko Sentral.
 - c. All qualified BSFIs may apply to be direct clearing participants and, as such, participate in the governance structure.

¹ Developing a comprehensive National Retail Payments Strategy, Financial Infrastructure Systems Policy and Research, World Bank, October 2012, available at http://siteresources.worldbank.org/FINANCIALSECTOR/Resources/Developing_a_comprehensive_national_retail_payments_strategy_for_G_PW_IO_20%2Bv1%29.pdf.

- d. All clearing participants shall subscribe to and comply with the PSMB-formulated principles, policies, and business rules that will govern the payments system.
- e. All clearing shall be done within the NRPS governance structure. Bilateral clearing arrangements outside of the NRPS governance structure are considered as undertakings that carry risks that cannot be identified, measured, monitored and/or controlled, nor can said undertakings be properly considered in attaining a holistic perspective and improving governance of the retail payment system. Hence, bilateral arrangements outside of the NRPS governance structure shall not be allowed and failure to comply therewith shall result in deployment of appropriate supervisory actions from the Bangko Sentral.
- f. All significant retail payment streams shall be covered by an ACH.
- g. Non-discriminatory participation shall be espoused in the retail payment system by allowing all qualified direct clearing participants to participate in the formulation of standards and rules, as well as participate in business arrangements.
- h. A reasonable market-based and transparent pricing mechanism shall be adopted by all BSFIs which are clearing participants. Reasonable service fees shall be allowed only for actual services rendered directly related to the delivery of electronic financial and payment services to clients of a BSFI.
- i. Bangko Sentral policies and supervisory actions, not directly involving payments governance within the scope of the PSMB, shall be addressed directly to the individual payment system participants as BSFIs.

2. Objectives:

- a. To enable effective and efficient interface and interoperability using shared and resilient infrastructure;
- b. To foster innovation and new business models;
- c. To promote fair access and competition amongst NRPS participants;
- d. To facilitate the provision of a wide range of payment products and services with needed certainty, affordability (based on a reasonable market-based pricing methodology) and trust; and
- e. To make relevant information on retail payment system available to concerned stakeholders.

The NRPS Framework espouses the cooperation of different competitors, or what is known as "*coopetition*", in the domestic retail payments by delineating areas to be covered between the cooperative and the competitive spheres.

It is recognized that certain areas are dedicated for cooperation and collaboration among BSFIs participating in the retail payment system towards the common goals of safety, efficiency, reliability and resiliency. This cooperative sphere centers on the clearing and settlement activities of BSFIs which shall collaborate through the formulation and implementation of clearing and settlement standards, rules, and agreements under a formal governance structure that conforms to the NRPS principles.

To complement the cooperative sphere is the competitive sphere where the NRPS principles promote competition through innovation in the delivery of quality and cost-effective financial products and services, the creation of new business models customized to the needs of target consumers, and the development of services with a higher level of security, among others. The competitive sphere shall be governed by reasonable, transparent and effective consumer pricing mechanisms to allow BSFIs cost-recovery and fair financial returns. Each BSFI shall be responsible for prescribing its pricing mechanisms for its financial products and services taking into consideration, among others, the nature of the product or service, the market segment to be served and the costs incurred to provide such product or service.

B. Governance - PSMB

The PSMB is an industry-led self-governing body that is duly recognized and overseen by the Bangko Sentral.

To attain a holistic perspective and multi-stakeholder organized structure that would bring about good governance in the retail payment system, BSFIs shall adhere to the following key principles when engaging in clearing activities and must do so only within the NRPS governance structure.

1. Key Principles

- a. The retail payment transactions covered under the NRPS governance structure shall be as follows:
 - i. For card-based instruments, the card shall be both issued and acquired locally; and
 - ii. For online, mobile, or other electronic payment instructions/instruments, the account of payer (sender) and account of payee (recipient) shall be both maintained with BSFIs that are licensed to offer EFPS.

- b. The PSMB shall be a not-for-profit juridical entity.
 - c. The PSMB shall adopt a Charter in consultation with the Bangko Sentral.
 - d. The PSMB membership criteria shall, at all times, be consistent with the NRPS Framework and Bangko Sentral regulations, in addition to the following principles:
 - i. All qualified direct clearing participants should be members of the PSMB.
 - ii. To be a PSMB member, a BSFI shall be a participant in at least one (1) ACH and actively participate in an ACH within one (1) month of joining the PSMB.
 - iii. Each PSMB member shall be entitled to only one (1) vote.
 - e. The PSMB shall be funded by the members on an agreed basis.
 - f. The PSMB shall be governed by a PSMB board which shall observe the following principles:
 - i. The PSMB board shall have multi-stakeholder representation in accordance with the volume of the risk-taking activities, such as clearing volume, within a specified time frame [e.g., immediately preceding twenty-four (24) months]. The basis for computing the clearing volume across all ACHs or payment streams shall include all payment streams with clearing activities as of the date when the election of the PSMB board is called, except if a valid reason is shown to limit the parameters.
 - ii. The PSMB board shall also abide by sound corporate governance practices which may include, but is not limited to, allocating seat/s for independent board member/s or board member/s that represent/s the broader public interest and has/have competence and experience in the payments field.
 - iii. The PSMB board members shall appoint as official representative their chief executive officer (CEO) and designate a formal alternate who can act with full authority (e.g., voting, approval, decision-making, and others).
 - iv. Each PSMB board member shall have one (1) vote.
 - v. No two (2) PSMB board members shall come from the same group of companies where one is majority-owned or controlled by the other company.
 - vi. The Chairperson shall be elected among PSMB board members and shall not serve for two (2) successive terms.
 - g. The PSMB shall be independent from the clearing switch operator/s with respect to business operations.
 - h. All BSFIs that are part of the NRPS governance structure shall subscribe to and comply with the PSMB-formulated principles, policies, and business rules that will govern the payments system provided such PSMB-formulated principles, policies and business rules are in conformity with the NRPS Framework and principles as well as applicable laws and regulations.
2. Objectives
- a. The PSMB will provide sound governance to the retail payment system and serve as a forum of collaboration for ensuring appropriate conditions for retail payments in the country. Towards this end, the PSMB will perform these functions with respect to its members:
 - i. Ensure compliance by PSMB members with criteria, standards and rules promulgated and adopted by the PSMB's membership and PSMB board, as applicable.
 - ii. Set policies and standards on clearing activities of PSMB members.
 - iii. Standardize retail clearing agreements across payment streams, which may include minimum guideline on the content of service level agreements with CSOs.
 - iv. Manage members' conformance to multilateral retail clearing agreements.
 - v. Review applications for establishment of ACHs and to accordingly approve the formation thereof to ensure, among others, that the NRPS principle of a payment stream falling only under one (1) ACH is observed by PSMB members.

- vi. Prescribe policies and rules to promote visibility of retail clearing and resulting settlement positions to manage risks resulting from or associated with clearing and settlement activities.
- vii. Set forth policies, rules and/or standards to ensure that no anti-competitive activities occur in clearing operations of PSMB members.
- viii. Promote fair access to the payment system amongst PSMB members.
- ix. Enable effective and efficient interface and interoperability using shared and resilient infrastructure.
- x. Establish a dispute resolution mechanism for PSMB members on matters not covered or cannot be resolved under the ACH dispute resolution framework.
- xi. Provide a clearing environment that will support payments innovation and the adoption of new business models by the payment system participants.

C. Automated Clearing House (ACH)

The ACH is a multilateral legally binding agreement amongst clearing participants. The ACH shall govern clearing and settlement determination.

To promote interoperability and standardize clearing and settlement rules and procedures, BSFIs are expected to observe the following key principles in forming and participating in ACHs under the NRPS governance structure.

1. Key Principles

- a. ACHs shall be created and differentiated based on payment streams, which comprise of payment instruments or instructions, business rules, clearing activities and risk considerations which are of similar nature or which create similar risk profiles.
- b. A payment stream can fall under only one (1) ACH.
- c. The formation of and participation in an ACH shall be open to all qualified clearing participants.
- d. The formation of an ACH shall be considered a business arrangement to be agreed upon between participants of an ACH.
- e. An ACH shall engage the services of only one (1) clearing switch operator.
- f. PSMB members may be part of more than one (1) ACH Participant Group and/or participate in more than one (1) ACH, provided the PSMB member meets the requirements for participating in such ACH.
- g. At least two (2) direct clearing participants can initiate the creation of an ACH subject to the recognition of the PSMB Board, or in the absence of a PSMB, the Bangko Sentral.

2. Salient Features

- a. ACH participants shall elect representatives to an ACH Participant Group, which once recognized by the PSMB, shall draw up and implement ACH rules and agreements and contract a qualified clearing switch operator. To assist in drafting the ACH agreements, the Participant Group may nominate a Working Group to formulate draft agreements subject to the former's approval.
- b. The assignment of a new ACH to an existing or new ACH Participant Group shall be approved by the PSMB Board.
- c. Where a new ACH Participant Group has to be formed, it shall be recognized by the PSMB Board once its charter has been accepted by the ACH participants and meets the PSMB criteria for an ACH Participant Group.

D. Clearing Switch Operator (CSO)

The CSO provides clearing switch services.

To augment efficiencies in the retail payment system while ensuring a robust and resilient infrastructure underlying retail payment transactions of BSFIs, BSFIs should observe the following key principles in engaging the services of CSOs relative to the delivery of a retail payment product or service within the NRPS governance structure.

1. Key Principles

- a. The operations of the CSO that services an ACH shall be limited to the provision of clearing and other services that do not compete with services offered by BSFIs participating in the ACH.
- b. Clearing switch operations shall be conducted effectively and efficiently consistent with international standards as this is a critical prerequisite for the functioning of all the various systems supporting and underlying retail payment services.
- c. The CSO shall have a reliable, resilient, robust, and secure infrastructure to ensure consistency and continuity of services under different operating conditions.
- d. The CSO shall be a duly licensed entity in the Philippines. Entities organized under the laws of countries other than the Philippines shall secure a license to do business in the Philippines and comply with the Foreign Investments Act of 1991 as well as other applicable laws and regulations.
- e. A CSO can extend service to multiple ACHs.
- f. Each ACH, through their designated CSO, shall individually settle their clearing results through the RTGS system operated by the Bangko Sentral.

(Circular No. 980 dated 06 November 2017)

**GUIDELINES ON THE ADOPTION OF PHILIPPINE FINANCIAL REPORTING STANDARDS 9
(PFRS 9) FINANCIAL INSTRUMENTS – IMPAIRMENT
(Appendix to Sec. 141-N)**

Section 1. Expected Credit Loss Model

Bangko Sentral supervised financial institutions (BSFIs) shall adopt the expected credit loss (ECL) model in measuring credit impairment, in accordance with the provisions of PFRS 9. In this respect, BSFIs shall recognize credit impairment/allowance for credit losses even before an objective evidence of impairment becomes apparent. BSFIs shall consider past events, current conditions, and forecasts of future economic conditions in assessing impairment.

- a) BSFIs shall apply the ECL model on credit exposures covered by PFRS 9, which include the following:
- loans and receivables that are measured at amortized cost;
 - investments in debt instruments that are measured at amortized cost or at fair value through other comprehensive income (FVOCI); and
 - credit commitments and financial guarantee contracts that are not measured at fair value through profit or loss (FVTPL).
- b) Credit exposures shall be classified into three stages using the following time horizons in measuring ECL:

Stage of credit impairment	Characteristics	Time horizon in measuring ECL
Stage 1	- Credit exposures that are considered “performing” and with no significant increase in credit risk since initial recognition or with low credit risk	Twelve (12) months
Stage 2	- Credit exposures that are considered “under-performing” or not yet non-performing but with significant increase in credit risk since initial recognition	Lifetime
Stage 3	- Credit exposures with objective evidence of impairment, thus, considered as “non-performing”	Lifetime

- c) BSFIs shall promptly recognize and maintain adequate allowance for credit losses at all times. It shall adopt the principles provided under the Enhanced Standards on Credit Risk Management¹ in implementing sound and robust credit risk measurement methodologies that adequately considers ECL. In this respect, the ECL methodology shall not be considered as a separate and distinct process but as an important element of the entire credit risk management process.

Section 2. Twelve (12)-Month ECL

- a) BSFIs shall consider reasonable and supportable information, including forward-looking information that affect credit risk in estimating the 12-month ECL. BSFIs shall exercise experienced credit judgment and consider both qualitative and quantitative information that may affect the assessment.
- b) Zero allowance for exposures under Stage 1 shall be rare. It shall be expected only for exposures with zero percent (0%) credit risk-weight under the Risk-Based Capital Adequacy Framework, such as Philippine peso-denominated exposures to the Philippine National Government and the Bangko Sentral.

Section 3. Lifetime ECL

- a) BSFIs shall evaluate the change in the risk of default occurring over the expected life of the exposures in assessing whether these shall be moved to a lifetime ECL measure.² Although collateral will be used to measure the loss given a default, this should not be primarily used in measuring risk of a default or in transferring to different stages.
- b) BSFIs shall measure lifetime ECL of the following:
- exposures that have significantly increased their credit risk from origination (Stage 2); and
 - non-performing exposures (Stage 3).

¹ Sec. 143 and Sec. 143-Q/122-N of the Manual of Regulations for Banks (MORB) and the Manual of Regulations for Non-Bank Financial Institutions (MORNBI), respectively.

² PFRS 9 paragraph 5.5.9 provides that the assessment should be made in terms of the risk of a default and not on the expected credit loss (i.e., before consideration of the effects of credit risk mitigants such as collaterals or guarantees).

Section 4. Assessment of forward-looking information

BSFIs shall clearly demonstrate how forward-looking information, including macroeconomic factors, have been reflected in the ECL assessment and how these are linked to the credit risk drivers of the exposures. Experienced credit judgment is essential in assessing the soundness of forward-looking information and in ensuring that these are adequately supported.

Section 5. Transfers from Stage 1 to Stage 2 – Assessment of significant increase in credit risk

BSFIs shall transfer credit exposures from Stage 1 to Stage 2 if there is significant increase in credit risk from initial recognition.

- a) BSFIs shall establish well-defined criteria on what constitutes significant increase in credit risk. BSFIs shall consider a wide range of information, which includes among others, information on macroeconomic conditions, economic sector and the geographical region relevant to the borrower, and other factors that are borrower-specific. The criteria on what constitutes significant increase in credit risk shall consider, at a minimum, the list provided in PFRS 9.
- b) BSFIs shall classify exposures to Stage 2 if the exposures have potential weaknesses, based on current and/or forward-looking information, that warrant management's close attention. Said weaknesses, if left uncorrected, may affect the repayment of these exposures. BSFIs shall also classify exposures to Stage 2 if there are adverse or foreseen adverse economic or market conditions that may affect the counterparty's ability to meet the scheduled repayments in the future.
- c) The Bangko Sentral shall apply the following indicators of significant increase in credit risk in BSFIs noted to have weak credit loss methodologies:
 - exposures considered especially mentioned under Section 122-N (Credit classification and provisioning);
 - exposures with missed payment for more than thirty (30) days; and
 - exposures with risk ratings downgraded by at least two (2) grades (e.g., exposure with risk rating of "3" on the origination date was downgraded to risk rating of "5" on the reporting date) for BSFIs with below fifteen (15)-risk rating grades, and three (3) grades for BSFIs with fifteen (15) or above risk rating grades.

Section 6. Transfers from Lifetime ECL to Twelve (12)-month ECL

BSFIs shall transfer the exposures from Stage 3 (non-performing) to Stage 1 (performing) when there is sufficient evidence to support their full collection. Exposures should exhibit both the quantitative and qualitative indicators of probable collection prior their transfer. The quantitative indicator is characterized by payments made within an observation period (e.g., regularly pays during the minimum observation period). The qualitative indicator pertains to the results of assessment of the borrower's financial capacity (e.g., improvement in counterparty's situation).

As a general rule, full collection is probable when payments of interest and/or principal are received for at least six (6) months.

BSFIs shall observe the following guidelines for exposures that were restructured:

- a) Non-performing restructured exposures that have exhibited improvement in creditworthiness of the counterparty may only be transferred from Stage 3 to Stage 1 after a total of one (1) year probation period [i.e., six (6) months in Stage 3 before transferring to Stage 2, and another six (6) months in Stage 2 before transferring to Stage 1; or directly from Stage 3 to Stage 1, without passing through Stage 2, after twelve (12) months]; and
- b) Restructured accounts classified as "performing" prior to restructuring shall be initially classified under Stage 2. The transfer from Stage 2 to Stage 1 will follow the six (6)-month rule mentioned in Item "a" of this Section.

Section 7. Multiple exposures to specific counterparties

In measuring the ECL of multiple exposures to a single counterparty or multiple exposures to counterparties belonging to a group of related entities, the following shall apply:

- a) *Exposures to non-retail counterparties.* BSFIs with multiple exposures to a non-retail counterparty shall measure ECL at the counterparty level. In particular, the BSFI shall consider all exposures to a counterparty as subject to lifetime ECL when any of its material exposure is subjected to lifetime ECL;
- b) *Exposures to a retail counterparty.* BSFIs with multiple exposures to a retail counterparty shall measure ECL at the transaction level. In particular, the BSFI may classify one transaction under Stage 1 and another transaction under Stage 3. However, BSFIs are not precluded from taking into account the potential of cross default, such that if one exposure is classified under Stage 3 all the other exposures may be classified under Stage 3; and

- c) *Exposures to counterparties belonging to a group of related entities.* BSFIs with multiple exposures to counterparties that belong to the same group of related entities shall measure ECL at the counterparty level (per entity). BSFIs shall likewise consider the status of the other counterparties belonging to the same group in determining the stage under which the exposures shall be classified.

Section 8. Recognition of Income

For purposes of preparing the prudential reports (e.g., Financial Reporting Package and Capital Adequacy Ratio report), BSFIs shall not recognize interest income on non-performing exposures, except when payment is received.

On the other hand, interest income recognized on non-performing exposures (Stage 3 accounts) for purposes of preparing the audited financial statements (AFS) shall be disclosed in the AFS. This shall likewise be included in the list of reconciling items between the prudential reports and the AFS that is being submitted to the Bangko Sentral.

Section 9. Off-balance sheet financial items

As a general rule, BSFIs shall recognize the ECLs on off-balance sheet exposures as a liability and booked as “Provisions - Others”.

On credit facilities with partial drawdown (e.g., with loan balance and an undrawn commitment), BSFIs shall observe the following rules in accordance with PFRS 7 (Financial Instruments: Disclosures):

- a) If the BSFI cannot separately identify the ECL attributable to the drawn and undrawn commitment, the provision for ECL on the off-balance sheet accounts shall be presented together with the allowance for the financial asset (contra-asset); and
- b) If the combined ECL exceeds the gross carrying amount of the financial asset, the ECL should be recognized as “Provisions - Others” (liability).

BSFIs shall look beyond the contractual date when estimating the expected losses of facilities with both loan and undrawn commitment components such as the credit card portfolio.

Section 10. Application to simple BSFIs

BSFIs with simple operations shall adopt simple loan loss methodologies fundamentally anchored on the principle of recognizing ECL. In this respect, BSFIs shall look beyond the past due/missed amortizations in classifying exposures and in providing allowance for credit losses. On the other hand, BSFIs with credit operations that may not economically justify adoption of said simple loan loss estimation methodology that is compliant with PFRS 9 shall, at a minimum, be subject to the regulatory guidelines in setting up allowance for credit losses prescribed under the *Appendix N-11*.

Section 11. General and Specific Provisions for Loan Accounts

- a) BSFIs shall treat Stage 1 provisions for loan accounts as General Provision (GP), while Stages 2 and 3 provisions shall be treated as Specific Provisions (SP).
- b) BSFIs shall set up general loan loss provision (GLLP) equivalent to 1 percent (1%) of all outstanding Stage 1 on-balance sheet loans, except for accounts considered as credit risk-free under existing regulations. BSFIs are not required to provide a 1 percent (1%) GP on other credit exposures covered by PFRS 9 such as off-balance sheet accounts and investments.
- c) Allowance for credit losses for Stages 1, 2, and 3 accounts shall be recognized in the profit or loss statement. In cases when the computed allowance for credit losses on Stage 1 accounts is less than the 1 percent GP required, the deficiency shall be recognized by appropriating the Retained Earnings (RE)¹ account. GP recognized in profit or loss as allowance for credit losses for Stage 1 accounts and the amount appropriated in RE shall be considered as Tier 2 capital subject to the limit provided under the Capital Adequacy Ratio (CAR) framework².
- d) BSFIs that use the guidelines provided under *Appendix N-11* in determining allowance for credit losses shall book the entire amount of GP in profit or loss.
- e) BSFIs shall charge against RE the increase in ECL – SP as of 01 January 2018 as a result of the change in accounting policy.

¹ BSFIs shall use Retained Earnings Reserve – Others as temporary account of Retained Earnings- General Provision (RE-GP).

² As a temporary presentation in CAR reports, the Retained Earnings (RE) included in Common Equity Tier (CET)/Core Tier 1 shall be net of RE-GP. In computing Tier 2 Capital, the General Loan Loss Provision (GLLP) shall include the RE-GP. However, the GLLP added back to on-balance sheet assets subject to risk-weight shall not include the RE-GP since when appropriating the RE, total assets is not affected.

Section 12. Expectations from Trust Entities

Consistent with the expectations from BSFIs on the adoption of PFRS 9, as provided under item “d” of Sec. 141-N, the board of directors of a trust entity (TE) shall ensure that the TE appropriately and consistently adopts PFRS 9 as part of its reporting governance process.

In this respect, the board of directors shall approve policies and guidelines relative to the impairment of financial assets under management of the TE.

The TE shall adhere to the requirements of PFRS 9 on impairment and the guidelines provided herein, to the extent applicable to the trust operations. Pursuant to item c of Section 1 of these guidelines (Expected Credit Loss Model), a TE shall promptly recognize and maintain adequate allowance for credit losses at all times.

Consistent with the provisions under Section 10 of these guidelines (Application to simple BSFIs), the following provisions shall apply to TEs:

- a) A TE with simple operations shall adopt simple loan loss methodologies fundamentally anchored on the principle of recognizing ECL. In this respect, the TE shall look beyond the past due/missed amortizations in classifying exposures and in providing allowance for credit losses.
- b) A TE with credit operations that may not economically justify adoption of said simple loan loss estimation methodology that is compliant with PFRS 9 shall, at a minimum, be subject to the regulatory guidelines in setting up allowance for credit losses prescribed under the revised *Appendix N-11*.

GUIDELINES ON EUROPAY, MASTERCARD AND VISA (EMV) IMPLEMENTATION

(Appendix to Sec. 126-N [IT Risk Management System])

A. Background

In response to the increasing sophistication of frauds perpetrated through magnetic stripe (magstripe), international payment networks have orchestrated the shift towards EMV chip-enabled card. The EMV is an interoperability standard for chipbearing smart card technology defined by EMVCo in 1994, adoption of which has resulted to significant reduction in card frauds due to skimming¹ and counterfeiting.

To outpace and manage fraudsters' shift towards jurisdictions that are still using magstripe, Bangko Sentral supervised financial institutions (BSFIs) via Circular No. 808 dated 22 August 2013 were required to migrate their entire payment network to the more secure EMV chip-enabled cards

B. Statement of Policy

It is the policy of the BSP to foster the development of safe, secure, efficient, and reliable retail payment systems, protect the integrity and confidentiality of customer accounts and information and uphold consumer protection.

C. Scope

These guidelines shall govern the migration to and implementation of EMV of all BSFIs with debit card issuing and acquiring functions. For credit card, only cash advance transaction at Automated Teller Machines (ATMs) shall be covered since other credit card transactions are governed by the rules of the international payment networks.

It is incumbent upon all affected BSFIs to ensure that other key players in the domestic payment network comply with these guidelines.

For purposes of the subject guidelines, payment transactions covered are limited to card present and contact transactions in ATMs, POS terminals and other similar devices. Guidelines governing card-not-present as well as contactless transactions shall be issued separately.

D. Definition of Terms

1. *EMV*, which stands for Europay, MasterCard and Visa, is a global standard for credit, debit and prepaid payment cards based on chip card technology. EMV chip-based payment cards, also known as smart cards, contain an embedded microprocessor, a type of small computer. The microprocessor chip contains the information needed to use the card for payment, and is protected by various security features. Chip cards are a more secure alternative to traditional magstripe payment cards.

Implementing EMV shall address the deficiencies inherent in magstripe by reducing fraud arising from counterfeit, lost and stolen card information through the following features:

- a. Authentication of the chip card to ensure that the card is genuine so as to protect against counterfeit fraud for on line-authorized transactions;
 - b. Digitally signing payment data for transaction integrity;
 - c. More robust cardholder verification to protect against lost and stolen card fraud for EMV transactions in all acceptance environments.
2. *Acquiring institution (acquirer)* is a bank or financial institution that processes credit or debit card transactions via ATM or POS terminals.
 3. *Bangko Sentral Supervised Financial Institutions (BSFIs)* include banks, non-banks with quasi-banking function (NBQB), non-bank electronic money issuers and other non-bank institutions which under existing Bangko Sentral rules and regulations and special laws are subject to Bangko Sentral supervision and/or regulation.
 4. *Co-branded cards* are Philippine-issued cards affiliated with international payment networks.
 5. *Debit cards* are payment cards linked to bank deposit or prepaid/electronic money (e-money) accounts.

¹ Skimming is the illegal copying of information from the magnetic stripe of a payment card to gain access to accounts.

6. *Domestic payment* network includes BSFIs as well as other key players such as merchants, providers of ATMs, point-of-sale (POS) terminals and similar devices, card vendors, card personalization bureaus and domestic switches responsible for processing and handling domestic transactions.
7. *Domestic switches* refer to BancNet and Megalink.
8. *EMV chip* liability shift means that the liability and responsibility for counterfeit or fraudulent transaction shall shift to the BSFI who is not EMV-compliant.
9. *EMVCo* is the governing body that manages the EMV specification.
10. *Hybrid cards* are payment cards that have both EMV chip and magstripe.
11. *International payment* networks refer to the payment networks that have global establishment. For purposes of subject guidelines, recognized international networks shall refer to Visa, Mastercard, UnionPay, Diners/Discover, American Express, and Japan Credit Bureau (JCB).
12. *Interoperability* refers to the ability of Philippine cardholders to transact at Philippine ATM and POS terminals, regardless of network affiliation or branding of the card.
13. *Issuing institution (issuer)* is a bank or non-bank financial institution that issues payment cards, whether proprietary or co-branded, to consumers.
14. *Payment cards* are cards that can be used by cardholders and accepted by terminals to withdraw cash and/or make payment for purchase of goods or services, fund transfer and other financial transactions. Typically, payment cards are electronically linked deposit, prepaid or loan/credit accounts.
15. *Philippine domestic EMV specification* refers to the specification or standards based on EMV that shall be adopted in the Philippine financial market for the proprietary or non-co-branded cards.
16. *Proprietary cards* are Philippine-issued cards without international payment network affiliation.
17. *Technical fallback* is a state in which a chip cannot be used and another type of entry, such as magstripe, is used to complete a transaction.

E. General Rule

In line with the declaration of policy, BSFIs, in migrating to EMV, shall consider the following:

1. BSFIs shall maintain interoperability of the domestic payment network;
2. The Philippine EMV implementation shall use established EMV specification as follows:
 - a. Issuers of proprietary cards shall use the Philippine domestic EMV specification; and
 - b. Issuers of co-branded cards shall use the EMV specification of their affiliated international payment network.
3. At a minimum, all debit accepting devices shall acquire/accept Philippine issued proprietary cards using the Philippine domestic EMV specification of members/participants of the domestic switches;
4. The domestic payment network shall ensure continued interoperability and acceptance of Philippine EMV cards using the Philippine domestic EMV specification on Philippine EMV deployed acceptance devices;¹ and
5. BSFIs shall strengthen consumer protection by adequately handling and containing consumer concerns and complaints arising from fraudulent schemes done electronically.

F. The Philippine Domestic EMV Specification

With the main objectives of maintaining interoperability and reducing card fraud, BSFIs shall adopt a Philippine domestic EMV specification for proprietary cards. The domestic EMV specification should:

- Adopt the EMV specification according to EMVCo;
- Apply to ATM and domestic debit POS transactions;
- Support contact transactions;
- Support online card authentication to ensure that transactions are made using a valid card;
- Support online authorization to enable issuer to manage fraud and credit risk at the transaction level;
- Support online PIN cardholder verification method;

¹ Include EMV-compliant ATMs, POS terminals and other similar devices.

- Support technical fallback to magstripe in the interim, as provided in Section I of these guidelines, without prejudice to the issuer's decision to process/approve fallback transactions.

G. Minimum Operational Requirements

1. Issuing institutions shall:
 - a. Ensure that they have the technical systems and network necessary to process and handle EMV transactions;
 - b. Support EMV data elements in authorization messages;
 - c. Define chip cards feature, functionality and interface capability;
 - d. Enhance risk management systems to leverage chip;
 - e. Determine the card migration strategy;
 - f. Update customer support and operational systems to support chip cards;
 - g. Be certified for network interfaces and card personalization by a certification body organized by BSFIs pursuant to these guidelines;
 - h. Replace card base; and
 - i. Educate the consumers.
2. Acquiring institutions shall:
 - a. Ensure that card-accepting devices are EMV-certified to support the acquiring and routing of Philippine-issued debit cards using the Philippine domestic EMV specification;
 - b. Ensure that P|N-entry devices are Payment Card Industry PIN Transaction Security (PCI-PTS)¹ compliant; and
 - c. Enable a debit POS environment that supports online PIN for Philippine-issued debit cards.
3. Domestic switches shall:
 - a. Establish infrastructure and systems that are EMV-compliant and able to support switched EMV transactions from domestic interconnected networks;
 - b. Ensure continued support to existing transaction sets and functions provided to consumers;
 - c. Enhance efforts to educate their members on EMV collaboration and seek effective alignment of strategy and design principles; and
 - d. Ensure continued ability to support, in the interim, transactions in magstripe format subject to liability shift policies acceptable to Bangko Sentral, the standards of which shall be covered in subsequent guidelines.

H. Detailed Guidelines, Policies and Processes

BSFIs shall agree on and implement detailed technical and operational requirements, policies and procedures that are acceptable to the BSP, the standards of which shall be covered in subsequent guidelines, and aligned with subject EMV Implementation Guidelines, covering but not limited to the following:

1. Philippine Application Identifier (AID);
2. Single Common AID, Single Common Card Personalization Profile and Single Common Terminal Configuration for domestic transactions;
3. Transaction routing;
4. Testing and certification
5. Dispute and fraud risk management; and
6. Other processes affected by the EMV migration.

I. Hybrid Card, Fallback Function and EMV Liability Shift

While the EMV infrastructure and environment are in the process of achieving full stability, hybrid cards may still be acceptable as a fallback option in cases when the EMV chip or terminal is unable to process domestic chip transactions. In this regard, BSFIs shall formulate a liability shift framework that is acceptable to the Bangko Sentral.

J. Updated EMV Migration Plan

Any changes arising from the aforementioned guidelines shall be incorporated in the EMV Migration Plan and all affected BSFIs shall resubmit their updated plan to Bangko Sentral's Core Information Technology Specialist Group (CITSG) within sixty (60) calendar days from the date of the Circular.

All BSFIs shall support migration to EMV standards. Consequently, all cards issued and card-accepting devices should be EMV-compliant.

¹ A security requirement of the Payment Card Industry (PCI) regarding testing of PIN-entry devices using predefined standards to get certification.

EMV CARD FRAUD LIABILITY SHIFT FRAMEWORK (ECFLSF)

I. Introduction

This document outlines the Bangko Sentral's guidelines implementing the EMV Card Fraud Liability Shift Framework (ECFLSF). Pursuant to Sec. 126-N and *Appendix N-17*, Bangko Sentral Supervised Financial Institutions (BSFIs) should shift from the magnetic stripe (magstripe) technology to EMV-compliant cards, POS terminals and ATMs. The immediate impact and benefit on the adoption of EMV technology is the reduction in card fraud resulting from counterfeit or skimming attacks.

While migration efforts to shift to EMV technology are ongoing, the use of magstripe in payment cards and/or card-accepting devices shall be allowed subject to card fraud liability shift. This means that the BSFIs which have not yet or have partially adopted the EMV technology shall be held responsible for losses associated with the use of a counterfeit card in a card-present environment.

II. Statement of Policy

It is the policy of the Bangko Sentral to foster the development of safe, secure, efficient and reliable retail payment systems, protect the integrity and confidentiality of customer accounts and information and uphold consumer protection.

Towards this end, the Bangko Sentral requires all concerned BSFIs to migrate to a more secure payment technology and sets forth subject principles for allocation of card fraud liability with the aim of ensuring compliance of the different retail payment system participants with the Bangko Sentral's EMV migration requirement. Pending full migration to the EMV technology, the ECFLSF shall likewise accelerate the dispute resolution and restitution process for customers who have valid claims arising from counterfeit fraud or skimming attacks.

III. Applicability and Scope

These guidelines shall apply to all BSFIs with debit and credit card issuing and acquiring functions and shall govern the allocation of liability associated with fraudulent transactions arising from counterfeit cards beginning 1 January 2017, subject to the conduct of proper investigation by the concerned participant/s of the payment card network. The coverage shall be limited to card-present and contact transactions of Philippine-issued payment cards used domestically in automated teller machines (ATMs), point-of-sale (POS) terminals, and other similar devices routed to either domestic or international payment networks.

Consequently, the ECFLSF shall not apply to card-not-present and contactless transactions. Furthermore, foreign-issued payment cards used domestically and Philippine-issued payment cards used abroad shall not be covered as these are already subject to the existing liability shift and chargeback rules of the international payment networks.

IV. Definition of Terms

For purpose of these guidelines, the following definitions shall apply:

- 1) *Acquiring institution (Acquirer)*, is a bank or non-financial institution that processes credit or debit card transactions via ATMs, POS terminals, and other similar devices.
- 2) *EMV compliant device or terminal* is a device or terminal that has, or is connected to, a contact chip card reader, has an EMV application, certified, and is able to process EMV transactions.
- 3) *Co-branded cards* are Philippine-issued cards affiliated with international payment networks.
- 4) *Counterfeit card* is an imitation or falsification of a genuine magstripe card or EMV chip card with track data copied from a hybrid EMV card.
- 5) *Debit cards* are payment cards linked to bank deposit or prepaid/electronic money (e-money) accounts.
- 6) *Fallback to magstripe transaction occurs* when the chip on the card is not being read by a terminal. This is similar to technical fallback, which is defined in *Appendix N-17* as a state in which the chip cannot be used and another type of entry, such as magstripe, is used to complete a transaction.
- 7) *Hybrid cards* are payment cards that have both EMV chip and magstripe.

- 8) *International payment networks* refer to the payment networks that have global establishment. For purposes of subject guidelines, recognized international networks shall refer to Visa, Mastercard, UnionPay, Diners/Discover, American Express, and Japan Credit Bureau (JCB).
- 9) *Issuing institution (Issuer)* is a bank or non-bank financial institution that issues payment cards, whether proprietary or co-branded, to consumers.
- 10) *Payment cards* are cards that can be used by cardholders and accepted by terminals to withdraw cash and/or make payment for purchase of goods or services, fund transfer and other financial transactions. Typically, payment cards are electronically-linked to deposit, prepaid or loan/credit accounts.

V. Guiding Principles

- 1) The adoption of EMV technology is designed to reduce and mitigate risks arising from counterfeit card fraud. While it remains virtually impossible to create a counterfeit EMV card that can be used to conduct an EMV payment transaction successfully, the presence of magstripe in a hybrid EMV card makes it still vulnerable to counterfeit attacks.
- 2) A BSFI that has enabled the most secure EMV options shall be protected from financial liability arising from losses on counterfeit card fraud. The liability for this type of fraud shall shift to the BSFI which is not or is partially compliant with the EMV migration requirement.
- 3) To resolve the issue on the allocation of card fraud liability using the guidelines described herein, the involved parties (such as issuer, acquirer, and payment network) should, first, characterize the fraud committed, and then, assess the technology being employed, in light of the applicable payment network rules. The party supporting EMV technology will prevail and in case of a technology-tie (neither or both parties are EMV compliant), the liability for fraudulent transactions generally remains with the Issuer.

VI. Allocation of Card Fraud Liability

Allocation of liability for counterfeit card fraud is summarized in the following table:

	Card Capabilities	Acceptance Device Support	Scenario	Liability
1	Magnetic stripe only	Magnetic stripe only	Magnetic card transaction was completed	Issuer
2	Magnetic stripe only	EMV compliant	Magnetic card transaction was completed	Issuer
3	EMV compliant hybrid card	Magnetic stripe only	Magnetic card transaction was completed	Acquirer ¹
4	EMV compliant hybrid card	EMV compliant	Fallback transaction; Magnetic card transaction was completed	Issuer

The information provided above shall be considered as a general guide as each fraudulent transaction shall be separately investigated on. Likewise, the domestic and international payment networks may come up with other scenarios and probable conditions that illustrate how liability is assigned on counterfeit card fraud using different combinations of card and acceptance device capabilities. However, the resolution of such scenarios/conditions should follow the principles espoused in these guidelines.

VII. Consumer Protection and Complaints Handling and Resolution

- 1) The participants in the domestic payment network (such as issuer, acquirer, and payment network) should collaborate and devise detailed rules and procedures including arbitration mechanisms to operationalize the ECFLSF. Accordingly, a body responsible for strictly implementing the above-mentioned detailed rules and procedures on ECFLSF should be constituted.

¹ When an Acquirer accepts a magstripe card that was counterfeited with track data copied from an EMV compliant hybrid card and the counterfeit card is used at a device/terminal that is not EMV-compliant, resulting in a transaction to be successfully processed, the Acquirer is liable for any chargeback resulting from such fraud.

- 2) Cardholders' complaints and/or requests for chargeback as a result of counterfeit card shall be considered as complex complaint/request defined in *Appendix N-12* and hence, shall follow the standards provided in such regulations, except for the processing and resolution timeline which should be within 10 days instead of 45 days.
- 3) Issuers and Acquirers should ensure that affiliated international payment networks align their existing liability and chargeback rules with the ECFLSF insofar as Philippine-issued payment cards used in the domestic payment environment are concerned.

Guidelines on Submission of Information Technology (IT) Profile Report

In order to build the baseline information of IT systems of Philippine banks and to risk profile the complexity of IT operations based on technology-related products and services offered, delivery channels, and processes involved, all banks are required to accomplish and submit annually an IT Profile Report as of 31 December of the reference year.

In accordance with Sec. 148 of the MORB on Technology Risk Management, the following shall be observed in the submission of the IT Profile Report:

1. The IT Profile reporting template can be accessed at <http://www.bsp.gov.ph/frp/templates>. Reports shall be submitted on an annual basis within twenty-five (25) calendar days from the end of reference year. (Attached as Annex A is sample format of IT Profile Report.)
2. The IT Profile report shall be submitted electronically to the following e-mail addresses:

E-mail Address	Type of Reporting Institution
sdckb-itprofile@bsp.gov.ph	Universal/Commercial Banks (U/KBs)
sdctb-itprofile@bsp.gov.ph	Thrift Banks (TBs)
sdcrb-itprofile@bsp.gov.ph	Rural/Cooperative Banks (R/CBs)

3. The following format shall be used for the subject of the e-mail: "ITPROFILE <bankname>, <reference period>", e.g.:

To : sdctb-itprofile@bsp.gov.ph
cc :
Subject : ITPROFILE <bankname>, 31 December 20yy

4. The certification, duly notarized and signed by the authorized official of the reporting institution, shall be sent within the prescribed submission deadline to the Director of the Department of Supervisory Analytics (DSA) via facsimile at (632) 708-7554 or 708-7558.
5. Within the same period prescribed in Item 1, Institutions that are unable to transmit their IT Profile Report electronically may submit the same report in compact disc (CD), together with the aforementioned certification through messengerial or postal services. Said report shall be submitted to the following:

The Director
Department of Supervisory Analytics
Bangko Sentral ng Pilipinas
11th Floor, Multi-Storey Building
BSP Complex, A. Mabini Street
Malate, Manila 1004

6. The IT Profile Report template and other relevant attachments are also available upon request at the Bangko Sentral Department of Supervisory Analytics through the above-mentioned e-mail addressed and/or postal address.

Guidelines on the Electronic Submission of the Report on Crimes and/or Losses (RCL)

Pursuant to existing regulations prescribing the reporting of cyber related fraud as well as other crime related incidents to the BSP and in line with on-going initiatives of maximizing available Information Technology infrastructure for regulatory reporting, the following guidelines shall be observed in submitting the RCL:

1. Reportable incidents shall be transmitted electronically using the data entry template (DET) prescribed for the updated RCL. The prescribed DET and its supporting Control Prooflist (CP) for the Initial Report and Final Report, respectively, and the User Guide as relevant reference for accomplishing the DET can be downloaded from http://www.bsp.gov.ph/ses/reporting_templates or requested directly from the Department of Supervisory Analytics (DSA). The Control Prooflist for the initial and final RCL need not be notarized.
2. The updated RCL reporting structure and its corresponding DET considered the reportable cyber fraud incidents as well as other incidents required under Secs. 148 (*Reports*) and 173 (*Report on crimes/losses*).
3. The DET for the RCL (DET-RCL) together with the corresponding scanned CP in Portable Document Format (PDF) duly notarized and signed by the authorized official of the reporting bank shall be electronically transmitted within the existing deadline prescribed for Initial Report and Final Report, as the case may be, to the following prescribed e-mail addresses:

Type of Institution	E-mail Address
Universal and Commercial Banks	sdckb-rcl@bsp.gov.ph
Thrift Banks	sdctb-rcl@bsp.gov.ph
Rural and Cooperative Banks	sdcrb-rcl@bsp.gov.ph

4. The following format shall be used for the subject of the e-mail:

<report name>space<bank name>space<control no.>space<report status>, e.g.:

To : sdctb-rcl@bsp.gov.ph (example for thrift banks)
Subject : RCL <Bank A> 102016-0001 INITIAL

using the following required format for the filenames:

<reference no.>_<report status>.<file extension>, e.g.:

- RCL_000250_102016-0001_INITIAL.xls and
- RCL_000250_102016-0001_INITIAL.pdf

5. Each email transmission shall correspond to only one (1) DET-RCL file as multiple RCL cases in a single email transmission will be automatically rejected, thus considered unsubmitted. Each DET-RCL transmission shall be accompanied by its corresponding CP as described in item 3. DET-RCL files which are transmitted without the required CP shall be deemed unsubmitted.
6. Hard copy submission of the RCL shall no longer be accepted. Nevertheless, within the same prescribed period, banks that are unable to transmit electronically may submit their DET-RCL and its accompanying CP in compact discs (CD) through messengerial or postal services. The DET-RCL and its accompanying CP shall be submitted to:

The Director
Department of Supervisory Analytics
Bangko Sentral ng Pilipinas
11th Floor, Multi-Storey Building
BSP Complex, A. Mabini Street
Malate, Manila 1004

7. Report submissions that do not conform to the above prescribed procedures shall not be accepted and will be considered non-compliant with the Bangko Sentral reporting standards as provided under Sec. 171. It likewise follows that only files prescribed by the Bangko Sentral for the RCL shall be accepted as compliant with the existing reportorial requirements subject to validation and applicable penalties for erroneous, delayed, or unsubmitted reporting.

POWERS OF THE BANGKO SENTRAL

001 – T EXAMINATION BY THE BANGKO SENTRAL

The Bangko Sentral shall have supervision over, and conduct periodic or special examinations of trust corporations (TC).

The head and examiners of the appropriate supervising department of the Bangko Sentral are authorized to administer oaths to any director, officer or employee of TCs, and to compel the presentation of all books, documents, papers or records necessary in their judgment to ascertain the facts relative to the true condition of the institution as well as the books and records of persons and entities relative to or in connection with the operations, activities or transactions of the institution under examination, subject to the provision of existing laws and regulations.

The term “examination” shall refer to an investigation of an institution under the supervisory authority of the Bangko Sentral to determine whether the institution is operating on a safe and sound basis, inquire into its solvency and liquidity, and assess the effectiveness of its compliance function to ascertain that it is conducting business in accordance with laws and regulations. Consistent with a risk-based approach to supervision, the scope of examination may include but need not be limited to the following:

- a. Appraisal of the overall quality of corporate governance;
- b. Assessment of risk management system, which shall include the evaluation of the effectiveness of management oversight and self-assessment functions (e.g., internal audit, risk management and compliance), adequacy of policies, procedures, and limits, effectiveness of risk measurement, monitoring and management information system, and robustness of internal control;
- c. Review of the institution’s operations and overall risk profile;
- d. Evaluation of financial performance, capital adequacy, asset quality and liquidity; and
- e. Any other activity relevant to the above.

Regular or periodic examination shall be done once a year, with an interval of twelve (12) months from the last date thereof. Special examination may be conducted earlier, or at a shorter interval, when authorized by the Monetary Board by an affirmative vote of five (5) members.

In the full exercise of the supervisory powers of the Bangko Sentral, examination by the Bangko Sentral of institutions shall be complemented by overseeing thereof. In this regard, the term Overseeing shall refer to a limited investigation of an institution, or any investigation/s that is limited in scope, conducted to inquire into a particular area/aspect of an institution’s operations, for the purpose of overseeing that laws and regulations are complied with, inquiring into the solvency and liquidity of the institution, enforcing prompt corrective action, or such other matters requiring immediate investigation: *Provided*, That (i) specific authorizations be issued by the Deputy Governor of the appropriate sector of the Bangko Sentral, and (ii) periodic summary reports on overseeings made be submitted by the Monetary Board.

(Circular Nos. 1066 dated 4 December 2019, 884 dated 22 July 2015, and 903 dated 29 February 2016)

002 – T SUPERVISORY ENFORCEMENT POLICY

The Policy sets forth guidance on the Bangko Sentral’s supervision-by-risk framework. It also puts together in a holistic manner all the enforcement tools available to the Bangko Sentral as contained in various laws and rules and regulations¹ and communicates the deployment thereof in a consistent manner by the Bangko Sentral in the course of performing its supervisory function. It further sets out the guiding principles and objectives behind the deployment of such enforcement actions.

Nothing in this Section shall be construed as superseding enforcement actions previously imposed against BSFIs pursuant to existing laws, Bangko Sentral rules and regulations.

- a. Statement of Policy and Rationale

The Bangko Sentral is issuing this Supervisory Enforcement Policy to provide guidance on its supervision-by-risk framework. The Bangko Sentral recognizes that risk-taking is integral to a financial institution’s business. The existence of risk is not necessarily a reason for concern so long as Management exhibits the ability to effectively manage that level of risk and operates the financial institution (FI) in a safe and sound manner. Thus, when risk is not properly managed, the Bangko Sentral may deploy a wide range of enforcement actions provided under existing laws, Bangko Sentral rules and regulations, taking into consideration the nature and extent of the supervisory issues and concerns and the level of cooperation provided by Management.

¹ Section 4 of R.A. No. 8791 (General Banking Law of 2000) defines the scope of Bangko Sentral’s supervisory powers, which may be grouped into three categories; (i) issuance of rules; (ii) examination and investigation; and (iii) enforcement of Prompt Corrective Action (PCA).

The Bangko Sentral adopts a holistic approach to supervision with the objective of guiding FIs under its supervision to mitigate risk and achieve the desired changes.

Bangko Sentral's risk-based supervision, of which enforcement action is a key part, focuses on the safety and soundness of operations of the FIs. This policy sets forth the expectations of the Bangko Sentral when it deploys enforcement action and the consequences when expected actions are not performed within prescribed timelines.

Thus, this over-arching policy is needed - (a) as a collation of various enforcement actions already present in various laws, rules and regulations; (b) for better guidance of the FIs and the bank supervisors; and (c) as a means to broadcast to the banking/financial industry the consequences of failure to address the Bangko Sentral requirements and supervisory expectations.

b. Objectives of the Enforcement Policy.

The Bangko Sentral's Supervisory Enforcement Policy aims to achieve the following two (2) key objectives:

- (1) *Achieving the desired change.* Effect a change in the overall condition and governance of Bangko Sentral-supervised FIs consistent with the expectations set under relevant laws and regulations; and
- (2) *Mitigating Risk.* Mitigate risks to the FIs and other stakeholders in order to maintain the stability of the financial system.

c. General Principles.

The Bangko Sentral, in the deployment of enforcement actions, is guided by the following general principles:

- (1) *Root cause diagnosis.* The enforcement action addresses the underlying cause of the supervisory issues and concerns.
- (2) *Consistently matching the severity of enforcement action to the supervisory issue.* The deployment of appropriate enforcement action is commensurate to the severity of the supervisory issues and concerns. The severity of the supervisory issues and concerns is assessed in terms of prevalence¹ and persistence.
- (3) *Successive or simultaneous deployment of enforcement actions.* Enforcement actions may be deployed successively or simultaneously taking into account the nature and seriousness of the difficulties encountered by the FIs and the ability and willingness of the FI's Management to address the supervisory issues and concerns.
- (4) *Monitorability and follow-through.* The Bangko Sentral monitors the FI's progress/compliance with the expected actions to address the supervisory issues, concerns and problems.
- (5) *Escalation of enforcement actions.* Enforcement actions may be escalated if the desired change is not achieved and the root causes of the FI's issues, concerns and problems are not addressed by the FI within prescribed timelines.

d. Categories of Enforcement Actions

The three main categories of enforcement action are: (1) corrective actions, (2) sanctions and (3) other supervisory actions. These enforcement actions may be imposed singly or in combination with others.

(1) Corrective Actions

Corrective actions are enforcement actions intended to require the FI to address the underlying cause of supervisory issues, concerns and problems. These include the following:

(a) Bangko Sentral Directives

Directives are basically orders and instructions communicated by the appropriate supervising department in Bangko Sentral requiring the FI to undertake a specific positive action or refrain from performing a particular activity within a prescribed timeline.

¹ Prevalence pertains to the pervasiveness of the supervisory issues, concerns and problems in relation to their impact on the FI's solvency, asset quality, operating performance and liquidity, among others.

(b) Letter of Commitment (LOC)

The LOC is an enforcement action where the FI's Board of Directors (Board) is required, upon approval and/or confirmation by the Monetary Board (MB), to make a written commitment to undertake a specific positive action or refrain from performing a particular activity within a given time period.

The LOC is generally used to arrest emerging supervisory concerns before these develop into serious weaknesses or problems, or to address remaining supervisory issues and concerns.

(2) Sanctions

Sanctions that may be imposed on an FI and/or its directors and officers, as provided under existing laws, Bangko Sentral rules and regulations, are subject to the prior approval and/or confirmation by the MB. Such sanctions include the following:

(a) FIs

- (i) Restrictions on Activities and Privileges
- (ii) Suspension of Authorities, Privileges and Other Activities
- (iii) Divestment and/or Unwinding
- (iv) Monetary Sanction - Penalties/Fines Against the FI

(b) Directors and officers

- (i) Reprimand
- (ii) Restriction on Compensation and Benefits
- (iii) Divestment
- (iv) Suspension
- (v) Disqualification
- (vi) Removal
- (vii) Monetary Penalties/Fines

The foregoing sanctions to individuals are without prejudice to the filing of separate civil or criminal actions against them, when appropriate.

(3) Other Supervisory Actions

Subject to prior MB approval, the Bangko Sentral, when warranted, may deploy other supervisory actions such as:

- (a) Initiation into the PCA Framework;
- (b) Issuance of a cease and desist order (CDO) against the FI as well as its directors and officers;
- (c) Conservatorship; and
- (d) Placement under Receivership.

e. Due Process

An integral part of the deployment of enforcement actions is the observance of due process in all cases.

The FI and/or its directors and officers are afforded fair and reasonable opportunity to explain their side and to submit evidence/s in support thereof, which are given due consideration in determining the appropriate enforcement action(s) to be imposed.

(Circular Nos. 1066 dated 4 December 2019, 903 dated 29 February 2016, and 875 dated 15 April 2015)

003 – T PROMPT CORRECTIVE ACTION FRAMEWORK

The framework for the enforcement of prompt corrective action (PCA) on banks which is in *Appendix 68* of the MORB, shall govern the PCA taken on TCs to the extent applicable, or by analogy.

(Circular Nos. 1066 dated 4 December 2019 and 884 dated 22 July 2015)

PART ONE

ORGANIZATION, MANAGEMENT AND ADMINISTRATION

A. ESTABLISHMENT, POWERS, AND OPERATIONS OF TRUST CORPORATIONS

101 – T APPLICABLE REGULATIONS ON TRUST CORPORATIONS

Trust operations and investment management activities of trust corporations shall be subject to the applicable Q-Regulations of the Manual of Regulations for Non-Bank Financial Institutions (MORNBF¹), as referred to and unless otherwise specified by the provisions of this Manual. The List of appendices of the MORB and Q-Regulations is shown in *Appendix T-1*.

(Circular Nos. 1048 dated 6 September 2019 and 884 dated 22 July 2015)

102 – T POLICY STATEMENT; DEFINITION OF TERMS

Policy Statement. It is the policy of the Bangko Sentral to promulgate rules and regulations necessary for the proper conduct and development of trust, other fiduciary business and investment management activities. Towards this end, authority to engage in trust, other fiduciary business and investment management activities shall be granted to all qualified trust corporations which meet the requirements provided herewith.

Definitions. For purposes of regulating the operations of a trust corporation, unless the context clearly connotes otherwise, the following shall have the meaning indicated:

- a. *Trust entity* shall refer to a: (a) bank or non-bank financial institution (NBFI), through its specifically designated business unit to perform trust functions, or (b) trust corporation, authorized by the Bangko Sentral to engage in trust and other fiduciary business under Section 79 of Republic Act (R.A.) No. 8791 (The General Banking Law of 2000) or to perform investment management services under Section 53 of R.A. No. 8791.
- b. A *trust corporation (TC)* shall be a stock corporation created, and duly authorized by the Monetary Board, to engage primarily in trust, other fiduciary business and investment management activities, which shall act as trustee or administer any trust or hold property in trust or on deposit for the use and benefit of others, and/or as financial consultant, investment adviser or portfolio manager.

A TC may be a subsidiary or an affiliate of a bank and/or an NBFI: *Provided*, That the investing bank and/or NBFI cannot engage in trust, other fiduciary business and investment management activities through its separate and distinct department or other similar unit in the bank or NBFI and through a TC.

- c. *Trust business* shall refer to any activity resulting from a trustor-trustee relationship (trusteeship) involving the appointment of a trustee by the trustor for the administration, holding, management of funds and/or properties of the trustor by the trustee for the use, benefit or advantage of the trustor or of others called beneficiaries.
- d. *Other fiduciary business* shall refer to any activity resulting from a contract or agreement whereby the TC binds itself to render services or to act in a representative capacity such as in an agency, guardianship, administratorship of wills, properties and estates, executorship, receivership and other similar services which do not create or result in a trusteeship. Investment management activities, which are considered as among other fiduciary business, shall be separately defined in the succeeding item to highlight its being a major source of fiduciary business.
- e. *Investment management activity* shall refer to any activity resulting from a contract or agreement primarily for financial return whereby the institution (the investment manager) binds itself to handle or manage investible funds or any investment portfolio in a representative capacity as financial or managing agent, adviser, consultant or administrator of financial or investment management, advisory, consultancy or any similar arrangement which does not create or result in a trusteeship.
- f. *Investment management account* shall refer to an account where transactions arising from investment management activities are kept and recorded.
- g. *Trust* is a relationship or an arrangement whereby a person called a trustee is appointed by a person called a trustor to administer, hold and manage funds and/or property of the trust or for the benefit of a beneficiary.

¹ Trust operations and investment management activities of trust corporations shall be subject to the applicable Q-Regulations in Parts Five (*Foreign Exchange Operations*), Six (*Treasury and Money Market Operations*), Seven (*Electronic Operations and Other Services*), Eight (*Anti-Money Laundering Operations*) and Ten (*Financial Consumer Protection Framework*) including the provisions of Sec. 002-Q (*Enforcement Actions*) of the MORNBF¹, unless otherwise provided in this Manual.

- h. *Trust agreement* is an instrument in writing covering the terms and conditions of the trust.
- i. *Trustee* is any person who holds legal title to the funds and/or property of a trust.
- j. *Trustor* is any person who creates a trust.
- k. *Beneficiary* is any person for whose benefit a trust is created.
- l. *Fiduciary* shall refer to any person or entity engaged in any of the other fiduciary business as herein defined where no trustor-trustee relation exists.
- m. *Agency* shall refer to a contract whereby a person binds himself to render some service or to do something in representation or on behalf of another, with the consent or authority of the latter.
- n. *Principal* shall refer to the person who grants authority to another person called an agent, under a contract to enter into transactions in his behalf.
- o. *Agent* shall refer to a person who acts in representation or on behalf of another person with the latter's authority.
- p. *President* shall refer to the chief executive officer of the TC or to any other position of equivalent rank or position.
- q. *Unit Investment Trust Fund (UITF)* shall refer to an open-ended pooled trust fund denominated in pesos or any acceptable currency, which are operated and administered by a trust entity and made available by participation. The term *Unit Investment Trust Funds* is synonymous to common trust funds. As an open-ended fund, participation or redemption is allowed as often as stated in its plan rules.
- r. *Assets under management (AUM)* shall represent all funds, properties and securities, denominated in peso and other foreign currency, which the TC, acting as trustee, fiduciary and agent, shall manage, administer, hold, and/or take custody, for the use and/or benefit of persons other than the TC. In the performance of its trust, other fiduciary business and investment management activities (IMA), the assets under management of the TC shall be kept separate and distinct from the proprietary assets of the TC as well as from the general or other business owned and operated by its parent company, subsidiaries and related interest including all other funds, properties, and assets owned by such TC.
- s. *Proprietary assets* shall refer to all assets, excluding assets under management, owned by the TC for the purpose of engaging in the business of trust, other fiduciary and investment management activities and maintaining the minimum capital requirement.

(Circular Nos. 1066 dated 4 December 2019 and 884 dated 22 July 2015)

103 – T ESTABLISHMENT, ORGANIZATION AND POWERS

A TC shall administer the funds or property under its custody with the diligence that a prudent man would exercise in the conduct of an enterprise of a like character with similar aims.

The TC must have suitable shareholders, adequate financial strength, a legal structure in line with its operations, and a management that is fit and proper to operate the corporation. Where the proposed owner or parent organization is a foreign-regulated financial institution, the prior consent of its home country supervisor should be obtained.

The incorporators/subscriber must be persons of integrity and of good credit reputation in the business community. The subscribers must have adequate and legitimate financial capacity to pay for their proposed subscriptions in the TC.

In addition, the incorporators/subscribers must not have been convicted of any crime involving moral turpitude, and unless otherwise allowed under the provisions of existing laws, are not officers or employees of a government agency, instrumentality, department or office charged with the supervision of, or the granting of credit to trust entities.

A TC shall ensure that it upholds consumer protection practices that adhere to the highest level of service standards, and observes fair and responsible dealings in the conduct of its trust business. In this regard, a TC shall adopt a board-approved consumer protection framework that is appropriate to its corporate structure, operations and risk profile.

Basic guidelines in establishing TCs. No person or entity shall be allowed to operate as a TC without prior authority from the Bangko Sentral.

- a. *Organizational requirements*

- (1) Articles of incorporation and by-laws. The articles of incorporation and by-laws of any TC, or any amendment thereto, shall not be registered with the Securities and Exchange Commission (SEC) unless accompanied by a certificate of authority to register issued by the Monetary Board.
- (2) Application for authority to establish the TC. The incorporators/directors of the proposed TC shall file and submit to the Monetary Board through the appropriate supervising department of the Bangko Sentral an application for authority to establish a TC to primarily engage in trust, other fiduciary business and investment management activities, which shall be duly signed by all incorporators/directors, together with the following documents:
 - (a) Accomplished biographical data of each incorporator, subscriber, proposed director and officer;
 - (b) Certificate of net worth as of a date not earlier than ninety (90) days prior to the filing of the application of each of the subscriber. Such certificate shall indicate a minimum net worth that will demonstrate the certifying person's financial capacity to invest in the TC. A waiver of rights under R.A. No. 1405, as amended, shall also be submitted for purposes of verification of the declared net worth;
 - (c) Certified photocopies of Income Tax Returns (ITRs) for the last two (2) calendar years of each incorporator, subscriber, proposed director and officer or similar document from the home country in the case of non-Filipino citizens;
 - (d) Clearance from the National Bureau of Investigation (NBI) of each of the incorporator, subscriber, proposed director and officer or similar document from the home country in the case of non-Filipino citizens;
 - (e) For corporate subscribers, the following additional documents shall be submitted:
 - (i) Copy of the board resolution authorizing the corporation to invest in such TC and designating the person who will represent the corporation in connection therewith;
 - (ii) Copy of the latest articles of incorporation and by-laws duly stamped received by the SEC;
 - (iii) Updated list of directors and principal officers;
 - (iv) Current list of substantial or major shareholders, indicating the citizenship and the number, amount and percentage of the voting and non-voting shares held by them. For this purpose, substantial or major shareholder shall mean a person, whether natural or juridical, owning such number of shares that will allow him to elect at least one (1) member of the board of directors of a TC, or who is directly or indirectly the registered or beneficial owner of more than ten percent (10%) of any class of its equity security;
 - (v) A copy each of the corporation's audited financial statements for the last two (2) years prior to the filing of the application;
 - (vi) A copy of the corporation's annual report to the stockholders for the year immediately preceding the date of filing of the application;
 - (vii) Certified photocopies of the corporation's ITRs and BIR clearance for the last two (2) calendar years; and
 - (viii) For foreign corporations, in addition to Items "(e)i" to "(e)vi", it shall also submit (1) a certification from its home country's supervisory authority that it has no objection to the investment of such company in a TC in the Philippines and that adequate information on such foreign corporation shall be provided to the Bangko Sentral to the extent allowed under existing laws; (2) certification from the foreign bank/entity applicant's Corporate Secretary or any officer holding equivalent position that the bank/entity is established, reputable and financially sound; and (3) if the proposed ownership represents controlling interest¹ in the TC, certification from the foreign bank/entity applicant's Corporate Secretary or any officer holding equivalent position containing the information that the bank/entity is widely-owned and publicly-listed, duly authenticated by the Philippine Consulate;

¹ Control exists when the parent owns directly or indirectly through subsidiaries more than one-half (1/2) of the voting power of an enterprise unless, in exceptional circumstance, it can be clearly demonstrated that such ownership does not constitute control. Control may also exist even when ownership is one-half (1/2) or less of the voting power of an enterprise when there is: (i) power over more than one-half (1/2) of the voting rights by virtue of an agreement with other stockholders; or (ii) power to govern the financial and operating policies of the enterprise under a statute or an agreement; or (iii) power to appoint or remove the majority of the members of the board of directors or equivalent governing body; or (iv) power to cast the majority votes at meetings of the board of directors or equivalent governing body; or (v) any other arrangement similar to any of the above.

- (f) Detailed plan of operation and economic justification for establishing a TC. The plan should describe and analyze the industry and the market area from which the TC expects to draw majority of its trust business and establish a strategy for its ongoing operation. It should also describe how the TC will be organized and controlled internally. Further, the plan should cover the marketing and distribution arrangements to be adopted by the TC which shall comply with Secs. 109-T and 110-T;
- (g) Projected financial statements for the first five (5) years together with assumptions. These should be consistent with its proposed plan of operation and would show sufficient capital to support its strategy and operations;
- (h) Detailed plan on how the subscribers would put up the required capitalization for the proposed TC; and
- (i) Such other information that the Bangko Sentral may require.

In case of banks and NBFIs that decide to spin-off their trust department to a TC, in addition to the articles of incorporation, by-laws and the application for establishment of the proposed TC, the documentary requirements are as follows:

- (a) Updated biographical data of each incorporator, subscriber, proposed director and officer;
- (b) Certificate of net worth as of a date not earlier than ninety (90) days prior to the filing of the application of each of the subscriber. Such certificate shall indicate a minimum net worth that will demonstrate the certifying person's financial capacity to invest in the TC. A waiver of rights under R. A. No. 1405, as amended, shall also be submitted for purposes of verification of the declared net worth;
- (c) Certified photocopies of ITRs for the last two (2) calendar years of each incorporator, subscriber, proposed director and officer or similar document from the home country in the case of non-Filipino citizens;
- (d) Clearance from the NBI of each of the incorporator, subscriber, proposed director and officer or similar document from the home country in the case of non-Filipino citizens. However, the applicant may instead submit a certification that the incorporator, subscriber, proposed director and officer concerned has already undergone prior approval/confirmation by the Bangko Sentral as director and/or officer of a Bangko Sentral-supervised entity;
- (e) Copy of the board resolution authorizing the trust department to spin-off into a TC and designating the person who will represent the corporation in connection therewith;
- (f) In addition to the detailed plan of operation and economic justification for establishing a TC required under Item "(2)(f)", the plan shall include specific actions and timelines for the smooth transition of its operations including timelines for ample notification to clients;
- (g) Detailed plan on how the bank/NBFI would put up the required capitalization for the proposed TC;
- (h) For trust departments of foreign banks/foreign bank branches, it shall also submit a certification from its home country's supervisory authority that it has no objection to the spin-off of the trust department of said bank/foreign branches into a TC and that adequate information shall likewise be provided to the Bangko Sentral to the extent allowed under existing laws; and
- (i) Such other information that the Bangko Sentral may require.

Application for establishment of a TC shall be subject to the following fees:

- (a) Filing fee - A filing fee of P25,000.00 shall be charged upon filing of the application and is non-refundable;
- (b) Processing fee - A processing fee of P100,000.00 shall be charged for accepted applications regardless whether the application is approved or denied. Processing fee shall be inclusive of the filing fee; and
- (c) Licensing fee - A licensing fee of P500,000.00 shall be charged upon approval of the application. Licensing fee shall be inclusive of the processing fee.

In submitting its application, the applicant shall include a written authorization in favor of the Bangko Sentral giving consent to the conduct of verification/validation of the documents or representations stated in the application for the establishment of a TC.

The application shall be considered filed and submitted on a first-come, first-served basis: *Provided*, That all required documents are complete and properly accomplished. Otherwise, the application shall be returned unacted.

- b. *Grounds for disapproval of application.* The Monetary Board may deny the application to organize a TC on the basis of any of the findings that:
 - (1) The TC is being organized for any purpose other than to engage in the business of a legitimate TC;
 - (2) The TC's detailed plan of operations is against the law, Bangko Sentral rules and regulations, and public policy; and
 - (3) There exist other reasons, which the Monetary Board may consider as sufficient ground for such disapproval.
- c. *Requirements for the issuance of the certificates of authority to register and to operate.*
 - (1) Within thirty (30) days from receipt of advice of approval by the Monetary Board of its application for authority to establish a TC, the applicant shall pay a non-refundable license fee, as stated above, to the Bangko Sentral.
 - (2) Within sixty (60) days from receipt of advice of approval by the Monetary Board of their application for authority to establish a TC, the incorporators shall:
 - (a) Submit seven (7) copies of the articles of incorporation, treasurer's sworn statement and by-laws which shall include provisions on the appointment of a president, equivalent position/officer, and other subordinate officers, and a clear definition of their duties and responsibilities; and
 - (b) Deposit with any universal/commercial bank the initial paid-up capital of the proposed TC.
 - (3) Within thirty (30) days after the articles of incorporation and by-laws had been cleared by the Bangko Sentral, and the corresponding certificate of authority to register had been issued, the incorporators shall effect the filing and registration of said documents with the SEC.
 - (4) Within six (6) months from receipt of advice of approval by the Monetary Board/Governor of their application for authority to establish a TC, the incorporators shall secure the certificate of authority to operate the trust, other fiduciary business and investment management activities and submit to the appropriate supervising department of the Bangko Sentral the following:
 - (a) Proof of registration of articles of incorporation and by-laws;
 - (b) Certification of compliance with the conditions of approval duly signed by the incorporators, including the set-up of the required basic security deposit;
 - (c) Names and positions of individuals designated as chairman and members of the board of directors, president and other subordinate officers of the TC with their respective bio-data and statement of duties and responsibilities;
 - (d) Organizational chart which shows the names of departments/units with respective functions and responsibilities and designations of officers/employees including responsibilities of personnel within the said departments/units. The organizational chart should show clear accountability of the management structure and should provide for independent check and balance by the board of directors;
 - (e) Risk Management Manual, Manual on Consumer Protection Framework and Operations Manual embodying the policies, systems, and operating procedures of each department/unit in the organization, together with the certification of the president of the TC that the manuals were prepared and aligned with existing Bangko Sentral rules and regulations on risk management, consumer protection and trust, other fiduciary and investment management activities, and that the policies, systems and operating procedures in the manuals shall be implemented. A TC is expected to have in place, a risk management system that is appropriate to the nature and complexity of the TC's fiduciary activities and to ensure that the policies, systems and operating procedures in the manuals shall be implemented;
 - (f) Excerpts of the minutes of the organizational/director's meetings confirming all organizational and pre-opening transactions relative to activities undertaken by the TC to operate the trust, other fiduciary business and investment management activities (e.g., appointment of officers, and approval of authorized signatories);
 - (g) Alphabetical list of all stockholders with the number and percentage of voting stocks owned/held;
 - (h) List of natural persons/stockholders certified by the corporate secretary, owning voting stocks in the TC and are related to other identified stockholders within the first degree of consanguinity or affinity, indicating the combined percentage of voting stocks held by these persons in the particular TC, as well as juridical persons, including corporations that are wholly-owned or a majority of the stock of which is owned by any of such persons, including their wholly- or majority-owned subsidiaries;

- (i) Certification by the president that no person who is the spouse or relative within the second degree of consanguinity or affinity of any person holding the position of chairman, president, chief executive officer, chief operating officer, executive vice-president, senior vice president or any position of equivalent rank, general manager treasurer, chief cashier, or chief accountant will be appointed to any of said positions in the TC; and
- (j) Other documents/papers which may be required.

Commencement of trust, other fiduciary business and investment management activities. The authority to establish a TC shall be automatically revoked if the TC is not organized and opened for business within one (1) year from date of approval by the Monetary Board of their application for authority to operate a TC. A final extension may be granted upon presentation of justifiable reason for failure to open the TC within the prescribed period, and proof that the TC can be opened within the extension period.

In the case of spun-off trust departments of banks/NBFIs, it is understood that upon receipt of the certificate of authority to operate a TC, the trust license of the trust department shall be automatically revoked.

The TC shall submit a written notice to the appropriate supervising department of the Bangko Sentral of the actual date of commencement of trust, other fiduciary and investment management operations not later than ten (10) days from such operation.

Powers and scope of authority. A TC, with prior approval of the Monetary Board, shall engage in trust and other fiduciary business under Chapter IX of R.A. No. 8791 (The General Banking Law of 2000).

A TC may accept peso and foreign currency denominated accounts: *Provided*, That in the case of foreign currency denominated accounts, all relevant laws, rules and regulations issued by local regulatory agencies on such are complied with.

Limitations. Except for escrow services, property administratorship, safekeeping, collection and payment services, and other similar legitimate activities, a TC shall not accept and administer funds or property of any bank and/or quasi-bank, and/or act as trustee, fiduciary, financial consultant, investment adviser, or portfolio manager of such funds or property. It shall not, in any manner, allow itself to be a party to any transaction by which a bank or quasi-bank circumvent laws, rules and regulations. Moreover, a TC cannot engage in quasi-banking functions, particularly the borrowing of funds from the public for the purpose of relending the said funds. The TC, however, retains the right to borrow as is inherent to any duly registered corporate entity: *Provided, however*, That borrowing of a TC from its managed or trustee accounts shall be prohibited.

(Circular Nos. 1066 dated 4 December 2019, 903 dated 29 February 2016, and 884 dated 22 July 2015)

104 – T AUTHORITY RESULTING FROM MERGER OR CONSOLIDATION

In the merger of financial institutions (FI), one of which is a TC, the authority to engage in trust, other fiduciary business and investment management activities shall continue to be in effect if the surviving institution has such authority and the same has not been withdrawn or revoked by the Bangko Sentral. In case the surviving institution does not have previous authority, it shall secure the prior approval of the Monetary Board to engage in trust business as part of its application for merger to enable it to incorporate such among its powers or purpose clause in its articles of incorporation, articles of merger, by-laws and such other pertinent documents. In the consolidation of TCs where the resulting entity is an entirely new one, it shall secure from the Monetary Board an authority to engage in trust, other fiduciary business and investment management activities before it may engage in such business.

Mergers and consolidations including the terms and conditions thereof shall comply with the provisions of applicable law and are subject to approval by the Bangko Sentral.

The guidelines and procedures in the application for merger/consolidation as shown in *Appendix Q -52* of the MORNBI shall be observed by TCs.

Rules on exchange of shares. As a general rule, the ratio of exchange of shares between or among the participants in a FI merger or consolidation shall be based on mutual agreement of the parties concerned. However, any appraisal increment reserve (revaluation reserve) arising from the revaluation of the fixed assets, as may be agreed upon by the parties shall be limited to premises, improvement, and equipment which are necessary for its immediate accommodation in the transaction of the FI's business. Such revaluation should be based on fair valuation of the property which shall be subject to review and approval by the Bangko Sentral.

(Circular Nos. 1066 dated 4 December 2019 and 884 dated 22 July 2015)

TCs may establish branch(es) only upon prior approval of the Monetary Board. However, it shall carry out its trust and other fiduciary business only at the place of business specified in its articles of incorporation. In the case of marketing office(s), it may be established subject to prior notification to the Bangko Sentral: *Provided*, That the marketing activities is in accordance with the provisions stated under Sec. 109-T.

For purposes of this Section, a branch shall refer to any permanent office or place of business other than the head office and maintains a complete set of books of accounts. A *marketing office* shall refer to any permanent office or place of business other than the head office which engages only in non-transactional activities such as marketing of its products. *Marketing* shall only include the promotion and presentation of the TC's trust products to clients or prospective clients and shall not involve the actual opening of trust/fiduciary account, and the receiving or dealing with client's money and/or property. The account opening shall be strictly undertaken by the TC in accordance with the Basic Standards set forth in *Appendix Q-49*.

Prerequisites for the grant of authority to establish a branch/marketing office. TCs may establish a branch/marketing office subject to the following pre-qualification requirements:

- a. Capital adequacy and solvency;
- b. No uncorrected findings of unsafe and unsound practices;
- c. It has complied with the required basic security deposits for the preceding four (4) quarters prior to application;
- d. It has established a risk management system appropriate to its operations, characterized by clear delineation of responsibility for risk management, adequate risk measurement system, appropriately structured risk limits, effective internal control system and complete, timely and efficient risk reporting system; and
- e. It has no major supervisory concerns outstanding on safety and soundness immediately preceding the date of application.

Prohibition. No application for establishment of new branch(es) shall be accepted if the TC has approved but unopened branch(es).

Documentary requirements.

- a. All branch applications shall be supported by the following documents:
 - (1) Certification that a TC has the ability to conduct operations from the head office as not to be a cause for delayed submission of reports to the Bangko Sentral and/or recording of transactions in the head office;
 - (2) Certified true copy of the board resolution authorizing the establishment of a branch;
 - (3) Areas to be served;
 - (4) Business and/or economic justification (including data) for the establishment of the branch; and
 - (5) Certification/Undertaking signed by the president that the TC has complied or will comply, as the case maybe, with the prerequisites for the grant of authority to establish a branch under Sec. 105-T (*Prerequisites for the grant of authority to establish a branch/marketing office*).
- b. For marketing office(s), the notice shall be supported with Items "(2), (3)" and "(5)" of the above documentary requirements.

Filing/processing fee. A non-refundable filing fee of P2,000.00 shall be paid for each branch application. Moreover, a processing fee of P25,000.00 shall be paid for each branch application processed, regardless of the final decision of the Bangko Sentral.

Date of opening. Approved branch(es) shall be opened within six (6) months from the date of approval thereof and shall not be subject to any extension.

Requirement for opening branch(es)/marketing office(s). Not later than five (5) banking days from date of opening, the TC shall notify the appropriate supervising department of the Bangko Sentral of the actual date of opening of its branch/marketing office.

Relocation/closure of branch(es)/marketing office(s). Relocation/closure of branch(es)/marketing office/s may be effected only with prior notification to the Bangko Sentral in accordance with the following procedures:

- a. Notice of the relocation/closure of the branch/marketing office signed by the president of the TC, together with a certified true copy of the resolution of the TC's board of directors authorizing said relocation/closure and stating the justifications/reasons thereof, shall be submitted by the TC to the appropriate supervising department of the Bangko Sentral;
- b. Upon receipt of "no objection notice" from the Bangko Sentral but at least forty-five (45) calendar days prior to the closure, notice of relocation/closure shall be sent by the TC to the trustors' and other creditors' last known addresses by registered mail service of the Philippine Postal Corporation (Philpost) or delivery service of other mail couriers or electronic mail, and posters shall also be displayed in conspicuous places in the premises of the branch to be closed. Proofs of receipt of notice by the trustors and other creditors shall be kept on file and made available upon request of the Bangko Sentral; and
- c. Within five (5) banking days from the date of relocation/closure of the branch/marketing office, a notice of such relocation/closure signed by the compliance officer with the rank of a vice president or equivalent rank, or by a higher ranking officer, together with a certification that the notification requirement in Item "2" above has been complied with, shall be submitted to the appropriate supervising department of the Bangko Sentral.

Sanctions. Any violation of the provisions of Sec. 105-T depending on the materiality or seriousness of the violation, may constitute a ground for considering the same as unsafe and unsound practice and may be a ground for cancellation of the franchise and closure of said branch/marketing office established herein without prejudice to the imposition of applicable criminal and administrative sanctions prescribed under Sections 36 and 37, respectively of R.A. No. 7653; and if any part of any certification submitted by the TC as required in this Section is found to be false, the following sanctions shall be imposed:

- a. *On the trust corporation.* Suspension for one (1) year of the privilege to establish and/or open approved branches/marketing office, and/or relocate branches/marketing office.
- b. *On the certifying officer.* A fine of P5,000 per day from the time the certification was made up to the time the certification was found to be false for each branch/marketing office opened, relocated, or closed without prejudice to the sanctions under Section 35 of R.A. No. 7653.

(Circular Nos. 1066 dated 4 December 2019 and 884 dated 22 July 2015)

106 – T UNAUTHORIZED CONDUCT OF TRUST AND OTHER FIDUCIARY BUSINESS

If an entity is found to be engaged in unauthorized trust and other fiduciary business and/or investment management activities, whether as its primary, secondary or incidental business, the Monetary Board may proceed against such entity and/or its board of directors, and/or principal officers and/or majority stockholders in accordance with law.

The Monetary Board may take such action as it may deem proper such as, but may not be limited to, requiring the transfer or turnover of any trust and other fiduciary and/or investment management accounts to duly incorporated and licensed entities of choice by the trustor, beneficiary or client, as the case may be.

No entity shall advertise or represent itself as being engaged in trust and other fiduciary business or in investment management activities or represent itself as trustee or investment manager or use words of similar import and/or use in connection with its business title, the words trust, trust corporation, trust company, trust plan or words of similar import, without having obtained the required authority to do so.

TCs may be allowed to adopt any name that is not offensive or confusing to the public: *Provided*, That the words trust, trust corporation, trust company or words of similar import, is affixed in its business name.

(Circular Nos. 1066 dated 4 December 2019 and 884 dated 22 July 2015)

107 – T BUSINESS DAYS AND HOURS

Trust corporations may adopt such business days and hours as they deem proper in the conduct of their operations: *Provided*, That such business days and hours are properly disclosed to clients/investor: *Provided, further*, That trust corporations shall post conspicuously at all times in their place of business their schedule of regular business days and hours.

(Circular Nos. 1066 dated 4 December 2019 and 884 dated 22 July 2015)

108 – T TRUST CORPORATION PREMISES; OTHER FIXED ASSETS

The regulations under Sec. 105-Q (except *Reclassification of real and other properties acquired to QB premises, furniture, fixture and equipment; Sanction*) shall be adopted for the premises and other fixed assets of the TC.

(Circular Nos. 1066 dated 4 December 2019 and 884 dated 22 July 2015)

109 – T MARKETING

General Policy. TC shall put in place sound policies and procedures covering its marketing arrangement giving primary consideration in upholding consumer protection in accordance with the Consumer Protection Framework of the Bangko Sentral. Such policies and procedures shall be embodied in a marketing plan and in case of significant changes to be made thereon, Trust Corporations shall notify the appropriate supervising department of the Bangko Sentral within thirty (30) calendar days prior to the implementation of such change.

Governance in marketing. In marketing its trust products, TC shall:

- a. Establish policies and procedures covering the marketing of its trust products such as, but not limited to, verification and handling of client information, disclosures of key features of trust products, extent of authority of marketing personnel, and risk disclosures;
- b. Be responsible for the conduct and regular training of its marketing personnel. For purposes of this Section, marketing Personnel shall mean any person performing marketing functions for the trust corporation;
- c. Establish proper customer feedback and complaint-handling mechanisms; and
- d. Comply with all laws and regulations applicable in the Philippines including labor laws, anti-money laundering rules, outsourcing and those governing the trust activities/services performed by the marketing personnel on the TC's behalf.

Marketing personnel. TC shall ensure that its marketing personnel are fit and proper, act within the bounds of their functions, and adhere to the Code of Ethics and Professional Standards required under Sec. 301-T. Accordingly, TC shall establish policies and procedures covering the following:

- a. Duties and responsibilities of its marketing personnel;
- b. Conduct of due diligence check on the fitness and propriety of its marketing personnel which includes monitoring and reviewing on an ongoing basis their performance; and
- c. Conduct of continuing training and education especially on updates relative to the TC's trust products.

With respect to the marketing personnel themselves, they shall be required to:

- (1) Undergo training program on trust, other fiduciary and investment management activities. This training program may be conducted by their respective trust entities or by the Trust Officers Association of the Philippines (TOAP) or any training provider acceptable to the Bangko Sentral. However, if the training is conducted by the trust entities, such training program shall be regularly reviewed/validated by TOAP. It is understood that all training materials shall be made available for review and/or validation, whenever necessary;
- (2) Continuously update themselves on the features and characteristics of the trust products they are selling; and
- (3) Conduct themselves with integrity, honesty and with proper representation to the clients of the TC.

In the case of UITF Marketing Personnel, the regulations provided under Sec. 414-Q shall apply.

Marketing materials. TC shall ensure that its marketing materials give a fair and balanced view of the trust product being offered. Marketing materials may be considered fair and balanced when they are clear and easily understood; highlight the purpose and risks of the product; and do not omit any material information that would cause the marketing materials to be misleading. All marketing materials should specify (a) that the same is a trust product and therefore not insured nor governed by the Philippine Deposit Insurance Corporation (PDIC); (b) that any loss/income is for the account of the client/investor; and (c) that the TC is not liable for losses unless upon willful default, bad faith or gross negligence.

Sec. 414-Q (*Minimum disclosure requirements*), on the minimum disclosure requirements shall be adopted by the TC, in so far as applicable to the trust product.

Complaints resolution. TCs, in the marketing and distribution of its products, shall establish systems and controls regarding the recording and handling of complaints. The provisions on Consumer Protection Framework of the Bangko Sentral shall apply.

Reports. TCs shall submit on an annual basis a certification signed by the president and the compliance officer that:

- a. The appointed marketing personnel are fit and proper and has undergone the requisite training; and
- b. The trust corporation has a policy on handling and ensuring the accountability, as well as a system of monitoring the activities and performance of its marketing personnel.

Said certification shall be submitted on or before 30 January of the following year and shall be considered a Category A-2 report.

(Circular Nos. 1066 dated 4 December 2019 and 1018 dated 26 October 2018 and 884 dated 22 July 2015)

110 – T DISTRIBUTION OF TRUST PRODUCTS

TCs shall adopt a distribution arrangement that is consistent with its strategic plan of operation. Such arrangement shall be conducted in a manner that is not prohibited by laws, rules and regulations. Further, a TC shall only be allowed to distribute its own products, otherwise, outsourcing should be taken into consideration as provided under Sec. 112-T.

(Circular Nos. 1066 dated 4 December 2019 and 884 dated 22 July 2015)

B. SPECIAL AUTHORITIES

111 – T LICENSING

Statement of policy and objectives. Consistent with the mandate of the Bangko Sentral to promote a safe and sound banking system, the licensing process on permissible activities of BSFI is enhanced to align the process with international standards and best practices such as the "Core Principles for Effective Supervision" issued by the Basel Committee on Banking Supervision. The Bangko Sentral will not restrict the scope of risk-taking activities of BSFIs consequent of the licenses and/or authorities granted: *Provided*, That these licenses and/or authorities are in line with their business model and strategic direction: *Provided, further*, That these BSFIs demonstrate the capacity to implement these strategies and the ability to manage risks.

The enhanced policy guidelines set forth the expectations and criteria of the Bangko Sentral with respect to granting of licenses and authorities as well as its right to reject applications if the criteria set forth are not met by the applicant BSFIs ("applicants") or if the information provided is not adequate. The Bangko Sentral also reserves the right to withdraw or revoke the license and/or authority or enforce appropriate actions when an institution no longer meets the criteria or standards required to be met for the exercise of the license and/or authority.

These criteria are intended to incorporate the licensing process into Bangko Sentral's enforcement regime that is anchored on good governance, sound risk management system and effective control systems. Further, these criteria aim to provide more consistency on how the risk-focused supervision function is applied to the licensing process. This enhanced licensing policy aims to ensure that licenses and authorities are granted only to applicants that comply with the standards set.

It is also the thrust of these enhanced policy guidelines on granting licenses/authorities to establish Bangko Sentral's accountability and promote transparency on the licensing process which are consistent with its commitment to deliver prompt and efficient service.

Scope. Applications for licenses and/or authorities shall be categorized as follows:

- a. *Type "A"* - applications for licenses and/or authorities where compliance with the defined prudential requirements/criteria described in Prudential Criteria Sec. 111-T (*Prudential Criteria*) is a pre-condition for applicants to be considered eligible;
- b. *Type "B"* - applications for licenses and/or authorities processed regardless of risk profile; and
- c. *Type "C"* - activities which no longer require submission of applications and processing but shall be subject to submission of reports/certification/notification within stated deadlines. However, compliance with pre-qualification requirements is subject to post verification and any false information and/or misrepresentation may be a basis for the imposition of appropriate enforcement actions described in Enforcement Actions Sec. 111-T (*Enforcement actions*). The Bangko Sentral shall use this information to continuously tailor its supervisory strategy for the supervised entities and to maintain and continuously update its institutional database.

Prudential criteria. The prudential criteria set forth in this Section shall be used in determining the eligibility of applicants to the licenses and/or authorities granted by the Bangko Sentral. Accordingly, the following minimum conditions must be met:

- a. Applicant domestic banks must have a CAMELS composite rating of at least "3" and a "Management" rating of not lower than "3", branches of foreign banks must have a ROCA rating of at least "3", and BSFIs must have a RAS rating of at least "Acceptable". Whenever applicable, ratings equivalent to cited minimum rating grade requirements under appropriate rating systems (i.e., IT Rating Systems, Trust Rating Systems, among others) shall apply for certain licenses and/or authorities;
- b. Applicants have no major supervisory concerns in governance, risk management systems, and internal controls and compliance system, and characterize/demonstrate the following:

(1) Governance

Applicants must display a culture of good corporate governance appropriate to its size, risk profile and complexity of operations. Board of directors and management, in their respective roles, provide an appropriate level and quality of oversight and support to all of the institution's activities. Sound management practices are observed and demonstrated through (a) active oversight and satisfactory performance by the board of directors and senior management, (b) appropriate policies, processes, and controls relative to the institution's size, complexity and risk profile, (c) maintenance of an independent and effective internal audit and compliance program as well as a sound internal control environment, and (d) effective risk monitoring and management information systems.

Applicants should not be found engaging in an activity which may be considered as conducting business in an unsafe and unsound manner. In cases where weaknesses, violations of law, policy and/or regulation exists, other than those considered unsafe or unsound practices, these should not be material to the safety and soundness of the institution, can be reasonably managed, and are being adequately addressed.

Quality of corporate governance shall be assessed based on the principles and framework set forth in the Guidelines in Assessing the Quality of Corporate Governance in BSFIs;

(2) Risk management system and internal controls

Applicants shall have a comprehensive risk management system approved by its board of directors (or equivalent management committee in the case of foreign bank branches) to identify, measure, evaluate, report and control or mitigate all material risks on a timely basis and to assess the adequacy of their capital in relation to their risk profile and market and macroeconomic conditions and whose sophistication are commensurate to the risks being monitored and controlled. The risk management system must be characterized by a clear delineation of responsibility for risk management, adequate risk measurement systems, appropriate risk limits structure, effective internal controls and complete, timely and efficient risk reporting systems.

Likewise, applicants shall have an effective and adequate system of internal controls for the conduct of their business taking into account their risk profile. These controls deal with organizational structure, accounting policies and processes, checks and balances, safeguarding of assets and investments and appropriate and effective internal audit and compliance functions. Standards and principles as well as the Bangko Sentral's expectations governing internal controls and audit under existing regulations shall apply in assessing the quality and effectiveness of the internal control systems of an applicant; and

(3) Compliance system

Applicants shall have a compliance system, appropriate to its size, risk profile and complexity of operations, designed to specifically identify and mitigate business risks¹ which may erode the franchise value of the institution. Compliance policies and procedures embodied in a Compliance Policy Manual should be sound and effectively implemented. Likewise, compliance monitoring and testing as well as review process should be robust to ensure BSFI conducts its business/operations in accordance with banking laws, rules and regulation and other laws relevant to banking such as securities laws and regulations. BSFI's should not have found significantly non-compliant with prudential requirements such as SBL, DOSRI limits, capital adequacy ratio requirements, among others.

Standards and principles set forth in the Compliance Rating System framework shall apply in assessing the quality of BSFI's compliance system; and

¹ As defined under Sec. 161-Q (*Compliance function*), *business risk* refers to conditions which may be detrimental to the institution's business model and its ability to generate returns from operations, which in turn erodes its franchise value. Business risk includes reputation, compliance, market conduct and legal risks.

- c. Applicants have complied with directives and/or not subject of specific directives and/or enforcement actions by the Bangko Sentral.

Applicants shall have corrected any findings of unsafe or unsound practices and have addressed any outstanding explicit directives from the Bangko Sentral and/or other relevant regulatory bodies, prohibiting the conduct of activities related to the licenses and/or authorities being applied, as of the date of application. Applicants with specific prohibitions to conduct certain activities shall not be eligible to apply for that particular license and/or authority.

No application shall be accepted until such time that enforcement actions are formally lifted by the Bangko Sentral and/or other relevant regulatory bodies after applicants have demonstrated to the Bangko Sentral that safety and soundness concerns are satisfactorily addressed and/or until such time applicants become eligible.

Applications of BSFIs under rehabilitation and/or enhanced supervision status¹ shall be dealt with in accordance with the eligibility test described in *Section II.1(a) of Appendix T-5*.

BSFIs granted with licenses/authorities shall continuously comply with the abovementioned standards and requirements even after the license/authority has been granted; otherwise, any deviation or non-compliance may be a basis for the imposition of appropriate enforcement actions described in Sec. 111-T (*Enforcement Actions*).

The specific guidelines and procedures on the Bangko Sentral's licensing framework are shown in *Appendix T-5*.

Enforcement Actions. In line with the thrust of the Bangko Sentral to incorporate the licensing process into its enforcement regime, the Bangko Sentral reserves the right to deploy, as may be warranted, an adequate range of supervisory tools to ensure that grantees of licenses/authorities are and remain qualified to possess the same, bring about timely corrective actions and compliance with Bangko Sentral directives, and provide safety to depositors, creditors, other stakeholders as well as the public in general.

Enforcement actions that may be imposed include, but are not limited to:

- a. Corrective action

Corrective actions are measures intended to primarily require BSFIs with approved licenses/authorities to rectify any deviations from the standards, principles and conditions expected for the exercise of the license and/or authority. Corrective actions may include, but are not limited to, issuance of directives and warnings.

- b. Sanctions.

The Monetary Board may impose any of the sanctions enumerated hereunder or a combination thereof.

- (1) Non-monetary

- (a) *Suspension of activities.* The conduct of activities related to the licenses/authorities granted may be suspended if the Bangko Sentral determines that the concerned BSFI no longer meets the criteria or standards set; or
- (b) *Revocation of licenses/authorities.* The license/authority granted may be revoked in cases where violation, non-compliance with criteria/standards and/or false information are noted which affects the safety and soundness of BSFIs' operations; and/or
- (c) *Administrative sanctions.* The responsible directors/officers who approve transactions and/or decisions that resulted in violations of laws, rules and regulations, orders, and directives issued by the Monetary Board or the Governor may be subject to reprimand, temporary suspension, and/or disqualification of directors/officers.

The Monetary Board is not precluded to impose non-monetary sanctions other than those identified from Items "(a)" to "(c)"; and/or

- (2) Monetary.

Monetary penalties may be imposed for any acts, omissions or transactions that are outside the permissible activities of the licenses/authorities granted or are in violation of laws, Bangko Sentral rules and regulations, orders and directives issued by the Bangko Sentral.

¹ Rehabilitation includes BSFIs under the Prompt Corrective Action (PCA), Rehabilitation Program, Letter of Commitment and any other similar cases where BSFIs are expected to comply specific terms and conditions to restore eligibility (safety and sound) status.

Type of license of permissible activities¹. The type of license attached to permissible activities of Bangko Sentral supervised financial institutions (BSFIs) shall be as follows:

Type of License	Permissible Activity	Related Sections
A	Trust and Other Fiduciary Business	Sec. 302-T
B	Amendment of Articles of Incorporation (AOI) and By-Laws	Sec. 103-T (<i>Basic Guidelines in Establishing TCs</i>)
C		

Processing and Licensing Fees. All applications shall be charged with the following processing fees pursuant to Section II.3.i of *Appendix Q-77*:

Type of License/ Authority	Processing Fees for Non-Bank Financial Institutions
A	10,000
B	10,000

Certain Type A licenses shall be charged with the following licensing fees upon approval pursuant to Section II.3.ii of *Appendix Q-77*:

Type of License/ Authority	Licensing Fees* for Non-Bank Financial Institutions
A	50,000

*Licensing fee shall be net of the processing fee.

The foregoing tables shall not apply to licensing applications with separate fee structure under specific sections of this Manual.

(Circular Nos. 1033 dated 22 February 2019, 1031 dated 07 February 2019, 1066 dated 4 December 2019, and 884 dated 22 July 2015)

112 – T MANAGEMENT CONTRACTS AND OUTSOURCING OF THE FUNCTIONS

Management Contracts. Subject to existing laws and regulations, all agreements whereby the affairs or operations of a TC will be carried out by another corporation, person or group of persons, shall be subject to prior Bangko Sentral approval.

The agreements referred to in the preceding paragraph shall not be entered into for a period longer than five (5) years.

Duties and Responsibilities of TCs and their Directors/Officers in All Cases of Outsourcing of Other Functions. Only TCs with trust composite rating of at least “2” and a Management rating of not lower than “3” shall be allowed to outsource designated activities without prior Bangko Sentral approval. Otherwise, the TC must secure approval from the appropriate supervising department of the Bangko Sentral whose evaluation shall be based on the TC's ability to manage risk attendant to outsourcing. The TC shall likewise ensure that outsourcing of activities will not compromise confidentiality or access to (client) sensitive information. Moreover, no trust corporation shall outsource inherent trust functions such as but not limited to managing of risk exposures and strategic decision-making activities. The rules on outsourcing of services as shown under Sec. 112 of the MORB and *Appendix Q-36*, in so far as applicable, shall apply.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019 and 884 dated 22 July 2015)

C. CAPITALIZATION

121 – T MINIMUM REQUIRED CAPITAL

A TC shall have an unimpaired combined capital accounts of P300 million or 0.10% of the total book value of its AUM, whichever is higher: *Provided*, That the minimum paid-in capital shall be at least P300 million.

¹ Transitory Provisions. Applications filed with the Bangko Sentral prior to 6 March 2019 shall not be charged with processing and licensing fees provided under this Section (*Processing and licensing fees*). Applications for Type C licenses received prior to 6 March 2019 shall be deemed to have complied with the notification/certification requirements if after thirty (30) banking days from 6 March 2019, the appropriate supervising department of the FSS does not advise the BSFI concerned of any deficiency on such application.

Capital build-up program. Upon incorporation/establishment, a TC may have an initial minimum paid-in capital of P100 million and shall be allowed to build-up capital over a period of five (5) years: *Provided*, That the minimum paid-in capital after five (5) years shall be at least P300 million: *Provided, further*, That the minimum capital during the capital build-up phase shall be determined as follows:

Calendar Year	Capital Requirements
Year 0- Upon incorporation/At inception	P100 million
End of Year 1	P140 million or 0.10% of AUM whichever is higher
End of Year 2	P180 million or 0.10% of AUM whichever is higher
End of Year 3	P220 million or 0.10% of AUM whichever is higher
End of Year 4	P260 million or 0.10% of AUM whichever is higher
End of Year 5 and onwards	P300 million or 0.10% and onwards of AUM whichever is higher.

The assets under management, for this purpose, shall be computed based on the average of the quarter-end balances of AUM for the calendar year.

For purposes of this Section, *combined capital accounts* shall mean the total capital stock, retained earnings, and profit and loss summary, net of (a) unbooked allowance for probable losses (which includes allowance for credit losses and impairment losses) on the allowable proprietary assets and (b) such other capital adjustments as may be required by the Bangko Sentral.

Sanctions. Whenever the paid-in or the combined capital accounts of the TC are deficient with respect to the preceding paragraphs, the TC may be subject to the sanctions/penalties provided under existing laws and Bangko Sentral rules and regulations. Moreover, the Monetary Board, after considering the report of the appropriate supervising department of the Bangko Sentral, shall require the TC to institute necessary corrective action(s) to address its capital deficiency. Until the TC complies with the minimum capital requirement, the Monetary Board may restrict the ability of the TC, to declare dividends and/or expand its business. The Monetary Board may revoke the license of the TC which fails to comply with the minimum capital requirement within the remedial period.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019, 1027 dated 28 December 2018, and 884 dated 22 July 2015)

D. BASIC SECURITY DEPOSIT AND ALLOWABLE PROPRIETARY ASSETS

131 – T SECURITY FOR THE FAITHFUL PERFORMANCE OF TRUST AND OTHER FIDUCIARY BUSINESS AND INVESTMENT MANAGEMENT ACTIVITIES

Basic security deposit. Trust Corporation duly authorized by the Monetary Board, shall deposit with the Bangko Sentral eligible government securities, pursuant to this Section (Eligible Securities), as security for the faithful performance of trust and other fiduciary duties and investment management activities equivalent to 0.05% of the total book value of the AUM: *Provided*, That at no time shall the basic security deposit be less than P500,000. *Provided, further*, That after the first year of operation, the basic security deposit shall be based on the trust rating of the most recent report of examination of the Trust Corporation, as shown in the table below:

Trust Rating	Required Basic Security Deposit
4	P500,000 or 0.03% of the total book value of the AUM, whichever is higher.
3	P500,000 or 0.05% of the total book value of the AUM, whichever is higher.
2	P500,000 or 0.10% of the total book value of the AUM, whichever is higher.
1	P500,000 or 0.20% of the total book value of the AUM, whichever is higher.

The basic security deposit shall be in the form of government securities acceptable to the Bangko Sentral, pursuant to this Section (*Eligible Securities*).

Scripless securities under the Bureau of the Treasury (BTr) Registry may be used as basic security deposit for trust and other fiduciary duties.

The security for the faithful performance of Personal Equity and Retirement Account (PERA) Administrator shall be separately calculated as prescribed under Sec. 1121-Q.

Eligible securities. The provisions of Sec. 416-Q on eligible securities shall govern the basic security deposit requirement for faithful performance of trust and other fiduciary business and investment management activities of trust corporations.

Valuation of securities and basis of computation of the basic security deposit requirement. For the valuation of securities and basis of computation of the basic security deposit requirement, the provisions of Sec. 416-Q (*Valuation of securities and basis of computation of the basic security deposit requirement*) shall apply.

Compliance with the basic security deposit requirement.

- a. Compliance¹. The trust corporation shall ensure compliance with the required basic security deposit at all times. Any deficiency arising from a withdrawal, replacement or redemption transaction must be corrected through the immediate posting of additional securities. In case a deficiency is calculated at the end of the calendar quarter, the trust corporation shall have a grace period of thirty (30) calendar days reckoned from the end of the reference calendar quarter within which to deposit with the Bangko Sentral the additional securities required under this Section. In case of change in the trust rating, the reckoning period of the thirty (30) days shall be the quarter-end from receipt of the Report of Examination.

- (1) *Quarterly compliance.* The trust corporation shall comply with the basic security deposit requirement on a quarterly basis. In determining quarterly compliance, the fair value of government securities used as compliance with the basic security deposit requirement shall be reckoned as of the end of the calendar quarter and the base amount for the basic security deposit requirement provided under this Section on *valuation of securities and basis of computation of the basic security deposit requirement* shall be applied.

Haircuts for government securities prescribed under this Section (*Valuation of securities and basis of computation of the basic security deposit requirement*) shall be determined based on the remaining maturity of the security from the end of the reference quarter, and applied of the fair value of the government securities used as compliance with the basic security deposit.

The trust corporation shall have a thirty (30)-calendar day grace period after the end of every quarter within which to deposit with the Bangko Sentral, securities pursuant to existing regulations to comply with the basic security deposit requirement as of the preceding quarter-end.

- (2) *Compliance upon deposit, withdrawal, replacement or redemption.* The trust corporation shall ensure compliance with the basic security deposit requirement after every deposit, withdrawal, replacement or redemption of government securities. The basic security deposit requirement shall be the amount computed as of the quarter-end preceding the date of deposit, withdrawal, replacement or redemption pursuant to this Section (*Valuation of securities and basis of computation of the basic security deposit requirement*). The fair value of the remaining government securities, adjusted for relevant haircuts, shall be based on amounts reported as of the quarter-end preceding the date of deposit, withdrawal, replacement or redemption pursuant to this Section (*Valuation of securities and basis of computation of the basic security deposit requirement*). The haircuts shall be determined based on the remaining maturity of the security from the quarter-end preceding the date of the securities transfer transaction.

Securities used as compliance with the basic security deposit requirement that are issued within the calendar quarter shall be valued at their purchase price, adjusted for relevant haircuts that are determined based on their remaining maturity as of the purchase date.

- b. Required Reports. Trust corporations shall submit the following reports in accordance with *Appendix T-3*:

- (1) Quarterly Report on Compliance with the Basic Security Deposit Requirement (BSD-Form-1); and
(2) Report on Basic Security Deposit Transactions (BSD-Form-2).

Trust corporations shall maintain adequate documentation (e.g., screenshots of fair values) to support the computation of their compliance with the basic security deposit requirement, which shall be made available to the Bangko Sentral upon request.

- c. Other Procedural Requirements.

- (1) Opening of a Securities Account. The guidelines on the opening of an account with the BTr Registry are provided in *Appendix Q-24*.
(2) Deposit, Withdrawal or Replacement. The trust corporation shall input the details of securities transfer transactions that are properly supported by notification reports in the BTr Registry to effect the deposit, withdrawal or replacement of securities on the intended date of transfer in the BTr Registry. The input of details of transactions shall be made on or before 12:00 noon for withdrawal or replacement transactions, and on or before 3:30 pm for deposit transactions, on the intended date of transfer as provided in the BSD-Form-2.

Withdrawal or replacement transactions entered after the cut-off time shall be processed on the next banking day: *Provided*, That the trust corporation re-enters the details of the withdrawal or replacement transaction on or before 12:00 noon of the next banking day: *Provided, further*, That deficiency in the basic security deposit arising from failure of the trust corporation to input details of withdrawal or replacement

¹ The provisions on quarterly compliance and compliance upon deposit, withdrawal, replacement or redemption became effective on 31 March 2018.

transactions in the BTr Registry on the intended date of transfer shall cause the imposition of sanctions/penalties under this Section (*Sanctions*). Failure to enter or re-enter the transaction details on the next banking day will result in the cancellation of the previously submitted BSD-Form-2. To effect withdrawal or replacement transactions, the trust corporation shall re-submit the BSD-Form-2 in accordance with the prescribed timelines.

- (3) Administration of Proceeds from Deposited Securities. Coupon or interest payments and the redemption value of matured securities that are deposited with the Bangko Sentral shall be credited to the DDA of the trust corporation's settlement bank.

Trust corporations shall develop and maintain systems to ensure compliance with the required basic security deposit as prescribed in this Section (*Compliance with the basic security deposit requirement*).

Sanctions.

- a. Without prejudice to the imposition of sanctions for capital deficiency, the following sanctions shall be imposed for any deficiency in the basic security deposit for the faithful performance of trust and other fiduciary duties and investment management activities:

- (1) On the TC

- (a) Daily monetary penalty of P1,000 or one tenth of one percent (1/10 of 1%) on the amount of the deficiency reckoned per calendar day, whichever is higher but not to exceed P10,000 per calendar day, shall be assessed on the Trust Corporation. A trust corporation which incurs a deficiency with the basic security deposit within the quarter, or reports a deficiency with the basic security deposit as of the end of the quarter and fails to deposit securities to comply with the said requirement within the thirty (30)-calendar day grace period, shall be considered deficient with the basic security deposit requirement from the date the deficiency is incurred up to the date the deficiency is corrected or the succeeding quarter-end, whichever comes earlier.
- (b) Non-monetary penalty beginning with the third offense – Prohibition against the acceptance of new trust and other fiduciary accounts, introduction of new trust products or UITF, and/or from renewing expiring trust and other fiduciary contracts up to the time the violation is corrected.

- (2) On the president

- (a) First offense - warning that subsequent violations shall be dealt with more severely;
- (b) Second offense - written reprimand with a stern warning that subsequent violations shall be subject to suspension;
- (c) Third offense - thirty (30) calendar day-suspension without pay; and
- (d) Subsequent offense(s) - sixty (60) calendar day-suspension without pay.

- b. Notwithstanding the execution of a basic security deposit, withdrawal, or replacement transaction, the Bangko Sentral is not precluded from imposing sanctions against the trust corporation for non-compliance with the regulations on the basic security deposit, if warranted.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019, 1032 dated 15 February 2019, 998 dated 01 March 2018, and 884 dated 22 July 2015)

132 – T ALLOWABLE PROPRIETARY ASSETS

Assets owned by the TC shall be for the purpose of engaging in the business of trust, other fiduciary and investment management activities and for maintaining the minimum capital requirement. The TC shall not engage in any manner in proprietary trading and speculative investing activities. The allowable proprietary assets shall include eligible government securities deposited with the Bangko Sentral in compliance with the basic security deposit requirement provided under Sec. 114-T.

The allowable proprietary assets shall consist of:

- (1) Investments in eligible government securities earmarked as basic security deposits as defined under Sec. 114-T (*Eligible Securities*);
- (2) Investments in securities issued by or guaranteed by the Philippine government, or the Bangko Sentral;
- (3) Investments in bank deposits, and highly liquid and investment grade securities, including: (1) money market instruments, (2) those issued by central governments and central banks of foreign countries with the highest credit quality given by any two (2) internationally accepted rating agencies, and (3) securities issued by any supranational entity;

- (4) Loans and other credit accommodations: (1) secured by obligations of the Philippine Government or of the Bangko Sentral; (2) fully guaranteed by the Philippine Government as to the payment of principal and interest; (3) secured by highly liquid and investment grade securities; (4) to the extent covered by the hold-out on or assignment of, bank deposits held in the Philippines; and (5) which the Monetary Board may from time to time specify as non-risk items;
- (5) Real and other properties, including building, furniture and fixtures, safes, equipment, and other fixed assets, utilized/to be utilized by the TC in the conduct of its trust, other fiduciary business and investment management activities; and
- (6) Other assets, not inconsistent with the provisions of paragraphs "a" to "d" hereof, which are deemed to be readily realizable and available for the payment of liabilities, losses or claims at values to be determined in accordance with existing Bangko Sentral guidelines.

For purposes of investing the allowable assets, the TC shall not: (a) commingle their proprietary funds or assets with the AUM and (b) invest the same in their own UITF or other trust products. The TC is expected to adopt policies and processes that will address relevant exposures as well as potential conflict of interest in the administration of fiduciary business.

(Circular Nos. 1144 and 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019, and 884 dated 22 July 2015)

E. STOCK, STOCKHOLDERS AND DIVIDENDS

141 – T SHARES OF STOCKS OF TCS

The following shall govern transactions affecting shares of stock of TCs and limits on stockholdings in a single TC.

Limits of stockholdings in a single TC. The stockholdings in any TC shall be subject to the limits as prescribed below:

- a. Domestic stockholders
 - (1) Banks may own stockholdings of a TC: *Provided*, That the acquisition or investment in the equity of a TC shall be subject to all relevant laws, rules and regulations on equity investment of banks in a financial allied enterprise.
 - (2) Regulated non-bank entities engaged in finance, insurance, asset management and other similar activities acceptable to the Bangko Sentral may own up to 100% of the TC's stockholdings unless otherwise provided in their respective governing laws, charters and regulations.
 - (3) Filipino individuals and non-regulated domestic entities may each own up to forty percent (40%) of the voting stock of a TC. There shall be no ceiling on the aggregate ownership by Filipino individuals and non-regulated domestic entities in a TC.
- c. Foreign stockholders may own stockholdings in a TC, subject to the limits as stated below:
 - (1) Unless otherwise provided by laws, charters and regulations, foreign banks and regulated foreign non-bank entities engaged in finance, insurance, asset management, and other similar activities acceptable to the Bangko Sentral may own more than forty percent (40%) up to 100% of the voting stock of a trust corporation, subject to the following factors:
 - (a) Strategic trade and investment relationships between the Philippines and the home country of the foreign bank/entity;
 - (b) Relationship between the applicant foreign bank/entity and the Philippines;
 - (c) Demonstrated capacity, global reputation for financial innovations and stability in a competitive environment of the applicant foreign bank/entity;
 - (d) Reciprocity enjoyed by Philippine banks and other financial institutions in the applicant's country; and
 - (e) Willingness to share technology.
 - (2) Others, such as individuals and other entities not identified above may own up to forty percent (40%) of the voting stock of a trust corporation: *Provided*, That the aggregate voting stock owned by foreign individuals and other entities not identified above shall not exceed forty percent (40%) of the outstanding voting stock of the trust corporation.

The limits as stated above are further subject to the limits imposed by the respective laws/regulations in the home country of investing companies or country of origin.

A foreign bank or non-bank entity seeking to operate in the Philippines shall satisfy the criteria in Item No. "b(1)(c)" above, i.e., demonstrated capacity, global reputation for financial innovations and stability in a competitive environment of the applicant foreign bank/entity: *Provided*, That if it has controlling interest in the TC, it must be widely-owned and publicly-listed in the country of origin, unless the foreign bank/entity is owned and controlled by the government of its country of origin.

The determination of whether a foreign bank/entity is widely-owned and publicly listed, established, reputable, and financially sound shall be based on the information derived from submitted documents. Further, if the foreign bank/entity is owned/controlled by a holding company, this requirement may apply to the holding company.

Moreover, the reciprocity rights enjoyed by Philippine banks and other financial institutions in the applicant's country shall be considered.

- d. An individual and a non-regulated entity or entities which are wholly-owned, or a majority of the voting stock of which is owned, by him, may own only up to a combined forty percent (40%) of the voting stock of a TC.
- e. Stockholdings of family groups or related interests. Individuals related to each other within the fourth degree of consanguinity or affinity, whether legitimate, illegitimate or common-law, shall be considered family groups or related interests but may each own up to forty percent (40%) of the voting stock of a trust corporation: *Provided*, That said relationship must be fully disclosed in all transactions by such individuals or family groups or related interests.
- f. Two (2) or more corporations owned or controlled by the same family group or same group of persons shall be considered related interests but may each own up to forty percent (40%) of the voting stock of a trust corporation: *Provided*, That said relationship must be fully disclosed in all transactions by such corporations or related groups of persons with the trust corporation.
- g. Determination of foreign-owned voting stock and citizenship of corporate stockholders in a trust corporation as well as the relationship of stockholders of a trust corporation.
 - (1) The percentage of foreign-owned voting stock in a trust corporation should be based on citizenship of individual stockholders, including beneficial owners¹ of shares being held by nominees, custodians and other vehicles; and
 - (2) The citizenship of the corporation, which is a stockholder of a trust corporation, shall follow the citizenship of the controlling stockholders of the corporation. For purposes hereof, the term "controlling stockholders" shall refer to stockholders holding more than fifty percent (50%) of the voting stock of the corporate stockholders of the trust corporation.
 - (3) The relationship of individuals who are stockholders of a trust corporation shall be determined in accordance with the provisions of Articles 963 to 966 of the Civil Code of the Philippines.

Transactions involving voting shares of stocks. The provisions relevant to the transactions involving voting shares of stocks as provided under Sec. 122 (*Transactions involving voting shares of stocks*) of the MORB, in so far as applicable to TC, shall apply.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019, 903 dated 29 February 2016, and 884 dated 22 July 2015)

142 – T DIVIDENDS

No trust corporation shall declare dividends greater than its accumulated net profits then on hand, deducting therefrom its losses. At the time of declaration, the trust corporation shall have complied with the following:

- a. Minimum capitalization;
- b. Basic security deposit;
- c. No net losses from operations in any one of the two calendar or fiscal years immediately preceding the date of dividend declaration; and
- d. Has not committed any of the following major violations:
 - (1) Unsafe and unsound practices as defined under existing Bangko Sentral regulations;
 - (2) Uncorrected major violations/exceptions cited in the previous examination;
 - (3) Engaging in activities without the required prior approval or license from the Bangko Sentral such as, but not limited to derivatives; and
 - (4) Refusal to permit examination into the affairs of the institution or any willful making of a false or misleading statement to the Monetary Board or to the appropriate supervising department of the Bangko Sentral.

¹ Beneficial owner refers to natural person(s) who ultimately owns or controls a customer and/or the person on whose behalf a transaction is being conducted. It also incorporates those persons who exercise ultimate effective control over a legal person or arrangement.

The provisions under Sec. 123-Q (*Definition of terms, Requirements on the declaration of dividends/net amount available for dividends Item “b”, Reporting and verification, Recording of dividends, and Rules on declaration of stock dividends*), shall be adopted relative to dividends declaration of a trust corporation.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019, and 884 dated 22 July 2015)

F. CORPORATE GOVERNANCE

151 – T BOARD OF DIRECTORS

Definition; Qualifications; Powers; Responsibilities and Duties of Board of Directors. Unless otherwise provided specifically, the provisions of Sec. 131-Q and Sec. 132-Q, in so far as applicable, shall be adopted.

Qualifications of a director. In addition to the provisions of Sec. 132-Q (*Qualifications of a director*), the members of the Board are expected to be familiar with Philippine laws, rules and regulations, and best practices on trust business, as well as uphold at all times, ethical and good governance standards. Accordingly, the members of the board of directors shall possess the necessary technical expertise and relevant experience in such trust business which may be indicated by any of the following:

- a. At least one (1) year of actual experience in trust, other fiduciary business, or investment management activities;
- b. At least three (3) years of professional experience in relevant field such as banking, finance, economics, law and risk management;
- c. Completion of at least ninety (90) training hours on trust, other fiduciary business, or investment management activities acceptable to the Bangko Sentral; or
- d. Completion of a relevant global or local professional certification program.

Powers/responsibilities and duties of board of directors. In addition to the provisions prescribed under Sec. 132-Q (*Specific duties and responsibilities of the board of directors*), the board of directors shall conduct regular meetings at least once every quarter, or more frequently as necessary, depending on the size and complexity of the fiduciary business.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019, 970 dated 22 August 2017, and 884 dated 22 July 2015)

152 – T OFFICERS

Definition; Qualifications; and Duties and Responsibilities of Officers. The definition, qualifications and duties of officers provided under Secs. 131-Q and 132-Q, shall be adopted for trust corporation, unless otherwise provided herein.

Moreover, in line with the fit and proper criterion of the abovementioned Section, the president who shall be appointed shall also possess the following qualifications:

- a. At least five (5) years of actual management experience in trust, other fiduciary and investment management operations; or
- b. At least five (5) years of actual experience as officer of a bank, NBFI or related field: *Provided*, That said officer passed the training program in trust, other fiduciary and investment management operations acceptable to the Bangko Sentral.

Officers of the TC with position of senior vice president and up, shall at least possess the requirement in Item “(b)” above.

The foregoing qualifications for officers shall be in addition to those required or prescribed under R. A. No. 8791, the Corporation Code of the Philippines (Batas Pambansa Blg. 68) and other existing applicable laws and regulations.

Duties and responsibilities of officers. The president shall have general supervision and direction of the business affairs of the TC; he/she shall be responsible in the management of the day-to-day activities of the TC. In this regard, the president shall provide supervision and direction in the following areas:

- a. Adherence to the basic standards in the administration of trust, other fiduciary and investment management accounts pursuant to *Appendix Q-49*;
- b. Development and implementation of relevant policies and procedures on fiduciary activities;
- c. Observance of sound risk management practices and maintenance of necessary controls to protect assets under custody and held in trust or other fiduciary capacity;
- d. Implementation of investment and other fiduciary activities in accordance with agreements with clients and parameters set by the BoD;

- e. Regular reportorial requirements to the board of directors on business performance and other matters requiring its attention;
- f. Maintenance of adequate books, records and files for each trust or other fiduciary account and provision of timely and regular disclosures to clients on the status of their accounts; and
- g. Submission of periodic reports to regulatory agencies on the conduct of the trust operations.

The other duties and responsibilities for officers as provided under Sec. 134-Q (*Duties and responsibilities of officers*) shall likewise apply to the officers of the TC.

Prohibitions to become officer. No appointive or elective public official, whether full-time or part-time, shall at the same time serve as officer of the trust corporation.

Bio-data of Directors and Officers. The applicable provisions of Sec. 136-Q (*Bio-data of directors and officers*, Item “(c)”) shall be adopted by the Trust Corporation.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019, 970 dated 22 August 2017, and 884 dated 22 July 2015)

153 – T INTERLOCKING DIRECTORSHIP/OFFICERSHIP

- a. Interlocking directorship between a trust corporation and another FI shall be allowed.
- b. No interlocking directorship and officership, and interlocking officership and secondments, shall be allowed between trust corporations and between a trust corporation and any FI except, with prior approval of the Monetary Board, on concurrent officership position in the same capacity which do not involve management functions such as internal auditor, corporate secretary, assistant corporate secretary, and security officer, within a group. For this purpose, secondment shall refer to the transfer/detachment of a person from his regular organization for temporary assignment elsewhere where the seconded employee remains the employee of the home employer although his salaries and other remuneration may be borne by the host organization.

Representatives of government. The provisions of this Section shall apply to persons appointed to such positions as representatives of the government or government-owned or controlled entities holding voting shares of stock of trust corporations unless otherwise provided under existing laws.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019, 953 dated 27 March 2017, and 884 dated 22 July 2015 and)

154 – T DISQUALIFICATIONS OF DIRECTORS AND OFFICERS

Disqualification of Directors and Officers. In so far as applicable, Sec. 137-Q shall be adopted by the trust corporation. In addition, Sec. 137-Q (*Persons disqualified to become directors/trustees, Persons disqualified to become officers*) as well as the following shall also be considered grounds for disqualification of directors and officers:

- a. Negligence in the performance of the duties and responsibilities stipulated in the contract creating the trust, other fiduciary and investment management account and which directly or indirectly caused material loss/impairment of the managed trust, other fiduciary and investment management assets;
- b. Entering into an arrangement or scheme which will compromise or prejudice the interest, rights and privileges of the trustor, principal and/or beneficiaries; and
- c. Other grounds as may be approved by the Monetary Board.

The foregoing grounds for disqualification for directors shall be in addition to those prescribed under the Corporation Code of the Philippines (Batas Pambansa Blg. 68) and other existing applicable laws and regulations.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019, 970 dated 22 August 2017, and 884 dated 22 July 2015)

155 – T RULES OF PROCEDURE ON ADMINISTRATIVE CASES INVOLVING DIRECTORS AND OFFICERS OF TC

Sec. 137-Q on the rules of procedure on administrative cases involving directors and officer of QBs shall likewise be adopted for TCs.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019, and 884 dated 22 July 2015)

G. RISK MANAGEMENT

161 – T RISK MANAGEMENT GUIDELINES

Risk Management Guidelines. Risk management guidelines for trust and other fiduciary business and investment management activities shall be governed by the applicable regulations under Secs. 142-Q, 144-Q, 145-Q and 147-Q, and by *Appendix Q-50*.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019, and 884 dated 22 July 2015)

162 – T CREDIT RISK MANAGEMENT

The guidelines on sound credit risk management practices as provided under Sec. 143-Q and the following Subtopics shall apply in so far as applicable to trust corporations:

Sec. 143-Q (*Evaluation of credit risk management system*)

Sec. 143-Q (*Role of the board and senior management*)

Sec. 143-Q (*Credit risk management structure*)

Sec. 143-Q (*Credit risk strategy*)

Sec. 143-Q (*Credit policies, processes and procedures*)

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019, and 884 dated 22 July 2015)

163 – T OPERATIONAL RISK MANAGEMENT

Policy Statement.¹ It is the thrust of the Bangko Sentral to promote the adoption of effective risk management systems to sustain the safe and sound operations of its trust corporations. Cognizant that operational risk is inherent in all activities, products and services, and is closely tied in with other types of risks (e.g., credit, liquidity and market risks), the Bangko Sentral is issuing these guidelines to clearly set out its expectations and define the minimum prudential requirements on operational risk management. These guidelines align existing regulations to the extent possible, with international standards² and best practices. Bangko Sentral expects trust corporations to adopt an operational risk management framework, as part of the enterprise-wide risk management system, that is suited to their size, complexity of operations, and risk profile.

Definition of operational risk. *Operational risk* refers to the risk of loss resulting from inadequate or failed internal processes, people and systems; or from external events. This definition includes legal risk, but excludes strategic and reputational risk. Operational risk is inherent in all activities, products and services, and cuts across multiple activities and business lines within the financial institution and across the different entities in a banking group or conglomerate where the financial institution belongs.

Duties and responsibilities.

- a. **Board of directors.** Consistent with the principles embodied under Sec. 118-T (*Powers/responsibilities and duties of board of directors*), the duties and responsibilities of the board of directors in relation to the effective management of risk include the establishment of a comprehensive and effective operational risk management framework as part of the enterprise-wide risk management system. In this regard, the board of directors shall:
 - (1) Ensure that it is aware of and understands the nature and complexity of the major operational risks in the trust corporation's business and operating environment, including risks arising from transactions or relationships with third parties, vendors, suppliers including outsourced service providers, and clients of services provided. This should include understanding of both the financial and non-financial impact of operational risk to which the trust corporation is exposed to;
 - (2) Approve the operational risk management framework which shall form part of the trust corporation's enterprise-wide risk management system and shall cover all business lines and functions of the trust corporation, including outsourced services and services provided to external parties. The operational risk management framework should include an enterprise-wide definition of operational risk, which should be consistent with the definition under Sec. 125-T (*Definition of Operation Risk*), governance, and reporting structures including the roles and responsibilities of all personnel, feedback mechanism, as well as standards and tools for operational risk management. In this respect, the board shall:

¹ Trust Corporations shall comply with the foregoing standards on operational risk management within a period of two (2) years from 05 February 2016. In this regard, a trust corporation should be able to show its plan of actions with specific timelines, as well as the status of initiatives being undertaken to fully comply with the provisions of Sec. 125-T.

² Embodied in the relevant documents issued by the Basel Committee on Banking Supervision

- (a) Define the operational risk management strategy and ensure that it is aligned with the trust corporation's overall business objectives. Relative to this, the board should set and provide clear guidance on the trust corporation's operational risk appetite (i.e., the level of operational risk the trust corporation is willing to take and able to manage in pursuit of its business objectives as well as the type of risks that are not acceptable to the board and management), which should consider all material risk exposures as well as the trust corporation's financial condition and strategic direction;
 - (b) Approve appropriate thresholds or limits to ensure that the level of operational risk is maintained within tolerance and at prudent levels and supported by adequate capital. Relative to this, the board shall approve policy on resolving limit breaches which should cover escalation procedures for approving or investigating breaches, approving authorities, and requirements in reporting to the appropriate level of management or the board;
 - (c) Ensure that operational risk is appropriately considered in the capital adequacy assessment process;
 - (d) Ensure that it receives adequate information on material developments in the operational risk profile of the trust corporation, including pertinent information on the current and emerging operational risk exposures and vulnerabilities as well as information on the effectiveness of the operational risk management framework. The board must challenge the quality and comprehensiveness of the operational risk information it receives. It should also be satisfied with the reliability of the said information and the monitoring system for operational risk;
 - (e) Ensure that business objectives, risk appetite, the operational risk management framework, and the respective roles and responsibilities of personnel and officers at all levels in terms of implementing the operational risk management framework, are properly disseminated, clearly communicated/discussed, and understood by personnel concerned;
 - (f) Provide senior management with clear guidance and direction regarding the principles underlying the operational risk management framework. The board shall ensure that senior management appropriately implements policies, processes and procedures, and provides feedback on the operational risk management process. In this regard, the board shall establish a feedback and reporting system that will allow employees to raise their concerns without fear of negative consequences; and
 - (g) Ensure that the operational risk management framework is subject to effective and comprehensive independent review, on a periodic basis, by operationally independent, appropriately trained, and competent staff to ensure that it remains commensurate with the trust corporation's risk profile and continues to be adequate and effective in managing operational risk. The review should take into account the changes in business and operating environment, material changes in systems, business activity or volume of transactions, quality of control environment, effectiveness of risk management or mitigation strategies, loss experience, and the frequency, volume or nature of breaches in limits or any policy.
- (3) Provide adequate oversight on all outsourcing activities and ensure effective management of risks arising from these activities. In this regard, the board of directors shall approve a framework governing outsourcing activities, which includes a system to evaluate the risk and materiality of all existing and prospective outsourcing engagements and the policies that apply to such arrangements;
 - (4) Ensure observance of expectations and requirements prescribed under relevant laws, rules, and regulations, industry-set standards, and policies on internal control, internal audit, and disclosure;
 - (5) Promote a culture of high standards of ethical behavior. The board shall adopt a code of conduct of ethical behaviors with corresponding disciplinary actions for non-compliance, which should cover, among others, guidance and protocols on conflicts of interest situations, safeguarding of confidential information, and use of sensitive information. The board should likewise institute tools, methodologies, and practices in order to ensure compliance and adherence to the standards by all employees including the senior officers and the board itself. In this regard, employees should be required to acknowledge in writing that they have read, understood, and will observe the code of conduct;
 - (6) Ensure that business and risk management activities, including the operational risk management function, are carried out by adequate and qualified staff with the necessary experience, technical capabilities, and competence. Moreover, the board shall ensure that employees and officers in all areas of operations have a high degree of integrity.

For this purpose, the board shall approve appropriate hiring and selection policies and processes, adopt a continuing professional development program, and institutionalize a framework for continuing assessment of fitness and propriety of employees. These policies, processes and programs should reinforce the conduct and values being promoted in the organization.

Further, the board shall oversee the design and implementation of remuneration policies. It shall ensure that the remuneration policies do not encourage excessive risk-taking or provide incentives to people to perform contrary to the desired risk management values. It shall also ensure that remuneration policies are appropriate and aligned with the trust corporation's long-term strategic direction and risk appetite, as well as with relevant legal or regulatory requirements;

- (7) Ensure that all units in the organization have adequate resources, including personnel complement, and are supported by appropriate technological systems. The use of technological systems must be commensurate to the activities being undertaken; and
 - (8) Oversee implementation of a sound business continuity management framework. The board should create and promote an organizational culture that places high priority on business continuity. This shall include providing sufficient financial and human resources associated with the trust corporation's business continuity initiatives.
- b. *Senior management.* Senior management shall be responsible for the implementation and consistent adherence by all personnel to the operational risk management framework approved by the board of directors. In this respect, senior management shall:
- (1) Translate the approved operational risk management framework into specific policies and processes covering all businesses and functions of the trust corporation, including outsourced services and services provided to external parties. Said policies should be clearly documented, approved by the board of directors and communicated to personnel at all levels. Policies should include, among others:
 - (a) Definition of operational risk and operational risk loss. This should be supported by common operational risk taxonomy that includes the operational risk event type and causes of losses to facilitate the consistent identification of operational risks across the trust corporation as well as the management of operational risk in an integrated manner;
 - (b) Appropriate governance and oversight structures, reporting lines, and accountabilities for managing operational risks;
 - (c) Clear description of risk limits and thresholds that correspond to the BSFI's approved operational risk appetite and tolerance;
 - (d) Risk mitigation strategies and tools for maintaining risks within the thresholds and limits set;
 - (e) Approach to operational risk identification, assessment, monitoring and reporting that utilizes appropriate operational risk management tools. This should include an outline of the reporting framework and types of data/information to be included in the risk management reports; and
 - (f) Requirement for the conduct of independent review of the framework as well as its implementation, on a periodic basis, and whenever there are material changes in the trust corporation's operational risk profile.
 - (2) Communicate individual roles and responsibilities of personnel. It is important that personnel at all levels understand their respective roles in the operational risk management process. In this regard, senior management should clearly assign authority, responsibility, and reporting relationships to encourage and maintain accountability, and ensure that the necessary resources are available to manage operational risk effectively;
 - (3) Establish systems to report, track, escalate, and resolve issues; and set the frequency of operational risk management reporting considering the level and type of risks involved as well as the pace and nature of the operating environment of the trust corporation;
 - (4) Assess the appropriateness of the operational risk management process in light of the changing business environment and nature of risks arising from business activities or functions;
 - (5) Ensure that sufficient number of personnel, technical support, and other resources are devoted for operational risk management such that the trust corporation's activities are conducted by qualified personnel with the necessary experience and technical capabilities. It shall also ensure that personnel responsible for monitoring and enforcing compliance with the trust corporation's operational risk policy as well as the compliance and internal audit units have authority independent from the units they review and are knowledgeable about the different areas of operations; and
 - (6) Establish policies, standards and processes for an effective business continuity management.

- c. *Business units.* Business line management and personnel, as the first line of defense, are responsible on a day-to-day basis for identifying, managing and reporting operational risks inherent in the products, activities, processes and systems for which they are accountable. In this regard, business line management shall ensure that:
- (1) Internal controls and practices within their business lines are consistent with the enterprise-wide policies and procedures to support the management of operational risk;
 - (2) Business line specific policies, processes, and procedures are adequate and effectively implemented, and personnel are adequate and competent to manage operational risk for all material products, activities, and processes;
 - (3) Operational risk management framework within each business line reflects the scope of that business line and its inherent operational complexity and operational risk profile;
 - (4) Risk mitigation strategies and processes as approved by the board and senior management are established and executed;
 - (5) Internal controls, and operational risk mitigation strategies and processes are periodically reviewed within the business units to effectively manage operational risks within approved risk tolerance, and consistent with enterprise-wide policies and procedures established. There must be clear expectations and processes established to ensure prompt escalation and actions to address any gap or issue identified; and
 - (6) Operational risk-related information (e.g., loss events, incidents, et. al.) are adequately and timely communicated/coordinated to Operational Risk Management Function (ORMF) for risk monitoring and reporting, in addition to the usual reporting to senior management and/or board.

Roles and functions.

- a. *Operational Risk Management Function.* Trust corporations are not required to create an ORMF. However, the board of directors is expected to discuss operational risk issues during its board meetings with discussions adequately documented in the minutes of meetings. The board of directors of trust corporations may, at its own discretion, or as directed by the appropriate supervising department of the Bangko Sentral, create a Risk Management Unit (RMU) or assign specific personnel under said unit to handle operational risk concerns. The specific personnel or RMU shall directly report to the head of the RMU or to the board-level Risk Oversight Committee (ROC), as appropriate. The ROC or the board shall be responsible for assessing the annual performance of the unit taking into account how said unit carried out its duties and responsibilities. The ORMF shall be supported by a board-approved charter that defines its stature, authority, and independence.

The ORMF shall primarily assist management in meeting its responsibility to understand and manage operational risk exposures and ensure the development and consistent implementation of operational risk policies, processes, and procedures throughout the institution. In this regard, the ORMF shall:

- (1) Recommend to the board of directors and senior management appropriate policies and procedures relating to operational risk management and controls;
- (2) Design and implement the operational risk assessment methodology tools and risk reporting system of the institution;
- (3) Coordinate risk management activities across the institution;
- (4) Consolidate all relevant operational risk information/reports to be elevated/presented to the board and senior management;
- (5) Provide operational risk management training and advice to business units on operational risk management issues; and
- (6) Coordinate with compliance function, internal audit, and external audit on operational risk matters.

ORMF personnel should have technical proficiency, appropriate educational background, and exposure to enable them to effectively perform the unit's mandate. Trust corporations shall have in place a training program to keep its personnel up-to-date on different operational risk issues and challenges.

- b. *Compliance function.* The compliance function shall conduct an independent assessment of the compliance with relevant laws, rules and regulations, as well as internal policies of the institution, and determine areas that may potentially result in risk of loss due to inadequate or failed internal processes, systems, and people. The latter includes inappropriate conduct/behavior of personnel, officers, and the board, that may lead to fraud or any form of business disruption. The compliance function shall assess whether the identified operational risk exposure by the business units or by the function itself shall affect the franchise value of the institution. In this regard, it shall advise and assist management in establishing guidance on the appropriate implementation of relevant laws, rules and regulations, and internal policies.

- c. *Internal audit.* Internal audit shall conduct an independent assessment of the operational risk management framework, including the implementation of operational risk management policies and procedures. The board of directors, either directly or indirectly through the board-level Audit Committee shall ensure that the scope and frequency of audit is appropriate to the risk exposures. Any operational risk issue identified and reported in the audit process should be addressed by senior management in a timely and effective manner, or raised to the attention of the board as appropriate.

Operational risk management framework. Trust corporations shall have in place an appropriate operational risk management framework, as part of the enterprise-wide risk management system, that is effective and efficient in identifying, assessing, monitoring and controlling/mitigating operational risk. They shall ensure that their operational risk management framework is commensurate with the complexity of their operations, range of products and services, organizational structure, and risk profile.

- a. *Risk identification and assessment.* Risk identification and assessment are fundamental elements of an effective operational risk management system. Effective risk identification shall consider both internal factors (such as trust corporation structure, nature of activities, the quality of human resources, organizational changes and employee turnover, among others) and external factors (such as changes in the broader environment and the industry, advances in technology, and developments in political, legal, and economic factors, among others). Risk identification and assessment allow the trust corporation to better understand its risk profile and allocate risk management resources and strategies more effectively. Since the business lines are expected to have the best knowledge of their risk exposures and processes, these units should play a major role in the identification and assessment of operational risk.

- (1) Trust corporations shall consider the following loss event-type categories as part of their risk identification and assessment processes:

- a. Internal fraud, e.g., intentional misreporting of positions, employee theft, and insider trading on an employee's own account;
- b. External fraud, e.g., robbery, forgery, check kiting, and damage from computer hacking;
- c. Employment practices and workplace safety, e.g., workers compensation claims, violation of health and safety rules, organized labor activities, discrimination claims, and general liability;
- d. Clients, products and business practices, e.g., fiduciary breaches, misuse of confidential customer information, improper trading activities on the trust corporation's account, money laundering, and sale of unauthorized products;
- e. Damage to physical assets, e.g., terrorism, vandalism, earthquakes, fires and floods;
- f. Business disruption and system failures, e.g., hardware and software failures, telecommunication problems, and utility outages; and
- g. Execution, delivery, and process management, e.g., data entry errors, collateral management failures, incomplete legal documentation, unapproved access given to client accounts, non-client counterparty misperformance, and vendor disputes.

- (2) Trust corporations shall adopt tools and mechanisms that are appropriate to their size, complexity of operations and risk profile to properly identify and assess operational risk. The tools that may be used for identifying and assessing operational risk may include, but not limited to:

- (a) *Results of internal/external audit and supervisory issues raised in the Bangko Sentral Report of Examination (ROE)* - Internal audit surfaces issues on effectiveness of internal control, risk management, and governance systems and processes of an organization, while external audit focuses on control weaknesses and susceptibility of the trust corporation to material misstatements in the financial statements. On the other hand, the Bangko Sentral ROE highlights deficiencies in the risk management systems and governance processes as well as issues on compliance with relevant laws, rules and regulations, which could have adverse effects on the safety and soundness of the trust corporation;
- (b) *Internal loss data collection and analysis* – Internal operational loss data provides meaningful information for assessing trust corporation's exposure to operational risk and the effectiveness of internal controls. Analysis of loss events can provide insights into the causes of large losses and information on whether control failures are isolated or pervasive. Trust corporations may consider mapping internal loss data to the following business lines:

- (i) Corporate finance;
- (ii) Trading and sales;

- (iii) Retail banking;
- (iv) Commercial banking;
- (v) Payment and settlement;
- (vi) Agency services;
- (vii) Asset management; and
- (viii) Retail brokerage.

Loss events linked to credit and market risk may also relate to operational issues and should be segmented in order to obtain a more comprehensive view of the trust corporation's operational risk exposure;

- (c) *Risk Self Assessments (RSA)/Risk Control Self Assessments (RCSA)* – RSA is a tool to assess processes underlying trust corporation's operations against a library of potential threats and vulnerabilities including their potential impact. A similar approach, RCSA, typically evaluates inherent risk (the risk before controls are considered), the effectiveness of the control environment, and residual risk (the risk exposure after controls are considered). Scorecards on RCSAs may be developed by allocating weights to residual risks to provide a means of translating the RCSA output into metrics that will give a relative ranking of the control environment;
- (d) *Business process mappings* – These help identify the key steps in business processes, activities, and organizational functions as well as the key risk points in the trust corporation's overall business process. Process maps can reveal individual risks, risk interdependencies, and areas of control or risk management weakness. They can also help prioritize subsequent management action;
- (e) *Risk and performance indicators* – Risk and performance indicators, such as Key Risk Indicators (KRIs) and Key Performance Indicators (KPIs), provide an insight into a trust corporation's emerging risk exposure. KRIs are used to monitor the main drivers of exposure associated with key risks that contribute to early detection of heightened risk, ongoing monitoring of their movements, and preemptive reactions as necessary. KPIs, on the other hand, provide insight into the status of operational processes, which may in turn provide insights into operational weaknesses, failures, and potential loss. Risk and performance indicators are often used with escalation triggers to warn when risk levels approach or exceed acceptable ranges and prompt mitigation plans;
- (f) *Scenario analysis* – This refers to the process of obtaining expert opinion of business line and risk managers to identify potential operational risk events and assess the potential outcome. Scenario analysis is an effective tool when considering potential sources of significant operational risk and the need for additional risk management controls or mitigation solutions. Given the subjectivity of the scenario process, a robust governance framework is essential to ensure the integrity and consistency of the process;
- (g) *Model measurement* – Larger Trust corporations may deem it useful to quantify their operational risk exposures by using the output of the risk assessment tools as inputs into a model that estimates operational risk exposure. The results of the model can be used in an economic capital process and can be allocated to business lines to link risk and return; and
- (h) *Comparative analysis* – Comparative analysis consists of comparing the results of the various assessment tools to provide a more comprehensive view of the trust corporation's operational risk profile.

Comparison of external loss data, if available, such as industry experiences, vis-à-vis trust corporation's internal loss data can also be made to explore possible weaknesses in the financial institution's control environment and enable it to consider previously unidentified risk exposures.

In choosing among these tools, each trust corporation must carefully consider what is proportionate to its size, risk profile, and complexity of operations. Data/information gathered from these tools should enable trust corporations to make a thorough causal analysis, identify control gaps, and consequently adopt appropriate corrective actions.

Trust corporations, are expected to adopt at the minimum, the (i) results of internal/external audit and supervisory issues raised in the Bangko Sentral ROE and (ii) internal loss data collection and analysis.

- (3) Trust corporations shall develop databases to accumulate at least a five (5)-year history of operational risk losses which can be fed back into the operational risk management process. Apart from capturing events that resulted to actual loss, trust corporations shall also gather potential loss or near-misses¹. Said database

¹ *Potential loss* is an initial estimate of the loss that the bank may have sustained at the time of discovery of the event. Near-miss is an adverse operational risk event which was not prevented by internal controls but did not result in an actual adverse impact (financial or reputational) due to chance, recovery or other external factors

of loss events provides basis for analysis which can help direct corrective action to improve the control environment, as well as determine risk mitigating actions. Trust corporations should assess the depth of its data collection which is vital in understanding the risk environment. The loss event database shall at a minimum disclose the following:

- (a) Short description of the event;
- (b) Loss event type category;
- (c) Department/Unit/Branch sustaining the loss;
- (d) Business line classification;
- (e) Date of occurrence;
- (f) Date of discovery;
- (g) Date of booking of actual losses;
- (h) Actual loss amount or potential loss amount, if a near-miss event;
- (i) Amount recovered and date of recovery;
- (j) Causes of the event (e.g., control weaknesses identified);
- (k) Consequence of the loss event (e.g., market loss, fees paid to a counterparty, a lawsuit or damage to the trust corporation's reputation); and
- (l) Action(s) taken.

Trust corporations shall define appropriate thresholds for internal loss data collection and must be able to justify the same. Thresholds should be reasonable and should not omit any operational loss event data that is material for operational risk exposure and for effective risk management. Trust corporations shall ensure that the choice of threshold should not adversely impact the credibility and accuracy of operational risk measurement.

- (4) Trust corporations shall determine based on the results of the risk assessment process whether the risks are within the scope of its operational risk management strategy and policies. It shall identify the risk exposures that are unacceptable or are outside its risk appetite and/or risk management capacity, and design and prioritize appropriate risk mitigation and corrective actions with clear accountabilities, roles and responsibilities for implementation within reasonable timelines.
- (5) Trust corporations shall continually assess its operational risk exposures in order to gain broader recognition and understanding of their effects. It shall consider the following factors in the assessment:
 - (a) Expected and unexpected changes to the trust corporation's operating environment;
 - (b) Actual operational loss events that could have resulted in substantial losses/damage but were avoided (e.g., near misses) or recovered;
 - (c) Reported external operational losses and incidents which have damaged investor confidence and caused serious reputational harm;
 - (d) Areas of concern or unusual volumes or high number of exceptions; and
 - (e) Results of internal assessment of risks and controls.
- (6) Trust corporations shall ensure that their risk management and control infrastructure keep pace with the growth of or changes in their business activities, i.e., when they engage in any new activity; introduce a new product; enter new or unfamiliar markets; implement new business processes or technology systems; establish subsidiaries/branches that are geographically remote from the head office; and/or embark on an aggressive growth strategy by acquiring problem trust corporations to rapidly increase branch network during a short period of time. Trust corporations should have relevant policies and procedures that address the process for review and approval of new products, activities, processes and systems. The review and approval process shall consider the following:
 - (a) Inherent risks in the new product, service, or activity;
 - (b) Changes to the trust corporation's operational risk profile, appetite and tolerance, including the impact on existing products or activities;
 - (c) Necessary controls, risk management processes, and risk mitigation strategies;
 - (d) Any residual risk; and
 - (e) Procedures and metrics to measure, monitor, and manage the risk of the new product or activity.
- b. *Risk monitoring and reporting.* Trust Corporations shall implement a process to regularly monitor their operational risk profiles and material exposures to losses on a continuing basis. The process shall take into account both qualitative and quantitative assessment of exposure to all types of operational risk, assess the quality and appropriateness of corrective or mitigating actions, and ensure that adequate controls and systems are in place to identify and address problems before they become major concerns.
 - (1) Risk monitoring should be an integral part of a trust corporation's activities, the frequency of which should reflect the risks involved in these activities as well as the frequency and nature of changes in the operating environment. The results of the monitoring activities, findings of compliance, internal audit and risk

management functions, management letters issued by external auditors, and reports generated by supervisory authorities, as appropriate, should be included in regular reports to the board and the senior management to ensure that timely and appropriate measures are undertaken to address the issues/findings.

- (2) Management shall ensure that regular reports on operational risk are received on a timely basis and in a form and format that will aid in the monitoring and control of their business areas. The board should receive sufficient high-level information to enable it to understand the trust corporation's overall operational risk profile and focus on the material and strategic implications for the business.
 - (3) Management reports should contain relevant internal financial, operational, and compliance data, as well as external market information about events and conditions that are relevant to decision making. They should aim to provide information such as:
 - (a) The critical operational risks facing, or potentially facing, the trust corporation (e.g., as shown in KRIs and their trend data, changes in risk and control self-assessments, comments in audit/compliance review reports, etc.);
 - (b) Major risk events/loss experience, issues identified and intended remedial actions;
 - (c) The status and/or effectiveness of actions taken; and
 - (d) Exception reporting (covering among others authorized and unauthorized deviations from the trust corporation's operational risk policy and likely or actual breaches in predefined thresholds for operational exposures and losses).
 - (4) Reports should be analyzed with a view to improving existing management performance as well as developing new risk management policies, procedures and practices. Moreover, to ensure the usefulness and reliability of the reports received, management should regularly verify the timeliness, accuracy, and relevance of reporting systems and internal controls in general.
 - (5) Management should keep track of the information provided in the reports, particularly the loss data, to establish a framework for systematically tracking and recording the frequency, severity and other relevant information on loss events.
- c. *Risk control and mitigation.* Strong control environment is key to effective risk control and mitigation. In this respect, trust corporations are expected to adhere to the standards set forth under pertinent provisions of Sec. 129-T and Sec. 130-T on Internal Control and Internal Audit.

Trust corporations shall decide whether to use appropriate procedures to control and/or mitigate the risks, or bear the significant risks that have been identified. In those instances where internal controls do not adequately address risk and accepting the risk is not a reasonable option, trust corporations may seek to transfer the risk to another party such as through insurance. Relative thereto, the board shall determine the maximum loss exposure the trust corporation is willing to take and has the capacity to assume, and should perform an annual review of the trust corporation's risk and insurance management program.

Trust corporations, however, should not consider risk transfer tools as substitute but as complementary tools to sound controls and risk management system. Management shall also assess the extent to which risk mitigation tools such as insurance reduces risk, transfer the risk to another business sector or area, or create a new risk (e.g., counterparty risk).

Management of human resource-related risk. One of the major sources of operational risk is "people risk". In this regard, trust corporations shall embed in their enterprise-wide risk management framework measures to identify, measure, monitor, and control human resource related risks. Trust corporations shall ensure that there are adequate policies and risk management and control measures in the following areas:

- a. *Recruitment and selection.* The board shall establish efficient process that will facilitate timely recruitment and selection of personnel from a broad pool of candidates with appropriate educational background, skills, experience and competencies to fulfill the duties and responsibilities of the function. Management shall also ensure that the trust corporation's culture, values and expectations on behavior are compatible with those of its employees so that there is unity of direction and purpose.
- b. *Performance management.* The board shall establish effective performance management framework that will ensure that personnel's performance is at par with the standards set by the board/senior management. Results of performance evaluation should be linked to other human resource activities such as training and development, remuneration, and succession planning. These should likewise form part of the assessment of the continuing fitness and propriety of personnel in carrying out their respective duties and responsibilities.

The assessment of continuing fitness and propriety of personnel should take into account factors that may affect the performance of an individual. For instance, the financial circumstances of an employee who will be responsible for the custody of, or handling of cash related transactions, shall be taken into consideration in the evaluation of his continuing qualification.

- c. *Training and development.* The board shall establish training and development programs that will ensure continuing development of employees' knowledge, competence, and skill. Results of gaps assessment in the performance evaluation/appraisal process can be used in the creation of training and development programs for employees.
- d. *Remuneration and compensation.* The board shall establish sound remuneration and compensation policies that can be used by the institution to attract/recruit and retain highly qualified workforce. Said policies should appropriately motivate personnel and discourage excessive risk taking. This can be achieved through timely assessment of performance and competencies based on set standards. Results of performance assessment/appraisal can be used in the organization's remuneration decisions.
- e. *Succession planning.* The board shall establish an effective succession planning program. The program should include a system for identifying and developing potential successors for key and or critical positions in an organization, through systematic evaluation process and training. This will require identifying critical skills and competencies; assessing gaps; and designing developing, and delivering training and development programs to build or improve critical skills and competencies. The program should be adequately documented to facilitate monitoring and assessment of its implementation.
- f. *Adequacy of complement.* The board shall establish effective strategic manpower planning to ensure that there is adequate and right manpower complement to meet the strategic goals and operational plans of the organization.
- g. *Disciplinary actions.* The board, officers and all employees are expected to conform to prescribed ethical culture and guidelines, meet performance standards, and to behave ethically/appropriately in the workplace. Disciplinary or corrective actions may be taken to improve/arrest unacceptable behavior or performance. Disciplinary action must be in accordance with the laws and the applicable rules.
- h. *Separation from service.* The board shall establish policies and procedures governing the separation of employees from service (e.g., termination, dismissal, retrenchment, retirement, or resignation), which should include transfer of accountabilities and/or salient information (e.g., client data, business strategies and formula, other trade secrets, etc.) to the successor, and clearance requirements. Policies may also include "non-compete" clauses, in accordance with existing laws.

The Human Resource Department shall assist the board in fulfilling its oversight responsibilities in the areas of recruitment, manpower planning, personnel development, performance appraisal, remuneration, termination, retrenchment and other key human resource issues.

Management of information technology-related risk. Trust corporations shall refer to Sec. 147-Q for the management of information technology-related risk.

Management of integrity of prudential reports or reports submitted to Bangko Sentral. Trust corporation shall adopt a prudential reporting framework that ensures the integrity of information submitted to the Bangko Sentral. They shall establish a system for ensuring effective compliance with the standards prescribed by the Bangko Sentral on acceptable reporting quality. Trust corporations shall likewise maintain adequate documentation of the processes and procedures covering the prudential reporting framework and conduct a periodic review of their continuing relevance.

Management should be cognizant of relevant guidelines that may be issued by the Bangko Sentral relative to issues on the integrity and accuracy of prudential reports. Persistent concerns on the integrity and accuracy of prudential reports including failure to comply with the directives of the Bangko Sentral in this respect may be considered by the Bangko Sentral as conducting business in an unsafe or unsound manner, subject to applicable provision of laws and regulations.

Management of legal risk exposures. Trust corporations shall adopt a system for identifying and assessing legal risks related to business line functions as well as products and services offered. This shall include a process for assessing the trust corporation's rights and obligations in contractual relationships and in ensuring that all agreements/contracts entered into by the trust corporation conform with legal and regulatory requirements and that no party is unduly disadvantaged. This shall also include the assessment of trends of customer complaints to determine potential legal risk exposures.

There should be a system in place to manage outstanding legal cases involving the trust corporation or any of its directors and officers, with respect to suits filed in line with the performance of their duties. Said system should cover a periodic review of the status of cases, an assessment of potential outcome including probable liability or receivable, and regular reporting of the same to the appropriate level of management and the board.

Management of operational risk arising from financial inclusion initiatives. Trust corporations that provide financial services to the unserved and underserved sector generally handle small and voluminous transactions, which have inherently high operational risk. Incremental operational risk also comes from the higher number of personnel or from the use of technology-based platform to effectively and efficiently deliver financial services. Trust corporations are expected to identify and understand the distinct operational risk arising from the products and services they offer or innovative delivery channels they use. They should also be cognizant of potential transformation or transfer or risk exposures. In this regard, trust corporations shall adopt an operational risk management framework appropriate to the nature and scale of their operations. Said framework shall consider the principles embodied in this Section designed to suit the trust corporation's business model and ensure sustained delivery of financial services to the unserved and underserved sector.

Notification/Reporting to Bangko Sentral. Trust corporations shall notify the appropriate supervising department of the Bangko Sentral, within ten (10) calendar days from the date of discovery, of any operational risk event¹ that may result in any of the following:

- a. Significant operational losses or exposures;
- b. Activation of business continuity plan; or
- c. Any material change in business and operating environment.

Upon receipt of notification, the Bangko Sentral may require, if warranted, the reporting trust corporation to submit a report detailing the causes and impact of such events and an acceptable action plan to address the issue and any other weakness identified.

Supervisory enforcement actions. Consistent with Sec. 002-T, the Bangko Sentral may deploy enforcement actions to promote adherence with the requirements set forth in this Section and bring about timely corrective actions. The Bangko Sentral may issue directives to improve the operational risk management system, or impose sanctions to limit the level of or suspend any business activity that has adverse effects on the safety or soundness of the trust corporation, among others. Sanctions may likewise be imposed on a trust corporation and/or its directors, officers and/or employees.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019, 900 dated 18 January 2016, and 930 dated 18 November 2016)

164 – T BUSINESS CONTINUITY MANAGEMENT

Business Continuity Management; Policy Statement.² BSFIs can be adversely affected by disruption of critical operations due to internal and external threats, which may be natural, man-made or technical in origin. Extreme events may cause major disruptions whose impact are very broad in scope, duration or both and can pose a substantial risk to the continued operation of BSFIs. Because BSFIs play a crucial role in the financial system and economy as a whole, it is important to ensure that their operations can withstand the effects of major disruptions. Thus, BSFIs need to have a comprehensive business continuity management (BCM) process as an integral part of their operational risk management system. A well-designed BCM process enables BSFIs to resume critical operations swiftly and minimize operational, financial, legal, reputational, and other material risks arising from a disruption. This also helps mitigate systemic risks as well as maintain public trust and confidence in the financial system.

Purpose, applicability, and scope. The guidelines aim to promote sound management of business continuity risks. These align existing regulations, to the extent possible, with leading standards and recognized principles on BCM, and shall serve as the Bangko Sentral's baseline requirement for all BSFIs.

The guidelines shall apply to BSFIs which include banks, non-banks with quasi-banking function (NBQB), non-bank electronic money issuers and other non-bank institutions which under existing Bangko Sentral rules and regulations and special laws are subject to Bangko Sentral supervision and/or regulation. Moreover, subject guidelines shall also apply to BSFIs with offshore data processing as may be appropriate to their situation.

Definition of terms. In these guidelines, terms are used with the following meanings:

- a. *Alternate and business recovery sites* shall refer to standby facilities for use during disruption of critical operations to ensure business continuity. These provide work space and/or the necessary technology environment needed to process business-critical information. Organizations may have more than one (1) alternate site. In some cases, alternate sites may involve facilities that are used for normal day-to-day operations but which are able to accommodate additional business processes when a primary location becomes inoperable. Examples of alternate sites include relocation and disaster recovery sites, whether managed directly or maintained by a third party for a BSFI or for use by multiple organizations.
- b. *Business continuity* shall refer to a state of continued, uninterrupted operation of a business.

¹ As enumerated under Sec. 125-T (*Operational risk management framework*), Item "a.(1)".

² BSFIs shall comply with the foregoing standards on BCM within a period of one (1) year from 11 April 2017. In this regard, a BSFI should be able to show its plan of actions with specific timelines, as well as the status of initiatives being undertaken to fully comply with the provisions of Sec. 126-T starting July 2017, upon request by the Bangko Sentral.

- c. *BCM* shall refer to an enterprise-wide framework encompassing policies, standards, facilities, personnel and practices that provides for continuous functioning of the institution during disruptions. It is proportionate to the BSFI's internal and external risk exposures and tailored to the nature, scale, and complexity of its business.
- d. *Business continuity plan (BCP)/plan* shall refer to a documented plan detailing the orderly and expeditious process of recovery, resumption, and restoration of business functions in the event of disruptions. It should be able to cover and establish linkages among its multiple components, such as communication plan, crisis management plan, contingency funding plan, and technology recovery plan.
- e. *Business impact analysis (BIA)* shall refer to the process of identifying and measuring (quantitatively and qualitatively) the business impact or loss of business processes in the event of a disruption. It is used to identify recovery priorities, recovery resource requirements, essential staff, and dependencies (internal and external) to be incorporated in the plan.
- f. *Crisis* shall refer to a situation that requires urgent action due to its disruptive impact on the BSFI's core activities or business and operating environment.
- g. *Crisis management plan (CMP)* shall refer to a documented plan detailing the actions to be taken when a crisis strikes a BSFI and designed to maintain order amidst the confusion surrounding such situations. During and immediately after a crisis, the members of the crisis management team will convene and activate the plan to attain control over the crisis and minimize its impact to operations.
- h. *Critical process* shall refer to any activity, function or service, which when lost would materially affect the continued operation of the BSFI.
- i. *Cyber resilience* shall refer to an organization's ability to anticipate, handle, adapt to, and/or recover from evolving cyber threats.
- j. *Events* shall refer to disruption scenarios such as loss of people, technology, alternate site, and service providers.
- k. *Pandemic* shall refer to epidemics or outbreaks in humans of infectious diseases that have the ability to spread rapidly over large areas, possibly worldwide.
- l. *Recovery point objective (RPO)* shall refer to acceptable amount of data loss should a disruption occur without severe impact on the recovery of operations.
- m. *Recovery time objective (RTO)* shall refer to the period of time following an incident within which a product, system or business process must be resumed or resources must be recovered.
- n. *Resilience* shall refer to the ability of an organization to anticipate, handle, adapt to and/or recover from a disruption and resume operations.
- o. *Risk assessment* shall refer to the process involving the identification and assessment of potential threats and vulnerabilities that could severely interrupt a BSFI's business activities and the corresponding likelihood and magnitude of impact on business processes.
- p. *Technology recovery plan (TRP)/disaster recovery plan (DRP)* shall refer to a documented plan detailing the technology strategy and requirements during recovery for business and support functions. The relevant regulations are in Item "3.3.2.13" of Appendix Q-64.

Roles and responsibilities.

- a. *Board of directors and senior management.* The BSFI's board and senior management are responsible for overseeing the implementation of a sound BCM process, which involves the creation and promotion of an organizational culture that places high priority on business continuity. This should be reinforced by providing sufficient financial and human resources associated with the BSFI's business continuity initiatives. Senior management should establish BCM policies, standards, and processes, which must be duly endorsed to and approved by the board.

Awareness training and periodic reporting to board and senior management on matters related to business continuity are equally important to ensure their continuing commitment and support. At a minimum, periodic management reports should include the following: (1) implementation status of the BCP; (2) incident reports; (3) plan test results; (4) changes to the plan; and (5) related action items to strengthen the BSFI's ability to recover during disruptions.

- b. *BCM coordinator/unit.* Coordination and supervision of all business continuity activities should be assigned to a competent individual and/or unit with technical knowledge and experience consistent with the nature and complexity of the BSFI's business activities. A complex¹ BSFI may need a BCM unit with a team of departmental liaisons throughout the organization. For a simple BSFI, an individual BCM coordinator may suffice. While the BCM coordinator/unit may recommend initiatives or activities to be prioritized, the board and senior management are ultimately responsible for understanding the critical business processes and subsequently establishing plans to meet business process requirements in a safe and sound manner.
 - c. *BSFI personnel.* BSFI personnel should understand their roles and responsibilities on the prevention of crisis and recovery of business operations during disruptions. Business and support functions should allocate responsibilities for managing disruptions and provide clear guidance regarding the succession of authority to account for unavailability of key personnel in the event of a disruption.
- (1) *Audit.* An independent review of the BSFI's BCM framework and corresponding plans should be periodically performed with frequency based on a sound risk assessment process. This is to ensure that significant policy revisions resulting from changes in the operating environment, lessons learned from plan tests, and internal and regulatory audit recommendations have been considered. Moreover, plan testing exercises should be independently observed, verified, and evaluated to ensure reasonableness and validity of the testing process and the accuracy of test results.

Figure 1. Business Continuity Management Process

Business continuity management framework. BSFIs should adopt a cyclical, process-oriented BCM framework, which, at a minimum, should include five (5) phases, namely: BIA and risk assessment, strategy formulation, plan development, plan testing, and personnel training and plan maintenance. This framework represents a continuous cycle that should evolve over time based on changes in business and operating environment, audit recommendations, and test results. This framework should cover each business function and the technology that supports it. Other related policies, standards, and processes should also be integrated in the overall BCM framework.

- a. *Business impact analysis and risk assessment.* A comprehensive BIA and risk assessment should be undertaken to serve as the foundation in the development of the plan. The BIA entails determining and assessing the potential impact of disruptions to critical business functions, processes, and their interdependencies through work-flow analyses, enterprise-wide interviews, and/or inventory questions. Accordingly, the BSFI should determine the recovery priority, RTO, RPO, and the minimum level of resources required to ensure continuity of its operations consistent with the criticality of business function and technology that supports it. The BSFI should then conduct risk assessment incorporating the results of the BIA and evaluating the probability and severity of a wide-range of plausible threat scenarios in order to come up with recovery strategies that are commensurate with the nature, scale, and complexity of its business functions.

Domestic systemically important banks (D-SIBs). To minimize the extent or impact of a D-SIB's failure in the financial system, BSFIs identified as D-SIB by the Bangko Sentral, pursuant to Sec. 126-Q (*Domestic systemically important banks*), should set the RTO for each of their critical processes to a maximum of four (4) hours from the point of disruption. For non-D-SIB BSFIs, the RTO of critical processes should be primarily driven by their BIA and risk assessment.

¹ Pursuant to Sec. 147-Q (*IT profile classification*). BSFIs are classified as "simple" but maybe re-classified as "complex" depending on extent or degree of reliance of core business functions or technology.

- b. *Strategy formulation.* Recovery and resumption strategies to achieve the agreed time-frame and deliver the minimum required services as identified in the BIA should be defined, approved, and tested. The minimum requirements for the provision of essential business and technology service levels during disruptions should be established by concerned business and support functions.
- (1) *Recovery strategy.* As business resumption relies primarily on the recovery of technology resources, adequate provisions should be in place to ensure systems availability and recoverability during disruptions as prescribed under *Appendix Q-64*. Recovery strategies should be able to meet the agreed requirements between business units and support functions for the provision of essential business and technology service levels.
 - (2) *Continuity of operations/business resumption strategy.* The business continuity models adopted by the BSFI to handle prolonged disruptions should be based on the risk assessment of its business environment and the characteristics of its operations. The resumption strategies and resource requirements should be approved by the board as recommended by senior management or the relevant board committees to ensure alignment with corporate goals and business objectives.
- c. *Plan development.* Plans are an important, tangible evidence of the BSFI's business continuity initiatives. The objective of the plan is to provide detailed guidelines and procedures on response and management of a crisis, recovery of critical business services and functions and to ultimately resume to normal operations. The plan should be formulated on an enterprise-wide basis, reviewed and approved by the board and senior management at least annually and disseminated to all concerned employees. The plan should include provisions for both short-term and prolonged disruptions.

A well-written plan should describe the various types of events or scenarios that could prompt BCP activation. It should include, at a minimum, the following components:

- (1) Escalation, declaration and notification procedures;
- (2) Responsibilities and procedures to be followed by each continuity or recovery teams and their members. The procedures should enable the BSFI to respond swiftly to a crisis (i.e., a crisis management plan) and to recover and resume the critical processes outlined in the plan within the stipulated time frame during disruptions;
- (3) A list of resources required to recover critical processes in the event of a major disruption. This would include, but not limited to: (a) key recovery personnel; (b) computer hardware and software; (c) communication systems; (d) office equipment; and (e) vital records and data;
- (4) Relevant information about the alternate and recovery sites; and
- (5) Procedures for restoring normal business operations. This should include the orderly entry of all business transactions and records during disruption into the relevant systems up to completion of all verification and reconciliation procedures.

Communication is a critical aspect of a BCP. In this respect, the BSFI should include a communication plan for notifying all relevant internal and external stakeholders (e.g., employees, customers, vendors, regulators, counterparties, and key service providers, media and the public) following a disruption. The BSFI should maintain an up-to-date call tree and contact list of key personnel and service providers, including communication flow and channels for internal and external stakeholders. Clear and effective communication will facilitate escalation for appropriate management action and instruction to all concerned and help manage reputation risks. The BSFI should consider alternate methods of communication and preparation of pre-determined messages tailored to a number of plausible disruption scenarios to ensure various stakeholders are timely, consistently, and effectively informed.

A crisis management plan should be included in the BCP to assist senior management in dealing with and containing an emergency and avoid spillover effects to the business. Senior management should identify potential crisis scenarios and develop corresponding crisis management procedures. This includes identifying a mix of individuals from various departments who are authorized to make instantaneous decisions during crisis situations. This team shall be responsible for the actual declaration of an event, activation of the plan, and internal and external communication process.

When outsourcing plan development, management should ensure that the chosen service provider has the expertise required to analyze the business needs of the BSFI and that the arrangement conforms with legal and regulatory requirements. The service provider should be able to design executable strategies relevant to the BSFI's risk environment and design education and training programs necessary to achieve successful BCP deployment.

d. *Plan testing*

- (1) *Types of testing methods.* Plan testing is a vital element of the BCM. It ensures that the plan remains accurate, relevant, and operable. Tests should be conducted periodically, with the nature, scope, and frequency determined by the criticality of the applications, business processes, and support functions. In some cases, plan tests may be warranted due to changes in BSFI's business, responsibilities, systems, software, hardware, personnel, facilities, or the external environment.

Testing methods can vary from simple to complex each bearing its own characteristics, objectives, and benefits. Types of testing methods in order of increasing complexity include:

- (a) *Tabletop exercise/structured walk-through test* – the primary objective is to ensure that critical personnel from all areas are familiar with the plan and that it accurately reflects the BSFI's ability to recover from a disruption.
 - (b) *Walk-through drill/simulation test* - similar to a tabletop exercise but with a more focused application. During this test, participants choose a specific scenario to which relevant plan provisions shall be applied.
 - (c) *Communication/call tree test* – an exercise that validates the capability of crisis management teams to respond to specific events and the effectiveness of the call tree notification process in disseminating information to employees, vendors, and key clients.
 - (d) *Alternate site test/exercise* - tests the capability of staff, systems, and facilities, located at alternate sites to effectively support production processing and workloads.
 - (e) *Component test/exercise* - A testing activity designed to validate the continuity of individual systems, processes, or functions, in isolation.
 - (f) *Functional drill/parallel test* - test to determine capability of alternate site and BSFI employees to support strategy as defined in the plan, which involves actual mobilization of personnel, establishing communications, and recovery processing.
 - (g) *Enterprise-wide full-interruption/full-scale test* – the most comprehensive type of test encompassing the entire organization and requires activation of all the components of the plan at the same time to simulate a real-life emergency and processing data and transactions using back-up media at the recovery site.
- (2) *Test policy/plan.* Testing should be viewed as a continuously evolving cycle. The BSFI should incorporate the results of BIA and risk assessment and work towards a testing strategy that increases in scope and complexity to address a variety of threat scenarios. Test scenarios should vary from isolated system failures to wide-scale disruptions and promote testing its primary and alternate facilities, as well as with key counterparties and third-party service providers.

A testing policy should define roles and responsibilities for the implementation and evaluation of the testing program. Test plans with pre-determined goals and test criteria should be developed for each testing activity. It should clearly define the objectives of testing, identify the functions, systems, or processes to be tested and the criteria for assessing what constitutes a successful test. Formal testing documentation (i.e., test plans, test scenarios, test procedures, test results) should be prepared to ensure thoroughness and effectiveness of testing and properly maintained for audit and review purposes.

- (3) *Annual enterprise-wide business continuity testing.* The BSFI must conduct an enterprise-wide business continuity test at least annually, or more frequently depending on changes in the operating environment, to ensure its plan's relevance, effectiveness, and operational viability. The scope of testing should be comprehensive to cover the major components of the plan as well as coordination and interfaces among important parties.
- (4) *Analysis and report of test result.* Plan tests, including successes, failures, and lessons learned, should be thoroughly analyzed to promote continuous BCM improvement. Exceptions noted should be documented and corrective actions should be closely monitored to ensure that they are implemented in a timely manner by concerned parties, including the board and senior management, business line management, risk management, IT management, and other internal stakeholders.

e. *Personnel training and plan maintenance.*

- (1) *Training program.* A business continuity training program should be provided to all concerned employees to promote awareness, familiarity, and understanding of their roles and responsibilities in the event of a disruption. The training program should be offered on a continuing basis for existing and new employees and should be updated to address changes to the plan.
- (2) *Plan maintenance.* Plans and results of BIA and risk assessment should be reviewed and updated on an ongoing basis (at least annually or when necessary) so that they remain consistent with the BSFI's current operations and business strategies. BCM-related documents (i.e., BCP, test program, policy guidelines, and program requirements) should be subject to change management process to ensure these are updated with proper approval and documentation with respect to any significant changes in the business environment or as a result of audit findings.

Other policies, standards and processes. The following policies, standards and processes should be integrated into the BCM process:

- a. *Pandemic planning.* Similar to natural disasters or technical disruptions, pandemics may also interrupt a BSFI's business activities. However, the difficulty in determining a pandemic's scope and duration present additional challenges in ensuring resilience and continuity of a BSFI's operations.

Generally, pandemic plans are integrated in the BSFI's BCP and follow the same BCM process with additional considerations, such as:

- (1) *Business impact analysis and risk assessment.* The BCM process should consider pandemics as early as the BIA and risk assessment phase. The BIA and risk assessment should be updated to incorporate complexities that may arise from pandemics, such as (a) increasing level of absenteeism based on a pandemic's severity; and (b) the need for another layer of contingency plans as regular disaster or emergency response methods are no longer feasible.
- (2) *Strategy formulation.* To complement strategies for natural and technical disruptions, the following should be given due consideration when planning for pandemics:
 - (a) *Trigger events* – Trigger events and strategies should be defined depending on the nature of a pandemic. Pandemic planning should have the flexibility to accommodate varying degrees of epidemic or outbreak as pandemics normally occur in waves or phases and of varying severity.
 - (b) *Remote access capability* – In the event of a pandemic, enabling remote access may be one of the primary strategies available to a BSFI. To support a telecommuting strategy, the BSFI should ensure adequate capacity, bandwidth and authentication mechanisms in its technological infrastructure against expected network traffic or volume of transactions.
 - (c) *External parties* – With pandemics not limited to the BSFI, establishing working relationships with external parties is an essential component. In addition to the communication plan for all relevant internal and external stakeholders, the BSFI should establish open relationships and communication channels with local public health and emergency response teams or other government authorities. The BSFI should inform concerned parties of any potential outbreaks and, at the same time, be aware of any developments in the expected scope and duration of a pandemic.
 - (d) *Employee awareness* – As information becomes available from reputable sources or local agencies, the BSFI should ensure that steps to limit or reduce the risk of being affected by the pandemic are cascaded to its employees.
- (3) *Plan development.* Pandemic plans should be commensurate to the nature, size and complexity of a BSFI's business activities and have sufficient flexibility to address the various scenarios that may arise. At a minimum, the pandemic plan should include:
 - (a) Strategy that is scalable dependent on the extent and depth of the outbreak;
 - (b) Preventive measures, including monitoring of current environment and hygiene tools available to employees;
 - (c) Communication plan with internal and external stakeholders, including concerned local public health teams and government agencies; and
 - (d) Tools, systems and procedures available to ensure continuity of its critical operations even with the unavailability of BSFI's staff for prolonged periods.
- (4) *Plan testing.* Test policy/plan should include strategies to assess capability to continue critical operations, systems and applications even in the event of a severe pandemic. When regular tests are unable to cover pandemic scenarios, separate pandemic plan tests should be carried out.

- (5) *Personnel training and plan maintenance.* The plan should be updated as developments and information become available. As needed, employee training programs should cover pandemic risks, including the roles and responsibilities of each employee during pandemic situations.
- b. *Cyber resilience.* Cyber-threats and attacks against the financial services industry have become increasingly widespread, sophisticated and coordinated. Recent cyber-attacks worldwide highlight, not only the degree of disruption to a BSFI's operations, but also the extent of reputational damage which could undermine public trust and confidence. As such, the BSFI should consider the potential impact of these cyber events into its BCM process and institute adequate cyber resilience capabilities.

Given the unique characteristics of cyber-threats and attacks, traditional back-up and recovery arrangements adopted by the BSFI may no longer be sufficient and even increase the damage to the BSFI's network, operations and critical information assets. In worst case scenarios, back-up systems and alternate recovery sites are likewise affected rendering both sites inoperable. To ensure cyber resilience, the BSFI should take into consideration a wide-range of cyber-threat scenarios perpetrated from diverse threat sources (e.g., skilled hackers, insiders, state-sponsored groups) which seek to compromise the confidentiality, availability and integrity of its information assets and networks. Defensive strategies and innovative recovery arrangements should be explored that are commensurate with the BSFI's cyber-security risk exposures and aligned with its information security program in accordance with *Appendix Q-62*.

- c. *Information security.* Mitigation strategies should consider security controls to manage risks that may arise once an event triggers plan activation. Security during disasters and disruptions is an important consideration to manage risks arising from the change in working environment. The relevant guidelines/standards on information security that may be considered in strategy formulation and/or in choosing alternate sites are in *Appendix Q-62*.
- d. *Interdependencies.* An effective plan coordinates across its many internal and external components, identifies potential process or system dependencies, and mitigates risks from interdependencies. The BSFI may have very complex operating and recovery environment wherein interdependencies need to be duly considered, such as telecommunications, third party service providers, and recovery site. Given the critical resources and services that are being shared with the BSFI or other entities, additional mitigating controls and recovery strategies need to be integrated in the plan.
- e. *Liquidity risk management.* Sound liquidity risk management practices enable a BSFI to maintain availability of funds even in times of financial stress or adverse changes in market conditions. In the event of a business disruption, sound liquidity risk management practices should similarly apply. The BSFI should ensure it has sufficient liquidity to support its recovery strategies and continue supporting the delivery of basic banking services to the clients pending full business resumption. Guidelines on liquidity risk management are in *Appendix Q-43*.
- f. *Project management.* Senior Management should ensure that availability and business continuity requirements are considered at the planning and development stages of new business products and services and other critical technology processes, such as systems development and acquisition, and change management.
- g. *Event/problem management.* Operations personnel should be properly trained to recognize events that could trigger implementation of the plan. Although an event may not initially activate the plan, it may become necessary as conditions and circumstances change. Management should train and test BSFI personnel to implement and perform appropriate business continuity procedures within the timeframes of the plan.
- h. *Outsourcing.* When a BSFI enters into an outsourcing arrangement, it should put due consideration on the business continuity and disaster recovery arrangements of the service provider to ensure continuity of operations. Detailed guidelines/standards on business continuity considerations for outsourcing arrangements are in *Appendix Q-65*.
- i. *Insurance.* Insurance is an option available to a BSFI for recovery of losses that cannot be completely prevented and the expenses related to recovering from a disruption. The BSFI should regularly review the adequacy and coverage of its insurance policies in reducing any foreseeable risks caused by disruptive events, such as loss of offices, critical facilities and equipment, and casualty. Insurance policies may also need to address the BSFI's legal responsibilities for failing to deliver services to its customers and counterparties. To facilitate the claims process, the BSFI should create and retain a comprehensive hardware and software inventory list in a secure off-site location and detailed expenses should be documented to support insurance claims.

Supervisory enforcement actions. BSFIs should make available all policies and procedures and other documents/information related to the foregoing during on-site examination as well as provide copies thereof to the regulator when a written request is made to determine compliance.

Consistent with Sec. 002-T, the Bangko Sentral may deploy enforcement actions to promote adherence with the requirements set forth in Sec. 126-T and bring about timely corrective actions. The Bangko Sentral may issue directives to improve the BCM process, or impose sanctions to limit the level of or suspend any business activity that has adverse

effects on the safety and soundness of the BSFI, among others. Monetary and non-monetary sanctions, as provided under existing laws, Bangko Sentral rules and regulations, may likewise be imposed on a BSFI and/or its directors, officers and/or employees for violation of subject Sec. 126-T.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019, 1051 dated 27 September 2019, and 951 dated 20 March 2017)

165 – T SOCIAL MEDIA RISK MANAGEMENT

Policy Statement.¹ Social media, a low-cost solution capable of disseminating real-time information via the internet, presents vast opportunities for growth, customer engagement and business benefits as usage, customer reach and adoption scale up and become widespread and ubiquitous. Considering these potential benefits alongside exponential growth in the number of social media users and its massive reach, BSFIs have started to leverage on social media platform/s to promote their business and improve customer interaction experience to help drive business objectives/strategies.

Similar to any new technology, however, social media introduces a new attack vector which may expose BSFIs to compliance, legal, reputational, strategic, and operational risks. Risks in social media include susceptibility to account take-over, malware distribution, brand bashing, inadvertent disclosure of sensitive information and privacy violation, among other possible threats. As such, BSFIs should adopt an appropriate risk management system, commensurate to the extent and degree of their social media usage, to effectively identify, measure, manage and monitor risks arising from the use of social media platforms. This should form an integral part of their operational risk management system.

Applicability and scope. The guidelines underscore the importance of having a well-defined social media risk management strategy in supporting BSFI's overall business goals and objectives. These guidelines align existing regulations, to the extent possible, with leading standards and recognized principles. They outline the minimum standards/basic principles that shall govern the BSFI's framework to aid in the sound management of risks associated with the use of social media for official purpose or employees' personal use, within and outside the organization.

It is not intended to provide procedural specifics or a "one-size-fits-all" solution for carrying out compliance and risk management responsibilities. Each BSFI is therefore expected to establish its own risk management strategy; suitable to its size, risk tolerance level, and the nature and scope of social media activities engaged in.

The guidelines shall apply to all BSFIs which include banks, NBQB, non-bank electronic money issuers, and other non-bank institutions which under existing Bangko Sentral rules and regulations and special laws are subject to Bangko Sentral supervision and/or regulation.

Definition of terms. In these guidelines, terms are used with the following meanings:

- a. *Attack vector* shall refer to the path or means by which an attacker can gain access to a computer system in order to deliver a malicious code (e.g., virus, worms, trojans).
- b. *Non-technical controls* shall refer to management, administration, and operational controls employed that are manual and procedural in nature (e.g., security-related policies and procedures; operational procedures; personnel, physical, and environmental security controls; performance management and measurement).
- c. *Risk assessment* shall refer to the process involving the identification and assessment of potential threats and vulnerabilities related to the use of social media and determination of the likelihood that the threat will occur as well as the corresponding impact to the business should the threat occur.
- d. *Social media* shall refer to online communication channels dedicated to community-based content generation and sharing, interaction, and collaboration.
- e. *Social media platform* shall refer to any form of interactive communication medium wherein users can generate and disseminate content (e.g., text, images, audio, video) through social networks using the internet. Examples of popular social media platform categories include the following:
 - (1) Social networking (e.g., Facebook, LinkedIn)
 - (2) Micro-blogging (e.g., Twitter, Tumblr)
 - (3) Blogging (e.g., Wordpress, Blogger)
 - (4) Photo Sharing (e.g., Flickr, Instagram, Pinterest)
 - (5) Video Sharing (e.g., Youtube, Vimeo, Vine)
 - (6) Crowdsourcing (e.g., Ushahidi, Inc.)

¹ BSFIs shall comply with the foregoing standards on social media risk management within a period of six (6) months from 04 April 2017. In this regard, a BSFI should be able to show, upon request of the Bangko Sentral, its plan of actions with specific timelines, as well as the status of initiatives being undertaken to fully comply with the provisions of this Section.

- f. *Technical controls* shall refer to the controls incorporated into the computer hardware, software, or firmware to aid in the effective implementation of policies and standards (e.g., access control, authentication, web scanner/crawler).

Social media risk management system. BSFIs should establish an appropriate framework that will result in sound social media governance and risk management. At a minimum, the framework shall include the following elements:

- a. Clearly defined governance structure indicating the roles and responsibilities of the board of directors and senior management in setting the direction on the BSFI's use of social media, including its alignment to the BSFI's strategic goals/plans; establishing adequate standards, policies, procedures, and controls; and implementing ongoing risk assessment of social media-related activities.

The board of directors shall be primarily responsible for defining the BSFI's risk tolerance level, understanding the nature and degree of risks the BSFI will be exposed to, and ensuring that these risks are properly addressed. Moreover, the board of directors, as part of its duties, shall approve and oversee the design and implementation of the social media strategy; related standards, policies and procedures; and means to ensure compliance with said standards and/or policies as well as applicable laws and regulations. Senior management, on the other hand, shall be responsible for the implementation of the social media risk management system approved by the board of directors.

The governance process should also include reporting mechanisms to the board of directors and/or senior management to enable periodic evaluation of the effectiveness of the BSFI's social media strategy/program, in terms of achieving its stated objectives, and measures put in place to manage the risks related to its use.

- b. Policies and procedures governing the following, among others:

- (1) Scope and definition of social media;
- (2) Social media regulatory landscape reflecting applicable laws, rules and regulations for compliance;
- (3) Individuals and/or composition of the team/s who will be responsible for the creation, maintenance, and monitoring of the BSFI's proprietary social media sites/pages. Their corresponding roles and accountabilities should also be clearly defined;
- (4) Content management and approval process;
- (5) Ongoing assessment, management, and monitoring of risks associated with social media-related activities;
- (6) Acceptable use as well as prohibitions/restrictions on the business/official use of social media platforms. These guidelines shall likewise apply to the employees¹ personal use of social media, insofar as it may impact the BSFI's operations, reputation and/or compliance with applicable laws and regulations. These should cover matters such as, but not limited to, expectations, ethical behavior, types/nature and extent of BSFI and/or customer-related information that can be posted, statements that can or cannot be made about or in behalf of the institution, comments that should not be made about a competitor, and corresponding sanctions/penalties for inappropriate use of social media and committing non-permissible activities;
- (7) Use and monitoring of the BSFI's proprietary social media sites/pages to ensure compliance with applicable laws, regulations and internal policies;
- (8) Monitoring and recording of suspicious transactions and customer activities on the BSFI's proprietary social media sites/pages;
- (9) Adoption of technical and non-technical controls to address risks associated with the use of social media platform/s including methodologies to manage risks from online postings, edits, replies and retention;
- (10) Due diligence process for selecting, managing and continuous monitoring of third-party service providers (TSP) that administer the BSFI's social media site(s)/page(s). In addition, the specific roles and responsibilities of the TSP, including liabilities and accountabilities for errors, omissions, fraud, and other instances, resulting from the TSP's actions, which may adversely affect the BSFI, should also be defined;
- (11) Social media crisis management plan and escalation procedures;
- (12) Enterprise-wide employee training and awareness programs covering relevant topics such as the BSFI's social media use policies, employee roles and responsibilities and non-permissible activities;

¹ Include the BSFI's employees, contractual employees and/or project hires, and third-party service providers

(13) Records retention of social media data; and

(14) Communication of the BSFI's official social media sites/pages to its customers to avoid confusion and being misled to unofficial sites.

- c. Specific roles and responsibilities of the risk management, consumer protection, audit and compliance functions to ensure that social media risks are adequately managed and integrated in the BSFI's enterprise-wide risk management systems.

BSFIs that do not utilize social media should nevertheless have clear policies and measures in place to address the potential reputation risks that may arise within the various social media platforms and provide guidance on employee use of social media.

Compliance with relevant regulations. BSFIs, in formulating and implementing their social media policies, should ensure compliance with the applicable requirements of Bangko Sentral rules and regulations on financial consumer protection, especially those relating to disclosures and transparency in advertising and promotional materials, protection of client information, effective recourse, and financial education and awareness. They should likewise conform with the relevant provisions of Bangko Sentral's outsourcing framework should they decide to outsource the conduct of social media-related activities to a service provider.

The use of social media platforms, including information gathered therein, for the conduct of account origination activities should comply with applicable rules and regulations, especially on the provisions relating to customer identification procedures under the existing anti-money laundering rules and regulations. In the event that BSFIs opt to use social media for processing financial transactions, the applicable Bangko Sentral rules and regulations on electronic payment and financial services and technology risk management should likewise be observed to ensure security, reliability and authenticity of such transactions.

The regulations mentioned herein are not exhaustive. It is the BSFI's responsibility to ensure that all applicable laws and regulations relevant to the activities it will choose to engage in using social media will be adequately complied with. Moreover, the BSFI is expected to stay abreast of and continuously adapt to changes in the regulatory requirements.

Supervisory enforcement actions. BSFIs should make available all policies and procedures and other documents/information related to the foregoing during the on-site examination as well as provide copies thereof when a written request is made to determine compliance.

Consistent with Sec. 002-T, the Bangko Sentral may deploy enforcement actions to promote adherence with the requirements set forth in Sec. 127-T and bring about timely corrective actions. The Bangko Sentral may issue directives to improve the social media risk management system or impose monetary and non-monetary sanctions on a BSFI and/or its directors, officers and/or employees.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019, 1033 dated 22 February 2019, and 949 dated 15 March 2017)

H. COMPLIANCE, INTERNAL CONTROL AND AUDIT

171 – T COMPLIANCE SYSTEM

The applicable provisions under Sec. 161-Q (*Compliance program*) shall be adopted by the trust corporations.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019, 972 dated 22 August 2017, and 884 dated 22 July 2015)

172 – T INTERNAL CONTROL SYSTEM

The applicable provisions under Sec. 162-Q shall be adopted by the trust corporations.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019 and 884 dated 22 July 2015)

173 – T INTERNAL AUDIT FUNCTION

Internal audit is an independent, objective assurance and consulting function established to examine, evaluate and improve the effectiveness of risk management, internal control, and governance processes of an organization.

The board of directors, in a resolution entered in its minutes, may adopt a suitable continuous audit system to supplement and/or replace the performance of an annual audit. The audit may be conducted in intervals commensurate with the assessed levels of risk in trust and investment management operations: *Provided*, That such intervals shall be supported and reassessed regularly to ensure appropriateness given the current risk and volume of the trust and investment management operations. In any case, the audit shall ascertain whether the institution's trust and other

fiduciary business and investment management activities have been administered in accordance with laws, Bangko Sentral rules and regulations, and sound trust or fiduciary principles. The report of the audit, together with the actions thereon, shall be noted in the minutes of the trust corporation's board of directors. Other applicable provisions of Sec. 163-Q shall likewise be adopted by the trust corporation.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019 and 884 dated 22 July 2015)

174 – T FRAMEWORK ON THE SELECTION OF EXTERNAL AUDITORS

Policy Statement. The Bangko Sentral considers the external auditing profession as a partner in promoting the integrity of financial reports and transparency in the financial system. In this light, the Bangko Sentral is issuing this framework on the selection of external auditors (individual practitioners and audit firms) for Bangko Sentral Supervised Financial Institutions (BSFIs) in line with its cooperative arrangements with the Securities and Exchange Commission (SEC), Insurance Commission (IC), and Philippine Deposit Insurance Corporation (PDIC), under the auspices of the Financial Sector Forum (FSF).

Appointment of External Auditors of BSFIs

- a. BSFIs shall engage the services of an external auditor included in the List of Selected External Auditors for BSFIs. In this respect, a BSFI shall only appoint an external auditor belonging to the same category or from categories higher than the category of the BSFI concerned as provided in this section: *Provided*, That the Monetary Board may require the BSFI to appoint an external auditor from higher categories as part of the Bangko Sentral's supervisory action on the BSFI. The external auditor appointed by the BSFI shall likewise audit the BSFI's trust department as well as its subsidiaries and affiliates engaged in allied activities, as applicable.
- b. External Auditors shall be classified into three categories and shall extend their services to BSFIs belonging to the same category or from categories lower than the category of the external auditor, as follows:
 - (1) Group A
 - (a) UBs/KBs
 - (b) Foreign banks and branches or subsidiaries of foreign banks
 - (c) Banks, trust departments and trust corporations with additional derivatives authority, pursuant to Sec. 613 of the MORB
 - (2) Group B
 - (a) TBs
 - (b) NBFIs with quasi-banking license
 - (c) Trust departments and trust corporations
 - (3) Group C
 - (a) RBs and Coop Banks
 - (b) Non-stock Savings and Loan Associations
 - (c) Pawnshops
 - (d) Remittance and Transfer Companies (RTCs)/Money Changers/Foreign Exchange Dealers (MCs/FXDs), including Virtual Currency Exchanges and Electronic Money Issuers
 - (e) Credit Card Issuers/Acquirers

The above categories shall include their subsidiaries and affiliates engaged in allied activities and other financial institutions subject to Bangko Sentral's consolidated supervision.

- c. External auditors applying for first time inclusion or renewal of inclusion in the List of Selected External Auditors for BSFIs shall submit their application to the SEC. The application shall be subject to the requirements set out by the SEC as agreed upon by the Bangko Sentral, SEC, IC and PDIC.
- d. The inclusion in the List of Selected External Auditors for BSFIs shall be valid for five (5) years or for a shorter period prescribed by the financial sector supervisors.
- e. The Bangko Sentral shall periodically evaluate the performance of the external auditor through an assessment of the quality of the BSFI's audited financial statements and its compliance with the requirements provided under this Section. The results of assessment shall serve as basis for the continuing inclusion of external auditors in the List of Selected External Auditors for BSFIs.
- f. The external auditor, including the engagement and quality control partners of the audit firm, of the BSFI shall be rotated in accordance with the relevant provisions of the Code of Ethics for Professional Accountants in the Philippines as adopted by the Philippine Board of Accountancy.

Audit Engagement and Reportorial Requirements

- a. The BSFI's Audit Committee/board of directors/board of trustees shall ensure that the scope of external audit work appropriately covers areas relevant to BSFI's operations and risk exposures. These include the following:
 - (1) Review of the adoption of applicable reporting framework as well as the assessment of the accuracy, adequacy, and reliability of accounting records and financial reports;
 - (2) Assessment of the propriety and adequacy of disclosures in the financial statements;
 - (3) Assessment of the adequacy and effectiveness of internal controls and risk management systems;
 - (4) Assessment of the quality of capital in relation to risk exposures; and
 - (5) Evaluation of the quality of corporate governance.
- b. The engagement contract of BSFIs with the external auditor shall include, at a minimum, the following provisions:
 - (1) That disclosure of information, such as those enumerated under Item "c" of this Section (*Audit engagement and reportorial requirements*), by the external auditor to the Bangko Sentral and/or other financial sector supervisors shall not constitute a breach of confidentiality on the part of the external auditor nor shall it be a ground for civil, criminal, or disciplinary proceedings against the external auditor;
 - (2) That the external auditor shall be allowed read-only access to the Bangko Sentral's Report of Examination on the BSFI and that the external auditor shall appropriately consider the contents thereof and maintain its confidentiality; and
 - (3) That the BSFI concerned and external auditor shall comply with all the requirements under this Section.

The engagement contract shall be made available by the BSFI to the Bangko Sentral upon request.

- c. The external auditor shall report to the appropriate supervising department of the Bangko Sentral within fifteen (15) calendar days upon discovery of any matter adversely affecting the condition or soundness of the BSFI, such as, but not limited to the following cases:
 - (1) Any material finding involving fraud or error;
 - (2) Actual or potential losses, the aggregate of which amounts to at least ten percent (10%) of the consolidated total assets of the BSFI;
 - (3) Significant doubt as to the ability of the BSFI to continue as a going concern;
 - (4) Material breach of laws or Bangko Sentral rules and regulations such as but not limited to prescribed capital and liquidity ratios, significant deficiency in allowance for credit losses, material weaknesses in fair value measurement methodology, and significant vulnerabilities to money laundering and combating the financing of terrorism;
 - (5) Material internal control weaknesses which may lead to financial reporting problems; and
 - (6) Findings on matters of corporate governance that may require urgent action by the Bangko Sentral.

Where a thorough investigation or evaluation of facts is necessary on the noted case, an initial report shall be submitted within the prescribed timeline: Provided, That a complete report is submitted not later than fifteen (15) calendar days from completion of investigation or evaluation.

In case there are no matters to report, the external auditor shall submit to the appropriate supervising department of the Bangko Sentral, not later than 120 calendar days after the close of the calendar year or the fiscal year adopted by the BSFI, a certification that there is none to report.

- d. The board of directors and management of the BSFI shall be primarily responsible for the financial statements submitted to the Bangko Sentral. External auditors are expected to conduct the audit of financial statements in accordance with the provisions of the Philippine Standards on Auditing.
- e. The external auditor shall directly inform the appropriate supervising department of the Bangko Sentral of the pre-termination of the engagement contract or his/her resignation/replacements as external auditor as well as the reasons thereto, within fifteen (15) calendar days of the pre-termination of the contract or his/her resignation/replacement.

Supervisory Enforcement Action

The Bangko Sentral reserves the right to deploy its range of supervisory enforcement actions to promote adherence with the requirements set forth in this Section and bring about timely corrective actions. For this purpose, the Bangko Sentral may issue directives or impose sanctions on BSFIs and/or its directors/trustees who approved the appointment of the external auditor, who/which are not in the List of Selected External Auditors for BSFIs, and/or for non-compliance with the provisions of this Section. The Bangko Sentral may likewise shorten the period of validity of inclusion of an external auditor in the List of Selected External Auditors for BSFIs, suspend, or delist external auditors from its List of Selected External Auditors for BSFIs based on the results of assessment of the quality of audited financial statements (AFS) as well as non-compliance with the provisions of this Section. The guidelines on the supervision/delisting of external auditor in the list of selected external auditors for BSFIs is prescribed in *Appendix Q-30*.

Transitory provisions

- a. External auditors whose inclusion in the List of Selected External Auditors for BSFIs is valid to cover the audit of 2018 financial statements are hereby given one (1) year extension on their inclusion in the List of Selected External Auditors for BSFIs allowing them to engage in the audit of the 2019 financial statements.
- b. All applications (new and renewal) for inclusion in the List of Selected External Auditors for BSFIs to cover in the audit of 2020 financial statements and thereafter shall be filed with the SEC starting June 2019.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019, 1040 dated 20 May 2019, and 884 dated 22 July 2015)

I. REPORTING GOVERNANCE

181 – T AUDITED FINANCIAL STATEMENTS OF TCs; FINANCIAL AUDIT

The trust corporation's operation shall be subject to financial audit by an external auditor acceptable to the Bangko Sentral not later than thirty (30) calendar days after the close of the calendar or the fiscal year adopted by the trust corporation. Such audit, which shall cover among others, the trust corporation's operation, practices and policies, audit and internal control system, shall be subject to auditing standards to the extent necessary to express an opinion on the financial statements. Report of such audit shall be submitted to the board of directors and the appropriate supervising department of the Bangko Sentral not later than 120 calendar days after the close of the calendar year or the fiscal year adopted by the trust corporation and shall contain, among other things, the complete set of financial statements and other information required by Bangko Sentral to be submitted under Sec. 173-Q: *Provided*, That a reconciliation of the balance sheet in the Audited Financial Statement (AFS) and the Financial Reporting Package for Trust Institutions (FRPTI) shall also be prepared For each of the general categories of contractual relationships (i.e., UITF trust, institutional-trust, and individual trust; other fiduciary; institutional-agency, and individual-agency; and special purpose trust) of the trust/investment management department of an institution with its clients following the format in *Appendix Q-32*.

The report of the audit, together with the actions thereon, shall be noted in the minutes of the board of directors of the trust corporations. Other provisions of Sec. 173-Q in so far as applicable shall likewise be adopted by the trust corporations.

Audited financial statements of TCs. The trust corporations shall submit two (2) sets of AFS: AFS of the trust corporations proper and AFS covering trust operations. The provisions of Sec. 173-Q and Sec. 435-Q (*Audited financial statements*) shall be adopted in so far as applicable to the TC.

Disclosure requirements in the notes to the audited financial statements. TCs shall require their external auditors to include the following additional information in the notes to financial statements:

- a. Basic quantitative indicators of financial performance such as return on average equity, return on average assets (computed pursuant to Sec. 173-Q (*Disclosure requirement in the notes to the audited financial statements*)) and percentage of total trust fees to total AUM;
- b. Total outstanding investment, loans and other credit exposures to TC's DOSRI and related parties with breakdown and name of DOSRI/related parties;
- c. Nature and amount of contingencies and commitments arising from off-balance sheet items, if any;
- d. Provisions and allowances for losses and how these are determined;
- e. Aggregate amount of secured liabilities and assets pledged as security; and

- f. Accounting policies which shall include, but shall not be limited to, general accounting principles, changes in accounting policies/practices, principles of consolidation, policies and methods for determining when assets are impaired, recognizing income on impaired assets and losses on non-performing credits, income recognition, valuation policies and accounting policies.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019, and 884 dated 22 July 2015)

182 – T RECORDS

TCs shall have a true and accurate account, record or statement of their daily transactions. The TC shall also keep books and records on trust, other fiduciary and IMAs separate and distinct from the books and records of its proprietary accounts and shall strictly follow and implement the FRPTI prescribed by the Bangko Sentral.

The making of any false entry or the willful omission of entries relevant to any transaction is a ground for the imposition of administrative sanctions under Section 37 of R.A. No. 7653, without prejudice to the criminal liability of the director or officer responsible therefor under Sections 35 and 36 of R.A. No. 7653 and/or the applicable provisions of the Revised Penal Code. Records shall be up-to-date and shall contain sufficient detail so that an audit trail is established. Other provisions of Sec. 171-Q and 435-Q shall be adopted in so far as applicable to the TC.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019, and 884 dated 22 July 2015)

183 – T REPORTS/MANNER OF FILING

The applicable provisions of Sec. 172-Q shall be adopted by the TC, except that, instead of *Appendix Q-3*, the applicable reports for TCs are those enumerated under *Appendix T-4*.

The TC, if a subsidiary/affiliate of a bank, is required to submit a quarterly report to the appropriate supervising department of the Bangko Sentral on its financial transactions with the bank within twenty (20) calendar days after the end of the reference quarter.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019, and 884 dated 22 July 2015)

J. UNSAFE OR UNSOUND CONDUCT OF BUSINESS

191 – T CONDUCTING BUSINESS IN UNSAFE OR UNSOUND MANNER

Sec. 419-Q, on unsafe and unsound practices shall be adopted for trust corporations.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019, and 884 dated 22 July 2015)

K. LIQUIDATION AND RECEIVERSHIP

192 – T VOLUNTARY LIQUIDATION

A TC which intends to surrender its trust license shall file with the Bangko Sentral a certified copy of the resolution of its board of directors manifesting such intention. The appropriate supervising department of the Bangko Sentral shall then conduct an examination of the TC's trust, other fiduciary business and investment management activities. If the TC is found to have satisfactorily discharged its duties and responsibilities as trustee, fiduciary or investment manager, and has provided for the orderly closure or transfer of its trust, fiduciary or IMAs, the Monetary Board, on the basis of the recommendation of the examining department, shall order the revocation of the institution's authority to engage in trust and other fiduciary management activities.

TCs shall adopt the provisions of *Appendix Q-60* on the guidelines on voluntary liquidation.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019, and 884 dated 22 July 2015)

193 – T RECEIVERSHIP AND INVOLUNTARY LIQUIDATION

The Monetary Board, after considering the report of the appropriate supervising department of the Bangko Sentral, may revoke the TC's authority to engage in trust, other fiduciary business and investment management activities in accordance with Section 37 of R.A. No. 7653. Upon revocation of the trust, other fiduciary and investment management license, the TC shall be required to wind down and liquidate its trust, other fiduciary business and investment management activities, and distribute proceeds thereof to its clients. It shall be unlawful for any such TC to thereafter perform or engage in trust, other fiduciary business and investment management activities.

Whenever a receiver is appointed by the Monetary Board for a TC, the receiver shall, pursuant to the instructions of the Monetary Board, proceed to close the trust, other fiduciary and IMAs promptly and/or transfer all other accounts to substitute trustees, fiduciaries or investment managers acceptable to the trustors, beneficiaries, principals or other parties in interest: *Provided*, That where the trustee, fiduciary or investment manager is acting as such under appointment by a court, the receiver shall proceed pursuant to the instructions of said court.

The guidelines on receivership and liquidation of banks found in Sec. 192 of the MORB, shall apply to the placement of a trust corporation under receivership or liquidation, to the extent possibly, or by analogy.

In case of a TC which license has been revoked by the Monetary Board, any director or officer thereof

- a. who refuses to turn over the corporation's records and assets under management to the appointed successor-trustee(s), or
- b. who tampers with the corporation's records, or
- c. who appropriates for himself for another party or destroys or causes the misappropriation and destruction of the TC's assets under management, or
- d. who receives or permits or causes to be received in said corporation any part or all of the assets under management, or
- e. who pays out or permits or causes to be transferred any part thereof, shall be subject to the penal provisions of the R.A. No. 7653.

(Circular Nos. 1143 dated 12 April 2022, 1066 dated 4 December 2019, 1065 dated 03 December 2019, and 884 dated 22 July 2015)

PART TWO

ASSET MANAGEMENT OPERATIONS

201 – T MANAGEMENT OF RISK ASSETS/MINIMUM GUIDELINES ON INVESTMENT OPERATIONS

It shall be the responsibility of the board of directors of a trust corporation to formulate written policies on credit and investment activities, and risk diversification and to set the guidelines for evaluation of proprietary and fiduciary assets. Sound credit and investment processes are essential if a trust corporation is to perform its asset management function effectively and minimize the risk inherent in any credit and investment activity. The responsibility should be approached in a way that will provide assurance to the client, the stockholders and supervisory authorities that timely and adequate action will be taken to maintain the quality of the loan and investment portfolio and other fiduciary assets.

(Circular Nos. 1066 dated 4 December 2019 and 884 dated 22 July 2015)

202 – T LOAN PORTFOLIO AND OTHER RISK ASSETS REVIEW SYSTEM

The following provisions of Sec. 143-Q on operating under a sound credit granting process shall be adopted, in so far as applicable to the TC:

- Sec. 143-Q (*Credit approval process*)
- Sec. 143-Q (*Credit granting and loan evaluation/analysis process and underwriting standards*)
- Sec. 143-Q (*Renewal or extension of maturity date of credits*)
- Sec. 143-Q (*Country and Transfer Risks*)
- Sec. 143-Q (*Credit Administration*)
- Sec. 143-Q (*Credit Risk Measurement, Validation and Stress Testing*)
- Sec. 143-Q (*Credit Risk Management Information and Reporting Systems*)
- Sec. 143-Q (*Credit Monitoring*)
- Sec. 143-Q (*Credit Review Process*)
- Sec. 143-Q (*Credit Classification and Provisioning*)
- Sec. 143-Q (*Credit Workout and Remedial Management of Problem Credits*)
- Sec. 143-Q (*Writing off problem credits*)
- Sec. 143-Q (*Enforcement Actions*)

(Circular No. 884 dated 22 July 2015)

203 – T LARGE EXPOSURES

TCs are expected to adopt policies and processes that will identify, measure, monitor and control large exposures as well as potential conflict of interest in the administration of fiduciary business.

Large exposures should be kept under regular review to ensure quality and controls thereof to safeguard against credit risk concentrations.

Large exposures shall refer to exposures to counterparty or a group of related counterparties equal or greater than five percent (5%) of TC's combined capital account as defined under Sec. 113-T.

(Circular No. 884 dated 22 July 2015)

204 – T APPLICABLE REGULATIONS ON CREDIT AND INVESTMENT OPERATIONS

Unless otherwise provided herein, the following regulations in Part Two (Asset Management Operations) shall be adopted, in so far as applicable to the TC:

- Sec. 301-Q Grant of Loans and Other Credit Accommodations (except for Sec. 143-Q (*Credit granting and loan evaluation/analysis process and underwriting standards*))
- Sec. 304-Q Interest and Other Charges
- Sec. 303-Q Past Due Accounts and Non-Performing Loans, and Sec. 303-Q (*Exclusion from loan limit, Non-performing loans, and Updating of information provided to credit information bureaus*)
- Sec. 305-Q "Truth in Lending Act" Disclosure Requirement
- Sec. 322-Q Transactions Covered and Not Covered
- Sec. 328-Q Procedural and Reportorial Requirements
- Sec. 361-Q Purchase of Receivables and Other Obligations
- Sec. 362-Q Acquired Assets in Settlement of Loans (except Sec. 362-Q (*Joint Venture of QBs with Real Estate Development Companies*))

(Circular No. 941 dated 20 January 2017 and 884 dated 22 July 2015)

205 – T LOANS/CREDIT ACCOMMODATIONS TO DIRECTORS, OFFICERS, STOCKHOLDERS AND THEIR RELATED INTERESTS (DOSRI) AND RELATED PARTIES

Dealings of a TC with any of its DOSRI and related parties¹ shall be in the regular course of business and upon terms not less favorable to the trust corporation and/or its clients than those offered to others. DOSRI shall be defined in accordance with the definitions under Sec. 321-Q (*Definitions*) and Sections 12 and 13 of R.A. 8791 on related interests.

The TC is expected to clearly articulate policies and procedures on the handling of any transaction with DOSRI and other related parties ensuring that there is appropriate disclosure and effective compliance with existing laws, rules and regulations at all times and no stakeholder is unduly disadvantaged.

(Circular Nos. 884 dated 22 July 2015 and 970 dated 22 August 2017)

206 – T TRANSACTIONS NOT COVERED

The provisions under Sec. 322-Q (except its Subtopics) shall be adopted by the TC.

(Circular No. 884 dated 22 July 2015)

207 – T REPORTS

The TC shall submit a report to the appropriate supervising department covering transactions of the TC with its DOSRI and related parties within twenty (20) calendar days from end of the reference quarter. Moreover, TC's records on monitoring large exposures and loans to DOSRI and its related parties shall be made available to the Bangko Sentral examiners for verification at any given time. When warranted, the Bangko Sentral may impose additional reporting requirements on TC in relation to its large exposures and credit risk concentrations.

(Circular No. 884 dated 22 July 2015)

¹ As defined under Sec. 131-Q, Item "(o)"

PART THREE

TRUST, OTHER FIDUCIARY BUSINESS AND INVESTMENT MANAGEMENT ACTIVITIES

301 – T STATEMENT OF PRINCIPLES

The cardinal principle common to all trust and other fiduciary relationships is fidelity. Policies predicated upon this principle shall be directed towards observance of the following:

- a. *Prudent administration.* The trust, investment management and other fiduciary accounts shall be administered in conformity with the intention and purpose of the client as manifested in the terms of the agreement, and with the skill, care, prudence and diligence necessary under the circumstance then prevailing that a prudent man acting in like capacity and familiar with such matters would exercise in the conduct of an enterprise of like character and with similar aims.
- b. *Undivided loyalty and utmost care.* In the discharge of fiduciary responsibility, the interests of clients shall be placed above those of the TC. Clear policies and procedures shall be developed in dealing with conflict of interest situations. The fiduciary assets shall be objectively and fairly administered, invested and distributed giving due regard to the beneficiaries' respective interests.
- c. *Non-delegation of responsibilities.* The administration of the trust, investment management, or fiduciary responsibilities or the performance of acts that should be personally performed shall not be delegated as the client's confidence is reposed on the TC.
- d. *Preserving and protecting property.* Reasonable care and diligence shall be observed to preserve and protect the property entrusted. Fiduciary assets shall be kept legally separate and distinct from proprietary assets and from one fiduciary/trust/investment management account to another.
- e. *Keeping and rendering accounts.* A true and accurate account or record of transactions entered into shall be kept. Reports on the trust, investment management and other fiduciary accounts shall be rendered to the trustor, principal, beneficiary or other party in interest, or the court concerned, or any party duly designated by a court order, as the case may be, in accordance with Sec. 435-Q (*Books, Records and Reports Required*). Likewise, all material facts within the knowledge or reasonably discoverable by the TC, particularly information that would enable clients to make well-informed decisions, shall be promptly transmitted/relayed to clients for them to protect their interests.

Furthermore, practices shall be carried out in accordance with the basic standards (*Appendix Q-49*) and risk management guidelines for trust, other fiduciary business and investment management activities (*Appendix Q-50*).

An institution incorporated or authorized to engage in trust and fiduciary business is under no obligation, either legal or moral, to accept any such business being offered nor has it the right to accept if the same is contrary to law, rules, regulations, public order and public policy. It shall advertise its services in a dignified manner and enter such business only when demand for such service is evident, when specially equipped to render such service and upon full appreciation of the responsibilities involved. It shall be ready and willing to give full disclosure of the services being offered and shall conduct its dealing with transparency. Harmonious relationship shall likewise be pursued with other professions to achieve the common goal of mutual service to the public and protection of its interest.

The TC shall formulate and adhere to a Code of Ethics and Professional Standards (Code and Standards), duly approved by the board of directors, that defines the ethical principles and professional conduct of fiduciary functions with the clients' best interest in mind. It shall be the responsibility of the board of directors of the TC to ensure strict conformance with the Code and Standards by all its directors, officers and personnel. To this end, the board of directors shall incorporate compliance procedures in its Code and Standards.

(Circular No. 884 dated 22 July 2015)

302 – T APPLICABLE REGULATIONS ON TRUST AND OTHER FIDUCIARY ACTIVITIES

In addition to the provisions in the "T" regulation of the MORNBF, trust operations and other fiduciary activities, including investment management shall be subject to the following regulations provided under the MORNBF, in so far as applicable to the TC:

- a. Sec. 438-Q Non-Trust, Non-Fiduciary and/or Investment Management Activities
- b. Sec. 413-Q Trust and Other Fiduciary Business (except Sec. 413-Q (*Ceilings on loans; Tax-exempt Individual Trust Accounts*))

- c. Sec. 414-Q Unit Investment Trust Funds
- d. Sec. 415-Q Investment Management Activities (except on the required pre-numbered contractual agreement form; and except Sec. 415-Q (*Ceilings on Loans; Tax-exempt individual investment management accounts*))
- e. Sec. 418-Q Required Retained Earnings Appropriation
- f. Sec. 432-Q Custody of Assets
- g. Sec. 433-Q Fees and Commissions
- h. Sec. 434-Q Taxes
- i. Sec. 435-Q Reports Required to Trustor, Beneficiary, Principal;
- j. Sec. 499-Q Sanctions (For this purpose the guidelines for the imposition of monetary penalty as shown under Appendix T-2 shall be used by TCs).
- k. Sec. 411-Q Authority to Perform Trust and Other Fiduciary Business

Trust fund of pre-need companies. The rules and regulations on the acceptance, management and administration of trust funds of pre-need companies by TCs shall be governed by Chapter VIII of the Pre-need Code of the Philippines (Republic Act No. 9829).

(Circular Nos. 1031 dated 07 February 2019, 903 dated 29 February 2016, and 884 dated 22 July 2015)

303 – T FOREIGN CURRENCY DENOMINATED TRUST, OTHER FIDUCIARY AND INVESTMENT MANAGEMENT ACCOUNTS

A TC may accept foreign currency-denominated (FCD) trust, other fiduciary and IMA accounts in any acceptable foreign currency.

For purposes of this Section, “*acceptable foreign exchange*” comprise those foreign currencies which are acceptable to and exchangeable at the Bangko Sentral and which form part of the international reserves of the country.

Applicability of rules and regulations. Unless otherwise revised by the provisions of this Section, the rules and regulations governing the administration of trust, other fiduciary or investment management accounts, including UITFs, shall be observed.

Allowable loans and investments. FCD accounts may be invested in loans and investments as allowed under the written contract between the TC and its clients: *Provided*, That the loans and investments are allowed under existing Bangko Sentral regulations and are properly disclosed to trustors/principals/fund participants: *Provided further*, That the pertinent rules and regulations in the Manual of Regulations on Foreign Exchange Transactions (Part V of MORB) are complied with.

The TC shall adopt a written policy on the determination of the level of liquid assets appropriate to each client after considering the client’s mandate/s or objective/s, given constraints and unique needs and circumstances. The Investment Policy Statement of each client shall show the basis for the client’s liquidity requirement.

Accounting. TCs shall maintain a separate accounting for these foreign currency transactions that will enable preparation of the Balance Sheet and Income Statement covering said funds. FCD assets and accountabilities shall be recorded at their foreign currency amounts and their local currency equivalent using the Philippine Dealing System (PDS) Peso/US Dollar closing rate and the New York US Dollar/Third Currencies closing rate. For purposes of preparing the FCD financial statements, the TC shall use the US dollar (USD) as its functional currency. However, for purposes of consolidating the FCD financial statements with the Peso financial statements, these shall be translated into the presentation currency, i.e. Philippine Peso (PHP).

The TC shall also prepare financial reports to clients as required under Sec. 435-Q, reflecting dollar denominated assets and accountabilities and consolidated reports reflecting the peso and foreign currency (translated into Philippine Peso) denominated assets and accountabilities.

(Circular No. 884 dated 22 July 2015)

The provisions under Sec. 431-Q, shall be adopted for TC with the following changes:

Pre-qualification requirements for a securities custodian/registry. The pre-qualification requirements for a securities custodian/registry under Sec. 431-Q (*Pre-qualification requirements for a securities custodian/registry*) shall apply, except for items a (QB requirement); and c (CAMELS composite rating requirement), of said Section. In addition to the said requirements, TC must have a Trust Composite Rating of at least “3” in the last regular examination.

Trust Rating System and Rating Downgrade. In the event that the TC’s trust rating of “3” is downgraded during a particular examination, the TC has one (1) examination cycle from date of receipt of the report of examination, which shall serve as notice of downgrade, within which to correct/address the cause of the downgrade, otherwise sanction will be imposed which include, but is not limited to: (1) suspension of custodianship authority and limiting the TC’s custodianship accounts to the level immediately prior to the downgrade until such time the rating is restored to “3”; or (2) revocation of the custodianship authority.

(Circular No. 884 dated 22 July 2015)

PART FOUR

OTHER REGULATIONS

401 – T ANNUAL SUPERVISION FEES

Trust Corporations shall pay to the Bangko Sentral an annual supervision fee of 0.01% of the average monthly balance of assets under management for the first three (3) years of the trust corporation's operations. However, a supervision fee of 0.02% of the average monthly balance of assets under management shall be imposed on the year and onwards. Securities held under custodianship shall be exempt from annual fees. The average monthly balance shall refer to the sum of the twelve (12) month-end balances of the preceding calendar year divided by a factor of twelve (12). Said annual supervision fee shall be paid by the trust corporations on or before end-February of every year. Non-payment of the supervisory fee within the prescribed period shall subject the concerned trust corporation to the sanctions prescribed under Section 37 of R.A. No. 7653.

(M-2019-010 dated 8 April 2019 and Circular No. 884 dated 22 July 2015)

402 – T PAYMENT OF FINES AND OTHER CHARGES

The provisions of Sec. 1102-Q shall apply to trust corporations.

(Circular No. 884 dated 22 July 2015)

403 – T TRANSITORY PROVISION

Trust Corporations spun off from trust departments of banks/NBFIs, may continue to operate as a trust department within a reasonable period of time, to be determined by the Bangko Sentral, after the grant of the Authority to Operate as trust corporation. Necessary documentations and transfer of resources may be done during this period: *Provided*, That new services and/or products to be offered by the trust corporation during this period shall be rendered by the newly incorporated trust corporation: *Provided, further*, That all necessary arrangements, notices to clients/investors/creditors shall be made by the trust corporation immediately after receipt of approval from the Bangko Sentral of its Authority to Establish as a trust corporation.

(Circular No. 884 dated 22 July 2015)

Compliance with the required basic security deposit during and after transition period.

a. During transition period

- (1) Spun-off trust department shall maintain basic security deposit equivalent to one percent (1%) of its previous end-of-day balance of total trust, investment management, and other fiduciary assets;
- (2) The newly established trust corporation shall maintain basic security deposit equivalent to the higher of P500,000 or 0.05% of the previous end-of-day balance of total trust, investment management, and other fiduciary asset; and
- (3) A weekly report on the daily compliance with the required basic security deposit shall be submitted to the Bangko Sentral by the first business day following the reference calendar week (Monday to Sunday).

b. After the transition period

- (1) The newly established trust corporation shall maintain basic security deposit equivalent to the higher of P500,000 or 0.05% of the balance of the total trust, investment management, and other fiduciary assets as of the end of transition period until one (1) calendar quarter of operations; and
- (2) Thereafter, the trust corporation shall maintain the required basic security deposit under Sec. 114-T (*Valuation of securities and basis of computation of the basic security deposit requirement*).

The trustee or fiduciary shall have ten (10) calendar days after end of day from the start of the transition period until one (1) calendar quarter of operation after end of the transition period within which to deposit with the Bangko Sentral the additional securities to comply with the required securities.

(Circular No. 962 dated 08 June 2017)

404 – T ELECTRONIC PAYMENT AND FINANCIAL SERVICES

Trust operations and investment management activities of trust corporations shall be subject to the applicable regulations Q-Regulations of the MORNBFi pursuant to Sec. 101-T.

Requirements for the grant of authority to offer EPFS. Pursuant to Sec. 111-T on the Bangko Sentral Policy and Regulations on Licensing, BSFIs that intend to offer EPFS shall obtain the appropriate authority/license, as follows:

Classification	Category of License/Authority
Advanced EPFS	Type A ¹ /B ²
Basic EPFS	Type C

BSFIs shall observe the “Guidelines on Licensing of Electronic Payment and Financial Services” shown in *Appendix Q-89*.

Reportorial requirements. BSFIs shall provide the Bangko Sentral with the required data and updates on their EPFS.

- a. **Required Reports.** The following reports shall be submitted to the appropriate supervising department of the Bangko Sentral in the manner prescribed under *Appendix T-4*:

- (1) EPFS Transactions and Indicators; and
- (2) Changes and Enhancements in EPFS

- b. **Sanctions.** Failure to comply with the reportorial requirements shall subject the concerned BSFI to applicable sanctions for “Erroneous/Delayed/Erroneous and Delayed/Unsubmitted reports” as prescribed under Sec. 111-T.

Enforcement action. Failure to comply with the provisions of this Section shall cause the concerned BSFI to be subject to enforcement action in accordance with Sec. 002-T and /or Sec. 111-T (*Enforcement actions*).

(Circular Nos. 1033 dated 22 February 2019 and 884 dated 22 July 2015)

¹ This applies to BSFIs that *can* be assessed against the prudential criteria provided in the Policy and Regulations on Licensing. These applicants must have been examined by the Bangko Sentral.

² This applies to proponents that *cannot* be assessed against the prudential criteria provided in the Policy and Regulations on Licensing. These include newly-established BSFIs and new applicants for an authority to operate as “Electronic Money Issuer-Others”.

GUIDELINES ON GRANTING OF LICENSE/AUTHORITY
(Appendix to Sec. 111-T [Statement of policy and objectives])

I. Guiding principle

The Bangko Sentral, the licensing authority, has the power to set criteria and reject applications that do not comply with the criteria/standards set. In this light, the Bangko Sentral is providing the following guidelines on its licensing process to establish accountability and promote transparency to banks and BSFIs wishing to apply for any licenses/authorities within the jurisdiction of the Bangko Sentral. These guidelines also aim to provide more consistency in how risk-focused supervision is applied to licensing process.

The Bangko Sentral will not restrict the scope of risk-taking activities of BSFIs consequent of the licenses and/or authorities granted: *Provided, That* these licenses and/or authorities are in line with their business model and strategic direction: *Provided, further, That* BSFIs demonstrate the capacity and ability to implement these strategies.

As indicated in the new licensing policy, applications for licenses and/or authorities are categorized as follows:

- a. Type "A" – applications for licenses and/or authorities where compliance with the defined prudential requirements/criteria described in Sec. 111-T is a pre-condition for applicants to be considered eligible;
- b. Type "B" – applications for licenses and/or authorities processed regardless of risk profile; and
- c. Type "C" -activities which no longer require submission of applications and processing but shall be subject to submission of reports/certification/notification within stated deadlines. However, compliance with pre-qualification requirements is subject to post verification and any false information and/or misrepresentation may be a basis for the imposition of appropriate enforcement actions described in Sec. 111-T.

II. Guidelines and procedures

1. Process flow. The licensing application process involves four (4) stages, to wit:

- a. Stage 1. Eligibility test and assessment. The Bangko Sentral shall consider an applicant's eligibility for licenses/authorities categorized as Type "A" in accordance with the standards and/or prudential criteria described in Sec. 111-T; and whether approval thereof is consistent with applicable laws, rules, regulations, policies and safety and soundness considerations.

In this regard, BSFIs shall signify to the appropriate supervising department of the SES its interest to apply for a license(s) or authority/ies. However, the Bangko Sentral expects each BSFI to have conducted self-assessment vis-à-vis prudential criteria and/or requirements to determine whether it is eligible and/or qualified to apply for any specific license/authority, prior to signifying its interest.

BSFIs with CAMELS composite rating of below "3", or under PCA or rehabilitation may still be considered eligible, on a case by case basis, upon showing valid justifications and/or verifiable evidence of significant compliance with the comprehensive PCA plan (PCAP)/rehabilitation plan approved by the Bangko Sentral and/or if licenses and/or authorities applied for are vital to the implementation of the PCAP/rehabilitation plan.

- b. Stage 2. Application. The BSFI upon receipt of notice and/or confirmation from the Bangko Sentral of its eligibility can now formally submit its application letter together with the documentary requirements, as applicable to the license/authority applied for. Applications with incomplete documentation will be returned without prejudice to re-submission of a complete application and collection of applicable fees.
- c. Stage 3. Processing. Upon receipt of a complete application, the appropriate supervising department of SES shall proceed in preparing the memorandum elevating to the appropriate approving authority of the Bangko Sentral its recommended action/s.
- d. Stage 4. Decision. Within five (5) working days upon approval and/or confirmation from the appropriate authority of the Bangko Sentral, BSFIs shall expect to be notified of the decision on their request/application.

The Bangko Sentral may request information and/or documents aside from the minimum documentary requirements for each type of license/authority to arrive at an informed decision. It may also conduct limited inspection or validation, when warranted.

The Bangko Sentral may approve any application of an eligible applicant after evaluating the application and considering relevant factors. Likewise, the Bangko Sentral may deny applications if (a) significant

supervisory or compliance concerns exist or (b) the applicants fail to provide material information necessary to make an informed decision.

2. Responsibility

The Bangko Sentral expects each applicant to prepare accurately and completely each application/certification/reports submitted to the appropriate department of the Bangko Sentral -SES.

By virtue of the application, the applicant authorizes the Bangko Sentral to conduct an on-site evaluation or inspection for the purpose of ascertaining compliance with relevant laws, rules, regulations and/or directives, and/or applicant's risk management capabilities, when warranted.

For this purpose, the applicant shall include in its application letter the authorization in favor of the Bangko Sentral giving its consent to the conduct of on-site verification of the documents and/or representations stated in the application filed in connection with the license or authority applied for.

3. Fees

An applicant, depending on its classification and type of license/authority applied for, shall be assessed the following fees per application:

- i. Processing fee -shall be charged upon filing of an application and is non-refundable. In case of re-submission of application that is returned for incomplete documentation, another processing fee shall be charged anew; and
- ii. Licensing fee -shall be charged to certain application upon approval.

The licensing fee shall be net of the processing fee.

For banks, assessed fees shall be debited from the applicants' demand deposit account with the Bangko Sentral upon the lapse of fifteen (15) calendar days reckoned from receipt of Bangko Sentral's decision on its request/application. For this purpose, banks shall, upon filing of an application, state in its application letter the authority to debit their demand deposit account with the Bangko Sentral for the applicable fees to the license or authority applied for. Otherwise, assessed fees shall be paid to the Bangko Sentral.

4. Post decision

Unless otherwise prescribed by the Bangko Sentral, an applicant may file a new application for a denied and/or withdrawn application after the lapse of six (6) months reckoned from the date of denial/withdrawal: *Provided*, That any weaknesses, deficiencies and/or non-compliance with any laws, rules, regulations and/or directives that made the applicants ineligible have already been satisfactorily addressed.

(Circular No. 947 dated 15 February 2017)

MANUAL OF REGULATIONS FOR NON-BANK FINANCIAL INSTITUTIONS

C REGULATIONS

(Regulations Governing Non-Bank Credit Card Issuers)

TABLE OF CONTENTS

PART ONE - ORGANIZATION, MANAGEMENT, AND ADMINISTRATION

Section	101-CC	Credit Card Operations; Policy Statement
Section	111-CC	Framework on the Selection of External Auditors
Section	121-CC	Bangko Sentral Regulations of Financial Consumer Protections

PART ONE

ORGANIZATION, MANAGEMENT, AND ADMINISTRATION

101-CC CREDIT CARD OPERATIONS; GENERAL POLICY

Policy Statement. The Bangko Sentral shall foster the development of consumer credit through innovative products such as credit cards under conditions of fair and sound consumer credit practices. The Bangko Sentral likewise encourages competition and transparency to ensure more efficient delivery of services and fair dealings with customers.

The following rules and regulations shall govern the establishment and operations of all non-bank credit card issuers, acquirers and all credit card transactions.

Definition of terms.

- a. *Credit card* refers to any card or other credit device, including its virtual representation, intended for the purpose of obtaining money, property, goods or services on credit.
- b. *Minimum amount due or minimum payment required* refers to the minimum amount that the credit cardholder is required to pay on or before the payment due date for a particular billing period/cycle which may include:
 - (1) outstanding balance multiplied by the required payment percentage or a fixed amount, whichever is higher;
 - (2) any amount which is part of any fixed monthly installment that is charged to the card;
 - (3) any amount in excess of the credit line; and
 - (4) all past due amounts, if any.
- c. *Default or delinquency* refers to non-payment of, or payment of an amount less than, the “*Minimum Amount Due*” or “*Minimum Payment Required*”, or words of similar import, for at least three (3) billing cycles, in which case, the “*Total Amount Due*” or “*Outstanding Balance*” for the particular billing period as reflected in the monthly statement of account may be considered in default or delinquent.
- d. *Acceleration clause* refers to any provision in the contract between the credit card issuer and the cardholder that gives the credit card issuer the right to demand the full settlement of the obligation in case of default or non-payment of any amount due, or for any valid reason.
- e. *Subsidiary* refers to a corporation or firm more than fifty percent (50%) of the outstanding voting stock of which is directly or indirectly owned, controlled or held with power to vote by its parent corporation.
- f. *Affiliate* refers to an entity linked directly or indirectly to a credit card issuer by means of:
 - (1) Ownership, control as defined under Item “c” of Sec. 131-Q (*Definition of terms*), or power to vote of at least twenty percent (20%) of the outstanding voting stock of the entity, or vice-versa;
 - (2) Interlocking directorship or officership, where the concerned director or officer owns, controls, as defined under Item “c” of Sec. 131-Q (*Definition of terms*) or has the power to vote at least twenty percent (20%) of the outstanding voting stock of the entity;
 - (3) Common ownership whereby the common stockholders own at least ten percent (10%) of the outstanding voting stock of the credit card issuer and at least twenty percent (20%) of the outstanding voting stock of the other entity;
 - (4) Management contract or any arrangement granting power to the credit card issuer to direct or cause the direction of management and policies of the other entity; or
 - (5) Permanent proxy or voting trusts in favor of the credit card issuer constituting at least twenty percent (20%) of the outstanding voting stock of the entity, or vice versa.
- g. *Simple annual rate* refers to the uniform percentage which represents the ratio between the finance charge and the amount to be financed under the assumption that the loan is payable in one (1) year with single payment upon maturity and there are no upfront deductions to principal.

For loans with terms different from the above assumptions, the effective annual interest rate shall be calculated and disclosed to the borrower as the relevant true cost of the loan comparable to the concept of simple annual rate.

For loans with contractual interest rates stated on monthly basis, the effective interest rate may be expressed as a monthly rate.

In accordance with the Philippine Accounting Standards (PAS) definition, *effective interest rate* is the rate that exactly discounts estimated future cash flows through the life of the loan to the net amount of loan proceeds. For consistency, methodology and standards for discounted cash flow models shall be prescribed to be used for the purpose.

- h. *Credit card acquirer* refers to the institution that accepts and facilitates processing of the credit card transaction which is initially accepted by the merchant.
- i. *Credit cardholder* refers to a person who owns and benefits from the use of a credit card.
- j. *Credit card business activity report* refers to a report which contains the quantitative data on the credit card industry.
- k. *Credit card issuer* refers to a corporation that offers the use of its credit card.
- l. *Pre-approved credit cards* refer to unsolicited credit cards issued by credit card issuers to consumers who have not applied for such credit cards. Acts described under *Appendix CC-2* and other similar acts are deemed tantamount to the act of issuing pre-approved credit cards, notwithstanding any contrary stipulations in the contract.
- m. *Application* refers to a request, documented in physical or electronic form with clear and explicit intention and consent of the applicant to avail of a credit card from a credit card issuer.
- n. *Balance transfer* refers to the transfer of the balance in a credit card account with one (1) credit card issuer to another account under a different credit card issuer subject to terms mutually agreed upon by the parties concerned.
- o. *Billing cycle/billing period* refers to the period of time between two (2) successive cut-off dates documented in a billing statement and defined under the terms and conditions of the credit card contract/agreement. A billing cycle/billing period shall comprise at least fifteen (15) calendar days.
- p. *Card association or payment network or credit card network provider* refers to any company that provides credit card network such as, but not limited to American Express, VISA International, MasterCard International, JCB International, Diners Club and China Union Pay.
- q. *Cash advances* refer to cash obtained by the cardholder from his/her credit card account, availed in any manner as stipulated in the credit card contract/agreement.
- r. *Credit card limit* refers to the maximum total amount for purchases, cash advances, balance transfers, and finance charges, service fees, penalties, and other charges which can be charged to the credit card. It represents the total loan or credit that a credit card issuer can extend to a cardholder.
- s. *Finance charges* refer to the interest charged to the cardholder on all credit card transactions in accordance with the terms and conditions specified in the agreement or contract on the use of the credit card.
- t. *Installment purchases* refer to transactions wherein payment is amortized in parts over a fixed period.
- u. *Industry association* refers to an association composed of companies engaged in the business of banking, finance, credit and/or payments.
- v. *Membership fee* refers to the amount a credit card issuer charges the credit cardholder for the right to use its credit card and acquire access to other membership benefits. This may also be referred to as annual membership fee, annual fee, joining fee or application fee.
- w. *Outstanding balance or total amount due* refers to the amount to be repaid as of statement cut-off date.
- x. *Statement cut-off date* refers to the end date of a billing cycle, as determined by the credit card issuer, when account activities (such as purchases, payments, charges) during the billing cycle are summarized.
- y. *Statement of account or billing statement* refers to the regular statement listing of the purchases, payments and other debits and credits made to the credit card account within the billing cycle.
- z. *Supplementary card or extension card* refers to a credit card issued to another person whose credit limit is consolidated with the primary cardholder.

Authority to operate

- a. A corporation, a non-bank subsidiary/affiliate of a bank or quasi-bank of good standing, or a finance/lending company duly registered with the Securities and Exchange Commission (SEC), and with the primary or secondary purpose to engage in the credit card business may engage in credit card operations only upon prior authority from the Monetary Board;

When the owner or parent organization of the applicant entity is a foreign-regulated financial institution or corporation, the prior consent of the foreign regulator/supervisor of the parent organization shall be obtained by the applicant entity.

- b. A quasi-bank which intends to engage in credit card business, may operate as a credit card issuer subject to the requirements provided under Sec. 312 of the Manual of Regulations for Banks (MORB).

Additional requirements for non-bank entities applying as credit card issuers.

- a. Minimal Capital Requirements.

Entities in Item "a" under this Section (*Authority to operate*) applying to become credit card issuers must be stock corporations with a minimum paid-up capital P100 million.

- b. Application for Certificate of Authority to Engage in Credit Card Issuance.

Entities in Item "a" under this Section (*Authority to operate*), represented by the incorporation/directors or the president or officer of equivalent rank, shall submit an application for a certificate of authority to engage in credit card issuance, together with documentary requirements and fees, to the appropriate supervising department of the Bangko Sentral. Application requirements are provided in *Appendix CC-1*.

Minimum requirements for the governance and risk management system of all credit card issuers. All credit card issuers must have adequate financial strength and fit and proper board and management. Unless otherwise provided specifically, applicable regulations on the Qualifications, Powers, Responsibilities and Duties of the Board of Directors/Officers, shall apply to directors and officers of all credit card issuers.

To effectively deliver services, credit card issuers must demonstrate technical and risk management capability to operate a credit card business. Credit card issuers shall establish a risk governance framework that includes policies, supported by appropriate processes and control procedures, designed to ensure that the risk arising from credit card operations are identified, aggregated, monitored and mitigated. The risk governance framework of credit card issuers shall be guided by Sec. 142-Q, as applicable.

At the minimum, the risk management and control systems on credit card operations shall cover:

- a. Policies, procedures and management information systems for credit card operations. These shall include limits and thresholds on exposures considering the credit card issuer's approved credit risk appetite;
- b. Organizational set up and the corresponding roles and responsibilities of personnel in the unit handling the credit card business;
- c. Approach to identifying, assessing, aggregating, monitoring, and reporting risks arising from credit card operations using appropriate risk management tools. This shall likewise include risk mitigation strategies and tools for maintaining risks within-thresholds and limits set;
- d. Internal audit and other independent review of credit card operations; and
- e. Policies and procedures including outsourcing arrangements necessary to ensure safe and sound operations in accordance with Bangko Sentral regulations on outsourcing under Sec. 111-Q and Sec. 102-N.

Written policies, procedures and internal control guidelines shall be established on the following aspects of credit card operations:

- a. Requirements for application;
- b. Solicitation and application processing;
- c. Determination and approval of credit limits;
- d. Issuance, distribution and activation of cards;
- e. Supplementary or extension cards;
- f. Cash advances;
- g. Billing and payments;
- h. Deferred payment program or special installment plans;

- i. Collection of past due accounts;
- j. Handling of accounts for write-off;
- k. Suspension, cancellation and withdrawal or termination of card;
- l. Renewal of cards, upgrade or downgrade of credit limit;
- m. Lost or stolen cards and their replacement;
- n. Accounts of DOSRI and employees;
- o. Disposition of errors and/or questions about the billing statement, statement of account and other customers' complaints; and
- p. Dealings with marketing agents/collection agents.

Minimum requirements for the issuance of credit cards Credit card issuers shall not issue pre-approved credit cards as provided under *Appendix CC-2* notwithstanding any contrary stipulations in the credit card contract/agreement with the cardholder.

Before issuing credit cards, credit card issuers shall conduct know-your-client (KYC) and customer identification procedures, consistent with applicable regulations; and exercise proper diligence in ascertaining that applicants possess good credit standing and are financially capable of fulfilling their credit commitments.

All credit card applications shall undergo a strict credit underwriting process, and information stated thereon shall be verified and validated by authorized personnel of credit card issuers, other than those handling marketing.

Information to be disclosed. Credit card issuers shall disclose to each of their existing and potential credit cardholders the following information:

- a. the finance charges for unpaid amounts after payment due date to be paid by the cardholder;
- b. other charges or fees, individually itemized, such as membership/renewal fees, processing fees, over-the-limit fees, collection fees, credit investigation fees and attorney's fees to be paid by the cardholder in connection with the transaction and incidental to the extension of credit;
- c. the percentage that the interest/finance charge bears to the total amount to be financed expressed as a simple monthly or annual rate, or a monthly or annual effective interest rate, on the outstanding balance of the obligation, as described in Item "g" under this Section (*Late payment fees/penalty for late payment*);
- d. for installment loans, the number of installments, amount and due dates or payment schedules to repay the indebtedness;
- e. the late payment fee/penalty for late payment or similar delinquency-related charges payable in the event of late payments, which shall be computed in accordance under this Section (*Late payment fees/penalty for late payment*);
- f. when one (1) or more periodic rates is used to compute interest: each such rate, the balances to which it is applicable, and the corresponding simple annual rate;
- g. in cases when transactions are made in foreign currencies, or for dual currency accounts, or when payments are made in any currency other than the billing currency: the manner of conversion from transaction currency to billing currency, or a general description of the conversion rates;
- h. a reminder to the cardholder in the billing statement, or its equivalent document, that payment of only the minimum amount due or any amount less than the total amount due for the billing cycle/billing period would mean the imposition of interest and/or other charges. A written statement in the following form must be printed in the billing statement:

"Important Reminder: Paying less than the total amount due will increase the amount of interest and other charges you pay and the time it takes to repay your balance."

Credit card issuers may provide additional reminders to the cardholder, including but not limited to late payment fees that may be imposed on past due or delinquent accounts;

- i. to the extent practicable, a detailed explanation and a clear illustration of the manner by which all interest, charges and fees are computed.

The credit card issuer shall notify the cardholder at least ninety (90) calendar days prior to any change in the manner of computation of the outstanding balance and the amount of fees to be imposed on the cardholder¹. If

¹ Pursuant to MB Res No. 1185 dated 17 September 2020, credit card issuers need not notify their cardholders of the change in interest or finance charges imposed on all credit card transactions and the change in processing fees for credit card cash advances. The said waiver of notice requirement shall only apply to the change in interest or finance charges and the change in processing fees brought about by the imposition of the can on interest or finance charge

the cardholder finds the change to be unacceptable, he/she shall have the right to terminate his/her account with the credit card issuer, subject to under this Section (*Suspension, termination of effectivity and reactivation of credit cards; and termination of accounts*);

- j. a table of all applicable fees, penalties, interest rates, conversion reference rates for third currency transactions, and the reason for their imposition, on credit card application forms, billing statements, and in the terms and conditions of the credit card agreement; and
- k. any other information that may be required by the Bangko Sentral.

The credit card issuer shall endeavour to convey the above information in a manner that is understandable to the credit cardholder: *Provided*, That the items enumerated above may be included in a billing statement on a quarterly basis at the minimum, in tabular format.

The table of fees, penalties, interest rates and reminder shall be printed in plain language, in bold black letters against a light or white background using the minimum Arial 12 theme font and size, or its equivalent in readability, and on the first page, if applicable document has more than one (1) page.

The credit card issuer shall ensure that all the above information, conveyed through written or electronic forms of communication, is easy to read for the average person. All marketing and advertising materials shall also disclose information that are consistent with the aforementioned provisions.

The credit card issuer shall put in place policies and procedures to ensure timely and effective delivery, either through physical or electronic means, of statement of accounts or billing statements, and other important information related to the credit card account of the cardholder.

Dissemination of Relevant Information. Banks operating as credit card issuer shall ensure that all persons to whom credit is extended are well informed of the salient provisions of Republic Act No. 3765, otherwise known as the "Truth in Lending Act" as contained in the revised format of disclosure statement in *Appendix 16* of the MORB through any acceptable medium of communication such as, but not limited to, posters, brochures, pamphlets, leaflets, educational videos, corporate websites, infographics and social media platforms. Said information must be conspicuously displayed and made available at all times, in physical or electric format, to all persons to whom credit is extended by banks operating as credit card issuers subject to the consumer protection standards and social media risk management guidelines. Such medium of communication shall include an explicit notification that the disclosure statement in writing is a required attachment to the credit transaction contract which banks operating as credit card issuer shall provide all persons to whom credit is extended with a copy of said disclosure statement prior to the consummation of the credit transaction.

Accrual of interest earned on loans. Accrual of interest earned on loans shall be subject to the provisions of Secs. 304-Q or 301-N (*Accrual of interest earned on loans*), as may be applicable.

Method of computing and imposition of interest or finance charges. Credit card issuers shall only charge interest or finance charges arising from the non-payment in full or on time of the outstanding balance based on the unpaid amount of the outstanding balance as of statement cut-off date, but excluding:

- a. the current billing cycle's purchase transactions reckoned from the previous cycle's statement cut-off date; and
- b. deferred payments under zero-interest installment arrangements which are not yet due.

interest or finance charges shall be imposed on the unpaid outstanding balance as of cut-off date each time a cardholder pays less than, or does not pay on time, the outstanding balance stated in his/her statement of account. Such interest or finance charge shall continue to be imposed until the outstanding balance and applicable interest are fully paid.

For credit card cash advances, a cardholder may be charged cash advance fees and finance charge on the date that the cash is obtained, subject to terms and conditions under the credit card agreement or contract.

For a loan where the principal is payable in installments, interest per installment period shall be calculated based on the outstanding balance of the loan at the beginning of each installment period.

All credit card-related documents shall show repayment schedules in a manner consistent with this provision. Marketing and advertising materials shall likewise be consistent with this provision.

on all credit card transactions and the imposition of the maximum amount of processing fee on credit card cash advances which will take effect on 03 November 2020 in accordance with the said MB Resolution.

Payment due date. Payment due date, or the date on which payment of the minimum amount due must be made to the credit card issuer shall be specified in the statement of account or billing statement: *Provided, That:*

- a. Payment due date shall be the same whatever the mode of payment: *Provided, further,* That payment through any authorized mode, or made to any accredited payment center of the credit card issuer shall be considered as payment to the credit card issuer made on the same date. Accordingly, Service Level Agreements between credit card issuers and their accredited payment centers shall be amended to operationalize this requirement.
- b. Notwithstanding any provision in the credit card contract/agreement, if the payment due date falls on a weekend and regular national holidays, the payment due date shall be automatically moved to the next business day and payment thereon shall not be treated as late payment.

Deferral charges. The credit card issuer and the cardholder may, prior to the consummation of the transaction, agree in written or electronic form, to a deferral of all or part of one (1) or more unpaid installments; and the credit card issuer may collect a deferral charge which shall not exceed the rate previously disclosed pursuant to the provisions under this Section (*Information to be disclosed*).

Late payment fees/penalty for late payment No late payment fees or penalty for late payment shall be collected from cardholders unless the collection thereof is fully disclosed in the contract/agreement between the credit card issuer and the cardholder: *Provided,* That such fees shall be based on the unpaid minimum amount due or a prescribed minimum fixed amount, whichever is lower: *Provided, further,* That said fees may be based on the total outstanding balance of the credit card obligation, including amounts payable under installment terms or deferred payment schemes, if the contract/agreement between the credit card issuer and the cardholder contains an “*acceleration clause*” as defined in Item “d” of Sec. 101-CC (*Definition of terms*), and the total outstanding balance of the credit card is classified and reported as past due.

Confidentiality of information. Credit card issuers, their directors, officers, employees and agents shall keep strictly confidential the data on the cardholder, except under any of the following circumstances:

- a. when disclosure of information is with the consent of the cardholder, which shall be stipulated in the application forms, the credit card contract/agreement, or any manner allowed by applicable laws, rules and regulations;
- b. upon orders of a court of competent jurisdiction or any government office or agency authorized by law, or under such conditions as may be prescribed by the Bangko Sentral Monetary Board;
- c. when the cardholder information is released, submitted or exchanged with credit information bureaus, industry associations or card associations or payment networks;
- d. when disclosure to third party service providers is necessary for the sole purpose of assisting or rendering services to the credit card issuer in enforcing its rights against the cardholder;
- e. when disclosure to third parties such as insurance companies is necessary for the sole purpose of insuring the credit card issuer from cardholder default or other credit loss, and the cardholder from fraud or unauthorized charges; and
- f. when disclosure to third parties is for the purpose of investigating fraud or unauthorized activities or mitigating risk involving card issuance, use and acquiring.

The recipients of information described in Items “a” to “f” above shall likewise be bound to preserve the confidentiality of cardholder data.

The disclosure of cardholder information by credit card issuers to third parties shall be subject to applicable laws, rules and regulations on data privacy.

Suspension, termination of effectivity and reactivation of credit cards; and termination of accounts. Credit card issuers shall formulate criteria or parameters for suspension, revocation and reactivation of the right to use the card, and shall include in their contract/agreement with cardholders a provision authorizing the credit card issuer to suspend or terminate the credit card effectivity, if circumstances warrant.

A cardholder may cancel or terminate his/her credit card account with any credit card issuer anytime: *Provided,* That the cardholder either pays in full, or enters into another agreement for payment of the outstanding balance and new purchases, debits and deferred installments. Payment may be made either through a one-time payment or on installments within a fixed period of time: *Provided, further,* That repayment in installments shall only be generally subject to interest, unless there is a violation of the above-mentioned new agreement.

A credit card issuer may initiate suspension, cancellation or revocation of a credit card account for any valid reason, as indicated in the terms and conditions of the credit card agreement: *Provided*, That the cardholder is notified within seven (7) business days from the date of suspension/cancellation/revocation. The credit cardholder shall have the right to appeal the suspension/cancellation/revocation subject to mutual agreement with the credit card issuer.

Inspection of records covering credit card transaction; determination of credit card limit; and over-the-limit transactions. Credit card issuers shall make available for inspection or examination by the appropriate supervising department of the Bangko Sentral the complete and accurate files on card applicant/cardholder to support the consideration for approval of the application and determination of the credit limit, which shall be in accordance with the verified debt repayment ability and/or net worth of the card applicant/cardholder.

Credit card issuers shall determine, based on the credit standing, credit history and financial capacity of the cardholder, the credit limit to be extended to the cardholder. Credit card issuers may thereafter implement changes in the credit limit applicable on the account based on their policies: *Provided*, That the cardholder is notified of such changes: *Provided, further*, That any credit limit increase may be declined by the cardholder: *Provided, finally*, That the cardholder has the option to request for a credit limit adjustment upon submission of updated information, but subject to the approval of the credit card issuer.

If a cardholder breaches the credit limit by a new transaction, the transaction may be processed, subject to the discretion of the credit card issuer as guided by its policies: *Provided*, That fees on over-the-limit transactions, if any, are clearly and prominently disclosed in the table of fees and charges, pursuant to under this Section (*Information to be disclosed*).

Offsets. A credit card issuer shall inform the cardholder, through the agreement, contract or any equivalent document governing the use of the credit card that, pursuant to the provisions of Articles 1278 to 1290 of the New Civil Code of the Philippines, as amended, the credit card issuer may offset any amount due and payable on the credit card against the cardholder's deposits with the credit card issuer, if any.

Handling of complaints, inquiries or requests. Credit card issuers shall establish a Consumer Assistance Unit within its organization, which shall be responsible for providing prompt action for the expeditious resolution of credit card related complaints, inquiries and requests.

- a. **Billing Statement.** Credit card issuers shall give cardholders up to thirty (30) calendar days from statement date to report any error or discrepancy in their statement of account or billing statement. The manner of reporting or notice of any billing error or discrepancy to the credit card issuer may be through written, verbal or any documented means.

The credit card issuer shall take action within ten (10) business days from receipt of such notice together with relevant documents or records in physical or electronic form from the cardholder.

Within ninety (90) days after receipt of the notice, credit card issuers shall conduct a thorough investigation; shall make appropriate corrections in their records; and send a written explanation or clarification to the cardholder prior to taking any action to collect the contested amount, subject to the result of the investigation.

Nothing in this Section shall be construed to prohibit any action by the credit card issuer to collect any amount which has not been indicated by the cardholder to contain a billing error.

- b. **Lost or Stolen Cards.** In case a credit card is lost or stolen, any transaction made prior to reporting by the cardholder of the loss or theft of his/her card to the credit card issuer shall be for the account of the cardholder: *Provided*, That this is without prejudice to the right of the cardholder to dispute the transaction, which, if found to be an unauthorized or fraudulent transaction, shall be corrected or reversed by the credit card issuer, including any finance charges and other fees related thereto, in accordance with the procedures set forth in the aforementioned regulations.

Appropriate manner of collection and use of third party collection agents. Credit card issuers may resort to all reasonable and legally permissible means to collect amounts due them under the credit card agreement: *Provided*, That in the exercise of their rights and performance of duties, they must observe good faith, reasonable conduct and proper decorum, and refrain from engaging in unscrupulous acts.

Credit card issuers may engage qualified third party service providers/collection agents for the purpose of assisting or rendering services in the administration of the credit card business, including recovery of unpaid obligations and enforcement of rights against the cardholder: *Provided*, That the engagement is in accordance with regulations on outsourcing under Sec. 111-Q and Sec. 102-N, as applicable: *Provided, further*, That the outsourcing arrangement shall be covered by a Service Level Agreement covering the responsibilities and accountabilities of each party.

Notwithstanding any contractual agreement between a credit card issuer and service provider/collection agent, the credit card issuer shall be responsible to its customers for maintaining customer service standards, without prejudice to further recourse, if any, by the credit card issuer to the service provider/collection agent.

A credit card issuer or its service provider/collection agent may communicate with a credit cardholder in connection with the collection of any debt through acceptable and reasonable modes. They shall not harass, abuse or oppress any cardholder or any person, or engage in any unfair practices in the collection of credit card debt.

The following activities are considered as guidelines and are not irrebuttably presumed to be unfair collection practices. Conversely, not all practices which might under the circumstances be termed unfair are mentioned here. The Monetary Board may now and then consider any other acts/omissions as unfair collection practices:

- a. the use or threat of violence or other criminal means to harm a person, or his/her reputation or property;
- b. the use of obscenities, insults, or profane language which amount to a criminal act or offense under applicable laws;
- c. disclosure of the names of credit cardholders who allegedly refuse to pay debts, except as allowed under this Section (*Confidentiality of information*);
- d. threat to take any action that cannot legally be taken;
- e. communicating or threatening to communicate to any person or entity, credit information which is known to be false, including failure to communicate that a debt is being disputed;
- f. any false representation or deceptive means to collect or attempt to collect any debt, or to obtain information concerning a cardholder; and
- g. making contact at unreasonable/inconvenient hours defined as contact before 6:00 A.M. or after 10:00 P.M., unless the cardholder has given express permission, or said times are the only reasonable or convenient opportunities for contact.

Credit card issuers shall inform their cardholder in writing of the endorsement of the collection of his/her account to a collection agency/agent, or the endorsement of the account from one (1) collection agency/agent to another, at least seven (7) business days prior to the actual endorsement. The notification shall include the full name of the collection agency and its contact details. The requirement to notify in writing shall be included in the terms and conditions of the credit card agreement: *Provided*, That the credit card issuer shall refer the collection of an account to only one collection agency/agent at any one time.

Credit card issuers shall adopt policies and procedures to ensure that personnel handling the collection of accounts, whether these are in-house collectors, or third-party collection agents, shall disclose his/her full name/true identity to the cardholder.

Application of card payment. Upon receipt of a payment from a cardholder whose account carries different interest rates for different types of purchases (i.e., cash advances, regular purchases, balance transfers), the credit card issuer shall apply amounts in excess of the minimum payment amount first to the fees and charges, and then to the billed balance bearing the highest rate of interest, followed by the billed balance bearing the next higher rate of interest, until the payment is exhausted: *Provided*, That the original rates for promotional offers shall be the basis for determining hierarchy of payment.

Service level agreement among industry players. There shall be, in the Service Level Agreement between acquirers and their partner merchants, a provision requiring merchants to perform due diligence to establish the identity of the cardholders, in accordance with applicable laws, rules and regulations.

Nothing in these regulations shall preclude card issuers from verifying or seeking confirmation with the cardholder any purchase, if in their assessment there is reasonable concern as to the validity of the purchase

Sanctions and penal provisions. Violations of the provisions of this Regulation shall be subject to any or all of the following sanctions depending upon their severity:

- a. Consistent with Sec. 002-Q, the Bangko Sentral may deploy enforcement actions to promote adherence with the requirements set forth in this Part and bring about timely corrective actions.
- b. Imposition of penalties and sanctions provided under Section 37 of R.A. No. 7653.

The provisions of Section 37 shall be made applicable to any credit card issuer, acquirer, their directors and officers including, but not limited to, the administrative sanctions that may be imposed, without prejudice to the criminal sanctions against the culpable persons provided in R.A. No. 10870, for any willful violation of such law, or any related rules, regulations, orders or instructions issued by the Monetary Board: *Provided*, That in addition to the administrative sanctions that may be imposed, the authority of the credit card issuer to issue credit cards may be suspended or cancelled by the Bangko Sentral.

- c. Appropriate monetary penalties, sanctions and other enforcement action/s shall be imposed for the following violation/s:

Nature of Violation/Exception	Possible Sanctions/Penalties
i. Operating without prior Bangko Sentral registration/license/authority	<ul style="list-style-type: none"> Applicable penalty prescribed under Section 37 of R.A. No. 7653, as implemented under Sec. 1102-Q (<i>Guidelines on the imposition of monetary penalties</i>) Applicable enforcement actions under Sec. 002-Q and Sec. 101-Q (<i>Transactions not considered quasi-banking</i>) and Sec. 101-N (<i>Enforcement actions</i>)
ii. Violation of any provisions/requirements of this Part	<ul style="list-style-type: none"> Penalties and sanctions and enforcement actions under applicable laws, such as Section 27 of R.A. No. 10870, rules and regulations, such as, but not limited to Sec. 002-Q, Sec. 1102-Q (<i>Guidelines on the imposition of monetary penalties</i>), Sec. 101-Q (<i>Transaction not considered quasi-banking</i>) and Sec. 101-N (<i>Enforcement actions</i>)
iii. Erroneous/delayed/unsubmitted reports	<ul style="list-style-type: none"> Applicable penalties under Secs. 172-Q and 143-N (<i>Reports</i>)

Submission of credit card business activity report. For purposes of transparency and availability of data on credit card operations and in light of ensuring consumer protection, as well as managing risks involved in credit transactions, credit card issuers shall submit a monthly quantitative report to the Bangko Sentral covering the following data on credit card issuers/acquirers, cardholders, credit card complaints and usage location:

Credit Card Issuance	Unit of Expression
I. Cards-in-force per network/brand	Number
II. Cards-in-force per card type	Number
III. Approved credit card applications	Number
IV. Cards issued by status	Number
V. Cards issued per credit limit	Peso amount
VI. Billings per mode of transactions	Peso amount
VII. Billings per network/ brand	Peso amount
VIII. Billed fees/charges	Peso amount
IX. Gross payment	Peso amount
X. Receivables	Peso amount
XI. Rates/charges per cardholder percentage	Peso amount
IX. Gross payment Peso	Peso amount
X. Receivables	Peso amount
XI. Rates/charges per cardholder	Peso amount/percentage

Cardholder Profile	Unit of Expression
I. Cardholder information (age, occupation, gender, civil status, educational attainment, geographic location)	Number
II. Cardholder by type of payment	Number

Complaints	Unit of Expression
I. Cardholder issues	Number
II. Complaint/request resolution	Number
III. External service provider	Number

Usage Location	Unit of Expression
I. Incoming	Peso Amount
II. Outgoing	Peso Amount

Changes to the existing report format required under this Section (*Submission of credit card business activity report*) shall be covered by a separate guideline.

Voluntary cessation of credit card business. A credit card issuer may undertake voluntary cessation of its credit card business only upon prior approval of the Monetary Board: *Provided*, That requests for approval of a voluntary cessation of business shall be accompanied by a plan of cessation of operations duly approved by the credit card issuer's Board of Directors. Such request for approval of voluntary cessation shall be submitted to the Monetary Board within ten (10) banking days from approval of the plan of cessation of operations by the credit card issuer's Board of Directors.

Transitory provisions. All existing credit card issuers shall be allowed a transitory period to make appropriate adjustments in their systems, processes and personnel to be compliant with the following provisions of this Section:

- a. For this Section on *Method of computing and imposition of interest or finance charges*, which pertains to adjustments in the computation and imposition of interest and finance charges; and for this Section on *Application of card payment* which pertains to the hierarchy of application of credit card payments: within one (1) year from the date of 6 June 2018;
- b. For this Section on *Payment due date*, Item "(a)", which pertains to same day recognition of payments made in accredited payment centers by credit card issuers: within nine (9) months from the date of 6 June 2018;
- c. For this Section on *Payment due date*, Item "(b)", which pertains to adjustment of payment due dates falling on weekends and holidays into the next business day: within three (3) months from 6 June 2018;
- d. For this Section on *Late payment fees/penalty for late payment*, which pertains to adjustments in the computation of late payment fees or penalty for late payment: within six (6) months from 6 June 2018; and
- e. For this Section on *Additional requirements, for non-bank entities applying as credit card issuers*, which pertains to minimum capital requirement: Existing credit card issuers shall comply with the minimum paid-up capital of P100 million within one (1) year from 6 June 2018.

(Circular Nos. 1143 dated 12 April 2022, 1052 dated 2 October 2019, and 1003 dated 16 May 2018)

111-CC FRAMEWORK ON THE SELECTION OF EXTERNAL AUDITORS

Policy Statement. The Bangko Sentral considers the external auditing profession as a partner in promoting the integrity of financial reports and transparency in the financial system. In this light, the Bangko Sentral is issuing this framework on the selection of external auditors (individual practitioners and audit firms) for Bangko Sentral Supervised Financial Institutions (BSFIs) in line with its cooperative arrangements with the Securities and Exchange Commission (SEC), Insurance Commission (IC), and Philippine Deposit Insurance Corporation (PDIC), under the auspices of the Financial Sector Forum (FSF).

Appointment of External Auditors of BSFIs

- a. BSFIs shall engage the services of an external auditor included in the List of Selected External Auditors for BSFIs. In this respect, a BSFI shall only appoint an external auditor belonging to the same category or from categories higher than the category of the BSFI concerned as provided in this section: *Provided*, That the Monetary Board may require the BSFI to appoint an external auditor from higher categories as part of the Bangko Sentral's supervisory action on the BSFI. The external auditor appointed by the BSFI shall likewise audit the BSFI's trust department as well as its subsidiaries and affiliates engaged in allied activities, as applicable.
- b. External Auditors shall be classified into three categories and shall extend their services to BSFIs belonging to the same category or from categories lower than the category of the external auditor, as follows:
 - (1) Group A
 - (a) UBs/KBs
 - (b) Foreign banks and branches or subsidiaries of foreign banks
 - (c) Banks, trust departments and trust corporations with additional derivatives authority, pursuant to Sec. 613 of the MORB
 - (2) Group B
 - (a) TBs
 - (b) NBFIs with quasi-banking license
 - (c) Trust departments and trust corporations
 - (3) Group C
 - (a) RBs and Coop Banks
 - (b) Non-stock Savings and Loan Associations
 - (c) Pawnshops

- (d) Remittance and Transfer Companies (RTCs)/Money Changers/Foreign Exchange Dealers (MCs/FXDs), including Virtual Currency Exchanges and Electronic Money Issuers
- (e) Credit Card Issuers/Acquirers

The above categories shall include their subsidiaries and affiliates engaged in allied activities and other financial institutions subject to Bangko Sentral's consolidated supervision.

- c. External auditors applying for first time inclusion or renewal of inclusion in the List of Selected External Auditors for BSFIs shall submit their application to the SEC. The application shall be subject to the requirements set out by the SEC as agreed upon by the Bangko Sentral, SEC, IC and PDIC.
- d. The inclusion in the List of Selected External Auditors for BSFIs shall be valid for five (5) years or for a shorter period prescribed by the financial sector supervisors.
- e. The Bangko Sentral shall periodically evaluate the performance of the external auditor through an assessment of the quality of the BSFI's audited financial statements and its compliance with the requirements provided under this Section. The results of assessment shall serve as basis for the continuing inclusion of external auditors in the List of Selected External Auditors for BSFIs.
- f. The external auditor, including the engagement and quality control partners of the audit firm, of the BSFI shall be rotated in accordance with the relevant provisions of the Code of Ethics for Professional Accountants in the Philippines as adopted by the Philippine Board of Accountancy.

Audit Engagement and Reportorial Requirements

- a. The BSFI's Audit Committee/board of directors/board of trustees shall ensure that the scope of external audit work appropriately covers areas relevant to BSFI's operations and risk exposures. These include the following:
 - (1) Review of the adoption of applicable reporting framework as well as the assessment of the accuracy, adequacy, and reliability of accounting records and financial reports;
 - (2) Assessment of the propriety and adequacy of disclosures in the financial statements;
 - (3) Assessment of the adequacy and effectiveness of internal controls and risk management systems;
 - (4) Assessment of the quality of capital in relation to risk exposures; and
 - (5) Evaluation of the quality of corporate governance.
- b. The engagement contract of BSFIs with the external auditor shall include, at a minimum, the following provisions:
 - (1) That disclosure of information, such as those enumerated under Item "c" of this Section (*Audit engagement and reportorial requirements*), by the external auditor to the Bangko Sentral and/or other financial sector supervisors shall not constitute a breach of confidentiality on the part of the external auditor nor shall it be a ground for civil, criminal, or disciplinary proceedings against the external auditor;
 - (2) That the external auditor shall be allowed read-only access to the Bangko Sentral's Report of Examination on the BSFI and that the external auditor shall appropriately consider the contents thereof and maintain its confidentiality; and
 - (3) That the BSFI concerned and external auditor shall comply with all the requirements under this Section.

The engagement contract shall be made available by the BSFI to the Bangko Sentral upon request.

- c. The external auditor shall report to the appropriate supervising department of the Bangko Sentral within fifteen (15) calendar days upon discovery of any matter adversely affecting the condition or soundness of the BSFI, such as, but not limited to the following cases:
 - (1) Any material finding involving fraud or error;
 - (2) Actual or potential losses, the aggregate of which amounts to at least ten percent (10%) of the consolidated total assets of the BSFI;
 - (3) Significant doubt as to the ability of the BSFI to continue as a going concern;
 - (4) Material breach of laws or Bangko Sentral rules and regulations such as but not limited to prescribed capital and liquidity ratios, significant deficiency in allowance for credit losses, material weaknesses in fair value measurement methodology, and significant vulnerabilities to money laundering and combating the financing of terrorism;

- (5) Material internal control weaknesses which may lead to financial reporting problems; and
- (6) Findings on matters of corporate governance that may require urgent action by the Bangko Sentral.

Where a thorough investigation or evaluation of facts is necessary on the noted case, an initial report shall be submitted within the prescribed timeline: *Provided*, That a complete report is submitted not later than fifteen (15) calendar days from completion of investigation or evaluation.

In case there are no matters to report, the external auditor shall submit to the appropriate supervising department of the Bangko Sentral, not later than 120 calendar days after the close of the calendar year or the fiscal year adopted by the BSFI, a certification that there is none to report.

- d. The board of directors and management of the BSFI shall be primarily responsible for the financial statements submitted to the Bangko Sentral. External auditors are expected to conduct the audit of financial statements in accordance with the provisions of the Philippine Standards on Auditing.
- e. The external auditor shall directly inform the appropriate supervising department of the Bangko Sentral of the pre-termination of the engagement contract or his/her resignation/replacements as external auditor as well as the reasons thereto, within fifteen (15) calendar days of the pre-termination of the contract or his/her resignation/replacement.

Supervisory Enforcement Action

The Bangko Sentral reserves the right to deploy its range of supervisory enforcement actions to promote adherence with the requirements set forth in this Section and bring about timely corrective actions. For this purpose, the Bangko Sentral may issue directives or impose sanctions on BSFIs and/or its directors/trustees who approved the appointment of the external auditor, who/which are not in the List of Selected External Auditors for BSFIs, and/or for non-compliance with the provisions of this Section. The Bangko Sentral may likewise shorten the period of validity of inclusion of an external auditor in the List of Selected External Auditors for BSFIs, suspend, or delist external auditors from its List of Selected External Auditors for BSFIs based on the results of assessment of the quality of audited financial statements (AFS) as well as non-compliance with the provisions of this Section. The guidelines on the supervision/delisting of external auditor in the list of selected external auditors for BSFIs is prescribed in *Appendix Q-30*.

Transitory provisions

- a. External auditors whose inclusion in the List of Selected External Auditors for BSFIs is valid to cover the audit of 2018 financial statements are hereby given one (1) year extension on their inclusion in the List of Selected External Auditors for BSFIs allowing them to engage in the audit of the 2019 financial statements.
- b. All applications (new and renewal) for inclusion in the List of Selected External Auditors for BSFIs to cover in the audit of 2020 financial statements and thereafter shall be filed with the SEC starting June 2019.

(Circular No. 1040 dated 20 May 2019)

121-CC BANGKO SENTRAL REGULATIONS OF FINANCIAL CONSUMER PROTECTIONS¹

Credit card issuers shall adopt a system for promptly addressing the complaints of their customers.

The Financial Consumer Protection Framework of the Bangko Sentral as stated under Part Ten of this Manual on Q-Regulations shall be adopted insofar as these are applicable to pawnshop operations.

Consistent with Sec. 002-Q, the Bangko Sentral may deploy enforcement action to promote adherence to the Bangko Sentral Regulations on Financial Consumer Protection.

(Circular Nos. 1143 dated 12 April 2022 and 1048 dated 06 September 2019)

¹ BSFIs shall be given six (6) months from 26 September 2019 to: (1) perform a gap analysis of their current consumer protection practices vis-i-vis this Section and (2) propose an action plan duly approved by the Board of Directors to achieve full compliance within a reasonable period of time but in no case longer than one (1) year from 26 September 2019.

REQUIREMENTS FOR NON-BANKS APPLYING TO BECOME CREDIT CARD ISSUERS
(Appendix to Secs. 102 – CC and 103 – CC)

- A. *Pre-qualification requirements* for non-banks applying to become credit card issuers:
1. It has generally complied with the applicable laws, rules and regulations, orders of instructions of appropriate authorities and the Monetary Board and/or the Bangko Sentral where applicable, including the minimum capital requirements.
 2. Its accounting records, systems and procedures as well as internal control systems are satisfactorily maintained.
 3. It has no past due obligation with any financial institution as of date of application.
 4. The officers who will be in-charge of the credit card operations have actual experience of at least two (2) years in a bank or quasi-bank as in-charge (or at least as assistant-in-charge). The directors, officer-in-charge of the credit card operations and the managerial staff must comply with the fit and proper rule prescribed under existing law/rules and regulations.
 5. The non-bank entity has elected at least two (2) independent directors and all its directors have attended the required seminar for directors of banks or quasi-banks conducted or accredited by the Bangko Sentral.
 6. It must have in place a comprehensive risk management system approved by its board of directors appropriate to its operations, characterized by a clear delineation of responsibility for risk management, adequate risk measurement systems, appropriately structured risk limits, effective internal control and complete, timely and efficient risk reporting systems.
- B. *Application for authority to become a credit card issuer.* The incorporators/directors or the president or officer of equivalent rank of a non-bank entity shall file and submit to the appropriate Department of the Bangko Sentral an application for authority to be a credit card issuer, together with the following documents:
1. New corporations/ subsidiaries of corporations in Item “a” of Section 102 - CC4 shall submit the following:
 - a. Certified true copy of the board resolution authorizing the application, together with a certification signed by the president or equivalent rank that the non-bank entity has complied with all prerequisites for the grant of authority to engage in credit card issuance.
 - b. Biographical data with picture of each incorporator, subscriber, existing/proposed director and officer. The directors and officers of the institution must comply with the fit and proper rule prescribed under existing law and regulations;
 - c. National Bureau of Investigation (NBI) clearance of each of the incorporator, subscriber, existing/proposed director and officer or similar document from the home country in the case of non-Filipino citizens, if possible;
 - d. If applicable, certification from home country’s supervisory authority that the Non-Filipino citizen has no derogatory record, if applicable;
 - e. For corporate subscribers, the following additional documents shall be submitted:
 - i. Copy of the board resolution authorizing the corporation to invest in the business of credit card issuance and designating the person who will represent the corporation in connection therewith;
 - ii. Copy of the latest articles of incorporation and by-laws;
 - iii. Updated list of directors and principal officers;

- iv. Current list of substantial or major stockholders, indicating the citizenship and the number, amount and percentage of the voting and non-voting shares held by them. For this purpose, substantial or major shareholder shall mean a person, whether natural or juridical, owning such number of shares that will allow him to elect at least one (1) member of the board of directors of a credit card issuer/acquirer, or who is directly or indirectly the registered or beneficial owner of more than ten percent (10%) of any class of its equity security;
 - v. A copy each of the corporation's audited financial statements for the last two (2) years prior to the filing of the application;
 - vi. A copy of the corporation's annual report to the stockholders for the year immediately preceding the date of filing of the application;
 - vii. Certified photocopies of the corporation's Income Tax Return; and
 - viii. For foreign corporations, in addition to Items "e(i)" to "e(vii)", it shall also submit, if applicable, a certification from its home country's supervisory authority that it has no objection to the investment of such company in a credit card issuer/acquirer in the Philippines and that adequate information on such foreign corporation shall be provided to the Bangko Sentral to the extent allowed under existing laws;
 - f. Detailed plan of operation and economic justification for engaging in the credit card issuance business, including a manual of operations and other related documents embodying the risk management system.
 - g. Projected financial statements for the first five (5) years together with assumptions. These should be consistent with its proposed plan of operation and would show sufficient capital to support its strategy and operations; and
 - h. Such other information/documents that the Bangko Sentral may require.
2. A duly incorporated quasi-bank of good standing, shall submit documents indicated in Sec. 312 (*Risk management system*) of the MORB.
- C. *Applicable fees.* Applications to become a credit card issuer shall be subject to the following fees:
- 1. Filing fee – A filing fee of ₱1,000.00 shall be charged upon filing of the application and is non-refundable; and
 - 2. Licensing fee – a licensing fee of ₱100,000.00 shall be charged upon approval of the application. Licensing fee shall be inclusive of the filing fee.
- D. *Complete documentation.* The application shall be considered filed and submitted on a first-come, first-served basis: Provided, that all required documents are complete and properly accomplished. Otherwise, the application shall be returned un-acted.
- E. *Commencement of operation as a credit card issuer.* A newly authorized non-bank credit card issuer shall commence operation within six (6) months from the receipt of certificate of authority to engage as a credit card issuer. Not later than ten (10) banking days from the commencement of business operations, the President or officer of equivalent rank of the credit card issuer shall submit a written notice to the appropriate supervising sector of the Bangko Sentral of the actual date of commencement.

Provided, That the credit card issuer may be granted by the Deputy Governor of the appropriate supervising sector of the Bangkok Sentral, a final extension of six (6) months subject to the formal presentation of valid justification and documentary proof that the credit card issuer can commence operation within the six (6)-month extension period. Otherwise, upon recommendation of the Deputy Governor of the appropriate supervising sector of the Bangkok Sentral, the Bangko Sentral shall revoke the certificate of authority to engage as a credit card issuer.

(Circular No. 1003 dated 16 May 2018)

ACTS TANTAMOUNT TO THE ACT OF ISSUING PRE-APPROVED CREDIT CARDS
(Appendix to Secs. 101 – CC and 104 – CC)

The acts described above and other similar acts are deemed tantamount to the act of issuing pre-approved credit cards notwithstanding any contrary stipulations in the contract.

- i. Sending of credit cards to consumers with no prior application, written request and supporting documents required for prudent credit card evaluation;
- ii. Sending of unsolicited supplementary cards and other cards with added features which are not in replacement or substitute to an existing cardholder's initial credit card;
- iii. Unsolicited calls by a credit card issuer requesting updated information from selected clients in order to be entitled to receive credit card as a reward for his/her continued patronage of the credit's other financial product;
- iv. Unsolicited calls by the credit card issuer to its depositors/clients informing them that they already have a credit card from the credit card issuer or its Credit Card Department due to good standing as a depositor/client;
- v. Sending of mails with credit card enclosed which will be deemed accepted upon the receipt of such card by a receiver, whether authorized or not;
- vi. Sending to a consumer an unsolicited credit card which is deemed accepted unless a request for termination is promptly instructed by the cardholder to the credit card issuer; and
- vii. Sending of credit cards as free offers to consumers who availed themselves of the credit card issuer's other financial products.

GUIDELINES ON THE SUSPENSION/DELISTING OF EXTERNAL AUDITOR IN THE LIST OF SELECTED EXTERNAL AUDITORS FOR BANGKO SENTRAL SUPERVISED FINANCIAL INSTITUTIONS (BSFIs)

Section 1. Grounds for Suspension/Delisting of External Auditors

An external auditor included in the List of Selected Auditors for BSFIs shall be suspended or delisted by the Bangko Sentral, without prejudice to the imposition of other sanctions by the Securities and Exchange Commission (SEC)¹, under any of the following grounds:

- a. Gross negligence in the conduct of the audit or failure to comply with the Philippine Standards on Auditing and such other issuances of the Auditing and Assurance Standards Council;
- b. Issuance of an unqualified opinion which is not supported by full compliance by the auditee with the applicable financial reporting framework due to material deficiencies or misstatements in the financial statements;
- c. Conduct of an audit despite the lack or eventual loss of independence as provided for under the Code of Ethics for Professional Accountants in the Philippines;
- d. Conduct of any non-audit services for his statutory audit clients, if he has not undertaken the safeguards to reduce the threat to his independence;
- e. Any material misrepresentation in the reports submitted to the Bangko Sentral;
- f. Failure to comply with the provisions set forth under Sec. 164-Q;
- g. Refusal for no valid reason, upon lawful order of the Bangko Sentral, to submit requested documents in connection with an ongoing investigation. The external auditor shall, however, be made aware of such investigation; and
- h. Failure to obtain from the Securities and Exchange Commission an accreditation appropriate to the client's category provided under Sec. 164-Q on the appointment of external auditor.

Section 2. Procedures and Effects of Delisting/Suspension

- a. On the basis of the results of the assessment of the quality of audited financial statements and evidence on the existence of the grounds for suspension or delisting under Section 1 above, the external auditor shall be notified in writing by the appropriate supervising department of the Bangko Sentral of the existence of the ground for his/her suspension or delisting in the List of Selected External Auditors for BSFIs and shall be allowed to submit within fifteen (15) calendar days from receipt of such notice an explanation on why he/she should not be suspended/delisted, together with the evidence in support of his/her position.

An external auditor shall only be suspended or delisted after due notice and opportunity to defend/clear himself/herself.

- b. Failure of the external auditor concerned to reply within the period prescribed under Item "a" above, shall be considered as a waiver on his/her part of the opportunity to defend/clear himself/herself. In this respect, the appropriate supervising department of the Bangko Sentral shall proceed with the evaluation of the case based on available records/evidence.
- c. Upon approval by the Monetary Board, the external auditor concerned shall be informed in writing by the appropriate supervising department of the Bangko Sentral of his/her suspension or delisting in the List of Selected External Auditors for BSFIs.
- d. A suspended or delisted external auditor shall be automatically included in the Bangko Sentral's Watchlist Disqualification File "B" (temporary).
- e. The Securities and Exchange Commission shall be immediately informed of the suspension or delisting of the external auditor.
- f. Suspended external auditors may re-apply for inclusion in the List of the Selected External Auditors for BSFIs after the lapse of five (5) years from the date of effectivity of the suspension.
