- b. The clearing participant or its settlement sponsor shall prefund the settlement of its net clearing obligation through the DDA stated above, ensuring that such account can sufficiently cover said obligation at any point during a settlement cycle. When prefunding, the clearing participant/settlement sponsor shall consider increasing the fund in its account for longer settlement cycles such as during weekends and holidays;
- c. The clearing participants shall agree on thresholds which shall be the bases of the CSO to execute a notification process that enables the clearing participants to efficiently monitor movements in their instant retail payment positions, and at the same time alerts them to place additional funds in their DDAs particularly when the ultimate threshold is breached;
- d. The service contract between the clearing participants and the CSO shall include, at a minimum, the following provisions:
 - (1) The CSO shall record the clearing participants’ DDA balances obtained from the Bangko Sentral at the start of every settlement cycle and monitor the clearing participants’ net clearing obligations against their respective account balances;
 - (2) Should the instant retail payments position (Funds in the DDA minus net clearing obligation/withdrawal from the DDA) of any of the clearing participants breach their agreed-upon thresholds, the CSO shall immediately send an electronic notification to the concerned clearing participant; and
 - (3) Any instant retail payment which is not fully covered by the corresponding DDA or which will result in a negative instant retail payments position shall be rejected by the CSO. A clearing participant with an instant retail payments position of zero shall be suspended from carrying out further outgoing instant payment transactions until said participant registers a positive position on account of its incoming payment transactions and/or subsequent deposits into its DDA;
- e. Should the clearing participants determine that the funds in their DDAs for instant retail payments are excessive after taking into account their highest potential clearing obligations, the clearing participants shall be allowed to withdraw from their DDAs to enable them to make optimal use of their funds; and
- f. The Bangko Sentral shall not be precluded from deploying applicable regulatory enforcement actions to concerned clearing participants notwithstanding the inclusion of sanctions in the ACH for non-compliance with the clearing participants’ agreed-upon settlement mechanism.

Risk Management. In view of the risks involved in the prescribed settlement mechanism for instant retail payments, including the possibility that a rejected payment transaction of a client due to prefunding issues may give rise to serious reputational damages to the concerned clearing participant, the BSFIs participating in the instant retail payment ACH shall ensure that they have the necessary operational and liquidity risk management measures in place. Such measures shall be designed in accordance with the guidelines provided under Sec. 146 on Operational Risk Management, and Sec. 145 on Liquidity Risk Management.

Demand deposits for instant payments as eligible reserves. The DDAs maintained with the Bangko Sentral for the settlement of net clearing obligations arising from instant retail payment transactions shall form part of the banks’ reserves against deposit and deposit substitute liabilities pursuant to Sec. 252.

¹ Based on the paper “Fast payments – Enhancing the speed and availability of retail payments” of the Committee on Payments and Market Infrastructures, Bank for International Settlements

Supervisory enforcement action. Consistent with Section 002, the Bangko Sentral may deploy enforcement actions to promote compliance with the requirements set forth in this Section and ensure timely implementation of preventive or corrective measures as needed. As part of its enforcement actions, the Bangko Sentral may issue directives or impose sanctions which limit the level of or suspend any business activity that adversely affects the safety and soundness of a BSFI.

(Circular Nos. 1065 dated 3 December 2019 and 1000 dated 23 April 2018)

805 PARTICIPATION IN AUTOMATED CLEARING HOUSES (ACHS)

BSFIs that have been licensed to offer funds transfer services shall make these services interoperable by participating in an ACH. Prior to its participation, a BSFI shall observe the following guidelines:

- a. Secure a Confirmation of Eligibility (COE) by submitting to the Bangko Sentral through the appropriate supervising department of the Bangko Sentral a letter of intent to participate in an identified ACH. This letter shall be accompanied by a certification (*Appendix 142*) signed by the president (or any officer of equivalent rank and function) and chief compliance officer (CCO).

If the BSFI is not yet a member of the Payment System Management Body (PSMB), it shall also indicate in its letter that it intends to become a member of this body;

- b. Submit the following minimum documentary requirements to the PSMB duly recognized by the Bangko Sentral.
 - (1) Valid COE. A COE shall be valid for a period of six (6) months from date of issuance;
 - (2) Corporate Secretary's Certificate (or equivalent document in the case of foreign bank branches) on the approval of the board of directors (or equivalent management committee in the case of foreign bank branches) of the participation of the BSFI in the ACH; and
 - (3) Copy of the agreement with the bank sponsoring the BSFI into settlement, if applicable; and
- c. Comply with any other requirements set by the PSMB or provided in the ACH.

(Circular No. 1033 dated 22 February 2019)

PART NINE

ANTI-MONEY LAUNDERING (AML) AND COMBATTING THE FINANCING OF TERRORISM REGULATIONS

901 BANGKO SENTRAL AUTHORITY TO CHECK COMPLIANCE WITH THE ANTI-MONEY LAUNDERING (AML) ACT, AS AMENDED

In the course of a periodic or special examination, the Bangko Sentral may inquire into or examine bank accounts or investments, including customer identification, account opening, and transaction documents, for the purpose of checking compliance by covered persons under its supervision or regulation with the requirements of these rules, the AMLA, as amended, and the Terrorism Financing Prevention and Suppression Act (TFPSA), their respective Revised Implementing Rules and Regulations (RIRR), other Anti-Money Laundering Council (AMLC) and Bangko Sentral issuances.

The Bangko Sentral may likewise conduct annual testing solely limited to the determination of the existence and true identity of the owners of numbered and similar accounts.

In the course of the periodic and special examination for purposes of complying with the provisions of the AMLA, as amended, its RIRR, and this Part, the covered person, their officers and employees, and the Bangko Sentral, shall not be deemed to have violated the provisions of R. A. No. 1405, as amended, R.A. No. 6426, as amended, R.A. No. 8791 and other similar laws, and Sec. 922 (*Confidentiality provision*) when disclosing information to Bangko Sentral relative to covered and suspicious transaction reports filed with the AMLC.

(Circular Nos. 1022 dated 26 November 2018 and 950 dated 15 March 2017)

902 POLICY STATEMENT

The Bangko Sentral adopts the policies of the State to (a) protect and preserve the integrity of the Philippine financial system, including the confidentiality of bank accounts; (b) ensure that the Philippines, in general, and the covered persons, in particular, shall not be used, as money laundering sites and conduit for the proceeds of unlawful activities as herein defined; (c) protect life, liberty and property from acts of terrorism and to condemn terrorism and those who support and finance it and reinforce the fight against terrorism by criminalizing the financing of terrorism and related offenses; (d) recognize terrorism and terrorist financing as inimical and dangerous to national security and the welfare of the people; and make the financing of terrorism a crime against the Filipino people, against humanity and against the law of nations; and (e) adhere to international commitments to combat financing of terrorism, specifically the International Convention for the Suppression of the Financing of Terrorism, as well as other binding terrorism related resolutions of the United Nations Security Council, pursuant to Chapter 7 of the United Nations Charter.

(Circular Nos. 1022 dated 26 November 2018 and 950 dated 15 March 2017)

903 SCOPE OF REGULATIONS

These regulations shall apply to all covered persons supervised and regulated by the Bangko Sentral. The term “covered persons” shall refer to banks, non-banks, QBs, trust entities, NSSLAs, pawnshops, foreign exchange dealers, money changers, remittance and transfer companies, EMLs and other financial institutions which under special laws are subject to Bangko Sentral supervision and/or regulation, including their subsidiaries and affiliates, which are also covered persons, wherever they may be located. For this purpose, subsidiary and affiliate shall be defined as:

- a. A *subsidiary* means an entity more than fifty percent (50%) of the outstanding voting stock of which is owned by a covered person.
- b. An *affiliate* means an entity the voting stock of which, at least twenty percent (20%) to not more than fifty percent (50%), is owned by a covered person.

Pursuant to Section 20 of the General Banking Law of 2000, a bank authorized by Bangko Sentral to establish branches or other offices within or outside the Philippines shall be responsible for all business conducted in such branches and offices to the same extent and in the same manner as though such business had all been conducted in the head office. A bank and its branches and offices shall be treated as one (1) unit.

If the host country does not permit the proper implementation of this Part or any of the provisions of the AMLA, as amended, the TFPSA, or their IRR, and other AMLC and Bangko Sentral issuances by reason of local laws, regulations or a supervisory directive, the covered person shall (1) formally notify the Bangko Sentral of this situation and furnish a copy of the applicable laws and/or regulations or the supervising authority’s directive, as the case may be; and (2) apply appropriate additional measures or mitigating controls to manage the ML and TF risks.

In cases where the minimum AML/CFT requirements of the host country are less strict, covered persons, including their foreign branches and majority-owned subsidiaries abroad, shall apply AML/CFT measures consistent with the AMLA and the TFPSA and their respective RIRR, and other AMLC and Bangko Sentral issuances, to the extent that the laws and regulations of the host country permit.

(Circular Nos. 1022 dated 26 November 2018 and 950 dated 15 March 2017)

Except as otherwise defined herein, all terms used shall have the same meaning as those terms that are defined in the AMLA, as amended, and its RIRR.

- a. *Money laundering* is committed by any person who, knowing that any monetary instrument or property represents, involves, or relates to the proceeds of any unlawful activity:

- (1) transacts said monetary instrument or property;
- (2) converts, transfers, disposes of, moves, acquires, possesses or uses said monetary instrument or property;
- (3) conceals or disguises the true nature, source, location, disposition, movement or ownership of or rights with respect to said monetary instrument or property;
- (4) attempts or conspires to commit money laundering offenses referred to in Items "(1)", "(2)" or "(3)" above;
- (5) aids, abets, assists in or counsels the commission of the money laundering offenses referred to in Items "(1)", "(2)" or "(3)" above; and
- (6) performs or fails to perform any act as a result of which he facilitates the offense of money laundering referred to in Items "(1)", "(2)" or "(3)" above.

Money laundering is also committed by any covered person who, knowing that a covered or suspicious transaction is required to be reported to the AMLC under any of the provisions of the AMLA, as amended, its RIRR, or this Part, fails to do so.

- b. *Financing of terrorism* is a crime committed by a person who, directly or indirectly, willfully and without lawful excuse, possesses, provides, collects or uses property or funds or makes available property, funds or financial service or other related services, by any means, with the unlawful and willful intention that they should be used or with the knowledge that they are to be used, in full or in part: (1) to carry out or facilitate the commission of any terrorist act; (2) by a terrorist organization, association or group; or (3) by an individual terrorist.

- c. *Covered transaction* (CT) refers to a transaction in cash or other equivalent monetary instrument exceeding P500,000.

- d. *Suspicious transaction* (ST) refers to a transaction with a covered person, regardless of the amount involved, where any of the following circumstances exists:

- (1) There is no underlying legal or trade obligation, purpose or economic justification;
- (2) The client is not properly identified;
- (3) The amount involved is not commensurate with the business or financial capacity of the client;
- (4) Taking into account all known circumstances, it may be perceived that the client's transaction is structured in order to avoid being the subject of reporting requirements under the AMLA, as amended;
- (5) Any circumstance relating to the transaction which is observed to deviate from the profile of the client and/or the client's past transactions with the covered person;
- (6) The transaction is in any way related to an unlawful activity or any money laundering activity or offense, that is about to be committed, is being or has been committed; or
- (7) Any transaction that is similar, analogous or identical to any of the foregoing.

Any unsuccessful attempt to transact with a covered person, the denial of which is based on any of the foregoing circumstances, shall likewise be considered as ST.

- e. *Monetary instrument* shall include, but is not limited to the following:

- (1) Coins or currency of legal tender of the Philippines, or of any other country;
- (2) Credit instruments, including bank deposits, financial interest, royalties, commissions and other intangible property;
- (3) Drafts, checks, and notes;
- (4) Stocks or shares, participation or interest in a corporation or in a commercial enterprise or profit-making venture and evidenced by a certificate, contract, instrument, whether written or electronic in character including those enumerated in Section 3 of the Securities Regulation Code;
- (5) A participation or interest in any non-stock, non-profit corporation;
- (6) Securities or negotiable instruments, bonds, commercial papers, deposit certificates, trust certificates, custodial receipts or deposit substitute instruments, trading orders, transaction tickets and confirmations of sale or investments and money market instruments;
- (7) Contracts or policies of insurance, life or non-life, contracts of suretyship, pre-need plans and member certificates issued by mutual benefit association; and

- (8) Other similar instruments where title thereto passes to another by endorsement, assignment or delivery.
- f. *Unlawful activity* refers to any act or omission or series or combination thereof involving or having direct relation to the following:
- (1) Kidnapping for ransom under Article 267 of Act No. 3815, otherwise known as the Revised Penal Code (RPC), as amended;
 - (2) Sections 4, 5, 6, 8, 9, 10, 11, 12, 13, 14, 15 and 16 of R.A. No. 9165, otherwise known as the Comprehensive Dangerous Drugs Act of 2002;
 - (3) Section 3 paragraphs "B", "C", "E", "G", "H" and "I" of R.A. No. 3019, as amended, otherwise known as the Anti-Graft and Corrupt Practices Act;
 - (4) Plunder under R.A. No. 7080, as amended;
 - (5) Robbery and extortion under Articles 294, 295, 296, 299, 300, 301 and 302 of the RPC, as amended;
 - (6) Jueteng and masiao punished as illegal gambling under P.D. No. 1602;
 - (7) Piracy on the high seas under the RPC, as amended, and P.D. No. 532;
 - (8) Qualified theft under Article 310 of the RPC, as amended;
 - (9) Swindling under Article 315 and "Other Forms of Swindling" under Article 316 of the RPC, as amended;
 - (10) Smuggling under R.A. Nos. 455 and 1937, as amended, otherwise known as the Tariff and Customs Code of the Philippines;
 - (11) Violations under R.A. No. 8792, otherwise known as the Electronic Commerce Act of 2000;
 - (12) Hijacking and other violations under R.A. No. 6235, otherwise known as the "Anti-Hijacking Law"; "Destructive Arson"; and "Murder", as defined under the RPC, as amended;
 - (13) Terrorism and conspiracy to commit terrorism as defined and penalized under Sections 3 and 4 of R.A. 9372;
 - (14) Financing of terrorism under Section 4 and offenses punishable under Sections 5, 6, 7 and 8 of R.A. No. 10168, otherwise known as the Terrorism Financing Prevention and Suppression Act of 2012;
 - (15) Bribery under Articles 210, 211 and 211-a of the RPC, as amended, and Corruption of Public Officers under Article 212 of the RPC, as amended;
 - (16) Frauds and illegal exactions and transactions under Articles 213, 214, 215 and 216 of the RPC, as amended;
 - (17) Malversation of public funds and property under Articles 217 and 222 of the RPC, as amended;
 - (18) Forgeries and counterfeiting under Articles 163, 166, 167, 168, 169 and 176 of the RPC, as amended;
 - (19) Violations of Sections 4 to 6 of R.A. No. 9208, otherwise known as the Anti-trafficking in Persons Act of 2003, as amended;
 - (20) Violations of Sections 78 to 79 of Chapter IV, of Presidential Decree No. 705, otherwise known as the Revised Forestry Code of the Philippines, as amended;
 - (21) Violations of Sections 86 to 106 of Chapter IV, of R.A. No. 8550, otherwise known as the Philippine Fisheries Code of 1998;
 - (22) Violations of Sections 101 to 107, and 110 of R.A. No. 7942, otherwise known as the Philippine Mining Act of 1995;
 - (23) Violations of Section 27(C), (E), (F), (G) and (I), of R.A. No. 9147, otherwise known as the Wildlife Resources Conservation and Protection Act;
 - (24) Violation of Section 7(B) of R.A. No. 9072, otherwise known as the National Caves and Cave Resources Management Protection Act;
 - (25) Violation of R.A. No. 6539, otherwise known as the Anti-Carnapping Act of 2002, as amended;
 - (26) Violations of Sections 1, 3 and 5 of P.D. No. 1866, as amended, otherwise known as the Decree Codifying the Laws on Illegal/Unlawful Possession, Manufacture, Dealing in, Acquisition or Disposition of Firearms, Ammunition or Explosives;
 - (27) Violation of P.D. No. 1612, otherwise known as the Anti-Fencing Law;
 - (28) Violation of Section 6 of R.A. No. 8042, otherwise known as the Migrant Workers and Overseas Filipinos Act of 1995, as amended by R.A. No. 10022;
 - (29) Violation of R.A. No. 8293, otherwise known as the Intellectual Property Code of the Philippines, as amended;
 - (30) Violation of Section 4 of R.A. No. 9995, otherwise known as the Anti-photo and Video Voyeurism Act of 2009;
 - (31) Violation of Section 4 R.A. No. 9775, otherwise known as the Anti-child Pornography Act of 2009;
 - (32) Violations of Sections 5, 7, 8, 9, 10 (C), (D) and (E), 11, 12 and 14 of R.A. No. 7610, otherwise known as the Special Protection of Children against Abuse, Exploitation and Discrimination;
 - (33) Fraudulent practices and other violations under R.A. No. 8799, otherwise known as the Securities Regulation Code of 2000; and
 - (34) Felonies or offenses of a nature similar to the aforementioned unlawful activities that are punishable under the penal laws of other countries.

In determining whether or not a felony or offense punishable under the penal laws of other countries is "of similar nature", as to constitute an unlawful activity under the AMLA, the nomenclature of said felony or offense need not be identical to any of the unlawful activities listed above.

- g. *Transaction* refers to any act establishing any right or obligation or giving rise to any contractual or legal relationship between the parties thereto. It also includes any movement of funds by any means with a covered person.
- h. *Proceed* refers to an amount derived or realized from any unlawful activity.

- i. *Monetary instrument or property related to an unlawful activity* refers to:
- (1) All proceeds of an unlawful activity;
 - (2) All monetary, financial or economic means, devices, accounts, documents, papers, items or things used in or having any relation to any unlawful activity;
 - (3) All moneys, expenditures, payments, disbursements, costs, outlays, charges, accounts, refunds and other similar items for the financing, operations, and maintenance of any unlawful activity; and
 - (4) For purposes of freeze order and bank inquiry: related and materially-linked accounts.
 - (a) *“Related accounts”* refer to those accounts, the funds and sources of which originated from and/or are materially-linked to the monetary instruments or properties subject of the freeze order or an order of inquiry.
 - (b) *“Materially-linked accounts”* shall include the following:
 - (i) All accounts or monetary instruments under the name of the person whose accounts, monetary instruments, or properties are the subject of the freeze order or an order of inquiry;
 - (ii) All accounts or monetary instruments held, owned, or controlled by the owner or holder of the accounts, monetary instruments, or properties subject of the freeze order or order of inquiry, whether such accounts are held, owned or controlled singly or jointly with another person;
 - (iii) All “In Trust For” accounts where either the trustee or the trustor pertains to a person whose accounts, monetary instruments, or properties are the subject of the freeze order or order of inquiry;
 - (iv) All accounts held for the benefit or in the interest of the person whose accounts, monetary instruments, or properties are the subject of the freeze order or order of inquiry; and
 - (v) All other accounts, shares, units, or monetary instruments that are similar, analogous, or identical to any of the foregoing.
- j. *Client/Customer* refers to any person or entity who keeps an account, or otherwise transacts business with a covered person. It includes the following: (1) any person or entity on whose behalf an account is maintained or a transaction is conducted, as well as the beneficiary of said transactions; (2) beneficiary of a trust, an investment fund or a pension fund; (3) a company or person whose assets are managed by an asset manager; (4) a grantor of a trust; and (5) any insurance policy holder, whether actual or prospective.
- k. *Shell company* refers to a legal entity which has no business substance in its own right but through which financial transactions may be conducted.
- l. *Shell bank* refers to a shell company incorporated as a bank or made to appear to be incorporated as a bank but has no physical presence and no affiliation with a regulated financial group. It can also be a bank that (a) does not conduct business at a fixed address in a jurisdiction in which the shell bank is authorized to engage; (b) does not employ one (1) or more individuals on a full time basis at this fixed address; (c) does not maintain operating records at this address, and (d) is not subject to inspection by the authority that licensed it to conduct banking activities.
- m. *Beneficial Owner* refers to any natural person(s) who ultimately owns or controls a customer and/or on whose behalf a transaction is being conducted; or those who have ultimate effective control over a juridical person or legal arrangement.

Ultimate effective control refers to situation in which ownership/control is exercised through actual or a chain of ownership or by means other than direct control.

Beneficial owner shall be:

- (1) The natural persons, if any, who ultimately have controlling ownership interest in a juridical person.

A shareholding or ownership interest of at least twenty percent (20%) in the customer held by a natural person shall be an indication of direct ownership. A shareholding or ownership interest of at least twenty percent (20%) in the customer held by a corporate entity, which is under the control of a natural person(s), or by multiple corporate entities, which are under the control of the same natural person(s), shall be an indication of indirect ownership.
- (2) The natural persons, if any, exercising control over the juridical person through other means, to the extent that there is a doubt under Item “(1)” above, as to whether the persons with the controlling ownership interest are the beneficial owners or where no natural person exerts control through ownership interests.

Control through other means, includes control exerted by means of trusts, agreements, arrangements, understandings, or practices, or when an individual can exercise control through making decisions about financial and operating policies. In addition, control also includes: (a) power to govern the financial and operating policies of the enterprise under statute or an agreement; (b) power to appoint or remove the majority of the members of the board of directors or equivalent governing body; (c) power to cast the majority votes at a meeting of the board of directors or equivalent governing body; or (d) any other arrangements similar to any of the above.

- (3) The natural person(s) who hold the position of senior managing official(s) or equivalent ranks, where no person under Items “(1)” and “(2)” is identified, or if there is any doubt that the person(s) identified are the beneficial owners(s).

- n. *Politically exposed person or PEP* refers to an individual who is or has been entrusted with prominent public position in (1) the Philippines with substantial authority over policy, operations or the use or allocation of government-owned resources; (2) a foreign state, or (3) an international organization.

The term *PEP* shall include immediate family members, and close relationships and associates that are reputedly known to have:

- (1) Joint beneficial ownership of a legal entity or legal arrangement with the main/principal PEP; or
- (2) Sole beneficial ownership of a legal entity or legal arrangement that is known to exist for the benefit of the main/principal PEP.

Immediate family members of PEPs refer to individuals who are related to a PEP within the second degree of affinity or consanguinity.

Close associates of PEPs refer to persons who are widely and publicly known to maintain a particularly close relationship with the PEP, and include persons who are in a position to conduct substantial domestic and international financial transactions on behalf of the PEP.

- o. *Correspondent banking* refers to the provision of banking services by one (1) bank (the “correspondent bank”) to another bank (the “respondent bank”).
- p. *Payable-through account* refers to a correspondent account that is used directly by third parties to transact business on their own behalf.
- q. *Fund/wire transfer* refers to any transaction carried out on behalf of an originator (both natural and juridical) through an FI (originating institution) by electronic means with a view to making an amount of money available to a beneficiary at another FI (beneficiary institution). The originator person and the beneficiary person may be the same person.
- r. *Cross border transfer* refers to any wire transfer where the originating and beneficiary institutions are located in different countries. It shall also refer to any chain of wire transfer that has at least one (1) cross border element.
- s. *Domestic transfer* refers to any wire transfer where the originating and beneficiary institutions are located in the same country. It shall refer to any chain of wire transfers that takes place entirely within the borders of a single country, even though the system used to effect the fund/wire transfer may be located in another country.
- t. *Originating financial institution* refers to the financial institution which initiates the wire transfer and transfers the funds upon receiving the request for a wire transfer on behalf of the originator.
- u. *Beneficiary financial institution* refers to the financial institution which receives the wire transfer from the originating financial institution, directly or through an intermediary financial institution, and makes the funds available to the beneficiary.
- v. *Intermediary financial institution* refers to a financial institution in a serial or cover payment chain that receives and transmits a wire transfer on behalf of the originating financial institution and the beneficiary financial institution, or another intermediary financial institution.
- w. *Official document* refers to any of the following identification documents:
 - (1) For Filipino citizens: Those issued by any of the following official authorities:
 - (a) Government of the Republic of the Philippines, including its political subdivisions, agencies, and instrumentalities;
 - (b) Government-Owned or -Controlled Corporations (GOCCs);
 - (c) Covered persons registered with and supervised or regulated by the Bangko Sentral, SEC or IC; or
 - (d) Philippine Statistics Authority (PSA) under the Philippine Identification System (PhilSys)

- (2) For foreign nationals: Passport or Alien Certificate of Registration;
 - (3) For Filipino students: School ID signed by the school principal or head of the educational institution;
 - (4) For low risk customers: Any document or information reduced in writing which the covered person deems sufficient to establish the client's identity; and
 - (5) Other identification document that can be verified using reliable, independent source documents, data or information.
- x. *Juridical person* refers to an entity other than a natural person as defined under Chapter 3 of the Civil Code of the Philippines, that can establish a permanent customer relationship with any financial institution or otherwise own property.
 - y. *Money or Value Transfer Service (MVTs) or Money Service Business (MSB)* refers to financial services that involve the acceptance of cash, checks, other monetary instruments or other stores of value, and the payment of a corresponding sum in cash or other form to a beneficiary by means of a communication, message, transfer, or through a clearing network to which the service provider belongs.
 - z. *Originator* refers to the account holder who allows the wire transfer from an account, or where there is no account, the person that places an order with the originating financial institution to perform a wire transfer.
 - aa. *Philippine Identification Card (PhilID)* refers to the non-transferrable identification card issued by the PSA to all citizens and resident aliens registered under the PhilSys, which serves as the official government-issued identification document of cardholders in dealing with all government agencies, local government units, government and controlled corporations, government financial institutions, and all private sector entities.
 - bb. *Cover payment* refers to a wire transfer that combines a payment message sent directly by the originating financial institution to the beneficiary financial institution with the routing of the funding instruction (the cover), from the originating financial institution to the beneficiary financial institution through one or more intermediary financial institutions.
 - cc. *Serial Payment* refers to a direct sequential chain of payment where the wire transfer and accompanying payment message travel together from the originating financial institution to the beneficiary financial institution, directly or through one (1) or more intermediary financial institutions.
 - dd. *Settlor/Grantor/Trustor* refers to a person who transfers ownership of his assets to trustees by means of a trust deed or similar arrangement.
 - ee. *Source of Fund* refers to the origin of the funds or other monetary instrument that is the subject of the transaction or business or professional relationship between a covered person and its customer, such as cash on hand, safety deposit box with a covered person, and a particular bank or investment account.
 - ff. *Source of Wealth* refers to the resource from which the customer's wealth including all monetary instruments and properties, came, comes, or will come from, such as employment, business, investments, foreign remittance, inheritance and donation
 - gg. *Straight-through Processing* refers to payment transactions that are conducted electronically without the need for manual intervention.

(Circular Nos. 1022 dated 26 November 2018 and 950 dated 15 March 2017)

905 BASIC PRINCIPLES AND POLICIES TO COMBAT MONEY LAUNDERING

In line with the declaration of policy, covered persons shall apply the following principles:

- a. Conduct business in conformity with high ethical standards in order to protect its safety and soundness as well as the integrity of the national banking and financial system;
- b. Know sufficiently your customer at all times and ensure that the financially or socially disadvantaged are not denied access to financial services while at the same time prevent suspicious individuals or entities from opening or maintaining an account or transacting with the covered person by himself or otherwise;
- c. Adopt and effectively implement a sound AML and terrorist financing prevention risk management system that identifies, assesses, monitors and controls risks associated with money laundering and terrorist financing;
- d. Comply fully with this Part and existing laws aimed at combating money laundering and terrorist financing by making sure that officers and employees are aware of their respective responsibilities and carry them out in accordance with superior and principled culture of compliance; and
- e. Fully cooperate with AMLC for the effective implementation and enforcement of the AMLA, as amended, and its RIRR.

(Circular No. 950 dated 15 March 2017)

A. RISK MANAGEMENT

911 RISK MANAGEMENT

All covered persons shall develop sound risk management policies and practices to ensure that risks associated with ML/TF such as reputational, operational, and compliance risks are identified, assessed, monitored, mitigated and controlled, as well as to ensure effective implementation of this Part, to the end that covered persons shall not be used as a vehicle to legitimize proceeds of unlawful activity or to facilitate or finance terrorism.

The four (4) areas of sound risk management practices are adequate and active board and senior management oversight, acceptable policies and procedures embodied in a money laundering and terrorist financing prevention compliance program, appropriate monitoring and Management Information System and comprehensive internal controls and audit.

Board and senior management oversight. Notwithstanding the provisions specifying the duties and responsibilities of the compliance office and internal audit, it shall be the ultimate responsibility of the board of directors to fully comply with these rules, the AMLA, as amended, the TFPSA and their RIRR. It shall ensure that ML/TF risks are effectively managed and that this forms part of the covered person's enterprise risk management system.

Senior management shall oversee the day-to-day management of the covered person, ensure effective implementation of AML/CFT policies approved by the board and alignment of activities with the strategic objectives, risk profile and corporate values set by the board. Senior management shall establish a management structure that promotes accountability and transparency and upholds checks and balances.

- a. **Compliance office.** Management of the implementation of the covered person's Money Laundering and Terrorist Financing Prevention Program (MTPP) shall be a primary task of the compliance office. To ensure the independence of the office, it shall have a direct reporting line to the board of directors or any board-level or approved committee on all matters related to AML and CTF compliance and their risk management. It shall be principally responsible for the following functions among other functions that may be delegated by senior management and the board, to wit:
 - (1) Ensure compliance by all responsible officers and employees with this Part, the AMLA, as amended, the RIRR and its own MTPP. It shall conduct periodic compliance checking which covers, among others, evaluation of existing processes, policies and procedures including on-going monitoring of performance by staff and officers involved in ML and TF prevention, reporting channels, effectiveness of the electronic money laundering transaction monitoring system and record retention system through sample testing and review of audit or examination reports. It shall also report compliance findings to the board or any board-level committee;
 - (2) Ensure that infractions, discovered either by internally initiated audits, or by special or regular examination conducted by the Bangko Sentral, or other applicable regulators, are immediately corrected;
 - (3) Inform all responsible officers and employees of all resolutions, circulars and other issuances by the Bangko Sentral and the AMLC in relation to matters aimed at preventing ML and TF;
 - (4) Alert senior management, the board of directors, or the board-level or approved committee if it believes that the covered person is failing to appropriately address AML/CFT issues; and
 - (5) Organize the timing and content of AML training of officers and employees including regular refresher trainings as stated in Sec. 932.
- b. **Group-wide Money Laundering and Terrorist Financing Prevention Program (MTPP).** Financial groups shall implement group-wide MTPP, which shall be applied to their branches and majority-owned subsidiaries as provided under Sec. 903 (*Scope of regulations*). The group-wide MTPP shall include the measures set out under this Section (*Money laundering and terrorist financing prevention program (MTPP)*).

The group-wide compliance officer or in his absence, the compliance officer of the parent entity, shall oversee the AML/CFT compliance of the entire group with reasonable authority over the compliance officers of said branches, subsidiaries or offices.

Money Laundering and Terrorist Financing Prevention Program (MTPP). All covered persons shall adopt a comprehensive and risk-based MTPP geared toward the promotion of high ethical and professional standards and prevention of the covered person from being used, intentionally or unintentionally, for ML/TF activities. The MTPP shall include policies, controls and procedures to enable the covered persons to manage and mitigate the risks that have been identified in their risk assessment, including taking enhanced measures for those classified as posing higher risks. The MTPP shall also be consistent with the AMLA, as amended, the TFPSA, their respective RIRR and the provisions set out in this Part. It shall be in writing, approved by the board of directors or by the country/regional head or its equivalent for local branches of foreign banks, and well disseminated to all officers and staff who are obligated by law and by their program to implement

the same. Where a covered person has branches, subsidiaries, affiliates or offices located within and/or outside the Philippines, there shall be a consolidated ML/TF risk management system to ensure the coordination and implementation of policies and procedures on a group-wide basis, taking into account local business considerations, the requirements of the host jurisdiction and the level of country risk.

The MTPP shall also be readily available in user-friendly form, whether in hard or soft copy. The covered person must put up a procedure to ensure an audit trail evidencing dissemination process for new and amended policies and procedures. The program shall embody the following at a minimum:

- a. Detailed procedures of the covered person's compliance and implementation of the following major requirements of the AMLA, as amended, its RIRR, and this Part, to wit:
 - (1) Customer identification process including acceptance policies and on-going monitoring processes;
 - (2) Record keeping and retention;
 - (3) Covered transaction reporting; and
 - (4) ST reporting including the adoption of a system, electronic or manual, of flagging, monitoring and reporting of transactions that qualify as suspicious transactions, regardless of amount or that will raise a "*red flag*" for purposes of conducting further verification or investigation, or transactions involving amounts below the threshold to facilitate the process of aggregating them for purposes of future reporting of such transactions to the AMLC when their aggregated amounts breach the threshold. The ST reporting shall include a reporting chain under which a ST will be processed and the designation of a board-level or approved committee who will ultimately decide whether or not the covered person should file a report to the AMLC. If the resources of the covered person do not permit the designation of a committee, it may designate the compliance officer to perform this function instead: *Provided*, That the board of directors is informed of his decision.
- b. An effective and continuous AML/CFT training program for all directors, and responsible officers and employees, to enable them to fully comply with their obligations and responsibilities under this Part, the AMLA, as amended, its RIRR and their internal policies and procedures as embodied in the MTPP. The training program shall also include refresher trainings to remind these individuals of their obligations and responsibilities as well as update them of any changes in AML laws, rules and internal policies and procedures.
- c. An adequate screening and recruitment process to ensure that only qualified personnel who have no criminal record/s are employed to assume sensitive banking functions;
- d. An internal audit system in accordance with this Section;
- e. An independent audit program with written scope of audit that will ensure the completeness and accuracy of the information and identification documents obtained from clients, the covered and suspicious transactions reports submitted to the AMLC, and the records retained in compliance with this Part as well as adequacy and effectiveness of the training program on the prevention of money laundering and terrorism financing;
- f. A mechanism that ensures all deficiencies noted during the audit and/or Bangko Sentral regular or special examination or other applicable regulator's examination are immediately corrected and acted upon;
- g. Cooperation with the AMLC and Bangko Sentral;
- h. Designation of an AML compliance officer, who shall at least be at senior officer level, as the lead implementor of the program within an adequately staffed compliance office. The AML compliance officer may also be the liaison between the covered person, the Bangko Sentral and the AMLC in matters relating to the covered person's AML/CFT compliance. Where resources of the covered person do not permit the hiring of an AML compliance officer, the compliance officer shall also assume the responsibility of the former; and
- i. Policies and procedures for sharing information required for the purposes of customer due diligence (CDD) and risk management;
- j. A provision that the group-level compliance, audit, and/or AML/CFT functions should be provided with customer, account, and transaction information from branches and subsidiaries when necessary for AML/CFT purposes. This should include information on analysis of transactions or activities which appear unusual, if such analysis was done. Similarly, branches and subsidiaries should receive such information from these group-level functions when relevant and appropriate to risk management. The MTPP may require a potential and/or existing customer to sign a waiver on the disclosure of information within the group;
- k. Adequate safeguards on the confidentiality and use of information exchanged, including safeguards to prevent tipping-off;

- l. A mechanism to comply with freeze, bank inquiry and asset preservation orders, and all directives of the AMLC; and
- m. A mechanism to comply with the prohibitions from conducting transactions with designated persons and entities, as set out in the relevant United Nations Security Council Resolutions (UNSCRs) relating to the prevention and suppression of terrorism and terrorist financing and financing of proliferation of weapons of mass destruction.

Submission of the revised and updated MTPP. Approval by the board of directors or country head. Within six (6) months from 05 April 2017, all covered persons shall prepare and have available for inspection an updated MTPP, approved by the board of directors, embodying the principles and provisions stated in this Part.

Henceforth, each MTPP shall be regularly updated at least once every two (2) years to incorporate changes in AML policies and procedures, latest trends in ML and TF typologies, and latest pertinent Bangko Sentral issuances. Any revision or update in the MTPP shall likewise be approved by board of directors or the country/regional head or its equivalent for local branches of foreign banks.

Monitoring and reporting tools. All covered persons shall adopt an AML/CFT monitoring system that is appropriate for their risk profile and business complexity and in accordance with this Part. The system should be capable of generating timely, accurate and complete reports to lessen the likelihood of any reputational and compliance risks, and to regularly apprise the board of directors and senior management on AML/CFT compliance.

- a. *Electronic monitoring and reporting systems for AML/CFT.* UBs and KBs and such covered persons that are considered complex pursuant to Sec. 131 (*Definition of terms*) shall adopt an electronic AML system capable of monitoring risks associated with ML/TF as well as generating timely reports for the guidance and information of its board of directors and senior management, in addition to the functionalities mentioned in Sec. 922 (*Electronic monitoring systems for AML/CFT*).
- b. *Manual monitoring.* Covered persons not required to adopt an AML/CFT electronic system must ensure that they have the means of complying with this Section.

Internal audit. The internal audit function associated with money laundering and terrorist financing should be conducted by qualified personnel who are independent of the office being audited. It must have the support of the board of directors and senior management and have a direct reporting line to the board or a board-level audit committee.

The internal audit shall, in addition to those specified by this Part, be responsible for the periodic and independent evaluation of the risk management, degree of adherence to internal control mechanisms related to the customer identification process, such as the determination of the existence of customers and the completeness of the minimum information and/or documents establishing the true and full identity of, and the extent and standard of due diligence applied to, customers, CT and ST reporting and record keeping and retention, as well as the adequacy and effectiveness of other existing internal controls associated with money laundering and terrorist financing.

For covered persons with electronic AML/CFT transaction monitoring system, in addition to the above, the internal audit shall include determination of the efficiency of the system's functionalities as required by this Section and Sec. 922 (*Electronic monitoring systems for AML/CFT*).

The results of the internal audit shall be timely communicated to the board of directors and shall be open for scrutiny by Bangko Sentral examiners in the course of the regular or special examination without prejudice to the conduct of its own evaluation whenever necessary. Results of the audit shall likewise be promptly communicated to the Compliance Office for appropriate monitoring of corrective actions taken by the different business units concerned. The Compliance Office shall regularly submit reports to the board to inform them of management's action to address deficiencies noted in the audit.

Risk assessment. Consistent with risk-based approach, covered persons are required to identify, understand and assess their ML/TF risks, arising from customers, countries or geographic areas of operations and customers, products, services, transactions or delivery channels. The assessment methodology shall be appropriate to the nature of operations and complexity of the business of the covered person. The institutional risk assessment shall (a) consider all relevant risk factors, including the results of national and sectoral risk assessments; (b) adequately document results and findings; and (c) be updated periodically or as necessary. The institutional risk assessment shall be conducted, at least once every two (2) years, or as often as the Board or senior management may direct, depending on the level of risks identified in the previous risk assessment, or other relevant AML/CFT developments that may have an impact on the covered person's operations.

Based on the risk assessment, the covered person shall take appropriate measures to manage and mitigate ML/TF risks and take enhanced measures on identified high risks areas, which should be incorporated in its MTPP. The risk assessment shall be made available to the Bangko Sentral during examination or in other circumstances deemed necessary as part of continuous supervision.

New products and business practices risk assessment. Covered persons are also required to identify and assess the ML/TF risks that may arise in relation to the development of new products and new business practices, including new delivery mechanisms, and the use of new or developing technologies for both new and pre-existing products. Such risk

assessment should be an integral part of product or service development process and should take place prior to the launch of the new products, business practices or the use of new or developing technologies. Covered persons should take appropriate measures to manage and mitigate the identified risks.

(Circular Nos. 1022 dated 26 November 2018 and 950 dated 15 March 2017)

B. PREVENTIVE MEASURES

921 CUSTOMER DUE DILIGENCE

- a. In conducting customer due diligence, a risk-based approach shall be undertaken depending on the type of customer, business relationship or nature of the product, transaction or activity. In this regard, a covered person shall maintain a system that will ensure the conduct of customer due diligence which shall include:

- (1) Identifying the customer and verifying the true identity of the customer based on official documents or other reliable, independent source documents, data or information. In case of corporate and juridical entities, verifying their legal existence and organizational structure, as well as the authority and identification of all persons purporting to act on their behalf;
- (2) Identifying the beneficial owner and taking reasonable measures to verify the identity of the beneficial owner based on official documents, or using relevant information or data obtained from reliable sources, such that the covered person is satisfied that it knows who is the beneficial owner. The covered person should have a system to understand the nature of the customer's business and its ownership and control structure, in case of juridical persons or legal arrangements;

Where the customer, or the owner of the controlling interest is a company listed in a stock exchange and subject to disclosure requirements (either by stock exchange rules or through law or enforceable means) to ensure adequate transparency of beneficial ownership, or is a majority-owned subsidiary of such a company, the covered person is not required to verify the identity of any shareholder or beneficial owner of such companies. The relevant identification data may be obtained from a public register, from the customer or from other reliable sources.

The covered person shall keep records of the actions taken in order to identify the beneficial owner.

- (3) Understanding and, as appropriate, obtaining information on the purpose and intended nature of the business relationship; and
- (4) Conducting ongoing due diligence on the business relationship and scrutiny of transactions undertaken throughout the course of the relationship to ensure that the transactions being conducted are consistent with the covered person's knowledge of the customer, their business and risk profile, including, where necessary, the source of funds.

Where a covered person is unable to comply with the relevant CDD measures, it shall (a) refuse to open an account, commence business relations or terminate the business relationship or refuse to perform the transaction; and (b) consider filing a suspicious transaction report (STR) in relation to the customer.

In cases where a covered person forms a suspicion of ML/TF and associated unlawful activities, and reasonably believes that performing the CDD process will tip-off the customer, the covered person need not pursue the CDD process, but should file an STR, closely monitor the account, and review the business relationship.

- b. A covered person shall be required to undertake customer due diligence when:
- (1) It establishes business relations with any customer;
 - (2) It undertakes any occasional but relevant business transaction for any customer who has not otherwise established relations with the covered person;
 - (3) There is a suspicion of ML or TF; or
 - (4) There is doubt about the veracity or adequacy of previously obtained customer identification data.
- c. *"Business relations"* means the opening or maintenance of an account or the provision of financial advice by the covered person to a customer.
- d. *"Relevant business transaction"* shall refer to:
- (1) A transaction with a value exceeding P100,000, except money changing or remittance transactions;
 - (2) Two (2) or more transactions believed to be linked and with an aggregate value exceeding P100,000; or
 - (3) In relation to remittance and money changing transactions, any transaction or two (2) or more transactions believed to be linked, with an aggregate value exceeding P5,000.00.

For this purpose, covered persons should have appropriate system to identify and determine occasional customer or transaction.

- e. *For existing customers.* Covered persons shall apply CDD requirements to existing customers on the basis of materiality and risk, and conduct due diligence on existing relationships at appropriate times, taking into account CDD measures previously undertaken as well as the adequacy of information and documents obtained.

Customer acceptance and identification policy. Every covered person shall develop clear, written and graduated customer acceptance and identification policies and procedures, which shall include sanctions screening. Covered persons shall ensure that the financially or socially disadvantaged are not denied access to financial services while at the same time prevent suspicious individuals or entities from opening an account or establishing a relationship. A covered person shall formulate a risk-based and tiered customer acceptance, identification and retention policy that involves reduced CDD for potentially low risk clients and enhanced CDD for higher risk accounts.

- a. *Criteria for type of customers: low, normal and high risk; Standards for applying reduced, average and enhanced due diligence.* Covered persons shall specify the criteria and description of the types of customers that are likely to pose low, normal or high ML/TF risk to their operations, as well as the standards in applying reduced, average and enhanced due diligence, including a set of conditions for the denial of account opening or services.

Enhanced due diligence shall be applied to customers that are assessed by the covered person or under this Part as high risk for ML/TF. For customers assessed to be of low risk such as small account balance and transactions, a covered person may apply reduced due diligence. Some entities may likewise be considered as low risk clients, e.g., banking institutions, trust entities and QBs authorized by the Bangko Sentral to operate as such and publicly listed companies subject to regulatory disclosure requirements.

In designing a customer acceptance and risk profiling policy, the following criteria relating to the product or service, the customer, and geographical location, at a minimum, shall be taken into account:

- (1) The nature of the service or product to be availed of by the customers and the purpose of the account or transaction;
- (2) Source of funds, source of wealth/nature of business, employment;
- (3) Public or high profile position of the customer or its directors/trustees, stockholders, officers and/or authorized signatory;
- (4) Country of origin and residence of operations or the fact that a customer came from a high risk jurisdiction;
- (5) The existence of ST indicators;
- (6) Watchlist of individuals and entities engaged in illegal activities or terrorist-related activities as circularized by the Bangko Sentral, AMLC, and other international entities or organizations, such as the Office of Foreign Assets Control (OFAC) of the U.S. Department of the Treasury and United Nations Security Council; and
- (7) Such other factors, e.g., the amount of funds to be deposited by a customer or the size of transactions, and regularity or duration of the transaction, as the covered person may deem reasonable or necessary to consider in assessing the risk of a customer to ML/TF.

In assessing the risk profile of customers which are juridical entities, the covered person should also consider the financial profile and other relevant information of the active authorized signatories.

The covered person shall document the risk profiling results as well as how a specific customer was profiled and what standard of CDD (reduced average or enhanced) was applied.

- b. *Enhanced due diligence (EDD).* Whenever EDD is applied as required by this Part, or by the covered person's customer acceptance policy, or where the risk of ML/TF are higher, the covered person shall do all of the following, in addition to profiling of customers and monitoring of their transactions:
 - (1) Gather additional customer information and/or identification documents, other than the minimum information and/or documents required for the conduct of average due diligence as enumerated in this Section and Sec. 924.
 - (a) In case of individual customers:
 - (i) supporting information on the intended nature of the business relationship/source of funds/ source of wealth (such as financial profile, ITR, Loan Application, Deed of Donation, Deed of Sale, etc.);
 - (ii) reasons for intended or performed transactions;
 - (iii) list of companies where he is a stockholder, director, officer, or authorized signatory;

- (iv) other relevant information available through public databases or internet; and
 - (v) a list of banks where the individual has maintained or is maintaining an account.
- (b) In case of entities:
- (i) prior or existing bank references;
 - (ii) the name, present address, nationality, date of birth, nature of work, contact number and source of funds of each of the primary officers (e.g., President, Treasurer);
 - (iii) volume of assets, other information available through public databases or internet and supporting information on the intended nature of the business relationship, source of funds or source of wealth of the customer (ITR, Audited Financial Statement, Loan Application, Deed of Donation, Deed of Sale, etc.); and
 - (iv) reasons for intended or performed transactions.
- (2) Conduct validation procedures in accordance with this Section on any or all of the information provided;
 - (3) Secure senior management approval to commence or continue business relationship/transacting with the customer;
 - (4) Conduct enhanced ongoing monitoring of the business relationship, by, among others, increasing the number and timing of controls applied, and selecting patterns of transactions that need further examination;
 - (5) Require the first payment to be carried out through an account in the customer's name with a bank subject to similar CDD standards, where applicable; and
 - (6) Perform such other measures as the covered person may deem reasonable or necessary.

Where additional information cannot be obtained, or any information or document provided is false or falsified, or result of the validation process is unsatisfactory, the covered person shall deny banking relationship with the customer without prejudice to the reporting of a suspicious transaction to the AMLC when circumstances warrant.

- c. *Minimum validation procedures for EDD.* The procedures performed must enable the covered person to achieve a reasonable confidence and assurance that the information obtained are true and reliable.

Validation procedures for individual customers shall include, but are not limited to, the following:

- (1) Confirming the date of birth from a duly authenticated official document;
- (2) Verifying the address through evaluation of utility bills, bank or credit card statement, sending thank you letters, or other documents showing address or through on-site visitation;
- (3) Contacting the customer by phone or e-mail;
- (4) Determining the authenticity of the identification documents through validation of its issuance by requesting a certification from the issuing authority or by any other effective and reliable means; or
- (5) Determining the veracity of the declared source of funds.

For corporate or juridical entities, verification procedures shall include, but are not limited to, the following:

- (1) Validating source of funds or source of wealth from reliable documents such as audited financial statements, ITR, bank references, etc.;
- (2) Inquiring from the supervising authority the status of the entity;
- (3) Verifying the address through on-site visitation of the company, sending thank you letters, or other documents showing address; or
- (4) Contacting the entity by phone or e-mail.

- d. *Reduced due diligence.* Where lower risks of ML/TF have been identified, through an adequate analysis of risk by the covered person and based on the results of the institutional risk assessment, reduced due diligence procedures may be applied commensurate with the lower risk factors. The reduced due diligence procedures shall not be applied in cases of suspicion of higher ML/TF risk scenarios.

Whenever reduced due diligence is applied as provided in this Part or in the covered person's customer acceptance policy, the following rules shall apply:

- (1) For individual customers, a covered person may open an account/establish relationship under the true and full name of the account owner/s or customers upon presentation of an acceptable identification card (ID) or official document as defined in this Part or other reliable, independent source documents, data or information: *Provided*, That, for accounts used purely for digital or electronic payments, the covered person may define appropriate reduced due diligence procedures provided that ML/TF risks are effectively managed.

- (2) For corporate, partnership, and sole proprietorship entities, a covered person may open an account under the official name of these entities by presenting a Board Resolution duly certified by the Corporate Secretary, or equivalent document, authorizing the signatory to sign on behalf of the entity, obtained at the time of account opening.

Verification of the identity of the customer, beneficial owner or authorized signatory can be made after the establishment of the business relationship.

- e. **Restricted account.** To promote financial inclusion and to ensure that the micro-business owners and the low-income households are able to manage their finances through the financial system, customers who may not be able to provide any of the required information or valid reasons or any valid identification document under this Section on Customer identification may be allowed to open a restricted account with a covered person, provided:
 - (1) the aggregate credits in a year shall not exceed P100,000; and
 - (2) the account shall not be allowed to receive/send foreign remittances.

In lieu of a valid ID, the covered person shall obtain the customer's complete name, birth date, address and nationality and ensure that it has in its records a clear photograph and signature or biometric of the customer.

The account opening shall be subject to the condition that the customer shall obtain a valid ID within twelve (12) months; otherwise the account shall be closed and the remaining balance therein shall be returned to the customer. An extension of another twelve (12) months may be allowed: *Provided*, That the customer is able to show to the covered person a proof of application for a valid ID.

The covered person shall ensure that the above conditions are not breached; otherwise complete information and valid ID shall immediately be required or the account shall be closed accordingly.

Customer identification. Covered persons shall establish and verify the true identity of their customers based on official document as defined in this Part or other reliable, independent source documents, data or information.

- a. Minimum information/documents required:

- (1) **New individual customers.** Covered persons shall develop a systematic procedure for establishing the true and full identity of new individual customers, and shall open and maintain the account/relationship only in the true and full name of the account/relationship owner/s.

Unless otherwise stated in this Part, average CDD requires that the covered person obtain from individual customers, at the time of account opening/establishing the relationship, the following minimum information and confirming these information with the official or valid identification documents:

- (a) name of customer and/or PhilSys Number (when available);
 - (b) date and place of birth;
 - (c) address;
 - (d) contact number or information;
 - (e) citizenship or nationality;
 - (f) specimen signature or biometric of the customer; and
 - (g) name, address, date and place of birth, contact number or information and citizenship or nationality of beneficiary or beneficial owner, whenever applicable;
- (2) **New juridical persons.** A covered person shall develop a systematic procedure for identifying corporate, partnership and sole proprietorship entities, as well as their stockholders/partners/owners, directors, officers and authorized signatories. It shall open and maintain accounts only in the true and full name of the entity and shall have primary responsibility to ensure that the entity has not been, or is not in the process of being dissolved, struck-off, wound-up, terminated, or otherwise placed under receivership or liquidation.

Unless otherwise stated in this Part, average due diligence requires that the covered person obtain the following minimum information and/or documents before establishing business relationships:

- (a) Customer information
 - (i) Name of juridical person;
 - (ii) Name, address, citizenship or nationality of beneficial owner, if applicable, and authorized signatories;
 - (iii) Official address;
 - (iv) Contact numbers or information;
 - (v) Nature of business; and
 - (vi) Specimen signatures or biometrics of the authorized signatory.

(b) Identification documents

- (i) Certificates of Registration issued by the Department of Trade and Industry (DTI) for single proprietors, or by the Securities and Exchange Commission (SEC) for corporations and partnerships, and by the Bangko Sentral for money changers/foreign exchange dealers and remittance agents and transfer companies;
- (ii) Secondary license or certificate of authority issued by the supervising authority or other government agency;
- (iii) Articles of incorporation/partnership;
- (iv) Latest General Information Sheet;
- (v) Board or Partners' resolution duly certified by the corporate/partners' secretary, or other equivalent document, authorizing the signatory to sign on behalf of the entity; and
- (vi) For entities registered outside of the Philippines, similar documents and/or information shall be obtained, duly authenticated by a senior officer or the designated officer of the covered person assigned in the country of registration; in the absence of said officer, the documents should be authenticated by the Philippine Consulate, company register or notary public, where said entities are registered.

(3) For legal arrangement (e.g., Trust). the following must be obtained:

- (a) Name of legal arrangement and proof of existence;
- (b) Address and country of establishment;
- (c) Nature, purpose and objects of the legal arrangement;
- (d) The names of the settlor, the trustee, the trustor, the protector, if any, the beneficiary and any other natural person exercising ultimate effective control over the legal arrangement;
- (e) Description of the purpose/activities of the legal arrangement;
- (f) Expected use of the account; and
- (g) Amount, number, type, purpose and frequency of the transaction expected.

In addition, the following rules shall apply for trustees:

- (a) *trustees of any express trust* shall obtain and hold adequate, accurate, and current information on the identity of the trustor/settlor/grantor, the trustee, the beneficiary or class of beneficiaries, and any other natural person exercising ultimate effective control over the trust.

Covered persons shall likewise obtain sufficient information, such as the full name, place and date of birth or date of registration of the beneficiary/ies of these trusts, or of similar legal arrangements. This is to ensure that covered persons will be able to identify and verify the identity of the beneficiary at the time of the payout or at the time of the exercise by the beneficiary of its vested rights.

- (b) *trustees of any trust* shall hold basic information on other regulated agents of, and service providers to, the trust, including investment advisors or managers, accountants, and tax advisors;
- (c) trustees shall disclose their status when forming a business or professional relationship, or in carrying out an occasional transaction above the threshold under "d" of Sec. 921 (*Customer due diligence*); and
- (d) trustees shall make available to competent authorities, to the extent allowed by law, information on the beneficial ownership and the assets of the trust to be held or managed under the terms of the business or professional relationship.

- (4) *Identification and Verification of Agents and Authorized Representatives.* Covered persons shall verify that any person purporting to act on behalf of a customer is so authorized and shall identify and verify the identity of that person.

For this purpose, the covered person shall obtain the name, address and citizenship or nationality of agents and authorized representatives.

- b. Customer verification process. Covered persons shall verify the identity of the customer before or during the course of establishing a business relationship, or conducting transactions for occasional customers. They may complete the verification process after the establishment of the business relationship: *Provided, That:*

- (1) this occurs as soon as reasonably practicable;

- (2) this is essential not to interrupt the normal conduct of business; and
- (3) the ML/TF risks are effectively managed, taking into consideration risk and materiality.

c. Valid identification documents.

- (1) Customers and the authorized signatory/ies of a corporate or juridical entity who engage in a financial transaction with covered person for the first time shall be required to present official identification document which shall include any of the official documents as defined in this Part or other identification information which can be verified from reliable, independent source, documents, data or information, such as third-party verified customer information database.
- (2) A covered person may classify identification documents based on its reliability and ability to validate the information indicated in the identification document with that provided by the customer. Whenever it deems necessary, a covered person may accept other IDs not provided herein: *Provided*, That it shall not be the sole means of identification.

In case the identification document presented does not bear any photo of the customer or authorized signatory, or the photo-bearing ID or a copy thereof does not clearly show the face of the customer or authorized signatory, a covered person may utilize its own technology to take the photo of the customer or authorized signatory.

Relief in case of calamity. In case of a disastrous calamity and subject to a declaration by the Bangko Sentral on the applicability of this relief, any requirement for the presentation of valid ID shall be relaxed, subject to the following conditions:

- (a) The amount of transactions shall not exceed P50,000.00 per day;
- (b) The customer is either a permanent or temporary resident or who conducts business in a severely affected area which has been declared to be under a state of calamity by a competent authority;
- (c) The customer shall submit a written certification, which need not be notarized, that he/she is a victim of the subject disastrous calamity and has lost his/her valid IDs; and
- (d) The customer's account activities shall be subject to strict monitoring by the covered person to identify potential abuse of the relaxed requirement and any STs shall be reported to the AMLC within the prescribed period.

In customer identification process, covered persons shall implement appropriate systems of data collection and recording, such as: (1) photocopying/scanning of identification document presented; (2) using Information and Communication Technology (ICT) to capture and record the biometric and other personal information of customers; and/or (3) manual recording of identification information.

- d. *Face-to-Face contact.* Covered persons shall conduct face-to-face contact and/or personal interview at the commencement of the relationship. Face-to-face contact may likewise be conducted as soon as reasonably practicable so as not to interrupt the normal conduct of business, taking into account the nature of the product, type of business and the risks involved: *Provided*, That, there are policies and procedures to address any specific risk associated with the same including a clear definition of instances when it will be allowed.

The use of ICT in the conduct of face-to-face contact and/or interview may be allowed: *Provided*, That the covered person has measures in place to mitigate the ML/TF risks and that the entire procedure is documented.

- e. *Outsourcing of the customer identification and verification procedures.* Subject to existing rules on outsourcing of specified banking activities, a covered person may, without prior Monetary Board approval, outsource to a counterparty, which may or may not be a covered person as herein defined, the customer identification and verification procedures under Items "a", "b" and "d" above: *Provided*, That the ultimate responsibility for knowing the customer, keeping the identification documents, and managing attendant risks shall rest with the covered person and the following conditions are complied with.

For covered person counterparty:

- (1) There is a written service level agreement approved by the board of directors or senior management of the covered persons and its counterparty;
- (2) The counterparty has a reliable and acceptable customer identification system and training program in place.

For non-covered person counterparty:

- (1) All conditions required for covered person counterparty;

- (2) The covered person outsourcing the activity shall ensure that the employees or representatives of the counterparty gathering the required information/documents of, and/ or conducting face-to-face contact with, the customer undergo equivalent training program as that of the covered person's own employees undertaking a similar activity; and
- (3) The covered person shall monitor and conduct annual review of the performance of the counterparty to determine whether or not to continue with the arrangement.

All identification information and/or documents shall be turned over within a period not exceeding ninety (90) calendar days to the covered person, which shall carefully review the documents or information and conduct the necessary risk assessment of the customer. The covered person may, however, include in the coverage of the outsourcing agreement the safekeeping of the documents gathered subject to the condition that customer identification documents shall be made available to the covered person or to the competent authorities within three (3) banking days from the date of request.

f. *Third party reliance.* A covered person may rely on third parties to perform the CDD procedures under Item "(a) 1 to 3" of Sec. 921 (*Customer due diligence*) subject to the following rules:

- (1) *Where the third party is a covered person specifically defined by this Part and as generally defined by AMLA, as amended, and its RIRR* - The covered person shall obtain from the third party a written sworn certification containing the following:
 - (a) The third party has conducted the prescribed customer identification procedures in accordance with this Part and its own MTPP, including the face-to-face contact requirement, to establish the existence of the ultimate customer and has in its custody all the minimum information and/or documents required to be obtained from the customer; and
 - (b) The relying covered person shall have the ability to obtain identification documents from the third party upon request without delay.
- (2) *Where the third party is a financial institution operating outside the Philippines that is other than covered persons referred to in Item "1" above but conducts business operations and activities similar to them.* All the contents required in the sworn certification mentioned in Item "1" above shall apply, with the additional requirement that the laws of the country where the third party is operating has equal or more stringent customer identification process requirement and that it has not been cited in violation thereof.

When determining in which countries the third party that meets the requirements above can be based, covered persons should consider available information on the level of country risk.

- (3) For both Items "(1)" and "(2)" above, it shall, in addition to performing normal due diligence measures, do the following:
 - (a) Gather sufficient information about the third party and the group to which it belongs to understand fully the nature of its business and determine from publicly available information the reputation of the institution and the quality of supervision, including whether or not it has been subject to ML or TF investigation or regulatory action. Satisfy itself that the third party is regulated, and supervised or monitored for, and has measures in place for compliance with CDD and record-keeping requirements;
 - (b) Document the respective responsibilities of each institution; and
 - (c) Obtain approval from senior management at inception of relationship before relying on the third party.
- (4) Covered persons may rely on a third party that is part of the same financial group under the following circumstances:
 - (a) the group applies CDD, record-keeping and MTPP requirements;
 - (b) the implementation of CDD and record-keeping requirements, and the MTPP is supervised at a group level by a competent authority, such as a Group Compliance Officer; and
 - (c) any higher country risk is adequately mitigated by the group's AML/CFT policies.

A Bangko Sentral-accredited custodian may likewise rely, in accordance with this Part, on the face-to-face contact and gathering of minimum information performed by the seller or issuer of securities or by the global custodian to establish the existence and full identity of the customer: *Provided*, That the said third party has an equivalent customer identification requirement.

Notwithstanding the foregoing, the ultimate responsibility for identifying the customer still lies with the covered person relying on the third party.

In cases where the customer is assessed as high risk by the third party, the covered person shall conduct its separate enhanced due diligence procedure.

- g. *Trustee, nominee, agent or intermediary account.* Where (1) an account is opened by; (2) relationship is established through; or (3) any transaction is conducted by, a trustee, nominee, agent or intermediary, either as an individual or through a fiduciary relationship or similar arrangements, the covered person shall establish and record the true and full identity and existence of both the (1) trustee, nominee, agent or intermediary; and (2) trustor, principal, beneficial owner or person on whose behalf the account/relationship/transaction is being opened/established/conducted. The covered person shall determine the true nature of the parties' capacities and duties by obtaining a copy of the written document evidencing their relationship and apply the same standards for assessing the risk profile and determining the standard of due diligence to be applied to both.

In case of several trustors, principals, beneficial owners, or persons on whose behalf the account is being opened/ relationship is being established, where the trustee, nominee, agent or intermediary opens a single account but keeps therein sub-accounts that may be attributable to each trustor, principal, or beneficial owner, the covered person shall, at the minimum, obtain the true and full name, place and date of birth or date of registration, as the case may be, present address, nature of work or business and source of funds as if the account was opened by them separately. Where the covered person is required to report a CT or circumstances warrant the filing of an ST, it shall obtain such information on every trustor, principal, beneficial owner, or person on whose behalf the account is being opened in order that a complete and accurate report may be filed with the AMLC.

In case a covered person entertains doubts as to whether the trustee, nominee, agent, or intermediary is being used as a dummy in circumvention of existing laws, it shall apply enhanced due diligence in accordance with this Section on *Customer acceptance and identification policy* and file an ST report, if warranted.

- h. *Prohibited accounts.* A covered person shall maintain accounts only in the true and full name of the account owner. The provisions of existing law to the contrary notwithstanding, anonymous accounts, accounts under fictitious names, numbered checking accounts and all other similar accounts shall be absolutely prohibited.

On-going monitoring of customers, accounts and transactions.

- a. Covered persons shall, on the basis of materiality and risk, ensure that pertinent identification information and documents collected under the CDD process are kept up-to-date and relevant, by undertaking reviews of existing records, particularly for higher risk categories of customers. The covered person shall document the actions taken in connection with updating of customer's records/information, and accordingly update customer's risk profile.

Covered persons shall establish a system that will enable them to understand the normal and reasonable account or business activity of customers to ensure that the customers' accounts and transactions are consistent with their knowledge of the customers, and the latter's commercial activities, risk profile, and source of funds and detect unusual or suspicious patterns of account activity. Thus, a risk-and-materiality-based on-going monitoring of customer's accounts and transactions, including periodic sanction screening, should be part of a covered person's customer due diligence.

- b. *Enhanced due diligence.* Covered persons shall examine the background and purpose of all complex, unusually large transactions, all unusual patterns of transactions, which have no apparent economic or lawful purpose, and other transactions that may be considered suspicious. Covered persons shall apply enhanced due diligence on the customer in accordance with this Section on *Customer acceptance and identification policy* if they acquire information in the course of customer account or transaction monitoring that:

- (1) Raises doubt as to the accuracy of any information or document provided or the ownership of the entity;
- (2) Justifies reclassification of the customer from low or normal risk to high risk pursuant to this Part or by their own criteria; or
- (3) Indicates that any of the circumstances for the filing of an ST report exists such as, but not limited to, the following:
 - (a) Transacting without any underlying legal or trade obligation, purpose or economic justification;
 - (b) Transacting an amount that is not commensurate with the business or financial capacity of the customer or deviates from his profile;
 - (c) Structuring of transactions in order to avoid being the subject of covered transaction reporting; or
 - (d) Knowing that a customer was or is engaged in any unlawful activity as herein defined.

If the covered person:

- (1) fails to satisfactorily complete the enhanced due diligence procedures; or
- (2) reasonably believes that performing the enhanced due diligence process will tip-off the customer,

it shall file a ST report, and closely monitor the account and review the business relationship.

Non-discrimination against certain types of customers. The provisions of this Part shall not be construed or implemented in a manner that will discriminate against certain customer types, such as PEPs, as well as their relatives, or against a certain religion, race or ethnic origin, or such other attributes or profiles when used as the only basis to deny these persons access to the covered person's services. In this regard, covered persons shall have appropriate policies and procedures to ensure non-discrimination against certain customer types when implementing AML/CFT regulations. Covered persons who will commit said discriminatory act shall be subject to appropriate sanctions provided under existing laws and regulations.

(Circular Nos. 1022 dated 26 November 2018 and 950 dated 15 March 2017)

922 COVERED AND SUSPICIOUS TRANSACTION REPORTING

Covered persons shall report to the AMLC all covered and STs within five (5) working days, unless the AMLC prescribes a different period not exceeding fifteen (15) working days, from the occurrence thereof.

For STs, "occurrence" refers to the date of determination of the suspicious nature of the transaction, which determination should be made not exceeding ten (10) calendar days from the date of transaction. However, if the transaction is in any way related to, or the person transacting is involved in or connected to, an unlawful activity or money laundering offense, the 10-day period for determination shall be reckoned from the date the covered person knew or should have known the suspicious transaction indicator.

Should a transaction be determined to be both a covered and suspicious transaction, the covered person shall be required to report the same as an ST.

Covered persons shall ensure the accuracy and completeness of covered and ST report, which shall be filed in the forms prescribed by the AMLC and submitted in a secured manner to the AMLC in electronic form.

Deferred reporting of certain covered transactions. Covered persons shall refer to the issuances of the AMLC from time to time on transactions that are considered as "non-cash, no/low risk covered transactions", hence subject to deferred reporting.

The Bangko Sentral may consider other transactions as "no/low risk covered transactions" and propose to the AMLC that they be likewise subject to deferred reporting by covered persons.

Electronic monitoring systems for AML/CFT. Covered persons required under Sec. 911 (*Monitoring and reporting tools*) to have an electronic monitoring system for AML/CFT should ensure that the system, at a minimum, shall detect and raise to the covered person's attention, transaction and/or accounts that qualify either as CT or ST as herein defined. The covered person shall endeavor to interface the electronic monitoring system with the systems of its branches, subsidiaries and affiliates, if any, for group-wide AML/CFT monitoring.

The system must have at least the following automated functionalities:

- a. Covered and suspicious transaction monitoring – performs statistical analysis, profiling and able to detect unusual patterns of account activity;
- b. Watch list monitoring – checks transfer parties (originator, beneficiary, and narrative fields) and the existing customer database for any listed undesirable individual or corporation;
- c. Investigation – checks for given names throughout the history of payment stored in the system;
- d. Can generate all the CTRs of the covered person accurately and completely with all the mandatory field properly filled up;
- e. Must provide a complete audit trail;
- f. Capable of aggregating activities of a customer with multiple accounts on a consolidated basis for monitoring and reporting purposes; and
- g. Has the capability to record all STs and support the investigation of alerts generated by the system and brought to the attention of senior management whether or not a report was filed with the AMLC.

Covered persons with existing electronic system of flagging and monitoring transactions already in place shall ensure that their existing system is updated to be fully compliant with functionalities as those required herein.

Manual monitoring. Covered persons which are not required, under this Part, to have an electronic system of flagging and monitoring transactions shall ensure that they have the means of flagging and monitoring the transactions mentioned in this Section on Electronic monitoring systems for AML/CFT. They shall maintain a register of all STs that have been brought to the attention of senior management whether or not the same was reported to the AMLC.

Electronic submission of reports. The CTR and STR shall be submitted to the AMLC in a secured manner, in electronic form and in accordance with the reporting procedures prescribed by the AMLC. The covered persons shall provide complete and accurate information of all the mandatory fields required in the report. In order to provide accurate information, the covered person shall regularly update customer identification information at least once every three (3) years.

For the purpose of reporting in a secured manner, all covered persons shall register with the AMLC within ninety (90) days from 27 January 2011 by directly coordinating with that office for the proper assignment of their institution code and facilitation of the reporting process. All covered institutions that have previously registered need not re-register.

Only their respective compliance officers shall electronically sign their CTRs and STRs.

Electronic copies of CTRs and STRs shall be preserved and safely stored for at least five (5) years from the dates the same were reported to the AMLC.

Exemption from bank secrecy laws. When reporting covered or suspicious transactions to the AMLC, covered persons and their officers and employees shall not be deemed to have violated R.A. No. 1405, as amended, R.A. No. 6426, as amended, R.A. No. 8791 and other similar laws, but are prohibited from communicating, directly or indirectly, in any manner or by any means, to any person, the fact that a covered or suspicious transaction report was made, the contents thereof, or any other information in relation thereto. In case of violation thereof, the concerned officer and employee of the covered person shall be criminally liable in accordance with the provision of the AMLA, as amended.

Confidentiality provision. When reporting CTs and STs to the AMLC, covered persons, their directors, officers and employees, are prohibited from communicating, directly or indirectly, in any manner or by any means, to any person or entity, or the media, the fact that a covered or suspicious transaction report was made, the contents thereof, or any other information in relation thereto. Any information about such reporting shall not be published or aired, in any manner or form, by the mass media, or through electronic mail, or other similar devices. In case of violation thereof, the concerned director, officer and employee of the covered person shall be criminally liable.

Safe harbor provision. No administrative, criminal or civil proceedings shall lie against any person for having made a CTR or an STR in the regular performance of his duties in good faith, whether or not such reporting results in any criminal prosecution under the AMLA, as amended, its RIRR or any other law.

(Circular No. 950 dated 15 March 2017)

923 ADDITIONAL PREVENTIVE MEASURES FOR SPECIFIC CUSTOMERS AND ACTIVITIES

Private banking/wealth management operations. These services, which by their nature involve high measure of client confidentiality, are more open to the elements of reputational risk especially if the customer identification process is not diligently followed. Covered persons shall therefore establish and record the true and full identify and take reasonable measures to establish the source of wealth and source of funds, of the customer and beneficial owners, if any, and establish a policy on what standard of due diligence will apply to them. They shall also require approval by a senior officer other than the private banking/wealth management/similar activity relationship officer or the like for acceptance of customers of private banking, wealth management and similar activities.

PEP. Covered persons shall establish and record the true and full identity of PEPs, as well as their immediate family members and entities related to them.

- a. In case of domestic PEPs or persons who have been entrusted with a prominent function by an international organization, or their immediate family members or close associates, in addition to performing the applicable due diligence measures, covered persons shall:
 - (1) Take reasonable measures to determine whether a customer or the beneficial owner is a PEP; and
 - (2) In cases when there is a higher risk business relationship, adopt measures under paragraphs “b(2)” to “b(4)” below.
- b. In relation to foreign PEPs or their immediate family members or close associates, in addition to performing the applicable customer due diligence measures, covered persons shall:
 - (1) Put in place risk management systems to determine whether a customer or the beneficial owner is a PEP;
 - (2) Obtain senior management approval before establishing (or continuing, for existing customers) such business relationship;
 - (3) Take reasonable measures to establish the source of wealth and the source of funds of customers and beneficial owners identified as PEPs; and
 - (4) Conduct enhanced ongoing monitoring on that relationship.

Correspondent banking. Covered persons shall adopt policies and procedures to prevent correspondent banking activities from being utilized for ML/TF activities, and designate an officer responsible in ensuring compliance with these regulations and the covered person’s policies and procedures.

The Guidelines on correspondent banking relationships are provided in Appendix 140.

Supervisory enforcement action. Consistent with Sec. 002, the Bangko Sentral may deploy enforcement actions to promote adherence to the requirements set forth in this Section and bring about timely corrective actions.

Fund/Wire transfer. Because of the risk associated with dealing with fund/wire transfers, where a covered person may unknowingly transmit proceeds of unlawful activities or funds intended to finance terrorist activities, it shall establish policies and procedures designed to prevent it from being utilized for that purpose which shall include, but not limited to, the following:

a. Originating financial institution:

- (1) Shall not accept instructions to fund/wire transfer from a non-customer originator, for occasional transactions exceeding the set threshold as defined in this Part, unless it has conducted the necessary CDD to establish the true and full identity and existence of said originator;
- (2) Shall ensure that all wire transfers are always accompanied by the required information such that:
 - (a) Cross border and domestic fund/wire transfers and related message not exceeding P50,000.00 or its equivalent in foreign currency, shall include accurate and meaningful originator and beneficiary information. The following information shall remain with the transfer or related message through the payment chain:
 - (i) Name of the originator;
 - (ii) Name of the beneficiary; and
 - (iii) Account number of the originator and beneficiary, or in its absence, a unique reference number.
 - (b) For cross border and domestic fund/wire transfers and related message amounting to P50,000.00 or more, or its equivalent in foreign currency, the following information shall be obtained and accompany the wire transfer:
 - (i) Name of the originator;
 - (ii) Originator account number where such an account is used to process the transaction or a unique transaction reference number which permits traceability of the transaction;
 - (iii) Originator's address, or national identity number, or customer identification number, or date and place of birth;
 - (iv) Name of the beneficiary; and
 - (v) Beneficiary account number where such an account is used to process the transaction, or unique transaction reference number which permits traceability of the transaction.

For domestic wire transfers, the originating institution should ensure that the required information accompanies the wire transfers, unless this information can be made available to the beneficiary institution and relevant authorities by other effective means. In the latter case, the originating institution shall include only the account number or a unique identifier within the message or payment form which will allow the transaction to be traced back to the originator or beneficiary. Originating institutions are required to provide the information within three (3) working days from receiving the request either from the beneficiary institution or from relevant authorities or agencies.

- (3) May be exempted from the requirements of Item "(2)" above in respect of originator information, where several individual cross-border wire transfers from a single originator are bundled in a batch file for transmission to beneficiaries: *Provided*, That it includes the originator's account number or unique transaction reference number and that the batch file contains the required and accurate originator information, and full beneficiary information, that is fully traceable within the beneficiary country;
- (4) Need not verify for accuracy the information mentioned in Item "(2)(a)" hereof. However, the originating financial institution shall verify the information pertaining to its customer where there is a suspicion of ML/TF;
- (5) Shall ensure that, for domestic wire transfers, the information accompanying the wire transfer includes originator information as indicated for cross-border wire transfers, unless this information can be made available to the beneficiary financial institution and relevant authorities by other effective means;
- (6) Shall only include the account number or a unique transaction reference number, where the information accompanying the domestic wire transfer can be made available to the beneficiary financial institution and appropriate authorities by other effective means: *Provided*, That this number or identifier will permit the transaction to be traced back to the originator or the beneficiary. The information shall be made available within three (3) working days from receipt of the request either from the beneficiary financial institution or from appropriate authorities;
- (7) Shall maintain all originator and beneficiary information collected, in accordance with Sec. 924; and
- (8) Should not execute the wire transfer if the requirements under Item "a" of this Section (*Fund/wire Transfer*), as applicable, are not complied with.

b. Intermediary financial Institution shall:

- (1) Ensure that, for cross-border wire transfers, all originator and beneficiary information that accompany a wire transfer are retained in the payment message.

Where technical limitations prevent the required originator or beneficiary information accompanying a cross-border wire transfer from remaining with a related domestic wire transfer, intermediary financial institution should keep a record of all the information received from the originating financial institution or another intermediary financial institution for at least five (5) years;

- (2) Take reasonable measures, which are consistent with straight-through processing, to identify cross-border wire transfers that lack required originator information or required beneficiary information;
- (3) Conduct transactional sanction screening on the payment parties, both for the originator and beneficiary;
- (4) Adopt risk-based policies and procedures for determining: (a) when to execute, reject, or suspend a wire transfer lacking required originator or required beneficiary information; and (b) the appropriate follow-up action.

c. Beneficiary financial institution shall:

- (1) Verify the identity of the beneficiary, if the identity has not been previously verified and maintain this information in accordance with Sec. 924 (*Record Keeping*). Should the originator and beneficiary be the same person, the beneficiary institution may rely on the customer due diligence conducted by the originating institution provided the rules on third party reliance under Sec. 921 (*Customer identification*) are met, treating the originating institution as third party as therein defined;
- (2) Take reasonable measures, which may include post-event monitoring or real-time monitoring where feasible, to identify cross-border wire transfers that lack required originator or beneficiary information, as applicable; and
- (3) Adopt risk-based policies and procedures for determining: (a) when to execute, reject, or suspend a wire transfer lacking required originator or beneficiary information, as applicable; and (b) the appropriate follow-up action.

d. In case a Money or Value Transfer Service (MVTs) provider controls both the originating and the beneficiary side of a wire transfer, it shall;

- (1) consider all the information from both the originating and beneficiary sides in order to determine whether an STR has to be filed; and
- (2) file an STR in any country affected by the suspicious wire transfer, and make relevant transaction information available to the AMLC.

Buyers of cashier's, manager's or certified checks. A covered person may sell cashier's, manager's or certified checks only to its existing customers and shall maintain a register of said checks indicating the following information:

- a. True and full name of the buyer or the applicant if buying on behalf of an entity;
- b. Account number;
- c. Date of issuance and the number of the check;
- d. Name of the payee;
- e. Amount; and
- f. Purpose of such transaction.

Buyers of cashier's, manager's or certified checks other than its existing customer. Where an individual or an entity other than an existing customer applies for the issuance of cashier's, manager's or certified checks, the covered person shall, in addition to the information required in Sec. 921 (*Customer identification*), obtain all the identification documents and minimum information required under this Part to establish the true and full identity and existence of the applicant. In no case shall reduced due diligence be applied to the applicant and, where circumstances warrant, enhanced due diligence should be applied.

Buyers of cashier's, manager's or certified checks in blank or payable to cash, bearer or numbered account. A covered person may issue cashier's, manager's or certified checks or other similar instruments in blank or payable to cash, bearer or numbered account subject to the following conditions:

- a. The amount of each check shall not exceed P10,000;
- b. The buyer of the check is properly identified in accordance with its customer acceptance and identification policies and as required under Sec. 921;
- c. A register of said checks indicating all the information required under Sec. 921;

- d. A covered person which issues as well as those which accepts as deposits, said cashier's, manager's or certified checks or other similar instruments issued in blank or payable to cash, bearer or numbered account shall take such measure(s) as may be necessary to ensure that said instruments are not being used/resorted to by the buyer or depositor in furtherance of an ML activity;
- e. The deposit of said instruments shall be subject to the same requirements of scrutiny applicable to cash deposits; and
- f. Transactions involving said instruments should be accordingly reported to the AMLC if there is reasonable ground to suspect that said transactions are being used to launder funds of illegitimate origin.

Second-endorsed checks. A covered person shall enforce stricter guidelines in the acceptance of second-endorsed checks including the application of enhanced due diligence to ensure that they are not being used as instruments for money laundering or other illegal activities.

For this purpose, a covered person shall limit the acceptance of second-endorsed checks from properly identified customers and only after establishing that the nature of the business of said customer justifies, or at least makes practical, the deposit of second-endorsed check. In case of isolated transactions involving deposits of second-endorsed checks by customer who are not engaged in trade or business, the true and full identity of the first endorser shall be established and the record of the identification shall also be kept for five (5) years.

Foreign exchange dealers/money changers/remittance and transfer companies. A covered person shall require its customers who are remittance and transfer companies, foreign exchange dealers and money changers to submit proof of registration with the Bangko Sentral as part of their customer identification document, and shall only deal with these entities if they are duly registered as such. Also, these customers shall be required to use company accounts for their remitting, foreign exchange dealing and money changing business.

Remittance and transfer companies, foreign exchange dealers and money changers presenting greater risk shall be subject to enhanced due diligence, which includes, among others, requiring proof of registration with the AMLC, reviewing and assessing their AML/CFT program to have reasonable assurance on their AML compliance, obtaining additional information and securing senior management approval for establishing business relationship.

Other high risk customer, jurisdiction or geographic location. A customer from a foreign jurisdiction that is recognized as having inadequate internationally accepted AML standards, or presents greater risk for ML/TF or its associated unlawful activities, shall be subject to enhanced customer due diligence. Information relative to these are available from publicly available information such as the websites of FATF, FATF Style Regional Bodies (FSRB) like the Asia Pacific Group on Money Laundering and the Egmont Group, national authorities like the OFAC of the U.S. Department of the Treasury, or other reliable third parties such as regulators or exchanges, which shall be a component of a covered person's customer identification process.

Covered persons shall apply countermeasures (such as conduct of enhanced due diligence, limit business relationship or financial transactions with the identified country or persons in that country) proportionate to the risks when called upon to do so by the FATF, or independently of any call by the FATF to do so, when warranted.

Shell company/shell bank/bearer share entities. A covered person shall undertake banking relationship with a shell company with extreme caution and always apply enhanced due diligence on both the entity and its beneficial owner/s.

No shell bank shall be allowed to operate or be established in the Philippines. Covered persons shall refuse to deal, enter into, or continue, correspondent banking relationship with shell banks. They shall likewise guard against establishing relations with foreign financial institutions that permit their accounts to be used by shell banks.

Bearer share entities refer to those juridical entities where the ownership is accorded to those who possess the bearer share certificate. A covered person dealing with bearer share entities shall conduct enhanced due diligence on said entities and their existing stockholders and/or beneficial owners at the time of opening of the account. These entities shall be subject to ongoing monitoring at all times and the list of stockholders and/or beneficial owners shall be updated within thirty (30) days after every transfer of ownership and the appropriate enhanced due diligence shall be applied to the new stockholders and/or beneficial owners.

Numbered accounts. No peso and foreign currency non-checking numbered accounts shall be allowed without establishing the true and full identity and existence of customers and applying enhanced due diligence in accordance with Sec. 921 (*Customer acceptance and identification policy*).

Peso and foreign currency non-checking numbered accounts existing prior to 17 October 2001 shall continue to exist but the covered person shall establish the true and full identity and existence of the beneficial owners of such accounts and apply enhanced due diligence in accordance with Sec. 921 (*Customer acceptance and identification policy*).

Compliance with United Nations Security Council Resolutions (UNSCR): As part of CDD process, covered persons shall adopt appropriate policies and procedures:

- a. To implement targeted financial sanctions without delay to comply with UNSCR, adopted under Chapter VII of the Charter of the United Nations, relating to the prevention, suppression and disruption of proliferation of weapons of mass destruction and its financing;
- b. To ensure that individuals/entities be prohibited from making any types of transactions or services for the benefit of designated persons and entities owned or controlled, directly or indirectly, by designated persons or entities; and persons and entities acting on behalf of, or at the direction of, designated persons or entities pursuant to relevant UNSCR such as 1267 (1999) and its successor resolutions, and 1373 (2001); and
- c. To report to AMLC the actions taken in compliance with the prohibition requirements of the relevant UNSCRs, including attempted transactions.

(Circular Nos. 1078 dated 09 March 2020, 1065 dated 3 December 2019, 1022 dated 26 November 2018, and 950 dated 15 March 2017)

924 RECORD KEEPING

All customer identification records of covered persons shall be maintained and safely stored as long as the account exists. All transaction records and documents of covered persons shall be maintained and safely stored for five (5) years from the date of transaction.

Said records and files shall contain the full and true identity of the owners or holders of the accounts involved in the transactions such as the ID card and photo of individual customers and the documents mentioned in Sec. 921 (*Customer identification*) for entities, customer information file, signature card of authorized signatory/ies, and all other pertinent customer identification documents as well as all factual circumstances and records involved in the transaction. Covered persons shall undertake the necessary adequate security measures to ensure the confidentiality of such file, including all information shared by the group-wide compliance. Covered persons shall prepare and maintain documentation, in accordance with the aforementioned client identification requirements, on their customer accounts relationships and transactions such that any account, relationship or transaction can be reconstructed as to enable the AMLC, and/ or the courts to establish an audit trail for money laundering.

Closed accounts and terminated relationships. Covered persons shall maintain and safely store all records of customer identification, and transactions documents, including the results of any analysis undertaken, for at least five (5) years following the closure of the account, termination of the business relationship or after the date of the occasional transaction.

Retention of records where the account or customer is the subject of a case. If a money laundering case has been filed in court involving the account or customer, records must be retained and safely kept beyond the 5-year retention period, until it is officially confirmed by the AMLC Secretariat that the case has been resolved, decided or terminated with finality.

Safekeeping of records and documents. The covered person shall designate at least two (2) officers who will be jointly responsible and accountable in the safekeeping of all records and documents required to be retained by the AMLA, as amended, its RIRR and this Part. They shall have the obligation to make these documents and records readily available without delay during Bangko Sentral regular or special examinations.

Form of records. Covered persons shall retain all records as originals or in such forms as are admissible in court pursuant to existing laws, such as the E-Commerce Act and its implementing rules and regulations, and the applicable rules promulgated by the Supreme Court.

Covered persons shall, likewise, keep the electronic copies of all CTRs and STRs for at least five (5) years from the dates of submission to the AMLC.

For low risk customers, it is sufficient that covered persons shall maintain and store, in any form, a record of customer information and transactions, but should be sufficient to permit reconstruction of individual transactions so as to provide, if necessary, evidence for prosecution of criminal activity.

(Circular Nos. 1078 dated 09 March 2020, 1022 dated 26 November 2018 and 950 dated 15 March 2017)

C. TRAINING PROGRAM

931 AML TRAINING PROGRAM

Covered persons shall formulate an annual AML training program aimed at providing all their responsible officers and personnel with efficient, adequate and continuous education program to enable them to fully and consistently comply with all their obligations under this Part, the AMLA, as amended, and its RIRR.

Trainings of officers and employees shall include awareness of their respective duties and responsibilities under the MTPP particularly in relation to the customer identification process, record keeping requirements and CT and ST reporting and ample understanding of the internal processes including the chain of command for the reporting and investigation of suspicious and money laundering activities.

The program shall be designed in a manner that will comprise of various focuses for new staff, front-line staff, compliance office staff, internal audit staff, officers, senior management, directors and stockholders. Regular refresher trainings shall likewise be provided in order to guarantee that officers and staff are informed of new developments and issuances related to the prevention of money laundering and terrorism financing as well as reminded of their respective responsibilities vis-à-vis the covered person's processes, policies and procedures.

Covered person's annual AML training program and records of all AML seminars and trainings conducted by the covered institution and/or attended by its personnel (internal or external), including copies of AML seminar/training materials, shall be appropriately kept by the compliance office/unit/department, and should be made available during periodic or special Bangko Sentral examination.

(Circular No. 950 dated 15 March 2017)

D. ENFORCEMENT ACTIONS

941 SANCTIONS AND PENALTIES

In line with the objective of ensuring that covered persons maintain high AML/CFT standards in order to protect its safety and soundness as well as protecting the integrity of the national banking and financial system, violation of this Part shall constitute a major violation subject to the following enforcement actions against the board of directors, senior management and line officers, not necessarily according to priority and whenever applicable:

- a. Written reprimand;
- b. Restriction on certain licenses/product, as appropriate;
- c. Suspension or removal from the office they are currently holding; and/or
- d. Disqualification from holding any position in any covered institution.

In addition to the non-monetary sanctions stated above, the Bangko Sentral may also impose monetary penalties computed in accordance with existing regulations and in coordination with the AMLC.

Enforcement action shall be imposed on the basis of the overall assessment of the covered person's AML risk management system. Whenever a covered person's AML compliance system is found to be grossly inadequate, this may be considered as unsafe and unsound banking that may warrant initiation of prompt corrective action.

To implement the enforcement action provision of this Part along with the AML Risk Rating System (ARRS), the following rules shall apply:

- a. An AML Composite rating of 4 and 3 will require no enforcement action.
- b. An AML Composite rating of 2 or 1 will require submission by the covered person to the appropriate department of the Bangko Sentral, of a written action plan duly approved by the BOD aimed at correcting the noted inefficiency in BOD and SM oversight, inadequacy in AML and TF policies and procedures, weakness in internal controls and audit, and/or ineffective implementation within a reasonable period of time.

The appropriate department of the Bangko Sentral shall assess the viability of the plan and shall monitor the covered person's performance.

In the event of non-submission of an acceptable plan within the deadline or failure to implement its action plan, the appropriate department of the Bangko Sentral shall recommend appropriate enforcement action on the covered person and its responsible officers including monetary penalties to be computed on a daily basis until improvements are satisfactorily implemented.

- c. An AML rating of 1 shall also be considered as an unsafe and unsound banking. For this reason, prompt corrective action shall be initiated on the covered person.

Escalation of enforcement action. In cases of heightened AML/CFT supervisory concern as reflected in the overall AML risk rating over a certain period of time, the Bangko Sentral shall impose escalated enforcement action which shall include corrective action, sanction and/or additional supervisory enforcement action, consistent with Sec. 002 on supervisory enforcement policy.

Monetary penalty guidelines. These guidelines are divided into three (3) parts.

Part I – *Monetary penalty matrices.* The monetary penalty matrices, where monetary penalties are categorized based on the (1) Composite rating and (2) Asset size of the Bangko Sentral covered institution.

Part II – Guiding principles.

- a. The first step is to determine the over-all risk rating of the Bangko Sentral covered institution for purposes of identifying which penalty matrix will be used. If the Composite rating is “1” or “2”, penalty matrix A or B, respectively shall be used. If the over-all rating is “3” and “4”, no monetary penalty shall be imposed.
- b. Second step is to establish the asset size of the Bangko Sentral covered institution as of the cut-off period of examination;
- c. Third step is to identify the aggravating and mitigating factors. If the aggravating factors are more than the mitigating factors, then the maximum range shall be used. On the other hand, if the mitigating factors are more than the aggravating factors, then the minimum range shall be applied. In case there are no aggravating and mitigating factors or there is a tie, the medium range shall be used.
- d. For Composite ratings of 1 and 2 where the covered institution concerned was required to submit within a reasonable period of time an acceptance plan, non-submission of the plan within the deadline or failure to implement the action plan shall be a basis for imposition of monetary penalties computed on a daily and continuing basis from the time the covered institutions is notified until corrective measures are satisfactorily effected. The penalty may be imposed on the covered institution itself or directly on the Board of Directors as a body, or the individual directors who have direct oversight, or the line officers involved in the management of money laundering and terrorist financing prevention.

Part III – Aggravating and mitigating factors.

a. Aggravating factors

- (1) *Frequency of the commissions or omissions of specific violation*- Majority of the following violations were noted:

- (a) Deficient Know Your Customer process
- (b) Unsatisfactory Covered Transaction reporting system
- (c) Non-reporting of and Improper Suspicious Transaction reporting
- (d) Non-compliance with the Record keeping requirement
- (e) Inadequate AML Training Program
- (f) Deficient AML Electronic system

- (2) *Duration of violations prior to notification*- This pertains to the length of time prior to the latest notification on the violation. Violations that have been existing for a long time before it was revealed/discovered in the examination or are under the evaluation for a long time due to pending requests or correspondences from covered institutions on whether a violation has actually occurred shall be dealt with through this criterion. Violations outstanding for more than one (1) year prior to notification, at the minimum, will qualify as violations outstanding for a long time.

- (3) *Continuation of offense or omission after notification*- This pertains to the persistence of an act or omission after the latest notification on the existence of the violation, either from the appropriate department of the Bangko Sentral or from the Monetary Board and/or Deputy Governor, in cases where the violation has been elevated accordingly. This covers the period after the final notification of the existence of the violation until such time that the violation has been corrected and/or remedied. The corrective action shall be reckoned with from the date of notification.

- (4) *Concealment*- This factor pertains to the cover up of a violation. In evaluating this factor, one shall consider the intention of the party/ies involved and whether pecuniary benefit may accrue accordingly. The act of concealing an act or omission constituting the violation carries with it the intention to defraud regulators. Moreover, the amount of pecuniary benefit, which may or may not accrue from the offense or omission, shall also be considered under this factor.

Concealment may be apparent when a covered institution’s personnel purposely complicate the transaction to make it difficult to uncover or refuse to provide information and/or document that would support the violation/offense committed.

- (5) *Loss or risk of loss to bank*- In asserting this factor, “*potential loss*” refers to any time at which the covered institution was in danger of sustaining a loss.

b. Mitigating factors

- (1) *Good faith* - is the absence of intention to violate on the part of the erring individual/entity.
- (2) *Full cooperation* - covered person’s personnel or the covered institution immediately took action to correct the violation after it is brought to its attention either verbally or in writing.

- (3) *With positive measures* - covered person's personnel or the covered institution commits to undertake concrete action to correct the violation but is being restrained by valid reasons to take immediate action.
- (4) *Voluntary disclosure of offense* - covered person's personnel or the covered person disclosed the violation before it is discovered in the course of a regular or special examination or off-site monitoring.

(Circular No. 950 dated 15 March 2017)

942 SEPARABILITY CLAUSE

If any provision, sections of this Part, or its application to any person or circumstance is held invalid, the other provisions or sections of this Part, and the application of such provision or section to other persons or circumstance shall not be affected thereby.

(Circular No. 950 dated 15 March 2017)

PART TEN

BANGKO SENTRAL REGULATIONS ON FINANCIAL CONSUMER PROTECTION

1001 FINANCIAL CONSUMER PROTECTION FRAMEWORK (FRAMEWORK)¹

Policy Statement. The Framework is in line with the responsibility of the Bangko Sentral under Section 3 of R.A. No. 7653, as amended by R.A. No. 11211, to promote broad and convenient access to high quality financial services and consider the interest of the general public. Bangko Sentral aims to ensure that financial service providers conduct ethical business practices and do not engage in practices that may cause harm to the consumer as well as consider consumer outcomes in the conduct of their business. Practices that harm consumers introduce risks not only at the level of the financial institution but also to the overall health of the financial sector particularly through decreased public trust and confidence. A well-informed and protected consumer can better benefit from the financial services received and be a more responsible client.

The Framework establishes the guidelines and expectations from Bangko Sentral supervised financial institutions (BSFIs) to institutionalize consumer protection as an integral component of corporate governance and culture as well as risk management. The objective of the Framework is for BSFIs to manage the risks of financial loss that are detrimental to the financial consumers or consumer protection risks inherent to the BSFIs operations that, if not properly managed, would affect other relevant risks, such as compliance, reputational, legal, operational and credit risks.

Scope and Applicability. The Framework applies to all BSFIs in the conduct of their business. The BSFIs' adoption of the Framework shall be proportionate to their asset size, structure, nature of products and services, and complexity of operations.

Consumer protection risk management system (CPRMS). A BSFI should have a CPRMS that is integrated into the BSFI's enterprise-wide risk management processes and risk governance framework. The CPRMS includes the governance structure, policies, processes, measurement and control procedures to ensure that consumer protection risks are identified, measured, monitored, and mitigated. A carefully devised, implemented, and monitored CPRMS provides the foundation for ensuring the BSFI's adherence to consumer protection standards of conduct and compliance with consumer protection laws, rules and regulations, thereby, ensuring that identified risks to the BSFI and associated risk of financial harm or loss to consumers are properly managed.

Consumer Protection Oversight.

- a. **Responsibilities of the Board of Directors (Board).** The Board shall be primarily responsible for approving and overseeing the implementation of the BSFI's CPRMS. The Board's responsibilities shall include the following:
 - (1) Approve the CPRMS and consumer assistance mechanism (CAM) that takes into consideration the BSFI's business model, market, product lines, and relationships with third parties that may give rise to consumer protection risks;
 - (2) Promote a culture of ethical behavior and adherence to the highest standards of fair and responsible dealing with consumers;
 - (3) Ensure that adequate information and actions taken are reported on a regular basis in terms of the measurement of consumer protection related risks, reports from the CAM, as well as other material consumer related developments that will impact the BSFI;
 - (4) Ensure the adequate provision of resources and effective implementation of personnel training and competency requirements;
 - (5) Approve remuneration and compensation packages structured to encourage responsible business conduct, fair treatment and avoidance/mitigation of conflicts of interest; and
 - (6) Review periodically the implementation and effectiveness of the CPRMS including how findings are reported and whether the audit mechanisms are in place to enable adequate oversight, and put in place a regular mechanism to review the relevance of the CPRMS in case of changes in the BSFI business model and/or operating environment.

¹ BSFIs shall be given six (6) months from 26 September 2019 to: (1) perform a gap analysis of their current consumer protection practices vis-i-vis this Section and (2) propose an action plan duly approved by the Board of Directors to achieve full compliance within a reasonable period of time but in no case longer than one (1) year from 26 September 2019.

- b. **Responsibilities of Senior Management.** The Senior Management shall be responsible for ensuring that the practices of the BSFIs are aligned with the approved consumer protection policies and risk management system and consistently displayed throughout the BSFI's place of business particularly across all business units that deal directly with consumers. In this regard, the Senior Management shall:
- (1) Ensure that approved CPRMS and CAM policies and procedures are clearly documented, properly understood and appropriately implemented across all levels and business units.
 - (2) Establish an effective monitoring and management information system to regularly measure, aggregate, and analyze consumer related issues to determine the level of consumer protection risk. An appropriate and clear reporting and escalation mechanism should also be integrated in the risk governance framework. The management information system should be able to:
 - (a) Provide adequate information on the performance and quality of the BSFI's CAM that allows for identification of emerging consumer issues and root cause analysis;
 - (b) Determine the level of consumer protection risk exposure through assessment of its implementation of the Consumer Protection Standards of Conduct (i.e., transparency and disclosure, protection of client information, fair treatment, effective recourse, and financial learning and awareness);
 - (c) Identify and monitor, in a timely manner, consumer protection risk exposures approaching risks of loss to financial consumers, legal and reputational risk, as well as other related risks;
 - (d) Identify and assess emerging or increasing consumer risks that affect the BSFI such as through social media monitoring and market monitoring;
 - (3) Ensure that adequate systems and controls are in place to promptly identify issues that affect the consumer across all phases of the relationship with the consumer;
 - (4) Ascertain that weaknesses in the consumer protection practices or consumer protection emerging risks are addressed and corrective actions are taken in a timely manner; and
 - (5) Ensure observance of expectations and requirements prescribed under relevant regulations on compliance and internal audit.

(Circular Nos. 1048 dated 6 September 2019 and 890 dated 02 November 2015)

1002 POLICIES AND PROCEDURES, CONSUMER PROTECTION STANDARDS OF CONDUCT

The CPRMS and CAM should ensure systematic application of policies and procedures, including the Consumer Protection Standards of Conduct (Standards). The Standards should reflect the core principles, which BSFIs must observe at all times in their dealings with financial consumers: *Provided, further*, That these Standards should be embedded into the corporate culture of the BSFI, enhancing further its defined governance framework while addressing conflicts that are inimical to the interests of the financial consumer.

Disclosure and transparency¹. BSFIs must ensure that their consumers have a reasonable holistic understanding of the products and services which they may be acquiring or availing. In this context, full disclosure and utmost transparency, to the extent allowed under applicable laws and regulations, are the critical elements that empower the consumer to make comparisons and informed financial decisions. This is made possible by providing the consumer with ready access to information that accurately represents the nature and structure of the product or service, its terms and conditions, as well as its fundamental benefits and risks.

The BSFI demonstrates adherence to appropriate and adequate disclosure and transparency when:

- a. The manner of disclosure, whether in advertising materials, terms and conditions, and other forms of communication, are clear, concise, accurate, understandable and not misleading.
- b. Information are disclosed before, during and after a sale of a financial product or service and during key stages of the relationship with the consumer; especially if there are any changes in the terms and conditions.
- c. Terms and Conditions contain all significant provisions of the financial product or service giving prominence to key features/facts. It includes the following with specific details relating to the type of product or service being offered:

¹ This Section should be read in conjunction with existing regulations related to disclosure and transparency of key information on loan and investment products and services, regulations on the conduct of treasury and trust activities of BSFIs and regulations governing fees on retail bank products/services and dormant deposit accounts.

- (1) Information on risks, return, possible warnings, any waiver of rights and limitations of liabilities, consumer's rights and responsibilities, consequences of failure to meet obligations, rights and responsibilities of the BSFI, involvement of authorized agents, any conflict of interest by BSFI staff, cancellation and product portability, among others;
 - (2) The full price or cost to the consumer including all interest, fees, charges, and penalties. The terms and conditions must clearly state whether interest, fees, charges, and penalties can change over time. The method for computing said interest, fees, charges, and penalties shall be disclosed consistent with existing regulations; and
 - (3) For more complex products, such as investment products, the key features as well as costs and risks shall be highlighted in a key facts statement or Product Highlight Sheet (PHS). The PHS shall enable comparison with other products and shall be provided at no additional cost. Before the consumer signs any contract, the BSFI should ensure that the consumer has freely signed a statement to the effect that the consumer has duly received, read, and understood the PHS.
- d. Advertising materials are not false, misleading, or contain deceptive statements or omit key information that may materially and/or adversely affect the decision of the consumer to avail of a service or acquire a product. BSFIs are responsible for all the statements made in said advertising materials.
 - e. The terms and conditions, advertising materials and other communications contain the following:
 - (1) Contact and information of the BSFI's internal complaints handling unit; and
 - (2) Statement that the BSFI is a regulated entity and contact information of the regulator.
 - f. Communication of the BSFI staff is conducted in such a manner that clients can understand the terms of the contract and their rights and obligations, taking into consideration client segments that may have financial literacy limitations.
 - g. Adequate time is given to consumers to review, ask questions and receive information to fully understand the terms and conditions prior to signing the contract or executing the transaction. BSFI should ensure that documents signed by the consumer are completely filled out and have no blank terms. The consumer should be given a copy of each of the documents he/she signed (including, but not limited to the contract) with all terms and conditions. The consumer should also be provided with proof of the transaction, whether printed or in electronic copy at the option of the consumer, immediately after the transaction has been completed.
 - h. Statements of Account or Billing Statements are provided regularly in a convenient manner to the consumer, or through the channel through which the product was sold, commensurate to the type of product and terms.
 - i. Notifications in writing (or electronic form) and through other channels are provided to the consumer with regard to any of the key features and terms of the product, the nature and extent of the change and its potential impact on the consumer. This notification requirement also apply to similar changes to any condition/s specified in the contract. Nonetheless, this does not cover financial products that have been identified at the inception to be subject to floating interest rate all throughout their life cycle as long as basis has not changed.

The principles of the above standards for disclosure and transparency shall be applicable even to products and services offered electronically as well as to products catering to different market segments with particular consideration for segments that may have limited financial literacy.

Protection of client information¹. Financial consumers have the right to expect that their financial transactions, as well as relevant personal information disclosed in the course of a transaction, are kept confidential and are secured. Towards this end, BSFIs must ensure that they have well-articulated information security guidelines, well-defined protocols, a secure database, and periodically re-validated procedures in handling the personal information of their financial consumers. This should be an end-to-end process that should cover, among others, the array of information that will be pre-identified and collected, the purpose and manner of gathering each information, the Information Technology (IT)-security infrastructure of the BSFI, and the protocols for disclosure, both within the BSFI and especially to third parties.

The BSFI demonstrates the ability to protect client information if it is able to:

- a. Have a written privacy policy to safeguard its consumers' personal information. This policy should govern the gathering, processing, use, distribution, storage, and eventual disposal of client information and the identification of levels of permissible access to consumer's data for employees. The BSFI should ensure that privacy policies and sanctions for violations are implemented and strictly enforced.

¹ This Section should be read in conjunction with existing regulations on IT Risk Management System and laws and regulations on data privacy.

- b. Ensure that privacy policies are regularly communicated throughout the organization.
- c. Have appropriate systems in place to protect the confidentiality and security of the personal data of its consumers against any threat or hazard to the security or integrity of the information and against unauthorized access. This includes a written information security plan that describes its program to protect consumer personal information. The plan must be appropriate to its size and complexity, nature and scope of its activities, and the sensitivity of consumer information it handles.
- d. Have a strong IT System in place to protect the confidentiality, security, accuracy, and integrity of consumer's personal information. This includes network and software design, as well as information processing, database storage, transmission, retrieval, and disposal. Security must be maintained throughout the life-cycle of consumer information, from data entry to disposal, and provide clear policies and procedures on data breaches including mechanisms to compensate consumers.
- e. Subject to the provisions of existing laws and regulations on data privacy, send written communication to its consumers informing and explaining how it will use and share the consumer's personal information.
- f. Obtain the consumers' written consent, unless in situations allowed as an exception by law or Bangko Sentral-issued regulations on confidentiality of consumer's information, before sharing consumers' personal information with third parties such as credit bureau, collection agencies, marketing and promotional partners, financial technologies that use a varied range of consumer data and other relevant external parties.
- g. Provide access to consumers to the information shared and allow consumers to challenge the accuracy and completeness of the information and have these amended as appropriate.

Fair treatment. This principle ensures that financial consumers are treated fairly, honestly, and professionally at all stages of its relationship with the BSFI. BSFIs shall adopt mechanisms to safeguard the interest of their consumers which shall include rules regarding ethical staff behavior, acceptable selling practices, fair and equitable terms and conditions, provision of products and services appropriate to the capacity and risk appetite of the consumers, among others, and incorporate the same in their policies and procedures, control functions and agreements with outsourced third parties.

The BSFI demonstrates the principle of fair treatment towards financial consumers if the policies and practices observe the following:

- a. Terms and conditions are not unfair in that there is significant imbalance in the parties' rights and obligations arising under the contract, to the detriment of the consumer.
- b. Product and services are offered with skill, due care and diligence and shall consider the consumers' financial situation, needs, capabilities and overall risk profile. Adequate product suitability and affordability mechanisms shall be in place subject to existing rules and regulations. If the requested products are of higher risk rating than a consumer's risk tolerance assessment results, the BSFI should draw the consumer's attention to the risk mismatch and provide a written disclosure of consequences which is accepted by the client. Product bundling should also take into consideration the product suitability and should not unduly limit consumer choice.
- c. Adequate product approval are in place to ensure that products and services are fit for the targeted consumer. Product development, review, distribution and after sales process shall take into consideration the risks to consumers.
- d. BSFIs do not unduly limit a consumer's ability to cancel or transfer the product to another provider as disclosed in the terms and conditions. As may be appropriate, BSFIs shall provide the consumer who is a natural person with a cooling off period subject to the following conditions:
 - (1) The "cooling-off" period shall be for a reasonable number of days, of at least two (2) banking days, immediately following the submission of any agreement or contract, particularly for financial instruments with a remaining term of at least one (1) year: *Provided*, That consumers with aggregate investment size of P500 thousand and above are excluded from invoking the cooling off period: *Provided, further*, That securities "traded" or "to be traded" are exempt from the coverage of the cooling-off period.
 - (2) Consumers may be permitted to cancel the agreement without penalty of any kind upon his or her written notice to the BSFI during the cooling-off period. The BSFI may however collect or recover reasonable amount of processing fees. Conditions and fees for products with automatic right to cooling off must be appropriately determined, discussed and explained to consumers.

- e. BSFI staff treats consumers with professional competence and in a manner that is fair and responsible. The BSFI shall:
- (1) Incorporate in its Code of Conduct (Code) the values and standards that uphold protection of consumers and embed the Consumer Protection Standards of Conduct; and have processes in place to detect, respond to and enforce sanctions on violations thereof.
 - (2) Align its recruitment and training policies around professional, fair and responsible treatment of clients, for instance:
 - (a) BSFI staff receives adequate training suitable for the complexity of the products or services they sell and are able to explain the key features of the product, including statutory and regulatory requirements.
 - (b) BSFI staff does not use deceptive or high pressure/aggressive sales techniques and should not force clients to sign contracts or rush into a financial deal without the benefit of shopping around.
 - (c) BSFI staff involved in collections, as well as agents contracted for the purpose, receives training in acceptable debt collection practices and loan recovery procedures consistent with existing relevant regulations.
 - (d) BSFI staff does not employ practices that discriminate or take advantage of difficulties faced by, vulnerable groups such as the low-income earners, and persons with disability.
 - (e) Establish policies and procedures that aim to protect consumers' deposits and other assets against internal or external fraud or misuse and have mechanisms in place to manage and resolve actual conflicts of interest with respect to compensation policies that arise in the interaction between their staff and agents and their consumers and potential consumers.
 - (3) Include ethical behavior, professional conduct, and quality of interaction with consumers as part of staff performance evaluations.
 - (4) Ensure that the remuneration structure for staff of BSFI and authorized agent is in a manner that encourages responsible business conduct, fair treatment and avoidance/mitigation of conflicts of interest.
 - (5) Perform appropriate due diligence before selecting the authorized agents/outsourced parties taking into account the agents' integrity, professionalism, financial soundness, operational capability and capacity, and compatibility with the FI's corporate culture and implement controls to monitor the agents' performance on a continuous basis.

Effective recourse. Financial consumers should be provided with accessible, affordable, independent, fair, accountable, timely, and efficient means for resolving complaints with their financial transactions. BSFIs should have in place mechanisms for complaint handling and redress, and may employ various modalities or technological innovations.

The BSFI demonstrates the ability to provide effective recourse if it is able to:

- a. Establish an effective Consumer Assistance Management System (CAMS) designed to receive, record, evaluate, resolve, monitor and report consumer complaints, concerns, inquiries or requests to be implemented by a designated officer, unit, group or department commensurate to the size, structure, nature of products and services, and complexity of operations, ensuring that there is no conflict of interest.
- b. Establish, maintain and implement internal policies and practices for a reasonable and prompt handling of consumer concern.
- c. Make available a wide range of channels in which consumers can conveniently lodge their complaints, inquiries and requests; and put in place a dedicated helpdesk or hotline for the said purpose.
- d. Maintain a management information system for the complaints from consumers that allows for consolidation, comparison and analysis on a regular basis including investigating whether complaints indicate an isolated issue or a more widespread issue for consumers. This analysis and reports of consumer complaints must have clear reporting and escalation structure within the BSFI's risk governance framework. The complaints reports shall be submitted in accordance with the existing regulations.
- e. Establish clear policies on investigation, resolution and restitution of complaints and making the process clear to the consumer.
- f. Ensure that information on the consumer assistance channels and applicable timelines for handling concerns are published in the following:

- (1) Terms and Conditions of a BSFI's product or service;
 - (2) Various channels of service delivery; and
 - (3) Conspicuous places within the premises of BSFI's and their branches/other offices.
- g. Provide for adequate resources to handle financial consumer complaints efficiently and effectively. Staff handling complaints should have appropriate experience, knowledge, and expertise. Depending on the BSFI's size and complexity of operation, a Senior staff member should be appointed to be in charge of the complaint handling process.

Financial education and awareness. Financial education initiatives give consumers the knowledge, skills, and confidence to understand and evaluate the information they receive and empower them to make informed financial decisions.

Because BSFI's deal directly with financial consumers, they have the reach, expertise, and established relationships ideal to deliver financial education, distinct and separate from information about their products. BSFI's should provide basic information on consumers' and the BSFI's rights and responsibilities.

BSFI's should demonstrate efforts at financial education, which may include digital literacy for products offered electronically, with the presence of programs whether as specific initiatives or as aspects embedded in their regular interface with consumers.

(Circular Nos. 1048 dated 06 September 2019, 1003 dated 16 May 2018, 930 dated 18 November 2016, 898 dated 14 January 2016, and 890 dated 02 November 2015)

1003 ENFORCEMENT ACTIONS

Consistent with Sec. 002, the Bangko Sentral may deploy enforcement actions to promote adherence to the Bangko Sentral Regulations on Financial Consumer Protection.

(Circular Nos. 1048 dated 06 September 2019 and 890 dated 02 November 2015)

PART ELEVEN

OTHER BANKING REGULATIONS

A. BANKING FEES/CHARGES

1101 ASSESSMENT FEES ON BANKS

Banks shall contribute to the Bangko Sentral an annual fee to help defray the cost of maintaining the appropriate supervising department of the Bangko Sentral in accordance with the following guidelines.

Annual fees on banks. For purposes of computing the annual fees chargeable against banks, the term “Total Assessable Assets” shall be the amount referred to as the total assets under Section 28 of R. A. No. 7653 (end-of-month total assets per balance sheet, after deducting cash on hand and amounts due from banks, including the Bangko Sentral and banks abroad), plus Trust Department accounts and personal equity and retirement accounts (PERA) administered by the bank.

Average Assessable Assets shall be the summation of the end-of-month total assessable assets divided by the number of months in operation during a particular assessment period. Beginning assessable year 2013, the rates of annual fees for banks for the current year shall be, as follows:

- | | |
|-------------------|--------------|
| a. UBs/KBs | - 1/28 of 1% |
| b. TBs | - 1/28 of 1% |
| c. RBs/Coop Banks | - 1/40 of 1% |

multiplied by the Average Assessable Assets of the preceding year: *Provided*, That the applicable rates for future assessable years shall be subject to review.¹

Securities held under custodianship shall be exempt from annual fees.

Annual fees to be collected from banks shall be debited from their respective deposit accounts with the Bangko Sentral by the Comptrollership Department upon receipt of the notice of the assessment from the appropriate supervising department of the Bangko Sentral.

Where the deposit account is insufficient to cover the assessment fee, the Comptrollership Department shall bill the bank for the full amount of the annual fee or for the balance thereof not covered by its deposit account, as the case may be.

Within thirty (30) calendar days from receipt of the bill, the bank shall make the corresponding remittance to the Bangko Sentral Accounting Department. Failure to pay the bill within the prescribed period shall subject the bank to administrative sanctions.

The guidelines in the collection of the annual supervisory fees are provided in *Appendix 91*.

(M-2019-009 dated 8 April 2019, Circular No. 903 dated 29 February 2016, M-2016-001 dated 24 February 2016, Circular Nos. 890 dated 02 November 2015, 878 dated 22 May 2015, M-2015-022 dated 06 May 2015, and M-2014-014 dated 20 March 2014)

1102 COLLECTION OF FINES AND OTHER CHARGES FROM BANKS

The following regulations shall govern the payment of monetary penalties and other charges by banks, and/or their directors and/or officers.

Guidelines on the imposition of monetary penalties.

- a. Statement of Policy

The Bangko Sentral recognizes the need to impose monetary penalties as one of the possible sanctions to hold banks, and/or their directors and/or officers accountable for their conduct and to deter the future commission of violations.

¹ With additional special regulatory relief in areas affected by Tropical Depression “Yolanda” as provided under *Appendix 93*. (Circular No. 820 dated 06 December 2013).

This subtopic sets forth the guidelines in the imposition of monetary penalties as may be warranted under the circumstances based on the following general principles laid down in the Bangko Sentral Supervisory Enforcement Policy provided under Sec. 002 taking into consideration their impact on the bank's financial condition:

- (1) Root cause diagnosis;
- (2) Consistently matching the severity of enforcement action to the supervisory issue;
- (3) Successive or simultaneous deployment of enforcement actions;
- (4) Monitorability and follow-through; and
- (5) Escalation of enforcement actions.

Accordingly, the Bangko Sentral may impose monetary penalties, singly or together with non-monetary sanctions, if applicable, even at the outset or as an escalated sanction.

- b. The following are the guidelines on the imposition of monetary penalties on banks, and/or their directors and/or officers and the payment of such monetary penalties and other charges:
 - (1) Banks, and/or their directors and/or officers shall be imposed the monetary penalties prescribed under applicable laws or other Bangko Sentral rules and regulations.

In the absence of provision on monetary penalty for the violation/ offense, banks and/or their directors and/or officers may be imposed a maximum monetary penalty of P30,000.00 per calendar day for each violation/ offense in accordance with the following schedule:

Asset Size Penalty Level ¹	High	Low
Up to P200 million	5,000	2,500
Above P200 million but not exceeding P500 million	10,000	5,000
Above P500 million but not exceeding P1 billion	15,000	7,500
Above P1 billion but not exceeding P10 billion	<u>20,000</u>	<u>10,000</u>
Above 10 billion but not exceeding P50 billion	<u>25,000</u>	<u>12,500</u>
Above P50 billion	<u>30,000</u>	<u>15,000</u>

The Bangko Sentral may use a penalty rate prescribed under the next higher range of asset size after considering the following attendant circumstances: (a) the harm caused or potential harm caused to the bank and/or its stakeholders; (b) the seriousness of the violation or irregularity; and (c) the intentionality and frequency; *Provided*, That the resulting penalty will have no adverse impact on the BSFI's operations, liquidity and/or capitalization.

If the monetary penalty is less than the gain derived or loss avoided by the bank and/or director and/or officer in committing the violation/s, the Bangko Sentral may assess total monetary penalties equivalent to the gain derived or loss avoided.

The appropriate supervising department of the Bangko Sentral shall notify the bank/director or officer concerned of the violation and the corresponding amount of monetary penalty, together with a directive for the bank/director or officer concerned to explain within fifteen {15} banking/business days from receipt of the letter why the assessed monetary penalty should not be imposed against it/him/her. The recommendation to impose monetary penalties shall be approved by the Governor or the Monetary Board, as the case may be. The decision of the Governor/Monetary Board shall be communicated to the bank/director or officer concerned.

However, the Bangko Sentral is not precluded from imposing non-monetary sanctions along with monetary penalties if circumstances so warrant.

¹ "High" penalty level is generally imposed on serious offenses/ violations such as unsafe or unsound practices; fraudulent acts; and major acts or omissions defined as the bank's/individual's failure to comply with the requirements of banking laws, rules and regulations, as well as Monetary Board directives/instructions which have/may have a material adverse impact on bank's solvency, liquidity or profitability. This penalty level may also be imposed as an escalated monetary penalty to violations previously meted with "low" penalty level.
"Low" penalty level is imposed on all other acts or omissions that cannot be classified under serious offenses/violations as described above.

- (2) *Basis for the computation of the period or duration of penalty.* The computation of the period or duration of all penalties shall be based on calendar days. For this purpose the terms “*per banking day*”, “*per business day*”, “*per day*” and/or “*a day*” as used in this Manual, and other Bangko Sentral rules and regulations shall mean “*per calendar day*” and/or “*calendar day*” as the case may be.

- (3) *Request for reconsideration or appeal.* A request for reconsideration on the monetary penalty approved by the Governor/Monetary Board is allowed. The bank/director or officer concerned shall be notified of the decision of the Governor/Monetary Board thereon. An appeal from the decision of the Governor on the request for reconsideration may be made to the Monetary Board.

A request for reconsideration or appeal shall be filed within fifteen (15) calendar days from receipt of the notice of the decision of the Governor/Monetary Board.

- (4) *Payment of monetary penalties.* Banks, and/or their directors and/or officers shall pay the monetary penalties within fifteen (15) calendar days from receipt of the notice of the decision of the Governor/Monetary Board or receipt of the notice of the decision denying the appeal or request for reconsideration, where applicable.

In the case of banks, penalties which remain unpaid after due date shall be automatically debited against their corresponding demand deposit account (DDA) with the Bangko Sentral. In the case of directors and/or officers, their employer bank shall advance the payment of the penalty to the Bangko Sentral in their behalf on or before due date through automatic debit of its DDA with the Bangko Sentral. In case the director and/or officer is no longer connected with the bank, payment thereof shall be for the account of the director and/or officer who shall pay directly to the Bangko Sentral in the form of cash or check or such other acceptable means of payment and in accordance with the provisions of Sec. 1102.

For uniform implementation of the above regulations, the procedural guidelines embodied in *Appendix 24*, shall be observed.

- (5) *Additional charge for late payment of monetary penalty.* Late payment or monetary penalty shall be subject to an additional charge of six percent (6%) per annum to be computed from the time said penalty becomes due and payable up to the time of actual payment.

Cost of checks and documentary stamps. Banks are given fifteen (15) days from receipt of invoice to settle their accounts with the Bangko Sentral Security Printing Plant for transactions representing the cost of printed checks and documentary stamps. Accounts not settled within fifteen (15) days will be debited against the bank's corresponding demand deposit account with the Bangko Sentral. A debit advice showing invoices paid shall be sent to the head office of the bank concerned.

Check/demand draft payments to the Bangko Sentral of thrift, cooperative and rural banks. TBs, Coop Banks and RBs shall make all check and demand draft payments for transactions other than those required to be paid through the banks DDA either to the Bangko Sentral Cash Department or to Bangko Sentral Regional Offices and Branches. Such payments shall be accompanied by an appropriate payment form as shown in *Appendix 31*. Payments not accompanied by the required payment forms shall be presumed to be additions to reserves and shall be credited to the demand deposit account of the paying bank.

(Circular No. 988 dated 20 December 2017)

1103 SERVICE FEE FOR TRANSACTIONS WITH THE BANGKO SENTRAL

The succeeding provisions under this Section provide the guidelines on the imposition of service fee on transaction of banks with the Cash Department (CD), Metro Manila Currency Operations Sub-Sector (MCOSS) and the Regional Offices and Branches, Regional Operations Sub-Sector (ROSS). The guidelines and procedures governing currency deposits and withdrawals of banks are provided in *Appendix 84*.

Fee structure on services offered by the CD, MCOSS and Bangko Sentral Regional Offices and Branches, ROSS. The following shall govern the transactions of banks with CD, MCOSS and Regional Offices and Branches, ROSS:

- a. Service fees for banknote deposits:

Type of Transaction	Applicable Service Fees
Fit banknote deposits	PHP 200 per bundle
Unfit banknote deposits	None

Type of Transaction	Applicable Service Fees
Mixed banknote deposits ¹	PHP 240 per bundle
Fit banknotes found in unfit banknote deposits verified	PHP 300 per bundle
Unfit banknotes found in fit banknote deposits verified ²	PHP 240 per bundle ³

- b. Reinstatement of Service fees for new and fit banknote withdrawals with modifications:

Denomination	Service Fee per Bundle (In PHP)	
	New	Fit
1000	200.00	140.00
500	100.00	70.00
200	40.00	28.00
100	20.00	14.00
50	10.00	7.00
20	4.00	3.00

- c. Penalty of PHP 5,000.00 for every cancelled withdrawal transaction;
- d. Provision for rebates, refunds and incentives for unfit banknote deposits which banks may avail within three (3) years:

Denomination	Rebate/Refund Amount per Bundle of Unfit Deposits (in PHP) ⁴		Incentive for Unfit Banknote Deposits in Excess of Total Withdrawals (per bundle, in PHP) ⁵
	New	Fit	
1000	160.00	100.00	50.00
500	60.00	30.00	15.00
200	40.00	28.00	14.00
100	20.00	14.00	7.00
50	10.00	7.00	3.50
20	4.00	3.00	1.50

1/ Rebate/Refund shall be based on total banknote withdrawals (fit and new)

2/ Total incentives shall not exceed total service fees of bank on withdrawal transactions

(Circular Nos. 1106 dated 23 December 2020, 931 dated 09 December 2016, 890 dated 02 November 2015, and M-2014-021 dated 03 May 2014)

B. PHILIPPINE & FOREIGN CURRENCY NOTES & COINS

1111 PHILIPPINE AND FOREIGN CURRENCY NOTES AND COINS

The following rules and regulations shall govern the treatment and disposition of counterfeit Philippine and foreign currency notes and coins, the reproduction and/or use of facsimiles of legal tender Philippine currency notes and coins, the replacement and redemption of legal tender Philippine currency notes and coins considered mutilated or unfit for circulation, and the treatment and disposition of Philippine currency notes and coins called in for replacement.

The guidelines and procedures governing currency deposits and withdrawals of banks for credit to and debit from their DDAs with the Bangko Sentral is provided in *Appendix 84*.

Definition of terms. For purposes of this Section, the following terms are defined:

- a. *Legal tender Philippine currency* – Notes and coins issued and circulating in accordance with R.A. No. 7653, which when offered for the payment of public or private debt must be accepted.
- b. *Counterfeit note* - An imitation of a legal and genuine note intended to deceive or to be taken for that which is original, legal and genuine.

¹ Only applicable to the Cash Department

² Only applicable to the Cash Department

³ Deposits classified as fit banknotes but found to include unfit banknote deposit shall be reclassified as mixed banknotes and accordingly charged an additional fee of PHP 40.00 per bundle (Total fee of PHP 240 less the PHP 200 fee paid for deposit of fit banknotes).

⁴ Rebate/Refund shall be based on total banknote withdrawals (fit and new)

⁵ Total incentives shall not exceed total service fees of bank on withdrawal transactions

- c. *Counterfeit coin* - An imitation or forged design of a genuine and legal coin regardless of its intrinsic value or metallic composition, intended to deceive or pass for the genuine coin.
- d. *Unauthorized reproduction of legal tender Philippine note* – A reproduction of a facsimile or any illustration or object bearing the likeness or similitude of legal tender Philippine currency note or any part thereof, without prior authority from the Governor of Bangko Sentral or his duly authorized representative.
- e. *Unauthorized reproduction of legal tender Philippine coin* - A reproduction of a facsimile or any object in metal form bearing the likeness or similitude of legal tender Philippine currency coin or any part thereof, without prior authority from the Governor of Bangko Sentral or his duly authorized representative.

Treatment and disposition of counterfeit Philippine and foreign currency notes and coins. Any person or entity, public or private, who receives or takes hold of a note or coin which is counterfeit or whose genuineness is questionable, whether Philippine or foreign currency, shall issue a temporary receipt to its owner/holder and must indicate therein his name, address and community tax certificate number or a reference number sourced from any Philippine government-issued ID or passport number, or in case of a foreigner, the date of receipt, the denomination, serial number of the note or the coin series as the case may be. The owner/holder shall be required to countersign the receipt and in case of refusal, the reason shall be stated in the receipt.

THE CURRENCY ISSUE AND INTEGRITY OFFICE

Security Plant Complex Bangko Sentral ng Pilipinas East Avenue,
Diliman 1101 Quezon City

In cases where personal delivery to the Currency Issue and Integrity Office (CIIO), Bangko Sentral ng Pilipinas, Quezon City, is not feasible, delivery of the afore stated notes or coins may be made through any of the following agencies:

- a. The Bangko Sentral Regional Offices/Branches; or
- b. Any banking institution under the supervision of the Bangko Sentral.

Any law enforcement agency which conducted any seizure of notes and coins, whether Philippine or foreign, which are counterfeits or suspected to be counterfeit currency, shall within five (5) working days from date of seizure, advise in writing the CIIO, Bangko Sentral ng Pilipinas, Quezon City of said seizure enclosing therewith a copy of the receipt and inventory taken on the seized items. All seized notes or coins which are not or no longer needed as evidence in any investigation/legal proceedings shall be immediately turned over to the CIIO, Bangko Sentral ng Pilipinas, for proper disposition.

The CIIO, Bangko Sentral ng Pilipinas, after examining all notes and coins, whether Philippine or foreign, submitted to it for examination and/or determination as to its genuineness, shall:

- (1) Issue a corresponding certification for the currency examined, if needed;
- (2) Stamp the word "COUNTERFEIT" on both the front and the back of each note found to be counterfeit; and
- (3) Return to the owner/holder, and/or sender the Philippine or foreign currency notes or coins found to be genuine in accordance with existing accounting and auditing regulations.

All notes and coins, whether Philippine or foreign, determined by the CIIO, Bangko Sentral ng Pilipinas, to be counterfeit currency, shall not be returned to the owner/holder, but shall be retained and later disposed of in accordance with such guidelines as may be adopted by the Bangko Sentral, except those which will be used as evidence in an investigation or legal proceedings, in which case, the same shall be retained and preserved by the Bangko Sentral for evidentiary purposes.

The Bangko Sentral shall extend assistance as may be requested of it in the investigation, apprehension and/or prosecution of person/s responsible for counterfeiting of notes and coins, both Philippine and foreign.

Reproduction and/or use of facsimiles of legal tender Philippine currency notes. No person or entity, public or private, shall design, engrave, print, make or execute in any other manner, or utter, issue, distribute, circulate or use any handbill, advertisement, placard, circular, card, or any other object whatsoever bearing the facsimile, likeness or similitude of any legal tender Philippine currency note, or any part thereof, whether in black and white or any color or combination of colors, without prior authority therefor having been secured from the Governor, Bangko Sentral or his duly authorized representative.

The reproduction and/or use of facsimiles or any illustration bearing the likeness or similitude of legal tender Philippine currency notes referred to above may be authorized by the Governor, Bangko Sentral, or his duly authorized representative, for printed illustrations in articles, books, journals, newspapers, or other similar materials and strictly for numismatic, educational, historical, newsworthy or other purposes which will maintain, promote or enhance the integrity and dignity of said note: *Provided, however,* That any such facsimile or illustration shall be of a size less than three-fifths (3/5) or more than one and one-half (1-1/2) times in size of the currency note being illustrated and that there will be no deviation from the purpose for which the notes will be used.

Reproduction and/or use of facsimiles of legal tender Philippine currency coins. No person or entity, public or private, shall design, engrave, print, make or execute in any other manner, or utter, issue, distribute, circulate or use any handbill, advertisement, placard, circular, card, or any other object whatsoever bearing the facsimile, likeness or similitude of any legal tender Philippine currency coin or any part thereof, in metal form, irrespective of size and metallic composition, without prior authority from the Governor, Bangko Sentral or his duly authorized representative.

The reproduction and/or use of facsimiles or of any object bearing the likeness or similitude of legal tender Philippine currency coins referred to above may be authorized by the Governor, Bangko Sentral, or his duly authorized representative, strictly for numismatic, educational, historical and other purposes which will maintain, promote or enhance the integrity and dignity of said coins.

Clean note and coin policy. As part of banks' duties to effect an expeditious withdrawal from circulation of unfit Philippine currency notes classified under Sec.1111 (*Replacement and redemption of legal tender Philippine currency notes and coins considered mutilated or unfit for circulation*), banks and their branches shall observe the guidelines and procedures governing currency deposits and withdrawals of banks provided in *Appendix 84*.

Provincial branches of banks may make direct deposits of currency notes, duly identified and sorted, with the nearest Bangko Sentral Regional Office/Branch. In areas where there are no Bangko Sentral Regional Offices/Branches, provincial branches of banks shall arrange with their respective Head Offices the shipment of their unfit or dirty notes for deposit with the CD, Bangko Sentral in Quezon City. Cost of shipment and other related expenses to be incurred shall be solely for the account of the bank concerned.

Coins submitted by banks to Bangko Sentral for deposit determination of redemption value shall be packed/bagged in accordance with the following procedure:

- a. Coins shall be free from adhesive tapes;
- b. Coins shall be sorted into fit, unfit or mutilated, per denomination and per series;
- c. Each bag of coins shall contain the following standard number of pieces and amount per denomination:

Denomination	Pieces Per Bag	Amount Per Bag
10-piso	1,200	12,000.00
5-piso	1,500	7,500.00
1-piso	2,000	2,000.00
25-sentimo	3,000	750.00
10-sentimo	4,500	450.00
5-sentimo	5,000	250.00
1-sentimo	5,000	50.00

Provided, however, That in the case of unfit or mutilated coins, these could be packed in amounts of One Thousand Pesos (P1,000.00) for denomination 10-, 5-, and 1-piso; and fifty pesos (P50.00) for 25-, 10-, 5-, and 1-sentimo.

The CD and the Regional Offices/Branches of Bangko Sentral may refuse acceptance of cash deposits that do not conform to these guidelines and procedures.

Replacement and redemption of legal tender Philippine currency notes and coins considered mutilated or unfit for circulation.

- a. *Unfit currency note.* A currency note shall be considered unfit for circulation when:
 - (1) It contains heavy creases which break the fiber of the paper and indicate that disintegration has begun; or
 - (2) It is badly soiled/contaminated and/ or with writings even if it has proper life or sizing; or
 - (3) It presents a limp or rag like appearance and/or it cannot sustain its upright position when held at the mid portion of one of the shorter borders.
- b. *Mutilated currency note.* A currency note shall be considered mutilated when:
 - (1) Torn parts of banknote are joined together with adhesive tape aimed at preserving as nearly as possible the original design and size of the note; or
 - (2) The original size of the note has been reduced/lost through wear and tear or has been otherwise torn, damaged, defaced or perforated through action of insects, chemicals or other causes; or
 - (3) It is scorched or burned to such an extent that although recognizable as such, it has become frail and brittle as to render further handling thereof impossible without disintegration or breaking; or
 - (4) It is split edgewise; or
 - (5) It has lost all the signatures inscribed thereon; or
 - (6) The Embedded Security Thread or Windowed Security Thread placed on the banknote is lost.

- c. *Unfit currency coin.* A currency coin shall be considered unfit for circulation when:
 - (1) It is bent or twisted out of shape or defaced, but its genuineness and/or denomination can still be readily and clearly determined/identified; or
 - (2) It has been considerably reduced in weight by natural abrasion/wear and tear.
- d. *Mutilated currency coin.* A currency coin shall be considered mutilated when:
 - (1) It shows signs of filing, clipping or perforation; or
 - (2) It shows signs of having been burned or has been so defaced, that its genuineness and/or denomination cannot be readily and clearly identified.
- e. Currency notes and coins considered unfit for circulation shall not be re-circulated, but may be presented for exchange to or deposited with any bank.
- f. Banks shall accept from the public mutilated notes and coins for referral/transmittal to CIO, Bangko Sentral – Quezon City or any of the Bangko Sentral Regional Offices/Branches for determination of redemption value. Banks may charge reasonable handling fees from clients and/or the general public relative to the handling/transporting to Bangko Sentral of mutilated notes and coins.
- g. The Bangko Sentral shall replace or redeem notes and coins considered unfit for circulation or mutilated except under the following conditions:
 - (1) Identification of notes and coins is impossible; or
 - (2) Coins that show signs of filing, clipping or perforations; or
 - (3) Notes which have lost more than two-fifths (2/5) of their surface or all of the signatures inscribed thereon; or
 - (4) Notes which are split edgewise resulting in the loss of the whole of or part of, either the face or back portion of the banknote paper; or
 - (5) Notes where the Embedded Security Thread or Windowed Security Thread placed thereon is completely lost except when the damage appears to be caused by wear and tear, accidental burning, action of water or chemical or bites of rodents/insects and the likes.

Notes and coins falling under any of the classifications mentioned under Item “g” above shall be withdrawn from circulation and demonetized without compensation to the owner/bearer.

Treatment and disposition of Philippine currency notes and coins called in for replacement. Any person or entity, public or private, who receives, takes, holds or has in his possession Philippine currency notes and coins called in for replacement shall forward the same during the redemption period to:

- a. Any authorized agent banks of the Bangko Sentral when the notes are still considered legal tender, within one (1) year from the date of call; or
- b. The CD or Regional Offices/Branches of the Bangko Sentral, within the redemption period as may be determined by the Monetary Board.

The CD or Regional Offices/Branches of the Bangko Sentral shall exchange the notes/coins called in for replacement if presented to the Bangko Sentral within the redemption period as determined by the Monetary Board and subsequently dispose the same in accordance with Bangko Sentral procedures for disposal.

Enforcement action. Consistent with Sec. 002, the Bangko Sentral may deploy enforcement actions to promote adherence to the requirements set forth in Sec. 1111 and its Subsections, and bring about timely corrective actions. The Bangko Sentral may issue directives or impose sanctions on the bank, for violation of the provisions of Sec. 1111 and its Subsections, which may include, among others, restrictions or prohibitions from certain authorities/activities. Sanctions may likewise be imposed on bank directors, officers and employees concerned.

Further, any violation of the provisions of Sec. 1111, shall subject the offender to imprisonment of not less than five (5) years, but not more than ten (10) years. In case the Revised Penal Code provides for a greater penalty, then that penalty shall be imposed.

(Circular Nos. 931 dated 09 December 2016, 930 dated 18 November 2016, 897 dated 06 January 2016, and 829 dated 13 March 2014)

1112 ADOPTION OF CLEAN NOTE AND COIN POLICY

The board of directors shall adopt a Clean Note and Coin Policy consistent with the principles and guidelines issued by the Bangko Sentral. The board of directors shall ensure that the policy takes a holistic approach to avoid biases in implementation in favor of certain areas or regions.

The Clean Note and Coin Policy shall include, among others, the following:

- a. *Coverage.* This shall emphasize that the policy shall be implemented bank-wide covering all branches.
- b. *Criteria to determine when a note/coin is to be pulled out of circulation.* This shall provide the conditions under which a currency is to be withdrawn from circulation as well as the system for properly segregating fit notes/coins from unfit notes/coins. This shall also cover the quality of notes to be loaded in automated teller machines.
- c. *Guidelines in ensuring that the life of currency notes/coins is extended.* This shall identify measures that deter unacceptable practices, such as, among others, stapling and writing on currencies, and excessive folding.
- d. *Deposit and/or exchange on a regular basis of unfit notes/coins with the Bangko Sentral.* This shall include safeguards that will ensure compliance with the guidelines set by the Bangko Sentral when making cash deposits with the Cash Department or any of the Regional Offices/Branches. Said policy shall include guidelines that aim to facilitate regular deposit and/or exchange with the various Bangko Sentral cash units of unfit notes/coins.

The board of directors shall ensure that on a periodic basis, consistent adherence to the clean note and coin policy is assessed, and that the continuing relevance and effectiveness of said policy is reviewed.

Compliance program. The clean note and coin policy shall be included in the Compliance Program. In this regard, the compliance function shall conduct periodic compliance testing to assess compliance with internal policies as well as with the principles and guidelines issued by the Bangko Sentral. Coverage of such testing shall include the head office and branches. Further, the compliance function shall periodically assess the risk of non-compliance with the said policy.

Internal audit. The internal audit function shall provide an independent assurance on the effectiveness of governance, risk management, and internal controls with respect to the bank's compliance with the clean note and coin policy. It shall conduct an independent review of operations to assess whether policies, procedures, and control processes are being effectively implemented or are still relevant considering the size, risk profile, and complexity of operations of the bank. The internal audit function shall ensure that the scope of audit shall cover the head office and the branches.

Supervisory enforcement action. The Bangko Sentral reserves the right to deploy its range of supervisory tools to promote adherence to the requirements set forth in this Section and bring about timely corrective actions and compliance with the Bangko Sentral directives. The Bangko Sentral may issue directives or impose sanctions on the bank, for violation of the provisions of this Section, which may include, among others, restrictions or prohibitions from certain authorities/activities. Sanctions may likewise be imposed on bank directors, officers, and employees concerned.

(Circular No. 931 dated 09 December 2016)

1113 CASH SERVICE ALLIANCE

The Cash Service Alliance (CSA) is a currency circulation mechanism that aims to enable all Authorized Agent Banks (banks) to enter into a mutually beneficial agreement to service requirements for fit Philippine currency of other banks from their available currency holdings.

The CSA aims to:

- a. Promote and facilitate efficient circulation of fit Philippine currency to support economic transactions;
- b. Provide a clear reference to accountability, roles and responsibilities of stakeholders;
- c. Ensure that proper and secured procedures are observed in the conduct of CSA transactions; and
- d. Strengthen cooperation among banks and enable their proactive role in currency circulations management.

The CSA general guidelines are provided in *Appendix 145*.

Enforcement Actions. Consistent with Sec. 002, the Bangko Sentral may deploy enforcement actions to promote adherence to the requirements set forth in this Section and bring about timely corrective actions. The Bangko Sentral may issue directives or impose sanctions on the bank, for violation of the provisions in this Section, which may include, among others, restrictions or prohibitions from certain authorities/activities. Sanctions may likewise be imposed on bank directors, officers and employees concerned.

(Circular No. 1099 dated 06 October 2020)

C. PERSONAL EQUITY AND RETIREMENT ACCOUNT (PERA)

1121 PERSONAL EQUITY AND RETIREMENT ACCOUNT (PERA) MARKET PARTICIPANTS AND PERA INVESTMENT PRODUCTS

The following are the guidelines on the qualification/accreditation of PERA Market Participants and PERA Investment Products which are being issued pursuant to R.A. No. 9505, also known as the PERA Act of 2008 (PERA Act), and its implementing Rules and Regulations (the PERA Rules).

The operational guidelines on the administration of the PERA are found in *Appendix 114*.

Applicability. These guidelines apply to banks, trust entities¹ and other entities determined by the Bangko Sentral as eligible that seek to be qualified/accredited and are qualified/accredited as PERA Market Participants, and to PERA Investment Products that are considered eligible by the Bangko Sentral for PERA purposes.

Eligibility criteria.

- a. *PERA investment products.* The following PERA investment products are considered to be Bangko Sentral-eligible PERA investment products: *Provided*, That, with respect to Items “(1)” and “(2)” below, they are issued by Bangko Sentral-supervised entities with CAMELS rating of not lower than “3” or its equivalent, to wit:

- (1) Unit investment trust fund (UITF);
- (2) Debt-instruments such as, but not limited to, long term negotiable certificate of deposits and unsecured subordinated debt;
- (3) Deposits; and
- (4) Government-issued securities.

In the case of UITF, the existing approval process shall be observed. The Bangko Sentral may allow other category of investment products or outlets for PERA purposes: *Provided*, That the product is non- speculative, readily marketable, and with a track record of regular income payments to investors.

- b. *PERA market participants*

PERA Market Participants	Eligible Entities
Administrator	Banks, trust entities and other entities as may be determined by the Bangko Sentral as eligible to act as PERA Administrator
Investment Manager	Trust entities and other entities as may be determined by the Bangko Sentral as having the qualifications to be accredited as PERA Investment Manager
Cash Custodian	Banks
Securities Custodian	Banks and trust entities
Investment Product Provider	Any Bangko Sentral-supervised entity that wishes to offer PERA Investment Product to Contributors

Qualification/Accreditation requirements.

- a. *As an Administrator.* The Bangko Sentral shall issue a Qualification Certificate as Administrator to an entity upon compliance with the following requirements:

- (1) The applicant shall have a net worth of at least Php100 million at all times.

Net worth shall refer to the total of the unimpaired paid- in capital, surplus and undivided profits, net of:

- (a) The required basic security deposit for the faithful performance of PERA Administrators’ duties;
- (b) Total outstanding unsecured credit accommodations, both direct and indirect, extended by the Administrator to DOSRI; and
- (c) Other capital adjustments as may be required by the Bangko Sentral.

¹ Trust entity shall refer to a (a) bank or non-bank financial institution, through its specifically designated business unit to perform trust functions, or (b) trust corporation, authorized by the Bangko Sentral ng Pilipinas to engage in trust and other fiduciary business under Section 79 of R.A. No. 8791 (General Banking Law of 2000) or to perform investment management services under Section 53 of R.A. No. 8791.

DOSRI cited in Item "1(b)" above shall refer to that provided in Sec. 341 (*Definitions*): *Provided*, That for purposes of this provision, references to a bank as an entity shall be understood to include references to any other type of entity acting as Administrator.

- (2) It has adopted a Manual of Corporate Governance approved by the Bangko Sentral, and is in full compliance therewith.
- (3) It has a clear and sufficient organization plan or structure of its personnel who will perform the PERA administration functions, stating the definition of the duties and responsibilities as well as the line and staff functional relationships.
- (4) It possesses adequate systems and technological capabilities, and the necessary technical expertise and personnel to administer all types of PERA investment products, ensure the proper recording and tracking of a contributor's PERA, and perform the other required functions of an Administrator.
- (5) It has sufficient personnel who have undergone the requisite training prescribed by the Bangko Sentral to educate the contributor on:
 - (a) The nature of a PERA;
 - (b) Privileges, conditions and requirements of a PERA;
 - (c) The risks and benefits of each type of PERA investment products; and
 - (d) Respective roles of the Administrator, Investment Manager and Custodian.
- (6) It has adopted the following forms that the Administrator shall use in dealing with the Contributor and his PERA:
 - (a) Pre-Acceptance Disclosure Policy described in PERA Rule 6.A.2.a;
 - (b) Client Suitability Assessment Questionnaire referred to in PERA Rule 6.A.2.b(i);
 - (c) Risk Disclosure Statement, which shall include the standard minimum information referred to in PERA Rule 6.A.2.d; and
 - (d) Contract between the Contributor and the Administrator referred to in PERA Rule 6.A.2.c.
- (7) It has a board-approved policy on fees and charges to be imposed for its services as Administrator which shall be subject to Bangko Sentral approval.

Failure to satisfy any of the above requirements shall be a ground for the denial of the application, without prejudice to the re-filing of an application.

An Administrator who has been issued with a "Qualification Certificate" shall then file an application for accreditation with the PERA Processing Office of the BIR to complete its application process to become a PERA Administrator.

- b. *As an Investment Manager.* The Bangko Sentral shall accredit an entity as an Investment Manager upon submission of a written application certified by the Chief Executive Officer (CEO) together with the following documentary requirements:
 - (1) Written supervision and control procedures for the conduct of the investment management functions;
 - (2) Proof of at least five (5) years of experience in professional investment management;
 - (3) Certified true copy of educational, professional/technical or other academic qualifications of its principal officers;
 - (4) Copy of its form contract to be utilized. The agreement between the contributor and the Investment Manager shall contain the following minimum contents:
 - (a) Overall investment philosophy, standards and practices of the Investment Manager; and
 - (b) Validation of contributor's Client Suitability Assessment and Investment Policy Statement made by contributor's Administrator referred to in PERA Rule 6.A.2.b (i) and (ii); and
 - (5) A schedule of commission charges and/or other fees it will charge for its services.

c. *As a custodian*

Cash custodian. In addition to the standard pre-qualification requirements for the grant of banking authorities enumerated in *Appendix 5*, banks applying for authority to act as cash custodian for PERA shall also comply with the following conditions:

- (1) The applicant bank must have complied with the minimum capital required under Sec. 121 (*Minimum Capitalization*); and

- (2) The Bank's CAMELS composite rating in its latest examination is not lower than "3" with Management component score of not lower than "3".

Securities custodian. Only banks and other entities with trust license which have complied with the requirements under Sec. 431 (*Pre-qualification requirements for a securities custodian/registry*) may be accredited as securities custodian.

For purposes of this Section, the Bangko Sentral may provide for such other requirements or qualifications as it may deem necessary for the qualification/accreditation of a supervised entity as a PERA Market Participant.

Application for qualification/accreditation. An eligible supervised entity seeking qualification/accreditation as PERA Market Participant (Administrator, Investment Manager, Cash Custodian or Securities Custodian) shall file an application for qualification/accreditation with the appropriate supervising department of the Bangko Sentral. The application shall be signed by the CEO and shall be accompanied by the following documents:

- a. Certified true copy of the resolution of the entity's board of directors authorizing the application;
- b. Certification signed by the CEO that the entity has complied with all the relevant qualification/accreditation requirements enumerated under this Section and an undertaking to comply with the aforementioned requirements while it acts as an Administrator, Investment Manager, Cash Custodian and/or Securities Custodian; and
- c. Relevant PERA forms, Board-approved policy on fees and charges, and proof of compliance with this Section insofar as the application of the Administrator is concerned.

The qualification/accreditation of PERA Market Participants and accreditation of PERA Investment Products granted by the Bangko Sentral shall be valid until revoked.

Security for the faithful performance of administrators' duties. As a security for the faithful performance of its duties under the PERA Act, an Administrator shall hold eligible government securities, equivalent to at least one half percent (0.5%) of the book value of the total volume of PERA assets administered, earmarked in favor of the Bangko Sentral: *Provided*, That the Administrator shall issue an authorization in favor of the Bangko Sentral to withdraw, dispose and disburse the proceeds thereof to settle any claims arising from the breach of its duties as evidenced by a final and executory court order; *Provided*, further, That the Administrator shall not withdraw, transfer or replace such earmarked securities without prior written instruction from the Bangko Sentral. The security for the faithful performance of the Administrator's duties shall be in addition to and shall be treated separately from the capital, surplus, and undivided profits of the Administrator.

For this purpose, eligible government securities shall consist of evidence of indebtedness of the Republic of the Philippines or of the Bangko Sentral or any other evidence of indebtedness or obligations the servicing and repayment of which are fully guaranteed by the Republic of the Philippines or such other kinds of securities which may be declared eligible by the Monetary Board: *Provided*, That, such securities shall be free, unencumbered, and not utilized for any other purpose: *Provided*, further, That such government securities shall have remaining maturities of not more than three (3) years from the date the securities have been earmarked in favor of the Bangko Sentral.

The requirement for the above-mentioned government securities to have remaining maturity of not more than three (3) years from date of deposit with the Bangko Sentral shall no longer apply starting 31 March 2018.

- a. *Valuation of securities and basis of computation of the basic security deposit requirement.*

Prior to 31 March 2018:

- (1) For purposes of determining compliance with the security for the faithful performance of administrators under the PERA Act, the amount of securities so earmarked shall be based on their book value, that is, cost as increased or decreased by the corresponding discount or premium amortization.
- (2) The base amount for the basic security deposit shall be the average of the month-end balances of administered assets for the immediately preceding calendar quarter.

The provisions under Item "a(i)" above shall no longer apply effective 31 March 2018. Meanwhile, Item "a(ii)" shall no longer apply starting the reporting period 31 December 2019. The provisions on the valuation of government securities shall be adopted, as follows:

- (a) Government securities deposited with the Bangko Sentral shall be measured at fair value according to the marking-to-market guidelines for government securities under *Appendix 28*, subject to applicable haircuts (effective 31 March 2018).

The haircuts that shall be applied to the government securities shall be as follows:

Residual Maturity	Minimum Haircut (in Percent) for Basic Security Deposit
3 years and below	0.0
>3 years up to 5 years	2.0
>5 years	4.0

- (b) The base amount for the basic security deposit shall be the PERA assets reported as of the end of the calendar quarter (effective 31 December 2019).

b. *Compliance with the basic security deposit requirement.*

- (1) Compliance¹. The Administrator shall ensure compliance with the required basic security deposit at all times. Any deficiency arising from a withdrawal, replacement or redemption transaction must be corrected through the immediate posting of additional securities. In case a deficiency is calculated at the end of the calendar quarter, the Administrator shall have a grace period of thirty (30) calendar days reckoned from the end of the reference calendar quarter within which to deposit with the Bangko Sentral the securities required under this Section.

- (a) *Quarterly compliance.* The Administrator shall comply with the basic security deposit requirement on a quarterly basis. In determining quarterly compliance, the fair value of government securities used as compliance with the basic security deposit requirement shall be reckoned as of the end of the calendar quarter and the base amount for the basic security deposit requirement provided under Item “a” of this Section (*Security for the faithful performance of administrators*) shall be applied.

Haircuts for government securities as provided under Item “a” of this Section (*Security for the faithful performance of administrators*) shall be determined based on the remaining maturity of the security from the end of the reference quarter, and applied on the fair value of the government securities used as compliance with the basic security deposit.

- (b) *Compliance upon deposit, withdrawal, replacement or redemption.* The Administrator shall ensure compliance with the basic security deposit requirement after every deposit, withdrawal, replacement or redemption of government securities. The basic security deposit requirement shall be the amount computed as of the quarter-end preceding the date of deposit, withdrawal, replacement or redemption pursuant to Item “a” of this Section (*Security for the faithful performance of administrators*). The fair value of the remaining government securities, adjusted for the relevant haircuts, shall also be based on amounts reported as of the quarter-end preceding the date of withdrawal, replacement or redemption pursuant to Item “a” of this Section (*Security for the faithful performance of administrators*). The haircuts shall be determined based on the remaining maturity of the security from the quarter-end preceding the date of the securities transfer transaction.

Securities used as compliance with the basic security deposit requirement that are issued within the calendar quarter shall be valued at their purchase price, adjusted for relevant haircuts that are determined based on their remaining maturity as of the purchase date.

- (2) Required Reports. The Administrator shall submit the following reports in accordance with *Appendix 7*.

- (a) Quarterly Report on Compliance with the Basic Security Deposit Requirement (BSD-PERA-Form-1); and
(b) Report on Basic Security Deposit Transactions (BSD-PERA-Form-2).

Administrators shall maintain adequate documentation (e.g., screenshots of fair values) to support the computation of their compliance with the basic security deposit requirement, which shall be made available to the Bangko Sentral upon request.

- (3) Other Procedural Requirements.

- (a) Opening of a securities account. The guidelines on the opening of an account with the BTr Registry are provided in *Appendix 30*.
(b) Deposit, withdrawal or replacement. The Administrator shall input the details of securities transfer transactions that are properly supported by notification reports in the BTr Registry to effect the deposit, withdrawal or replacement of securities on the intended date of transfer in the BTr Registry.

¹ The provisions on quarterly compliance and compliance upon deposit, withdrawal, replacement or redemption became effective on 31 March 2018.

The input of details of transactions shall be made on or before 12:00 noon for withdrawal or replacement transactions, and on or before 3:30 pm for deposit transactions, on the intended date of transfer as provided in the BSD-PERA-Form-2.

Withdrawal or replacement transactions entered after the cut-off time shall be processed on the next banking day: *Provided*, That the Administrator re-enters the details of the withdrawal or replacement transaction on or before 12:00 noon of the next banking day: *Provided further*, That deficiency in the basic security deposit arising from failure of the Administrator to input details of withdrawal or replacement transactions in the BTr Registry on the intended date of transfer shall cause the imposition of sanctions/penalties under this Section. Failure to enter or re-enter the transaction details on the next banking day will result in the cancellation of the previously submitted BSD-PERA-Form-2. To effect withdrawal or replacement transactions, the Administrator shall re-submit the BSD-PERA-Form-2 in accordance with the prescribed timelines.

- (c) Administration of proceeds from deposited securities. Coupon or interest payments and the redemption value of matured securities that are deposited with the Bangko Sentral shall be credited to the DDA of the Administrator or the DDA of the Administrator's settlement bank.

Administrators shall develop and maintain systems to ensure compliance with the required basic security deposit as prescribed in this Section (*Security for the faithful performance of administrators*).

(4) Sanctions.

- (a) An administrator which incurs a deficiency with the basic security deposit within the quarter, or reports a deficiency with the basic security deposit as of the end of the quarter and fails to deposit securities to comply with the said requirement within the one (1)-week grace period, shall be considered deficient with the basic security deposit requirement from the date the deficiency is incurred up to the date the deficiency is corrected or the succeeding quarter-end, whichever comes earlier.

Any non-compliance with the security requirements shall be subject to Sections 36 and 37 of R.A. No. 7653 also known as the New Central Bank Act without prejudice to the imposition of other sanctions as the Monetary Board may consider warranted under the circumstances that may include the suspension or revocation of the entity's authority to engage in PERA administration, and such other sanctions as may be provided by law.

- (b) Notwithstanding the execution of a basic security deposit, withdrawal, or replacement transaction, the Bangko Sentral is not precluded from imposing sanctions against the Administrator for non-compliance with the regulations on the basic security deposit, if warranted.

Grounds for suspension or revocation of qualification/accreditation of administrator, investment manager of custodian. The qualification of an Administrator, and the accreditation of an Investment Manager and Custodian may be refused, restricted, suspended or revoked by the Bangko Sentral if, after due notice and hearing, the Bangko Sentral determines that the applicant or licensee has:

- a. Willfully violated any provision of the PERA Act, the PERA Rules or any regulations and issuances by the Bangko Sentral made pursuant thereto, or any other law administered by the Bangko Sentral relevant to its function as a PERA Market Participant, or not providing prudential standards for asset management or has aided, abetted, counseled, commanded, induced or procured such violation;
- b. Failed to supervise, with a view to preventing such violation, a person associated to the applicant or licensee by virtue of an arrangement or other types of arrangement and who commits such violation;
- c. Willfully made or caused to be made a materially false or misleading statement in the application for qualification/accreditation or report filed with the Bangko Sentral, or has willfully omitted to state any material fact that is required to be stated therein or necessary to make the statement therein not misleading;
- d. Failed to maintain the qualifications or requirements for accreditation prescribed under the PERA Rules, these guidelines or has failed to maintain compliance with any of them;
- e. Failed to carry on and manage its PERA-related business and activities in a proper, diligent and efficient manner to the prejudice of the Contributor;
- f. Been subject to regulatory sanctions for (a) violations, which the Bangko Sentral determines to affect its operation conditions and ability as a PERA Market Participant, such as but not limited to violations affecting required capitalization and/or solvency, or (b) any act or behavior prejudicial to the PERA Contributors;

- g. Been enjoined or restrained by a competent body from engaging in securities, banking or insurance activities;
- h. Failed to enforce or monitor PERA contribution limits entitled to tax incentives; or
- i. Failed to manage or adequately address conflicts of interest in the performance of its functions, which may be identified by the Bangko Sentral as prejudicial to the interests of the PERA Contributor.

For purposes of this Subsection, the term “*competent body*” shall include a foreign court of competent jurisdiction and a foreign financial regulator.

Penalty. A fine of not less than Php50 thousand nor more than P200 thousand or imprisonment of not less than six (6) years and one (1) day to not more than twelve (12) years or both, such fine and imprisonment at the discretion of the court, shall be imposed upon any person, association, partnership or corporation, its officer, employee or agent, who, acting alone or in connivance with others, shall:

- a. Act as administrator, custodian or investment manager without being properly qualified or without being granted prior accreditation by the Bangko Sentral;
- b. Invest the contribution without written or electronically authenticated authority from the Contributor, or invest the contribution in contravention of the instructions of the Contributor;
- c. Knowingly and willfully make any statement in any application, report, or document required to be filed under the PERA Act, which statement is false or misleading with respect to any material fact;
- d. Misappropriate or convert, to the prejudice of the Contributor, contributions to and investments or income from the PERA;
- e. By gross negligence, cause any loss, conversion, or misappropriation of the contributions to, or investments from the PERA; or
- f. Violate any provision of the PERA Act or rules and regulations issued pursuant to the PERA Act.

Notwithstanding the foregoing, any willful violation by the accredited administrator, custodian or investment manager of any of the provisions of the PERA Act, the PERA Rules, relevant rules and regulations issued by the Bangko Sentral or other terms and conditions of the authority to act as administrator, custodian or investment manager may be subject to the administrative sanctions provided for in applicable laws such as those set forth in Section 37 of R.A. No. 7653.

The above penalties shall be without prejudice to whatever civil and criminal liability provided for under applicable laws for the same act or omission such as those set forth in Sections 35 and 36 of R.A. No. 7653.

Reportorial requirements. An entity qualified/accredited by the Bangko Sentral to be a PERA Market Participant shall comply with the reportorial requirements that may be prescribed by the Bangko Sentral.

(Circular Nos. 1081 dated 04 March 2020, 1032 dated 15 February 2019, 998 dated 1 March 2018, 890 dated 02 November 2015, M-2014-045 dated 2 December 2014, and Circular No. 860 dated 28 November 2014)

D. CREDIT RATING AGENCIES

1131 RECOGNITION AND DERECOGNITION OF DOMESTIC CREDIT RATING AGENCIES FOR BANK SUPERVISORY PURPOSES

The following regulations shall govern the recognition and derecognition of domestic credit rating agencies (CRAs) for bank supervisory purposes.

Statement of policy. The introduction in the financial market of new and innovative products create increasing demand for and reliance on CRAs by the industry players and regulators as well. As a matter of policy, the Bangko Sentral wants to ensure that the reliance on credit ratings is not misplaced. The following rules and regulations that shall govern the recognition/derecognition of domestic CRAs for bank supervisory purposes.

Minimum eligibility criteria. Only ratings issued by CRAs recognized by the Bangko Sentral shall be considered for Bangko Sentral bank supervisory purposes. The Bangko Sentral, through the Monetary Board, may officially recognize a credit rating agency upon satisfaction of the following requirements:

- a. *Organizational structure*
 - (1) A domestic CRA must be a duly registered company under the Securities and Exchange Commission (SEC); and
 - (2) A domestic CRA must have at least five (5) years track record in the issuance of reliable and credible ratings. In the case of new entrants, a probationary status may be granted: *Provided*, That the CRA employs professional analytical staff with experience in the credit rating business.

b. *Resources*

(1) Human Resources

- (a) The size and quality of the CRA's professional analytical staff must have the capability to thoroughly and competently evaluate the assessed/rated entity's creditworthiness;
- (b) The size of the CRA's professional analytical staff must be sufficient to allow substantial on-going contact with senior management and operational levels of assessed/rated entities as a routine component of the surveillance process;
- (c) The CRA shall establish a Rating Committee composed of adequately qualified and knowledgeable individuals in the rating business, majority of whom must have at least five (5) years experience in credit rating business;
- (d) The directors of the CRA must possess a high degree of competency equipped with the appropriate education and relevant experience in the rating business;
- (e) The directors, officers, members of the rating committee and professional analytical staff of the CRA have not at any time been convicted of any offense involving moral turpitude or violation of the Securities Regulation Code; and
- (f) The directors, officers, members of the rating committee and professional analytical staff of the CRA are not currently involved as a defendant in any litigation connected with violations of the SRC nor included in the Bangko Sentral watchlist.

(2) Financial Resources

- (a) The CRA must have the financial capability to invest in the necessary technological infrastructure to ensure speedy acquisition and processing of data/information and timely release of reliable and credible ratings; and
- (b) The CRA must have financial independence that will allow it to operate free from economic and political pressures.

c. *Objectivity*

- (1) The CRA may use a rigorous and systematic assessment methodology that has been established for at least one (1) year; however, a three (3)-year period is preferable;
- (2) The assessment methodology of the CRA must be based both on qualitative and quantitative approaches; and
- (3) The CRA must use an assessment methodology that is subject to on-going review and is responsive to changes in the operations of assessed/rated entities.

d. *Independence*

- (1) The CRA must be free from control of and undue influence by the entities it assesses/rates;
- (2) The assessment process must be free from ownership pressures to allow management to exercise independent professional judgment;
- (3) Persons directly involved in the assessment process of the CRA are free from conflicts of interest with assessed/rated entities; and
- (4) The CRA does not assess/rate an associate entity.

e. *Transparency*

- (1) A general statement of the assessment methodology used by the CRA should be publicly available;
- (2) The CRA shall disseminate to the public thru a well-circularized publication, all assigned ratings disclosing whether the rating issued is solicited or unsolicited;
- (3) The rationale of ratings issued and risk factors considered in the assessment should be made available to the public;
- (4) The ratings issued by the CRA should be available both to domestic and foreign institutions with legitimate interest; and
- (5) Publication of changes in ratings together with the basis for the change should be done on a timely basis.

f. *Disclosure requirements*

(1) Quantitative disclosures

- (a) Definition of ratings along with corresponding symbols;
- (b) Definition of what constitutes a default, time horizon within which a default is considered and measure of loss given a default; and
- (c) Material changes within the CRA (i.e., changes in management or organizational structure, rating personnel, modifications of rating practices, financial deterioration) that may affect its ability to provide reliable and credible ratings.

(2) Quantitative disclosures

- (a) Actual default rates experienced in each rating category; and
- (b) Rating transitions of assessed/rated entities over time (i.e., likelihood of an AAA credit rating transiting to AA etc. over time).

g. *Credibility*

- (1) The CRA must have a general reputation of high standards of integrity and fairness in dealing with its clients and conducts its business in an ethical manner;
- (2) The CRA is generally accepted by predominant users in the market (i.e., issuers, investors, bankers, financial institutions, securities traders); and
- (3) The CRA must carry out its rating activities with due diligence to ensure ratings are fair and appropriate.

For purposes of this Section, a *subsidiary* refers to a corporation, more than fifty percent (50%) of the voting stock of which is owned or controlled directly or indirectly by the CRA while an affiliate refers to a corporation, not more than fifty percent (50%) but not less than ten percent (10%) of the voting stock of which is owned or controlled directly or indirectly by the CRA.

“Control” exists when the parent owns directly or indirectly through subsidiaries more than a half (1/2) of the voting power of an enterprise unless, in exceptional circumstance, it can be clearly demonstrated that such ownership do not have constitute control. Control may also exist even when ownership is a half (1/2) or less of the voting power of an enterprise when there is:

- (a) power over more than a half (1/2) of the voting rights by virtue of an agreement with other stockholders;
- (b) power to govern the financial and operating policies of the enterprise under a statute or an agreement;
- (c) power to appoint or remove the majority of the members of the board of directors or equivalent governing body;
- (d) power to cast the majority votes at meetings of the board of directors or equivalent governing body; or
- (e) any other arrangement similar to any of the above.

h. *Internal compliance procedures*

- (1) The CRA must have the necessary internal procedures to prevent misuse or unauthorized disclosure of confidential/non-public information; and
- (2) The CRA must have rules and regulations that prevent insider trading and other conflict of interest situations.

Pre-qualification requirements. The application of a domestic CRA for Bangko Sentral recognition shall be submitted to the appropriate supervising department of the Bangko Sentral together with the following information/documents:

a. *An undertaking*

- (1) That the CRA shall comply with regulations, directives and instructions which the Bangko Sentral or other regulatory agency/body may issue from time to time; and
- (2) That the CRA shall notify the Bangko Sentral in writing of any material changes within the organization (i.e., changes in management or organizational structure, rating personnel, modifications of its rating practices, financial deterioration) that may affect its ability to provide reliable and credible ratings.

b. *Other documents/information*

- (1) Brief history of the CRA, major rating activities handled including information on the name of the name of the client, type of instruments rated, size and year of issue;

- (2) Audited financial statements for the past three (3) years and such other information as the Monetary Board may consider necessary for selection purposes;
- (3) For new entrants, employment of professional analytical staff with experience in the credit rating business;
- (4) List of major stockholders/partners (owning at least ten percent (10%) of the voting stocks of the CRA directly or along with relatives within the 1st degree of consanguinity or affinity);
- (5) List of directors, officers, members of the rating committee and professional analytical staff of the CRA, including their qualifications, experience related to rating activities, directorship and shareholdings in the CRA and in other companies, if any;
- (6) List of subsidiaries and affiliates including their line of business and the nature of interest of the CRA in these companies;
- (7) Details of the denial of a previous request for recognition, if any (i.e., application date, date of denial, reason for denial etc.); and
- (8) Details of all settled and pending litigations connected with the securities market against the CRA, its directors, officers, stockholders, members of the rating committee and professional analytical staff, if any.

Inclusion in Bangko Sentral list. The Bangko Sentral will regularly circularize to all banks and NBFIs an updated list of recognized CRAs. The Bangko Sentral, however, shall not be liable for any damage or loss that may arise from its recognition of CRAs to be engaged by users.

Derecognition of credit rating agencies.

- a. ***Grounds for derecognition.*** Credit rating agencies may be derecognized from the list of the Bangko Sentral recognized CRAs under the following circumstances:
 - (1) Failure to maintain compliance with the requirements under Sec. 1131; (*Minimum eligibility criteria*) or any willful misrepresentation in the information/documents required under Sec. 1131 (*Prequalification requirements*);
 - (2) Involvement in illegal activities such as ratings blackmail; creation of a false marker or insider trading; divulging any confidential information about a client without prior consent to a third party without legitimate interest; indulging in unfair competition (i.e., luring clients of another rating agency by assuring higher ratings etc.); and
 - (3) Any violations of applicable laws, rules and regulations.
- b. ***Procedure for derecognition.*** A CRA shall only be derecognized upon prior notice and after being given the opportunity to defend itself.

Recognition of PhilRatings as domestic credit rating agency for bank supervisory purposes. Credit ratings assigned by Philippine Ratings Service Corporation (PhilRatings) may be used, among others, for determining appropriate risk weights in ascertaining compliance with existing rules and regulations on risk-based capital requirements.

1132 INTERNATIONALLY ACCEPTED CREDIT RATING AGENCIES

Internationally accepted CRAs are recognized for bank supervisory purposes to undertake local and national ratings: *Provided*, That said CRAs shall have at least a representative office in the Philippines. Accordingly, credit ratings assigned by said CRAs may be used, among others, as basis for determining appropriate risk weights in ascertaining compliance with existing rules and regulations on risk-based capital requirements.

Recognition of Fitch Singapore Pte., Ltd. as International credit rating agency for bank supervisory purposes. The national or domestic credit ratings of Fitch Singapore Pte. Ltd., a BSP-recognized international CRA with representative office in the Philippines, is hereby recognized by the Bangko Sentral for bank supervisory purposes. Accordingly, national or domestic credit ratings assigned by Fitch Singapore Pte. Ltd. may be used, among others, as basis for determining appropriate risk weights in ascertaining compliance with existing rules and regulations on risk-based capital requirements.

1133 RECOGNITION AND DERECOGNITION OF MICROFINANCE INSTITUTION RATING AGENCIES

The following regulations shall govern the recognition and derecognition of Microfinance Institution Rating Agencies (MIRA) that provide ratings for banks with microfinance operation.

Statement of policy. Third-party ratings of FIs provide an independent assessment which will ultimately benefit stakeholders, including the management of the covered FI. For microfinance institutions, the enhanced transparency and independent assessment can materially improve access to capital of qualified institutions and generate a useful benchmark vis-à-vis other microfinance institutions. As a matter of policy, the Bangko Sentral supports an enabling environment for the appropriate use of objective, credible and competent third-party ratings of microfinance institutions.

Pre-qualification requirements. The application of a MIRA for Bangko Sentral recognition shall be submitted to the appropriate supervising department of the Bangko Sentral together with the following information/documents:

- a. An undertaking that:
 - (1) the MIRA shall comply with regulations, directives and instructions which the Bangko Sentral may issue from time to time; and
 - (2) the MIRA shall notify the Bangko Sentral in writing of any material changes within the organization (such as but not limited to changes in management or organizational structure, rating personnel, modifications of its rating practices and financial deterioration) that may affect its ability to provide reliable and credible ratings.
- b. Other documents/information:
 - (1) Brief history of the MIRA, major rating activities handled including information on the name of the client, type of instruments rated, size and year of issue;
 - (2) Audited financial statements for the past three (3) years and such other information that may be considered relevant for selection purposes;
 - (3) List of major stockholders/partners (owning at least ten percent (10%) of the voting stocks of the MIRA directly or together with relatives within the 1st degree of consanguinity or affinity);
 - (4) List of directors, officers, members of the rating committee and professional analytical staff of the MIRA; including their qualifications, experience related to rating activities, directorship and shareholdings in the MIRA and in other companies, if any;
 - (5) List of subsidiaries and affiliates including their line of business and the nature of interest of the MIRA in these companies;
 - (6) Details of the denial of a previous request for recognition, if any (such as application data, date of denial, reason for denial, etc.); and
 - (7) Details of all previous and pending litigations connected with the securities market against the MIRA, its directors, officers, stockholders, members of the rating committee and professional analytical staff, if any.

Minimum eligibility criteria. The Bangko Sentral will review the application based on the following basic principles:

- a. The proposed rating framework that will be used by the applicant-MIRA reflects all the material facets of microfinance operations, its attendant risks and operational challenges; and
- b. The applicant-MIRA demonstrates the technical capability, experience and organization to provide microfinance ratings that are objective, credible and transparent.

Based on the above principles, the Bangko Sentral, through the Monetary Board, may officially recognize a MIRA upon satisfaction of the following requirements. The official recognition shall be valid for a period of three (3) years and may be renewed upon assessment that the following requirements are satisfied.

- c. Organizational structure
 - (1) A MIRA must be duly registered with the SEC and have the necessary permits to operate;
 - (2) A MIRA must have at least five (5) years track record in the issuance of reliable and credible ratings with particular experience in microfinance; and
 - (3) An international MIRA that will undertake local ratings shall have a representative office in the Philippines.

d. Resources

(1) Human resources

- (a) A MIRA must be staffed by full-time analysts who have the demonstrated capability to competently assess the credit-worthiness of a microfinance institution (MFI). The analysts referred herein preclude support staff engaged in other functions such as, but not limited to, marketing and administration;
- (b) A MIRA must have a sufficient number of analysts so as to allow substantive interaction with the senior management and operating units of the assessed/rated entities as a routine component of the surveillance process;
- (c) The MIRA shall establish a Rating Committee, independent of its analysts, whose members have unquestionable expertise in the rating business, majority of whom must have at least five (5) years direct professional experience in rating institutions;
- (d) The directors of the MIRA must possess a high degree of competency equipped with the appropriate education and relevant experience in the rating business;
- (e) The directors, officers, members of the Rating Committee and professional analytical staff of the MIRA have not at any time been convicted of any offense involving moral turpitude or violation of the Securities Regulation Code; and
- (f) The directors, officers, members of the Rating Committee and professional analytical staff of the MIRA are not currently involved as a defendant in any litigation connected with violations of the Securities Regulation Code nor included in the Bangko Sentral watchlist.

(2) Financial resources

- (a) The MIRA must have financial capability to support viable operations such as, but not limited to, the necessary technology and infrastructure to ensure the effective processing of data/information and the timely release of reliable and credible ratings; and
- (b) The MIRA must have financial independence that will allow it to operate free from economic and political pressures.

e. Objectivity

- (1) The MIRA must employ an assessment methodology which is accepted as a global standard. Where the MIRA uses its own proprietary framework, said methodology must have been in market use for at least three (3) years with demonstrable credibility;
- (2) The assessment methodology used by the MIRA must be based both on qualitative and quantitative approaches; and
- (3) Said assessment methodology must be subjected to periodic review to ensure that it is responsive to changes in the operations of assessed/rated entities.

f. Independence

- (1) The MIRA must be free from control of and undue influence by the entities it assesses/rates;
- (2) The assessment process must be free from ownership pressures to allow the management of the MIRA to exercise independent professional judgment;
- (3) Persons directly involved in the assessment process of the MIRA are free from conflicts of interest with assessed/rated entities; and
- (4) The MIRA cannot assess/rate its affiliate or subsidiary or any other entity in which the MIRA has control.

For purposes of this section, a *subsidiary* refers to a corporation, more than fifty percent (50%) of the voting stock of which is owned or controlled directly or indirectly by the MIRA, while an *affiliate* refers to a corporation, not more than fifty percent (50%) but not less than ten percent (10%) of the voting stock of which is owned or controlled directly or indirectly by the MIRA. "Control" exists when the parent owns directly or indirectly through subsidiaries more than one half (1/2) of the voting power of an enterprise unless, in exceptional circumstance. It can be clearly demonstrated that such ownership does not constitute control. Control may also exist even when ownership is one half (1/2) or less of the voting power of an enterprise when there is:

- (a) power over more than one half (1/2) of the voting rights by virtue of an agreement with other stockholders;
- (b) power to govern the financial and operating policies of the enterprise under a statute or an agreement;

- (c) power to appoint or remove the majority of the members of the board of directors or equivalent governing body;
 - (d) power to cast the majority votes at meeting of the board of directors or equivalent governing body; or
 - (e) any other arrangement similar to any of the above.
- g. Transparency
 - (1) A general statement of the assessment methodology used by the MIRA should be publicly available;
 - (2) The rationale of ratings issued and risk factors considered in the assessment should be made available to the public; and
 - (3) The ratings issued by the MIRA should be available both to domestic and foreign institutions with legitimate interest.
- h. Disclosure requirements
 - (1) Qualitative disclosures
 - (a) Definition of ratings along with corresponding symbols; and
 - (b) Material changes within the MIRA (such as but not limited to changes in management or organizational structure, rating personnel, modification of rating practices, financial deterioration) that may affect its ability to provide reliable and credible ratings.
 - (2) Quantitative Disclosures. Rating transitions of assessed/rated entities over time, i.e., the likelihood that the current rating of an entity will change to another rating (either higher or lower) over time.
- i. Credibility
 - (1) The MIRA must have a general reputation of high standards of integrity and fairness in dealing with its clients and conducts its business in ethical manner;
 - (2) The MIRA is generally accepted by predominant users in the market (i.e., issuers, investors, bankers, FIs, securities traders); and
 - (3) The MIRA must carry out its rating activities with due diligence to ensure ratings are fair and appropriate.
- j. Internal compliance procedures
 - (1) The MIRA must have the necessary internal procedures to prevent misuse or unauthorized disclosure of confidential/non- public information; and
 - (2) The MIRA must have rules and regulations that prevent insider trading and other conflict of interest situations.

Derecognition of MIRA.

- a. Grounds for derecognition. MIRAs may be derecognized, upon evaluation of the appropriate supervising department of the Bangko Sentral, under the following circumstances:
 - (1) Any willful misrepresentation and/ or falsification of information/documents required under this Section.
 - (2) Failure to maintain compliance with the requirements under this Section.
 - (3) Involvement in illegal activities such as ratings blackmail; creation of a false market or insider trading; divulging any confidential information about a client without prior consent to a third party without legitimate interest; indulging in unfair competition (such as luring clients of another rating agency by assuring higher ratings, etc.)
 - (4) Failure to deliver credible, objective and transparent ratings as prescribed in this Section; and
 - (5) Any violation of applicable laws, rules and regulations.
- b. Procedure for derecognition. A MIRA shall only be derecognized upon prior notice and after being given the opportunity to defend itself.

E. PRODUCT OFFERING OF PARENT OF FOREIGN BANK BRANCHES

1141-A OFFERING IN THE PHILIPPINES OF PRODUCTS BY PARENT BANK AND BRANCHES ABROAD OF THE PARENT BANK

Philippine branches and subsidiaries of foreign banks shall:

- a. Inform/notify the Bangko Sentral if their parent bank and/or branches abroad of their parent bank offer or market products in the Philippines, either through electronic means (website) or through its local desks (within bank premises); and
- b. In cases when there are products being offered, to submit to the appropriate supervising department of the Bangko Sentral within ten (10) banking days from receipt of Circular Letter dated 12 April 2005, the list of products offered/marketed, the corresponding manuals containing the policies and procedures, the flow chart of transaction and the risk management system for each particular product.

F. FRAMEWORK ON THE GRANT OF REGULATORY RELIEF TO BANKS

1151 REGULATORY RELIEF POLICY

The Policy sets forth the guidelines on the grant of regulatory relief measures to banks affected by calamities. The Bangko Sentral recognizes that the Philippines is vulnerable to calamities, whether caused by natural or human-induced hazards, that may adversely affect certain areas/localities, and result in declaration thereof under state of calamity. The damages brought about by calamities to people's resources and livelihood may affect the paying capacity and risk profile of the borrowers/clients of banks. This may translate to higher past due ratios and inability to meet the legal reserve requirements.

Nothing in this Section shall be construed as superseding the previously granted temporary regulatory relief to banks under *Appendix 92*.

a. Objectives

The Bangko Sentral's regulatory relief policy aims to achieve the following:

- (1) Set a uniform and systematic approach in granting regulatory relief to banks affected by calamities; and
- (2) Provide an adequate support to the recovery efforts of banks.

b. Definition of terms¹

- (1) *Hazard* - a dangerous phenomenon, substance, human activity or condition that may cause loss of life, injury or other health impacts, property damage, loss of livelihood and services, social and economic disruption, or environmental damage.
- (2) *Local Disaster Risk Reduction and Management Council (LDRRMC)* – is a working group responsible for ensuring the integration of disaster risk reduction and climate change adaptation into local development plans, programs and budgets as a strategy in sustainable development and poverty reduction.
- (3) *National Disaster Risk Reduction and Management Council (NDRRMC)* – also known as the National Council, is composed of various government agencies, non-government, civil sector and private sector organizations in the Philippines, which is responsible for advising the President on the status of disaster preparedness, prevention, mitigation, response, and rehabilitation operations being undertaken by the government, civil society organizations, private sector, and volunteers; recommending to the President the declaration of a state of calamity in areas extensively damaged; and submitting proposals to restore normalcy in the affected areas, to include calamity fund allocation.
- (4) *Regional Disaster Risk Reduction and Management Council (RDRRMC)* – is a working group responsible in ensuring disaster sensitive regional development plans, and in case of emergencies shall convene the different regional line agencies and concerned institutions and authorities.
- (5) *State of Calamity* - a condition involving mass casualty and/or major damages to property, disruption of means of livelihoods, roads and normal way of life of people in the affected areas as a result of the occurrence of natural or human-induced hazard.

¹ Sources: Republic Act (R.A.) No. 10121 or the Philippine Disaster Risk Reduction and Management Act of 2010 and its Implementing Rules and Regulations

c. *Declaration of State of Calamity*

Section 16 of R.A. No. 10121 or the Philippine Disaster Risk Reduction and Management Act of 2010, states that the NDRRMC shall recommend to the President of the Philippines the declaration of a cluster of barangays, municipalities, cities, provinces, and regions under a state of calamity, and the lifting thereof, based on the criteria set by the NDRRMC. It further provides that the declaration and lifting of the state of calamity may also be issued by the local sanggunian, upon the recommendation of the R/LDRRMC, based on the results of the damage assessment and needs analysis.

d. *Regulatory relief package*¹

For a period of one (1) year from the date of declaration of state of calamity, banks may avail of the following:

For All Banks

- (1) Allowing banks to provide financial assistance under Sec. 135 (*Loans, advances, and other credit accommodations to officers*) to officers who are affected by the calamity even in the absence of Bangko Sentral-approved purposes or even if not within the scope of the existing Bangko Sentral-approved purposes, for the grant of loans, advances, or any other forms of credit accommodations to officers, subject to subsequent submission of request for approval of the purpose for the grant of loans, advances, or any other forms of credit accommodations to officers affected by calamities, within thirty (30) calendar days from the approval thereof of the bank's Board of Directors, to the appropriate supervising department of the Bangko Sentral for regularization.

For Thrift Banks (TBs)/Rural Banks (RBs)/Cooperative Banks (Coop Banks)

- (1) Upon grant by TBs/RBs/Coop Banks of a temporary grace period for payment or upon approval of the restructuring, but subject to reporting to Bangko Sentral, exclusion from the computation of past due ratio of the loans of borrowers in affected areas which should have been reclassified as past due under Section 304 beginning on the date of declaration of state of calamity, including those loans becoming past due six (6) months thereafter: *Provided*, That the exclusion shall be for a period of one (1) year from declaration date of state of calamity. For this purpose, Bangko Sentral documentary requirements for restructuring of loans may be waived: *Provided*, That the bank will adopt appropriate and prudent operational control measures.
- (2) Non-imposition of monetary penalties for delays incurred in the submission of all supervisory reports due to be submitted from date of declaration of state of calamity up to six (6) months thereafter.
- (3) Subject to prior approval of the Bangko Sentral, staggered booking of allowance for credit losses computed under Sec. 143 (*Credit classification and Provisioning*), over a maximum period of five (5) years for all types of credits extended to individuals and businesses directly affected by calamities as of the date of declaration of state of calamity.
- (4) Moratorium, without penalty, on monthly payments due to the Bangko Sentral, for a period of six (6) months from the date of declaration of state of calamity, for banks with ongoing rehabilitation upon filing of application for extension/rescheduling with the Department of Loans and Credit.
- (5) Subject to prior approval of the Bangko Sentral, non-imposition of penalties on legal reserve deficiencies computed under Sec. 255, starting from reserve week following the date of declaration of state of calamity up to six (6) months thereafter.

For All Rediscounting Banks²

- (1) Upon application, grant of a 60-day grace period to settle the outstanding rediscounting obligations with the Bangko Sentral as of the date of declaration of state of calamity of all rediscounting banks except those

¹ The Bangko Sentral deployed targeted and time-bound Coronavirus Disease 2019 (COVID-19) regulatory relief packages that facilitated the uninterrupted flow of financial services in the country through the issuance of various memorandum, such as: (a) M-2020-008 (*Regulatory Relief for BSFIs Affected by the COVID-19*) dated 14 March 2020 as amended by M-2020-032 dated 27 April 2020, M-2020-075 dated 27 September 2020 and M-2020-087 dated 2 December 2020; (b) M-2020-011 (*Additional Operational Relief for BSFIs Affected by Measures to Manage the COVID-19 Situation and its Health and Safety Risk*) dated 19 March 2020, as amended by M-2020-025 dated 13 April 2020, M-2020-049 dated 9 June 2020, M-2020-057 dated 21 July 2020; M-2020-063 dated 7 August 2020, and M-2020-075 dated 27 September 2020; (c) M-2020-015 (*Relief Measure on Customer Identification to Manage the COVID-19 Situation*) dated 30 March 2020, as amended by M-2020-057 dated 21 July 2020; (d) M-2020-020 (*Reduction in the Minimum Liquidity Ratio in response to COVID-19*) dated 7 April 2020, as amended by M-2020-085 dated 1 December 2020; (e) M-2020-022 (*Reclassification of Debt Securities Measured at Fair Value to the Amortized Cost Category*) dated 8 April 2020; (f) M-2020-034 (*Relaxation in the Credit Risk Weight for Loans to MSMEs under the Bangko Sentral's Risk-Based Capital Adequacy Frameworks*) dated 28 April 2020; (g) M-2020-039 (*Utilization of Basel III Capital and Liquidity Buffers*) dated 4 May 2020; and (h) M-2020-050 (*Regulatory Relief through Temporary Relaxation of the Maximum Borrowing Limit of Pawnshops*) dated 15 June 2020.

² As governed by Section 282

with serious violations or findings as may be determined by the Bangko Sentral; *Provided*, That interest shall be charged, but no penalty shall be imposed for the sixty (60)-day grace period.

- (2) In addition to the above, allowing the rediscounting banks to restructure with the Bangko Sentral, on a case-to-case basis, the outstanding rediscounted loans as of date of declaration of state of calamity of their end-user borrowers affected by the calamity, subject to the terms and conditions stated in the implementing guidelines (*Appendix 133*).
- (3) Allowing the relaxation of eligibility requirements by excluding the criteria on reserve requirement for the renewal of rediscounting line and for the availment of rediscounting loans from the date of declaration of state of calamity up to six (6) months thereafter.

e. *Eligibility*

All banks with head offices and/or branches/branch-lite units or with end-user borrowers located in areas under state of calamity as declared by the President or the local sanggunian, upon the recommendation of the NDRRMC or R/LDRRMC, may avail of the relief package specified in Item “d”; *Provided*, That the banks shall notify the Bangko Sentral, through the appropriate supervising department of the Bangko Sentral, of their intention to avail said regulatory relief package within a period of one (1) year from the date of declaration of state of calamity.

For banks with head office and/or branches/branch-lite units or with end-user borrowers located in areas declared as under state of calamity beginning year 2018 for which no regulatory relief packages were approved yet, the relief package under this policy may be availed of within a period of one (1) year reckoned from the date of declaration of state of calamity.

f. *Reportorial requirements*

Banks which opt to avail of the regulatory relief shall submit the following:

- (1) Letter-notification stating the bank’s intention to avail of the relief package, signed by the President of the bank or officer of equivalent rank, provided that the notice shall specify, at a minimum, the specific relief measures to be availed and the affected branches/branch-lite units located in areas declared as under a state of calamity;
- (2) Resolution of the board of directors authorizing the bank to avail of the relief package; and
- (3) Memorandum Order/Proclamation/Resolution approving the declaration of state of calamity of the area where the affected head office/branches/branch-lite units of bank are located.

- g. *Supervisory Enforcement Action.* Consistent with Sec. 002, the Bangko Sentral may deploy enforcement actions to promote adherence to the requirements set forth in this Section and bring about timely corrective actions. As part of its enforcement actions, the Bangko Sentral may issue directives or impose sanctions on any misrepresentation in the document and information required to be submitted to the Bangko Sentral in relation to the availment of regulatory relief measures.

GUIDELINES FOR THE ISSUANCE OF A UNIVERSAL BANKING AUTHORITY
(Appendix to Sec. 102 on Prerequisites for the Grant of a Universal Banking Authority)

I. QUALIFICATION REQUIREMENTS

A. Minimum Capital Required

A KB applying for a universal banking (UB) authority shall have capital equivalent to at least the amount prescribed by the Monetary Board for UBs. The term *capital* shall have the same meaning as defined in Sec. 121 prescribing the required minimum capitalization for each bank category.

The merger or consolidation of banks, or that of a bank and an investment house as a means of meeting the minimum capitalization requirement for a UB is encouraged. The revaluation of the premises, improvements and equipment of the institutions involved in a merger or consolidation may be allowed under Sec. 104.

B. Financial Resources, Past Performance and General Compliance with Banking Laws and Regulations

1. Applicant bank shall not have incurred any deficiency in the minimum capital to risk assets ratio prescribed by the Monetary Board pursuant to Section 34 of R.A. No. 8791 for the year preceding the filing of application. It shall have sufficient valuation reserves to cover estimated losses.
2. Applicant bank shall not have incurred net deficiencies in its reserves against deposit and deposit substitute liabilities for the three (3)-month period immediately preceding the filing of application. In addition, applicant bank's liquidity ratios such as primary reserves to deposit liabilities and primary and secondary reserves to deposit and demand liabilities shall at least be equal to the averages of the UB sector as of the end of the quarter immediately preceding the date of application.
3. Applicant bank shall show profitable operations for the past calendar year immediately preceding the filing of application. Its ratio of net earnings to average capital accounts should indicate satisfactory returns on stockholders' investments.
4. Applicant bank has substantially complied with banking laws or orders, instructions, or regulations issued by the Monetary Board or orders, instructions, or rulings by the Governor. Major/important exceptions and findings by Bangko Sentral examiners have been corrected or satisfactorily explained.

C. Banking Facilities, Managerial Capability, Competence, Experience and Integrity of Directors, Principal Officers and Key Personnel

1. The applicant bank shall manifest adequate banking facilities and managerial capability in commercial banking operations as shown by, among other things, its branch network, subsidiaries and allied undertakings, FCDU/EFCDU and foreign trade transactions, participation in syndicated lending, trust services, etc.
2. The applicant bank shall indicate in the application those officers and key personnel having the appropriate training and/or experience in investment banking and related functions are available/ obtainable by the bank.

The application shall be supported by the updated bio-data of the bank's directors and principal officers, including the officers and key personnel who will handle the investment banking and related functions.

II. FEASIBILITY STUDY

The applicant bank shall submit a feasibility study, which shall include, in addition to the usual content of such study, the following information:

A. Capitalization and Ownership

1. A schedule showing the computation of the applicant bank's capital accounts taking into consideration capital as defined under Sec. 121 and, if applicable, the merger or consolidation scheme to meet the capitalization requirement as allowed under Sec. 104.
2. A list of direct and indirect loans to DOSRI which are unsecured, indicating the original amount, date granted, outstanding balance and classification (i.e., whether current or past due) of each DOSRI loan.
3. A summary of holdings of stockholders classified as to citizenship and family/business group indicating the number of shares subscribed in the applicant bank and the corresponding percentage of each shareholding to total shareholdings.

4. A list of individual stockholders grouped according to family/business group, indicating the TIN, citizenship, type of shares held (whether voting or non-voting, common or preferred), number of shares subscribed and percentage of holdings to total of each shareholder.
5. A list of individual stockholders in the applicant bank with equity investment in other financial institutions, indicating the type and number of shares held in the other institution and the corresponding percentage of holdings to total of each shareholder.

B. Organization and Management

1. The names of the members of the board of directors and principal officers of the applicant bank.
2. The proposed organization chart of the department within the applicant bank that will be responsible for the investment banking functions, indicating the designation of officers and other key positions and the names of persons proposed for appointment to those positions.

C. Financial Capability and Previous Year's Operation

A brief discussion of the applicant bank's general financial condition, operating performance, solvency and liquidity position, supported by appropriate financial ratios as seen from the latest condensed balance sheet and income statement. The discussion shall include major banking activities, exposure concentrations (in terms of top borrowers and major industries), equity and credit exposures in subsidiaries and affiliates, and other significant information.

D. Corporate Strategy

1. The statement of corporate strategy of the proposed UB, its immediate and long-term goals and objectives.
2. The lending program and special policies lined up for the first five (5) years including details on guidelines and standards to be established on exposure limits, portfolio diversification, collateral requirements, geographical expansion, assistance to pioneer and priority areas of economic activities and relationship with clients.
3. The investment policies and programs to be implemented within the first five (5) years of operation including broad categories of undertakings in which the proposed UB will invest, the portfolio mix to be observed, the extent of control over subscribed capital stock and voting stock to be exercised in the financial allied undertakings, QBs and non-financial allied undertakings.
4. The fund generation program for the first five (5) years of operation to support the expansion in loans and investments.
5. The quarterly underwriting program for one (1) year stating industry of issuer, the volume of underwriting business classified into equity and debt, public offering and private placement and other information.

E. Financial Projections

1. The detailed statement of underlying assumptions made in projecting the financial statements and ratios.
2. The detailed projected statement of income and expenses for the first five (5) years of operation.
3. The projected operating ratios for the first five (5) years of operation.
4. The actual statement of condition of applicant bank at month-end before filing of application and the projected statement of condition as of the first five (5) years-end of operation.
5. The projected balance sheet ratios as of the first five (5) years-end of operation.
6. The projected funds flow for the first five (5) years of operation.

III. PUBLIC OFFERING AND LISTING OF BANK SHARES

A domestic bank applying for a UB authority shall cause the public offering and listing of its shares pursuant to the rules of the SEC on the MPO and the listing rules of the PSE and subject to the following additional guidelines:

1. The shares to be publicly offered may be voting or non-voting shares and may come from the bank's existing authorized and unsubscribed capital stock, in the case of a newly incorporated UB; or from the issued and outstanding capital stock, in case of an existing bank: *Provided*, That in the case of an applicant bank whose authorized capital stock has been fully subscribed and paid-up and that the bank does not intend to increase its authorized capital stock, the shares to be publicly offered may come from existing stockholders who may be willing to divest themselves of such holdings.

2. The shares subject of public offering shall be made available to new investors or existing stockholders whose stockholdings, together with those of their relatives within the fourth degree of consanguinity or affinity or of firms, partnerships, corporations or associations, at least a majority of the voting stock of which are owned by such stockholders, are not considered as strategic shareholdings pursuant to the SEC rules. The bank's articles of incorporation shall have an explicit provision stating that existing stockholders who are disqualified under these rules shall waive their pre-emptive rights to the additional shares to be publicly offered unless the articles of incorporation already provide that such stockholders do not have pre-emptive rights. The waiver may be limited to three (3) months after which period the disqualified stockholders may purchase shares from the unsubscribed/unsold publicly offered shares. The applicant bank shall submit to the appropriate supervising department of the Bangko Sentral, the written undertaking of the issue managers and underwriters manifesting their conformity to comply with the existing rules on public offering and listing of bank shares.
3. The bank shall fix the offer price of the shares of stock. In the case of subscribed and fully paid-up shares which shareholders are willing to divest, the price shall be set by agreement of the parties.
4. The offering bank shall submit to the appropriate supervising department of the Bangko Sentral for evaluation, an offering prospectus prepared pursuant to the requirements of the Securities Regulation Code and its Implementing Rules and Regulations, and the PSE listing rules.
5. The bank shall cause the publication of the public offering in a newspaper of general circulation at least twice within a period of one (1) month prior to the offering. The bank must also comply with the investor relation program required by the PSE.

The requirements of public offering and listing shall be complied with by all applicant banks including those that are able to meet the prescribed minimum capital requirement on their own or through merger/consolidation with other banks or non-bank financial intermediaries.

(Circular No. 1060 dated 15 November 2019)

³ Creditable to the franchise fee

SAMPLE GUARANTEE UNDERTAKING TO ESTABLISH BRANCH/ES OF FOREIGN BANKS

GUARANTEE

KNOW ALL MEN BY THESE PRESENTS:

WHEREAS, under the provisions of Republic Acts (R.A.) No. 8791 ("The General Banking Law of 2000") and No. 7721 ("An Act Liberalizing the Entry and Scope of Operations of Foreign Banks in the Philippines and for Other Purposes"), as amended by R.A. No. 10641, of the Republic of the Philippines, the licensing, supervision and regulation of banks, both foreign and domestic, are vested with the Bangko Sentral ng Pilipinas;

WHEREAS, under said R.A. 7721, as amended by R.A. No. 10641, {Name of Bank} (hereinafter called Guarantor) has been authorized to operate a branch or branches in the Philippines.

WHEREAS, under the provisions of R.A. No. 7721, as amended by R.A. No. 10641, banks organized under laws other than those of the Republic of the Philippines shall guarantee the full payment of all liabilities of its branch or branches in the Philippines for the purpose of providing effective protection and security to the interests of the depositors and other creditors of said branch or branches; and

WHEREAS, Guarantor is willing, desirous and ready at any time to give such full guarantee as well as to comply with whatever conditions required in said R.A. No. 7721, as amended by R.A. No. 10641.

NOW, THEREFORE, for the purpose above mentioned, Guarantor hereby agrees that in the event any branch of Guarantor located in the territory of the Republic of the Philippines should fail to promptly pay any lawful debt, claim or liability of any kind or character, due and payable under the laws of the Republic of the Philippines and pursuant to the terms of said debt, claim or liability, then Guarantor upon the demand of the Bangko Sentral ng Pilipinas shall promptly pay said debt, claim or liability to the person or persons entitled thereto under the laws of the Republic of the Philippines. Any such debt, claim or liability, not so promptly paid, shall bear the legal interest rate at a rate per annum as may be prescribed by the Monetary Board. Said debts, claims or liabilities, interest thereon and any cost or expenses incidental to the collection thereof, shall be paid in the currency in which the obligations are expressed, or in which the costs or expenses were incurred. The obligation of Guarantor upon default of any of its branches located in the territory of the Republic of the Philippines is primary, direct and immediate and not contingent on any remedy or recourse upon any asset, property or right which its branch or branches within the territory of the Republic of the Philippines may have, in such a way that any depositor or creditor of its branch or branches in the Philippines may take, at any time, any action on this Guaranty whether or not said depositor or creditor has simultaneously taken or will thereafter take, any direct or indirect action under the laws of the Philippines against said branch or branches, or against any assets, property or rights thereof: *Provided*, however, That Guarantor shall have the right to set-off should it have any claim or claims against any depositor or creditor taking any action by virtue of the provisions of its Guarantee.

The right on this Guarantee is independent of and separate from whatever right, security or action which any depositor or creditor of said branch or branches in the Philippines may have, take or pursue to protect his interest, and whatever action or measure the Bangko Sentral ng Pilipinas may adopt in the exercise of its supervisory and regulatory powers allowed and provided for in said R.A. No. 8791 and No. 7721, as amended by R.A. No. 10641, of the Republic of the Philippines, such as requiring Guarantor to assign to its Philippine Branch or Branches an amount of capital sufficient to meet the minimum capital required in said R.A. No. 7721, as amended by R.A. No. 10641, or any measure it may be authorized to take under the provisions of said R.A. No. 8791, in the case of capital deficiencies; in such case or cases, the liability created hereunder shall not in the least be minimized or affected, it being the purpose of this undertaking that Guarantor shall at all times be responsible and obligated for any such obligations or liabilities of its branch or branches in the Philippines, and to the extent that the same has been fully paid or satisfied only will said Guarantor be relieved from its primary obligations hereunder.

No technicality in the law or in the language of this Guarantee or in any contract, agreement or security, held by or with said branch or branches in the Philippines, shall defeat the nature and purpose of this Guarantee as a primary and direct obligation of Guarantor to the end that the interest of the depositors and creditors of the said branch or branches in the Philippines may be fully protected and satisfied in accordance with Section 5 of R.A. No. 7721, as amended by R.A. No. 10641. Guarantor hereby acknowledges having full knowledge of said R.A. No. 7721, as amended by R.A. No. 10641, in accordance with which this primary and principal obligation is given. Guarantor hereby recognizes the jurisdiction of Philippine courts and hereby authorizes its branch office and/or offices in the Philippines to accept summons, processes and notices from the Philippine courts.

The Guarantee shall be governed by Philippine law.

IN WITNESS WHEREOF, this Guarantee has been executed by Guarantor acting by and through its Officers thereunto duly authorized this ____ day of _____, 20__.

SAMPLE AGREEMENT TO ORGANIZE A SUBSIDIARY BANK

AGREEMENT TO ORGANIZE A (Specify type of Bank) BANK

An agreement, made this _____ day of ___, 20___ by and among the following:

Name

Residence

Citizenship

Whereas, the parties hereto are desirous of forming a corporation under the following terms:

GUIDELINES FOR THE ISSUANCE OF A UNIVERSAL BANKING AUTHORITY FOR BRANCHES OF FOREIGN BANKS
(Appendix to Sec. 103)

I. QUALIFICATION AND DOCUMENTATION REQUIREMENTS

A. Minimum Capital Required. The capital, as defined under prevailing rules and regulations, of a foreign bank branch applying for a universal banking (UB) authority shall be equivalent to at least the amount prescribed by the Monetary Board for UBs.

B. Financial Resources, Past Performance and General Compliance with Banking Laws and Regulations. Applicant bank shall comply with capital adequacy ratios (Common Equity Tier 1, Tier 1, Capital Adequacy Ratio, and the combined requirement for the Capital Conservation Buffer and Countercyclical Capital Buffer) under Section 34 of R.A. No. 8791, Sec. 103 (Risk-based capital for foreign bank branch) and *Appendix 59*, for the year preceding the filing of application. It shall have sufficient valuation reserves to cover estimated losses.

Applicant bank shall not have incurred net deficiencies in its reserves against deposit liabilities and/or deposit substitute liabilities for the three (3)-month period immediately preceding the filing of the application. In addition, such ratios as primary reserves to deposit liabilities and primary and secondary reserves to deposit and demand liabilities shall show that applicant bank is in a liquid position.

Applicant bank has substantially complied with banking laws or orders, instructions or regulations issued by the Monetary Board or orders, instructions or rulings by the Governor. Major/important exceptions and findings by Bangko Sentral examiners have been corrected or satisfactorily explained.

C. Knowledge, Competence, Experience and Integrity of Officers and Key Personnel. The applicant shall indicate in the application that officers and key personnel having the appropriate training and/or experience in investment banking and related functions are available/obtainable by the bank.

An updated bio-data shall be submitted by each of the officers and key personnel who will handle investment banking and related functions.

II. PROJECT FEASIBILITY STUDY

The project feasibility study to be submitted by the applicant bank shall include, in addition to the regular content of such study, the following information in the format prescribed.

A. Organization and Management

1. The proposed organization (position) chart of department within the applicant bank which shall be responsible for the investment banking functions, indicating for each position the name of the personnel proposed for appointment.
2. Bio-data that should be prepared for each of the proposed key personnel in the investment banking department.

B. Corporate Strategy

1. The statement of corporate strategy of the UB and the immediate and long-term goals and objectives.
2. The lending program and special policies lined up for the first five (5) years including details on guidelines and standards to be established on exposure limits, portfolio diversification, collateral requirements, geographical expansion, assistance to pioneer and priority areas of economic activities and relationship with clients.
3. Investment policies and program to be implemented within the first five (5) years of operation including the broad categories of undertakings in which the UB may invest, the portfolio mix to be observed, the extent of control over subscribed capital stock and voting stock to be exercised in financial allied undertakings, quasi-banks and non-financial allied undertakings.

4. Local branches of foreign banks may invest in the equity of financial as well as non-financial allied undertakings and non-allied undertakings wherein locally incorporated commercial banks with UB authority are allowed to invest. However, the branches' equity investments shall be subject to equity ceilings set in pertinent laws.
5. Fund generation program for the first five (5) years of operation to support the expansion in loans and investments.
6. Quarterly underwriting program for one (1) year stating industry of issuer, the volume of underwriting business classified into equity and debt, public offering and private placement and other information.

C. Financial Projections

1. The detailed statements of the underlying assumptions made in projecting the financial statements and ratios.
2. The detailed projected statement of income and expenses for the first five (5) years of operation.
3. The projected operating ratios for the first five (5) years of operation.
4. The actual statement of condition of UB at month-end before filing of application and the projected statement of condition as of the first five (5) years- end of operation.
5. The projected balance sheet ratios as of the first five (5) years of operation.
6. The projected funds flow for the first five (5) years of operation.

(Circular Nos. 1024 dated 06 December 2018)

FORMAT OF AFFIDAVIT ON TRANSACTIONS INVOLVING VOTING SHARES OF STOCKS
[Appendix to Sec. 122]

REPUBLIC OF THE PHILIPPINES)
_____) S.S.

AFFIDAVIT

I, _____, also known as _____
with business address at _____, after having been duly sworn to in accordance
with law depose and state that:

1. I am the subscriber, purchaser, transferee, or recipient of (state quantity) shares representing _____ percent of voting stocks of (state name of bank), hereinafter to be referred to as "*Bank*", by virtue of (state instrument of subscription, purchase/sale, transfer, acquisition, etc.) dated _____.
2. In acquiring equity in the Bank, I acted with full awareness and understanding that the Bank is a duly organized domestic banking corporation, exercising and enjoying a right, franchise and privilege to engage in _____ banking business, decreed by law to be a nationalized industry, wherein at least _____ percent of the voting stock should be owned by citizens of the Philippines and that there exist prohibitions under the law against the holding by any person, of voting shares of stock in excess of _____ of the voting shares of stock of the Bank.

I am also aware of the requirement for prior Monetary Board approval of significant ownership of voting shares of stock by any person, natural or juridical, or by one (1) group of persons as provided in Sec. 122 of the Manual of Regulations for Banks (MORB).

3. Consonant with the policy of the Government as provided for in Commonwealth Act No. 108, as amended (The Anti-Dummy Law) and R. A. No. 8791 (The General Banking Law of 2000), I hereby declare as follows:
 - a. The (state instrument of transfer) was not simulated to evade the provisions of the Constitution and Commonwealth Act No. 108, as amended, or the provisions of R. A. No. 8791, particularly Sections 11, 12 and 13 imposing maximum equity holdings by any person, whether natural or juridical, in banks;
 - b. That I acquired said voting shares of stocks for valuable consideration from my own funds;
 - c. As such subscriber, purchaser, transferee, or recipient, I have title over said voting shares of stock; and That I am the bona fide owner of voting shares of stock of the bank in my own right, and not as an agent, assignee, proxy, nominee or dummy of any person, whether natural or juridical.
 - d. That I am the bona fide owner of voting shares of stock of the bank in my own right, and not as an agent, assignee, proxy, nominee or dummy of any person, whether natural or juridical.
4. This Affidavit is executed for the purpose of stating under oath my bona fide title over the voting shares of stocks of the Bank; that in acquiring title over said voting shares I gave valuable consideration; and that I shall comply with the requirements of all laws, rules and regulations with respect to my conduct as stockholder of the Bank.

IN WITNESS WHEREOF, I hereby affix my signature this ____ day of _____ 20__ at _____.

(Circular Nos. 1086 dated 6 May 2020 and 987 dated 28 December 2017)

QUALIFICATION REQUIREMENTS FOR A BANK/NBFI APPLYING FOR ACCREDITATION TO ACT AS TRUSTEE ON ANY MORTGAGE OR BOND ISSUED BY ANY MUNICIPALITY, GOVERNMENT-OWNED OR -CONTROLLED CORPORATION, OR ANY BODY POLITIC
(Appendix to Sec. 413)

A bank/NBFI applying for accreditation to act as trustee on any mortgage or bond issued by any municipality, government-owned or controlled corporation, or any body politic must comply with the following requirements:

- a. It must be a bank or NBFI under Bangko Sentral supervision;
- b. It must have a license to engage in trust and other fiduciary business;
- c. It must have complied with the minimum capital accounts required under existing regulations, as follows:

UBs and KBs	The amount required under existing regulations or such amount as may be required by the Monetary Board in the future
Branches of Foreign Bank	The amount required under Foreign Bank existing regulations
Thrift Banks	₱650.0 million or such amounts as may be required by the Monetary Board in the future
NBFIs	Adjusted capital of at least ₱300.0 million or such amounts as may be required by the Monetary Board in the future.
- d. Its risk-based capital adequacy ratio is not lower than twelve percent (12%) at the time of filing the application;
- e. The articles of incorporation or governing charter of the institution shall include among its powers or purposes, acting as trustee or administering any trust or holding property in trust or on deposit for the use, or in behalf of others;
- f. The by-laws of the institution shall include among others, provisions on the following:
 - (1) The organization plan or structure of the department, office or unit which shall conduct the trust and other fiduciary business of the institution;
 - (2) The creation of a trust committee, the appointment of a trust officer and subordinate officers of the trust department; and
 - (3) A clear definition of the duties and responsibilities as well as the line and staff functional relationships of the various units, officers and staff within the organization.
- g. The bank's operation during the preceding calendar year and for the period immediately preceding the date of application has been profitable;
- h. It has not incurred net weekly reserve deficiencies during the eight (8) weeks period immediately preceding the date of application;
- i. It has generally complied with banking laws, rules and regulations, orders or instructions of the Monetary Board and/or Bangko Sentral Management in the last two (2) preceding examinations prior to the date of application, particularly on the following:
 - (1) election of at least two (2) independent directors;
 - (2) attendance by every member of the board of directors in a special seminar for board of directors conducted or accredited by the Bangko Sentral;
 - (3) the ceilings on credit accommodations to DOSRI;
 - (4) liquidity floor requirements for government deposits;
 - (5) single borrower's loan limit; and
 - (6) investment in bank premises and other fixed assets.
- j. It maintains adequate provisions for probable losses commensurate to the quality of its assets portfolio but not lower than the required valuation reserves as determined by the Bangko Sentral;
- k. It does not have float items outstanding for more than sixty (60) calendar days in the "Due From/To Head Office/Branches/Other Offices" accounts and the "Due from Bangko Sentral" account exceeding one percent (1%) of the total resources as of date of application;

- l. It has established a risk management system appropriate to its operations characterized by clear delineation of responsibility for risk management, adequate risk measurement systems, appropriately structured risk limits, effective internal controls and complete, timely and efficient risk reporting system;
- m. It has a CAMELS Composite Rating of at least 3 in the last regular examination with management rating of not lower than 3; and
- n. It is a member of the PDIC in good standing (for banks only);

Compliance with the foregoing as well as with other requirements under existing regulations shall be maintained up to the time the trust license is granted. A bank that fails in this respect shall be required to show compliance for another test period of the same duration.

(M-2019-007 dated 14 March 2019, M-2019-014 dated 3 May 2019, and M-2019-015 dated 15 May 2019)

CERTAIN INFORMATION REQUIRED FROM BANKS
(Appendix to Sec. 173 on Submission of certain required information)

1. Name of bank
2. Address
3. P. O. Box Number
4. Cable address or cable code
5. Board of Directors including Corporate Secretary:
 - a. Names of Chairman, Vice-Chairman and Directors;
 - b. Number of directors per by-laws;
 - c. Number of vacancies in the Board;
 - d. Names of corporations where they serve as Chairman of the Board or as President and names of other business enterprises of which they are proprietors or partners;
 - e. For the Corporate Secretary, indicate if he is also a Director; and
 - f. Date of annual election of directors per by-laws.
6. President to Department Heads, including Auditor:
 - a. Names and titles;
 - b. Telephone number of each officer (office);
 - c. For Executive Vice Presidents, state the names of corporations where they serve as Chairman of the Board and names of other business enterprises of which they are proprietors or partners; and
 - d. For Vice-Presidents and other officers with non-descriptive titles, indicate area of responsibility, e.g., Vice-President for Operations or Vice-President, International Department.
7. Branches, agencies and branch-lite unit/s:
 - a. Name of branch, agency or branch-lite unit/s, e.g., Quiapo Branch or Makati Agency;
 - b. Address;
 - c. Names and telephone numbers of:
 - (1) Manager
 - (2) Cashier
 - (3) Accountant; and
 - d. For agencies and branch-lite unit/s, indicate name of mother branch.

(Circular No. 987 dated 28 December 2017)

DOCUMENTS/INFORMATION ON ORGANIZATIONAL STRUCTURE AND OPERATIONAL POLICIES
(Appendix to Sec. 173 on Submission of certain required information)

1. Chart of the firm's organizational structure or any substitute therefore;
2. Name of departments/units/offices with their respective functions and responsibilities;
3. Designations of positions in each department/unit/office with the respective duties and responsibilities;
4. Manual of Instructions or the like embodying the operational policies/procedures of each department/unit/office, covering such areas as:
 - a. Signing/delegated authority;
 - b. Procedure/flow of paper work; and
 - c. Other matters;
5. Memoranda-Circulars or the like issued covering organizational and operational policies;
6. Sample copies of each of the forms/ reports used by each office/unit/department other than those submitted to the Bangko Sentral; and
7. Such other documents/information that may be required from time to time by the supervisory/regulatory department concerned.

**FORMAT OF SELF-ASSESSMENT AND CERTIFICATION ON COMPLIANCE WITH
RULES AND REGULATIONS ON BANK PROTECTION
(Appendix to Sec. 147 on Minimum security measures)**

(Name of Bank)

I hereby certify that the Bank has developed and adopted an updated security program which has been reduced in writing and approved by the Bank's Board of Directors in its Resolution No. _____ dated _____ and retained by this Bank in such form as will readily permit determination of its adequacy and effectiveness. I also certify that I have evaluated/assessed said security program and its implementation and that to the best of my knowledge and belief said security program equals or exceeds the standards prescribed by the Bangko Sentral rules and regulations.

Attached are the results of the self-assessment prepared under my supervision regarding the Bank's security program.

President

Date

ASSESSMENT OF COMPLIANCE WITH RULES AND REGULATIONS ON BANK PROTECTION

(Name of Bank)

I, _____, Security Officer of (Name of Bank), hereby certify that -

1. The Bank has a written security program approved by its board of directors and retained by this Bank in such form as will readily permit determination of its adequacy and effectiveness;
2. The security program is compliant with the standards set by Bangko Sentral rules and regulations and commensurate to the Bank's operations, taking into consideration its size, locations and the number of its offices. The security program of the Bank is deemed adequate to promote maximum protection of life and property against crimes and other destructive causes; prevent and discourage crimes against the Bank; and assist law enforcement agencies in the identification and prosecution of perpetrators of crimes committed against the Bank;
3. The assessment we conducted last _____ disclosed that said security program of the Bank has faithfully been implemented by the Bank and the implementation thereof is substantially compliant with the requirements on bank protection prescribed under Section 147 as follows:
 - a. Guard system Description of the system
 - b. Security devices
Description of the security devices, such as:
 - Surveillance system;
 - Burglar alarm system; and
 - Robbery/hold-up alarm system.
 - c. Vaults and safes
State physical description and minimum security measures designed for the vault
 - d. Security of the premises
Description of the security measures/devices for banking premises
 - e. Automated Teller Machines (ATM)
Description of security measures/devices for ATMs
 - f. Armored car operation
Description of armored vehicles and security measures adopted for them
 - g. Employees training
Describe training given

There are no noted adverse deviations of the program from the requirements under Bangko Sentral rules and regulations. (If there are deviations, please state, "We noted the following deviations and the measures taken to address the deviations.")
4. The Bank has written procedures on the following emergency programs:
 - a. Anti-robbery/hold-up plan;
 - b. Bomb threat plan;
 - c. Fire protection plan; and
 - d. Other disaster plan like earthquake and terrorist attack.
5. The Bank periodically inspects, tests and reviews its security program and records thereof are adequately maintained and will be made readily available to the Bangko Sentral for the determination of the program's adequacy and effectiveness.

IMPLEMENTING GUIDELINES OF THE COUNTRYSIDE FINANCIAL INSTITUTIONS ENHANCEMENT PROGRAM (CFIEP)
(Appendix to Sec. 287 B/C)

Sec. 1. Statement of Policy Objectives. The CFIEP aims to:

- a. raise the capital base of the countryside FIs by encouraging existing and new investors to infuse fresh equity into said institutions and thereby accelerate the government's economic development efforts;
- b. reduce the debt burden of eligible countryside FIs and the corresponding financial strain on the government in continually assisting them; and
- c. improve the long-term viability of the countryside FIs and establish such institutions as an effective means to mobilize savings and credit.

Sec. 2. Qualified Participants. The Program shall be open to the following:

- a. All Countryside Financial Institutions (CFIs) that meet the eligibility requirement set by the Bangko Sentral except those with unrectified/unaddressed serious irregularities based on the examination findings of the Bangko Sentral;
- b. The term CFIs shall refer to all RBs, Coop banks and TBs, which have their main operations in the countryside;
- c. TBs as may be determined by the Task Force which have their main operations in the countryside; and
- d. Individuals, cooperatives and/or corporations as may be qualified to make an investment in the RB or qualified TB.

Sec. 3. Coverage of the Program. All past due borrowings (principal and interests) with the Bangko Sentral of the countryside FIs as of 31 December 2001 in the form of rediscounted loans, CB:IBRD loans other supervised credit program and special liquidity loans.

Sec. 4. CFIEP Task Force. To effectively attain the objectives hereinabove cited, the Task Force constituted under CBP Circular 1315 composed of the Governor of the Bangko Sentral, the President of the LBP, the President of the PDIC, shall continue coordinating all activities relating to, and oversee the implementation of the CFIEP.

Sec. 5. Incentives under the Program. As the Task Force may allow, participants to the Program are entitled to the following incentives:

- a. Exemption from the forty percent (40%) limitation on voting stockholdings of any person or persons related to each other within the third degree of consanguinity or affinity, cooperatives, or corporations participating in the program, from the application of prescribed equity ceiling, as may be warranted, and for a period not to exceed twenty (20) years; and
- b. Waiver of penalties and other charges due on arrearages that may be redeemed under the Program.

Sec. 6. Definition of Terms. As used in these Guidelines:

- a. *Investor* – shall refer to individuals, group of individuals, cooperative and all CFIs that meet the eligibility requirements set by the Bangko Sentral except those CFIs with unrectified/uncorrected serious irregularities based on the examination findings of the Bangko Sentral.
- b. *Arrearages* – shall refer to the CFI's arrearages with Bangko Sentral as of 31 December 2001 which are eligible for buy-back such as past due rediscounted loans, special liquidity loans, CBP-IBRD loans and other supervised credit programs, including those other arrearages as the Task Force may determine.
- c. *Converted Shares* - shall refer to the arrearages converted into LBP equity in the form of common and preferred shares pursuant to Bangko Sentral Circular Nos. 1143 and 1172.

Sec. 7. Components of the Program. The components of the Program are as follows:

- a. *Purchase of CFI Arrearages (Module I)*

The investor/CFI stockholders' equity infusion with the CFI shall be used to purchase negotiable promissory notes (NPNs) with the LBP valued at twice the amount actually infused by the investor. The NPNs, in turn, will be used to redeem arrearages with the Bangko Sentral through the PDIC. The investor/CFI stockholders will then be issued shares of stock in the CFI equivalent to the actual amount invested and the difference between the amount actually infused and the value of the NPN issued by the LBP shall be credited to the investors which actually infused the capital.

b. *Land Bank Counterpart Capital (Module II)*

An eligible CFI is provided access to LBP's capital infusion program which essentially involves the matching on a one-to-one basis of CFI's fresh capital infusion. The LBP's matching equity shall be in preferred shares redeemable within a period of five (5) years for Business and Risk Recovery Modules, and ten (10) years for the Developmental Module. The cumulative dividend shall be equal to the average 364-day T-Bill rate for the Developmental and Risk Recovery Modules, and 364-day T-bill plus three percent (3%) for the Business Module. Other terms of LBP's investment will be determined by its board and operational details will be announced to the CFIs accordingly.

c. *Merger, Consolidation or Acquisition Incentives (Module III)*

Eligible CFIs can avail of incentives aimed at promoting mergers, consolidations or acquisitions among CFIs as a means to develop larger and stronger CFIs which may include the following:

- (1) Counterpart capital infusion by the LBP by a ratio of more than one-to-one of the merged, consolidated or acquired CFI's total fresh equity;
- (2) PDIC financial assistance to qualified merger, consolidation or acquisition applicants to augment the capital infusion required in absorbing the adverse impact of asset write-downs and other costs as part of restructuring. The merger, consolidation or acquisition must involve a lead bank (with strong capital position and good track record) acquiring a majority stock of one (1) or more undercapitalized CFI. The amount of financial assistance shall be an amount that would generate income spread to the surviving or consolidated CFI equivalent to fifty percent (50%) of the undercapitalized CFI's eligible non-performing loans and ROPA or unbooked valuation reserves as of 31 December 2001, whichever is higher, over a period of six (6) years as determined by the Bangko Sentral;
- (3) CFIs availing of the financial assistance shall submit, among others, a business plan supported by a six (6)-year financial projections; and
- (4) The term of the loan shall be for a period of at least six (6) years.

Sec. 8. Qualification to the Program. CFIs, except those with unrectified/uncorrected serious irregularities based on the examination findings of the Bangko Sentral, may participate in the Program.

- a. Under Module I, CFIs with arrearages as defined in Sec. 6(b) hereof may qualify.
- b. To avail of equity matching program of the LBP under Module II, the CFI must meet the following minimum requirements:
 - (1) A past due loans ratio of not more than twenty-five percent (25%); and
 - (2) A loan portfolio at least sixty percent (60%) of which is in agriculture or rural-based production activities.
- c. Under Module III, PDIC financial assistance shall be available to merging, consolidating or acquiring CFIs involving at least one (1) or more undercapitalized banks.

A separate memorandum shall be issued on the guidelines for the LBP equity matching program and PDIC financial assistance.

- d. Investors/CFI stockholders will be evaluated based on the "fit and proper" rule under Sec. 138 and other criteria that the Task Force may set.

CFIs investing in undercapitalized CFIs should have a minimum unimpaired capital as defined under Sec. 121 and under applicable and existing risk-based capital adequacy framework and a history of sustained profitability for a period of at least five (5) years

5. Fresh investments should at least cover the additional capital to achieve the required minimum risk-based capital adequacy ratio of ten percent (10%) after risk-based adequate provision for losses based on the latest examination findings of the appropriate supervising department of the Bangko Sentral.

Sec. 9. Application Procedures

a. Purchase of Arrearages under Module I

- (1) Investor/CFI stockholder files application (CFIEP Form No. 1-A) with the LBP together with the following requirements:
 - (a) a proposal for financial strengthening accompanied by a three (3)-year financial projection and a subsequent two (2)-year business plan;
 - (b) the designation of PDIC by the CFI as the attorney-in-fact to receive the NPN from LBP and to exchange the NPN for arrearages of the CFI;
 - (c) other requirements as the Task Force may deem necessary.
- (2) Simultaneously, the investor/CFI stockholder deposits cash with the LBP in an amount equivalent to fifty percent (50%) of the arrearages to be redeemed, which shall be placed in a special account pending approval of application by the Task Force.
- (3) Upon approval of the application, the CFI shall be duly notified by the Task Force directly or through the LBP Regional Office.
- (4) The LBP shall issue a Negotiable Promissory Note in favor of the CFI, with a ten (10)-year term or such period where a maturity value will be equivalent to twice the amount invested.
- (5) The CFI, through the PDIC as attorney-in-fact, shall exchange the NPN for the CFI arrearages equivalent to the amount of the NPN.
- (6) The CFI shall issue stock certificates in favor of the investor/s equivalent to the total fresh capital infusion. The difference between the amount actually infused and the value of the NPN issued by the LBP shall be credited as equity of the investor who actually infused the capital.
- (7) Applicants who do not qualify shall be reimbursed for their deposits including accrued interest earned.

b. LBP Counterpart Capital under Module II

Interested CFIs shall submit the requirements listed in CFIEP Form No. 2-B to the LBP.

c. Merger and Consolidation under Module III

The merging/consolidating/acquiring CFIs shall formulate a merger/consolidation/ acquisition plan which shall be an integral component of the CFIEP application documents to be submitted to the LBP Regional Office.

Sec. 10. Applicability of Relevant Laws. Nothing herein shall be construed as a waiver by the Bangko Sentral from proceeding under Section 30 of R.A. No. 7653 or other pertinent provisions in said Act, R.A. No. 7353 (Rural Banks Act of 2000), and R.A. No. 7906 (Thrift Banks Act) in the event that circumstance shall exist as would warrant action under such provisions of law.

(Circular Nos. 969 dated 22 August 2017 and 890 dated 02 November 2015)

RULES GOVERNING ISSUANCE OF MORTGAGE/CHattel MORTGAGE CERTIFICATE BY THRIFT BANKS
(Appendix to Sec. 293-B/C)

- a. With prior approval of the Monetary Board, TBs, whether or not authorized to engage in quasi-banking functions, may issue and deal in mortgage and chattel mortgage certificates exclusively for the purpose of financing the following loans:
 - (1) Equipment loans;
 - (2) Mortgage loans for acquisition of machinery and other fixed installations;
 - (3) Loans for the conservation, enlargement or improvement of productive properties; and
 - (4) Real estate mortgage loans (a) for the construction, acquisition, expansion or improvement of rural and urban properties; (b) for the refinancing of similar loans and mortgages; and (c) for such other purposes as may be authorized by the Monetary Board.
- b. The certificates shall be issued at a minimum denomination of P20,000 for a term of at least four (4) years.
- c. The amount of certificates which a TB may issue shall not exceed an amount equivalent to fifty percent (50%) of the total amortizations falling due during the projected term of the certificates on the mortgages/chattel mortgages pooled for the purpose of the issue.
- d. The maturity of the certificates shall in no case be later than any of the maturities of the mortgages/chattel mortgages constituting the pool. Mortgages and chattel mortgages on "past due loans" as defined under existing regulations shall not be eligible for the pool.
- e. All outstanding certificates shall constitute a prior preferred lien on payments or amortizations on the mortgages and chattel mortgages constituting the pool.
- f. If at any time, during the term of the certificates, the aggregate outstanding amount thereof should exceed the ceiling as provided in Item "c" above on account of any deficiency or inadequacy of the mortgages or chattel mortgages resulting from prepayments by the mortgage or chattel mortgages becoming past due as determined by existing regulations, the issuing bank shall provide additional mortgages or chattel mortgages as are current necessary to cover the deficiency.
- g. The issuing TB shall enter into an agreement with another bank which shall constitute the latter as custodian of the mortgages/chattel mortgages pooled for the purpose of the issue, as transfer agent of the certificates, and as its paying and securing agent, and in general shall specifically state (a) the rights, obligations and liabilities of the issuing bank and custodian banks; (b) the rights of the holders of the certificates; (c) the mortgages making up the pool; and (d) the aggregate value of the certificates that may be issued.
- h. The agreement shall be available for inspection at reasonable hours during business days to the holders of the certificates, or their duly authorized representatives.
- i. The certificates shall have the following minimum features:
 - (1) The certificate shall be thirteen (13) inches in length and eight and a half (8.5) inches in width, and shall be serially pre-numbered and printed on security paper with safeguards against alterations and/or falsifications;
 - (2) The description of the certificate, i.e., "Mortgage Certificate" or "Chattel Mortgage Certificate", shall be printed on the upper center margin of the certificate;
 - (3) The certificate shall indicate its date of issuance, the amount or denomination thereof, the rate of interest expressed as a percentage on an annual basis, and the term or maturity thereof;
 - (4) The certificate shall contain a conspicuous notice at the lower margin thereof that the same is not insured by the Philippine Deposit Insurance Corporation (PDIC); and
 - (5) The copy of the certificate to be issued to the investor shall be stamped or printed with the word "Original" and the copies retained by the issuer as "Duplicate copy", "File copy", or words of similar import.
- j. A five percent (5%) reserve shall be maintained against all issues of mortgage/chattel mortgage certificates. The Monetary Board may change the required reserves as may be necessary.

- k. Any thrift bank desiring to apply for authority to issue mortgage/chattel mortgage certificates may submit its application to the appropriate supervising department of the Bangko Sentral duly accompanied by the following documents:
- (1) Pro-forma copies of the mortgage/chattel mortgage certificates proposed to be issued and the agreement referred to in Item "g" thereof;
 - (2) Statement setting forth the details or particulars of the mortgages/chattel mortgages to be pooled for purposes of the issue and the purpose for which the proceeds will be used; and
 - (3) Other records or data as the appropriate supervising department of the Bangko Sentral may deem necessary for the proper evaluation of the bank's application.

BASIC GUIDELINES IN SETTING UP OF ALLOWANCE FOR CREDIT LOSSES
(Appendix to Sec. 143 on Credit Classification and Provisioning)

BSFIs with credit operations that may not economically justify a more sophisticated loan loss estimation methodology or where practices fall short of expected standards shall, at a minimum, be subject to the following guidelines:

As a general rule, Especially Mentioned and Substandard – Underperforming [e.g., substandard accounts that are unpaid or with missed payment of less than ninety (90) days] shall be considered as Stage 2 accounts, while Substandard Non-performing, Doubtful, and Loss accounts shall be considered as Stage 3 accounts.

I. Individually Assessed Credit Exposures¹

- Loans and other credit exposures with unpaid principal and/or interest shall be classified and provided with allowance for credit losses (ACL) based on the number of days of missed payments as follows:

For unsecured loans and other credit exposures:

No. of Days Unpaid/with Missed Payment	Classification	Minimum ACL	Stage
31 – 90 days	Substandard (underperforming)	10%	2
91 – 120 days	Substandard (non-performing)	25%	3
121 – 180 days	Doubtful	50%	3
181 days and over	Loss	100%	3

For secured loans and other credit exposures:

No. of Days Unpaid/with Missed Payment	Classification	Minimum ACL	Stage
31 – 90 days*	Substandard (underperforming)	10%	2
91-180 days*	Substandard (non-performing)	10%	3
181-365 days	Substandard (non-performing)	25%	3
Over a year – 5 years	Doubtful	50%	3
Over 5 years	Loss	100%	3

**When there is imminent possibility of foreclosure and expectation of loss, ACL shall be increased to 25%.*

Provided, That where the quality of physical collaterals or financial guarantees securing the loans and advances are determined to be insufficient, weak or without recoverable values, such loans and advances shall be treated as if these are unsecured.

- Loans and other credit exposures that exhibit the characteristics for classified accounts described under Sec. 143 (Credit Classification and Provisioning) shall be provided with ACL as follows:

Classification	Minimum ACL	Stage
Especially Mentioned	5%	2
Substandard - Secured	10%	2 or 3 ²
Substandard - Unsecured	25%	2 or 3 ³
Doubtful	50%	3
Loss	100%	3

- Unsecured loans and other credit accommodations classified as “Substandard” in the last two (2) internal credit reviews which have been continuously renewed/extended without reduction in principal and is not in process of collection, shall be downgraded to “Doubtful” classification and provided with a fifty percent (50%) allowance for credit losses;

¹ Other credit exposures include exposures under the scope of PFRS 9, such as investments in debt securities measured at fair value through other comprehensive income and amortized cost, loan commitments, sales contract receivables, accounts receivables, accrued interest receivables and advances.

² The stage depends on whether the accounts are classified as non-performing (Stage 3) or underperforming (Stage 2)

³ The stage depends on whether the accounts are classified as non-performing (Stage 3) or underperforming (Stage 2)

4. Loans and other credit accommodations under litigation which have been classified as “Pass” prior to the litigation process shall be classified as “Substandard” and provided with twenty-five percent (25%) allowance for credit losses.
5. Loans and other credit accommodations that were previously classified as “Pass” but were subsequently restructured shall have a minimum classification of EM and provided with a five percent (5%) allowance for credit losses, except for loans which are considered non- risk under existing laws, rules and regulations.
6. Classified loans and other credit accommodations that were subsequently restructured shall retain their classification and provisioning until the borrower has sufficiently exhibited that the loan will be fully repaid.

II. Collectively Assessed Loans¹ and Other Credit Exposures

1. Current “Pass” loans and other credit accommodations should be provided with a reasonable level of collective allowance, using historical loss experience adjusted for current conditions.
2. Loans and other credit exposures with unpaid principal and/ or interest shall be classified and provided with ACL based on the number of days of missed payments as follows:

For unsecured loans and other credit exposures:

No. of Days Unpaid/with Missed Payment*	Classification	Minimum ACL	Stage
1 – 30 days	Epecially Mentioned	2%	2
31 – 60 days/1 st restructuring	Substandard	25%	2 or 3 ²
61 – 90 days	Doubtful	50%	3 ³
91 days and over/2 nd restructuring	Loss	100%	3

* PAR for microfinance loans

For secured loans and other credit accommodations:

No. of Days Unpaid/with Missed Payment	Classification	ACL (%)		Stage
		Other types of collateral	Secured by real estate	
31 – 90 days	Substandard (underperforming)	10	10	2
91 – 120 days	Substandard (non-performing)	25	15	3
121 – 360 days	Doubtful	50	25	3
361 days – 5 years	Loss	100	50	3
Over 5 years	Loss	100	100	3

Provided, That where the quality of physical collaterals or financial guarantees securing the loans and advances is determined to be insufficient, weak or without recoverable values, such loans and advances shall be treated as if these are unsecured.

(As amended by Circular Nos. 1011 dated 14 August 2018, 903 dated 29 February 2016, 890 dated 02 November 2015, M-2015-035 dated 07 October 2015, M-2015-009 dated 28 January 2015, and M-2015-005 dated 20 January 2015)

¹ This includes microfinance loans, micro enterprises and small business loans and consumer loans such as salary loans, credit card receivables, auto loans, housing loans and other consumption loans, and other loan types which fall below the FI's materiality threshold for individual assessment.

² The stage depends on whether the accounts are classified as non-performing (Stage 3) or underperforming (Stage 2)

³ Section 304 (Accounts considered non-performing) provides that doubtful accounts are considered as non-performing hence, shall be classified under Stage 3 notwithstanding the number of missed amortizations.

ABSTRACT OF "TRUTH IN LENDING ACT" (Republic Act No. 3765)
(Appendix to Sec. 306)

Sec. 1. This Act shall be known as the "Truth in Lending Act."

Sec. 2. Declaration of Policy. It is hereby declared to be the policy of the State to protect its citizens from a lack of awareness of the true cost of credit to the user by assuring a full disclosure of such cost with a view of preventing the uninformed use of credit to the detriment of the national economy.

xxx xxx xxx

Sec. 3. As used in this Act, the term

xxx xxx xxx

(3) "Finance charge" includes interest, fees, service charges, discounts, and such other charges incident to the extension of credit as the Board may by regulation prescribe.

xxx xxx xxx

Sec. 4. Any creditor shall furnish to each person to whom credit is extended, prior to the consummation of the transaction, a clear statement in writing stating forth, to the extent applicable and in accordance with rules and regulations prescribed by the Board, the following information:

- (1) the cash price or delivered price of the property or service to be acquired;
- (2) the amounts, if any, to be credited as down payment and/or trade-in;
- (3) the difference between the amounts set forth under clauses (1) and (2);
- (4) the charges, individually itemized, which are paid or to be paid by such person in connection with the transaction but which are not incident to the extension of credit;
- (5) the total amount to be financed;
- (6) the finance charge expressed in terms of pesos and centavos; and
- (7) the percentage that the finance charge bears to the total amount to be financed expressed as a simple annual rate on the outstanding unpaid balance of the obligation.

xxx xxx xxx

Sec. 5.

- (a) Any creditor who in connection with any credit transaction fails to disclose to any person any information in violation of this Act or any regulation issued thereunder shall be liable to such person in the amount of ₱100 or in an amount equal to twice the finance charge required by such creditor in connection with such transaction, whichever is greater, except that such liability shall not exceed ₱2,000 on any credit transaction.

xxx xxx xxx

- (b) Any person who willfully violates any provision of this Act or any regulation issued thereunder shall be fined by not less than ₱1,000 nor more than ₱5,000 or imprisonment for not less than 6 months, nor more than one year or both.

xxx xxx xxx

- (c) Any final judgment hereafter rendered in any criminal proceeding under this Act to the effect that a defendant has wilfully violated this Act shall be *prima facie* evidence against such defendant in an action or proceeding brought by any other party against such defendant under this Act as to all matters respecting which said judgment would be an estoppel as between the parties thereto.

Sec. 6. This Act shall become effective upon approval.

Approved, 22 June 1963.

ENHANCED INTRADAY LIQUIDITY FACILITY (ILF)
(Appendix to Sec. 290)

Given the increasing volume of PhilPaSS transactions as well as concerns of having temporary gridlocks in the PhilPaSS, the current features of the ILF had been enhanced, specifically on the following areas:

- a. Flexibility in changing the securities that will be used for the ILF;
- b. Availment of the facility on a "as the need arises" basis; and
- c. Removal of commitment fees.

The revised features of the ILF are described below.

- a. **Access to ILF.** Government securities (GS) held by an Eligible Participant bank in its Regular Principal Securities Account that will be used for ILF purposes shall be delivered to a sub-account under the BSP-ILF Securities Account with the Bureau of the Treasury's (BTr) Registry of Scripless Securities (RoSS). The delivered GS to be used for ILF purposes shall be recorded by RoSS in a sub-account (the "Client Securities Account (CSA)"-ILF) under the BSP-ILF Securities Account in the name of the Eligible Participant/banks.

Banks without RoSS securities accounts who intend/desire to avail of the ILF shall be required to open/maintain a Securities Account with the RoSS. The documentation requirements for RoSS membership shall be prescribed by the BTr.

Banks desiring to avail of the ILF shall be further required to open a sub-account under the BSP-ILF Securities Account with the BTr's RoSS by accomplishing an application letter addressed to the Treasurer of the Philippines, Attn: The Director, Liability Management Service and the Chief, Scripless Securities Registration Division. The application letter shall be in the form of Annex 1 hereto.

- b. **Timeline.** From 9:00AM to 9:30AM of each banking day, an Eligible Participant bank shall electronically instruct the BTr to move/transfer from its Principal Securities Account with the BTr's ROSS to the CSA-ILF under the name of the Eligible Participant bank, the pool of peso-denominated GS to be set aside for the ILF purpose. The Eligible Participant bank hereby confirms to the BTr that pursuant to an ILF availment, it has authorized the transfer without consideration unto the CSA-ILF the pool of GS to be used for ILF purposes.

From 9:30 AM to 10:00 AM, the BTr RoSS shall electronically submit a consolidated report to the Bangko Sentral showing the details of the GS that were transferred to the BSP-ILF Securities Account.

From 10:00 AM to 4:00PM, Eligible Participant banks with insufficient balances in its Demand Deposit Account No.2 (PhilPaSS Account) may avail of the ILF.

Eligible Participant banks may avail of the ILF as necessary to fund pending payment instructions. Thus, when the ILF system detects queued transactions in the PhilPaSS-Central Accounting System, the Eligible Participant bank with insufficient balance in its PhilPaSS Account will automatically sell to the BSP-Treasury the GS in the CSA-ILF pool corresponding to the amount which may be needed to cover any pending payment instruction, and the proceeds of the sale of securities shall be immediately credited to the bank's PhilPaSS Account. There may be more than one availment during the day. Until a sale to the Bangko Sentral or an Overnight Repurchase (O/N-RP) transaction with the Bangko Sentral is executed, the beneficial ownership of the GS that have been transferred to the CSA-ILF still belongs to the banks.

At 5:00PM, the Bangko Sentral shall sell back to the Eligible Participant bank the GS at the same price as the original Bangko Sentral purchase. Partial repayment of a particular availment will not be allowed.

In case the PhilPaSS Account balance of the participating bank is not sufficient to cover the afternoon repayment transaction, the Bangko Sentral and the participating bank may agree on the following:

- a. Bangko Sentral shall extend to the Eligible participant bank an O/N-RP at 600 basis points over the Bangko Sentral's regular overnight lending rate for the day. The O/N-RP shall be paid not later than 11:00AM on maturity date. Unpaid O/N-RP shall be automatically converted into an absolute sale to the Bangko Sentral of the subject GS earlier delivered/transferred to the CSA-ILF, pursuant to an ILF availment by the Eligible Participant bank, in which case, Bangko Sentral shall issue an instruction to BTr to deliver/transfer the subject GS from the BSP-ILF Securities Account to the Bangko Sentral regular Principal Securities Account. The sale shall be evidenced by the

issue of Confirmation of Sale by the Eligible Participant bank (Annex 2) and the Confirmation of Purchase by the Bangko Sentral Treasury Department (Annex 3), or,

- b. Only in extreme cases, the Bangko Sentral shall sell back to the participating bank GS up to the extent of the PhilPaSS Account balance. The Bangko Sentral shall issue an instruction to the BTr to transfer the remaining GS amounting to the unpaid ILF availment from the BSP-ILF Securities Account to the Bangko Sentral's Regular Principal Securities Account.

At the end of the day and after Bangko Sentral's sell-back of the GS to ILF participants, normally by 5:45PM, the Bangko Sentral Treasury Department shall electronically instruct RoSS, using the ILF RoSS system developed for herein purpose, to return/deliver from the CSA-ILF of the participating banks to their respective Regular Principal Securities Accounts with the RoSS all unused/unencumbered GS. GS used for O/N-RP shall remain in the CSA-ILF until repayment of subject O/N-RP or conversion to outright sale the following day.

Upon receipt of Bangko Sentral's electronic instruction for the return of GS back to the participating banks' regular Principal Securities Accounts, the BTr shall update their database after which participating banks may request/download statements of securities accounts for their verification.

- c. **Eligible Securities.** Peso-denominated scripless securities of the National Government that are free and unencumbered and with remaining maturity of eleven (11) days to ten (10) years shall be eligible for the ILF. GS that will be used for ILF purposes would be reclassified with due consideration to the original booking of the security, as follows:

Original Booking of GS

- a. Held for Trading
- b. Designated Fair Value Through Profit or Loss
- c. Available for Sale
- d. Held to Maturity

To be reclassified to

- Held for Trading - ILF
- Designated Fair Value Through Profit or Loss - ILF
- Available for Sale - ILF
- Held to Maturity - ILF

- d. **Valuation of Securities.** The GS subject of an ILF transaction shall be valued based on the 11:16AM fixing rates of the previous business day, from the applicable Reuters PDEX pages or any other valuation benchmark as may be prescribed by the Bangko Sentral.
- e. **Margins.** Margins shall be applied based on prevailing policies of the Bangko Sentral Treasury Department.
- f. **Transaction Fee.** The BTr shall collect a monthly maintenance fee of One Thousand Pesos (P1,000.00) from each Eligible Participant bank for the use of the CSA-ILF Securities Account. The maintenance fees herein required to be paid by each Eligible Participant bank shall be separate from and exclusive of any other fees being assessed and collected by BTr for membership in the RoSS. For this purpose, the Eligible Participant bank shall issue to the BTr an autodebit instruction to authorize the BTr to debit its DDA with Bangko Sentral for the above-mentioned monthly maintenance fee. The BTr will inform the Eligible Participant banks of any change in fee at least fifteen (15) days prior to implementation.
- g. **DDA Statements/Transaction Details.** Eligible Participating banks will be able to verify the status of their accounts by initiating the SWIFT/PPS-Front-end System inquiry request.

AVAILABILITY OF SERVICES

The ILF is covered by a Memorandum of Agreement (MOA) dated 25 March 2008 by and among the Bangko Sentral, the BTr, the Bankers Association of the Philippines (for BAP members) and the Money Market Association of the Philippines (for non-BAP members). Participating banks shall sign individual participation agreements. The services outlined in the MOA shall be available at the Bangko Sentral and the BTr at a fixed hour on all banking days. Banking days refer to the days banking institutions are open for business Mondays thru Fridays as authorized by the Bangko Sentral.

Gentlemen:

Please be advised that we agree to participate in the Agreement for the Establishment of Intraday Liquidity Facility to support the Philippine Payment and Settlement System (the "System") which is covered by the Memorandum of Agreement dated ____ (the "Agreement") among yourselves and its subsequent amendments of revisions as may be agreed upon by the parties thereto from time to time.

We agree to be bound by all the terms and conditions of the Agreement and adopt it as an integral part of this Participation Agreement, including the authority of the Bangko Sentral to execute payment instructions and the authority of the Bureau of the Treasury (BTr) to execute our instructions on transfer to/from, credit and debit to/against our Securities Account. Further, we agree to comply with all our obligations as participating bank/financial institution as provided in the Agreement. Lastly, we agree to keep yourselves free and harmless from any claim or liability arising from, or in connection with, our transactions transmitted through the System in accordance with the provisions of the Agreement.

This participation will become effective upon your conformity hereto and your notification of the same to us, the Bangko Sentral and the BTr.

Very truly yours,

Participating Bank/Financial Institutions

Sir:

The undersigned hereby makes an application to open a Client Securities Account under the BSP-ILF RoSS Account in the Registry of Scripless Securities (RoSS) operated and maintained by the Bureau of the Treasury (BTr).

The undersigned will pay to BTr an additional monthly fee of P1,000.00 for the Client Securities Account opened payable on the first business day of each month. The BTr will inform the undersigned of any change in fee at least fifteen (15) days prior to implementation.

Please debit/credit our Regular Demand Deposit Account No. _____ with the Bangko Sentral for the payment of said monthly fee.

CREDIT PRIORITY CLASSIFICATION
(Appendix to Sec. 384 on Credit Policies of Government- Owned Corporations)

Priority I -

- a. Production of agricultural, including forestry and fishery, and industrial goods which (1) possess growth potential in competitive domestic and world markets, (2) contribute most to the development of the economy, (3) provide for the satisfaction of basic wants of the population as a whole, and (4) require resources in addition to their self-financing capabilities.
- b. Marketing export products, primarily those goods that contain the maximum possible domestic processing and labor content.
- c. Marketing in the international market of domestic products which fall under Priority I and imported basic consumer goods by Filipino merchandisers.
- d. Importation and marketing of capital equipment, raw materials and supplies for the production and distribution of Priority I products.
- e. Public utilities which are not overcrowded and are necessary to support the production and distribution of Priority I goods or to satisfy basic wants.
- f. Other services which are not overcrowded and which are necessary for the development of desirable knowledge and skills, (2) the support of the production and distribution of Priority I products, and (3) the promotion of tourism and cultural pursuits.
- g. Construction of (1) infrastructure projects, (2) physical plants necessary for the production and distribution of Priority I products and services, and (3) individual low cost housing for the lower income groups of the population.

Priority II -

- a. Production and distribution of goods and services which do not qualify under the Priority I category.
- b. Real estate loans (construction, acquisition, development and refinancing of real estate) other than those specified under Priority I.
- c. Consumption.
- d. Other non-productive and speculative activities.

ECONOMIC ACTIVITIES FALLING UNDER PRIORITY I

A. Economic activities eligible for credits up to eighty percent (80%) of loan value of credit instrument

- a. *Agriculture, Fisheries and Forestry*
 - (1) Agricultural
 - (a) Abaca
 - (b) Cassava
 - (c) Cattle and dairy farms
 - (d) Coconut
 - (e) Coffee and cocoa
 - (f) Corn
 - (g) Palay or rice
 - (h) Piggery
 - (i) Poultry
 - (j) Ramie
 - (k) Rubber plantation
 - (l) Other fruits and vegetables
 - (2) Fisheries
 - (a) Fishponds and inland fishing
 - (b) Marine fishing

- (3) Forestry
 - (a) Forest nurseries and reforestation project
- b. *Mining and quarrying*
 - (1) Metal mining
 - (a) Chromite
 - (b) Copper
 - (c) Iron
 - (d) Lead
 - (e) Manganese
 - (f) Mercury and quicksilver
 - (g) Nickel
 - (i) Zinc
 - (2) Non-metallic mining
 - (a) Asbestos
 - (b) Sulphur
 - (c) Coal
 - (d) Gypsum
- c. *Manufacturing*
 - (1) Basic metal industries
 - (a) Blast furnaces, steel works and rolling mills
 - (b) Iron and steel basic industries
 - (c) Iron and steel foundries
 - (d) Non-ferrous metal basic industries
 - (2) Chemical and chemical products
 - (a) Basic chemicals
 - (b) Drugs
 - (c) Fertilizer
 - (3) Coconut products and their preparation
 - (a) Coconut oil, edible
 - (b) Coconut oil, inedible
 - (c) Copra meal and cake
 - (4) Electrical machinery, apparatus and appliances
 - (a) Transmissions and distribution equipment
 - (5) Food manufacturing
 - (a) Canning and preserving of fish and other sea foods
 - (i) Fish canning
 - (b) Canning and preserving of fruits and vegetables
 - (i) Canning, drying, brining, pickling or otherwise preserving or preparing vegetables
 - (ii) Canning, drying or otherwise preparing and preserving fruits
 - (c) Slaughtering, preparation and preserving of meat
 - (d) Miscellaneous food preparation
 - (i) Prepared feeds for animals and fowls
 - (6) Furniture and fixtures manufacture
 - (a) Rattan and bamboo furniture
 - (7) Leather and leather products
 - (a) Tanning and finishing
 - (8) Lumber and wood products
 - (a) Veneer, plywood and prefabricated products
 - (9) Machinery, equipment, accessories and parts
 - (a) Agricultural machinery
 - (b) Engines and turbines
 - (c) Industrial, construction and mining machinery
 - (10) Non-metallic products
 - (a) Cement

- (11) Paper and paper products
 - (a) Pulp, paper and paperboard
- (12) Petroleum and coal products
 - (a) Coke
- (13) Textile, cordage and twines manufactures
 - (a) Cordage, rope, twines and nets
 - (b) Hemp milling, abaca stripping and baling establishments
 - (c) Knitting mills
 - (d) Spinning, weaving and finishing of textiles
- (14) Transportation equipment and parts
 - (a) Aircrafts and parts
 - (b) Motor vehicles, equipment and parts
 - (c) Motorcycles, bicycles and parts
 - (d) Railroad equipment
 - (e) Ships and boats
- (15) Miscellaneous manufacturing industries
 - (a) Laboratory, engineering and medical

d. *Construction*

- (1) Contract
 - (a) Building construction
 - (i) Commercial and industrial projects¹

e. *Public Utilities*

- (1) Ice and ice refrigeration plants
- (2) Operation of wharves, dry docks etc.
- (3) Warehousing
- (4) Water supply and sanitary services
 - (a) Irrigation systems
 - (b) Water supply systems

f. *Commerce*

- (1) Export products¹
- (2) Importation of capital goods and raw materials¹
- (3) Domestic trade (Filipino only) wholesales and retail

B. Economic activities eligible for credits up to sixty percent (60%) of the loan value of the credit instrument ²

a. *Agriculture, fisheries and forestry*

- (1) Agricultural
 - (a) Citrus
 - (b) Cotton
 - (c) Salt farming
 - (d) Soybean
 - (e) Other root crops

b. *Mining and quarrying*

- (1) Metal mining
 - (a) Gold
 - (b) Silver
- (2) Non-metallic mining
 - (a) Asphalt
 - (b) Marble

¹ To follow rating of economic activities included in the list.

² For updated loans values, see Sec 292

c. *Manufacturing*

- (1) Chemical and chemical products
 - (a) Dyeing and tanning materials
 - (b) Explosives (excluding firecrackers)
- (2) Coconut products and their preparations
 - (a) Desiccated coconut
- (3) Electrical machinery, apparatus and appliances
 - (a) Communication equipment
 - (b) Dry cells and storage batteries
- (4) Food manufacturing
 - (a) Canning and preserving of fruits and vegetables
 - (i) Fruits and vegetables, sauces and seasoning
 - (b) Dairy products
 - (i) Milk processing
 - (c) Miscellaneous food preparations
 - (i) Coffee roasting, grinding and/or processing
- (5) Furniture and fixture manufacture
 - (a) Wood furniture
- (6) Lumber and wood products
 - (a) Cork
 - (b) Sashes and doors
 - (c) Sawn and planed lumber
 - (d) Wooden box
 - (e) Wood chips
- (7) Machinery, equipment, accessories and parts
 - (a) Office and store machines and devices
- (8) Metal industries
 - (a) Cutlery, handtools and general products
 - (b) Fabricated structural and metal products
 - (c) Tin and aluminum ware
- (9) Non-metallic products
 - (a) Glass and glass products
 - (b) Structural clay products
- (10) Textile, cordage and twines manufactures
 - (a) Jute bags and sacks
- (11) Miscellaneous manufacturing industries
 - (a) Cottage native handicraft industries
 - (b) Footwear (other than rubber)
 - (c) Photographic and optical goods

d. *Construction*

- (1) Contract
 - (a) Building construction
 - (b) Commercial and industrial projects¹
 - (c) Highway and street construction (including road building)

e. *Public utilities*

- (1) Common carriers
 - (a) Airlines and other air transportation
 - (b) Motor vehicles
 - (c) Railroad and railway companies
 - (d) Steamboats and steamship lines
- (2) Communication
 - (a) Telecommunication (cable, mail and express, telegraph, telephone)
- (3) Electricity, gas and steam
 - (a) Electric, light, heat and power
- (4) Water supply and sanitary services
 - (a) Garbage, sewerage and disposal system

¹ To follow rating of economic activities included in the list.

f. *Services*

- (1) Business and professional services
 - (a) Engineering and technical services
- (2) Educational services
 - (a) Private vocational and trade schools
 - (b) Public universities and higher educational institutions
 - (c) Public vocational and trade schools
- (3) Medical and other health services
 - (a) Public health services
- (4) Recreation services
 - (a) Theatrical production (i.e., all performing arts)
- (5) Research and scientific institutions

g. *Financial*

- (1) Banks
 - (a) Private development banks
 - (b) Rural banks/Cooperative banks

h. *Commerce*

- (1) Export products¹
- (2) Importation of capital goods and raw materials¹
- (3) Domestic trade (Filipino only) wholesale and retail¹

i. *Other activities*

- (1) Loans for other dollar-earning purposes not elsewhere classified (included in this category are the construction, development and operations of first-class hotels which cater to the needs of the tourist industry).

C. Economic activities eligible for credits up to sixty percent (60%) of the loan value of the credit instrument¹

a. *Agriculture, Fisheries and Forestry*

- (1) Agricultural
 - (a) Pineapple
 - (b) Tobacco, native
- (2) Fisheries
 - (a) Fishery services
 - (b) Pearl fishing and culture, shell gathering and other marine products
- (3) Forestry
 - (a) Forest services
 - (b) Timber tracts

b. *Mining and quarrying*

- (1) Non-metallic mining
 - (a) Mineral salt
 - (b) Silica

c. *Manufacturing*

- (1) Apparel and other finished products made from fabrics and similar materials
 - (a) Embroidery shops
 - (b) Wearing apparel
- (2) Chemicals and chemical products
 - (a) Paints, varnishes and lacquers
 - (b) Soaps and other cleansing preparations
- (3) Coconut products and their preparations
 - (a) Copra

¹ For updated loans values, see Sec 292

- (4) Electrical machinery, apparatus and appliances
 - (a) Electric lamp
 - (b) Household appliances
 - (c) Radio, television, telephone receiving sets, electronic tubes and components
- (5) Food manufacturing
 - (a) Canning and preserving of fish and other sea foods
 - (i) Fish sauce (patis) manufacture
 - (ii) Shellfish curing, smoking, salting or pickling
 - (b) Cocoa and chocolate and sugar confectionery
 - (i) Cocoa and chocolate processing factories
 - (c) Grain mill products
 - (i) Corn mills
 - (ii) Rice mills
 - (iii) Tuber flour mills
 - (iv) Wheat flour
 - (d) Miscellaneous food preparations
 - (i) Salt manufacture
 - (ii) Starch and its products
 - (iii) Vegetable lard and margarine manufacture
 - (iv) Vermicelli and noodles manufacture
- (6) Lumber and wood products
 - (a) Creosoting and other wood treating
- (7) Metal industries
 - (a) Fabricated wire products
 - (b) Metal stamping, coating and engraving
- (8) Non-metallic products
 - (a) Private vocational and trade schools
 - (b) Public universities and higher educational institutions
 - (c) Public vocational and trade schools
- (9) Medical and other health services
 - (a) Public health services
- (10) Recreation services
 - (a) Theatrical production (i.e., all performing arts)
- (11) Research and scientific institutions

d. *Financial*

- (1) Banks
 - (a) Private development banks
 - (b) Rural banks/Cooperative banks

e. *Commerce*

- (1) Export products¹
- (2) Importation of capital goods and raw materials¹
- (3) Domestic trade (Filipino only) wholesale and retail¹

f. *Other activities*

- (1) Loans for other dollar-earning purposes not elsewhere classified (included in this category are the construction, development and operations of first-class hotels which cater to the needs of the tourist industry).

C. Economic activities eligible for credits up to sixty percent (60%) of the loan value of the credit instrument²

a. *Agriculture, Fisheries and Forestry*

- (1) Agricultural
 - (a) Pineapple
 - (b) Tobacco, native
- (2) Fisheries
 - (a) Fishery services
 - (b) Pearl fishing and culture, shell gathering and other marine products

- (3) Forestry
 - (a) Forest services

 - (c) Radio, television, telephone receiving sets, electronic tubes and components
 - (5) Food manufacturing
 - (a) Canning and preserving of fish and other sea foods
 - (i) Fish sauce (patis) manufacture
 - (ii) Shellfish curing, smoking, salting or picking
 - (b) Cocoa and chocolate and sugar confectionary
 - (i) Cocoa and chocolate processing factories
 - (c) Grain mill products
 - (i) Corn mills
 - (ii) Rice mills
 - (iii) Tuber flour mills
 - (iv) Wheat flour
 - (d) Miscellaneous food preparations
 - (i) Salt manufacture
 - (ii) Starch and its products
 - (iii) Vegetable lard and margarine manufacture
 - (iv) Vermicelli and noodles manufacture
 - (6) Lumber and wood products
 - (a) Creosoting and other wood treating
 - (7) Metal industries
 - (a) Fabricated wire products
 - (b) Metal stamping, coating and engraving
 - (8) Non-metallic products
 - (a) Plastic products
 - (b) Pottery, china, earthenware
 - (c) Concrete aggregates
 - (d) Concrete products
 - (i) Cement products light weight aggregate
 - (ii) Pre-mold concrete light aggregate
 - (9) Paper and paper products
 - (a) Coated and glazed paper products
 - (10) Printing, publishing and allied industries
 - (a) Book publishing and printing
 - (b) Newspaper and periodical publishing
 - (11) Tobacco
 - (a) Cigar and cigarette factories (native)
 - (12) Miscellaneous manufacturing industries
 - (a) Oxygen, acetylene and similar products
 - (b) Silver and gold work without precious stones
 - (c) Musical instruments and parts
 - (i) Blank recording discs
 - (ii) Metal stampers

- d. *Construction*
 - (1) Contract
 - (a) Building construction
 - (i) Government projects
 - (ii) Commercial and industrial projects¹
 - (b) Heavy construction (including bridges and irrigation projects)
 - (2) Personal
 - (a) Construction
 - (b) Reconstruction
- e. *Public utilities*
 - (a) Electricity, gas and steam
 - (i) Gas manufacture and distribution
 - (ii) Steam heat and power
 - (b) Water supply and sanitary services
 - (i) Drainage system

SAMPLE INVESTMENT MANAGEMENT AGREEMENT
(Appendix to Sec. 415 on Minimum documentary requirements)

IMA No. (prenumbered)

INVESTMENT MANAGEMENT AGREEMENT

KNOW ALL MEN BY THESE PRESENTS:

This AGREEMENT, made and executed this _____ day of _____ at __, Philippines, by and between:

(Here in after referred to as the “**PRINCIPAL**”)

and

_____, a banking corporation authorized to perform trust functions, organized and existing under and by virtue of the laws of the Philippines, with principal office and place of business at _____, _____, Philippines.

(Hereinafter referred to as the “**INVESTMENT MANAGER**”)

WITNESSETH: THAT –

WHEREAS, the **Principal** desires to avail of the services of the **Investment Manager** relative to the management and investment of **Principal’s** investible funds;

WHEREAS, the Investment Manager is willing to render the services required by the Principal relative to the management and investment of Principal’s investible funds, subject to the terms and conditions hereinafter stipulated;

NOW, THEREFORE, for and in consideration of the foregoing and of the mutual conditions stipulated hereunder, the parties hereto hereby agree and bind themselves to the following terms and conditions:

INVESTMENT PORTFOLIO

- (1) **Delivery of the Fund** - Upon execution of this Agreement, the **Principal** shall deliver to the **Investment Manager** the amount of PHILIPPINE PESOS: _____ (P _____).
- (2) **Composition** - The cash which the **Principal** has delivered to the **Investment Manager** as well as such securities in which said sums are invested, the proceeds, interest, dividends and income or profits realized from the management, investment and reinvestment thereof, shall constitute the managed funds and shall hereafter be designated and referred to as the **Portfolio**. For purposes of this Agreement, the term securities shall be deemed to include commercial papers, shares of stock and other financial instruments.
- (3) **Delivery of Additional Funds** - At any time hereafter and from time to time at the discretion of the **Principal**, the latter may deliver additional funds to the **Investment Manager** who shall form part of the Portfolio and shall be subject to the same terms and conditions of this Agreement. No formalities other than a letter from the principal and physical delivery to the **Investment Manager** of cash will be required for any addition to the Portfolio.
- (4) **Nature of Agreement** - **THIS AGREEMENT IS AN AGENCY AND NOT A TRUST AGREEMENT. AS SUCH, THE CLIENT SHALL AT ALL TIMES RETAIN LEGAL TITLE TO FUNDS AND PROPERTIES SUBJECT OF THIS ARRANGEMENT.**

THIS AGREEMENT IS FOR FINANCIAL RETURN AND FOR THE APPRECIATION OF ASSETS OF THE ACCOUNT. THIS AGREEMENT DOES NOT GUARANTEE A YIELD, RETURN OR INCOME BY THE INVESTMENT MANAGER. AS SUCH, PAST PERFORMANCE OF THE ACCOUNT IS NOT A GUARANTY OF FUTURE PERFORMANCE AND THE INCOME OF INVESTMENTS CAN FALL AS WELL AS RISE DEPENDING ON PREVAILING MARKET CONDITIONS.

IT IS UNDERSTOOD THAT THIS INVESTMENT MANAGEMENT AGREEMENT IS NOT COVERED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC) AND THAT LOSSES, IF ANY, SHALL BE FOR THE ACCOUNT OF THE PRINCIPAL.

POWERS

- (5) Powers of the Investment Manager - The **Investment Manager** is hereby conferred the following powers:
- a. To invest or reinvest the Portfolio in
 - (1) Evidences of indebtedness of the Republic of the Philippines and of the Bangko Sentral ng Pilipinas, and any other evidences of indebtedness or obligations the servicing and repayment of which are fully guaranteed by the Republic of the Philippines or loans against such government securities;
 - (2) Loans fully guaranteed by the government as to the payment of principal and interest;
 - (3) Loans fully secured by hold-out on, assignment or pledge of deposits or of deposit substitutes, or mortgage and chattel mortgage bonds;
 - (4) Loans fully secured by real estate and chattels in accordance with Section 78 of R.A. No. 337, as amended, and subject to the requirements of Sections 75, 76 and 77 of R.A. No. 337, as amended; and
 - (5) Such other investments or loans as may be directed or authorized by the **Principal** in a separate written instrument which shall form part of this Agreement: *Provided*, That said written instrument shall contain the following minimum information:
 - (a) The transaction to be entered into;
 - (b) The amount involved; and
 - (c) The name of the issuer, in case of securities and/or the name of the borrower and nature of security, in the case of loans;
 - b. To endorse, sign or execute any and all securities, documents or contracts necessary for or connected with the exercise of the powers hereby conferred or the performance of the acts hereby authorized;
 - c. To cause any property of the Portfolio to be issued, held, or registered in the name of the **Principal** or of the **Investment Manager**: *Provided*, That in case of the latter, the instrument shall indicate that the **Investment Manager** is acting in a representative capacity and that the **Principal's** name is disclosed thereat;
 - d. To open and maintain savings and/or checking accounts as may be considered necessary from time to time in the performance of the agency and the authority herein conferred upon the **Investment Manager**;
 - e. To collect and receive matured securities, dividends, profits, interest and all other sums accruing to or due to the Portfolio;
 - f. To pay such taxes as may be due in respect of or on account of the Portfolio or in respect of any profit, income or gains derived from the sale or disposition of securities or other properties constituting part of the Portfolio;
 - g. To pay out of the Portfolio all costs, charges and expenses incurred in connection with the investments or the administration and management of the Portfolio including the compensation of the **Investment Manager** for its services relative to the Portfolio; and
 - h. To perform such other acts or make, execute and deliver all instruments necessary or proper for the exercise of any of the powers conferred herein, or to accomplish any of the purposes hereof.

LIABILITY OF INVESTMENT MANAGER

- (6) Exemption from Liability - In the absence of fraud, bad faith, or gross or willful negligence on the part of the **Investment Manager** or any person acting in its behalf, the **Investment Manager** shall not be liable for any loss or damage to the Portfolio arising out of or in connection with any act done or performed or caused to be done or performed by the **Investment Manager** pursuant to the terms and conditions herein agreed, to carry out the powers, duties and purposes for which this Agreement is executed.

ACCOUNTING AND REPORTING

- (7) The Investment Manager - shall keep and maintain books of accounts and other accounting records as required by law. The **Principal** or the authorized representative of the **Principal** shall have access to and may inspect such books of accounts and all other records related to the Portfolio, including the securities held in custody by the **Investment Manager** for the Portfolio.

- (8) Reporting Requirements - The **Investment Manager** shall prepare and submit to the **Principal** the following reports within _____:
- (a) Balance Sheet;
 - (b) Income Statement;
 - (c) Schedule of Earning Assets;
 - (d) Investment Activity Report; and
 - (e) (such other reports as may be required by the Principal).

INVESTMENT MANAGER'S FEE

- (9) Investment Fee - The **Investment Manager**, in addition to the reimbursement of its expenses and disbursements in the administration and management of the Portfolio including counsel fees, shall be entitled to receive as compensation for its services a management fee of ____ (Specify amount or rate) ____.

WITHDRAWALS FROM THE PORTFOLIO

- (10) Withdrawal of Income/Principal - Subject to availability of funds and the non-diminution of the Portfolio below P1 million, the **Principal** may withdraw the income/principal of the Portfolio or portion thereof upon written instruction or order given to the **Investment Manager**. The **Investment Manager** shall not be required to see as to the application of the income/principal so withdrawn from the Portfolio. Any income of the Portfolio not withdrawn shall be accumulated and added to the principal of the Portfolio for further investment and reinvestment.
- (11) Non-alienation of Encumbrance of the Portfolio or Income - During the effectivity of this Agreement, the **Principal** shall not assign or encumber the Portfolio or its income or any portion thereof in any manner whatsoever to any person without the prior written consent of the **Investment Manager**.

EFFECTIVITY AND TERMINATION

- (12) Term - This Agreement shall take effect from the date of signing hereof and shall be in full force and effect until terminated by either party by giving written notice thereof to the other at least _____ () days prior to the termination date.
- (13) Powers upon Liquidation - The powers, duties and discretion conferred upon the **Investment Manager** by virtue of this Agreement shall continue for the purpose of liquidation and return of the Portfolio, after the notice of termination of this Agreement has been served in writing, until final delivery of the Portfolio to the **Principal**.
- (14) Accounting of Transaction - Within _____ () days after the termination of this Agreement, the **Investment Manager** shall submit to the **Principal** an accounting of all transactions effected by it since the last report up to the date of termination. Upon the expiration of the _____ () days from the date of submission, the **Investment Manager** shall forever be released and discharged from all liability and accountability to anyone with respect to the Portfolio or to the propriety of its acts and transactions shown in such accounting, except with respect to those objected to in writing by the **Principal** within the _____ () day period.
- (15) Remittance of Net Assets of the Portfolio - Upon termination of the Agreement, the **Investment Manager** shall turn over all assets of the Portfolio which may or may not be in cash to the **Principal** less the payment of the fees provided in this Agreement in carrying out its functions or in the exercise of its powers and authorities.

This Agreement or any specific amendments hereto constitute the entire agreement between the parties, and the **Investment Manager** shall not be bound by any representation, agreement, stipulation or promise, written or otherwise, not contained in this Agreement or incorporated herein by reference, except pertinent laws, circulars or regulations approved by the Government or its agencies. No amendment, novation, modification or supplement of this Agreement shall be valid or binding unless in writing and signed by the parties hereto.

IN WITNESS WHEREOF, the parties have hereunto set their hands on the date and at the place first above set forth.

(PRINCIPAL)

(INVESTMENT MANAGER)

By:

SIGNED IN THE PRESENCE OF:

RISK MANAGEMENT GUIDELINES FOR DERIVATIVES
[Appendix to Sec. 613 on Generally Authorized Derivatives Activities]

I. Introduction

This Appendix, together with the Guidelines on Supervision by Risk (*Appendix 69*), Market Risk Management under Sec. 144, Liquidity Risk Management under Sec. 145, and other Bangko Sentral issuances on management of the different risks attendant to banking activities, provides a framework on which a bank can establish its risk management activities. Accordingly, this set of risk management guidelines for derivatives should be read and used in conjunction with all related Bangko Sentral issuances on risk management.

A bank, in using these guidelines to evaluate the propriety and adequacy of its risk management, must consider the following principles:

- a. No single risk management system for derivatives is expected to work for all banks considering that the structure and level of derivatives activities will vary from one bank to another. Each bank should apply the principles set in these guidelines in a manner appropriate to its needs and circumstances. The Bangko Sentral shall evaluate the quality of a bank's risk management system based on the principles and minimum requirements of these guidelines, scaled to the derivatives activities being undertaken.
- b. The requirements prescribed in these guidelines are merely minimum standards and therefore, should not be taken as the "be-all" for a bank's risk management. The board of directors¹ has the responsibility of ensuring that a bank's risk management system appropriately captures its risk exposures and affords proper management of these.
- c. A trust entity within a bank must have a separate risk management system. However, the trust department may in-source back office functions of its risk management system with the bank proper only upon prior Bangko Sentral approval on the basis that such in-sourcing will not give rise to potential conflict of interest.

II. Risk associated with derivatives

While derivatives primarily help manage existing and anticipated risks, derivatives themselves are exposed to the risks they are designed to manage. Moreover, simple derivatives, when combined with other financial instruments, may result in a structure that exposes a bank to complicated risks. Thus, derivatives can aggravate the risks of banks and of counterparties if derivatives are not clearly understood and properly managed.

A single derivatives product may expose a bank to multiple risks as enumerated under *Appendix 69*. These categories are not mutually exclusive of each other. Hence, derivatives activities must be managed with consideration of all these risks.

III. Risk management process for derivatives

The management of derivatives activities should be integrated into a bank's overall risk management system using a conceptual framework common to the bank's other businesses. For example, price risk exposure arising from derivatives transactions should be assessed in a manner comparable to and aggregated with all other price risk exposures. Risk consolidation is particularly important because the various risks contained in derivatives and other market activities can be interconnected and may transcend specific markets.

At a minimum, the risk management process for derivatives should be able to:

- a. **Identify** the risks arising from its derivatives activities in whatever capacity it deals with the same. A bank must likewise identify the impact of its derivatives activities on its overall risk profile. To properly identify risks, a bank must understand the derivatives products with which it is transacting and the factors that affect them. Considering that changes in the value of derivatives are highly influenced by changes in market factors, risk identification should be a continuing process and should occur at both a transaction and portfolio level.
- b. **Measure** the risks arising from its derivatives activities. A bank must have measurement models or tools to quantify the risks identified. These measurement tools should be suitable to the nature and volume of a bank's derivatives activities. As the complexity and volume of the derivatives activity increases, the measurement tools should

¹ In case of a local branch of a foreign bank, the equivalent management review arrangement (e.g., management committee, regional review committee). In case of a trust entity, the trust committee.

correspondingly be more sophisticated. The primary criteria for the propriety of the measurement tools are accuracy, timeliness, efficiency and comprehensiveness with which these tools can capture the risks involved and their contribution to the decision-making process of bank management.

- c. **Monitor** the risks arising from its derivatives activities. Derivatives products are very sensitive to market factors, which continually change. Thus, a bank should have a mechanism to monitor the responsiveness of derivatives to market factors to enable it to review and assess its risk positions. In order to effectively monitor the risks, reports must be timely generated in order to aid management in determining whether there is a need to adjust the bank's derivatives positions.
- d. **Control** the risks arising from its derivatives activities. A bank must establish limits to its derivatives exposure. These limits should be comprehensive and aligned with a bank's overall risk tolerance. A bank's policies and procedures on control should provide for contingencies when limits are breached. A bank must allot lead time and have a mechanism that enables management to act in time to control unacceptable or undesired exposures. A bank must also establish a system that separates functions susceptible to conflicts of interest.

IV. Sound risk management practices for derivatives

Consistent with the criteria for sound risk management practices in Item V of *Appendices 70 and 71*, the Bangko Sentral shall assess the propriety and adequacy of a bank's risk management system for its derivatives activities in accordance with the following basic principles:

- a. Active and appropriate board¹ and senior management oversight

A bank's board of directors must set the general policy or the policy direction relating to the management of a bank's risks, including those arising from its derivatives activities. This policy should be consistent with the bank's business strategies, capital strength, management expertise and risk profile. Accordingly, the board of directors must understand the nature and purpose of the bank's derivatives activities and the role derivatives play in the bank's overall business strategy. Passive board of directors approval is not acceptable. There must be verifiable evidence of the board of directors approval processes and that senior management exerted effort to explain the nature and purpose of the derivatives activities to the board of directors (e.g., minutes of board of directors meetings documenting presentations and reports to the board of directors and the approval processes).

The board of directors must review and pre-approve new derivatives products as well as significant related policies and procedures. Central to the approval of new products is defining when a product or activity is new in order to ensure that variations on existing products receive the proper review and authorization. Policies should also detail authorized activities (e.g., at what stages approvals should be obtained, from whom approvals should be obtained), those that require one-time approval and those that are considered inappropriate.

The board of directors must be apprised of the bank's derivatives exposures on a timely basis in order to enable the board of directors to act on such exposures accordingly. Consequently, there should be an established reporting methodology to ensure that the board of directors receives, on a continuing basis, detailed information regarding the bank's risk exposures from derivatives, including the impact to the bank's overall risk profile, earnings and capital. These reports should include both normal and stress scenarios.

Pursuant to the general policy or policy direction on risk management set by the board of directors, senior management must adopt adequate policies and procedures for conducting the bank's derivatives activities on both a long-range and day-to-day basis. Policies should clearly delineate responsibility for managing risk, and provide effective internal controls and a comprehensive risk-reporting process. Policies must also keep pace with the changing nature of derivatives products and markets and therefore must be reviewed on an on-going basis. Senior management should ensure that the various components of a bank's risk management process are regularly reviewed and evaluated. Internal evaluations may be supplemented by external auditors or other qualified outside parties. The quality of oversight provided by the board of directors and senior management to a bank's derivatives activities will be reflected in the overall risk management process, the adequacy of resources (financial, technical expertise, and systems technology) devoted to handle derivatives activities and its use of the monitoring reports. The board of

¹ In case of a local branch of a foreign bank, the equivalent management review arrangement (e.g., management committee, regional review committee). In case of a trust entity, the trust committee.

directors and senior management shall be responsible for ensuring that bank personnel comply with prescribed risk management standards and sales and marketing guidelines.

b. Adequate risk management policies and procedures

A bank must establish policies and procedures to guide its personnel in conducting derivatives activities. These risk management policies must be reflective of a bank's current strategy and practice.

A bank should not issue policies and procedures for derivatives in isolation. All aspects of the risk management process for derivatives activities should be integrated into the bank's over-all risk management system to the fullest extent possible using a conceptual framework common to the bank's other activities. Risk management policies should be comprehensive, covering all activities of the bank. The Bangko Sentral will evaluate the degree to which controls covering derivatives activities have been integrated in other issuances of the bank covering aggregate risk-taking activities

For banks that conduct derivatives transactions with subsidiaries and affiliates, there should be policies and procedures that describe the nature, pricing, monitoring, and reporting of acceptable related-party transactions.

All risk management policies and procedures must be written, well communicated to all personnel involved in the derivatives activities and readily available in user-friendly form, whether the same is a hard or soft copy thereof. A bank must also put up systems and procedures to ensure an audit trail evidencing the dissemination process for new and amended policies and procedures.

At a minimum, a bank is expected to have:

1. Comprehensive, updated and relevant risk policy manual(s);
2. Operations manual(s) or similar documents that describe the flow of transactions among and between the relevant units and personnel in a bank's treasury (front office, back office and accounting) and risk management unit;
3. Approved product manual(s) that includes product definition, benefits and risks, pricing mechanisms, risk management processes, capital allocation guidelines, tax implications and other operating procedures and controls for the bank's derivatives activities.

c. Appropriate risk measurement methodologies, limits structure, monitoring and management information system.

The process of measuring, monitoring and controlling risk should be carried out independently from individuals conducting derivatives activities. An independent system of reporting exposures to both senior level management and to the board of directors is critical to the effectiveness of the process.

(1) Measurement methodologies

A bank must be able not only to accurately quantify the multiple risk exposures arising from its derivatives activities but also aggregate similar risks across the different activities of the bank to the fullest extent possible. A bank must develop a risk measurement model appropriate to its portfolio. Accordingly, a bank must evaluate the assumptions used, computational requirements, procedures for computing the risk metric, sourcing of inputs used in the measurement process, including the theoretical reasons for a particular input choice, and how these concepts apply to the bank's portfolio.

The risk measurement system should be structured to enable management to initiate prompt remedial action, facilitate stress- testing, and assess the potential impact of various changes in market factors on earnings and capital. A risk measurement system is considered sound if it is capable of comprehensively capturing risks from:(a) the bank's on and off-balance sheet exposure; (b) all relevant market factors; and (c) normal circumstances and stress events. Sound risk measurement practice includes identifying possible events or changes in market behavior that could have unfavorable effects on the bank and assessing the ability of the bank to withstand these events or changes. The stress testing should include not only quantitative exercises that compute potential gains or losses but also qualitative analyses of actions that management might take under particular scenarios.

A bank's risk measurement system should provide appropriate pricing and valuation procedures to ensure best execution for both proprietary trading and those undertaken for clients and mark-to-market/model (MTM) methodology for derivatives instruments that follows established MTM regulations and Philippine Financial Reporting Standards (PFRS 9).

New measurement models whether developed internally or purchased from vendors, should be subject to an initial validation before it is used. Internally developed models require more intensive evaluation where they have not been market-tested by external parties. The validation process should consist of a review of the logic, mathematical or statistical theories, assumptions, internal processes and overall reliability of a bank's measurement models, including the compatibility of the measurement model with the bank's technology and systems. The validation must be undertaken by a technical expert independent from the unit that developed the model. For example, pricing systems developed by a trader is required to be independently validated by a corresponding technical expert from the bank's risk management unit. If no such personnel from the risk management unit exists, an independent validation may be performed by internal audit provided that internal audit has the necessary expertise. A bank may also avail of the services of an independent outside expert. Thereafter, the frequency and extent to which models are validated depends on changes that affect pricing, risk presentation or the existing control environment. Changes in market conditions that affect pricing and risk conventions, which model performance, should trigger additional validation review.

Risk management policies should clearly address the scope of the validation process, the frequency of validations, documentation requirements, and management responses. At a minimum, policies should require the evaluation of significant underlying algorithms and assumptions before the model is put in regular use, and as market conditions warrant thereafter. Such internal evaluations should be conducted by parties who, where practicable, are independent of the business sector using or developing the model. The evaluation may, if necessary, be conducted or supplemented with reviews by qualified outside parties, such as experts in highly technical models and risk management techniques.

(2) Limits structure

A bank must specify individual limits for all types of risks involved in a bank's derivatives activities. A bank should use a variety of limits to adequately capture the range of risks or to address risks that the measurement system does not capture. These limits should be integrated into the bank-wide limit structure to ensure consistency with the board of director- approved risk appetite and business strategy.

The limit structure should be realistic taking into consideration the target budget, level of earnings and capital. Limits must be documented and promptly communicated to all relevant personnel. Limits must be reviewed at least annually or more frequently, if circumstances warrant, in order to ensure that limits reflect the bank's past performance and current position.

Limits should be continually analyzed as regards its impact on target income, earnings and capital. These analyses should be submitted/reported to the board of directors. Any excess over the limit must be approved only by authorized personnel and immediately reported to senior management and depending on the seriousness, also to the board of directors. The seriousness of limit exceptions depends upon management's approach towards setting limits and on the actual size of individual and organizational limits relative to the bank's capacity to take risks. A bank with relatively conservative limits may encounter more exceptions to those limits than that with less restrictive limits. There must also be mechanisms for the correction of breach of these limits.

A bank's limit structure should address the following:

- (a) Definition of a credit exposure;
- (b) Maximum credit exposure to an individual counterparty;
- (c) Credit concentrations;
- (d) Maximum nominal exposure:
 - (i) per trader and per transaction; and
 - (ii) position limits.
- (e) Approved credit risk mitigation techniques;
- (f) Appropriate loss exposure triggers:

- (i) loss alert;
- (ii) stop loss;
- (iii) value-at-risk; and
- (iv) earnings-at-risk.

(3) Monitoring

Monitoring of risk exposures, market conditions, and trading positions should be done at least daily. Derivatives instruments are highly influenced by movements in market factors. Thus, a bank must have a mechanism that can track and analyze the effect of market movements on its derivatives exposures.

To ensure proper monitoring of risks, a bank is expected to have technology and systems that can (a) track movements in reference variables (underlying) and other market factors affecting the value of the derivatives instruments, such as trigger events; and (b) incorporate observed market movements into the pricing and valuation of derivatives instruments.

While monitoring is undertaken independently from the personnel conducting derivatives activities, bank traders are expected to actively monitor their positions to ensure that they do not breach their limits. Bank traders should not wait until a limit is breached to alert senior management and risk control units. Instead, traders should promptly report unanticipated changes and progressively deteriorating positions, as well as other significant issues arising from their positions, to the risk control function and responsible management.

(4) Management information system

A bank must institute an information system that generates accurate and incisive reports to ensure that management and the board of directors are timely and regularly apprised of the bank's derivatives exposures. A bank is expected to have policies and procedures pertaining to the derivatives reporting specifying, among others, the types of derivatives reports to be generated, the purpose and contents thereof, responsible units that will generate the reports, frequency and deadlines of reports, recipients/users of reports, and the type of action expected from the users of the report. At a minimum, management reports should contain the following: outstanding derivatives positions, compliance with or status of positions as against limits, analysis of derivatives positions, along with other bank exposures, in relation to the impact to earnings and capital, monitoring of trigger events, and deviations from established policies and procedures and justifications thereof.

The management information system must be able to translate the measured risks from derivatives activities from a technical and quantitative format to one that can easily be read and understood by senior managers and directors, who may not have specialized and technical knowledge of derivatives products. Such a system enables management and the board of directors to judge the changing nature of the bank's risk exposures. The electronic data processing capability must be commensurate to the volume and complexity of the bank's derivatives activities to facilitate the generation of needed reports.

The frequency and content of board of directors and management reporting will ultimately depend upon the nature and significance of derivatives activities. Where applicable, board of directors and management reports should consolidate information across functions and divisions. Board of directors and management reporting should be tailored to the intended audience, providing summary information to senior management and the board of directors and more detailed information to bank traders.

Management reports should be generated by control departments independent of the risk-takers. When risk-takers provide information (e.g., valuations or volatilities on thinly traded derivatives contracts) for management reports, senior management should be informed of possible weaknesses in the data, and these positions should be audited frequently.

d. Comprehensive internal controls and independent audits

A sound system of internal controls promotes effective and efficient operations, reliable financial and regulatory reporting, and compliance with relevant laws, regulations and policies of the bank. In determining whether a bank's internal controls meet these objectives, the Bangko Sentral will consider the overall control environment of the bank, particularly, the process of identifying, measuring, analyzing and managing risk, the adequacy of management

information systems, and degree of adherence to control activities such as approvals, confirmations and reconciliations. Control of the reconciliation process is particularly important where there are differences in the valuation methodologies or systems used by the front and back offices.

(1) Risk control

A bank should have an independent risk control unit responsible for the design and implementation of the bank's risk management system. A strong risk control function is a key element in fulfilling the oversight responsibilities of board of directors and senior managers. This unit must be independent from business trading units and should report directly to senior management of the bank. The role and structure of risk control function should be commensurate to the nature, complexity and extent of a bank's derivatives activities.

A risk control unit should regularly evaluate risk-taking activities by assessing risk levels and the adequacy of risk management processes. It should also monitor the development and implementation of control policies and risk measurement systems. It should analyze daily reports produced by the bank's risk measurement model, including an evaluation of the relationship between measures of risk exposure and trading limits. Risk control personnel staff should periodically communicate their observations to senior management and the board of directors.

A bank's control structure shall be considered sound if all the following elements are present:

(a) Formal approval process for new products

A bank should have an effective process to evaluate and review risks involved in products that are either new to the bank or new to the market and of potential interest to the bank. A bank that desires to engage in new products and transactions must first subject these products and transactions to a rigorous review and approval process. This will ensure that all bank personnel involved in the activity have sufficient knowledge of the product or transaction, and that the ensuring risk exposures can be identified, measured and analyzed. The process must be contained in a board of directors- approved policy that is fully documented and must be implemented consistently and with integrity.

Before initialing a new derivatives activity, all relevant personnel should understand the product. Risks arising from the new product should be integrated into the bank's risk measurement and control systems. The new product approval process should include a sign-off by all relevant areas such as risk control, operations, accounting, legal, audit, and senior management and trading operations.

Defining a product or activity as "new" is central to ensuring that variations on existing products receive the proper review and authorization. Factors that should be considered in classifying a product/activity as "new" include: capacity changes (e.g., end-user to dealer), structure variations (e.g., non-amortizing swap versus amortizing interest rate swap), products which require a new pricing methodology, legal or regulatory considerations, or market characteristics (e.g., foreign exchange forwards in major currencies as opposed to emerging market currencies).

A bank should introduce new products in a manner that adequately limits potential losses and permits the testing of internal systems.

(b) Segregation of functions/units subject to conflict of interest

A bank must separate the business unit conducting the derivatives activities from the unit/s tasked with the checking, accounting, reporting and control functions of its derivatives activities.

A bank should have policies and procedures addressing conflicts of interest, particularly among the following functions: proprietary trading, sales or marketing desks/units, personal trading, and asset management.

A bank that conducts derivatives activities with its subsidiaries and/or affiliates must establish policies and procedures to avoid actual, or even the appearance of a conflict of interest. Off-market rates between related parties should generally be forbidden.

A bank should avoid dealing in transactions conducted at off-market rates. A bank should have internal policies defining what constitutes “market rates” and identify the range of deviation from the benchmark rates which could still be considered as “market rates”. The bank’s monitoring system should be able to alert management of any breaches in the rate tolerance levels and the appropriate action that should be taken. A bank must be able to justify any off-market transaction.

(c) Competent and adequate personnel who are properly supervised

The increased complexity of derivatives activities requires highly skilled staff particularly in the risk-taking, risk control, and operational functions. Management should regularly review the knowledge, skills and number of people needed to engage in the bank’s derivatives activities. The staff must be appropriately balanced among the different areas involved in derivatives activities such that no area is understaffed in terms of number or skill.

Staff turnover can create serious problems, especially if knowledge is concentrated in a few individuals. The impact of staff turnover can be particularly acute in specialized trading markets where bank traders are in high demand and are often recruited in teams.

To mitigate business continuity and succession risk arising from a high staff turnover, a bank should devise a system of building technical expertise across involved personnel through continuous technical training, periodic rotation and cross-training of staff members performing key functions and developing understudies.

The board of directors should ensure that the power and control delegated to these expert personnel are not abused. Therefore, the board of directors must establish appropriate controls over their activities.

(d) Independent control functions or units

The risk control and audit units should possess the authority, independence, and corporate stature to enable them to identify and report their findings unimpeded by bank traders. It is equally important to employ individuals with sufficient experience and technical expertise to be credible to the business line they monitor and senior executives to whom they report.

(2) Audit

Audits should be conducted by qualified professionals who are independent of the business line being audited. Audits should supplement, and not be a substitute for, risk control function.

The scope of audit coverage should be commensurate with the level of risk and volume of derivatives activity. The audit should include an appraisal of the effectiveness and independence of the bank’s risk management process; the adequacy of operations, compliance, accounting and reporting systems; propriety of risk measurement models; and the effectiveness of internal controls. Auditors should test compliance with the bank’s policies, including limits.

The level of auditor expertise should be consistent with the level and complexity of activities and degree of risk assumed. A bank may choose to out-source audit coverage to ensure that the professionals performing the work possess sufficient knowledge and experience.

Procedures should be in place to ensure that auditors are informed of significant changes in product lines, risk management methods, risk limits, operating systems, and internal controls so that the auditors can update their scope and procedures accordingly. Auditors should periodically review and analyze performance and risk management reports to ensure that areas showing significant changes are given appropriate attention.

The audit function must have the support of management and the board of directors in order to be effective. Management should respond promptly to audit findings by investigating identified system and internal control weaknesses and implementing corrective action. Thereafter, management should periodically monitor newly implemented systems and controls to ensure they are working appropriately. The board of directors, or designated committee, should receive reports tracking management’s actions to address identified deficiencies.

(Circular No. 903 dated 29 February 2016)

**GENERAL GOVERNANCE PRINCIPLES AND STANDARDS ON RELATIONSHIPS BETWEEN BANKS AND
THEIR RELATED NON-GOVERNMENTAL ORGANIZATIONS (NGOs)/FOUNDATIONS**
(Appendix to Sec. 341 on Definition of Related Interest)

Section 1. General Principles and Standards

To reinforce the observance of corporate governance principles and guidelines, the following principles and standards shall govern business relationships between banks and their related NGOs/Foundations engaged in retail microfinance operations:

General Principles:

1. Microfinance programs/operations of banks shall be supervised and administered separately from the microfinance programs/operations of related NGOs/foundations;
2. All transactions between banks and their related NGOs/foundations shall be in the ordinary course of business and upon terms not less favorable to the bank than those offered to other parties; and
3. Bank board of directors and management must at all times adhere to the three pillars of corporate governance, namely: fairness, accountability and transparency in all of its dealings with related NGOs/foundations.

Standards

1. Microfinance programs/operations of banks and their related NGOs/foundations should have separate organizational structure, manual of operations, management information system, etc.;
2. The board of directors should formulate policies that shall govern the dealings of the bank with its related NGO/foundation, e.g., prohibiting and/or limiting activities and transactions that could result in conflict of interests and providing preferential treatment to the related NGO/foundation to the disadvantage of the bank. Also, the board must ensure that senior management implements the aforementioned policies by requiring the submission of periodic reports covering transactions with related NGO/foundation;
3. Formal agreements/contracts should govern the business relationships of banks and their related NGO/foundations covering both their overall/general relationship and specific transactions such as: (i) the purchase of bank of NGO/foundation's loan portfolio, (ii) the collection of loan payments (from NGO/foundation's borrowers) by the bank and (iii) the payment for trainings/seminars given by the NGO/foundation;

Terms and conditions of the formal agreements/contracts shall include, among other things, the following:

Purchase of loan receivables of NGO/ foundation

- a. Criteria in selecting loan accounts;
- b. Purchase price including premiums, if any;
- c. Bank recourse in case of non-payment by borrowers;

Collection of loan payments from borrowers of NGO/foundation

- a. Compensation for utilizing bank resources, e.g. employees, transportation and equipment, etc.;
- b. Mode of payment by the NGO/ foundation;

Conduct of microfinance trainings/ seminars by BGO/foundation

- a. Lecturers shall have adequate background and/or experience in microfinance operations;
 - b. Training syllabus which include subjects on client selection, credit and cash flows analyses, delinquency management, etc.
4. Any loan, other credit accommodation or guarantee in any form whatsoever granted to a related NGO/foundation is subject to existing rules on DOSRI loans.

However such loan, other credit accommodation or guarantee shall be excluded in determining compliance with the Individual Ceiling on DOSRI loans: *Provided*, That such loan, other credit accommodation or guarantee is secured by the deposit of clients of the borrowing NGO/ foundation which are maintained with the lending bank: *Provided further*, That all of the following conditions are met:

- a. Existing regulations on the opening of deposit accounts and other deposit transactions shall apply except when specifically stated otherwise;
 - b. Depositors shall issue waivers of confidentiality of their deposits and enter hold-out agreements with the lending bank;
 - c. Interest rates on such deposits shall not exceed to that of similar type of deposit accounts;
 - d. Collected but undeposited capital build-up funds from clients shall be recorded in a temporary liability account in the books of related NGOs/foundations and shall be deposited with the related bank not later than fifteen (15) calendar days from date of collection;
 - e. Total loans, other credit accommodations and guarantees granted to the related NGO/foundation shall not exceed, at any time, the total deposits owned by its clients; and
 - f. That the NGO/foundation shall consider as payments to the clients' obligations any deposit used by the lending bank to settle any unpaid obligation(s) of the NGO/foundation.
5. Bank directors and management are reminded to perform their duties and responsibilities in accordance with the standards of corporate governance. Under Sec. 132 duties and responsibilities of bank directors include, among other, the following:
- a. To conduct fair business transactions with the bank;
 - b. To act honestly and in good faith, with loyalty and in the best interest of the institution;
 - c. To devote time and attention necessary to properly discharge their duties and responsibilities;
 - d. To act judiciously; and
 - e. To observe confidentiality.

Section 2. Requirements

In this connection, banks engaged in retail microfinance operations are required to:

1. To include in the biographical data of directors and officers their involvement, in any capacity, in the microfinance operations of related microfinance NGOs/ foundations;
2. Require the approval of the board of directors of all related party transactions and that the same be covered by notarized agreements. It is also understood that all loan transactions with related NGOs/ foundations shall comply with the existing requirements on DOSRI loans; and
3. Submit a copy of the said agreement/contract to the appropriate Bangko Sentral department/group for review and evaluation.

(Circular No. 969 dated 22 August 2017)

PROCEDURES ON COLLECTION OF FINES/PENALTIES FROM BANKS AND/OR DIRECTORS/OFFICERS OF BANKS
(Appendix to Sec. 1102 on Guidelines on the imposition of monetary penalties and Payment of monetary penalties)

For uniform implementation of the regulations payment of monetary penalties from banks and/or directors/officers, the following procedures shall be observed:

1. Upon approval of the fines/penalties by the Governor/ Monetary Board, the Department/Office concerned shall send the Statement of Account (SOA)/billing letter to the bank with an advice that the penalty should be paid in full within fifteen (15) calendar days from receipt of SOA/billing letter. For entities which maintain DDA with Bangko Sentral, the amount of the penalty/ies shall be automatically debited from the bank's DDA with the Bangko Sentral after the lapse of the fifteen (15)-calendar day period. The bank shall likewise be advised that penalty or portion thereof which remained unpaid after the lapse of said fifteen (15)-day period shall be subject to additional charge of six percent (6%) per annum reckoned from the banking day immediately following the end of the fifteen (15)-day period up to the day of actual payment.
2. On the banking day immediately following the end of said fifteen (15)-day period, unpaid penalties shall be automatically debited, without additional charge, against the bank's DDA with the Bangko Sentral by the Comptrollership Sub-sector (CoSS) based on the amount booked by the Department/Office concerned after first confirming with the CoSS the sufficiency of the bank's DDA balance to cover the amount of the penalty.
3. If, based on its confirmation with the CoSS, the Department/Office concerned received information that the bank's DDA balance is insufficient to cover the amount of the penalty, it shall accordingly advise and request the bank to immediately fund its DDA.
4. As soon as it is funded, the bank's DDA shall be debited by the CoSS for the amount of the penalty, plus the six percent (6%) additional charge for late payment of the penalty reckoned from the banking day immediately following the end of the fifteen (15)-day period up to the day of actual payment, based on the amount booked by the Department/Office concerned.
5. Payment by TBs, RBs or Coop banks of penalty, plus the additional charge, if any, by check or demand draft shall be made directly to the Bangko Sentral Cash Department or to Bangko Sentral Regional Cash Units in accordance with the provisions of Sec. 1102.
6. In the case of penalty/ies imposed on bank directors and/or officers, the employers bank and said directors and/or officers shall be advised by the appropriate supervising department concerned that the employer bank's DDA with the Bangko Sentral shall be debited for the amount of the penalty as advance payment in behalf of the director and/or officer within fifteen (15) calendar days from receipt of the notice of the decision of the Governor/Monetary Board. In case the director and/or officer is no longer connected with the bank, payment thereof shall be for the account of the director and/or officer who shall pay directly to the Bangko Sentral in the form of cash or check or such other acceptable means of payment and in accordance with the provisions of Sec. 1102. The procedures under Items "2", "3" and "4" hereof shall likewise apply.

(Circular No. 988 dated 20 December 2017)

**IMPLEMENTING GUIDELINES FOR BANKS PARTICIPATING DIRECTLY IN THE
CLEARING OPERATIONS¹ OF THE PHILIPPINE CLEARING HOUSE CORPORATION (PCHC)
(Appendix to Sec. 802)**

Sec. 1. Definition of Terms

- a. *Clearing Day* - shall refer to a day when the PCHC processes the exchange of checks and other cash items of participating member banks
- b. *Value or Settlement Date* - Settlement of both inward and outward items shall be value dated on the day the checks are originally presented to PCHC or Regional Clearing Center (RCC), net of AM returns. For this purpose, the value or settlement date referred to herein shall be defined uniformly as the date of original presentation of the Checks and Other Cash Items (COCI), to PCHC or RCC for the Integrated Greater Manila local exchanges (Integrated GM LX) and regional local exchanges (RLX).

Unless otherwise modified in subsequent Circulars, value or settlement date for clearing items shall be as stated in the following schedule:

Session	Value/Settlement Date
Returned Items	
AM Returns	
Integrated Greater Manila local exchanges (Integrated GM LX) and regional local exchanges (RLX)	On date of original presentation of COCI to PCHC or Regional Clearing Center (RCHC)
Integrated GM Outward to Region Integrated GM Inward from Region Region to Region	On the date the COCIs are received and processed at PCHC
PM Returns (for returned COCIs due to technical reasons only)	On date of return
Outward Items	
Integrated GM LX and RLX	On date of original presentation of COCI to PCHC or RCC, net of AM returns
Integrated GM Outward to Region Integrated GM Inward from Region Region to Region	On the date the COCIs are received and processed at PCHC
COCI not coursed through PCHC	On the date the COCI is cleared by the drawee bank

Sec. 2. Ceiling on Overdraft Due to Clearing Losses .

A ceiling shall be set on the amount of overdraft a bank may incur due to failure to cover clearing losses through interbank borrowings and/or repurchase agreements with Bangko Sentral. The ceiling is defined as the sum of clean Overdraft Credit Line (OCL) equivalent to fifteen percent (15%) of rediscounting line with the Bangko Sentral, and the collateralized OCL that will be extended by Bangko Sentral. A bank not meeting the following criteria:

- a. CAMELS composite rating of at least "3";
- b. CAR of at least ten percent (10%); or
- c. No chronic reserve deficiencies for the immediately preceding one (1) year or other measures as may be defined by the Bangko Sentral for this purpose, should apply for collateralized OCL in an amount equivalent to at least five percent (5%) of their demand deposit liabilities as of end of month, two (2) months prior to the date of application with the Department of Loans and Credit (DLC); otherwise, its outward clearing items shall be subject to second day value dating.

Other banks may also apply for collateralized OCL in any amount.

¹ The revised clearing and settlement process shall become effective as follows:

Clearing Exchanges	From	To
1. Integrated Greater Manila Local Exchanges (Integrated GM LX)	01 January 2011	24 January 2011
2. Regional Local Exchanges (RLX)	01 January 2011	01 July 2011

Provided, That for RLX, the extended deferral from 24 January 2011 to 01 July 2011 shall refer only to the provision of Circular No. 681 on the mandatory return of checks drawn against insufficient funds or credit, checks drawn against closed accounts and/or checks with stop payment orders, (i.e., not later than 7:30 AM of the next clearing day following the original presentation to PCHC or RCC), subject to the condition that checks returned due to insufficiency of funds or credit shall no longer be allowed to be covered or funded after the day they were presented to PCHC or RCC.

Sec. 3. Application for Collateralized OCL

- a. Banks shall file their application for collateralized OCL with the DLC supported by the documents indicated below:
 - (1) A duly notarized secretary's certificate together with a resolution of the board of directors of the bank authorizing the bank to apply for the loan line and designating the officers authorized to negotiate, sign and execute all accessory documents for the loan line;
 - (2) Notarized Surety Agreement executed by the controlling stockholders (owning more than fifty percent (50%) of the voting stock) and every person or group of persons whose stockholdings are sufficient to elect at least one director obligating themselves jointly and severally with the bank to pay promptly on maturity or when due the Bangko Sentral, its successor or assigns, all promissory notes covering availment against the loan line, if any; and
 - (3) Collateralized documents to cover the loan line.
- b. The OCL line shall be secured by first class collateral that refer to the assets and securities which have relatively stable and clearly definable value and/or greater liquidity and free from lien and encumbrances, to the extent of their applicable loan values, as follows:

Acceptable Collateral	Loan Value	
	With Surety Agreement	Without Surety Agreement
(1) Government securities - based on the current market value of the securities	80%	80%
(2) Unencumbered real estate properties in the name of the bank <ol style="list-style-type: none"> (a) <i>Initial rate</i> - based on the appraised value (AV) of the land and insured improvements (b) <i>Final rate</i> - based on the AV of the land and insured improvements determined by a licensed and independent appraiser acceptable to the Bangko Sentralin accordance with Bangko Sentral's terms of reference 	40%	30%
(3) Mortgage credits		
<i>Initial rate</i> - based on the AV of the property securing the loan evidenced by negotiable instruments or the outstanding balance of such loan	40% of AV or 50% of the outstanding balance, whichever is lower	30% of AV or 40% of the outstanding balance, whichever is lower
<i>Final rate</i> - based on the AV of the property securing the loan evidenced by negotiable instruments as determined by a licensed and independent appraiser acceptable to the Bangko Sentralin accordance with the Bangko Sentral's terms of reference or the outstanding balance of such loan	70% of AV or 80% of the outstanding balance, whichever is lower	80% of AV or 70% of the outstanding balance, whichever is lower
(4) Hold-out on foreign currency deposits with the Bangko Sentral- based on current (buying) exchange rate	80%	80%
(5) Investment grade commercial papers	80%	80%

- c. The DLC shall possess the application for OCL and any subsequent amendments to the approved OCL. Upon approval, the DLC shall require the bank to submit the following:
 - (1) Duly signed and notarized OCL Agreement between the bank and the Bangko Sentral; and
 - (2) PCHC certification that the bank participates in the PCHC clearing process in accordance with the MOA per Bangko Sentral Circular letter dated 11 September 2001.
- d. It shall also inform the Payments and Settlements Office (PSO) and the appropriate supervising department of the Bangko Sentral of the amount of the bank's approved OCL and any changes that may occur thereafter. The amount of the approved OCL shall be reviewed and if necessary, amended annually or as circumstances warrant by the DLC. A nominal processing fee of ten thousand (P10,000.00) shall be collected annually or upon amendment of the OCL.
- e. The bank shall be allowed the flexibility of changing or substituting collateral, specially matured government securities. The DLC shall process any request for amendment to the collateral offerings.

- f. The loan value of the collaterals securing the OCL shall be correspondingly reduced under any of the following circumstances:
 - (1) There are collections received on the mortgage credits;
 - (2) The mortgage credits becomes past due;
 - (3) The property mortgaged was sold; and
 - (4) The collateral assets fall short of the definition of first class collateral.
- g. The bank shall duly inform DLC of any collections on mortgaged credits or sale of assets mortgaged and ensure that adequate records on collections and sales made by the branches are maintained in its head office.

Sec. 4. Availments Against the Approved Clean/Collateralized OCL

- a. Provided the overdraft does not exceed the ceiling as defined in Section 2 hereof, the bank may avail of the clean/collateralized OCL. The availment shall be granted the next banking day after taking into account the amount of AM returns, for value the previous banking day.
- b. The availment shall bear interest at one-tenth of one percent (1/10 of 1%) per day or the ninety-one (91)-day Treasury Bill rate of the last auction immediately preceding the availments, plus three percentage points whichever is higher.
- c. The availment shall be fully debited to the demand deposit account of the bank with Bangko Sentralon the next banking day without need of demand.
- d. The availment shall be for a maximum period of five (5) consecutive clearing days or five (5) clearing days within any 30-day rolling calendar period, after which the OCL shall be suspended.

Sec. 5. Procedures for Unwinding and Exclusion.

Should the overdraft exceed the ceiling as defined in Section 2 hereof, no availment of the clean/collateralized OCL shall be allowed.

- a. In the case of end-of-day overdraft, the PSO shall advise the PCHC of the amount available for settlement of the drawee bank's inward clearing items net clearing loss, beyond which amount inward clearing items will be unwound in accordance with the PCHC Clearing House Rules and Regulations.
- b. In the case of final overdraft, i.e., after AM returns, where unwinding is no longer possible, the bank shall be excluded from next clearing. The PSO shall advise the PCHC of such exclusion upon prior Monetary Board approval.

Sec. 6. Conversion/Suspension of Clean/Collateralized OCL.

Banks found to be abusing their clean/collateralized OCL privilege shall be subject to suspension of the OCL. The following shall constitute an abuse of the OCL privilege and shall automatically result in the suspension of the OCL:

- a. Availment of OCL for five (5) consecutive clearing days; or
- b. Availment of OCL for five (5) times within any 30-day rolling calendar period.

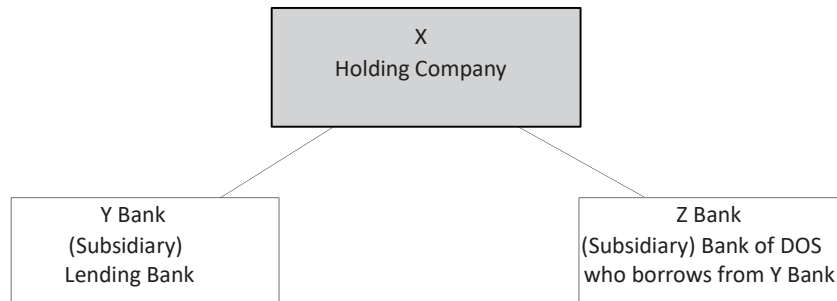

The suspension of the OCL may be lifted upon request by the bank concerned subject to the approval of the Bangko Sentral's Credit Committee.

The collateralized OCL may be converted into an emergency loan provided the bank complies with the guidelines governing the grant of emergency loans under Sec. 285 (*When an emergency loan or advance may be availed of*) or may be subject to foreclosure of collateral.

(Circular No. 1077 dated 26 February 2020)

ILLUSTRATIONS WHEN A DIRECTOR, OFFICER AND STOCKHOLDER (DOS) SHALL WAIVE THE SECRECY OF DEPOSITS
(Appendix to Sec. 347)

- A. When the loan is obtained from a bank that is a subsidiary of a holding company of which both the borrower's bank and the lending bank are subsidiaries.

Thus, if Mr. A, who is a director of Z Bank borrows from Y Bank, he should waive the secrecy of deposits of whatever nature in all banks in the Philippines since both Y Bank and Z bank are subsidiaries of X Holding Company.

- B. When the loan is from a bank in which a controlling proportion of the shares is owned by the same interest that owns a controlling proportion of the shares of his bank.

Lending bank's Equity Structure

Borrower's bank Equity Structure

In illustration above, the controlling shares in both banks belong to the "same interest", Owner A.

**GUIDELINES ON THE ADOPTION OF PHILIPPINE FINANCIAL REPORTING STANDARDS (PFRS 9) –
CLASSIFICATION AND MEASUREMENT
(Appendix to Sec. 172)**

Section 1. Classification and Measurement of Financial Assets and Financial Liabilities

BSFIs shall classify and measure financial assets and financial liabilities, including those which are designated as hedged items, in accordance with the provisions of PFRS 9. In this respect, BSFIs shall observe the following:

- A. **Classification of Financial Assets** - Financial assets shall be classified based on their contractual cash flow characteristics and the business model for holding the instruments.

- (1) *Financial assets that are debt instruments.* Financial assets that are debt instruments shall be classified under any of the following categories:

- a. **Financial assets measured at fair value through profit or loss (FVPL).** A financial asset shall be measured at fair value through profit or loss, except in the following cases:

- The financial asset is part of a hedging relationship, in which case, the provisions of PFRS 9 on hedge accounting shall apply;
- The financial asset is measured at fair value through other comprehensive income (FVOCI); or
- The financial asset that is a debt instrument is measured at amortized cost.

Financial assets measured at fair value through profit or loss shall consist of the following:

- i. Financial assets held for trading (HFT), which include stand-alone and/or embedded derivatives, except a derivative that is a financial guarantee contract or designated and effective hedging instruments, as defined in PFRS 9;
- ii. Financial assets designated at fair value through profit or loss (DFVPL) as defined in PFRS 9.

BSFIs may, at initial recognition, irrevocably designate financial assets that are debt instruments as measured at fair value through profit or loss in accordance with the condition mentioned under PFRS 9, subject to the following requirements:

- BSFIs shall have in place appropriate risk management systems including related risk management policies, procedures, and controls; and
- BSFIs shall apply the fair value option only to instruments for which fair values can be reliably estimated.

- iii. Other financial assets which are mandatorily measured at fair value through profit or loss (MMFVPL) refers to financial assets that are required to be measured at fair value through profit or loss under PFRS 9, other than those that are HFT and DFVPL.

- b. **Financial Assets at Fair Value through Other Comprehensive Income (FVOCI).** A financial asset measured at FVOCI shall meet both of the following conditions:

- The financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

- c. **Financial assets measured at amortized cost.** A financial asset that is a debt instrument, other than those that are designated at fair value through profit or loss, which meet both of the following conditions:

- The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

- (2) *Financial assets that are equity instruments.* Financial assets that are equity instruments shall be classified under any of the following categories:

- a. Financial assets measured at fair value through profit or loss which shall include financial assets HFT;
 - b. Financial Assets at Fair Value through Other Comprehensive Income (FVOCI) which shall consist of:
 - i. Financial asset designated at fair value through other comprehensive income (DFVOCI). BSFIs may, at initial recognition, irrevocably designate financial assets that are equity instruments that are neither held for trading nor contingent consideration recognized by an acquirer in a business combination to which PFRS 3 applies, as measured at fair value through other comprehensive income.
 - ii. Financial assets mandatorily measured at fair value. This includes investment in an equity instrument, previously accounted at cost per PAS 39, which does not have a quoted price in an active market for an identical instrument.
- B. **Classification of Financial Liabilities** - Financial liabilities shall be classified and subsequently measured at amortized cost using the effective interest method, except for:
- (1) Financial liabilities measured at fair value through profit or loss. This shall consist of the following:
 - a. Financial liabilities HFT, including derivative liabilities that are not accounted for as hedging instruments; and
 - b. Financial liabilities DFVPL. A BSFI may, at initial recognition, irrevocably designate financial liabilities as measured at fair value through profit or loss subject to the conditions mentioned under PFRS 9 and the regulatory requirements for financial assets DFVPL under Item "A (1) a ii" above.
 - (2) Financial liabilities which shall be subsequently measured in accordance with the provisions of PFRS 9, as follows:
 - a. Financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies;
 - b. Financial guarantee contracts, as defined under PFRS 9;
 - c. Commitments to provide a loan at a below-market interest rate; and
 - d. Contingent consideration recognized by an acquirer in a business combination.
- C. **Classification of hybrid contracts and derivatives** - Investments in hybrid securities, securities overlying securitization structures, other structured products and credit-linked notes (CLNs) and similar structured products with embedded credit derivatives, as defined under Sec. 624-A shall be classified and measured in accordance with PFRS 9 based on the following guidelines:
- (1) An entire hybrid contract, which contains a host that is an asset within the scope of PFRS 9, shall be classified in accordance with the requirements on the classification of financial assets.
 - (2) A hybrid contract, which contains a host that is not an asset within the scope of PFRS 9 shall require the separation of an embedded derivative from the host and the same shall be accounted for as a derivative based on the requirements and conditions provided under the standard. If an embedded derivative is separated, the host contract and the derivative, individually, shall be accounted for in accordance with appropriate standards.
 - (3) If a contract contains one or more embedded derivatives and the host is not an asset within the scope of this Standard, a BSFI may designate the entire hybrid contract as at fair value through profit or loss unless:
 - the embedded derivative(s) do(es) not significantly modify the cash flows that otherwise would be required by the contract; or
 - it is clear with little or no analysis when a similar hybrid instrument is first considered that the separation of the embedded derivative(s) is prohibited, such as a prepayment option embedded in a loan that permits the holder to prepay the loan for approximately its amortized cost.
 - (4) If a BSFI is unable to measure the embedded derivative separately either at acquisition or at the end of a subsequent financial reporting period, it shall designate the entire hybrid contract as at fair value through profit or loss.

Section 2. Business Model in Managing Financial Assets

Business model pertains to the manner by which a portfolio of financial assets will be managed to generate cash flows such as by collecting contractual cash flows or by both collecting contractual cash flows and selling the financial assets, among others. BSFIs shall determine the business model for a portfolio of financial assets based on scenarios that are reasonably expected to occur, taking into consideration the expected changes to asset allocations or to balance sheet structure as a result of business strategies. In this respect, these scenarios do not include “worst case” or “stress case” scenarios.

- a) The criteria that will be used in determining the business model for managing financial assets shall be applied to a portfolio of financial assets and not on an instrument-by-instrument basis.
- b) Business models for managing financial assets shall be observed through specific activities being undertaken by the BSFI to achieve their stated objectives. A BSFI shall exercise sound judgment and shall use all relevant evidences available at the date of assessment in determining the business model for managing portfolios of financial assets. Such relevant evidences include but are not limited to:
 - Risks affecting the performance of financial assets and the business model and how these risks will be managed;
 - Frequency, volume, timing and nature of sales in prior periods, the reasons for such sales, and expectations about future sales activity;
 - The manner by which business model and the financial assets held within it are evaluated (e.g., based on trading income) and reported to the BSFI’s board of directors or any equivalent position in the case of branches of foreign banks and senior management; and
 - The basis for compensation of concerned personnel and/officers (e.g., whether the compensation is based on the fair value of the assets managed or the contractual cash flows collected).
- c) Business models for managing financial assets shall be approved by the board of directors and shall be adequately documented. The documentation for each business model shall include, among others, detailed description of specific business objectives (whether to hold in order to collect contractual cashflows, to sell or both); cases of sales and/or derecognition of financial assets and conditions for changes in business model that are considered consistent with the provisions of PFRS 9; and appropriate level of authority designated to approve determination of business model of specific portfolios of financial assets as well as the sales, derecognition, and changes in business model of financial assets.
- d) Changes in business model are expected to be rare and shall be determined as a result of external or internal changes which are significant to the BSFI’s operations and evident to external parties. Change in intention related to the management of particular financial assets does not constitute a change in business model. The change in business model shall be approved by the appropriate level of authority based on sound justifications and in accordance with accounting standards. The qualitative and quantitative impact of the change in business model shall be adequately documented and appropriately disclosed in the audited financial statements in line with the disclosure of risk management policies on the relevant risk exposure.
- e) All affected financial assets shall be reclassified when, and only when, a BSFI changes its business model for managing financial assets in accordance with the provisions of Item (“d). *Financial liabilities*” are not allowed to be reclassified.

If cash flows are realized in a way that is different from the expectations at the date at which the BSFI assessed the business model, it does not constitute a change in the classification of the remaining financial assets as long as the BSFI considered all relevant and objective information available when it initially made the business model assessment.

In cases where a BSFI changes a business model, the financial assets within the said model shall not be reclassified within the reporting period that the change in business model was made. The reclassification in this case shall only take effect in the next financial reporting month. In this respect, any previously recognized gains, losses or interest shall not be restated.

Section 3. Contractual Cash Flow Characteristics

- a) In order for a financial asset to be classified and measured at amortized cost or FVOCI, the contractual terms of the financial asset must give rise on specific dates to cash flows that are SPPI on the principal amount outstanding. A financial asset that does not meet the SPPI criterion shall be measured at FVPL, unless it is an equity instrument which shall be classified and measured at FVOCI.
- b) The cashflows that are considered SPPI are consistent with basic lending arrangement where the principal is the fair value of the financial asset at initial recognition and the interest represents consideration for the time value of money, credit risk, profit margin and other basic lending risks and costs associated with holding the financial asset for a particular period of time.
- c) A BSFI shall determine if the contractual cashflows are SPPI in accordance with the provisions of PFRS 9. In this respect, a BSFI shall assess the contractual terms of a financial instrument before investing in the same and determine if such instrument introduces exposure to risks or volatility that is unrelated to a basic lending arrangement.
- d) Policies and procedures shall include guidelines in performing the SPPI assessment, and shall identify the units responsible for conducting and reviewing the propriety of the assessment as well as the documentation supporting the classification of financial assets.

Section 4. Supervisory Expectations on Classification and Measurement of Financial Assets and Financial Liabilities

- a) The business model for managing financial assets shall be assessed in line with the BSFI's internal risk management policies such as credit, market and liquidity risk management. For instance, the financial assets classified and measured at FVPL are commonly associated with the management of market risks since the business model objective is to actively trade the securities. On the other hand, financial assets which were classified and measured at amortized cost mostly relate to the management of credit risk and/or interest rate risk in the banking book since there is no intent to sell the financial asset prior to maturity.
- b) The business model for managing financial assets shall be assessed based on the objective information on the activities undertaken for the portfolios of financial assets. This shall include the comparison of frequency of sales activities across portfolios of financial assets. Portfolios of financial assets that are held for trading are expected to exhibit more frequent and higher turnover as compared with financial assets managed under a hold to collect cash flow and sell business model.
- c) The manner by which the performance of financial assets is measured given a specific business model shall be assessed. Key performance indicators should be consistent with the specific business models for portfolios of financial assets. For instance, the performance of financial assets accounted at fair value through profit or loss may be gauged through actual trading/capital gains since the objective is to optimize earnings from interest rate volatilities/price movements. Performance of financial assets classified at amortized cost may be measured through (net) interest income since the objective is to generate accrual income from long-term investments. The results of the impairment testing and credit review of accounts may likewise be considered.
- d) Bases for incentives or compensation granted to personnel involved in managing specific portfolios of financial assets shall be evaluated in line with the expected activities under a specific business model.
- e) The roles and responsibilities of units involved in the management, monitoring, and reporting of performance of financial assets for specific business models shall be clearly defined. Pursuant to Section 146 (*Duties and Responsibilities*) the Bangko Sentral shall assess the effective implementation of the three lines of defense, which shall include the evaluation of the propriety of segregation of functions.

For instance, part of the first line of defense is the trading desk which is expected to manage financial assets that are measured at FVPL as these assets are usually acquired for short term profit taking. On the other hand, the asset/liability management desk is expected to manage financial assets classified as FVOCI since the financial assets booked under said classification are being used to manage the BSFI's liquidity position or to maintain a particular interest yield profile or duration.

The delineation of the roles and responsibilities of the second and third lines of defense shall be evaluated as well as the effectiveness of the scope and frequency of their review. These lines of defense are expected to evaluate consistency of internal policies and practices with the provisions of PFRS 9 and adherence of the BSFI with established policies.

- f) The review of the second and third lines of defense shall cover, among others, the assessment of the following:
 - i. Comprehensiveness of reports submitted to the board or senior management. These should include the risks that may affect the performance of the business model; consistency of the performance of the financial assets held within the business model against strategic and financial objectives; and results of internal and external validation on management and monitoring of business model.
 - ii. Propriety of sales or derecognition of financial assets based on the business model for managing the same. For instance, the BSFI decides to sell a portion of a portfolio of financial assets held and measured at amortized cost, a review should be conducted to ascertain whether the business models has not changed as a result of such sale. In case of change in business model, the self-assessment functions shall look into the circumstances that triggered the decisions to change, consistency of said decision with internal policies and principles of the standard, propriety of the governance process, and adequacy of documentation.

Section 5. Financial Instruments Under Management of Trust Entities

Consistent with the expectations from BSFIs on the adoption of PFRS 9, as provided under Item “d” of Sec. 172 (*Philippine Financial Reporting Standards/Philippine Accounting Standards*), the board of directors of a trust entity (TE) shall ensure that the TE appropriately and consistently adopts PFRS 9 as part of its reporting governance process.

In this respect, the board of directors shall approve policies and guidelines relative to the classification and measurement of financial assets under management of the TE.

The TE shall adhere to the provisions of Sections 1 to 4 of these guidelines on the classification and measurement of financial assets, to the extent applicable to trust operations. In addition, considering that the management of financial assets under the administration of the TE shall vary for each client, the TE shall be governed by the following:

- a. The board of directors shall approve the business models that will be adopted by the TE for managing the financial assets of clients under its administration. Such business models shall be in accordance with pre-defined investment objectives. For this purpose, the TE may use as guide the industry convention on the mapping of investment objectives to the corresponding business models.
- b. The TE shall use only the board-approved business models in determining the business model/s for each client’s financial assets. The assignment of the applicable business model/s, which shall be consistent with the client’s investment objectives, liquidity requirement, and investment horizon, shall no longer require a separate approval. The classification of financial assets for each client shall be aligned with the business model/s determined by the TE.
- c. For existing accounts, the TE shall assess the impact of the new classification of financial assets on the performance indicator/s set for the client.
 - (1) If the new classification will have a significant unfavorable impact on the performance indicator/s set for the client, a consent or conforme shall be obtained from the client or the authorized signatory/ies of the client, as applicable. The consent or conforme shall document in plain and clearly understandable language: (a) the business model/s determined by the TE in the management of the client’s financial assets; (b) a brief description of the new classification; and (c) the corresponding impact on the performance indicator/s set for the client.

A negative consent or conforme may be allowed, subject to the following conditions:

- (a) the TE has an adequate monitoring process to ensure actual receipt of the notification by the client;
 - (b) the client shall be given a reasonable time to respond to the negative consent or conforme or to raise concern/query, if any; and
 - (c) the client is allowed to amend the business model determined by the TE in the management of the client’s portfolio within a reasonable period.
- (2) If the new classification will not have a significant unfavorable impact on the performance indicator/s set for the client, the TE shall provide appropriate disclosure in the financial reports provided or made available to the client. The disclosure shall document in plain and clearly understandable language: (a) the business model/s determined by the TE in the management of the client’s financial assets; and (b) a statement allowing the client to discuss with the TE any concern/query on the change in the classification of the financial assets of the client.

- d. For new accounts opened after the effectivity of these guidelines, the business model/s determined by the TE in the management of the client's financial assets shall be documented in plain and clearly understandable language in the investment policy statement or letter of instruction, whichever is applicable.
- e. Reclassification of assets may be allowed if there is a change in the business model/s determined in the management of the client's financial assets.

Any change in the business model/s determined by the TE in the management of the client's financial assets shall be supported by a change in the client's investment objective. In order to strengthen controls and prevent potential abuse, the TE shall have adequate policies and procedures, duly approved by the board of directors, covering, among others, the review process, minimum required documentation, and monitoring mechanism for the change in the business model/s determined by the TE in the management of each client's financial asset/s.

Section 6. Reporting guidelines.

Prudential reports shall be prepared using the existing templates of the Financial Reporting Package (FRP)/FRP for Trust Institutions (FRPTI). The mapping of PFRS 9 based accounts to the existing FRP/Consolidated Statement of Condition (CSOC) and Consolidated Statement of Income and Expenses (CSIE) and FRPTI template is provided in Annex A of *this guidelines*.

(Circular No. 1023 dated 04 December 2018 and 1011 dated 14 August 2018)

**Mapping of Philippine Financial Reporting Standards 9 (PFRS 9) Accounts
in the Financial Reporting Package (FRP)**

Banks, including their trust departments, shall report financial assets and financial liabilities using the existing account titles of the FRP based on the mapping of accounts provided below:

1. Banks

MARKING TO MARKET GUIDELINES FOR INVESTMENTS IN DEBT AND EQUITY SECURITIES
(Appendix to Sec. 172 on Marking to market of financial instruments)

Bases/References

Bangko Sentral Supervised Financial Institutions (BSFIs) shall have adequate governance structures and control processes to ensure that valuations are prudent and reliable for risk management and financial reporting purposes. These processes shall be consistently applied across the institution and integrated within the overall governance framework and risk management systems.

In this respect, BSFIs shall mark-to-market (MTM) debt and equity securities in accordance with the provisions of Philippine Financial Reporting Standard 13 (PFRS 13) on Fair Value Measurement and shall observe the following bases/references:

Type of Security	Market Price Basis
A. Equity Securities Listed in the Stock Exchange	
1. Traded in the Philippines	Same day closing price as quoted at the Philippine Stock Exchange. In case of halt trading/suspension or holidays, use the latest available closing price.
2. Trade Abroad	Latest available closing price from the exchange where the securities are traded.
B. Foreign Currency-Denominated Debt Securities Quoted in Major Information Systems (e.g., Bloomberg, Reuters)	Latest available price for the day, Manila time.
C. Foreign Currency Denominated Debt Securities Traded in Local Registered Exchange or Market	The latest available closing price provided by the exchange where the said security is traded and/or enrolled.
D. Peso-Denominated Government Securities	The market prices provided by either a third party pricing service or calculating agent: <i>Provided</i> , That the pricing service or the calculation agent and its valuation methodology are recognized by the Securities and Exchange Commission (SEC) – licensed benchmark administrator.
E. Peso-Denominated Private Debt Securities	The basis for MTM of peso-denominated debt securities traded in an organized market shall be the same as those used in Section C above.

Other Valuation Guidelines

In the absence of market price described above, the fair value which is the price that would be received in selling the financial instrument in an orderly transaction in the principal (or most advantageous) market under current market condition, shall be used as basis for the MTM. BSFIs shall ensure that such an observed price or the price estimated using another valuation technique, including inputs to valuation technique, are consistent with the provisions of PFRS 13.

(Circular Nos. 1021 dated 15 November 2018 and 960 dated 04 May 2017)

**GUIDELINES ON THE OPENING OF A SECURITIES ACCOUNT WITH THE BUREAU OF THE
TREASURY REGISTRY**
(Appendix to Secs. 417 and 424 (Compliance with the basic security deposit requirement))

A. Definition of Terms and Acronyms

Scripless securities - refers to uncertificated securities issued by the Bureau of Treasury (BTr) that are under the BTr's Registry

Trust Entity (TE) – defined under Sec. 403

BTr - Bureau of Treasury

BTr Registry – Registry of scripless securities maintained by the BTr or any registry system of scripless securities recognized as such by the BTr.

DDA – refers to the regular demand deposit account of a bank/quasi-bank with Bangko Sentral

B. Basic Requirements on the Opening of a Securities Account with the BTr Registry

1. The sector of the Bangko Sentral which is responsible for supervising banks/quasi-banks/trust entities shall file with the BTr an application to open a Registry Account where scripless securities of trust entities used as security deposit for trust duties shall be held.
2. The trust entity shall request for the opening of a Client Securities Account with the BTr. The relevant fees for the maintenance of the Client Securities Accounts with BTr shall be subject to the terms and conditions of the BTr.
3. A trust entity with a DDA shall act as its own settlement bank.

A trust entity without a DDA shall designate a settlement bank which will act as consult for transferring securities for trust duties to the Bangko Sentral Registry account and for paying interest, interest coupons and redemption proceeds. The trust entity shall inform the appropriate supervising department of the Bangko Sentral of the designation of a settlement bank.

4. Each trust entity shall accomplish an *Autodebit/Autocredit Authorization* for its client securities account under the supervising sector's Registry account. The document shall authorize the BTr and the Bangko Sentral to credit the DDA of the trust entity or the designated settlement bank for coupons/interest payments and maturity proceeds of securities and to debit the same DDA for the monthly fees payable to the BTr for the maintenance of the trust entity's client securities accounts with the Bangko Sentral. It will also authorize the BTR and Bangko Sentral to credit the deposit account of the trust entity or the designated settlement bank for the redemption proceeds of securities that mature while in the Bangko Sentral – FSS Registry account.

A trust entity with a DDA with Bangko Sentral shall use *Annex A.1* while a trust entity with a settlement arrangement shall use *Annex A.2*.

(Circular No. 1032 dated 15 February 2019)

To be used by a Trust Entity with own demand deposit account with Bangko Sentral

Letterhead of Trust Entity

AUTODEBIT/AUTOCREDIT AUTHORIZATION

The (name of Trust Entity) hereby authorizes the Bureau of the Treasury (BTr) and the Bangko Sentral to credit our demand deposit account (DDA) with Bangko Sentral for coupons/interest payment including the redemption proceeds of our securities deposited with the Bangko Sentral under the BTr Registry and to debit our DDA to settle the payment of monthly maintenance fees of the BTr for maintaining our client securities account with the Bangko Sentral.

This authorization will take effect on (indicate date).

(Authorized Signatories)

To be used by a trust entity with settlement arrangement with a bank

Letterhead of Trust Entity

AUTODEBIT/AUTOCREDIT AUTHORIZATION

The (Name of settlement bank) for the account of (Name of trust entity) hereby authorizes the Bureau of the Treasury (BTr) and the Bangko Sentral to credit our demand deposit account (DDA) with Bangko Sentral for coupons/interest payment including the redemption proceeds of securities of (Name of Trust Entity) deposited with the appropriate supervising department of the Bangko Sentral under the BTr Registry and to debit our DDA to settle the payment of monthly maintenance fees of the BTr for maintaining the client securities account of (Name of Trust Entity) with the appropriate supervising department of the Bangko Sentral.

This authorization will take effect on (indicate date).

**GUIDELINES ON THE OPENING OF A SECURITIES ACCOUNT WITH THE BUREAU OF THE
TREASURY REGISTRY FOR PERA ADMINISTRATOR
[Appendix to Sec. 1121 (Security for the faithful performance of Administrators)]**

A. Definition of Terms and Acronyms

BTr – Bureau of the Treasury

DDA - refers to the regular demand deposit account of a bank with Bangko Sentral-FAD

Financial Institution (FI) - refers to a bank, non-bank financial institution, or trust entity supervised by the Bangko Sentral that is accredited as a PERA Administrator

BTr Registry – Registry of scripless securities maintained by the BTr or any registry system of scripless securities recognized as such by the BTr.

Scripless Securities - refers to uncertificated securities issued by the BTr

B. Basic Requirements on the Opening of a Securities Account with the BTr Registry

1. The sector of the Bangko Sentral which is responsible for supervising banks/quasi-banks/trust entities shall file with the BTr an application to open a BSP-PERA registry account where the securities for the faithful performance of PERA Administrator shall be held.
2. The FI shall request for the opening of a Client Securities Account with the BTr. The relevant fees for the maintenance of the Client Securities Account with the BTr shall be subject to the terms and conditions of the BTr.
3. An FI without a DDA shall designate a settlement bank and shall inform the appropriate supervising department of its designated settlement bank.
4. Each FI shall accomplish an autodebit/autocredit authorization for its PERA Administrator securities account under the BSP-PERA Registry account. The document shall authorize the BTr and the Bangko Sentral to credit the DDA of the FI or the designated settlement bank for coupons/interest payments and maturity proceeds of securities and to debit the same DDA for the monthly fees payable to the BTr for maintenance of the PERA Administrator securities account.

An FI with a DDA with Bangko Sentral shall use Annex A.1 while an FI with a designated settlement bank shall use Annex A.2.

(Circular Nos. 1032 dated 15 February 2019 and 879 dated 22 May 2015)

To be used by an FI with own demand deposit account with Bangko Sentral

Letterhead of PERA Administrator

AUTODEBIT/AUTOCREDIT AUTHORIZATION

The (Name of PERA Administrator) hereby authorizes the Bureau of the Treasury (BTr) and the Bangko Sentral to credit our demand deposit account (DDA) with the Bangko Sentral for coupons/interest payment including the redemption proceeds of our securities deposited with the Bangko Sentral-PERA under the BTr Registry and to debit our DDA to settle the payment of monthly maintenance fees of the BTr for maintaining our client securities with Bangko Sentral-PERA.

This authorization will take effect on (indicate date) .

(Authorized Signatory)

To be used by an FI with settlement arrangement with a bank

Letterhead of Trust Entity

AUTO DEBIT/AUTOCREDIT AUTHORIZATION

The (Name of Settlement Bank) for the account of (Name of PERA Administrator) hereby authorizes the Bureau of the Treasury (BTr) and the Bangko Sentral to credit our demand deposit account (DDA) with Bangko Sentral for coupons/interest payment and redemption proceeds of securities of (Name of Financial Institution/trust entity) deposited with Bangko Sentral under the BTr Registry and to debit our DDA to settle the payment of monthly maintenance fees of the BTr of maintaining the client securities of (Name of financial institution/trust entity) with Bangko Sentral-PERA.

B. Livestock		will depend on the cash flow or type of project, up to a maximum of seven (7) years
C. Poultry		
D. Fisheries		

Note: Cash Flows/Cost and Return Analysis for these projects are available at the Agribusiness and Marketing Assistance Service, Department of Agriculture.

¹ Others - other crops/projects as may be determined by the Department of Agriculture through the Agricultural Credit Policy Council which may include industrial tree crops planted in private lands and used for intercropping purposes.

BASIC GUIDELINES IN ESTABLISHING BANKS (Appendix to Sec. 102)

A. THE APPLICATION PROCESS

Consistent with relevant laws, rules and regulations, the licensing framework of the Bangko Sentral encompasses the assessment of the transparency of ownership and control structure; suitability of shareholders, including the ultimate beneficial owners (UBOs); fitness and propriety of directors and senior management; and adequacy of capital, including sources of initial capital and ability of shareholders to provide additional financial support, where needed. The assessment shall likewise cover the strategic and operating plan, including an appropriate system of corporate governance, risk management and internal controls, projected financial condition, consumer assistance mechanism, and compliance with anti-money laundering (AML) and combating the financing of terrorism (CFT) regulations.

Stage I: Application for Bangko Sentral approval to establish a new bank

PRE-APPROVAL

1. The application for authority to establish a bank shall be signed by a representative authorized by the incorporators/subscribers and submitted either electronically or in hardcopy to the appropriate supervising department of the Bangko Sentral in two (2) copies. The prospective applicant bank may engage the Bangko Sentral in discussion before submitting the formal application.
2. The required documents¹ and other information in support of the application are, as follows:
 - a. Agreement to organize a bank using the prescribed form².
 - b. For each individual incorporator, subscriber, proposed director and principal officer:

Requirements	Incorporators ³	Subscribers	Directors	Principal Officers
1. Biographical data using the prescribed form ⁴ with (2"x2") photograph taken within the last six (6) months from the date the application was received by the Bangko Sentral.	✓	✓	✓	✓
2. Evidence of citizenship	✓	✓	✓	✓
3. Evidence of financial capacity as of a date not earlier than ninety (90) calendar days prior to the filing of application such as credit reports, bank deposits, investments, real estate owned, etc., accompanied by waiver of rights under R. A. No. 1405, as amended, for covered items	✓	✓		
4. Certified photocopies of Income Tax Returns (ITRs) or equivalent document from other jurisdiction for non-Filipino/non-resident Filipinos for the last three (3) calendar/fiscal years	✓	✓		
5. Clearances from the National Bureau of Investigation (NBI) and Bureau of Internal Revenue (BIR) or equivalent clearances or certificate from home country for non-Filipinos, obtained	✓	✓	✓	✓

¹ Documents issued outside the country shall be apostilled or consularized, as applicable.

² Copy of the prescribed form may be downloaded from the BSP website under the section on Regulations – Guidelines and Other Regulations – Guidelines on Establishing Banks, using the link: <https://www.bsp.gov.ph/Regulations/Guidelines%20and%20other%20Regulations/Agreement%20to%20Organize%20a%20Bank.pdf>

³ This shall include UBOs.

⁴ Copy of the prescribed form may be downloaded from the BSP website under the section on Regulations – Guidelines and Other Regulations – Guidelines on Establishing Banks, using the link: <https://www.bsp.gov.ph/Regulations/Guidelines%20and%20other%20Regulations/Biosraphical%20Data.pdf>

within the last six (6) months from the date the application was received by the Bangko Sentral				
---	--	--	--	--

c. For corporate subscribers:

Requirements	Domestic		Foreign	
	Bank	Non-bank	Bank ¹	Non-bank
1. Board resolution authorizing the corporation to invest in such bank; and designating the person who will represent the corporation in connection therewith	✓	✓	✓	✓
2. Latest articles of incorporation (AOI) and by-laws (BL) registered with the Securities and Exchange Commission (SEC) or similar agency from home country for foreign corporate subscribers.	✓	✓	✓	✓
3. Corporate background providing the following:		✓	✓	✓
a. Date and place of incorporation;				
b. List of domestic and foreign branches, agencies, other offices, subsidiaries and affiliates and their location and line of business;				
c. Range of financial and non-financial products offered to and services performed for clients;				
d. Conglomerate structure/map where the corporate subscriber belongs; and				
e. Financial and commercial relationship with the Philippine government, local banks, business entities and residents, past and present				
4. Latest General Information Sheet filed with the SEC or equivalent information sheet filed with the home country's SEC or similar agency for foreign corporate subscribers.	✓	✓	✓	✓
5. List of all stockholders, including the corporation's UBOs, indicating the citizenship, address, and the number, amount and percentage of the voting and non-voting shares held by them	✓	✓	✓	✓
6. Annual reports at the entity-level and consolidated level with audited financial statements for the last three (3) calendar/fiscal years prior to the filing of application	✓	✓	✓	✓

¹ For foreign bank subscriber other than those entering via R.A. No. 7721, as amended by R.A. No. 10641. Meanwhile, foreign bank applicants entering via R.A. No. 7721, as amended by R.A. No. 10641 shall refer to the documentary requirements in Appendix 2 to be submitted to the Bangko Sentral during Stage I of the application process.

7. Certified photocopies of ITRs or equivalent tax returns filed by foreign corporate subscribers for the last three (3) calendar/ fiscal years	✓	✓	✓	✓
8. BIR clearance or equivalent clearance from home country's tax authorities for foreign corporate subscribers obtained within the last six (6) months from the date the application was received by the Bangko Sentral.	✓	✓	✓	✓
9. Certification from the board of directors that it is compliant with the applicable conditions set forth in Sec. 371 for the equity investment to the proposed bank	✓			
10. List of directors and principal officers including their citizenships	✓	✓	✓	✓
11. Certification from relevant home country supervisory authority that it has no objection to the investment in a bank in the Philippines, and it will provide the Bangko Sentral with relevant supervisory information on the foreign corporate subscriber to the extent allowed under existing laws			✓	✓

- d. A UBO of a corporate stockholder shall likewise submit clearances from the NBI and the BIR or equivalent clearances or certificates from home country for non-Filipinos, obtained within the last six (6) months from the date the application was received by the Bangko Sentral.
- e. Comprehensive corporate plan describing its business model, including the target markets and channels, corporate strategy and economic justification for establishing the bank. The said document shall also provide detailed information to substantiate that the proposed bank has adequate financial, managerial and organizational resources in place to support its strategy and operations on an ongoing basis.
- f. Feasibility study with projected monthly financial statements (FS) for the first year and projected yearly FS for the first five (5) years of operation, using realistic assumptions consistent with the proposed business model and corporate strategy of the bank. The details of the assumptions used shall be presented in the feasibility study.

If an applicant is seeking a digital banking license, a detailed review and assessment of the supporting information technology (IT) systems and infrastructure vis-à-vis the digital banking business model should be performed by a competent independent third-party IT expert. Said technical review shall cover a comprehensive assessment of the design, security controls, scalability, and resilience capability of the IT infrastructure, network, application, database, security systems, AML/CFT measures and other applicable technologies supporting the digital banking operations.

A copy of the assessment and technical reports shall be submitted to Bangko Sentral as part of the application requirements.

- g. Certification executed by each of the subscribers that the amount committed to pay the proposed paid-up capitalization in the bank was not derived from borrowings, unlawful activity or any money laundering activity.
- h. In addition to the foregoing requirements, an applicant seeking for a digital banking license shall also submit the applicable requirements in offering Electronic Payments and Financial Services (EPFS) as enumerated under Sec. 701 (*Requirements for the grant of authority to offer EPFS*) and *Appendix 141*, including the list and nature of material outsourcing arrangements.
- i. Other documents which may be required by the Bangko Sentral relevant to the evaluation of the application.

3. The application shall be processed on a first-come, first-served basis: *Provided*, That all the required documents and information are complete. Incomplete application documents shall be returned by the Bangko Sentral. The said application shall be considered closed without prejudice to the submission of a new application together with the complete documentary requirements.
4. The applicant bank shall be required to make a presentation to the Financial Supervision Sector of the Bangko Sentral. The presentation shall cover the following: ownership structure, including UBOs, of the proposed bank and its related parties, if any; corporate plan and results of the feasibility study; governance structure (i.e., board of directors and senior management); amount and sources of capitalization; risk management and internal control system; consumer assistance mechanism; general overview of the AML/CFT measures to be adopted; and other information relevant to the evaluation of the application.
5. The non-refundable application fee, as provided under Sec. 102 and *Appendix 2*, shall be paid upon filing of complete application documents.

EVALUATION

Capital Requirements/Stockholdings

1. Banks to be established shall comply with the required minimum capital prescribed under Sec. 121 (*minimum capitalization*) and 102 (*Establishment of digital banks*), as applicable.
2. The stockholdings in any bank shall be subject to the limits on stockholdings in a single bank and several banks as prescribed under Secs. 122 (*Limits of stockholdings in a single bank*), 122-A (*Limits on stockholdings in several banks*), and 122-C (*Limits in stockholdings in several rural banks*), respectively.

Incorporators, Subscribers, Directors and Officers

1. The incorporators, subscribers and proposed directors and officers must be persons of integrity, of good credit standing in the business community, and must possess technical expertise in the field of banking and finance. In the case of applicants for digital banking license, at least one member of the board of directors and one senior management officer should have a minimum of three (3) years of experience and technical knowledge in operating a business in the field of technology or e-commerce.
2. The incorporators/subscribers must have adequate financial strength to pay their proposed subscriptions in the bank and/or infuse additional capital when needed. The Bangko Sentral reserves the right to require the incorporator, subscriber or UBO to submit a deed of undertaking committing himself to pay his subscription and/or infuse additional capital to support the operations of the proposed bank in an ongoing basis.
3. The incorporators, subscribers and proposed directors and officers must not have been convicted of any crime or involved in any of the cases enumerated in Sec. 138 (*Disqualification and Watchlisting of Directors and Officers*), as a principal, accomplice or accessory. Unless otherwise allowed under the provisions of existing laws, the incorporators, subscribers and proposed directors and officers are not officers or employees of a government agency, instrumentality, department or office charged with the supervision of, or the granting of loans to banks within one (1) year prior to their subscription/appointment/election/hiring. Moreover, such incorporators, subscribers and proposed directors and officers must have no adverse derogatory information of any kind (e.g., included in the watchlist file of any competent authority locally or internationally, have pending administrative or criminal cases, among other things). Furthermore, in case of corporate stockholder, the UBO must be expressly declared and required to submit the same proof of qualifications.
4. A bank may be organized with not less than five (5) nor more than fifteen (15) incorporators.
5. The number and nationality of the members of the board of directors of the bank shall be subject to the limits prescribed under Sec. 132 (*Composition of the board of directors*).
6. No appointive or elective public official, whether full-time or part-time, shall at the same time serve as officer of a bank except in cases where such service is incident to financial assistance provided by the government or a government-owned or -controlled corporation (GOCC) to the bank or in cases allowed under existing laws.
7. The proposed directors and officers of the bank shall be subject to qualifications and other requirements under Secs. 132 (*Qualifications of a director*) and 134 (*Qualifications of an officer*) as well as confirmation/approval of the Bangko Sentral pursuant to Sec. 137 (*Confirmation of election/appointment of directors/officers*).
8. The disqualifications of directors and officers prescribed under Sec. 138 (*Disqualification and Watchlisting of Directors and Officers*) shall also apply.

POST APPROVAL

Stage II: Application for the issuance of Certificate of Authority (COA) to Register with the SEC

1. Within thirty (30) calendar days from receipt of advice of approval by the Monetary Board of the application for authority to establish the bank, the organizers shall:
 - a. Submit the proposed AOI, BL and treasurer's sworn statement in four (4) copies and the letter requesting the issuance of the COA to Register the AOI and BL with the SEC;
 - b. Deposit with any U/KB (for KBs, TBs and digital banks), any bank (for RBs and coop banks), and any UB (for Islamic banks) the initial paid-up capital of the proposed bank, and submit a copy of the depository bank's certification of deposit;
 - c. Pay the applicable license fee at the Bangko Sentral Cash Department (for cash) or other alternative payment modes acceptable to the Bangko Sentral, net of the previously paid application fee; and
 - d. Submit a copy of certificate of the inward remittance of capital, in the case of foreign subscribers.
2. Within sixty (60) calendar days after the issuance by the Bangko Sentral of the COA to Register the AOI and BL, the organizers shall effect the filing of said documents with the SEC.

Stage III: Application for the issuance of COA to Operate

3. Within one (1) year from receipt of advice of approval by the Monetary Board of the application for authority to establish the bank, the organizers shall:
 - a. Complete the establishment of the bank premises, with the applicable minimum security measures under Sec. 147 (*Minimum security measures*) and the requirements under Batas Pambansa Blg. 344¹ and Republic Act No. 9994²;
 - b. Effect and complete the recruitment and hiring of officers and employees of the bank;
 - c. Attend the briefing on Bangko Sentral reportorial requirements conducted by the appropriate department of the Bangko Sentral together with the relevant officers of the bank;
 - d. Attend the briefing on Anti-Money Laundering (AML) registration and reportorial requirements conducted by the AML Council Secretariat (AMLCS) together with the relevant officers of the bank; and
 - e. Submit the letter requesting the issuance of COA to Operate the bank and the following documentary requirements at least thirty (30) calendar days before the scheduled start of operations:
 - (1) Proof of registration of AOI and BL with the SEC;
 - (2) Certification signed by all the directors stating that –
 - i. All the conditions of the approval to establish the proposed bank have been complied with;
 - ii. The policies, and procedures covering all risk areas; internal controls, information technology, accounting systems, and business continuity plan that have been approved by the board of directors are in place upon start of operations;
 - iii. The necessary bond policy on custodial officers and insurance policy on bank properties required to be insured have been obtained;
 - iv. All applicable pre-operating requirements under existing laws and regulations, which include among others, (a) use of business name, (b) posting of schedule of banking days and hours, notice to depositors on clearing cut- off time, and disclosure statement on loan/ credit transaction, (c) Batas Pambansa Blg. 344 and Republic Act No. 9994; (d) minimum security measures; and (e) publication of consumer assistance management system have been complied with; and

¹ An Act to Enhance the Mobility of Disabled Persons by Requiring Certain Buildings, Institutions, Establishments and Public Utilities to Install Facilities and Other Devices

² An Act Granting Additional Benefits and Privileges to Senior Citizens

- v. No person who is the spouse or relative within the second degree of consanguinity or affinity will be appointed to any officership positions across the following functional categories in the bank: (a) decision making and senior management function, (b) treasury function, (c) recordkeeping and financial reporting function, (d) safekeeping of assets, (e) risk management function, (f) compliance function, and (g) internal audit function.
- (3) Proof of compliance with the applicable pre- operating requirements under existing rules and regulations in relation to Item "(21)(iv)" above;
 - (4) List of principal and junior officers and their respective designations and salaries;
 - (5) Ownership and governance structure;
 - (6) Contract of lease on bank's premises, if the same are to be leased;
 - (7) List of stockholders stating the number and percentage of voting stocks owned by them as well as their citizenships;
 - (8) Certification from the Philippine Deposit Insurance Corporation (PDIC) stating that the organizers have undergone a briefing on all of its requirements;
 - (9) Alien Employment Permit or other applicable document issued by the Department of Labor and Employment for foreign directors and officers;
 - (10) Provisional certificate of registration from the AMLCS; and
 - (11) Other documents/papers which may be required by the Bangko Sentral.

B. OPENING OF THE BANK FOR BUSINESS AFTER THE CERTIFICATE OF AUTHORITY TO OPERATE HAS BEEN ISSUED

Within five (5) banking days after the start of operation, the bank shall –

1. Inform the Bangko Sentral of the first day of operation and the banking days and hours; and
2. Submit the balance sheet as of the first day of operation.

The approved applicant bank is expected to adhere to the qualifications for the grant of banking license on a continuing basis. Moreover, it shall be subjected to assessment/s or examination/s of the Bangko Sentral to ensure that the necessary governance structure, risk management system and internal controls, among others, are in place. The assessment may be conducted any time before or after the issuance of the COA to operate the bank.

C. REVOCATION OF AUTHORITY TO ESTABLISH A BANK

The basis for revocation of authority to establish a bank are provided under Sec. 102.

(Circular Nos. 1105 dated 02 December 2020, 969 dated 22 August 2017, 930 dated 18 November 2016, and 902 dated 15 February 2016)

RULES AND REGULATIONS FOR COOPERATIVE BANKS (Appendix to Section 102)

Pursuant to Monetary Board Resolution No. 192 dated 11 February 2010, following are the revised rules and regulations governing the organization, membership, establishment, administration, activities, supervision and regulation of Cooperative Banks to implement the provisions of Chapter XII of Republic Act No. 9520 otherwise known as the Philippine Cooperative Code of 2008, which amends Republic Act No. 6938 otherwise known as the Cooperative Code of the Philippines.

Sec. 1 Statement of Policy. The Bangko Sentral is committed to developing a sound and vibrant cooperative banking sector to support the growth of rural economies and communities. Toward this end, these rules and regulations recognize the unique nature and character of Coop Banks while at the same time ensure that they are operating within a level playing field with other types of banks and thereby comply with banking laws, rules and regulations.

Sec. 2 Definition of Cooperative Banks. A Coop Bank is one organized for the primary purpose of providing a wide range of financial services to cooperatives and their members. It shall be organized only by cooperative organizations that are duly established and registered under the Philippine Cooperative Code of 2008 (R.A. No. 9520).

A cooperative organization is a duly registered association of persons with a common bond of interest, who have voluntarily joined together to achieve their social, economic and cultural needs and aspirations by making equitable contributions to the capital required patronizing their products and services and accepting a fair share of the risks and benefits of the undertaking in accordance with universally-accepted cooperative principles.

For purposes of these regulations, a Cooperative Bank shall, likewise, be considered a cooperative that should be registered with the Cooperative Development Authority (CDA), subject to the requirements and requisite authorization of the Bangko Sentral.

Sec. 3 Registration, Application Procedures and Pre-Operating Requirements for Coop Banks

1. A prospective Coop Bank shall file its application for licensing as a bank with the Bangko Sentral, and upon approval, shall be registered with the CDA;
2. Duly registered cooperatives applying for authority to establish a Coop Bank shall submit the following documents to the appropriate supervising department of Bangko Sentral;
 - a. Certificate of registration or re-registration with the CDA;
 - b. Board resolution authorizing the investment of the cooperative to the Coop Bank;
 - c. Board resolution appointing/designating the authorized representative of the cooperative to the Coop Bank. The authorized representative must either be the chairman, president or secretary of the cooperative;
 - d. Latest AFS of the cooperatives;
 - e. Articles of Cooperation, Treasurer's Sworn Statement and By-Laws of the proposed Coop Bank in six (6) copies;
 - f. Certificate of Good Standing of each cooperative from the CDA;
 - g. Bio-data, accomplished in the prescribed form under oath and in triplicate, by each of the authorized representatives of the cooperative members, and proposed members of the board of directors and officers of the Coop Bank;
 - h. NBI/BIR clearances of the authorized representatives of the cooperative members and proposed members of the board of directors and officers of the Coop Bank;
 - i. Latest statement of assets and liabilities of authorized representatives which must be not earlier than ninety (90) days from date of application;
 - j. Projected monthly financial statements for the first three (3) years of operations which must be supported by the following:
 1. reasonable assumptions;
 2. plantilla of organization including the estimated salaries and allowances of the officers and employees, as well as the members of the board of directors;

3. schedule of proposed banking premises, furniture, fixtures and equipment indicating their estimated cost; and
 4. such other information as may be necessary.
- k. Detailed plan of operations which should include the following minimum information:
1. marketing plan describing how the bank expects to generate viable and sustainable business;
 2. description of how the bank will be organized and controlled internally to ensure that an appropriate system of corporate governance will be in place; and
 3. adequate operational policies and procedures, internal control procedures and management expertise to operate the proposed bank in a safe and sound manner.
- l. Economic justification. The economic justification for establishing the bank should provide information on the economic profile of the proposed area of operation, i.e., whether it is industrial, agricultural, etc., number of existing business establishments, population, expected competition and such other relevant information.
3. A Coop Bank established under RA No. 9520 shall comply with the pre-operating requirements specified in *Section 11, Appendix 34*.
- a. Within eight (8) months from receipt of advice of approval of the Monetary Board of its application, the proposed Coop Bank shall:
1. Complete the construction and furnishing of the bank building which shall be equipped with facilities, furniture, forms and stationery, and vault of reinforced concrete with a steel two (2)-hour fire resistant door and equipped with time delay device, in accordance with the specifications of the Bangko Sentral;
 2. Effect and complete the training/seminar of directors, officers and employees of the Coop Bank; and
 3. Inaugurate and open the Coop Bank for business.
- b. At least thirty (30) days prior to the start of operations, the Coop Bank shall submit the following requirements
1. Certification of compliance with the conditions of approval of the applications duly signed by the cooperators;
 2. Proof of registration of Articles of Cooperation, Treasurer's Sworn Statement and By-Laws of the Bank;
 3. Certificate of deposits of the bank's paid-in capital;
 4. Request for ocular inspection of the bank premises at least thirty (30) days before the scheduled date of operations;
 5. Certificates of training/seminar of officers and employees;
 6. Certificates of attendance of the special seminar for members of the board of directors conducted or accredited by the Bangko Sentral;
 7. List of principal and junior officers and their respective designations and salaries;
 8. Bio-data sheets, NBI/BIR clearances, ITRs for the last two (2) years of directors/ officers who have not had the previous approval of the Monetary Board, for evaluation of their qualifications prior to their appointment;
 9. Chart of organization. The chart should show the names of departments/ units/offices with their respective functions and responsibilities, and the designations of positions in each department/unit/office with their respective duties and responsibilities. The internal organization should provide for a management structure with clear accountability, a board of directors with ability to provide independent check on management and independent audit and compliance functions, and should follow the "four eyes" principle, i.e., segregation of various functions, cross checking, dual control of assets, double signatures;
 10. Manual of Operations embodying the policies and operating procedures of each department/unit/office covering such areas as signing/delegated authorities;

11. Two (2) sets of specimens of principal bank accounting and other forms;
12. Blueprint of floor layout of bank premises;
13. Contract of lease on bank's premises, if the same are to be leased;
14. Insurance coverage of bank properties;
15. Fidelity bonds of accountable officers;
16. Excerpts of the minutes of the organizational meetings confirming all organizational and pre-opening transactions relative to activities undertaken to prepare the bank to operate (such as appointment of officers, contract of lease, etc.);
17. An alphabetical list of stockholders with the number and percentage of voting stocks owned by them;
18. A separate list containing the names of persons who own voting stocks in banks and who are related to each other within the 3rd degree of consanguinity or affinity, with proper indication of the combined percentage of voting stocks held by them in the particular bank, as well as corporations which are wholly-owned or a majority of the stock of which is owned by any of such persons, including their wholly or majority-owned subsidiaries;
19. Certification by the president or officer of equivalent rank that no person who is the spouse or relative within the 2nd degree of consanguinity or affinity of any person holding the position of chairman, president, executive vice president or any position of equivalent rank, general manager, treasurer, chief cashier or chief accountant will be appointed to any of said positions in the bank;
20. Appointment of an officer of the proposed bank who shall have undergone orientation on the reportorial requirements with the Bangko Sentral and a certification by the manager that he is fully aware of said reportorial requirements and the respective deadlines for submission to the Bangko Sentral;
21. A certification by the PDIC that the organizers had already been briefed on all of its requirements for newly established banks; and
22. Other documents/papers which may be required.

Sec. 4 Capital Requirements. Coop Banks that will be established under R.A. No. 9520 shall comply with the minimum paid in capital provided in Sec. 121 (*minimum capitalization*).

No cooperative member shall own or control more than forty percent (40%) of the total capital contributions of a Coop Bank. This limitation shall also apply to cooperatives purchasing government-held preferred shares of Coop Banks which are converted into common shares.

Coop Banks shall issue par value shares only.

Sec. 5 Members of the Board of Directors, Officers, Quorum and Voting Rights

1. The definition, qualifications, responsibilities and duties of the board of directors and officers that are generally applicable to all banks under Secs. 132 to 138 shall also apply to Coop Banks.
2. Coop Banks shall, likewise, comply with the following regulations on the minimum qualification requirements of the members of its board of directors and officers:
 - a. At least one (1) member of the Board of Directors of a Coop Bank shall have a one (1) year experience in banking; and
 - b. The manager of a Coop Bank must have actual banking experience (at least manager or assistant manager)
3. The quorum requirement for general assembly meetings, whether special or regular, shall be one-half plus one of the number of voting shares of all the members in good standing.

The quorum requirement for amendments of articles of cooperation and by-laws shall be three-fourths (3/4) of the number of voting shares of all the members with voting rights, present and constituting a quorum.

4. The voting rights of members shall be proportionate to the number of their paid-up shares. Existing Coop Banks shall amend their Articles of Cooperation to conform to this provision within a period of one (1) year from 06 March 2010.
5. In the meetings of the board of directors, whether special or regular, the quorum requirement shall be one-half plus one of all the members of the board of directors. Each director shall only have one (1) vote.

Sec. 6 Membership in a Coop Bank

Membership in a Coop Bank shall either be regular or associate. Regular membership shall be limited to cooperative organizations which are holders of common shares of bank. Such common shares shall not be withdrawable but may be sold or transferred to qualified member cooperative organizations.

Associate members are those that subscribe and hold preferred shares of the bank, the features of which shall be defined in the Articles of Cooperation. Associate members may include, but shall not be limited to, individual members of the bank's member-primary cooperatives.

In the case of Samahang Nayon (SN) and Municipal Katipunan ng mga Samahang Nayon (MKSAN) which held common shares of Coop Banks prior to the effectivity of R.A. No. 9520, they shall apply for conversion to full-fledged cooperatives in order to maintain their status as regular members of cooperative banks.

Coop Banks shall inform their members SN and MKSAN that they have to convert to full-fledged cooperatives within a period of one (1) year from 22 March 2009. If the SN or MKSAN fails to do so, the Coop Bank concerned shall convert the common shares held by such associations to preferred shares. The conversion to full-fledged cooperatives and conversion of common shares to preferred shares shall both be reported to the Bangko Sentral within six (6) months from 06 March 2010.

Sec. 7 Establishment of Coop Banks

1. At least five (5) cooperatives may form a Coop Bank: *Provided*, That majority of the Coop Bank's voting shares of stock shall be held by member-cooperatives located in the said province where the head office is located. The said majority requirement shall be maintained on an ongoing basis, except in meritorious cases as may be allowed by the Monetary Board.
2. Only one (1) Coop Bank may be established in each province. However, an additional Coop Bank may be established in the same province: *Provided*, That the additional Coop Bank may be located in a city or municipality other than the city or municipality where the first Coop Bank is located. The establishment of another Coop Bank will be authorized depending on the economic conditions of the province as may be determined by the Bangko Sentral.

The Articles of Cooperation and By-Laws of any Coop Bank, or any amendment thereto, shall be registered with the CDA only when accompanied by a certificate of authority issued by the Monetary Board, under its official seal.

Sec. 8 Establishment of Branches and Other Offices

The establishment of branches/branch-lite units/other banking offices by Coop Banks shall be governed by the provisions of Sec. 105 and its Subsections, as applicable.

Sec. 9 Powers, Functions and Allied Undertakings of Coop Banks

1. A Coop Bank shall primarily provide financial, banking and credit services to cooperatives and their members, although it may provide the same services to non-members or the general public.
2. The powers and functions of a Coop Bank shall be subject to such rules and regulations as may be promulgated by the Bangko Sentral. In addition to the powers granted to Coop banks under existing laws, any Coop Bank may perform any or all of the banking services offered by other types of banks, subject to prior approval of the Bangko Sentral.

Consistent with existing rules and regulations applicable to banks other than universal banks on limits on investments in the equities of financial allied undertakings under Sec. 373, a Coop Bank with existing investments in insurance companies, including insurance cooperatives, shall not increase but may reduce and once reduced, shall not increase such equity holdings: *Provided*, That the entire equity holding shall be divested within a period of five (5) years from 06 March 2010.

Sec. 10 Privileges, Incentives and Assistance for Coop Banks. The Coop Banks shall be given the same privileges and incentives granted to RBs, TBs, KBs and UBs to rediscount notes with the Bangko Sentral, the Land Bank of the Philippines, and other government banks.

The foreclosure of mortgages covering loans granted by Coop Banks and execution of judgment thereon involving real properties levied upon by a sheriff shall be exempt from the publications in newspaper now required by law where the total amount of loan, excluding interest due and unpaid, does not exceed P250,000 or such amount as the Bangko Sentral may prescribe as may be warranted by prevailing economic conditions and by the nature and character of the Coop Banks. It shall be sufficient publication in such cases if the notices of foreclosure and execution of judgment are posted in conspicuous areas in the bank's premises, municipal hall, the municipal public market, the barangay hall and the barangay public market, if any, where the property mortgaged is situated during the period of sixty (60) days immediately preceding the public auction or execution of judgment and shall be attached to the records of the case.

Sec. 11 Applicability of Banking Laws With respect to the operations and governance of Coop Banks, the provisions of the banking laws, rules and regulations shall prevail, notwithstanding Section 71 of R.A. No. 8791, otherwise known as the General Banking Act of 2000.

(Circular Nos. 987 dated 28 December 2017, 969 dated 22 August 2017, 932 dated 16 December 2016, and 917 dated 08 July 2016)

INSTRUCTIONS FOR DIRECTORS AND OFFICERS OF PROPOSED COOPERATIVE BANKS

The term *officers* shall include the president, senior vice-president, vice president, manager, secretary, cashier, and others mentioned as officers of the bank, or those whose duties as such are defined in the by-laws, or are generally known to be the officers of the bank (or any of its branches and offices other than the head office) either thru announcement, representation, publication or any kind of communication made by the bank.

The term *directors* shall include: (1) directors who are named as such in the Articles of Cooperation; (2) directors duly elected in subsequent meetings of authorized representative of each cooperative-member, and (3) those elected to fill vacancies in the board of directors.

The following are the qualifications and disqualifications of directors and officers of Coop Banks:

1. Qualifications for directors. A director must have the following minimum qualifications:

- (a) He shall be at least twenty-five (25) years of age at the time of his election or appointment;
- (b) He shall be at least a college graduate or have at least five (5) years experience in business;
- (c) He must have attended a special seminar for board of directors conducted or accredited by the Bangko Sentral within a period of six (6) months from the date of his election; and
- (d) He must be fit and proper for the position of a director of the Coop Bank. In determining whether a person is fit and proper for the position of a director, the following matters must be considered:
 - integrity/probity;
 - competence;
 - education;
 - diligence; and
 - experience/training.

At least one (1) of the members of the board of directors must, in addition to the above-mentioned minimum qualifications, have at least one (1) year experience in banking.

The foregoing qualifications for directors shall be in addition to those already required or prescribed under existing laws.

2. Persons disqualified to become directors. Without prejudice to specific provisions of law prescribing disqualifications for directors, the following persons are disqualified from becoming directors:

(a) Permanently disqualified

Directors/officers/employees permanently disqualified by the Monetary Board from holding a director position:

- (1) Persons who have been convicted by final judgment of the court for offenses involving dishonesty or breach of trust such as estafa, embezzlement, extortion, forgery, malversation, swindling and theft;
- (2) Persons who have been convicted by final judgment of the court for violation of banking laws;
- (3) Persons who have been judicially declared insolvent, spendthrift or incapacitated to contract; or
- (4) Directors, officers or employees of closed banks/QBs/trust entities who were responsible for such institution's closure as determined by the Monetary Board.

(b) Temporarily disqualified

Directors/officers/employees disqualified by the Monetary Board from holding a director position for a specific/ indefinite period of time. Included are:

- (1) Persons who refuse to fully disclose the extent of their business interest to the appropriate supervising department of Bangko Sentral when required pursuant to a provision of law or of a circular, memorandum or rule or regulation of the Bangko Sentral. This disqualification shall be in effect as long as the refusal persists;

- (2) Directors who have been absent or who have not participated for whatever reasons in more than fifty percent (50%) of all meetings, both regular and special, of the board of directors during their incumbency, or any twelve (12) month period during said incumbency. This disqualification applies for purposes of the succeeding election;
- (3) Persons who are delinquent in the payment of their obligations as defined hereunder:
 - (a) Delinquency in the payment of obligations means that an obligation of a person with a bank/QB/trust entity where he/she is a director or officer, or at least two (2) obligations with other banks/FIs, under different credit lines or loan contracts, are past due pursuant to Sec. 304 and Sec. 303-Q of the MORNBF;
 - (i) A director or officer for his own account or as the representative or agent of others or where he/she acts as a guarantor, endorser, or surety for loans from such FIs;
 - (ii) The spouse or child under the parental authority of the director or officer;
 - (iii) Any person whose borrowings or loan proceeds were credited to the account of, or used for the benefit of a director or officer;
 - (iv) A partnership of which a director or officer, or his/her spouse is the managing partner or a general partner owning a controlling interest in the partnership; and
 - (v) A corporation, association or firm wholly-owned or majority of the capital of which is owned by any or a group of persons mentioned in the foregoing Items "i", "ii" and "iv";
 - (b) Obligations shall include all borrowings from a bank/QB obtained by:

This disqualification shall be in effect as long as the delinquency persists.

- (4) Persons convicted for offenses involving dishonesty, breach of trust or violation of banking laws but whose conviction has not yet become final and executory;
- (5) Directors and officers of closed banks/QBs/trust entities pending their clearance by the Monetary Board;
- (6) Directors disqualified for failure to observe/discharge their duties and responsibilities prescribed under existing regulations. This disqualification applies until the lapse of the specific period of disqualification or upon approval by the Monetary Board on recommendation by the appropriate supervising department of Bangko Sentral of such directors' election/re-election;
- (7) Directors who failed to attend the special seminar for board of directors required under Item "3" of Sec. 132 or Sec. 137-Q. This disqualification applies until the director concerned had attended such seminar;
- (8) Persons dismissed/terminated from employment for cause. This disqualification shall be in effect until they have cleared themselves of involvement in the alleged irregularity;
- (9) Those under preventive suspension; or
- (10) Persons with derogatory records with the NBI, court, police, Interpol and monetary authority (central bank) of other countries (for foreign directors and officers) involving violation of any law, rule or regulation of the government or any of its instrumentalities adversely affecting the integrity and/or ability to discharge the duties of a bank/QB/trust entity director/ officer. This disqualification applies until they have cleared themselves of involvement in the alleged irregularity.

3. Qualification for officers

- (a) He shall be at least twenty-one (21) years of age;
- (b) He shall be at least a college graduate, or have at least five (5) years experience in banking or trust operations or related activities or in a field related to his position and responsibilities, or have undergone training in banking acceptable to the appropriate supervising department of Bangko Sentral; and
- (c) He must be fit and proper for the position he is being proposed/appointed to. In determining whether a person is fit and proper for a particular position, the following matters must be considered:
 - integrity/probity;
 - competence;

- education;
- diligence; and
- experience/training.

Any one of the president, chief operating officer or general manager of a national Coop Bank must, in addition to the abovementioned minimum qualifications, have at least two (2) years actual banking experience in a senior management capacity (head or assistant head) while the manager of a local Coop Bank must have actual banking experience (at least manager or assistant manager).

The foregoing qualifications for officers shall be in addition to those already required or prescribed under existing laws.

4. Persons disqualified to become officers. The grounds for disqualification for directors shall likewise apply to officers, except that stated in Items "2.b.2" and "2.b.7".
 - (a) Except as may be authorized by the Monetary Board or the Governor, the spouse or a relative within the second degree of consanguinity or affinity of any person holding the position of chairman, president, executive vice president or any position of equivalent rank, general manager, treasurer, chief cashier or chief accountant is disqualified from holding or being elected or appointed to any of said positions in the same bank; and the spouse or relative within the second degree of consanguinity or affinity of any person holding the position of manager, cashier, or accountant of a branch or office of a bank is disqualified from holding or being appointed to any of said positions in the same branch or office.
 - (b) Any officer or employee of the CDA or any appointive or elective public official, except a barangay official;
 - (c) Except as may otherwise be allowed under C.A. No. 108, otherwise known as "The Anti-Dummy Law", as amended, foreigners cannot be officers or employees of a Coop Bank.

The foregoing disqualifications for officers shall be in addition to those already required or prescribed under existing laws.

5. Government officers and employees.

Any officer or employee of the CDA shall be disqualified to be elected or appointed to any position in a cooperative; and (2) elective officials of the government, except barangay officials, shall be ineligible to become officers and directors of cooperatives.

However, any government employee may, in the discharge of his duties as member in the cooperative, be allowed by the head office concerned to use official time for attendance at the general assembly, board and committee meetings of cooperatives as well as cooperative seminars, conferences, workshops, technical meetings, and training courses locally or abroad: *Provided*, That the operations of the office concerned are not adversely affected.

Unless otherwise provided, officers elected or appointed without possessing the qualifications or possessing any of the disqualifications as enumerated herein, shall vacate their respective positions immediately.

**GUIDELINES GOVERNING THE REDISCOUNTING OF HOUSING LOAN
PAPERS OF QUALIFIED BANKS UNDER DHSUD PROGRAM
(Appendix to Sec. 289)**

Sec. 1. Statement of Policy. The Bangko Sentral, consistent with its primary objective of maintaining price stability under its charter (R.A. No. 7653), shall comply with its mandate under Section 11 (c) of R.A. No. 7835 (Comprehensive and Integrated Shelter Financing Act) by providing short-term rediscounting facility to qualified banking institutions providing financing for socialized and low-cost housing.

Sec. 2. Criteria for Eligibility

a. Eligible Banks

KBs, TBs and RBs/Coop Banks which are qualified to rediscount with the DLC, under existing rules and regulations, and with unused rediscounting ceiling at the time of application for rediscounting can avail themselves of this rediscounting facility.

b. Eligible Housing Loan Paper

Housing loan papers for rediscounting under this facility shall satisfy the following requirements:

- (1) *Loan purpose and amount.* The loan shall be used for the construction of a house/acquisition of a house and lot. The amount of the loan shall not exceed the amount for socialized and economic housing, as prescribed under existing guidelines of the DHSUD for the implementation of various government housing programs, or in such other amounts which DHSUD may prescribe in the future for said housing loans.
- (2) *Loan limit.* The amount of the loan shall not exceed the amount of amortization covering principal payments due within one (1) year from date of rediscount, subject to the terms and conditions discussed in Section 3.
- (3) *Security.* The subject property shall be covered by a duly registered Real Estate Mortgage (REM) in favor of the rediscounting bank.

Sec. 3. Terms and Conditions of Rediscounting Availments

a. Maximum Loan Value

Banks can obtain additional availments annually representing amortizations for the current year against the mortgaged property. However, total cumulative availments for a mortgaged property shall not exceed eighty percent (80%) of the collateral value.

b. Interest Rate

The loan availment shall be assessed an interest rate equivalent to the prevailing rediscount rate at the date of rediscount: *Provided*, That the banks' spread shall not exceed three percent (3%) per annum.

c. Maturity

Rediscounting availments shall be due on demand but not beyond 360 days from date of rediscount.

Sec. 4. Sanctions. Non-remittance or delayed remittance within the allowable period of the corresponding loan value of collections on rediscounted notes shall be considered as sufficient ground for suspension of banks' rediscounting privilege as follows:

- | | | |
|----------------|---|-----------------------------|
| First offense | - | one (1) month suspension |
| Second offense | - | two (2) months suspension |
| Third offense | - | three (3) months suspension |
| Fourth offense | - | permanent suspension |

(Circular No. 1053 dated 7 October 2019)

**MINIMUM CRITERIA FOR ACCREDITATION OF PARTICIPATING FINANCIAL INSTITUTIONS (PFIs)
IN GOVERNMENT BANKS WHOLESALE LENDING PROGRAM
(Appendix to Sec. 362 on Limit for Wholesale Lending Activities of Government Banks)**

I. Accreditation Criteria

For accreditation purposes, PFIs shall initially be evaluated/appraised on the basis of the following pre-qualifying criteria:

- a. The PFI shall submit a certification on the following:
 - (1) Compliance with the prescribed minimum capital to risk assets ratio of ten percent (10%), minimum capitalization, legal and liquidity reserve requirements for deposit liabilities, deposit substitutes, common trust funds (CTFs) and Trust and Other Fiduciary Accounts (TOFA)-Others, liquidity floor requirement for government funds held, and ceilings on credit accommodations to directors, officers, stockholders and their related interests (DOSRI), for six (6) consecutive months prior to the filing of application for accreditation.
 - (2) As of application date, the PFI has generally complied with the orders or instructions of the Monetary Board and/or Bangko Sentral Management, more particularly:
 - (a) Set-up of the required general loan loss and specific provisioning requirements.; and
 - (b) Correction of major violations and previous years' exceptions noted in the latest Bangko Sentral examination.
 - (3) The PFI has no past due obligations with the Bangko Sentral or with any government financial institution.
 - (4) The PFI's accounting records, systems, procedures and internal control systems are satisfactorily maintained.
- b. Profitability
 - (1) For PFIs operating for more than three (3) years as of date of filing of the application for accreditation - Operating profitably for three (3) consecutive years prior to the filing of application for accreditation.
 - (2) For PFIs operating for less than three (3) years as of date of filing of the application for accreditation - Operating profitably for two (2) consecutive years prior to the filing of application for accreditation.
- c. Capital

Compliance with minimum capital accounts of ₱400.0 million or Bangko Sentral required minimum capitalization applicable to the category where the PFI belongs, whichever is higher.
- d. Non-performing loans ratio for six (6) consecutive months prior to the filing of application for accreditation shall not exceed the industry ratio which may be obtained from the SRSO of the Bangko Sentral.
- e. Ownership/Management

For PFIs operating for less than three (3) years as of date of filing of the application for accreditation –

 - (1) Domestic bank owned by reputable individuals/institutions and managed by reputable and experienced bankers.
 - (2) Philippine branch of a foreign bank carrying an international investment grade rating acceptable to the government bank with foreign bank's (Head Office/parent bank) unconditional and irrevocable guarantee on loan availments of Philippine branch or subsidiary.

II. Grant and Renewal of Credit Lines to Accredited PFIs

- a. Government banks shall provide credit lines for a specified term to each accredited PFI based on the results of the quantitative and qualitative evaluation guidelines to be formulated in accordance with credit policies and procedures approved by the bank's Board of Directors and/or as prescribed by the institutions, organizations or agencies which provide the funds.
- b. PFIs shall be subject to quantitative and qualitative evaluation as well as the accreditation criteria when applying for renewal of credit lines.
- c. Government banks may suspend the release of funds to PFIs that failed to meet any of the quantitative and qualitative evaluation guidelines and/or the accreditation criteria.

DEED OF UNDERTAKING FOR THE ISSUANCE OF REDEEMABLE PREFERRED SHARES
(Appendix to Section 122 on Issuance of redeemable shares: conditions; certification and report; sanctions)

We, the majority of the members of the Board of Directors and key executive officers of _____, a banking corporation duly registered and organized under the laws of the Republic of the Philippines, with principal office and place of business at _____, by these presents do hereby obligate ourselves to undertake the following in the issuance of preferred stock:

1. That the issuance of preferred stock shall be in accordance with the terms and conditions of approval by the Bangko Sentral ng Pilipinas (BSP) and pertinent rules and regulations of the BSP and that of the Securities and Exchange Commission (SEC)/Cooperative Development Authority (CDA);
2. That any preferred shares so issued shall not be redeemed, retired, converted to any other kind of stocks or securities or paid back in cash or property without the prior approval of BSP in accordance with Sections 122 and 122-C of the Manual of Regulations for Banks, Section 8, R.A. 7353 and other applicable regulations and banking laws;
3. That in no case shall the issuance of preferred shares be treated as similar to or as a substitute of other form of temporary investments of clients and depositors such as time deposits, savings deposits, money market placements or other form of investments subject to withdrawal;
4. That outstanding preferred shares may be redeemed or retired only if the shares redeemed or retired are replaced with at least an equivalent amount of newly paid-in shares so that the total paid-in capital stock is maintained at the same level immediately prior to redemption or retirement: *Provided*, That no outstanding preferred share shall be redeemed within five (5) years from full payment of the subscription or issuance of stock certificate therefore;
5. That we, the undersigned, shall ensure that the above undertakings are strictly complied with and observed at all times by the management of the bank;
6. That non-compliance with this undertaking shall subject the directors/officers involved liable to such administrative sanctions as the Monetary Board may impose and such other sanctions as may be provided pursuant to Section 37 of R.A. 7653, without prejudice to the criminal sanctions under Section 36 of the same Act.

GUIDELINES ON THE SUSPENSION/DELISTING OF EXTERNAL AUDITOR IN THE LIST OF SELECTED EXTERNAL AUDITORS FOR BANGKO SENTRAL SUPERVISED FINANCIAL INSTITUTIONS (BSFIs)
(Appendix to Sec. 164 on Framework on the Selection of External Auditors)

Section 1. Grounds for Suspension/Delisting of External Auditors

An external auditor included in the List of Selected Auditors for BSFIs shall be suspended or delisted by the Bangko Sentral, without prejudice to the imposition of other sanctions by the Securities and Exchange Commission (SEC)¹, under any of the following grounds:

- a. Gross negligence in the conduct of the audit or failure to comply with the Philippine Standards on Auditing and such other issuances of the Auditing and Assurance Standards Council;
- b. Issuance of an unqualified opinion which is not supported by full compliance by the auditee with the applicable financial reporting framework due to material deficiencies or misstatements in the financial statements;
- c. Conduct of an audit despite the lack or eventual loss of independence as provided for under the Code of Ethics for Professional Accountants in the Philippines;
- d. Conduct of any non-audit services for his statutory audit clients, if he has not undertaken the safeguards to reduce the threat to his independence;
- e. Any material misrepresentation in the reports submitted to the Bangko Sentral;
- f. Failure to comply with the provisions set forth under Sec. 164;
- g. Refusal for no valid reason, upon lawful order of the Bangko Sentral, to submit requested documents in connection with an ongoing investigation. The external auditor shall, however, be made aware of such investigation; and
- h. Failure to obtain from the Securities and Exchange Commission an accreditation appropriate to the client's category provided under Sec. 164 on the appointment of external auditor.

Section 2. Procedures and Effects of Delisting/Suspension

- a. On the basis of the results of the assessment of the quality of audited financial statements and evidence on the existence of the grounds for suspension or delisting under Section 1 above, the external auditor shall be notified in writing by the appropriate supervising department of the Bangko Sentral of the existence of the ground for his/her suspension or delisting in the List of Selected External Auditors for BSFIs and shall be allowed to submit within fifteen (15) calendar days from receipt of such notice an explanation on why he/she should not be suspended/delisted, together with the evidence in support of his/her position.

An external auditor shall only be suspended or delisted after due notice and opportunity to defend/clear himself/herself.

- b. Failure of the external auditor concerned to reply within the period prescribed under Item "a" above, shall be considered as a waiver on his/her part of the opportunity to defend/clear himself/herself. In this respect, the appropriate supervising department of the Bangko Sentral shall proceed with the evaluation of the case based on available records/evidence.
- c. Upon approval by the Monetary Board, the external auditor concerned shall be informed in writing by the appropriate supervising department of the Bangko Sentral of his/her suspension or delisting in the List of Selected External Auditors for BSFIs.
- d. A suspended or delisted external auditor shall be automatically included in the Bangko Sentral's Watchlist Disqualification File "B" (temporary).
- e. The Securities and Exchange Commission shall be immediately informed of the suspension or delisting of the external auditor.
- f. Suspended external auditors may re-apply for inclusion in the List of the Selected External Auditors for BSFIs after the lapse of five (5) years from the date of effectivity of the suspension.

(Circular No. 1040 dated 20 May 2019)

¹ Accrediting Agency duly designated by the member-agency of the Financial Sector Forum, comprising of the Bangko Sentral ng Pilipinas, Securities and Exchange Commission, Insurance Commission, and Philippine Deposit Insurance Corporation.

IMPLEMENTING RULES AND REGULATIONS OF REPUBLIC ACT NO. 6848 (THE ISLAMIC BANK CHARTER)
(Appendix to Section 101)

Pursuant to Section 43 of R.A. No. 6848, otherwise known as “The Charter of the Al-Amanah Islamic Investment Bank of the Philippines”, the Monetary Board, in its Resolution Nos. 161 and 244 dated 14 February and 6 March 1996, respectively, approved the following Implementing Rules and Regulations:

Sec. 1. Domicile and Place of Business

The principal domicile and place of business of the Al-Amanah Islamic Investment Bank of the Philippines, hereinafter called the Islamic Bank, shall be in Zamboanga City. It may establish branches, agencies or other offices at such places in the Philippines or abroad subject to applicable laws, rules and regulations of the *Bangko Sentral*.

Sec. 2. Purpose and Basis

The primary purpose of the Islamic Bank shall be to promote and accelerate the socio-economic development of the Autonomous Region by performing banking, financing and investment operations and to establish and participate in agricultural, commercial and industrial ventures based on the Islamic concept of banking.

All business dealings and activities of the Islamic Bank shall be subject to the basic principles and rulings of Islamic *Shari’a* within the purview of the aforementioned declared policy. Any *zakat* or “tithe” paid by the Islamic Bank on behalf of its shareholders and depositors shall be considered as part of compliance by the Islamic bank with its obligation to appropriate said *zakat* fund and to disburse it in legitimate channels to be ascertained first by the *Shari’a* Advisory Council.

Sec. 3. *Shari’a* Advisory Council

The *Shari’a* Advisory Council of the Islamic Bank shall be composed of at least three (3) but not more than five (5) members, selected from among Islamic scholars and jurists of comparative law.

The members shall be elected at a general shareholders’ meeting of the Islamic Bank every three (3) years from a list of nominees prepared by the board of directors of the Islamic Bank. The board is hereby authorized to select the members of the first *Shari’a* Advisory Council and to determine their remunerations.

Sec. 4. Functions of the *Shari’a* Advisory Council

The functions of the *Shari’a* Advisory Council shall be to offer advice and undertake reviews pertaining to the application of the principles and rulings of the Islamic *Shari’a* to the Islamic Bank’s transactions, but it shall not directly involve itself in the operations of the Bank.

Any member of the *Shari’a* Advisory Council may be invited to sit in the regular or special meetings of the board of directors of the Islamic Bank to expound his views on matters of the Islamic *Shari’a* affecting a particular transaction but he shall not be entitled to vote on the question presented before the board meetings.

Sec. 5. Islamic Bank’s Powers

The Al-Amanah Islamic Investment Bank of the Philippines, upon its organization, shall be a body corporate and shall have the power:

1. To prescribe its by-laws and its operating policies;
2. To adopt, alter and use a corporate seal;
3. To make contracts, to sue and be sued;
4. To borrow money; to own real or personal property and to introduce improvements thereon, and to sell mortgage or otherwise dispose of the same;
5. To employ such officers and personnel, preferably from the qualified Muslim sector, as may be necessary to carry Islamic banking business;
6. To establish branches, agencies and correspondent offices in provinces and cities in the Philippines, particularly where Muslims are predominantly located, or in other areas in the country or abroad as may be necessary to carry on its Islamic banking business, subject to the rules and regulations of the *Bangko Sentral*;

7. To perform the following banking services:
 - a. Open current or checking accounts;
 - b. Open savings accounts for safekeeping or custody with no participation in profit and losses unless otherwise authorized by the account holders to be invested;
 - c. Accept investment account placements and invest the same for a term with the IB's funds in Islamically permissible transactions on participation basis;
 - d. Accept foreign currency deposits from banks, companies, organizations and individuals, including foreign governments;
 - e. Buy and sell foreign exchange;
 - f. Act as correspondent of banks and institutions to handle remittances or any fund transfers;
 - g. Accept drafts and issue letters of credit or letters of guarantee, negotiable notes and bills of exchange and other evidence of indebtedness under the universally accepted Islamic financial instruments;
 - h. Act as collection agent insofar as the payment orders, bills of exchange or other commercial documents are exclusive of *riba* or interest prohibitions;
 - i. Provide financing with or without collateral by way of *Al-Ijarah* (leasing), *Al-Bai ul Takjiri* (sale and leaseback), or *Al-Murabahah* (cost- plus profit sales arrangement);
 - j. Handle storage operations for goods or commodity financing secured by warehouse receipts presented to the Bank;
 - k. Issue shares for the account of institutions and companies assisted by the Bank in meeting subscription calls or augmenting their capital and/or fund requirements as may be allowed by law;
 - l. Undertake various investments in all transactions allowed by the Islamic *Shari'a* in such a way that shall not permit the *haram* (forbidden), nor forbid the *halal* (permissible);
8. To act as an official depository of the government or its branches, subdivisions and instrumentalities and of government-owned or controlled corporations, particularly those doing business in the Autonomous Region;
9. To issue investment participation certificates, muqaradah (non-interest- bearing bonds), debentures, collaterals and/or the renewal or refinancing of the same, with the approval of the Monetary Board of the *Bangko Sentral*, to be used by the Bank in its financing operations for projects that will promote the economic development primarily of the Autonomous Region;
10. To carry out financing and joint investment operations by way of mudarabah partnership, musharaka joint venture or by decreasing participation, murabaha purchasing for others on a cost-plus financing arrangement, and to invest funds directly in various projects or through the use of funds whose owners desire to invest jointly with other resources available to the IB on a joint mudarabah basis;
11. To invest in the equity of allied undertakings, financial or non-financial, as well as in the equity of enterprises engaged in non-allied activities, as the Monetary Board has declared or may declare as appropriate from time to time, subject to the limitations and conditions provided for under the Manual of Regulations for Banks and Other Financial Intermediaries - Book I (MRBOFI) ; and
12. To exercise the powers granted under R.A. No. 6848 and such incidental powers as may be necessary to carry on its business, and to exercise further the general powers mentioned in the Corporation Law and the General Banking Act, insofar as they are not inconsistent or incompatible with the provisions of R.A. No. 6848.

Sec. 6. Authorized Capital Stock

The authorized capital stock of the IB shall be P1.0 billion divided into 10.0 million common shares with par value of One hundred pesos (P100.00) each. All shares are nominative and indivisible. The subscription to and ownership of such shares, including the transfer thereof to third parties, shall be limited to persons and entities who subscribe to the concept of Islamic banking.

Sec. 7. Classification of Shares

The IB's authorized capital stock shall have the following classifications and features in relation to its Islamic banking operations:

1. Series "A" shares shall comprise 5.1 million shares equivalent to P510.0 million to be made available for subscription by the present stockholders of the Philippine Amanah Bank namely: the National Government, and such other financial entities as it may designate.
2. Series "B" shares shall comprise nine hundred thousand (900,000) shares equivalent to P90.0 million to be made available for subscription by the Filipino individuals and institutions.

3. Series “C” shares shall comprise 4.0 million shares equivalent to P400.0 million to be made available for subscription by Filipino and foreign individuals and/or institutions or entities.

Any shareholders may exercise his pre-emptive right to consolidate ownership of the outstanding shares as hereinafter increased: *Provided*, That the common shares of the Philippine Amanah Bank which have been issued and outstanding shall form part of the increased capitalization of the IB, subject to the concurrence of the existing shareholders of the Philippine Amanah Bank.

The IB is authorized to reacquire its common shares that are held privately: *Provided*, That it has sufficient surplus and/ or accumulated earnings for the purpose.

The IB may take the necessary steps to have its Series “B” shares listed in any duly registered stock exchange.

Sec. 8. Sale or Transfer of Shares

The IB shall make a report to the *Bangko Sentral* whenever a change is about to take place in relation to the ownership or control of the Bank. The approval of the Monetary Board shall be required in the following changes.

1. Any proposal for the sale or disposal of its share or business, or other matters related thereto, which will result in a change of the control of management of the IB in the following cases:
 - a. Any sale or transfer of ownership or control of more than twenty percent (20%) of the voting stock of the Bank to any person whether natural or juridical; and
 - b. Any sale or transfer or a series of sales or transfers which will effect a change in the majority ownership or control of the voting stock of the Bank from one group of persons to another group.
2. Any scheme for reconstruction or for consolidation or merger, or otherwise, between the IB and any other company wherein the whole or any part of the undertaking of the property of the IB is to be transferred to another corporation.
3. Acquisition by foreign banking institutions, including their wholly- or majority-owned subsidiaries and their holding companies having majority holdings in such foreign banking institutions.

Sec. 9. Privatization

The IB may privatize its ownership. For this purpose, any limitation on the transfer of shares shall not be applicable with respect to the shareholdings of the National Government, SSS, GSIS, PNB and DBP. Transactions affecting the shares of stocks of the IB shall be subject to existing rules and regulations governing transfer of shares and ceilings on stockholdings, insofar as they are not in conflict with any provisions of R.A. No. 6848 and other pertinent laws, rules and regulations.

Sec. 10. Board of Arbitration

The board of directors of the IB, acting as an arbitrator, shall settle by the majority decision of its members any dispute between and among shareholders of the IB, whether individuals or entities, where such dispute arises from their relations as shareholders in the IB. The board shall be bound in this respect to the procedures of laws on civil and commercial pleadings, except in regard to the basic principles of due process.

If the dispute is between the IB and any of the investors or the shareholders, a Board of Arbitration shall settle such dispute. In this case, the Board of Arbitration, consisting of three (3) members shall be formed by two (2) parties to the dispute within forty-five (45) days from receipt of written notice by either party to the dispute. The three (3) members shall be selected as follows: one (1) arbitrator from each party who shall then select a casting arbitrator as the third member of the board. The three (3) shall select one of them to preside over the Board of Arbitration. The selection by each party of its arbitrator shall be deemed as an acceptance of the arbitrator’s decision and of its finality.

In the event that one of the two parties shall fail to select its arbitrator or in the case of non-agreement on the selection of the casting arbitrator or the presiding member of the Board of Arbitration within the period specified in the preceding paragraph, the matter shall be submitted to the *Shari’a* Advisory Council which shall select the arbitrator, the casting arbitrator or the presiding member, as the case may be.

The Board of Arbitration shall meet at the IB’s principal office and shall set up the procedure of arbitration which it shall follow in hearing and deciding the dispute. The decision shall include the method of its execution and the party that shall incur the costs of arbitration. The final judgment shall be deposited with the Office of the Corporate Secretary of the Bank and the SEC.

The Board of Arbitration's decision shall, in all cases, be final and executory. It shall be valid for execution in the same manner as final judgments are effected under R.A. No. 876 otherwise known as the Arbitration Law.

Sec. 11. Incentives to Islamic Banking

Subject to the provisions of Section 72 of the New Central Bank Act, the provisions of the Omnibus Investment Code on the basic rights and guarantees of investors are made applicable to the commercial operations of the IB in respect to repatriation or remittance of profits from investments, and to protection against nationalization, sequestrations, or expropriation proceedings. Any proceedings of judicial or administrative seizure may not be taken against the said property or investment except upon a final court judgment.

Sec. 12. Grants and Donations

The IB shall accept grants, donations, endowments, and subsidies, or funds and/or property offered by individuals and organization who may earmark such grants for a specific purpose or for such other purposes beneficial to the Muslim communities, without prejudice to the general objectives of the IB.

The financial statement and books of accounts of such funds shall be maintained separately but may be supplemented to the IB's balance sheet.

Under special circumstances in which the board of directors considers it advisable to promote or facilitate Islamic banking business and commercial operations, the IB may seek financing from governments, organizations, individuals or banks always without prejudice to the provisions of Section 43 of R.A. No. 6848.

Sec. 13. Non-Interest Bearing Placements

The IB is authorized to accept deposits from governments, banks, and organizations or other entities and individuals from within the Philippines or abroad which shall form under any of the following non-interest bearing placements:

1. Savings accounts
2. Investment participation accounts
3. Current accounts and other deposit liabilities.

Any deposit received by the IB without authorization to invest shall be treated as current account and savings account, as the case may be, and may be withdrawn wholly or partly at any time, under the principle of *Al-Wadiah* (Safe Custody). The IB shall provide check books for its current account depositors and savings passbook for savings account depositors and other usual services connected therewith.

The IB, at its absolute discretion, may reward the customers for the use of their funds. The board of directors shall formulate rules and guidelines which should be consistent with the *Shari'a* principle, in the giving of rewards to the customers.

All deposits received with authorization to invest for a given period of time shall form part of the general pool of placements allocated for the investment portfolios of the IB and may be added to its working capital to be invested in any special projects or in general areas of investments or commercial operations of the Bank. These deposits shall be called as "Investment Participation Accounts" in which under the principle of *Al-Mudarabah*, the IB acts as the "entrepreneur" and the customers as the "Provider of Capital", and both shall agree through negotiation on the ratio of distribution of the profits generated from the investment of the funds. In the event of loss, the customers shall bear all the losses.

Sec. 14. Investment of Funds

The IB shall have the capacity of agent or attorney and shall act with full authority on behalf of the group of depositors in general in investing their commingled deposits without prejudice to the following sections and shall ensure a degree of liquidity to be determined by the board of directors to meet the current obligations of the IB including drawings from savings accounts and current accounts: *Provided*, That such degree of liquidity shall be subject to the reserve requirement as may be determined by the *Bangko Sentral*. The board of directors shall determine the period for an investment participation account. Investment of funds shall be undertaken by the IB acting on behalf of the group of depositors or investors in selected areas of investment under such terms and conditions as the board of directors may determine by way of *mudarabah* or other forms of joint investment permitted by Islamic *Shari'a* principle.

Sec. 15. Return on Investment Funds

The depositors or investors in joint investment participation accounts shall be entitled to a portion of the return on investment according to the deposit balances and its period. The profits on participation account with authorization to invest in specific transaction shall be calculated on the same basis as on the capital funds invested as determined by the board of directors pursuant to Section 35 of R.A. No. 6848.

Sec. 16. Allocation of Resources

The IB may allocate part of its own investible funds or of the deposits on hand to finance investment projects and carry on its Islamic banking business directly or indirectly under its own supervision. For this purpose, it may create and finance investment companies or affiliates which shall manage investment projects on behalf of and under the supervision of the IB and for its own account.

The IB shall ascertain the viability and soundness of investment projects which it may directly supervise and those in which it may participate with part of its own funds, with the general pool of investors funds with authorization. The IB shall have the right to inspect and supervise the projects which it shall finance or in which it is the majority shareholder. The original capital and related profits shall be remitted in the same currency it was originally contributed or in one of the convertible currencies, as the board of directors shall determine in accordance with R.A. No. 6848.

Sec. 17. Authorized Banking Services

The IB shall exercise all the powers enumerated under Section 6 of R.A. No. 6848 and perform all the services of a bank, except as otherwise prohibited by R.A. No. 6848: *Provided*, That no transactions with any customer, company, corporation or firm shall be permitted for discounts by the *Bangko Sentral*.

Sec. 18. Acceptance of Government Funds

Pursuant to Sec. 6 (8) of R.A. No. 6848, the IB shall act as an official depository of the government or its branches, subdivisions and instrumentalities and of government-owned or controlled corporations, particularly those doing business in the autonomous region. Government funds placed with the IB shall be limited to working balances. All government deposits in excess of working balances shall be placed with the *Bangko Sentral*.

Once privatized, acceptance by the IB of government funds or deposits shall be subject to existing laws and regulations governing the acceptance of such funds by private commercial banks which include prior Monetary Board approval.

The government deposits held by the IB shall be subject to reserve and liquidity floor requirements as the Monetary Board may prescribe.

Sec. 19. Authorized Commercial Operations

The IB may operate as an Investment House pursuant to Presidential Decree No. 129, as amended, and as a Venture Capital Corporation pursuant to Presidential Decree No. 1688, and by virtue thereof, carry on the following types of commercial operations:

1. The IB may have a direct interest as a shareholder, partner, owner or any other capacity in any commercial, industrial, agricultural, real estate or development project under *mudarabah* form of partnership or *musharaka* joint venture agreement or by decreasing participation, or otherwise invest under any of the various contemporary Islamic financing techniques or modes of investment for profit sharing.
2. The IB may carry on commercial operations for the purpose of realizing its investment banking objectives by establishing enterprises or financing existing enterprises, or otherwise by participating in any way with other companies, institutions or banks performing activities similar to its own or which may help accomplish its objectives in the Philippines or abroad, under any of the contemporary Islamic financing techniques or modes of investment for profit sharing; and
3. The IB may perform all business ventures and transactions as may be necessary to carry out the objectives of its charter within the framework of the IB's financial capabilities and technical considerations prescribed by law and convention: *Provided*, That these shall not involve any *riba* or other activities prohibited by the Islamic *Shari'a* principles.

The IB may likewise perform the functions of an investment house either directly or indirectly through a subsidiary investment house; in either case, the underwriting of equity securities and securities dealing shall be subject to pertinent laws and rules and regulations of the SEC: *Provided*, That the IB cannot perform such functions both directly and indirectly through a subsidiary: *Provided, further*, That if the investment house functions are performed directly by the IB, such functions shall be undertaken by a separate and distinct department or other similar unit in the bank: *Provided, finally*, That if the bank avails of the option of exercising the powers of an investment house indirectly through its subsidiary investment house, it may not directly exercise the powers which are exclusively reserved to IHs.

Sec. 20. Employee Share Schemes

The board of directors may adopt an employee profit sharing scheme under any of the following ways:

1. Any arrangement under which the directors, officers and employees of the IB receive, in addition to their salaries and wages, a share, fixed beforehand, in the profits realized by the Bank or by its affiliate companies to which the profit sharing scheme relates; and
2. Any arrangement under which the IB facilitates the acquisition by its directors, officers and employees of common shares of stock either as share- incentives, share-bonus options, or any other share-saving schemes as the board of directors may determine.

No scheme shall be approved by the board of directors under this section unless it is satisfied that the participant in the profit sharing scheme is bound by a contract with the IB by virtue of which an appropriation of shares has been made for the purpose. The shares so purchased or appropriated shall be deposited in escrow with the Bank.

The board of directors of the IB shall then constitute the trustee of the approved scheme, whose functions with respect to the common shares held by them are regulated by Chapter VII of the General Banking Act and other pertinent laws. The terms of the approved scheme shall be prescribed by the board of directors and embodied in a deed of instrument.

The adoption of and any change in the employee profit sharing scheme shall be reported to the appropriate supervising department of the Bangko Sentral within thirty (30) calendar days from the date of approval.

Sec. 21. Investment Ceilings; Business Limits

The IB shall observe the following investment ceilings and business limits in its operations:

1. The aggregate credit facilities or any other liabilities of any customer of the IB shall not exceed at all times fifteen percent (15%) of the unimpaired capital and surplus of the Bank.

For purposes of determining compliance with this regulation, credit facilities shall refer to:

- a. Interbank Receivable
- b. Financing and Investment
- c. Trade Financing
- d. Agrarian Reform/Other Agricultural Financing – P. D. No. 717
- e. Bills Purchased
- f. Customer's Liability on Bills/Drafts under Letters of Credit and/or Trust Receipts
- g. Customer's Liability for this Bank's Acceptances Outstanding
- h. Trading Account Securities – Financing
- i. Underwriting Accounts – Debt Securities
- j. Stand-by Letters of Credit
- k. Such other facilities as may be determined by the Monetary Board Credit facilities granted by the IB to any other bank, as well as deposits maintained by it in any bank, shall be subject to the credit facility limit to any single borrower as herein prescribed.

2. The aggregate amount of investment portfolios for any single industry (following the major industry groupings in the 1977 Philippine Standard Industrial Classification) shall at no time exceed thirty percent (30%) of the IB's investment capacity. Investment capacity shall mean the total unimpaired capital and surplus plus deposits and borrowings minus the investment in bank premises.
3. The IB shall not grant unsecured loans except *gardhasan* (benevolent loans). Such outstanding unsecured loans or credit accommodations which the IB may extend at any time without security or in respect of any advance, loan or credit facility made with the security wholly or partly whenever at any time it exceeds the aggregate market value of the assets constituting the security, shall be limited to fifty thousand pesos (P50,000.00) to any person, company, corporation or firm.
4. A credit facility granted to any person for the purpose of financing the acquisition of shares in any company, corporation or firm shall not exceed fifty percent (50%) of the appraised value of the shares at the time the credit facility is granted. Appraised value, in the case of listed shares, shall mean the weighted average price in the stock exchange. For unlisted shares, the appraised value shall mean the book value of the shares.

Sec. 22. Loans and Credit Facilities to Directors, Officers, Employees and Stockholders

1. *General Policy.* Except as otherwise provided in these regulations, the IB shall not directly or indirectly grant an advance, loan or credit facility to any of its directors, officers, employees or stockholders, or to any other person for whom any of them is a guarantor, or in any manner be an obligor for money granted by the IB.
2. *Direct Loans to Officers, Employees and Stockholders.* Whenever the IB is satisfied that special circumstances exist, a loan not exceeding at any one time an amount equivalent to six months remuneration, may be granted to an officer and employees in the form of fringe benefits granted in accordance with the rules and regulations prescribed under Section 1337 of the MRBOFI shall not be subject to the preceding limitation, nor to the ceiling on unsecured loans prescribed in Section 21.

The IB may extend credit facilities to stockholders owning two percent (2%) or more of the subscribed capital stock up to an amount equivalent to the outstanding deposits or the book value of his paid-in capital in the Bank, whichever is higher.

3. *Indirect Credit Facilities to Directors and Auditors.* No credit facility shall be granted by the IB to a company, corporation, partnership or firm wherein any member of the board of directors or auditors is a shareholder, partner, manager, agent or employee in any manner, except with the written approval of and by unanimous vote of not less than two-thirds of all the members of the board of directors, excluding the director concerned: *Provided*, That the total liabilities of such company, corporation, partnership or firm to the IB shall be limited to the director's or auditor's outstanding deposits or the book value of his paid-in capital in the Bank, whichever is higher.
4. *Aggregate Ceiling.* Except with the prior approval of the Monetary Board, the total outstanding credit facilities of directors, officers, auditors and stockholders, whether direct or indirect, shall not exceed fifteen percent (15%) of the total credit facilities of the Bank or one hundred percent (100%) of combined capital accounts, net of deferred income tax and such unbooked valuation reserves and other capital adjustments as may be required by the *Bangko Sentral*, whichever is lower.
5. *Procedural Requirements.* The following provisions shall apply to direct loans to officers and indirect credit facilities to directors and auditors, allowed under these regulations.
 - a. *Approval of the Board; when to obtain.* Direct loans to officers shall require the prior written approval of the majority of the directors.

Indirect loans to directors and auditors shall be allowed subject to the prior written approval, and by unanimous vote, of not less than two-thirds (2/3) of all the members of the board of directors, excluding the director concerned.
 - b. *Approval by the board; how manifested.* The approval as required in Item "a" above shall be manifested in a resolution passed by the board of directors duly assembled during a regular or special meeting for that purpose and made of record.
 - c. *Determination of compliance with the required number of votes.* The determination of the majority or two-thirds (2/3) of the directors, excluding the directors concerned, shall be based on the total number of directors of the Bank as provided in its Charter and By-Laws.

- d. *Content of the resolution.* The resolution of the board of directors shall contain the following information:
- (i) Name of the director, officer or auditor concerned and his relationship as regards the credit facility, such as principal, indorser, guarantor, etc.;
 - (ii) Nature of the loan or credit facility, purpose, amount, credit basis for such loan or credit facility, security and appraisal thereof, maturity, schedule of repayment, and other terms of the loan or credit facility;
 - (iii) Date of the resolution;
 - (iv) Names of the directors who were present and who participated in the deliberations of the meeting;
 - (v) Names in print and signatures of the directors approving the resolution: *Provided*, That the corporate secretary may sign, under a power-of-attorney, in behalf of a director who was present in the board meeting and who approved such resolution, in instances where such signature is necessary to indicate that such resolution was approved by a majority or two-thirds of the directors; and
 - (vi) Such other information as may be required by the appropriate supervising department of the Bangko Sentral.
- e. *Transmittal of copy of board approval; contents thereof.* A copy of the written approval of the board of directors, as herein required, shall be submitted to the appropriate supervising department of the Bangko Sentral within twenty (20) banking days from the date of approval. The copy may be a duplicate of the original, or a reproduction copy showing clearly the signatures of the approving directors: *Provided*, That if a reproduction copy is to be submitted, it shall contain on its face or reverse side a signed certification by the Secretary that it is a reproduction of the original written approval.

Sec. 23. Past Due Accounts

Accounts considered past due. The following shall be considered as past due:

1. Loans or receivables payable on demand – if not paid on the date indicated on the demand letter, or within six (6) months from date of grant, whichever comes earlier;
2. Financing and investment accounts not paid at maturity/ expiry date or not paid in accordance with the terms of payment stipulated in the agreement/ contract;
3. Customers' liability on drafts under LC/TR
 - a. Sight Bills – if dishonored upon presentment for payment or not paid within thirty (30) days from date of original entry, whichever comes earlier;
 - b. Usance Bills – if dishonored upon presentment for acceptance or not paid on due date, whichever comes earlier; and
 - c. Trust Receipts – if not paid on due date;
4. Bills and other negotiable instruments purchased – if dishonored upon presentment for acceptance/ payment or not paid on maturity date, whichever comes earlier: *Provided, however*, That an out-of-town check and a foreign check shall be considered as past due if outstanding for thirty (30) days and forty-five (45) days respectively, unless earlier dishonored;
5. Credit facilities or receivables payable in installments – the total outstanding balance thereof shall be considered past due in accordance with the following schedule:

<u>Mode of Payment</u>	<u>Minimum Number of Installments in Arrears</u>
Monthly	6
Quarterly	2
Semestral	1
Annually	1

Provided, however, That when the total amount of arrearages reaches twenty percent (20%) of the total outstanding balance of the credit facility/receivable, the total outstanding balance of the credit facility/receivable shall be considered as past due, notwithstanding the number of installments in arrears: *Provided, further*, That for modes of payment other than those listed above (e.g., daily, weekly or semi-monthly), the entire outstanding balance of the loan/receivable shall be considered as past due when the total amount of arrearages reaches ten percent (10%) of the total receivable balance;

6. Credit card receivables – if the amount due is not paid within ten (10) days from the deadline indicated in the billing statement; and
7. All items in litigation as defined in the IB's Manual of Accounts.

For the purpose of determining delinquency in the payment of obligations as a ground for disqualification of bank directors and officers, any due and unpaid loan/financing installment or portion thereof, from the time the obligor defaults, shall be considered as past due.

Sec. 24. Equity Investments

1. *Financial Allied Undertakings.* With prior approval of the Monetary Board, the IB may invest in the equity of the following financial allied undertakings:
 - a. Leasing companies;
 - b. Banks;
 - c. Investment houses;
 - d. Financing companies;
 - e. Credit card operations;
 - f. Financial institutions addressed/ catering to small and medium- scale industries;
 - g. Companies engaged in stock brokerage/security dealership/ brokerage;
 - h. Foreign exchange dealers/brokers; and
 - i. Insurance companies.

Provided, That any such undertaking is the primary purpose for which a particular enterprise was established and the volume of its business indicates that it is principally engaged in such undertaking.

The equity investment of the IB in a single financial allied undertaking shall be, in relation to the total subscribed capital stock and in relation to the total voting stock of the allied undertaking, within the following ratios:

<u>Allied Undertaking</u>	<u>Limit</u>
KBs	- Up to 49%
TBs and RBs	- Up to 100%
Other financial allied undertakings	- Up to 100% without prejudice to the limitations prescribed in Subsec. 1378.1 (of the MRBOFI).

Provided, That the equity investment in an insurance company of the IB, any of its wholly or majority-owned subsidiaries, its directors, officers and stockholders owning two percent (2%) or more of the bank's subscribed capital stock, shall not exceed fifty-one percent (51%) of the total subscribed capital stock and the total voting stock of such insurance company.

The equity investment of the IB in a bank pursuant to R.A. No. 7721 shall be governed by the rules and regulations implementing said law.

2. *Non-Financial Allied Undertakings.* The IB may invest in the equity of the following non-financial allied undertakings:
 - a. Warehousing companies;
 - b. Storage companies;
 - c. Safe deposit box companies;
 - d. Companies engaged in the management of mutual funds but not in the mutual funds themselves;
 - e. Management corporations engaged or to be engaged in activity similar to the management of mutual funds;
 - f. Companies engaged in the provision of computer services;
 - g. Insurance agencies: *Provided,* That no director, officer or stockholder of the bank and their related interests hold/ own more than twenty percent (20%) of the subscribed capital stock or equity of the insurance company for which the affiliates insurance acts as agent;

- h. Companies engaged in home building and home development;
- i. Companies providing drying and/or milling facilities for agricultural crops such as rice and corn;
- j. Companies engaged in insurance brokerage: *Provided*, That no director, officer, stockholder of the IB or its related interests shall have financial interests in the insurance company/companies for which the affiliate insurance brokerage company acts as broker;
- k. Bank service corporations all of the capital of which is owned by one or more banks and organized to perform for and in behalf of banks the following services:
 - (i) data processing systems development and maintenance;
 - (ii) deposit and withdrawal recording;
 - (iii) computation and recording of interests, service charges, penalties and other fees;
 - (iv) check-clearing processing, such as the transmission and receipt of check-clearing items/tapes to and from the *Bangko Sentral*, collection and delivery of checks not included in the Philippine Clearing House System, as well as the recording of the same; and
 - (v) printing and delivery of bank statements.
- l. Clearing house companies such as the PCHC and the Philippine Central Depository, Inc.

Provided, further, That any such undertaking is the primary purpose for which a particular enterprise was established and the volume of its business indicates that it is principally engaged in such undertaking.

The IB may acquire up to one hundred percent (100%) of the equity of a non- financial allied undertaking. However, prior Monetary Board approval is required if the investment is in excess of forty percent (40%) of the total subscribed capital stock or forty percent (40%) of the total voting stock of such allied undertaking.

3. *Investments in Non-Allied or Non-Related Enterprises.* The broad category of undertakings in which the IB may invest in directly or through its wholly or majority-owned subsidiary shall be subject to prior approval of the Monetary Board. Investments shall be allowed in enterprises engaged in certain activities in agriculture, mining and quarrying, manufacturing, public utilities, construction, wholesale trade and community and social services following the industrial groupings in the 1977 Philippine Standard Industrial Classification (PSIC) as enumerated in Annex I of Subsection 1380.1 of the MRBOFI, as amended. Individual equity investment in undertakings within these enumerated activities shall not require prior approval: *Provided, however*, That within thirty (30) days after the investment, the Bank shall furnish the appropriate supervising department of the Bangko Sentral such relevant information on the investments made as amount invested, name of investee company, and nature of business, accompanied by such pertinent documents as Articles of Incorporation, Articles of Partnership or Registration Certificate, whichever may be applicable, and such other information which may be required: *Provided, further*, That said investment is within the limits and restrictions set forth in the succeeding paragraphs of this Section.

The equity investment of the IB or of its wholly or majority-owned subsidiary, in any single non-allied enterprise shall not exceed thirty-five percent (35%) of the total subscribed capital stock nor shall it exceed thirty-five percent (35%) of the voting stock in the enterprise.

For the purpose of determining compliance with the ceiling prescribed in the preceding paragraph, (i) the equity investment of the Bank; (ii) the equity investment of the Bank's wholly or majority-owned subsidiaries; and (iii) the equity investment of directors, officers and stockholders owning two percent (2%) or more of the subscribed capital stock of the Bank or of the Bank's wholly or majority-owned subsidiaries, shall be combined.

In no case shall the total equity investments in a single non-allied enterprise of the IB, together with the investments of other expanded commercial banks, non-bank financial intermediaries performing quasi-banking functions, or their wholly or majority-owned subsidiaries, whether or not the parent financial intermediaries have equity investments in the enterprise, amount to fifty percent (50%) or more of the voting stock of that enterprise.

4. *Other Limitations and Restrictions on Equity Investments.* The following limitations and restrictions shall also apply regarding equity investments of the IB:

For purposes hereof, the phrase “equity investments in and/or credit facilities to” shall include any accommodation that gives rise to a creditor/debtor relationship such as deposits, money market placements, loans or any advances or any amount of funds granted or remitted by the IB to its subsidiary/affiliate abroad including letters of comfort and deposits/placements abroad of the Bank which are hypothecated.

5. *Exclusion of Underwriting Exposure from Ceiling.* The exposure of the IB arising from the firm underwriting of equity securities of enterprises shall not be counted in determining compliance with the ceiling prescribed for equity investments for a period of two (2) years from the acquisition of such equity securities.

Sec. 25. Special Cash Account

The IB shall open a special cash account with the *Bangko Sentral* in which the liquid funds shall be deposited. Any transfer of funds from this account to other accounts shall be made only upon prior consultation with the IB.

The Bank’s board of directors shall make such representations with the *Bangko Sentral* as may be necessary to facilitate the opening of said account.

- a. The total equity investments of IB in any single enterprise, whether allied or non-allied, shall not at any time exceed fifteen percent (15%) of the Bank’s net worth.
- b. The total amount of investment in equities made by the IB in all enterprises, whether allied or non- allied, shall not exceed fifty percent (50%) of its net worth.

Investments Abroad. The ceiling provided for in the preceding paragraph shall apply to equity investments in and/or credit facilities to any enterprise abroad.

Sec. 26. Capital Funds Requirements

The IB shall maintain its combined capital accounts in proportion to its assets as prescribed by the General Banking Act and subject to the Rules and Regulations of the *Bangko Sentral*.

Sec. 27. Investment Risk Fund

1. *Creation.* A reserve account, known as the Investment Risk Fund, shall be created in the books of the IB, by annually setting aside an amount equal to ten percent (10%) of the profits realized during the financial year from the investment of the customers’ deposits in the following operations:
 - a. Financing & Investment
 - b. Foreign Exchange Transactions
 - c. Investment in Bonds & Other Islamic Financial Instruments
 - d. Trading Account Securities
 - e. Investments in Stocks
 - f. Equity Investments
 - g. Placements with Treasury Department
 - h. Others

Should the accumulated reserves equal the authorized capital of the IB, the board of directors may reduce the amount of the annual deduction to a minimal percentage until the aggregate reserves become double the amount of the capital, after which the herein authorized deduction shall cease to accrue to the reserve account.

2. *Determination of Profits and Losses.* At the close of each financial year, the IB shall determine the results of its operation. The board of directors shall, after deducting the general and administrative expenses including remunerations of the board of directors and *Shari’a* Advisory Council, determine annually what part of the income shall be appropriated to reserves, investors and shareholders. All accounts relating to financing and joint investment operations shall be kept separate from the accounts of the other banking activities and services offered by the IB. The same rule with respect to the accounts of specific investments shall apply where such specific projects may have a separate account.

Losses incurred, if any, shall be deducted from the total profits realized for the financial year in which such losses are incurred, but any excess of losses over the profits which have been actually realized during the year may be deducted from the Investment Risk Fund opened for covering the risks of investments: *Provided*, That should the total profits realized in the year be insufficient to cover the losses incurred, the IB shall carry out a comprehensive assessment to arrive at estimated profit and loss based on the market rates, from operations which are financed by the *mudarabah* funds and which have not reached the stage of final settlement by the end of the financial year.

3. Utilization. The Investment Risk Fund shall be invested for the benefit of the IB in safe non-interest bearing transactions only, as authorized by the board of directors.

The board of directors shall adopt policies on the creation and utilization of the Investment Risk Fund and determination of profits and losses, within one (1) year from date of this Circular.

Sec. 28. Periodic Reports

The IB shall submit to the appropriate supervising department of the Bangko Sentral the periodic reports enumerated under Annex "A" and such other reports as may be prescribed by the Monetary Board.

Sec. 29. Manual of Accounts

The IB shall adopt/implement the Manual of Accounts for Al-Amanah Islamic Investment Bank of the Philippines as approved by the Monetary Board in its Resolution No. 335 dated 15 March 1991.

Sec. 30. Board of Directors

The board of directors shall be composed of nine (9) members duly elected by the shareholders. The board of directors shall choose from among themselves the Chairman. The board shall convene at the principal office once every three (3) months at the most upon due notice by the Chairman or, whenever the need arises, upon the request of three (3) members. The board may convene outside the IB's principal office as the members shall determine in the by-laws of the Bank.

Sec. 31. Power of the Board

The board of directors shall have the broadest powers to manage the IB except such matters as are explicitly reserved for the shareholders. The board shall adopt policy guidelines necessary to carry out effectively the provisions of R.A. No. 6848, as well as internal rules and regulations necessary for the conduct of its Islamic banking business and all matters related to:

1. credit and investment;
2. discretionary and delegated authorities
3. risk management;
4. investment risk fund;
5. *qardhasan* (benevolent loans); and
6. personnel policies

The board of directors shall have the power to appoint managers, authorized agents or legal representatives and shall vest them with signing authority on behalf of the Bank either severally or jointly in accordance with the operational procedures of the Bank.

The board shall cause the preparation of the IB's balance sheet for each financial year within three (3) months at the latest from the end of each accounting period as well as the profit and loss statement according to accounting rules established and based on Islamic criteria. Copies of the audited annual balance sheet, profit and loss account, together with any note thereon, and the report of the auditor and the directors own report shall be provided to the shareholders before the date of the general meeting.

The board shall also cause the preparation of the annual revenue and expenditures budget as well as the annual business plan.

Sec. 32. Chief Executive Officer; Other Officers and Employees

The Chairman of the Board of the IB shall be the Chief Executive Officer of the Bank. He must have experience and training in Islamic banking. All other officers and employees of the IB shall, upon recommendation of the Chief Executive Officer, be appointed and removed by the Board which shall not be subject to Civil Service Law.

The Chief Executive Officer of the IB shall, among others, execute and administer the policies, measures, orders and resolutions approved by the board of directors. In particular, he shall have the power and duty to execute all contracts in behalf of the IB, to enter into all necessary obligations required or permitted under R.A. No. 6848, to report weekly to the board of directors the main facts concerning the operations of the Bank during the preceding week, and to suggest changes in policy or policies which will serve the best interest of the Bank.

Sec. 33. Qualifications and Disqualifications of Directors and Officers

The provisions (of the MRBOFI – Book I) regarding the qualifications and disqualifications of directors and officers shall be applicable to the directors and officers of the IB.

Sec. 34. Business Development Office

The IB shall have a Business Development Office which shall be responsible for the following:

1. To conduct periodic economic surveys and studies of the investment climate and opportunities in the IB's sphere of operations and identify the viable projects which may be sponsored by the people of the Autonomous Region;
2. To offer technical consultancy services in the preparation of project studies and in meeting other technical credit requirements of the IB, including the provision of the management consultants at rates to be determined by the board of directors to projects financially assisted by the IB; and
3. To perform such other functions as may be directed by the board of directors.

Sec. 35. General Shareholder's Meeting

The shareholders shall convene in a general meeting annually at the latest within six (6) months following the end of the financial year of the Bank at the place, date and time fixed in the notice. The attendance of shareholders representing at least sixty percent (60%) of the capital of the IB shall constitute a quorum to do business and voting shall be by shares of stocks.

For purposes of this Section, "Capital" shall refer to the Total Subscribed Capital, whether paid or unpaid.

No delinquent stock shall be voted for or be entitled to vote or to representation at any stockholders' meeting, nor shall the holder thereof be entitled to any of the rights of a stockholder except the right to dividends until and unless he pays the amount due on his subscription, including the cost and expenses incurred thereon, if any.

Holders of subscribed shares not fully paid which are not delinquent shall have all the rights of a stockholder.

Sec. 36. Purposes of General Meeting

The general shareholders' meeting shall be convened purposely to hear the board of directors' report on the activities of the IB, its financial condition, the auditor's report and to approve the balance sheet for the financial year ended and the profit and loss statement, to determine the portion of dividends to be distributed to the shareholders and the method of distribution, to appoint the auditors, and to elect the members of the board of directors and the *Shari'a* Advisory Council.

Sec. 37. Ordinary and Extraordinary Sessions

The general shareholders' meeting shall be presided over by the Chairman of the board of directors. All resolutions adopted by the general meeting in ordinary session assembled shall be taken by a vote of majority of the shareholders represented therein and in case of votes being equal, the Chairman shall cast his vote to break the tie. The resolutions of the general meeting adopted in accordance therewith shall be binding on all shareholders including those not in attendance or opposing the resolution.

An extraordinary general meeting shall be required to pass resolutions related to the increase or decrease of capital of the Bank, the extension of its legal existence or matters affecting amendment of R.A. No. 6848. Resolutions of the extraordinary general meeting shall be deemed adopted when a majority vote of at least sixty-six and two-thirds plus one percent ($66 \frac{2}{3} + 1\%$) of the capital shares shall have been cast.

In no case shall the general meeting resolve to modify the object of the Bank as an Islamic investment bank.

Sec. 38. Bank Auditor; Reports

Subject to the approval by the shareholders, the IB shall appoint an external auditor, whose qualifications and remunerations shall be fixed by the board of directors. The external auditor shall assume his functions from the date of his appointment until the date of the next general shareholders' meeting. In case a vacancy occurs at any time during the year for any reason, the board of directors shall immediately appoint a replacement who shall serve until the next general shareholders' meeting.

The external auditor shall conduct an annual financial audit not later than thirty (30) days after the close of the calendar year. Reports on such audit shall be made and submitted to the board of directors and the appropriate supervising department of the Banko Sentral not later than ninety (90) days after the start of the audit.

For purpose hereof, an independent external auditor who may be engaged by the Bank shall refer to one who does not hold or own two percent (2%) or more of equity in the Bank.

The board of directors, in a regular or special meeting, shall consider and act on the financial audit report and shall submit, within thirty (30) days after receipt of the report, a copy of its resolution to the appropriate supervising department of the Banko Sentral. The resolution shall show, among other things, the names of the directors present and absent, and the action(s) taken on the findings and recommendations.

In the exercise of his auditing functions, all books, accounts and documents of the Bank shall be made available to the auditor for inspection to ascertain its assets and liabilities.

Sec. 39. Confidential Information

Banking transactions of the IB relating to all deposits of whatever nature are confidential and may not be examined, inquired or looked into by any person, government official, bureau or office except as provided in Sec. 38, or upon written permission by the depositor, or in cases where the money deposited or the transaction concerned is the subject of a court order.

It shall be unlawful for any official or employee of the IB or any person as may be designated by the board of directors to examine or audit the books of the Bank to disclose or reveal to any person any confidential information except under the circumstances mentioned in the preceding paragraph.

Sec. 40. Accounting Period

The financial year of the IB shall be based on the Gregorian calendar, but the corresponding Islamic *Hijra* date shall be mentioned on all correspondences, contracts, printed materials, forms and records of the IB. The accounting period shall commence on the first day of January and close on the last day of December each year.

Sec. 41. Sharing between the Bank and the Investors

Not later than the 31st day of January of each financial year, the board of directors shall determine and publish the general percentages of profit to be allocated to the total funds participating in joint investments of the IB.

The IB as a joint venturer (*Mudarib*) shall be entitled to certain percentage after deducting the amount allocated to investors. The Bank shall likewise be entitled to a share in the profits of joint investments in proportion to its own invested funds.

For the purpose of calculating funds employed in financing operations, priority shall be given to joint investment accounts and the holders of *muqaradah* (interest free) bonds.

All *zakat* due in the shareholder's capital and reserves represented by the pecuniary value of shares and the *zakat* due on the investor's funds or profits accruing to every depositor shall be paid to the *zakat* fund, subject to their instructions.

The board of directors shall adopt a policy on the sharing between the Bank and its investors which should be consistent with the *Shari'a* principle.

Sec. 42. Training of Technical Personnel

The IB shall promote and sponsor the training of technical personnel in the field of Islamic banking, finance and insurance.

Towards this end, the IB may defray the costs of study, at home or abroad, of outstanding employees of the IB, of promising university graduates or of any other qualified persons who shall be determined by proper competitive examinations. The board of directors shall prescribe rules and regulations to govern the training program of the IB.

Sec. 43. Definition of Terms

For purposes of these Rules and Regulations, the following definition of term shall apply:

1. Islamic banking business means banking business whose aims and operations do not involve interest (*riba*) which is prohibited by the Islamic *Shari'a* principles.

2. *Shari'a* has the meaning assigned to it by Islamic law and jurisprudence as expounded by authoritative sources; in the context of R.A. No. 6848, it is construed by reference to pertinent Quranic ordinances and applicable rules in Islamic jurisprudence on business transactions.
3. *Riba* has the meaning assigned to it by Islamic law and jurisprudence as expounded by authoritative sources; in the context of banking activities, the term includes the receipt and payment of interest in the various types of lending and borrowing and in the exchange of currencies on forward basis.
4. *Zakat* has the meaning assigned to it by Islamic law and jurisprudence as expounded by authoritative sources; in the context of R.A. No. 6848, it represents annual an "tithe" payable by the Bank on behalf of its shareholders and investors in compliance with Islamic *Shari'a* principles.
5. Depositors means a person or entity who has an account at an IB, whether the account is a current account, a savings account, an investment account or any other deposit account; unless the context requires another meaning, a depositor corresponds to an investor in joint investment of the IB.
6. Current account liabilities in relation to Islamic banking services mean the total deposits at the Bank which are repayable on demand.
7. Savings account liabilities in relation to Islamic banking services mean the total deposits at the IB which normally require the presentation of passbooks or such other legally acceptable documents in lieu of passbooks as approved by the *Bangko Sentral* for the deposit or withdrawal of money;
8. Investment account liabilities in relation to Islamic banking services mean the total deposit liabilities at the IB in respect of funds placed by a depositor with the Bank for a fixed period of time under an agreement to share the profits and losses of that bank on the investment of such funds.
9. Other deposit liabilities in relation to an IB mean the deposit liabilities at the Bank other than savings account, investment account, current account liabilities and deposit liabilities from any IB or any other licensed bank.
10. Participation in relation to Islamic banking and commercial operations means any agreement or arrangement under which the mode of joint investments or specific transactions shall not involve the element of interest charge other than as percentage share in profits and losses of business.
11. Share means share in the capital of the Bank or a corporation and includes a stock, except where a distinction between stock and share is expressed or implied.
12. *Muqaradah* Bonds represent long term non-interest bearing bonds of definite denomination issued and floated by the bank on the basis of participation under the *Mudarabah* principle to be used in financing projects for economic development.

Sec. 44. Statement of Principles

For purposes of implementing these Rules and Regulations, the following *Shari'a* principles shall be observed:

1. *Al-Bai Bithaman Ajil* (Deferred Payment Sale) - principle under which one sells to another by passing the ownership and delivery immediately but collects the payment later, usually by installments. This principle is applied in financing fixed asset acquisition, such as buying of houses, properties, plant and machinery, etc.
2. *Al-Bai ul Takjiri* (Leasing ending with ownership) - principle under which the fund-owner may purchase the asset required by the fund-user with the right to use the services of the asset, but subsequently to own the asset. Thus, the fund-owner first purchased the asset required by the fund-user and subsequently lease the asset to the fund-user with the stipulation that at a point in time the fund-user will purchase from the fund-owner the asset concerned at an agreed price with all the lease rental previously paid constituting part of the purchase price.
3. *Al-Ijarah* (Leasing) - principle under which the fund-owner purchases the asset required by the fund-user who acquires the right to use the services of said asset. The transaction is covered by a contract whereby the fund-owner first purchases the asset and subsequently leases the same to the beneficiary (fund- user) for a fixed, obligatory period, subject to lease rentals and other terms and conditions as may be agreed by both parties.
4. *Al-Kafalah* (Guarantee) - principle under which one can provide guarantee to another on behalf of a third person. This principle is applied by IBs to issue Letters of Guarantee in respect of the performance of a task, or the

settlement of a loan, etc. Where a security deposit is required, it is taken under the principle of *Al-Wadiah*. This principle also enables the IBs to take guarantees from others for the credit facilities granted.

5. *Al-Mudarabah* (Trust Financing) - principle under which a fund-owner provides full financing to the fund-user who provides only entrepreneurship and labor. The fund-owner is not involved in the management of the funds at all. The return to the fund-owner and the fund-user is a share of profit at a rate or ratio agreed in advance. In case of a failure, the fund-owner bears the financial losses. This principle is applied by the IBs in both deposit taking and financing. It is mostly applied to support the investment (fixed) deposit accounts.
6. *Al-Murabahah* (Purchase and Sale or Cost-plus) - principle under which the fund-owner purchases the goods or assets required by the fund-user and sells at an agreed mark-up to the fund-user. This principle is applied in Bills Receivable financing. If full financing is not to be given, the fund-user would be requested to place a margin deposit which will be used to pay for a portion of the cost of the goods or assets.
7. *Al-Musharaka* (Partnership Profit Sharing) - principle under which a fund-owner and an entrepreneur can jointly contribute to the finance and the management of a business. Profits or losses from the joint venture are shared between them in the rate or ratio agreed in advance. This principle is applicable in both the areas of funding and financing. It is mostly applied by IBs to raise capital, to finance projects on a joint venture basis, and in Trust Receipt financing.
8. *Al-Qardhasan* (Benevolent Loan) - principle under which one provides a direct loan, free of any charges, to another in need. Payment of dividend for the use of the loan is at the discretion of the user of the funds. Financing economic and business activities of the poor is sometimes extended under this principle.
9. *Al-Rahan* (Security) - principle under which security can be given and taken for an outstanding obligation. Although IBs extend financing through partnership and trading assets, security is also taken as a precaution under this principle.
10. *Al-Wadiah* (Safe Custody) - principle under which a trustee will safeguard the funds entrusted without any obligation to pay any dividend to the owners of the fund (depositors) as long as a guarantee is given to ensure the full refund of the money upon request of withdrawal. The trustee can have full discretion over the use of the funds.
11. *Al-Wakalah* (Agency) - principle under which one acts as an agent for another for a fee. This principle is applied in the Letters of Credit (LCs) operations in which the IBs issue LCs on behalf of their importing customers when only LC service is required. A 100% margin deposit is collected under the principle of *Al-Wadiah*. The deposit will be used ultimately to meet the full value of the inward bills.

Sec. 45. Sanctions

Any director, officer, employee, auditor or agent of the IB who violates or permits the violation of any provisions of these Rules and Regulation shall be subject to the criminal and administrative sanctions provided under Sections 36 and 37 of R.A. No. 7653 (The New Central Bank Act).

Sec. 46. Supervision; Applicability of Banking Laws, Rules and Regulations

The IB shall be under the supervision of the *Bangko Sentral*. The provisions of other banking laws, MRBOFI, as well as the existing Rules and Regulations of the *Bangko Sentral*, particularly those enumerated under Annex "B", and other pertinent laws insofar as they are not in conflict with any provisions of R.A. No. 6848 and these Rules and Regulations shall be applicable to the IB.

Sec. 47. Transformation to Islamic Banking Business

The IB shall transform its investment portfolios, accounts or assets for the conduct of full Islamic banking business within two (2) years from 24 April 1996. The Monetary Board may allow extension of the period as circumstances may warrant. If for any reason, such portfolios, accounts or assets granted under the authority of the Philippine Amanah Bank Charter are not eligible for this purpose, the same may be transferred, swapped, sold or otherwise disposed of in any manner deemed feasible.

The board of directors of the IB shall formulate policies to transform the business of the Bank into an Islamic concept, and shall submit the same to the appropriate supervising department of the *Bangko Sentral* within six (6) months from 24 April 1996.

During the transformation period, the Bank may continue to perform conventional banking activities under R.A. No. 337, as amended, insofar as they are not in conflict with R.A. No. 6848, and the applicable rules and regulations of the *Bangko Sentral*.

NOTES ON MICROFINANCE
(Appendix to Sec. 314)

A. Definition of microfinance

Microfinance is the provision of a broad range of financial services, such as deposits, loans, payment services, money transfers and insurance products to the poor and low-income households, generally for their microenterprises and small businesses, to enable them to raise their income levels and improve their living standards.

B. Core principles for microfinance

- a. The poor needs access to variety of appropriate financial services that are convenient, flexible and reasonably priced.
- b. The poor has the capability to repay loans, pay the real cost of loans, generate savings and avail complementary financial services.
- c. Microfinance institutions must subscribe to performance standards and best practices to ensure greater outreach and sustainability.
- d. In line with the Philippine National Strategy for Microfinance, the government's role is an enabler (establishing the market-oriented policy and regulatory environment) and not as a direct provider of financial services.
- e. Microfinance should become an integral part of the financial sector in order to achieve its full potential of reaching a large number of the poor.
- f. Microfinance is an effective tool for poverty alleviation and is a clear testament that market-based solutions are feasible to expand access to financial services toward building a truly inclusive financial system.

C. Characteristics of a typical microfinance client

<i>Characteristics</i>	<i>Distinguishing Features</i>
Type of client	Low income with regular cash flow Employment in informal sector; low wage bracket Lack of physical collateral Closely interlinked household and business activities Poor and low income ¹
Other market segments	<ol style="list-style-type: none"> a. The landless who are engaged in agricultural work on a seasonal basis and manual and laborers in forestry, mining, household industries, construction and transport; requires credit for consumption needs and also for acquiring small productive assets, such as livestock. b. Small and marginal farmers, rural artisans, weavers and those self-employed in the urban informal sector as hawkers, vendors and workers in household micro-enterprises requires credit for working capital, including a small part for consumption needs. This segment largely comprises the poor but not the poorest. c. Medium farmers/small entrepreneurs who have gone into commercial crops and others who are engaged in dairy and poultry. Among non-farm activities, this segment includes those in villages and slums engaged in processing or manufacturing activity. These persons live barely above the poverty line and also suffer from inadequate access to formal credit.

D. Definition of microfinance loans or micro-credit

Micro-credit loans are small loans granted to the basic sectors, on the basis of the borrower's cash flow and other loans granted to the poor and low-income households to enable them to raise their income levels and improve their living standards. These loans are typically unsecured but may also be secured in some cases.

E. General features of microfinance loans

- a. Types of microfinance loans
 - (1) Microenterprise loans – Small and short term loans granted to the basic sectors, in the basis of the borrower's cash flow, for their microenterprises and small businesses. The principal amount of a microenterprises loan can be generally pegged at P150,000.
 - (2) Microenterprise Loan Plus or "Microfinance Plus"- loans granted to the basic sectors, on the basis of the borrower's cash flow, for their growing microenterprises and small businesses. These loans are from PhP150,001 to PhP300,000. The borrowers that will qualify as recipients of Microfinance Plus shall have a track record of at least two (2) microfinance loan cycles in the PhP50,000 to PhP150,000 range demonstrating the success of the business, its increasing credit demand and subsequent increased capacity

¹ For purposes of microinsurance products only. Poor and low income clients refer to those with annual family income below the national average based on the latest available National Statistics Office (NSO) Family Income and Expenditures Survey (FIES). The 2009 national average annual family income is P206,000.

to pay. The borrower must also have a savings account. The delivery of Microfinance Plus will be utilizing microfinance principles and methodologies in accordance with Sec.314.

- (3) Housing microfinance loans-loans granted for home improvements, house construction, house and/or lot acquisition, utilizing microfinance principles and methodologies in accordance with existing Bangko Sentral regulations¹. The maximum principal amount of a housing microfinance loan for house construction and/or lot acquisition is generally pegged at P300,000.
- (4) Micro-agri loans – short term loans granted for farming activities, agri-business and agri-related fixed assets, among others, utilizing microfinance principles and methodologies in accordance with Sec. 314.

b. Collateralization of microfinance loan

Microfinance loans are typically unsecured, for relatively short periods of time (up to 365 days) with monthly (or more frequent) amortizations of interest and principal, and often featuring a joint and several guarantee of one (1) or more persons. In some cases, they can also be secured, depending on the capacity of the borrower to offer collaterals acceptable to the policies of the lending institutions.

c. Interest on microfinance loans

Global experience has demonstrated that a market-based interest rate regime permits the institution providing microfinance services become sustainable and able to cover administrative costs, provisions for loan losses and intermediation/funding costs. Global experience continues to validate the proposition that what matters most to the poor and underserved segments is access to financial services rather than their interest-rate cost – most especially because microenterprise and small business borrowers will take a microfinance loan whose repayment periods match the additional cash flows they hope to generate.

Therefore, interest on such microfinance loans shall be reasonable but shall not be lower than the prevailing market rates. This is to enable the lending institution not only to recover the financial and operational costs incidental to this type of microfinance lending but also to realize some bottom line gains.

d. Lending technology

- Prompt approval and disbursement of microloans
- Lack of extensive loan records
- Collateral substitutes; group based guarantees
- Conditional access to further micro-credits
- Information intensive character-based lending linked to cash flow analysis and group-based borrower selection

F. Definition and general features of microfinance savings deposit accounts or micro-deposits

Micro-deposits shall now be referred to as basic deposit accounts under Sec. 213.

G. Definition of microinsurance (Insurance Commission Memorandum Circular 1-2010 dated 29 January 2010)

Microinsurance is an activity providing specific insurance, insurance-like and other similar products and services that meet the needs of the low-income sector for risk protection and relief against distress, misfortune and other contingent events.

The marketing, sale and servicing of microinsurance products by thrift, rural and cooperative banks shall be governed by existing Bangko Sentral regulations².

H. General features of a microinsurance product (as provided by the Insurance Code)

- a. Premiums, contributions, fees or charges are collected/deducted prior to the occurrence of a contingent event. The amount of contributions, premiums, fees or charges, computed on a daily basis, does not exceed seven and a half percent (7.5%) of the current daily minimum wage rate for non-agricultural workers in Metro Manila.
- b. Guaranteed benefits are provided upon occurrence of a contingent event. The maximum sum of guaranteed benefits is not more than 1,000 times of the current daily minimum wage rate for non-agricultural workers in Metro Manila.

(Circular No. 992 dated 01 February 2018)

¹ Circular 678 dated 05 January 2010

² Circular 683 dated 23 February 2010

GUIDELINES TO INCORPORATE MARKET RISK IN THE RISK-BASED CAPITAL ADEQUACY FRAMEWORK
(Appendix to Section 125 on Market risk capital requirements)

Introduction

1. These guidelines describe the approach to be used by the Bangko Sentral to determine the minimum level of capital to be held by a bank against its market risk. The guidelines are broadly consistent with the recommendations of the Basel Committee on Banking Supervision in a document entitled "Amendment to the Capital Accord to Incorporate Market Risks" issued in January 1996.
2. Under these guidelines, banks shall be required to measure and apply capital charges against their market risk, in addition to their credit risk.
3. Market risk is defined as the risk of losses in on- and off-balance sheet positions arising from movements in market prices. The risks addressed by these guidelines are:
 - the risks pertaining to *interest rate-related instruments* and *equities* in the trading book; and
 - *Foreign exchange risk* throughout the bank.

Coverage of capital requirement for market risk

4. The capital requirement for market risk shall apply to all UBs and KBs.
5. The minimum CAR covering combined credit risk and market risk shall apply to banks which are subject to market risk capital requirement on both solo basis (i.e., head office plus branches) and consolidated basis (i.e., parent bank plus subsidiary financial allied undertakings, but excluding insurance companies).

Methods of measuring market risk

6. There are two (2) alternative methods recognized for the measurement of market risk, as follows:
 - (a) The *standardized approach* shall be used by all banks which are subject to market risk capital requirement, except by those which may be allowed by Bangko Sentral to use the alternative method described in paragraph (b) below. The method of measuring market risk under the standardized approach is set out in the Instructions for Accomplishing the Report on Computation of the Adjusted Risk-Based Capital Adequacy Ratio Covering Combined Credit Risk and Market Risk.
 - (b) The *internal models approach* allows banks with the necessary system to use their own internal risk management models to calculate market risk. The use of this approach is subject to prior Bangko Sentral approval. Approval shall be based on meeting certain qualitative and quantitative conditions relating to the models themselves and the controls surrounding them, as set out in *Annex "A"*. Banks may on a transitional basis be allowed to use a combination of the standardized approach and the models approach to measure their market risk, provided any such "partial" model shall cover a complete risk category (e.g., interest rate risk or foreign exchange risk). The reporting under the internal models approach is contained in the Instructions for Accomplishing the Report on Computation of the Adjusted Risk-Based Capital Adequacy Ratio Covering Combined Credit Risk and Market Risk.

Calculation of the capital adequacy ratio (CAR)

7. The adjusted CAR covering combined credit risk and market risk shall be calculated using the qualifying capital expressed as a percentage of the total risk-weighted assets (including credit risk and market risk-weighted assets). The components of this calculation are as follows:
 - *Market risk-weighted assets* are the sum of the capital charges for all market risk categories calculated using either the standardized approach or the internal models approach [multiplied by 125% for those calculated using the standardized methodology to be consistent with the higher capital charge for credit risk, i.e., ten percent (10%) as opposed to BIS recommended eight percent (8%)] multiplied by 10. (The multiplier 10 is the reciprocal of the Bangko Sentral required minimum capital adequacy ratio for credit risk of ten percent (10%). The effect is to convert the sum of the market risk capital charges into a risk-weighted assets equivalent which can then be directly added to the total credit risk-weighted assets.)

- *In calculating the capital charge for foreign exchange exposures*, the net open position for non-deliverable forwards (NDFs) shall be multiplied by 187.5% in lieu of the 125% factor referred to above starting 01 January 2012.
 - *Credit risk-weighted assets* is the total risk weighted assets calculated in accordance with applicable and existing capital adequacy framework, less the part calculated for on-balance sheet debt securities and equities in the trading book. (The credit risk-weighted assets for on-balance sheet debt securities and equities are deducted because they represent an element now covered by the market risk capital charge); and
 - *Qualifying capital* is the same as that calculated in accordance with applicable and existing capital adequacy framework.
8. Banks shall maintain a minimum adjusted risk-based CAR covering combined credit risk and market risk of ten percent (10%) calculated in this manner on solo basis and on consolidated basis.

The trading book

9. A key feature of the market risk framework is the definition of the trading book of a bank. This is set out in the Instructions for Accomplishing the Report on Computation of the Adjusted Risk-Based Capital Adequacy Ratio Covering Combined Credit Risk and Market Risk. Banks are expected to adopt a consistent approach to allocating transactions into their trading and non-trading (i.e., banking book), and clear audit trail for this purpose should be created at the time each transaction is entered into. The Bangko Sentral shall monitor banks' practices to ensure that there is no abusive switching between different books to inappropriately reduce capital charges.

Required reports

10. Banks shall submit quarterly reports of their adjusted risk-based CARs covering combined credit risk and market risk on solo basis and on consolidated basis to the appropriate supervising department of the Bangko Sentral in accordance with the prescribed forms within fifteen (15) banking days and thirty (30) banking days after the end of reference quarter for solo report and consolidated report, respectively. These reports shall be in addition to the reports on risk-based CAR covering credit risk required to be submitted in applicable and existing capital adequacy framework.
11. One (1) of three (3) alternative report forms prescribed, shall be used depending on the complexity of the bank's operations, to wit:
- (a) For UBs/KBs with expanded derivatives authority;
 - (b) For UBs/KBs with expanded derivatives authority but without option transactions; or
 - (c) For UBs/KBs without expanded derivatives authority.
12. The abovementioned reports shall be classified as Category A-2 Reports.

(Circular No. 890 dated 02 November 2015)

REQUIREMENTS FOR THE USE OF INTERNAL MODELS TO MEASURE MARKET RISK

I. General Criteria

1. The use of internal models shall be conditional upon the explicit prior approval of the Bangko Sentral.
2. The Bangko Sentral will only give approval if at a minimum:
 - It is satisfied that the bank's risk management system is conceptually sound and is implemented with integrity;
 - The bank has in the Bangko Sentral's view sufficient number of staff skilled in the use of sophisticated models not only in the trading area but also in the risk control, audit and if necessary, back office areas;
 - The bank's models have in the Bangko Sentral's judgment a proven track record of reasonable accuracy in measuring risk; and
 - The bank regularly conducts stress tests along the lines discussed in Part V below.
3. The Bangko Sentral may require a period of initial monitoring and live testing of a bank's internal model before it is used for supervisory capital purposes.
4. In addition to these general criteria, banks using internal models for capital purposes shall be subject to the requirements detailed in Parts II to VII below.

II. Qualitative Standards

5. Banks using internal models must have market risk management systems that are conceptually sound and implemented with integrity. Accordingly, a number of qualitative criteria that banks would have to meet before they are permitted to use a model-based approach are specified in paragraph 6 below. The extent to which banks meet the qualitative criteria may influence the level at which the Bangko Sentral will set the multiplication factor referred to in Part IV, paragraph 8(j) below. Only those banks whose models are in full compliance with the qualitative criteria as listed in this Section will be eligible for application of the minimum multiplication factor.
6. The qualitative criteria are:
 - (a) The bank should have an independent risk control unit that is responsible for the design and implementation of the bank's risk management system. The unit should produce and analyze daily reports on the output of the bank's risk measurement model, including an evaluation of the relationship between measures of risk exposure and trading limits. This unit must be independent from business trading units and should report directly to senior management of the bank.
 - (b) The unit should conduct a regular backtesting program, i.e. an ex-post comparison of the risk measure generated by the model against actual daily changes in portfolio value over longer periods of time, as well as hypothetical changes based on static positions.
 - (c) The board of directors (or equivalent management committee in the case of Philippine branches of foreign banks) and senior management should be actively involved in the risk control process and must regard risk control as an essential aspect of the business to which significant resources need to be devoted. In this regard, the daily reports prepared by the independent risk control unit must be reviewed by a level of management with sufficient seniority and authority to enforce both reductions of positions taken by individual traders and reductions in the bank's overall risk exposure.
 - (d) The bank's internal risk measurement model must be closely integrated into the day-to-day risk management process of the bank. Its output should accordingly be an integral part of the process of planning, monitoring and controlling the bank's market risk profile.
 - (e) The risk measurement system should be used in conjunction with internal trading and exposure limits. In this regard, trading limits should be related to the bank's risk measurement model in a manner that is consistent over time and that is well-understood by both traders and senior management.
 - (f) A routine and rigorous program of stress testing should be in place as a supplement to the risk analysis based on day-to-day output of the bank's risk measurement model. The results of stress testing exercises should be reviewed periodically by senior management and should be reflected in the policies and limits set by management and the board of directors (or equivalent management committee in the case of Philippine

branches of foreign banks). Where stress tests reveal particular vulnerability to a given set of circumstances, prompt steps should be taken to manage those risks appropriately (e.g., by hedging against that outcome or reducing the size of the bank's exposures).

- (g) Banks should have a routine in place for ensuring compliance with a documented set of internal policies, controls and procedures concerning the operation of the risk measurement system. The bank's risk measurement system must be well documented, for example, through a risk management manual that describes the basic principles of the risk management system and that provides an explanation of the empirical techniques used to measure market risk.
- (h) An independent review of the risk measurement system should be carried out regularly in the bank's own internal auditing process. This review should include both the activities of the business trading units and of the independent risk control unit. A review of the overall risk management process should take place at regular intervals (ideally not less than once a year) and should specifically address, at a minimum:
 - the adequacy of the documentation of the risk management system and process;
 - the organization of the risk control unit;
 - the integration of market risk measures into daily risk management;
 - the approval process for risk pricing models and valuation systems used by front and back-office personnel;
 - the validation of any significant change in the risk measurement process;
 - the scope of market risks captured by the risk measurement model;
 - the integrity of the management information system;
 - the accuracy and completeness of position data;
 - the verification of the consistency, timeliness and reliability of data sources used to run internal models, including the independence of such data sources;
 - the accuracy and appropriateness of volatility and correlation assumptions;
 - the accuracy of valuation and risk transformation calculations; and
 - the verification of the model's accuracy through frequent backtesting as described in paragraph (b) above.

III. Specification of Market Risk Factors

7. A bank's internal market risk measurement system must specify an appropriate set of market risk factors, i.e., the market rates and prices that affect the value of the bank's trading positions. The risk factors contained in a market risk measurement system should be sufficient to capture the risks inherent in the bank's portfolio of on-and off-balance sheet trading positions. Although banks will have some discretion in specifying the risk factors for their internal models, the following guidelines should be fulfilled:
 - (a) For interest rates, there must be a set of risk factors corresponding to interest rates in each currency in which the bank has interest rate-sensitive on- or off-balance sheet positions.
 - The risk measurement system should model the yield curve using one (1) of a number of generally accepted approaches, for example, by estimating forward rates of zero coupon yields. The yield curve should be divided into various maturity segments in order to capture variation in the volatility of rates along the yield curve; there will typically be one (1) risk factor corresponding to each maturity segment. For material exposures to interest rate movements in the major currencies and markets, banks must model the yield curve using a minimum of six (6) risk factors. However, the number of risk factors used should ultimately be driven by the nature of the bank's trading strategies. For instance, a bank with a portfolio of various types of securities across many points of the yield curve and that engages in complex arbitrage strategies would require a greater number of risk factors to capture interest rate risk accurately; and
 - The risk measurement system must incorporate separate risk factors to capture spread risk (e.g., between bonds and swaps). A variety of approaches may be used to capture the spread risk arising from less than perfectly correlated movements between government and other fixed-income interest rates, such as specifying a completely separate yield curve for non-government fixed-income instruments (for instance, swaps or local government unit securities) or estimating the spread over government rates at various points along the yield curve.
 - (b) For equity prices, there should be risk factors corresponding to each of the equity markets in which the bank holds significant positions.
 - At a minimum, there should be a risk factor that is designed to capture market-wide movements in equity prices (e.g., a market index). Positions in individual securities or in sector indices could be expressed in "beta-equivalents" relative to this market-wide index;

- A somewhat more detailed approach would be to have risk factors corresponding to various sectors of the overall equity market (for instance, industry sectors or cyclical and non-cyclical sectors). As above, positions in individual stocks within each sector could be expressed in beta-equivalents relative to the sector index; and
 - The most extensive approach would be to have risk factors corresponding to the volatility of individual equity issues.
 - The sophistication and nature of the modeling technique for a given market should correspond to the bank's exposure to the overall market as well as its concentration in individual equity issues in that market.
- (c) For exchange rates, the risk measurement system should incorporate risk factors corresponding to the individual foreign currencies in which the bank's positions are denominated. Since the value-at-risk (VaR) figure calculated by the risk measurement system will be expressed in Philippine peso, any net position denominated in a foreign currency will introduce a foreign exchange risk. Thus, there must be risk factors corresponding to the exchange rate between the Philippine peso and each foreign currency in which the bank has a significant exposure.

IV. Quantitative Standards

8. Banks will have flexibility in devising the precise nature of their models, but the following minimum standards shall apply for the purpose of calculating their capital charge:
- (a) "*Value-at-risk*" (VaR) must be computed on a daily basis.
 - (b) In calculating VaR, a 99th percentile, one-tailed *confidence interval* is to be used.
 - (c) In calculating VaR, an instantaneous price shock equivalent to a 10-day movement in prices is to be used, i.e., the minimum "*holding period*" will be ten (10) trading days. Banks may use VaR numbers calculated according to shorter holding periods scaled up to ten (10) days by the square root of time. (For the treatment of options, also see paragraph (h) below.)
 - (d) The choice of *historical observation period* (sample period) for calculating VaR will be constrained to a minimum length of one (1) year. For banks that use a weighting scheme or other methods for the historical observation period, the "*effective*" observation period must be at least one (1) year (that is, the weighted average time lag of the individual observations cannot be less than six (6) months).
 - (e) Banks should update their *data sets* no less frequently than once every three (3) months and should also reassess them whenever market prices are subject to material changes. The Bangko Sentral may also require a bank to calculate its VaR using a shorter observation period' if in the Bangko Sentral's judgment, this is justified by a significant upsurge in price volatility.
 - (f) No particular *type of model* is prescribed. So long as each model used captures all the material risks run by the bank, as set out in Part III, banks will be free to use models based, for example on variance- covariance matrices, historical simulations, or Monte Carlo simulations.
 - (g) Banks will have discretion to recognize empirical *correlations* within broad risk categories (e.g., interest rates, exchange rates and equity prices, including related options volatilities in each risk factor category). The Bangko Sentral may also recognize empirical correlations across broad risk factor categories, provided that the Bangko Sentral is satisfied that the bank's system for measuring correlations is sound and implemented with integrity.
 - (h) For banks with option transactions, banks' models must accurately capture the unique risks associated with *options* within each of the broad risk categories. The following criteria apply to the measurement of options risk:
 - Banks' models must capture the *non-linear price characteristics* of options positions;
 - Banks are expected to ultimately move towards the application of a full 10-day price shock to options positions or positions that display option-like characteristics. In the interim, the Bangko Sentral may require banks to adjust their capital measure for options risk through other methods, e.g., periodic simulations or stress testing; and
 - Each bank's risk measurement system must have a set of risk factors that captures the *volatilities of the rates* and prices underlying option positions, i.e., *vega* risk. Banks with relatively large and/or complex

options portfolios should have detailed specifications of the relevant volatilities. This means that banks should measure the volatilities of options positions broken down by different maturities.

- (i) Each bank must meet, on a daily basis, a *capital requirement* expressed as the higher of (i) last trading day's VaR number or (ii) an average of the daily VaR measures on each of the preceding sixty (60) trading days (both measured according to the parameters specified in this Section) multiplied by a multiplication factor.
- (j) The *multiplication factor* shall be set by the Bangko Sentral on the basis of its assessment of the quality of the bank's risk management system subject to an absolute minimum of three (3). Banks will be required to add to this factor a "plus" directly related to the ex-post performance of the model (to be determined on a quarterly basis), thereby introducing a built-in positive incentive to maintain the predictive quality of the model. The plus will range from 0 to 1 based on the number of backtesting exceptions (i.e., the number of times that actual/ hypothetical loss exceeds the VaR measure) for the past 250 trading days of the reference quarter-end as set out in Table 5 of the Instructions for Accomplishing the Report on Computation of the Adjusted Risk- Based Capital Adequacy Ratio Covering Combined Credit Risk and Market Risk. (Table 3 for banks with expanded derivatives authority but without option transactions, and banks without expanded derivatives authority.)
- (k) Banks using models will be subject to a separate capital charge to cover the *specific risk* of interest rate-related instruments and equity securities as defined in the standardized approach to the extent that this risk is not incorporated into their models. However, for banks using models, the total specific risk charge applied to interest rate- related instruments or to equities should in no case be less than half the specific risk charges calculated according to the standardized methodology.

V. Stress Testing

- 9. Banks using internal models for measuring market risk capital requirements must have in place a rigorous and comprehensive stress testing program. Stress testing to identify events or influences that could greatly impact banks is a key component of a bank's assessment of its capital position.
- 10. Banks' stress scenarios should cover a range of factors that can create extraordinary losses or gains in trading portfolios, or to make the control of risks in those portfolios very difficult. These factors include low-probability events in all major types of risks, including the various components of market, credit, and operational risks. Stress scenarios should shed light on the impact of such events on positions that display both linear and non-linear price characteristics (i.e., options and instruments that have options-like characteristics).
- 11. Banks' stress tests should be both of a qualitative and quantitative nature, incorporating both market risk and liquidity aspects of market disturbances. Quantitative criteria should identify plausible stress scenarios to which banks could be exposed. Qualitative criteria should emphasize that two (2) major goals of stress testing are to evaluate the capacity of the bank's capital to absorb potential large losses and to identify steps the bank can take to reduce its risk and conserve capital. This assessment should be integral to setting and evaluating the bank's management strategy and the results of stress testing should be regularly reported to senior management and, periodically, to the board of directors (or equivalent management committee in the case of Philippine branches of foreign banks).
- 12. Banks should combine the use of supervisory stress scenarios with stress tests developed by banks themselves to reflect their specific risk characteristics. Specifically, the Bangko Sentral may ask banks to provide information on stress testing in the following three (3) broad areas:
 - (a) Supervisory scenarios requiring no simulation by the bank. Banks should provide the Bangko Sentral information on the largest losses experienced during the reference quarter. This loss information could be compared to the level of capital that results from a bank's internal measurement system. For example, it could provide Bangko Sentral with a picture of how many days of peak day losses would have been covered by a given VaR estimate.
 - (b) Scenarios requiring a simulation by the bank. Banks should subject their portfolios to a series of simulated stress scenarios and provide Bangko Sentral with the results. These scenarios could include testing the current portfolio against past periods of significant disturbance, for example, the early 80's banking crisis or the 1997 Asian financial crisis, incorporating both the large price movements and the sharp reduction in liquidity associated with these events. A second type of scenario would evaluate the sensitivity of the bank's market risk exposure to changes in the assumptions about volatilities and correlations. Applying this test would require an evaluation of the historical range of variation for volatilities and correlations and evaluation of the bank's current positions against the extreme values of the historical range. Due consideration should be given to the sharp variation that at times has occurred in a matter of days in periods of significant market disturbance.

- (c) Scenarios developed by the bank itself to capture the specific characteristics of its portfolio. A bank should also develop its own stress test which it identifies as most adverse based on the characteristics of its portfolio. It should provide the Bangko Sentral with a description of the methodology used to identify and carry out the scenarios, as well as with the description of the results derived from these scenarios.

The results should be reviewed periodically by senior management and should be reflected in the policies and limits set by management and the board of directors (or equivalent management committee in the case of Philippine branches of foreign banks). Moreover, if a bank's testing reveals particular vulnerability to a given set of circumstances, the Bangko Sentral would expect the bank to take prompt steps to manage those risks appropriately (e.g., by hedging against that outcome or reducing the size of its exposures).

VI. External Validation

13. The validation of models' accuracy by external auditors and the Bangko Sentral should at a minimum include the following steps:
 - (a) Verify that the *internal validation processes* described in Part II, paragraph 6 (h) are operating in a satisfactory manner;
 - (b) Ensure that the *formulae* used in the calculation process, as well as for the pricing of options and other complex instruments, are validated by a qualified unit, which in all cases should be independent from the trading area;
 - (c) Check that the *structure* of internal models is adequate with respect to the bank's activities and geographical coverage;
 - (d) Check the results of the bank's *backtesting* of its internal measurement system (i.e., comparing VaR estimates with actual profits and losses) to ensure that the model provides a reliable measure of potential losses over time. This means that banks should make the results, as well as the underlying inputs to their VaR calculation, available to the Bangko Sentral and/or external auditors on request; and
 - (e) Make sure that data flows and processes associated with the risk measurement system are *transparent and accessible*. In particular, it is necessary that auditors or the Bangko Sentral is in a position to have easy access, whenever they judge it necessary and under appropriate procedures, to the models' specifications and parameters.

VII. Combination of Internal Models and the Standardized Methodology

14. Unless a bank's exposure to a particular risk factor is insignificant, the internal models approach will require banks to have an integrated risk measurement system that captures the broad risk factor categories (i.e., interest rates, exchange rates and equity prices, with related option volatilities being included in each risk factor category). A bank which has developed one or more models will no longer be able to revert to measuring the risk measured by those models according to the standardized methodology (unless the Bangko Sentral withdraws approval for that model).
15. The following conditions will apply to banks using such combinations:
 - (a) Each broad risk factor category must be assessed using a single approach (either internal models or the standardized approach), i.e., no combination of the two (2) methods will be permitted within a risk category or across banks' different entities for the same type of risk;
 - (b) All the criteria laid down in this Annex will apply to the models being used;
 - (c) Banks may not modify the combination of the two (2) approaches they use without justifying to the Bangko Sentral that they have a good reason for doing so;

No element of market risk may escape measurement, i.e., the exposure for all the various risk factors, whether calculated according to the standardized approach or internal models, would have to be captured; and
 - (e) The capital charges assessed under the standardized approach and under the models approach are to be aggregated according to the simple sum method.

MARKET RISK CAPITAL TREATMENT FOR DOLLAR-LINKED PESO NOTES
(Appendix to Section 125 on Market Risk Capital Requirement)

1. *Treatment of interest rate risk.* Dollar-linked Peso Notes (DLPNs) booked under Trading Account Securities (TAS) or Available for Sale Securities (ASS) result in interest rate risk. These exposures shall be included in the report forms in the following manner:
 - *Under the standardized approach.* The market value of the DLPN shall be reported in Part I.1, Item I.1, and Part I.2, US dollar ladder, under the coupon and time band corresponding to the DLPN's residual maturity; and
 - *Under the internal models approach.* DLPN exposures must be included in the computation of Value-at-Risk (VaR) measure for interest rate risk. This VaR measure shall be reported in Part V, Item 1 (for banks with expanded derivatives authority), or Part IV, Item 1 (for banks with expanded derivatives authority but without option transactions and for banks without expanded derivatives authority).
2. *Treatment of foreign exchange risk.* DLPNs booked under TAS, ASS or Investment in Bonds and other Debt Instruments (IBODI) result in foreign exchange risk. These exposures shall be included in the report forms in the following manner:
 - *Under the standardized approach.* The market value of the DLPN shall be included in the computation of the net long/(short) position for US dollar to be reported in Part III; and
 - *Under the internal models approach.* DLPN exposures must be included in the computation of VaR measure for foreign exchange risk. This VaR measure shall be reported in Part V, Item 2 (for banks with expanded derivatives authority), or Part IV, Item 2 (for banks with expanded derivatives authority but without option transactions, and for banks without expanded derivatives authority).

**INSTRUCTIONS FOR ACCOMPLISHING THE REPORT ON COMPUTATION OF THE ADJUSTED
RISK-BASED CAPITAL ADEQUACY RATIO COVERING COMBINED CREDIT RISK AND MARKET RISK
(For Universal Banks and Commercial Banks With Expanded Derivatives Authority)
(Appendix to Sec. 125 on Market risk capital requirement)**

General Instructions

1. All universal banks and commercial banks are required to complete this Report both on a solo basis (i.e., head office plus branches) and on a consolidated basis (i.e., parent bank plus subsidiary financial allied undertakings, but excluding insurance companies).
2. The Report should be submitted as follows:
 - a) Solo report - within fifteen (15) banking days after the end of each reference quarter; and
 - b) Consolidated report - within thirty (30) banking days after the end of each reference quarter.
3. Current market value should be used for reporting. For leveraged instruments where the apparent notional amount differs from the effective notional amount, the bank should use the effective notional amount in calculating the market value for reporting, e.g., a swap contract with a stated notional amount of PHP1.0 million, the terms of which call for a quarterly settlement of the difference between five percent (5%) and PHIBOR multiplied by 10 has an effective notional amount of PHP10.0 million.
4. Securities transactions are to be reported on a "trade date" basis.

Definitions and Clarifications

5. Market risk is defined as the risk of losses in on- and off-balance sheet positions arising from movements in market prices. The risks subject to this reporting requirement are:
 - a) the risks pertaining to interest rate- related instruments and equities in the bank's trading book; and
 - b) foreign exchange risk throughout the bank.

The Report should include the reporting bank's positions in on-balance sheet financial instruments and off-balance sheet derivatives, the latter being defined as financial contracts whose values depend on the values of one or more underlying assets or indices.
6. For the purpose of the Report, the trading book of a bank shall consist of:
 - a) its proprietary positions in financial instruments which are taken on with the intention of short-term resale or benefiting in the short term from actual or expected differences between the buying and selling prices or from other price or interest rate variations;
 - b) positions which arise from the execution of trade orders from customers and market making; and
 - c) positions taken in order to hedge other elements of the trading book.
7. The financial instruments referred to in the preceding paragraph include:
 - a) (i) transferable securities;
 - (ii) units in collective investment undertakings;
 - b) certificates of deposit and other similar capital market instruments;
 - c) financial futures contracts;
 - d) forward contracts including forward rate agreements;
 - e) swaps; and
 - f) options.
8. Banks are expected to have an established policy for allocating transactions (including internal deals) to the trading or non-trading (i.e., banking) book, as well as procedures to ensure compliance with such policy. There must be a clear audit trail at the time each transaction is entered into and the Bangko Sentral will examine the adequacy of such policy and procedures and their consistent implementation when it is considered necessary. For this purpose, banks which engage in trading activities should submit to the Bangko Sentral a policy statement covering:

- a) the definition of trading activities;
 - b) the financial instruments which can be traded or used for hedging the trading book portfolio; and
 - c) the principles for transferring positions between the trading and the banking books.
9. In general, the Bangko Sentral will have regard to the bank's intention in entering into a particular transaction when determining whether such transaction should fall into the trading book. Transactions will likely be considered to carry a trading intent on the part of the bank if:
- a) the positions arising from the transactions are marked to market on a daily basis as part of the internal risk management process;
 - b) the positions are not (or not intended to be) held to maturity; and
 - c) the positions satisfy other criteria the bank applies to its trading portfolio on a consistent basis.
10. Debt securities include both fixed- rate and floating-rate instruments, negotiable certificates of deposit, non-convertible preference shares, and also convertible bonds (i.e., debt issues or preference shares that are convertible, at a stated price, into common shares of the issuer) which trade like debt securities. Debt related derivatives include bond futures and bond options. Options are subject to special treatment described in detail under Part IV of Specific Instructions.
11. Interest rate derivatives include all derivatives contracts and off-balance sheet instruments which react to changes in interest rates, e.g., interest rate futures, forward rate agreements (FRAs), interest rate and cross currency swaps, interest rate options and forward foreign exchange positions. As noted above, the treatment for options is described in Part IV of Specific Instructions.
12. Detailed offsetting rules applicable to the reporting of positions are set out in the relevant parts of Specific Instructions. These offsetting rules can be applied on both the solo and consolidated basis, provided that in the latter case there are no obstacles to the quick repatriation of profits from a foreign subsidiary to the Philippines and the bank performs daily management of risks on a consolidated basis. For this purpose, offsetting means the exclusion of matched positions of a bank from reporting and hence exclusion of such positions from the calculation of the adjusted capital adequacy ratio.
13. For avoidance of doubt, items that are deductible from the qualifying capital of the bank in the calculation of the risk-based capital adequacy ratio under applicable and existing capital adequacy framework are excluded from market risk capital requirement.
14. In general, banks are only required to complete Parts I to IV and VI of the Report. Banks which have obtained the Bangko Sentral's approval to adopt their internal value-at-risk (VaR) models to calculate their market risk capital charge (in all or individual risk categories) should complete Part V (in lieu of Parts I to IV). Where the internal model is used to calculate only selected risk categories, the capital charge for the risk categories measured under the internal models approach should be reported in Part V while that for the other risk categories measured under the standardized approach should be reported in the relevant sections of Parts I to IV. This combination of the standardized approach and the internal models approach is allowed on a transitional basis. Banks which adopt the internal models approach will not be permitted, save in exceptional circumstances, to revert to the standardized approach.

Specific Instructions

Part I Interest Rate Exposures

1. Debt securities and debt related derivatives – specific risk

15. Report in this part the long and short positions in debt securities and debt derivatives (e.g., bond futures and bond options) in the trading book by category of the issuer. Offsetting will be allowed between long and short positions in identical issues (including positions in derivatives) with exactly the same issuer, coupon, currency and maturity. For items 1.4 to 1.7 of the Report, positions should be slotted into the appropriate time bands according to the residual maturities of the debt securities (or the underlying securities in case of debt derivatives). (Refer to examples (1) and (2) in Annex A).
16. A security, which is the subject of a repurchase agreement, will be treated as if it were still owned by the seller of the security, i.e., to be reported by the seller. This principle applies also in Part 1.2 of the Report. Commitments to buy and sell securities should be reported as long and short positions, respectively.

17. Foreign countries, foreign incorporated banks and Philippine incorporated banks/QBs with the “highest credit quality”, as well as debt securities with the “highest credit quality” refer to rates/debt securities given the minimum credit ratings as indicated below by any two of the following internationally accepted rating agencies:

<u>Rating Agency</u>	<u>Credit Rating</u>
(a) Moody’s	“Aa3” and above
(b) Standard and Poor’s	“AA-” and above
(c) Fitch IBCA	“AA-” and above

and such other recognized international rating agencies as may be approved by the Monetary Board.

The ratings of domestic rating agencies may likewise be used for this purpose provided that such rating agencies meet the criteria to be prescribed by the Monetary Board.

18. Multilateral development banks refer to the World Bank Group comprised of the International Bank for Reconstruction and Development (IBRD) and the International Finance Corporation (IFC), the Asian Development Bank (ADB), the African Development Bank (AfDB), the European Bank for Reconstruction and Development (EBRD), the Inter-American Development Bank (IADB), the European Investment Bank (EIB); the Nordic Investment Bank (NIB); the Caribbean Development Bank (CDB), the Council of Europe Development Bank (CEDB) and such others as may be recognized by the Bangko Sentral.
19. Non-central government public sector entities of a foreign country refer to entities which are regarded as such by a recognized banking supervisory authority in the country in which they are incorporated.

2. Debt securities, debt related derivatives and interest rate derivatives – general market risk

20. Report in this part the long and short trading book positions in debt securities and debt derivatives described above, as well as interest rate derivatives. Report also interest rate exposures arising from futures contracts and forward positions in equities. A Maturity Method is adopted for the reporting of these positions as detailed below. Banks that possess the necessary capability to calculate the duration and price sensitivity of each position separately and wish to adopt such a duration approach for reporting in this part may seek approval from Bangko Sentral.
21. Positions should be reported separately for each currency, i.e., banks should use separate sheets (Part I.2 of the Report) to report positions of different currencies. The unadjusted market risk capital charge is then calculated for each currency according to procedures set out in paragraphs 31 to 34 with no offsetting between different currencies.
22. Under the Maturity Method, positions are slotted into the time bands of the maturity ladder (as shown in Part I.2 of the Report) by remaining maturity if fixed rate and by the period to the next repricing date if floating rate. (Refer to examples (1) and (2) in Annex A). Derivatives should be treated as combinations of long and short positions. The maturity of an interest rate future or a forward rate agreement will be the period until delivery or exercise of the contract, plus – where applicable – the life of the underlying instrument. For example, a long position in a June 3-month interest rate future taken in December is to be reported at end of December as a long position in a zero coupon government security in that particular currency with a maturity of 9 months and a short position in a zero coupon government security with a maturity of 6 months. (Refer to examples (5) and (6) in Annex A). The market values of the two positions should be reported. For forward foreign exchange positions in the trading book, they should be treated as long and as short positions in a zero coupon government security of the 2 currencies with the same maturity as the forward contract. (Refer to example (8) in Annex A).
23. For a bond future, where a range of deliverable instruments may be delivered to fulfill the contract, the bank has flexibility to elect which deliverable security goes into the maturity ladder but should take account of any conversion factor defined by the exchange. A two-leg approach will be adopted similar to the above. A long bond future will be taken as a long position in a deliverable bond and a short position in a zero coupon security maturing at the future’s delivery date. For example, a long futures contract on a 5 year fixed rate security with delivery 3 months from the reporting date will be reported as a long position in say, a 5.25 year security, i.e., a specific security which is within the range of deliverables under the futures contract (as opposed to a notional/theoretical security), and a short position in a 3 months zero coupon security. (Refer to example (3) in Annex A).

The amount to be reported in the above example for both legs will be the contract face value divided by the relevant conversion factor and multiplied by the current cash price of the selected deliverable bond. A forward bond transaction (i.e., with a settlement period longer than the market norm) will be treated similarly, i.e., a long bond forward will be reported as long position in the bond and a short position in a zero coupon security up to the forward delivery date. The current market value (at spot price) of the bond should be reported.

24. Swaps will be treated as two positions in securities with the relevant maturities. For example, an interest rate swap under which a bank is receiving floating rate interest and paying fixed will be treated as a long position in a floating rate instrument of maturity equivalent to the period until the next interest fixing and a short position in a fixed-rate instrument of maturity equivalent to the residual life of the swap. The market values of the 2 instruments should be reported. (Refer to example (4) in Annex A). For swaps that pay or receive a fixed or floating interest rate against some other reference price, e.g., an equity price, the interest rate component should be slotted into the appropriate maturity category, with the equity component being included in the equity framework. The separate legs of cross-currency swaps are to be reported in the relevant maturity ladders for the currencies concerned. (Refer to example (12) in Annex A).
25. As with the reporting under Part I.1 of the Report, banks can offset long and short positions in identical instruments with exactly the same issuer, coupon, currency and maturity for general market risk purposes. Similarly, a matched position in a futures or forward contract and its underlying may be fully offset. However, the leg representing the time to expiry of the futures or forward contract should be reported.

For example, a bank has a long position in a particular bond and sells forward (i.e., beyond the normal settlement period for the security) such a bond as at the reporting date. The long and short positions in the bond can be offset but a long position in a (notional) zero coupon security with maturity at the forward delivery date should be reported, at the current market value of the bond. Similarly, if the bank has a short position in a bond future and a long position in the underlying bond, such positions can be offset. A long position up to the future's delivery date should, however, be reported.

When the futures contract comprises a range of deliverable instruments, offsetting of positions in the futures contract and its underlying is only permissible in cases where there is a readily identifiable underlying security which is most profitable for the trader with a short position to deliver, i.e., the "cheapest to deliver". This means that offsetting is only permitted between a short future and a long bond, not between a long future and a short bond; and the long bond must be the one that is "cheapest to deliver". The amount to be reported for the remaining long position up to the futures contract's delivery date will be the face value of the contract divided by the relevant conversion factor and multiplied by the current spot price of the "cheapest to deliver" bond.

26. Opposite positions in the same category of derivatives instruments (including the delta-equivalent value of options where the delta-plus approach for options is adopted – see Part IV of the Report) can in certain circumstances be regarded as matched and allowed to offset fully. The separate legs of different swaps may also be "matched" subject to the same conditions. To qualify for this treatment, the positions must relate to the same underlying instruments, be of the same nominal value and be denominated in the same currency. In addition:
- a) for futures: offsetting positions in the notional or underlying instruments to which the futures contract relates must be for identical products and mature within 7 days of each other;
 - b) for swaps and forward rate agreements (FRAs): the reference rate (for floating rate positions) must be identical and the coupon closely matched (i.e., within 15 basis points); and
 - c) for swaps, FRAs and forwards: the next interest fixing date or, for fixed coupon positions or forwards, the residual maturity must correspond within the following limits:
 - if either of the instruments for offsetting has an interest fixing date or residual maturity up to 1 month, the interest fixing date or residual maturity must be the same for both instruments;
 - if either of the instruments for offsetting has an interest fixing date or residual maturity greater than 1 month and up to 1 year, those dates or residual maturities must be within 7 days of each other; and
 - if either of the instruments for offsetting has an interest fixing date or residual maturity over 1 year, those dates or residual maturities must be within 30 days of each other.

For example, a bought and a sold FRA in the same currency with the same face value and settlement date as well as notional deposit maturity date can be offset against each other and excluded from reporting if the contract rates are within 15 basis points of each other. Similarly, opposite swap positions in the same currency with the same face value and reference dates can be offset if, say, the floating rate in both cases is 6 months PHIBOR and the fixed rates are within 15 basis points of each other. The positions can still be offset if the reference dates (i.e., the next interest fixing date or remaining maturity) of the opposite positions are different but within the range as set out in (c) above. Opposite bond futures can, for example, be offset against each other if the deliverable bonds are of the same type and mature within 7 days of each other.

27. Banks with the necessary expertise and systems may use alternative formulae (the so called "pre-processing" techniques) to calculate the positions to be included in the maturity ladder. This applies to all interest rate sensitive positions, arising from both physical and derivative instruments. One method is to first convert the payments required under each transaction into their present values. For that purpose, each cash flow should be

discounted using zero-coupon yields. A single net figure of all of the cash flows within each time band may be reported. Banks wishing to adopt this or other methods for reporting should seek the Bangko Sentral's prior approval. The "pre-processing" models would be subject to review by the Bangko Sentral.

Calculation of capital charges for interest rate exposures reported in Part I

28. The unadjusted minimum capital requirement is expressed in terms of two separately calculated charges, one applying to the "specific risk" of each trading book position in debt securities or debt derivatives, whether it is a short or long position, and the other to the overall interest rate risk in the trading book portfolio (termed "general market risk") where long and short positions in different securities or derivatives can be offset subject to certain "disallowances".

Specific risk

29. The unadjusted specific risk charge is graduated into five broad categories by types of issuer, as follows:

Government and multilateral banks ¹	0.00%
Qualifying ²	.25% (residual maturity of 6 months or less)
	1.00% (residual maturity of over 6 months to 24 months)
	1.60% (residual maturity of over 24 months)
LGU bonds ³	4.00%
Others	8.00%

30. Interest rate and currency swaps, FRAs, forward foreign exchange contracts and interest rate futures will not be subject to a specific risk charge. In the case of futures contracts where the underlying is a debt security, a specific risk charge will apply according to the issuer (and the remaining maturity) as set out in the above paragraph.

General market risk

31. General market risk General market risk applies to positions in all debt securities, debt derivatives and interest rate derivatives, subject only to an exemption for fully or very closely matched positions in identical instruments as described in paragraphs 25 to 26 above. The unadjusted capital charge is the sum of the following components:
- a) the net short or long weighted position in the whole trading book;
 - b) a small proportion of the matched positions in each time band (the "vertical disallowance"); and
 - c) a larger proportion of the matched positions across different time-bands (the "horizontal disallowance").
32. In the maturity ladder, first calculate the weighted positions by multiplying the positions reported in each time band by a risk-factor according to the following table:

Table 1
Maturity method: time bands and weights

Coupon 3% or more	Coupon less than 3%	Risk weight
1 month or less	1 month or less	0.00%
Over 1 month to 3 months	Over 1 month to 3 months	0.20%
Over 3 months to 6 months	Over 3 months to 6 months	0.40%
Over 6 months to 12 months	Over 6 months to 12 months	0.70%
Over 1 to 2 years	Over 1.0 year to 1.9 years	1.25%
Over 2 years to 3 years	Over 1.9 years to 2.8 years	1.75%
Over 3 years to 4 years	Over 2.8 years to 3.6 years	2.25%
Over 4 years to 5 years	Over 3.6 years to 4.3 years	2.75%
Over 5 years to 7 years	Over 4.3 years to 5.7 years	3.25%
Over 7 years to 10 years	Over 5.7 years to 7.3 years	3.75%
Over 10 years to 15 years	Over 7.3 years to 9.3 years	4.5%
Over 15 years to 20 years	Over 9.3 years to 10.6 years	5.25%
Over 20 years	Over 10.6 years to 12 years	6.00%
	Over 12 years to 20 years	8.00%
	Over 20 years	12.50%

¹ "Government and multilateral development banks" refers to the issuers as described under items 1.1 and 1.3 in Part I.1 of the Report.

² "Qualifying" refers to the issuers/issues as described under items 1.4 to 1.7 in Part I.1 of the Report.

³ "LGU bonds" refers to bonds issued by local government units (LGUs), covered by Deed of Assignment of Internal Revenue Allotment of the LGU and guaranteed by LGU Guarantee Corporation.

33. The weighted longs and shorts in each time band will be offset resulting in a single short or long position for each band. A 10% capital charge ("vertical disallowance") will be levied on the smaller of the offsetting positions, be it long or short. Thus, if the sum of the weighted longs in a time band is P100.0 million and the sum of the weighted shorts is PHP90.0 million, the vertical disallowance would be 10% of PHP90.0 million (i.e., PHP9.0 million).
34. Two rounds of "horizontal offsetting" will then be conducted, first between the net positions in each of 3 zones (zero to 1 year, over 1 year to 4 years and over 4 years), and subsequently between the net positions in the 3 different zones. The offsetting will be subject to a scale of disallowances expressed as a fraction of the matched positions, as set out in Table 2 below. The weighted long and short positions in each of 3 zones may be offset, subject to the matched portion attracting a disallowance factor that is part of the capital charge. The residual net position in each zone may be carried over and offset against opposite positions in other zones, subject to a second set of disallowance factors.

Table 2
Horizontal disallowances

Horizontal disallowances				
Zones	Time-Band	Within the zone	Between adjacent zones	Between zones 1 and 3
Zone 1	1 month or less	40%	40%	100%
	Over 1 month to 3 months			
	Over 3 months to 6 months			
	Over 6 months to 12 months			
Zone 2	Over 1 year to 2 years	30%		
	Over 2 years to 3 years			
	Over 3 years to 4 years			
Zone 3	Over 4 years to 5 years	30%		
	Over 5 years to 7 years			
	Over 7 years to 10 years			
	Over 10 years to 15 years			
	Over 15 years to 20 years			
	Over 20 years			

Part II Equity Exposures

35. Report in this part the long and short positions in equities and equity derivatives in the trading book, including instruments that exhibit market behavior similar to equities. The instruments covered include common stock (whether voting or non-voting), convertible bonds (i.e., debt issues or preference shares that are convertible, at a stated price, into common shares of the issuer) which trade like equities and commitments to buy or sell equity securities. For non-convertible preference shares and those convertible bonds which trade like debt securities, they should be reported under Part I. Equity derivatives include forwards, futures and swaps on both individual equities and or stock indices. Options should be included subject to the specific instructions set out in Part IV. Long and short positions in the same issue may be reported on a net basis.
36. The positions are to be reported on a market-by-market basis, i.e., under separate columns to indicate the exchange where the reported equities are listed/traded. For foreign markets, banks should indicate the country where the market is located. (Refer to example (9) in Annex A) Equities with listing in more than one market should be reported as positions in the market of their primary listing.
37. Equity derivatives are to be converted into positions in the relevant underlying. Futures and forward contracts relating to an individual equity should be reported at current market values. Futures relating to equity indices can be reported either as the current index value times the monetary value of one index point set by the exchange, i.e., the "tick" value, or the marked-to-market value of the notional underlying equity portfolio. (Refer to example (11) in Annex A).
38. Matched positions in each identical equity or index (same delivery months) in each market may be fully offset, resulting in a single net short or long position. A future in a given equity may be offset against an opposite cash position in the same equity but the interest rate exposure arising out of the equity futures should be reported in Part I. For example, a short futures contract on a specific stock with delivery 3 months from the reporting date can be offset against a long position in the underlying stock. However, the interest rate exposure arising out of the equity futures should be reported as a long position in the "1 to 3 months" time band of the stock denominated currency in Part I. The position should be reported as the current market value of the stock.

39. An equity swap obligates a bank to receive an amount based on the change in value of a particular equity or equity index and also to pay an amount based on the change in value of a different equity or equity index. Accordingly, the receipt side and the payment side of an equity swap contract should be reported as a long and a short position, respectively. For an equity swap contract which involves a leg relating to a financial instrument other than equities or equity derivatives, for example, receiving/paying a fixed or floating interest rate, the exposure should be slotted into the appropriate maturity band in Part I. Where equities are part of a forward contract (equities to be received or to be delivered), any interest rate exposure from the other leg of the contract should be reported in Part I. The treatment is similar to that set out in paragraph 38. The same arrangement applies for index futures. (Refer to example (11) in Annex A).
40. As with interest rate exposures, the capital charge is levied to separately cover both the specific risk and the general market risk. Calculation is done on an individual market basis. The unadjusted capital charge for specific risk will be 8% on the gross (i.e., long plus short) positions. The unadjusted general market risk charge will be 8% on the net position. Net long and short positions in different markets cannot be offset for the purpose of calculating general market risk charge.

Part III Foreign Exchange Exposures

41. Report in this part the amount in US dollars (USD) of net long or net short position in each currency. The net delta- based equivalent of foreign currency options should also be reported for each currency, subject to the specific instructions in Part IV. In addition, structural positions taken deliberately to hedge against the effects of exchange rate movements on the capital adequacy of the reporting bank may be excluded. This should be cleared with the Bangko Sentral prior to reporting.
42. Net long/(short) position shall refer to FX assets (excluding FX items allowed under existing regulations to be excluded from FX assets in the computation of a bank's net FX position limits) less FX liabilities (excluding FX items allowed under existing regulations to be excluded from FX liabilities in the computation of a bank's net FX position limits), plus contingent FX assets less contingent FX liabilities, including net delta weighted long/ (short) position of options (subject to a separately calculated capital charge for gamma and vega described in Part IV.2). Alternatively, if the bank engages in purchase of options only, the options shall be carved out and reported under Part IV.1. Delta-weighted long and short positions refer to potential purchases and sales of the underlying, respectively. For example, a short put option carries a potential purchase of the underlying, thus will be treated as a long delta-weighted position.
43. Banks which base their normal management accounting of forward currency positions on net present values shall use the net present values of each position, discounted using current interest rates, for measuring their positions. Otherwise, forward currency positions shall be measured based on notional amount.
44. The total USD amount of net long or net short position in each currency should then be converted at spot rates into Philippine peso. The overall net open position is the greater of the absolute value of the sum of net long position or sum of net short position.
45. The unadjusted capital charge will be 8% of the overall net open position.

Part IV Options

46. Report in this part the positions of option contracts which are related to the risk categories reported in Parts I to III, using either the Simplified Approach or the Delta Plus Approach.

1. For banks that purchase options only – Simplified Approach

47. Banks will be considered to be engaging only in purchase of options if at any time all their written option positions (if any) are hedged by perfectly matched long positions in exactly the same options. In this case such perfectly matched options need not be reported and only the outstanding long (purchased) options are covered by the following approach.
48. Treatments for purchased options with and without related cash positions are summarized in Table 3 below. The capital charge should be calculated separately for each individual option (together with the related cash position). Banks should then report the sum of the capital charges calculated.

Table 3
Simplified approach: capital charge for purchased options only

Short cash and Long call or Long cash and Long put	The capital charge will be the market value of the underlying of the option multiplied by the sum of specific and general market risk charges for the underlying less the amount the option is in the money (if any) with the reduced capital charge bounded at zero ¹ (Refer to example (10) in Annex A).
Long call or Long put	The capital charge will be the lesser of: a. the market value of the underlying of the option multiplied by the sum of specific and general market risk charges for the underlying; and b. the market value of the option ²

49. The market risk capital charges to be applied for the purpose of the above paragraph are indicated in Table 4 below:

Table 4

Underlying	Specific risk charge	General market risk charge
Debt instrument ³		As per the risk weights in Table 1, according to the residual maturity (fixed rate) or next repricing (floating rate)
Government and multi-lateral development banks	0.00%	
Qualifying (with residual rate maturity)		
6 months or less	0.25%	
Over 6 months to 24 months	1.00%	
Over 24 months	1.60%	
LGU bonds	4.00%	
Others	8.0%	
Interest rate (non-debt related)	0.00%	
Equity	8.00%	8.00%
Foreign Exchange	0.00%	8.00%

50. In some cases, such as foreign exchange where it may be unclear which currency is the “underlying” of the option, this should be taken to be the asset which would be received if the option is exercised. In addition, the nominal value should be used for items where the market value of the underlying instrument could be zero, e.g., caps and floors as well as swaptions.

2. For banks that write options – Delta Plus Approach

51. Banks that write options (apart from those described in paragraph 47) should report in Parts I to III the relevant delta- weighted positions of all their outstanding options, i.e., the market value of the underlying of the option multiplied by the option delta. The relevant negative gamma and vega sensitivities of these options should be reported in Parts IV.2(a) to IV.2(c) of the Report in order to capture the delta sensitivity and volatility risk of these options. Banks wishing to adopt alternate treatments for their options such as a scenario approach should seek prior approval from the Bangko Sentral.
52. Delta-weighted option positions with debt securities or interest rates as the underlying will be slotted into the interest rate time bands, as set out in Part I.2 of the Report. A two-legged approach should be used as for other derivatives, requiring one entry at the time the underlying contract takes effect and a second at the time the underlying contract matures. In other words the reporting mechanism would be the same as those for the positions in the underlying instruments of the options as presented in Parts I to III, except that the market value of the underlying instruments will be adjusted by the delta ratios of the relevant options for reporting under this approach. For instance:
- a) A bought call option on a June 3- month interest-rate future will in March be considered, on the basis of its delta- equivalent value, to be a long position with a maturity of 6 months and a short position with a maturity of 3 months. The written option will similarly be slotted as a long position with a maturity of three (3) months and a short position with a maturity of six (6) months.

¹ For options with a residual maturity of more than 6 months, the strike price should be compared with the forward, not current, price. A bank unable to do this must take the in the money amount to be zero.

² Where the position does not fall within the trading book (i.e., options on certain foreign exchange position not belonging to the trading book), it is acceptable to use the book value instead.

³ Issuer/Issues classifications as per Part I.1 of the Report.

- b) A 2-month purchased call option on a bond future where delivery of the bond takes place in September would be considered in March as being long the deliverable bond and short a 6-month government security in the same currency, both positions being delta-weighted.
 - c) Floating rate instruments with caps or floors will be treated as a combination of floating rate securities and a series of European-style options, e.g., the holder of 2- year floating rate security indexed to 6 month LIBOR with a cap of 8% will treat it as:
 - i. a debt security that reprices in 6 months; and
 - ii. a series of 3 written call options on a FRA with a reference rate of 8%, each with a negative sign at the time the underlying FRA takes effect and a positive sign at the time the underlying FRA matures. (The rules applying to closely matched positions set out in paragraph 26 will also apply in this respect.) (Refer to example (7) in Annex A).
53. The reporting of options with equities as the underlying will also be based on the delta-weighted positions which will be incorporated in Part II of the Report. For purposes of this calculation, each national market is to be treated as a separate underlying. For options on foreign exchange position, the net delta-based equivalent of the foreign currency options will be incorporated into the measurement of the exposure for the respective currency position. These delta positions will be reported in Part III of the Report.
54. The net negative gamma positions and vega positions of all outstanding options (purchased or written) should also be reported in Part IV.2. This is in addition to the delta positions being reported in Parts I to III.
55. The net negative gamma positions should be reported in the following way:
- a) for each individual option, a “gamma impact” should be calculated by the following formula:

$$\text{Gamma impact} = \frac{1}{2} \times \text{Gamma} \times \text{VU}^2$$

where VU = Variation of the underlying of the option.
 - b) VU will be calculated as follows:
 - for debt and interest rate options of which the delta-equivalent position is reported in Part I, the market value of the underlying or notional underlying multiplied by the risk weights for the appropriate time bands set out in Table 1;
 - for options on equities and equity indices, the market value of the underlying multiplied by 8%; and
 - for options on foreign exchange, the market value of the underlying multiplied by 8%.
 - c) For the purpose of this calculation the following positions should be treated as the same underlying:
 - for interest rate instruments, each time band as set out in Table 1;
 - for equities and equity indices, each national market; and
 - for foreign currencies, each currency pair.

Banks with options relating to more underlyings than the space provided should report their positions in additional sheets.
 - d) Each option on the same underlying will have a gamma impact that is either positive or negative. These individual gamma impacts will be summed, resulting in a net gamma impact for each underlying that is either positive or negative. Only those net gamma impacts that are negative should be reported.
56. The vega charge should be reported in the following way:
- a) The vega positions should represent the risk in a proportional shift in volatility of +25% for the underlying. For example, an increase in volatility carries a risk of loss for a short option of which the assumed current (implied) volatility is 20%. With a proportional shift of 25%, the vega position has to be calculated on the basis of an increase in volatility of 5 percentage points from 20% to 25%. If the vega is calculated as 1.68, i.e., a 1% increase in volatility increases the value of the option by 1.68, then the above change in volatility of 5 percentage points will increase the value of the option by 8.4 (1.68 x 5) which represents the vega position to be reported.

- b) Each option on the same underlying will have a vega position that is either positive or negative. These individual vega positions will be summed, resulting in a net vega position for each underlying that is either positive or negative. The total vega charge will be the sum of the absolute values of the net vega positions obtained for each underlying.

Part V Internal Models Approach

57. Only those banks which have obtained the Bangko Sentral's approval to adopt their internal value-at-risk (VaR) models to calculate their market risk capital charges in lieu of the standardized methodology are required to report in this part.

1. Value-at-risk results

58. Report in this part the value-at-risk (VaR) results as at the last trading day of the reference quarter in column (a) and the average VaR over the most recent 60 trading days of the reference quarter in column (b), both for each individual market risk category using internal models approach, i.e., item 1.1 to 1.3, and for the aggregate of these risk categories, i.e., item 1.4.
59. Provided that the Bangko Sentral is satisfied with the bank's system for measuring correlations, recognition of empirical correlations across broad risk categories (e.g., interest rates, equity prices and exchange rates, including related options volatilities in each risk factor category) may be allowed. The VaR for the aggregate of all risk categories will therefore not necessarily be equal to an arithmetic sum of the VaR for the individual risk category.
60. Report also in this part the number of backtesting exceptions for the past 250 trading days (from the reference quarter-end going backwards), based on:
- actual daily changes in portfolio value, in item 1.4. column (c), and
 - hypothetical changes in portfolio value that would occur were end-of-day positions to remain unchanged during the 1 day holding period, in item 1.4 column (d),
- for the aggregate of the broad risk categories.
61. The multiplication factor to be reported in item 1.4 column (e) is the summation of the following 3 elements:
- a) the minimum multiplication factor of 3;
 - b) the "plus" factor ranging from 0 to 1 based on the number of backtesting exceptions (i.e., the larger of item 1.4 column (c) or item 1.4 column (d)) for the past 250 trading days as set out in Table 5 below: and
 - c) any additional "plus" factor as may be prescribed by the Bangko Sentral.

Table 5
"Plus" factor based on the number of backtesting exceptions for the past 250 trading days

Zone	Number of exceptions	"Plus" factor
Green Zone	0	0.00
	1	0.00
	2	0.00
	3	0.00
	4	0.00
Yellow Zone	5	0.40
	6	0.50
	7	0.65
	8	0.75
	9	0.85
Red Zone	10 or more	1.00

62. Capital charge for general market risk calculated by internal models reported in item 1.6 is larger of:
- a) Item 1.4 column (a), i.e., VaR for the aggregate of all risk categories, as at the last trading day of the reference quarter; or
 - b) Item 1.5, i.e., the average VaR for the last 60 trading days of the reference quarter [item 1.4 column (b)] times the multiplication factor [item 1.4 column (e)] set out in paragraph 61 above.

2. Specific risk

63. Capital charge for the specific risk of debt securities and other debt related derivatives, and equities and equity derivatives is to be reported using either of the following two methods:

- a) For banks which incorporate the specific risk into their models, report the capital charge for the total specific risk calculated by the models in item 1.7 of Part V.1; or
- b) For banks which do not incorporate the specific risk into their models, report the specific risk of debt securities and other debt related derivatives in Part I.1 according to the instructions in paragraphs 15-19 and 29-30. For equities and equity derivatives, report the specific risk in Part II according to the instructions in paragraphs 35 to 40.

3. Largest daily losses over the quarter

64. Report in this part in descending order (i.e., the largest loss first) the 5 largest daily losses over the reference quarter and their respective VaRs for the risk exposures which are measured by the internal models approach. If the number of daily losses during the quarter is less than 5, report only all such daily losses.

Part VI Adjusted Capital Adequacy Ratio

65. The market risk capital charges should be aggregated and converted to a market risk-weighted exposure. The total market risk capital charges is the sum of the capital charges for individual market risk categories computed using either (a) the standardized approach, or (b) the internal models approach. The total capital charges for individual market risk categories using the standardized approach should be multiplied by 125% (to be consistent with the higher capital charge for credit risk, i.e., ten percent (10%) as opposed to the BIS recommended eight percent (8%).

66. The total market risk-weighted exposure is computed by multiplying the total market risk capital charges by 10. (The multiplier 10 is the reciprocal of the Bangko Sentral required minimum capital ratio for credit risk of 10%). The qualifying capital and total credit risk-weighted exposures are extracted from Part V.A and Part V.B, respectively, of the Report on the Computation of Risk-Based Capital Adequacy Ratio covering credit risk.

67. For on-balance-sheet debt securities and equities in the trading book included in Parts I, II and V of this Report, the credit risk-weighted exposures reported in Part II of the Report on the Computation of the Risk-Based Capital Adequacy Ratio covering credit risk should be excluded in calculating the adjusted ratio covering combined credit risk and market risk. The market risk capital charges for these positions calculated in this Report cover all the capital requirements for absorbing potential losses arising from carrying such positions.

(Circular No. 890 dated 02 November 2015)

Suppose as at 31 December, 200X, ABC Bank Corporation has the following trading book positions:

1. Long position in US Treasury Bond (7.5% annual coupon) with face value equivalent to PHP507.000MM and residual maturity of 8 years. Market value based on quoted price: PHP518.914MM equivalent
2. Long position in an unrated floating rate note (6.25% current annual coupon) issued by a US corporate with face value equivalent of PHP260.000MM and next repricing 9 months after. Market value based on quoted price: PHP264.758MM equivalent
3. Long 10 futures contracts involving 5-year US Treasury Note (face value USD0.100MM per contract) for delivery 3 months after. Selected deliverable: US Treasury Note (coupon 6.375%) maturing 5.25 years, current price at 100.0625, conversion factor 0.9423.
4. Single currency interest rate swap with face value PHP975.000MM and residual maturity of 2.5 years, bank receives annual floating rate interest and pays fixed at 8% per annum. The current floating rate is fixed at 5.5% with next repricing after 6 months.
5. Long 10 futures contracts involving 3-month LIBOR interest rate (face value GBP6.500MM per contract) for delivery 6 months after.
6. An FRA sold on 6-month PHIBOR with nominal amount PHP130.000MM and settlement date 9 months after.
7. A GBP2.000MM 2 year cap written on GBP 6 month LIBOR at cap rate 8%, next repricing after 6 months and remaining maturity 2 years (i.e., the cap is written on the reporting date).
8. Forward foreign exchange position of EUR5.000MM (long) against PHP250.000MM equivalent maturing in 3 months.
9. Long 1000 shares of a US listed company with current market price of PHP715.000MM equivalent.
10. Long 50,000 shares of a Philippine listed company hedged by a long position in 25 put option contracts (each contract represents 1,000 shares) for the same share. The current market price for the share is PHP195.00 and the exercise price of all the option contracts is PHP214.50.
11. Short one Hang Seng Index Futures for delivery 3 months after, current index at 10,000.
12. Currency swap with residual maturity of 6 months. Bank receives USD19.500MM at 9.5% per annum and pays PHP975.000MM at 11% per annum.

Treatments:

1. Report market value (PHP518.914MM) of the long position in Part I.1, item I.2 and Part I.2, USD ladder, 7 to 10 years time band.
2. Report market value (PHP264.758MM) of the long position in Part I.1, item 1.9 and Part I.2, USD ladder, 6 to 12 months time band.
3. Report selected Treasury Note (long position) in Part I.1, item I.2 and Part I.2, USD ladder, 5 to 7 year time band. Report the same amount in short position, 1 to 3 months time band.

Assume spot exchange rate PHP50.00

Amount to be reported:

USD0.100MM x 10 x 100.0625%/0.9423
= USD1.062MM

= P53.095MM

4. Report the fixed rate leg as a short 2.5-year bond in Part I.2, Peso ladder, 2 to 3 years time band. Report the floating rate leg as a long 6 months security in the 3 to 6 months time band.

Assume the Peso zero coupon yields are as follows:

Period	Zero Coupon (ZC)
1M	5.31
3M	5.63
6M	5.81
1Y	6.16
2Y	6.69
3Y	7.07

(Zero coupon yields within 1 year can be taken as cash rates, i.e., PHIBOR, zero coupon yields beyond 1 year can be constructed from, say, swap rates.)

Cash flows of Peso swap: 2 legs

Pay – fixed rate bond

8% of PHP975.000MM in 6 months

8% of PHP975.000MM in 18 months

108% of PHP975.000MM in 30 months

Receive – floating rate paper

105.5% of PHP975.000MM in 6 months

Zero-coupon rates at 18 months can be obtained from the linear interpolation between the 1Y and 2Y zero coupon rates.

$$\text{ZC (18 months)} = (6.16\% + 6.69\%)/2 = 6.425\%$$

Similarly,

$$\text{ZC (30 months)} = (6.69\% + 7.07\%)/2 = 6.88\%$$

PV of the fixed leg (i.e., pay side)

$$= \text{PHP975.000MM} \times \frac{0.08}{(1+0.0581 \times 0.5)} + \frac{0.08 + 1.08}{(1+0.06425)^{1.5}} + \frac{1.08}{(1+0.0688)^{2.5}}$$

$$= \text{PHP1,038.479MM}$$

PV of the floating leg (i.e. receive side)

$$= \text{PHP975.000MM} \times \frac{1.055}{(1+0.0581 \times 0.5)}$$

$$= \text{PHP999.587MM}$$

- Report a long 9 months zero coupon security in Part I.2, GBP ladder, 6 to 12 months time band and a short 6 months zero coupon security in 3 to 6 months time band.

Assume the GBP 6 months zero-coupon yield is 6.74% while the interpolated 9 months zero-coupon yield is 6.87%.

Assume spot exchange rate is PHP75.00.

Amount to be reported:

$$\begin{aligned} \text{9 months} &= \text{GBP65.000MM} / (1+0.0687 \times 0.75) \\ &= \text{GBP65.000MM} \times 0.951 \\ &= \text{PHP4,636.124MM equivalent} \end{aligned}$$

$$\begin{aligned} \text{6 months} &= \text{GBP65.000MM} / (1+0.0674 \times 0.5) \\ &= \text{GBP65.000MM} \times 0.9674 \\ &= \text{PHP4,716.069MM equivalent} \end{aligned}$$

6. Report a long 15 months zero coupon security in Part I.2, Peso ladder, 1.0 to 1.9 years time band and a short 9 months zero coupon security in 6 to 12 months time band.

Calculations similar to (4) above,

$$\begin{aligned}\text{ZC (15 months)} &= 6.16\% + (6.69\% - 6.16\%) \times 0.25 \\ &= 6.2925\%\end{aligned}$$

$$\begin{aligned}\text{15 months} &= \text{PHP}130.000\text{MM} (1 + 0.062925)^{1.25} \\ &= \text{PHP}121.000\text{MM}\end{aligned}$$

$$\begin{aligned}\text{9 months} &= \text{PHP}130.000\text{MM} \times 0.957 \\ &= \text{PHP}124.410\text{MM}\end{aligned}$$

7. Report the cap as 3 written call options on 6-month FRA, i.e., 6 against 12, 12 against 18 and 18 against 24. (The rate for the first 6 months is already set on the reporting date, i.e., the option already expires.)

Assume the delta ratios of the options are:

6 against 12	0.055
12 against 18	0.17
18 against 24	0.225

Assume the discounting factors are:

6 months	0.09674
12 month	0.9346
18 month	0.9009
24 month	0.8673

Assume spot exchange rate is PHP75.00

Report in Part I.2 GBP ladder:

For the first option –

$$\begin{aligned}&\text{A long position in the 6 to 12 months time band} \\ &= \text{GBP}2.000\text{MM} \times 0.055 \times 0.9346 \\ &= \text{PHP}7.710\text{MM equivalent}\end{aligned}$$

A short position in the 3 to 6 months time band

$$\begin{aligned}&= \text{GBP}2.000\text{MM} \times 0.055 \times 0.9674 \\ &= \text{PHP}7.981\text{MM equivalent}\end{aligned}$$

For the second option –

$$\begin{aligned}&\text{A long position in the 1.0 to 1.9 years time band} \\ &= \text{GBP}2.000\text{MM} \times 0.17 \times 0.9009 \\ &= \text{PHP}22.973\text{MM equivalent}\end{aligned}$$

A short position in the 6 to 12 months time band

$$\begin{aligned}&= \text{GBP}2.000\text{MM} \times 0.17 \times 0.9346 \\ &= \text{PHP}23.832\text{MM equivalent}\end{aligned}$$

For the third option –

$$\begin{aligned}&\text{A long position in the 1.9 to 2.8 years time band} \\ &= \text{GBP}2.000\text{MM} \times 0.225 \times 0.8673 \\ &= \text{PHP}29.271\text{MM equivalent}\end{aligned}$$

A short position in the 1.0 to 1.9 years time band

$$\begin{aligned}&= \text{GBP}2.000\text{MM} \times 0.225 \times 0.9009 \\ &= \text{PHP}30.405\text{MM equivalent}\end{aligned}$$

(For simplicity, gamma and vega positions are not presented in this example.)

8. Report a long 3 months zero coupon security in Part I.2, EUR ladder, 1 to 3 months time band and a short 3 months Calculation similar to (4) above and assume 3 months EUR cash rate at 3.25% and spot exchange rate is PHP46.00.

$$\begin{aligned}\text{EUR} &= \text{EUR}5.000\text{MM}/(1 + 0.0325 \times 0.25) \\ &= \text{PHP}228.146\text{MM equivalent} \\ \text{PHP} &= \text{PHP}250.000\text{MM}/(1 + 0.0563 \times 0.25) \\ &= \text{PHP}246.530\text{MM}\end{aligned}$$

(For simplicity, Part III of the report is not presented in this example.)

9. Report market value in Part II, item 1 (US column).
10. Report as a long position the market value for 25,000 shares (PHP4.875MM) in Part II, Item 1 (Philippine column).

Report 25,000 shares covered by put option in Part IV.1 (a), item 2

$$\begin{aligned}\text{Amount to be reported} &= (25,000 \times \text{PHP}195.00 \times 16\%) - \\ &\quad \{25,000 \times (\text{PHP}214.50 - \text{PHP}195.00)\} \\ &= \text{PHP}0.293\text{MM}\end{aligned}$$

11. Report as a short position the market value for futures (HKD50.00 per index point) in Part II, item 5 (HKD column) and as a long position in Part I.2, HKD ladder, 1 to 3 months time band. Assume HKD to PHP exchange rate is PHP6.50.
12. Report the USD leg as a long 6- month zero coupon security in Part I.2, USD ladder, 3 to 6 months time band. Report the PHP leg as a short 6-month zero coupon security in Part I.2, PHP ladder, 3 to 6 months time band.

Assume the 6-month Peso and Dollar zero coupon yields are 5.81% and 4%, respectively, and the spot exchange rate is PHP50.00.

Cash flows of currency swap: two legs

Pay – PHP
111% of PHP975.000MM in 6 months

$$\begin{aligned}\text{PV of PHP leg} &= \frac{\text{PHP}975.000\text{MM} \times (1.11)}{(1 + 0.0581 \times 0.5)} \\ &= \text{PHP}1,051.700\text{MM}\end{aligned}$$

Receive – USD
109.5% of USD19.500MM in 6 months

$$\begin{aligned}\text{PV of USD leg} &= \frac{\text{USD}19.500\text{MM} \times (1.095)}{(1 + 0.04 \times 0.5)} \\ &= \text{PHP}1,046.700\text{MM equivalent}\end{aligned}$$

**INSTRUCTIONS FOR ACCOMPLISHING THE REPORT ON COMPUTATION OF THE ADJUSTED
RISK-BASED CAPITAL ADEQUACY RATIO COVERING COMBINED
CREDIT RISK AND MARKET RISK**

**(For Universal Banks and Commercial Banks with Expanded Derivatives Authority but
Without Options Transactions)**

(Appendix to Sec. 125 on Market risk capital requirement)

General Instructions

1. All UBs and KBs are required to complete this Report both on a solo basis (i.e., head office plus branches) and on a consolidated basis (i.e., parent bank plus subsidiary financial allied undertakings, but excluding insurance companies).
2. The Report should be submitted as follows:
 - (a) Solo report - within fifteen (15) banking days after the end of each reference quarter; and
 - (b) Consolidated report - within thirty (30) banking days after the end of each reference quarter.
3. Current market value should be used for reporting. For leveraged instruments where the apparent notional amount differs from the effective notional amount, the bank should use the effective notional amount in calculating the market value for reporting, e.g., a swap contract with a stated notional amount of PHP1.0 million, the terms of which call for a quarterly settlement of the difference between five percent (5%) and PHIBOR multiplied by 10 has an effective notional amount of PHP10.0 million.
4. Securities transactions are to be reported on a “trade date” basis.

Definitions and Clarifications

5. Market risk is defined as the risk of losses in on- and off-balance sheet positions arising from movements in market prices. The risks subject to this reporting requirement are:
 - (a) the risks pertaining to interest rate- related instruments and equities in the bank’s trading book; and
 - (b) foreign exchange risk throughout the bank.

The Report should include the reporting bank’s positions in on-balance sheet financial instruments and off-balance sheet derivatives, the latter being defined as financial contracts whose values depend on the values of one or more underlying assets or indices.

6. For the purpose of the Report, the trading book of a bank shall consist of:
 - (a) its proprietary positions in financial instruments which are taken on with the intention of short-term resale or benefiting in the short term from actual or expected differences between the buying and selling prices or from other price or interest rate variations;

- (b) positions which arise from the execution of trade orders from customers and market making; and
 - (c) positions taken in order to hedge other elements of the trading book.
7. The financial instruments referred to in the preceding paragraph include:
- (a) (i) transferable securities;
(ii) units in collective investment undertakings;
 - (b) certificates of deposit and other similar capital market instruments;
 - (c) financial futures contracts;
 - (d) forward contracts including forward rate agreements; and
 - (e) swaps.
8. Banks are expected to have an established policy for allocating transactions (including internal deals) to the trading or non-trading (i.e., banking) book, as well as procedures to ensure compliance with such policy. There must be a clear audit trail at the time each transaction is entered into and the Bangko Sentral will examine the adequacy of such policy and procedures and their consistent implementation when it is considered necessary. For this purpose, banks which engage in trading activities should submit to the Bangko Sentral a policy statement covering:
- (a) the definition of trading activities;
 - (b) the financial instruments which can be traded or used for hedging the trading book portfolio; and
 - (c) the principles for transferring positions between the trading and the banking books.
9. In general, the Bangko Sentral will have regard to the bank's intention in entering into a particular transaction when determining whether such transaction should fall into the trading book. Transactions will likely be considered to carry a trading intent on the part of the bank if:
- (a) the positions arising from the transactions are marked to market on a daily basis as part of the internal risk management process;
 - (b) the positions are not (or not intended to be) held to maturity; and
 - (c) the positions satisfy other criteria the bank applies to its trading portfolio on a consistent basis.
10. Debt securities include both fixed-rate and floating-rate instruments, negotiable certificates of deposit, non-convertible preference shares, and also convertible bonds (i.e., debt issues or preference shares that are convertible, at a stated price, into common shares of the issuer) which trade like debt securities. Debt related derivatives include bond futures.
11. Interest rate derivatives include all derivatives contracts and off-balance sheet instruments which react to changes in interest rates, e.g., interest rate futures, forward rate agreements (FRAs), interest rate and cross currency swaps, and forward foreign exchange positions.
12. Detailed offsetting rules applicable to the reporting of positions are set out in the relevant parts of Specific Instructions. These offsetting rules can be applied on both the solo and consolidated basis, :*Provided*, That in the latter case there are no obstacles to the quick

repatriation of profits from a foreign subsidiary to the Philippines and the bank performs daily management of risks on a consolidated basis. For this purpose, offsetting means the exclusion of matched positions of a bank from reporting and hence exclusion of such positions from the calculation of the adjusted capital adequacy ratio.

13. For avoidance of doubt, items that are deductible from the qualifying capital of the bank in the calculation of the risk-based capital adequacy ratio pursuant to applicable and existing capital adequacy framework are excluded from market risk capital requirement.
14. In general, banks are only required to complete Parts I to III and V of the Report. Banks which have obtained the Bangko Sentral's approval to adopt their internal value-at-risk (VaR) models to calculate their market risk capital charge (in all or individual risk categories) should complete Part IV (in lieu of Parts I to III). Where the internal model is used to calculate only selected risk categories, the capital charge for the risk categories measured under the internal models approach should be reported in Part IV while that for the other risk categories measured under the standardized approach should be reported in the relevant sections of Parts I to III. This combination of the standardized approach and the internal models approach is allowed on a transitional basis. Banks which adopt the internal models approach will not be permitted, save in exceptional circumstances, to revert to the standardized approach.

Specific Instructions

Part I Interest Rate Exposures

1. Debt securities and debt related derivatives – specific risk

15. Report in this part the long and short positions in debt securities and debt derivatives (e.g., bond futures) in the trading book by category of the issuer. Offsetting will be allowed between long and short positions in identical issues (including positions in derivatives) with exactly the same issuer, coupon, currency and maturity. For items 1.4 to 1.7 of the Report, positions should be slotted into the appropriate time bands according to the residual maturities of the debt securities (or the underlying securities in case of debt derivatives). (Refer to examples (1) and (2) in Annex A).
16. A security, which is the subject of a repurchase agreement, will be treated as if it were still owned by the seller of the security, i.e., to be reported by the seller. This principle applies also in Part 1.2 of the Report. Commitments to buy and sell securities should be reported as long and short positions, respectively.
17. Foreign countries, foreign incorporated banks and Philippine incorporated banks/QBs with the "highest credit quality", as well as debt securities with the "highest credit quality" refer to ratees/debt securities given the minimum credit ratings as indicated below by any two of the following internationally accepted rating agencies:

Rating Agency	Credit Rating
(a) Moody's	"Aa3" and above
(b) Standard and Poor's	"AA-" and above
(c) Fitch IBCA	"AA-" and above

and such other recognized international rating agencies as may be approved by the

Monetary Board.

The ratings of domestic rating agencies may likewise be used for this purpose :*Provided*, That such rating agencies meet the criteria to be prescribed by the Monetary Board.

18. Multilateral development banks refer to the World Bank Group comprised of the International Bank for Reconstruction and Development (IBRD) and the International Finance Corporation (IFC), the Asian Development Bank (ADB), the African Development Bank (AfDB), the European Bank for Reconstruction and Development (EBRD), the Inter-American Development Bank (IADB), the European Investment Bank (EIB); the Nordic Investment Bank (NIB); the Caribbean Development Bank (CDB), the Council of Europe Development Bank (CEDB) and such others as may be recognized by the Bangko Sentral.
19. Non-central government public sector entities of a foreign country refer to entities which are regarded as such by a recognized banking supervisory authority in the country in which they are incorporated.

2. Debt securities, debt related derivatives and interest rate derivatives – general market risk

20. Report in this part the long and short trading book positions in debt securities and debt derivatives described above, as well as interest rate derivatives. Report also interest rate exposures arising from futures contracts and forward positions in equities. A Maturity Method is adopted for the reporting of these positions as detailed below. Banks that possess the necessary capability to calculate the duration and price sensitivity of each position separately and wish to adopt such a duration approach for reporting in this part may seek approval from Bangko Sentral.
21. Positions should be reported separately for each currency, i.e., banks should use separate sheets (Part I.2 of the Report) to report positions of different currencies. The unadjusted market risk capital charge is then calculated for each currency according to procedures set out in paragraphs 31 to 34 with no offsetting between different currencies.
22. Under the Maturity Method, positions are slotted into the time bands of the maturity ladder (as shown in Part I.2 of the Report) by remaining maturity if fixed rate and by the period to the next repricing date if floating rate. (Refer to examples (1) and (2) in Annex A). Derivatives should be treated as combinations of long and short positions. The maturity of an interest rate future or a forward rate agreement will be the period until delivery or exercise of the contract, plus – where applicable – the life of the underlying instrument. For example, a long position in a June 3-month interest rate future taken in December is to be reported at end of December as a long position in a zero coupon government security in that particular currency with a maturity of 9 months and a short position in a zero coupon government security with a maturity of 6 months. (Refer to examples (5) and (6) in Annex A). The market values of the two positions should be reported. For forward foreign exchange positions in the trading book, they should be treated as long and as short positions in a zero coupon government security of the 2 currencies with the same maturity as the forward contract. (Refer to example (7) in Annex A).
23. For a bond future, where a range of deliverable instruments may be delivered to fulfill the contract, the bank has flexibility to elect which deliverable security goes into the maturity ladder but should take account of any conversion factor defined by the exchange. A two-leg approach will be adopted similar to the above. A long bond future will be taken as a long

position in a deliverable bond and a short position in a zero coupon security maturing at the future's delivery date. For example, a long futures contract on a 5 year fixed rate security with delivery 3 months from the reporting date will be reported as a long position in say, a 5.25 year security, i.e., a specific security which is within the range of deliverables under the futures contract (as opposed to a notional/theoretical security), and a short position in a 3 months zero coupon security. (Refer to example (3) in Annex A).

The amount to be reported in the above example for both legs will be the contract face value divided by the relevant conversion factor and multiplied by the current cash price of the selected deliverable bond. A forward bond transaction (i.e., with a settlement period longer than the market norm) will be treated similarly, i.e., a long bond forward will be reported as long position in the bond and a short position in a zero coupon security up to the forward delivery date. The current market value (at spot price) of the bond should be reported.

24. Swaps will be treated as two positions in securities with the relevant maturities. For example, an interest rate swap under which a bank is receiving floating rate interest and paying fixed will be treated as a long position in a floating rate instrument of maturity equivalent to the period until the next interest fixing and a short position in a fixed-rate instrument of maturity equivalent to the residual life of the swap. The market values of the 2 instruments should be reported. (Refer to example (4) in Annex A). For swaps that pay or receive a fixed or floating interest rate against some other reference price, e.g., an equity price, the interest rate component should be slotted into the appropriate maturity category, with the equity component being included in the equity framework. The separate legs of cross- currency swaps are to be reported in the relevant maturity ladders for the currencies concerned. (Refer to example (10) in Annex A).
25. As with the reporting under Part I.1 of the Report, banks can offset long and short positions in identical instruments with exactly the same issuer, coupon, currency and maturity for general market risk purposes. Similarly, a matched position in a futures or forward contract and its underlying may be fully offset. However, the leg representing the time to expiry of the futures or forward contract should be reported.

For example, a bank has a long position in a particular bond and sells forward (i.e., beyond the normal settlement period for the security) such a bond as at the reporting date. The long and short positions in the bond can be offset but a long position in a (notional) zero coupon security with maturity at the forward delivery date should be reported, at the current market value of the bond. Similarly, if the bank has a short position in a bond future and a long position in the underlying bond, such positions can be offset. A long position up to the future's delivery date should, however, be reported.

When the futures contract comprises a range of deliverable instruments, offsetting of positions in the futures contract and its underlying is only permissible in cases where there is a readily identifiable underlying security which is most profitable for the trader with a short position to deliver, i.e., the "cheapest to deliver". This means that offsetting is only permitted between a short future and a long bond, not between a long future and a short bond; and the long bond must be the one that is "cheapest to deliver". The amount to be reported for the remaining long position up to the futures contract's delivery date will be the face value of the contract divided by the relevant conversion factor and multiplied by the current spot price of the "cheapest to deliver" bond.

26. Opposite positions in the same category of derivatives instruments can in certain circumstances be regarded as matched and allowed to offset fully. The separate legs of different swaps may also be “matched” subject to the same conditions. To qualify for this treatment, the positions must relate to the same underlying instruments, be of the same nominal value and be denominated in the same currency. In addition:
- (a) for futures: offsetting positions in the notional or underlying instruments to which the futures contract relates must be for identical products and mature within 7 days of each other;
 - (b) for swaps and forward rate agreements (FRAs): the reference rate (for floating rate positions) must be identical and the coupon closely matched (i.e., within 15 basis points); and
 - (c) for swaps, FRAs and forwards: the next interest fixing date or, for fixed coupon positions or forwards, the residual maturity must correspond within the following limits:
 - if either of the instruments for offsetting has an interest fixing date or residual maturity up to 1 month, the interest fixing date or residual maturity must be the same for both instruments;
 - if either of the instruments for offsetting has an interest fixing date or residual maturity greater than 1 month and up to 1 year, those dates or residual maturities must be within 7 days of each other; and
 - if either of the instruments for offsetting has an interest fixing date or residual maturity over 1 year, those dates or residual maturities must be within 30 days of each other.

For example, a bought and a sold FRA in the same currency with the same face value and settlement date as well as notional deposit maturity date can be offset against each other and excluded from reporting if the contract rates are within 15 basis points of each other. Similarly, opposite swap positions in the same currency with the same face value and reference dates can be offset if, say, the floating rate in both cases is 6 months PHIBOR and the fixed rates are within 15 basis points of each other. The positions can still be offset if the reference dates (i. e., the next interest fixing date or remaining maturity) of the opposite positions are different but within the range as set out in (c) above. Opposite bond futures can, for example, be offset against each other if the deliverable bonds are of the same type and mature within 7 days of each other.

27. Banks with the necessary expertise and systems may use alternative formulae (the so called “pre-processing” techniques) to calculate the positions to be included in the maturity ladder. This applies to all interest rate sensitive positions, arising from both physical and derivative instruments.

One method is to first convert the payments required under each transaction into their present values. For that purpose, each cash flow should be discounted using zero- coupon yields. A single net figure of all of the cash flows within each time band may be reported. Banks wishing to adopt this or other methods for reporting should seek the Bangko Sentral’s prior approval. The “pre- processing” models would be subject to review by the Bangko Sentral.

Calculation of capital charges for interest rate exposures reported in Part I

28. The unadjusted minimum capital requirement is expressed in terms of two separately calculated charges, one applying to the “specific risk” of each trading book position in debt securities or debt derivatives, whether it is a short or long position, and the other to the overall interest rate risk in the trading book portfolio (termed “general market risk”) where long and short positions in different securities or derivatives can be offset subject to certain “disallowances”.

Specific risk

29. The unadjusted specific risk charge is graduated into five broad categories by types of issuer, as follows:

Government and multilateral development banks ¹	0.00%
Qualifying ²	0.25% (residual maturity of 6 months or less)
	1.00% (residual maturity of over 6 months to 24 months)
	1.60% (residual maturity of over 24 months)
LGU bonds ³	4.00%
Others	8.00%

30. Interest rate and currency swaps, FRAs, forward foreign exchange contracts and interest rate futures will not be subject to a specific risk charge. In the case of futures contracts where the underlying is a debt security, a specific risk charge will apply according to the issuer (and the remaining maturity) as set out in the above paragraph.

General market risk

31. General market risk applies to positions in all debt securities, debt derivatives and interest rate derivatives, subject only to an exemption for fully or very closely matched positions in identical instruments as described in paragraphs 25 to 26 above. The unadjusted capital charge is the sum of the following components:

- (a) the net short or long weighted position in the whole trading book;
- (b) a small proportion of the matched positions in each time band (the “vertical disallowance”); and
- (c) a larger proportion of the matched positions across different time-bands (the “horizontal disallowance”).

32. In the maturity ladder, first calculate the weighted positions by multiplying the positions reported in each time band by a risk-factor according to the following table:

Table 1

¹ “Government and multilateral development banks” refers to the issuers as described under items 1.1 and 1.3 in Part I.1 of the Report.

² “Qualifying” refers to the issuers/issues as described under items 1.4 to 1.7 in Part I.1 of the Report.

³ “LGU bonds” refers to bonds issued by local government units (LGUs), covered by Deed of Assignment of Internal Revenue Allotment of the LGU and guaranteed by LGU Guarantee Corporation.

Maturity method: time bands and weights

Coupon 3% or more	Coupon less than 3%	Risk Weight
1 month or less	1 month or less	0.00%
Over 1 month to 3 months	Over 1 month to 3 months	0.20%
Over 3 months to 6 months	Over 3 months to 6 months	0.40%
Over 6 months to 12 months	Over 6 months to 12 months	0.70%
Over 1 year to 2 years	Over 1 year to 1.9 years	1.25%
Over 2 years to 3 years	Over 1.9 years to 2.8 years	1.75%
Over 3 years to 4 years	Over 2.8 years to 3.6 years	2.25%
Over 4 years to 5 years	Over 3.6 years to 4.3 years	2.75%
Over 5 years to 7 years	Over 4.3 years to 5.7 years	3.25%
Over 7 years to 10 years	Over 5.7 years to 7.3 years	3.75%
Over 10 years to 15 years	Over 7.3 years to 9.3 years	4.50%
Over 15 years to 20 years	Over 9.3 years to 10.6 years	5.25%
Over 20 years	Over 10.6 years to 12 years	6.00%
	Over 12 years to 20 years	8.00%
	Over 20 years	12.50%

Maturity method: time bands and weights

33. The weighted longs and shorts in each time band will be offset resulting in a single short or long position for each band. A 10% capital charge (“vertical disallowance”) will be levied on the smaller of the offsetting positions, be it long or short. Thus, if the sum of the weighted longs in a time band is P100.0 million and the sum of the weighted shorts is P90.0 million, the vertical disallowance would be 10% of P90.0 million (i.e., P9.0 million).
34. Two rounds of “horizontal offsetting” will then be conducted, first between the net positions in each of 3 zones (zero to 1 year, over 1 year to 4 years and over 4 years), and subsequently between the net positions in the 3 different zones. The offsetting will be subject to a scale of disallowances expressed as a fraction of the matched positions, as set out in Table 2 below. The weighted long and short positions in each of 3 zones may be offset, subject to the matched portion attracting a disallowance factor that is part of the capital charge. The residual net position in each zone may be carried over and offset against opposite positions in other zones, subject to a second set of disallowance factors.

Table 2 Horizontal disallowance

Zones	Time-band	Within the zone	Between adjacent zones	Between zones 1 and 3
Zone 1	1 month or less	40%	40%	
	Over 1 month to 3 months			
	Over 3 month to 6 months			
	Over 6 months to 12 months			
Zone 2	Over 1 year to 2 years	30%		
	Over 2 years to 3 years			
	Over 3 years			

Zones	Time-band	Within the zone	Between adjacent zones	Between zones 1 and 3
	to 4 years		40%	100%
Zone 3	Over 4 years to 5 years	30%		
	Over 5 years to 6 years			
	Over 6 years to 7 years			
	Over 7 years to 10 years			
	Over 10 years to 15 years			
	Over 15 years to 20 years			
	Over 20 years			

Part II Equity Exposures

35. Report in this part the long and short positions in equities and equity derivatives in the trading book, including instruments that exhibit market behavior similar to equities. The instruments covered include common stock (whether voting or non-voting), convertible bonds (i.e., debt issues or preference shares that are convertible, at a stated price, into common shares of the issuer) which trade like equities and commitments to buy or sell equity securities. For non-convertible preference shares and those convertible bonds which trade like debt securities, they should be reported under Part I. Equity derivatives include forwards, futures and swaps on both individual equities and or stock indices. Long and short positions in the same issue may be reported on a net basis.
36. The positions are to be reported on a market-by-market basis, i.e., under separate columns to indicate the exchange where the reported equities are listed/traded. For foreign markets, banks should indicate the country where the market is located. (Refer to example (8) in Annex A) Equities with listing in more than one market should be reported as positions in the market of their primary listing.
37. Equity derivatives are to be converted into positions in the relevant underlying. Futures and forward contracts relating to an individual equity should be reported at current market values. Futures relating to equity indices can be reported either as the current index value times the monetary value of one index point set by the exchange, i.e., the “tick” value, or the marked-to-market value of the notional underlying equity portfolio. (Refer to example (9) in Annex A).
38. Matched positions in each identical equity or index (same delivery months) in each market may be fully offset, resulting in a single net short or long position. A future in a given equity may be offset against an opposite cash position in the same equity but the interest rate exposure arising out of the equity futures should be reported in Part I. For example, a short futures contract on a specific stock with delivery 3 months from the reporting date can be offset against a long position in the underlying stock. However, the interest rate exposure arising out of the equity futures should be reported as a long position in the “1 to 3 months” time band of the stock denominated currency in Part I. The position should be reported as the current market value of the stock.
39. An equity swap obligates a bank to receive an amount based on the change in value of a

particular equity or equity index and also to pay an amount based on the change in value of a different equity or equity index. Accordingly, the receipt side and the payment side of an equity swap contract should be reported as a long and a short position, respectively. For an equity swap contract which involves a leg relating to a financial instrument other than equities or equity derivatives, for example, receiving/paying a fixed or floating interest rate, the exposure should be slotted into the appropriate maturity band in Part I. Where equities are part of a forward contract (equities to be received or to be delivered), any interest rate exposure from the other leg of the contract should be reported in Part I. The treatment is similar to that set out in paragraph 38. The same arrangement applies for index futures. (Refer to example (9) in Annex A).

40. As with interest rate exposures, the capital charge is levied to separately cover both the specific risk and the general market risk. Calculation is done on an individual market basis. The unadjusted capital charge for specific risk will be 8% on the gross (i.e., long plus short) positions. The unadjusted general market risk charge will be 8% on the net position. Net long and short positions in different markets cannot be offset for the purpose of calculating general market risk charge.

Part III Foreign Exchange Exposures

41. Report in this part the amount in US dollars (USD) of net long or net short position in each currency. In addition, structural positions taken deliberately to hedge against the effects of exchange rate movements on the capital adequacy of the reporting bank may be excluded. This should be cleared with the Bangko Sentral prior to reporting.
42. Net long/ (short) position shall refer to FX assets (excluding FX items allowed under existing regulations to be excluded from FX assets in the computation of a bank's net FX position limits) less FX liabilities (excluding FX items allowed under existing regulations to be excluded from FX liabilities in the computation of a bank's net FX position limits), plus contingent FX assets less contingent FX liabilities.
43. Banks which base their normal management accounting of forward currency positions on net present values shall use the net present values of each position, discounted using current interest rates, for measuring their positions. Otherwise, forward currency positions shall be measured based on notional amount.
44. The total USD amount of net long or net short position in each currency should then be converted at spot rates into Philippine peso. The overall net open position is the greater of the absolute value of the sum of net long position or sum of net short position.
45. The unadjusted capital charge will be 8% of the overall net open position.

Part IV Internal Models Approach

46. Only those banks which have obtained the Bangko Sentral's approval to adopt their internal value-at-risk (VaR) models to calculate their market risk capital charges in lieu of the standardized methodology are required to report in this part.

1. Value-at-risk results

47. Report in this part the value-at-risk (VaR) results as at the last trading day of the reference

quarter in column (a) and the average VaR over the most recent 60 trading days of the reference quarter in column (b), both for each individual market risk category using internal models approach, i.e., item 1.1 to 1.3, and for the aggregate of these risk categories, i.e., item 1.4.

48. Provided that the Bangko Sentral is satisfied with the bank's system for measuring correlations, recognition of empirical correlations across broad risk categories (e.g., interest rates, equity prices and exchange rates) may be allowed. The VaR for the aggregate of all risk categories will therefore not necessarily be equal to an arithmetic sum of the VaR for the individual risk category.
49. Report also in this part the number of backtesting exceptions for the past 250 trading days (from the reference quarter-end going backwards), based on:
- actual daily changes in portfolio value, in item 1.4. column (c), and
 - hypothetical changes in portfolio value that would occur were end-of-day positions to remain unchanged during the 1 day holding period, in item 1.4 column (d), for the aggregate of the broad risk categories.
50. The multiplication factor to be reported in item 1.4 column (e) is the summation of the following 3 elements:
- (a) the minimum multiplication factor of 3;
 - (b) the "plus" factor ranging from 0 to 1 based on the number of backtesting exceptions (i.e., the larger of item 1.4 column (c) or item column (d)) for the past 250 trading days as set out in Table 3 below: and
 - (c) any additional "plus" factor as may be prescribed by the Bangko Sentral.

Table 3
"Plus" factor based on the number of backtesting exceptions for the past 250 trading days

Zone	Number of exceptions	"Plus" factor
Green zone	0	0.00
	1	0.00
	2	0.00
	3	0.00
	4	0.00
Yellow zone	5	0.40
	6	0.50
	7	0.65
	8	0.75
	9	0.85
Red zone	10 or more	1.00

51. Capital charge for general market risk calculated by internal models reported in item 1.6 is larger of:
- (a) Item 1.4 column (a), i.e., VaR for the aggregate of all risk categories, as at the last trading day of the reference quarter; or

- (b) Item 1.5, i.e., the average VaR for the last 60 trading days of the reference quarter (item 1.4 column (b)) times the multiplication factor (item 1.4 column (e)) set out in paragraph 50 above.

2. Specific risk

52. Capital charge for the specific risk of debt securities and other debt related derivatives, and equities and equity derivatives is to be reported using either of the following two methods:

- (a) For banks which incorporate the specific risk into their models, report the capital charge for the total specific risk calculated by the models in item 1.7 of Part IV.1; or
- (b) For banks which do not incorporate the specific risk into their models, report the specific risk of debt securities and other debt related derivatives in Part I.1 according to the instructions in paragraphs 15-19 and 29-30. For equities and equity derivatives, report the specific risk in Part II according to the instructions in paragraphs 35 to 40.

3. Largest daily losses over the quarter

53. Report in this part in descending order (i.e., the largest loss first) the 5 largest daily losses over the reference quarter and their respective VaRs for the risk exposures which are measured by the internal models approach. If the number of daily losses during the quarter is less than 5, report only all such daily losses.

Part V Adjusted Capital Adequacy Ratio

54. The market risk capital charges should be aggregated and converted to a market risk-weighted exposure. The total market risk capital charges is the sum of the capital charges for individual market risk categories computed using either (a) the standardized approach, or (b) the internal models approach. The total capital charges for individual market risk categories using the standardized approach should be multiplied by 125% (to be consistent with the higher capital charge for credit risk, i.e., 10% as opposed to the BIS recommended 8%.)
55. The total market risk-weighted exposures is computed by multiplying the total market risk capital charges by 10. (The multiplier 10 is the reciprocal of the Bangko Sentral required minimum capital ratio for credit risk of 10%.) The qualifying capital and total credit risk weighted exposures are extracted from Part V.A and Part V.B, respectively, of the Report on the Computation of Risk-Based Capital Adequacy Ratio covering credit risk.
56. For on-balance-sheet debt securities and equities in the trading book included in Parts I, II and IV of this Report, the credit risk-weighted exposures reported in Part II of the Report on the Computation of the Risk-Based Capital Adequacy Ratio covering credit risk should be excluded in calculating the adjusted ratio covering combined credit risk and market risk. The market risk capital charges for these positions calculated in this Report cover all the capital requirements for absorbing potential losses arising from carrying such positions.

(Circular No. 890 dated 02 November 2015)

Suppose as at 31 December, 200X, ABC Bank Corporation has the following trading book positions:

- (1) Long position in US Treasury Bond (7.5% annual coupon) with face value equivalent to PHP507.000MM and residual maturity of 8 years.

Market value based on quoted price: PHP518.914MM equivalent

- (2) Long position in an unrated floating rate note (6.25% current annual coupon) issued by a US corporate with face value equivalent of PHP260.000MM and next repricing 9 months after.

Market value based on quoted price: PHP264.758MM equivalent

- (3) Long 10 futures contracts involving 5- year US Treasury Note (face value USD0.100MM per contract) for delivery 3 months after.

Selected deliverable: US Treasury Note (coupon 6.375%) maturing 5.25 years, current price at 100.0625, conversion factor 0.9423.

- (4) Single currency interest rate swap with face value PHP975.000MM and residual maturity of 2.5 years, bank receives annual floating rate interest and pays fixed at 8% per annum. The current floating rate is fixed at 5.5% with next repricing after 6 months.

- (5) Long 10 futures contracts involving 3- month LIBOR interest rate (face value GBP6.500MM per contract) for delivery 6 months after.

- (6) An FRA sold on 6-month PHIBOR with nominal amount PHP130.000MM and settlement date 9 months after.

- (7) Forward foreign exchange position of EUR5.000MM (long) against PHP250.000MM equivalent maturing in 3 months.

- (8) Long 1000 shares of a US listed company with current market price of PHP715.000MM equivalent.

- (9) Short one Hang Seng Index Futures for delivery 3 months after, current index at 10,000.

- (10) Currency swap with residual maturity of 6 months. Bank receives USD19.500MM at 9.5% per annum and pays PHP975.000MM at 11% per annum.

Treatments:

- (1) Report market value (PHP518.914MM) of the long position in Part I.1, item I.2 and Part I.2, USD ladder, 7 to 10 years time band.
- (2) Report market value (PHP264.758MM) of the long position in Part I.1, item 1.9' and Part I.2, USD ladder, 6 to 12 months time band.
- (3) Report selected Treasury Note (long position) in Part I.1, item I.2 and Part I.2, USD ladder,

5 to 7 year time band. Report the same amount in short position, 1 to 3 months time band.

Assume spot exchange rate PHP50.00

Amount to be reported:

USD0.100MM x 10 x 100.0625%/0.9423 = USD1.062MM

=P53.095MM

- (4) Report the fixed rate leg as a short 2.5- year bond in Part I.2, Peso ladder, 2 to 3 years time band. Report the floating rate leg as a long 6 months security in the 3 to 6 months time band.

Assume the Peso zero coupon yields are as follows:

Period	Zero coupon
1M	5.31
3M	5.63
6M	5.81
1Y	6.16
2Y	6.69
3Y	7.07

(Zero coupon yields within 1 year can be taken as cash rates, i.e., PHIBOR, zero coupon yields beyond 1 year can be constructed from, say, swap rates.)

Cash flows of Peso swap: 2 legs

Pay – fixed rate bond

8% of PHP975.000MM in 6 months

8% of PHP975.000MM in 18 months

108% of PHP975.000MM in 30 months Receive – floating rate paper

105.5% of PHP975.000MM in 6 months

Zero-coupon rates at 18 months can be obtained from the linear interpolation between the 1Y and 2Y zero coupon rates.

ZC (18 months) = (6.16% + 6.69%)/2 = 6.425%

Similarly,

ZC (30 months) = (6.69% + 7.07%)/2 = 6.88%

PV of the fixed leg (i.e., pay side)

$$= \text{PhP}975.000\text{MM} \times \frac{0.08}{(1+0.0581 \times 0.5)} + \frac{0.08}{(1+0.06425)^{1.5}} + \frac{1.08}{(1+0.0688)^{2.5}}$$

= PHP1,038.479MM

PV of the floating leg (i.e. receive side)

$$= \text{PhP}975.000\text{MM} \times \frac{1.055}{(1+0.0581 \times 0.5)}$$

$$= \text{PHP}999.587\text{MM}$$

- (5) Report a long 9 months zero coupon security in Part I.2, GBP ladder, 6 to 12 months time band and a short 6 months zero coupon security in 3 to 6 months time band.

Assume the GBP 6 months zero-coupon yield is 6.74% while the interpolated 9 months zero-coupon yield is 6.87%. Assume spot exchange rate is PHP75.00.

Amount to be reported:

$$\begin{aligned} 9 \text{ months} &= \text{GBP}65.000\text{MM} / (1+0.0687 \times 0.75) \\ &= \text{GBP}65.000\text{MM} \times 0.951 \\ &= \text{PHP}4,636.124\text{MM equivalent} \end{aligned}$$

$$\begin{aligned} 6 \text{ months} &= \text{GBP}65.000\text{MM} / (1+0.0674 \times 0.5) \\ &= \text{GBP}65.000\text{MM} \times 0.9674 \\ &= \text{PHP}4,716.069\text{MM equivalent} \end{aligned}$$

- (6) Report a long 15 months zero coupon security in Part I.2, Peso ladder, 1.0 to 1.9 years time band and a short 9 months zero coupon security in 6 to 12 months time band.

Calculations similar to (4) above, ZC (15 months)
 $= 6.16\% + (6.69\% - 6.16\%) \times 0.25 = 6.2925\%$

$$\begin{aligned} 15 \text{ months} &= \text{PHP}130.000\text{MM} / (1+0.062925)^{1.25} \\ &= \text{PHP}121.000\text{MM} \end{aligned}$$

$$\begin{aligned} 9 \text{ months} &= \text{PHP}130.000\text{MM} \times 0.957 \\ &= \text{PHP}124.410\text{MM} \end{aligned}$$

- (7) Report a long 3 months zero coupon security in Part I.2, EUR ladder, 1 to 3 months time band and a short 3 months zero coupon security in the Peso ladder, 1 to 3 months time band.

Calculations similar to (4) above and assume 3 months EUR cash rate at 3.25% and spot exchange rate is PHP46.00.

$$\begin{aligned} \text{EUR} &= \text{EUR}5.000\text{MM} / (1 + 0.0325 \times 0.25) \\ &= \text{PHP}228.146\text{MM equivalent} \\ \text{PhP} &= \text{PHP}250.000\text{MM} / (1 + 0.0563 \times 0.25) \\ &= \text{PHP}246.530\text{MM} \end{aligned}$$

(For simplicity, Part III of the report is not presented in this example.)

- (8) Report market value in Part II, item 1 (US column).

- (9) Report as a short position the market value for futures (HKD50.00 per index point) in Part II, item 5 (HKD column) and as a long position in Part I.2, HKD ladder, 1 to 3 months time band. Assume HKD to PHP exchange rate is PHP6.50.
- (10) Report the USD leg as a long 6-month zero coupon security in Part I.2, USD ladder, 3 to 6 months time band. Report the PHP leg as a short 6-month zero coupon security in Part I.2, PHP ladder, 3 to 6 months time band.

Assume the 6-month Peso and Dollar zero coupon yields are 5.81% and 4%, respectively, and the spot exchange rate is PHP50.00.

Cash flows of currency swap: two legs Pay – PHP
111% of PHP975.000MM in 6 months

PV of PHP leg

$$= \frac{\text{PHP}975.000\text{MM} \times (1.11)}{(1 + 0.0581 \times 0.5)}$$

$$= \text{PHP}1,051.700\text{MM}$$

Receive – USD

109.5% of USD19.500MM in 6 months

PV of USD leg

$$= \frac{\text{USD}19.500\text{MM} \times (1.095)}{(1 + 0.04 \times 0.5)}$$

$$= \text{PHP}1,046.700\text{MM equivalent}$$

(For simplicity, Part III of the report is not presented in this example.)

**INSTRUCTIONS FOR ACCOMPLISHING THE REPORT ON COMPUTATION OF THE ADJUSTED RISK-BASED CAPITAL ADEQUACY RATIO
COVERING COMBINED CREDIT RISK AND MARKET RISK
(For Universal Banks and Commercial Banks Without Expanded Derivatives Authority)
(Appendix to Sec. 125 on Market risk capital requirement)**

General Instructions

1. All universal banks and commercial banks are required to complete this Report both on a solo basis (i.e., head office plus branches) and on a consolidated basis (i.e., parent bank plus subsidiary financial allied undertakings, but excluding insurance companies).
2. The Report should be submitted as follows:
 - (a) Solo report - within fifteen (15) banking days after the end of each reference quarter; and
 - (b) Consolidated report - within thirty (30) banking days after the end of each reference quarter
3. Current market value should be used for reporting. For leveraged instruments where the apparent notional amount differs from the effective notional amount, the bank should use the effective notional amount in calculating the market value for reporting, e.g., a swap contract with a stated notional amount of PhP1.0 million, the terms of which call for a quarterly settlement of the difference between 5% and PHIBOR multiplied by 10 has an effective notional amount of P10.0 million.
4. Securities transactions are to be reported on a "trade date" basis.

Definitions and Clarifications

5. Market risk is defined as the risk of losses in on- and off-balance sheet positions arising from movements in market prices. The risks subject to this reporting requirement are:
 - (a) the risks pertaining to interest rate-related instruments and equities in the bank's trading book; and
 - (b) foreign exchange risk throughout the bank.

The Report should include the reporting bank's positions in on-balance sheet financial instruments and off-balance sheet derivatives, the latter being defined as financial contracts whose values depend on the values of one or more underlying assets or indices.

6. For the purpose of the Report, the trading book of a bank shall consist of:
 - (a) its proprietary positions in financial instruments which are taken on with the intention of short-term resale or benefiting in the short term from actual or expected differences between the buying and selling prices or from other price or interest rate variations;
 - (b) positions which arise from the execution of trade orders from customers and market making; and
 - (c) positions taken in order to hedge other elements of the trading book.
7. The financial instruments referred to in the preceding paragraph include:
 - (a) (i) transferable securities;
 - (ii) units in collective investment undertakings;
 - (b) certificates of deposit and other similar capital market instruments;
 - (c) currency forwards with tenor of one (1) year or less; and
 - (d) currency swaps with tenor of one (1) year or less and which for this purpose refer to the simultaneous buying and selling of a currency in approximately equal amounts for different maturity dates with the same party.
8. Banks are expected to have an established policy for allocating transactions (including internal deals) to the trading or non-trading (i.e., banking) book, as well as procedures to ensure compliance with such policy. There must be a clear audit trail at the time each transaction is entered into and the Bangko Sentral will examine the adequacy of such policy and procedures and their consistent implementation when it is considered necessary. For this purpose, banks which engage in trading activities should submit to the Bangko Sentral a policy statement covering:

- (a) the definition of trading activities;
 - (b) the financial instruments which can be traded or used for hedging the trading book portfolio; and
 - (c) the principles for transferring positions between the trading and the banking books.
- 9. In general, the Bangko Sentral will have regard to the bank's intention in entering into a particular transaction when determining whether such transaction should fall into the trading book. Transactions will likely be considered to carry a trading intent on the part of the bank if:
 - (a) the positions arising from the transactions are marked to market on a daily basis as part of the internal risk management process;
 - (b) the positions are not (or not intended to be) held to maturity; and
 - (c) the positions satisfy other criteria the bank applies to its trading portfolio on a consistent basis.
- 10. Debt securities include both fixed-rate and floating-rate instruments, negotiable certificates of deposit, non-convertible preference shares, and also convertible bonds (i.e., debt issues or preference shares that are convertible, at a stated price, into common shares of the issuer) which trade like debt securities.
- 11. Detailed offsetting rules applicable to the reporting of positions are set out in the relevant parts of Specific Instructions. These offsetting rules can be applied on both the solo and consolidated basis, provided that in the latter case there are no obstacles to the quick repatriation of profits from a foreign subsidiary to the Philippines and the bank performs daily management of risks on a consolidated basis. For this purpose, offsetting means the exclusion of matched positions of a bank from reporting and hence exclusion of such positions from the calculation of the adjusted capital adequacy ratio.
- 12. For avoidance of doubt, items that are deductible from the qualifying capital of the bank in the calculation of the risk-based capital adequacy ratio pursuant to applicable and existing capital adequacy framework are excluded from market risk capital requirement.
- 13. In general, banks are only required to complete Parts I to III and V of the Report. Banks which have obtained the Bangko Sentral's approval to adopt their internal value-at-risk (VaR) models to calculate their market risk capital charge (in all or individual risk categories) should complete Part IV (in lieu of Parts I to III). Where the internal model is used to calculate only selected risk categories, the capital charge for the risk categories measured under the internal models approach should be reported in Part IV while that for the other risk categories measured under the standardized approach should be reported in the relevant sections of Parts I to III. This combination of the standardized approach and the internal models approach is allowed on a transitional basis. Banks which adopt the internal models approach will not be permitted, save in exceptional circumstances, to revert to the standardized approach.

Specific Instructions

Part I Interest Rate Exposures

1. Debt securities – specific risk

- 14. Report in this part the long and short positions in debt securities in the trading book by category of the issuer. Offsetting will be allowed between long and short positions in identical issues with exactly the same issuer, coupon, currency and maturity. For items 1.4 to 1.7 of the Report, positions should be slotted into the appropriate time bands according to the residual maturities of the debt securities. (Refer to examples (1) and (2) in Annex A).
- 15. A security, which is the subject of a repurchase agreement, will be treated as if it were still owned by the seller of the security, i.e., to be reported by the seller. This principle applies also in Part 1.2 of the Report.
- 16. Foreign countries, foreign incorporated banks and Philippine incorporated banks/QBs with the “highest credit quality”, as well as debt securities with the “highest credit quality” refer to ratees/debt securities given the minimum credit ratings as indicated below by any two of the following internationally accepted rating agencies:

<u>Rating Agency</u>	<u>Credit Rating</u>
(a) Moody's	"Aa3" and above
(b) Standard and Poor's	"AA-" and above
(c) Fitch IBCA	"AA-" and above

and such other recognized international rating agencies as may be approved by the Monetary Board.

The ratings of domestic rating agencies may likewise be used for this purpose provided that such rating agencies meet the criteria to be prescribed by the Monetary Board.

17. Multilateral development banks refer to the World Bank Group comprised of the International Bank for Reconstruction and Development (IBRD) and the International Finance Corporation (IFC), the Asian Development Bank (ADB), the African Development Bank (AfDB), the European Bank for Reconstruction and Development (EBRD), the Inter-American Development Bank (IADB), the European Investment Bank (EIB); the Nordic Investment Bank (NIB); the Caribbean Development Bank (CDB), the Council of Europe Development Bank (CEDB) and such others as may be recognized by the Bangko Sentral.
18. Non-central government public sector entities of a foreign country refer to entities which are regarded as such by a recognized banking supervisory authority in the country in which they are incorporated.

2. Debt securities – general market risk

19. Report in this part the long and short trading book positions in debt securities and forward foreign exchange positions. A Maturity Method is adopted for the reporting of these positions as detailed below. Banks that possess the necessary capability to calculate the duration and price sensitivity of each position separately and wish to adopt such a duration approach for reporting in this part may seek approval from Bangko Sentral.
20. Positions should be reported separately for each currency, i.e., banks should use separate sheets (Part I.2 of the Report) to report positions of different currencies. The unadjusted market risk capital charge is then calculated for each currency according to procedures set out in paragraphs 28 to 31 with no offsetting between different currencies.
21. Under the Maturity Method, positions are slotted into the time bands of the maturity ladder (as shown in Part I.2 of the Report) by remaining maturity if fixed rate and by the period to the next repricing date if floating rate. (Refer to examples (1) and (2) in Annex A). For forward foreign exchange positions in the trading book, they should be treated as long and as short positions in a zero coupon government security of the 2 currencies with the same maturity as the forward contract. (Refer to example (3) in Annex A).
22. As with the reporting under Part I.1 of the Report, banks can offset long and short positions in identical instruments with exactly the same issuer, coupon, currency and maturity for general market risk purposes.
23. Opposite forward foreign exchange positions can in certain circumstances be regarded as matched and allowed to offset fully. The separate legs of different currency swaps may also be "matched" subject to the same conditions. To qualify for this treatment, the positions must relate to the same underlying currency and be of the same nominal value. In addition, the residual maturity must correspond within the following limits:
 - if either of the instruments for offsetting has a residual maturity up to 1 month, the residual maturity must be the same for both instruments; and
 - if either of the instruments for offsetting has a residual maturity greater than 1 month and up to 1 year, those residual maturities must be within 7 days of each other.
24. Banks with the necessary expertise and systems may use alternative formulae (the so called "pre-processing" techniques) to calculate the positions to be included in the maturity ladder. This applies to all interest rate sensitive positions, arising from physical instruments and currency forwards and swaps. One method is to first convert the payments required under each transaction into their present values. For that purpose, each cash flow should be discounted using zero-coupon yields. A single net figure of all of the cash flows within each time band may be reported. Banks wishing to adopt this or other methods for reporting should seek the Bangko Sentral's prior approval. The "pre-processing" models would be subject to review by the Bangko Sentral.

Calculation of capital charges for interest rate exposures reported in Part I

25. The unadjusted minimum capital requirement is expressed in terms of two separately calculated charges, one applying to the "specific risk" of each trading book position in debt securities, whether it is a short or long position, and the other to the overall interest rate risk in the trading book portfolio (termed "general market risk") where long and short positions in different securities and currency forwards and swaps can be offset subject to certain "disallowances".

Specific risk

26. The unadjusted specific risk charge is graduated into five broad categories by types of issuer, as follows:

Government and multilateral development banks ¹	0.00%
Qualifying ²	0.25% (residual maturity of 6 months or less)
	1.00% (residual maturity of over 6 months to 24 months)
	1.60% (residual maturity of over 24 months)
LGU bonds ³	4.00%
Others	8.00%

27. Currency swaps and forward foreign exchange contracts will not be subject to a specific risk charge.

General market risk

28. General market risk applies to positions in all debt securities and currency forwards and swaps subject only to an exemption for fully or very closely matched positions in identical instruments as described in paragraphs 22 to 23 above. The unadjusted capital charge is the sum of the following components:
- (a) the net short or long weighted position in the whole trading book;
 - (b) a small proportion of the matched positions in each time band (the "vertical disallowance"); and
 - (c) a larger proportion of the matched positions across different time-bands (the "horizontal disallowance").
29. In the maturity ladder, first calculate the weighted positions by multiplying the positions reported in each time band by a risk-factor according to the following table:

Table 1
Maturity method: time bands and weights

Coupon 3% or more	Coupon less than 3%	Risk weight
1 month or less	1 month or less	0.00%
Over 1 month to 3 months	Over 1 month to 3 months	0.20%
Over 3 months to 6 months	Over 3 months to 6 months	0.40%
Over 6 months to 12 months	Over 6 months to 12 months	0.70%
Over 1 year to 2 years	Over 1.0 year to 1.9 years	1.25%
Over 2 years to 3 years	Over 1.9 years to 2.8 years	1.75%
Over 3 years to 4 years	Over 2.8 years to 3.6 years	2.25%
Over 4 years to 5 years	Over 3.6 years to 4.3 years	2.75%
Over 5 years to 7 years	Over 4.3 years to 5.7 years	3.25%
Over 7 years to 10 years	Over 5.7 years to 7.3 years	3.75%
Over 10 years to 15 years	Over 7.3 years to 9.3 years	4.5%
Over 15 years to 20 years	Over 9.3 years to 10.6 years	5.25%
	Over 10.6 years to 12 years	6.00%
	Over 12 years to 20 years	8.00%
	Over 20 years	12.50%

¹ "Government and multilateral development banks" refers to the issuers as described under items 1.1 and 1.3 in Part I.1 of the Report.

² "Qualifying" refers to the issuers/issues as described under items 1.4 to 1.7 in Part I.1 of the Report.

³ "LGU bonds" refers to bonds issued by local government units (LGUs), covered by Deed of Assignment of Internal Revenue Allotment of the LGU and guaranteed by LGU Guarantee Corporation.

30. The weighted longs and shorts in each time band will be offset resulting in a single short or long position for each band. A 10% capital charge ("vertical disallowance") will be levied on the smaller of the offsetting positions, be it long or short. Thus, if the sum of the weighted longs in a time band is P100.0 million and the sum of the weighted shorts is PhP90.0 million, the vertical disallowance would be 10% of PhP90.0 million (i.e., PhP9.0 million).
31. Two rounds of "horizontal offsetting" will then be conducted, first between the net positions in each of 3 zones (zero to 1 year, over 1 year to 4 years and over 4 years), and subsequently between the net positions in the 3 different zones. The offsetting will be subject to a scale of disallowances expressed as a fraction of the matched positions, as set out in Table 2 below. The weighted long and short positions in each of 3 zones may be offset, subject to the matched portion attracting a disallowance factor that is part of the capital charge. The residual net position in each zone may be carried over and offset against opposite positions in other zones, subject to a second set of disallowance factors.

Table 2
Historical disallowances

Zones	Time-band	Within the zone	Between adjacent zones	Between zones 1 and 3
Zone 1	1 month or less	40%	40%	100%
	Over 1 month to 3 months			
	Over 3 months to 6 months			
	Over 6 months to 12 months			
Zone 2	Over 1 year to 2 years	30%	40%	
	Over 2 years to 3 years			
	Over 3 years to 4 years			
Zone 3	Over 4 years to 5 years	30%		
	Over 5 years to 7 years			
	Over 7 years to 10 years			
	Over 10 years to 15 years			
	Over 15 years to 20 years			
	Over 20 years			

Part II Equity Exposures

32. Report in this part the long and short positions in equities in the trading book, including instruments that exhibit market behavior similar to equities. The instruments covered include common stock (whether voting or non-voting), and convertible bonds (i.e., debt issues or preference shares that are convertible, at a stated price, into common shares of the issuer) which trade like equities. For non-convertible preference shares and those convertible bonds which trade like debt securities, they should be reported under Part I. Long and short positions in the same issue may be reported on a net basis.
33. The positions are to be reported on a market-by-market basis, i.e., under separate columns to indicate the exchange where the reported equities are listed/traded. For foreign markets, banks should indicate the country where the market is located. (Refer to example (4) in Annex A) Equities with listing in more than one market should be reported as positions in the market of their primary listing.
34. Matched positions in each identical equity market may be fully offset, resulting in a single net short or long position.
35. As with interest rate exposures, the capital charge is levied to separately cover both the specific risk and the general market risk. Calculation is done on an individual market basis. The unadjusted capital charge for specific risk will be 8% on the gross (i.e., long plus short) positions. The unadjusted general market risk charge will be 8% on the net position. Net long and short positions in different markets cannot be offset for the purpose of calculating general market risk charge.

Part III Foreign Exchange Exposures

36. Report in this part the amount in US dollars (USD) of net long or net short position in each currency. In addition, structural positions taken deliberately to hedge against the effects of exchange rate movements on the capital adequacy of the reporting bank may be excluded. This should be cleared with the Bangko Sentral prior to reporting.

37. Net long/(short) position shall refer to FX assets (excluding FX items allowed under existing regulations to be excluded from FX assets in the computation of a bank's net FX position limits) less FX liabilities (excluding FX items allowed under existing regulations to be excluded from FX liabilities in the computation of a bank's net FX position limits), plus contingent FX assets less contingent FX liabilities.
38. Banks which base their normal management accounting of forward currency positions on net present values shall use the net present values of each position, discounted using current interest rates, for measuring their positions. Otherwise, forward currency positions shall be measured based on notional amount.
39. The total USD amount of net long or net short position in each currency should then be converted at spot rates into Philippine peso. The overall net open position is the greater of the absolute value of the sum of net long position or sum of net short position.
40. The unadjusted capital charge will be eight (8%) of the overall net open position.

Part IV Internal Models Approach

41. Only those banks which have obtained the Bangko Sentral's approval to adopt their internal value-at-risk (VaR) models to calculate their market risk capital charges in lieu of the standardized methodology are required to report in this part.

1. Value-at-risk results

42. Report in this part the value-at-risk (VaR) results as at the last trading day of the reference quarter in column (a) and the average VaR over the most recent 60 trading days of the reference quarter in column (b), both for each individual market risk category using internal models approach, i.e., items 1.1 to 1.3, and for the aggregate of these risk categories, i.e., item 1.4.
43. Provided that the Bangko Sentral is satisfied with the bank's system for measuring correlations, recognition of empirical correlations across broad risk categories (e.g., interest rates, equity prices and exchange rates) may be allowed. The VaR for the aggregate of all risk categories will therefore not necessarily be equal to an arithmetic sum of the VaR for the individual risk category.
44. Report also in this part the number of backtesting exceptions for the past 250 trading days (from the reference quarter-end going backwards), based on:
 - actual daily changes in portfolio value, in item 1.4. column (c), and
 - hypothetical changes in portfolio value that would occur were end-of-day positions to remain unchanged during the 1 day holding period, in item 1.4 column (d), for the aggregate of the broad risk categories.
45. The multiplication factor to be reported in item 1.4 column (e) is the summation of the following 3 elements:
 - (a) the minimum multiplication factor of 3;
 - (b) the "plus" factor ranging from 0 to 1 based on the number of backtesting exceptions (i.e., the larger of item 1.4 column (c) or item 1.4 column (d)) for the past 250 trading days as set out in Table 3 below: and
 - (c) any additional "plus" factor as may be prescribed by the Bangko Sentral.

Table 3
"Plus" factor based on the number of backtesting exceptions for the past 250 trading days

Zone	Number of exceptions	"Plus" factor
Green zone	0	0.00
	1	0.00
	2	0.00
	3	0.00
	4	0.00
Yellow zone	5	0.40
	6	0.50
	7	0.65
	8	0.75
	9	0.85
Red zone	10 or more	1.00

46. Capital charge for general market risk calculated by internal models reported in item 1.6 is larger of:

- (a) Item 1.4 column (a), i.e., VaR for the aggregate of all risk categories, as at the last trading day of the reference quarter; or
- (b) Item 1.5, i.e., the average VaR for the last 60 trading days of the reference quarter [(item 1.4 column (b)) times the multiplication factor [(item 1.4 column (e)) set out in paragraph 45 above.

2. Specific risk

47. Capital charge for the specific risk of debt securities and equities is to be reported using either of the following two methods:

- (a) For banks which incorporate the specific risk into their models, report the capital charge for the total specific risk calculated by the models in item 1.7 of Part IV.1; or
- (b) For banks which do not incorporate the specific risk into their models, report the specific risk of debt securities in Part I.1 according to the instructions in paragraphs 14-18 and 26-27. For equities, report the specific risk in Part II according to the instructions in paragraphs 32 to 35.

3. Largest daily losses over the quarter

48. Report in this part in descending order (i.e., the largest loss first) the 5 largest daily losses over the reference quarter and their respective VaRs for the risk exposures which are measured by the internal models approach. If the number of daily losses during the quarter is less than 5, report only all such daily losses.

Part V Adjusted Capital Adequacy Ratio

- 49. The market risk capital charges should be aggregated and converted to a market risk-weighted exposure. The total market risk capital charge is the sum of the capital charges for individual market risk categories computed using either (a) the standardized approach, or (b) the internal models approach. The total capital charges for individual market risk categories using the standardized approach should be multiplied by 125% (to be consistent with the higher capital charge for credit risk, i.e., 10% as opposed to the BIS recommended 8%.)
- 50. The total market risk-weighted exposure is computed by multiplying the total market risk capital charges by 10. (The multiplier 10 is the reciprocal of the Bangko Sentral required minimum capital ratio for credit risk of 10%.) The qualifying capital and total credit risk weighted exposures are extracted from Part V.A and Part V.B, respectively, of the Report on the Computation of Risk-Based Capital Adequacy Ratio covering credit risk.
- 51. For on-balance-sheet debt securities and equities in the trading book included in Parts I, II and IV of this Report, the credit risk-weighted exposures reported in Part II of the Report on the Computation of the Risk-Based Capital Adequacy Ratio covering credit risk should be excluded in calculating the adjusted ratio covering combined credit risk and market risk. The market risk capital charges for these positions calculated in this Report cover all the capital requirements for absorbing potential losses arising from carrying such positions.

(Circular Nos. 890 dated 02 November 2015 and 827 dated 28 February 2015)

Annex A

Suppose as at 31 December, 200X, ABC Bank Corporation has the following trading book positions:

- (1) Long position in US Treasury Bond (7.5% annual coupon) with face value equivalent to PHP507.000MM and residual maturity of 8 years.

Market value based on quoted price: PHP518.914MM equivalent

- (2) Long position in an unrated floating rate note (6.25% current annual coupon) issued by a US corporate with face value equivalent of PHP260.000MM and next repricing 9 months after.

Market value based on quoted price: PHP264.758MM equivalent

- (3) Forward foreign exchange position of EUR5.000MM (long) against PHP250.000MM equivalent maturing in 3 months.
- (4) Long 1000 shares of a US listed company with current market price of PHP715.000MM equivalent.

Treatments:

- (1) Report market value (PHP518.914MM) of the long position in Part I.1, item I.2 and Part I.2, USD ladder, 7 to 10 years time band.
- (2) Report market value (PHP264.758MM) of the long position in Part I.1, item 1.9 and Part I.2, USD ladder, 6 to 12 months time band.
- (3) Report a long 3 months zero coupon security in Part I.2, EUR ladder, 1 to 3 months time band and a short 3 months zero coupon security in the Peso ladder, 1 to 3 months time band.

Assume 3 months EUR cash rate at 3.25%, 3-month Peso zero-coupon yield at 5.63% and spot exchange rate is 46.

PV of the EUR leg (i.e. receive side)

$$\begin{aligned}\text{EUR} &= \text{EUR}5.000\text{MM} / (1 + 0.0325 \times 0.25) \\ &= \text{P}228.146\text{MM equivalent}\end{aligned}$$

PV of the PHP leg (i.e. pay side)

$$\begin{aligned}\text{PHP} &= \text{P}250.000\text{MM} / (1 + 0.0563 \times 0.25) \\ &= \text{P}246.530\text{MM}\end{aligned}$$

(For simplicity Part III of the report is not presented in this example.)

- (4) Report market value in Part II, item 1 (US column).

**PROCEDURES TO BE OBSERVED BY UNIVERSAL AND COMMERCIAL BANKS APPLYING FOR BANGKO SENTRAL
RECOGNITION OF THEIR OWN INTERNAL MODELS FOR CALCULATING MARKET RISK CAPITAL
(Appendix to Sec. 125 on Market risk capital requirement)**

A. Bank's own self-assessment

A bank intending to use its own internal Value-at-Risk (VaR) models, in lieu of the standardized approach, for calculating market risk capital charge should conduct a self-assessment of its compliance with the requirements for the use of such models as prescribed in *Appendix 42*, using the attached questionnaire in Annex A.

B. Offsite assessment by Bangko Sentral

If a bank believes that it is in compliance with the abovementioned requirements for the use of internal models, it should submit a written application to the appropriate supervising department of the Bangko Sentral, together with the following:

1. Accomplished questionnaire;
2. A listing of the products to be included in the risk models;
3. Details as of end of the preceding quarter, by each product listed above, of:
 - a. The size of positions in terms of market value; and
 - b. The currencies in which it is traded,
4. Organizational structure and personnel;

The bank should submit latest organizational chart showing the names, reporting lines, and responsibilities of key personnel in-charge of trading, and of functions supporting the trading operations such as risk control, back office, internal audit, etc., and those at board level to whom they report. For those responsible for trading, the bank should provide details of their relevant qualifications and experience in the area of trading. For those responsible for risk control, the bank should provide details of their relevant qualifications and experience, particularly on the use of bank's models.

The bank should also provide information on the number of staff within the risk control unit¹, their internal reporting structure, responsibilities, qualifications and experience.

5. Full technical description of the model, indicating, among others, the following:
 - a. the type of VaR model used (e.g., variance-covariance matrix, historical simulation or Monte Carlo simulation);
 - b. the parameters which are integral to the VaR calculations, including assumptions regarding:
 - (1) confidence interval;
 - (2) holding period;
 - (3) length of historical data used to calculate volatility parameters;
 - (4) scaling factors applied to VaR numbers to convert shorter holding periods to longer holding periods;
 - (5) weighting scheme applied to historical data (e.g., giving recent observations more weight than less recent observations);
 - (6) probability distribution functions of input variables to the Monte Carlo simulation model;
 - (7) the frequency of input data updates (e.g., how often are historical data series updated, when are variance- covariance matrices revised, etc.);
 - (8) the other models which are used as inputs to the VaR model (e.g., option pricing models, interest rate sensitivity models, etc.) and how they interface with the model; and
 - (9) the frequency of VaR calculation;
 - c. an outline of the VaR risk measurement calculation and processes, including, where necessary, mathematical formulae. This should also include:
 - (1) the manner in which non-linear products, like options, are incorporated in the model;
 - (2) the extent to which correlation is allowed both within and across risk categories (i.e., interest rates, equity prices, exchange rates); and

¹ Referring generally to the risk management group functions in the BAP Financial Markets Risk Reference Manual.

- (3) the means by which specific risk is addressed within the VaR framework, if appropriate, and the explanation of the techniques by which this is achieved.

6. Policies and procedures for backtesting;

The bank should describe the methods of backtesting employed, including the treatment of intra-day trading profits and loss and fee income within the daily profit and loss figures. While the formal implementation of the Bangko Sentral prescribed backtesting program should begin on the quarter following the date of Bangko Sentral's recognition of the bank's internal model and thus implies that the formal accounting of exceptions under the Bangko Sentral prescribed backtesting program would be a year later, the bank should, at initial assessment, submit at least the latest backtesting result based on its own backtesting program, including the confidence level used in calculating the VaR numbers. The confidence level used shall dictate the number of daily observations on which the backtesting will be applied (e.g., 250 number of observations for a ninety-nine percent (99%) confidence level, and a higher number of observations for a confidence level higher than ninety-nine percent (99%), subject to a minimum of 250 observations.

7. Policies and procedures for stress testing;

8. Internal validation reports which should include the following:

- a. the latest review of the overall risk management process by the applicant bank's internal auditors; and
- b. the latest validation of the formulae used in the calculation process, as well as for the pricing of options and other complex instruments by a qualified unit which is independent from the trading area; and

9. Validation reports of external auditor.

The bank should stand ready to make a presentation to the Bangko Sentral on its compliance with the abovementioned requirements for the use of internal models.

C. On-site assessment by Bangko Sentral

The Bangko Sentral shall conduct an on-site assessment of the models to review both the technical details of the models and the risk management practices that govern their use.

During the on-site assessment, the bank should give a brief demonstration of how its models work. The demonstration should cover the following:

1. how model inputs are fed into the system including extent of manual inputs;
2. how VaR numbers are calculated;
3. how results are generated and interpreted;
4. accuracy in terms of back testing results;
5. stress testing capability;
6. use of model outputs in risk management; and
7. limitations of the model.

The onsite assessment shall also include interview with the concerned officers and personnel of the bank.

D. Assessment on an ongoing basis by the Bangko Sentral.

After initial recognition of the models by the Bangko Sentral, the bank should inform the Bangko Sentral of any material change to the models, including change in the methodology or scope to cover new products and instruments. The Bangko Sentral shall determine whether the models remain acceptable for calculating the market risk capital charge.

The Bangko Sentral shall likewise conduct a periodic assessment of the models and the controls surrounding the models at least annually to ensure that they remain compliant with the minimum qualitative and quantitative requirements prescribed under *Appendix 42* on an ongoing basis. Non-compliance with the minimum requirements shall be ground for disallowing the use of such models.

(Name of Bank)

COMPLIANCE WITH THE REQUIREMENTS FOR THE USE OF INTERNAL MODELS

Criteria	Yes	No	Bank's Explanations ¹
I. General Criteria			
1. Is the bank's risk management system conceptually sound and implemented with integrity?			
2. Does the bank have sufficient number of staff skilled in the use of sophisticated models not only in the trading area but also in the risk control, audit, and if necessary, back office area?			
3. Do the bank's models have a proven track record of reasonable accuracy in measuring risk?			
4. Does the bank conduct stress tests along the lines discussed in Item V below?			
II. Qualitative Standards			
1. Does the bank have an independent risk control unit that is responsible for the design and implementation of the bank's risk management system?			
- Does the unit produce and analyze daily reports on the output of the bank's risk measurement model, including an evaluation of the relationship between measures of risk exposure and trading limits?			(Cite examples of reports produced by the unit and indicate what time of day these reports are calculated.)
- Is the unit independent from business trading units?			
• Does the unit report directly to senior management of the bank?			
2. Does the risk control unit conduct a regular backtesting program, i.e., an ex post comparison of the risk measure generated by the model against actual daily changes in portfolio value over longer periods of time, as well as hypothetical changes based on static positions?			
3. Does the risk control unit conduct a regular backtesting program, i.e., an ex post comparison of the risk measure generated by the model against actual daily changes in portfolio value over longer periods of time, as well as hypothetical changes based on static positions?			
4. Are the board of directors (or equivalent management committee in the case of Philippine branches of foreign banks) and senior management actively involved in the risk control process?			
5. Are the board of directors (or equivalent management committee in the case of Philippine branches of foreign banks) and senior management actively involved in the risk control process?			
• Do the board of directors (or equivalent management committee in the case of Philippine branches of foreign banks) and senior management regard risk control as an essential aspect of the business to which significant resources need to be devoted?			
• Are daily reports prepared by the independent risk control unit reviewed by a level of management with sufficient seniority and authority to enforce both reductions of positions taken by individual traders and reductions in the bank's overall risk exposure?			

¹ The questions in this checklist may already be addressed by other materials submitted by the Bank. In such cases, please indicate in this column the appropriate reference document.

Criteria	Yes	No	Bank's Explanations ¹
6. Is the bank's internal risk measurement model closely integrated into the day-to-day risk management process of the bank?			
- Is the output of the internal risk measurement model accordingly an integral part of the process of planning, monitoring and controlling the bank's market risk profile?			
7. Is the risk measurement system used in conjunction with internal trading and exposure limits?			
- Are trading limits related to the bank's risk measurement model in a manner that is consistent over time and that is well-understood by both traders and senior management?			
8. Is a routine and rigorous program of stress testing in place as a supplement to the risk analysis based on day-to-day output of the bank's risk measurement model?			
- Are the results of stress testing exercises reviewed periodically by senior management and reflected in the policies and limits set by management and the board of directors (or equivalent management committee in the case of Philippine branches of foreign banks)?			
- Where stress tests reveal particular vulnerability to a given set of circumstances, are prompt steps taken to manage those risks appropriately (e.g., by hedging against that outcome or reducing the size of the bank's exposures)?			
9. Does the bank have a routine in place for ensuring compliance with a documented set of internal policies, controls and procedures concerning the operation of the risk measurement system?			
- Is the bank's risk measurement system well documented, i.e. through a risk management manual that describes the basic principles of the risk management system and that provides an explanation of the empirical techniques used to measure market risk?			
10. Is an independent review of the risk measurement system carried out regularly in the bank's own internal auditing process?			
- Does this review include both the activities of the business trading units and of the independent risk control unit?			
- Does the review of the overall risk management process take place at regular intervals (ideally not less than once a year)?			
- Does the review address the following:			
- the adequacy of the documentation of the risk management system and process?			
- the organization of the risk control unit?			
- the integration of market risk measures into daily risk management?			
- the approval process for risk pricing models and valuation systems used by front and back-office personnel?			
- the validation of any significant change in the risk measurement process?			
- the scope of market risks captured by the risk measurement model?			
- the integrity of the management information system?			
- the accuracy and completeness of position data?			
- the verification of the consistency, timeliness and reliability of data sources used to run internal models, including the independence of such data sources?			
- the accuracy and appropriateness of volatility and correlation assumptions?			

Criteria	Yes	No	Bank's Explanations ¹
- the accuracy of valuation and risk transformation calculations?			
- the verification of the model's accuracy through frequent backtesting as discussed in Item II.2 above?			
III. Specification of Market Risk Factors			
A. Interest Rates			
Is there a set of risk factors corresponding to interest rates in each currency in which the bank has interest rate-sensitive on- or off- balance sheet positions?			
1. Does the risk measurement system model the yield curve using one (1) of a number of generally accepted approaches, e.g., by estimating forward rates of zero coupon yields?			
2. Is the yield curve divided into various maturity segments in order to capture variation in the volatility of rates along the yield curve, with one (1) risk factor corresponding to each maturity segment?			
3. For material exposures to interest rate movements in the major currencies and markets, does the bank model the yield curve using a minimum of six (6) risk factors?			
4. Does the risk measurement system incorporate separate risk factors to capture spread risk (e.g., between bonds and swaps)?			
B. Equity Prices			
1. Are there risk factors corresponding to each of the equity markets in which the bank holds significant positions?			
• Is there, at a minimum, a risk factor that is designed to capture market-wide movements in equity prices (e.g., a market index)?			
2. Does the sophistication and nature of the modeling technique for a given market correspond to the bank's exposure to the overall market as well as its concentration in individual equity issues in that market?			
C. Exchange Rates			
Does the risk measurement system incorporate risk factors corresponding to the individual foreign currencies in which the bank's positions are denominated, i.e., are there risk factors corresponding to the exchange rate between the Philippine peso and each foreign currency in which the bank has a significant exposure?			
IV. Quantitative Standards			
1. Is "Value-at-risk" (VaR) computed on a daily basis?			
2. Is a 99th percentile, one-tailed confidence interval used?			
3. Is an instantaneous price shock equivalent to a ten (10) day movement in prices used, i.e., is the minimum "holding period" ten (10) trading days?			
• If VaR numbers are calculated according to a shorter holding period, is this scaled up to ten (10) days by the square root of time?			
4. Is the historical observation period (sample period) at least one (1) year?			
If a weighting scheme or other methods for the historical observation period are used, is the "effective" observation period at least one year (that is, the weighted average time lag of the individual observations is not less than six (6) months)?			
5. Are data sets updated no less frequently than once every three (3) months?			
• Are data sets reassessed whenever market prices are subject to material changes?			
6. For banks with option transactions			
• Does the bank's model capture the non-linear price characteristics of options positions?			

Criteria	Yes	No	Bank's Explanations ¹
<ul style="list-style-type: none"> Is a ten (10)-day price shock applied to options positions or positions that display option-like characteristics? 			
<ul style="list-style-type: none"> Does the bank's risk measurement system have a set of risk factors that captures the volatilities of the rates and prices underlying option positions, i.e., vega risk? 			
<ul style="list-style-type: none"> For banks with relatively large and/or complex options portfolios, does the bank have detailed specifications of the relevant options volatilities, i.e., does the bank measure the volatilities of options positions broken down by different maturities? 			
V. Stress Testing			
1. Does the bank have a rigorous and comprehensive stress-testing program in place?			
2. Do the bank's stress scenarios cover a range of factors that can create extraordinary losses or gains in trading portfolios, or to make the control of risks in those portfolios very difficult, e.g., low-probability events in all major types of risks, including the various components of market, credit, and operational risks?			
<ul style="list-style-type: none"> Do the stress scenarios shed light on the impact of such events on positions that display both linear and non-linear price characteristics (i.e. options and instruments that have options-like characteristics)? 			
3. Are the bank's stress tests both of a qualitative and quantitative nature, incorporating both market risk and liquidity aspect of market disturbances?			
<ul style="list-style-type: none"> Do quantitative criteria identify plausible stress scenarios to which banks could be exposed? 			
4. Are the results of stress testing reviewed periodically by senior management?			
<ul style="list-style-type: none"> Are the results of stress testing reflected in the policies and limits set out by management and the board of directors (or equivalent management committee in the case of Philippine branches of foreign banks)? 			
<ul style="list-style-type: none"> If the bank's testing reveals particular vulnerability to a given set of circumstances, does the bank take prompt steps to manage those risks appropriately (e.g., by hedging against the outcome or reducing the size of its exposures)? 			
VI. External Validation			
Is the model accuracy validated by external auditor?			
<ul style="list-style-type: none"> If yes, does the validation include - 			
<ul style="list-style-type: none"> - Verification of the internal auditors' report on their review of the bank's overall risk management process? 			
<ul style="list-style-type: none"> - Ensuring that the formula used in the calculation process, as well as for pricing of options and other complex instruments, are validated by a qualified unit, which is independent from the trading area? 			
<ul style="list-style-type: none"> - Checking the adequacy of the structure of the internal models with respect to the bank's activities? 			
<ul style="list-style-type: none"> - Checking the results of the backtesting to ensure that the internal model provides a reliable measure of potential loss over time? 			
<ul style="list-style-type: none"> - Ensuring the transparency and accessibility of the data flows and processes associated with the risk measurement system? 			

**GUIDELINES FOR THE ESTABLISHMENT AND ADMINISTRATION/MANAGEMENT OF SINKING FUND
FOR THE REDEMPTION OF REDEEMABLE PRIVATE PREFERRED SHARES
(Appendix to Sec. 122 on Issuance of redeemable shares: conditions; certification and report; sanctions)**

Sinking fund shall refer to a fund set aside in order to accumulate the amount necessary for the redemption of redeemable preferred shares.

A. Establishment and Composition

1. Documentation

- a. A resolution by the bank's board of directors authorizing the Chief Executive Officer/President of the bank to establish a sinking fund equal to the reserve for retirement of preferred shares for the sole purpose of redemption of redeemable preferred shares at their maturity dates.
- b. Investment Plan. The plan shall be approved by the board of directors and should indicate the types/classes of investments for the sinking fund. The amount of initial/periodic contributions set forth in the Investment Plan shall be in accordance with Section B par. 1 below. A copy of the Plan shall be submitted to the Bangko Sentral within thirty (30) calendar days from approval thereof by the bank's board of directors.

2. Eligible Securities and Investments

The sinking fund may be invested in the following:

- a. Evidence of indebtedness of the Republic of the Philippines and/or the Bangko Sentral, or any other evidence of indebtedness or obligations the servicing and repayment of which are fully guaranteed by the Republic of the Philippines;
- b. Evidence of indebtedness or obligation of the central monetary authority of a foreign country, denominated in the national currency of the issuing country, the servicing and repayment of which are fully guaranteed by the government of such country;
- c. Deposits with private and/or government banks to the extent covered by deposit insurance; and
- d. Such other securities as the Monetary Board may designate from time to time.

Banks shall refrain from investing sinking fund resources in highly volatile, high-risk commercial instruments.

B. Operation

1. Amount of Annual Investment

The annual contribution to the sinking fund shall be equal to the reserve for retirement set up for the year, equivalent to the amount of redeemable shares issued divided by their respective terms, i.e., number of years from date of issue to date of maturity.

2. Accounting Entries - please refer to Annex "A".

3. Administration

- a. Responsible Officer. The sinking fund shall be administered by the Chief Executive Officer or his duly authorized representative, who shall be an employee of the bank with a rank not lower than manager or its equivalent, preferably with experience in treasury operations. The administrator shall be responsible for investment decisions and the maintenance of records of the sinking fund. He shall be responsible for the execution of the Investment Plan, and may deviate from the Plan only upon the approval of the board of directors.

In the case of RBs/Coop Banks, the bank president or the general manager or the officer-in-charge shall be designated as the administrator of the sinking fund.

- b. Sinking Fund Manager. The board of directors shall delegate the management of the fund to an independent fund manager, e.g., trust company, where the amount of the fund is equivalent to five percent (5%) or more of the authorized redeemable private preferred shares, in case of UBs and KBs, or when such fund amounts to P1.0 million or more in the case of TBs and RBs/Coop Banks: Provided, That the sinking fund manager shall

invest only in such securities as are prescribed in these guidelines: Provided, further, That a bank/financial institution acting as sinking fund manager may not designate the owner of the fund it manages as the sinking fund manager of its own sinking fund established for the same purpose.

- c. Reports. The administrator shall submit to the Board a quarterly report on the status of the Fund. The report shall include the to-date balance of the fund, its composition, income earned for the period, a reasonable forecast for the various financial instruments into which the fund has been placed, and the administrator's/ fund manager's recommendations or proposals regarding the fund. In its evaluation of the report the Board shall ascertain the degree of risk that the sinking fund is exposed to and prescribe the appropriate corrective actions.

The report of the administrator/fund manager shall be under oath and made available for examination by the Bangko Sentral.

- d. Review of the Investment Plan. The Board shall conduct an annual evaluation of the Investment Plan and the performance of the administrator/fund manager, and may introduce amendments to or revisions of the Plan, a copy of which shall be submitted to the Bangko Sentral.
- 4. Sanctions. Failure to comply with the guidelines shall subject the bank and its directors and officers to the sanctions prescribed Item "c" of Sec. 122 Issuance of redeemable shares; conditions; certification and report; sanctions and Sections 36 and 37 of R.A. No. 7653.

Summary of Pro-Forma Journal Entries to Record Sinking Fund Transactions

- a. Setting up the sinking fund. The initial contribution to the sinking fund shall be recorded as follows:

1. To set up Reserve for Retirement of Preferred Stock

Undivided Profits/Surplus Free	xxx	
Other Surplus Reserves – Reserve for Retirement of Preferred Stock		xxx

To transfer from free to restricted Surplus the amount set up as reserve for redemption of preferred shares.

2. To set up the subsidiary account – Sinking Fund (classified as Other Non-Current Assets)

IBODI/Others – Sinking Fund for Redemption of Preferred Shares	xxx	
Cash/Due from Banks		xxx

To set up the Sinking Fund for the Redemption of Preferred Shares.

- b. Contributions to the sinking fund

1. To set up the periodic Reserve for Retirement

Undivided Profits/Surplus Free	xxx	
Other Surplus Reserves – Reserve for Retirement of Preferred Stock		xxx

To transfer from free to restricted Surplus reserve for redemption of preferred shares.

- c. Income/loss from the sinking fund. The recognition of income/loss from the investments shall follow the existing accounting treatment/procedures prescribed in the Manual of Accounts for Banks

1. To record receipt or accrual of income due to the sinking fund

Cash/Due from Banks/ Accrued Other Income Receivable	xxx	
Other Income/Accrued Other Income		xxx

To record income earned from sinking fund assets.

- d. Redemption

1. Liquidation of sinking fund. Any gain or loss realized/incurred from liquidation of the sinking fund investments shall be credited/charged to operations.

Undivided Profits/ Surplus Free		
Cash	xxx	
IBODI/Others – Sinking Fund for Redemption of Preferred Shares		xxx
Other Income – Gain on Sale of Sinking Fund Securities		xxx

To record the liquidation of sinking fund assets and recognize income therefrom.

or:

- | | | |
|--|-----|-----|
| Cash | xxx | |
| Loss from Sale of Sinking Fund Securities | | xxx |
| IBODI/Others – Sinking Fund for Redemption of Preferred Shares | | xxx |

To record the liquidation of sinking fund assets and loss incurred therefrom.

2. Transfer to Undivided Profits/Surplus Free of the balance of the Restricted Surplus account

Other Surplus Reserves – Reserve for Retirement of Preferred Stock	xxx	
Undivided Profits/ Surplus Free		xxx

To close the restricted surplus account 'Other Surplus Reserves – Retirement of Preferred Stock' and to revert the balance of the same to Undivided Profits/Surplus Free.

3. Redemption of preferred shares, declaration of stock dividend equal to amount of preferred shares redeemed and payment of such dividend through the issuance of new shares of stock

(a) Capital Stock – Preferred Shares	xxx	
Cash/Due from Banks		xxx

To record the redemption of redeemable preferred shares.

(b) Undivided Profits/Surplus Free	xxx	
Dividends Distributable		xxx

(b) Dividends Distributable	xxx	
Capital Stock – Common Stock/Preferred Stock		xxx

To record payment of stock dividend (common stock).

- e. Treatment of changes in the market of the sinking fund portfolio. Gains and losses arising from changes in market values of component securities shall be deferred (not recognized) until the securities are liquidated.

ACTIVITIES WHICH MAY BE CONSIDERED UNSAFE OR UNSOUND BANKING
(Appendix to Secs. 181 and 420)

The following activities are considered only as guidelines and are not irrebutably presumed to be unsafe or unsound. Conversely, not all practices which might under the circumstances be termed unsafe or unsound are mentioned here. The Monetary Board may now and then consider any other acts/omissions as unsafe or unsound transactions.

- a. Operating with management whose policies and practices are detrimental to the bank and jeopardize the safety of its deposits.
- b. Operating with total adjusted capital and reserves that are inadequate in relation to the kind and quality of the assets of the bank.
- c. Operating in a way that produces a deficit in net operating income without adequate measures to ensure a surplus in net operating income in the future.
- d. Operating with a serious lack of liquidity, especially in view of the asset and deposit/liability structure of the bank.
- e. Engaging in speculative and hazardous investment policies.
- f. Paying excessive cash dividends in relation to the capital position, earnings capacity and asset quality of the bank.
- g. Excessive reliance on large, high-cost or volatile deposits/borrowings to fund aggressive growth that may be unsustainable.

For this purpose, a bank is considered offering high-cost deposit/borrowings if the effective interest rate paid on said deposits/ borrowings and/or non-cash incentives is fifty percent (50%) over the prevailing comparable market median rate for similar bank categories, maturities and currency denomination and accompanied by other circumstance/s such as:

- (1) Undue reliance on solicitation and acceptance of brokered deposits;
 - (2) Bank incurs large sum of deposit generation expenses in the form of commissions, referral and solicitation fees and related expenses and/or payment of advance interest on deposits;
 - (3) Deferral of the above deposit generation expenses incurred to delay recording of expenses and/or inaccurate amortization of advance interest paid on deposits.
 - (4) Deposit packages offered include non-cash incentives disproportionate to the amount of deposits sought which give undue or unwarranted advantage or preference for the bank; and
 - (5) Bank markets, solicits and accepts deposits outside the bank premises including branches, unless otherwise authorized by the Bangko Sentral under Secs. 274 and 420.
- h. Excessive reliance on letters of credit either issued by the bank or accepted as collateral to loans advanced.
 - i. Excessive amounts of loan participations sold.
 - j. Paying interest on participations without advising participating institution that the source of interest was not from the borrower.
 - k. Selling participations without disclosing to the purchasers of those participations material, non-public information known to the bank.
 - l. Failure to limit, control and document contingent liabilities.
 - m. Engaging in hazardous lending and tax collection policies and practices, as evidenced by any of the following circumstances:
 - (1) An excessive volume of loans subject to adverse classification;
 - (2) An excessive volume of loans without adequate documentation, including credit information;
 - (3) Excessive net loan losses;

- (4) An excessive volume of loans in relation to the total assets and deposits of the bank;
 - (5) An excessive volume of weak and self-serving loans to persons connected with the bank, especially if a significant portion of these loans are adversely classified;
 - (6) Excessive concentrations of credit, especially if a substantial portion of this credit is adversely classified;
 - (7) Indiscriminate participation in weak and undocumented loans originated by other institutions;
 - (8) Failing to adopt written loan policies;
 - (9) An excessive volume of past due or non-performing loans;
 - (10) Failure to diversify the loan portfolio/asset mix of the institution;
 - (11) Failure to make provision for an adequate reserve for possible loan losses;
 - (12) High incidence of spurious and fraudulent loans due to patently inadequate risk management systems and procedures resulting in significant impairment of capital;
 - (13) Bank's niche mostly consists of borrowers who have impaired or limited credit history, or majority of the loans are either clean/unsecured or backed with minimum collateral values except those underwritten using microfinance technology consistent with Sec. 314 and other acceptable cash flow-based lending systems; and the bank does not have a robust risk management system in place leaving the bank vulnerable to losses;
 - (14) Loan rates are excessively higher than market rates to compensate the added or higher risks involved. Excessively higher rates are those characterized by effective interest rates that are fifty percent (50%) over the prevailing comparable market median rate for similar loan types, maturities and collaterals; and
 - (15) Assignment of loans on without recourse basis with real estate properties as payment, resulting in total investment in real estate in excess of the prescribed ceiling.
- n. Permitting officers to engage in lending practices beyond the scope of their positions.
 - o. Operating the bank with inadequate internal controls.
 - p. Failure to keep accurate and updated books and records.
 - q. Operating the institution with excessive volume of out-of-territory loans.
 - r. Excessive volume of non-earning assets.
 - s. Failure to heed warnings and admonitions of the supervisory and regulatory authorities.
 - t. Continued and flagrant violation of any law, rule, regulation or written agreement between the institution and the Bangko Sentral.
 - u. Any other action likely to cause insolvency or substantial dissipation of assets or earnings of the institution or likely to seriously weaken its condition or otherwise seriously prejudice the interest of its depositors/investors/clients.
 - v. Non-observance of the principles and the requirements for managing and monitoring large exposures and credit risk concentrations under Sec. 143.
 - w. Improper or non-documentation of repurchase agreements covering government securities and commercial papers and other negotiable and non-negotiable securities or instruments.

(Circular No. 903 dated 29 February 2016)

CERTIFICATION OF COMPLIANCE WITH SECTION 55.4 OF REPUBLIC ACT NO. 8791
(Appendix to Sec. 276 on Certification of Compliance with Subsection 55.4 of R.A. No. 8791)

Name of Bank
Address of Head Office
Telefax/FaxNumber

The Deputy Governor
Financial Supervision Sector
Bangko Sentral ng Pilipinas
Manila, Philippines

Sir:

This is to certify that this bank, in the conduct of its business involving bank deposits, does not have in its employ any casual/non-regular personnel or employees/personnel, who are working after the probationary period of six (6) months, are still not being considered regular/permanent employees, personnel of the bank.

This certification is being submitted in compliance with the requirements of Circular No. 336 dated July 2, 2002 and Circular Letter dated November 11, 2003 implementing Section 55.4 of the General Banking Law of 2000.

Very truly yours,

Authorized Officer's Signature

GUIDELINES ON RETENTION AND DISPOSAL OF RECORDS OF RURAL AND COOPERATIVE BANKS
(Appendix to Sec. 172)

The following guidelines shall govern the retention and disposal of records of RBs/Coop Banks.

A. Classification of Records and Documents	Retention Period
1. Accounting Records	
(a) Books of accounts, audited financial/annual reports	10 years
(b) Tickets and supporting papers	10 years
(c) Official receipts (2nd copy)	10 years
2. Organization papers for the establishment of RBs/Coop Banks, branches/offices (organizational file), special license/authority granted by Bangko Sentral (e.g., authority to accept demand deposits, government deposits, fringe benefit plan)	Permanent
3. Updated Manual of operations, including compliance system, policies on personnel, security and other related matters	Permanent
4. Stock and transfer book and related records and documents	Permanent
5. Minutes of meeting	
(a) Stockholders/general assembly, board of directors	Permanent
(b) Other committees	10 years
6. Human resource files	
(a) Documents pertaining to members of the board of directors and stockholders	Permanent
(b) Bank officers and staff	5 years from resignation/separation/retirement
(c) Officers and staff with derogatory information	Permanent
7. Correspondence (to and from)	
(a) Bangko Sentral on examination findings/exceptions and directives; rediscounting, loans and advances	10 years except if there is a court case - until the case is finally resolved by the court
(b) Other government regulatory/supervisory authorities, e.g., PDIC, BIR, DOLE, SSS	5 years or as prescribed by the government institution concerned whichever is longer
(c) All other correspondence	5 years
8. Reports to Bangko Sentral (Financial and non-financial reports)	5 years
9. Reports to other government and non-government	5 years or as prescribed by the institution concerned whichever is longer
10. Records and documents on court cases/complaints	Permanent
11. Documents, certificates of ownership/titles on bank assets	Permanent
12. All other records/documents of all transactions, e.g., loans and investments, disposal of assets, deposit liabilities and borrowings, expenditures of/settled and income, disbursements, disposal of assets	10 years from dates when accounts were closed/disposed

Notwithstanding the retention periods herein, RBs/Coop Banks may preserve for a longer period those records/documents they deem necessary.

In cases where specific laws or Bangko Sentral issuances require a different retention period, the longer retention period shall be observed.

B. Procedural requirements on disposal of banks records and documents

1. No RBs/Coop Banks shall dispose of any records without the prior approval of its board of directors.
2. All records and documents for disposal must be burned or shredded in the presence of a director of the bank duly designated by the board of directors, the chief operating officer or equivalent rank and the compliance officer.
3. The designated director, the chief operating officer (or its equivalent) and the compliance officer shall execute a joint affidavit (Annex A) attesting to the burning/shredding of the records/documents.

The original copy of the joint affidavit shall be kept permanently by the treasurer or cashier and must be made available for inspection by the Bangko Sentral.

As of 22 January 2003, MART 1-Bloomberg, 3-year term loan has a yield of 9.25% and 5 year term loan has a yield of 10.75%. With a premium of 2%, the 3-year rate will be set at 11.25% and the 5-year rate at 12.75%.

² The Program will not decline a loan only on the basis of inadequate collateral. However, the borrower must be willing to mortgage all available business and personal collateral, including assets to be acquired from the loan to secure the borrowing.

**GUIDELINES ON REQUESTS FOR MONETARY BOARD OPINION ON THE MONETARY AND BALANCE
OF PAYMENTS IMPLICATIONS OF PROPOSED DOMESTIC BORROWINGS BY
LOCAL GOVERNMENT UNITS (LGUs) PURSUANT TO SECTION 123 OF REPUBLIC ACT NO. 7653
(Appendix to Sec. 316)**

Pursuant to Monetary Board Resolution No. 1125 dated 22 June 2016, the following guidelines shall govern the domestic borrowings of LGUs-in line with R.A. 7653 (The New Central Bank Act), as well as other pertinent laws/regulations.

I. Coverage

This shall govern domestic borrowings of LGUs within the Philippines, the procedures to be observed and the documentary requirements to be submitted, relative to the request for Monetary Board opinion on the probable effects of the proposed credit operation on monetary aggregates, the price level and the balance of payments (BOP), pursuant to Section 123 of R.A. No. 7653.

II. Procedures

- a. The LGU shall submit a written request to the Bangko Sentral for Monetary Board opinion on the monetary and BOP implications of its proposed borrowing prior to the loan release. The request shall be accompanied by the required documents and information listed in Section III of this *Appendix*.
- b. The Bangko Sentral shall acknowledge receipt of the request, with an initial evaluation of the documents/information submitted. No request will be processed should there be any deficiency or inconsistency found in the documents/information submitted.
- c. Once the LGU has submitted the complete set of required documents/information, the matter shall be elevated to the Monetary Board for an opinion on the probable monetary and BOP implications of the proposed loan.
- d. The LGU shall be informed in writing of the Monetary Board's decision on its request for opinion and shall contain the following conditions:
 - (1) The loan proceeds shall only be released by the lending institution to the LGU subject to the submission of a duly executed ordinance approving the proposed borrowing, its purpose, terms and conditions, as well as the provincial/city/ municipal validation of the ordinance, as applicable;
 - (2) The opinion of the Monetary Board is limited to the assessment of the monetary and BOP implications of the proposed borrowing, pursuant to Section 123 of R.A. No. 7653. The said opinion is based on: (i) the information contained in the documents submitted; and (ii) the assumption that the proceeds of the borrowing will be used for the intended purpose described in the documents submitted;
 - (3) The Monetary Board opinion is valid only for one (1) year from the date of issue. The validity period refers to the time within which the proposed loan is to be released in part or in full. It commences on the date of the Bangko Sentral letter transmitting the said Monetary Board opinion on the monetary and BOP implications of the LGU's proposed loan;
 - (4) The LGU shall submit to Bangko Sentral a post-borrowing report on the final terms and conditions and on the utilization of the proceeds of the borrowing within thirty (30) days after the final disbursement of the loan proceeds; and
 - (5) The Monetary Board opinion should not in any way be construed as exempting the borrowing LGU from the applicable requirements and/or prohibitions under existing laws, rules and regulations.
- e. No opinion will be issued by the Monetary Board in case the LGU loan has already been partially or fully disbursed.
- f. For LGU loans with amounts that exceed the borrowing capacity, as indicated in the certification on the borrowing and debt service capacity issued by the Bureau of Local Government Finance (BLGF), the Monetary Board opinion will refer only to the amount that is within the borrowing capacity.

- g. The LGU shall request a new Monetary Board opinion should there be any increase in the loan amount in excess of ten percent (10%), or a change in the manner of acquisition of the project/s to be funded (i.e., whether for importation or local purchase) after a Monetary Board opinion has been issued: *Provided*, That no release has been made of the loan.
- h. LGUs that are unable to avail of their loan during the one (1) year validity period shall request for a new Monetary Board opinion on their proposed loan. They shall submit to Bangko Sentral the required documents and information under Item "a" of Section III of this *Appendix*. However, the LGU would only need to submit the required documents under Items "(1)" to "(3)" of Item "b" under Section III of this *Appendix* to the lending institution if there are changes to the previously submitted documents.

III. Required Documents and Information

- a. Request for Monetary Board opinion. To support the request for Monetary Board opinion, the LGU must submit the following documents/information to Bangko Sentral:
 - (1) Letter from the LGU requesting for Monetary Board opinion on its proposed loan (use the prescribed form attached as *Annex 1*). The letter should contain:
 - (a) Information on the loan amount, purpose with breakdown of specific project/s to be funded and corresponding cost/s, manner of acquisition (i.e., whether through importation or local purchase), name of lending institution, interest rate, term/tenor, fees and other charges, lending institution's source of fund for the loan, and name of designated contact person responsible for coordinating with the Bangko Sentral along with contact information;
 - (b) Statement certifying that no disbursement, in full or partial amounts, has been made on the loan; and
 - (c) The names and signatures of the LGU's chief executive and the lending institution's authorized representative.
 - (2) Valid BLGF certification on the borrowing and debt service capacity of the LGU; and
 - (3) Information on the LGU's year-to- date outstanding loans (use the prescribed form attached as *Annex 2*).
- b. Release of loan proceeds. The lending institution shall require the submission of the Monetary Board opinion on monetary and BOP implications prior to the release of the loan proceeds or the release of the first tranche, in case of loans with multiple tranches. In addition, lending institutions may release the loan proceeds only upon receipt from the LGU of the following documents/information:
 - (1) Ordinance approving the proposed loan terms and conditions as well as the specific purpose and corresponding amount/s of the project/s to be funded (sample copy attached as *Annex 3*);
 - (2) Other applicable requirements under R.A. No. 7160, such as the provincial/city/ municipal validation of the ordinance, as applicable.
 - (3) Waiver on the confidentiality of investment and bank deposits, whether in peso or foreign currency, duly executed by the governor/mayor/barangay chairman, as the case may be, and supported by a "waiver resolution" (sample copy attached as *Annex 4*).
- c. The Bangko Sentral may request for additional documents and information from the LGU or the lending institution, as may be deemed necessary, to support the request for Monetary Board opinion.
- d. LGUs requesting for Monetary Board opinion on proposed borrowings to be obtained from lending institutions other than BSP-supervised financial institutions (BSFIs), shall submit to Bangko Sentral a written request accompanied by the required documents/information enumerated above.

IV. Reportorial requirements

- a. *Post-Borrowing Report (PBR)*. The borrowing LGU shall submit to Bangko Sentral, through a letter addressed to the Director, Department of Economic Research or through electronic mail addressed to mbopinion_der@bsp.gov.ph, a post-borrowing report (PBR) that will indicate the actual amount of loan, the final terms and conditions, and utilization of the proceeds of the borrowing within thirty (30) calendar days after the

- final release of loan proceeds (use the prescribed form attached as *Annex 5/5.1*).
- b. *Post-Loan Release Report (PLRR)*. The lending institutions shall submit to Bangko Sentral, through a letter addressed to the Director, Department of Economic Research or through electronic mail addressed to mbopinion_der@bsp.gov.ph, a semestral post-loan release report on LGU loans granted in full within the last six (6) months that will indicate the actual amount of loan released as well as the final terms and conditions thereof, within thirty (30) calendar days after the end of each semester (use the prescribed form attached as *Annex 6*).
 - c. *Sworn certification on lendings to local government units (LGUs)*. The BSFIs shall submit, through a letter addressed to the appropriate supervising department of the Bangko Sentral, within fifteen (15) banking days after every semester, a duly notarized certification on loan releases to LGUs signed by the president or an officer of equivalent rank and the chief compliance officer. Such certification shall be considered as a *Category A-2* report for purposes of imposing fines on the delayed submission of required reports pursuant to existing regulations. (Use the prescribed form attached as *Annex 7*).

(Circular No. 926 dated 13 September 2016)

For bond flotation:

Details of proposed bond flotation	
a. Lender/Investor	
b. Trustee bank	
c. Amount (in Php million)	
d. Bond name/label	
e. Purpose/s	<i>Please provide breakdown of specific projects, including cost and mode of acquisition</i>
f. Interest rate (in percent per annum)	
g. Term/tenor (in no. of years)	
h. Collateral/security	
i. Fees and charges	
j. Payment terms and condition	
k. Borrowing capacity (in Php million)	
l. Financial advisor	
m. Underwriter	
n. Guarantor	

Relative to this, we would like to certify that no disbursement, in part or in full, has been made on the proposed loan.

Please find attached documents and information in support of our request, as follows:

- a. Latest DOF-BLGF certification on the net debt service ceiling and borrowing capacity; and
- b. Information on the LGU's year-to-date outstanding loans (*use the form attached as Annex 2 of Appendix 53*).

Also, please find below the name/s and details of our designated contact person/s whom you may coordinate with relative to this request for Monetary Board opinion:

**LOANS RELEASED TO
LGUs WITHOUT THE REQUISITE MONETARY BOARD OPINION**

(Name of BSFI)

LGU	Amount Released	Date of Release	Justifications/explanation for the loan release without the requisite Monetary Board opinion

**GUIDELINES ON REQUESTS FOR MONETARY BOARD OPINION ON THE MONETARY AND BALANCE
OF PAYMENTS IMPLICATIONS OF PROPOSED DOMESTIC BORROWINGS BY GOVERNMENT-OWNED
AND/OR -CONTROLLED CORPORATIONS (GOCCs), LOCAL WATER DISTRICTS (LWDs) AND
STATE UNIVERSITIES AND COLLEGES (SUCs) PURSUANT TO SECTION 123 OF R.A. NO. 7653
(Appendix to Sec. 316)**

Pursuant to Monetary Board Resolution No. 1125 dated 22 June 2016, the following guidelines shall govern the domestic borrowings of Government-owned and/or Controlled Corporations (GOCCs), Local Water Districts (LWDs) and State Universities and Colleges (SUCs), in line with R.A. No. 7653 (The New Central Bank Act), as well as other pertinent laws/regulations.

I. Coverage

This shall govern domestic borrowings¹ of GOCCs,² LWDs, and SUCs, herein collectively referred to as “borrowing government entities” (BGEs), within the Philippines, the procedures to be observed and the documentary requirements to be submitted, relative to the request for Monetary Board opinion on the probable effects of their proposed credit operation on monetary aggregates, the price level and the balance of payments (BOP), pursuant to Section 123 of Republic Act No. 7653.

II. Procedures

- a. The BGE shall submit a written request to the Bangko Sentral for Monetary Board opinion on the monetary and BOP implications of its proposed borrowing prior to the loan release. The request shall be accompanied by the required documents and information listed in Section III of this Appendix.
- b. The Bangko Sentral shall acknowledge receipt of the request, with an initial evaluation of the documents/information submitted. No request will be processed should there be any deficiency or inconsistency found in the documents/information submitted.
- c. Once the BGE has submitted the complete set of required documents/information, the matter shall be elevated to the Monetary Board for an opinion on the probable monetary and BOP implications of the proposed loan.
- d. The BGE shall be informed in writing of the Monetary Board’s decision on its request for opinion and shall contain the following conditions:
 - (1) The opinion of the Monetary Board is limited to the assessment of the monetary and BOP implications of the proposed borrowing, pursuant to Section 123 of R.A. No. 7653. The said opinion is based on: (i) the information contained in the documents submitted; and (ii) the assumption that the proceeds of the borrowing will be used for the intended purpose described in the documents submitted;
 - (2) The Monetary Board opinion is valid only for one (1) year from the date of issue. The validity period refers to the time within which the proposed loan is to be released in part or in full. It commences on the date of the Bangko Sentral letter transmitting the Monetary Board opinion on the monetary and BOP implications of the BGE’s proposed loan;
 - (3) The BGE shall submit to Bangko Sentral a post-borrowing report on the final terms and conditions and on the utilization of the proceeds of the borrowing within thirty (30) days after the full release of the loan proceeds or final availment of the credit facility; and
 - (4) The Monetary Board opinion should not in any way be construed as exempting the BGE from the applicable requirements and/or prohibitions under existing laws, rules and regulations.
- e. No opinion will be issued by the Monetary Board in case the borrowing has already been partially or fully disbursed.
- f. The BGE shall request a new Monetary Board opinion should there be any increase in the loan amount in excess of ten percent (10%) or a change in the manner of acquisition of the project/s to be funded (i.e., whether for importation or local purchase) after a Monetary Board opinion has been issued: *Provided*, That no release has been made of the term loan/credit line. The BGE shall likewise request for new Monetary Board opinion for the renewal of credit line/s.
- g. BGEs that are unable to avail of their loan during the one (1) year validity period shall request for a new Monetary Board opinion on their proposed loan. They shall submit to the Bangko Sentral the required documents and information under Item “1” of Section III of this Appendix.

¹ The term 'borrowings' shall include credit lines of BGEs.

² GOCCs shall cover agencies/institutions classified as such by the GOCC Governance Commission (GCG).

- h. BGEs need not request a Monetary Board opinion for a one-time short-term borrowing, but if the borrowing is a revolving credit line, the BGEs shall request said Monetary Board opinion.¹

III. Required documents and information

- a. *Request for Monetary Board opinion.* To support the request for Monetary Board opinion, the BGE must submit the following documents/information to Bangko Sentral:

(1) *For GOCCs*

- (a) Letter from the GOCC requesting Monetary Board opinion on its proposed loan (use the prescribed letter format attached as *Annex 1*). The letter should contain information on the following: loan amount; name of lending institution; for credit line/facility: type, purpose and date of expiry; for term loan: breakdown of specific project/s to be funded, cost and mode of acquisition (i.e., whether through importation or local purchase); interest rate; term/tenor; date of maturity; fees and other charges; lending institution's source of fund for the loan; and name/s of designated contact person/s responsible for coordinating with the Bangko Sentral along with contact information. The letter should certify that no disbursement, in full or partial amounts, has been made on the loan.
- (b) Copy of the specific provision in the GOCC's charter or its equivalent for GOCC's without original charters (which may pertain to the GOCC's Articles of Incorporation duly registered with the SEC), indicating its authority to borrow, including the borrowing limit, if any.
- (c) Board Resolution approving the proposed loan, its purpose, terms and conditions (pro-forma Board Resolution attached as *Annex 2*) or Corporate Secretary's certificate on the corresponding Board Resolution (pro-forma Corporate Secretary's certificate attached as *Annex 3*).
- (d) Department of Finance (DOF) comments on the proposed loan.
- (e) Endorsement/clearance of the proposed loan by the head of the line department or government agency with oversight functions over the borrowing entity, as applicable.
- (f) Information on outstanding loans (use the prescribed form attached as *Annex 4*).

(2) *For LWDs*

- (a) Letter from the LWD requesting for Monetary Board opinion on the proposed loan (use the prescribed letter format attached as *Annex 1*). The letter should contain information on the following: loan amount, lending institution; purpose with breakdown of specific project/s to be funded, cost, and manner of acquisition (i.e., whether through importation or local purchase); interest rate; term/tenor; fees and other charges; lending institution's source of fund for the loan; name/s of designated contact person/s responsible for coordinating with the Bangko Sentral along with contact information. The letter should certify that no disbursement, in full or partial amounts, has been made on the loan.
- (b) Board Resolution approving the proposed loan, its purpose and terms and conditions (pro-forma Board Resolution attached as *Annex 2*) or Corporate Secretary's certificate on the corresponding Board Resolution (pro-forma Corporate Secretary's certificate attached as *Annex 3*).
- (c) Endorsement/clearance of the proposed loan from the Local Water Utilities Administration (LWUA).
- (d) Information on outstanding loans (use the prescribed form attached as *Annex 4*).

(3) *For SUCs*

- (a) Letter from the SUC requesting for Monetary Board opinion on the proposed loan (use the prescribed letter format attached as *Annex 1*). The letter should contain information on the following: loan amount, lending institution; purpose with breakdown of specific project/s to be funded, cost, and manner of acquisition (i.e., whether through importation or local purchase); interest rate; term/tenor; fees and other charges; lending institution's source of fund for the loan; name/s of designated contact person/s responsible for coordinating with the Bangko Sentral along with contact information. The letter should

¹ Short-term borrowings refer to those with tenors of ninety (90) days or less.

certify that no disbursement, in full or partial amounts, has been made on the loan.

- (b) Board Resolution approving the proposed loan, its purpose and terms and conditions (pro-forma Board Resolution attached as *Annex 2*) or Corporate Secretary's certificate on the corresponding Board Resolution (pro-forma Corporate Secretary's certificate attached as *Annex 3*).
- (c) Endorsement/clearance of the proposed borrowing from the Commission on Higher Education (CHED).
- (d) Information on outstanding loans (use the prescribed form attached as *Annex 4*).

The Bangko Sentral may request additional documents and information from the BGE or the lending institution, as may be deemed necessary, to support the request for Monetary Board opinion.

BGEs requesting Monetary Board opinion on proposed borrowings to be obtained from lending institutions other than BSP-supervised financial institutions (BSFIs), shall submit to Bangko Sentral a written request accompanied by the required documents/information enumerated above.

- b. *Release of loan proceeds.* The lending institution shall require the submission of the Monetary Board opinion on monetary and BOP implications prior to the release of the loan proceeds or the release of the first tranche, in case of loans with multiple tranches.

IV. Reportorial Requirements

- a. *Post-Borrowing Report (PBR).* The BGE shall submit to Bangko Sentral, through registered mail addressed to the Director, Department of Economic Research (DER) or through electronic mail addressed to mbopinion_der@bsp.gov.ph, a post-borrowing report that will indicate, among others the actual amount of the loan availed as well as the final terms and conditions thereof within thirty (30) calendar days from the date of the full release of the loan proceeds or final availment of the credit facility (use the prescribed form attached as *Annex 5*).
- b. *Post-Loan Release Report (PLRR).* The lending institutions shall submit to Bangko Sentral, through a letter addressed to the Director, DER or through electronic mail addressed to mbopinion_der@bsp.gov.ph, a semestral post-loan release report on GOCC/LWD/SUC loans granted in full within the last six (6) months that will indicate the actual amount of loan released as well as the final terms and conditions thereof, within thirty (30) calendar days after the end of each semester (use the prescribed form attached as *Annex 6*).
- c. *Sworn Certification on Lendings to BGEs.* The BSFIs shall submit, through a letter addressed to the appropriate supervising department of the Bangko Sentral, within fifteen (15) banking days after every semester, a duly notarized certification on loan releases to BGEs signed by the president or an officer of equivalent rank and the chief compliance officer. Such certification shall be considered as a *Category A-2* report for purposes of imposing fines on the delayed submission of required reports pursuant to existing regulation. (Use the prescribed form attached as *Annex 7*).

GOCC/LWD/SUC REQUEST FOR MONETARY BOARD OPINION

Dear Governor,

Pursuant to Section 123 of Republic Act No. 7653 (The New Central Bank Act), may we request for the opinion of the Monetary Board on the monetary and balance of payments implications of our proposed loan, details of which are provided below.

a. *For line/s of credit:*

Details of proposed loan ¹	
a. Name of lending institution	
b. Total loan amount (in Php million)	
c. Type of credit line/s	Please provide details: Facility 1: (Type of credit facility) (Amount in Php million) (Purpose) Facility 1: (Type of credit facility) (Amount in Php million) (Purpose) ...
d. Interest rate (in percent per annum)	<i>Please indicate if fixed or floating</i>
e. Term/tenor (in no. of years)	
f. Availability and expiry dates	
g. Repayment terms and conditions	
h. Lending institution's source of fund for the loan	

¹ Information for Items "d" to "g" should be validated with the lending bank/institution.

b. For term loan/s:

Details of proposed loan ¹	
a. Name of lending institution	
b. Total loan amount (in Php million)	
c. Purpose/s	<p><i>Please provide breakdown of specific projects, including cost and mode of acquisition:²</i></p> <p>Project 1: (Project title/details) (Cost in Php million) (Mode of acquisition)</p> <p>Project 2: (Project title/details) (Cost in Php million) (Mode of acquisition)</p> <p>...</p>
d. Interest rate (in percent per annum)	<i>Please indicate if fixed or floating</i>
e. Term/tenor (in no. of years)	
f. Repayment terms and conditions	
g. Lending institution's source of fund for the loan	

c. For bond flotation:

Details of proposed bond flotation	
a. Lender/investor	
b. Trustee bank	
c. Amount (in Php million)	
d. Bond name/label	
e. Purpose/s	<i>Please provide breakdown of specific projects, including cost and mode of acquisition</i>
f. Interest rate (in percent per annum)	
g. Term/tenor (in no. of years)	
h. Collateral/security	
i. Fees and charges	
j. Payment terms and conditions	
k. Borrowing capacity (in Php million)	
l. Financial advisor	
m. Underwriter	
n. Guarantor	

¹ Information for Items "d" to "g" should be validated with the lending bank/institution.

² For mode of acquisition, please indicate whether for importation or local purchase; for acquisition or heavy equipment, please provide list of equipment.

Relative to this, we would like to certify that no disbursement, in part or in full, has been made on the proposed loan.

Please find attached documents and information in support of our request, as follows:

For GOCCs:

- a. Board Resolution approving the proposed loan, its purpose, terms and conditions (Annex 2. Pro-forma Board Resolution) or Corporate Secretary's certificate on the corresponding Board Resolution (Annex 3. Pro-forma Corporate Secretary certificate);
- b. Data on the year-to-date outstanding borrowings (Annex 4. Pro-forma report on outstanding loans);
- c. DOF comments on the proposed loan; and
- d. Endorsement/clearance of the proposed loan by the head of the line department or government agency with the oversight functions over the borrowing entity, as applicable.

For LWDs:

- a. Board Resolution approving the proposed loan, its purpose, terms and conditions (Annex 2. Pro-forma Board Resolution) or Corporate Secretary's certificate on the corresponding Board Resolution (Annex 3. Pro-forma Corporate Secretary certificate);
- b. Data on the year-to-date outstanding borrowings (Annex 4. Pro-forma report on outstanding loans); and
- c. LWUA endorsement/clearance of the proposed loan.

For SUCs:

- a. Board Resolution approving the proposed loan, its purpose, terms and conditions
- b. (Annex 2. Pro-forma Board Resolution) or Corporate Secretary's certificate on the corresponding Board Resolution (Annex 3. Pro-forma Corporate Secretary certificate);
- c. Data on the year-to-date outstanding borrowings (Annex 4. Pro-forma report on outstanding loans); and
- d. CHEd endorsement/clearance of the proposed loan.

Also, please find below the name/s and details of our designated contact person/s whom you may coordinate with relative to this request for Monetary Board opinion:

1. (Name); (telephone/facsimile/mobile nos.); and (email address); ..

POST-LOAN RELEASE REPORT ON LOANS

Name of BSFI/lending institution: _____

Period covered, for the six (6) months ending (mm/dd/yyyy)

A. Loans granted in full for the semester

(1) Name of borrowing government entity (BGE)	(2) Loan amount applied for (in Php million)	(3) Monetary Board Resolution No. and date	(4) Actual loan amount released (in Php million)	(5) Final terms and conditions ¹	(6) Date of initial loan release (mm/dd/yyyy)	(7) Date of final loan release (mm/dd/yyyy)	(8) Explanation for variance between loan applied and granted

B. Past-due loans for the semester

(1) Total no. of borrowing BGEs with payment due	(2) GOCCs/WDs/SUCs with delayed payment	(3) Loan Amount	(4) Loan Maturity	(5) Interest Rate	(6) Mode of Payment

¹ Should at least include information on the maturity date, interest rate, and payment terms.

Deadline: 15 banking days after end
of reference semester

SWORN CERTIFICATION ON LENDINGS TO BORROWING GOVERNMENT ENTITIES

(Name of BSFI)

Pursuant to the requirements under Sec. 316 [Domestic borrowings by local government units pursuant to Section 123 of R.A. 7653; Domestic Borrowings by Government-Owned and/or -Controlled Corporations (GOCCs), Local Water Districts (LWDs) and State Universities and Colleges (SUCs) pursuant to Section 123 of R.A. No. 7653; and Enforcement actions], we hereby certify¹ that for the six (6)-month period ending <state reporting semester>:

- ☐ There were no loans released to borrowing government entities (BGEs) by <Name of BSFI>
- ☐ <Name of BSFI> had released loans to BGEs and that -
- ☐ EXCEPT for loans in the attached list, loans released to BGEs were covered with Monetary Board opinions on the borrowings' probable effects on monetary aggregates, the price level and the balance of payments, pursuant to Section 123 of R.A. No. 7653, otherwise known as "The New Central Bank Act"
- ☐ ALL loans released to BGEs were covered with Monetary Board opinions on the borrowings' probable effects on monetary aggregates, the price level and the balance of payments, pursuant to Section 123 of R.A. No. 7653.

To the best of our knowledge, the foregoing statements are true and correct.

**CHECKLIST OF BANGKO SENTRAL REQUIREMENTS IN THE SUBMISSION OF
AUDITED FINANCIAL STATEMENTS AND ANNUAL AUDIT REPORT
(Appendix to Sec. 174 on Financial Audit)**

The external auditor (included in the List of Bangko Sentral Selected External Auditors) shall start the audit not later than thirty (30) calendar days after the close of the calendar/fiscal year adopted by the bank. AFS of banks with subsidiaries shall be presented side by side on a solo basis and on a consolidated basis (banks and subsidiaries). The following shall be submitted by the bank to the appropriate supervising department of the Bangko Sentral:

<u>Information/Data required</u>	<u>Deadline for submission</u>
1. Audited Financial Statements (AFS)	Not later than one hundred twenty (120) calendar days after the close of the calendar year or fiscal year adopted by the bank.
2. Certification by the external auditor on compliance with the following: <ul style="list-style-type: none"> a. Confidentiality clause pertinent to read-only access to the Report of Examination; and b. Disclosure requirements under Sec. 174 and other information that may be required. 	For submission together with the AFS not later than 120 calendar days after the close of the calendar year or fiscal year adopted by the bank.
3. Reconciliation statement, including copies of adjusting entries on the reconciling items, between the AFS and the prudential reports (i.e., Balance Sheet and Income Statement for bank proper (regular and FCDU) and Financial Reporting Package for Trust Institutions [FRPTI] for trust department/institutions, following the formats in Annexes B and C of Appendix 55 [for the bank proper and for the trust department, respectively]).	For submission together with the AFS not later than 120 calendar days after the close of the calendar year or fiscal year adopted by the bank.
4. Letter of Comments (LOC) ¹ indicating material weaknesses on internal control and risk management system as well as other issues, which may include findings on the quality of governance, that should be brought to the attention of the Board/Management along with the recommendations for corrective action. Otherwise, a certification by the external auditor that there are no issues noted in the course of the audit to warrant the submission of the LOC.	For submission together with the AFS not later than 120 calendar days after the close of the calendar year or fiscal year adopted by the bank.
5. Copy of the board resolution showing the actions on the AFS and the submitted LOC, if any.	For submission together with the AFS not later than 120 calendar days after the close of the calendar year or fiscal year adopted by the bank.
6. In case of foreign banks with branches in the Philippines, in lieu of the board resolution, a report by the country head on the action taken by management (head office or regional) on the AFS and the LOC, if any.	For submission together with the AFS not later than 120 calendar days after the close of the calendar year or fiscal year adopted by the bank.
7. The external auditor shall report to the appropriate supervising department of the Bangko Sentral any matter adversely affecting the condition or soundness of the BSFI, such as, but not limited to the following cases: <ul style="list-style-type: none"> a. Any material finding involving fraud or error; b. Actual or potential losses the aggregate of which amounts to at least ten percent (10%) of the consolidated total assets of the BSFI; 	Within fifteen (15) calendar days upon discovery.

¹ LOC or equivalent letter to Management/Board of Directors

- c. Significant doubt as to the ability of the BSFI to continue as a going concern;
- d. Material breach of laws or Bangko Sentral rules and regulations such as but not limited to prescribed capital and liquidity ratios, significant deficiency in allowance for credit losses, material weaknesses in fair value measurement methodology, significant vulnerabilities to money laundering and combating the financing of terrorism;
- e. Material internal control weaknesses which may lead to financial reporting problems; and
- f. Findings on matters of corporate governance that may require urgent action by the Bangko Sentral.

In case there are no matters to report (e.g., fraud, dishonesty, breach of laws, etc.), a notarized certification that there is none to report.

AAR - For banks under the concurrent jurisdiction of the Bangko Sentral and Commission on Audit (COA)

Not later than 120 calendar days after the close of the calendar year or fiscal year adopted by the BSFI.

1. Copy of the AAR accompanied by the:

- a. Certification by the institution concerned on the date of receipt of the AAR by the board of directors;
- b. Reconciliation statement, including copies of adjusting entries on the reconciling items, between the AFS in the AAR and the prudential reports (i.e., Balance Sheet and Income Statement of bank proper (Regular and FCDU) and Financial Reporting Package for Trust Institutions [FRPTI] for trust department/institutions, following the formats in Annexes B and C of Appendix 55 [for the bank proper and for the trust department, respectively]; and
- c. Other information that may be required by the Bangko Sentral.

Within forty (40) calendar days after receipt of the AAR by the board of directors.

2. Copy of the board resolution showing the action taken on the AAR, as well as on the comments and observations, including the names of the directors present and absent, among other things.

Within thirty (30) banking days after receipt of the AAR by the board of directors.

(Circular Nos. 1074 dated 07 February 2020 and 911 dated 02 May 2016)

DISCLOSURE REQUIREMENTS TO THE AUDITED FINANCIAL STATEMENTS
(Appendix to Sec. 174 on Disclosure requirements to the audited financial statements)

Banks shall include the additional information to the Audited Financial Statements:

a. Notes to the financial statements

- (1) Capital position on solo and consolidated bases. These shall include Common Equity Tier 1 (CET 1) capital, Tier 1 capital, Total Qualifying Capital, Total Risk-Weighted Assets; Capital Adequacy Ratio (CAR), Tier 1 ratio, and CET 1 ratio, as applicable;
- (2) Leverage ratio and Total Exposure Measure both on solo and consolidated bases;
- (3) Liquidity position on solo and consolidated bases. It shall include the Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR);

In the case of stand-alone thrift banks, rural banks, cooperative banks and quasi-banks, only the Minimum Liquidity Ratio (MLR) shall be disclosed.

- (4) Provisioning methodology and key assumptions used in determining allowance for credit losses;
- (5) Accounting policies which shall include, but not limited to, general accounting principles, valuation policies for financial instruments and Real and Other Properties Acquired (ROPA), and policies on securitizations, foreign currency translations, and repurchase agreements.

b. Supplementary information

- (1) Basic quantitative indicators of financial performance such as return on average equity, return on average assets and net interest margin;

For purposes of computing the indicators, the following formulas shall be used:

$$(a) \text{ Return on Average Equity (\%)} = \frac{\text{Net Income (or Loss) after Income Tax} \times 100}{\text{Average Total Capital Accounts}}$$

Where:

$$\text{Average Total Capital Accounts} = \frac{\text{Current calendar/fiscal year-end Total Capital Accounts balance} + \text{previous calendar/fiscal year-end Total Capital Accounts balance}}{2}$$

$$(b) \text{ Return on Average Assets (\%)} = \frac{\text{Net Income (or Loss) after Income Tax} \times 100}{\text{Average Total Assets}}$$

Where:

$$\text{Average Total Assets} = \frac{\text{Current calendar/fiscal year-end Total Assets balance} + \text{previous calendar/fiscal year-end Total Assets balance}}{2}$$

$$(c) \text{ Net Interest Margin (\%)} = \frac{\text{Net Interest Income} \times 100}{\text{Average Interest Earning Assets}}$$

Where:

$$\text{Net Interest Income} = \text{Total Interest Income} - \text{Total Interest Expense}$$

$$\text{Average Interest Earning Assets} = \frac{\text{Current calendar/fiscal year-end Total Interest Earning Assets balance} + \text{previous calendar/fiscal year-end Total Assets balance}}{2}$$

- (2) Description of capital instruments issued;
- (3) Significant credit exposures (30.0 percent of the total loan portfolio or 10.0 percent of Tier 1 capital) as to industry/economic sector;
- (4) Breakdown of total loans as to: (i) security (secured, including type of security, and unsecured), and (ii) status (performing and non-performing per product line);
- (5) Information on related party loans broken down as follows:

Particulars	DOSRI Loans	Related Party Loans (Inclusive of DOSRI Loans)
• Outstanding loans		
• Percent of DOSRI/ Related Party loans to total loan portfolio		
• Percent of unsecured DOSRI/ Related Party loans to total DOSRI/ Related Party loans		
• Percent of past due DOSRI/ Related Party loans to total DOSRI/ Related Party loans		
• Percent of non-performing DOSRI/ Related Party loans to total DOSRI/ Related Party loans		

- (6) Aggregate amount of secured liabilities and assets pledged as security; and
- (7) Nature and amount of contingencies and commitments arising from off-balance sheet items include direct credit substitutes (e.g., export LCs confirmed, underwritten accounts unsold), transaction-related contingencies (e.g., performance bonds, bid bonds, standby LCs), short-term self-liquidating trade-related contingencies arising from the movement of goods (e.g., sight/usance domestic LCs, sight/ usance import LCs), sale and repurchase agreements not recognized in the balance sheet; interest and foreign exchange-rate related items; and other commitments.

For items "5", "6", and "7", indicate if there is none to report.

**GUIDE IN PREPARING THE KEY INFORMATION AND INVESTMENT DISCLOSURE STATEMENT
FOR UNIT INVESTMENT TRUST FUNDS
(Appendix to Sec. 414 on Minimum disclosure requirement)**

1. The Key Information and Investment Disclosure Statement (KIIDS) is a document intended to provide unit investment trust fund (UITF) participants with key information and disclosures to facilitate better understanding and comparison of UITFs offered by trust entities (TEs).
2. The KIIDS is, preferably a one- sheet document with back-to-back information. The text shall be written in Arial style with font size 10 or its equivalent while the disclosures enumerated below shall be in capital letter and in bold font:
 - **THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC).**
 - **RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPu IS FOR ILLUSTRATION OF NAVPu MOVEMENTS/FLUCTUATIONS ONLY.**
 - **WHEN REDEEMIN G, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES SHALL BE SOLELY FOR THE ACCOUNT OF THE CLIENT.**
 - **THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.**
3. The attached format serves as a standard template in preparing the KIIDS. The headings, lay-outs and disclosures inside the boxes shall be strictly followed; nonetheless, the trustee may opt to add sub- headings provided that these additions shall result to clearer disclosure of key information.
4. The trustee shall use clear and plain language to ensure that the participants can easily understand the disclosures contained therein.
5. The use of diagrams such as graphs, charts, flowcharts, tables or numerical explanations is highly encouraged.
6. The trustee is advised to be judicious in deciding the information to be disclosed. The KIIDS shall give a fair and balanced view of the investments and shall ensure that no material information is omitted if such omission would make the KIIDS to be misleading. Examples are presented for illustration purposes only and are not meant to be prescribed or exhaustive.
7. The trustee shall include a web address for online access of other disclosure documents, educational resources or explanatory materials. However, key information shall be clearly disclosed in the KIIDS and not merely referred to other sources.

(Circular No. 876 dated 20 April 2015)

(Name of Bank)

(Name of UIT Fund)

KEY INFORMATION AND INVESTMENT DISCLOSURE STATEMENT

(Reporting Period)

FUND FACTS: _____

Classification: _____	Net Asset value per unit (NAVPu): _____
Launch Date: _____	Total Fund NAV: _____
Minimum Investment: _____	Dealing Day: _____
Additional Investment: _____	Redemption Settlement: _____
Minimum Holding Period: _____	Early Redemption Charge: _____

FEES* (Indicate trustee fees and special reimbursable expenses, as necessary)

Trustee Fees: _____% (Name of Trustee)	Custodianship Fees: _____% (Name of Custodian)	External Auditor Fees: _____% (Name of External Auditor)	Other Fees: _____% (Please specify)
--	--	--	--

* As a percentage of average daily NAV for the quarter valued at _____.

INVESTMENT OBJECTIVE AND STRATEGY

[Indicate the investment objective of the fund and the strategies on how to attain the said objective]

Example:

The Fund intends to achieve for its participants long-term capital growth by investing into the extent possible, equity securities issued by Philippine domiciled companies which have a value style bias. The Fund aims to provide returns in excess of the return of the Philippine Stock Exchange Index (PSEI).

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

- The (Name of the Fund) is suitable only for investors who:
 - o [Indicate the risk profile of the target investors/participants]
 - o [Indicate if the principal will be at risk]
 - o [Indicate the recommended investment horizon of a participant]
 - o [Indicate other key characteristics of the fund which can help investors determine if it is suitable for them]

Example:

- The Equity Fund is suitable only for investors who:
 - o Have aggressive risk appetite
 - o Are comfortable with the greater volatility and risks of an equity fund
- Participants are recommended to stay invested in an equity fund for three (3) years

KEY RISKS AND RISK MANAGEMENT

(Disclose the key risks of the Fund and provide short illustrations/explanations which are stated in plain and simple language, and the risk management process employed in managing the Fund, as necessary)

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Example:

- Market risks. You have greater exposure to market risks as this is an equity fund since equities usually have greater volatility than bonds and other fixed income securities.
- The Fund employs a risk management policy based on duration. Duration measures the sensitivity of NAVPu to interest rate movements. As interest rates rise, bond prices fall. The higher the duration, the more NAVPu will fluctuate in relation to changes in interest rates.
 - **THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC).**
 - **RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPu IS FOR ILLUSTRATION OF NAVPu MOVEMENTS/FLUCTUATIONS ONLY.**
 - **WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT.**
 - **THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.**

(Indicate contact details of the trustee which investors can use if they have queries, include a website address, e-mail address and telephone number)

FUND PERFORMANCE AND STATISTICS AS OF JUNE 30, 2014
(PURELY FOR REFERENCE PURPOSES AND IS NOT A GUARANTEE OF FUTURE RESULTS)

NAVPU Graph [Include graph showing the NAVPU trend vis-à-vis the benchmark]

Example:

Cumulative Performance (%)

Period	1 mo	3 mos	6 mos	1 yr	3 yrs	Fund	xx.xx	xx.xx	xx.xx
xx.xx	xx.xx	Benchmark	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx	xx.xx

Portfolio Composition [Illustrate/describe the composition of the Fund as a percentage of the NAV as of the reference quarter in terms of asset class, maturity profile, and credit rating of trustees, as applicable; use of graphs/charts/tables are highly recommended]

Example:

NAVPU over the past 12 months

Highest	xx
Lowest	xx

Statistics [Fill in the information, as necessary]

Weighted Ave. Duration	xx
Volatility, Past 1 Year *	xx%
Sharpe Ratio **	xx
Information Ratio ***	xx

1. Volatility measures the degree to which the Fund fluctuates vis-à-vis its average return over a period of time.
2. Sharpe Ratio is used to characterize how well the return of a Fund compensates the investor for the level of risk taken. The higher the number, the better.
3. Information Ratio measures reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk.

Top Ten Holdings (%)

ABCCo.	xx.x
DEFCo.	xx.x
XYZ	xx.x
AB&J	xx.x
KYLPN Co.	xx.x
GJ Investments	xx.x
JK Corp.	xx.x
Bank OP	xx.x
FKH Group	xx.x
ANGL Corp.	xx.x
Total	xx.x

OTHER DISCLOSURES

[Indicate RELATED PARTY TRANSACTIONS, prospective investments and other disclosures deemed necessary or relevant] [This heading may be changed as appropriate]

Example:

RELATED PARTY TRANSACTIONS

The Fund has deposits with the Bank Proper and investments in ABC Co., a wholly-owned subsidiary of the Bank, amounting to Pxxx and Pxxx, respectively, which were approved by the Board of Directors. Likewise, all related party transactions are conducted on an arm's length basis.

OUTLOOK AND STRATEGY

The Fund took advantage of the pockets of rallies supported by the substantial liquidity in the system. It took profit on its bond holdings across the curve in anticipation of increased volatility in the months ahead. Market corrections are likewise seen as opportunities to reposition in the more liquid and tradable bonds. Nonetheless, amidst prospects of further SDA rate hikes, we maintain our overall defensive stance. The Fund's prospective investments include xxx.

FORMAT OF RISK DISCLOSURE STATEMENT
(Appendix to Sec. 414)

(NAME OF TRUST ENTITY) (TRUST BANKING GROUP/TRUST DEPARTMENT)
Unit Investment Trust Funds
RISK DISCLOSURE STATEMENT

Prior to making an investment in any of the (Name of Trust Entity) Unit Investment Trust Funds (UITFs), (Name of Trust Entity) is hereby informing you of the nature of the UITFs and the risks involved in investing therein. As investments in UITFs carry different degrees of risk, it is necessary that before you participate/invest in these funds, you should have:

1. Fully understood the nature of the investment in UITFs and the extent of your exposure to risks;
2. Read this Risk disclosure Statement completely; and
3. Independently determined that the investment in the UITFs is appropriate for you.

There are risks involved in investing in the UITFs because the value of your investment is based on the Net Asset Value per unit (NAVpu) of the Fund which uses a marked-to-market valuation and therefore may fluctuate daily. The NAVpu is computed by dividing the Net Asset Value (NAV) of the Fund by the number of outstanding units. The NAV is derived from the summation of the market value of the underlying securities of the Fund plus accrued interest income less liabilities and qualified expenses.

Investment in the UITF does not provide guaranteed returns even if invested in government securities and high-grade prime investment outlets. Your principal and earnings from investment in the Fund can be lost in whole or in part when the NAVpu at the time of redemption is lower than the NAVpu at the time of participation. Gains from investment is realized when the NAVpu at the time of redemption is higher than the NAVpu at the time of participation.

Your investment in any of the (Name of Trust Entity) UITFs exposes you to the various types of risks enumerated and defined hereunder:

Interest Rate Risk. This is the possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.

The UITF portfolio, being market-to-market, is affected by changes in interest rates thereby affecting the value of fixed income investments such as bonds. Interest rate changes may affect the prices of fixed income securities inversely, i.e., as interest rates rise, bond prices fall and when interest rates decline, bond prices rise. As the prices of bonds in a Fund adjust to a rise in interest rates, the Fund's unit price may decline.

Market/Price Risk. This is the possibility for an investor to experience losses due to changes in market prices of securities (e.g., bonds and equities). It is the exposure to the uncertain market value of a portfolio due to price fluctuations.

It is the risk of the UITF to lose value due to a decline in securities prices, which may sometimes happen rapidly or unpredictably. The value of investments fluctuates over a given time period because of general market conditions, economic changes or other events that impact large portions of the market such as political events, natural calamities, etc. As a result, the NAVpu may increase to make profit or decrease to incur loss.

Liquidity Risk. This is the possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a loss. These may be caused by different reasons such as trading in securities with small or few outstanding issues, absence of buyers, limited buy/sell activity or underdeveloped capital market.

Liquidity risk occurs when certain securities in the UITF portfolio may be difficult or impossible to sell at a particular time which may prevent the redemption of investment in UITF until its assets can be converted to cash. Even government securities which are the most liquid of fixed income securities may be subjected to liquidity risk particularly if a sizeable volume is involved.

Credit Risk/Default Risk. This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued. This inability of the borrower to make good on its financial obligations may have resulted from adverse changes in its financial condition thus, lowering credit quality of the security, and consequently lowering the price (market/price risk) which contributes to the difficulty in selling such security. It also includes risk on a counterparty (a party the UITF Manager trades with) defaulting on a contract to deliver its obligation either in cash or securities.

This is the risk of losing value in the UITF portfolio in the event the borrower defaults on his obligation or in the case of a counter party, when it fails to deliver on the agreed trade. This decline in the value of the UITF happens because the default/failure would make the price of the security go down and may make the security difficult to sell. As these happen, the UITFs NAVpu will be affected by a decline in value.

Reinvestment Risks. This is the risk associated with the possibility of having lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

Investors in the UITF who redeem and realize their gains run the risk of reinvesting their funds in an alternative investment outlet with lower yields. Similarly, the UITF manager is faced with the risk of not being able to find good or better alternative investment outlets as some of the securities in the fund matures.

In case of a foreign-currency denominated UITF or a peso denominated UITF allowed to invest in securities denominated in currencies other than its base currency, the UITF is also exposed to the following risks:

Foreign Exchange Risk. This is the possibility for an investor to experience losses due to fluctuations in foreign exchange rates. The exchange rates depend upon a variety of global and local factors, e.g., interest rates, economic performance, and political developments.

It is the risk of the UITF to currency fluctuations when the value of investments in securities denominated in currencies other than the base currency of the UITF depreciates. Conversely, it is the risk of the UITF to lose value when the base currency of the UITF appreciates. The NAVpu of a peso-denominated UITF invested in foreign currency- denominated securities may decrease to incur loss when the peso appreciates.

Country Risk. This is the possibility for an investor to experience losses arising from investments in securities issued by/in foreign countries due to the political, economic and social structures of such countries. There are risks in foreign investments due to the possible internal and external conflicts, currency devaluations, foreign ownership limitations and tax increases of the foreign country involved which are difficult to predict but must be taken into account in making such investments.

Likewise, brokerage commissions and other fees may be higher in foreign securities. Government supervision and regulation of foreign stock exchanges, currency markets, trading systems and brokers may be less than those in the Philippines. The procedures and rules governing foreign transactions and custody of securities may also involve delays in payment, delivery or recovery of investments.

Other Risks. Your participation in the UITFs may be further exposed to the risk of any actual or potential conflicts of interest in the handling of in-house or related party transactions by (Name of Trust Entity). These transactions may include own-bank deposits; purchase of own-institution or affiliate obligations (stock, mortgages); purchase of assets from or sales to own institution, directors, officers, subsidiaries, affiliates or other related interests/parties; or purchases or sales between fiduciary/managed accounts.

I/we have completely read and fully understood this risk disclosure statement and the same was clearly explained to me/us by a (Name of Trust Entity) UIT marketing personnel before I/we affixed my/our signature/s herein. I/we hereby voluntarily and willingly agree to comply with any and all laws, regulations, the plan rules, terms and conditions governing my/our investment in the (Name of Trust Entity) UITFs.

**IMPLEMENTATION PLANS UNDER THE NEW INTERNATIONAL CAPITAL STANDARDS AS CONTAINED
IN THE BASEL COMMITTEE ON BANKING SUPERVISION DOCUMENT
INTERNATIONAL CONVERGENCE OF CAPITAL MEASUREMENT AND CAPITAL STANDARDS
(Appendix to Section 125)**

A. General approach

UBs/KBs are expected to comply with the standardized approach for credit risk, and the basic indicator or standardized approaches for operational risk by 2007. By 2010, these banks may move to the foundation internal ratings based (IRB) or advanced IRB approaches for credit risk, and advanced measurement approaches for operational risk.

TBs, on the other hand, are classified into two (2). TBs are generally expected to be subject to an enhanced Basel 1-type approach by 2007. However, TBs affiliated with UBs/KBs should use the same approach used by the UBs/KBs.

RBs/Coop banks, meanwhile, are expected to be subject to an enhanced Basel 1-type approach also by 2007.

An enhanced Basel 1-type approach is basically the same as the current framework (Sec. X116) but with certain elements of Basel 2 already incorporated such as higher risk weight for past due accounts, and expanded disclosures.

B. Time Table

Between 2004 and 2007, certain provisions of Basel 2 will be gradually incorporated into the current risk-based capital adequacy framework. These would include:

- (1) Giving lower risk weights for highly-rated corporate exposures;
- (2) Giving higher risk weights for past due claims (net of specific provisions);
- (3) Adopting the standardized approach for investments in securitization structures (i.e., risk weights would depend on external ratings);
- (4) Implementing a standard computation of liquidity risk and interest rate risk in the banking book; and
- (5) Issuing broad guidelines on operational risk management.

The rest of the provisions of Basel 2 standardized approach for credit risk, and basic indicator and standardized approaches for operational risk will be implemented by 2007. Under the standardized approach for credit risk, risk weights would mainly depend on the external rating of the counterparty. Under the basic indicator approach for operational risk, capital charge is fifteen percent (15%) of the 3-year average of a bank's gross income. Under the standardized approach for operational risk, on the other hand, banks will compute capital charge separately for each business line. Business line operational risk charge is a fraction (between 12%-18%) of the 3-year average of a business line's gross income. Total operational risk charge is the sum of the operational risk charges for all business lines.

The expanded disclosure requirements prescribed under Basel 2, as may be appropriate, will also be implemented by 2007.

The draft implementation guidelines containing all these provisions will be exposed for comment by the Bangko Sentral in the first quarter of 2005. The final implementation guidelines are expected to be issued by end-December 2005.

By 2010, banks may already be allowed to use the advanced approaches prescribed under Basel 2. For credit risk, banks may use the internal ratings based (IRB) approach, where the credit risk capital charge would depend on banks' internal rating of the counterparty, including estimates of probability of default, loss given default, and other risk parameters. For operational risk, banks may use statistical modeling and other advanced measurement tools in determining the capital charge.

To facilitate a successful implementation of Basel 2, the Bangko Sentral will continue to engage the banking community, particularly through the BAP's Risk Management Committee, in its preparations especially those involving the eventual implementation of the advanced approaches by 2010. The Bangko Sentral likewise strongly encourages banks to assess the likely impact of this shift in risk-based capital framework on their capital adequacy ratio. Banks needing assistance in performing this self-analysis may contact the Office of the Assistant Governor of the appropriate supervising sector at email address sd_c_stat@bsp.gov.ph.

(Circular No. 890 dated 02 November 2015)

RISK-BASED CAPITAL ADEQUACY FRAMEWORK FOR THE PHILIPPINE BANKING SYSTEM

(Appendix to Sec. 125)

Introduction

This Appendix outlines the Bangko Sentral implementing guidelines of the *revised International Convergence of Capital Measurement and Capital Standards*, popularly known as Basel II, and the reforms introduced in *Basel III: A global regulatory framework for more resilient banks and banking systems*. Basel II and Basel III comprise the international capital standards set by the Basel Committee on Banking Supervision (BCBS)¹.

The guidelines revise the risk-based capital adequacy framework for UBs and KBs, as well as their subsidiary banks and QBs. TBs and RBs as well as QBs that are not subsidiaries of UBs and KBs shall be subject to a different set of guidelines except the criteria for eligibility as qualifying capital.

The guidelines shall take effect on 01 January 2014.

Part I. Risk-based capital adequacy ratio (CAR)

1. UBs and KBs and their subsidiary banks and QBs shall be subject to the following risk-based CARs:
 - a. Common Equity Tier (CET1) must be at least six percent (6%) of risk-weighted assets at all times;
 - b. Tier 1 capital must be at least seven and a half percent (7.5%) of risk-weighted assets at all times; and
 - c. Qualifying capital (Tier 1 plus Tier 2 capital) must be at least ten percent (10%) of risk-weighted assets at all times.
2. CET1 capital, Tier 1 capital and qualifying capital are computed in accordance with the provisions of Part II. Risk-weighted assets is the sum of (1) credit- risk weighted assets (Parts IV, V and VI), (2) market risk-weighted assets (Parts VI and VII), and (3) operational risk-weighted assets (Part VIII).
3. The CAR requirement will be applied to all UBs and KBs and their subsidiary banks, and QBs on both solo² and consolidated³ bases. The application of the requirement on a consolidated basis is the best means to preserve the integrity of capital in banks with subsidiaries by eliminating double gearing. However, as one of the principal objectives of supervision is the protection of depositors, it is essential to ensure that capital recognized in capital adequacy measures is readily available for those depositors. Accordingly, individual banks should likewise be adequately capitalized on a stand-alone basis.
4. To the greatest extent possible, all banking and other relevant financial activities (both regulated and unregulated) conducted by a bank and its subsidiaries will be captured through consolidation. Thus, majority-owned or -controlled financial allied undertakings should be fully consolidated on a line by line basis. Exemptions from consolidation shall only be made in cases where such holdings are acquired through debt previously contracted and held on a temporary basis, are subject to different regulation⁴ or where non- consolidation for regulatory capital purposes is otherwise required by law. All cases of exemption from consolidation must be made with prior clearance from the Bangko Sentral.
5. Banks shall comply with the minimum CARs at all times notwithstanding that supervisory reporting shall only be on quarterly basis. Any breach, even if only temporary, shall be reported to the bank's Board of Directors and to Bangko Sentral, SES within three (3) banking days. For this purpose, banks shall develop an appropriate system to properly monitor their compliance.
6. The Bangko Sentral reserves the right, upon authority of the Deputy Governor, SES, to conduct on-site inspection outside of regular or special examination, for the purpose of ascertaining the accuracy of CAR calculations as well as the integrity of CAR monitoring and reporting systems.

Part II. Qualifying capital

1. Qualifying capital consists of the sum of the following elements, net of required deductions
 - a. Tier 1 capital (going concern capital) is composed of:
 - i. CET1; and

¹ The Basel Committee on Banking Supervision is a committee of banking supervisory authorities that was established by the central bank governors of the Group of Ten countries in 1975. It consists of senior representatives of bank supervisory authorities and central banks from Argentina, Australia, Belgium, Canada, China, France, Germany, Hong Kong SAR, India, Indonesia, Italy, Japan, Korea, Luxembourg, Mexico, the Netherlands, Russia, Saudi Arabia, Singapore, South Africa, Spain, Sweden, Switzerland, Turkey, the United Kingdom, and the United States. It usually meets at the Bank for International Settlements in Basel, Switzerland where its permanent Secretariat is located.

² Pertains to the reporting entity's head office and branches

³ Pertains to the reporting entity and its financial allied subsidiaries except insurance companies that are required to be consolidated on a line-by-line basis for the purpose of preparing consolidated financial statements

⁴ These currently pertain to insurance companies and securities brokers/dealers

- ii. Additional Tier 1 (AT1) capital; and
 - b. Tier 2 (gone-concern) capital.
2. A bank must ensure that any component of capital included in qualifying capital complies with all the eligibility criteria for the particular category of capital in which it is included.

Section A. Domestic banks

CET1 capital

3. CET1 capital consists of:
- a. Paid up common stock issued by the bank that meet the eligibility criteria in “App. 59 Annex A”;
 - b. Common stock dividends distributable;
 - c. Additional paid-in capital resulting from the issuance of common stock included in CET1 capital;
 - d. Deposit for common stock subscription;
 - e. Retained earnings;
 - f. Undivided profits;¹
 - g. Other comprehensive income;
 - (1) Net unrealized gains or losses on AFS securities²;
 - (2) Cumulative foreign currency translation;
 - (3) Remeasurement of Net Defined Benefit Liability/(Asset);
 - (4) Gains/(Losses) on Fair Value Adjustments of Hedging Instruments:
 - (a) Cash Flow Hedge; and
 - (b) Hedge of a Net Investment in Foreign Operations; and
 - (5) Others (indicate the nature and amount of the accounts lodged)
 - h. Minority interest in subsidiary banks which are less than wholly-owned:³ *Provided*, That the minority interest arises from issuances of common stock which, if issued by the bank itself, would meet all of the criteria for classification as CET1 capital: *Provided, further*, That the amount to be included as minority interest shall be reduced by the surplus CET1 of the subsidiary attributable to minority shareholders: *Provided, furthermore*, That the surplus CET1 capital of the subsidiary attributable to minority shareholders is computed as the available CET1 capital minus the lower of: (1) the minimum CET1 capital requirement of the subsidiary and (2) the portion of the consolidated minimum CET1 requirement that is attributable to the subsidiary, multiplied by the percentage of CET1 held by minority shareholders.

Illustrative computation is in App. 59 Annex D.

Regulatory adjustment to CET1 capital

4. The following must be deducted from/(added to) CET1 capital:
- a. Common stock treasury shares⁴ including shares that the bank could be contractually obliged to purchase;
 - b. Gains (Losses) resulting from designating financial liabilities at fair value through profit or loss that are due to changes in its own credit worthiness;⁵

¹ For early adopters of PFRS 9, this account should include the net unrealized gains/losses on available-for-sale (AFS) debt securities;

² For early adopters of PFRS 9, this account shall refer only to “Net Unrealized gains(losses) on AFS equity securities; For AFS debt securities, refer to Footnote No.5. In view of the continuing evaluation by the Basel Committee on the appropriate treatment of unrealized gains/losses with respect to the evolution of the accounting framework, the Bangko Sentral will revise its relevant regulation once the treatment of fair value adjustments in the calculation of CET1 has been determined.

³ Minority interest in a subsidiary that is a bank is strictly excluded from the parent bank’s common equity if the parent bank or affiliate has entered into any arrangements to fund directly or indirectly minority investment in the subsidiary whether through an SPV or through another vehicle or arrangement. The treatment of minority interest set out above is strictly available where all minority investments in the bank subsidiary solely represent genuine third party common equity contributions to the subsidiary.

⁴ Treasury shares are: (1) shares of the parent bank held by a subsidiary financial allied undertaking in a consolidated statement of condition, or (2) the reacquired shares of a subsidiary bank/QB that is required to compute its capital adequacy ratio in accordance with this framework.

⁵ This adjustment shall only apply to banks/non-banks which would not early adopt the provisions of PFRS 9 and recognize the gains/losses (relative to changes in own credit worthiness) in undivided profits.

- c. Unbooked valuation reserves and other capital adjustments based on the latest report of examination as approved by the Monetary Board;
- d. Total outstanding unsecured credit accommodations, both direct and indirect, to DOSRI;
- e. Total outstanding unsecured loans, other credit accommodations and guarantees granted to subsidiaries;
- f. Total outstanding loans, other credit accommodations and guarantees granted to related parties that are not at arm's length terms as determined by the appropriate supervising department of the Bangko Sentral;
- g. Deferred tax assets that rely on future profitability of the bank to be realized, net of any (1) allowance for impairment and (2) associated deferred tax liability, if and only if the conditions cited in PAS 12 are met: *Provided*, That, if the resulting figure is a net deferred tax liability, such excess cannot be added to Tier 1 capital;
- h. Goodwill, net of any allowance for impairment and any associated deferred tax liability which would be extinguished upon impairment or derecognition, including that relating to unconsolidated subsidiary banks, financial allied undertakings (excluding subsidiary securities dealers/brokers and insurance companies) (on solo basis) and unconsolidated subsidiary securities dealers/brokers, insurance companies and non- financial allied undertakings (on solo and consolidated bases);
- i. Other intangible assets, net of any allowance for impairment and any associated deferred tax liability which would be extinguished upon impairment or derecognition;
- j. Gain on sale resulting from a securitization transaction;
- k. Defined benefit pension fund assets (liabilities);¹
- l. Investments in equity of unconsolidated subsidiary banks and QBs, and other financial allied undertakings (excluding subsidiary securities dealers/brokers and insurance companies), after deducting related goodwill, if any (for solo basis);
- m. Investments in equity of unconsolidated subsidiary securities dealers/brokers and insurance companies after deducting related goodwill, if any (for both solo and consolidated bases);
- n. Significant minority investments (10%- 50% of voting stock) in banks and QBs, and other financial allied undertakings (for both solo and consolidated bases);
- o. Significant minority investments (10%-50% of voting stock) in securities dealers/brokers and insurance companies, after deducting related goodwill, if any (for both solo and consolidated bases);
- p. Minority investments (below 10% of voting stock) in banks and QBs, and other financial allied undertakings (excluding subsidiary securities dealers/brokers and insurance companies), after deducting related goodwill, if any (for both solo and consolidated bases);
- q. Minority investments (below 10% of voting stock) in securities dealers/brokers and insurance companies, after deducting related goodwill, if any (for both solo and consolidated bases);

For equity investments in financial entities (Items "k" to "p"), total investments include:

- i. common equity exposures in both the banking and trading book; and
- ii. underwriting positions in equity and other capital instruments held for more than five (5) days:

Provided, That should the instrument of the entity in which the bank has invested does not meet the criteria for CET1 capital of the bank, the capital is to be considered common shares and thus deducted from CET1.

- r. Other equity investments in non- financial allied undertakings and non-allied undertakings;
- s. Capital shortfalls of unconsolidated subsidiary securities dealers/brokers and insurance companies (for both solo and consolidated bases);
- t. Reciprocal investments in common stock of other banks/QBs and financial allied undertakings including securities dealers/brokers and insurance companies, after deducting related goodwill, if any (for both solo and consolidated bases);

¹ The adjustment pertains to the defined benefit asset or liability that is recognized in the balance sheet. Such that CET1 cannot be increased by derecognizing the liabilities, in the same manner, any asset recognized in the balance sheet should be deducted from CET1 capital;

- u. Materiality thresholds in credit derivative contracts purchased;
- v. Credit-linked notes and other similar products in the banking book with issue ratings below investment grade;
- w. Securitization tranches and structured products which are rated below investment grade or are unrated; and
- x. Credit enhancing interest only strips in relation to a securitization structure, net of the amount of “gain-on-sale” that must be deducted from CET1 capital.

Additional Tier 1 (AT1) capital

5. AT1 capital consists of the following:
 - a. Instruments issued by the bank that are not included in CET1 capital that meet the following:
 - i. criteria for inclusion in AT1 capital as set out in “App. 59 Annex B”;
 - ii. required loss absorbency features for instruments classified as liabilities for accounting purposes. The loss absorbency requirements are provided in “App. 59 Annex E”; and
 - iii. required loss absorbency feature at point of non-viability as set out in “App. 59 Annex F.”
 - b. Additional paid-in capital resulting from the issuance of instruments included in AT1 capital;
 - c. Deposit for subscription of AT1 capital instruments;
 - d. Minority interest in subsidiary banks which are less than wholly-owned:¹ *Provided*, That the minority interest arises from issuances of Tier 1 instruments, if issued by the bank itself, would meet all of the criteria for classification as Tier 1 capital: *Provided, further*, That the amount to be included as minority interest shall be reduced by the surplus Tier 1 capital of the subsidiary attributable to minority shareholders: *Provided, furthermore*, That the surplus Tier 1 capital of the subsidiary attributable to minority shareholders is computed as the available Tier 1 capital minus the lower of: (1) the minimum Tier 1 capital requirement of the subsidiary and (2) the portion of the consolidated minimum Tier 1 requirement that is attributable to the subsidiary, multiplied by the percentage of Tier 1 held by minority shareholders: *Provided, finally*, That the amount of Tier 1 capital to be recognized in AT1 capital will exclude amounts recognized in CET1 capital.

Illustrative computation is in App. 59 Annex D.

Regulatory adjustments to AT1 capital

6. The following are the adjustments to AT1 capital:
 - a. AT1 instruments treasury shares², including shares that the bank could be contractually obliged to purchase;
 - b. Investments in equity of unconsolidated subsidiary banks and QBs, and other financial allied undertakings (excluding subsidiary securities dealers/brokers and insurance companies), after deducting related goodwill, if any (for solo basis);
 - c. Investments in equity of unconsolidated subsidiary securities dealers/brokers and insurance companies after deducting related goodwill, if any (for both solo and consolidated bases);
 - d. Significant minority investments (10%-50% of voting stock) in banks and QBs, and other financial allied undertakings (for both solo and consolidated bases);
 - e. Significant minority investments (10%-50% of voting stock) in securities dealers/brokers and insurance companies, after deducting related goodwill, if any (for both solo and consolidated bases);
 - f. Minority investments (below 10% of voting stock) in banks and QBs, and other financial allied undertakings (for both solo and consolidated bases);
 - g. Minority investments (below 10% of voting stock) in securities dealers/brokers and insurance companies, after deducting related goodwill, if any (for both solo and consolidated bases).

For equity investments in financial entities (Items “b” to “g”), total investments include:

- i. other capital instruments in both the banking and trading book; and

¹ Same footnote as in Part II, Item “3.g.2.a”.

² Same footnote as in Part II, Item “4.a”

- ii. underwriting positions in equity and other capital instruments held for more than five (5) days:

Provided, That should the instrument of the entity in which the bank has invested does not meet the criteria for AT1 capital of the bank, the capital is to be considered common shares and thus deducted from CET1 capital.

- h. Reciprocal investments in AT1 capital instruments of other banks/QBs and financial allied undertakings including securities dealers/brokers and insurance companies, after deducting related goodwill, if any (for both solo and consolidated bases);

Tier 2 capital

- 7. Tier 2 capital is composed of the following:

- a. Instruments issued by the bank (and are not included in AT1 capital) that meet the following:
 - i. criteria for inclusion in Tier 2 capital as set out in “App. 59 Annex C”; and
 - ii. required loss absorbency feature at point of non-viability as set out in “App. 59 Annex F”.
- b. Deposit for subscription of T2 capital;
- c. Appraisal increment reserve – bank premises, as authorized by the Monetary Board;
- d. General loan loss provision, limited to a maximum of one percent (1.00%) of credit risk-weighted assets, and any amount in excess thereof shall be deducted from the credit risk-weighted assets in computing the denominator of the risk-based capital ratio;
- e. Minority interest in subsidiary banks which are less than wholly-owned:¹ *Provided, That* the minority interest arises from issuances of capital instruments, if issued by the bank itself, would meet all of the criteria for classification as Tier 1 or Tier 2 capital: *Provided, further, That* the amount to be included as minority interest shall be reduced by the surplus total capital of the subsidiary attributable to minority shareholders: *Provided, furthermore, That* the surplus total capital of the subsidiary attributable to minority shareholders is computed as the available total capital minus the lower of: (1) the minimum total capital requirement of the subsidiary and (2) the portion of the consolidated minimum total capital requirement that is attributable to the subsidiary, multiplied by the percentage of total capital held by minority shareholders. *Provided, finally, That* the total capital that will be recognized in Tier 2 will exclude amounts recognized in CET1 and AT1 capital.

Illustrative computation in App. 59 Annex D.

Regulatory adjustments to Tier 2 capital

- 8. The following adjustments shall be charged against Tier 2 capital:
 - a. Tier 2 instruments treasury shares², including shares that the bank could be contractually obliged to purchase;
 - b. Investments in equity of unconsolidated subsidiary banks and QBs, and other financial allied undertakings (excluding subsidiary securities dealers/brokers and insurance companies), after deducting related goodwill, if any (for solo basis);
 - c. Investments in equity of unconsolidated subsidiary securities dealers/brokers and insurance companies after deducting related goodwill, if any (for both solo and consolidated bases);
 - d. Significant minority investments (10%- 50% of voting stock) in banks and QBs, and other financial allied undertakings (for both solo and consolidated bases);
 - e. Significant minority investments (10%- 50% of voting stock) in securities dealers/brokers and insurance companies, after deducting related goodwill, if any (for both solo and consolidated bases);
 - f. Minority investments (below 10% of voting stock) in banks and QBs, and other financial allied undertakings (for both solo and consolidated bases);
 - g. Minority investments (below 10% of voting stock) in securities dealers/brokers and insurance companies, after deducting related goodwill, if any (for both solo and consolidated bases);

¹ Same footnote as in Part II, Item "3.g.2.a"

² Same footnote in Part II, Item "4.a"

For equity investments in financial entities (Items "b" to "g"), total investments include:

- i. other capital instruments in both the banking and trading book; and
- ii. underwriting positions in equity and other capital instruments held for more than five (5) days:

Provided, That should the instrument of the entity in which the bank has invested does not meet the criteria for T2 capital of the bank, the capital is to be considered common shares and thus deducted from CET1 capital.

- h. Sinking fund for the redemption of T2 capital instruments; and
 - i. Reciprocal investments in T2 capital instruments of other banks and financial allied undertakings including securities dealers/brokers and insurance companies, after deducting related goodwill, if any (for both solo and consolidated bases).
9. Any asset deducted from qualifying capital in computing the numerator of the risk-based capital ratio shall not be included in the risk-weighted assets in computing the denominator of the ratio.

Section B. Branches of Foreign Banks CET1 capital

10. CET1 Capital shall be comprised of:

- a. Permanently assigned capital¹;
- b. Undivided profits;
- c. Retained earnings;
- d. Accumulated net earnings²;
- e. Other comprehensive income
 - (1) Net unrealized gains or losses on AFS securities³;
 - (2) Cumulative foreign currency translation;
 - (3) Remeasurement of Net Defined Benefit Liability/(Asset);
 - (4) Gains/(Losses) on Fair Value Adjustments of Hedging Instruments:
 - (a) Cash Flow Hedge; and
 - (b) Hedge of a Net Investment in Foreign Operations; and
 - (5) Others (indicate the nature and amount of the accounts lodged)

Regulatory adjustments to CET1 capital

11. The regulatory adjustments to CET1 capital are provided in paragraph 4, as applicable.

In addition, the *Net due from* head office, branches and subsidiaries outside the Philippines, excluding accumulated net earnings shall be deducted from CET1 capital.

For designated clearing and settlement banks, such Net Due from head office, branches and subsidiaries account shall also exclude deposits placed in the Head Office up to the extent of the deposits maintained by other resident banks in the designated clearing and settlement bank relative to its function as clearing and settlement bank (as defined under Item "f" of Sec. 342 on *Transactions not covered*): *Provided, That* the designated clearing and settlement bank shall adopt appropriate control measures to ensure that such deposits placed in the Head Office are appropriately accounted for and segregated from the other items in the Due From Head Office/Branches/Agencies account: *Provided, further, That* such deposits places in the head office which are excluded in the Net Due from account shall be risk weighted based on the credit rating of the head office following the applicable risk weights provided in Part V of this Appendix.

¹ Shall include unremitted earnings elected by the branch to be part of assigned capital.

² Pertains to the unremitted profits not yet cleared by the Bangko Sentral for outward remittance, net losses in operation of Philippine branch of foreign banks.

³ For early adopters of PFRS 9, this account shall refer only to Net Unrealized gains (losses) on AFS equity securities. For AFS debt securities, refer to footnote in Part II, Item "3f" In view of the continuing evaluation by the Basel Committee on the appropriate treatment of unrealized gains/losses with respect to the evolution of the accounting framework, the Bangko Sentral will revise its relevant regulation once the treatment of fair value adjustments in the calculation of CET1 has been determined.

Additional Tier 1 (AT1) capital

Tier 2 Capital

12. Tier 2 capital shall consist of general loan loss provision, limited to a maximum of one percent (1%) of credit risk-weighted assets, and any amount in excess thereof shall be deducted from the risk-weighted assets in computing the denominator of the risk-based capital ratio.

Regulatory adjustments to Tier 2 capital

13. The regulatory adjustments to T2 capital for branches of foreign banks are provided in paragraph 8, as applicable.
14. Any asset deducted from qualifying capital in computing the numerator of the risk-based capital ratio shall not be included in the risk-weighted assets in computing the denominator of the ratio.

Part III. Capital conservation buffer

1. A capital conservation buffer of two and a half percent (2.5%) of risk-weighted assets, comprised of CET1 capital, shall be required of UBs/KBs (both domestic and branches of foreign banks) and their subsidiary banks and QBs.
2. This buffer is meant to promote the conservation of capital and build up of adequate cushion that can be drawn down by banks to absorb losses during periods of financial and economic stress.
3. Where a bank does not have positive earnings, has CET1 of not more than eight and a half percent (8.5%) (CET1 ratio of six percent (6%) plus conservation buffer of two and a half percent (2.5%) and has not complied with the ten percent (10%) minimum CAR, it would be restricted from making positive distributions, as illustrated below:

Level of CET 1 capital	Restriction on Distributions
<6.0%	No distribution
6.0%-7.25%	No distribution until more than 7.25% CET1 capital is met
>7.25%-8.5%	50% of earnings may be distributed
>8.5%	No restriction on Distribution

4. Elements subject to the restriction on distributions include dividends, profit remittance, in the case of foreign bank branches, share buybacks, discretionary payments on other Tier 1 capital instruments, and discretionary bonus payments to staff.
5. Payments which do not result in the depletion of CET1 are not considered distributions.
6. Earnings refer to distributable profits calculated prior to the deduction of elements subject to the restriction on distributions. The earnings is computed after the tax which would have been reported had none of the distributable items been paid.
7. The framework shall be applied on both solo and consolidated basis. The distribution constraints when applied to solo basis (individual bank level) would allow conservation of resources in specific parts of the group.
8. Drawdowns on the capital conservation buffers are generally allowed, subject to certain restrictions on distributions. However, UBs/KBs and their subsidiary banks and QBs shall be subject to a capital restoration plan within the timeframe determined by the Bangko Sentral. This restoration plan shall likewise be required for banks under the PCA framework.
9. While banks are not prohibited from raising capital from private sector in case they wish to distribute in excess of the constraints, this matter should be discussed with the Bangko Sentral and included in the capital planning process.

Part IV. Countercyclical Capital Buffer

1. A Countercyclical Capital Buffer (CCyB) set as percent of risk-weighted assets shall be required of UBs/KBs and their subsidiary banks and quasi-banks. It shall be comprised of CET1 capital.
2. The buffer is meant to ensure that banking sector capital requirements take account of the macrofinancial environment in which banks operate. The primary aim of the countercyclical capital buffer regime is to use a buffer of capital to achieve the broader macroprudential goal of protecting the banking sector from the build-up of systemic vulnerabilities. Protecting the banking sector in this context is not simply ensuring that individual banks remain solvent through a period of stress, as the minimum capital requirement and capital conservation buffer are together designed to fulfill this objective. Rather, the aim is to ensure that the banking sector in aggregate has the capital on hand to help maintain the flow of credit in the economy without its solvency being questioned, when the broader financial system experience stress.

3. The countercyclical buffer requirement will extend the size of the capital conservation buffer. The ban shall not be subject to any restriction on distribution if the following conditions are met:
 - a. Has positive retained earnings as of the preceding quarter and has complied with the requirements on the declaration of dividends as provided in the MORB.
 - b. Has CET1 of more than the total required (minimum CET1 ratio of six percent (6%) plus CCB of two and a half percent (2.5%) plus CCyB at the rate determined by the Monetary Board) before the distribution; and
 - c. Has complied with the minimum capital ratios (CET1 ratio to six percent (6%) Tier 1 ratio of seven and a half percent (7.5%) and ten percent (10%) (CAR) after the distribution.

Otherwise, the policy framework of the capital conservation buffer on the restriction on distributions shall apply, except for drawdowns. Thresholds on the restriction on distribution shall consider the CCyB requirement as an extension of the capital conservation buffer.

4. Drawdowns on the CCyB are not allowed unless the Bangko Sentral announces a decision to lower the buffer rate. The capital surplus created when the CCyB is lowered should be unfettered, i.e., there are no restrictions on distributions when the buffer is released.
5. The uniformly applicable rate of the countercyclical buffer shall initially be set at zero percent (0%), subject to recalibration as determined by the Monetary Board. CCyB decisions shall be based on a set of indicators including, but not limited to, the credit-to-GDP gap as well as the growth and quality of credit, among others.
6. Any increase in the countercyclical buffer shall have a preannouncement period of twelve (12) months in consideration of the capital planning process of banks while reductions in the buffer would take effect immediately to help reduce the risk of the supply of credit being constrained by regulatory capital requirement.

Part V. Credit risk-weighted assets

A. Risk-weighting

1. Banking book exposures shall be risk-weighted based on third party credit assessment of the individual exposure given by eligible external credit assessment institutions listed in Part IV.C.

The table below sets out the mapping of external credit assessments with the corresponding risk weights for banking book exposures. Exposures related to credit derivatives and securitizations are dealt with in Parts V and VI, respectively. Exposures should be risk-weighted net of specific provisions.

STANDARDIZED CREDIT RISK WEIGHTS								
Credit Assessment ¹	AAA Below	AA+ to AA-	A+ to A-	BBB+ to BBB-	BB+ to BB-	B+ to B-	Below B-	Unrate d
Sovereigns	0%	0%	20%	50%	100%	100%	150%	100%
MDBs	0%	20%	50%	50%	100%	100%	150%	100%

Sovereign Exposures

2. These include all exposures to central governments and central banks. All Philippine peso (Php) denominated exposures to the Philippine National Government (NG) and the Bangko Sentral shall be risk-weighted at zero percent (0%). Foreign currency denominated exposures to the NG and the Bangko Sentral, however, shall be risk-weighted according to the table above: *Provided*, That only one-third (1/3) of the applicable risk weight shall be

¹ The notations follow the rating symbols used by Standard & Poor's. The mapping of ratings of all recognized external rating agencies is in Part IV.C

² Or risk weight applicable to sovereign of incorporation, whichever is higher

applied from 01 July 2007, two-thirds (2/3) from 01 January 2008, and the full risk weight from 01 January 2009¹. Exposures to the Bank for International Settlements (BIS), the International Monetary Fund (IMF), and the European Central Bank (ECB) and the European Community (EC) shall also receive zero percent (0%) risk weight.

Multilateral Development Bank (MDB) Exposures

3. These include all exposures to multilateral development banks. Exposures to the World Bank Group comprised of the IBRD and the IFC, the ADB, the AfDB, the EBRD, the IADB, the EIB, the European Investment Fund (EIF), the NIB, the CDB, the Islamic Development Bank (IDB), and the CEDB currently receive zero percent (0%) risk weight. However, it is the responsibility of the bank to monitor the external credit assessments of multilateral development banks to which they have an exposure to reflect in the risk weights any change therein.

Bank Exposures

4. These include all exposures to Philippine-incorporated banks/QBs, as well as foreign-incorporated banks.

Interbank Call Loans

5. Interbank call loans refer to interbank loans that pass through the Interbank Call Loan Funds Transfer System of the Bangko Sentral, the BAP, and the PCHC.

Exposures to Local Government Units

6. These include all exposures to non- central government public sector entities.

Exposures to Government Corporations

7. These include all exposures to commercial undertakings owned by central or local governments. Exposures to Philippine GOCCs that are not explicitly guaranteed by the Philippine NG are also included in this category.

Corporate Exposures

8. These include all exposures to business entities, which are not considered as micro, small, or medium enterprises (MSME), whether in the form of a corporation, partnership, or sole proprietorship. These also include all exposures to FIs, including securities dealers/brokers and insurance companies, not falling under the definition of Bank in paragraph 4.

Housing Loans

9. These include all current loans to individuals for housing purpose, fully secured by first mortgage on residential property that is or will be occupied by the borrower².

Micro, Small, and Medium Enterprises (MSME)

10. An exposure must meet the following criteria to be considered as an MSME exposure:
 - a) The exposure must be to an MSME as defined under existing Bangko Sentral regulations; and
 - b) The exposure must be in the form of direct loans, or unavailed portion of committed credit lines and other business facilities such as outstanding guarantees issued and unused letters of credit: *Provided*, That the credit equivalent amounts thereof shall be determined in accordance with the methodology for off-balance sheet items.

Qualified portfolio

11. For a bank's portfolio of MSME exposures to be considered as qualified, it must be a highly diversified portfolio, i.e., it has at least 500 borrowers that are distributed over a number of industries. In addition, all MSME exposures in the qualified portfolio must be current exposures. All non-current MSME exposures are excluded from count and are to be treated as ordinary non-performing loans. Current MSME exposures not qualifying under highly diversified MSME portfolio will be risk weighted based on external rating and shall be risk-weighted in the same manner as corporate exposures.

¹ The capital treatment of banks holdings of ROP Global Bonds paired with Warrants under the Bangko Sentral's revised risk-based capital adequacy framework is contained in *Appendix 60*.

² Includes housing microfinance loans under Sec. 314

Defaulted Exposures

12. A default is considered to have occurred in the following cases:

- a) If a credit obligation is considered non-performing under existing rules and regulations. For non-performing debt securities, they shall be defined as follows:
 - i. For zero-coupon debt securities, and debt securities with quarterly, semi-annual, or annual coupon payments, they shall be considered non-performing when principal and/or coupon payment, as may be applicable, is unpaid for thirty (30) days or more after due date; and
 - ii. For debt securities with monthly coupon payments, they shall be considered non-performing when three (3) or more coupon payments are in arrears: *Provided, however,* That when the total amount of arrearages reaches twenty percent (20%) of the total outstanding balance of the debt security, the total outstanding balance of the debt security shall be considered as non-performing.
- b) If a borrower/obligor has sought or has been placed in bankruptcy, has been found insolvent, or has ceased operations in the case of businesses;
- c) If the bank sells a credit obligation at a material credit-related loss, i.e., excluding gains and losses due to interest rate movements. Banks' board-approved internal policies must specifically define when a material credit-related loss occurs; and
- d) If a credit obligation of a borrower/obligor is considered to be in default, all credit obligations of the borrower/obligor with the same bank shall also be considered to be in default.

Housing loans

13. These include all loans to individuals for housing purpose, fully secured by first mortgage on residential property that is or will be occupied by the borrower, which are considered to be in default in accordance with paragraph 12.

Others

14. These include the total amounts or portions of all other defaulted exposures, which are not secured by eligible collateral or guarantee as defined in Part IV.B.

ROPA

15. All real and other properties acquired and classified as such under existing regulations.

Other Assets

16. The standard risk weight for all other assets, including bank premises, furniture, fixtures and equipment, will be 100%, except in the following cases:

- a) Cash on hand and gold, which shall be risk-weighted at zero percent (0%);
- b) Checks and other cash items, which shall be risk-weighted at twenty percent (20%);
- c) Loans to small farmer and fisherfolk to the extent guaranteed by the Agricultural Guarantee Fund Pool (AGFP) created under Administrative Order No. 225-A dated 26 May 2008, which shall be risk weighted at zero percent (0%), prior to the transfer of its administration to the Philippine Guarantee Corporation (Philguarantee); and
- d) Loans to MSMEs, which are performing, to the extent guaranteed by a qualified Credit Surety Fund (CSF) Cooperative, which shall be risk-weighted at twenty percent (20%). A qualified CSF Cooperative refers to a cooperative that is organized consistent with the provisions of Republic Act (R.A.) No. 10744 and its implementing rules and regulations (IRR): *Provided,* That the maximum allowable leveraging ratio of the CSF Cooperative to guarantee bank loans shall be three (3); *Provided further,* That said leverage ratio shall be subject to periodic review for progressive increase as warranted by the CSF Cooperative's performance but not to exceed 5x the CSF Cooperative's Restricted Capital for Surety.

Accruals on a claim shall be classified and risk-weighted in the same way as the claim. Bills purchased shall be classified and risk-weighted as claims on the drawee bank. The treatments of credit derivatives and securitization exposures are presented separately in Parts V and VI, respectively. Investments in equity or other regulatory capital instruments issued by banks or other financial/non-financial allied/non-allied undertakings will be risk-weighted at 100%, unless deductible from the capital base as required in Part II.

Off-balance sheet items

17. For off-balance sheet items, the risk-weighted amount shall be calculated using a two-step process. First, the credit equivalent amount of an off-balance sheet item shall be determined by multiplying its notional principal amount by the appropriate credit conversion factor, as follows:

a) *100% credit conversion factor* - this shall apply to direct credit substitutes, e.g., general guarantees of indebtedness (including standby letters of credit serving as financial guarantees for loans and securities) and acceptances (including endorsements with the character of acceptances), and shall include:

- i. Guarantees issued other than shipside bonds/airway bills;
- ii. Financial standby letters of credit

b) *Fifty percent (50%) credit conversion factor* – this shall apply to certain transaction-related contingent items, e.g., performance bonds, bid bonds, warranties and standby letters of credit related to particular transactions, and shall include:

- i. Performance standby letters of credit (net of margin deposit), established as a guarantee that a business transaction will be performed;

This shall also apply to –

- i. Note issuance facilities and revolving underwriting facilities; and
- ii. Other commitments, e.g., formal standby facilities and credit lines with an original maturity of more than one (1) year, and this shall also include Underwritten Accounts Unsold.

c) *Twenty percent (20%) credit conversion factor* – this shall apply to short term, self-liquidating trade-related contingencies arising from movement of goods, e.g., documentary credits collateralized by the underlying shipments, and shall include:

- i. Trade-related guarantees:
 - Shipline bonds/airway bills
 - Letters of credit – confirmed
- ii. Sight letters of credit outstanding (net of margin deposit);
- iii. Usance letters of credit outstanding (net of margin deposit);
- iv. Deferred letters of credit (net of margin deposit); and
- v. Revolving letters of credit (net of margin deposit) arising from movement of goods and/or services;

This shall also apply to commitments with an original maturity of up to one (1) year, and shall include Committed Credit Line for Commercial Paper Issued.

d) *Zero percent (0%) credit conversion factor* – this shall apply to commitments which can be unconditionally cancelled at any time by the bank without prior notice, and shall include Credit Card Lines.

This shall also apply to those not involving credit risk, and shall include:

- i. Late deposits/payments received;
- ii. Inward bills for collection;
- iii. Outward bills for collection;
- iv. Travelers' checks unsold;
- v. Trust department accounts;
- vi. Items held for safekeeping/custodianship;
- vii. Items held as collaterals;
- viii. Deficiency claims receivable; and
- ix. Others.

18. For derivative contracts, the credit equivalent amount shall be the sum of the current credit exposure (or replacement cost) and an estimate of the potential future credit exposure (or add-on). However, the following shall not be included in the computation:

- a) Instruments which are traded in an exchange where they are subject to daily receipt and payment of cash variation margin; and
- b) Exchange rate contract with original maturity of fourteen (14) calendar days or less.

19. The current credit exposure shall be the positive mark-to-market value of the contract (or zero if the mark-to-market value is zero or negative). The potential future credit exposure shall be the product of the notional principal amount of the contract multiplied by the appropriate potential future credit conversion factor, as indicated below:

Interest Exchange			
Residual Maturity	Rate Contract	Rate Contract	Equity Contract
One (1) year or less	0.0%	1.0%	6.0%
Over One (1) year to five (5) years	0.5%	5.0%	8.0%
Over five (5) years	1.5%	7.5%	10%

Provided, That:

- a) For contracts with multiple exchanges of principal, the factors are to be multiplied by the number of remaining payments in the contract;
 - b) For contracts that are structured to settle outstanding exposure following specified payment dates and where the terms are reset such that the market value of the contract is zero on these specified dates, the residual maturity would be set equal to the time until the next reset date, and in the case of interest rate contracts with remaining maturities of more than one (1) year that meet these criteria, the potential future credit conversion factor is subject to a floor of one-half percent (1/2%); and
 - c) No potential future credit exposure shall be calculated for single currency floating/floating interest rate swaps, i.e., the credit exposure on these contracts would be evaluated solely on the basis of their mark-to-market value.
20. The credit equivalent amount shall be treated like any on-balance sheet asset, and shall be assigned the appropriate risk weight, i.e., according to the third party credit assessment of the counterparty exposure.

B. Credit risk mitigation (CRM)

21. Banks use a number of techniques to mitigate the credit risks to which they are exposed. For example, exposures may be collateralized by first priority claims, in whole or in part with cash or securities, or a loan exposure may be guaranteed by a third party. Physical collateral, such as real estate, buildings, machineries, and inventories are not recognized at this time for credit risk mitigation purposes in line with Basel II recommendations.
22. In order for banks to obtain capital relief for any use of CRM techniques, all documentation used in collateralized transactions and for documenting guarantees must be binding on all parties and legally enforceable in all relevant jurisdictions. Banks must have conducted sufficient legal review to verify this and have a well-founded legal basis to reach this conclusion, and undertake such further review as necessary to ensure continuing enforceability.
23. The effects of CRM will not be double counted. Therefore, no additional supervisory recognition of CRM for regulatory capital purposes will be granted on claims for which an issue-specific rating is used that already reflects that CRM. Principal-only ratings will not be allowed within the framework of CRM.
24. While the use of CRM techniques reduces or transfers credit risk, it simultaneously may increase other risks (residual risks). Residual risks include legal, operational, liquidity and market risks. Therefore, it is imperative that banks employ robust procedures and processes to control these risks, including strategy; consideration of the underlying credit; valuation; policies and procedures; systems; control of roll-off risks; and management of concentration risk arising from the bank's use of CRM techniques and its interaction with the bank's overall credit risk profile.
25. The disclosure requirements under Part IX of this document must also be observed for banks to obtain capital relief (i.e., adjustments in the risk weights of collateralized or guaranteed exposures) in respect of any CRM techniques.

Collateralized transactions

26. A collateralized transaction is one in which:
 - a) banks have a credit exposure or potential credit exposure; and
 - b) that credit exposure or potential credit exposure is hedged in whole or in part by collateral posted by a counterparty¹ or by a third party in behalf of the counterparty.
27. In addition to the general requirement for legal certainty set out in paragraph 22, the legal mechanism by which collateral is pledged or transferred must ensure that the bank has the right to liquidate or take legal possession of it, in a timely manner, in the event of default, insolvency or bankruptcy (or one or more otherwise defined credit events

¹ Counterparty refers to a party to whom a bank has an on- or off-balance sheet credit exposure or a potential credit exposure.

set out in the transaction documentation) of the counterparty (and, where applicable, of the custodian holding the collateral). Furthermore, banks must take all steps necessary to fulfill those requirements under the law applicable to the bank's interest in the collateral for obtaining and maintaining an enforceable security interest, e.g., by registering it with a registrar, or for exercising a right to net or set off in relation to title transfer collateral.

28. In order for collateral to provide protection, the credit quality of the counterparty and the value of the collateral must not have a material positive correlation. For example, securities issued by the counterparty – or by any related group entity – would provide little protection and so would be ineligible.
29. Banks must have clear and robust procedures for the timely liquidation of collateral to ensure that any legal conditions required for declaring the default of the counterparty and liquidating the collateral are observed, and that collateral can be liquidated promptly.
30. Where the collateral is required to be held by a custodian, the Bangko Sentral will only recognize the collateral for regulatory capital purposes if it is held by Bangko Sentral-authorized third party custodians.
31. A capital requirement will be applied to a bank on either side of the collateralized transaction: for example, both repos and reverse repos will be subject to capital requirements. Likewise, both sides of a securities lending and borrowing transaction will be subject to explicit capital charges, as will the posting of securities in connection with a derivative exposure or other borrowing.

Banking book

32. Where banks take eligible collateral, as listed in paragraph 34, and satisfies the requirements under paragraphs 27 to 31, they are allowed to apply the risk weight of the collateral to the collateralized portion of the credit exposure (equivalent to the fair market value of recognized collateral), subject to a floor of twenty percent (20%). The twenty percent (20%) floor shall not apply and a zero percent (0%) risk weight can be applied when the exposure and the collateral are denominated in the same currency, and either:
 - a) The collateral is cash as defined in paragraph 34.a; or
 - b) The collateral is a sovereign debt security eligible for zero percent (0%) risk weight, or a Php-denominated debt obligation issued by the Philippine NG or the Bangko Sentral, which fair market value has been discounted by twenty percent (20%).
33. For collateral to be recognized, however, the collateral must be pledged for at least the life of the exposure and it must be marked to market and revalued with a minimum frequency of every six (6) months.
34. The following are the eligible collateral instruments:
 - a) Cash (as well as certificates of deposit or comparable instruments issued by the lending bank) on deposit with the bank which is incurring the counterparty exposure;
 - b) Gold;
 - c) Debt obligations issued by the Philippine NG or the Bangko Sentral;
 - d) Debt securities issued by central governments and central banks (and PSEs treated as sovereigns) of foreign countries as well as MDBs with at least investment grade external credit ratings;
 - e) Other debt securities with external credit ratings of at least BBB- or its equivalent;
 - f) Unrated senior debt securities issued by banks with an issuer rating of at least BBB- or its equivalent, or with other debt issues of the same seniority with a rating of at least BBB- or its equivalent;
 - g) Equities included in the main index of an organized exchange; and
 - h) Investments in Unit Investment Trust Funds (UITF) and the Asian Bond Fund 2 (ABF2) duly approved by the Bangko Sentral.

Trading book

35. A credit risk capital requirement should also be applied to banks' counterparty exposures in the trading book (e.g., repo-style transactions, OTC derivatives contracts). Where banks take eligible collateral for these trading book transactions, as listed in paragraph 34, and satisfies the requirements under paragraphs 27 to 31, they are to compute for the credit risk capital requirement according to the following paragraphs: *Provided*, That, for repo-style transactions in the trading book, all instruments which are included in the trading book may be used as eligible collateral.
36. For collateralized transactions in the trading book, the exposure amount after risk mitigation is calculated as follows:

$$E^* = \max \{0, [E \times (1 + H_e) - C \times (1 - H_c - H_{fx})]\}$$

Where:

E* = the exposure value after risk mitigation

E = the current value of the exposure

He = haircut appropriate to the exposure

C = the current value of the collateral received

Hc = haircut appropriate to the collateral

Hfx = haircut appropriate for currency mismatch between the collateral and exposure set at 8% (based on a 10-business day holding period and daily marking to market)

37. The treatment of transactions where there is a maturity mismatch between the maturity of the counterparty exposure and the collateral is given in paragraphs 50 to 54.
38. These are the haircuts to be used (based on a 10-business day holding period, daily marking to market and daily remargining), expressed as percentages:

Issue rating for debt securities ¹	Residual maturity	Haircut	
		Sovereign (and PSEs treated as sovereign) and MDB (with 0% risk weight) issuers	Other Issuers
Php – denominated securities issued by the Philippine NG and Bangko Sentral	<1 year	0.5	
	>1 yr. to < 5 yrs.	2	
	> 5 years	4	
AAA to AA-	<1 year	0.5	1
	>1 yr. to < 5 yrs.	2	4
	> 5 years	4	8
A+ to BBB-/Unrated bank debt securities as defined in paragraph 34.f	<1 year	1	2
	>1 yr. to < 5 yrs.	3	6
	> 5 years	6	12
Equities included in the main index and gold		15	
UITF and ABF2		Highest haircut applicable to any security in which the fund can invest	
Cash per paragraph 34.a in the same currency		0	
Other financial instruments in the trading book (applies to reposition transactions in the trading book only)		25	

39. Where the collateral is a basket of assets, the haircut on the basket will be $H = \sum a_i H_i$, where a_i is the weight of the asset in the basket and H_i is the haircut applicable to that asset.
40. For collateralized OTC derivatives transactions in the trading book, the credit equivalent amount will be computed according to paragraphs 18 to 19, but adjusted by deducting the volatility adjusted collateral amount as computed according to paragraphs 36 to 39.
41. The exposure amount after risk mitigation will be multiplied by the risk weight of the counterparty to obtain the risk weighted asset amount for the collateralized transaction.

Guarantees

42. Where guarantees are direct, explicit, irrevocable and unconditional, banks may be allowed to take account of such credit protection in calculating capital requirements.
43. A guarantee must represent a direct claim on the protection provider and must be explicitly referenced to specific exposures or a pool of exposures, so that the extent of the cover is clearly defined and incontrovertible. Other than non-payment by a protection purchaser of money due in respect of the credit protection contract, the guarantee must be irrevocable; there must be no clause in the contract that would allow the protection provider unilaterally to cancel the credit cover or that would increase the effective cost of cover as a result of deteriorating credit quality in the hedged exposure. It must also be unconditional; there should be no clause in the protection contract outside the direct control of the bank that could prevent the protection provider from being obliged to pay out in a timely manner in the event that the original counterparty fails to make the payment(s) due.

¹ The notations follow the rating symbols used by Standard & Poor's. The mapping of ratings of all recognized external rating agencies is in Part IV.C

44. In addition to the legal certainty requirement in paragraph 22, in order for a guarantee to be recognized, the following conditions must be satisfied:
- a) On the qualifying default/non- payment of the counterparty, the bank may in a timely manner pursue the guarantor for any monies outstanding under the documentation governing the transaction. The guarantor may make one lump sum payment of all monies under such documentation to the bank, or the guarantor may assume the future payment obligations of the counterparty covered by the guarantee. The bank must have the right to receive any such payments from the guarantor without first having to take legal actions in order to pursue the counterparty for payment;
 - b) The guarantee is an explicitly documented obligation assumed by the guarantor; and
 - c) The guarantee must cover all types of payments the underlying obligor is expected to make under the documentation governing the transaction, for example, notional amount, margin payments, etc. Where a guarantee covers payment of principal only, interests and other uncovered payments should be treated as an unsecured amount.
45. Where the bank's exposure is guaranteed by an eligible guarantor, as listed in paragraph 47, and satisfies the requirements under paragraphs 42 to 44, the bank is allowed to apply the risk weight of the guarantor to the guaranteed portion of the credit exposure.
46. The treatment of transactions where there is a mismatch between the maturity of the counterparty exposure and the guarantee is given in paragraphs 50 to 54.
47. The following are the eligible guarantors:
- a) Philippine NG and the Bangko Sentral;
 - b) Central governments and central banks and PSEs of foreign countries as well as MDBs with a lower risk weight than the counterparty;
 - c) Banks with a lower risk weight than the counterparty;
 - d) Other entities with external credit assessment of at least A- or its equivalent;
 - e) The Agricultural Guarantee Fund Pool (AGFP) created under Administrative Order No. 225-A dated 26 May 2008, prior to the transfer of the administration of the AGFP to the Philguarantee; and
 - f) Qualified Credit Surety Fund (CSF) Cooperative as defined in Part IV. A.
48. Where a bank provides a credit protection to another bank in the form of a guarantee that a third party will perform on its obligations, the risk to the guarantor bank is the same as if the bank had entered into the transaction as a principal. In such circumstances, the guarantor bank will be required to calculate capital requirement on the guaranteed amount according to the risk weight corresponding to the third party exposure. In this instance, and provided the credit protection is deemed to be legally effective, the credit risk is considered transferred to the bank providing credit protection. However, the bank receiving credit protection on its exposure to a third party shall recognize a corresponding risk- weighted credit exposure to the bank providing credit protection.
49. An exposure that is covered by a guarantee that is counter-guaranteed by the Philippine NG or Bangko Sentral, may be considered as covered by the guarantee of the Philippine NG or Bangko Sentral: *Provided, That:*
- a) the counter-guarantee covers all credit risk element of the exposure;
 - b) both the original guarantee and the counter-guarantee meet all operational requirements for guarantees, except that the counter guarantee need not be direct and explicit to the original exposure; and
 - c) the cover is robust and that no historical evidence suggests that the coverage of the counter-guarantee is less than effectively equivalent to that of a direct guarantee of the Philippine NG and Bangko Sentral.
- Currently, Php-denominated exposures to the extent guaranteed by Philguarantee (PGC) receive zero percent (0%) risk-weight.

Maturity mismatch

50. For collateralized transactions in the trading book and guaranteed transactions, the credit risk mitigating effects of such transactions will still be recognized even if a maturity mismatch occurs between the hedge and the underlying exposure, subject to appropriate adjustments.
51. For purposes of calculating risk- weighted assets, a maturity mismatch occurs when the residual maturity of a hedge is less than that of the underlying exposure.
52. The maturity of the hedge and the maturity of the underlying exposure should both be defined conservatively. For the hedge, embedded options which may reduce the term of the hedge should be taken into account so that the

shortest possible effective maturity is used. Where a call is at the discretion of the guarantor/protection seller, the maturity will always be at the first call date. If the call is at the discretion of the protection buying bank but the terms of the arrangement at origination of the hedge contain a positive incentive for the bank to call the transaction before contractual maturity, the remaining time to the first call date will be deemed to be the effective maturity. For example, where there is a step-up in cost in conjunction with a call feature or where the effective cost of cover increases over time even if credit quality remains the same or increases, the effective maturity will be the remaining time to the first call. The effective maturity of the underlying, on the other hand, should be gauged as the longest remaining time before the counterparty is scheduled to fulfill its obligation, taking into account any applicable grace period.

53. Hedges with maturity mismatches are only recognized when their original maturities are greater than or equal to one year. As a result, the maturity of hedges for exposures with original maturities of less than one (1) year must be matched to be recognized. In all cases, hedges will no longer be recognized when they have a residual maturity of three months or less.

54. When there is a maturity mismatch with recognized credit risk mitigants, the following adjustment will be applied.

$$Pa = P \times (t - 0.25) / (T - 0.25)$$

Where:

Pa = value of the credit protection adjusted for maturity mismatch

P = credit protection (e.g., collateral amount, guarantee amount) adjusted for any haircuts

T = min (T, residual maturity of the credit protection arrangement) expressed in years

t = min (5, residual maturity of the exposure) expressed in years

C. Use of third party credit assessments

55. The following third party credit assessment agencies are recognized by the Bangko Sentral for regulatory capital purposes:

International credit assessment agencies:

- Standard & Poor's;
- Moody's;
- Fitch Ratings; and
- Such other rating agencies as may be approved by the Monetary Board.

Domestic credit assessment agencies:

- PhilRatings; and
- Such other rating agencies as may be approved by the Monetary Board.

56. The tables below set out the mapping of ratings given by the recognized credit assessment agencies for purposes of determining the appropriate risk weights.

Agency	INTERNATIONAL RATINGS						
S&P	AAA	AA+	AA	AA-	A+	A	A1
Moody's	Aaa	Aa1	Aa2	Aa3	A1	A2	A3
Fitch	AAA	AA+	AA	AA-	A+	A	A-

Agency	DOMESTIC RATINGS						
PhilRatings	AAA	Aa+	Aa	Aa-	A+	A	A-

Agency	INTERNATIONAL RATINGS						
S&P	BBB+	BBB	BBB-	BB+	BB	BB-	B+
Moody's	Baa1	Baa2	Baa3	Ba1	Ba2	Ba3	B1
Fitch	BBB+	BBB	BBB-	BB+	BB	BB-	B+
Agency	DOMESTIC RATINGS						
PhilRatings	Baa+	Baa	Baa-	Ba+	Ba	Ba-	B+

Agency	INTERNATIONAL RATINGS		
S&P	B	B-	
Moody's	B2	B3	
Fitch	B	B-	

Agency	DOMESTIC RATINGS		
PhilRatings	B	B-	

57. The Bangko Sentral will issue the mapping of ratings of other rating agencies as soon as it is recognized by the Bangko Sentral for regulatory capital purposes.

National rating systems

58. With prior Bangko Sentral approval, international credit rating agencies may have national rating systems developed exclusively for use in the Philippines using the Philippines as reference highest credit quality anchor.

Multiple assessments

59. If an exposure has only one rating by any of the Bangko Sentral recognized credit assessment agencies, that rating shall be used to determine the risk weight of the exposure; in cases where there are two or more ratings which map into different risk weights, the higher of the two lowest risk weights should be used.

Issuer versus issue assessments

60. Any reference to credit rating shall refer to issue-specific rating; the issuer rating may be used only if the exposure being risk-weighted is:
- an unsecured senior obligation of the issuer and is of the same denomination applicable to the issuer rating (e.g., local currency issuer rating may be used for risk weighting local currency denominated senior claims);
 - short-term; and
 - in cases of guarantees.
61. For loans, risk weighting shall depend on either the rating of the borrower or the rating of the unsecured senior obligation of the borrower: *Provided*, That in case of the latter, the loan is of the same currency denomination as the unsecured senior obligation.

Domestic versus international debt issuances

62. Domestic debt issuances may be rated by Bangko Sentral-recognized domestic credit assessment agencies or by international credit assessment agencies which have developed a national rating system acceptable to the Bangko Sentral. Internationally-issued debt obligations shall be rated by Bangko Sentral-recognized international credit assessment agencies only.

Level of application of the assessment

63. External credit assessments for one entity within a corporate group cannot be used to proxy for the credit assessment of other entities within the same group. Such other entities should secure their own ratings.

Part VI. Credit Derivatives

- This Part sets out the capital treatment for credit derivatives. Banks may use credit derivatives to mitigate its credit risks or to acquire credit risks. For credit derivatives that are used as credit risk mitigants (CRM), the general requirements for the use of CRM techniques in paragraphs 21 to 25, Part IV.B, have to be satisfied, in addition to the specific operational requirements for credit derivatives in paragraphs 8 to 14.
- The contents of this Part are just the general rules to be followed in computing capital requirements for credit derivatives. A bank, therefore, is expected to consult the Bangko Sentral-SES when there is uncertainty about the computation of capital requirements, or even about whether a given transaction should be treated under the credit derivatives framework.

A. Definitions and general terminology

- Credit derivative* – a contract wherein one party called the protection buyer or credit risk seller transfers the credit risk of a reference asset or assets issued by a reference entity or entities, which it may or may not own, to another party called the protection seller or credit risk buyer. In return, the protection buyer pays a premium or interest-related payments to the protection seller reflecting the underlying credit risk of the reference asset/s. Credit derivatives may refer to credit default swaps (CDS), total return swaps (TRS), and credit-linked notes (CLN) and similar products.
- Credit default swap* – a credit derivative wherein the protection buyer may exchange the reference asset or any deliverable obligation of the reference entity for cash equal to a specified amount, or get compensated to the

extent of the difference between the par value and market value of the asset upon the occurrence of a defined credit event.

5. *Total return swap* – a credit derivative wherein the protection buyer exchanges the actual collections and variations in the prices of the reference asset with the protection seller in return for a fixed premium.
6. *Credit-linked note* – a pre-funded credit derivative wherein the note holder acts as a protection seller while the note issuer is the protection buyer. As such, the repayment of the principal to the note holder is contingent upon the non-occurrence of a defined credit event. All references to CLNs shall be taken to generically include similar instruments, such as credit-linked deposits (CLDs).
7. *Special purpose vehicle* – refers to an entity specifically established to issue CLNs of a single, homogeneous risk class that are fully collateralized as to principal by eligible collateral instruments listed in paragraph 34, Part IV.B, and which are purchased out of the proceeds of the note issuance.

B. Operational requirements for credit derivatives

8. A credit derivative must represent a direct claim on the protection seller and must be explicitly referenced to specific exposures or a pool of exposures, so that the extent of the cover is clearly defined and incontrovertible. Other than non-payment by a protection buyer of money due in respect of the credit derivative contract, it must be irrevocable; there must be no clause in the contract that would allow the protection seller unilaterally to cancel the credit cover or that would increase the effective cost of cover as a result of deteriorating credit quality in the hedged exposure. It must also be unconditional; there should be no clause in the credit derivative contract outside the direct control of the protection buyer that could prevent the protection seller from being obliged to pay out in a timely manner in the event of a defined credit event.
9. The credit events specified by the contracting parties must at a minimum cover:
 - a) failure to pay the amounts due under terms of the underlying obligation that are in effect at the time of such failure (with a grace period that is closely in line with the grace period in the underlying obligation);
 - b) bankruptcy, insolvency or inability of the obligor to pay its debts, or its failure or admission in writing of its inability generally to pay its debts as they become due, and analogous events; and
 - c) restructuring of the underlying obligation involving forgiveness or postponement of principal, interest or fees that results in a credit loss event (i.e., charge-off, specific provision or other similar debit to the profit and loss account).
10. The credit derivative shall not terminate prior to expiration of any grace period required for a default on the underlying obligation to occur as a result of a failure to pay, subject to the provisions of paragraph 52 of Part IV.B.
11. Credit derivatives allowing for cash settlement are recognized for capital purposes insofar as a robust valuation process is in place in order to estimate loss reliably. There must be a clearly specified period for obtaining post-credit event valuations of the underlying obligation.
12. If the protection buyer's right or ability to transfer the underlying obligation to the protection seller is required for settlement, the terms of the underlying obligation must provide that any required consent to such transfer may not be unreasonably withheld.
13. The identity of the parties responsible for determining whether a credit event has occurred must be clearly defined. This determination must not be the sole responsibility of the protection seller. The bank as protection buyer must have the right/ability to inform the protection seller of the occurrence of a credit event.
14. Asset mismatches (underlying obligation is different from the obligation used for purposes of determining cash settlement or the deliverable obligation, or from the obligation used for purposes of determining whether a credit event has occurred) are permissible if:
 - a) the obligation used for purposes of determining cash settlement or the deliverable obligation, or the obligation used for purposes of determining whether a credit event has occurred ranks *pari passu* with or is junior to the underlying obligation; and
 - b) both obligations share the same obligor (i.e., the same legal entity) and legally enforceable cross-default or cross-acceleration clauses are in place.

C. Capital treatment for protection buyers

15. A bank that enters into a credit derivative transaction as a protection buyer in order to hedge an existing exposure in the banking book may only get capital relief if all the general requirements for the use of CRM techniques in paragraphs 21 to 25, Part IV.B and the conditions in paragraphs 8 to 14 are satisfied. In addition, only the eligible guarantors listed in paragraph 47, Part IV.B are considered as eligible protection sellers.
16. If all of the conditions in paragraph 15 are satisfied, banks that are protection buyers may apply the risk weight of the protection seller to the protected portion of the exposure being hedged. The risk weight of the protection seller should therefore be lower than the risk weight of the exposure being hedged for capital relief to be recognized. Exposures that are protected through the issuance of CLNs will be treated as transactions collateralized by cash and a zero percent (0%) risk weight is applied to the protected portion. The uncovered portion shall retain the risk weight of the bank's underlying counterparty.
17. The protected portion of an exposure is measured as follows:
 - a) The fixed amount, if such is to be paid upon the occurrence of a credit event; or
 - b) The notional value of the contract if either (1) par is to be paid in exchange for physical delivery of the reference asset, or (2) par less market value of the asset is to be paid upon the occurrence of a credit event.
18. A bank may obtain credit protection for a basket of reference entities where the contract terminates and pays out on the first entity to default. In this case, the bank may substitute the risk weight of the protection seller for the risk weight of the asset within the basket with the lowest risk-weighted amount, but only if the notional amount is less than or equal to the notional amount of the credit derivative.
19. Where the contract terminates and pays out on the nth (other than the first) entity to default, the bank will only be able to recognize any reductions in the risk weight of the underlying asset if (n-1)th default- protection has also been obtained or when n-1 of the assets within the basket has already defaulted.
20. Where the contract is referenced to entities in the basket proportionately, reductions in the risk weight will only apply to the extent of the underlying asset's share of protection in the contract.
21. When a bank conducts an internal hedge using a credit derivative (i.e., hedging the credit risk of an exposure in the banking book with a credit derivative booked in the trading book), in order for the bank to receive any reduction in the capital requirement for the exposure in the banking book, the credit risk in the trading book must be transferred to an outside third party (i.e., an eligible protection seller).
22. Where a bank buys credit protection through a TRS and records the net payments received on the swap as net income, but does not record offsetting deterioration in the value of the asset that is protected (either through reductions in fair value or by an addition to reserves), the credit protection will not be recognized.
23. Materiality thresholds on payments below which no payment is made in the event of loss are equivalent to retained first loss positions and must be deducted in full from the capital of the bank buying the credit protection.
24. Where the credit protection is denominated in a currency different from that in which the exposure is denominated – i.e., there is a currency mismatch – the protected portion of the exposure will be reduced by the application of a haircut, as follows:

$$Ga = G \times (1 - H_{fx})$$

Where:

Ga = adjusted protected portion of the exposure

G = protected portion of the exposure prior to haircut

H_{fx} = haircut appropriate for currency mismatch between the credit protection and underlying obligation set at eight percent (8%) (based on a 10-business day holding period and daily marking to market)

25. Where a maturity mismatch occurs between the credit protection and the underlying exposure, the protected portion of the exposure adjusted for maturity mismatch will be computed according to paragraph 50 to 54, Part IV.B.

D. Capital treatment for protection sellers

26. Where a bank is a protection seller in a CDS or TRS transaction, it must calculate a capital requirement on the reference asset as if it were a direct investor in the reference asset. The risk weight of the reference asset is multiplied by the nominal amount of the protection provided by the credit derivative to obtain the risk-weighted exposure.

27. For a bank holding a CLN, credit exposure is acquired on two fronts. As such, the on-balance sheet exposure arising from the note should be weighted by adding the risk weights of the reference entity and the risk weight of the note issuer. The amount of exposure is the carrying amount of the note. If the CLN principal is fully collateralized by an eligible collateral listed in paragraph 34, Part IV.B, and which satisfies the requirements in paragraphs 27 to 31, Part IV.B, the risk weight of the note issuer is substituted with the risk weight associated with the relevant collateral.
28. When the credit derivative is referenced to a basket of reference entities and the contract terminates and pays out on the first entity to default in the basket, capital should be held to consider the cumulative risk of all the reference entities in the basket. This means that the risk weights of all the reference entities are added up and multiplied by the amount of the protection provided by the credit derivative to obtain the risk-weighted exposure to the basket. However, the risk-weighted exposure is capped at ten (10) times the protection provided under the contract. Accordingly, the maximum capital charge is 100% of the protection provided under the contract. The multiplier ten (10) is the reciprocal of the Bangko Sentral-required minimum CAR of ten percent (10%). For CLNs, the risk weight of the issuer is likewise included in the summing of the risk weights.
29. When the contract terminates and pays out on the nth (other than the first) entity to default, the treatment above shall apply except that in aggregating the risk weights of the reference entities, the risk weight/s of the n-1 lowest risk-weighted entity/ies is/are excluded from the computation. For CLNs, the risk weight of the issuer is likewise included in the summing of the risk weights.
30. When a first or an nth-to-default credit derivative has an external credit rating acceptable to the Bangko Sentral, the risk weight in paragraph 21, Part VI.F will be applied.
31. A contract that is referenced to entities in the basket proportionately should be risk-weighted according to each reference entity's share of protection under the contract.

E. Credit derivatives in the trading book

32. The following describes the positions to be reported for credit derivative transactions for purposes of calculating specific risk and general market risk charges under the standardized approach.
33. A CDS creates a notional position in the specific risk of the reference obligation. A TRS creates notional positions on the specific and general market risks of the reference obligation, and an opposite notional position on a zero coupon government security representing the fixed payments or premium under the TRS. A CLN creates a notional position in the specific risk of the reference obligation, a position on the specific risk associated with the issuer, and a position on the general market risk of the note.

Specific risk

34. The specific risk position/s on the reference obligation/s created by credit derivatives are reported as short positions by protection buyers and long positions by protection sellers. In addition, holders of CLNs should report a long position on the specific risk of the note issuer.
35. The protection buyer in a first-to-default transaction should report a short position in the reference obligation with the lowest specific risk charge. A protection buyer in an nth (other than the first)-to-default transaction shall only be allowed to report a short position in a reference obligation only if n-1 obligations in the reference basket has/have already defaulted.
36. When a credit derivative is referenced to multiple entities and the contract terminates and pays out on the first obligation to default in the basket, the transaction should be reported by the protection seller as long positions in each of the reference obligations in the basket. A CLN should likewise be reported as a long position on the note issuer. The total capital charge is capped at the notional amount of the derivative or, in the case of a CLN, the carrying amount of the note.
37. When the contract terminates and pays out on the nth (other than the first) entity to default in the basket, the treatment above shall apply except that the protection seller may exclude the long position/s on n-1 reference obligations with the lowest risk-weighted exposures in its report. A CLN should likewise be reported as a long position on the note issuer. The total capital charge is capped at the notional amount of the derivative or, in the case of a CLN, the carrying amount of the note.
38. When an nth-to-default credit derivative has an external credit rating acceptable to the Bangko Sentral, the specific risk weights in Part VII.B will be applied.
39. When the contract is referenced to multiple obligations under a proportionate structure, positions in the reference obligations should be reported according to their respective proportions in the contract.

General market risk

40. A protection buyer/seller in a TRS should report a short/long notional position on the reference obligation and a long/short notional position on a zero coupon government security representing the fixed payment under the contract.
41. A protection buyer/seller in a CLN should report a short/long position on the note.

Counterparty credit risk

42. CDS and TRS transactions in the trading book attract counterparty credit risk charges. A five percent (5%) add-on factor for the computation of the potential future credit exposure shall be used by both protection buyers and protection sellers if the reference obligation has an external credit rating of at least BBB- or its equivalent. A ten percent (10%) add-on factor applies to all other reference obligations. However, a protection seller in a CDS shall only be subject to the add-on factor if it is subject to closeout upon the insolvency of the protection buyer while the underlying is still solvent. The add-on in this case should be capped to the amount of unpaid premiums.
43. Where the credit derivative is a first to default transaction, the add-on will be determined by the lowest credit quality underlying in the basket, i.e., if there are any non-investment grade or unrated items in the basket, the ten percent (10%) add-on should be used. For second and subsequent to default transactions, underlying assets should continue to be allocated according to the credit quality, i.e., the second lowest credit quality will determine the add-on for a second to default transaction, etc.
44. Where the credit derivative is referenced proportionately to multiple obligations, the add-on factor will follow the add-on factor applicable for the obligation with the biggest share. If the protection is equally proportioned, the highest add-on factor should be used.

Part VII. Securitization

1. Banks must apply the securitization framework for determining regulatory capital requirements on their securitization exposures. Securitization exposures can include but are not restricted to the following: asset-backed securities, mortgage-backed securities, credit enhancements, liquidity facilities, interest rate or currency swaps, and credit derivatives. Underlying instruments in the pool being securitized may include but are not restricted to the following: loans, commitments, asset-backed and mortgage-backed securities, corporate bonds, equity securities, and private equity investments.
2. Since securitizations may be structured in many different ways, the capital treatment of a securitization exposure must be determined on the basis of its economic substance rather than its legal form. The contents of this Part are just the general rules to be followed in computing capital requirements for securitization exposures. A bank should therefore consult the Bangko Sentral- SES when there is uncertainty about the computation of capital requirements, or even about whether a given transaction should be considered a securitization.

A. Definitions and general terminology

3. *Traditional securitization* – a structure where the cash flow from an underlying pool of exposures is used to service at least two (2) different stratified risk positions or tranches reflecting different degrees of credit risk. Payments to the investors depend upon the performance of the specified underlying exposures, as opposed to being derived from an obligation of the entity originating those exposures. The stratified/tranched structures that characterize securitizations differ from ordinary senior/subordinated debt instruments in that junior securitization tranches can absorb losses without interrupting contractual payments to more senior tranches, whereas subordination in a senior/subordinated debt structure is a matter of priority of rights to the proceeds of liquidation.
4. *Synthetic securitization* – a structure with at least two (2) different stratified risk positions or tranches that reflect different degrees of credit risk where credit risk of an underlying pool of exposures is transferred, in whole or in part, through the use of funded (e.g., credit-linked notes) or unfunded (e.g., credit default swaps) credit derivatives or guarantees that serve to hedge the credit risk of the portfolio. Accordingly, the investors' potential risk is dependent upon the performance of the underlying pool.
5. *Originating bank* – a bank that originates directly or indirectly underlying exposures included in the securitization.
6. *Clean-up call* – an option that permits the securitization exposures to be called before all of the underlying exposures or securitization exposures have been repaid. In the case of traditional securitizations, this is generally accomplished by repurchasing the remaining securitization exposures once the pool balance or outstanding securities have fallen below some specified level. In the case of a synthetic transaction, the cleanup call may take the form of a clause that extinguishes the credit protection.
7. *Credit enhancement* – a contractual arrangement in which the bank retains or assumes a securitization exposure and, in substance, provides some degree of added protection to other parties to the transaction.

8. *Early amortization provisions* – mechanisms that, once triggered, allow investors to be paid out prior to the originally stated maturity of the securities issued. For risk-based capital purposes, an early amortization provision will be considered either controlled or non-controlled.
 - a) The bank must have an appropriate capital/liquidity plan in place to ensure that it has sufficient capital and liquidity available in the event of an early amortization;
 - b) Throughout the duration of the transaction, including the amortization period, there is the same pro rata sharing of interest, principal, expenses, losses and recoveries based on the bank's and investors' relative shares of the receivables outstanding at the beginning of each month;
 - c) The bank must set a period for amortization that would be sufficient for at least ninety percent (90%) of the total debt outstanding at the beginning of the early amortization period to have been repaid or recognized as in default; and
 - d) The pace of repayment should not be any more rapid than would be allowed by straight-line amortization over the period set out in criterion (c).

An early amortization provision that does not satisfy the conditions for a controlled early amortization provision will be treated as non-controlled early amortization provision.

9. *Eligible liquidity facilities* – an off- balance sheet securitization exposure shall be treated as an eligible liquidity facility if the following minimum requirements are satisfied:
 - a) The facility documentation must clearly identify and limit the circumstances under which it may be drawn. Draws under the facility must be limited to the amount that is likely to be repaid fully from the liquidation of the underlying exposures and any seller-provided credit enhancements. In addition, the facility must not cover any losses incurred in the underlying pool of exposures prior to a draw, or be structured such that draw-down is certain (as indicated by regular or continuous draws);
 - b) The facility must be subject to an asset quality test that precludes it from being drawn to cover credit risk exposures that are considered non-performing under existing Bangko Sentral regulations. In addition, liquidity facilities should only fund exposures that are externally rated investment grade at the time of funding;
 - c) The facility cannot be drawn after all applicable (e.g., transaction-specific and program-wide) credit enhancements from which the liquidity would benefit have been exhausted; and
 - d) Repayment of draws on the facility (i.e., assets acquired under a purchase agreement or loans made under a lending agreement) must not be subordinated to any interests of any note holder in the program or subject to deferral or waiver.
10. *Eligible servicer cash advance facilities* – cash advance that may be provided by servicers to ensure an uninterrupted flow of payments to investors. The servicer should be entitled to full reimbursement and this right is senior to other claims on cash flows from the underlying pool of exposures.
11. *Excess spread* – generally defined as gross finance charge collections and other income received by the trust or special purpose entity (SPE, specified in paragraph 13) minus certificate interest, servicing fees, charge-offs, and other senior trust or SPE expenses.
12. *Implicit support* – arises when a bank provides support to a securitization in excess of its predetermined contractual obligation.
13. *Special purpose entity* – a corporation, trust, or other entity organized for a specific purpose, the activities of which are limited to those appropriate to accomplish the purpose of the SPE, and the structure of which is intended to isolate the SPE from the credit risk of an originator or seller of exposures. SPEs are commonly used as financing vehicles in which exposures are sold to a trust or similar entity in exchange for cash or other assets funded by debt issued by the trust.

B. Operational requirements for the recognition of risk transference in traditional securitizations

14. An originating bank may exclude securitized exposures from the calculation of risk-weighted assets only if all of the following conditions have been met. Banks meeting these conditions, however, must still hold regulatory capital against any securitization exposures they retain.
 - a) Significant credit risk associated with the securitized exposures has been transferred to third parties.

- b) The transferor does not maintain effective or indirect control over the transferred exposures. The assets are legally isolated from the transferor in such a way (e.g., through the sale of assets or through subparticipation) that the exposures are put beyond the reach of the transferor and its creditors, even in bankruptcy or receivership. These conditions must be supported by an opinion provided by a qualified legal counsel.

The transferor is deemed to have maintained effective control over the transferred credit risk exposures if it:

- i. is able to repurchase from the transferee the previously transferred exposures in order to realize their benefits; or
- ii. is obligated to retain the risk of the transferred exposures.

The transferor's retention of servicing rights to the exposures will not necessarily constitute indirect control of the exposures.

- c) The securities issued are not obligations of the transferor. Thus, investors who purchase the securities only have claim to the underlying pool of exposures.
- d) The transferee is an SPE and the holders of the beneficial interests in that entity have the right to pledge or exchange them without restriction.
- e) Clean-up calls must satisfy the conditions set out in paragraph 17.
- f) The securitization does not contain clauses that (i) require the originating bank to alter systematically the underlying exposures such that the pool's weighted average credit quality is improved unless this is achieved by selling assets to independent and unaffiliated third parties at market prices; (ii) allow for increases in a retained first loss position or credit enhancement provided by the originating bank after the transaction's inception; or (iii) increase the yield payable to parties other than the originating bank, such as investors and third-party providers of credit enhancements, in response to a deterioration in the credit quality of the underlying pool.

C. Operational requirements for the recognition of risk transference in synthetic securitizations

- 15. For synthetic securitizations, the use of CRM techniques (i.e., collateral, guarantees and credit derivatives) for hedging the underlying exposure may be recognized for risk-based capital purposes only if the conditions outlined below are satisfied:

- a) Credit risk mitigants must comply with the requirements as set out in Part IV.B and Part V of this Framework.
- b) Eligible collateral is limited to that specified in paragraph 34, Part IV.B. Eligible collateral pledged by SPEs may be recognized.
- c) Eligible guarantors are defined in paragraph 47, Part IV.B. SPEs are not recognized as eligible guarantors in the securitization framework.
- d) Banks must transfer significant credit risk associated with the underlying exposure to third parties.
- e) The instruments used to transfer credit risk must not contain terms or conditions that limit the amount of credit risk transferred, such as those provided below:
 - i. Clauses that materially limit the credit protection or credit risk transference (e.g., significant materiality thresholds below which credit protection is deemed not to be triggered even if a credit event occurs or those that allow for the termination of the protection due to deterioration in the credit quality of the underlying exposures);
 - ii. Clauses that require the originating bank to alter the underlying exposures to improve the pool's weighted average credit quality;
 - iii. Clauses that increase the banks' cost of credit protection in response to deterioration in the pool's quality;
 - iv. Clauses that increase the yield payable to parties other than the originating bank, such as investors and third-party providers of credit enhancements, in response to a deterioration in the credit quality of the reference pool; and
 - v. Clauses that provide for increases in a retained first loss position or credit enhancement provided by the originating bank after the transaction's inception.
- f) An opinion must be obtained from a qualified legal counsel that confirms the enforceability of the contracts in all relevant jurisdictions.
- g) Clean-up calls must satisfy the conditions set out in paragraph 17.

16. For synthetic securitizations, the effect of applying CRM techniques for hedging the underlying exposure are treated according to Part IV.B and Part V of this Framework. In case there is a maturity mismatch, the capital requirement will be determined in accordance with paragraphs 50 to 54, Part IV.B. When the exposures in the underlying pool have different maturities, the longest maturity must be taken as the maturity of the pool. Maturity mismatches may arise in the context of synthetic securitizations when, for example, a bank uses credit derivatives to transfer part or all of the credit risk of a specific pool of assets to third parties. When the credit derivatives unwind, the transaction will terminate. This implies that the effective maturity of the tranches of the synthetic securitization may differ from that of the underlying exposures. Originating banks of synthetic securitizations with such maturity mismatches must deduct all retained positions that are unrated or rated below investment grade. Accordingly, when deduction is required, maturity mismatches are not taken into account. For all other securitization exposures, the bank must apply the maturity mismatch treatment set forth in paragraphs 50 to 54, Part IV.B.

D. Operational requirements and treatment of clean-up calls

17. For securitization transactions that include a clean-up call, no capital will be required due to the presence of a clean-up call if the following conditions are met: (i) the exercise of the clean-up call must not be mandatory, in form or in substance, but rather must be at the discretion of the originating bank; (ii) the clean-up call must not be structured to avoid allocating losses to credit enhancements or positions held by investors or otherwise structured to provide credit enhancement; and (iii) the clean-up call must only be exercisable when ten percent (10%) or less of the original underlying portfolio, or securities issued remain, or, for synthetic securitizations, when ten percent (10%) or less of the original reference portfolio value remains.
18. Securitization transactions that include a clean-up call that does not meet all of the criteria stated in paragraph 17 result in a capital requirement for the originating bank. For a traditional securitization, the underlying exposures must be treated as if they were not securitized. Additionally, banks must not recognize in regulatory capital any gain-on-sale, as defined in paragraph 23. For synthetic securitization, the bank purchasing protection must hold capital against the entire amount of the securitized exposures as if they did not benefit from any credit protection. Same treatment applies for synthetic securitization that incorporates a call, other than a cleanup call, that effectively terminates the transaction and the purchased credit protection on a specified date.
19. If a clean-up call, when exercised, is found to serve as a credit enhancement, the exercise of the clean-up call must be considered a form of implicit support provided by the bank and must be treated in accordance with paragraph 26.

E. Operational requirements for use of external credit assessments

20. The following operational criteria concerning the use of external credit assessments apply in the securitization framework:
- a) To be eligible for risk-weighting purposes, the external credit assessment must take into account and reflect the entire amount of credit risk exposure the bank has with regard to all payments owed to it. For example, if a bank is owed both principal and interest, the assessment must fully take into account and reflect the credit risk associated with timely repayment of both principal and interest.
 - b) The external credit assessments must be from an eligible External Credit Assessment Institution (ECAI) as recognized by the bank's national supervisor in accordance with Part IV.C. An eligible credit assessment must be publicly available. In other words, a rating must be published in an accessible form and included in the ECAI's transition matrix. Consequently, ratings that are made available only to the parties to a transaction do not satisfy this requirement.
 - c) Eligible ECAIs must have a demonstrated expertise in assessing securitizations, which may be evidenced by strong market acceptance.
 - d) A bank must apply external credit assessments from eligible ECAIs consistently across a given type of securitization exposure. Furthermore, a bank cannot use the credit assessments issued by one ECAI for one or more tranches and those of another ECAI for other positions (whether retained or purchased) within the same securitization structure that may or may not be rated by the first ECAI. Where two or more eligible ECAIs can be used and these assess the credit risk of the same securitization exposure differently, paragraph 59 of Part IV.C will apply.
 - e) Where CRM is provided directly to an SPE by an eligible guarantor defined in paragraph 47 of Part IV.B and is reflected in the external credit assessment assigned to a securitization exposure(s), the risk weight associated with that external credit assessment should be used. In order to avoid any double counting, no additional capital recognition is permitted. If the CRM provider is not an eligible guarantor, the covered securitization exposures should be treated as unrated.

- f) In the situation where a credit risk mitigant is not obtained by the SPE but rather applied to a specific securitization exposure within a given structure (e.g., ABS tranche), the bank must treat the exposure as if it is unrated and then use the CRM treatment outlined in Part IV.B to recognize the hedge.

F. Risk-weighting

21. The risk-weighted asset amount of a securitization exposure is computed by multiplying the amount of the position by the appropriate risk weight determined in accordance with the following table. For off- balance sheet exposures, banks must apply a credit conversion factor (CCF) and then risk weight the resultant credit equivalent amount.

Credit assessment ¹	AAA to AA-	A+ to A-	BBB+ to BBB-	Below BBB- and unrated
Risk weight	20%	50%	100%	Deduction from Tier 1 capital

22. The capital treatment of implicit support, liquidity facilities, securitizations of revolving exposures, and credit risk mitigants are identified separately.
23. Banks must deduct from CET 1 capital any increase in equity capital resulting from a securitization transaction, such as that associated with expected future margin income resulting in a gain-on-sale that is recognized in regulatory capital. Such an increase in capital is referred to as a “gain-on-sale” for the purposes of the securitization framework.
24. Credit enhancing IOs (interest only), net of the amount that must be deducted from CET 1 as in paragraph 23.
25. Deductions from capital may be calculated net of any specific provisions taken against the relevant securitization exposures.
26. When a bank provides implicit support to a securitization, it must, at a minimum, hold capital against all of the exposures associated with the securitization transaction as if they had not been securitized. Additionally, banks would not be permitted to recognize in regulatory capital any gain-on-sale, as defined in paragraph 23. Furthermore, the bank is required to disclose publicly that (a) it has provided non-contractual support and (b) the capital impact of doing so.
27. As a general rule, off-balance sheet securitization exposures will receive a CCF of 100%, except in the cases below.
28. A CCF of twenty percent (20%) and fifty percent (50%) will be applied to eligible liquidity facilities as defined in paragraph 9 above with original maturity of one year or less and more than one year, respectively. However, if an external rating of the facility itself is used for risk weighting the facility, a 100% CCF must be applied. A zero percent (0%) CCF may be applied to eligible liquidity facilities that are only available in the event of a general market disruption (i.e., whereupon more than one SPE across different transactions are unable to roll over maturing commercial paper, and that inability is not the result of an impairment in the SPE’s credit quality or in the credit quality of the underlying exposures). To qualify for this treatment, the conditions provided in paragraph 9 must be satisfied. Additionally, the funds advanced by the bank to pay holders of the capital market instruments (e.g., commercial paper) when there is a general market disruption must be secured by the underlying assets, and must rank at least pari passu with the claims of holders of the capital market instruments.
29. A CCF of zero percent (0%) will be applied to undrawn amount of eligible servicer cash advance facilities, as defined in paragraph 10 above, that are unconditionally cancellable without prior notice.
30. An originating bank is required to hold capital against the investors’ interest (i.e., against both the drawn and undrawn balances related to the securitized exposures) when:
- It sells exposures into a structure that contains an early amortization feature; and
 - The exposures sold are of a revolving nature. These involve exposures where the borrower is permitted to vary the drawn amount and repayments within an agreed limit under a line of credit (e.g., credit card receivables and corporate loan commitments).
31. Originating banks, though, are not required to calculate a capital requirement for early amortizations in the following situations:
- Replenishment structures where the underlying exposures do not revolve and the early amortization ends the ability of the bank to add new exposures;
 - Transactions of revolving assets containing early amortization features that mimic term structures (i.e., where the risk of the underlying facilities does not return to the originating bank);

¹ The notations follow the rating symbols used by Standard & Poor’s. The mapping of ratings of all recognized external rating agencies is in Part IV.C

- c) Structures where a bank securitizes one or more credit line(s) and where investors remain fully exposed to future draws by borrowers even after an early amortization event has occurred; and
 - d) The early amortization clause is solely triggered by events not related to the performance of the securitized assets or the selling bank, such as material changes in tax laws or regulations.
32. As described below, the CCFs depend upon whether the early amortization repays investors through a controlled or non-controlled mechanism. They also differ according to whether the securitized exposures are uncommitted retail credit lines (e.g., credit card receivables) or other credit lines (e.g., revolving corporate facilities). A line is considered uncommitted if it is unconditionally cancellable without prior notice.
33. For uncommitted retail credit lines (e.g., credit card receivables) that have either controlled or non-controlled early amortization features, banks must compare the three-month average excess spread defined in paragraph 11 to the point at which the bank is required to trap excess spread as economically required by the structure (i.e., excess spread trapping point). In cases where such a transaction does not require excess spread to be trapped, the trapping point is deemed to be 4.5 percentage points.
34. The bank must divide the excess spread level by the transaction's excess spread trapping point to determine the appropriate segments and apply the corresponding conversion factors, as outlined in the following tables:

	Controlled		Non-controlled	
	3-month average excess spread- credit conversion factor (CCF)	Credit conversion factor (CCF)	3-month average excess spread- credit conversion factor (CCF)	Credit conversion factor (CCF)
	Uncommitted	Committed	Uncommitted	Committed
Retail credit lines	133.33% of trapping point or more – 0% CCF	90% CCF	133.33% of trapping point or more – 0% CCF	100% CCF
	less than 133.33% to 100% of trapping point – 1% CCF		less than 133.33% to 100% of trapping point – 5% CCF	
	less than 100% to 75% of trapping point – 2% CCF		less than 100% to 75% of trapping point – 15% CCF	
	less than 75% to 50% of trapping point - 10% CCF		less than 75% to 50% of trapping point - 50% CCF	
	less than 50% to 25% of trapping point - 20% CCF		less than 50% of trapping point - 100% CCF	
	less than 25% of trapping point - 40%			
Non-retail credit lines	90% CCF	90% CCF	100% CCF	100% CCF

35. All other securitized revolving exposures with controlled and non- controlled early amortization features will be subject to CCFs of ninety percent (90%) and 100%, respectively, against the off- balance sheet exposures.
36. The CCF will be applied to the amount of the investors' interest. The resultant credit equivalent amount shall then be applied a risk weight applicable to the underlying exposure type, as if the exposures had not been securitized.
37. For a bank subject to the early amortization treatment, the total capital charge for all of its positions will be subject to a maximum capital requirement (i.e., a 'cap') equal to the greater of (i) that required for retained securitization exposures, or (ii) the capital requirement that would apply had the exposures not been securitized. In addition, banks must deduct the entire amount of any gain-on-sale and credit enhancing IOs arising from the securitization transaction in accordance with paragraphs 23 and 25.

G. Credit risk mitigation

38. The treatment below applies to a bank that has obtained or given a credit risk mitigant on a securitization exposure. Credit risk mitigants include collateral, guarantees, and credit derivatives. Collateral in this context refers to that used to hedge the credit risk of a securitization exposure rather than the underlying exposures of the securitization transaction.

Collateral

39. Eligible collateral is limited to that recognized in paragraph 34, Part IV.B. Collateral pledged by SPEs may be recognized.

Guarantees and credit derivatives

40. Credit protection provided by the entities listed in paragraph 47, Part IV.B may be recognized. SPEs cannot be recognized as eligible guarantors.
41. Where guarantees or credit derivatives fulfill the minimum operational requirements as specified in Part IV.B and Part V, respectively, banks can take account of such credit protection in calculating capital requirements for securitization exposures.
42. Capital requirements for the collateralized or guaranteed/protected portion will be calculated according to Part IV.B and Part V.
43. A bank other than the originator providing credit protection to a securitization exposure must calculate a capital requirement on the covered exposure as if it were an investor in that securitization. A bank providing protection to an unrated credit enhancement must treat the credit protection provided as if it were directly holding the unrated credit enhancement.

Maturity mismatches

44. For the purpose of setting regulatory capital against a maturity mismatch, the capital requirement will be determined in accordance with paragraphs 50 to 54, Part IV.B, except for synthetic securitizations which will be determined in accordance with paragraph 16.

Part VIII. Market Risk-weighted Assets

1. *Market risk* is defined as the risk of losses in on- and off-balance sheet positions arising from movements in market prices. The risks addressed in these guidelines are:

- a) The risks pertaining to interest rate-related instruments and equities in the trading book; and
- b) Foreign exchange risk throughout the bank.

A. Definition of the trading book

2. A *trading book* consists of positions in financial instruments held either with trading intent or in order to hedge other elements of the trading book. To be eligible for trading book capital treatment, financial instruments must either be free of any restrictive covenants on their tradability or able to be hedged completely. In addition, positions should be frequently and accurately valued, and the portfolio should be actively managed.
3. A *financial instrument* is any contract that gives rise to both a financial asset of one entity and a financial liability or equity instrument of another entity. Financial instruments include both primary financial instruments (or cash instruments) and derivative financial instruments. A *financial asset* is any asset that is cash, the right to receive cash or another financial asset; or the contractual right to exchange financial assets on potentially favorable terms, or an equity instrument. A *financial liability* is the contractual obligation to deliver cash or another financial asset or to exchange financial liabilities under conditions that are potentially unfavorable.
4. *Positions held with trading intent* are those held intentionally for short-term resale and/or with the intent of benefiting from actual or expected short-term price movements or to lock in arbitrage profits, and may include for example proprietary positions, positions arising from client servicing (e.g. matched principal brokering) and market making.
5. The following will be the basic requirements for positions eligible to receive trading book capital treatment:
- a) Clearly documented trading strategy for the position/instrument or portfolios, approved by senior management (which would include expected holding horizon);
 - b) Clearly defined policies and procedures for the active management of the position, which must include:
 - i. positions are managed on a trading desk;
 - ii. position limits are set and monitored for appropriateness;
 - iii. dealers have the autonomy to enter into/manage the position within agreed limits and according to the agreed strategy;

- iv. positions are marked to market at least daily, and when marking to model the parameters must be assessed on a daily basis;
 - v. positions are reported to senior management as an integral part of the institution's risk management process; and
 - vi. positions are actively monitored with reference to market information sources (assessment should be made of the market liquidity or the ability to hedge positions or the portfolio risk profiles). This would include assessing the quality and availability of market inputs to the valuation process, level of market turnover, sizes of positions traded in the market, etc.
- c) Clearly defined policy and procedures to monitor the positions against the bank's trading strategy including the monitoring of turnover and stale positions in the bank's trading book.
6. The documentations of the basic requirements of Part VII, Item "5" should be submitted to the Bangko Sentral.
7. In addition to the above documentation requirements, the bank should also submit to the Bangko Sentral a documentation of its systems and controls for the prudent valuation of positions in the trading book including the valuation methodologies.

Measurement of capital charge

8. The market risk capital charge shall be computed according to the methodology set under Sec. 125, subject to certain modifications as outlined in the succeeding paragraphs.
9. The specific risk weights for trading book positions in debt securities and debt derivatives shall depend on the third party credit assessment of the issue or the type of issuer, as may be appropriate, as follows:

Credit ratings of debt securities/derivatives issued by sovereigns ¹	Credit ratings of debt securities/derivatives issued by MDBs	Credit ratings of debt securities/derivatives issued by other entities	Unadjusted specific risk weight
Php-denominated debt securities/derivatives issued by the Philippine NG and Bangko Sentral			0.00%
LGU Bonds covered by Deed of Assignment of Internal Revenue Allotment and guaranteed by LGU Guarantee Corporation			4.00%
AAA to AA-	AAA		0.00%
A+ to BBB-	AA+ to BBB-	AAA to BBB-	
Residual maturity ≤ 6 months	Residual maturity ≤ 6 months	Residual maturity ≤ 6 months	0.25%
Residual maturity > 6 months, ≤ 24 months	Residual maturity > 6 months, ≤ 24 months	Residual maturity > 6 months, ≤ 24 months	1.0%
Residual maturity > 24 months	Residual maturity > 24 months	Residual maturity > 24 months	1.60%
		All other debt securities/derivatives	8.00%

10. Foreign currency denominated debt securities/derivatives issued by the Philippine NG and Bangko Sentral² shall be risk-weighted according to the table above: *Provided*, That only one-third (1/3) of the applicable risk weight shall be applied from 01 July 2007, two-thirds (2/3) from 01 January 2008, and the full risk weight from 01 January 2009.
11. A security, which is the subject of a repo-style transaction, shall be treated as if it were still owned by the seller/lender of the security, i.e., to be reported by the seller/lender.
12. In addition to capital charge for specific and general market risk, a credit risk capital charge should be applied to banks' counterparty exposures in repo-style transactions and OTC derivatives contracts. The computation of the credit risk capital charge for counterparty exposures arising from trading book positions are discussed in paragraphs 35 to 41 of Part IV.B.

B. Measurement of risk-weighted assets

13. Market risk-weighted assets are determined by multiplying the market risk capital charge by ten (10) [i.e., the reciprocal of the minimum capital ratio of ten percent (10%)].

¹ The notations follow the rating symbols used by Standard & Poor's. The mapping of ratings of all recognized external rating agencies is in Part IV.C. For purposes of this framework, debt securities/derivatives issued by sovereigns include foreign currency denominated debt securities/derivatives issued by the Philippine NG.

² Warrants paired with ROP Global Bonds shall be exempted from capital charge for market risk only to the extent of bank's holdings of bonds paired with warrants equivalent to not more than fifty percent (50%) of total qualifying capital, as defined under Part II of this Appendix.

Part IX. Operational Risk-weighted Assets

A. Definition of operational risk

1. *Operational risk* is defined as the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. This definition includes legal risk, but excludes strategic and reputational risk.
2. Banks should be guided by the Basel Committee on Banking Supervision's recommendations on Sound Practices for the Management and Supervision of Operational Risk (February 2003). The same may be downloaded from the BIS website (www.bis.org).

B. Measurement of capital charge

3. In computing for the operational risk capital charge, banks may use either the basic indicator approach or the standardized approach.
4. Under the basic indicator approach, banks must hold capital for operational risk equal to fifteen percent (15%) of the average gross income over the previous three (3) years of positive annual gross income. Figures for any year in which annual gross income is negative or zero should be excluded from both the numerator and denominator when calculating the average.
5. Banks that have the capability to map their income accounts into the various business lines given in paragraph 7 may use the standardized approach subject to prior Bangko Sentral approval¹. In order to qualify for use of the standardized approach, a bank must satisfy Bangko Sentral that, at a minimum:
 - a) Its board of directors and senior management are actively involved in the oversight of the operational risk management framework;
 - b) It has an operational risk management system that is conceptually sound and is implemented with integrity; and
 - c) It has sufficient resources in the use of the approach in the major business lines as well as the control and audit areas.
6. Operational risk capital charge is calculated as the three (3)-year average of the simple summation of the regulatory capital charges across each of the business lines in each year. In any given year, negative capital charges (resulting from negative gross income) in any business line may offset positive capital charges in other business lines without limit. However, where the aggregate capital charge across all business lines within a given year is negative, then figures for that year shall be excluded from both the numerator and denominator.
7. The business lines and their corresponding beta factors are listed below:

Business lines		Activity Groups	Beta Factors
Level 1	Level 2		
Corporate Finance	Corporate finance	Mergers and acquisitions, underwriting, privatization, securitization, research, debt (government, high yield), equity, syndications, IPO, secondary private placements	18%
	Municipal/Government Finance		
	Advisory Services		
Trading and Sales	Sales	Fixed income, equity, foreign exchanges, commodities, credit, funding, own position securities, lending and repos, brokerage, debt, prime brokerage	18%
	Market Making		
	Proprietary Positions		
	Treasury		
Retail Banking	Retail Banking	Retail lending and deposits, banking services, trust and estates	12%
	Private Banking	Private lending and deposits, banking services, trust and estates, investment advice	
	Card Services	Merchant/commercial/corporate cards, private labels and retail	
Commercial Banking	Commercial Banking	Project finance, real estate, export finance, trade finance, factoring, leasing, lending, guarantees, bills of exchange	15%
Payment and Settlement	External Clients	Payments and collections, funds transfer, clearing and settlement	18%
Agency Services	Custody	Escrow, depository receipts, securities lending (customers) corporate actions	15%

¹ Refer to Appendix 61 for the Guidelines on the Use of the Standardized Approach in Computing the Capital Charge for Operational Risk

	Corporate Agency	Issuer and paying agents	
	Corporate Trust		
Asset Management	Discretionary Fund Management	Discretionary and non-discretionary fund management, whether pooled, segregated, retail, institutional, closed, open, private equity	12%
	Non-Discretionary Fund Management		
Retail Brokerage	Retail brokerage	Execution and full service	12%

8. Gross income, for the purpose of computing for operational risk capital charge, is defined as net interest income plus non-interest income. This measure should:
- be gross of any provisions for losses on accrued interest income from financial assets;
 - be gross of operating expenses, including fees paid to outsourcing service providers;
 - include fees and commissions;
 - exclude gains/(losses) from the sale/redemption/derecognition of non-trading financial assets and liabilities;
 - exclude gains/(losses) from sale/derecognition of non-financial assets; and
 - include other income (i.e., rental income, miscellaneous income, etc.).

C. Measurement of risk-weighted assets

9. The resultant operational risk capital charge is to be multiplied by 125% before multiplying by ten (10) [i.e., the reciprocal of the minimum capital ratio of ten percent (10%)].

Part X. Disclosures in the Annual Reports and Published Financial Statements

- This section lists the specific information that banks have to disclose, at a minimum, in their Annual Reports, except Item “j”, paragraph 3 which should also be disclosed in banks’ quarterly Published Balance Sheet.
- Full compliance of these disclosure requirements is a prerequisite before banks can obtain any capital relief (i.e., adjustments in the risk weights of collateralized or guaranteed exposures) in respect of any credit risk mitigation techniques.

A. Capital structure and capital adequacy

- The following information with regard to banks’ capital structure and capital adequacy shall be disclosed in banks’ Annual Reports, except Item “j” below which should also be disclosed in banks’ quarterly published Balance Sheet:
 - CET1 capital and a breakdown of its components;
 - Tier 1 capital and a breakdown of its components;
 - Tier 2 capital and a breakdown of its components;
 - Total qualifying capital;
 - Capital conservation buffer;
 - Countercyclical capital buffer;
 - Capital requirements for credit risk (including securitization exposures);
 - Capital requirements for market risk;
 - Capital requirements for operational risk; and
 - Total CAR, Tier 1 and CET1 ratios on both solo and consolidated bases.
- In addition to the above disclosure requirements, the following shall likewise be disclosed to improve transparency of regulatory capital and enhance market discipline:
 - Full reconciliation of all regulatory capital elements back to the balance sheet in the audited financial statements;
 - All regulatory adjustments/deductions, as applicable;
 - Description of the main features of capital instruments issued; and
 - Comprehensive explanations of how ratios involving components of regulatory capital are calculated.
- On top of the above disclosure requirements, banks/QBs shall be required to make available on their websites the full terms and conditions of all instruments included in regulatory capital.

B. Risk exposures and assessments

- For each separate risk area (credit, market, operational, interest rate risk in the banking book), banks must describe their risk management objectives and policies, including:
 - Strategies and processes;
 - The structure and organization of the relevant risk management function;
 - The scope and nature of risk reporting and/or measurement systems; and

- iv. Policies for hedging and/or mitigating risk, and strategies and processes for monitoring the continuing effectiveness of hedges/mitigants.

Credit risk

- 7. Aside from the general disclosure requirements stated in paragraph 4, the following information with regard to credit risk have to be disclosed in banks' Annual Reports:
 - a) Total credit risk exposures (i.e., principal amount for on-balance sheet and credit equivalent amount for off-balance sheet, net of specific provision) broken down by type of exposures as defined in Part IV;
 - b) Total credit risk exposure after risk mitigation, broken down by:
 - i. type of exposures as defined in Part IV; and
 - ii. risk buckets, as well as those that are deducted from capital;
 - c) Total credit risk-weighted assets broken down by type of exposures as defined in Part IV;
 - d) Names of external credit assessment institutions used, and the types of exposures for which they were used;
 - e) Types of eligible credit risk mitigants used including credit derivatives;
 - f) For banks with exposures to securitization structures, aside from the general disclosure requirements stated in paragraph 4, the following minimum information have to be disclosed:
 - i. Accounting policies for these activities;
 - ii. Total outstanding exposures securitized by the bank; and
 - iii. Total amount of securitization exposures retained or purchased broken down by exposure type;
 - g) For banks that provide credit protection through credit derivatives, aside from the general disclosure requirements stated in paragraph 4, total outstanding amount of credit protection given by the bank broken down by type of reference exposures should also be disclosed; and
 - h) For banks with investments in other types of structured products, aside from the general disclosure requirements stated in paragraph 4, total outstanding amount of other types of structured products issued or purchased by the bank broken down by type should also be disclosed.

Market risk

- 8. Aside from the general disclosure requirements stated in paragraph 4, the following information with regard to market risk have to be disclosed in banks' Annual Reports:
 - a) Total market risk-weighted assets broken down by type of exposures (interest rate, equity, foreign exchange, and options); and
 - b) For banks using the internal models approach, the following information have to be disclosed:
 - i. The characteristics of the models used;
 - ii. A description of stress testing applied to the portfolio;
 - iii. A description of the approach used for backtesting/validating the accuracy and consistency of the internal models and modeling processes;
 - iv. The scope of acceptance by the Bangko Sentral; and
 - v. A comparison of VaR estimates with actual gains/losses experienced by the bank, with analysis of important outliers in backtest results.

Operational risk

- 9. Aside from the general disclosure requirements stated in paragraph 4, banks have to disclose their operational risk-weighted assets in their Annual Reports.

Interest rate risk in the banking book

- 10. Aside from the general disclosure requirements stated in paragraph 4, the following information with regard to interest rate risk in the banking book have to be disclosed in banks' Annual Reports:
 - a) A description of how the bank defines IRRBB for purposes of risk control and measurement;

- b) A description of the bank's overall IRRBB management and mitigation strategies. Examples are: monitoring of risk measures in relation to established limits, hedging practices, conduct of stress testing, outcomes analysis, the role of independent audit, the role and practices of the asset and liability committee (ALCO), the bank's practices to ensure appropriate model validation, and timely updates in response to changing market conditions;
- c) The periodicity of the calculation of the bank's IRRBB measures, and a description of the specific measures that the bank uses to gauge its sensitivity to IRRBB;
- d) A description of the interest rate shock and stress scenarios that the bank uses to estimate changes in the economic value and/or in earnings;
- e) A high-level description of how the bank hedges its IRRBB, as well as the associated accounting treatment; and
- f) A high-level description of key modelling and parametric assumptions used in IRRBB measurement.

(Circular Nos. 1107 dated 23 December 2020, 1084 dated 28 April 2020, 1067 dated 13 December 2019, 1044 dated 6 August 2019, 1027 dated 28 December 2018, and 1024 dated 06 December 2018)

COMMON SHARES

Criteria for classification as common shares for regulatory capital purposes

1. It represents the most subordinated claim in liquidation.
2. It is entitled to a claim on the residual assets that is proportional with its share of issued capital, after all senior claims have been repaid in liquidation (i.e., has an unlimited and variable claim, not a fixed or capped claim).
3. Its principal is perpetual and never repaid outside of liquidation (setting aside discretionary repurchases or other means of effectively reducing capital in a discretionary manner that is allowable under relevant law).
4. The bank does nothing to create an expectation at issuance that the instrument will be bought back, redeemed or cancelled nor do the statutory or contractual terms provide any feature which might give rise to such an expectation.
5. The distributions are paid out of distributable items (retained earnings included). The level of distributions is not in any way tied or linked to the amount paid in at issuance and is not subject to a contractual cap (except to the extent that a bank is unable to pay distributions that exceed the level of distributable items).
6. There are no circumstances under which the distributions are obligatory. Non-payment is therefore not an event of default.
7. The distributions are paid only after all legal and contractual obligations have been met and payments on more senior capital instruments have been made. This means that there are no preferential distributions, including in respect of other elements classified as the highest quality issued capital.
8. It is the issued capital that takes the first and proportionately greatest share of any losses as they occur¹. Within the highest quality capital, each instrument absorbs losses on a going concern basis proportionately and *pari passu* with all the others.
9. The paid in amount is recognized as equity capital (i.e., not recognized as a liability) for determining balance sheet insolvency.
10. The paid in amount is classified as equity under the relevant accounting standards.
11. It is directly issued and paid-in and the bank cannot directly or indirectly have funded the purchase of the instrument.
12. It must be underwritten by a third party not related to the issuer bank nor acting in reciprocity for and in behalf of the issuer bank.
13. The paid in amount is neither secured nor covered by a guarantee of the issuer or related entity² or subject to any other arrangement that legally or economically enhances the seniority of the claim.
14. It is only issued with the approval of the owners of the issuing bank, either given directly by the owners or, if permitted by applicable law, given by the board of directors or by other persons duly authorized by the owners.
15. It is clearly and separately disclosed in the bank's balance sheet.

¹ In cases where capital instruments have a permanent write-down feature, this criterion is still deemed to be met by common shares.

² A related entity includes a parent company, a sister company, a subsidiary or any affiliate. A holding company is a related entity irrespective of whether it forms part of the consolidated banking group.

ADDITIONAL TIER 1 CAPITAL

Criteria for inclusion in Additional Tier 1 capital

1. It must be issued and paid-in.
2. It must be subordinated to depositors, general creditors and subordinated debt of the bank.
3. It is neither secured nor covered by a guarantee of the issuer or related entity or other arrangement that legally or economically enhances the seniority of the claim vis-à-vis bank creditors.
4. It is perpetual, ie., there is no maturity date and there are no step-ups or other incentives to redeem.
5. It may be callable at the initiative of the issuer only after a minimum of five (5) years, subject to the following conditions:
 - a. To exercise a call option a bank must receive prior supervisory approval;
 - b. A bank must not do anything which creates an expectation that the call will be exercised; and
 - c. Banks must not exercise a call unless:
 - i. They replace the called instrument with capital of the same or better quality and the replacement of this capital is done at conditions which are sustainable for the income capacity of the bank¹; or
 - ii. The bank demonstrates that its capital position is well above the minimum capital requirements after the call option is exercised;
6. Any repayment of principal (e.g. through repurchase or redemption) must be with prior supervisory approval and banks should not assume or create market expectations that supervisory approval will be given.
7. With regard to dividend/coupon discretion:
 - a. The bank must have full discretion at all times to cancel distributions/payments²;
 - b. Cancellation of discretionary payments must not be an event of default;
 - c. Banks must have full access to cancelled payments to meet obligations as they fall due;
 - d. Cancellation of distributions/payments must not impose restrictions on the bank except in relation to distributions to common stockholders.
8. Dividends/coupons must be paid out of distributable items.
9. The instrument cannot have a credit sensitive dividend feature, that is a dividend/coupon that is reset periodically based in whole or in part on the bank's credit standing.
10. The instrument cannot contribute to liabilities exceeding assets if such a balance sheet test forms part of national insolvency law.
11. Instruments classified as liabilities for accounting purposes must have principal loss absorption through either (i) conversion to common shares or (ii) a write-down mechanism which allocates losses to the instrument at a pre-specified trigger point. The trigger point is set at CET1 ratio of 7.25% or below or as determined by the Bangko Sentral. The bank must submit an expert's opinion on the accounting treatment/classification of the instruments.

The guidelines on loss absorbency features of AT1 capital as provided in *App.59- Annex E* shall likewise be observed.

12. It must have a provision that requires the instrument to either be written off or converted into common equity upon the occurrence of a trigger event.

The trigger event occurs when a bank is considered non-viable as determined by the Bangko Sentral. Non-viability is defined as a deviation from a certain level of CET1 Ratio, inability of the bank to continue business (CLOSURE), or any other event as may be determined by the Bangko Sentral, whichever comes earlier.

The issuance of any new shares as a result of the trigger event must occur prior to any public sector injection of capital so that the capital provided by the public sector is not diluted.

¹ Replacement issues can be concurrent with but not after the instrument is called.

² A consequence of full discretion at all times to cancel distributions/payments is that "dividend pushers" are prohibited. An instrument with a dividend pusher obliges the issuing bank to make a dividend/coupon payment on the instrument if it has made a payment on another (typically more junior) capital instrument or share. This obligation is inconsistent with the requirement for full discretion at all times. Furthermore, the term "cancel distributions/payments" means extinguish these payments. It does not permit features that require the bank to make distributions/payments in kind.

The guidelines on loss absorbency features of AT1 capital at point of non- viability as provided in *App. 59 Annex F* shall likewise be observed.

13. The write-down will have the following effects:
 - a. Reduce the claim of the instrument in liquidation;
 - b. Reduce the amount re-paid when a call is exercised; and
 - c. Partially or fully reduce coupon/dividend payments on the instrument.
14. Neither the bank nor a related party over which the bank exercises control nor significant influence can have purchased the instrument, nor can the bank directly or indirectly have funded the purchase of the instrument.
15. The instrument cannot have any features that hinder recapitalization, such as provisions that require the issuer to compensate investors if a new instrument is issued at a lower price during a specified time frame.
16. It must be underwritten by a third party not related to the issuer bank or acting in reciprocity for and in behalf of the issuer bank;
17. It must clearly state on its face that it is not a deposit and is not insured by the Philippine Deposit Insurance Corporation (PDIC).
18. The bank must submit a written external legal opinion that the above-mentioned requirements, including the subordination and loss absorption features have been met.
19. If the instrument is not issued out of an operating entity or the holding company in the consolidated group (e.g. a special purpose vehicle – “SPV”), proceeds must be immediately available without limitation to an operating entity or the holding company in the consolidated group in a form which meets or exceeds all of the other criteria for inclusion in Additional Tier 1 capital.¹

¹ Capital issued to third parties out of an SPV cannot be included in CET1. Instruments meeting the criteria for eligibility as AT1 capital will be treated as if the bank itself has issued the capital directly to 3rd parties. In cases where the capital has been issued to 3rd parties through an SPV via a fully consolidated subsidiary of the bank, such capital subject to the requirements for eligibility as AT1 capital, be treated as if the subsidiary itself had issued it directly to the 3rd parties and may be included in the bank's consolidated AT 1 capital based on the treatment of minority interest.

TIER 2 CAPITAL

Criteria for inclusion in Tier 2 Capital

1. It must be issued and paid-in.
2. It must be subordinated to depositors and general creditors of the bank.
3. It is neither secured nor covered by a guarantee of the issuer or related entity or other arrangement that legally or economically enhances the seniority of the claim vis-à-vis depositors and general creditors of the bank.
4. With regard to maturity:
 - a. It must have a minimum original maturity of at least five (5) years;
 - b. Its recognition in regulatory capital in the remaining five (5) years before maturity will be amortized on a straight line basis as shown in the table below; and

Remaining maturity	Discount factor
5 years & above	0%
4 years to <5 years	20%
3 years to <4 years	40%
2 years to <3 years	60%
1 year to <2 years	80%
< 1 year	100%

- c. There are no step-ups or other incentives to redeem.
5. It may be callable at the initiative of the issuer only after a minimum of five (5) years:
 - a. To exercise a call option, a bank must receive prior supervisory approval; and
 - b. A bank must not do anything which creates an expectation that the call will be exercised¹; and
 - c. Banks must not exercise a call unless:
 - i. They replace the called instrument with capital of the same or better quality and the replacement of this capital is done at conditions which are sustainable for the income capacity of the bank;² or
 - ii. The bank demonstrates that its capital position is well above the minimum capital requirements after the call option is exercised.
6. The investor must have no rights to accelerate the repayment of future scheduled payments (coupon or principal), except in bankruptcy and liquidation.
7. The instrument cannot have a credit sensitive dividend feature, that is a dividend/coupon that is reset periodically based in whole or in part on the bank's credit standing.
8. Neither the bank nor a related party over which the bank exercises control or significant influence can have purchased the instrument, nor can the bank directly or indirectly have funded the purchase of the instrument.
9. It must be underwritten by a third party not related to the issuer bank nor acting in reciprocity for and in behalf of the issuer bank.
10. It must have a provision that requires the instrument to either be written off or converted into common equity upon the occurrence of a trigger event.

The trigger event occurs when a bank is considered non-viable as determined by the Bangko Sentral. Non-viability is defined as a deviation from a certain level of Common Equity Tier 1 (CET1) Ratio, inability of the bank to continue business (CLOSURE) or any other event as determined by the Bangko Sentral, whichever comes earlier.

The issuance of any new shares as a result of the trigger event must occur prior to any public sector injection of capital so that the capital provided by the public sector is not diluted.

¹ An option to call the instrument after five (5) years) but prior to the start of the amortization period will not be viewed as an incentive to redeem as long as the bank does not do anything that creates an expectation that the call will be exercised at this point.

² Replacement issues can be concurrent with but not after the instrument is called.

The guidelines on loss absorbency features of Tier 2 capital at point of nonviability as provided in *App. 63b Annex F* shall likewise be observed.

11. The write-down will have the following effects:
 - a. Reduce the claim of the instrument in liquidation;
 - b. Reduce the amount re-paid when a call is exercised; and
 - c. Partially or fully reduce coupon/dividend payments on the instrument
12. The bank must submit a written external legal opinion that the above-mentioned requirements, including the subordination and loss absorption features have been met.
13. It must clearly state on its face that it is not a deposit and is not insured by the Philippine Deposit Insurance Corporation (PDIC).
14. If the instrument is not issued out of an operating entity or the holding company in the consolidated group (e.g. a special purpose vehicle – “SPV”), proceeds must be immediately available without limitation to an operating entity or the holding company in the consolidated group in a form which meets or exceeds all of the other.¹

¹ Capital issued to third parties out of an SPV cannot be included in CET1. Instruments meeting the criteria for eligibility as Tier 2 capital will be treated as if the bank itself has issued the capital directly to 3rd parties. In cases where the capital has been issued to 3rd parties through an SPV via a fully consolidated subsidiary of the bank, such capital subject to the requirements for eligibility as Tier 2 capital, be treated as if the subsidiary itself had issued it directly to 3rd parties through an SPV via a fully consolidated subsidiary of the bank, such capital subject to the requirements for eligibility as AT1 capital, be treated as if the subsidiary itself had issued it directly to the 3rd parties and may be included in the banks consolidated AT1 capital based on the treatment of minority interest.

Illustrative Sample

Computation of eligible minority interests to be included in parent bank's capital base

The case:

A banking group consists of two (2) legal entities that are both banks – Bank P is the parent and Bank S is the subsidiary. Their individual balance sheets are set out below:

Bank P- Balance Sheet		Bank S-Balance Sheet	
Assets		Assets	
Loans	90	Loans	160
CET 1 investment in Bank S	30		
ATI investment in Bank B	9		
Tier 2 investment in Bank S	4		
		Liabilities and Equity	
		Deposits	90
		Tier 2 capital instruments	16
Liabilities and Equity		ATI capital instruments	11
Deposits	12	CET1 capital instruments	43
Tier 2 capital instruments	31		
ATI capital instruments			
CET1 capital instruments			

The consolidated balance sheet of the banking group is set out below:

Consolidated Balance Sheet	
Assets	
Loans	250
Liabilities and Equity	
Deposits	160
Tier 2 issued by subsidiary to third parties	12
Tier 2 issued by parent	20
AT1 issued by subsidiary to third parties	2
AT1 issued by parent	12
Common Equity issued by subsidiary to third parties (i.e., minority interest)	13
Common Equity issued by parent	31

The balance sheet of Bank P shows that in addition to its loans to customers, it has investments in Bank S as follows:

1. 70% of common shares;
2. 82% of Additional Tier 1 capital; and
3. 25% of Tier 2 capital.

	Amount issued to Bank P		Amount issued to third parties		Total
CET1	30	70%	13	30%	43
AT1	9	82%	2	18%	11
Tier 1	39		15		54
Tier 2	4	25%	12	75%	16
Total	43		27		70
Capital					

(A) Computation of minority interests arising from ordinary shares issued by a consolidated bank subsidiary

Step 1 –

Calculate the surplus CET1 of Bank S in excess of its 8.5% minimum CET1 plus conservation buffer requirement (i.e., 6.0% + 2.5%). Bank S is assumed to have risk weighted assets of 100.

Minimum Capital Surplus of Bank S		
	Minimum plus capital conservation buffer	Surplus capital
CET1	8.5 (= 8.5% * 100)	34.5 (= 43 - 8.5)

Step 2 –

Calculate the eligible portion of minority interest (MI) arising from CET1 issued by Bank S that is allowed to be included in the consolidated capital of Bank P [i.e., item (e)].

Banks: amount of capital issued to third parties included in consolidated capital					
	Total amount issued (a)	Amount issued to third parties (b)	Surplus capital (c)	Surplus attributable to third parties (i.e., amount excluded from consolidated capital) (d) = (c) * (b)/(a)	Amount included in consolidated capital (e) = (b) - (d)
CET1	43	13	34.5	10.4	2.6

Step 3 –

The eligible amount of MI to be included in the consolidated CET1 Capital of Bank P is 2.6.

	Total amount issued by Bank P (all of which is to be included in consolidated capital)	Amount issued by Bank S to third parties to be included in consolidated capital of Bank P	Total amount issued by Bank P and Bank S to be included in consolidated capital of Bank P
CET1	31	2.6	33.6

(B) Minority interests arising from ordinary shares and Additional Tier 1 capital instruments issued by a consolidated bank subsidiary

Step 1 –

Calculate the surplus Tier 1 Capital of Bank S in excess of its 10% minimum Tier 1 capital plus capital conservation buffer requirement (i.e., 7.5% + 2.5%). Bank S is assumed to have risk weighted assets of 100.

Minimum and surplus capital of Bank S		
	Minimum plus capital conservation buffer	Surplus capital
Tier 1	10 (= 10% * 100)	44 (= (43+11) – 10)

Step 2 –

Calculate the eligible portion of MI arising from Tier 1 Capital issued by Bank S that is allowed to be included in the consolidated capital of Bank P [i.e., item (e)]

Banks: amount of capital issued to third parties included in consolidated capital					
	Total amount issued (a)	Amount issued to third parties (b)	Surplus capital (c)	Surplus attributable to third parties (i.e., amount excluded from consolidated capital) (d) = (c) * (b)/(a)	Amount included in consolidated capital (e) = (b) - (d)
CET1	43	13	34.5	10.4	2.6
Tier 1	54	15	44	12.2	2.8

Step 3 –

The eligible amount for inclusion in Bank P's consolidated AT1 Capital is 0.2, arrived at by excluding from the eligible amount for inclusion as Tier 1 Capital (i.e., 2.8) the amount that has already been recognized in CET1 (i.e., 2.6).

	Total amount issued by Bank P (all of which is to be included in consolidated capital)	Amount issued by Bank S to third parties to be included in consolidated capital of Bank P	Total amount issued by Bank P and Bank S to be included in consolidated capital of Bank P
CET1	31	2.6	33.6
AT1	12	.2	12.2
Tier 1	43	2.8	45.8

(C) Minority interests arising from Tier 1 capital instruments and Tier 2 capital instruments issued by a consolidated bank subsidiary

Step 1 –

Calculate the surplus total capital of Bank S in excess of 12.5% minimum total capital plus conservation buffer requirement (i.e., 10% + 2.5%). Bank S is assumed to have risk weighted assets of 100.

Minimum and surplus capital of Bank S		
	Minimum plus capital conservation buffer	Surplus capital
Tier 1	12.5 (= 12.5% * 100)	57.5 (= (43+11+16) - 12.5)

Step 2 –

Calculate the eligible portion of MI arising from total capital by Bank S that is allowed to be included in the consolidated capital of Bank P (i.e., item (e)).

Banks: amount of capital issued to third parties included in consolidated capital					
	Total amount issued (a)	Amount issued to third parties (b)	Surplus capital (c)	Surplus attributable to third parties (i.e., amount excluded from consolidated capital) (d) = (c) * (b)/(a)	Amount included in consolidated capital (e) = (b) - (d)
CET1	43	13	34.5	10.4	2.6
Tier 1	54	15	44	12.2	2.8
Total Capital	70	27	57.5	22.2	4.8

Step 3 –

The eligible amount for inclusion in Bank P's consolidated capital is 2.0, arrived at by excluding from the eligible amount for inclusion as total capital (i.e., 4.8) the amount that has already been recognized in Tier 1 Capital (i.e., 2.8).

	Total amount issued by Bank P (all of which is to be included in consolidated capital)	Amount issued by Bank S to third parties to be included in consolidated capital of Bank P	Total amount issued by Bank P and Bank S to be included in consolidated capital of Bank P
CET1	31	2.6	33.6
AT1	12	.2	12.2
Tier 1	43	2.8	45.8
Tier 2	20	2.0	22.0
Total Capital	63	4.8	67.8

LOSS ABSORBENCY REQUIREMENTS FOR ADDITIONAL TIER 1 CAPITAL

1. Capital instruments classified as liabilities for accounting purposes must have principal loss absorption when the pre-specified trigger point is breached, through either:
 - a. conversion to common shares; or
 - b. write-off mechanism which allocates losses to the instrument.
2. The trigger point for conversion or write-off is set at 7.25% Common Equity Tier 1 (CET 1) or below or as determined by the Bangko Sentral.
3. The write-off or conversion to common equity must generate CET1 under the relevant accounting standards. The instrument will only receive recognition in Tier 1 (CET 1) up to the amount of CET1 generated by a full write-off of the instrument.
4. The aggregate amount to be written off or converted for all such instruments on breaching the trigger point must be at least the amount needed to immediately return the bank's CET1 ratio at more than 7.25%, or if this is not possible, the full principal value of the instrument.
5. The bank has the option to choose its main loss absorption mechanism for its AT1 instruments which must be explicitly provided in the terms and condition of the issuance of the instruments.

In case the conversion mechanism was chosen as an option, the terms and condition of the issuance shall likewise provide that in case said conversion cannot be implemented due to certain legal constraints, the write-off mechanism shall take effect.

6. Banks opting to use the conversion mechanism must address all legal impediments and obtain all prior authorization to ensure immediate recapitalization through conversion when the trigger point is breached. Failure to satisfy these requirements would render the instruments ineligible for inclusion in AT1 capital.
7. Banks must make the necessary adjustments to their Articles of Incorporation to accommodate the conversion of capital instruments to common shares for loss absorbency. Moreover, banks must ensure that it has an appropriate buffer of authorized capital stock.
8. Where AT1 capital instruments provide for conversion into common shares when the trigger point is breached, the issue documentation must include among others:
 - a. the specific number of common shares to be received upon conversion, or specify the conversion formula for determining the number of common shares received; and
 - b. number of shares to be received based on the specified formula:

Provided, That the capital instruments converting into ordinary shares shall have a maximum conversion rate of fifty percent (50%) of the ordinary share price at the time of issue.

9. In issuing AT1 capital, the bank may:
 - a. differentiate between/among instruments as to whether the instrument is required to be converted or written off upon breaching the trigger point; and
 - b. provide for a hierarchy as to which AT1 instruments will be converted or written off.
10. Where the issue documentation provides for a ranking of the conversion or write-off, the terms attached to such hierarchy must not impede the ability of the capital instrument to be immediately converted or written off, as required.
11. Written commitment to undertake the necessary actions to effect the conversion must be accomplished by the bank. Otherwise, the write-off mechanism will take effect as the main loss absorbency mechanism.
12. Where, following the breach of the trigger point, the conversion cannot be undertaken, the write-off mechanism shall likewise take effect.
13. The write-off mechanism shall have the following effects:
 - a. reduce the claim of the instrument in liquidation;
 - b. reduce the amount re-paid when a call is exercised; and
 - c. partially or fully reduce coupon/dividend payments on the instruments.

14. The conversion to common shares or write-off of capital instruments prompted by the breach of the trigger point does not preclude the Bangko Sentral from requiring further conversion or write-off upon the occurrence of the trigger event.

RISK DISCLOSURE REQUIREMENTS ON LOSS ABSORBENCY FEATURES OF CAPITAL INSTRUMENTS

The following are the risk disclosure requirements on the loss absorbency features of Additional Tier 1 (AT1) and Tier 2 (T2) capital instruments eligible under the BASEL III framework which aim to uphold investor protection through enhanced disclosure and transparency.

When marketing, selling and distributing AT1 and T2 instruments eligible as capital under the Basel III framework, banks must:

- a. Subject investors to a client suitability test to determine their understanding of the specific risks related to these investments and their ability to absorb risks arising from these instruments;
- b. Provide the appropriate Risk Disclosure Statement for the issuance of AT1 and T2 capital instruments. The said disclosure statement shall explain the loss absorbency feature for AT1 and T2 capital instruments as well as the resulting processes that will be effected when the triggers for loss absorbency are breached;
- c. Secure a written certification from each investor stating that;
 - (1) The investor has been provided with a Risk Disclosure Statement which, among others, explains the concept of loss absorbency for AT1 and T2 capital instruments as well as the resulting processes should the case triggers are breached;
 - (2) The investor has read and understood the terms and conditions of the issuance;
 - (3) The investors are aware of the risks associated with the capital instruments; and
 - (4) Said risks include permanent write- down or conversion of the debt instrument into common equity at a specific discount;
- d. Make available to the Bangko Sentral, as may be required, the:
 - (1) Risk Disclosure Statement;
 - (2) Certification cited in Item "c(3)" above duly signed by the investor; and
 - (3) Client Suitability Test of the investor.

LOSS ABSORBENCY REQUIREMENTS FOR ADDITIONAL TIER 1 CAPITAL AND TIER 2 CAPITAL AT THE POINT OF NON-VIABILITY

1. Additional Tier 1 (AT1) and Tier 2 (T2) capital instruments are required to have loss absorbency features at the point of non- viability.
2. Upon the occurrence of the trigger event, AT1 and T2 capital instruments should be able to absorb losses either through:
 - a. conversion to common shares; or
 - b. write-off mechanism which allocates losses to the instrument.
3. AT1 and T2 capital instruments will then be converted to common shares or written off upon the occurrence of the trigger event.

The trigger event occurs when a bank is considered non-viable as determined by the Bangko Sentral. Non-viability is defined as a deviation from a certain level of Common Equity Tier 1 (CET1) Ratio, inability of the bank to continue business (CLOSURE) or any other event as determined by the Bangko Sentral, whichever comes earlier.

4. The write-off or conversion to common equity must generate CET1 and Total Capital under the relevant accounting standards. The instrument will only receive recognition in Tier 1 and Total Capital up to the amount of CET1 generated by a full write-off of the instrument.
5. In the absence of any contractual terms to the contrary, AT1 capital instruments shall be utilized first before Tier 2 capital instruments are converted or written off, until viability of the bank is re- established.
6. In the event that the bank does not have any AT1 instruments, then the conversion/write off shall automatically apply to T2 capital.
7. The bank has the option to choose its main loss absorption mechanism at the point of non-viability which must be explicitly provided in the terms and condition of the issuance of the instruments.

In case the conversion mechanism was chosen as an option, the terms and condition of the issuance shall likewise provide that in case, said conversion cannot be implemented due to certain legal constraints, the write-off mechanism shall take effect.

8. Banks opting to use the conversion mechanism must address all legal impediments and obtain all prior authorization to ensure immediate recapitalization through conversion when the trigger event occurs. Failure to satisfy these requirements would render the instruments ineligible for inclusion as either AT1 capital or T2 capital.
9. Banks must make the necessary adjustments to their Articles of Incorporation to accommodate the conversion of capital instruments to common shares for loss absorbency at the point of non-viability. Moreover, banks must ensure that it has an appropriate buffer of authorized capital stock.
10. Where AT1 or T2 capital instruments provide for conversion into common shares when the trigger event occurs, the issue documentation must include among others:
 - a. the specific number of common shares to be received upon conversion, or specify the conversion formula for determining the number of common shares received; and
 - b. number of shares to be received based on the specified formula.

Provided, That the capital instruments converting into ordinary shares shall have a maximum conversion rate of fifty percent (50%) of the ordinary share price at the time of issue.

11. In issuing AT1 or T2 capital, the bank may:
 - a. differentiate between/among instruments as to whether the instrument is required to be converted or written off upon the occurrence of the trigger event; and
 - b. provide for a hierarchy as to which instruments will be converted or written off among the AT1 capital instruments as well as among the T2 capital instruments.
12. Where the issue documentation provides for a ranking of the conversion or write-off, the terms attached to such hierarchy must not impede the ability of the capital instrument to be immediately converted or written off, as required.
13. Written commitment to undertake the necessary actions to effect the conversion must be accomplished by the bank. Otherwise, the write-off mechanism will take effect as the main loss absorbency mechanism.

14. Where, upon the occurrence of the trigger event, the conversion cannot be undertaken, the write-off mechanism shall likewise take effect.
15. The write-off mechanism shall have the following effects:
 - a. reduce the claim of the instrument in liquidation;
 - b. reduce the amount re-paid when a call is exercised; and
 - c. partially or fully reduce coupon/dividend payments on the instruments.
16. In case of bank closure prior to the breach of the trigger event, a provision that provides for automatic write-off of AT1 and T2 instruments must be included in the terms and conditions of the issuance.

GROUP TREATMENT

17. The relevant jurisdiction in determining the trigger event is the jurisdiction in which the capital is being given recognition for regulatory purposes. However, the group treatment will only apply to wholly-owned subsidiary banks.
18. Where an issuing bank is a subsidiary of a wider banking group regulated by the Bangko Sentral or its parent wishes the instrument to be included in the capital of the consolidated group in addition to its solo capital, the terms and conditions of the subsidiary bank AT1 and T2 capital instruments must specify an additional trigger event as follows:

AT1 and T2 capital instruments will be converted to common shares or written off once the parent bank is considered non-viable.
19. In case of a Bangko Sentral supervised entity that is a subsidiary of another institution that is not regulated by the Bangko Sentral, if the instruments are to be recognized as capital under Bangko Sentral requirements, in addition to the applicability of the trigger event, said instruments must provide that:
 - a. any supervisor of the parent entity cannot impede the right of Bangko Sentral to require the write-off or conversion of the instruments in relation to the Bangko Sentral supervised entity; and
 - b. any right of write-off or conversion by the parent supervisor must generate CET1 in the Bangko Sentral supervised entity.
20. Further, any common stock paid as compensation to the holders of the instrument must be common stock of either the issuing bank or the parent company of the consolidated group.

RISK DISCLOSURE REQUIREMENTS ON LOSS ABSORBENCY FEATURES OF CAPITAL INSTRUMENTS

- I. When marketing, selling and/or distributing AT1 and Tier 2 instruments eligible as capital under the Basel III framework, in the Philippines, banks must:
 1. Subject investors to a client suitability test to determine their understanding of the specific risks related to these investments and their ability to absorb risks arising from these instruments;
 2. Provide the appropriate Risk Disclosure Statement for the issuance of AT1 and Tier 2 capital instruments. The said disclosure statement shall explain the loss absorbency features for AT1 and Tier 2 capital instruments as well as the resulting processes that will be effected when the triggers for loss absorbency are breached;
 3. Secure a written certification from each investor stating that:
 - a. The investor has been provided a Risk Disclosure Statement which, among others, explains the concept of loss absorbency for AT1 and Tier 2 capital instruments as well as the resulting processes should the case triggers are breached;
 - b. The investor has read and understood the terms and conditions of the issuance;
 - c. The investor is aware of the risks associated with the capital instruments; and
 - d. Said risks include permanent write- down or conversion of the debt instrument into common equity at a specific discount;
 4. Make available to the Bangko Sentral, as may be required, the:
 - a. Risk disclosure statement;
 - b. Certification cited in Item "3" above duly signed by the investor; and
 - c. Client suitability test of the investor.
- II. For offshore issuances of AT1 and Tier 2 capital instruments, the risk disclosure requirements shall be governed by the applicable rules and regulations of the country where these instruments are issued.

The subsequent sale and/or distribution of AT1 and Tier 2 capital instruments in the Philippines, originally issued overseas, shall comply with all the risk disclosure requirements for issuance in the Philippines.

(Circular Nos. 1051 dated 27 September 2019, 979 dated 25 October 2017, 934 dated 23 December 2016, and 914 dated 23 June 2016)

**GUIDELINES ON THE CAPITAL TREATMENT OF BANKS' HOLDINGS OF
REPUBLIC OF THE PHILIPPINES GLOBAL BONDS PAIRED WITH WARRANTS
(Appendix to Section 125)**

A bank's holdings of ROP Global Bonds that are paired with Warrants (paired Bonds), which give the bank the option or right to exchange its holdings of ROP Global Bonds into Peso-denominated government securities upon occurrence of a predetermined credit event, shall be risk weighted at zero percent (0%): *Provided*, That the zero percent (0%) risk weight shall be applied only to bank's holdings of paired Bonds equivalent to not more than fifty percent (50%) of the total qualifying capital, as defined under *Appendix 59*.

(Circular No. 890 dated 02 November 2015)

**GUIDELINES ON THE USE OF THE STANDARDIZED APPROACH IN COMPUTING
THE CAPITAL CHARGE FOR OPERATIONAL RISKS
(Appendix to Sec. 125)**

Banks applying for the use of The Standardized Approach (TSA) must satisfy the following requirements/criteria:

General Criteria

1. The use of TSA shall be conditional upon the explicit prior approval of the Bangko Sentral.
2. The Bangko Sentral will only give approval to an applicant bank if at a minimum:
 - a. Its board of directors (or equivalent management committee in the case of foreign bank branches) and senior management are actively involved in the oversight of the operational risk management framework;
 - b. It has an operational risk management system that is conceptually sound and is implemented with integrity; and,
 - c. It has sufficient resources in the use of the approach in the major business lines as well as in the control and audit areas.
3. The above criteria should be supported by a written documentation of the board-approved operational risk management framework of the bank which should cover the following:
 - a. Overall objectives and policies
 - b. Strategies and processes
 - c. Operational risk management structure and organization
 - d. Scope and nature of risk reporting/assessment systems
 - e. Policies and procedure for mitigating operational risk
4. This operational risk management framework of the bank should be disclosed in its annual report, as provided under *Appendix 59*.

Mapping of Gross Income

5. Banks using TSA in computing operational risk capital charge must develop specific written policies and criteria for mapping gross income of their current business lines into the standard business lines prescribed under *Appendix 59*. They must also put in place a review process to adjust these policies and criteria for new or changing business activities or products as appropriate.
6. Banks must adopt the following principles for mapping their business activities to the appropriate business lines:
 - (a) Activities or products must be mapped into only one (1) of the eight (8) standard business lines, as follows:
 1. *Corporate finance*- This includes banking arrangements and facilities [e.g., mergers and acquisitions, underwriting, privatizations, securitization, research, debt (government, high yield), equity, syndications, Initial Public Offering (IPO), secondary private placements] provided to large commercial enterprises, multinational companies, NBFIs, government departments, etc.
 2. *Trading and sales*- This includes treasury operations, buying and selling of securities, currencies and others for proprietary and client account.
 3. *Retail banking*- This includes financing arrangements for private individuals, retail clients and small businesses such as personal loans, credit cards, auto loans, etc. as well as other facilities such as trust and estates and investment advice.
 4. *Commercial banking* - This includes financing arrangements for commercial enterprises, including project finance, real estate, export finance, trade finance, factoring, leasing, guarantees, bills of exchange, etc.
 5. *Payment and settlement* - This includes activities relating to payments and collections, inter-bank funds transfer, clearing and settlement.
 6. *Agency services* - This refers to activities of the banks acting as issuing and paying agents for corporate clients, providing custodial services, etc.

7. *Asset management* - This includes managing funds of clients on a pooled, segregated, retail, institutional, open or closed basis under a mandate.
8. *Retail brokerage* - This includes brokering services provided to customers that are retail investors rather than institutional investors.
 - (a) Any activity or product which cannot be readily mapped into one (1) of the standardized business lines but which is ancillary¹ to a business line shall be allocated to the business line to which it is ancillary. If the activity is ancillary to two (2) or more business lines, an objective criteria or qualification must be made to allocate the annual gross income derived from that activity to the relevant business lines.
 - (b) Any activity that cannot be mapped into a particular business line and is not an ancillary activity to a business line shall be mapped into one (1) of the business lines with the highest associated beta factor eighteen percent (18%). Any ancillary activity to that activity will follow the same business line treatment.
 - (c) Banks may use internal pricing methods to allocate gross income between business lines: *Provided*, That the sum of gross income for the eight (8) business lines must still be equal to the gross income as would be recorded if the bank uses the Basic Indicator Approach (BIA).
 - (d) The process by which banks map their business activities into the standardized business lines must be regularly reviewed by party independent from that process.
7. In computing the gross income of the bank, the amounts of the income accounts reported in the operational risk template² must be equal to the year-end balance reported in the FRP. Any discrepancy must be properly accounted and supported by a reconciliation statement.

Application Process for the Use of TSA

8. Banks applying for the use of TSA should submit the following documents to their respective Central Points of Contact (CPCs) of the Bangko Sentral:
 - (a) An application letter signed by the president/CEO (or equivalent management committee in the case of foreign bank branches) of the bank signifying its intention to use TSA in computing the capital charge for operational risk;
 - (b) Written documentation of the Board- approved operational risk management framework as described in paragraph 3.
 - (c) Written policies and criteria for mapping business activities and their corresponding gross income into the standard business lines as described in paragraphs 5 to 7.
 - (d) An overall roll-out plan of the bank including project plans and execution processes, with the appropriate time lines.

Initial Monitoring Period

9. The Bangko Sentral may require a six (6)-month period of initial monitoring of a bank's TSA before it is used for supervisory capital purposes.

Reversion from TSA to BIA

10. A bank which has been approved to use TSA in computing its capital charge for operational risk will not be allowed to revert to the simpler approach, i.e., the BIA. However, if the Bangko Sentral determines that the bank no longer meets the qualifying criteria for TSA, it may require the bank to revert to BIA. The bank shall be required to repeat the whole application process should it opt to return to the use of TSA, but only after a year of using the BIA.

These guidelines shall take effect on 21 July 2007.

(Circular No. 890 dated 02 November 2015)

¹ Ancillary function is an activity/function that is not the main activity of a given business line but only as support activity

² Part V of the revised CAR report template

**RISK BASED CAPITAL ADEQUACY FRAMEWORK FOR STAND-ALONE
THRIFT BANKS, RURAL BANKS, AND COOPERATIVE BANKS¹**
(Appendix to Sec. 127)

Introduction

This Appendix contains the Bangko Sentral's implementing guidelines of the risk-based capital adequacy framework for stand-alone TBs, RBs and Coop Banks. The framework largely conforms with the Basel capital adequacy standards.

Part I. Risk-based Minimum Capital Ratios

1. The minimum capital ratios shall be expressed as a percentage of capital to risk-weighted assets as shown below:

Minimum Capital Ratio	Capital	% of Risk Weighted Assets
Common Equity Tier 1 (CET1) Ratio	CET1	at least 6.0%
Tier 1 Ratio	Tier 1	at least 7.5%
Capital Adequacy Ratio (CAR)	Qualifying Capital	at least 10.0%

A capital conservation buffer (CCB) of two and a half percent (2.5%), comprised of CET1 capital, shall likewise be imposed.

Stand-alone TBs, RBs and Coop Banks must meet the foregoing minimum capital ratios at all times, for both solo basis (head office and branches) and consolidated basis (parent bank and subsidiary financial allied undertakings).

The minimum capital ratios based on the new compositions and the CCB shall take effect starting 1 January 2023.

2. CET1 capital, Tier 1 capital and Qualifying capital are computed in accordance with the provisions set out under Part II.

Risk weighted assets is the sum of (a) credit risk-weighted assets (Part III), and (b) operational risk-weighted assets (Part IV): *Provided*, That banks that shall engage in trading activities, including derivatives activities as end-user for hedging purpose and/or under a Type 3-Limited User Authority shall likewise include counterparty credit risk-weighted assets and/or market risk-weighted assets relative to such exposures, which shall be computed based on the relevant provisions of the Risk-Based Capital Adequacy Framework for the Philippine Banking System under *Appendix 59*.

3. The minimum capital ratio shall apply to all stand-alone TBs, RBs and Coop Banks on both solo and consolidated bases, as applicable. The application of the requirement on a consolidated basis is the best means to preserve the integrity of capital in banks with subsidiaries by eliminating double gearing. However, as one of the principal objectives of supervision is the protection of depositors, it is essential to ensure that capital recognized in capital adequacy measures is readily available for those depositors. Accordingly, individual banks should likewise be adequately capitalized on a stand-alone basis.
4. To the greatest extent possible, all banking and other relevant financial activities (both regulated and unregulated) conducted by a bank and its subsidiaries will be captured through consolidation. Thus, majority-owned or controlled financial allied undertakings (i.e., RBs and VCCs for TBs, and RBs for Coop Banks) should be fully consolidated on a line-by-line basis. Exemptions from consolidation shall only be made in cases where such holdings are acquired through debt previously contracted and held on a temporary basis, are subject to different regulation, or where non-consolidation for regulatory capital purposes is otherwise required by law. All cases of exemption from consolidation must be made with prior clearance from the Bangko Sentral.
5. Banks shall comply with the minimum capital ratios at all times notwithstanding that supervisory reporting shall only be on quarterly basis. Any breach, even if only temporary, shall be reported to the bank's board of directors and to the appropriate supervising department of the Bangko Sentral within three (3) banking days from the date of breach in the minimum capital ratios. For this purpose, these banks shall develop an appropriate system to properly monitor their compliance.

¹ These refers to TBs, RBs and Coop Banks that are not subsidiaries of universal and commercial banks.

Part II. Qualifying Capital

1. Qualifying capital consists of the following elements, net of required deductions:
 - a) Tier 1 capital is composed of:
 - i. CET1 capital; and
 - ii. Additional Tier 1 (AT1) capital; and
 - b) Tier 2 capital.
2. Banks must ensure that all capital instruments which form part of the qualifying capital comply with the eligibility criteria prescribed for a particular category of capital where such instrument belongs.

A. Tier 1 Capital

3. Tier 1 capital is the sum of CET1 capital and AT1 capital.

CET1 Capital

4. CET1 capital consists of:
 - a) Paid-up common stock issued by the bank that meet the eligibility criteria in Annex A of *Appendix 59*;
 - b) Deposit for common stock subscription recognized as equity pursuant to Sec. 123;
 - c) Common stock dividends distributable;
 - d) Additional paid-in capital resulting from the issuance of common stock included in CET1 capital;
 - e) Retained earnings²;
 - f) Undivided profits;
 - g) Other Comprehensive Income;
 - i. Net unrealized Gains/(Losses) on Available for Sale (AFS) Securities³;
 - ii. Cumulative foreign currency translation;
 - iii. Net Gains/(Losses) on Fair Value Adjustments of Hedging Instruments in a cash flow hedge; and
 - iv. Other⁴
 - h) Minority interest in subsidiary bank which are less than wholly-owned⁵: *Provided*, That the minority interest arises from issuances of common stock which, if issued by the bank itself, would meet all of the criteria as CET1 capital: *Provided, further*, That the amount to be included as minority interest shall be reduced by the surplus CET1 capital of the subsidiary attributable to minority shareholders computed as the available CET1 capital minus six percent(6%)⁶ of the subsidiary's total risk-weighted assets multiplied by the percentage of CET1 held by minority shareholders.

Regulatory Adjustments to CET1 capital

5. The following must be deducted from(added to) CET1 capital:
 - a) Common stock treasury shares⁷, including shares that the bank could be contractually obliged to purchase;
 - b) Unbooked allowance for credit losses and other capital adjustments based on the latest report of examination as approved by the Monetary Board;
 - c) Total outstanding unsecured credit accommodations, both direct and indirect, to directors, officers, stockholders and their related interests (DOSRI), net of allowances for credit losses;
 - d) Total outstanding unsecured loans, other credit accommodations and guarantees granted to subsidiaries, net of allowances for credit losses;

² This shall exclude the portion appropriated for general provision.

³ Under PFRS 9, this account shall refer to "Net Unrealized Gains/(Losses) on Financial Assets at Fair Value Through Other Comprehensive Income (FVOCI)"; In view of the continuing evaluation by the Basel Committee on the appropriate treatment of unrealized gains/losses with respect to the evolution of the accounting framework, the Bangko Sentral will revise its relevant regulation once the treatment of fair value adjustments in the calculation of CET1 capital has been determined.

⁴ This shall be equal to OCI – Others as reflected in the FRP Balance Sheet.

⁵ Minority interest in a subsidiary that is a bank is strictly excluded from the parent bank's common equity if the parent bank or affiliate has entered into any arrangements to fund directly or indirectly minority investment in the subsidiary whether through an SPV or through another vehicle or arrangement. The treatment of minority interest set out above is strictly available where all minority investments in the bank subsidiary solely represent genuine third party common equity contributions to the subsidiary.

⁶ This represents the minimum CET1 ratio.

⁷ This also includes shares of the parent bank held by a subsidiary financial allied undertaking in a consolidated statement of condition.

- e) Total outstanding loans, other credit accommodations and guarantees granted to related parties that are not at arm's length terms as determined by the appropriate supervising department of the Bangko Sentral, net of allowances for credit losses;
 - f) Deferred tax asset, net of allowance for impairment and associated deferred tax liability: *Provided*, That the conditions to offset under Philippine Accounting Standards (PAS) 12 are met: *Provided, further*, That any excess of deferred tax liability over deferred tax asset (i.e., net deferred tax liability) shall not be added to CET1 capital;
 - g) Goodwill, net of allowance for impairment and any associated deferred tax liability which would be extinguished upon impairment or derecognition, including that relating to unconsolidated subsidiary RBs and VCCs for TBs, and RBs for Coop Banks (on solo basis) and unconsolidated non-financial allied undertakings (on solo and consolidated bases);
 - h) Other intangible assets, net of any allowance for impairment and any associated deferred tax liability which would be extinguished upon impairment or derecognition;
 - i) Defined benefit pension fund assets (liabilities)⁸;
 - j) Investments in equity of unconsolidated subsidiary RBs and VCCs for TBs, and RBs for Coop Banks after deducting related goodwill, if any (for solo basis);
 - k) Investments in equity of unconsolidated subsidiary non-financial allied undertakings after deducting related goodwill, if any (for both solo and consolidated bases);
 - l) Significant minority investments (10%-50% of voting stock) in RBs and VCCs for TBs, and RBs for Coop Banks after deducting related goodwill, if any (for both solo and consolidated bases);
 - m) Significant minority investments (10%-50% of voting stock) in unconsolidated subsidiary non-financial allied undertakings after deducting related goodwill, if any (for both solo and consolidated bases);
 - n) Minority investments [below ten percent (10%) of voting stock] in RBs and VCCs for TBs, and RBs for Coop Banks after deducting related goodwill, if any (for both solo and consolidated bases);
 - o) Minority investments [below ten percent (10%) of voting stock] in unconsolidated subsidiary non-financial allied undertakings after deducting related goodwill, if any (for both solo and consolidated bases);
- For equity investments in financial and non-financial entities (Items "j" to "o"), total investments include common equity exposures in both the banking and trading books.
- In case the instrument of the entity in which the bank has invested does not meet the criteria for CET1 capital of the bank, the capital is to be considered common shares and thus deducted from CET1.
- p) Other equity investments in non-financial allied undertakings; and
 - q) Reciprocal investments in common stock of other banks/enterprises, after deducting related goodwill, if any (for both solo and consolidated bases).

Additional Tier 1 (AT1) Capital

6. AT1 capital consists of the following:

- a) Paid up perpetual and non-cumulative preferred stock;
- b) Other instruments issued by the bank that are not included in CET1 capital that meet the following:
 - i. Criteria for inclusion in AT1 capital as set out in Annex B of *Appendix 59*;
 - ii. Required loss absorbency features for instruments classified as liabilities for accounting purposes to ensure that the capital instrument absorbs losses and minimize public sector support. The loss absorbency requirements are enumerated in Annex E of *Appendix 59*: *Provided*, That the applicable trigger point for stand-alone TBs, RBs and Coop Banks is set at CET1 ratio of seven percent (7%) or below as determined by Bangko Sentral; and

⁸ The adjustment pertains to the defined benefit asset or liability that is recognized in the balance sheet. Such that CET1 cannot be increased by derecognizing the liabilities, in the same manner, any asset recognized in the balance sheet should be deducted from CET1 capital.

iii. Required loss absorbency feature at point of non-viability as set out in Annex F of Appendix 59.

- c) Deposit for subscription of perpetual and non-cumulative preferred stock and other AT1 capital instruments recognized as equity pursuant to Sec. 123;
- d) Additional paid-in capital resulting from the issuance of instruments included in AT1 capital; and
- e) Minority interest in subsidiary financial allied undertakings (e.g., VCCs for TBs) which are less than wholly-owned:⁹ *Provided*, That the minority interest from issuances of Tier 1 instruments, if issued by the bank itself, would meet all of the criteria as Tier 1 capital: *Provided, further*, That the amount to be included as minority interest shall be reduced by the surplus Tier 1 capital of the subsidiary attributable to minority shareholders computed as the available Tier 1 capital minus the seven and a half percent (7.5%)¹⁰ of the subsidiary's total risk-weighted assets multiplied by the percentage of Tier 1 held by minority shareholders: *Provided, furthermore*, That the amount of Tier 1 Capital to be recognized in AT1 capital will exclude amounts recognized in CET1 capital.

Regulatory Adjustments to AT1 capital

7. The following are the adjustments to AT1 capital:

- a) Perpetual and non-cumulative preferred stock and other AT1 instruments treasury shares¹¹, including shares that the bank could be contractually obliged to purchase;
- b) Investments in equity of unconsolidated subsidiary RBs and VCCs for TBs, and RBs for Coop Banks after deducting related goodwill, if any (for solo basis);
- c) Investments in equity of unconsolidated subsidiary non-financial allied undertakings after deducting related goodwill, if any (for both solo and consolidated bases);
- d) Significant minority investments (10%-50% of voting stock) in RBs and VCCs for TBs, and RBs for Coop Banks after deducting related goodwill, if any (for both solo and consolidated bases);
- e) Significant minority investments (10%-50% of voting stock) in unconsolidated subsidiary non-financial allied undertakings after deducting related goodwill, if any (for both solo and consolidated bases);
- f) Minority investments [below ten percent (10%) of voting stock] in RBs and VCCs for TBs, and RBs for Coop Banks after deducting related goodwill, if any (for both solo and consolidated bases);
- g) Minority investments [below ten percent (10%) of voting stock] in unconsolidated subsidiary non-financial allied undertakings after deducting related goodwill, if any (for both solo and consolidated bases);

For equity investments in financial and non-financial entities (Items "b" to "g"), total investments include other capital instruments in both the banking and trading books.

In case the instrument of the entity in which the bank has invested does not meet the criteria for AT1 capital of the bank, the capital is to be considered common shares and thus deducted from CET1; and

- h) Reciprocal investments in AT1 capital instruments of other banksenterprises, after deducting related goodwill, if any (for both solo and consolidated bases).

B. Tier 2 Capital

8. Tier 2 capital is composed of the following:

- a) Paid-up perpetual and cumulative preferred stock;
- b) Deposit for perpetual and cumulative preferred stock subscription recognized as equity pursuant to Sec. 123;
- c) Paid-up limited life redeemable preferred stock issued with the condition that redemption thereof shall be allowed only if the shares redeemed are replaced with at least an equivalent amount of newly paid-in shares so that the total paid-in capital stock is maintained at the same level prior to redemption;
- d) Deposit for limited life redeemable preferred stock subscription with the replacement requirement upon redemption recognized as equity pursuant to Sec. 123;

⁹ Please refer to Footnote No. 5.

¹⁰ This represents the minimum Tier 1 ratio.

¹¹ Please refer to Footnote No. 7.

- e) Paid-up limited life redeemable preferred stock without the replacement requirement upon redemption in an amount equivalent to its carrying amount discounted by the following rates:

Remaining maturity	Discount factor
5 years & above	0%
4 years to <5 years	20%
3 years to <4 years	40%
2 years to <3 years	60%
1 year to <2 years	80%
<1 year	100%

- f) Deposit for limited life redeemable preferred stock subscription without the replacement requirement upon redemption recognized as equity pursuant to Sec. 123;
- g) Other instruments issued by the bank (and are not included in AT1 capital)¹² that meet the following:
- criteria for inclusion in Tier 2 capital as set out in Annex C of *Appendix 59*; and
 - Required loss absorbency feature at point of non-viability to ensure that the capital instrument absorbs losses and minimize public sector support as set out in Annex F of *Appendix 59: Provided*, That the applicable trigger point for stand-alone TBs, RBs and Coop Banks is set at CET1 ratio of seven percent (7%) or below as determined by Bangko Sentral: *Provided further*, That the conversion of Tier 2 capital should be in compliance with the Revised Corporation Code of the Philippines.
- h) Appraisal increment reserve – bank premises, as authorized by the Monetary Board;
- i) General loan loss provision¹³, limited to a maximum of one percent (1%) of total credit risk-weighted assets, and any amount in excess thereof shall be deducted from the total credit risk weighted assets in computing the denominator of the risk-based capital ratio; and
- j) Minority interest in subsidiary financial allied undertakings (e.g., VCCs for TBs) which are less than wholly-owned:¹⁴ *Provided*, That the minority interest from issuances of capital instruments, if issued by the bank itself, would meet all of the criteria as Tier 1 or Tier 2 capital: *Provided, further*, That the amount to be included as minority interest shall be reduced by the surplus total capital of the subsidiary attributable to minority shareholders computed as the available total capital minus the ten percent (10%)¹⁵ of the subsidiary's total risk-weighted assets multiplied by the percentage of total capital held by minority shareholders: *Provided, furthermore*, That the total capital that will be recognized in Tier 2 capital will exclude amounts recognized in CET1 and AT1 capital.

Regulatory Adjustments to Tier 2 capital

9. The following adjustments shall be charged against Tier 2 capital:
- Perpetual and cumulative preferred stock treasury shares¹⁶;
 - Limited life redeemable preferred stock treasury shares with the replacement requirement upon redemption¹⁷;
 - Limited life redeemable preferred stock treasury shares without the replacement requirement upon redemption¹⁸;
 - Tier 2 capital instruments treasury shares¹⁹, including shares that the bank could be contractually obliged to purchase;
 - Sinking fund for redemption of limited life redeemable preferred stock with the replacement requirement upon redemption;
 - Sinking fund for redemption of limited life redeemable preferred stock without the replacement requirement upon redemption up to the extent of the balance of redeemable preferred stock after applying the cumulative discount factor;

¹² This shall include existing issuances of Hybrid Tier 1 capital and Unsecured Subordinated Debt by covered banks. Such instruments shall continue to be recognized as part of Tier 2 capital until maturity/pre-termination/redemption. In the case of Hybrid Tier 1 capital, no new issuances shall be allowed upon maturity of such capital instruments.

¹³ This shall include the General Provision appropriated in the Retained Earnings

¹⁴ Please refer to Footnote No. 5.

¹⁵ This represents the minimum CAR.

¹⁶ Please refer to Footnote No. 7.

¹⁷ Please refer to Footnote No. 7.

¹⁸ Please refer to Footnote No. 7.

¹⁹ Please refer to Footnote No. 7.

- g) Investments in equity of unconsolidated subsidiary RBs and VCCs for TBs, and RBs for Coop Banks after deducting related goodwill, if any (for solo basis);
- h) Investments in equity of unconsolidated subsidiary non-financial allied undertakings after deducting related goodwill, if any (for both solo and consolidated bases);
- i) Significant minority investments (10%-50% of voting stock) in RBs and VCCs for TBs, and RBs for Coop Banks after deducting related goodwill, if any (for both solo and consolidated bases);
- j) Significant minority investments (10%-50% of voting stock) in unconsolidated subsidiary non-financial allied undertakings after deducting related goodwill, if any (for both solo and consolidated bases);
- k) Minority investments [below ten percent (10%) of voting stock] in RBs and VCCs for TBs, and RBs for Coop Banks after deducting related goodwill, if any (for both solo and consolidated bases);
- l) Minority investments [below ten percent (10%) of voting stock] in unconsolidated subsidiary non-financial allied undertakings after deducting related goodwill, if any (for both solo and consolidated bases);

For equity investments in financial and non-financial entities (Items “g” to “l”), total investments include other capital instruments in both the banking and trading books.

In case the instrument of the entity in which the bank has invested does not meet the criteria for Tier 2 capital of the bank, the capital is to be considered common shares and thus deducted from CET1; and

- m) Reciprocal investments in Tier 2 capital of other banksenterprises, after deducting related goodwill, if any (for both solo and consolidated bases).
10. Any asset deducted from qualifying capital in computing the numerator of the risk-based capital ratio shall not be included in the total risk-weighted assets in computing the denominator of the ratio.

C. Capital Conservation Buffer

- 11. Stand-alone TBs, RBs and Coop Banks shall be required to set a Capital Conservation Buffer (CCB) of two and a half percent (2.5%) of risk-weighted assets in the form of CET1 capital.
- 12. The CCB is meant to promote the conservation of capital and build-up of adequate cushion above the minimum level that can be drawn down by banks to absorb losses during periods of financial and economic stress.
- 13. The buffer is on top of the minimum capital requirements. The capital must first be used to meet the minimum CET1 ratio, before the remainder can contribute to the CCB.
- 14. Where a bank does not have positive earnings, has CET1 ratio of lower than eight and a half percent (8.5%) [CET1 ratio of six percent (6%) plus conservation buffer of two and a half percent (2.5%)] and has not complied with other minimum capital ratios, the bank would then be restricted from making distribution of earnings, as illustrated below:

CET 1 capital ratio	Restriction on Distribution of earnings
<6.0%-7.25%	No distribution until more than 7.25% CET1 capital is met
>7.25%-8.5%	50% of earnings may be distributed
>8.5%	No restriction on distribution

- 15. Elements subject to the restriction on distributions include dividends, share buybacks, discretionary payments on other Tier 1 capital instruments, and discretionary bonus payments to staff.
- 16. Payments that do not result in the depletion of CET1 capital are not considered distributions.
- 17. Earnings refer to distributable profits calculated prior to the deduction of elements subject to the restriction on distributions. The earnings are computed after the tax which would have been reported had none of the distributable items been paid.
- 18. Drawdowns on the capital conservation buffers are generally not prohibited. However, banks should not choose in normal times to operate in the buffer range. If buffer is drawn down, banks shall ensure to rebuild buffers over an appropriate timeframe.

19. If the bank wants to make payments or distribute earnings in excess of the restrictions, the bank may raise capital in the private sector equal to the amount above the constraints which it wishes to distribute. The bank's options may be discussed with the Bangko Sentral and should be included in the capital planning process.

Part III. Credit Risk-Weighted Assets

1. Credit risk-weighted assets shall be determined by assigning risk weights to amounts of on-balance sheet assets and to credit equivalent amounts of off-balance sheet items and for banks that shall engage in derivatives activities as end-user for hedging purpose and/or under a Type 3-Limited User Authority granted pursuant to the provisions of Sec. 613, inclusive of derivative contracts: *Provided*, That the following shall be deducted from the total credit risk-weighted assets:
- a) General loan loss provision (in excess of the amount permitted to be included in upper Tier 2 capital); and
 - b) Unbooked valuation reserves and other capital adjustments affecting asset accounts based on the latest report of examination as approved by the Monetary Board.

A. On-Balance Sheet Assets

2. The risk-weighted amount shall be the product of the net carrying amount of the asset and the risk weight associated with that asset. Net carrying amount shall refer to the outstanding balance of the account inclusive of unamortized discount (premium) and accumulated market gains (losses), and net of allowance for credit losses: *Provided*, That for available for sale debt securities, any accumulated market gains/(losses) shall be deducted/added back as stated in paragraph 10 of Part II.
- a) 0% risk weight –
 - i. Cash on hand (including foreign currency notes and coins on hand acceptable as international reserves);
 - ii. Peso-denominated claims on or portions of claims guaranteed by or collateralized by peso-denominated securities issued by the Philippine National Government and the Bangko Sentral;
 - iii. Claims on or portions of claims guaranteed by or collateralized by securities issued by central governments and central banks of foreign countries with the highest credit quality as defined in Part VI;
 - iv. Claims on or portions of claims guaranteed by or collateralized by securities issued by multilateral development banks with the highest credit quality as defined in Part VI;
 - v. Loans to the extent covered by hold-out on, or assignment of deposits/deposit substitutes maintained with the lending bank;
 - vi. Loans or acceptances under letters of credit to the extent covered by margin deposits;
 - vii. Peso-denominated special time deposit loans to the extent guaranteed by PGC;
 - viii. Peso-denominated real estate mortgage loans to the extent guaranteed by the PGC;
 - ix. Peso-denominated loans to the extent guaranteed by the PGC;
 - x. Loans to the extent guaranteed by the Agricultural Credit Policy Council; and
 - xi. Loans to small farmer and fisherfolk to the extent guaranteed by the Agricultural Guarantee Fund Pool (AGFP) created under Administrative Order No. 225-A dated 26 May 2008, prior to the transfer of the administration of the AGFP to the Philguarantee.
 - b) 20% risk weight –
 - i. Checks and other cash items (including foreign currency checks and other cash items denominated in currencies acceptable as international reserves);
 - ii. Claims on or portions of claims guaranteed by or collateralized by securities issued by local government units (LGUs) with the highest credit quality as defined in Part VI;
 - iii. Claims on or portions of claims guaranteed by or collateralized by securities issued by non-central government public sector entities of foreign countries with the highest credit quality as defined in Part VI;

- iv. Claims on or portions of claims guaranteed by Philippine incorporated banks/QBs with the highest credit quality as defined in Part VI;
 - v. Claims on or portions of claims guaranteed by foreign incorporated banks with the highest credit quality as defined in Part VI;
 - vi. Interbank call loans;
 - vii. Claims on or portion of claims guaranteed by Philippine incorporated private enterprises (including claims on government corporations and on MSME not qualifying under highly diversified loan portfolio as defined in Item “d” below) with the highest credit quality as defined in Part VI;
 - viii. Claims on or portion of claims guaranteed by foreign incorporated private enterprises (including claims on government corporations) with the highest credit quality as defined in Part VI; and
 - ix. Loans to MSMEs, which are performing, to the extent guaranteed by a qualified Credit Surety Fund (CSF) Cooperative. Loans to small farmer and fisherfolk engaged in palay and/or food production projects/activities to the extent guaranteed by the Agricultural Guarantee Fund Pool (AGFP) created under Administrative Order No. 225-A dated 26 May 2008: *Provided*, That a separate fund is maintained to guarantee the loans originated by banks: *Provided, further*, That the maximum allowable leveraging ratio of the fund maintained to guarantee bank loans shall be three (3), i.e., the maximum amount of loans guaranteed by the fund is thrice the amount of money in the fund: *Provided, furthermore*, That the fund maintained to guarantee bank loans is invested in assets that are zero percent (0%) risk weighted under this risk-based capital adequacy framework.
 - x. Loans to MSMEs, which are performing, to the extent guaranteed by a qualified Credit Surety Fund (CSF) Cooperative. A qualified CSF Cooperative refers to a cooperative that is organized consistent with the provisions of Republic Act (R.A.) No. 10744 and its implementing rules and regulations (IRR): *Provided*, That the maximum allowable leveraging ratio of the CSF Cooperative to guarantee bank loans shall be three (3); *Provided further*, That said leverage ratio shall be subject to periodic review for progressive increase as warranted by the CSF Cooperative's performance, but not to exceed five times (5x) the CSF Cooperative's Restricted Capital for Surety.
- c) 50% risk weight –
- i. Loans to individuals for housing purpose, fully secured by first mortgage on residential property that is or will be occupied by the borrower which are not classified as non-performing.
 - ii. Foreign currency denominated claims on or portion of claims guaranteed by or collateralized by foreign currency denominated securities issued by the Philippine National government and the Bangko Sentral.

d) 75% risk weight –

Qualified micro, small and medium enterprise (MSME) loan portfolio that meets the following criteria:

For individual claims that may form part of the MSME loan portfolio –

- (1) Claim must be on a micro, small or medium business enterprise as defined under existing Bangko Sentral regulations; and
- (2) Claim must be in the form of:
 - Direct loan; or
 - Unused letters of credit: *Provided*, That the credit equivalent amounts thereof shall be determined in accordance with paragraph 3.

For the MSME loan portfolio –

It must be a highly diversified portfolio, i.e., it has at least 500 borrowers that are distributed over a number of industries. All borrowers included in the count must not have any non-performing loan. All non-performing MSME exposures are to be treated as ordinary non-performing loans.

e) 100% risk weight –

- i. Non-performing loans to individuals for housing purpose, fully secured by first mortgage on residential property that is or will be occupied by the borrower.

f) 150% risk weight –

- i. All non-performing loans (except non-performing loans to individuals for housing purpose, fully secured by first mortgage on residential property that is or will be occupied by the borrower), all non-performing sales contract receivables and all non-performing debt securities.
- ii. Real and other properties acquired (ROPA) and Non-Current Assets Held for Sale (NCAHS)²⁰ – net of allowance for losses: *Provided*, That the 150% risk weight shall be applied on a staggered basis for three (3) years, i.e., 115% starting 01 January 2012, 130% from 01 January 2013, and 150% from 01 January 2014.

g) 100% risk weight –

All other assets including, among others, the following:

- i. Claims on central governments and central banks of foreign countries other than those with the highest credit quality;
- ii. Claims on Philippine local government units other than those with the highest credit quality;
- iii. Claims on non-central government public sector entities of foreign countries other than those with the highest credit quality;
- iv. Claims on Philippine incorporated banks/QBs other than those with the highest credit quality;
- v. Claims on foreign incorporated banks other than those with the highest credit quality;
- vi. Claims on the Philippine incorporated private enterprises (including claims on government corporations and on MSME not qualifying under highly diversified loan portfolio as defined in Item “d” above) other than those with the highest credit quality;
- vii. Claims on foreign incorporated private enterprises other than those with the highest credit quality;
- viii. Loans to companies engaged in speculative residential building or property development;
- ix. Equity investments (except those deducted from capital);
- x. Bank premises, furniture, fixture and equipment, inclusive of revaluation increment – net of allowance for losses;
- xi. Foreign currency notes and coins on hand not acceptable as international reserves; and
- xii. Foreign currency checks and other cash items not acceptable as international reserves, except those which are deducted from capital, as follows
 - (1) Total outstanding unsecured credit accommodations, both direct and indirect, to DOSRI - net of allowance for credit losses;
 - (2) Total outstanding unsecured loans, other credit accommodations and guarantees granted to subsidiaries - net of allowance for credit losses;
 - (3) Total outstanding loans, other credit accommodations and guarantees granted to related parties that are not at arm’s length terms as determined by the appropriate supervising department of the Bangko Sentral – net of allowance for credit losses;
 - (4) Deferred tax asset, net of allowance for impairment and associated deferred tax liability: *Provided*, That the conditions to offset under Philippine Accounting Standards (PAS) 12 are met: *Provided, further*, That any excess of deferred tax liability over deferred tax asset (i.e., net deferred tax liability) shall not be added to CET1 capital;
 - (5) Goodwill, net of allowance for impairment and any associated deferred tax liability which would be extinguished upon impairment or derecognition, including that relating to unconsolidated subsidiary RBs and VCCs for TBs, and RBs for Coop Banks (on solo basis) and unconsolidated non-financial allied undertakings (on solo and consolidated bases);

²⁰ For all non-performing sales receivables and NCAHS, it shall take effect 01 January 2013.

- (6) Other intangible assets, net of any allowance for impairment and any associated deferred tax liability which would be extinguished upon impairment or derecognition;
- (7) Defined benefit pension fund assets (liabilities);
- (8) Investments in equity of unconsolidated subsidiary RBs and VCCs for TBs, and RBs for Coop Banks after deducting related goodwill, if any (for solo basis)
- (9) Investments in equity of unconsolidated subsidiary non-financial allied undertakings, after deducting related goodwill, if any (for both solo and consolidated bases);
- (10) Significant minority investments (10%-50% of voting stock) in RBs and VCCs for TBs, and RBs for Coop Banks after deducting related goodwill, if any (for both solo and consolidated bases);
- (11) Significant minority investments (10%-50% of voting stock) in unconsolidated subsidiary non-financial allied undertakings after deducting related goodwill, if any (for both solo and consolidated bases);
- (12) Minority investments [below ten percent (10%) of voting stock] in RBs and VCCs for TBs, and RBs for Coop Banks after deducting related goodwill, if any (for both solo and consolidated bases);
- (13) Minority investments [below ten percent (10%) of voting stock] in unconsolidated subsidiary non-financial allied undertakings after deducting related goodwill, if any (for both solo and consolidated bases);
- (14) Other equity investments in non-financial allied undertakings;
- (15) Reciprocal investments in common stock, AT1 capital or Tier 2 capital of other banks/enterprises after deducting related goodwill, if any (for both solo and consolidated bases);
- (16) Sinking fund for redemption of limited life redeemable preferred stock with the replacement requirement upon redemption;
- (17) Sinking fund for redemption of limited life redeemable preferred stock without the replacement requirement upon redemption (limited to the balance of redeemable preferred stock after applying the cumulative discount factor).

B. Off-Balance Sheet Assets

3. The risk-weighted amount shall be calculated using a two-step process. First, the credit equivalent amount of an off-balance sheet item shall be determined by multiplying its notional principal amount by the appropriate credit conversion factor, as follows:

- a) 100% credit conversion factor

This shall apply to direct credit substitutes, e.g., general guarantees of indebtedness (including standby letters of credit serving as financial guarantees for loans and securities) and acceptances (including endorsements with the character of acceptances), and shall include:

- i. Guarantees issued other than shipside bonds/airway bills; and
- ii. Financial standby letters of credit (net of margin deposit).

- b) 50% credit conversion factor

This shall apply to certain transaction-related contingent items, e.g., performance bonds, bid bonds, warranties and standby letters of credit related to particular transactions, and shall include:

- i. Performance standby letters of credit (net of margin deposit), established as a guarantee that a business transaction will be performed.

This shall also apply to –

- i. Other commitments e.g., formal standby facilities and credit lines with an original maturity of more than one (1) year.

c) 20% credit conversion factor

This shall apply to short-term, self-liquidating trade-related contingencies arising from movement of goods, e.g., documentary credits collateralized by the underlying shipments, and shall include:

i. Trade-related guarantees:

- (1) Shipperside bonds/airway bills
- (2) Letters of credit – confirmed

- ii. Sight letters of credit outstanding (net of margin deposit);
- iii. Usance letters of credit outstanding (net of margin deposit);
- iv. Deferred letters of credit (net of margin deposit);
- v. Revolving letters of credit (net of margin deposit) arising from movement of goods and/or services; and

This shall also apply to commitments with an original maturity of up to one (1) year.

d) 0% credit conversion factor

This shall apply to commitments, which can be unconditionally cancelled at any time by the bank without prior notice, and shall include –

i. Credit card lines.

This shall also apply to those not involving credit risk, and shall include:

- i. Late deposits/payments received;
- ii. Inward bills for collection;
- iii. Outward bills for collection;
- iv. Travelers' checks unsold;
- v. Trust department accounts;
- vi. Items held for safekeeping/custodianship;
- vii. Items held as collaterals;
- viii. Deficiency claims receivable; and
- ix. Others.

Second, the credit equivalent amount shall be treated like any on-balance sheet asset and shall be assigned the appropriate risk weight, i.e., according to the obligor, or if relevant, the qualified guarantor or the nature of collateral.

C. Claims with Eligible Collateral/Guarantees

- 4. In order to obtain capital relief, all documentation used in collateralized transactions and for documenting guarantees must be binding on all parties and legally enforceable in all relevant jurisdictions. The disclosure requirements under Part V of this document must also be observed for banks to obtain capital relief.
- 5. In addition to the general requirement for legal certainty set out in paragraph 4, the legal mechanism by which collateral is pledged or transferred must ensure that the bank has the right to liquidate or take legal possession of it in a timely manner, in the event of default, insolvency or bankruptcy.
- 6. The following are the eligible collateral instruments:
 - a) Cash (as well as certificates of deposits or comparable instruments issued by the lending bank) on deposit with the bank which is incurring the counterparty exposure;
 - b) Peso-denominated securities issued by the Philippine National Government and the Bangko Sentral;
 - c) Multilateral development banks;
 - d) Securities with the highest credit quality as defined in Part VI issued by:
 - i. Central government and central banks of foreign countries;
 - ii. Philippine local government units; and
 - iii. Non-central government public sector entities of foreign countries; and
 - e) First mortgage on residential property, only in the case of loans to individuals for housing purpose.

7. A guarantee must represent a direct claim on the protection provider and must be explicitly referenced to specific exposures or a pool of exposures, so that the extent of the cover is clearly defined and incontrovertible. Other than the non-payment by a protection purchaser of money due in respect of the credit protection contract, the guarantee must be irrevocable; there must be no clause in the contract that would allow the protection provider unilaterally to cancel the credit cover or that would increase the effective cost of cover as a result of deteriorating credit quality in the hedged exposure. It must also be unconditional; there should be no clause in the protection contract outside the direct control of the bank that could prevent the protection provider from being obliged to pay out in a timely manner in the event that the original counterparty fails to make the payment(s) due.
8. The following are the eligible guarantors:
 - a) Philippine National Government and the Bangko Sentral;
 - b) Multilateral development banks;
 - c) Guarantors with the highest credit quality as defined in Part VI:
 - i. Central government and central banks of foreign countries;
 - ii. Philippine local government units;
 - iii. Non-central government public sector entities of foreign countries;
 - iv. Philippine incorporated banks/QBs;
 - v. Foreign incorporated banks;
 - vi. Philippine incorporated private enterprises (including government corporations); and
 - vii. Foreign incorporated private enterprises (including government corporations);
 - d) The Agricultural Guarantee Fund Pool (AGFP) created under Administrative Order No. 225-A dated 26 May 2008, prior to the transfer of the administration of the AGFP to the Philguarantee; and
 - e) Qualified Credit Surety Fund (CSF) Cooperative as defined in Part III. A.
9. The extent to which a claim is guaranteed/collateralized shall be determined by the amount of current market value of securities pledged/guarantee coverage, in comparison with the carrying amount of the on-balance sheet claim or the notional principal amount of the off-balance sheet exposure.

Part IV. Operational Risk-Weighted Assets

A. Definition of operational risk

1. Operational risk is defined as the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. This definition includes legal risk, but excludes strategic and reputational risk.
2. Banks should be guided by the Basel Committee on Banking Supervision's recommendations on Sound Practices for the Management and Supervision of Operational Risk (February 2003). The same may be downloaded from the BIS website (www.bis.org).

B. Measurement of capital charge

3. In computing for the operational risk capital charge, banks shall use the basic indicator approach, with modification.
4. Under this approach, banks must hold capital for operational risk equivalent to twelve percent (12%) of the average gross income over the previous three (3) years of positive annual gross income; *Provided*, That this shall be applied over a three (3)-year period, i.e., four percent (4%) capital charge shall be applied by 01 January 2012, eight (8%) by 01 January 2013, and twelve percent (12%) by 01 January 2014. Figures for any year in which annual gross income is negative or zero should be excluded from both the numerator and denominator when calculating the average.
5. Gross income must be calculated using the year-end balances from the FRP.
6. Gross income, for the purpose of computing for operational risk capital charge, is defined as net interest income plus non-interest income. This measure should:
 - a) be gross of any provisions for losses on accrued interest income from financial assets;
 - b) be gross of operating expenses, including fees paid to outsourcing service providers;
 - c) include fees and commissions;
 - d) exclude gains/(losses) from the sale/redemption/derecognition of non-trading financial assets and liabilities;

- e) exclude gains/(losses) from sale/derecognition of non-financial assets; and
 - f) include other income (i.e., rental income, miscellaneous income, etc.).
7. Banks that have concerns on the insufficiency of their income data should consult their respective Central Point of Contact Department (CPCD) of the SES for the appropriate computation of the operational risk capital charge.²¹

C. Measurement of operational risk- weighted assets

8. The resultant operational risk capital charge is to be multiplied by 125% before multiplying by 10 (i.e., the reciprocal of the minimum capital ratio of 10%) to arrive at the total operational risk- weighted assets.

Part V. Disclosures in the Annual Reports and Published Balance Sheet

1. In addition to the disclosure requirements under Sec. 175, banks shall disclose in their Annual Reports, where applicable, the information below. Item "h" should also be disclosed in the quarterly Published Balance Sheet (PBS):
- a) Tier 1 capital and a breakdown of its components (including deductions solely from Tier 1);
 - b) Tier 2 capital and a breakdown of its components;
 - c) Deductions from Tier 1 fifty percent (50%) and Tier 2 fifty percent (50%) capital;
 - d) Total qualifying capital;
 - e) Capital requirements for credit risk;
 - f) Capital requirements for market risk;
 - g) Capital requirements for operational risk; and
 - h) Total and Tier 1 capital adequacy ratio on both solo and consolidated bases.
2. The required disclosures shall commence with Annual Reports for financial year 2012 and quarterly PBS from end-March 2012.

Part VI. Definitions

1. *Bank premises, furniture, fixture and equipment (inclusive of revaluation increment) – net.* This refers to the real and other properties used/to be used for banking purposes inclusive of revaluation increment as approved by the Monetary Board.
2. *Cash on hand.* This refers to total amount of cash in the bank's vault in the form of notes and coins in Philippine currency and in foreign currencies acceptable to form part of the international reserves.
3. *Central government of a foreign country.* This refers to the central government which is regarded as such by a recognized banking supervisory authority in that country.
4. *COCIs.* This refers to the total amount of COCIs received after the selected clearing cut-off time until the close of the regular banking hours denominated in Philippine currency and in foreign currencies acceptable to form part of the international reserves.
5. *Claims.* This refers to exposures to the entity on whom the claim is held, and shall include, but shall not be limited to the following accounts, inclusive of unamortized discount/(premium) and accumulated market gains/(losses) and net of allowance for credit losses: *Provided*, That for available for sale debt securities, any accumulated market gains/(losses) shall be deducted/added back as stated in paragraph 10 of Part II:
- a) Due from Bangko Sentral;
 - b) Due from other banks;
 - c) Financial assets designated at fair value through profit or loss;
 - d) Available for sale financial assets;
 - e) Held to maturity financial assets;
 - f) Unquoted debt securities classified as loans;
 - g) Loans and receivables;
 - h) Loans and receivable arising from repurchase agreements, certificates of assignment/participation with recourse, and securities lending and borrowing transactions;
 - i) Sales contract receivables;
 - j) Accrued interest income from financial assets; and
 - k) Others, e.g., accounts receivable and dividends receivable.

²¹ Applies to banks operating for less than three years, or those that have been recently merged, among others.

Accruals on a claim shall be classified and risk weighted in the same way as the claim. Bills purchased on a without recourse basis shall be classified as claims on the drawee banks.

6. *Claims on (a) central government and central bank and non-central government public sector entities of foreign country and foreign incorporated bank/private enterprise; (b) multilateral development banks; (c) local government units and Philippine incorporated bank/QB/private enterprise with the highest credit quality.* This refers to claims on governments, banks/QBs, private enterprises given the highest credit rating by any of the following BSP-recognized credit rating agencies:

International rating agencies:

Rating agency	Highest rating
Moody's	"Aa3" and above
Standard & Poor's	"AA-" and above
Fitch Ratings	"AA-" and above
And such other rating agencies as may be approved by the Monetary Board.	

International rating agencies (with National Ratings):

Rating agency	Highest rating
Fitch Ratings Singapore	"AA-" and above
And such other rating agencies as may be approved by the Monetary Board	

Domestic rating agencies:

Rating agency	Highest rating
PhilRatings	"PRS Aa" and above
And such other rating agencies as may be approved by the Monetary Board	

Provided, That for purposes of this Appendix, With prior Bangko Sentral approval, international credit rating agencies may have national rating systems developed exclusively for use in the Philippines using the Philippine sovereign as reference highest credit quality anchor;

- If a claim has only one rating by any of the Bangko Sentral recognized credit assessment agencies, that rating shall be used to determine the risk weight of the claim; in cases where there are two (2) or more ratings which map into different risk weights, the higher of the two lowest risk weights should be used;
 - Any reference to credit rating shall refer to issue-specific rating; the issuer rating may be used only if the claim being risk-weighted is an unsecured senior obligation of the issuer and is of the same denomination applicable to the issuer rating (e.g., local currency issuer rating may be used for risk weighting local currency denominated senior claims); or short-term or in cases of guarantees;
 - For loans, risk weighting shall depend on either the rating of the borrower or the rating of the unsecured senior obligation of the borrower: *Provided*, That in the case of the latter, the loan is of the same currency denomination as the unsecured senior obligation; and
 - Domestic debt issuances may be rated by Bangko Sentral-recognized domestic or international credit rating agencies, which have developed a national rating scale acceptable to the Bangko Sentral, while internationally issued debt obligations shall be rated by Bangko Sentral-recognized international credit assessment agencies only.
7. *Consolidated basis.* This refers to combined financial statements of parent bank and subsidiary financial allied undertakings (i.e., RBs and VCCs for TBs, and RBs for Coop Banks) on a line by line basis.
8. *Deposit for stock subscription.* This refers to the funds received as deposits for stock subscription that meets the conditions for recognition as equity provided in Sec. 123.
9. *Financial allied undertakings.* This refers to enterprises or firms with homogenous or similar activities/business functions with the financial intermediary and may include but not limited to leasing companies, banks, investment houses, financing companies, credit card companies, FIs catering to small and medium scale industries (including VCCs), companies engaged in FX dealership brokerage, and such other similar activities as the Monetary Board may declare as appropriate from time to time.

10. *Goodwill*. This refers to the future economic benefit arising from assets that are not capable of being individually identified and separately recognized.
11. *Government corporations*. This refers to commercial undertakings owned by central governments or non-central public sector entities. Claims on Philippine GOCCs that are not explicitly guaranteed by the Philippine National Government are also included in this category.
12. *Interbank call loans*. This refers to the cost of call/demand loans granted to other resident banks and non-bank financial intermediaries with quasi-banking authority covered under Sec. 315.
13. *Investment in subsidiaries*. This refers to the amount of the bank's investments in the equity instruments of unconsolidated subsidiaries which shall be accounted for using the equity method. As provided under PAS 27, a subsidiary is an entity that is controlled by another entity (known as the parent). Control is presumed to exist when the parent owns, directly or indirectly through subsidiaries, more than half of the voting power of an entity, unless in exceptional circumstances, it can be directly demonstrated that such ownership does not constitute control.
14. *Loans to individuals for housing purpose, fully secured by first mortgage on residential property that is or will be occupied by the borrower*. This shall not include loans to companies engaged in speculative residential building or property development.
15. *Loans or acceptances under letters of credit to the extent covered by margin deposits*. This shall not include the unnegotiated letters of credit or the unutilized portion thereof, or other items booked under contingent accounts. This shall also not include margin deposits against loans or acceptance accounts which are fully liquidated.
16. *Loans to the extent covered by hold-out on, or assignment of, deposits or deposit substitutes maintained in the lending bank*. A loan shall be considered as secured by a hold-out on, or assignment of deposit or deposit substitute only if such deposit or deposit substitute account is covered by a hold-out agreement or deed of assignment signed by the depositor or investor/placer in favor of the bank. This shall not include loans transferred to/carried by the bank's trust department secured by deposit hold-out/assignment.
17. *Multilateral development banks*. This includes all exposures to multilateral development banks. Claims on World Bank Group, which comprised of the International Bank for Reconstruction and Development (IBRD) and the International Finance Corporation (IFC), the Asian Development Bank (ADB), the African Development Bank (AfDB), the European Bank for Reconstruction and Development (EBRD), the Inter-American Development Bank (IADB), the European Investment Bank (EIB), the European Investment Fund (EIF), the Nordic Investment Bank (NIB), the Caribbean Development Bank (CDB), the Islamic Development Bank (IDB), and the Council of Europe Development Bank (CEDB) currently receive 0% risk weight.
18. *Non-central government public sector entities of a foreign country*. This refers to entities which are regarded as such by a recognized banking supervisory authority in the country in which they are incorporated.
19. *Non-performing debt securities*. This refers to debt securities as described below:
 - a) For zero-coupon debt securities, and debt securities with quarterly, semi-annual, or annual coupon payments, they shall be considered non-performing when principal and or coupon payment is unpaid for thirty (30) days or more after due date; and
 - b) For debt securities with monthly coupon payments, they shall be considered non-performing when three (3) or more coupon payments are in arrears: *Provided, however*, That when the total amount of arrearages reaches twenty percent (20%) of the total outstanding balance of the debt security, the total outstanding balance of the debt security shall be considered as non-performing.
20. *Other commitments*. This includes undrawn portion of any binding arrangements which obligate the bank to provide funds at some future date.
21. *Other commitments with an original maturity of up to one (1) year*. This includes any revolving or undated open-ended commitments, e.g., overdrafts or unused credit lines, providing that they can be unconditionally cancelled at any time and subject to credit revision at least annually.
22. *Other regulatory capital instruments*. This refers to unsecured subordinated term debt instruments qualifying as capital of banks.
23. *Perpetual preferred stock*. This refers to preferred stock that does not have a maturity date, that cannot be redeemed at the option of the holder of the instrument, and that has no provision that will require future redemption of the issue. Consistent with these provisions, any perpetual preferred stock with a feature permitting redemption at the option of the issuer may qualify as capital only if the redemption is subject to prior approval of the Bangko Sentral.

24. *Philippine LGUs*. This refers to Philippine government units below the level of national government, such as city, provincial, and municipal governments.
25. *Philippine National Government*. This shall refer to the Philippine National Government and its agencies such as departments, bureaus, offices, and instrumentalities, but excluding GOCCs.
26. *Private enterprises*. This refers to all commercial companies whether organized in the form of a corporation, partnership, or sole proprietorship. This shall include government corporations.
27. *Redeemable preferred stock*. This refers to preferred stock which under existing regulation may be redeemed at the specific dates or periods fixed for redemption, only upon prior approval of the Bangko Sentral and, where the conditions of the issuance specifically state, only if the shares redeemed are replaced with at least an equivalent amount of newly paid-in shares so that the total paid-in capital stock is maintained at the same level immediately prior to redemption: *Provided*, That redemption shall not be earlier than five (5) years after the date of issuance: *Provided, further*, That such redemption may not be made where the bank is insolvent or if such redemption will cause insolvency, impairment of capital or inability of the bank to meet its debts as they mature.
28. *Solo basis*. This refers to combined financial statements of head office and branches.
29. *Treasury shares*. This refers to shares of the parent bank held by a subsidiary financial allied undertaking (i.e., RBs and VCCs for TBs, and RBs for Coop Banks) in consolidated financial statements.

Part VII. Required Reports

(As deleted by Circular No. 1079 dated 9 March 2020)

Part VIII. Sanctions

(As deleted by Circular No. 1079 dated 9 March 2020)

(Circular Nos. 1084 dated 28 April 2020, 1079 dated 9 March 2020, 988 dated 20 December 2017, 979 dated 25 October 2017, 956 dated 17 April 2017, and 914 dated 23 June 2016)

BANGKO SENTRAL RULES OF PROCEDURE ON ADMINISTRATIVE CASES INVOLVING DIRECTORS AND OFFICERS OF BANKS
(Appendix to Sec. 138 on Rules of Procedures on Administrative Cases Involving Directors and Officers of the Bank)

RULE I – GENERAL PROVISIONS

Sec. 1. Title. These rules shall be known as the Bangko Sentral Rules of Procedure on Administrative Cases Involving Directors and Officers of Banks.

Sec. 2. Applicability. These rules shall apply to administrative cases filed with or referred to the Office of Special Investigation (OSI), Bangko Sentral, involving directors and officers of banks pursuant to Section 37 of Republic Act No. 7653 (The New Central Bank Act) and Sections 16 and 66 of Republic Act No. 8791 (The General Banking Law of 2000).

The disqualification of directors and officers under Section 16 of R.A. No. 8791 shall continue to be covered by existing Bangko Sentral rules and regulations.

Sec. 3. Nature of proceedings. The proceedings under these rules shall be summary in nature and shall be conducted without necessarily adhering to the technical rules of procedure and evidence applicable to judicial trials. Proceedings under these rules shall be confidential and shall not be subject to disclosure to third parties, except as may be provided under existing laws.

RULE II – COMPLAINT

Sec. 1. Complaint. The complaint shall be in writing and subscribed and sworn to by the complainant. However, in cases initiated by the appropriate department of the Bangko Sentral, the complaint need not be under oath. No anonymous complaint shall be entertained.

Sec. 2. Where to file. The complaint shall be filed with or referred to the OSI.

Sec. 3. Contents of the complaint. The complaint shall contain the ultimate facts of the case and shall include:

- a. full name and address of the complaint;
- b. full name and address of the person complained of;
- c. specification of the charges;
- d. statement of the material facts;
- e. statement as to whether or not a similar complaint has been filed with the Bangko Sentral or any other public office.

The complaint shall include copies of documents and affidavits of witnesses, if any, in support of the complaint.

RULE III – DETERMINATION OF PRIMA FACIE CASE AND PROSECUTION OF THE CASE

Sec. 1. Action on complaint. Upon determination that the complaint is sufficient in form and substance, the OSI shall furnish the respondent with a copy thereof and require respondent to file within ten (10) days from receipt thereof, a sworn answer, together with copies of documents and affidavits of witnesses, if any, copy furnished the complainant.

Failure of the respondent to file an answer within the prescribed period shall be considered a waiver and the case shall be deemed submitted for resolution.

Sec. 2. Preliminary investigation. Upon receipt of the sworn answer of the respondent, the OSI shall determine whether there is a prima facie case against the respondent. If a prima facie is established during the preliminary investigation, the OSI shall file the formal charge with the Supervised Banks Complaints Evaluation Group (SBCEG), Bangko Sentral. However, in the absence of a prima facie case, the OSI shall dismiss the complaint without prejudice or take appropriate action as may be warranted.

Sec. 3. Formal charge. The formal charge shall contain the name of the respondent, a brief statement of material or relevant facts, the specific charge, and the pertinent provisions of banking laws, rules or regulations violated.

Sec. 4. Prosecution. The OSI shall prosecute the case. The complainant may be assisted or represented by counsel, who may be deputized for such purpose, under the direction and control of the OSI.

RULE IV – PROCEEDING BEFORE THE HEARING PANEL OR HEARING OFFICER

Sec. 1. Filing of the formal charge. The OSI shall file the formal charge before the SBCEG. It shall also furnish the SBCEG with supporting documents relevant to the formal charge.

Sec. 2. Hearing officer and composition of the hearing panel. The case shall be heard either by a hearing officer or a hearing panel, which shall be composed of a chairman and two (2) members, all of whom shall be designated by the SBCEG. The SBCEG shall determine whether the case shall be heard either by a hearing panel or a hearing officer.

Sec. 3. Answer. The hearing panel or hearing officer shall furnish the respondent with a copy of the formal charge, with supporting documents relevant thereto, and shall require him to submit, within ten (10) days from receipt thereof, a sworn answer, copy of which shall be furnished the prosecution.

The respondent, in his answer, shall specifically admit or deny all the charges specified in the formal charge, including the attachments. Failure of the respondent to comment, under oath, on the documents attached thereto shall be deemed an admission of the genuineness and due execution of said documents.

Sec. 4. Waiver. In the event that the respondent, despite due notice, fails to submit an answer within the prescribed period, he shall be deemed to have waived his right to present evidence. The hearing panel or hearing officer shall issue an order to that effect and direct the prosecution to present evidence ex parte. Thereafter, the hearing panel or hearing officer shall submit a report on the basis of available evidence.

Sec. 5. Preliminary conference. Upon receipt of the answer of respondent, the hearing panel or hearing officer shall set the case for preliminary conference for the parties to consider and agree on the admission or stipulation of facts and of documents, simplification of issues, identification and marking of evidence and such other matters as may aid in the prompt and just resolution of the case. Any evidence not presented and identified during the preliminary conference shall not be admitted in subsequent proceedings.

Sec. 6. Submission of position papers. After the preliminary conference, the hearing panel or hearing officer shall issue an order stating therein the matters taken up, admissions made by the parties and issues for resolution. The order shall also direct the parties to simultaneously submit, within ten (10) days from the receipt of said order, their respective position papers which shall be limited to a discussion of the issues as defined in the order.

Sec. 7. Hearing. After the submission by the parties of their position papers, the hearing panel or hearing officer shall determine whether or not there is a need for a hearing for the purpose of cross-examination of the affiant(s). If the hearing panel or hearing officer finds no necessity for conducting a hearing, he shall issue an order to the effect.

In cases where the Hearing Panel or Hearing Officer deems it necessary to allow the parties to conduct cross-examination, the case shall be set for hearing. The affidavits of the parties and their witnesses shall take the place of their direct testimony.

RULE V – PROHIBITED MOTIONS

Sec. 1. Prohibited Motions. No motion to dismiss or quash, motion for bill of particulars and such other dilatory motions shall be allowed in the cases covered by these rules.

RULE VI – RESOLUTION OF THE CASE

Sec. 1. Contents and period for submission of report. Within sixty (60) days after the hearing panel or hearing officer has issued an order declaring that the case is submitted for resolution, a report shall be submitted to the Monetary Board. The report of the hearing panel or hearing officer shall contain clearly and distinctly the findings of facts and conclusions of law on which it is based.

Sec. 2. Rendition and notice of resolution. After consideration of the report, the Monetary Board shall act thereon and cause true copies of its resolution to be served upon the parties.

Sec. 3. Finality of the resolution. The resolution of the Monetary Board shall become final after the expiration of fifteen (15) days from receipt thereof by the parties, unless a motion for reconsideration shall have been timely filed.

Sec. 4. Motion for reconsideration. A motion for reconsideration may only be entertained if filed within fifteen (15) days from receipt of the resolution by the parties. No second motion for reconsideration shall be allowed.

RULE VII – APPEAL

Sec. 1. Appeal. An appeal from the Resolution of the Monetary Board may be taken to the Court of Appeals within the period and in the manner provided under Rule 43 of the Revised Rules of Court.

RULE VIII – EXECUTION OF RESOLUTION

Sec. 1. Resolution becoming executor. The resolution of the Monetary Board shall become executory upon the lapse of fifteen (15) days from receipt thereof by the parties or from the receipt of the denial of the motion for reconsideration.

Sec. 2. Effect of appeal. The appeal shall not stay the resolution sought to be reviewed unless the Court of Appeals shall direct otherwise upon such terms as it may deem just.

Sec. 3. Enforcement of resolution. When the resolution orders the imposition of fines, suspension or removal from office of respondent, the enforcement thereof shall be referred to the appropriate department of the Bangko Sentral.

RULE IX - MISCELLANEOUS PROVISIONS

Sec. 1. Repeal. All existing rules, regulations, orders or circulars or any part thereof inconsistent with these rules are hereby repealed, amended or modified accordingly.

Sec. 2. Separability Clause. If any part of these rules is declared unconstitutional or illegal, the other parts or provisions shall remain valid.

**REGULATORY REQUIREMENTS IN INVESTING IN CREDIT-LINKED NOTES, STRUCTURED PRODUCTS AND SECURITIES
OVERLYING SECURITIZATION STRUCTURES BY UNIVERSAL BANKS AND COMMERCIAL BANKS
(Appendix to Secs. 624-A, 625-A, 626-A and 627-A)**

- a. Banks shall: submit the following documents to the appropriate supervising department of the Bangko Sentral within five (5) banking days after the date of its initial investment in credit-linked notes, structured products and/or securities overlying securitization structures –
- (1) A notarized certification in the prescribed formats (Annexes “A” and “B”) duly signed by the President/Chief Executive Officer or its equivalent, the Treasurer and Compliance Officer, stating that the bank’s investments are in compliance with relevant Bangko Sentral rules and regulations, and that the bank has an adequate risk management system in place; and
 - (2) Terms and conditions and/or product manuals on the credit-linked notes, structured products and/or securities overlying securitization structures, which as a minimum should cover the following:
 - (a) Description of the relevant financial product;
 - (b) Analysis of the proposed investments’ –
 - (i) reasonableness vis-à-vis the institution’s overall financial condition and capital levels; and
 - (ii) consistency with the institution’s business strategies and objectives;
 - (c) Analysis of the risks that may arise from the investments and the corresponding impact on the bank’s risk profile;
 - (d) Procedures/methodologies that the bank will implement to measure, monitor and control the risks inherent in the financial products;
 - (e) Relevant accounting guidelines, including pro-forma accounting entries;
 - (f) Relevant tax treatment;
 - (g) Analysis of any legal/regulatory restrictions and whether the investment is permissible for the institution; and
 - (h) Process flow chart, from deal initiation to risk reporting, indicating the departments and personnel involved in the identified processes.

UBs/KBs failing to submit the required certification within the prescribed deadline shall be subject to monetary penalties applicable for delayed reporting under existing regulations. For purposes of imposing monetary penalties, the required certification shall be classified as a *Category A-1 report*. Further, failure to comply with the above requirements shall subject the erring bank to the imposition of administrative sanctions under Section 37 of R.A. 7653.

The certification and the terms and conditions and/or product manual need not be submitted for a bank’s subsequent investments in the same issue of credit-linked note or structured product, or securities overlying the same tranche of a securitization structure.

- b. The certification shall be subject to post-verification by the appropriate supervising department of the Bangko Sentral.

Should the Bangko Sentral subsequently determine that the investments do not fully comply with the provisions of Secs. 624-A, 625-A, 626-A and 627-A, as applicable, and other relevant Bangko Sentral regulations, the UB/KB shall be considered to have submitted a false certification, subject to the sanctions prescribed under –

- (1) Sec. 626-A for investments in structured products by UBs and KBs without expanded derivatives authority, or
- (2) Section 37 of R.A. No. 7653 for investments in structured products by UBs and KBs with expanded derivatives authority, and for investments in credit-linked notes and similar products and in securities overlying securitization structures by all UBs and KBs.

Monetary penalties shall be reckoned from the date of the investment until the date that the erring bank shall have fully complied with the requirements under Secs. 624-A, 625-A, 626-A and 627-A.

For investments in (1) structured products by UBs and KBs with expanded derivatives authority and (2) credit-linked notes and securities overlying securitization structures by all UBs and KBs

(Name of Bank)

CERTIFICATION

We certify, in relation to _____ (Name of Bank) _____'s investment in _____ (name _____ of financial product) on _____ (date), _____ that –

1. The bank is allowed to invest in the product cited above under existing rules and regulations of the Bangko Sentral ng Pilipinas and the investment was approved by the Board of Directors in its Resolution No. _____ dated _____; and
2. The bank has an adequate risk management system, which includes, among others, the following:
 - a. Written policies and procedures that provide for adequate identification, measurement, monitoring and control of all risks in the investment;
 - b. Pertinent risk measurement system/methodologies that effectively measure on a timely basis all risks inherent in the investment;
 - c. Limit structure that addresses all risk factors and is consistent with the board- approved risk appetite and business strategy;
 - d. Internal controls; and
 - e. Management information system that efficiently provides accurate and timely monitoring and reporting of risk exposures and limit compliance.

(Name of Bank)

CERTIFICATION

We certify, in relation to _____ (Name of Bank) 's
investment in _____ (name of financial product) on _____ (date), that –

- a. The bank is allowed to invest in the product cited above under existing rules and regulations of the Bangko Sentral ng Pilipinas;
- b. The bank's investment is in compliance with the conditions set out in Circular No. 466 dated 05 January 2005, as follows:
 - (1) The revenue stream of the structured product is linked only to interest rate indices and/or foreign exchange rates other than those that involve the Philippine Peso, and that the minimum all-in return of such investments is not lower than zero.
 - (2) The contractual maturity of the instrument does not exceed 5 years.
 - (3) The product is issued by a bank or special purpose vehicle (SPV) collateralized by securities rated at least "A" or its equivalent by an international rating agency acceptable to the Monetary Board.
 - (4) The investment is booked in the "Held to Maturity" (HTM) Securities" account, or for instruments with put options, in the "Available for Sale (AFS) Securities" account.
 - (5) The total carrying value of all the bank's investments in structured products does not exceed 20% of the total investment portfolio of its EFCDU.
 - (6) The bank has established internal processes to identify, evaluate, monitor and manage the risk exposures (e.g. credit risk, market risk, liquidity risk, operational risk, legal risk, compliance risk), created by its investment in the above-cited product. Further to this:
 - (a) The investment was specifically approved by the Board of Directors in its Resolution No. _____ dated _____, and is subject to appropriate internal limits and periodic reporting to the Board.
 - (b) The bank complies with generally accepted accounting and disclosure standards and/or rules and regulations prescribed by the Bangko Sentral.
 - (c) An independent risk management function is in place.
 - (d) The bank has the ability to value the investments on a continuing and consistent basis and to measure its sensitivity to market movements.
 - (e) The risks of the investments can be accurately aggregated in risk reports on a timely basis.

Further, we undertake to –

- a. Perform, at regular intervals, stress tests that reflect extreme market conditions; and
- b. Obtain, on a monthly basis, bid prices from the issuer(s) of the investment instruments, to supplement the valuation exercise in Item 2.f.iv above.

**GUIDELINES ON THE ACCOUNTING TREATMENT FOR INVESTMENTS IN
CREDIT-LINKED NOTES (CLNs) AND OTHER STRUCTURED PRODUCTS (SPs)
(Appendix to New Section 623-A)**

In line with the policy of promoting fairness and accuracy in reporting financial transactions, banks are enjoined to observe the following guidelines on accounting for investments in (CLNs) and other (SPs) in addition to those prescribed under PAS 39: CLNs and other SPs are financial instruments which consist of the host contract (e.g., debt or equity contract) and one or more embedded derivatives. Said financial instruments may be accounted for as compound financial instruments or as bifurcated financial instruments where the embedded derivatives shall be separated from the host contracts. PAS 39 provides the conditions on when the embedded derivative may be bifurcated from the host contract.

Booking of CLNs and other SPs as a compound instrument

- a. CLNs may be booked under the “Held for Trading” (HFT) or “Designated at Fair Value through Profit or Loss” (DFVPL) category according to intention as provided under Circular No. 494 dated 20 September 2005.
- b. Other SPs, shall also be booked under the HFT or DFVPL category according to intention as provided in PAS 39.

In either case, the compound instrument (host contract and embedded derivatives) shall be carried at fair value with fair value changes reflected in profit or loss.

Booking of CLNs and other SPs as bifurcated financial instrument

Investment in CLNs and other SPs that are not intended to be traded (i.e., not to be booked as HFT) or to be designated at fair value through profit or loss shall be accounted for as bifurcated financial instruments.

Accounting for host contracts. When the embedded derivatives are bifurcated (separated) from the host contract, the host contract shall be accounted for as follows:

- a. In the case of CLN, the host contract shall be booked under the “Available for Sale” (ASS) but not under the “Held to Maturity” (HTM) nor under the “Unquoted Debt Securities Classified as Loans” (UDSCL) category in accordance with Circular No. 494.
- b. In the case of other SPs, the host contract shall be booked under the ASS, HTM or UDSCL category in accordance with Sec. 381.

Host contracts of investments in CLNs and Other SPs shall in no case be booked under the “Due from Other Banks” or “Interbank Loans Receivable” accounts.

Accounting for embedded derivatives The bifurcated embedded derivatives shall be accounted for as “Derivatives Held for Trading” with fair value changes reflected in profit or loss, except in cases where the bifurcated embedded derivatives are designated and effective hedging instruments, which shall be booked under the “Derivatives Held for Hedging” account. The following shall be observed for purposes of FRP reporting of bifurcated embedded derivatives:

- The entire notional amount (or leveraged notional amount in cases of leveraged exposures) of the hybrid contract and the corresponding positive/(negative) fair value of the embedded derivatives shall be reported in Schedule 4 (Derivatives Held for Trading – Embedded Derivatives) of the FRP.
- In the case of CLNs and Other SPs that have more than one embedded derivatives (multiple embedded derivatives) that are required to be separated from the hybrid contract, the entire notional amount (or leveraged notional amount in cases of leveraged exposures) of the hybrid contract and the corresponding positive/(negative) fair value of the embedded derivatives shall be reported in Schedule 4 (Derivatives Held for Trading – Embedded Derivatives) of the FRP for each type of bifurcated derivatives.

Generally, multiple embedded derivatives in a single instrument are treated as a single compound embedded derivative. However, embedded derivatives that are classified as equity are accounted for separately from those classified as assets or liabilities. In addition, if an instrument has more than one embedded derivatives and those derivatives relate to different risk exposures and are readily separable and independent of each other, they are accounted for separately from each other.

Marking to market guidance In addition to the marking to market guidelines provided under PAS 39, banks should likewise consider apart from the carrying amount of the host contract the notional amount (or leveraged notional amount in cases of leveraged exposures) of embedded derivatives in marking to market the hybrid financial instrument.

For this purpose, the term CLN shall include similar instruments such as credit linked deposits (CLDs) and credit linked loans (CLLs) where the repayment of the principal to the note holder is contingent upon the occurrence of a defined credit event. On the other hand, other SPs (as defined under Sec. 622) shall refer to a financial instrument where the total return is a function of one or more underlying indices, such as interest rates, equities and exchange rates. It is composed of a host contract (e.g., plain vanilla debt or equity securities) and an embedded derivative (e.g., swaps, forwards or options) that re-shape the risk-return pattern of the hybrid instrument. The term SP does not include asset-backed securities.

**IMPLEMENTATION OF THE DELIVERY BY THE SELLER OF SECURITIES DIRECTLY TO THE BUYER OR TO HIS DESIGNATED
SECURITIES CUSTODIAN/CENTRAL SECURITIES DEPOSITORY**

***Appendix to Secs. 431, 242 on Delivery of Securities and Repurchase Agreements Covering Government Securities,
Commercial Papers and Other Negotiable and Non-Negotiable Securities or Instruments,
245 on Delivery of Securities, and 431 on Registry of Scripless Securities of the Bureau of the Treasury***

Sec. 1. Statement of Policy. Pursuant to the policy of the Bangko Sentral to promote the protection of investors in order to gain their confidence in the securities market, the following rules/guidelines shall be observed by banks and NBFIs under Bangko Sentral supervision in their dealings in securities whether they are acting as seller, buyer, agent or custodian.

The guidelines on the delivery of government securities by the selling banks to an investor's Principal Securities Account with the RoSS through the Client Interface System facility are in *Appendix 67*.

Sec. 2. Distinction between a Securities Custodian, Registry and Central Securities Depository. For purposes of these Rules, a securities custodian, registry and central securities depository are defined as follows:

A securities custodian is a Bangko Sentral -accredited financial institution under Bangko Sentral supervision that is authorized to engage in investment management (for banks/investment houses with quasi-banking authority only) or trust business and is designated by the investor to perform the functions of safekeeping, holding title to the securities in a nominee capacity, reports rendition, mark-to-market valuation, collection and payment of dividends, interest earnings or proceeds from the sale/redemption/maturity of securities held under custodianship and representation of clients in corporate actions.

It may also perform the value added service of securities lending as agent, subject to the conditions specified under Sec. 431 (*Functions and responsibilities of a securities custodian*).

A securities registry is a duly authorized financial institution designated or appointed by the issuer to maintain the securities registry book either in electronic or in printed form. It records the initial issuance of the securities and subsequent transfers of ownership and issues registry confirmation to the buyers/holders. The registry must be a third party that does not belong to the same financial conglomerate or banking group as that of the issuer of securities.

A central securities depository is an SEC-authorized entity that provides securities accounts, central safekeeping services, and asset services, which may include the administration of corporate actions and redemptions, and plays an important role in helping to ensure the integrity of securities issues¹.

The securities custodian and the central securities depository must at all times maintain their independence and should not belong to the same financial conglomerate or banking group as that of the issuer or seller of securities held under custody or deposit.

It shall be the responsibility of the securities custodian and central securities depository to ensure that appropriate systems capacity, procedures or measures such as proper recording, accounting, reporting, preserving, and segregation of securities are in place in order to protect the interest of the client.

Sec. 3. Registry of Scripless Securities (RoSS) of the Bureau of Treasury. The Bureau of Treasury, as operator of the RoSS, which serves as the official registry for government securities, is not subject to Bangko Sentral accreditation and is exempted from the independence requirement under the existing Bangko Sentral regulations.

Sec. 4. Delivery of Securities. Pursuant to existing Bangko Sentral regulations, securities which are the subject of quasi-banking activities, repurchase agreements and securities sold on a without recourse basis shall be delivered by the seller directly to the purchaser or to the purchaser's designated BSP-accredited securities custodian or SEC authorized central securities depository.

Sec. 5. Mode of Delivery

- a. If the securities sold are certificated, delivery shall be effected physically to the purchaser, or to the purchaser's designated Bangko Sentral -accredited custodian. The certificate must be transferred to and registered under the name of the purchaser and properly recorded in the registry book.

¹ BIS-IOSCO, "Principles for Financial Market Infrastructure", p.8 (April 2012)

- b. Delivery of immobilized or dematerialized securities shall be effected by means of book entry transfer to the appropriate securities account of the following: (1) purchaser in a registry of said securities; (2) purchaser in an SEC authorized central securities depository; or (3) purchaser's designated Bangko Sentral accredited securities custodian. Book-entry transfer to a sub-account for clients under the primary account of the dealer will not be deemed compliant with this requirement.

Sec. 6 Client Information. Selling or dealing banks shall inform their clients of the requirements under Secs. 3 and 4 above, together with the complete list of all Bangko Sentral -accredited custodians or SEC authorized central securities depositories. The selling or dealing bank or NBFIs must inform their clients that the choice of securities custodian or central securities depository is the sole prerogative of the securities purchaser. The seller or dealer may, however, indicate to their clients their preferred custodian or central securities depositories.

Sec. 7. Custodianship/Securities Deposit Agreement. The securities owner/purchaser shall enter into a custodianship agreement with a Bangko Sentral -accredited securities custodian or a securities deposit agreement with an SEC authorized central securities depository of his choice. The Agreement shall contain the following minimum stipulations: a) Rights and obligations of the parties; b) Fees for the services offered by the custodian/depository; and c) Scope and term/period of the Agreement.

The securities purchasers/owners may, designate/appoint a representative or agent for the purpose of opening of the custodianship/securities deposit account and the execution of trade transactions (i.e., buying and selling instructions including relaying of instructions to the custodian/central securities depository to receive or deliver securities in order to consummate the buy/sell transactions).

Sec. 8. Compliance with the Anti-Money Laundering (AML) Act of 2001, as amended. Compliance with AML Act of 2001, as amended, by Bangko Sentral -accredited securities custodians/registries or SEC authorized central securities depositories shall be governed by AML rules and regulations issued by their supervising authorities, such as the Bangko Sentral or the SEC. For purposes of complying with the customer identification requirement, a Bangko Sentral -accredited securities custodian/registry or SEC authorized central securities depository may rely on the customer identification process undertaken by a third party pursuant to existing AML rules and regulations.

Notwithstanding the above, the custodian, registry or central securities depository is not precluded from conducting its own know-Your-Customer (KYC) activities and maintaining direct holding of the KYC information/documents of its clients.

TEMPLATE OF LETTER TO INVESTOR

Dear Investor:

We wish to inform you that the Bangko Sentral ng Pilipinas (BSP), in July of 2003 issued Circular No. 392, Series of 2003, which requires all securities sold by banks on a “without recourse basis” (i.e. the bank has no liability to the buyer of securities in paying the obligation due on the security) to be delivered to the buyer/purchaser of securities through any of the following means:

- a. If the security is evidenced by a certificate of indebtedness, the certificate must be transferred in the name of the purchaser/buyer and physically delivered to the purchaser/buyer or to his designated Bangko Sentral -accredited third party custodian.
- b. If the security is immobilized or dematerialized (i.e., that the security is not evidenced by a certificate of indebtedness and instead security account is created in the electronic books of the registry in the name of the purchaser/buyer or his designated custodian):
 - (1) The security must be delivered by book-entry transfer to the appropriate securities account of the buyer in the registry of said securities which must be evidenced by a confirmation in writing by the registrar to the buyer. The confirmation of sale or document of conveyance shall be physically delivered by the seller or dealer to the buyer, or
 - (2) The security must be delivered by book-entry transfer to the appropriate securities account of the Bangko Sentral-accredited third party custodian designated by the buyer/purchaser in the registry of said securities which must be evidenced by a confirmation in writing by the registrar to the said Bangko Sentral -accredited third party custodian, who shall in turn issue to the securities owner a delivery receipt acknowledging receipt of the securities.

Circular No. 392 is part of a package of reforms to support the development of the domestic capital market through enhanced investor protection and greater market transparency. It provides for a more defined role and responsibilities for the custodians and registrars and a stricter supervision and regulation thereof by the Bangko Sentral . It aims to provide the client with the following benefits:

- a. Full control and possession of the securities purchased;
- b. Independent validation of the existence of securities purchased;
- c. Regular reporting of securities holdings; and
- d. Capability to choose most competitive counter-parties in case of sale, pledge, transfer, and lending of securities.

Moreover, Circular No. 392, which amends CBP Circular 437-74, seeks to address the changes in the legal framework brought by the developments in the market, i.e., where purchase of securities may be evidenced not only by transfer of certificates but also by electronic book-entry transfer of ownership in the books of the registrar for said security.

As an investor, therefore, of securities which is dematerialized or scripless, you have the option to require your dealer/broker to deliver the securities to you by requiring them to have the securities registered directly in your name in the registry of said securities or by requiring them to have the securities registered in the name of the Bangko Sentral accredited third party custodian of your choice who in turn will credit your securities account with them.

The registry is a Bangko Sentral -accredited bank or non-bank financial institution (NBFI) designated or appointed by the Issuer to (1) maintain the securities registry book; (2) record the (a) issuance of the securities and (b) subsequent transfers of ownership thereof; and (3) issue registry confirmation to the buyers/holders of security.

The custodian, on the other hand, is a Bangko Sentral -accredited bank or NBFI designated by the investor to safekeep the security by allowing it to hold title to the security, either in a nominee or trustee capacity, to enable it to perform the following administrative functions/services related to investing in a security or various securities: i) Mark to market valuation of security that will enable the client to know the value of his investment at any period in time;

ii) compute and collect the interest due on the security; iii) render statements on outstanding securities under safekeeping; iv) represents the client (per its instruction) in the events of default or breach of contract of the issuer; and v) lend the security of the clients as “agent” that will enable the client to earn additional income on the security.

The registrars and custodians underwent a rigorous evaluation process by the Bangko Sentral to determine whether they have the following: i) adequate capital to cover for potential operating risks related to performing its custody functions; ii) competent management team to manage the company with responsibility and proper corporate ethics; iii) robust technology system to operate the custody business efficiently; and iv) favorable track record or significant experience in the custody business or related business. They will also undergo regular audit by the Bangko Sentral to ensure that they comply with Bangko Sentral rules and regulations and will be subject to penalties and administrative sanctions for any violation thereof.

As of date, Bangko Sentral has accredited the following registrars and custodians: Bank of the Philippine Islands, CITIBANK N.A., Deutsche Bank, Hongkong and Shanghai Banking Corporation, Philippine Depository and Trust Corporation, and Standard Chartered Bank.

The Registry of Scripless Securities (RoSS) operated by the Bureau of Treasury (BTR) which is acting as a registry for government securities, is automatically accredited as securities registry. However, the BTR, as registry, cannot act as custodian of government securities pursuant to the opinion of the Secretary of Justice rendered on 17 January 2005 due to irreconcilable conflict of loyalties that is anathema to agency if the same institution were to act as registrar and custodian at the same time.

The custodian shall render periodic reports on your account balances on a quarterly basis, or at such interval as you may require. Moreover, the custodian shall issue to you a confirmation of any transfer of ownership as it occurs, in either electronic or printed forms. Said reports shall be delivered/mailed directly at your address unless you give a written instruction directly to the custodian to deliver the said reports to your designated person/entity. You are, however, required to acknowledge in the written instruction that you are designating another person/entity to receive the periodic reports from the custodian, notwithstanding contrary advice of the Bangko Sentral

Please note that the abovementioned arrangements may change once the Bangko Sentral issues more detailed implementing rules and guidelines to the abovementioned circulars. We will update you if and when these developments occur.

Please fill up and sign the required documentation of your chosen custodian and we will forward the same to them so that your securities account can be opened as soon as possible. You may, however, designate/appoint an agent for this purpose. In either case, the custody arrangement may or may not entail additional fees.

If you have any further questions, please call us so that we can refer the matter to the appropriate custodian/registrar.

Very truly yours,

**DELIVERY OF GOVERNMENT SECURITIES TO THE INVESTOR'S PRINCIPAL
SECURITIES ACCOUNT WITH THE REGISTRY OF SCRIPLESS SECURITIES**
Appendix to Secs. 431, 242 on Delivery of Securities, and 245 on Delivery of Securities

The following are the guidelines on the delivery of government securities by the selling bank and/or NBFI under the supervision of the Bangko Sentral to an investor's Principal Securities Account with the Registry of Scripless Securities (RoSS) through the Client Interface System (CIS) facility as compliance with the requirement of effective delivery under Secs. 242 (*Delivery of Securities*), 245 (*Delivery of Securities*) and 431:

- a. Banks/NBFIs, acting either as accredited government securities eligible dealers (GSEDs) or licensed government securities dealers, shall execute the attached Memorandum of Agreement (MOA) with the BTr regarding the creation of the Principal Securities Account with the RoSS on or before 31 January 2007. The MOA between the BTr and the GSED is attached as Annex A.
- b. The dealing bank/NBFI shall provide BTr with the following documents:
 - (1) Agency Document issued by investor/client if the dealing bank/NBFI is designated as the agent; and
 - (2) Investor's Undertaking (attached as Annex B)
- c. No new Investors Principal Securities Account shall be created unless the foregoing documents are submitted to the BTr. Otherwise, the dealing bank/QB/NBFI will be subject to the appropriate penalties prescribed under Secs. 242 (*Delivery of Securities*), 245 (*Delivery of Securities*) and 431.

(Circular No. 873 dated 25 March 2015)

MEMORANDUM OF AGREEMENT

KNOW ALL MEN BY THESE PRESENTS:

This agreement made and entered into this _____ at _____, Philippines by and between:

The **BUREAU OF THE TREASURY**, a duly constituted government bureau under the Department of Finance, Republic of the Philippines, with principal office at Palacio del Gobernador Building, Gen. Luna corner A. Soriano Avenue, Intramuros, Manila, represented herein by the Treasurer of the Philippines, _____, and hereinafter referred to as "**BTr**";

- and -

_____ a domestic/international banking/financial institution organized and existing pursuant to the laws of the Republic of the Philippines/(*country of incorporation*), duly licensed by the Securities and Exchange Commission (SEC) to deal in securities, represented herein by _____ in her/his capacity as _____, and hereinafter referred to as the "**Dealer**";

(the "BTr" and the "Dealer" may be referred to as a "Party" in the singular tense, as "Parties" in the plural/collective tense)

WITNESSETH: THAT

WHEREAS, the Registry of Scripless Securities ("RoSS") is the official registry of government securities issued by the National Government through the Bureau of the Treasury;

WHEREAS, the RoSS is an electronic registry of recording ownership of or interest in and transfers of government securities;

WHEREAS, the delivery of government securities sold by the Dealer, on a without recourse basis, to the investor's Principal Securities Account with the RoSS through the Client Interface System ("CIS") Facility shall be sufficient compliance with the delivery requirement under Sec. 245 (Delivery of securities), of the Bangko Sentral ng Pilipinas ("BSP") Manual of Regulations for Banks (MORB) and Circular No. 524 dated 31 March 2006.

WHEREAS, the Dealer is a government securities eligible dealer, accredited by the BTr to participate in the primary auction of government securities pursuant to Finance Department Order No. 141-95, as amended, and/or a bank/financial institution licensed by the SEC to deal in government securities in the secondary market;

WHEREAS, investors of government securities purchase/trade the same in the secondary market through any of the dealers;

WHEREAS, recording of ownership of, or interest in government securities requires the creation/opening of a Principal Securities Account with the RoSS through the CIS Facility;

WHEREAS, to promote transparency, investor confidence and deepening of the government bond market, investors must be given adequate assistance in the opening/creation of his/its Principal Securities Account with the RoSS ("Name-on-Registry");

NOW, THEREFORE, in view of the foregoing premises and the mutual covenants hereinafter provided, the parties hereby agree as follows:

Section 1. Obligations of BTr

1. Receive instruction from the Dealer as authorized by the investor, through the RoSS-CIS for the creation/opening of the Principal Securities Account;
2. Create/open in the RoSS a Principal Securities Account for the requesting investor of scripless government securities through which all transactions affecting said securities will be recorded;

3. Provide and forward to the investor an electronic confirmation of his/its RoSS Principal Securities Account Number and notices and statements of account under any of the modes indicated in the Investor's Oath of Undertaking submitted to the BTr;
4. On relevant coupon/maturity payment dates and for payments made through the Bangko Sentral, instruct the Bangko Sentral to credit the regular demand deposit account (DDA) of the investor's settlement bank: *Provided*, That if the coupon/maturity payment date falls on a Saturday, Sunday, or Holiday or on a day during which business operations of the BTr is suspended, payment/s shall be made by the BTr on the next business day, without adjustment in the amount of interest to be paid;
5. Ensure that all government securities bought by investors from the Dealer are accurately recorded under the investor's Principal Securities Account, or to the Securities Custody Account of the investor's designated third-party custodian, or to the Securities Deposit Account of the investor's designated depository;
6. Furnish the investor with Statement(s) of Securities Account, at least quarterly and whenever there is a movement in the investor's Principal Securities Account, through the investor's preferred mode of receipt of notice and/or statement; and
7. Consistent with BTr Memoranda dated 28 December 2005, 12 January 2006 and 31 January 2006 and applicable Bangko Sentral regulations, disallow any increase in the holdings of beneficial owners of securities recorded in the sub-account of the Dealer, if any, existing as of 02 February 2006, for beneficial owners of securities who have either (a) declined in writing the delivery of his/its securities to a direct registry account under his or its name or a third-party custodian or (b) not responded to the Dealer's letter to the investor as regards the disposition of his/its securities. Any withdrawal or sale of the securities, either partial or total, under the sub-account of the Dealer for the beneficial owners may only be allowed if the Dealer is authorized in writing by the client/Investor. Such written authority shall be furnished by the Dealer to the BTr prior to the execution of the transaction.

Section. 2. Obligations of the Dealer

The Dealer shall:

1. Assist the investor to open his/its individual Principal Securities Account (Name-On-Registry) with the RoSS through the CIS facility;
2. Conduct the Know your Client ("KYC") screening of its investors/clients referred to the BTr for the creation of the Principal Securities Account (Name-On-Registry) with the RoSS. In this connection it shall: (a) issue a certification to the BTr that it has conducted the necessary "KYC" screening; (b) maintain client identification records; (c) report any suspicious transaction in accordance with the provisions of R.A. No. 9160, otherwise known as the "Anti-Money Laundering Act of 2001", as amended, and its implementing rules and regulations; and whenever necessary, (d) afford BTr unchallenged access to said KYC records/documents. The same KYC or customer identification documents shall likewise be made available to regulators for verification upon request;
3. Transmit the investor's instructions to the RoSS for the creation/opening of a Principal Securities Account. For this purpose, the Dealer shall submit and/or inform the investor to submit to the BTr his/her settlement account maintained in a settlement bank of his/her choice, through which all relevant payments on the securities will be made by the BTr;
4. Upon the creation of the investor's Principal Securities Account with the BTr's RoSS to which the securities subject of a sale will be credited, immediately furnish the investor with the BTr's electronic confirmation of its creation. The Dealer shall also provide to the investor the BTr electronic confirmation that includes a statement on the credited amount of securities;
5. Ensure that all the necessary documents executed by the client investor are complete and submitted to BTr upon request;
6. Ensure that all government securities sold to investors are delivered to their appropriate Principal Securities Account with the RoSS, or to the account of the investor's designated custodian or securities depository;
7. Undertake not to misuse the investor's RoSS Account No., which may come into its possession upon the creation of a Principal Securities Account for the investor or on previous transactions with the investor;
8. Acquaint/apprise investors on the rules and procedure prescribed by the BTr in connection with investment and trading of scripless government securities, including but not limited to coupon payment, redemption value/proceeds of the investor's securities, legal encumbrances, and other relevant information relative to investor's security holdings. As a minimum, investors must be apprised of the Revised RoSS Procedure on Buy and Sell of Securities and recording of

transfers through the RoSS-CIS facility found in the BTr website, with particular emphasis on the feature of non-tagging of securities to GSEDs, or non-exclusivity of the selling GSEDs for subsequent transactions;

9. Whenever designated as authorized agent and/or settlement bank, ensure confidentiality and prompt delivery of all notices and statements of securities account/s to investors; and
10. Ensure that all instructions transmitted to BTr concerning the securities account of clients-investors are legal, valid and duly authorized pursuant to an agreement or any written authority executed by the client-investor in favor of the dealer.

- A. Hereby agree to execute, necessary written authority in favor of either the dealing Government Securities Eligible Dealer¹ (GSED) (accredited by the Bureau of the Treasury) or Securities Dealer² (licensed by the Securities and Exchange Commission) for the creation of a Principal Securities Account with the RoSS or for the execution of trade transactions (i.e. buying and selling instructions, including relaying of instructions to "the CUSTODIAN" or "Central Securities Depository" to receive or deliver securities in order to consummate the buy/sell transactions) and to be bound by the provisions of a written authority or any relevant agreement I/we have entered into concerning my/our government security holdings, thereby confirming my/our authority for BTr-RoSS to carry out and execute the acts or instructions referred to in the aforesaid documents; and
- B. It is understood that the RoSS administered by the BTr is the official registry of ownership of or interest in government securities; that all government securities floated/originated by NG under its scripless policy are recorded in the RoSS as well as subsequent transfer of the same; and that I/we will abide by the rules and regulations of BTr-RoSS concerning government securities.

And further undertake as follows:

1. To create/open through the Client Interface System a Principal Securities Account with the RoSS to ensure that title of said scripless securities is officially recorded in my/our name and under my/our control.
2. That as a condition for the creation/opening of my/our Principal Securities Account with the RoSS, I/we have opened a bank account with (_____ as *Settlement Bank*) to which coupon and maturity proceeds and any other payments to be made on my/our government securities holdings will be credited; undertake to furnish the RoSS of said bank account number; and give notice at least three (3) business days prior to any coupon and/or maturity payment of any change in the Settlement Bank and/or bank account number.
3. That no transfer of securities shall be made: (i) during the period of two (2) business days ending on (and including) the due date of any redemption payment of principal; and (ii) during the period of two (2) business days ending on (and including) the due date of any coupon payment date (the "Closed Period"). I/We further acknowledge that the BTr shall prevent any transfer of the securities to be recorded in the RoSS during any Closed Period.
4. That in the case of outright sale transactions of government securities, including that of RTBs, I/we undertake to sell the same to any of the GSEDs or Securities Dealers, save those provided for under existing rules and regulations on government securities applicable to tax-exempt institutions, government-owned or controlled corporations and local government units. Otherwise, I/we shall have the said securities delivered to my/our agent/custodian for trading or any other transactions pursuant to a relevant written instruction/authority.
5. To receive notices and/or statements of account on a quarterly basis or whenever there is a movement in my Principal Securities Account from the RoSS through any of the following modes: *(Please indicate choice)*

¹ Accredited by the Bureau of the Treasury² Licensed by the Securities and Exchange Commission

- ☐ Pick-up at the RoSS
- ☐ Registered Mail to Home/Office Address _____
- ☐ Deliver electronically to Agent
- ☐ Deliver electronically to Settlement Bank (for pick up)
- ☐ Email - email address _____

In the absence of an indicated choice, I/we understand that the BTr shall electronically deliver all Notices and Statements to my/our designated settlement bank.

Note: In addition to the indicated manner of receiving notice(s) and statement(s), Investor can directly secure from the BTr written copy of any notice, statement of account, or confirmation report, subject to prior notice to and in accordance with the procedures of the BTr.

I/We hereby agree to abide with the Schedule of Fees and the manner of collection, as may be prescribed by the BTr from time to time.

6. That I/we expressly agree and acknowledge that the crediting to the regular DDA of my/our settlement bank of coupons and/or redemption value due my/our scripless securities, shall constitute actual receipt of payment by me/us.
7. To hold the BTr, its officers, employees and agents free and harmless against all suits, actions, damages or claims arising from failure of my/our Settlement Bank to credit my/our bank account for coupons and maturity values on due date.
8. That all instructions affecting my/our scripless securities which are transmitted to or received in good faith the RoSS from myself/ourselves or my/our designated agent/custodian are covered by relevant documentation indicating my/our express consent and authority.
9. That I/we expressly warrant and authorize the delivery of copies of all evidence of authority granted to my/our designated agent/custodian to transact on my/our scripless securities upon reasonable demand by BTr.
10. That I/we undertake to immediately notify the RoSS of any unauthorized trade of my/our scripless securities, and until receipt of such notice, transactions effected by BTr in good faith are deemed valid.
11. To render free and harmless the BTr, its officers, employees and agents for any claim or damages with respect to trade instructions carried out in good faith.
12. That while it is understood that BTr shall maintain the strict confidentiality of records in the RoSS, I/we hereby expressly waive and authorize BTr, to the extent allowed by law, to disclose relevant information in compliance with Anti-Money Laundering laws, rules and regulations.
13. To submit to the BTr the relevant authorizations issued to my/our agent, upon demand of BTr.

IN WITNESS WHEREOF, I/We hereunto affix our hands this _____ day of _____ at _____, Philippines.

PROMPT CORRECTIVE ACTION FRAMEWORK (Appendix to Sec. 003)

In carrying out its primary objective of maintaining price stability conducive to a balanced and sustainable growth of the economy¹, the Bangko Sentral must necessarily maintain stability of the financial system through preservation of confidence therein. While preservation of confidence in the financial system may call for closure of mismanaged banks and/or financial entities under its jurisdiction, such closure is not the only option available to the Bangko Sentral. When a bank's closure, for instance, is adjudged by the Monetary Board to have adverse systemic consequences, the State may act in accordance with law to avert potential financial system instability or economic disruption.²

It is recognized that the closure of a bank or its intervention can be a costly and painful exercise. For this reason, the Bangko Sentral, as supervisor, can enforce PCA³ as soon as a bank's condition indicates higher-than normal risk of failure.

PCA essentially involves the Bangko Sentral directing the board of directors of a bank, prior to an open outbreak of crisis, to institute strong measures to restore the entity to normal operating condition within a reasonable period, ideally within one (1) year. These measures may include any or all of the following components:

- (1) Implementation of a capital restoration plan;
- (2) Implementation of a business improvement plan; and
- (3) Implementation of corporate governance reforms.

Capital restoration plan - this component contains the schedule for building up a bank's capital base (primarily through an increase in Tier 1 capital) to a level commensurate to the underlying risk exposure and in full compliance with minimum capital adequacy requirement. In conjunction with this plan, the Bangko Sentral may also require any one (1), or a combination of the following:

1. Limit or curtail dividend payments to common stockholders;
2. Limit or curtail dividend payments to preferred stockholders; and
3. Limit or curtail fees and/or other payments to related parties.

Business improvement plan - this component contains the set of actions to be taken immediately to bring about an improvement in the entity's operating condition, including but not limited to any one (1), or a combination of the following:

1. Reduce risk exposures to manageable levels;
2. Strengthen risk management;
3. Curtail or limit the bank's scope of operations including those of its subsidiaries or affiliates where it exercises control;
4. Change or replace management officials;
5. Reduce expenses; and
6. Other measures to improve the quality of earnings.

Corporate governance reforms - this component contains the actions to be immediately taken to improve the composition and/or independence of the board of directors and to enhance the quality of its oversight over the management and operation of the entity. This also includes measures to minimize potential shareholder conflicts of interest detrimental to its creditors, particularly, depositors in a bank. This likewise lays down measures to provide an acceptable level of financial transparency to all stakeholders. Such actions could include, but are not limited to, any one (1), or a combination of the following:

1. A change in the composition of the board of directors or any of the mandatory committees (under the MORB);
2. An enhancement to the frequency and/or depth of reporting to the board of directors;
3. A reduction in exposures to and/or a termination or reduction of business relationships with affiliates that pose excessive risk or are inherently disadvantageous to the supervised financial institution; and
4. A change of external auditor.

¹ Section 3 of Republic Act No. 7653

² Section 17 and 18 of Republic Act No. 3591, as amended

³ Section 4.6 of Republic Act No. 8791

A bank may be subject to PCA whenever any or all of the following conditions obtain:

- (1) When either of the Total Capital Adequacy Ratio (CAR) or Tier 1 Capital Ratio as defined under Secs. 125 and 127 or Leverage Ratio⁴ falls below ten percent (10%), seven and a half percent (7.5%)⁵ and five percent (5%), respectively, or such other minimum levels that may be prescribed for the said ratios under relevant regulations, and/or the combined capital account falls below the minimum capital requirement prescribed under Sec. 121;
- (2) When either of the Total Risk-Based Ratio⁶, Tier 1 Risk-Based Ratio, or Leverage Ratio⁷ falls below ten percent (10%), six percent (6%) and five percent (5%), respectively, or such other minimum levels that may be prescribed for the said ratios under relevant regulations, and/or the combined capital account falls below the minimum capital requirement prescribed under Sec. 121;
- (3) The CAMELS composite rating is less than “3” or a Management component rating of less than “3”;
- (4) A serious supervisory concern has been identified that places a bank at more- than-normal risk of failure in the opinion of the director of the Examination Department concerned, which opinion is confirmed by the Monetary Board. Such concerns could include, but are not limited to, any one (1) or a combination of the following:
 - a. Finding of unsafe and unsound activities that could adversely affect the interest of depositors and/or creditors;
 - b. A finding of repeat violations of law or the continuing failure to comply with Monetary Board Directives; and
 - c. Significant reporting errors that materially misrepresent the bank’s financial condition.

The initiation of PCA shall be recommended by the Deputy Governor, appropriate supervising department of the Bangko Sentral to the Monetary Board for approval. Any initiation of PCA shall be reported to the PDIC for notation. Upon PCA initiation, the Bangko Sentral shall require the bank to enter into a MOU committing to the PCA plan. The MOU shall be subject to approval by the Deputy Governor, appropriate supervising department of the Bangko Sentral and confirmation by the Monetary Board.

In order to monitor compliance with the PCA, quarterly progress reports shall be made. The Bangko Sentral reserves the right to conduct periodic on-site visits outside of regular examination to validate compliance with the PCA plan.

Subject to Monetary Board approval, sanctions may be imposed on any bank subject to PCA whenever there is unreasonable delay in entering into a PCA plan or when PCA is not being complied with. These may include any or all of the following:

- (1) monetary penalty on or curtailment or suspension of privileges enjoyed by the board of directors or responsible officers;
- (2) restriction on existing activities that the supervised financial institution may undertake;
- (3) denial of application for branching and other special authorities;
- (4) denial or restriction of access to Bangko Sentral credit facilities; and
- (5) restriction on declaration of dividends.

On the other hand, if the bank subject to PCA promptly implements a PCA plan and substantially complies with its conditions, it may continue to have access to Bangko Sentral credit facilities notwithstanding non-compliance with standard conditions of access to such facilities. The Deputy Governor, appropriate supervising department of the Bangko Sentral shall recommend such exemption to the Monetary Board for approval.

In cases where a bank’s problems are deemed to be exceptionally serious from the outset, or when a bank is unwilling to submit to the PCA or unable to substantially comply with an agreed PCA plan, the Deputy Governor, appropriate supervising department of the Bangko Sentral may immediately recommend to the Monetary Board more drastic actions as prescribed under Section 29 (conservatorship) and Section 30 (receivership) of R.A. No. 7653.

Subject to Monetary Board approval, the PCA status of a bank may be lifted: *Provided*, That the bank fully complies with the terms and conditions of its MOU and: *Provided*, further, That the Deputy Governor, appropriate supervising department of the Bangko Sentral has determined that the financial and operating condition of the bank no longer presents a risk to itself or the financial system. Such improved assessment shall be immediately reported to the PDIC.

(Circular Nos. 1084 dated 29 April 2020 and 1079 dated 09 March 2020)

⁴ For universal and commercial banks and their subsidiary banks and quasi-banks, this refers to the Basel III Leverage Ratio. For stand-alone TBs, RBs and Coop Banks, this is derived as Total Capital /Total Assets.

⁵ This shall take effect on 01 January 2023 for stand-alone thrift, rural, and cooperative banks. Pending effectivity of the new risk-based capital adequacy ratio framework for stand-alone thrift, rural and cooperative banks, the covered banks shall refer to the existing six percent (6%) as the minimum threshold for Tier 1 capital.

⁶ Otherwise known as Capital Adequacy Ratio (“CAR”)

⁷ Total Capital /Total Assets

GUIDELINES ON SUPERVISION BY RISK

(Appendix to Sec. 141)

I. Background

It must be recognized that banking is a business of taking risks in order to earn profits. While banking risks historically have been concentrated in traditional banking activities, the financial services industry has evolved in response to market-driven, technological, and legislative changes. These changes have allowed FIs to expand product offerings, geographic diversity, and delivery systems. They have also increased the complexity of the FI's consolidated risk exposure. Because of this complexity, FIs must evaluate, control, and manage risk according to its significance. The FI's evaluation of risk must take into account how non-bank activities within a banking organization affect the FI. Consolidated risk assessments should be a fundamental part of managing the FI. Large FIs assume varied and complex risks that warrant a risk-oriented supervisory approach.

II. Statement of policy

The existence of risk is not necessarily a reason for concern. Likewise, the existence of high risk in any area is not necessarily a concern, so long as management exhibits the ability to effectively manage that level of risk. Under this approach, the Bangko Sentral will not necessarily attempt to restrict risk-taking but rather ensure that FIs identify, understand, and control the risks they assume. As an organization grows more diverse and complex, the FI's risk management processes must keep pace. When risk is not properly managed, Bangko Sentral will direct FI management to take corrective action such as reducing exposures, increasing capital, strengthening risk management processes or a combination of these actions. In all cases, the primary concern of the Bangko Sentral is that the FI operates in a safe and sound manner and maintains capital commensurate with its risks. Further guidance on risk management issues will be addressed in subsequent issuances that are part of the overall risk assessment program.

III. Guidelines for risk management

For purposes of the discussion of risk, the Bangko Sentral will evaluate banking risk relative to its impact on capital and earnings. From a supervisory perspective, risk is the potential that events, expected or unanticipated, may have an adverse impact on the FI's capital or earnings.

The Bangko Sentral-appropriate supervising department of the Bangko Sentral has defined eight (8) categories of risk for FI supervision purposes. These risks are: credit, market, interest rate, liquidity, operational, compliance, strategic, and reputation. These categories are not mutually exclusive; any product or service may expose the FI to multiple risks. In addition, they can be interdependent. Increased risk in one (1) category can increase risk in other categories.

Types and definitions of risk

1. *Credit risk* arises from a counterparty's failure to meet the terms of any contract with the FI or otherwise perform as agreed. Credit risk is found in all activities where success depends on counterparty, issuer, or borrower performance. It arises any time FI funds are extended, committed, invested, or otherwise exposed through actual or implied contractual agreements, whether reflected on or off the balance sheet. Credit risk is not limited to the loan portfolio.
2. *Market risk* is the risk to earnings or capital arising from adverse movements in factors that affect the market value of both on and off-balance sheet instruments, products, and transactions in an institution's overall portfolio. Market risk arises from market-making, dealing, or position-taking in instruments, structure or strategies the income from which are sensitive to movements in interest rate, foreign exchange rates, credit spreads and equities and commodities prices.
3. Interest rate risk in the banking book (IRRBB) is the current and prospective risk to earnings and capital arising from adverse movements in interest rates that affect banking book positions. IRRBB has three sub-types that relate to the level and structural characteristics of interest rates: (a) *gap risk* which arises from the term structure of banking book instruments, and describes the risk arising from the differences in timing of instruments' rate changes; (b) *basis risk* that describes the impact of relative changes in interest rates for financial instruments that have similar re-pricing tenors but are priced using different interest rate indices; and (c) *option risk* which arises from option positions or from options embedded in a bank's assets, liabilities and/or off-balance sheet items that alter the level and timing of their cash flows.
4. *Liquidity risk* is generally defined as the current and prospective risk to earnings or capital arising from an FI's inability to meet its obligations when they become due without incurring unacceptable losses or costs. Liquidity risk includes the inability to manage unplanned decreases or changes in funding sources.

5. *Operational risk* is the current and prospective risk to earnings or capital arising from fraud, error, and the inability to deliver products or services, maintain a competitive position, and manage information. Risk is inherent in efforts to gain strategic advantage, and in the failure to keep pace with changes in the financial services marketplace. Operational risk is evident in each product and service offered. Operational risk encompasses: product development and delivery, operational processing, systems development, computing systems, complexity of products and services, and the internal control environment.
6. *Compliance risk* is the current and prospective risk to earnings or capital arising from violations of, or non-conformance with, laws, rules, regulations, prescribed practices, internal policies and procedures, or ethical standards. Compliance risk also arises in situations where the laws or rules governing certain FI products or activities of the FI's clients may be ambiguous or untested. This risk exposes the FI to fines, payment of damages, and the voiding of contracts. Compliance risk can lead to diminished reputation, reduced franchise value, limited business opportunities, reduced expansion potential, and lack of contract enforceability.
7. *Strategic risk* is the current and prospective impact on earnings or capital arising from adverse business decisions, improper implementation of decisions, or lack of responsiveness to industry changes. This risk is a function of the compatibility of an organization's strategic goals, the business strategies developed to achieve those goals, the resources deployed against these goals, and the quality of implementation. The resources needed to carry out business strategies are both tangible and intangible. They include communication channels, operating systems, delivery networks, and managerial capacities and capabilities. The organization's internal characteristics must be evaluated against the impact of economic, technological, competitive, regulatory, and other environmental changes.
8. *Reputation risk* is the current and prospective impact on earnings or capital arising from negative public opinion. This affects the FI's ability to establish new relationships or services or continue servicing existing relationships. This risk may expose the FI to litigation, financial loss, or a decline in its customer base. In extreme cases, FIs that lose their reputation may suffer a run on deposits. Reputation risk exposure is present throughout the organization and requires the responsibility to exercise an abundance of caution in dealing with customers and the community.

IV. FI management of risk

Because market conditions and company structures vary, there is no single risk management system that works for all FIs. Each FI should tailor its risk management program to its needs and circumstances. Sound risk management systems, however, have several things in common; for example, they are independent of risk-taking activities. Regardless of the risk management program's design, each program should:

1. *Identify risk*: To properly identify risks, an FI must recognize and understand existing risks or risks that may arise from new business initiatives, including risks that originate in non-bank subsidiaries and affiliates. Risk identification should be a continuing process, and should occur at both the transaction and portfolio level.
2. *Measure risk*: Accurate and timely measurement of risk is essential to effective risk management systems. An FI that does not have a risk measurement system has limited ability to control or monitor risk levels. Further, the more complex the risk, the more sophisticated should be the tools that measure it. An FI should periodically conduct tests to make sure that the measurement tools it uses are accurate. Good risk measurement systems assess the risks of both individual transactions and portfolios. During the transition process in FI mergers and consolidations, the effectiveness of risk measurement tools is often impaired because of the technological incompatibility of the merging systems or other problems of integration. Therefore, the resulting FI must make a strong effort to ensure that risks are appropriately measured across the consolidated entity. Larger, more complex FIs must assess the impact of increased transaction volume across all risk categories.
3. *Monitor risk*: FIs should monitor risk levels to ensure timely review of risk positions and exceptions. Monitoring reports should be frequent, timely, accurate, and informative and should be distributed to appropriate individuals to ensure action, when needed. For large, complex FIs, monitoring is essential to ensure that management's decisions are implemented for all geographies, products, and legal entities.
4. *Control risk*: The FI should establish and communicate risk limits through policies, standards, and procedures that define responsibility and authority. These control limits should be valid tools that management should be able to adjust when conditions or risk tolerances change. The FI should have a process to authorize exceptions or changes to risk limits when warranted. In merging or consolidating FIs, the transition should be tightly controlled; business plans, lines of authority, and accountability should be clear. Large, diversified FIs should have strong risk controls covering all geographies, products, and legal entities.

The Board must establish the FI's strategic direction and risk tolerances. In carrying out these responsibilities, the Board should approve policies that set operational standards and risk limits. Well- designed monitoring systems will allow the Board to hold management accountable for operating within established tolerances. Capable management and appropriate staffing are also essential to effective risk management. FI management is responsible for the implementation, integrity, and maintenance of risk management systems. Management also must keep the directors adequately informed. Management must:

- a. Implement the FI's strategy;
- b. Develop policies that define the FI's risk tolerance and ensure that they are compatible with strategic goals;
- c. Ensure that strategic direction and risk tolerances are effectively communicated and adhered to throughout the organization;
- d. Oversee the development and maintenance of management information systems to ensure that information is timely, accurate, and pertinent.

V. Assessment of risk management

When assessing risk management systems, the Bangko Sentral will consider the FI's policies, processes, personnel, and control systems. Significant deficiencies in any one of these areas will cause the Bangko Sentral to expect the FI to compensate for these deficiencies in their overall risk management process.

1. *Policies* are statements of the FI's commitment to pursue certain results. Policies often set standards (on risk tolerances, for example) and recommend courses of action. Policies should express an FI's underlying mission, values, and principles. A policy review should always be triggered when an FI's activities or risk tolerances change.
2. *Processes* are the procedures, programs, and practices that impose order on the FI's pursuit of its objectives. Processes define how daily activities are carried out. Effective processes are consistent with the underlying policies, are efficient, and are governed by checks and balances.
3. *Personnel* are the staff and managers that execute or oversee processes. Good staff and managers perform as expected, are qualified, and competent. They understand the FI's mission, values, policies, and processes. Compensation programs should be designed to attract, develop, and retain qualified personnel. In addition, compensation should be structured to reward contributions to effective risk management.
4. *Control systems* include the tools and information systems (e.g, internal/ external audit programs) that FI managers use to measure performance, make decisions about risk, and assess the effectiveness of processes. Feedback should be timely, accurate, and pertinent.

VI. Supervision by Risk

Using the core assessment standards of the Bangko Sentral as guide, an examiner will obtain both a current and prospective view of an FI's risk profile. When appropriate, this profile will incorporate potential material risks to the FI from non-bank affiliates' activities conducted by the FI. Subsidiaries and branches of foreign FIs should maintain sufficient documentation onsite to support the analysis of their risk management. This risk assessment drives supervisory strategies and activities. It also facilitates discussions with FI management and directors and helps to ensure more efficient examinations. The core assessment complements the RAS. Examiners document their conclusions regarding the quantity of risk, the quality of risk management, the level of supervisory concern (measured as aggregate risk), and the direction of risk using the RAS. Together, the core assessment and RAS give the appropriate supervising department of the Bangko Sentral the means to assess existing and emerging risks in FIs, regardless of size or complexity.

Specifically, supervision by risk allocates greater resources to areas with higher risks. The appropriate supervising department of the Bangko Sentral will accomplish this by:

1. Identifying risks using common definitions. The categories of risk, as they are defined, are the foundation for supervisory activities.
2. Measuring risks using common methods of evaluation. Risk cannot always be quantified in pesos. For example, numerous internal control deficiencies may indicate excessive operational risk.
3. Evaluating risk management to determine whether FI systems and processes permit management to manage and control existing and prospective levels of risk.

The appropriate supervising department of the Bangko Sentral will discuss preliminary conclusions regarding risks with FI management. Following these discussions, the appropriate supervising department of the Bangko Sentral will adjust conclusions when appropriate. Once the risks have been clearly identified and communicated, the appropriate supervising department of the Bangko Sentral can then focus supervisory efforts on the areas of greater risk within the FI, the consolidated banking organization, and the banking system.

To fully implement supervision by risk, the appropriate supervising department of the Bangko Sentral will also assign CAMELS ratings to the lead FI and all affiliated FIs. It may determine that risks in individual FIs are increased, reduced, or mitigated in light of the consolidated risk profile of the FI as a whole. To perform a consolidated analysis, it will obtain pertinent information from FIs and affiliates, and verify transactions flowing between FIs and affiliates.

(Circular Nos. 1044 dated 6 August 2019 and 981 dated 3 November 2017)

GUIDELINES ON MARKET RISK MANAGEMENT
(Appendix to Sec. 144)

(Deleted by Circular No. 1044 dated 6 August 2019)

GUIDELINES ON LIQUIDITY RISK MANAGEMENT

[Appendix to Sec. 145]

I. GENERAL PRINCIPLES

Liquidity risk management practices should ensure that a bank is able to maintain a level of liquidity sufficient to readily meet both expected and unexpected cash flows and collateral needs without adversely affecting daily operations and the financial condition of the institution. The management of cash flows should duly consider a bank's funding capacity for both short- and long-term time horizons, including intraday, and the currencies in which it has significant activities or exposures. Systems and controls should be in place to oversee and manage liquidity positions on an intragroup basis, including those arising from cross-border transactions, taking into consideration the differing liquidity risk profiles of each entity and the transferability of funds within the group, among other relevant factors. Funds management practices shall ensure that liquidity is not consistently maintained at a high cost, from concentrated sources, or through undue reliance on funding sources that may not be available in times of financial stress or adverse changes in market conditions. Lastly, a bank should ensure that it is able to withstand a series of stress events with varying severities under different time horizons.

The requirements for sound liquidity risk management that are set forth in these guidelines shall apply to all banks. In addition, all banks are expected to comply with the minimum prudential liquidity requirements set out under existing regulations.

II. DEFINITIONS

1. *Liquidity risk* is generally defined as the current and prospective risk to earnings or capital arising from a bank's inability to meet its obligations when they come due without incurring unacceptable losses or costs. Liquidity risk includes the inability to manage unplanned decreases or changes in funding sources.
2. *Funding liquidity risk* is the risk that a bank will not be able to meet efficiently both expected and unexpected current and future cash flow and collateral needs without affecting either daily operations or the financial condition of the bank. It also refers to the inability to meet investment and funding requirements arising from cash flow mismatches without incurring unacceptable losses or costs. This is synonymous to the general definition of liquidity risk.
3. *Market liquidity risk* is the risk that a bank cannot easily offset or eliminate a position at the market price because of inadequate market depth or market disruption. The size of the bid/ask spread of instruments in a market provides a general indication of its depth, hence its liquidity, under normal circumstances. Market liquidity risk is also associated with the probability that large transactions may have a significant effect on market prices in markets that lack sufficient depth.
4. *Intraday liquidity* refers to funds which can be accessed during the business day, usually to enable banks to make payments in real time.
5. *Intraday liquidity risk* is the risk that a bank fails to manage its intraday liquidity effectively, which could leave it unable to meet a payment obligation at the time expected, thereby affecting its own liquidity position and that of other parties.
6. *Intragroup transactions/activities* are transactions between the bank and its parent, subsidiaries, affiliates, and related parties¹ that involve or could cause movement or transfer of funds.

III. LIQUIDITY RISK MANAGEMENT PROCESS

The management of liquidity risk shall form part of the overall risk management framework. At a minimum, the process should:

1. *Identify liquidity risk.* Proper identification of liquidity risk requires that management understands both existing and prospective risks from products and activities. It involves determining the volume and trend of liquidity needs and the sources of liquidity available to meet these needs. Liquidity risk identification should be a continuing process and should occur at the transaction, portfolio, entity and group levels.
2. *Measure liquidity risk.* Adequate measurement systems enable banks to quantify liquidity risk exposures on a per entity basis and across the consolidated organization. A relatively large organization with an extensive scope of operations would generally require more robust risk measurement tools and management information system to properly measure risk in a timely and comprehensive manner.

¹ Related parties are defined in item "(n)" of Sec. 131.

3. *Control liquidity risk.* The control of liquidity risk necessitates the establishment of policies and standards on acceptable product types, activities, and counterparties, and set risk limits on a transactional, portfolio and aggregate/consolidated basis. Lines of authority and accountability should be clearly defined to ensure that liquidity risk exposures remain reasonable and within the risk tolerance expressed by the board.
4. *Monitor liquidity risk.* Monitoring liquidity risk requires timely reviews of liquidity risk positions, including intraday positions. Monitoring reports should be comprehensive, timely, and accurate in order to provide sufficient basis for sound business decisions.

IV. LIQUIDITY RISK MANAGEMENT FRAMEWORK

A sound liquidity risk management system should cover the following basic elements:

- Active board and senior management oversight;
- Adequate risk management policies and procedures;
- Appropriate risk measurement methodologies, limits structure, monitoring, and management information system; and
- Comprehensive internal controls and independent audits.

Following the proportionality principle, banks with simple operations may generally employ basic practices while larger and/or complex institutions are expected to adopt more sophisticated risk management frameworks. Large organizations shall take a comprehensive perspective to measuring and controlling risk by understanding how subsidiaries and affiliates can magnify or reduce the consolidated liquidity risk profile.

A. *Board and Senior Management Oversight*¹

The board and senior management should have an adequate understanding of how the liquidity risk profile is affected by other risks such as credit, market, operational and reputational risks.

Responsibilities of the Board of Directors

The board is ultimately responsible for the liquidity risk assumed by the bank and the processes used to manage it. The board of directors shall:

1. Establish the bank's tolerance for liquidity risk in a way that:
 - a. Defines clearly the level of unmitigated liquidity risk that the bank is willing to assume under normal and stressed conditions in varying time periods, including intraday, given its business model, financial condition, and funding capacity. The risk tolerance level should also be appropriate for the bank's role in the financial system. Banks that carry out important market functions or an activity that covers a key segment of the financial system are generally expected to factor in an additional measure of prudence in setting their risk tolerance level;
 - b. Can be easily communicated and understood by personnel involved in the liquidity risk management process; and
 - c. Reflects the bank's evaluation of the sources of liquidity risks and the trade-off between risks and profits.

The risk tolerance level should be adequately documented, preferably with a combination of qualitative provisions in the form of a policy statement, and quantitative expressions (e.g., the specification of a minimum survival period under a range of severe but plausible stress scenarios, or the setting of limits on liquidity metrics used by the bank for controlling different aspects of liquidity risk). Lastly, the risk tolerance should be regularly reviewed in light of any significant changes in market conditions or the validity of assumptions used.

2. Approve the bank's funding strategy.
3. Ensure coherence of the measures used to contain liquidity risk within the stated tolerance level. Banks should note that the mere setting of metrics and limits for managing different aspects of liquidity risk alone does not in itself constitute a sufficient articulation of the overall liquidity risk tolerance.
4. Maintain an appropriate structure for day-to-day funds management and the management of liquidity risk of the bank and its subsidiaries, whenever applicable. The structure should enable the availability of liquidity and the monitoring of liquidity risks across the banking group and at each entity on an on-going basis.

¹ This Section refers to a management structure composed of a board of directors and senior management. The Bangko Sentral is aware that there may be differences in some financial institutions as regards the organizational framework and functions of the board of directors and senior management. For instance, branches of foreign banks have board of directors located outside of the Philippines and are overseeing multiple branches in various countries. In this case, "board-equivalent" committees are appointed. Owing to these differences, the notions of the board of directors and the senior management are used in these guidelines not to identify legal constructs but rather to label two decision-making functions within a financial institution.

The management of liquidity risk generally requires collaboration among the various business areas that impact the bank's liquidity risk profile. These business units are usually represented in a senior management-level committee, commonly known as the Asset and Liability Committee (or ALCO), whose authority over asset and liability management (ALM) emanates from the board. Meanwhile, day-to-day funds management is executed by the ALM desk which is typically under a bank's treasury department.¹

A simple bank's² organizational structure may differ from that described above. Nonetheless, the board should identify committees/units within the organization that are responsible for effectively performing the ALM and daily funds management functions.

To ensure the proper management of liquidity risk, the board shall designate an independent unit responsible for measuring, monitoring and controlling liquidity risk. Said unit should directly report to the board of directors or a committee thereof.

5. Ensure that the bank has competent senior personnel and appropriate resources in terms of expertise and systems to enable the identification, measurement, monitoring and control of liquidity risk.
6. Monitor the bank's performance and overall liquidity risk profile in a timely manner by requiring regular reports. These reports should, at a minimum, contain the liquidity position of the bank along with information related to compliance with established risk limits, and on new or emerging liquidity risks.
7. Mandate and track the resolution of breaches in risk limits and actions taken on deviations from policies and procedures.

Responsibilities of Senior Management

Senior management is responsible for effectively executing liquidity strategies and for operating within the liquidity risk tolerance level set by the board. Thus, the senior management shall:

1. Develop and implement a set of liquidity risk policies and procedures that translates the board's goals and objectives into operating standards, and ensure that this is transmitted to and well understood by personnel.
2. Develop a funding strategy that provides for the effective diversification of assets, funding sources and maturities, taking into account market conditions and the bank's ability to access funds from different sources. A bank should diversify available funding sources in the short-, medium- and long-term. Diversification targets should be part of the medium- to long-term funding plans and aligned with the budgeting and business planning process. The funding strategy should be formally documented and regularly reviewed in light of any changes in the market environment or key assumptions. The factors that complex banks may consider in designing the strategy are set out in Annex A (Factors to Consider in Developing a Funding Strategy).
3. Appropriately incorporate liquidity costs, benefits and risks in the internal pricing, performance measurement and new product approval processes for all significant activities (both on- and off-balance sheet), thereby aligning the risk-taking incentives of individual business lines with the liquidity risk tolerance set by the board.
4. Ensure that all business units conducting activities that have an impact on the liquidity profile are fully aware of the bank's funding strategies, and operate in accordance with approved policies, procedures, limits and controls.
5. Adhere to the lines of authority and responsibility that the board has established for managing overall liquidity risk, and ensure that the units responsible for managing liquidity risk have sufficient authority and independence from risk taking units to enable them to discharge their functions effectively.
6. Oversee the implementation and maintenance of management information and other systems that are used to identify, measure, monitor, and control the bank's liquidity risk.
7. Closely monitor current trends and potential market developments that may present significant challenges for managing liquidity risk. These developments and trends shall include emerging issues, such as increasing funding costs or concentrations, the growing size of the funding gap, the drying up of alternative liquidity sources, material and/or persistent breaches of limits, a significant decline in the internal liquidity buffer, or changes in external market conditions that signal difficulties in the future.
8. Inform the board of any new and emerging liquidity concerns in a timely manner.

¹ With this structure, the ALM desk would be the unit responsible for ensuring the capability of the bank to monetize any high-quality liquidity asset (HQLA) in accordance with Part III Item "(9) (b)" of the Liquidity Coverage Ratio Framework (LCR) in *Appendix 72*.

² The classification of banks as simple or complex is set out in item "(c)" of Sec. 131

B. Risk Management Policies and Procedures

A bank's liquidity risk policies and procedures shall be comprehensive, clearly defined, documented and duly approved by the board of directors. Policies and procedures covering the bank's liquidity risk management system shall provide appropriate guidance to relevant personnel. These policies should be applied on a consolidated basis and, as appropriate, at the level of individual financial subsidiaries, recognizing legal distinctions and possible obstacles to cash movements within the banking group.

The details of the policies and procedures shall take into account the bank's liquidity needs under normal and stressed conditions. These should cover, at a minimum, the following key aspects:

1. The liquidity risk tolerance, as determined by the board;
2. The general approach to funds management, and the liquidity risk management policies on particular aspects, such as:
 - a. The composition and maturity of assets and liabilities;
 - b. The diversity and stability of funding sources;
 - c. The approach to managing liquidity in different currencies and across business lines;
 - d. The approach to intraday liquidity management; and
 - e. The assumptions on the liquidity and marketability of assets.¹
3. Lines of authority, roles and responsibilities, and the reporting structure for liquidity risk management;
4. Tools for measuring, monitoring, controlling, and reporting liquidity risk, including:
 - a. The setting of various liquidity limits and ratios;
 - b. The framework for conducting cash-flow analysis under normal and stress scenarios, including the techniques and behavioural assumptions used; and
 - c. The management reporting system for liquidity risk.
5. The contingency funding plan, which describes the approach and strategies for dealing with various types of liquidity crises.

The policies should be periodically reviewed to ensure that these remain consistent with the level and complexity of the bank's operations as well as current circumstances. The policies should be regularly updated to incorporate the effects of new products/activities², or changes in funding strategies or corporate structure.

C. Risk Measurement Methodologies, Limits Structure, Monitoring, and Management Information System (MIS)

Liquidity Metrics or Measurement Tools

Liquidity management entails the on-going measurement of intraday to long-term liquidity positions. Banks shall be guided by the following:

1. Banks shall employ a range of customized metrics or tools, against which internal limits may be set for measuring, monitoring and controlling liquidity risk.
2. Measurement tools should be comprehensive and forward-looking. A comprehensive risk measurement process entails an analysis of cash flows and liquidity implications arising from all material assets, liabilities, off-balance sheet positions and other activities. This also includes the monitoring of liquidity positions in currencies in which banks have significant activity. A currency is considered significant if the aggregate liabilities denominated in that currency amount to five percent (5%) or more of total liabilities. On the other hand, a forward-looking process requires the identification of potential funding gaps, apart from current liquidity shortfalls.
3. The bank's set of metrics or tools shall be commensurate with its size, complexity, and liquidity risk profile. This set of tools should be able to measure the day-to-day liquidity position, structural liquidity mismatches, as well as vulnerabilities under stressed conditions. Some of the liquidity metrics that a bank may use are as follows:
 - a. Cash flow projections from assets, liabilities and off-balance sheet items over an appropriate set of time horizons. Cash flow projections can be used for monitoring intraday liquidity requirements, day-to-day liquidity needs and funding capacity over short to medium term horizons, longer term liquidity needs, and vulnerabilities to events, activities or strategies that can put a significant strain on the bank's capacity to generate liquidity;

¹ A related discussion on asset and market liquidity characteristics may be found in Part III Item "5" of LCR Framework in *Appendix 72*.

² Item "(i)" of Sec. 611 of the sets out the expectations on the risk management for new products.

- b. Liquidity/Funding gap or maturity mismatch analyses based on contractual maturities as well as behavioural assumptions of cash inflows and outflows. These can be used to identify potential structural funding gaps that may need to be bridged;
 - c. Information on the composition and quality of funding sources (e.g., ratio of core deposits to total deposits, level of concentration of funding sources). Such metrics provide information on the degree of stability of funding sources; and
 - d. Other ratios (e.g., loans to deposits, liquid assets to liabilities, assets funded by swaps, etc.) as may be applicable to the bank.
4. A bank can use either a static or a dynamic approach to manage its liquidity position, and identify and address potential funding shortfalls in a timely manner.
5. Banks with large deposit bases should be able to conduct statistical or behavioural analyses of the stickiness or volatility of deposits. The related supervisory expectations are in Annex B (Factors to Consider in Developing Cash Flow Projections).
6. On the use of cash flow projections:
 - a. Universal and commercial banks (UBs/KBs) and other institutions with active treasury operations are expected to adopt more robust approaches (e.g., dynamic cash flow projection). The related guidelines are set out in Annex B (Factors to Consider in Developing Cash Flow Projections).
 - b. Simple banks may generally use a static approach to liquidity risk measurement, which is based on positions at a given point in time. This may consist of a simple cash flow projection in a spreadsheet where the bank's sources and uses of cash in a contractual or maturity liquidity gap over different time horizons may be analyzed.
 - c. Developing a realistic cash flow projection is highly dependent upon the underlying assumptions. As such, banks shall ensure that:
 - Controls are in place such that no major assumptions or parameters are used or changed unless the approval by an appropriate independent board-level committee is sought; and
 - Key assumptions, including those that are used in behavioural analysis, are kept valid considering changes in market conditions, the competitive environment, and business strategies; thus, the assumptions must be evaluated and tested at least annually.
 - d. At a minimum, the cash flow projection shall be prepared on a consolidated basis and for each significant currency (refer to Section VI – Foreign Currency Liquidity Management), at the banking group level and for each material financial subsidiary. In determining whether a financial subsidiary is material, consideration may be given to the subsidiary's balance sheet size, volume of funding requirements, level of activities, and degree of funding reliance on the parent bank.
7. Apart from liquidity metrics, banks shall design a set of indicators which may be derived from either internal or market data, to help identify at an early stage emerging risks or potential funding needs. These indicators can be qualitative or quantitative in nature and may include, but are not limited to, the following:
 - a. Rapid asset growth, especially when funded by volatile liabilities;
 - b. Growing concentrations on certain assets and liabilities, or on payment/settlement obligations to a single or group of related counterparties;
 - c. Increasing currency mismatches or widening negative liquidity gaps especially in short-term time bands;
 - d. Unusual or sudden increase in intraday payment obligations;
 - e. Growing size of the projected intraday liquidity shortfall;
 - f. Increasing level of past due loans or non-performing assets;
 - g. Increasing overall funding costs;
 - h. Continuing operating losses;
 - i. Rapid decline of share prices, for listed banks;
 - j. Negative publicity; and
 - k. Difficulty in accessing short-term or longer term funds, such as from interbank and repo facilities.

Limits Structure

Banks shall establish limits consistent with the liquidity risk tolerance set by the board and the nature and amount of liquidity risk they are willing and capable to assume. A set of quantitative and qualitative factors should be considered in limits setting. These include, at a minimum, the nature of the bank's strategies and activities, market conditions and costs of access to money markets and other alternative sources of funding.

Limits can take various forms. Banks should address limits on types of funding sources and uses of funds, including off-balance sheet positions. These limits, tolerances, and guidelines may include the following:

- a. Limits on projected net cash flow positions over specified time horizons;
- b. Limits on the maximum amount of projected intraday liquidity shortfall;
- c. Limits on periodic and/or cumulative funding mismatches or gaps over specified short- and long-term time horizons;
- d. Target amounts of highly liquid assets expressed as aggregate amounts or as ratios calculated in relation to, for example, coverage of net cash outflows, or expected liquidity needs under stress scenarios;
- e. Limits or triggers on the structure of short-term and longer-term funding of the asset base, under both normal and stressed conditions;
- f. Limits or triggers on funding concentrations or guidelines that promote funding diversification such as limits on large liability and borrowed funds dependency, single funds providers, exposure to market segment funds providers, and other wholesale funding;
- g. Limits or triggers on contingent liabilities such as unfunded loan commitments and top-up provisions or margin calls from outstanding contracts; and
- h. Guidance on the acceptable tenors of different categories of assets and liabilities (e.g., term of deposits or notes to be issued, or duration of securities holdings).

Before setting limits that allow negative funding gaps, the board and senior management shall consider the bank's ability to fund these negative gaps. Factors include, but are not limited to: the availability of on-balance sheet liquidity, the amount of firm credit lines available from commercial sources that can be drawn to fund the shortfall, and the amount of unencumbered on-balance sheet assets that can be sold without excessive loss and in a reasonable timeframe. Further, liquidity positions and limits should be influenced by the outcome of stress tests.

Banks shall ensure compliance with the established limits, establish policies on accountabilities for non-compliance, and define the procedures for reporting exceptions or breaches. Finally, banks should regularly review the suitability and effectiveness of their limits structure.

Liquidity Risk Monitoring and Reporting

Banks shall have an adequate and reliable MIS that is able to provide the board, senior management and other concerned personnel with timely information on the bank's liquidity position. The MIS should encompass all significant sources of liquidity risk, including new activities and contingent risks and the related triggers. The MIS should be able to calculate risk measures to monitor liquidity positions:

- In all currencies, both individually and on an aggregate basis;
- In each financial subsidiary and at the consolidated level;
- Under normal business conditions and during stress events, with the ability to deliver more granular, frequent, and time-sensitive information during the latter; and
- For different time horizons (e.g., on an intraday basis, on a day-to-day basis, and over a series of more distant time periods thereafter).

A bank's MIS should likewise be able to capture risks in the following areas:

- The deposit base particularly signs that it is becoming more volatile, as may be indicated by statistical and behavioural analyses;
- Secured borrowing and lending, including information on maturity mismatches and asset liquidity;
- Derivative transactions, including collateral outflows resulting from rating changes and asset price movements; and
- Off-balance sheet funding vehicles and non-contractual obligations, providing greater transparency into contingent funding risks.

To facilitate liquidity risk monitoring, there should be reporting standards that specify the scope and granularity of information that should be provided to specific committees or authorities within the bank, as well as the manner and frequency of reporting.

The contents of the MIS reports should adequately support the functioning of the liquidity risk management tools for measuring liquidity needs and controlling different aspects of liquidity risk. At a minimum, the reporting should compare current liquidity exposures to established limits. Breaches in liquidity risk limits should be reported to the appropriate level of management.

Other than monitoring of compliance with limits, the MIS reports should be capable of supporting the board and senior management in identifying emerging concerns on liquidity, as well as in managing events during liquidity crises.

D. Internal Controls and Audit¹

A bank shall have adequate internal controls in place to protect the integrity of its liquidity risk management process. An effective internal control system promotes operational efficiency, complete and reliable financial and regulatory reporting, and compliance with applicable policies, laws and regulations.

As with other risks, an effective system of internal controls for liquidity risk includes:

- A strong internal control environment;
- An adequate process for identifying, measuring, monitoring and controlling liquidity risk;
- Adequate information systems; and
- Continuous review of adherence to established policies and procedures.

A key element of the internal control system is the conduct of independent internal audit reviews at reasonable audit cycles. Banks should ensure that the internal audit scope, program and procedures cover all aspects of the liquidity risk management process, including the determination of the appropriateness of the risk management system, particularly its risk measurement tools and stress testing methodology, risk reporting processes, and compliance with policies.

V. INTRADAY LIQUIDITY RISK MANAGEMENT

Banks whose business activities inherently entail a large volume of daily payments and settlements should effectively manage their intraday liquidity positions and risks in order to meet obligations on a timely basis under both normal and stressed conditions, and contribute to the smooth functioning of payment and settlement systems.

A bank may be exposed to intraday liquidity risk through its direct participation in payment and settlement systems, the provision of correspondent and custodian banking services, or reliance on correspondent or custodian banks for the payment and settlement of its own transactions. In the latter case, operational or financial disruptions at the bank's correspondent or custodian bank will also affect its own liquidity position.

The objective of intraday liquidity risk management is to identify, prioritize, and meet critical obligations when they become due, and to settle other less critical obligations as soon as possible. In accomplishing this objective, banks may face a number of challenges due to the uncertainty of the level and timing of gross cash inflows and outflows. It is, therefore, essential that all banks:

1. Understand the rules of all payment and settlement systems in which they participate;
2. Identify key counterparties and their correspondents or custodians that act as the source of incoming or outgoing gross liquidity flows;
3. Identify key times, days, and circumstances where liquidity flows and possible intraday credit needs might be particularly high; and,
4. Understand the business needs underlying the timing of liquidity flows and intraday credit needs of internal business lines and key customers.

For this purpose, it may be useful for banks to maintain lines of communication with key customers, including customer banks, to obtain a forecast of their own payment traffic.

Banks should have policies, procedures and systems to support operational objectives in all of the financial markets and currencies in which they have significant payment and settlement activities. These should enable them to:

1. Measure expected daily gross liquidity inflows and outflows, including throughput,² anticipate the intraday timing of these flows where possible, and forecast the range of potential net funding shortfalls that might arise at different points during the day;
2. Identify, measure, and monitor payments in large value payment systems (LVPS) that are time-specific in nature. For this purpose, a bank should be able to define the types of transactions that are time-specific relative to its liquidity requirements and participation in an LVPS. Time-specific obligations refer to payments, such as but not limited to: a) with a time-specific intraday deadline; b) required to settle positions in other payment and settlement systems, as well as ancillary systems such as check clearing, PESONet, InstaPay, ATM network; c) related to market activities such as delivery or return of money market transactions or margin payments; and d) critical to the bank's business, reputation, or continued compliance with agreements or regulations, failure of which may lead to

¹ Refer to Secs. 162 and 163 for the frameworks on Internal Control System and Internal Audit, respectively.

² Throughput refers to the percentage of outgoing payments relative to total payments within the day.

penalties or other sanctions. These obligations include amounts drawn from overnight lending facilities or intraday liquidity facilities that must be settled at the end of the day.

3. Identify and properly document accounts that are opened and maintained with correspondent banks to facilitate payment services pertaining to fund transfer, check clearing, cash management services, trade finance, foreign exchange trades, security trades, security custody services, and other short-term payment transactions.
4. Monitor and keep track payments made on behalf of correspondent banking customers as well as manage risks related to the provision of intraday credit line facilities. A bank should maintain appropriate documentation on these intraday credit facilities as well as monitor the extent of drawdown and peak usage¹ of the intraday credit lines so as to ensure adherence to established credit limits and to facilitate liquidity risk management. As intraday credit lines are normally drawn down and repaid within the same day, banks should keep track of their customers' drawings and repayments on such credit lines on an intraday basis to ensure compliance with approved credit limits and funds flow management. A bank should form its own view, from a risk management perspective, of the extent or frequency of monitoring consistent with its business model and the scale and usage pattern of its customers.
5. Monitor intraday liquidity positions in LVPS and correspondent banks against expected activities and available resources. Such monitoring should be frequent enough to enable a bank to:
 - (a) determine when to acquire additional intraday liquidity or restrict liquidity outflows to meet critical payments;
 - (b) allocate intraday liquidity efficiently between itself and its customers; and
 - (c) react quickly to unexpected payment flows and adjust overnight funding positions easily when needed.
6. Secure sufficient funding and manage the timing of liquidity outflows in accordance with intraday objectives, as well as requirements from the market;
7. Manage and mobilize collaterals as necessary to obtain intraday funds. A bank should have sufficient collaterals available to acquire the level of intraday liquidity needed to meet its intraday objectives. It should have operational arrangements in place to pledge or deliver this collateral either to the central bank, correspondents, custodians or other counterparties when needed. A bank should also understand the timeframes required to mobilize different forms of collaterals, including collaterals held on a cross-border basis;
8. Attribute intraday liquidity costs to the bank's income generating units, as warranted;
9. Set intraday liquidity risk limits that take into account possible obstacles to intraday cash flow movement across various payment systems, and across borders in the case of foreign banks and other global financial market utilities (FMUs)² which may be operating in more than one jurisdiction; and
10. Deal with unexpected disruptions to intraday liquidity flows, as supported by stress tests and the contingency funding plan. Scenarios designed based on intraday funding disruptions should be included in the bank's stress testing exercise. Stress scenarios for a bank that uses correspondent banking services may include events where:
 - (i) intraday credit lines are being withdrawn by the correspondent bank; or
 - (ii) a bank is required to either prefund its payments and/or to collateralize its intraday credit lines. Contingency funding plans must also be adopted to manage liquidity needs under the different scenarios. (Refer to Sections IX and X of this Appendix for the related guidelines on stress testing and contingency funding plans.)

The tools and resources applied by a bank in managing its intraday liquidity risks should be tailored to its business model, role in the financial system, and the manner by which it conducts its activities for a particular market. That is, whether it directly participates in a payment and settlement system, or it provides correspondent or custodian services and intraday credit facilities to other banks. In particular, a bank classified as a settlement bank for transactions executed through an FMU is expected to have a robust MIS that can tag and segregate, as well as monitor, in real time the inflows/outflows of their own transactions from their payment and settlement obligations.

Stand-alone TBs and all RBs/Coop Banks shall be expected to maintain an adequate and reliable management information system (MIS) that is able to monitor and report (a) gross payments sent and received in the LVPS and/or, where appropriate, across all accounts held with correspondent banks on a daily basis and (b) available intraday liquidity at the start of the banking/business day. For this purpose, available intraday liquidity at the start of the business day shall be defined as follows:

- (a) For RBs that are subject to the Basel III Liquidity Coverage Ratio (LCR) requirement, it shall include the High Quality Liquid Assets (HQLA) under Sec. 145, total credit lines available from the central bank, total credit

¹ Peak usage refers to the maximum aggregate amount of concurrently outstanding intraday credit drawn against intraday credit lines granted.

² A Financial Market Utility (FMU) refers to a multilateral system that provides the infrastructure for transferring, clearing, payment settlements and other financial transactions among financial institutions in the system. A bank can be designated as a settlement entity for foreign exchange transactions, securities related transactions, large value payment systems (such as the Philippine Payments and Settlements System or PhilPaSS), a clearing house, transfer systems and any other FMU.

lines available from correspondent banks, balances maintained in correspondent banking accounts, and balances maintained in accounts other than correspondent banking accounts.

- (b) For banks that are subject to the Minimum Liquidity Ratio (MLR), it shall include the eligible liquid assets under Sec. 145, total credit lines available from the central bank, and total credit lines available from correspondent banks.

Stand-alone TBs and all RBs/Coop Banks shall make the abovementioned information available any time upon request of the Bangko Sentral.¹

Banks should ensure that there is a clear assignment of tasks and responsibilities to personnel involved in the intraday liquidity management process. There should also be sufficient coordination among the front, middle, and back offices, as intraday liquidity management requires close monitoring of expected payments and direct contacts with customers, where necessary, to quickly verify the reasons for delayed payments.

VI. FOREIGN CURRENCY LIQUIDITY MANAGEMENT

The principles described in these guidelines also apply to the management of any foreign currency in either the Regular Banking Unit (RBU) or Foreign Currency Deposit Unit (FCDU) to which the bank maintains a significant exposure. The systems or processes for measuring, monitoring, and controlling foreign currency liquidity positions shall be integrated into various aspects of a bank's overall liquidity risk management framework, such as managing net funding requirements, stress-testing, and contingency funding planning, as appropriate.

Banks should formulate liquidity strategies and policies for the major currencies in which they have significant activity or exposure.² As a general principle, banks should manage and control their funding needs to avoid over-reliance on foreign exchange or currency swap markets in respect of those currencies in which they have significant exposure, as there is a risk that their ability to swap currencies may erode rapidly under stressed conditions.

Banks should assess their aggregate foreign currency liquidity needs under both normal and stressed conditions, and control currency mismatches within acceptable levels.³ Management needs to set and regularly review limits on the size of its funding gaps for each significant individual currency and in aggregate over particular time bands (e.g., "next day", "7 days" and "1 month") for each major foreign currency in which they operate.

Currency mismatch may arise where, for example, a bank relies on local currency liabilities and short-term borrowings to fund a portion of its assets denominated in foreign currency, or vice versa via foreign exchange or currency swap markets. In these cases, banks should demonstrate the capacity to assess and monitor the risk of sudden, adverse exchange rate movements that could sharply widen existing funding gaps and alter the effectiveness of foreign exchange hedges and hedging strategies. Banks should also assess the likely convertibility of foreign currencies and access to foreign exchange markets for switching funding from one currency to another.

The size of the limits should take into account the following factors, among others:

- a. The amount of foreign currency liabilities that can be swapped through the foreign exchange market to fund local currency assets, or vice versa;
- b. The convertibility and price volatility of individual foreign currencies, the timing of access to funds in those currencies, as well as the potential for impairment or complete closure of foreign exchange swap markets for particular currency pairs in the case of market disruptions;
- c. The conditions of foreign exchange markets, including the depth and liquidity of the markets and the level of interest rates;
- d. The ability to raise funds in foreign exchange markets and to transfer surplus liquidity from one currency to another, across jurisdictions and legal entities;
- e. Differences in the behavior of foreign currency depositors and lenders vis-à-vis those of customers and counterparties in transactions involving the domestic currency, and the stickiness of deposits in foreign currencies under stressed conditions;
- f. The availability of foreign currency backup facilities in cases where normal access to funding in individual currencies is disrupted; and

¹ Stand-alone TBs/QBs and all RBs/Coop Banks shall be given one (1) year and six (6) months from 24 December 2019 to achieve full compliance with the provisions of this section.

² The term "significant" as defined in Item "C.2" applies.

³ Banks with FCDU operations are subject to statutory requirements, such as the asset cover.

- g. The ability of borrowers to repay their foreign currency liabilities under stressed conditions (e.g., interest rate hikes and exchange rate fluctuations).

VII. INTRAGROUP LIQUIDITY RISK MANAGEMENT

Banks belonging to a financial group shall have adequate policies and systems that enable active monitoring and control of liquidity risk exposures and funding needs within and across business lines and legal entities in their groups, including those arising from cross-border transactions. Further, the parent bank of a group should establish processes that facilitate data aggregation across multiple systems to enable group-wide management of liquidity risk. For cross-border intragroup activities and other intragroup transactions involving foreign currencies, banks shall also apply the provisions of Part VI, Foreign Currency Liquidity Management.

Banks shall clearly document any liquidity support arrangements with group entities. Further, they should specify in their liquidity risk management policies the treatment of intragroup transactions and the assumptions on intragroup dependencies for the purposes of making cash-flow projections for both normal and stressed conditions.

Intragroup transactions may be treated in the same way as other third party transactions for the purpose of cash flow projections under normal business conditions, provided that there is no doubt about the financial position of the group as a whole. Under stressed situations, banks should analyze how the liquidity positions of group entities may affect their own liquidity. They should be able to account for any funding or liquidity commitment provided to group entities and prepare for any withdrawal of funding provided by these entities. Where there is reliance on funding support from group entities, banks should take into account any limitation on their access to liquidity from those entities.

Banks should identify and understand the constraints on the movement of liquidity within their groups and specify assumptions regarding the transferability of funds and collateral in liquidity risk management policies. These assumptions should fully consider regulatory, legal, accounting, credit, tax, and internal constraints on the effective movement of liquidity and collateral as well as the time required to complete the transfers. There should also be processes in place for the allocation of liquidity and collateral resources.

A bank should assess the possibility of a reputation contagion that occurs when a liquidity problem in an entity within its group leads to a liquidity strain across the entire group due to the assumption of market counterparties that a problem at one entity is a problem for the group as a whole. The inherent vulnerability of a bank that is part of a group to reputation contagion must be addressed in the bank's intragroup liquidity risk management system.

To mitigate the potential for reputation contagion, banks should consider establishing internal limits on liquidity risk within and across business lines and group entities. It is also vital that banks engage in effective communication with major counterparties and other stakeholders when liquidity problems in their group entities arise. Scenarios based on reputation contagion should be considered in the bank's stress testing exercise and must be complemented with a robust group-wide contingency funding plan. Banks should ensure that they have sufficient liquidity cushions and a well-diversified funding structure to mitigate the effects of reputation contagion.

VIII. COLLATERAL MANAGEMENT

The availability of eligible assets that a bank can use as collateral to obtain funding in the market gives it the ability to raise cash quickly to meet liquidity needs. On the other hand, entering into contracts with margin requirements (such as derivatives) exposes a bank to liquidity risk. Hence, the allocation of sufficient resources to the management of collateral positions is needed in order to achieve the overall liquidity risk management strategy of the bank. In this regard, banks that regularly and/or have plans to enter into collateralized transactions shall institute policies, procedures, and systems that would enable them to:

1. Assess the eligibility and acceptability of each major asset class for pledging as collateral to major counterparties, the Bangko Sentral, and other fund providers in secured funding markets for intraday, overnight, and term credit. Banks should also ensure that there is proper legal documentation for each asset class to be effectively pledged for liquidity;
2. Monitor the level of available collateral by legal entity, jurisdiction, and currency exposure;
3. Track the legal entity and the physical location, i.e., the custodian bank or securities settlement system, with which each of the available collaterals are held;
4. Meet expected, and accommodate unexpected, borrowing needs as well as potential increases in margin requirements. Banks should also be able to monitor the shifts of collateral usage between intraday, overnight, and term borrowing requirements;
5. Optimize the allocation of collateral available for different operational needs, products, business units, locations, and currencies, as applicable;

6. Diversify the sources of collateral to avoid excessive concentration on any particular funding provider or market taking into consideration capacity constraints, sensitivity of prices, haircuts and collateral requirements (e.g., concentration of available collaterals in the form of long-dated ROP bonds that have a higher price sensitivity may pose constraints in generating liquidity especially during stressed conditions);
7. Account for all collateral positions, including both currently pledged and unencumbered eligible assets;
8. Prudently measure the value of available and pledged collaterals, together with estimates of its liquidated value in adverse market conditions;
9. Capture the implications of hedging activities and obligations embedded in the contractual terms of transactions involving derivatives, securitizations, structured products, and other market instruments to their ability to utilize collaterals to obtain liquidity and outstanding collateral positions; and
10. Integrate collateral positions in the liquidity risk measurement tools. Banks should incorporate assumptions for available and pledged collaterals in both business as usual and stressed-based liquidity risk measurement tools.

IX. LIQUIDITY STRESS TESTING

Stress tests should enable a bank to assess its ability to generate sufficient liquidity from the asset side, liability side, and contingent items of the balance sheet to meet funding needs under adverse conditions and to ensure that exposures remain in accordance with the bank's liquidity risk tolerance. In this regard, the following guidelines shall apply:

1. Stress tests shall be conducted on a regular basis for a variety of short-term and protracted stress scenarios to identify sources of potential liquidity strain. This applies to all bank, including those that are covered by the regulations on the LCR, to take into account the varying liquidity risk profiles and vulnerabilities of individual institutions.
2. The design and frequency of stress tests shall be commensurate with the size and complexity of a bank, its liquidity risk exposures, as well as the importance of the bank within the financial system.
3. It is important for banks to construct plausible stress scenarios under varying levels of severities and examine the resultant cash flow needs. They shall, at a minimum, include the following types of scenarios in their stress testing exercise: (a) an institution-specific crisis scenario; (b) a market-wide crisis scenario; and (c) a combination of both.¹
4. In designing stress scenarios, banks shall take into account specific risks associated with their business models and vulnerabilities arising from a concentration of assets or funding sources.
5. Retail banks, including rural and cooperative banks, may develop scenarios that include: (i) an acute deposit run with significant daily run-off rates for deposits; and (ii) increasing requests from customers to redeem their time deposits prior to maturity.
6. Banks that actively utilize interbank facilities or collateralized borrowings, shall:
 - a. Analyze the impact of stressed market conditions on the value of assets used as collaterals; and
 - b. Account for systemic as well as second-round effects, i.e., tests should assume that the bank's actions may have an impact on the market and that there are other institutions seeking to undertake similar actions.
7. The ability of a bank to honor its immediate commitments at least for the initial period when the stress is likely to be most acute is crucial for its later survival. As such, the bank is expected to have sufficient funds to cover its liquidity needs. It shall ensure that it is able to continue its businesses for a certain minimum stress period under each of the crisis scenarios.

The minimum stress period for an institution-specific crisis scenario shall last for no less than five (5) business days, while a market wide crisis scenario and a combined scenario shall last for no less than one month. Banks may adopt longer minimum stress periods if their liquidity risk profile so warrants.

8. Stress tests shall be performed for all currencies in aggregate and separately for positions in the local currency and individual foreign currencies in which banks have significant positions. Refer to Section VI for the related guidelines on foreign currency liquidity management.
9. A bank that exercises control over subsidiary/ies should be able to analyze the impact of stress scenarios on its consolidated liquidity position as well as that of individual financial subsidiaries within the group in order to

¹ An institution-specific stress scenario may refer to situations that could arise from a bank experiencing problems which affect public confidence in either the bank or its group-wide operations. On the other hand, a market-wide stress scenario may refer to situations where liquidity at a large number of financial institutions in one or more markets is affected. This may be characterized by a market-wide liquidity squeeze, substantial discounts needed to sell or repo assets, or severe operational or settlement disruptions affecting one of more payment or settlement systems.

understand where risks could arise. Branches of foreign banks are expected to apply these guidelines to their Philippine operations only. Refer to Section VII for the related guidelines on intragroup stress testing.

10. Banks belonging to a banking group/conglomerate should, in particular, assess the effects of a group-wide crisis scenario on their liquidity positions. This scenario assumes that an institution-specific stress event is affecting the global operations of the banking group (i.e., with problems spilling over the entire banking group).
11. Results of the stress tests should be linked to the overall ALM and liquidity risk management processes of the bank. To this end, the board and senior management should:
 - a. Integrate the stress test results into the bank's strategic business planning process, liquidity risk management strategies and practices, setting of internal liquidity risk limits, and the assessment of potential funding shortfalls in the contingency funding plan; and
 - b. Thoroughly discuss the stress testing results to consider the need for remedial or mitigating actions, such as, but not limited to, expanding the liquidity buffer, obtaining more long-term funding or adjusting the composition of assets.
12. A bank's stress scenarios and related assumptions must be well documented. The scenario design and underlying scenarios used should be subject to regular review and approval by the board and senior management to ensure that the nature and severity of the tested scenarios remain appropriate and relevant to market conditions, changes in business model and activities, and actual experiences in stressed situations.

X. CONTINGENCY FUNDING PLAN

Banks shall have a formal contingency funding plan (CFP) that clearly sets out strategies for addressing emergency situations. These include, in particular, liquidity shortfalls estimated from stress tests performed by the bank under institution-specific, market-wide and combined stress scenarios mentioned in Sections V and IX. The following shall be observed:

1. The CFP should address liquidity issues over a range of different time horizons, including intraday.
2. The CFP should clearly define a set of triggering events that will activate the plan as well as the mechanisms for identification, monitoring and reporting of such events at an early stage. Banks may adopt internal and market indicators for defining and monitoring triggering events.
3. The CFP should provide a bank's management with a diversified set of viable, readily deployable potential contingency funding measures for preserving liquidity and addressing liquidity shortfalls. All potential sources of funding should be identified, along with the estimated amount of funds that can be derived from these sources, their expected degree of reliability, the conditions under which these sources should be used (such as scenarios when a bank incurs a sudden material intraday liquidity shortfall), and the lead time needed to tap additional funds from each of the sources.

In this regard, banks must maintain adequate records in support of their assumed funding sources during stress conditions, such as test results of counterparty lines, analysis of saturation points for certain securities markets, or statements of support from related parties.

4. The CFP should reflect the relevance of the central bank lending facility as a secondary source of liquidity. It should specify the type of facility to be availed, the corresponding collateral requirements, and operational procedures for accessing the same.
5. To enable a bank to make timely and well-informed decisions and execute contingency measures proficiently, the roles and responsibilities and internal procedures for crisis management should be clearly delineated. These should cover the following:
 - a. The authority to invoke the CFP, and the establishment of a formal liquidity crisis team to facilitate internal coordination and communication across different business lines and locations and decision-making by senior management during a liquidity crisis;
 - b. Clear escalation and prioritization procedures detailing what actions to take, who can take them, and when and how each of the actions can and should be activated;
 - c. Names and contact details of members of the team responsible for implementing the CFP and the locations of team members; and
 - d. The designation of alternates for key roles.

6. In a time of stress, to support general confidence in the bank, it should develop a communication plan to deliver on a timely basis clear and consistent communication to internal and external parties. Internal communication should cover employees in different business lines and locations. External parties should include the Bangko Sentral, clients, and creditors. The CFP should, in particular, address communication with shareholders, market participants, and major counterparties to whom assurance about the bank is extremely important, as their actions could significantly affect the reputation of the bank and its liquidity position.

Strategies should also be appropriately formulated for managing media relationships and making public announcements to help reduce uncertainty or speculation about the bank in the market.

7. The CFP should be subject to regular testing to ensure its effectiveness and operational feasibility, particularly in respect of the availability of the contingency sources of funding listed in it. This is highly warranted in respect of intraday liquidity stress events considering the need to address funding shortfalls in a limited period of time. The testing of the CFP should cover the following major aspects:
 - a. Verifying key assumptions, such as the ability to sell or repo a certain volume of assets or periodically draw down from credit lines;
 - b. Ensuring that roles and responsibilities are appropriate and understood;
 - c. Confirming that contact information is up-to-date, with reporting lines clearly stated and synchronized with the latest organization chart; and
 - d. Reviewing that the necessary legal and operational documentation is in place to execute the plan at short notice.
8. The CFP should be consistent with a bank's business continuity plans and should be operational under situations where business continuity arrangements have been invoked. As such, the bank should ensure effective coordination between teams managing issues surrounding liquidity crises and business continuity.
9. Banks should review and update their plan at least annually for the board's approval, or more often as changing business or market circumstances require.

(Circular No. 1064 dated 03 December 2019)

FACTORS TO CONSIDER IN DEVELOPING A FUNDING STRATEGY

1. Concentration on particular funding markets and sources

Banks should manage any potential concentration in their reliance on particular funding markets and sources. What would constitute a funding concentration cannot be expressed in definite sizes or amounts, as this depends on the nature and complexity of banks' business activities. The following factors should be taken into account in assessing the degree of funding concentration:

- Maturity profile and credit-sensitivity of the liabilities;
- Mix of secured funding and unsecured funding;
- Extent of reliance on the following:
 - a. A single fund provider or a group of related fund providers;
 - b. Certain instruments or products, e.g., interbank borrowing, retail versus wholesale deposits, and repurchase agreements and swaps;
 - c. Particular markets, including a limited number of counterparty lines for financial instruments that are regularly used for funds management; and
 - d. Intragroup funding;
- Geographical location, industry, or economic sector of fund providers; and
- Currency of funding sources.

2. Availability of stable funding sources

Banks should build up a sufficient level of stable funding to support their assets and activities. They should analyze their funding structure and identify which funding sources are likely to stay with them, and which may leave, under adverse circumstances. Banks with a large deposit base should, in particular, conduct a granular analysis to evaluate the behavioural characteristics of different types of deposits with a view of determining the attributes of deposits that are more stable in nature. The trends and levels of stable deposits should be regularly monitored.

3. Impact of available funding sources on liquidity position

Banks should recognize that certain funding sources, e.g., interbank borrowing and wholesale funding, are more volatile than traditional retail funding. Banks that are heavily reliant on such funding sources should seek more diversification of these sources and maintain a higher proportion of high-quality liquid assets to withstand the potential impact of liquidity or market disruptions.

In the case of standby credit facilities, banks should likewise recognize the likelihood that their right to draw on these facilities may be denied in a crisis. Banks should therefore avoid excessive reliance on standby facilities. Where standby facilities constitute a major source of a bank's backup liquidity, it should be able to prove the certainty of these arrangements.

4. Access to alternative sources of funding

Banks should identify alternative sources of funding that may be used to generate liquidity in case of need. These may include intragroup fund transfers, new debt issues, asset sales, and access to Bangko Sentral credit facilities, among others. Banks should review the effectiveness of using such sources in different situations. They should be aware that not all fund-raising options are available in all circumstances and some may be available only with a substantial time delay.

FACTORS TO CONSIDER IN DEVELOPING CASH FLOW PROJECTIONS

1. While certain cash flows can be based simply on contractual maturities, there are those which can only be estimated based on assumptions. Banks should make realistic assumptions to enable prudent cash-flow projections that reflect the complexity of their underlying businesses, products and markets. These assumptions may include –
 - a. Future growth in the balance sheet;
 - b. The proportion of maturing assets and liabilities that banks/QBs expect to roll over or renew;
 - c. The quality and proportion of liquid assets or other marketable securities that can be used as collateral to obtain secured funding;
 - d. The behaviour of assets and liabilities with no clearly specified maturity dates, such as repayment of overdrafts and demand deposits;
 - e. Potential cash flows arising from off-balance sheet activities, e.g., drawdown under loan commitments and contingent liabilities (including all potential draws from contractual or non-contractual commitments);
 - f. Convertibility of foreign currencies;
 - g. The lead time required for the liquidation of marketable debt securities, taking into account the settlement time and the impact of time differences if the clearing or custodian agents are located outside the Philippines; and
 - h. Access to wholesale markets, standby facilities, and intragroup funding.
2. In projecting cash flows, banks should also consider general economic and market trends (e.g., an interest rate hike) that could affect their ability to access funds readily and at reasonable terms. Banks should document in their liquidity risk management policy statement the underlying assumptions used for estimating cash flow projections and the rationale behind them. The assumptions and their justifications should be approved, and be subjected to regular review, by senior management to take account of available statistical evidence and the changing business environment.
3. Techniques employed by banks for designing assumptions should be commensurate with the nature and complexity of their business activities. These may range from historical experience and static simulations based on current holdings to sophisticated modelling (for more complex banks), taking into account ongoing market developments.
4. In deriving behavioural cash flow assumptions, banks may analyze historical observations on cash flow patterns. While there is no standard methodology for making such assumptions, it is important that the use of consistent and reasonable assumptions should be supported by sufficient historical or empirical evidence.
5. The minimum criteria for using behavioural assumptions are as follows:
 - a. The assumptions should be consistent and reasonable for each scenario. For example, the proportion of marketable debt securities which could be liquidated in case of need and their liquidation value should properly reflect the quality and market liquidity of the securities under different scenarios.
 - b. The assumptions should be verified and supported by sufficient evidence, experience and performance rather than arbitrarily selected. Typical information sources that could be used to help formulate the assumptions include –
 - Historical observations or statistical analyses of cash-flow patterns/behavioural maturity under different scenarios. For instance, the past behaviour of different types of customer deposits, coupled with an analysis of their characteristics and factors affecting their stability, may provide relevant information for estimating the amount of deposits that will likely be withdrawn under normal or stressed situations;
 - Models developed or used by banks for conducting cash-flow analysis;
 - Input from managerial and business units about business and pricing strategies, as planned changes to business or repricing strategies could affect the behaviour of future cash flows of positions with uncertain maturities; and
 - General economic and market trends as well as other relevant information that could affect banks'/QBs' ability to access funds readily and at reasonable terms.
 - c. The length of the underlying historical observation period used for the analyses and models should be at least ten years, consistent with international standards.
6. Banks should document the behavioural assumptions in their liquidity management policy statement. The type of analysis performed under each assumption should also be documented to facilitate periodic review. The details of that documentation should be consistent with the significance of the risk and the complexity of the analysis.

BASEL III FRAMEWORK ON LIQUIDITY STANDARDS- LIQUIDITY COVERAGE RATIO
(Appendix to Sec. 145 on Liquidity Coverage Ratio [LCR], LCR Disclosure Requirements, and Sanctions)

Introduction

This Appendix outlines the Bangko Sentral guidelines implementing a quantitative liquidity regulatory framework consistent with the liquidity coverage ratio (LCR) standard introduced under the Basel III: The Liquidity Coverage Ratio and Liquidity Risk Monitoring Tools, January 2013 by the Basel Committee on Banking Supervision (BCBS)¹.

With this new liquidity standard, the Bangko Sentral aims to further strengthen the risk management of covered banks by enhancing their ability to draw information from their various operations, and assess the impact of external events on the liquidity of financial instruments and on the availability of funding under both normal and stressed conditions. With liquidity risk measurement standards in place, covered banks are expected to manage their liquidity positions more prudently by better aligning their funding models with their risk preferences and incorporating liquidity risk into product pricing. Overall, the new liquidity regime shall give market participants greater confidence in the ability of the banking sector to absorb shocks arising from financial and economic stress, and hence, lowering the probability of acute shortfalls in liquidity.

The liquidity framework is part of the comprehensive set of complementary and mutually reinforcing measures for regulatory reform that are consistent with global standards that have been introduced by the Bangko Sentral to strengthen the risk management of covered banks and the supervision of the banking system. The liquidity standard shall complement existing supervisory guidance on liquidity risk management.

Part I. Liquidity Coverage Ratio (LCR) Framework

I. Definition of terms

For the purpose of the LCR standard, the following terms and phrases shall be understood as follows:

1. *Beneficiary* – refers to a legal entity that receives, or may become eligible to receive, benefits under will, insurance policy, retirement plan, annuity, trust, or other contract.
2. *Cash management operation* – refers to the provision of products and services intended to manage customers' cash flows, assets and liabilities, and for the conduct of financial transactions necessary to the customer's ongoing operations.
3. *Clearing operation* – refers to a service arrangement that enables customers to transfer funds (or securities) indirectly through direct participants in domestic settlement systems to final recipients.
4. *Committed business facilities* – are off- balance sheet facilities or funding commitments issued by covered banks to clients under explicit contractual agreements or obligations to extend funds at a future date that are contractually irrevocable (i.e., "committed") or conditionally revocable. The terms governing the facility prohibit the covered bank from refusing to extend credit or funding to the counterparty, except where certain conditions specified by the terms of the facility- other than customary notice, administrative conditions, or changes in financial condition of the client-have been met.
5. *Correspondent banking* – refers to arrangements under which one (1) covered bank (correspondent) holds deposits owned by other covered banks (respondents) and provides payment and other services in order to settle foreign currency transactions (e.g., so-called nostro and vostro accounts used to settle transactions in a currency other than the domestic currency of the respondent covered bank for the provision of clearing and settlement of payments).
6. *Current market value* – refers to the value of liquid assets included in the stock of HQLA, measured in accordance with the existing guidelines on mark-to-market valuation under *Appendix 28*.
7. *Custody operation* – refers to the provision of safekeeping, reporting, processing of assets or the facilitation of the operational and administrative elements of related activities on behalf of customers in the process of their transacting and retaining financial assets.
8. *Downgrade triggers* – pertain to clauses or provisions in contracts governing derivatives and other transactions that require the posting of additional collateral, drawdown of contingent facilities, or early repayment of existing liabilities upon the covered bank's downgrade by a recognized credit rating organization.

¹ The Basel Committee on Banking Supervision is a committee of banking supervisory authorities that was established by the central bank governors of the Group Ten countries in 1975. It consists of senior representatives of covered bank supervisory authorities and central banks from Argentina, Australia, Belgium, Canada, China, France, Germany, Hong Kong SAR, India, Indonesia, Italy, Japan, Korea, Luxemborg, Mexico, the Netherlands, Russia, Saudi Arabia, Spain, Singapore, South Africa, Sweden, Switzerland, Turkey, the United Kingdom, and the United States. It usually meets at the Bank for International Settlements in Basel, Switzerland where its permanent Secretariat is located.

9. *Financial corporates* – refer to corporations, whether resident or non- resident, that are primarily engaged in financial intermediation or in auxiliary financial activities that are closely related to financial intermediation. These include non-bank financial institutions with quasi- banking functions, securities firms, and insurance companies, among others.
10. *Financial stress* – pertains to a condition where a covered bank cannot meet or has difficulty paying off its financial obligations as brought about by firm-specific and/or market-wide stress events. In such financial circumstance, the covered bank may be having difficulty accessing credit and financing facilities, and has no reasonable alternative other than to monetize its HQLA to the extent necessary to meet obligations such as but not limited to:
 - Servicing of deposit withdrawals;
 - Posting of additional collateral requirements;
 - Servicing of unscheduled drawdowns on committed but unused credit lines and business facilities that are extended to clients;
 - In the interest of mitigating reputational risk, buying back of debt, extending of funds to honor non-contractual obligations, or accommodation of any unexpected liquidity demand from counterparty.
11. *Haircut* – refers to a percentage by which the market value of an asset is reduced. A haircut is applied by a collateral taker as a risk control measure to protect itself from losses resulting from decline in the market value of an asset in the event that it needs to liquidate said collateral.
12. *High-quality liquid asset (HQLA)* – refers to an asset that can be converted easily and immediately into cash at little or no loss of value in private markets to meet the covered banks's liquidity needs during times of stress. To qualify as HQLA, the liquid asset should possess the asset and market liquidity characteristics, and should satisfy the operational requirements for monetization prescribed under the LCR standard. HQLAs shall be categorized as either Level 1 or Level 2 assets. The stock of HQLA makes up the numerator of the LCR.
13. *Inflow/Outflow rates* – pertain to the various percentages that are designed to reflect the observed behavior and characteristics of different assets, funding sources, obligations, and commitments during periods of liquidity stress. Inflow rates provide the assumption at which assets or contractual receivables are expected to flow in during times of stress. Outflow rates assume the level at which funding sources, obligations, and commitments are expected to run off or be drawn down during stress periods.
14. *LCR measurement date* – refers to end-of-moth/quarter date which serves as the reference date for the calculation of the LCR.
15. *LCR period* – refers to the thirty (30)- calendar day period following the LCR measurement date, which serves as the standard horizon for HQLA availability and for total net cash outflows calculation.
16. *Liquidity metrics* – refer to a set of market-based indicators which enable assessment of the fundamental attributes of an asset that are generally found to be determinants of liquidity (i.e., measure of asset characteristics), and the essential aspects of the broader market structure within which the asset is traded (i.e., measure of market liquidity). These criteria provide guidance on which specific asset to qualify as liquid and readily marketable within an asset class.
17. *Multilateral organizations* – pertain to the Bank of International Settlements, the International Monetary Fund, the European Central Bank and European Community and the multilateral development banks (MDBs).
18. *Non-financial corporates* – refer to corporations, whether resident or non- resident, whose principal activity is the production of goods or non-financial services.
19. *Non-HQLAs* – pertain to debt securities and equity shares that are neither qualified as Level 1 nor Level 2 assets.
20. *Operational deposit* – refers to a deposit account maintained by a wholesale client for the primary purpose of obtaining a specific operational service from the covered bank as an independent third party intermediary, agent or administrator.
21. *Operational service* – refers to any of the following contractual services performed by the covered bank related to clearing, cash management operations, and custody (but excluding correspondent banking or brokering activities), which effectively facilitate the clients' access and ability to use payment and settlement systems and otherwise make payments:
 - Clearing
 - a. Overnight financing and maintenance of post-settlement balances;
 - b. Transmission, reconciliation, and confirmation of payment orders;
 - c. Intraday overdraft;
 - d. Determination of intraday and final settlement positions;

Cash Management

- e. Payment remittance;
- f. Collection and aggregation of funds;
- g. Payroll administration and control over disbursement of funds;
- h. Administration of payments and cash flows related to the safekeeping of investment assets, not including the purchase or sale of assets;

Custody

- i. Settlement of securities transactions;
 - j. Client subscriptions and redemptions;
 - k. Processing of collateral;
 - l. Transfer of contractual payments, including collection and payment of dividends and other income from financial assets under custodianship; and
 - m. Escrow, funds transfer, stock transfer, and agency services, including payment and settlement services (excluding correspondent banking), payment of fees, taxes, and other expenses
22. *Other contingent funding obligations* – refer to either contractual or non-contractual contingent funding obligations (excluding lending commitments) that are contingent upon a credit or other event that is not always related to the liquidity events simulated in the LCR stress scenario, but may nevertheless have the potential, especially out of reputation risk considerations, to cause significant liquidity drains to the covered bank in times of stress. Non-contractual contingent funding obligations are funding liabilities that are:
- associated with the issuance or sponsorship of products (including structured financial instruments) or provision of services that may require the funding support or extension of funds by the covered bank in times of stress; or
 - embedded in financial products and instruments sold, sponsored, marketed or originated by the covered bank that might prompt the covered bank to repurchase said products and instruments from a customer in order to satisfy or manage the customer's reasonable expectations about the liquidity and marketability of the product or instrument. Failure to do so would likely cause material reputational damage to the covered bank or otherwise impair its ongoing viability.
23. *Philippine National Government (NG)* – refers to the Philippine NG and its agencies such as departments, bureaus, offices, and instrumentalities, but excluding local government units (LGUs) and government-owned and controlled corporations (GOCCs).
24. *Public Sector entities (PSE)* – refer to entities which are regarded as such by a recognized banking supervisory authority in the country in which they are incorporated.
25. *Rehypothecation and/or re-use of collateral* – Rehypothecation refers to the right of financial intermediaries to sell, pledge, invest, or perform transactions with the client assets they hold, thereby allowing them to obtain funding using said client collateral. Re-use of collateral, on the other hand, usually covers a broader context where securities delivered in one transaction are used to collateralize another transaction, including own trades, borrowings or short sellings. The terms rehypothecation and re-use of securities are used interchangeably in this standard.
26. *Retail deposits* – refer to deposit liabilities raised by the covered bank from individual clients including sole proprietorships and partnerships, and those classified as micro and small enterprises (hereinafter called retail clients).
27. *Securities financing transactions (SFTs)* – these involve repurchase (repos), and reverse repurchase (reverse repos) agreements, securities lending and borrowing, or margin lending transactions, where the value of the transactions depends on market valuations and the transactions are often subject to margin agreements.
28. *Secured funding* – refers to any liability and general obligation of the covered bank arising from securities transaction that is covered by collateral in the form of duly constituted mortgage, pledge, or lien on specifically designated asset owned by the covered bank or by its related party that gives the counterparty priority over said asset in case of bankruptcy, insolvency, liquidation, or resolution. This consists of repos, collateral swaps, collateral lending to customers to cover short positions and other similar secured funding arrangements. Forward repos and forward collateral swaps that start previous to and mature within the LCR horizon are included in this category.
29. *Secured lending* – refers to any securities transaction that is subject to a legally binding agreement that gives rise to a cash obligation of a counterparty to a covered bank that is secured under applicable law by a lien on specifically designated asset owned by the counterparty or by its related party, which gives the covered bank, as holder of the lien, priority over said asset in the event the counterparty enters into bankruptcy, insolvency, liquidation, receivership, resolution, or similar proceeding. This will include reverse repos, margin loans, and securities borrowing transactions. Forward reverse repos and forward collateral swaps that start previous to and mature within the LCR horizon are included in this category.

30. *Special purpose entity (SPE)* – as defined in the Basel II Framework, SPE is a corporation, trust, or other entity organized for a specific purpose, the activities of which are limited to those appropriate to accomplish the purpose of the SPE, and the structure of which is intended to isolate the SPE from the credit risk of an originator or seller of exposures. SPEs are commonly used as financing vehicles in which exposures are sold to a trust or similar entity in exchange for cash or other assets funded by debt issued by the trust.
31. *Total expected cash inflows* – pertain to the various types of contractual receivables which outstanding balances as of the LCR measurement date are multiplied by relevant inflow rates. The total inflow amounts are capped at seventy-five percent (75%) of aggregated total expected cash outflows.
32. *Total expected cash outflows* – pertain to the various on- and off-balance sheet funding sources and commitments which outstanding balances as of the LCR measurement date are multiplied by relevant outflow rates. The outflow amounts are aggregated to determine the total expected cash outflows.
33. *Total net cash outflows* – pertains to the sum of the total expected outflow amounts less the sum of the total expected inflow amounts, with the inflow amounts limited to seventy-five percent (75%) of outflow amounts. The calculated amount makes up the denominator of the LCR, thereby establishing the amount of HQLA that a covered bank would be required to hold.
34. *Trust and other fiduciary* – refers to a legal entity or to a specifically designated business unit that is authorized to administer, hold or manage assets for the use or in behalf of a third party. These shall include trust entities as defined under Sec. 403, mutual funds, exchange-traded funds and other collective investment vehicles.
35. *Unencumbered* – means free of legal, regulatory, tax, accounting, contractual or other impediments or practical restrictions on the ability of the covered bank to liquidate, sell, transfer, or assign the asset. Liquid assets may also be considered unencumbered if the potential credit or funding for which the assets are pre-positioned, deposited with or pledged to the Bangko Sentral, to a clearing and settlement system, or to another financial entity is not currently extended to the covered bank or to any of its related parties¹.
36. *Unsecured wholesale funding* – refers to liabilities and general obligations of the covered bank, other than deposits, to wholesale clients that are not collateralized by legal rights to specifically designated assets owned by the covered bank or by its related party. This includes deposit substitutes, unsecured loans and advances, unsecured notes, bonds and other debt securities, and other unsecured funding obligations.
37. *Wholesale deposits* – refer to deposit liabilities raised by the covered bank from legal entities (excluding sole proprietorships and partnerships and those entities classified as micro and small enterprises) (hereinafter called wholesale clients).

II. LCR Calculation

A. General Requirements

1. The LCR is designed to promote the short-term resilience of the liquidity risk profile of a covered bank. To meet funding obligations and draws on contingent liabilities over the next thirty (30) calendar days, the LCR requires the covered bank to hold a stock of unencumbered HQLA equal to or greater than total net cash outflows. Hence, the LCR is calculated as the:

$$\text{LCR} = \frac{\text{Stock of HQLA}}{\text{Total net cash outflows over the next 30 calendar days}}$$

2. The standard requires that, under normal situation, the value of the liquidity ratio be no lower than 100%² on a daily basis because the stock of the unencumbered HQLA is intended to serve as a defense against potential onset of liquidity stress.
3. When calculating the LCR, the covered bank should maintain a consistent categorization of a given entity/counterparty across all HQLA, outflow and inflow categories.
4. To facilitate LCR monitoring and ongoing compliance, the covered bank must maintain a reliable system that has the ability to calculate liquidity positions on a day-to-day basis, regardless of the frequency of mandatory reporting to the Bangko Sentral.

It should capture, at a minimum, specific information related to the covered bank's available unencumbered assets and collaterals, cash flows, and certain market and liquidity indicators prescribed in the standard. It must have the ability to deliver granular and time-sensitive information particularly during periods of stress.

¹ As defined under Sec. 131 on Policy Statement and Definition of Terms.

² The 100% threshold is the minimum requirement absent a period of financial stress, and after the phase-in arrangement are complete.

B. Stock of HQLA

(1) HQLA eligibility criteria

5. *Asset and market liquidity characteristics.* To qualify as HQLA, assets should have a high potential to generate funds easily and immediately through outright sale or secured borrowing, during a stress scenario without incurring large discounts due to fire-sales. These assets must be liquid and readily-marketable.
6. The liquidity and ready-marketability of an asset is influenced both by its own specific features and by the characteristics of the broader market structure within which it is traded.
7. To assess the relative liquidity and ready-marketability of assets, particularly those that are classified as Level 2 under this Framework, liquidity metrics such as those set out in *Annex A* may be used. The metrics, including the analytical tools, guidelines and methodologies, data used, and the threshold levels shall be developed in coordination with the banking industry. These shall be subject to review and updating at least annually to reflect prevailing market liquidity conditions.
8. Operational requirements for monetization. Not all assets considered to be liquid and readily-marketable are immediately eligible for the stock as there are other operational restrictions on the availability of HQLA that can prevent timely monetization during a stress period. The immediate availability of the liquid assets for monetization in times of stress as well as the unrestricted use of the funds generated from outright sale or secured borrowing of said assets must also be established in order for the liquid assets to be appropriately considered as HQLA.
9. The following operational requirements are designed to ensure that the stock of HQLA is managed in such a way that the covered bank can, and is able to demonstrate that it can, immediately use the stock of assets as a source of contingent funds that is available for the covered bank to convert into cash through outright sale or repo, to fill funding gaps between cash inflows and outflows at any time during the thirty (30)-day stress period, with no restriction on the use of the liquidity generated:
 - a. *Encumbrance and transferability of the liquid assets*
 - i. The liquid asset must be unencumbered. It should neither be pledged, explicitly or implicitly, to secure, collateralize, or credit-enhance any transaction¹.
 - ii. No operational constraint that may impede the monetization of the liquid asset must be attached to it, such as, but not limited to:
 - (1) Whether the monetization of the asset would directly conflict with another business or risk management strategy of the covered bank. For example, an asset should not be included in the stock if the sale of that asset, without replacement throughout the thirty (30)-day period, would remove a hedge that would create an open risk position to the covered bank in excess of internal limits;
 - (2) Potential differences in financial market conventions in other jurisdictions, where applicable (e.g., settlement period, processing time, etc.) that affect timely monetization of the asset; and
 - (3) Whether the asset is internally designated to cover operational costs (e.g., rents, salaries, facility maintenance, etc.).
 - iii. The liquid asset received, such as those in SFTs or as collateral for derivatives transaction that is not segregated, must not have been rehypothecated and is legally and contractually available for the covered bank's use.
 - iv. Assets or liquidity generated from said assets, which have been received under right of rehypothecation or under brokering agreements, shall be excluded from the covered bank's stock of HQLA if the beneficial owner has the contractual right to withdraw those assets during the LCR period.
 - b. *Capability to monetize the HQLA*
 - v. The covered bank must implement policies, procedures and appropriate systems that establish the proper authority and operational capacity of a liquidity management function (e.g., the treasurer) to monetize any HQLA at any point in the thirty (30)-day stress period. To ensure effective monetization from an operational perspective, said function must have:

¹ If a covered bank has deposited, pre-positioned or pledged Level 1, Level 2 and other assets in a collateral pool and no specific securities are assigned as collateral for any transactions, it may assume that assets are encumbered in order of increasing liquidity value in the LCR, i.e., assets ineligible for the stock of HQLA are assigned first, followed by Level 2 assets, and finally Level 1.

- (1) Continuous authority to invoke the contingency funding plan of the covered bank when deemed necessary;
 - (2) Access to all necessary information to execute monetization of any HQLA;
 - (3) Control to any HQLA at any time. Control must be evidenced either by maintaining the assets in a separate pool managed by the function with the sole intent for use as a source of contingent funds, or by demonstrating that the function can monetize the asset at any point in the thirty (30)-day stress period; and
 - (4) Access and control over the monetization proceeds such that the funds will be available to the function throughout the thirty (30)-day stress period without directly conflicting with another business or risk management strategy of the covered bank.
- vi. The covered bank, as led by the liquidity management function, must demonstrate its operational capability to monetize the HQLA, through repo or outright sale to the market, by:
- (1) Implementing policies that set out the approach to periodic monetization of its HQLA, which are consistent with existing regulatory standards and accounting principles;
 - (2) Establishing and maintaining appropriate procedures and systems to monetize any of the covered bank's HQLA at any time in accordance with the relevant standard settlement periods and procedures for the asset class; and
 - (3) Periodically monetizing a sample of HQLA in order for the covered bank to test its access to the market, the effectiveness of its processes for monetization, the availability of the assets, and to minimize the risk of negative signaling during a period of actual stress.
- Such periodic monetization may be carried out through the ordinary business activities of the covered bank or be done without reference to its day-to-day liquidity needs depending on the liquidity profile exhibited by the HQLA.
- The asset must be monetized in varying amounts, at varying durations in case of repos, and in various related trading or financing markets in which the covered bank has access to. The cumulative effect of said periodic monetization over any twelve (12) month period must reasonably reflect a representative proportion of the minimum required HQLA, including with respect to asset type, maturity, and counterparty characteristics.
- vii. The covered bank must implement policies and procedures and maintain systems that monitor the current market value, as well as the composition of the stock of HQLA as to:
- (1) Identification by legal entity, location, currency, custodial account, or other relevant identifying factors;
 - (2) Appropriate diversification within asset classes (except for cash, government securities, and accounts with the Bangko Sentral) by asset type, counterparty, issuer, currency, borrowing capacity, or other factors associated with the liquidity risk of the assets; and
 - (3) Continuous qualification as eligible HQLA.

(2) Calculation and composition of HQLA

10. Two (2) categories of eligible assets¹, which must be held by the covered bank on the first day of the thirty (30)-day stress test period irrespective of residual maturity, shall be included in the stock of HQLA. The highest quality liquid assets, the Level 1 assets, shall be included without limit, while other HQLA, the Level 2 assets, can only comprise up to forty percent (40%) of the stock.
11. The calculation of the stock of HQLA, specifically the forty percent (40%) cap on Level 2 assets, must take into account the required haircuts, as applicable, and the assumed unwinding of all short-term SFTs and collateral swap transactions maturing within thirty (30) calendar days that involve the exchange of HQLA. The details of the adjustment on calculation of the stock of HQLA are provided in *Annex B*.

¹ To qualify as HQLA, the assets must satisfy the asset and market liquidity characteristics, and the operational requirements for monetization eligibility criteria.

12. The specific individual assets within an asset class that would be considered as liquid and readily-marketable shall be determined in accordance with the liquidity metrics. However, the designation of these specific individual assets as HQLA is not fixed and absolute as the liquidity characteristics and/or the liquidity derived from these assets that qualify them under this criterion may change over time.
13. If a liquid asset will no longer qualify as HQLA during the immediate LCR period, the covered bank shall be allowed to keep such liquid asset as HQLA during the said LCR period. This would give the covered bank additional time to adjust its stock of HQLA as needed or to replace the liquid asset.
14. For purpose of LCR, assets included in the stock of HQLA should be measured at its current market value¹. However, in case the covered bank hedges the market risk associated with the eligible HQLA, the current market value of the HQLA must be reduced by the outflow amount that would arise if the hedge were to be closed out early (in the event of the asset being sold).
15. For purpose of computing the consolidated LCR, the qualifying HQLA that are held at the branch/es abroad of domestic covered banks or subsidiary level (where applicable) shall be counted towards the stock of HQLA in an amount up to the total net cash outflows of said branch or subsidiary that are included in the consolidated LCR: *Provided*, That the HQLA are freely available and transferrable (i.e., without any regulatory, legal, tax, accounting or other impediment) to the parent covered bank for monetization.

(a) Level 1 Assets

16. Level 1 assets shall not be subject to any haircut under the LCR. These are not limited to the following asset classes:
 - a. Cash on hand;
 - b. Covered bank reserves in the Bangko Sentral;
 - c. Overnight and term deposits² with the Bangko Sentral, including reserve repos where the Bangko Sentral is the counterparty; and
 - d. Eligible securities representing claims on or guaranteed³ by -
 - i. The Philippine National Government (NG) and the Bangko Sentral⁴; or
 - ii. sovereigns, central banks, or PSEs of foreign countries, or by multilateral organizations, that are assigned a 0% risk weight under the Basel II Standardized Approach for credit risk, and are not an obligation by a covered bank or any of a covered bank's financial allied undertakings⁵.

(b) Level 2 Assets

17. Specific haircuts shall be applied to each Level 2 asset held in the stock. Level 2 assets are limited to the following asset classes:

Level 2 Asset	Haircut
a. Eligible securities representing claims on or guaranteed by LGUs, GOCCs, by sovereigns, central banks, or PSEs of foreign countries, or by MDBs, that are assigned with the following risk weight under the Basel II Standardized Approach for credit risk, and are not an obligation by a covered bank or any of a covered bank's financial allied undertakings ⁵ :	
i. Twenty percent (20%)	15%
ii. Fifty percent (50%)	50%
b. Eligible corporate debt securities (including commercial papers) ⁶ that are assigned with the following long-term credit rating ⁷ by a third party credit	

¹ Eligible HQLAs that are recognized at book value or at amortized cost such as securities designated as "held-to-maturity" must be included in the HQLA amount calculation at current market value.

² To the extent allowed to be drawn down in times of stress.

³ Securities which are guaranteed by the Philippine NG but were issued and remain as liabilities of a covered bank will not qualify for the stock of HQLA. The only exception is when the covered bank also qualifies as a GOCC with the highest credit quality, in which case, the securities issued by said covered bank could qualify for Level 2 assets if all necessary conditions are satisfied.

⁴ Issuances in foreign currencies shall be included in the stock to the extent of the covered bank's net cash outflows in that specific foreign currency.

⁵ For LCR purpose, a holding company shall only be deemed a financial corporate and/or a financial allied undertaking if the holding company is primarily engaged in financial intermediation or in auxiliary financial activities that are closely related to financial intermediation.

⁶ Corporate debt securities (including commercial paper) in this respect include only plain-vanilla assets which valuation is readily available based on standard methods and does not depend on private knowledge, i.e., these do not include complex structured products or subordinated debt.

⁷ In the absence of a long-term rating, a short-term rating equivalent in quality to the long-term rating shall be used. In case the security does not have a credit assessment by a recognized third party credit assessment agency, an internal rating equivalent to the probability of default corresponding to the required long-term credit rating shall be applied. In cases where there are two or more ratings which map into different risk weights, the higher of the two lowest risk weights should be used. External credit assessments for one entity within a corporate group cannot be used to proxy for the credit assessment of other entities within the same group. Such other entities should secure their own ratings.

assessment agency recognized by the Bangko Sentral ¹ , and are not issued by a covered bank or any of a covered bank's financial allied undertakings ² :	
i. At least AA- or its equivalent	15%
ii. Between A+ and BBB- or their equivalent	50%
c. Eligible common equity shares that are included in the main index of an organized exchange, and are not issued by a covered bank or any of a covered bank's financial allied undertakings ² .	50%

Further, the Level 2 assets shall meet the metrics set out in Annex A-1, except for securities representing claims on or guaranteed by sovereigns, central covered banks and MDBs.

C. Total Net Cash Outflows

18. The total net cash outflows, which should include interests and installments that are expected to be received and paid during the LCR period, are calculated as follows:

$$\text{Total net cash outflows over the next thirty (30) calendar days} = \text{Total expected cash outflows} - \text{Min \{total expected cash inflows; seventy-five percent (75\%) of the total expected cash outflows\}}$$

19. a. The bank is not allowed to double count items in the calculation of the LCR. If a liquid asset is included as part of the stock of high-quality liquid assets (HQLA) (which is the numerator), the cash inflows associated with that liquid asset should no longer count as part of the total expected cash inflows (which is part of the denominator).
- b. Cash flows arising from Foreign Exchange (FX) spot transactions that involve the full exchange of principal amounts need not be reported as a cash flow in determining compliance with the LCR in single currency. However, cash flows for FX spot transactions shall be reported in their original currency at gross amounts in determining compliance with the LCR in significant currency.
20. Where there is potential that a liability or obligation could be counted in multiple outflow categories (e.g., committed business facilities granted to cover debt maturing within the thirty (30)-calendar day period), only such liability or obligation that will yield the maximum amount of expected cash outflow must be included in the calculation of total expected cash outflows, except when a specific outflow treatment is clearly prescribed herein.
21. Cash flows arising from purchase/ sale of non-HQLA that are executed but not yet settled at the LCR measurement date shall count towards other cash outflows/ inflows. Outflows and inflows of HQLA- type assets that are or will be excluded from the covered bank's stock of HQLA due to operational requirements are treated like outflows or inflows of non-HQLA.
22. In calculating cash outflows and inflows, if considered to mature within the LCR period, the covered bank shall make the most conservative assumptions for determining the maturity or transaction date for an instrument or transaction:
- a. In general, the maturity of an instrument or obligation that would result in an outflow amount must be assumed to occur on the earliest possible contractual maturity date or the earliest possible date the obligation could be fulfilled; while the maturity of an instrument or transaction that would result in an inflow amount must be assumed to occur on the latest possible contractual maturity date or the latest possible date the transaction could occur;
- b. With respect to any option that would modify the maturity date, either explicit or embedded in the instrument or transaction, the covered bank shall assume that the option would be exercised at the earliest possible date in case of an outflow, and at the latest possible date in case of an inflow. In the event of an actual financial stress, however, the covered bank shall be allowed not to exercise the option and to treat the original maturity date of the instrument or transaction as the maturity for purpose of computing the LCR: *Provided*, That the decision not to exercise the option would not subject the covered bank to any legal or reputational risk;
- c. If an option to adjust the maturity date is subject to a notice period, the covered bank must determine, for cash outflows, the earliest possible contractual maturity date regardless of the notice period; and for cash inflows, the latest possible contractual maturity date based on the borrower using the entire notice period;

¹ The list of third party credit assessment agencies and the mapping of ratings given by these rating agencies are in Part IV.C of Appendix 59.

² For LCR purpose, a holding company shall only be deemed a financial corporate and/or a financial allied undertaking if the holding company is primarily engaged in financial intermediation or in auxiliary financial activities that are closely related to financial intermediation

- d. In the absence of a specific maturity date, i.e., there is no defined maturity or is an open maturity, the covered bank must consider the instrument or transaction to mature within the LCR period for cash outflows calculation; and after the LCR period for cash inflows calculation.

(3) Cash Outflows

23. When the covered bank, at LCR measurement date and in accordance with trade rules or market conventions, has specifically pre-positioned or deposited cash or any asset with a clearing and settlement system or with another financial institution to cover an obligation or settle a transaction that is set to mature within the LCR period, the cash outflow related to the obligation or transaction shall be excluded from cash outflow calculation: *Provided*, however, That the cash or any asset pre- positioned or deposited is neither treated as cash inflow nor counted in the stock of HQLA.
24. Funds subject to special arrangements whereby cash balances are cleared and transferred into a main account, other than those maintained within the covered bank, at the end of each day or within the LCR period (e.g., the Treasury Single Account System) shall automatically receive a 100% outflow rate.

(a) Deposits

25. Regardless of maturity, all deposits, unless otherwise excluded under the cases specified in the succeeding paragraph, shall be included in the calculation of total expected cash outflows. These accounts are categorized either as retail or wholesale, with wholesale accounts classified as either operational or non-operational, with different outflow rates assigned accordingly. To capture the relative volatility of a deposit account during a period of stress, the outflow rates for retail deposits are calibrated on a per account basis. Wholesale operational and non-operational deposits, on the other hand, receive outflow rates that are based on the established operational relationship of the depositor with the covered bank.
26. A deposit account with residual maturity or withdrawal notice period of greater than thirty (30) calendar days may be excluded from the calculation of the total expected cash outflows under the following circumstances:
 - a. The deposit is contractually pledged to the covered bank as collateral to secure a credit facility or loan, where:
 - i. the loan will not mature or be settled during the LCR period; and
 - ii. the pledge or hold-out arrangement is subject to a legally enforceable contract disallowing withdrawal of the deposit before the loan is fully settled or repaid.

Said exclusion, however, does not apply to a deposit which is pledged against an undrawn facility, in which case the higher expected cash outflow between the undrawn facility or the pledged deposit shall be used; or
 - b. The depositor has no contractual or legal discretion to withdraw said deposit or pre- terminate the account within the thirty (30)-day horizon of the LCR (e.g., negotiable certificates of time deposits).
- (i) *Retail deposits: 5%, 10% or 15% run-off rate*
27. Retail deposits shall be assigned with specific run-off rates depending on the outstanding balance per account:

Outstanding Balance Per Account	Run-off Rate
P500,000 and below	5%
P500,000.01 to P4,000,000	10%
Over P4,000,000	15%

- (ii) *Wholesale deposits: Operational deposits: 30% run-off rate*
28. Operational deposits, which are maintained by wholesale clients to avail the operational services offered by the covered bank, shall receive a thirty percent (30%) outflow rate.
29. For LCR calculation, all current and savings (CASA) accounts, including negotiable order of withdrawal (NOW) accounts, shall automatically be categorized as operational deposits considering that said accounts are generally characterized by the following:
 - a. The client is reliant on the covered bank as an independent third party that provides the operational service that will fulfill the client's normal business operation, rendering it unlikely for the client to transfer its banking activity to another covered bank within thirty (30) days;

- b. The funds held in this account are utilized for the operational needs of the client and no excess balance is assumed to be retained for the purpose of earning interest, or any economic incentive (i.e., rewards, rebates, reduction of fees or charges for other covered bank services, etc.) from the covered bank; and
 - c. The operational service is usually governed by a legally binding written agreement, which can only be terminated by the client either by giving prior notice of at least thirty (30) days or by paying significant switching costs (such as those related to transaction, information technology, early termination or legal costs) if the operational deposit is withdrawn before thirty (30) days.
30. In the case of the Philippine branch of a foreign covered bank, the amount of “Net Due To Head Office/Branches/Agencies Abroad” account shall be treated as operational deposit for LCR purpose. The “Due From” and “Due To” accounts are essentially clearing accounts through which the head office and branch transactions of the foreign bank are cleared, hence, for LCR purpose, the “Net Due To” balance shall be assumed as operational in nature. However, accumulated “Unremitted Profits” and “Losses in Operation” shall not be included in the LCR calculation considering that these balances are part of regulatory capital for purposes of computing risk-based capital adequacy ratio and adjusted net worth.
31. Deposits received specifically for clearing and settlement of foreign exchange transactions (e.g., amount of funding provided by the Philippine Domestic Dollar Transfer System [PDDTS] participants) shall be classified as operational accounts. These accounts are deemed maintained with the settlement/depository covered bank solely for effecting credits and debits arising from foreign exchange transactions, without having to go through a correspondent covered bank in the country where the foreign currency to be settled originated.
- (iii) *Wholesale deposits: Non-Operational deposits: 20%, 40% or 100% run-off rate*
32. The covered bank shall apply a run-off rate of twenty percent (20%) on term and other deposits of wholesale clients not classified as operational, provided the outstanding balance is fully insured by the PDIC. Otherwise, said accounts shall be assigned with the following run-off rates:

Outstanding Balance Per Account	Run-off Rate
Philippine NG; LGUs; GOCCs; Bangko Sentral; sovereigns, central banks, PSEs of foreign countries; MDBs	40%
Non-financial corporates	40%
Other entities not included in the prior categories	100%

33. Irrespective of outstanding balance, the term and other non-operational deposits provided by covered banks, financial corporates, trust and other fiduciaries, beneficiaries, conduits and special purpose vehicles (SPVs), and by affiliated entities of the covered bank shall receive a 100% run-off rate at all times.
- (iv) *Deposits received under correspondent banking and brokering services agreements*
34. The criterion for an operational deposit where the client has a substantive dependency on the continued operation of the deposit account, which serves as a practical impediment to closing or moving such account to another covered bank, is not consistently the case with correspondent banking and brokering services activities. Thus, deposits arising from correspondent banking and brokering services will be treated as wholesale non-operational deposit accounts.
35. Customer cash balances arising from the provision of brokering services should be considered separate from any required segregated accounts related to client protection regimes, and should not be netted against other customer exposures included in this LCR standard.

(b) Unsecured wholesale funding

36. The expected cash outflow that will be calculated for other unsecured wholesale funding shall generally comprise of:
 - a. Any obligation or instrument issued by the covered bank that is not eligible as capital, and hence, treated as borrowings which the covered bank expects to fulfill within the LCR period;
 - b. All unsecured wholesale funding that is callable, or has an earliest contractual maturity date within the next thirty (30) calendar days; and
 - c. Unsecured wholesale funding with undetermined maturity.
37. A range of outflow rates is assigned to this wholesale fund depending on the assumed stability of the funding in times of stress, i.e., in consideration of the sensitivity of the fund providers to the rate offered and to the credit quality and solvency of the borrowing bank, the type of wholesale client and their level of sophistication. However, this category excludes:

- a. Debt instruments issued by the covered bank exclusively in the retail market, such that those instruments cannot be bought and held by parties other than retail clients, which shall be treated appropriately under the retail funding category; and
 - b. Liabilities and obligations related to derivative contracts, which outflow calculation shall be taken up under the derivatives contracts category.
- (i) *Unsecured wholesale funding provided by the Philippine NG, LGUs, GOCCs, Bangko Sentral; by sovereigns, central banks, PSEs of foreign countries; by MDBs and by non-financial corporates: 40% outflow rate*
38. The covered bank shall apply a cash outflow rate of forty percent (40%) on all unsecured funds received from the abovementioned entities.
- (ii) *Unsecured wholesale funding from covered banks, financial corporates and from other wholesale clients: 100% outflow rate*
39. Unsecured funding provided by covered banks, financial corporates, trust and other fiduciaries, beneficiaries, conduits and SPVs, by affiliated entities of the covered bank, and by other entities not included in the prior category shall receive a 100% outflow factor.

(c) Secured funding

40. The cash outflow on secured funding shall be calculated based on the amount of funds raised through the transaction and not on the value of the underlying collateral. In case of collateral swaps or collateral lending transactions, the outflow amount shall be based on the current market value of the asset received.
41. The outflow rates to be applied to outstanding secured funding transactions maturing within the thirty (30)-calendar day period shall depend on the quality of the underlying collateral and/or the counterparty, as follows:

Underlying Collateral and/or Counterparty	Outflow Rate
Level 1 assets <i>OR</i> funding provided by the Bangko Sentral	0%
Level 2 assets with 15% haircut	15%
Non-HQLA <i>AND</i> funding provided by the Philippine NG or by LGUs that are assigned with 20% credit risk weight or lower, or by MDBs	25%
Level 2 assets without 50% haircut	50%
All other maturing secured funding transactions not specified in the prior categories	100%

(d) Derivatives contracts

42. The bank shall calculate expected contractual derivative cash inflows and outflows in accordance with existing valuation methodologies. A 100% outflow factor shall be assigned to net cash outflows within the LCR period from each derivative contract maturing or expected to be pre-terminated within the LCR period.
43. Where derivative payments are collateralized by HQLA, the cash outflows shall be calculated net of any corresponding cash or collateral inflows that would result, all other things being equal, from contractual obligations for cash or collateral to be posted to the bank: *Provided*, That the bank is legally entitled and operationally capable to re-use the collateral in new cash raising transactions once the collateral is received. This is in line with the principle that banks should not double count liquidity inflows and outflows.
44. Options shall be assumed to be exercised when they are "in the money" to the option buyer.
45. Additional cash outflow¹ for liquidity requirements resulting from contingent obligations embedded in derivative contracts, if any, shall be included in the calculation of total expected cash outflows, with outflow rates assigned as follows:
- (i) *Potential valuation changes on posted collateral securing derivative and other transactions: 20% outflow rate*
46. When a mark-to-market exposure from a derivative position is secured by securities other than those that qualify as Level 1 assets, an additional stock of HQLA shall be maintained by the bank posting such collateral to cover the potential loss of market value for these securities. Twenty percent (20%) of the value of such posted collateral, net of collateral received on a counterparty basis, shall be included in the calculation of total expected cash outflows: *Provided*, That the collateral received is not subject to restrictions on re-use or

¹ If a bank posted a pool of HQLA and non-HQLA collateral to secure derivative and other transactions, the bank shall compute the collateral requirement in the order of increasing liquidity value of said assets, consistent with the methodology set out in footnote 4 of this standard.

rehypothecation. This 20% shall be calculated based on the amount required to be posted as collateral after applying the relevant haircut prescribed for these assets. Any collateral that is in a segregated margin account can only be used to offset outflows that are associated with payments that are eligible to be offset from that same account.

(ii) Market valuation changes on derivative or other transactions: 100% outflow rate

47. Potential valuation changes of derivative or other transactions, which are subject to collateral requirements, require additional outflows. Using the historical look-back approach, the outflows shall be based on the fluctuations in the total current market value amount of collaterals posted for all derivatives for each day within consecutive periods of thirty (30) days. The amount of additional expected cash outflows shall be equal to the largest difference between the highest and the lowest amount of accumulated collateral posted during any thirty (30)-day period in the last 24 months¹⁵ preceding the date of the LCR calculation. The collateral amounts pledged towards the bank shall not be taken into account.

(iii) Downgrade triggers embedded in financing transactions, derivatives and other contracts¹: 100% outflow rate

48. As covered bank faces potentially substantial liquidity risk exposures to the valuation changes of collaterals posted by the covered bank on its derivatives and other transactions, the increased liquidity needed to cover these market valuation changes should be included in the LCR. Using the historical look-back approach, the collateral outflows shall be based on the fluctuations in the total current market value amount of collaterals posted for all derivatives for each day within consecutive periods of thirty (30) days. The amount of additional expected cash outflows shall be equal to the largest difference between the highest and the lowest amount of accumulated collateral posted during any thirty (30)-day period in the last twenty four (24) months² preceding the date of the LCR calculation. The collateral amounts pledged towards the covered bank shall not be taken into account.

(iv) Excess non-segregated collateral held by the covered bank: 100% outflow rate

49. An additional 100% cash outflow based on the market value of the collateral held must be calculated as part of the total expected cash outflows in cases where the bank holds a collateral that:
- a. Can be contractually called at any time by the counterparty because the collateral posted exceeds the counterparty's current collateral requirement under the contract; and
 - b. Is not segregated from the bank's other assets (such that the bank holding the collateral may have already rehypothecated the asset or counted the same as HQLA).

(v) Contractually required collateral which are not yet posted: 100% outflow rate

50. For a collateral that is contractually due but the posting of which is not yet demanded by the counterparty, the bank shall increase the total expected cash outflows by an amount equivalent to 100% of the market value of the collateral.

(vi) Collateral substitution to non-HQLA or lower-quality HQLA³: 100% outflow rate

51. When a contract for a transaction allows the HQLA collateral received that has not been segregated to be substituted by other collateral without the consent of the bank, an additional outflow shall be included in the calculation of the total expected cash outflows. The basis for calculating the amount of the outflow depends on the type of asset that may serve as a potential substitute under the contract. Where the potential substitute collateral is a non-HQLA, the amount of outflow shall be equivalent to 100% of the market value of the HQLA collateral held by the bank. Where the potential substitute is another HQLA but of a lower quality (e.g., a Level 1 asset is potentially substituted by a Level 2 asset), the amount of the outflow shall be equivalent to the market value of the collateral received multiplied by the difference between the haircuts of the collateral received and the potential substitute collateral.

(e) Loss of funding from structured financing instruments (SFIs)

(i) Asset-backed securities and other SFIs allowed under existing regulations: 100% outflow rate

52. Under the assumption that the funding required to refinance the bank-issued SFIs will not be available, the covered bank shall assign a 100% outflow rate to the total outstanding amount of these instruments maturing within the thirty (30)-day period.

¹ This applies to contracts governing derivatives and other transactions that have clauses that require the posting of additional collateral, drawdown of contingent facilities, or early repayment of existing liabilities upon the covered bank's downgrade by a recognized credit rating organization. Contracts that include early termination agreements if a triggering event occurs (e.g., credit rating downgrade) shall not be covered by this requirement.

² The two (2)-year observation period consists of approximately 730 periods of thirty (30)-day, partly overlapping, rolling window.

³ This provision for additional liquidity requirement shall be applicable only when the received HQLA collateral actually counts toward the covered bank's stock of HQLA, and its maturity value after applying the respective haircut is lower than the liquidity value of the potential collateral substitution.

- (ii) *Asset-backed commercial paper, conduits, securities investment vehicles (SIVs) and other such financing facilities allowed under existing regulations: 100% outflow rates*

53. To take account of the potential liquidity risks pertaining to the covered bank's own structured financing facilities that include the issuance of short-term asset-backed commercial paper, the covered bank shall assume that its ability to refinance the outstanding maturing instrument will be uncertain and shall include in the calculation of expected cash outflows 100% of the amount of the maturing debt.
54. In cases where the documentation associated with the financing arrangement contractually includes derivatives or derivative-like components that allow the "return" of assets, or that require the covered bank (as original asset transferor) to provide liquidity, effectively ending the financing arrangement (liquidity puts) within the thirty (30)-day period, the covered bank shall increase its expected cash outflows by another 100% based on the amount of assets that could potentially be returned, or on the liquidity required.
55. Where the structured financing activities of the covered bank are conducted through a special purpose entity (such as a special purpose vehicle, conduit or structured investment vehicle), the covered bank should look through to the maturity of the debt instruments issued by the entity and to any embedded options in financing arrangements that may potentially trigger the "return" of assets or the need for liquidity, irrespective of whether or not the SPV is consolidated.

(f) Drawdowns on committed business facilities

56. For LCR purpose, committed business facilities shall include: (a) lending commitments (e.g., Committed Credit Line for Commercial Paper Issued); (b) direct credit substitutes and transaction-related contingencies that are assigned 100% and fifty percent (50%) credit conversion factors under the Basel II Standardized Approach for credit risk, respectively; and (c) all other committed funding facilities extended by the covered bank excluding credit card lines and trade-related guarantees.
57. For purpose of expected cash outflows calculation, all committed obligations that are assumed to be drawn will remain outstanding at the amounts assigned throughout the duration of the stress test, regardless of maturity. The currently undrawn portion of each committed obligation shall be calculated net of HQLA collateral, if any¹: *Provided*:
- The covered bank is legally entitled and operationally capable to re-use the collateral in new cash raising transactions once the facility is drawn; and
 - There is no undue correlation between the probability of drawing the facility and the market value of the collateral.

The collateral can be netted against the outstanding amount of the committed obligation to the extent that this collateral is not already counted in the stock of HQLA.

58. To calculate the expected cash outflows, the covered bank shall assume the amount of contractual loan drawdowns from irrevocable committed obligations and the estimated drawdowns from conditionally revocable obligations within the thirty (30)-day period using the following drawdown rates against the undrawn portion of these committed obligations:

Counterparties	Drawdown Rate
Retail clients	5%
Philippine NG; LGUs; GOCCs; sovereigns, central banks, PSEs of foreign countries; MDBs	10 %
Non-financial corporates	10%
Covered banks subject to prudential supervision	40%
Financial corporates, trust and other fiduciaries, beneficiaries, SPEs conduits and SPVs (excluding covered bank's own structured financing facilities)	100 %
Other entities not included in the prior categories	100 %

(g) Other contractual obligations within a thirty (30)-day period

59. The covered bank shall calculate additional 100% cash outflows on each of the following contractual obligation to extend funds within the next thirty (30) calendar days:
- Any contractual lending obligations to financial institutions not captured elsewhere in this standard;

¹ The HQLA in this case could have already been posted as collateral by the counterparty to secure the facility or is contractually obliged to be posted when the counterparty will draw down the facility.

- b. If the total of all contractual obligations to extend funds to retail and non-financial corporates within the next thirty (30) calendar days (not captured in the prior categories) exceeds fifty percent (50%) of the total contractual inflows due in the next thirty (30) calendar days from these clients, the difference should be reported as a 100% outflow;
 - c. Forward reverse repos (with a binding obligation to accept) that start within and mature beyond the LCR period, where the cash outflow should be netted against the market value of the collateral received after deducting the applicable haircuts;
 - d. In case of forward collateral swaps, the net amount between the market values of the assets extended and received after deducting the haircuts applied to the respective assets in the LCR counts towards “other contractual outflows” or “other contractual inflows” depending on which amount is higher;
 - e. Any other contractual cash outflows such as outflows to cover unsecured collateral borrowings, uncovered short positions¹, dividends or contractual interest payments, with explanation given as to what comprises this bucket. In case, however, the covered bank’s short position is being covered by a collateralized securities financing transaction, the covered bank should assume the short position will be maintained throughout the thirty (30)-day period and thus, will receive a 0% outflow rate.
60. Contractual obligations by the covered bank related to operating costs (such as rents, salaries, utilities, and other similar payments) are not included in the calculation of LCR.

(h) Other contingent funding obligations

61. These include products and instruments for which the client or holder has specific expectations regarding the liquidity and marketability of the product or instrument and for which failure to satisfy client expectations in a commercially reasonable manner would likely cause material reputational damage to the covered bank or otherwise impair ongoing viability.
62. Other contingent funding obligations referred to in this category shall consist, among others, of the following:
- a. Unused portions of commitments to extend credit through credit cards;
 - b. Guarantees issued related to trade finance obligations directly underpinned by the movement of goods and/or the provision of services;
 - c. Unconditionally revocable “uncommitted” credit lines and business facilities;
 - d. Joint ventures or minority investments in entities which are not consolidated for financial reporting purposes but there is expectation that the covered bank will be the main liquidity provider when the entity is in need of funding; and
 - e. Non-contractual contingent funding obligations related to:
 - i. debt repurchases of the covered bank’s own debt or that of related conduits, SIVs and other such financing facilities;
 - ii. structured products where customers anticipate ready marketability;
 - iii. managed funds such as money market funds and other types of collective investment funds that are marketed by the covered bank with the objective of maintaining stable value²; and
 - iv. outstanding debt securities (unsecured and secured, term as well as short-term) having maturities greater than thirty (30) calendar days, where the covered bank (or its affiliated entity) is the issuer, the market maker or the dealer, or has acted as an originator, sponsor, marketing or selling agent, to cover the potential repurchase of such outstanding securities.
63. To account for the potential liquidity exposure to these contingent liabilities, a minimum of three percent (3%) drawdown based on the contracted amount, on the undrawn portion of the facility, or on the value of the fund or debt instruments, whichever is applicable, shall be calculated as additional expected cash outflows. However, when there is reasonable expectation based on the covered bank’s assessment that the contingent outflow will materialize within the LCR period, thereby rendering it necessary for the covered bank to provide funding support or to extend funds; or the Bangko Sentral has determined the covered bank’s

¹ In the case of a covered bank’s short positions, if the short position is being covered by an unsecured security borrowing, the covered bank should assume the unsecured security borrowing of collateral from financial market participants would run-off in full, leading to a 100% outflow of either cash or HQLA to secure the borrowing, or cash to close out the short position by buying back the security.

² This excludes funds managed by the covered bank’s trust department.

systems and processes for identifying, measuring and monitoring contingent funding risks to be inadequate and ineffective in assessing the related risks that could potentially materialize, the full amount of the contingent funding obligation will receive a 100% outflow rate.

64. For non-contractual obligations where customer short positions are covered by other customers' collateral that are not qualified as HQLA, a fifty percent (50%) run-off factor of the contingent obligations shall be calculated in the total cash outflows under the assumption that the covered bank may be obligated to find additional sources of funding for these positions in the event of client withdrawals.
65. To estimate the potential liquidity demand associated with these contingent funding obligations, the covered bank must have a robust framework (i.e., procedures, systems and tools) that at a minimum, allows assessment of contingent funding risks, as follows:
 - a. Identify the nature of the contingent obligation and credit worthiness of the counterparty, as well as the exposures to business and geographical sectors, as counterparties in the same sectors may be affected by stress at the same time;
 - b. Measure the normal level of cash outflows arising from the relevant off-balance sheet instruments under routine conditions and then estimate the scope of increase in these outflows during periods of stress;
 - c. Analyze the liquidity trigger events and the changes to underlying risk factors (e.g., changes in economic variables or conditions, credit rating downgrades, country risk issues, specific market disruptions and the alteration of contracts by governing legal, accounting, or tax systems and other similar changes) that would result to liquidity draws on these off-balance sheet positions. This analysis should include appropriate assumptions on the behavior of both the covered bank and its counterparties; and
 - d. Determine which among these contingent obligations and counterparties are of particular importance due to their prevalent use of liquidity, both under normal and adverse market conditions.

(4) Cash inflows

66. *Cap on total inflows.* In order to prevent covered banks from relying solely on anticipated inflows to meet their liquidity requirement when there is a possibility that a portion of expected cash inflows may become unavailable in a short-term stressed environment, the amount of inflows that can offset outflows is capped at seventy-five (75%) of total expected cash outflows. This requires that at a minimum, at least one-quarter of the total expected cash outflow amount should be covered by HQLA.
67. When considering available cash inflows, the covered bank should only include inflows (including interest payments and installments) from outstanding exposures that are contractually due within the LCR period, and are fully performing and for which the covered bank has no reason to expect a default within the LCR period.
68. For LCR purpose, the following shall not be counted as cash inflows:
 - a. Market value of assets that already qualify in the stock of HQLA;
 - b. Deposits held at other financial institutions for operational purposes, such as for clearing, custody, and cash management purposes, including funds provided for clearing and settlement of foreign exchange transactions (e.g., deposits placed to facilitate PDDTS transactions). These deposits are necessary for operational reasons, and are therefore not available to the depositing bank to repay other outflows.
 - c. Amount of "Net Due From Head Office/Branches/Agencies Abroad" account in case of the Philippine branch of a foreign bank;
 - d. Payments from loans, receivables and other assets that are considered past due, or that the covered bank has reason to expect will become non-performing exposure within the LCR period;
 - e. Potential or contingent inflows from committed credit lines, business or other funding facilities that the covered bank holds at other institutions for its own purposes;
 - f. Amounts related to non-financial revenues; and
 - g. Amounts payable to the covered bank with respect to any transaction that has no specific contractual maturity date, i.e., no defined maturity or is open maturity, or that matures after the LCR period.

(a) Secured lending, including reserve repos¹ and securities borrowings

69. For secured lending maturing within the LCR period, the covered bank shall calculate the expected cash inflow using the following inflow rates applied to the outstanding amount of the secured lending transaction:

Maturing Secured Lending Transactions Backed by the Following Asset Category	Inflow Rate
Level 1 assets	0 %
Level 2 assets with 15% Haircut	15%
Level 2 assets with 50% Haircut	50%
Margin lending backed by all other collateral	50%
All other collaterals	100%

70. If the collateral obtained through reverse repo, securities borrowing, or collateral swap, which matures within the LCR period, is re-used (i.e., rehypothecated) and is used to cover short positions that could be extended beyond thirty (30) days, the covered bank should assume that such reverse repo or securities borrowing arrangements will be rolled-over. To reflect the need to continue to cover the short position or to re-purchase the relevant securities, no cash inflow will be expected, hence a 0% inflow rate.

(b) Loans, receivables and other credit facilities

71. The covered bank shall be assumed to continue to extend and roll-over loans and other credits to clients, either secured or unsecured, at a certain level even during times of stress. In this view, all payments (including interest payments and installments) shall be assumed to be received by the covered bank at a net inflow rate, as follows:

Counterparties	Inflow Rate
Retail clients	50%
Philippine NG; LGUs; GOCCs; sovereigns, PSEs of foreign countries; MDBs	50%
Non-financial corporate	50%
Covered banks; financial corporates; trust and other fiduciaries; beneficiaries; Bangko Sentral; and central banks of foreign countries	100%
Other entities not included in the prior categories	100%

72. For revolving credit facilities, the covered bank shall assume that the existing loan or financing is rolled over and that no principal or interest payment shall be received from the counterparty. However, in similar arrangements where the covered bank is not under obligation to extend credit and/or the covered bank reserves the right to revoke or withdraw the agreement and the facility in its sole and absolute discretion at any time, the principal and interest payments for the loan shall be assumed to be received by the covered bank at the foregoing net inflow rates.
73. In case of loans with no specific maturity, the covered bank shall include as cash inflows, at the rates prescribed above, the minimum payments of principal, fee or interest associated with the open maturity loan, *Provided*, That such payments are contractually due within the LCR period.

(c) Other cash inflows

74. The following instruments or transactions maturing within the LCR period shall receive a 100% inflow percentage:
- Deposits held at other financial institutions for non-operational purposes;
 - Deposits pledged against an undrawn credit line or business facility;
 - Cash balances arising from the provision of brokering services and similar arrangements;
 - Cash balances released from segregated accounts held for the protection of customer trading assets, *Provided*, That these segregated balances are maintained in HQLA;
 - Cash inflows associated with non- HQLA, as well with HQLA-type assets that are or will be excluded from the covered bank's stock of HQLA due to operational requirement;
 - Forward repos that start within and mature beyond the LCR period, where the cash inflow should be netted against the market value of the collateral extended after deducting the applicable haircuts; and

¹ This excludes reverse repo transactions where the Bangko Sentral is the counterparty, as such is already treated as HQLA.

- g. The sum of all cash inflows from derivatives transactions calculated in accordance with *paragraphs 42 to 44 under Section II.C – Total Net Cash Outflows*.

Part II. LCR Disclosure Requirements

1. In the quarterly published balance sheet, the covered bank, at a minimum, must publicly disclosed the: (i) total HQLA; (ii) total net cash outflows; and (iii) LCR ratio, based on the LCR position for the quarter.
2. On the covered bank's website or in its other published reports, the disclosure must be presented in a format following a common template (Annex C), and must contain the following minimum requirements:
 - a. Data must be reported as simple averages of quarterly observations over the last twelve (12) months. The number of data points used in calculating the average figures in the template must also be disclosed.
 - b. Sufficient qualitative discussion around the LCR to facilitate understanding of the results and data must be provided. Where significant to the LCR, the covered bank should discuss:
 - i. the main drivers of the LCR results and the evolution of the contribution of inputs to the LCR's calculation over time;
 - ii. intra-period changes as well as changes over time;
 - iii. the composition of HQLA;
 - iv. concentration of funding sources;
 - v. derivative exposures and potential collateral calls;
 - vi. currency mismatch in the LCR;
 - vii. a description of the degree of centralization of liquidity management and interaction between the covered bank's units; and
 - viii. other inflows and outflows in the LCR calculation that are not captured in the LCR common template but which the covered bank considers to be relevant for its liquidity profile.
3. The covered bank may also present additional information relevant to its business model that may not be adequately captured by the LCR standard. Additional quantitative information shall allow market participants to better understand and analyze any LCR figures disclosed while additional qualitative discussion of LCR results and its related components shall enable them to gain a more thorough understanding of the covered bank's internal liquidity risk management and positions. At the option of the covered bank, the following additional information may be provided:
 - a. Quantitative disclosures:
 - a. concentration limits on collateral pools and sources of funding (both products and counterparties);
 - b. liquidity exposures and funding needs at the level of individual legal entities, foreign branches and subsidiaries, taking into account legal, regulatory and operational limitations on the transferability of liquidity; and
 - c. balance sheet and off-balance sheet items broken down into maturity buckets and the resultant liquidity gaps.
 - b. Qualitative disclosures:
 - a. governance of liquidity risk management, including: risk tolerance; structure and responsibilities for liquidity risk management; internal liquidity reporting; and communication of liquidity risk strategy, policies and practices across business lines and with the board of directors;
 - b. funding strategy, including policies on diversification in the sources and tenor of funding, and whether the funding strategy is centralized or decentralized;
 - c. liquidity risk mitigation techniques;
 - d. an explanation of how stress testing is used; and
 - e. an outline of contingency funding plans.
4. The covered bank must also make available on its website, or through publicly available regulatory reports, an archive of all disclosure templates relating to prior reporting periods. Irrespective of the location of the disclosure, the minimum disclosure requirements must be presented in accordance with the format and template defined by this standard.

(Circular Nos. 1035 dated 15 March 2019, 996 dated 08 February 2018, 969 dated 22 August 2017, 930 dated 18 November 2016, and 905 dated 10 March 2016)

LIQUIDITY CHARACTERISTICS, CRITERIA AND METRICS

Characteristics		Criteria	Examples of metrics/measures
Asset characteristics	Asset quality	Probability of default	Ratings
			Spreads
			Price drops during stress
		Flight to quality (performance during distress)	Performance relative to risk-free asset
			Correlation with financial stress
		Volatility	Implied and actual volatility
	Transparency and standardization	Collateral eligibility	Eligible/haircuts at financial market infrastructures
			Across private counterparties
		Standardization	Small number of standardized product
			Standardized risk modeling
			Well-understood risk properties
		Price transparency	Pre-trade pricing broadly available
			Post-trade pricing broadly available
Market structure characteristics	Trading venues	Trading venues	Electronic (including hybrids)
			Exchange-traded
	Active and sizeable market	Size	Volumes (number of trades and peso value)
			Outstandings
		Related financing markets	Repo financing available
			Other secured/forward financing
		Market participation	Related hedging markets
Market liquidity	Liquidity	Depth/price impact of trading	Breadth of investors (low)
			Large number of active market maker
		Breadth	Amihud ratio (price changes relative to volume)
			Autocorrelations of returns
		Immediacy	Effective bid-ask spreads (ex post)
			Quoted bid-ask spreads (ex ante)
			Average number of trades per day
			Number of days with zero

(Circular No. 905 dated 10 March 2016)

LIQUIDITY METRICS FOR LEVEL 2 ASSETS

Pursuant to paragraph 17 of Part I.II of *Appendix 72*, a security must meet the following metrics to be eligible as a Level 2 Asset:

- (a) The security has a long term issuer rating that is investment grade or its equivalent;
- (b) The security is traded in the secondary market with an ample number of market participants on both the buying and selling side of transactions; and
- (c) There is a means to obtain market information on a security (i.e., bid, ask and done price). For peso securities, information on trade volume should also be available.

(Circular No. 996 dated 08 February 2019)

CALCULATION OF THE CAP ON LEVEL 2 ASSETS WITH REGARD TO SHORT-TERM SECURITIES FINANCING TRANSACTIONS

1. The formula for the calculation of the stock of HQLA is as follows:

$$\text{Stock of HQLA} = \text{Unadjusted Level 1 Assets} + \text{Unadjusted Level 2 Assets} - \text{Adjusted for 40\% cap on Level 2 Assets}$$

Where:

$$\text{Adjustment for 40\% cap} = \text{Max (Adjustment Stock of Level 2 Assets} - \frac{2}{3} * \text{Adjusted Stock of Level 1 Assets, 0)}$$

$$\text{Adjusted Level 1 Assets} = \text{Unadjusted Level 1 Assets} + \text{Level 1 assets lent or placed as collateral under short term}^1 \text{ secured funding, secured lending or collateral swap transactions} - \text{Level 1 assets borrowed or received as collateral under short-term}^1 \text{ secured funding, secured lending or collateral swap transactions}$$

$$\text{Adjusted Level 2 Assets} = \text{Unadjusted Level 2 Assets} + \text{Level 2 assets lent or placed as collateral under short-term}^1 \text{ secured funding, secured lending or collateral swap transactions} - \text{Level 2 assets borrowed or received as collateral under short-term}^1 \text{ secured funding, secured lending or collateral swap transactions}$$

Alternatively, the formula can be expressed as:

$$\text{Stock of HQLA} = \text{Unadjusted Level 1 Assets} + \text{Unadjusted Level 2 Assets} - \text{Max (Adjusted Stock of Level 2 Assets} - \frac{2}{3} * \text{Adjusted Level 1 Assets, 0)}$$

2. The calculation of the forty percent (40%) cap on Level 2 assets should take into account the impact on the stock of HQLA of the amounts of Level 1 and Level 2 assets involved in secured funding, secured lending and collateral swap transactions maturing within thirty (30) calendar days. The maximum amount of adjusted Level 2 assets in the stock of HQLA is equal to two-thirds of the adjusted amount of Level 1 assets after haircuts have been applied.
3. The adjusted amount of Level 1 assets is defined as the amount of Level 1 assets that would result after unwinding those short-term secured funding, secured lending and collateral swap transactions involving the exchange of any HQLA for any Level 1 assets (including cash) that meet, or would meet if held unencumbered, the operational requirements for HQLA.
4. The adjusted amount of Level 2 assets is defined as the amount of Level 2 assets that would result after unwinding those short-term secured funding, secured lending and collateral swap transactions involving the exchange of any HQLA for any Level 2 assets that meet, or would meet if held unencumbered, the operational requirements for HQLA.

(Circular Nos. 1035 dated 15 March 2019 and 905 dated 10 March 2016)

¹ Pertains to maturity date up to and including 30 calendar days.

LIQUIDITY COVERAGE RATIO DISCLOSURE TEMPLATE (In Single Currency, Absolute Amount)			THIS PORTION IS FOR REFERENCE ONLY. DO NOT INCLUDE IN THE TEMPLATE.	
NATURE OF ITEM	TOTAL UNWEIGHTED ¹ VALUE (AVERAGE)	TOTAL WEIGHTED ² VALUE (AVERAGE)	Relevant Paragraph(s) of Appendix 74a (Section – Paragraph)	Instructions for Completion of Template
STOCK OF HIGH-QUALITY LIQUID ASSETS (HQLA)				<p>Rows in the template are set and mandatory for all banks/QBs. The relevant paragraph(s) of the Consultative Draft as well as the LCR Reporting Template provide guidance on which relevant subcomponents of each category or line item are to be included in the calculation of each row.</p> <p>Values reported in the template must be averages of the observations of individual line items over the financial reporting period (i.e., the average of categories and the average LCR over the previous year of quarterly positions, irrespective of the financial reporting schedule). The averages are calculated after the application of any haircuts, outflow and inflow rates and caps, where applicable. For example:</p> <p><i>Total unweighted retail funding</i>_{Qi} =</p> $\frac{1}{T} \times \sum_{t=1}^T (Total \text{ unweighted retail funding})_t$ <p><i>Total weighted retail funding</i>_{Qi} =</p> $\frac{1}{T} \times \sum_{t=1}^T (Total \text{ weighted retail funding})_t$ <p>Where <i>T</i> equals the number of observations in period <i>Qi</i>.</p>
No value to be reported				
1. TOTAL STOCK OF HQLA		report calculated value		
EXPECTED CASH OUTFLOWS				
No value to be reported				
2. Deposits, of which:	Sum of lines 3 & 4	Sum of lines 3 & 4		
3. Retail funding	report calculated value	report calculated value		
4. Wholesale funding, of which:	Sum of lines 5 & 6	Sum of lines 5 & 6		
5. Operational deposits	report calculated value	report calculated value		
6. Non-operational deposits (all counterparties)	report calculated value	report calculated value		
7. Unsecured wholesale funding (all counterparties)	report calculated value	report calculated value		
8. Secured funding		report calculated value		
9. Derivatives contracts, of which:	Sum of lines 10 & 11	Sum of lines 10 & 11		
10. Outflows related to derivatives exposures (net)	report calculated value	report calculated value		
11. Outflows related to collateral requirements	report calculated value	report calculated value		
12. Structured financing instruments	report calculated value	report calculated value		

¹ Unweighted values must be calculated as outstanding balances maturing or callable within 30 days (for inflows and outflows).

² Weighted values must be calculated after the application of respective haircuts (for HQLA) or inflow and outflow rates (for inflows and outflows).

LIQUIDITY COVERAGE RATIO DISCLOSURE TEMPLATE (In Single Currency, Absolute Amount)			THIS PORTION IS FOR REFERENCE ONLY. DO NOT INCLUDE IN THE TEMPLATE.	
NATURE OF ITEM	TOTAL UNWEIGHTED ¹ VALUE (AVERAGE)	TOTAL WEIGHTED ² VALUE (AVERAGE)	Relevant Paragraph(s) of Appendix 74a (Section – Paragraph)	Instructions for Completion of Template
13. Committed business facilities (all counterparties)	report calculated value	report calculated value		
14. Other contractual obligations within a 30-day period	report calculated value	report calculated value		
15. Other contingent funding obligations	report calculated value	report calculated value		
16. TOTAL EXPECTED CASH OUTFLOWS		Sum of lines 2, 7 to 9 & 12 to 15		
EXPECTED CASH INFLOWS	No value to be reported			<i>Weighted</i> values of HQLA (line 1, 3 rd column) must be calculated after the application of the respective haircuts but before the application of the 40% cap on Level 2 assets. <i>Unweighted</i> outflows and inflows (lines 3, 5–7, 10–15 and 17–19, 2 nd column) must be calculated as outstanding balances. <i>Weighted</i> outflows and inflows (lines 3, 5–8, 10–15 and 17–19, 3 rd column) must be calculated after the application of the outflow and inflow rates.
17. Secured lending	report calculated value	report calculated value		
18. Fully performing exposures (all counterparties)	report calculated value	report calculated value		
19. Other cash inflows	report calculated value	report calculated value		
20. TOTAL EXPECTED CASH INFLOWS	Sum of lines 17 to 19	Sum of lines 17 to 19		
		Total Adjusted ¹ Value		<i>Adjusted</i> values of HQLA (line 21, 3 rd column) must be calculated after the application of both (i) haircuts <u>and</u> (ii) 40% cap on Level 2 assets. <i>Adjusted</i> values of net cash outflows (line 22, 3 rd column) must be calculated after the application of both (i) outflow and inflow rates <u>and</u> (ii) 75% cap on inflows.
21. TOTAL STOCK OF HQLA		report calculated value		
22. TOTAL EXPECTED NET CASH OUTFLOWS		report calculated value		

¹ Adjusted values must be calculated after the application of both: (i) haircuts (for Total HQLA) and inflow and outflow rates (for Total Net Cash Outflows); and (ii) applicable cap and ceiling (i.e., cap on Level 2 assets for HQLA and ceiling on inflows).

LIQUIDITY COVERAGE RATIO DISCLOSURE TEMPLATE (In Single Currency, Absolute Amount)			THIS PORTION IS FOR REFERENCE ONLY. DO NOT INCLUDE IN THE TEMPLATE.	
NATURE OF ITEM	TOTAL UNWEIGHTED ¹ VALUE (AVERAGE)	TOTAL WEIGHTED ² VALUE (AVERAGE)	Relevant Paragraph(s) of Appendix 74a (Section – Paragraph)	Instructions for Completion of Template
23. LIQUIDITY COVERAGE RATIO (%)		report calculated value		<p>The LCR (line 23) must be calculated as the average of observations of the LCR:</p> $LCR_{Qi} = \frac{1}{T} \times \sum_{t=1}^T LCR_t$
Note: Not all reported figures will sum exactly, particularly in the denominator of the LCR. For example, “total expected net cash outflows” (line 22) may not be exactly equal to “total expected cash outflows” minus “total expected cash inflows” (line 16 minus line 20) considering the 75% cap on inflows is binding. Similarly, the disclosed LCR may not be equal to an LCR computed on the basis on the average values of the set of line items disclosed in the template.				

**FORMAT OF SWORN CERTIFICATION OF COMPLIANCE WITH THE
LIQUIDITY COVERAGE RATIO (LCR) REQUIREMENTS
(Appendix to Sec. 145 on Liquidity Coverage Ratio)**

(As deleted by Circular No. 996 dated 8 February 2018 and as amended by Circular No. 905 dated 10 March 2016)

IT RISK MANAGEMENT STANDARDS AND GUIDELINES

Area: IT Audit

(Appendix to Section 148 on Purpose and Scope, and on IT Risk Management Systems)

1. INTRODUCTION

- 1.1. BSFIs must plan, manage and monitor rapidly changing technologies to enable them to deliver and support new products, services, and delivery channels. The rate of these changes and the increasing reliance on IT make the inclusion of IT audit coverage essential to an effective overall audit program. The audit program should address IT risk exposures throughout the organization, including the areas of IT management and strategic planning, IT operations, client/server architecture, local and wide-area networks, telecommunications, physical and information security, electronic products and services, systems development and acquisition, and business continuity planning. IT audit should also focus on how management determines the risk exposure from its operations and controls or mitigates identified risks.
- 1.2. A well-planned, properly structured audit program¹ is essential to evaluate risk management practices, internal control systems and compliance with policies concerning IT-related risks at BSFIs of every size and complexity. Effective audit programs are risk-focused, promote sound IT controls, ensure the timely resolution of audit deficiencies and inform the Board of Directors of the effectiveness of risk management practices. An effective IT audit function may also allow regulators to place substantial reliance on and reduce the time spent reviewing areas of the BSFIs during examinations. Ideally, the audit program should consist of a full-time, continuous program of internal audit which may be further supported by a well-planned external audit program.

2. ROLES AND RESPONSIBILITIES

- 2.1. Board of Directors (Board) and Senior Management. The BSFI's Board or its Audit Committee has the overall responsibility for establishing and maintaining an independent, competent and effective IT audit function commensurate with the complexity of its IT risk profile. In order to properly oversee the IT audit function, the Board or its Audit Committee should:
 - a. Assign responsibility for IT audit function to an internal audit department or individual with sufficient audit expertise, knowledge base and skill level;
 - b. Ensure that IT audit maintains its professional and organizational independence²; and
 - c. Approve and review an audit program that would guide IT audit engagements.

Senior management is responsible for supporting IT audit by providing sufficient resources, establishing programs defining and requiring compliance with IT planning practices, operating policies and internal controls. Likewise, senior management should not, in any manner, diminish or interfere with the candor of the audit findings and recommendations.

- 2.2. Audit Management and Audit Staff. The internal audit manager is responsible for implementing the Board-approved audit directives. The manager oversees the audit function and provides leadership and direction in communicating and monitoring audit policies, practices, programs, and processes. He should establish clear lines of authority and reporting responsibility for all levels of audit personnel and activities.

The internal audit manager should also ensure that members of the audit staff possess the necessary independence, experience, education, training, and skills to properly conduct assigned activities. This can be undertaken by providing auditors with an effective program of continuing education and development. As the information systems of a BSFI become more sophisticated or as more complex technologies evolve, the auditor may need additional training.

¹ Audit program encompasses audit policies, procedures, and strategies that govern the audit function, including IT audit.

² Independence means self-governance, freedom from conflict of interest and undue influence. The IT auditor should be free to make his or her own decisions, not influenced by the organization being audited, or by its managers and employees.

The primary role of the internal IT audit staff, on the other hand, is to assess independently and objectively the controls, reliability, and integrity of the BSFI's IT environment. Internal auditors should evaluate IT plans, strategies, policies, and procedures to ensure adequate management oversight. They should assess the day-to-day IT controls to ensure that transactions are recorded and processed in compliance with acceptable accounting methods and standards and are in compliance with policies set forth by the Board and senior management. Auditors also perform operational audits, including system development audits, to ensure that internal controls are in place, policies and procedures are effective, and employees operate in compliance with approved policies. Auditors should identify weaknesses, provide meaningful recommendations and review management's plans for addressing those weaknesses, monitor their resolution, and report to the Board material weaknesses, as necessary.

- 2.3. Operating Management. Operating management should formally and effectively respond to IT audit or examination findings and recommendations. The audit procedures should clearly identify the methods for following up on noted audit or control exceptions or weaknesses. Operating management is responsible for correcting the root causes of the audit or control exceptions, not just treating the exceptions themselves. Response times for correcting noted deficiencies should be reasonable and may vary depending on the complexity of the corrective action and the risk of inaction.

3. INDEPENDENCE OF THE IT AUDIT FUNCTION

- 3.1. The ability of the internal audit function to achieve desired objectives depends largely on the independence of audit personnel. Hence, the placement of the internal audit function in relation to the BSFI's management structure should be carefully assessed. The degree of auditors' independence, objectivity and impartiality entails the following key elements:
 - a. Direct reporting of audit results to the Board or its Audit Committee;
 - b. Full authority vested by the Board to the IT Audit Department/IT auditor to access all records and staff necessary to conduct the audit and require management to address significant findings in a timely manner. Said authority must be clearly specified in an Internal Audit Charter or Audit Program duly approved by the Board or Audit Committee;
 - c. Non-involvement of IT audit personnel in management/operational activities that may compromise or appear to compromise their independence; and
 - d. The Board or Audit Committee should decide on audit personnel performance evaluation and compensation matters.

4. INTERNAL IT AUDIT PROGRAM

- 4.1. A formal audit program or manual consisting of policies and procedures governing the IT audit function should be adopted commensurate with the BSFI's size, complexity, scope of activities and risk profile. The audit program should, at a minimum, encompass the following components:
 - a. A mission statement or audit charter¹ outlining the purpose, objectives, organization, authorities, and responsibilities of the internal auditor, audit staff, audit management, and the audit committee;
 - b. A risk assessment process to describe and analyze the risks inherent in a given line of business and drive the scope and frequency of audits. Auditors should update the risk assessment at least annually, or more frequently if necessary, to reflect changes to internal control or work processes;
 - c. An annual audit plan detailing IT audit's budgeting and planning processes to include audit goals, schedules, staffing needs and reporting;

¹ Audit charter is a document approved by the Board of Directors that defines the IT audit function's responsibility, authority and accountability.

- d. An audit cycle that identifies the frequency of audits which should be based on a sound risk assessment process;
- e. Well-planned and properly structured audit work programs¹ that set out the required scope and resources, including the selection of audit procedures, extent of testing and the basis for conclusions for each audit area;
- f. Audit report preparation standards that require the use of an approved audit rating system;
- g. Requirements for audit work paper documentation to ensure clear support for all audit findings and work performed, including work paper retention policies;
- h. Follow-up processes that require internal auditors to determine the disposition of management actions to correct significant deficiencies;
- i. Policies on outsourcing of some or all of IT audit function, including technical/ highly specialized reviews, to external third parties; and
- j. Professional development programs for audit staff/personnel to maintain the necessary technical expertise.

Additionally, the BSFI should consider conducting its internal audit activities in accordance with professional standards, such as the Standards for the Professional Practice of Internal Auditing issued by the Institute of Internal Auditors (IIA), and those issued by the Standards Board of the Information Systems Audit and Control Association (ISACA), whenever possible.

5. IT AUDIT PHASES

- 5.1. Audit Planning.** The BSFI should develop an overall audit plan² for all the audit assignments/engagements covering at least twelve (12) months to ensure adequate coverage of IT risks. The plan should be defined by combining the results of the risk assessments and the resources required to yield the timing and frequency of planned internal audits. The audit plan must be realistic and should cover a time budget for other assignments and activities such as specific examination, consulting/advisory services, training and provision for audit personnel leave of absences.

The audit plan must be formally approved and regularly reviewed by the Board or Audit Committee. The internal auditors should report the status of the planned versus actual audits and any revisions to the annual audit plan on a periodic basis.

For each audit assignment, an audit work program detailing the objectives, scope, nature and extent of audit procedures and outline of audit work should be prepared. This is to ensure that appropriate attention is devoted to important areas of the audit, potential problems are identified and resolved on a timely basis, and the audit engagement is properly organized and managed to be performed in an effective and efficient manner.

- 5.2. Risk Assessment.** The use of an appropriate risk assessment technique or approach is critical in developing the overall IT audit plan and in planning specific audits. An effective risk assessment methodology should be defined to provide the Board or its Audit Committee with objective information in determining audit priorities for the effective allocation of IT audit resources. The risk assessment for IT audit planning should:

¹ Work program is a series of specific, detailed steps to achieve an audit objective.

² Audit plan is a description and schedule of audits to be performed in a certain period of time (ordinarily a year). It includes the areas to be audited, the type of work planned, the high-level objectives and scope of the work and includes other items such as budget, resource allocation, schedule dates, and type of report issued.

- a. Identify the BSFI's data, application¹ and operating systems², technology, facilities, and personnel;
- b. Identify the business activities and processes within each of those categories;
- c. Include profiles of significant business units, departments, and product lines, or systems, and their associated business risks and control features, resulting in a document describing the structure of risk and controls throughout the BSFI; and
- d. Use a measurement or scoring system that ranks and evaluates business and control risks for significant business units, departments, and products.

The results of the risk assessments, in support of the audit plan, must be presented to the Board or Audit Committee for review and approval. A process must be in place to ensure regular monitoring of the results of the risk assessment and updating it at least annually for all significant business units, departments, and products or systems.

A risk scoring model or system may be adopted to provide a sound basis for the risk assessment. Among the major risk factors that may be used in scoring systems include the following: a) Adequacy of internal controls; b) Nature of transactions and operating environment; c) Age of the system or application; d) Physical and logical security of information, equipment, and premises; e) Adequacy of operating management oversight and monitoring; f) Previous regulatory examination and audit results and management's responsiveness in addressing issues; g) Human resources, including the experience of management and staff, turnover, technical competence, management's succession plan, and the degree of delegation; and h) Senior management oversight.

Written guidelines on the use of risk assessment tools and risk factors should be approved and reviewed by the Board or its Audit Committee. IT auditors should use the guidelines to grade or assess major risk areas and to define the range of scores or assessments (e.g. groupings such as high, medium or low risk or numeric risk ratings). At a minimum, the written assessment guidelines should specify the following elements: a) Maximum length for audit cycles based on the risk scores; b) Timing of risk assessments for each department or activity; c) Documentation requirements to support scoring decisions; and d) Guidelines for overriding risk assessments in special cases and the circumstances under which they can be overridden.

5.3. Performance of Audit Work.

Depending on the complexity of IT risk profile, IT auditors may perform all or a combination of any of the following IT audit procedures:

- a. **IT General Controls Review** – This entails the review of the adequacy of general controls³ in place to ensure proper management and monitoring of IT risks/ environment and the effective functioning of the BSFI's IT systems and infrastructure. The following areas should be covered, among others: a) IT management and strategic planning; b) IT operations; c) Client/server architecture; d) Local and wide-area networks; e) Telecommunications; and f) Physical and information security.

IT general controls review may be carried out through the audit of each IT unit or department in the institution (e.g., IT Operations, Network and Communications, etc.).

- b. **Application Systems Review** - The purpose of this review is to identify, document, test and evaluate the application controls⁴ that are implemented to ensure the confidentiality, integrity and accuracy of the system processing and the related data. The application-level risks to the system and data addressed by

¹ Application system is an integrated set of computer programs designed to serve a well-defined function and having specific input, processing, and output activities (e.g., CASA, general ledger, loans and treasury systems).

² Operating system is the program that manages all the basic functions and programs in a computer.

³ General controls are controls, other than application controls, that relate to the environment within which application systems are developed, maintained, and operated, and that are therefore applicable to all the applications at an institution. Like application controls, general controls may be either manual or automated. Examples of general controls include the development and implementation of an IT strategy and an IT security policy, the organization of IT staff to separate conflicting duties and planning for disaster prevention and recovery.

⁴ Application controls are controls related to transactions and data within application systems. Application controls ensure the completeness and accuracy of the records and the validity of the entries made resulting from both programmed processing and manual data entry. Examples of application controls include data input validation, agreement of batch totals and encryption of data transmitted.

this review are the following, among others: a) System availability risks relating to the lack of system operational capability; b) System security risks relating to unauthorized access to systems and/or data; c) System integrity risks relating to incomplete, inaccurate, untimely or unauthorized processing of data; d) System maintainability risks relating to inability to update the system when required in a manner that continues to provide for system availability, security and integrity; and e) Data risks relating to its completeness, integrity, confidentiality, privacy and accuracy.

- c. **Technical Reviews** - BSFIs with complex IT risk profile such as those providing electronic products and services and web-enabled facilities, also require IT auditors to perform highly technical/ specialized reviews such as the conduct of periodic internal vulnerability assessment and penetration testing, computer forensics and review of emerging technologies, e.g., cloud computing, virtualization, mobile computing.

IT auditors frequently use computer- assisted audit techniques (CAATs) to improve audit coverage by reducing the cost of testing and sampling procedures that otherwise would be performed manually. CAATs include many types of tools and techniques, such as generalized audit software, utility software, test data, application software tracing and mapping, and audit expert systems. These tools and techniques can also be used effectively to check data integrity by testing the logical processing of data “through” the system, rather than by relying only on validations of input and output controls.

Audit software programs should remain under the strict control of the audit department. For this reason, all documentation, test material, source listings, source and object program modules, and all changes to such programs, should be strictly controlled. Computer programs intended for audit use should be carefully documented to define their purpose and to ensure their continued usefulness and reliability.

All audit procedures forming part of the assignment should be documented in working papers. These must reflect the examinations that have been made and emphasize the evaluations formulated in the report. The working papers must be drawn up according to a well-determined method. Such method must provide sufficient information to verify whether the assignment was duly performed and to enable others to check the manner in which it was performed.

- 5.4. **Reporting.** A written audit report of each assignment is to be issued to the auditee and Audit Committee within a reasonable timeline. The audit report should state the scope, objectives, period of coverage and the nature, timing and extent of the audit work performed. It should state the findings, conclusions and recommendations and any reservations, qualifications or limitations in scope that the IT auditor has with respect to the audit. The IT audit should discuss the draft report contents with management in the subject area prior to finalization and release of the final report. This should be signed, dated and distributed according to the terms of the audit charter/audit program or engagement letter.
- 5.5. **Post-closing/Monitoring Activities.** Senior management should ensure that the internal audit department’s concerns are appropriately addressed. Therefore, they should approve a procedure established by the internal audit department to ensure the consideration and, if appropriate, timely implementation of audit recommendations.

The IT audit department should monitor the implementation of management’s corrective actions for proper disposition of its findings/recommendation. The status of the recommendations is communicated at least on a quarterly basis to the Board or Audit Committee.

6. OTHER IT AUDIT ACTIVITIES/ PARTICIPATION

- 6.1. **Development, Acquisition, Conversions and Testing.** The BSFI’s Board-approved audit policy should include guidelines detailing what involvement internal audit will have in the development, acquisition, conversion, and testing of major applications. This includes describing the monitoring, reporting, and escalation processes (when internal controls are found to be insufficient or when testing is found to be inadequate). For acquisitions with significant IT impacts, participation of IT audit may be necessary early in the due diligence stage.

It is necessary that audit's participation in the development process be independent and objective. Auditors can determine and should recommend appropriate controls to project management. However, such recommendations do not necessarily "pre- approve" the controls, but instead guide the developers in considering appropriate control standards and structures throughout their project.

- 6.2. Review of Technology Service Providers (TSP).** The BSFI should effectively manage its relationships with key TSPs through review and assessment of adequacy of IT controls employed by such TSPs. When circumstances warrant, the BSFI's internal audit function may be utilized to directly audit TSP's operations and controls. In some instances, the services of external auditors may be employed. A BSFI using external audit to complement its own coverage should ensure that the independent auditor is qualified to perform the review, that the scope satisfies its own audit objectives and that any significant reported deficiencies are corrected.

7. OUTSOURCING OF IT AUDIT FUNCTIONS

- 7.1. The Board and senior management of a BSFI that outsources its internal IT audit function should ensure that the structure, scope and management of the outsourcing arrangement provides for an adequate evaluation of the system of internal controls. Management should ensure that there are no conflicts of interest and that the use of these services does not compromise independence.
- 7.2. When negotiating the outsourcing arrangement with a service provider, the BSFI should carefully consider its current and anticipated business risks in setting each party's internal audit responsibilities. To clearly define the BSFI's duties and those of the audit provider, it should have a written contract, often referred to as an engagement letter¹.

8. COMPLIANCE WITH EXISTING BANGKO SENTRAL RULES AND REGULATIONS

- 8.1. The provisions of the IT audit guidelines prescribe in detail the essentials and elements of an effective IT audit which complement and are consistent with Section 162 Independence of the Internal Auditor. Likewise, the IT audit- related tasks of the Audit Committee are in addition to the tasks prescribed under Section 133 Powers/responsibilities and duties of directors, Item "c(7)(d)(i)".

(Circular Nos. 969 dated 22 August 2017 and 958 dated 25 April 2017)

¹ In general, the contract between the institution and the audit provider may or may not be the same as the engagement letter.

IT RISK MANAGEMENT STANDARDS AND GUIDELINES

Area: Information Security

[Appendix to Sections 148 on Purpose and Scope, and on IT Risk Management Systems, and 149 on Other Policies, Standards and Processes]

1. INTRODUCTION

- 1.1 Information, as one of the most critical assets of Bangko Sentral Supervised Financial Institutions (BSFIs), should be accorded with adequate level of protection and risk management controls to preserve its confidentiality, integrity, and availability. BSFIs are increasingly relying on information to achieve business goals and objectives, drive core operations, and support critical decisions. With the emergence of new business models in a predominantly information-driven economy, information that is timely, accurate, and reliable becomes even more important. Effectively addressing information security requirements enables BSFIs to remain competitive and relevant as the financial services industry moves towards digital innovation. Thus, BSFIs need to prioritize information security risk management (ISRM) aligned with their business goals and objectives.
- 1.2 Information security instills trust and confidence between BSFIs and their customers, ensures compliance with laws and regulations, and improves enterprise value. Because information security is intrinsically linked to the overall safety and soundness of BSFIs, the Board of Directors (Board) and Senior Management should exercise effective information security governance to ensure ongoing alignment of information security with business needs and requirements. Information security risks and exposures must be managed to within acceptable levels through a dynamic interplay of people, policies and processes, and technologies and must be integrated with the enterprise-wide risk management system.
- 1.3 The frequency, severity, and visibility of recent cyber-attacks highlight, not only the degree of disruption to business operations, but also the extent of reputational damage which could undermine public trust and confidence in the financial system. If not properly managed, cyber-attacks may result to operational, legal, reputational, and systemic risks. In light of the growing concerns on cybersecurity, a key component of information security, BSFIs should put greater emphasis on cybersecurity controls and measures in managing information security risks.

2. INFORMATION SECURITY GOVERNANCE

- 2.1. **Information Security Strategic Plan.** An information security strategic plan (ISSP), aligned with the BSFI's business plan, must be established to clearly articulate the Board and Senior Management's direction on information security. The ISSP should provide a roadmap that would guide the BSFI in transforming the current state of security to the desired state taking into account business goals and strategies. In defining the desired state of security, the concerned BSFI should consider key elements, to include principles and policy framework, organizational structures and culture, information/data, services, IT infrastructure, and people.

The BSFI may utilize commonly accepted approaches or frameworks in developing the ISSP tailored to its specific business and technology profile. The ISSP must be reviewed at least annually by the Board and Senior Management and regularly updated in line with changes in business strategies, IT infrastructure and services, and operating environment.

- 2.2. **Information Security Program.** The BSFI should maintain a comprehensive, well- designed and effective Information Security Program (ISP) commensurate with its operational and IT profile complexity. The ISP is essentially the mechanism to implement the ISSP which must be aligned with business needs and strategies and integrated across all facets of the business environment. To ensure its effectiveness and sustainability, the ISP should have strong support from the Board and Senior Management as well as cooperation of all concerned stakeholders. The program should clearly establish security roles, responsibilities and accountabilities, and provide mechanisms to ensure enforcement and compliance (e.g. formal disciplinary process and corresponding actions for those who have committed security violations). The ISP generally covers security policies, standards and procedures, security operations, technologies, and organizational structures as well as security awareness and training programs aimed at protecting BSFI's information assets and supporting infrastructure from internal and external threats.

The ISP should be reviewed and tested at planned intervals to ensure its continuing suitability, adequacy, and effectiveness. Management should adjust the ISP to reflect the results of ongoing risk assessment, analyses of emerging internal and external threats and vulnerabilities, cyber-intelligence gathered from information sharing groups, and the level of effectiveness of the existing security controls. Further, Management should take into

account changes in the IT infrastructure/systems and business arrangements such as mergers, acquisitions, alliances and joint ventures, and outsourcing agreements.

- 2.3 **Security Culture.** The Board and Senior Management should take the lead in establishing an information security culture that regards security as an intrinsic part of the BSFI's core business and operations. Instilling a strong security culture ensures that security controls, processes and measures are deeply embedded into the BSFI's lines of business, products, services and processes, including its employees and external relationships. Having a strong security culture will help facilitate attainment of the institution's desired state of security and level of maturity as well as more effective and efficient implementation of the ISSP and ISP. The level of compliance of employees to the security policies, employees' knowledge in identifying and reporting incidents, and the degree of integration of security requirements throughout the life cycles of services and applications are some indicators of an institution's security culture. The Board and Senior Management should adopt the right mindset and understand the crucial role of information security in supporting/achieving business goals and objectives. In line with this, the Board and Senior Management should provide the necessary resources to develop, maintain, and implement the ISP.
- 2.4 **Responsibility and Accountability.** Information security roles and responsibilities span the entire organization from the Board and Senior Management, business line managers, security department, down to the employees. The BSFI's Board and Senior Management set the overall tone and strategic direction for information security by providing strong leadership and effective information security governance. The Board, or an appropriate Board committee, is responsible for overseeing the development, implementation and maintenance of the BSFI's ISSP and ISP. The Board should understand the business case for information security as well as the impact of information security risks to the business. Relative thereto, the Board should approve and provide adequate funding and other necessary resources for security projects and initiatives to effectively implement the ISSP and ISP. The Board or a Board-designated committee should approve and review the written ISSP and ISP including the corresponding security policies and standards at least annually. The Board or a Board-designated committee should likewise periodically review the assessments of the overall effectiveness of the program and direct Senior Management to undertake corrective actions, when necessary.

Senior Management is generally responsible and accountable in executing the ISSP and ISP within the bounds and thresholds set by the Board. Senior Management plays a key role in providing leadership and support for information security as well as balancing business and security requirements and managing information security risks within acceptable levels. Senior Management should appoint a Chief Information Security Officer (CISO) who will be responsible and accountable for the organization-wide ISP. The duly appointed CISO is a senior level executive with sufficient authority within the institution to effectively perform the following functions and responsibilities, among others:

- a. Formulate the ISSP and ISP for approval by the Board and Senior Management;
- b. Implement and manage the duly-approved ISSP and ISP;
- c. Coordinate and work with business process owners and executives across different departments to ensure that information security requirements support business needs and security systems and processes are working as intended;
- d. Enforce compliance with the ISP and the corresponding policies, standards and procedures across the organization and conduct security awareness and training programs catered to different sets of stakeholders;
- e. Educate, inform, and report to the Board and Senior Management relevant information security issues and concerns;
- f. Prepare business cases for certain security control technologies, products, and arrangements for Board and Senior Management's approval;
- g. Ensure that security controls and processes are embedded throughout the lifecycle of information, systems, applications, products and services;
- h. Assist in the effective implementation of information security incident response plan; and
- i. Assist in ensuring regulatory compliance and adherence to information security-related laws, rules and regulations.

In addition to the minimum qualifications provided in Sec. 134, the appointed CISO should have sufficient knowledge, technical background, skills and training to enable him to perform the above assigned tasks. To ensure appropriate segregation of duties, the CISO should report directly to the Board, designated Board committee or to Senior Management and have sufficient independence to perform his mandate. The CISO should perform the tasks of a risk manager and should be independent from the IT department. For BSFIs with moderate to complex IT profile classification, the CISO may be the head of an information security office/unit, staffed with a number of highly skilled security specialists. In the case of BSFIs with simple IT profile, the CISO function may be assigned to an existing independent officer who meets the above qualifications.

The BSFI's IT department also plays a crucial role in maintaining security within the technology domain. Considering that security controls and measures are largely automated and technology-driven, it may be more feasible for BSFI's security operations personnel and IT personnel to share some security administration functions. IT personnel are usually charged in managing the security configuration of servers, databases, routers, switches and other security technologies that are deeply embedded in systems/applications.

Security specialists, on the other hand, are responsible in managing the more specialized security tools and technologies such as Security Information and Event Management (SIEM) tools, vulnerability scanners, and other management support technologies.

Insofar as the ISP includes physical security as one of the IS controls, the CISO may need to coordinate with the BSFI's Chief Security Officer or Bank Security Officer on IS matters/incidents that entail physical security considerations. The CISO should also collaborate with fraud management units (FMU), particularly in monitoring emerging security and fraud risks involving customer accounts.

Business line managers, application/system and information owners are generally responsible for information asset classification and determining the required level of security requirements to support business requirements. They are also responsible in defining and granting access rights of employees and ongoing monitoring of the appropriateness of such access rights. On the other hand, employees, as the first line of defense, should understand and abide by the security policies, standards and procedures. They are responsible in monitoring and reporting security-related incidents and security lapses within their job functions in accordance with the information security incident response plans. To ensure their ongoing commitment and awareness, employees should regularly attend security awareness trainings and other programs.

- 2.5. **Resources.** The Board and Senior Management should see to it that adequate resources, organizational functions/capabilities, policies, standards and procedures as well as the supporting infrastructure commensurate with the BSFI's IT profile classification and risk appetite, are available and optimized to effectively implement the institution's ISSP and ISP. Without sufficient resources in terms of funding/budget allocations, skilled manpower and underlying technologies, implementation of the ISP may suffer leading to security lapses, incidents and poorly designed/implemented security systems. Thus, it is crucial that sufficient resources are devoted to information security operations and initiatives. Further, Management may supplement its existing security skills and capabilities through outsourcing of certain security functions to third party service providers, including cloud service providers. In such cases, the institution needs to provide adequate oversight and institute robust risk management processes and practices pursuant to existing regulations on outsourcing and cloud computing.

- 2.6. **Compliance with Relevant Laws, Regulations and Standards.** In designing the ISSP and ISP, compliance with relevant laws, regulations, and standards must be fully considered. For BSFIs, these include The Law on Secrecy of Bank Deposits under R.A. No. 1405 and recently, the Data Privacy Act of 2012 under R.A. No. 10173. For BSFIs that process and issue payment cards under international brand schemes (e.g., VISA, Mastercard, AMEX, etc.), the ISP should be tailored to fit the requirements of the Payment Card Industry Data Security Standard (PCI DSS). Moreover, Management may find having security certifications such as those provided by the International Organization for Standardization (ISO) and other certifying bodies to be of significant value to the business.

These certifications serve as proof of certain quality and standards in terms of information security management systems which may enhance customers' and stakeholders' confidence, facilitate regulatory compliance on security, and enable achievement of desired security posture and maturity. While not specifically required under the Bangko Sentral regulations, obtaining security certifications may be considered a sound security practice that may speed up the maturity level of the BSFI and a sound indicator of effective information security culture. Management should continually assess the regulatory environment and adjust/update their ISSP and ISP accordingly to ensure continuing compliance.

3. ISP MANAGEMENT

- 3.1. **Information Security Risk Management System.** The Information Security Risk Management (ISRM) system should be an integral part of the organization's ISP and enterprise-wide risk management system. The ISRM framework, including cybersecurity elements, should be commensurate to the level of risk profile of the BSFI. The design and implementation of the ISRM system largely depends on the BSFI's culture, mission and objectives, organizational structure, products, services, and management/operational processes. To ensure that appropriate information

security controls and maturity levels are achieved, Management may refer to leading standards and technology frameworks¹ in designing the institution's own ISRM framework.

3.1.1. Risk Management Process.

Management should conduct periodic security risk assessment to identify and understand risk on confidentiality, integrity and availability of information and IT systems based on current and detailed knowledge on BSFI's operating and business environment. This includes identifying information security risks relative to its internal networks, hardware, software, applications, systems interfaces, operations and human elements. The risk assessment should include an identification of information and IT resources to be protected and their potential threats and vulnerabilities. This risk identification phase should be comprehensive to cover all possible risk scenarios that may hamper the confidentiality, integrity and availability of information assets.

An effective risk assessment process involves three phases namely: risk identification, analysis and evaluation. Vendor concerns place additional elements to the process. The risk identification process, including the elements that the BSFI needs to consider is further detailed in item 3.2 Identification phase.

Once the risks are identified, Management should undertake a systematic risk analysis phase whereby the likelihood and impact of threats and vulnerabilities are assessed. It should utilize clearly defined and consistent risk measurement approaches in analyzing and evaluating risks. After which, the appropriate risk treatment options (i.e., mitigate, transfer, avoid or accept) should be applied taking into consideration the BSFI's risk appetite and tolerance. Once the BSFI identifies the risks to mitigate, Management can begin to develop risk mitigation strategy which should be an integral component of the ISP. The risk management phases from identification to risk treatment should flow into the BSFI's risk reporting and monitoring activities to ensure effectiveness and continuous improvement of the entire risk management process. The results of the risk management processes should be communicated to the concerned stakeholders and reported to the Board and Senior Management for appropriate risk decisions.

3.1.1.1. Insurance. The BSFI may avail of insurance coverage for information security- related events and incidents as a way to transfer risks. It is, however, not to be construed as a substitute for an effective ISP. Insurance is a logical risk treatment option for risk exposures with high impact but with low probabilities (e.g., fire, earthquakes, massive cyber-attacks, etc.). Hence, it should carefully evaluate the extent and availability of coverage in relation to the magnitude and probability of the risks. Likewise, Management should ensure compliance with relevant security controls and policies as stipulated in the insurance policy.

3.2. Identification. Management should be able to identify the BSFI's information security as well as cyber-related risks through a thorough understanding of its business processes and functions, information assets and related access, threats and vulnerabilities, interconnections, and security architecture. The identification process is the first crucial step to information security risk management and should be robust enough to ensure that all foreseeable risks and

¹ US National Institute of Standards and Technology (NIST), ISO, US FFIEC, COBIT and CPMI publications, among others.

threats are identified. Failure to identify key information security risks would significantly hamper the security posture, as such would no longer be considered in the analysis and mitigation phases.

3.2.1. **Business Processes and Functions.** The BSFI constantly faces the challenge of balancing its security requirements versus performance objectives and costs. Similar to the conduct of business impact analysis (BIA), Management should identify all business processes and functions, including their dependencies and consequently assess and determine their criticality and importance to the business. This exercise should guide the BSFI's decision-makers in prioritizing preventive, detective, response and recovery efforts. The level and degree of security controls and measures are expected to be commensurate to the criticality and importance of the business processes and functions. At a minimum, Management should ensure that the ISP is able to adequately support/secure the institution's critical business processes and functions.

3.2.2. **Information Assets and Related Access.** The BSFI should maintain an inventory of all information systems assets that include components from all information systems. In developing an information systems assets inventory, it should be able to document system-specific information (e.g., hardware inventory specifications, software license information, software version numbers, component owners, machine names, network address, manufacturer, device type, model, serial number, and physical location) that will allow Management to:

- a. Identify the information owner who shall be responsible in ensuring confidentiality, integrity, and protection of these assets;
- b. Associate the interdependencies of these systems and understand how these systems support the associated business lines;
- c. Facilitate an efficient process for system installations, removals, and other updates; and
- d. Monitor system configuration activities and detect unauthorized changes to the systems in a timely manner.

3.2.3. **Threats and Vulnerabilities.** In identifying risks, the BSFI should have a documented process that will determine the threats and vulnerabilities to the institution's IT environment. A threat is anything or anyone that has the potential to adversely impact the institution by exploiting vulnerability in people, process, and/or technology. Given the broad definition of threat, the BSFI should establish a structured approach that will allow Management to have a holistic view of the threat landscape. This can be done by maintaining robust threat intelligence feeds from various sources such as publicly available data from news media, publications and websites as well as subscription to information security vendors and information-sharing organizations.

Threat identification and management programs should enable the BSFI to:

- a. Identify and understand the nature, frequency, and sophistication of threats;
- b. Categorize threats, sources, and vulnerabilities;
- c. Aggregate and quantify potential threats;
- d. Evaluate the corresponding information security risks to the institution; and
- e. Develop appropriate risk mitigation strategies as part of the ISP.

As threats continue to evolve rapidly and increase in sophistication, Management should ensure that threat monitoring and vulnerability scanning tools and processes remain effective in identifying both known and unknown (zero-day¹) security exposures.

3.2.4. **Interconnections.** The BSFI's business processes often deal with exchanging information and conducting transactions in an online and interconnected environment which inevitably require third-party connections to its network and computing resources and vice versa. These arrangements should be governed by terms and conditions that clearly establish the duties and responsibilities of both parties in owning, operating, and/or maintaining the information systems. The extent of interconnection may result to risks that may weaken the institution's security posture.

As such, it should identify connections with external parties, including other BSFIs, financial market infrastructures and third party service providers, their corresponding access points and channels and systems/applications accessed. Consequently, Management should assess the BSFI's interconnectivity risks and implement appropriate risk mitigation controls to improve resilience of the entire ecosystem.

¹ Refers to the exploit of zero-day vulnerability which takes place on the same day the vulnerability becomes generally known. It also means zero days between the time the vulnerability is discovered and the first attack.

3.2.5. **Security Architecture.** Given the increasing interconnectivity and complexity of information systems and security infrastructure, developing an information security architecture using generally acceptable architectural approaches can provide the BSFI with a holistic view of existing security controls and processes, the taxonomy of business processes and information and information flows and their interdependencies. For complex BSFIs, an information security architecture that is aligned with their enterprise architecture should be adequately documented. The development of the information security architecture should also incorporate security controls needed to support data privacy requirements. The information security architecture generally includes an architectural description, placement of security controls, security-related information for external interfaces, information being exchanged across the interfaces, and protection mechanisms associated with each interface.

3.3. **Prevention.** Management should put in place adequate protection mechanisms and controls to prevent security incidents and risks from materializing. These include measures ranging from baseline to advanced tools and approaches such as defense-in-depth, malware prevention, access controls, and cybersecurity awareness programs, among others. These preventive controls are generally categorized into three types, namely: administrative, physical and environmental, and technical controls.

3.3.1. **Administrative Controls.** The BSFI should establish administrative controls to clearly articulate the Board and Senior Management's intent, expectations, and direction on information security. Administrative controls generally address the human factor affecting information security within all levels of the organization.

3.3.1.1. **Policies, Standards, and Procedures.** Management should formulate written information security policies, standards, and procedures which define the institution's control environment and guide employees on the required, expected, and prohibited activities. Policies, standards, and procedures serve as a primary tool in the exercise of effective information security governance, hence, they should be able to capture the Board and Senior Management's security direction and risk appetite. The Board and Senior Management should approve and periodically review policies, standards, and procedures to ensure ongoing alignment with business needs and requirements. Policies, standards, and procedures should have the following attributes:

- a. Documented using clear, simple, and unambiguous language and widely communicated to all employees and concerned stakeholders;
- b. Comprehensive and complete covering all aspects of ISRM such as, but not limited to, security organizational structure, physical, environmental and logical security, communications and operations management, and human resources security;
- c. Tailored to the needs and requirements, including the security culture of the institution; and
- d. Adaptable to the changing business, regulatory, and operating environment.

3.3.1.1.1. **Minimum Baseline Security Standards.** Management should put in place minimum baseline security standards (MBSS) to ensure that systems, hardware, and network devices are consistently and securely configured across the organization. These standards enable the deployment of operating systems, databases, network devices, and mobile devices within the IT environment in an efficient and standardized manner. Management may refer to leading standards and best practices as well as vendor-specific recommendations in developing their MBSS, taking into consideration the following controls:

- a. Secure configuration of operating systems, system software, databases, and servers to meet the intended uses with all unnecessary services and programs disabled or removed;
- b. Periodic checking to ensure that baseline standards are consistently complied with;

- c. Timely deployment of tested and approved patches and security updates;
- d. Adequate documentation of all configurations and settings of operating systems, system software, databases, and servers; and
- e. Adequate logging capabilities for all systems, applications, network devices, and databases.

3.3.1.2. **Security Training and Awareness Programs.** All employees of the organization and, where relevant, contractors and third party users should receive appropriate information security awareness training and regular updates in organizational policies and procedures relevant to their job function. Awareness and education are vital components in the overall security strategy of the BSFI as they address the weakest link in the security chain. Security training and awareness programs promote a security conscious environment and strengthen compliance with the BSFI's security policies, standards, and procedures.

Security training and awareness programs should be designed and tailored to the specific requirements of different groups and stakeholders (i.e., business process/information owners, security specialists, incident responders, etc.). The program should be constantly updated to cover emerging threats and risks and must include defined metrics to enable the BSFI to assess its effectiveness over time.

3.3.1.3. **Security Screening in Hiring Practices.** Management should have a process to verify job application information of all new employees. Screening procedures, including verification and background checks, should be developed for recruitment of permanent and temporary IT staff, and contractors, particularly for sensitive IT-related jobs or access level. Similar checks should be conducted for all staff, including contractors, at regular intervals throughout their employment, commensurate with the nature and sensitivity of their job functions as well as their access to critical systems. Management should be aware of changing personal circumstances of employees and contractors that may be indicative of potential increased incentives for system misuse or fraud. Further, it should establish processes and controls to mitigate risks related to employees' termination/resignation or changing responsibilities.

3.3.1.4. **Security Screening in Hiring Practices.** Management should have a process to verify job application information of all new employees. Screening procedures, including verification and background checks, should be developed for recruitment of permanent and temporary IT staff, and contractors, particularly for sensitive IT-related jobs or access level. Similar checks should be conducted for all staff, including contractors, at regular intervals throughout their employment, commensurate with the nature and sensitivity of their job functions as well as their access to critical systems. Management should be aware of changing personal circumstances of employees and contractors that may be indicative of potential increased incentives for system misuse or fraud. Further, it should establish processes and controls to mitigate risks related to employees' termination/resignation or changing responsibilities.

3.3.2. **Physical and Environmental Controls.** Physical security measures should be in place to protect computer facilities and equipment from damage or unauthorized access that can impair the confidentiality, integrity, and availability of information. Critical information processing facilities should be housed in secure areas such as data centers and network equipment rooms with appropriate security barriers and entry controls. Access to these areas should be restricted to authorized personnel only and upon presentation of proper identification and authentication process (i.e., ID cards, badges, biometrics, etc.). Moreover, a specific and formal authorization process should be employed for the removal of hardware and software from the premises.

Since the data center houses the BSFI's most critical information processing facilities, Management should fully consider the environmental threats (e.g., proximity to dangerous environment hazards) when selecting sites for data centers. Buildings should give minimum indication of their purpose, with no obvious signs identifying the presence of information processing facilities. Moreover, physical and environmental controls should be implemented to prevent, detect, and monitor environmental conditions which could adversely affect the operation of information processing facilities (e.g., fire, explosives, smoke,

temperature, water, and dust). Equipment and facilities should be protected from power failures and electrical supply interference by, for example, installing uninterruptible power supply (UPS) and backup generators. Management should ensure that these systems and devices regularly undergo preventive maintenance to ensure that they are in good working condition and operating as intended.

- 3.3.3. **Technical Controls.** Management should employ robust and multi-layered technical controls to ensure that the confidentiality, integrity, and availability objectives for information assets are met. These consist of various logical security controls, security tools, and technologies which provide defense against system compromise. Technical controls represent the technology factor in information security that should be working in tandem with the BSFI's policies, standards, and processes.

3.3.3.1. **Technology Design.** Management should consider information security and cyber resilience during the infrastructure build-up, systems development and product design. It should ensure that applicable standards and operating procedures are in place for all software, network configurations, and hardware connected to critical systems. Management should also understand the benefits and limitations of the technology that the institution uses and provide compensating controls when necessary. Management should also adopt mechanisms to continually assess whether processes, people, and technologies support the desired level of information security based on the BSFI's size, complexity, and risk profile.

3.3.3.2. **Identity and Access Management.** The BSFI should adopt a sound and systematic identity and access management program following the principles of least privilege and segregation of duties. Access rights and system privileges granted should be the minimum required for users to perform their job functions and responsibilities. No person, by virtue of rank or position, should have unrestricted and unauthorized access to confidential data, applications, system resources or facilities.

The BSFI should have an effective process to manage user authentication and access control consistent with the criticality and sensitivity of the information/system. The grant, modification, and removal of user access rights should be approved by the information/system owner prior to implementation. Information/system owners or business line managers should ensure that user access rights remain appropriate through a periodic user access re-certification process. Obsolete user accounts or inappropriate access rights should be disabled/removed from the systems in a timely manner.

Prior to granting access to systems, users should be required to sign an acceptable-use policy (AUP) to promote user awareness and accountability in conforming to security policies and procedures. The BSFI should have password standards in place to ensure that user passwords are not easily compromised (i.e., password syntax, validity, system-enforced password changes). Stronger authentication methods, such as the use of multi-factor authentication techniques, should be deployed for high-risk transactions (e.g., large value funds/wire transfers, enrollment of billers, systems administration functions).

Default user accounts defined in new software and hardware should either be disabled or changed and subject to close monitoring. Privileged access and use of emergency IDs should be tightly controlled as it gives the user the ability to override system or application controls. The necessary controls include:

- a. Formal approval process on a need-to-use or event-by-event basis;
- b. Prohibiting shared usage of privileged accounts/IDs;
- c. Logging and monitoring of activities performed;
- d. Proper safeguard of privileged and emergency IDs and passwords (e.g., kept in a sealed envelope and locked in a secure place inside the data center); and
- e. Change of privileged and emergency IDs' passwords immediately upon return by the requesters.

3.3.3.2.1. **Remote Access.** The BSFI, in line with business strategies and needs, may allow employees to connect remotely to the institution's network using either an institution-owned or a personally owned device (often referred to as "bring

your own device" or BYOD). Management should ensure that such remote access is provided in a safe, secure, and sound manner to manage attendant risks. At a minimum, the BSFI should establish control procedures covering:

- a. Formal authorization process for granting remote access;
- b. Risk-based authentication controls for remote access to networks, host data and/or systems, depending on the criticality and sensitivity of information/systems;
- c. Securing communication channels, access devices and equipment from theft, malware and other threats (i.e., encryption, strong authentication methods, data wipe capabilities, application whitelisting¹); and
- d. Logging and monitoring all remote access communications.

For BYOD, Management should fully understand the benefits in line with business goals/strategies as well as the risks in adopting BYOD policy. An effective mechanism should be in place to ensure that personal devices meet certain security standards, such as operating system version, patch levels, and anti-malware solutions, before these can be allowed to access the internal network.

3.3.3.3. Network Security. Management should adopt robust and multi-layered controls to prevent and detect unauthorized access, misuse, and other threats from entering and/or spreading into its internal computer networks and systems. Effective controls should be employed to adequately secure system and data within the network which include the following, among others:

- a. Grouping of network servers, applications, data, and users into security domains or zones (e.g., untrusted external networks, external service providers, or trusted internal networks);
- b. Adopting security policies for each domain in accordance with the risks, sensitivity of data, user roles, and appropriate access to application systems;
- c. Establishment of appropriate access requirements within and between each security domain;
- d. Implementation of appropriate technological controls to meet access requirements consistently;
- e. Monitoring of cross-domain access for security policy violations and anomalous activity; and
- f. Maintaining accurate network diagrams and data flow charts².

Commonly used tools and technologies to secure the network include firewalls, intrusion detection systems (IDS), intrusion prevention systems (IPS) and demilitarized zones, among others. As the network complexity as well as threats affecting the network evolve, the BSFI should continuously monitor and enhance its network security and systems to ensure that they remain secure, safe, and resilient.

Additional controls should be adopted for Wireless Local Area Networks (WLAN) implementations since these are inherently less secure than wired networks. Controls such as limiting of WLAN signals to authorized areas, physically securing wireless access points and formally approving installations of wireless devices/gateways and active monitoring of the WLAN environment should be employed on top of the usual network security controls. Management may also consider implementing network access control (NAC) systems to prevent recognition and connection of unauthorized or rogue devices into the network.

3.3.3.3.1. **Virtualization.** As BSFIs are increasingly leveraging on virtualization technologies to optimize existing hardware resources, reduce operating expenses and improve IT flexibility and agility to support business needs, additional security risks such as attacks on hypervisor integrity and lack of visibility over intra-host communications and virtual machine (VM) migrations are also rising. To address such risks,

¹ *Application whitelisting* is the maintenance and use of a list of applications and their components (e.g., libraries and configuration files) that are authorized to be present or active on a system according to a well-defined baseline.

² Network and data flow diagrams should identify hardware, software, and network components, internal and external connections, and types of information passed between systems to facilitate the development of a defense-in-depth security architecture.

Management should extend security policies and standards to apply to virtualized servers and environment. Likewise, it should adopt the following control measures:

- a. Hypervisor hardening with strict access controls and patch management;
- b. Inspection of intra-host communications {traffic within VM environments) and ensuring that security control measures are implemented for confidential/sensitive data stored in VMs; and
- c. VM creation, provisioning, migration, and changes should undergo proper change management procedures and approval processes similar to deployment of physical network/system devices and servers.

The BSFI may also consider implementing next generation firewalls that can restrict access more granularly and prevent virtualization-targeted attacks that exploit known VM vulnerabilities and exploits.

- 3.3.3.4. **Application Security.** Management should ensure that all applications, whether developed in-house or acquired off-the-shelf, have appropriate controls commensurate to the sensitivity and criticality of applications. Core banking applications as well as other applications considered as mission-critical (e.g., loans, general ledger and treasury systems) should have embedded security control features to maintain information confidentiality, integrity and availability. Secure coding practices which consider security control requirements early into the development phase should be incorporated in the BSFI's application systems development and acquisition policies and procedures. New applications, including subsequent enhancements, should be adequately tested using various testing methodologies (e.g., penetration tests, vulnerability assessments, and application security tests) before loading into production. In case third parties were engaged to develop the applications, Management should exercise adequate oversight to ensure that the level of risk management and security controls/standards is consistently applied.

Security controls within applications should have adequate access and authentication controls, audit trails and logs, and logical controls appropriate to the applications' business purpose and function (e.g., maker/checker functionalities, transaction limits and alerts). Application systems reviews, penetration testing and vulnerability assessments should be periodically conducted to ensure that the applications meet the desired level of security.

- 3.3.3.5. **Data Security.** The BSFI should have information classification strategy guidelines and institute appropriate set of controls and procedures for information protection in accordance with the classification scheme. Information should be protected throughout its life cycle from handling, storage or data-at-rest, transmission or data-in-transit, up to the disposal phase.

- 3.3.3.5.1. **Data-at-Rest.** Policies, standards, and procedures as well as risk management controls must be in place to secure the BSFI's information assets, whether stored on computer systems, physical media, or in hard-copy documents. The level of protective controls shall depend on the sensitivity and criticality of the information. Sensitive information such as system documentation, application source code, and production transaction data are expected to have more extensive controls to guard against alteration or data leakage (e.g., integrity checkers, cryptographic hashes, data leakage prevention systems). Management should likewise implement appropriate controls over information stored on portable devices such as laptops, smart phones, and tablets taking into account their susceptibility to lost or theft. Applicable risk mitigation controls include data encryption, host-provided access controls, homing beacons, and remote wiping or deletion capabilities, among others.

Considering the unique risk dimensions of storing data in cloud computing platforms, Management should fully understand the nature of the cloud technology in line with business requirements and satisfy themselves as to the

level of security (e.g., how access is controlled and how information is retrieved) and compliance to data privacy and other relevant rules and regulations. Information security and accountability still rests with the institution's Management, hence, it should exercise effective oversight over the cloud service provider in terms of adherence to security, performance and uptime, and back-up and recovery arrangements contained in the contract/agreement.

3.3.3.5.1.1. **Database security.** The BSFI should adopt policies, standards, and procedures to adequately secure databases from unauthorized access, misuse, alteration, leakage and/or tampering. Considering their criticality, sensitivity and business impact, access authorizations to databases should be tightly controlled and monitored. Databases should be configured properly and securely with effective preventive and detective controls such as encryption, integrity checkers, logs and audit trails, among others.

3.3.3.5.1.2. **Data-in-transit.** Data transfers are commonly done through physical media or electronic transmission. Policies, standards, and procedures should be in place for maintaining the security of physical media containing sensitive information while in transit, including to off-site storage, or when shared with third parties. These include contractual requirements incorporating risk-based controls, accreditation process for carriers/couriers, packaging standards, encryption of sensitive information, tracking of shipments, and non-disclosure agreements, among others.

Electronic transmission may be done using various channels such as e-mail, file transfer protocols, secure shell, dedicated line, short message service, and the internet. Management should develop policies and procedures and implement appropriate safeguards depending on the channel used. When transmitting sensitive information over a public network, the institution may use encryption controls and techniques such as secure e-mail protocols, secure file transfer protocol (SFTP), and secure socket layer (SSL) certificates to protect against interception or eavesdropping.

3.3.3.5.2. **Removal, Transfers and Disposition of Assets.** Procedures for the destruction and disposal of media containing sensitive information should be risk-based relative to the sensitivity of the information and the type of media used to store the information. Disposal techniques that the BSFI may implement include deletion, overwriting, degaussing¹, destruction of the media. Management should be mindful about residual data being stored in computer-based media as well as dumpster-diving attacks in paper-based information in deciding the best disposal strategy for sensitive information assets. BSFIs should consider applicable Bangko Sentral regulations as well as laws, rules and regulations in developing policies and procedures on disposal of records/media.

3.3.3.6. **Malware Protection.** Malware threats continue to be a serious concern given their rapid proliferation and advanced capabilities to disrupt operations, corrupt data, and conduct unauthorized transactions. Zero-day exploits and other advanced malwares have the ability to penetrate various access points within the BSFI's network and evade traditional signature-based anti-malware systems and network monitoring controls. To mitigate such risks and ensure resilience against malware threats, Management should adopt layered and integrated anti-malware strategy, including data integrity checks, anomaly detection, system behavior monitoring, and enhanced employee security awareness training programs.

¹ Degaussing is a procedure that reduces the magnetic flux to virtual zero by applying a reverse magnetizing field. Also called demagnetizing.

At a minimum, Management should apply the "Least Privilege" principle in granting access to all systems and services and mandate safe computing practices for all users. Other preventive measures include installation and timely update of anti-malware software provided by reputable vendors, periodic vulnerability scanning, and effective patch management procedures for all critical systems and applications. To address the more sophisticated forms of malware, Management should consider adopting advanced security solutions such as signature-less anti-malware solutions capable of analyzing abnormal behavioral patterns in network and system traffic flows. Likewise, application whitelisting which allows only specified programs to run and/or sandboxing technologies which can inspect incoming traffic such as e-mail attachments without compromising the production environment can be employed.

As malware sophistication and capabilities evolve, Management should continuously monitor changes in technologies, threat profiles and the overall operating environment to address emerging risks. It should likewise closely coordinate with its technology vendors and relevant information sharing groups for appropriate remediation procedures.

3.3.3.7. **Encryption.** Encryption, when properly designed, managed, and implemented, can serve as a key control in securing communications, information, and data storage. Management should adopt a sound encryption program covering the following elements:

- a. Encryption type, level and strength commensurate to the sensitivity of the information based on the institution's data classification policy;
- b. Effective key management policies and practices to properly safeguard the generation, distribution, storage, entry, use, and archiving of cryptographic keys; and
- c. Periodic review and testing to ensure that encryption methods deployed still provide the desired level of security vis-a-vis changes in technology and threat landscape.

3.3.3.8. **Integration with IT Processes.**

3.3.3.8.1. **Systems Development and Acquisition.** Security requirements and considerations should be deeply embedded into the BSFI's systems development and acquisition processes. Involvement of internal audit and information security personnel in the development or acquisition activities should be clearly defined as a means to verify the adequacy of the control and security requirements as they are developed and implemented.

Aside from business functionalities, security requirements relating to system access control, authentication, transaction authorization, data integrity, system activity logging, audit trail, security event tracking, and exception handling should be clear and specific. The information and/or process owners should check security requirements and conduct user acceptance tests prior to approval of systems to be loaded into the production environment.

Further, BSFIs should maintain separate environments for their development, testing, and production activities respectively. In line with this, programmers/developers should have no access to the production environment. Lastly, strict segregation of duties between developers/programmers and IT operations should be upheld.

3.3.3.8.2. **Change Management.** The BSFI should have an effective and documented process to introduce changes into the IT environment in a safe and secure manner. Such changes should be controlled as to requirements definition, authorization and approvals, testing procedures, and audit trails. Moreover, the process should incorporate review of the impact of changes to the effectiveness of security controls.

3.3.3.8.3. **Patch Management.** Management should adopt a patch management process to promptly identify available security patches to technology and software assets, evaluate criticality and risk of patches, and test and deploy patches within an appropriate timeframe.

3.3.3.8.4. **Vendor Management and Outsourcing.** Management should conduct appropriate due diligence and consider information security in selecting third party service providers (TPSPs). The BSFI should ensure that effective oversight processes are in place to monitor the activities of TPSPs. Contracts should sufficiently detail information security requirements, particularly for TPSPs that store, transmit, process, or dispose of customer information. Mechanisms should be in place to properly monitor the performance of third party service providers to confirm whether sufficient level of controls is maintained. Considering that TPSPs may be a source of cyber-risks, Management should properly assess cyber-risk exposures from TPSPs in order to proactively adjust their cyber-risk management

3.4. **Detection.** Management should design and implement effective detection controls over the BSFI's networks, critical systems and applications, access points, and confidential information. Detection controls provide the institution with alerts and notifications for any anomalous activities within its network that can potentially impair the confidentiality, integrity, and availability of information assets. Early detection is critical to the BSFI's incident response and recovery procedures as it allows sufficient lead time to institute countermeasures to address impending attacks and contain associated impacts. The detection capabilities are largely a function of people, process, and technology that enable continuous monitoring of the institution's internal networks, systems, applications, and databases.

The level and maturity of the BSFI's detection capabilities should be commensurate to its IT profile classification and operating environment. The selection and design of detection controls largely depends on business priorities and overall security strategy. Detection controls which Management may employ include intrusion detection systems (IDS), virus/malware detection, honeypots, system alerts/notifications, and security incident and event management (SIEM) system. For moderate to complex BSFIs, detection controls are expected to be largely automated to facilitate real-time or near real-time analysis of events such the use of SIEM, IDS, and other technology-based detection systems.

At a minimum, all BSFIs should be able to establish baseline profile of system activity or condition and data flows across the layers of their infrastructure to facilitate monitoring and detection of anomalous activity. Likewise, metrics should be defined for systems, applications and network to determine indicators of possible compromise. For instance, access to a highly-sensitive system beyond office hours or failed log-in attempts of privilege user accounts should prompt real-time or near real-time alerts and notification to concerned security operations personnel.

3.4.1. **Log Management.** Log files can be analyzed for real-time or near real-time detection of anomalous activities, facilitate subsequent investigation of security incidents and can serve as forensic evidence for the prosecution of fraudulent activities. Thus, Management should put in place adequate security controls to prevent unauthorized access, modification and/or deletion of log files. Depending on the criticality of information contained in the log files, Management should implement the following controls to secure the integrity of log files:

- a. Encrypting log files containing sensitive data, where feasible;
- b. Ensuring adequate storage capacity to avoid gaps in log generation;
- c. Restricting access and disallowing modification to log files. Attempts to tamper with log files should prompt activation of system alarms/notifications; and
- d. Securing backup and disposal of log files.

3.4.2. **Layered Detection.** In designing the BSFI's detection controls and monitoring capabilities, Management should, to the extent feasible, adopt a layered or defense-in- depth approach to ensure that a failure in one control would be compensated by another control. This approach effectively delays or disrupts an attacker's ability to progress within the attack sequence. Tools such as attack trees, event trees, and kill chains may be utilized to enable swift identification and remediation of attacks as they occur.

- 3.5. **Response.** The response phase is triggered upon confirmation of an occurrence of a cyber-attack or security incident affecting the BSFI and its customers. With the growing incidence of sophisticated cyber-crimes and threats, Management should develop comprehensive, updated, and tested incident response plans supported by well-trained incident responders, investigators, and forensic data collectors. Through adequate response capabilities, Management should be able to minimize and contain the damage and impact arising from security incidents, immediately restore critical systems and services, and facilitate investigation to determine root causes.
- 3.5.1. **Incident Response Plan and Procedures.** Management should develop and implement a formal incident response plan to address identified information security incidents in a timely manner. The incident response plan should:
- a. Provide a roadmap for implementing an incident response process appropriate to the nature, size, and complexity of the institution;
 - b. Describe the structure and organization that supports the incident response process;
 - c. Classify incidents, define reportable incidents, and escalation protocols;
 - d. Define metrics for assessing the incident response process; and
 - e. Define resources and management support needed to effectively maintain and continuously improve the incident response process.
- 3.5.2. **Incident Management Process.** Incident handling should follow a well-defined and documented incident management process which sufficiently details the steps from incident analysis and triage assessment, impact mitigation and containment up to testing and continuous improvements.
- 3.5.2.1. **Incident Analysis and Triage Assessment.** Reported incidents should be investigated to confirm their occurrence and classification. Incidents should be categorized or classified in a manner that enables appropriate prioritization of response and recovery efforts. The category of an incident should guide protocols for communicating to internal and external stakeholders.
- 3.5.2.2. **Impact Mitigation and Containment.** Upon discovery of an information security incident, the BSFI should seek to contain the damage, mitigate its effects, and eradicate the cause of the incident. Containment measures should be implemented to prevent further harm to the BSFI and/or its customers. Strategies for containment can vary between organizations but typically include the following:
- a. Isolation of compromised systems;
 - b. Remediation and recovery of compromised systems;
 - c. Collection and preservation of evidence; and
 - d. Communication with affected parties (e.g., primary regulator, information-sharing organizations, law enforcement authorities, customers).
- 3.5.2.3. **Testing and Continuous Improvement.** Management should define a process for periodically reviewing the incident response plan and updating it based on the BSFI's experience from current and previous incident response activities, including periodic testing exercises.
- 3.5.3. **Incident Response Teams.** The incident response plan should identify in advance the personnel who will be tasked to respond to an information security incident and clearly define their roles and responsibilities. Organizing a team and assigning responsibilities during an actual incident is likely to cause confusion and may limit the ability of the BSFI to effectively execute response and recovery efforts. In this regard, BSFIs should set-up and organize a formal security incident response team (SIRT) tasked to perform, coordinate, and support responses to security incidents and intrusions. Typical SIRT membership includes individuals with varied backgrounds and different areas of expertise including management, legal, public relations, information security, and information technology.
- 3.5.4. **Crisis Communication and Notification.** The plan should be adequately communicated to appropriate internal and external stakeholders. The BSFI should establish and communicate standard procedures for reporting possible information security incidents to a designated officer or organizational unit.

Concerned BSFIs should promptly notify the Bangko Sentral of any confirmed IT-related fraud cases or major security breaches, pursuant to Sec. 148. Appropriate law enforcement authorities should also be

notified in situations involving criminal violations requiring immediate attention. Incidents involving unauthorized disclosure of sensitive personal information should comply with notification rules set by the National Privacy Commission. Customers should also be notified when warranted.

- 3.5.5. **Forensic Readiness.** Management should implement appropriate controls to facilitate forensic investigation of incidents. Policies on system logging should be established covering the types of logs to be maintained and their retention periods. Applicable Bangko Sentral regulations as well as laws, rules, and regulations on records retention should be complied with. Where a follow-up action against a person or organization after an information security incident involves legal action, evidence shall be collected, preserved, and presented to conform to the relevant rules for evidence.

Management should define in the response plan a systematic process for recording and monitoring information security incidents to facilitate investigation and subsequent analysis. Adequate documentation should be maintained for each incident from identification to closure. Facts about the incident, operational impact, estimated cost, investigation findings, and actions taken by the BSFI should be consistently documented. Automated means of reporting and tracking of incidents may be implemented for analysis and preparation of reports to support decision-making.

- 3.5.6. **Outsourcing.** For a BSFI without in-house technical expertise, outsourcing of functions related to security incident response including forensic investigations, can be a viable option. In such instances, Management should require the service provider to strictly adhere to the BSFI's policies and standards and ensure confidentiality of data.

- 3.6. **Recovery.** The recovery phase encompasses both the resumption of activities at a level which is considered "good enough for a certain period of time" and full recovery, i.e., an eventual return to full service. The BSFI should be able to establish back-up facilities and recovery strategies to ensure the continuity of critical operations. During recovery phase, Management should ensure that information processed using back-up facilities and alternate sites still meet acceptable levels of security.

- 3.6.1. **Business Continuity Management.** Management should develop and implement a formal incident recovery plan to restore capabilities or services that are affected by information security incidents in a timely manner. This can be achieved by incorporating scenarios related to information security (e.g., data breach, malware outbreak, denial of service) in its business continuity and disaster recovery plans. Refer to Sec. 149 for further guidance on Business Continuity Management (BCM).

- 3.6.2. **Communication Plan.** A communication plan for information security incidents should be incorporated in the incident recovery plan to facilitate escalation for appropriate management action and to help manage reputation risk. Incidents that lead to publicly visible disruption to BSFI services should be given utmost attention. Timely notification should be given to all relevant internal and external stakeholders (e.g., employees, customers, vendors, regulators, counterparties, and key service providers, media and the public) following a disruption.

Management should consider alternate methods of communication and preparation of predetermined messages tailored to a number of plausible disruption scenarios to ensure various stakeholders are timely, consistently, and effectively informed. Refer to Sec. 149 for further guidance on crisis management.

- 3.6.3. **Cyber Resilience.** Management should consider the potential impact of evolving cyber events into the BSFI's business continuity planning and institute adequate cyber resilience capabilities. Given the unique characteristics of cyber-threats and attacks, traditional back-up and recovery arrangements adopted may no longer be sufficient. In some instances, it may even exacerbate the damage to BSFI's network, operations, and critical information assets. Hence, Management must consider cyber-related attacks and incidents in the BCM and recovery processes to achieve cyber resilience.

- 3.6.3.1. **Business Impact Analysis/Risk Assessment.** Management should consider the impact of cyber-threat scenarios during the Business Impact Analysis/Risk Assessment (BIA/RA) phase in conjunction with the ongoing information security risk assessment process. The BSFI should take into consideration a wide-range of cyber-threat scenarios perpetrated from diverse threat sources (e.g., skilled hackers, insiders, state-sponsored groups) which seek to compromise the confidentiality, availability, and integrity of its information assets and networks. Cyber-risks and threats such as

malware, distributed denial of service (DDoS) attacks, advance persistent threats (APTs), among others, should be considered in the BIA/RA process.

3.6.3.2. **Defensive Strategies.** Depending on the results of its risk assessments and cybersecurity profile, the BSFI may need to deploy defensive strategies ranging from basic to highly advanced technologies to promote cyber resilience, such as, defense-in-depth or layered controls, reducing attack surfaces, virtual technologies, air-gap facilities and threat intelligence feeds, among others.

3.6.3.3. **Recovery Arrangements.** Depending on IT and operations risk profile and complexity, Management should consider adopting innovative recovery arrangements that address the unique risks arising from cyber-threats. These include the use of non-similar facility, cloud-based disaster recovery solutions and pre-arranged third party forensic and incident management services.

3.7. **Assurance and Testing.** Management needs to continually assess and test controls and security measures implemented under prevent, detect, respond and recover phases to ensure that these are effective and working as intended. Likewise, a comprehensive, systematic and layered testing and assurance program covering security processes and technologies should be in place. This is to ensure that the ISP is on track in providing appropriate level of information security commensurate to the BSFI's IT profile classification. This phase also ensures that the ISSP and ISP remain effective vis-a-vis the fast-evolving cyber-threat landscape.

3.7.1. **Testing Program.** Given the dynamic nature of information security risks, Management should continually ascertain that the ISP is operating as expected and reaching the intended goals. The scope and depth of testing generally depend on the level of confidence that the Board and Senior Management intend to place on the program. Management should establish a written testing and evaluation plan that assesses the effectiveness of system design and operation, including the integration of security controls, vis-a-vis the level of assurance desired by the Board and Senior Management. At a minimum, the testing plan should have the following key elements:

- a. Scope, timing, and frequency of testing;
- b. Independence and capability of the testing personnel and review team;
- c. Criteria used to ascertain whether the results are acceptable; and
- d. Reporting process to the Board and Senior Management.

3.7.2. **Types of Tests and Evaluations.** Considering that no one type of assessment can provide a complete representation of the BSFI's information security posture, Management should employ a variety of effective testing methodologies and practices in order to validate the overall effectiveness of the ISP. Some of the more common types of security assessment/testing with corresponding objectives, brief description and other details, in order of increasing complexity, are as follows:

- a. Self-Assessment - an activity conducted by the specific business line or department that typically captures their awareness of the level of risk and effectiveness of controls concerning their own business processes and functions. Since these are performed by the concerned business units themselves, an independent review process should occur subsequent to the conduct of self-assessment for validation and consistency across the entire BSFI.
- b. Security Audit/Review and Compliance Check - is commonly performed by the BSFI's IT auditors, security personnel, and compliance function, respectively, to assess compliance to relevant security policies, standards, and procedures. Internal or external auditors review all aspects of the ISP to determine its overall effectiveness in achieving the desired security results or outcome. Auditors must have the necessary background, training, experience, and independence to effectively discharge their tasks and responsibilities.
- c. Vulnerability Assessment (VA) - refers to the identification of security vulnerabilities in systems and network usually through the use of automated vulnerability scanners. Frequency of the performance of vulnerability scans should be determined based on assessment of risk and criticality of systems or information stored on each system. High risk vulnerabilities uncovered during VA exercises should be remediated within a reasonable timeframe.
- d. Penetration Testing (PT) - involves subjecting a system or network to simulated or real-world attacks that exploit vulnerabilities under controlled conditions. Depending on the test objectives and scope,

the BSFI may use penetration testing to assess potential business impact, the level of security, risk management processes and controls as well as the knowledge of concerned personnel in the organization in identifying, detecting, and responding to attacks.

For BSFIs providing digital/electronic, financial services, VA and PT should be performed by an external party at least annually.

- e. Scenario-Based Testing - constitutes a wide range of scenarios, including simulation of extreme but plausible events such as targeted cyber-attacks in testing the BSFI's response, resumption and recovery practices, including governance arrangements and communication plans. To ensure robustness of test scenarios, cyber threat intelligence and threat modeling should be utilized to the extent possible to mimic actual cyber-threats and events.
- f. Compromise/Breach Assessment- involves the placement of sensors/tools within the network to actively probe network traffic and system activities to detect, alert, and potentially mitigate malware intrusions as they occur. This type of assessment addresses advanced malwares and threats with capabilities to evade traditional monitoring systems. Complex BSFIs should conduct regular compromise/breach assessment exercises, on top of other types of tests, to enhance the level of assurance on their security posture as well as their overall situational awareness.
- g. Red-Teaming Exercise - a more in-depth type of penetration testing which continually challenges the organization's defenses and controls against cyber- attacks. The red team is composed of highly-trained specialists, acting on adversarial mode, which may be the BSFI's own independent employees or third party experts. The end objective is to improve the state of readiness of the entire organization in cases of cyber-attacks.

4. CYBER THREAT INTELLIGENCE AND COLLABORATION

- 4.1. **Situational Awareness and Threat Monitoring.** In response to rapidly-evolving, sophisticated, and coordinated cyber-attacks targeting financial institutions, BSFIs need to enhance situational awareness as well as their threat monitoring capabilities. Situational awareness is a state whereby the BSFIs' Board and Senior Management are fully aware of the internal and external threat environment as it relates to their IT risk and cyber-risk profiles, operating complexities and business models. Situational awareness entails gathering and maintaining robust threat intelligence about the proficiencies, tactics, and motives of malicious actors/attackers that enable BSFIs to institute appropriate countermeasures quickly. A keen sense of the threat landscape, both from internal and external sources, would greatly help BSFIs in adjusting their ISSP and ISP to achieve cyber- resilience. BSFIs should establish a systematic process of gathering, analyzing, and monitoring threat information for actionable intelligence, timely insights, and proactive response. As gathered from Bangko Sentral 's surveillance and monitoring activities, below are some of the top cyber-threats that BSFIs should be wary about with the corresponding prescribed countermeasures/controls:

Threat Description	Prescribed Countermeasures/Controls
Card Skimming - refers to the illegal copying of information from the magnetic stripe of a credit or ATM card to gain access to accounts. This type of fraud usually results to financial losses and unauthorized charges to the customers.	As required under Sec. 148 , BSFIs should migrate their entire payment card network to the EMV technology. This is to address the vulnerabilities of magnetic stripe cards from card skimming fraud. Pending full migration to EMV, BSFIs should implement mitigating controls such as those specified under Bangko Sentral Memorandum No. M-2014-040 dated 03 October 2014 on Card Fraud and skimming attacks.

Distributed Denial of Service (DDoS) Attack - makes use of the capacity limitation of enterprise networks, systems or applications with extreme traffic loads or requests that impair their availability to legitimate users.	BSFIs should implement multiple layers of control to prevent, detect, correct, monitor, and analyze system and network anomalies arising from DDoS attacks. These include deployment of on-premise and/or cloud-based solutions, close coordination with internet service providers (ISPs) and hosting companies, as well as having a robust and reliable back-up system. Incident response plans should cover response and recovery procedures for DDoS attacks. In some cases, a DDoS attack is used as a diversionary tactic, hence, BSFIs should be on heightened alert for any signs of infiltration or presence of malware across their IT environment during and after such incident.
Phishing Attacks - involve tricking customers into giving sensitive information through fraudulent emails or websites.	Employee and customer awareness campaigns and education programs are key elements in addressing phishing attacks since these attacks specifically exploit BSFIs' employees, officers and customers. BSFIs should adopt multi-factor authentication for high-risk systems/transactions in order to limit the ability of attackers to consummate the fraud. Further, BSFIs should adopt security measures and mitigating controls prescribed under Memorandum No. M-2015-025 dated 22 June 2015 on Guidance on Management of Risks Associated with Fraudulent E-mails or Websites.
Ransomware and other malwares - refer to malicious software that compromises the confidentiality, availability, and integrity of information systems, networks and data. For ransomware, data or applications are encrypted by the attacker to prevent users from accessing their own data. Only when users pay the "ransom" will these information or systems be released.	On top of the security controls and measures under Item 3.3.3.6 on malware prevention prescribed above, BSFIs, specifically those confronted with ransomware attacks should refrain from paying or communicating with the malicious actor as this does not guarantee that ransomed and/or encrypted files will be released. To mitigate the potential catastrophic impact of ransomware attacks, BSFIs should ensure that adequate back-up and recovery procedures for critical systems and data, including periodic testing to check the integrity thereof, are in place. Because back-ups may also be subject to attacks, BSFIs should consider supplementing existing practices with cloud-based back-ups and/or back-ups using removable media or air-gapped facilities.
Advanced Persistent Threats (APT) - are highly-sophisticated attacks which primarily target a specific institution or industry for terrorist aims, corporate espionage or massive fraud schemes. APTs often involve integrity breach wherein core data, systems, and network are compromised and corrupted once an attacker gained foothold and established persistent presence in the target environment.	These types of attacks are generally more destructive compared to the other cyber-threats since the threat actors are highly skilled, motivated, and determined to infiltrate and exploit vulnerabilities on stealth mode. As such, Management should adopt defense-in-depth strategy in preventing and detecting APTs. Likewise, complex BSFIs that are more vulnerable to these types of threats should consider deploying automated and advanced security tools, technologies and methods such as the use of anti-malware solutions, behavior-based fraud management systems and monitoring tools with machine-learning capabilities, among others. These technologies should be supported by 24x7 monitoring through a mature SOC. High-risk system should have robust security controls and closely monitored for any anomalous or suspicious activities. A strong security culture should likewise be instilled across the organization as a first line of defense.

4.1.1. Security Operations Center. In light of the growing cyber-threat concerns affecting BSFIs, the need for centralized visibility, continuous monitoring, and rapid response and recovery procedures is increasingly heightened. Hence, centralizing security operations through a security operations center (SOC), equipped with automated security monitoring tools, defined processes and highly-trained personnel, enables BSFIs to keep pace with the tactics of advanced threat actors. Complex BSFIs should put in place an SOC tasked to provide round-the-clock monitoring and real-time analysis of security incidents and cyber-related events.

An SOC is typically organized into three levels or tiers, with Tier 1 responders serving as the frontlines to monitor security endpoints and perform incident triage procedures in line with the institution's incident response plans and procedures. Depending on incident classification, security events are then escalated to

Tier 2 and Tier 3 responders accordingly to conduct deep-dive analysis and investigation to quickly remediate, contain and recover from the incident. The SOC's major functions commonly cover detect, respond, and recover phases in the information security cycle. These include network, host, and application activity monitoring; forensic investigation; threat analysis and modeling; and engagement with security service providers and information sharing groups. The BSFI should adopt adequate policies and procedures in managing the SOC which should be integrated into its governance mechanisms, business and IT operations, incident response and BCM processes.

Considering that it may be difficult for some organizations to establish a mature and fully-operational SOC with the requisite skills, expertise and tools, the BSFI may opt to outsource some or all of its SOC functions to a third party service provider. This may be under a managed security service arrangement either on-premise, off-premise or through cloud computing platforms. In this regard, Management should exercise adequate oversight, due diligence and other risk management controls, and comply with existing Bangko Sentral regulations on outsourcing and cloud computing.

- 4.1.2 **Emerging Technologies and Innovation.** Emerging technologies and innovation are continuously being introduced in the market resulting to a dynamic operating environment for BSFIs. These include distributed ledger technologies (DLT), cryptocurrencies, big data and internet of things (IOT), among others. These technologies, if prudently harnessed, can significantly increase market share, improve customer experience, enhance security, and promote financial inclusion.

Prior to adopting these emerging technologies, Management should fully understand the mechanics, implications to consumer protection, money-laundering and overall security posture as well as inherent risks associated with these new technologies. In cases where applicable regulations/requirements are unclear, BSFIs should consult the Bangko Sentral prior to implementation.

- 4.2. **Information Sharing and Collaboration.** With the stealthier, sophisticated and advanced forms of cyber-threats and attacks confronting the financial services industry, BSFIs should have a collective, coordinated, and strategic response through information sharing and collaboration. Information sharing allows BSFIs to enhance threat intelligence/ situational awareness that enable quick identification, prevention, and response to emerging and persistent threats. In some cases, BSFIs may need to cooperate with concerned government/regulatory bodies, law enforcement agencies and third party providers to prosecute cyber-criminals, activate government incident response plans or issue warnings/advisories to the public. The extent, breadth, and nature of information sharing activities of BSFIs largely depend on their maturity and capabilities. Moderate to Complex BSFIs should actively engage in information sharing organizations and fora within the financial services industry.

At a minimum, BSFIs should define information sharing goals and objectives aligned with their ISSP and ISP. Further, BSFIs should formulate policies and procedures on information sharing activities within and outside their organizations, taking into consideration the following:

- a. Obtaining Board and Senior Management approvals prior to joining information sharing groups/communities;
- b. Listing/identifying threat information (i.e. indicators of compromise (IOC), tactics, techniques and procedures (TIPs), security alerts, etc.) that can be shared with trusted parties;
- c. Establishing processes to sanitize/anonymize threat information that may contain sensitive/confidential data; and
- d. Ensuring compliance with applicable laws, rules, and regulations (e.g. data privacy and bank secrecy laws).

- 4.3. **Continuous Improvement.** The BSFI should integrate continuous improvements in its ISSP and ISP to maintain an effective security posture amidst changing threat landscape and technological developments. Lessons learned from their own experiences as well as from other BSFIs/organizations should be incorporated in further enhancing its capabilities to identify, assess, and manage security threats and vulnerabilities. A holistic and systematic approach should be adopted in assessing the BSFI's security posture, supported by robust and effective metrics, to ensure that security program, initiatives and efforts are moving in the right direction. The improvement process should cover all aspects of ISRM, people, policies, standards and procedures, processes and technology which should ultimately result to ongoing cyber-resilience.

IT RISK MANAGEMENT STANDARDS AND GUIDELINES
Area: Project Management/Development, Acquisition and Change Management
(Appendix to Section 148 on Purpose and Scope, and on IT Risk Management Systems)

1. INTRODUCTION

- 1.1. Because technology is constantly evolving, Management of BSFIs should periodically assess their uses of IT as part of overall business planning. Such an enterprise-wide and ongoing approach should be formalized in the IT strategic plan to help ensure that all major IT projects are consistent with its overall strategic goals.
- 1.2. As part of their strategic goals, BSFIs may need to constantly introduce new or enhanced products and services, improve systems and processes and implement updates and innovations in IT to secure and manage voluminous information and maintain their competitive position. This necessity may oftentimes result to initiating IT projects¹; which may be in the form of internal or external development of software applications or systems, acquisition and/or implementation of new or enhanced hardware, software, infrastructure or services with or without the help of third party providers.
- 1.3. IT projects, when managed improperly, often result in late deliveries, cost overruns, or poor quality applications. Inferior applications can result in underused, unsecure, or unreliable systems. Retrofitting functional, security, or automated-control² features into applications is expensive, time consuming, and often results in less effective features. Therefore, BSFIs should carefully manage IT-related projects to ensure they meet organizational needs on time and within budget.

2. ROLES AND RESPONSIBILITIES

- 2.1. The size and complexity of a project dictates the required number and qualifications of project personnel. Duties may overlap in smaller organizations or lower-risk projects; however, all projects should include appropriate segregation of duties or compensating controls.
- 2.2. **Board of Directors (Board) and Senior Management.** The BSFI's Board and senior management should review, approve, and monitor IT projects that may have significant impact on its operations, earnings or capital. They are responsible to ensure that IT projects support business objectives and adequate resources are available to complete these projects. Consequently, they should establish adequate policies and strategies to achieve these and ensure that risks related to IT projects are managed appropriately.

Senior management is expected to have more knowledge and involvement in the day-to-day operations of these IT projects to critically evaluate the design and oversee the related operation and activities. They should ensure that IT projects are coordinated and undertaken in adherence to appropriate policies, standards, and risk management controls. They should periodically inform the Board and/or IT Steering Committee of the IT initiatives and the related risks that these may pose to the BSFI. They should also review, approve, document and report deviations from established policies and standards.

- 2.3. **Quality Assurance.** An independent party (e.g., the quality assurance function, the TRM function or the technology audit team), who is not involved in the project development, should conduct a quality assurance review of major IT-related projects, with the assistance of the legal and compliance functions, if necessary. This review is to ensure compliance with the project life cycle³ methodology, other internal policies, control requirements, regulations and applicable laws.

3. PROJECT MANAGEMENT STANDARDS AND METHODOLOGY

- 3.1. **Project Management.** The BSFI should establish a general framework for management of major technology-related projects. This framework should, among other things, specify the project management methodology to be adopted and applied to these projects. The methodology should cover, at a minimum, allocation of responsibilities, activity breakdown, budgeting of time and resources, milestones, check points, key dependencies, quality assurance, risk assessment and approvals.

A BSFI that needs to coordinate multiple IT projects should establish standards for coordinating and managing the projects from an enterprise-wide perspective. The standards should, at a minimum, include guidelines for project prioritization, resource coordination and progress reporting.

¹ An IT project is a task involving the acquisition, development or maintenance of a technology product.

² Automated controls are software routines designed into programs to ensure the validity, accuracy, completeness and availability of input, processed and stored data.

³ Project life cycle refers to a logical sequence of activities to accomplish a project's goals or objectives.

- 3.2. **Project Methodology.** The BSFI should adopt and implement a full project life cycle methodology governing the process of developing, implementing and maintaining major computer systems. In general, this should involve phases of project initiation, feasibility study, requirement definition, system design, program development, system and acceptance testing, training, implementation, operation and maintenance.

The project life cycle methodology should define clearly the roles and responsibilities for the project team and the deliverables¹ from each phase. It also needs to contain a process to ensure that appropriate security requirements are identified when formulating business requirements, built during program development, tested and implemented.

4. PROJECT PLANNING AND INITIATION

- 4.1. A formal project committee, to ensure the development of well-structured applications, should be established with clear details of its terms and reference. The committee should at least consist of the following representatives:
- a. Senior management, to provide strategic direction and ensure full commitment;
 - b. User departments, to ensure that the application design meets their requirements;
 - c. Internal audit department, to act as an independent party to ensure adequate controls are diligently applied at all times. However, internal audit participation should only be on an advisory capacity; and
 - d. IT department, to provide technical knowledge and skills.
- 4.2. A feasibility study should be performed to identify the expected costs and benefits of developing a system, and also to decide either to utilize internal resources or to outsource to a vendor. In case of outsourcing, the responsibility of the senior management does not diminish in ensuring that a well-designed application is developed. The senior management maintains the responsibility for ensuring that minimum controls are in place and are in accordance with the BSFI's standards.
- 4.3. When management proposes a new hardware, software or IT solution and/or changes to existing ones, it should ensure that functional, operational and regulatory requirements are accurately identified and clearly detailed in request for proposals (RFP²) or invitations-to-tender (ITT) that it distributes to vendors or third-party service providers (TSP) in the bid solicitation process. Moreover, relevant security requirements should be clearly specified before a new system is developed or acquired. A review should also be conducted to ensure an appropriate balance between security and other objectives (ease- of-use, operational simplicity, ability to upgrade, acceptable cost, etc.) is achieved.
- 4.4. During the development and acquisition of new systems or other major IT projects, project plans should address issues such as - a) business requirements for resumption and recovery alternatives; b) information on back-up and storage; c) hardware and software requirements at recovery locations; d) BCP and documentation maintenance; e) disaster recovery testing; and f) staffing and facilities. Likewise, during maintenance, where there are changes to the operating environment, business continuity considerations should be included in the change control process and implementation phase.
- 4.5. Proper planning should be employed to ensure IT projects meet their objectives. Project control systems should be employed to monitor specific target completion dates for each task of systems development against original targets. Periodic reports to senior management such as, project priorities and status, resource allocations, target deviations and budgets, should be in place to measure project effectiveness.

5. SYSTEMS DEVELOPMENT

- 5.1. Development projects involve the creation of applications, integrated application systems and other critical softwares. Software development projects are completed in-house, through outsourcing, or by a combined approach. To manage this type of projects, the BSFI should establish development standards that, at a minimum, address project management, system control, and quality assurance issues. Project management standards should address issues such as project management methodologies, risk management procedures, and project approval authorities.

System control standards should address items such as an application's functional, security, and automated control features. Quality assurance standards should address issues such as the validation of project assumptions, adherence to project standards, and testing of a product's performance.

¹ Deliverables are project goals and expectations. They include broadly-defined, project or phase requirements and specifically-defined tasks within project phases.

² RFP is a document that a BSFI sends to a vendor inviting the vendor to submit a bid for hardware, software, services, or any combination of the three. An institution typically issues the RFP in order to assess competing bids.

- 5.2. Development standards should also include procedures for managing internally developed spreadsheets and database reports. BSFIs often rely on the spreadsheets and reports to make important budgeting and asset/liability decisions, but fail to implement adequate testing, documentation, and change-control procedures. Management's reliance on the spreadsheets and reports should dictate the formality of their development procedures, change controls, and backup techniques.
- 5.3. Programming standards should be designed to address issues such as the selection of programming languages and tools, the layout or format of scripted code, interoperability between systems, and the naming conventions of code routines and program libraries. These will enhance the BSFI's ability to decrease coding defects and increase the security, reliability, and maintainability of application programs.

6. SYSTEM ACQUISITION

- 6.1. Software package acquisition is an alternative to in-house systems development and should be subject to broadly similar controls as the project life cycle. A proper software selection analysis should be conducted to ensure that user and business requirements are met. In particular, the process should involve detailed evaluation of the software package and its supplier (e.g. its financial condition, reputation and technical capabilities). If financial stability is in doubt, alternatives should be developed to reduce the adverse impact from loss of a vendor's service.
- 6.2. The contract agreement between the BSFI and vendor should be legally binding. The BSFI should ensure all contract agreements outline all expected service levels and are properly executed to protect its interest. It is also important to ensure that vendor technicians and third-party consultants are subjected to at least, or preferably more stringent policies and controls compared to the in-house staff. In the case where contract personnel are employed, written contracts should also be in effect.
- 6.3. To optimize use of acquired software and limit or minimize risks from unauthorized or obsolete software, guidelines and procedures on installation, use, maintenance and retirement should be formally defined. Installation should be controlled to minimize risks from unauthorized software (such as loss of data, reduced productivity and unnecessary consumption of network bandwidth). Licenses should also be adequately reviewed, safe kept and monitored to ensure proper usage and adherence to terms and conditions. As changes in the industry and updates to the computing environment occur, software retirement should also be defined in the guidelines to provide when and how acquired software will be removed from or upgraded in the BSFI's existing portfolio.

7. CHANGE MANAGEMENT

- 7.1. Change management is the process of planning, scheduling, applying, distributing and tracking changes to application systems, system software (e.g., operating systems and utilities), hardware, network systems, and other IT facilities and equipment. The change management procedures should be formalized, enforced and adequately documented. Authorization and approval are required for all changes and the personnel responsible for program migration should be identified. For the purpose of accountability, proper sign-off should be adequately implemented where formal acknowledgement is obtained from all related parties.
- 7.2. An effective change management process helps to ensure the integrity and reliability of the production environment. To ensure IT-related modifications are appropriately authorized, tested, documented, implemented and disseminated, the change manage process should include the following:
 - a. Classification and prioritization of changes and determination of the impact of changes;
 - b. Roles and responsibilities of each relevant party, including IT functions and end-user departments, with adequate segregation of duties. This is to ensure that no single person can effect changes to the production environment without the review and approval of other authorized personnel;
 - c. Program version controls and audit trails;
 - d. Scheduling, tracking, monitoring and implementation of changes to minimize business disruption;
 - e. Process for rolling-back changes to re-instate the original programs, system configuration or data in the event of production release problems; and
 - f. Post implementation verification of the changes made (e.g. by checking the versions of major amendments).
- 7.3. Requested changes should be screened before acceptance to determine alternate methods of making the changes, the cost of changes and time requirements for programming activity. System analysts should assess the impact and validity of the proposed changes and all critical change requests should be set as priority.

- 7.4. The actual cause that led to the request for change should be identified and adequately documented. Formal reports on analysis for problems raised and status of change requests (including closed and outstanding) should be reported to senior management on a periodic basis.
- 7.5. Audit trail of all change requests should be maintained. Programmers' activities should be controlled and monitored, and all jobs assigned should also be closely monitored against target completion dates.
- 7.6. To enable unforeseen problems to be addressed in a timely and controlled manner, the BSFI should establish formal procedures to manage emergency changes. Emergency changes should be approved by the information owner (for application system or production data-related changes) and other relevant parties at the time of change. If the change needs to be introduced as a matter of urgency and it is impracticable to seek the approval of the information owner, endorsement should be sought from the information owner after the implementation as soon as practicable (e.g., on the following business day).
- 7.7. Emergency changes should be logged and backed up (including the previous and changed program versions and data) so that recovery of previous program versions and data files is possible, if necessary. Emergency changes need to be reviewed by independent personnel to ensure that the changes are proper and do not have an undesirable impact on the production environment. They should be subsequently replaced by proper fixes through the normal acceptance testing and change management procedures.
- 7.8. Management should ensure that vendors permitted remote access to network resources are properly authorized. System logs showing activity on the system should be reviewed to ensure that unauthorized remote access has not taken place. Management may institute time of day restrictions for remote access, to limit the duration of time a user can access the network remotely (e.g., only during business hours). Vendors utilizing dial in access should be verified through call back procedures and/or through the use of a modem that can be turned on when authorization has been granted by the system administrator.
- 7.9. Data patching could severely compromise the integrity of the database in production systems and should strictly be avoided. The BSFI should adequately ensure the accuracy and reliability of its database and the integrity of its data. Good project management discipline requires validation of data input, data integrity testing, user sign-off, impact analysis and escalation of decision to senior management should be adopted to ensure accuracy and validity of data before live implementation.

8. SYSTEMS TESTING

- 8.1. A formal acceptance process should be established to ensure that only properly tested and approved systems are promoted to the production environment. System and user acceptance testing should be carried out in an environment separate from the production environment. Production data should not be used in development or acceptance testing unless the data has been desensitized (i.e., not disclosing personal or sensitive information) and prior approval from the information owner has been obtained. Performance testing should also be performed before newly developed systems are migrated to the production environment.
- 8.2. Sufficient testing is important to ensure that design and overall reliability of the application systems are in accordance with original specifications. Tests should be conducted using documented test plans that should encompass all predetermined data or processing problems and business scenarios.
- 8.3. User acceptance testing should be performed in a separate environment. All related users are responsible to ensure that adequate test scenarios are formulated and sufficiently tested. Successful test activities should be formally confirmed and accepted by users, before the modified programs can be transferred to the production environment.

9. SYSTEMS MIGRATION

- 9.1. A secured library for program pending migration to the production environment should be established. The secured library or quarantine area for all amended programs should only be accessible by the personnel who performed the migration process and restricted from the application programmers. This is to mitigate the risk of programmers changing the modified programs after user acceptance testing, but prior to the program migration.
- 9.2. Source compare procedure should be in place to verify changes and to ensure no unauthorized changes have been made. Modified programs should be compared to the authorized change documents to determine that only approved specification changes were implemented.
- 9.3. Updates or a version control for all applications should be maintained. Old versions of source codes¹ should be archived as contingency measure, with a clear indication of the precise date, time and all necessary

¹ Source codes are software program instructions written in format (language) readable by humans.

information while the latest version of the source codes and databases should be strictly protected. Version controls may also be implemented to ensure only authorized programs are migrated to quarantine and production environments.

10. SOURCE CODE CONVERSION AND MAINTENANCE

- 10.1. Conversion of source codes into object codes¹ should be adequately controlled in order to mitigate the risks of unauthorized changes and to ensure accurate and complete results. The conversion process should only be performed by designated personnel. In the case where the compiler programs or other systems development tools are used, it should be placed under restricted control and the access and execution rights are strictly monitored.

In cases where core applications are developed by vendors but the source codes were not released to the BSFI, the institution's interest should be protected in the form of a written agreement. The agreement, generally known as escrow agreement, should allow the BSFI to access the source programs under conditions, such as, but not limited to, discontinued product support or financial insolvency by the vendor. A third-party entity should be appointed to retain these programs and documents in escrow. However, it is important for the BSFI to periodically determine that the source code maintained in escrow is up-to-date. If the BSFI decides not to go into a source code escrow agreement, appropriate controls or contingency plans should be established as necessary, to continue adequate operation of the business or process the acquired program is supporting in case it becomes problematic, obsolete, or ceases to function.

11. SYSTEMS DOCUMENTATION

- 11.1 All standards and procedures on systems development and documentation on user manuals should be formally established and properly maintained to ensure consistency of approach. Accessibility to these documents should be strictly confined only to those who are authorized to receive such information in order for them to effectively discharge their duties.
- 11.2 Management should identify the type and level of documentation personnel must produce during each project phase. Project documentation of major IT projects, especially development and acquisition, should include project requests, feasibility studies, project plans, testing plans, etc. System documentation, which focuses on system analysis and design, should include system concept narratives, data flow charts, and database specifications. Application documentation should include application descriptions, programming flowcharts, and operations and user instructions. The documentation should be revised as needed throughout the project life cycle.
- 11.3 Documentation standards should identify primary documentation custodians and detail document authoring, approving, and formatting requirements. Personnel should document all changes to system, application, and configuration documentation according to prescribed standards. Additionally, management should control access to documentation libraries with appropriate library and version controls.
- 11.4 All standards and documentation should be kept secured to prevent unauthorized access. The BSFI should maintain a central storage (of either hardcopy or softcopy) of all standards and documentation onsite as well as in an offsite premise for contingency purposes. In the case where the application is developed by a vendor, management should ensure that adequate training and manuals are provided as part of the package, stated in writing and clearly understood by all parties. The BSFI should also ensure complete and updated system documentation is provided.

12. POST-IMPLEMENTATION REVIEW

- 12.1. A post implementation review should be conducted at the end of a project to validate the application's operational performance, after it has begun to operate. The relative success of the project should be gauged by comparing planned and actual cost, benefits and completion time. If the planned objectives do not materialize, reasons should be reviewed and documented in a post implementation evaluation report that should be presented to senior management highlighting any operational or project management deficiencies noted.
- 12.2. The responsibilities for conducting post-implementation review can be assigned to the BSFI's IT audit function. In larger IT organizations, formal quality assurance or change management groups may have primary responsibility for post-implementation reviews. In such cases, the IT auditor may choose not to perform a separate review but instead to participate in establishing the test criteria and evaluating results of any other independent reviews.

¹ Object codes are software program instructions compiled (translated) from source code into machine- readable formats.

13. DISPOSAL

- 13.1. The BSFI may sometimes need to remove surplus or obsolete hardware, software, or data. Primary tasks include the transfer, archiving, or destruction of data records. Management should transfer data from production systems in a planned and controlled manner that includes appropriate backup and testing procedures. The BSFI should maintain archived repository of data in accordance with applicable record retention requirements and system documentation to facilitate reinstallation of a system into production, when necessary. Management should destroy data by overwriting old information or degaussing (demagnetizing) disks and tapes.

14. ROLE OF AUDIT, INFORMATION SECURITY AND QUALITY ASSURANCE OFFICERS

- 14.1 **Audit.** The BSFI's auditors assist user departments, project managers, and system designers in identifying system control requirements and testing the controls during development and after implementation. Please refer to Item 6.1 of *Appendix 73* for the detailed guidelines on audit's participation in the development, acquisition, and maintenance of major systems.
- 14.2 **Information Security.** The BSFI should ensure that systems are developed, acquired and maintained with appropriate security controls. To do this, management should ensure that – a) systems are developed and implemented with necessary security features enabled and based on established security control requirements; b) software is trustworthy by implementing appropriate controls in the different project phases; and c) appropriate configuration management and change control processes exist, including an effective patch management process. Management should establish security control requirements based on their risk assessment process evaluating the value of the information at risk and the potential impact of unauthorized access, damage or other threats.
- 14.3 **Quality Assurance.** Independent quality assurance function is a critical part of well-managed IT projects. Comprehensive quality assurance, risk management, and testing standards provide the best means to manage project risks and ensure IT projects, especially software, include expected functionality, security, and operability, as applicable.

(Circular No. 958 dated 25 April 2017)

IT RISK MANAGEMENT STANDARDS AND GUIDELINES
Area: IT Operations
(Appendix to Section 148 on Purpose and Scope, and on IT Risk Management Systems)

1. INTRODUCTION

- 1.1. The evolving role IT plays in supporting the business function has become increasingly complex. IT operations – traditionally housed in a computer data center with user connections through terminals – have become more dynamic and include distributed environments, integrated applications, telecommunication options, internet connectivity, and an array of IT operating platforms¹. With the advent of technology, even small BSFIs have now become increasingly reliant on IT to achieve operational efficiency and deliver innovative products and services. Although some of these BSFIs have developed their products and services in-house, many have relied on vendors and service providers to develop and operate these products and services.
- 1.2. The increasing dependency to IT of BSFIs has consequently resulted to heightened risk exposures arising from their reliance on a variety of IT solutions and services and third-party relationships as well. It is also emphasized that risks involve more than IT and that controls include sound processes and well-trained people. To many BSFIs, effective support and delivery from IT operations has become vital to the performance of most of their critical business lines. This necessitates the adoption of risk management processes that promote sound and controlled operation of IT environments to ensure that IT operations process and store information in a timely, reliable, secure, and resilient manner.

2. ROLES AND RESPONSIBILITIES

- 2.1. **Board of Directors (Board) and Senior Management.** The BSFI's Board and senior management are responsible for overseeing a safe, sound, controlled and efficient IT operating environment that supports the institution's goals and objective. Although they can delegate implementation and oversight of daily operations to IT management, final responsibility for these activities remains with the Board and senior management. Consequently, the Board and senior management are responsible for understanding the risks associated with existing and planned IT operations, determining the risk tolerance of the BSFI, and establishing and monitoring policies for risk management.

On the other hand, IT operations management is primarily responsible in ensuring the BSFI's current and planned infrastructure is sufficient to accomplish the strategic plans of senior management and the Board. To accomplish this objective, operations management should ensure the BSFI has sufficient personnel (in knowledge, experience, and number), system capacity and availability, and storage capacity to achieve strategic objectives. Operations management should select or recommend IT solutions that can meet strategic requirements with reduced resources to control capital expenditures and operating costs.

3. IT OPERATIONS STANDARDS

- 3.1. **Technology Inventory.** To effectively identify, assess, monitor, and manage the risks associated with IT operations, management should have a comprehensive understanding of the BSFI's operations universe. Regardless of size, BSFI management should perform and maintain an inventory of all its IT resources, recognize interdependencies of these systems and understand how these systems support the associated business lines. Management should ensure the inventory is updated on an on-going basis to reflect the BSFI's IT environment at any point in time.

Appropriate documentation of infrastructure and data flow should be in place to facilitate risk identification, application of controls, and ongoing maintenance of information systems. At a minimum, said documentation should include among others, the following components:

- a. **Hardware** - Inventory should be comprehensive to include BSFI's owned assets and equipment owned by other parties but located within the environment. To the extent possible, hardware items should be marked with a unique identifier, such as a bar code, tamper-proof tag, or other label.
- b. **Software** - There are at least three major categories of software the BSFI should include in the software inventory: operating systems, application software, and back-office and environmental applications.

¹IT operating platform includes the underlying computer system on which application programs run. A platform consists of an operating system, the computer system's coordinating program, which in turn is built on the instruction set for a processor or microprocessor, and the hardware that performs logic operations and manages data movement in the computer.

- c. **Network Components and Topology**¹- Network management should develop and maintain high-level topologies that depict local area networks (LANs²), metropolitan area networks (MANs³) and wide area networks (WANs⁴). The topologies should have sufficient detail to facilitate network maintenance and troubleshooting, facilitate recovery in the event of a disruption and plan for expansion, reconfiguration, or addition of new technology.
 - d. **Data Flow Diagram** - Management should also develop data flow diagrams to supplement its understanding of information flow within and between network segments as well as across the BSFI's perimeter to external parties. Data flow diagrams are also useful for identifying the volume and type of data stored on various media. In addition, the diagrams should identify and differentiate between data in electronic format, and in other media, such as hard copy or optical images.
 - e. **Media** - Descriptive information should identify the type, capacity, and location of the media. It should also identify the location, type, and classification (public, private, confidential, or other) of data stored on the media. Additionally, management should document source systems, data ownership, back up frequency and methodology (tape, remote disk, compact disc (CD), or other), and the location of back-up media if other than at the primary off-site storage facility.
- 3.2. **Risk Assessment.** Once inventory is complete, management should employ a variety of risk assessment techniques to identify threats and vulnerabilities to its IT operations, covering among others, the following:
- a. Internal and external risks;
 - b. Risks associated with individual platforms, systems, or processes as well as those of a systemic nature; and
 - c. The quality and quantity of controls. The risk assessment process should be appropriate to the BSFI's IT risk profile. To the extent possible, the assessment process should quantify the probability of a threat or vulnerability and the financial consequences of such an event.

After the BSFI identifies and analyzes the universe of risks, management should prioritize risk mitigation actions based on the probability of occurrence and the financial, reputational or legal impact to the institution. Management should prioritize the risk assessment results based on the business importance of the associated systems. The probability of occurrence and magnitude of impact provide the foundation for establishing or expanding controls for safe, sound, and efficient operations appropriate to the risk tolerance of the BSFI.

3.3. Risk Mitigation & Control Implementation

3.3.1. **Policies, Standards and Procedures.** Board and management should enact policies, standards and procedures sufficient to address and mitigate the risk exposure of the BSFI. The BSFI should adopt minimum IT standards to establish measurable controls and requirements to achieve policy objectives. Procedures describe the processes used to meet the requirements of the BSFI's IT policies and standards. Management should develop written procedures for critical operations, which procedures should be updated and reviewed regularly. The scope of required procedures depends on the size, complexity and the variety of functions performed by the BSFI's IT operations.

3.3.2. Controls Implementation

3.3.2.1. **Environmental Controls.** IT equipment should have a continuous uninterruptible power supply (UPS⁵). Management should configure the UPS to provide sufficient electricity within milliseconds to power equipment until there is an orderly shutdown or transition to the back-up generator. The back-up generator should generate sufficient power to meet the requirements of mission critical IT and environmental support systems. Similarly, IT operations centers should have independent telecommunication feeds from different vendors. Wiring configurations should support rapid switching from one provider to another without burdensome rerouting or rewiring.

¹ A *network* is a group of two or more computers that are linked together. For example, networks allow users at different branches or different workstations to access the Internet, send and receive email, and share printers, applications, and data. A *network topology* pictorially describes the arrangement or architecture of a network, including its workstations and connecting communication lines.

² A *LAN* is a network that connects workstations in a relatively small geographic area, such as a building. Computers connected in a LAN are usually connected by cables, but they can also be connected wirelessly.

³ A *MAN* is a network that usually spans a city or a large campus. A MAN usually interconnects a number of LANs using a high-capacity backbone technology, such as fiber-optical links, and provides up-link services to WAN and the internet.

⁴ A *WAN* is a network that connects other networks together. WANs are typically complicated networks covering broad areas (i.e., any network that links across metropolitan, regional, or national boundaries) and allowing many computers and other devices to communicate and share data.

⁵ *UPS* is a device that allows computer to keep running for at least a short time when the primary power source is lost. A UPS may also provide protection from power surges. A UPS contains a battery that "kicks in" when the device senses a loss of power from the primary source allowing the user time to save any data they are working on and to exit before the secondary power source (the battery) runs out. When power surges occur, a UPS intercepts the surge so that it doesn't damage the computer.

Even small IT operations centers with modest IT equipment can contain a significant amount of computer cabling. Management should physically secure these cables to avoid accidental or malicious disconnection or severing. In addition, management should document wiring strategies and organize cables with labels or color codes to facilitate easy troubleshooting, repair, and upgrade.

Every operations center should have adequate heating, ventilation, and air conditioning (HVAC) systems in order for personnel and equipment to function properly. Organizations should plan their HVAC systems with the requirements of their IT systems in mind. Also, operations personnel should be familiar with written emergency procedures in the event of HVAC system disruption.

Water leaks can cause serious damage to computer equipment and cabling under raised floors. For this reason, operations centers should be equipped with water detectors under raised flooring to alert management of leaks that may not be readily visible. Management should also consider installing floor drains to prevent water from collecting beneath raised floors or under valuable computer equipment.

A variety of strategies are available for fire suppression. Ideally, the fire suppression system should allow operators time to shut down computer equipment and cover it with waterproof covers before releasing the suppressant.

Lastly, Management should consider using video surveillance and recording equipment in all or parts of the facility to monitor activity and deter theft. Management should also use inventory labels, bar codes, and logging procedures to control the inventory of critical and valuable equipment.

- 3.3.2.2. **Preventive Maintenance.** All maintenance activities should follow a predetermined schedule. A record of all maintenance activities should be maintained to aid management in reviewing and monitoring employee and vendor performance. Management should schedule time and resources for preventive maintenance and coordinate such schedule with production. During scheduled maintenance, the computer operators should dismount all program and data files and work packs, leaving only the minimum software required for the specific maintenance task on the system. If this is impractical, management should review system activity logs to monitor access to programs or data during maintenance. Also, at least one computer operator should be present at all times when the service representative is in the computer room.

In case a vendor performs computer maintenance online, operators should be aware of the online maintenance schedule so that it does not interfere with normal operations and processing. Operators and information security personnel should adhere to established security procedures to ensure they grant remote access only to authorized maintenance personnel at predetermined times to perform specific tasks.

Operators should maintain a written log of all hardware problems and downtime encountered between maintenance sessions. A periodic report on the nature and frequency of those problems is a necessary management tool, and can be valuable for vendor selection, equipment benchmarking, replacement decisions, or planning increased equipment capacity.

- 3.3.2.3. **Change Management¹ & Control.** Complex BSFIs should have a change management policy that defines what constitutes a “change” and establishes minimum standards governing the change process. Simple BSFIs may successfully operate with less formality, but should still have written change management policies and procedures.

All changes should flow through the oversight function, which may include appropriate representation from business lines, support areas, IT management, information security, and internal audit. In establishing a framework for managing change, a policy should be present describing minimum standards and including such factors as notification, oversight, and control. Control standards should address risk, testing, authorization and approval, timing of implementation, post installation validation, and back-out or recovery.

¹ *Change management* refers to the broad processes for managing organizational change. Change management encompasses planning, oversight or governance, project management, testing and implementation.

3.3.2.4. **Patch Management¹**

Management should establish procedures to stay abreast of patches, to test them in a segregated environment, and to install them when appropriate. Change management procedures should require documentation of any patch installations. Management should develop a process for managing version control of operating and application software to ensure implementation of the latest releases. Management should also maintain a record of the versions in place and should regularly monitor the Internet and other resources for bulletins about product enhancements, security issues, patches or upgrades, or other problems with the current versions of the software.

- 3.3.2.5. **Conversions.** Conversions involve major changes to existing systems or applications, or the introduction of systems or data sets which may span multiple platforms. Consequently, they have a higher level of risk requiring additional, specialized controls. Conversions, if improperly handled, may result to corrupt data; hence, strong conversion policies, procedures, and controls are critical. Likewise, since the ramifications of conversion span IT operations, it is important for management to periodically re-evaluate all operations processes and consider the appropriateness of process re-engineering.

- 3.3.2.6. **Network Management Controls.** Network standards, design, diagrams and operating procedures should be formally documented, kept updated, communicated to all relevant network staff and reviewed periodically. Communications facilities that are critical to continuity of network services should be identified. Single points of failure should be minimized by automatic re-routing of communications through alternate routes should critical nodes or links fail.

The network should be monitored on a continuous basis to reduce the likelihood of network traffic overload and detect network intrusions. Powerful network analysis and monitoring tools, such as protocol analyzers, network scanning and sniffer tools, are normally used for monitoring network performance and detecting potential or actual intrusions. These powerful network tools should be protected from unauthorized usage (e.g., viewing of unencrypted sensitive information). The use of network tools should also be tightly restricted to authorized staff only and be subject to stringent approval and review procedures.

- 3.3.2.7. **Disposal of Media.** Management should have procedures for the destruction and disposal of media containing sensitive information. These procedures should be risk-based relative to the sensitivity of the information and the type of media used to store the information. Furthermore, disposal procedures should recognize that records stored on electronic media, including tapes, and disk drives present unique disposal problems in that residual data can remain on the media after erasure. Since data can be recovered, additional disposal techniques should be applied to remove sensitive information.

- 3.3.2.8. **Imaging.** Management should ensure there are adequate controls to protect imaging processes, as many of the traditional audit and controls for paper-based systems may be reduced. Management should also consider issues such as converting existing paper storage files, integration of the imaging system into the organization workflow, and business continuity planning needs to achieve and maintain business objectives.

- 3.3.2.9. **Event/Problem Management.** Management should ensure appropriate controls are in place to identify, log, track, analyze, and resolve problems that occur during day-to-day IT operations. The event/ problem management process should be communicated and readily available to all IT operations personnel. Management should ensure it trains all operations personnel to act appropriately during significant events. Employees should also receive training to understand event response escalation procedures.

Operations personnel should be properly trained to recognize events that could trigger implementation of the business continuity plan. Although an event may not initially invoke the plan, it may become necessary as conditions and circumstances change. Management should train and test BSFI personnel to implement and perform appropriate

¹ A *patch* is a piece of software designed to fix problems with, or update a computer program or its supporting data. This includes fixing security vulnerabilities and other bugs, and improving the usability or performance. Though meant to fix problems, poorly designed patches can sometimes introduce new problems. In some special cases, updates may knowingly break the functionality, for instance, by removing components for that the update provider is no longer licensed. *Patch Management* is the process of using a strategy and plan of what patches should be applied to which systems at a specified time.

business continuity procedures within the timeframes of the BCP. Operations personnel should properly log and record any events that trigger BCP response and document their ultimate resolutions.

- 3.3.2.10. **User Support/Help Desk.** User support processes and activities should ensure end users continuously have the resources and services needed to perform their job functions in an efficient and effective manner. In complex BSFIs, the help desk function provides user support, which typically consists of dedicated staff trained in problem resolution, equipped with issue tracking software, and supported with knowledge-based systems that serve as a reference resource to common problems. In simple BSFIs, user support may consist of a single person, a very small group, or a contract with a support vendor.

The help desk should record and track incoming problem reports, whether handled by live operators or automated systems.

Documentation in the tracking system should include such data as user, problem description, affected system (platform, application, or other), prioritization code, current status toward resolution, party responsible for resolution, root cause (when identified), target resolution time, and a comment field for recording user contacts and other pertinent information. The help desk should evaluate and prioritize issues to ensure the most critical problems receive prompt attention.

Help desk functions may also be supported by knowledge based-systems that provide support staff with action responses to common problems. Strong support functions continually update the knowledge based-systems with information obtained from vendors and from the experiences of help desk staff. Because attrition rates in the help desk function can be high, a knowledge based-system can ensure the BSFI retains knowledge and facilitates the training and development of new employees.

Proper authentication of users is critical to risk management within the user support function. If the help desk uses a single authentication standard for all requests, it should be sufficiently rigorous to cover the highest risk scenarios. However, the BSFI may choose to use different levels of authentication depending upon the problem reported, the type of action requested, or the platform, system, or data involved. If the help desk function is outsourced, management should determine the service provider's information access level, assign the functions it will perform, and ensure that security and confidentiality remain in place.

- 3.3.2.11. **Scheduling.** The BSFI should implement policies and procedures for creating and changing job schedules and should supplement them with automated tools when cost effective. Sound scheduling practices and controls prevent degraded processing performance that can affect response time, cause delays in completing tasks, and skew capacity planning. Automated scheduling tools are necessary for large, complex systems to support effective job processing. Smaller and less complex IT systems generally have a standard job stream with little need for change.

- 3.3.2.12. **Systems and Data Back-up.** The BSFI should ensure that sufficient number of backup copies of essential business information, software and related hardcopy documentations are available for restoration or critical operations. A copy of these information, documentation and software should also be stored in an off-site premise or backup site and any changes should be done periodically and reflected in all copies.

The BSFI should back-up and store its data and program files in a secure off-site location to allow restoration of systems, applications, and associated data in the event normal processing is disrupted by a disaster or other significant event. A full system backup should be periodically conducted and should at least consist of the updated version of the operating software, production programs, system utilities and all master and transaction files. The frequency of backup should depend on its criticality, but should be performed after critical modification or updates. Management should implement a storage solution that is manageable from an administrative perspective and usable and accessible from the customer and end-user perspectives to enable them to receive current, complete and accurate data. Storage solutions should be appropriately scalable to allow for future growth.

Written standards should document back-up methodologies, delineate responsibilities of appropriate personnel, and ensure uniform performance throughout the institution. Management should maintain inventories of back-up media stored off-site and periodically perform physical inventories to ensure all required back-up materials are available. Procedures should include verifying adherence to the back-up schedule and reviewing actual back-up copies for readability. Similarly, management should periodically test back-up copies by actually using them to restore programs and data.

All backup media should be properly labeled using standard naming conventions. Management should develop a rotation scheme that addresses varying storage durations as well as transportation and storage of multiple formats of media at the off-site storage location. Transportation to the backup site should be done in controlled and secured manner with proper authorization and record. Procedures for disposal of backup media should also be in place.

3.3.2.13. Systems Reliability, Availability and Recoverability.

- a. **System Availability.** BSFIs should achieve high systems availability (or near zero system downtime) for critical systems which is associated with maintaining adequate capacity, reliable performance, fast response time, scalability and swift recovery capability. Built-in redundancies for single points of failure should be developed and contingency plans should be tested so that business and operating disruptions can be minimized.
- b. **Technology Recovery Plan.** Business resumption very often relies on the recovery of IT resources that include applications, hardware equipment and network infrastructure as well as electronic records. The technology requirements that are needed during recovery for individual business and support functions should be specified when the recovery strategies for the functions are determined.

Appropriate personnel should be assigned with the responsibility for technology recovery. Alternate personnel needs to be identified for key technology recovery personnel in case of their unavailability to perform the recovery process.

As unavailability of systems may result to disruptive impact on its operations, the BSFI should develop an IT disaster recovery plan to ensure that critical application systems and technology services can be resumed in accordance with the business recovery requirements. In formulating an effective recovery plan, scenario analysis should be included to identify and address various types of contingency scenarios. Scenarios such as major system outages which may be caused by system faults, hardware malfunction, operating errors or security incidents as well as a total inaccessibility of the primary data centre should be considered. To strengthen recovery measures relating to large scale disruptions and to achieve risk diversification, rapid operational and backup capabilities at the individual system or application cluster level should be implemented. Recovery and business resumption priorities must be defined accordingly. Specific recovery objectives including recovery time objective¹ (RTO) and recovery point objective² (RPO) should be established for systems and applications.

- c. **Alternate sites for technology recovery.** The BSFI should make arrangements for alternate and recovery sites³ for their business functions and technology in the event the business premises, key infrastructure and systems supporting critical business functions become unavailable. A recovery site geographically separate from the primary site must be established to enable the restoration of critical systems and resumption of business operations should a disruption occur at the primary site. The required speed of recovery will depend on the criticality of resuming business operations, the type of services and whether there are alternative ways and processing means to maintain adequate continuing service levels to satisfy customers. Recovery strategies and technologies such as on-site redundancy and real-time data replication could be explored to enhance the BSFI's recovery capability.

¹ RTO refers to the required time taken to recover an IT system from the point of disruption.

² RPO refers to the acceptable amount of data loss for an IT system should a disaster occur.

³ Recovery site is an alternate location for processing information (and possibly conducting business) in an emergency.

The recovery site could either be an in-house backup premise that has a redundant hardware system located away from the computer center, or a third-party recovery facility provider that requires formal subscription to its service, or a combination of both solutions. The recovery facility should be at a distance that would protect it from damage from any incident occurring at the primary site. Ideally, it should be on different electrical power and telecommunication switches, and free from the same disaster. The BSFI should ensure that the IT systems at the recovery sites are:

- a. Compatible with the BSFI's primary systems (in terms of capacity and capability) to adequately support the critical business functions; and
- b. Continuously updated with current version of systems and application software to reflect any changes to the BSFI's system configurations (e.g. hardware or software upgrades or modifications).

In case where a third-party recovery facility is used, there should be a written contract agreement that is legally binding. The agreement should specifically identify the conditions under which the recovery facility may be used and specify how customers would be accommodated if simultaneous disaster conditions occur to several customers of the recovery facility provider. The recovery facility should allow the BSFI to use its services until it achieves a full recovery from the disaster and resumption of activity at the BSFI's own facility.

The BSFI which outsources critical systems to offshore service providers is heavily dependent on the stability and availability of cross-border network links. To minimize impact to business operations in the event of a disruption (e.g., due to earthquake), cross-border network redundancy with strategies such as engagement of different network service providers and alternate network paths may be instituted.

- d. **Disaster Recovery Testing.** The BSFI should always adopt pre-determined recovery actions that have been tested and endorsed by management. The effectiveness of recovery requirements and the ability of BSFI's personnel in executing or following the necessary emergency and recovery procedures should be tested and validated at least annually.

Various scenarios which include total shutdown or inaccessibility of the primary data center, as well as component failure at the individual system or application cluster level should be included in disaster recovery tests. Inter-dependencies between and among critical systems should be included in the tests. BSFIs whose networks and systems are linked to specific service providers and vendors, should consider conducting bilateral or multilateral recovery testing.

Business users should be involved in the design and execution of comprehensive test cases so as to obtain assurance that recovered systems function accordingly. The BSFI should also participate in disaster recovery tests of systems hosted overseas. Periodic testing and validation of the recovery capability of backup media should be carried out and assessed for adequacy and effectiveness. Backup tapes and disks containing sensitive data should be encrypted before they are transported offsite for storage.

3.4. Risk Monitoring

- 3.4.1. **Service Level Agreement (SLA).** BSFI Management of IT functions should formulate an SLA with business units which will measure the effectiveness and efficiency of delivering IT services. Measurable performance factors include system availability and performance requirements, capacity for growth, and the level of support provided to users, resource usage, operations problems, capacity, response time, personnel activity, as well as business unit and external customer satisfaction. Adequate procedures should be in place to manage and monitor delivery of committed services.

- 3.4.2. **Control Self-Assessments¹ (CSAs).** The BSFI may consider the conduct of periodic CSAs to validate the adequacy and effectiveness of the IT control environment. They also facilitate early identification to allow management to gauge performance, as well as the criticality of systems and emerging risks.

¹ CSA is a technique used to assess risk and control strength and weaknesses against a control framework.

Depending on the complexity of the BSFI's IT risk profile, the content and format of the CSAs may be standardized and comprehensive or highly customized, focusing on a specific process, system, or functional area. IT operations management may collaborate with the internal audit function in creating the templates used. Typically, the CSA form combines narrative responses with a checklist. The self-assessment form should identify the system, process, or functional area reviewed, and the person(s) completing and reviewing the form. CSA's however, are not a substitute for a sound internal audit program. Management should base the frequency of CSA the risk assessment process and coordinate the same with the internal audit plan.

- 3.4.3. **Performance Monitoring.** The BSFI should implement a process to ensure that the performance of IT systems is continuously monitored and exceptions are reported in a timely and comprehensive manner. The performance monitoring process should include forecasting capability to enable problems to be identified and corrected before they affect system performance. Monitoring and reporting also support proactive systems management that can help the BSFI position itself to meet its current needs and plan for periods of growth, mergers, or expansion of products and services.

BSFI Management should also conduct performance monitoring for outsourced IT solutions as part of a comprehensive vendor management program. Reports from service providers should include performance metrics, and identify the root causes of problems. Where service providers are subject to SLAs, management should ensure the provider complies with identified action plans, remuneration, or performance penalties.

- 3.4.4. **Capacity Planning.** Management should monitor IT resources for capacity planning including platform processing speed, core storage for each platform's central processing unit, data storage, and voice and data communication bandwidth¹. Capacity planning should be closely integrated with the budgeting and strategic planning processes. It also should address personnel issues including staff size, appropriate training, and staff succession plans. This process should help the preparation of workload forecasts to identify trends and to provide information needed for the capacity plan, taking into account planned business initiatives. Capacity planning should be extended to cover back- up systems and related facilities in addition to the production environment.

4. ROLE OF IT AUDIT

- 4.1. The BSFI's IT audit function should regularly assess the effectiveness of established controls within the IT operations environment through audits or other independent verification. Audits provide independent assessments rendered by qualified individuals regarding the effective functioning of operational controls.

(Circular No. 958 dated 25 April 2017)

¹ *Bandwidth* is a terminology used to indicate the transmission or processing capacity of a system or of a specific location in a system (usually a network system) for information (text, images, video, sound). It is usually defined in bits per second (bps)

IT RISK MANAGEMENT STANDARDS AND GUIDELINES
Area: IT Outsourcing/Vendor Management
(Appendix to Section 148 on Purpose and Scope, and on IT Risk Management Systems)

1. INTRODUCTION

- 1.1. With globalization and advancement in IT, BSFIs increasingly rely on services provided by other entities to support an array of IT-related functions. The ability to outsource IT systems and process enables a BSFI to manage costs, obtain necessary expertise, expand customer product offerings, and improve services. While outsourcing offers a cost-effective alternative to in-house capabilities, it does not reduce the fundamental risks associated with IT or the business lines that use it. Risks such as loss of funds, loss of competitive advantage, damaged reputation, improper disclosure of information and regulatory action remain. Because the functions are performed by an organization outside the BSFI, the risks may be realized in a different manner than if the functions were inside resulting in the need for well-structured process to properly manage risks and ensure that the interest of customers will not be compromised.

2. ROLES AND RESPONSIBILITIES

- 2.1. **Board of Directors (Board) and Senior Management.** The responsibility for the oversight and management of outsourcing activities and accountability for all outsourcing decisions continue to rest with the BSFI's Board and senior management. They should establish and approve enterprise-wide policies, appropriate to the IT risk profile of the institution. This framework should govern the end-to-end perspective of outsourcing process and shall provide the basis for management to identify, measure, monitor, and control the risks associated with IT-related outsourcing arrangements.

3. IT OUTSOURCING / VENDOR RISK MANAGEMENT PROGRAM

- 3.1 **Risk Assessment.** Prior to entering into an outsourcing plan, the BSFI should clearly define the business requirements for the functions or activities to be outsourced, assess the risk of outsourcing those functions or activities and establish appropriate measures to manage and control the identified risks. Risk assessment should take into consideration the criticality of the services to be outsourced, the capability of the technology service provider (TSP)¹ and the technology it will use in delivering the outsourced service. Such assessment should be made periodically on existing arrangements as part of the outsourcing program and review process of the BSFI.
- 3.2 **Service Provider Selection.** Before selecting a service provider, the BSFI should perform appropriate due diligence of the provider's financial soundness, reputation, managerial skills, technical capabilities, operational capability and capacity in relation to the services to be outsourced. The depth and formality of the due diligence performed may vary depending on the nature of the outsourcing arrangement and the BSFI's familiarity with the prospective service providers. Contract negotiation should be initiated with the service provider determined to best meet the business requirements of the BSFI.

Due diligence undertaken during the selection process should be documented and reviewed periodically, using the most recent information, as part of the monitoring and control processes of outsourcing.

- 3.3 **Outsourcing Contracts.** The contract is the legally binding document that defines all aspects of the servicing relationship and one of the most important controls in outsourcing process. It should be clearly written and sufficiently detailed to provide assurances for performance, reliability, security, confidentiality and reporting. Before signing a contract, management should:
- a. Ensure the contract clearly defines the rights and responsibilities of both parties and contains or supported by adequate and measurable service level agreements;
 - b. Ensure contracts with related entities clearly reflect an arms-length relationship and costs and services are on terms that are substantially the same, or at least as favorable to the BSFI, as those prevailing at the time for comparable transactions with non- related third parties;
 - c. Choose the most appropriate pricing method for the BSFI's needs;
 - d. Ensure service provider's physical and data security standards meet or exceed the BSFI's standards. Any breach in security should be reported by the service provider to the BSFI;

¹ TSPs include a wide range of entities including but not limited to affiliated entities, non-affiliated entities, and alliances of companies providing technology products and services. These services may include but not limited to the following: a) information and transaction processing and settlement activities that support banking functions; b) electronic banking-related services; c) Internet-related services; d) security monitoring; e) systems development and maintenance; f) aggregation services; and g) digital certification services. Other terms used to describe TSPs include vendors and external/outsourced service providers.

- e. Engage legal counsel to review the contract; and
- f. Ensure the contract contains the minimum provisions required under existing Bangko Sentral rules and regulations, like access by Bangko Sentral to systems and databases outsourced, and the same does not include any provisions or inducements that may adversely affect the BSFI (i.e. extended terms, significant increases after the first few years, substantial cancellation penalties).

Each agreement should allow for renegotiation and renewal to enable the BSFI to retain an appropriate level of control over the outsourcing and the right to intervene with appropriate measures to meet its legal and regulatory obligations. The agreement should also acknowledge Bangko Sentral's supervisory authority over the BSFI and the right of access to information on the BSFI and the service provider.

Some service providers may contract with third-parties in providing IT services to the BSFI. The extent to which subcontractors perform additional services should be limited to peripheral or support functions while the core services should rest with the main service provider. The BSFI should retain the ability to maintain similar control over its outsourcing risks when a service provider uses subcontractors in the course of rendering the IT-related services. Agreements should have clauses setting out the rules and limitations on subcontracting. To provide accountability, it may be beneficial for the BSFI to include a provision specifying that the contracting service provider shall remain fully responsible with respect to parts of the services which were further outsourced to subcontractors. It should also consider including notification and approval requirements regarding changes to the service provider's significant subcontractors.

An annual review of the outsourcing agreements should be performed to assess whether the agreements should be renegotiated and renewed to bring them in line with current market standards and to cope with changes in their business strategies. When renegotiating contracts, the BSFI should ensure that the provider delivers a level of service that meets the needs of the institution over the life of the contract.

- 3.4 **Service Level Agreement (SLA).** SLAs formalize the performance standards against which the quantity and quality of service should be measured. Management should include SLAs in its outsourcing contracts to specify and clarify performance expectations, as well as establish accountability for the outsourced activity. The BSFI should link SLA to the provisions in the contract regarding incentives, penalties and contract cancellation in order to protect themselves in the event the service provider failed to meet the required level of performance.

Management should closely monitor the service provider's compliance with key SLA provision on the following aspects, among others:

- a. Availability and timeliness of services;
- b. Confidentiality and integrity of data;
- c. Change control;
- d. Security standards compliance, including vulnerability and penetration management;
- e. Business continuity compliance; and
- f. Help desk support.

SLAs addressing business continuity should measure the service provider's contractual responsibility for backup, record retention, data protection, and maintenance and testing of disaster recovery and contingency plans. Neither contracts nor SLAs should contain any extraordinary provisions that would exempt the service provider from implementing its contingency plans (outsourcing contracts should include clauses that discuss unforeseen events for which the BSFI would not be able to adequately prepare).

3.5 Ongoing Monitoring

- 3.5.1. **Monitoring Program.** As outsourcing relationships and interdependencies increase in materiality and complexity, the BSFI needs to be more proactive in managing its outsourcing relationships. It should establish a monitoring program to ensure service providers deliver the quantity and quality of services required by the contract. The resources to support this program will vary depending on the criticality and complexity of the system, process, or service being outsourced.

The program should employ effective mechanisms to monitor key aspects of the outsourcing relationship and the risk associated with the outsourced activity, particularly the following:

- a. contract/SLA performance;
- b. material problems encountered by the service provider which may impact the BSFI;
- c. financial condition and risk profile; and
- d. business continuity plan, the results of testing thereof and the scope for improving it.

To increase the effectiveness of monitoring mechanisms, management should periodically classify service provider relationships to determine which service providers require closer monitoring. Relationships with higher risk classification should receive more frequent and stringent monitoring for due diligence, performance (financial and/or operational), and independent control validation reviews.

Personnel responsible for monitoring activities should have the necessary expertise to assess the risks and should maintain adequate documentation of the process and results thereof. Management should use such documentation when renegotiating contracts as well as developing business continuity planning requirements.

Reports on the monitoring and control activities of the BSFI should be prepared or reviewed by its senior management and provided to its Board. The BSFI should also ensure that any adverse development arising from any outsourced activity is brought to the attention of the senior management, or the Board, when warranted, on a timely basis. Actions should be taken to review the outsourcing relationship for modification or termination of the agreement.

- 3.5.2. **Financial Condition of Service Providers.** The BSFI should have an on-going monitoring of the financial condition of its service providers as financial problems may jeopardize the quality of its service and possibly the integrity of the data in its possession. In the event management recognizes that the financial condition of the provider is declining or unstable, more frequent financial reviews of said provider are warranted.
- 3.5.3. **General Control Environment of the Service Provider.** The BSFI should also implement adequate measures to ensure service providers are only given access to the information and systems that they need in order to perform their function. Management should restrict their access to BSFI's systems, and appropriate access controls and monitoring should be in place between the service provider's systems and the BSFI.
- 3.6. **Business Continuity Planning Consideration.** The BSFI should integrate the provider's BCP into its own plan, communicate functions to the appropriate personnel, and maintain and periodically review the combined plan. It should ensure that service provider tests its plan annually and notify the institution of any resulting modifications.
- 3.7. **Compliance with Bangko Sentral Regulations.** The BSFI should ensure that appropriate up-to-date records relevant to its outsourcing arrangements are maintained in its premises and kept available for inspection by the Bangko Sentral Examiners. The outsourcing agreement should explicitly provide a clause allowing Bangko Sentral and BSFIs' internal and external auditors to review the operations and controls of the service provider as they relate to the outsourced activity.

In addition to the general guidelines on outsourcing contracts stated in Item No. "3.3" of this Appendix, the BSFIs intending to outsource must comply with existing Bangko Sentral rules and regulations on outsourcing.

4. EMERGING OUTSOURCING MODELS

- 4.1. With continued and fast growth of technology, outsourcing of IT-related systems and processes has been a constant theme among BSFIs. While outsourcing strategy allows BSFIs to achieve growth targets, operational efficiency and cost savings, this also exposes them to various levels and kinds of risks. Potential risk exposures and other significant supervisory concerns are further heightened by the emergence of flexible and innovative outsourcing models (i.e. shared-services, offshoring and cloud computing).
- 4.2. Due mainly to the perceived implications for greater flexibility and availability at lower cost, cloud computing is a subject that has been receiving a good deal of attention. Currently, the most widely accepted definition of cloud computing is as follows –

*A model for enabling ubiquitous, convenient, on-demand network access to a shared pool of configurable computing resources that can be rapidly provisioned and released with minimal management effort or service provider interaction.*¹

¹ National Institute of Standards Technology, *The NIST Definition of Cloud Computing: Special Publication 800-145, 2011*, www.nist.gov/it/cloud/

- 4.3. In general, cloud computing is a migration from owned resources to shared resources in which client users receive IT services, on demand, from third-party service providers a.k.a. Cloud Service Providers (CSP) via the Internet “cloud.” This emerging model allows BSFIs the option to move from a capital-intensive approach to a more flexible business model that lowers operational costs. Cloud computing technologies can be implemented in a wide variety of architectures, under different service and deployment models, and can coexist with other technologies and software design approaches. The four (4) cloud deployment models include the following:
- a. Private Cloud – A private cloud is operated solely for an institution and is closely related to the existing IT outsourcing models in the marketplace, but can be an institution’s internal delivery model as well.
 - b. Public Cloud – A public cloud is owned and operated by a CSP that delivers services to the general public or a large industry group via the internet or other computer network using a multi-tenant platform.
 - c. Community Cloud – It is a private- public cloud with users having a common connection or affiliation, such as a trade association, the same industry or a common locality. It allows a CSP to provide cloud tools and applications specific to the needs of the community.
 - d. Hybrid Cloud – This model composes two or more clouds (private, community or public). A hybrid cloud leverages on the advantage of the other cloud models, thus, providing a more optimal user experience.
- 4.4. Cloud computing is perceived to play an increasingly important role in a wide range of development initiatives, including among others, offering small to medium- sized BSFIs critical access to infrastructure and computational resources that would otherwise be out of their financial reach or are too complex to manage. While the advantages of adopting an outsourced cloud-based component are undeniable, the fact remains that cloud computing also creates disruptive possibilities and potential risks. Many of the threats identified are not necessarily unique to the cloud environment. In fact, risks such as potential data loss, poor management by a service provider, service interruption and unauthorized access to sensitive data are also applicable to traditional forms of outsourcing. Cloud computing, however, adds new dimensions to the traditional outsourcing risks, thus, the vulnerabilities and the probability of the risk event occurring is amplified. BSFIs should be fully aware of the unique attributes and risks associated with cloud computing, particularly in the following areas: (Details are shown in the attached Annex “A”)
- o Legal and Regulatory Compliance;
 - o Governance and Risk Management;
 - o Due Diligence;
 - o Vendor Management/Performance and Conformance;
 - o Security and Privacy;
 - o Data Ownership and Data Location and Retrieval;
 - o Business Continuity Planning.
- 4.5. Among the four (4) cloud models, the private cloud deployment is most similar to traditional outsourcing model, thus, offers the least amount of new risks and security challenges. Implementation of this model is allowed subject to compliance with existing Bangko Sentral rules and regulations on outsourcing. Adoption of community and hybrid cloud deployment models may also be allowed with prior Bangko Sentral approval, subject to the following:
- a. Compliance with existing Bangko Sentral rules and regulations on outsourcing;
 - b. Implementation of more robust risk management systems and controls required for these types of arrangements;
 - c. Issues set out in the attached Annex “A” are properly addressed prior to executing the plans; and
 - d. Bangko Sentral may be allowed to perform onsite validation prior to implementing the cloud computing arrangement/s.
- 4.6. However, given the increased probability of risk & exposure to potential issues related to business operations, confidentiality and compliance which are critical in the financial service industry, the Bangko Sentral, at present, would only allow the use of public cloud computing model for non-core operations and business processes (e.g., email, office productivity, collaboration tools, claims and legal management, etc.) which do not directly involve sensitive BSFI and customer data. Bangko Sentral approval of public cloud deployment model for non-core operations shall be subject to the same conditions in Item 4.5 above. Core operations and business processes whose importance is fundamental in ensuring continuous and undisturbed operation of IT systems used to directly perform banking and financial services (e.g., CA/SA, Loans, Trust and Treasury

systems, ATM switch operations, electronic delivery systems and systems used to record banking operations) are not allowed to use public cloud computing service. Distinguishing whether a particular actual operation or business is “core” or “non-core” and classifying the data (e.g. confidential, critical, sensitive, public) associated with the system or application are, therefore, significant considerations in determining permissibility of public cloud model for this type of operation or process.

- 4.7. BSFIs should consult Bangko Sentral before making any significant commitment on cloud computing.

5. ROLE OF IT AUDIT

- 5.1. The BSFI should conduct a regular, comprehensive audit of its service provider relationships. The audit scope should include a review of controls and operating procedures that help protect the BSFI from losses due to irregularities and willful manipulations. Such responsibility can be assigned to the BSFI’s IT audit function. In case the BSFI has no technical audit expertise, the non-technical audit methods can provide minimum coverage and should be supplemented with comprehensive external IT audits.

(Circular No. 958 dated 25 April 2017)

ANNEX A

Despite its many potential benefits, cloud computing also brings with it potential areas of concern, when compared with computing environments found in traditional data centers. Some of the more fundamental concerns include the following:

1. Legal and Regulatory Compliance

Important considerations for any BSFI before deploying a cloud computing model include clearly understanding the various types of laws and regulations that potentially impact cloud computing initiatives, particularly those involving confidentiality, visibility, data location, privacy and security controls and records management. The nature of cloud computing may increase the complexity of compliance with applicable laws and regulations because customer data may be stored or processed offshore. The BSFI’s ability to assess compliance may be more complex and difficult in an environment where the Cloud Service Provider (CSP) processes and stores data overseas or comingles the BSFI’s data with data from other customers that operate under diverse legal and regulatory jurisdictions. The BSFI should understand the applicability of local laws and regulations and ensure its contract with a CSP specify its obligations with respect to the BSFI’s responsibilities for compliance with relevant laws and regulations. CSP’s processes should not compromise compliance with the following, among others:

- a. Law on Secrecy of Deposits (R.A. No. 1405);
- b. Foreign Currency Deposit System (R.A. No. 6426)
- c. Anti-Money Laundering Act, particularly on data/file retention;
- d. Electronic Commerce Act (R.A. No. 8792);
- e. Data Privacy Law;
- f. Cybercrime Prevention Act;
- g. General Banking Law (R.A. No. 8791); and
- h. Regulations concerning IT risk management, electronic banking, consumer protection, reporting of security incidents and other applicable Bangko Sentral issuances, rules and regulations.

Lastly, the CSP should grant Bangko Sentral access to its cloud infrastructure to determine compliance with applicable laws and regulations and assess soundness of risk management processes and controls in place.

2. Governance and Risk Management

The use of outsourced cloud services to achieve the BSFI’s strategic plan does not diminish the responsibility of the Board of Directors and management to ensure that the outsourced activity is conducted in a safe and sound manner and in compliance with applicable laws and regulations. The BSFI Management should consider overall business and strategic objectives prior to outsourcing the specific IT operations to the cloud computing platform. A Board-approved outsourcing policy and rationale for outsourcing to the cloud environment should be in place to ensure that the Board is fully apprised of all the risks identified.

Outsourcing to a CSP can be advantageous to a BSFI because of potential benefits such as cost reduction, flexibility, scalability, improved load balancing, and speed. However, assessing and managing risk in systems that

use cloud services can be a formidable challenge due mainly to the unique attributes and risks associated with a cloud environment especially in areas of data integrity, sovereignty, commingling, platform multi-tenancy, recoverability and confidentiality as well as legal issues such as regulatory compliance, auditing and data offshoring. Cloud computing may require more robust controls due to the nature of the service. When evaluating the feasibility of outsourcing to a CSP, it is important to look beyond potential benefits and to perform a thorough due diligence and risk assessment of elements specific to the service. Vendor management, information security, audits, legal and regulatory compliance, and business continuity planning are key elements of sound risk management and risk mitigation controls for cloud computing. As with other service provider offerings, cloud computing may not be appropriate for all BSFIs.

3. Due Diligence

The due diligence in selecting a qualified CSP is of paramount importance to ensure that it is capable of meeting the BSFI's requirements in terms of cost, quality of service, compliance with regulatory requirements and risk management. Competence, infrastructure, experience, track record, financial strength should all be factors to consider. When contemplating transferring critical organizational data to the cloud computing platform, it is critical to understand who and where all of the companies and individuals that may touch the BSFI's data. This includes not only the CSP, but all vendors or partners that are in the critical path of the CSP. Background checks on these companies are important to ensure that data are not being hosted by an organization that does not uphold confidentiality of information or that is engaging in malicious or fraudulent activity. Business resiliency and capability to address the BSFI's requirements for security and internal controls, audit, reporting and monitoring should also be carefully considered.

4. Vendor Management/Performance and Conformance

It is always important to thoroughly review the potential CSP's contract terms, conditions and SLA. This is to ensure that the CSP can legally offer what it has verbally committed to and that the cloud risk from the CSP's service offerings is within the determined level of acceptable risk of the BSFI. The SLA should ensure adequate protection of information and have details on joint control frameworks. It should also define expectations regarding handling, usage, storage and availability of information, and specify each party's requirements for business continuity and disaster recovery. At a minimum, the SLA should cover the provisions required under existing rules and regulations on outsourcing.

A vendor management process should be in place that proactively monitors the performance of the CSP on an ongoing basis. This is also to guarantee availability and reliability of the services provided and ability to provide consistent quality of service to support normal and peak business requirements. If a BSFI is using its own data centre, it can mitigate and prepare for outages. However, if it is using a cloud computing service, it has to put all its trust in the cloud service provider delivering on its SLA. This requires that SLA has sufficient means to allow transparency into the way a CSP operates, including the provisioning of composite services which is a vital ingredient for effective oversight of system security and privacy by the BSFI.

Continuous monitoring of information security requires maintaining ongoing awareness of security controls, vulnerabilities, and threats to support risk management decisions. Collection and analysis of available data about the state of the system should be done regularly and as often as needed by the BSFI to manage security and privacy risks, as appropriate for each level of the organization involved in decision making. Transition to public cloud services entails a transfer of responsibility to the CSP for securing portions of the system on which the BSFI's data and applications operate. To fulfill the obligations of continuous monitoring, the organization is dependent on the CSP, whose cooperation is essential, since critical aspects of the computing environment are under its complete control.

Cloud services that allow CSP to further outsource or subcontract some of its services may also heighten concerns, including the scope of control over the subcontractor, the responsibilities involved (e.g., policy and licensing arrangements), and the remedies and recourse available should problems occur. A CSP that hosts applications or services of other parties may involve other domains of control, but through transparent authentication mechanisms, appear to the BSFI to be that of the CSP. Requiring advanced disclosure of subcontracting arrangements, and maintaining the terms of these arrangements throughout the agreement or until sufficient notification can be given of any anticipated changes, should be properly enforced.

Additionally, the complexity of a cloud service can obscure recognition and analysis of incidents. The CSP's role is vital in performing incident response activities, including incident verification, attack analysis, containment, data collection and preservation, problem remediation, and service restoration. Each layer in a cloud application stack, including the application, operating system, network, and database, generates event

logs, as do other cloud components, such as load balancers and intrusion detection systems; many such event sources and the means of accessing them are under the control of the cloud provider. It is important that the CSP has a transparent response process and mechanisms to share information with the BSFI during and after the incident. Understanding and negotiating the provisions and procedures for incident response should be done before entering into a service contract, rather than as an afterthought. The geographic location of data is a related issue that can impede an investigation, and is a relevant subject for contract discussions. Revising the BSFI's incident response plan to address differences between the organizational computing environment and the cloud computing environment is also a prerequisite to transitioning applications and data to the cloud.

Lastly, to effectively monitor services including risk and risk mitigation associated with the use of a CSP, the BSFI and the CSP should agree in advance that former shall have accessibility to the CSP to audit and verify the existence and effectiveness of internal and security controls specified in the SLA. The BSFI's audit policies and practices may require adjustments to provide acceptable IT audit coverage of outsourced cloud computing. It may also be necessary to augment the internal audit staff with additional training and personnel with sufficient expertise in evaluating shared environments and virtualized technologies. In addition, the parties may also agree on the right to audit clause via external party as a way to validate other control aspects that are not otherwise accessible or assessable by the BSFI's own audit staff. Ideally, the BSFI should have control over aspects of the means of visibility to accommodate its needs, such as the threshold for alerts and notifications, and the level of detail and schedule of reports.

5. Security and Privacy

Security and privacy concerns continue to be a major issue within a cloud computing model. Given the obvious sensitivity of data and the regulated environment within which they operate, BSFIs utilizing cloud systems, need to have an assurance that any data exposed on the cloud is well protected. They may need to revise their information security policies, standards, and practices to incorporate the activities related to a CSP. They should also have an understanding of and detailed contracts with SLAs that provide the desired level of security to ensure that the CSP is applying appropriate controls. In certain situations, continuous monitoring of security infrastructure may be necessary for BSFIs to have a sufficient level of assurance that the CSP is maintaining effective controls.

It is important that BSFIs maintain a comprehensive data inventory and a suitable data classification process, and that access to customer data is restricted appropriately through effective identity and access management. A multi-tenant cloud deployment, in which multiple clients share network resources, increases the need for data protection through encryption and additional controls such as virtualization mechanisms to address the risk of collating organizational data with that of other organizations and compromising confidential information through third-party access to sensitive information. Verifying the data handling procedures, adequacy and availability of backup data, and whether multiple service providers are sharing facilities are important considerations. If the BSFI is not sure that its data are satisfactorily protected and access to them is appropriately controlled, entering into a cloud service arrangement may not be suitable.

Storage of data in the cloud could increase the frequency and complexity of security incidents. Therefore, management processes of the BSFI should include appropriate notification procedures; effective monitoring of security-related threats, incidents and events on both BSFI's and CSP's networks; comprehensive incident response methodologies; and maintenance of appropriate forensic strategies for investigation and evidence collection.

6. Data Ownership and Data Location and Retrieval

The BSFI's ownership rights over the data must be firmly established in the contract to enable a basis for trust and privacy of data. Ideally, the contract should state clearly that the organization retains exclusive ownership over all its data; that the CSP acquires no rights or licenses through the agreement, to use the BSFI's data for its own purposes; and that the CSP does not acquire and may not claim any interest in the data due to security. For these provisions to work as intended, the terms of data ownership must not be subject to unilateral amendment by the CSP.

One of the most common challenges in a cloud computing environment is data location. Use of an in-house computing center allows the BSFI to structure its computing environment and to know in detail where data is stored and what safeguards are used to protect the data. In contrast, the dynamic nature of cloud computing may result in confusion as to where information actually resides (or is transitioning through) at a given point in time, since multiple physical locations may be involved in the process. This situation makes it difficult to ascertain whether sufficient safeguards are in place and whether legal and regulatory compliance requirements are being met. One of the main compliance concerns is the possible transborder flows of data which may impinge upon varying laws and regulations of different jurisdictions.

To address the above constraints, the BSFI should pay attention to the CSP's ability to isolate and clearly identify its customer data and other information system assets for protection. Technical, physical and administrative safeguards, such as access controls, often apply. Likewise, such concerns can be alleviated if the CSP has some reliable means to ensure that an organization's data is stored and processed only within specific jurisdictions. Lastly, external audits and security certificates can mitigate the issues to some extent.

7. Business Continuity Planning

The BCP in a BSFI involves the recovery, resumption, and maintenance of the critical business functions, including outsourced activities. Due to the dynamic nature of the cloud environment, information may not immediately be located in the event of a disaster. Hence, it is critical to ensure the viability of the CSP's business continuity and disaster recovery plans to address broad-based disruptions to its capabilities and infrastructure. The plans must be well documented and tested. Specific responsibilities and procedures for availability, data backup, incident response and recovery should be clearly understood and stipulated. Recovery Time Objectives should also be clearly stated in the contract. It is critical for the BSFI to understand the existence and comprehensiveness of the CSP's capabilities as well as its level of maturity to ensure that during an intermediate or prolonged disruption or a serious disaster, critical operations can be immediately resumed, and that all operations can be eventually reinstated in a timely and organized manner. Other BCP-related concerns which must be addressed by the BSFI and CSP include the following:

- a. Prioritization arrangements in case of multiple/simultaneous disasters;
- b. Retention of onsite and offsite back- up (Whether to maintain an up-to-date back- up copy of data at the BSFI's premises or stored with a second vendor that has no common points of failure with the CSP); and
- c. Ability to synchronize documents and process data while the client-BSFI is offline.

(Circular No. 958 dated 25 April 2017)

IT RISK MANAGEMENT STANDARDS AND GUIDELINES

Area: Electronic Banking, Electronic Payment, Electronic Money and Other Electronic Products and Services (Appendix to Section 148 on Purpose and Scope, and on IT Risk Management Systems)

1. INTRODUCTION

- 1.1. Continuing technological innovation and competition among existing FIs and new entrants have contributed to a wide array of electronic products and services (e-services) available to customers. These products and services have been widely adopted by BSFIs in recent years and are now a component of most institutions' business strategy. Electronic delivery of services can have many benefits for BSFIs and their customers and can also have implications on financial condition, risk profile, and operating performance. The emergence of e- services may contribute to improving the efficiency of the banking and payment system, reducing the cost of retail transactions nationally and internationally and expanding the target customers beyond those in traditional markets. Consequently, BSFIs are therefore becoming more aggressive in adopting electronic capabilities that include sophisticated marketing systems, remote-banking capabilities, and stored value programs.
- 1.2. Notwithstanding the significant benefits of technological innovation, the rapid development of electronic capabilities carries risks as well as benefits and it is important that these risks are recognized and managed by BSFIs in a prudent manner to promote safe and secure e-services and operations. The basic types of risks generated by e-services are not new, the specific ways in which some of the risks arise, as well as the magnitude of their impact may be new for BSFIs and supervisors. While existing risk management guidelines remain applicable to e-services, such guidelines must be tailored, adapted and, in some cases, expanded to address the specific risk management challenges created by the characteristics of such activities. As the industry continues to address technical issues associated with e-services, including security challenges, a variety of innovative and cost efficient risk management solutions are likely to emerge. These solutions are also likely to address issues related to the fact that BSFIs differ in size, complexity and risk management culture and that jurisdictions differ in their legal and regulatory frameworks.

2. ROLES AND RESPONSIBILITIES

- 2.1. **Board of Directors (Board) and Senior Management.** The Board is expected to take an explicit, informed and documented strategic decision as to whether and how the BSFI is to provide e-services to their customers. The Board and senior management should establish effective management oversight of the risks associated with these activities, including the establishment of specific accountability, policies and controls to manage these risks. Senior management oversight processes should operate on a dynamic basis in order to effectively intervene and correct any material systems problems or security breaches that may occur.

The Board should ensure that plans to offer e-services are consistent and clearly integrated within corporate strategic goals. The BSFI should also ensure that it does not offer new e-services or adopt new technologies unless it has the necessary expertise to provide competent risk management oversight. Management and staff expertise should be commensurate with the technical nature and complexity of the BSFI's applications and underlying technologies.

The Board and senior management should ensure that the operational and security risk dimensions of the BSFI's business strategies on e-services are appropriately considered and addressed. The provision of e-services may significantly modify and/or even increase traditional business risks. As such management should take appropriate actions to ensure that the BSFI's existing risk management, security control, due diligence and oversight processes for outsourcing relationships are appropriately evaluated and modified to accommodate e-services.

BSFI management should assess the impact of the implementation and ongoing maintenance of e-services. These areas should be monitored and analyzed on an ongoing basis to ensure that any impact on the BSFI's financial condition and risk profile resulting from e-services is appropriately managed and controlled. Management should evaluate e-services acceptance vis-à-vis the performance to the its goals and expectations through periodic review of reports tracking customer usage, problems such as complaints and downtime, unreconciled accounts or transactions initiated through the system, and system usage relative to capacity. Insurance policies may also need to be updated or expanded to cover losses due to system security breaches, system downtime, or other risks from e-services.

- 2.2. **Compliance Officer.** The compliance officer or its equivalent should be aware and informed of all relevant laws and regulatory requirements relative to the offering of e-services, including those of other countries where they also intend to deliver cross-border e-services. BSFI management should ensure that these requirements are complied with to minimize legal and compliance risks and other negative implications.

3. RISK MANAGEMENT SYSTEM

- 3.1. The BSFI should carefully evaluate the offering of a new e-service to customers to ensure that Management fully understands the risk characteristics and that there are adequate staffing, expertise, technology and financial resources to launch and maintain the service. A formal business strategy for introducing new service should be in place and form part of the BSFI's overall strategy. The BSFI should also perform regular assessments to ensure that its controls for managing identified risks remain proper and adequate.
- 3.2. The underlying risk management processes for e-services should be integrated into the BSFI's overall risk management framework and the existing risk management policies and processes should be evaluated to ensure that they are robust enough to cover the new risks posed by current or planned activities. Relevant internal controls and audit as required in BSFI's risk management system should also be enforced and carried out as appropriate for its e-services. Regular review of the relevant policies and controls should be performed to ascertain that these remain appropriate to the risks associated with such activities.
- 3.3. The BSFI should adjust or update, as appropriate, its information security program in the light of any relevant changes in technology, the sensitivity of its customer information and internal or external threats to information. The BSFI should ensure that the related information security measures and internal control are installed, regularly updated, monitored and are appropriate with the risks associated with their products and services.

4. RISK MANAGEMENT CONTROLS

- 4.1. **Security Controls.** The BSFI should recognize that e-services should be secured to achieve a high level of confidence with both customers and business. It is the responsibility of BSFI management to provide adequate assurances that transactions performed and information flowed through the electronic delivery channels are properly protected. For this reason, the BSFI should maintain a strong and comprehensive security control system. As such, in addition to the information security standards in *Appendix 75*, the BSFI should also provide the following controls specific for e-services:

- 4.1.1. **Account Origination and Customer Verification.** The BSFI should use reliable methods for originating new customer accounts. Potentially significant risks may arise when it accepts new customers through the internet or other electronic channels. Thus, the BSFI should ensure that in originating new accounts using electronic channels, the KYC requirement which involves a face-to-face process is strictly adhered to.
- 4.1.2. **Authentication¹.** The BSFI should use reliable and appropriate authentication methods to validate and verify the identity and authorization of customers. Authentication is facilitated by the use of factors, which are generally classified into three (3) basic groups:
- a. Knowledge – Something the user knows (e.g., username, password, mobile PIN, card number account number);
 - b. Possession – Something the user has (e.g., payment card, token, one-time password); and
 - c. Inherence – Something the user is (e.g., biometrics)

As the number of factors increases, the window of compromise becomes more difficult. The use of single factor authentication alone is considered inadequate to address the risks inherent in sensitive communications and/or high-risk transactions. Thus, BSFIs should adopt multi-factor authentication (MFA) or use a minimum of two (2) factors in such instances. This requirement shall apply to online transactions where the risk of compromise is heightened. Sensitive communications and/or high-risk transactions requiring MFA include, among others, the following:

- a. Enrollment in transactional e-services;
- b. Payments and transfers to third parties;
- c. Online remittance, including those for pick-up at the BSFI branches or via door- to-door delivery;

¹ BSFIs shall comply with the foregoing requirements on customer authentication by 30 September 2017. In this regard, a BSFI should be able to show its plan of actions with specific timelines, as well as the status of initiatives being undertaken to fully comply with the provisions of item "4.1.2" of *Appendix 78*, upon request of the Bangko Sentral starting May 2017. This transitory period, however, should not excuse BSFIs from immediately complying with the MFA requirements imposed by affiliated payment networks.

- d. Account maintenance, including change in account information and contact details; and
- e. Use of payment cards (e.g., ATM, credit and debit cards) in e-commerce websites.

For transactions that do not require real-time or near real-time authentication/ authorization, BSFIs may also opt to use positive confirmation in lieu of MFA. Positive confirmation refers to any form of communication that will enable the BSFI to timely and accurately verify the identity of the requesting customer. The BSFI should use a different communication channel other than the one where the request originated from when confirming sensitive communications and/or high-risk transactions.

The adoption of MFA techniques or positive confirmations for sensitive communications and/or high-risk transactions can increase customer confidence in e-services. In addition, it provides an opportunity for the customers to assist the BSFI in preventing and detecting fraudulent activity. Nevertheless, alternative and less stringent authentication procedures may be considered for the following:

- a. Small-value payment or other low-risk transactions, provided the same are justified by a transaction risk analysis¹ and bounded by prudent thresholds established by the BSFI. The BSFI's methodology for setting the threshold should be adequately documented and independently validated at least annually;
- b. Payments and transfers made to pre-enrolled merchants in the bills payment facility and those pre-registered recipients by the customer: Provided, That the BSFI employs a robust and reliable enrollment process for third party merchants and recipients; and
- d. Transaction between two (2) accounts of the same customer at the same BSFI.

As authentication methods continue to evolve, the BSFI should monitor, evaluate, and adopt sound industry practices to address current and changing risk factors. The authentication process should be consistent with and support the BSFI's overall security and risk management programs. An effective authentication process should have customer acceptance, reliable performance, scalability to accommodate growth and interoperability with existing systems and future plans as well as appropriate policies, procedures and controls

4.1.3. **Non-Repudiation**². As customers and merchants originate an increasing number of transactions, authentication and encryption become increasingly important to ensure non-repudiation of transactions. In such cases, the BSFI should consider implementing non-repudiation controls in the form of digital signatures, collision-free hash value of the entire transaction or unique authorization code that will provide conclusive proof of participation of both the sender and receiver in an online transaction environment. Public key infrastructure³, digital signature⁴, digital certificate⁵ and certification authority⁶ arrangements can be used to impart an enhanced level of security, authentication and authorization which can uniquely identify the person initiating transaction, detect unauthorized modifications and prevent subsequent disavowal.

4.1.4. **Authorization Controls and Access Privileges**. Specific authorization and access privileges should be assigned to all individuals, agents or systems, which conduct activities on e-services. No individual agent or system should have the authority to change his or her own authority or access privileges in the e-services authorization database. Any addition of an individual, agent or system or changes to access privileges should be duly authorized by an authenticated source empowered with adequate authority and subject to suitable and timely oversight and audit trails.

All systems that support e-services should be designed to ensure that they interact with a valid authorization database. Appropriate measures should be in place in order to make authorization databases reasonably resistant to tampering. Authenticated e-services sessions should remain secure throughout the

¹ *Transaction risk analysis* refers to the evaluation of risk related to a specific transaction taking into account various criteria including, but not limited to, customer behavioral transaction pattern, payee profile, nature of product/service to be acquired and transition value.

² *Non-repudiation* is a means of ensuring that a transferred message has been sent and received by the parties claiming to have sent and received the message. Non-repudiation is a way to guarantee that the sender of a message cannot later deny having sent the message and that the recipient cannot deny having received the message.

³ *Public Key Infrastructure (PKI)* refers to the use of public key cryptography in which each customer has a key pair (i.e. unique electronic value called a public key and a mathematically-related private key). The private key is used to encrypt (sign) a message that can only be decrypted by the corresponding public key or to decrypt message previously encrypted with the public key. The public key is used to decrypt message previously encrypted (signed) using an individual's private key or to encrypt a message so that it can only be decrypted (read) using the intended recipient's private key.

⁴ *Digital certificate* is a digital code that can be attached to an electronically transmitted message that uniquely identifies the sender. Like a written signature, the purpose of a digital signature is to guarantee that the individual sending the message really is who he or she claims to be.

⁵ *Digital Certificate* is the electronic equivalent of an ID card that authenticates the originator of digital signature.

⁶ *Certification Authority (CA)* is the organization that attests using a digital certificate that a particular electronic message comes from a specific individual or system.

full duration of the session. In the event of a security lapse, the session should require re-authentication. Controls should also be in place to prevent changes to authorization levels during e-services sessions and any attempts to alter authorization should be logged and brought to the attention of management.

No person by virtue of rank or position should have any intrinsic right to access confidential data, applications, system resources or facilities. Only employees with proper authorization and whose official duties necessitate access to such data, applications, system resources or facilities should be allowed to access confidential information and use system resources solely for legitimate purposes.

4.1.5. Confidentiality and Integrity of Information, Transactions and Records. The BSFI should ensure that appropriate measures are in place to ascertain the accuracy, completeness and reliability of e-services transactions, records and information that are either transmitted over the internal and external networks or stored in BSFI's internal systems. Common practices used to maintain data integrity include the following:

- a. E-services transactions should be conducted in a manner that make them highly resistant to tampering throughout the entire process;
- b. E-services records should be stored, accessed and modified in a manner that make them highly resistant to tampering;
- c. E-services transaction and record- keeping processes should be designed in a manner as to make it virtually impossible to circumvent detection of unauthorized changes.
- d. Adequate change control policies, including monitoring and testing procedures, should be in place to protect against any system changes that may erroneously or unintentionally compromise controls or data reliability; and
- e. Any tampering with e-services transactions or records should be detected by transaction processing, monitoring and record keeping functions.

The BSFI should take appropriate measures to preserve the confidentiality of key e-services information commensurate with the sensitivity of the information being transmitted and/or stored in databases. It should ensure that all intelligent electronic devices that capture information do not expose/store information such as the PIN number or other information classified as confidential and must also ensure that a customer's PIN number cannot be printed for any reason whatsoever. In addition, the BSFI must provide safe-to-use intelligent electronic devices and ensure that customers are able to make safe use of these devices at all times.

The BSFI should implement appropriate technologies to maintain confidentiality and integrity of sensitive information, in particular customer information. Cryptographic technologies can be used to protect the confidentiality and integrity of sensitive information. The BSFI should choose cryptographic technologies that are appropriate to the sensitivity and importance of information and the extent of protection needed and, only those that are making use of internationally recognized cryptographic algorithms where the strengths of the algorithms have been subjected to extensive tests. In cases when the information is transmitted over public network, the BSFI should consider the need to apply strong end-to-end encryption to the transmission of sensitive information.

To ensure adequate protection and secrecy of cryptographic keys whether they are master keys, key encrypting keys or data encrypting keys, no single individual should know entirely what the keys are or have access to all the constituents making up these keys. All keys should be created, stored, distributed or changed under the most stringent conditions. Likewise, use of these keys should be logged and provided with timely oversight.

4.1.6. Application Security. The BSFI should ensure an appropriate level of application security in its electronic delivery systems. In selecting system development tools or programming languages for developing e-services application systems, it should evaluate the security features that can be provided by different tools or languages to ensure that effective application security can be implemented. In selecting an e-services system developed by a third party, the BSFI should take into account the appropriateness of the application security of the system. It should test new or enhanced applications thoroughly using a general accepted test methodology in a test environment prior to implementation.

Comprehensive and effective validation of input parameters (including user-supplied data and database queries that may be submitted by the users' computers) should be performed on server side. This prevents intentional invalid input parameters from being processed by the e-services system that may result in unauthorized

access to data, execution of commands embedded in the parameters or a buffer overflow attack¹. Moreover, e-services systems should operate with the least possible system privileges.

Error messages generated by the application system for e-services customers should not reveal details of the system which are sensitive. Errors should be appropriately logged. Similarly, the HTML² source code on the production web server should not contain sensitive information such as any references or comments that relate to the design features of the web application code.

The mechanism for managing an active e-services session should be secure. Web pages containing sensitive information should not be cached in the temporary files of browsers. The application should ideally prohibit the customers' browsers from memorizing or displaying the user IDs and passwords previously entered by customers and the web pages previously accessed by customers.

When a known vulnerability related to the e-services application system is identified or reported, a review of the relevant program source code should be conducted as appropriate to ensure that the vulnerability is appropriately addressed. A security standard may be defined for the purpose of system development and code review. For third-party developed systems, the patches provided by vendors from time to time should be appropriately applied to these systems.

Hidden directories that contain administrative pages or sensitive information of the web site should either be removed from the production web server or protected by effective authentication and access control mechanisms. Back-up files and common files should be removed from the production servers or the structure of file directories to prevent access by unauthorized users. A periodic security review of the structure of file directories and access controls of the files is necessary to ensure that all sensitive files are appropriately protected and not exposed through the web applications.

- 4.1.7. **Infrastructure and Security Monitoring.** The BSFI should establish an appropriate operating environment that supports and protects systems on e-services. It should proactively monitor systems and infrastructure on an ongoing basis to detect and record any security breaches, suspected intrusions, or weaknesses. The BSFI should ensure that adequate controls are in place to detect and protect against unauthorized access to all critical e-services systems, servers, databases, and applications. The attached Annex "A" provides for the minimum security measures for e-services facilities.

The BSFI should put in place effective monitoring mechanisms to detect in a timely manner suspicious online transactions and unusual activities. A sound monitoring system should include audit features that can assist in the detection of fraud, money laundering, compromised passwords or other unauthorized activities. In particular, the monitoring mechanism for personal e-services should be able to detect cases similar to the following:

- a. False or erroneous application information, large check deposits on new e-services accounts, unusual volume or size of funds transfers, multiple new accounts with similar account information or originating from the same internet address, and unusual account activity initiated from a foreign internet address;
- b. Multiple online transfers are made to the same unregistered third-party account within a short period of time especially if the amount transferred is close to the maximum amount allowed or the value exceeds a certain amount; and
- c. Change of a customer's correspondence address shortly followed by transactions which may indicate potential fraudulent activities such as opening of an e-service account online, a request for important documents (e.g., cheque book, new e-banking password, credit card/ATM PIN) to be mailed to that address, increase of fund transfer limits, or a sudden increase of fund transfers made to unregistered third parties.

The BSFI's monitoring staff should be promptly alerted by its monitoring mechanism if suspicious online transfers and unusual activities are initiated. In these cases, the BSFI should, as soon as practicable, check with the account holders of these transactions or activities. Consideration should also be given to notifying personal customers immediately through an alternative automated channel (such as messages sent to mobile phones or e-mail accounts of customers) of online transfers made to unregistered third parties, online transfers exceeding certain amount limits, or detected unusual activities related to their accounts.

¹ Buffer overflow attack is a method of overloading a predefined amount of space in a buffer, which can potentially overwrite and corrupt memory in data.

² Hypertext Markup Language (HTML) is a set of codes that can be inserted into text files to indicate special interfaces, inserted images, and links to the hypertext documents.

- 4.1.8. **Audit Trail.** The BSFI should ensure that comprehensive logs are maintained to record all critical e-services transactions to help establish a clear audit trail and promote employee and user accountability. Audit logs should be protected against unauthorized manipulation and retained for a reasonable period [e.g., three (3) months] to facilitate any fraud investigation and any dispute resolution if necessary. In instances where processing systems and related audit trails are the responsibility of a third-party service provider, the BSFI should ensure that it has access to relevant audit trails maintained by the service provider in accordance with existing standards. In particular, clear audit trails should exist under the following types of e-services transactions:
- a. the opening, modification or closing of a customer's account;
 - b. any transaction with financial consequences;
 - c. any authorization granted to a customer to exceed a limit; and
 - d. any granting, modification or revocation of systems access right or privileges.
- 4.1.9. **Segregation of Duties.** As in any traditional process, segregation of duties is a basic internal control measure designed to reduce the risk of fraud in operational processes and systems. The BSFI management should ensure that duties are adequately separated and transaction processes are designed in a manner that no single person could initiate, approve, execute and enter transactions into a system that would enable fraudulent actions to be perpetrated and concealed. Segregation should also be maintained between (a) those developing and those administering the systems; and (b) those initiating static data (including web page content) and those responsible for verifying its integrity. E-services systems should be tested to ensure that segregation of duties cannot be bypassed.
- 4.1.10. **Website Information and Maintenance.** Because the BSFI's website is available on an ongoing basis to the general public, appropriate procedures should be established to ensure accuracy and appropriateness of its information. Key information changes and updates (such as deposit, loan and foreign exchange rates), are normally subject to documented authorization and dual verification. Procedures and controls to monitor and verify website information frequently may help prevent any inadvertent or unauthorized modifications or content that could lead to reputational damage or violations of advertising, disclosure, or other compliance requirements.

In addition, some BSFIs provide various tools and other interactive programs to enable customers to submit online application or provide resources for them to research available options associated with BSFI's products and services on-line. To protect the BSFI from potential liability or reputational harm, it should test or otherwise verify the accuracy and appropriateness of these tools and programs.

The BSFI should carefully consider how links to third-party Internet Web sites are presented. "Hyperlinks¹" may imply an endorsement of third-party products, services, or information that could lead to implicit liability for the BSFI. The BSFI should provide disclaimers when such links take the customer to a third-party web site to ensure that they clearly understand any potential liabilities arising out of any such cross-marketing arrangements or other agreements with third parties. Any links to sites offering non-deposit, investment or insurance products must comply with existing regulations. Links to other sites should be verified regularly for accuracy, functionality, and appropriateness.

The BSFI should manage the risk associated with fraudulent emails or websites which are designed to trick its customers into revealing private details such as account numbers or e-services passwords. To this end, the BSFI should consider educating customers the ways to ensure that they are communicating with the official website and that they will not be required to access the BSFI's transactional e-services portal through hyperlinks embedded in e-mails unless the website is validated by legitimate digital certificate.

Additionally, the BSFI should exercise care in selecting its website name(s) in order to reduce possible confusion with those of other Internet sites. It should periodically scan the Internet to identify sites with similar names and investigate any that appear to be posing as the institution. Suspicious sites should be reported to appropriate law enforcement agencies and regulatory authorities.

¹ *Hyperlink* is an item on a webpage, that, when selected, transfers the user directly to another location in a hypertext document or to another webpage, perhaps on a different machine.

4.2. Administrative and Management Controls

- 4.2.1. **Service Availability and Business Continuity.** The BSFI should have the ability to deliver e-services to all end-users and be able to maintain such availability in all circumstances within a reasonable system response time in accordance with its terms and conditions and anticipated customer expectations. Performance criteria for each critical e-service should be established and service levels should be monitored against these criteria. Appropriate measures should be taken to ensure that e-services systems and the interfaces with the internal systems can handle the projected transaction volume and future growth in transactions.

Appropriate business continuity and contingency plans for critical e-services processing and delivery systems should be in place and regularly tested. Contingency plans should set out a process for restoring or replacing e-services processing capabilities, reconstructing supporting transaction information, and include measures to be taken to resume availability of critical e-services systems and applications in the event of a business disruption.

- 4.2.2. **Incident Response and Management.** The BSFI should put in place formal incident response and management procedures for timely reporting and handling of suspected or actual security breaches, fraud, or service interruptions of their e-services during or outside office hours. A communication strategy should be developed to adequately address the reported concerns and an incident response team should be established to manage and respond to the incident in accordance with existing standards enumerated in *Appendix 75*.

- 4.2.3. **Outsourcing Management.** Increased reliance upon partners and third party service providers to perform critical e-services functions lessens BSFI management's direct control. Accordingly, a comprehensive process for managing the risks associated with outsourcing and other third-party dependencies is necessary to ensure that:

- a. The BSFI fully understands the risks associated with entering into an outsourcing or partnership arrangement for its e-services systems or applications;
- b. An appropriate due diligence review of the competency and financial viability of any third-party service provider or partner is conducted prior to entering into any contract for e-services;
- c. The contractual accountability of all parties to the outsourcing or partnership relationship is clearly defined. For instance, responsibilities for providing information to and receiving information from the service provider should be clearly defined;
- d. All outsourced e-services systems and operations are subject to risk management, security and privacy policies that meet the BSFI's own standards;
- e. Periodic independent internal and/or external audits are conducted of outsourced operations to at least the same scope required if such operations were conducted in-house; and
- f. Appropriate contingency plans for outsourced e-services activities exist.

Complete guidelines for managing outsourcing relationships and third party dependencies are enumerated in *Appendix 78*.

4.3. Consumer Protection.

- 4.3.1. **Customer Privacy and Confidentiality.** The BSFI should take appropriate measures to ensure adherence to customer privacy requirements applicable to the jurisdictions to which the institution is providing electronic products and services. Misuse or unauthorized disclosure of confidential customer data exposes the entity to both legal and reputation risk. To meet these challenges concerning the preservation of privacy of customer information, the BSFI should make reasonable endeavours to ensure that:

- a. The BSFI's customer privacy policies and standards take account of and comply with all privacy regulations and laws applicable to the jurisdictions to which it is providing e-services;
- b. Customers are made aware of the BSFI's privacy policies and relevant privacy issues concerning use of e-services;
- c. Customers may decline ("opt out") from permitting the BSFI to share with a third party for cross-marketing purposes any information about the customer's personal needs, interests, financial position or banking activity; and
- d. Customer data are not used for purposes beyond which they are specifically allowed or for purposes beyond which customers have authorized. The BSFI's standards for customer data use must be met when third parties have access to customer data through outsourcing relationships.

- 4.3.2. **Information Disclosure for E-Services.** The BSFI should comply with all legal requirements relating to e-services, including the responsibility to provide its customers with appropriate disclosures and to protect customer data. Failure to comply with these responsibilities could result in significant compliance, legal, or reputation risk for the BSFI.

The BSFI should set out clearly in its terms and conditions the respective rights and obligations between the BSFI and its customers. These terms and conditions should be fair and balanced to both parties. In addition, it is required to provide its customers with a level of comfort regarding information disclosures or transparencies, protection of customer data and business availability that they can expect when using traditional banking services. To minimize operational, legal and reputational risks associated with e-services activities, the BSFI should make adequate disclosures of information and take appropriate measures to ensure adherence to customer privacy and protection requirements. Annex "B" provides for the minimum disclosure requirements of BSFIs.

- 4.3.3. **Consumer Awareness.** Customer education is a key defense against fraud, identity theft and security breach. Therefore, the BSFI should pay special attention to the provision of easy to understand and prominent advice to its customers on security precautions for e-services. To be effective, the BSFI should maintain and continuously evaluate its consumer awareness program. Methods to evaluate a program's effectiveness include tracking the number of customers who report fraudulent attempts to obtain their authentication credentials, the number of clicks on information security links on websites, the number of inquiries, etc. "Annex "C" provides for the minimum Consumer Awareness Program that the BSFI should convey to its customers.
- 4.3.4. **Complaints Resolution.** The BSFI may receive customer complaint either through an electronic medium or otherwise, concerning an unauthorized transactions, loss or theft in the e-services account. Therefore, it should ensure that controls are in place to review these notifications and that an investigation is initiated as required. The BSFI should also establish procedures to resolve disputes arising from the use of the e-services.

4.3. Cross-Border E-Banking Activities.

- 4.4.1. Before a BSFI initiates cross-border e-services, its management should conduct appropriate risk assessment and due diligence to ensure that it can adequately manage the attendant risks. It must also comply with any applicable laws and regulations, both the home country as well as those of any foreign country that may assert jurisdiction over e-services that are directed at its residents. Further, the BSFI should ensure that it has an effective and ongoing risk management program for its cross-border e-services activities;
- 4.4.2. Before engaging in transactions involving cross-border e-services with foreign customers, the BSFI should ensure that adequate information is disclosed on its Web site to allow potential customers to make a determination of the BSFI's identity, home country, and whether it has the relevant regulatory license(s) before it establishes the relationship. This information will help improve transparency and minimize legal and reputational risk associated with the offering of cross border e-services.

5. INDEPENDENT ASSESSMENT

- 5.1. An appropriate independent audit function is also an important component of a BSF's monitoring mechanisms. The audit coverage should be expanded commensurate with the increased complexity and risks inherent in e-services and should include the entire process as applicable (i.e., network configuration and security, interfaces to legacy systems, regulatory compliance, internal controls, support activities performed by third-party providers etc.).
- 5.2. The BSFI should also make arrangements for independent assessments to be conducted on its systems before the launch of the relevant services or major enhancements to existing services. The person(s) (i.e., the assessor) contracted by the BSFI to perform independent assessment should have, and be able to demonstrate, the necessary expertise in the relevant fields. He/she should be independent from the parties that develop or administer the system and should not be involved in the operations to be reviewed or in selecting or implementing the relevant control measures to be reviewed. He/she should be able to report findings freely and directly to the authorized BSFI senior management.
- 5.3. Subsequent to an initial independent assessment, the BSFI should conduct risk assessment at least every two (2) years or when there are substantial changes to determine if further independent assessment should be required and the frequency and scope of such independent assessment. Any substantial changes to the risk profile of the services being provided, significant modifications of the network infrastructure and applications, material system vulnerabilities or major security breaches are to be taken into consideration in the risk assessment.

6. APPLICABILITY

- 6.1. These guidelines are intended for all electronic products and services offered by BSFIs to their customers. These are focused on the risks and risk management techniques associated with electronic delivery channels to protect customers and general public. It should be understood, however, that not all the customer protection issues that have arisen in connection with new technologies are specifically addressed in subject guidelines. Additional issuances may be issued in the future to address other aspects of consumer protection as the financial service environment through e-services evolves.

SECURITY CONTROLS ON SPECIFIC ELECTRONIC SERVICES AND CHANNELS

In providing banking/financial services via electronic channels, such as ATM, internet and mobile devices, the BSFI must consider customer's convenience in using the facilities, including the effectiveness of the display on electronic menu, particularly on customer's instructions selection menu in order to avoid any error and loss in transactions. In electronic services which involve physical equipment like ATMs, the BSFI must implement physical security control on equipments and rooms from the danger of theft, sabotage and other criminal actions by unauthorized parties. It must perform routine monitoring to ensure security and comfort of customers using electronic service.

Automated Teller Machine (ATM)

1. To minimize/prevent ATM frauds and crimes, the BSFI, at a minimum, implement the following security measures with respect to its ATM facilities:
 - a. Locate ATM's in highly visible areas;
 - b. Provide sufficient lighting at and around the ATMs;
 - c. Where ATM crimes (e.g., robbery, vandalism, skimming) are high in a specific area or location, the BSFI should install surveillance camera or cameras which shall view and record all persons entering the facility. Such recordings shall be preserved by the BSFI for at least thirty (30) days;
 - d. Implement ATM programming enhancements like masking/non-printing of card numbers;
 - e. Educate customers by advising them regularly of risks associated with using the ATM and how to avoid these risks;
 - f. Conduct and document periodic security inspection at the ATM location;
 - g. Educate BSFI personnel to be responsive and sensitive to customer concerns; and
 - h. Post a clearly visible sign near the ATM facility which, at a minimum, provides the telephone numbers of the BSFI as well as other BSFI's hotline numbers for other cardholders who are allowed to transact business in the ATM, and police hotlines for emergency cases.
2. The BSFI must study and assess ATM crimes to determine the primary problem areas. Procedures for reporting ATM crimes should also be established. Knowing what crimes have occurred will aid the BSFI in recognizing the particular problem and to what degree it exists so that it can implement the necessary preventive measures. In this connection, all BSFI's are encouraged to share information involving ATM fraud cases to deter and prevent proliferation of the crime.

Online Internet Financial Services

1. Assurance should be provided that online login access and transactions performed over the internet are adequately protected and authenticated. In addition, customers should be adequately educated on security measures that must be put in place to uphold their interests in the online environment.
2. With internet connection to internal networks, financial systems and devices may now be potentially accessed by anyone from anywhere at any time. The BSFI should implement physical and logical access security to allow only authorized personnel to access its systems. Appropriate processing and transmission controls should also be implemented to protect the integrity of systems and data.
3. There should be a mechanism to authenticate official website to protect customers from spoofed or faked websites. The BSFI should determine what authentication technique to adopt to provide protection against these attacks. For wireless applications, it should adopt authentication protocols that are separate and distinct from those provided by the wireless network operator.

4. Monitoring or surveillance systems should be implemented to alert BSFI of any erratic system activities, transmission errors or unusual online transactions. A follow-up process should be established to verify that these issues or errors are adequately addressed subsequently. High resiliency and availability of online systems and supporting systems (such as interface systems, backend host systems and network equipment) should be maintained to meet customers' expectations. Measures to plan and track capacity utilization as well as guard against online attacks should be established.
5. As more customers log into BSFI's website to access their accounts and conduct a wide range of financial transactions for personal and business purposes, a suite of measures must be established to protect customers' interests in using online systems. Furthermore, customers should be educated on the risks of using online financial services before they subscribe to such services. Ongoing education must be available to raise the security awareness of customers to protect their systems and online transactions.

Mobile and Phone Financial Services

1. For electronic services using mobile phone, the BSFI must ensure the security of transactions by implementing the following, among others:
 - a. Employment of a SIM Toolkit with end-to-end encryption feature from hand phones to m-banking servers, to protect data transmission in m-banking; and
 - b. Adoption of dual authentication process (i.e., MPIN) to ensure that the party initiating the transaction is the owner of the device and is authorized to perform such transaction.
2. For phone banking and other financial services, the BSFI must ensure the security of transactions, by implementing the following, among others:
 - a. The service shall not be used for transactions with high value or risk;
 - b. All IVR conversations shall be recorded, including customer's phone number, transaction detail, etc;
 - c. The service shall use reliable and secure authentication methods; and
 - d. The use of customer authentication method such as PIN and password for financial transactions.

Other Mobile Online and Payment Services

1. Mobile online and payment services are extensions of the online financial services which are offered by the BSFI and accessible from the internet via computers, laptops and similar devices. Security measures which are similar to those of online financial and payment systems should also be implemented on the mobile online services and payment systems. A risk assessment should be conducted to identify possible fraud scenarios and appropriate measures should be established to counteract payment card fraud via mobile devices.
2. The BSFI may require customers to download its mobile online services and payment applications directly from third party repositories (e.g., Apple store, Google Play and Windows Market Place) on to mobile devices. Customers must be able to verify the integrity and authenticity of the application prior to its download. The BSFI should also be able to check the authenticity and integrity of the software being used by the customers.
3. As mobile devices are susceptible to theft and loss, there must be adequate protection of sensitive data used for mobile online services and payments. Sensitive data should be encrypted to ensure the confidentiality and integrity of these data in storage, transmission and during processing.
4. Customers should be educated on security measures to protect their own mobile devices from theft and loss as well as viruses and other errant software which cause malicious damage and harmful consequences.

Point of Sale Devices

1. Point of Sale (POS)/Electronic Data Capture (EDC) enable electronic fund transfer from customer's account to acquirer's or merchant's account for payment of a transaction. The party providing POS terminal must always increase the physical security around the vicinity of such POS terminal and on the POS terminal itself, among others, by using POS terminal that minimizes the possibility of interception on such terminal or in its communication network.

2. The BSFI deploying POS devices at merchant locations must familiarize the merchant with the safe operation of the device. The acquiring institution must ensure that the POS devices as well as other devices that capture information do not expose/store information such as the PIN number or other information classified as confidential. It must also ensure that a customer's PIN number cannot be printed at the point of sale for any reason whatsoever.
3. Operators of point of sale devices are encouraged to work towards interoperability of cards from other schemes.

Electronic Payment Cards (ATM, Credit and Debit Cards)

1. Payment cards allow cardholders the flexibility to make purchases wherever they are. Payment cards exist in many forms; with magnetic stripe cards posing the highest security risks. Sensitive payment card data stored on magnetic stripe cards is vulnerable to card skimming attacks. Card skimming attacks can happen at various points of the payment card processing, including payment kiosks and POS terminals. In addition to counterfeit/ skimmed cards, fraudulent activities associated with payment cards include lost/ stolen cards, card-not-received and card-not-present transactions.
2. The BSFI providing payment card services should implement adequate safeguards to protect sensitive payment card data. Sensitive payment card data should be encrypted to ensure the confidentiality and integrity of these data in storage, transmission and during processing. Pending the required adoption of EMV chip-cards by 01 January 2017, all BSFIs engaged in the payment card business should consider implementing the following measures to mitigate exposure from skimming attacks:
 - a. Installation of anti-skimming solutions on ATM and POS machines to detect the presence of foreign devices placed over or near a card entry slot;
 - b. Establishment of detection and alert mechanisms to appropriate personnel for follow-up response and action;
 - c. Implementation of tamper-resistant keypads to ensure that no one can identify which buttons are being pressed by customers;
 - d. Implementation of appropriate measures to prevent shoulder surfing of customers' PINs; and
 - e. Conduct video surveillance of activities at these machines and maintain the quality of CCTV footage.
3. New payment cards sent to customers via courier should only be activated upon obtaining the customer's instruction. Online transactions should only be allowed if authorized by the customers. Authentication of customers' sensitive static information, such as personal identification number (PIN) or passwords, should be performed by the card issuer and not by third party payment processing service providers. Appropriate security mechanisms should also be implemented for card-not-present transactions via internet to reduce fraud risk associated with this type of transaction.
4. To enhance payment card security, cardholders should be notified promptly via transaction alerts on withdrawals/charges exceeding customer-defined thresholds made on their payment cards. The transaction alert should include information such as source and amount of the transaction to assist customers in identifying a genuine transaction.
5. Fraud detection systems with behavioral scoring and correlation capabilities should be implemented to identify and curb fraudulent activities. Risk management parameters should be calibrated according to risks posed by cardholders, nature of transactions or other risk factors to enhance fraud detection capabilities. Follow-up actions for transactions exhibiting behavior which deviates significantly from a cardholder's usual card usage patterns should be instituted. These transactions should be investigated into and the cardholder's authorization obtained prior to completing the transaction.

DISCLOSURE REQUIREMENTS

1. General Requirement

BSFIs offering electronic products and services (e-services) should adopt responsible privacy policies and information practices. They should provide disclosures that are clear and readily understandable, in writing, or in a form the consumers may print and keep.

BSFIs should also ensure that consumers who sign-up for a new e-service are provided with disclosures (e.g., pamphlet) informing him of his rights as a consumer.

At a minimum, the following disclosures should be provided to protect consumers and inform them of their rights and responsibilities:

- a. Information on the duties of the BSFI and customers;
- b. Information on who will be liable for unauthorized or fraudulent transactions;
- c. Mode by which customers will be notified of changes in terms and conditions;
- d. Information relating to how customers can lodge a complaint, and how a complaint may be investigated and resolved;
- e. Disclosures that will help consumers in their decision-making (e.g., PDIC insured, etc.);
- f. For internet environment, information that prompt in the BSFI's website to notify customers that they are leaving the BSFI's website and hence they are not protected by the privacy policies and security measures of the BSFI when they hyperlink to third party's website.

2. Disclosure Responsibility

- a. Compliance officers should review BSFI's disclosure statements to determine whether they have been designed to meet the general and specific requirements set in the regulation;
- b. For BSFIs that advertise deposit products and services on-line, they must verify that proper advertising disclosures are made (e.g., whether the product is insured or not by the PDIC; fees and charges associated with the product or services, etc.). Advertisements should be monitored to determine whether they are current, accurate, and compliant;
- c. For BSFIs that issue various products like stored value cards, e-wallets, debit cards and credit cards, they must provide information to consumers regarding the features of each of these products to enable consumers to meaningfully distinguish them. Additionally, consumers would find it beneficial to receive information about the terms and conditions associated with their usage. Example of these disclosures include:
 - PDIC insured or non-insured status of the product;
 - Fees and charges associated with the purchase, use or redemption of the product;
 - Liability for loss;
 - Expiration dates, or limits on redemption; and
 - Toll-free telephone number for customer service, malfunction and error resolution.
- d. Whenever e-services are outsourced to third parties or service providers, the BSFI should ensure that the vendors comply with the disclosure requirements of the Bangko Sentral.

ELECTRONIC SERVICES CONSUMER AWARENESS PROGRAM

To ensure security of transactions and personal information in electronic delivery channels, consumers should be oriented of their roles and responsibilities which, at a minimum, include the following:

1. Internet Products and Services

- a) Secure Login ID and Password or PIN.
 - i. Do not disclose Login ID and Password or PIN.
 - ii. Do not store Login ID and Password or PIN on the computer.
 - iii. Regularly change password or PIN and avoid using easy-to-guess passwords such as names or birthdays. Password should be a combination of characters (uppercase and lowercase) and numbers and should be at least six (6) digits in length.
- b) Keep personal information private.
 - i. Do not disclose personal information such as address, mother's maiden name, telephone number, social security number, bank account number or e-mail address — unless the one collecting the information is reliable and trustworthy.
- c) Keep records of online transactions.
 - i. Regularly check transaction history details and statements to make sure that there are no unauthorized transactions.
 - ii. Review and reconcile monthly credit card and bank statements for any errors or unauthorized transactions promptly and thoroughly.
 - iii. Check e-mail for contacts by merchants with whom one is doing business. Merchants may send important information about transaction histories.
 - iv. Immediately notify the BSFI if there are unauthorized entries or transactions in the account.
- d) Check for the right and secure website.
 - i. Before doing any online transactions or sending personal information, make sure that correct website has been accessed. Beware of bogus or "look alike" websites which are designed to deceive consumers.
 - ii. Check if the website is "secure" by checking the Universal Resource Locators (URLs) which should begin with "https" and a closed padlock icon on the status bar in the browser is displayed. To confirm authenticity of the site, double-click on the lock icon to display a security certificate information of the site.
 - iii. Always enter the URL of the website directly into the web browser. Avoid being re-directed to the website, or hyperlink to it from a website that may not be as secure.
 - iv. If possible, use software that encrypts or scrambles the information when sending sensitive information or performing e-banking transactions online.
- e) Protect personal computer from hackers, viruses and malicious programs.
 - i. Install a personal firewall and a reputable anti-virus program to protect personal computer from virus attacks or malicious programs.
 - ii. Ensure that the anti-virus program is updated and runs at all times.
 - iii. Always keep the operating system and the web browser updated with the latest security patches, in order to protect against weaknesses or vulnerabilities.

- iv. Always check with an updated anti-virus program when downloading a program or opening an attachment to ensure that it does not contain any virus.
 - v. Install updated scanner softwares to detect and eliminate malicious programs capable of capturing personal or financial information online.
 - vi. Never download any file or software from sites or sources, which are not familiar or hyperlinks sent by strangers. Opening such files could expose the system to a computer virus that could hijack personal information, including password or PIN.
- f) Do not leave computer unattended when logged-in.
- i. Log-off from the internet banking site when computer is unattended, even if it is for a short while.
 - ii. Always remember to log-off when e-banking transactions have been completed.
 - iii. Clear the memory cache and transaction history after logging out from the website to remove account information. This would avoid incidents of the stored information being retrieved by unwanted parties.
- g) Check the site's privacy policy and disclosures.
- i. Read and understand website disclosures specifically on refund, shipping, account debit/credit policies and other terms and conditions.
 - ii. Before providing any personal financial information to a website, determine how the information will be used or shared with others.
 - iii. Check the site's statements about the security provided for the information divulged.
 - iv. Some websites' disclosures are easier to find than others — look at the bottom of the home page, on order forms or in the "About" or "FAQs" section of a site. If the customer is not comfortable with the policy, consider doing business elsewhere.
- h) Other internet security measures:
- i. Do not send any personal information particularly password or PIN via ordinary e-mail.
 - ii. Do not open other browser windows while doing online transactions.
 - iii. Avoid using shared or public personal computers in conducting financial transactions.
 - iv. Disable the "file and printer sharing" feature on the operating system if conducting financial transactions online.
 - v. Contact the BSFI concerned to discuss security concerns and remedies to any online e-services account issues.
2. Other Electronic Products/Channels
- a) Automated Teller Machine (ATM) and debit cards
- i. Use ATMs that are familiar or that are in well-lit locations where one feels comfortable. If the machine is poorly lit or is in a hidden area, use another ATM.
 - ii. Have card ready before approaching the ATM. Avoid having to go through the wallet or purse to find the card.
 - iii. Do not use ATMs that appear to have been tampered with or otherwise altered. Report such condition to the BSFI.
 - iv. Memorize ATM card PIN and never disclose it with anyone. Do not keep those numbers or passwords in the wallet or purse. Never write them on the cards themselves. And avoid using easily available personal information like a birthday, nickname, mother's maiden name or consecutive numbers.

- v. Be mindful of “shoulder surfers” when using ATMs. Stand close to the ATM and shield the keypad with hand when keying in the PIN and transaction amount.
 - vi. If the ATM is not working correctly, cancel the transaction and use a different ATM. If possible, report the problem to the BSFI.
 - vii. Carefully secure card and cash in the wallet, handbag, or pocket before leaving the ATM.
 - viii. Do not leave the receipt behind. Compare ATM receipts to monthly statement. It is the best way to guard against fraud and it makes record-keeping easier.
 - ix. Do not let other people use your card. If card is lost or stolen, report the incident immediately to the BSFI.
- b) Credit cards
- i. Never disclose credit card information to anyone. The fraudulent use of credit cards is not limited to the loss or theft of actual credit cards. A capable criminal only needs to know the credit card number to fraudulently make numerous charges against the account.
 - ii. Endorse or sign all credit cards as soon as they are received from the BSFI.
 - iii. Like ATM card PINs, secure credit card PINs. Do not keep those numbers or passwords in the wallet or purse and never write them on the cards themselves.
 - iv. Photocopy both the front and back of all credit cards and keep the copies in a safe and secure location. This will facilitate in the immediate cancellation of the card if lost or stolen.
 - v. Carry only the minimum number of credit cards actually needed and never leave them unattended.
 - vi. Never allow credit card to use as reference (credit card number) or as an identification card.
 - vii. Never give your credit card account number over the telephone unless dealing with a reputable company or institution.
 - viii. When using credit cards, keep a constant eye on the card and the one handling it. Be aware of the “swipe and theft” scam using card skimmers. A skimmer is a machine that records the information from the magnetic stripe on a credit card to be downloaded onto a personal computer later. The card can be swiped on a skimmer by a dishonest person and that data can then be used to make duplicate copies of the credit card.
 - ix. Do not leave documents like bills, bank and credit card statements in an unsecure place since these documents have direct access to credit card and/or deposit account information. Consider shredding sensitive documents rather than simply throwing them away. (Some people will go through the garbage to find this information).
 - x. Notify the BSFI in advance of a change in address.
 - xi. Open billing statements promptly and reconcile card amounts each month.
 - xii. Do not let other people use your card. If card is lost or stolen, report the incident immediately to the BSFI.
- c) Mobile Phones/Devices
- i. Do not disclose your Mobile Banking Pin (MPIN) to anyone.
 - ii. Regularly change the MPIN.
 - iii. Do not let other people use your mobile phone enrolled in a mobile banking service. If the phone is lost or stolen, report the incident immediately to the BSFI.

- iv. Be vigilant. Refrain from doing mobile banking transactions in a place where you observe the presence of “shoulder surfers”.
- v. Keep a copy of the transaction reference number provided by the Bank whenever you perform a mobile banking transaction as an evidence that the specific transaction was actually executed.

Since customers may find it difficult to take in lengthy and complex advice, BSFIs should devise effective methods and channels for communicating with them on security precautions. They may make use of multiple channels (e.g., BSFI websites, alert messages on customers mobile phone, messages printed on customer statements, promotional leaflets, circumstances when BSFI’s frontline staff communicate with their customers) to enforce these precautionary measures.

(Circular No. 958 dated 25 April 2017)

**AUTHORIZATION FORM FOR QUERYING THE BANGKO SENTRAL RECORDS FOR SCREENING
APPLICANTS AND CONFIRMING APPOINTMENTS OF DIRECTORS AND OFFICIALS
(Appendix to Sec. 138 on Watchlisting)**

A U T H O R I Z A T I O N

I, _____ after being sworn in accordance with law, do hereby authorize the following, pursuant to the provisions of Sec. 138 on Confidentiality of the Manual of Regulations for Banks:

- a) (Name of BSP-supervised financial institutions (BSFI)), to conduct a background investigation on myself relative to my application for or appointment to the position of (position) in (Name of BSFI) which include, among others, inquiring from the records of the Bangko Sentral, including the Watchlist Files of the Bangko Sentral; and
- b) The Bangko Sentral to disclose its findings pertinent to the aforementioned inquiry on its records, including the Watchlist Files, to (Name of BSFI).

With the above authorization, I hereby waive my right to the confidentiality of the information that will be obtained as a result of the said inquiry, provided that disclosure of said information will be limited for the purpose of ascertaining my qualification or non-qualification for the said position.

IN WITNESS WHEREOF, I have hereunto set my hand this

FINANCIAL REPORTING PACKAGE **(Appendix to Sec. 172)**

The *Financial Reporting Package (FRP)* is a set of financial statements for prudential reporting purposes composed of the Balance Sheet, Income Statement and Supporting Schedules. The FRP is primarily designed to align the Bangko Sentral reportorial requirements with the (1) provisions of the Philippine Financial Reporting Standards (PFRS)/Philippine Accounting Standards (PAS) and (2) Basel 2 Capital Adequacy Framework. It is also designed to meet Bangko Sentral statistical requirements.

Organization of the Instructions of the FRP

This instruction is divided into the following sections:

- (1) The General Instructions, which describe the overall reporting requirements;
- (2) Structure of the FRP;
- (3) Manual of Accounts, which provides in the order presented in the Balance Sheet and the Income Statement the definitions of the accounts in the FRP;
- (4) Line Item Instructions for the Balance Sheet; Income Statements and Supporting Schedules; and
- (5) Report Formats, for solo and consolidated reports.

In determining the required treatment of particular transactions or in determining the definitions of the various items, the General Instructions, the Structure of the FRP, Manual of Accounts and Line Item Instructions must be used jointly. A single section does not necessarily give the complete instructions for accomplishing the main report and schedules.

GENERAL INSTRUCTIONS

Who must Report on What Forms/Schedules

All banks are required to prepare the FRP. The FRP shall be prepared on a solo and consolidated basis. Solo basis shall refer to the combined financial statements of the head office and branches/other offices. Consolidated basis shall refer to the combined financial statements of parent bank and subsidiaries consolidated on a line by line basis. Only banks with financial allied subsidiaries, excluding insurance subsidiaries, shall submit the report on consolidated basis.

The solo and consolidated FRP shall be prepared on a quarterly basis, except for the solo balance sheet and the following selected schedules which shall be prepared on a monthly basis.

- | | | | |
|------|-----------------------|---|--|
| (1) | Schedule 1 | : | Checks and Other Cash Items |
| (2) | Schedule 2 | : | Due from Other Banks |
| (3) | Schedule 3 | : | Financial Assets Held for Trading |
| (4) | Schedule 4a | : | Derivatives Held for Trading, Matrix of Counterparty and Type of Derivative Contracts |
| (5) | Schedule 5 | : | Financial Assets Designated at Fair Value Through Profit or Loss |
| (6) | Schedule 6 | : | Available for Sale Financial Assets |
| (7) | Schedule 7 | : | Held to Maturity Financial Assets |
| (8) | Schedule 8 | : | Unquoted Debt Securities Classified as Loans |
| (9) | Schedule 9 | : | Investment in Non Marketable Equity Securities |
| (10) | Schedule 10 | : | Interbank Loans Receivables |
| (11) | Schedule 11 | : | Loans and Receivables– Others |
| (12) | Schedule 11a to 11 a4 | : | Loans and Receivables – Others, Classified as to Status |
| (13) | Schedule 11b to 11b4 | : | Restructured Loans and Receivables, Classified as to Status |
| (14) | Schedule 11d to 11d4 | : | Loans and Receivables – Others, at Amortized Cost, Classified as to Type of Business/ Industry |
| (15) | Schedule 11f | : | Schedule of Agri/Agra, Microfinance and SME Loans Receivables, Classified as to Counterparty |

- | | | | |
|------|-------------|---|--|
| (16) | Schedule 12 | : | Loans and Receivables
Arising from Repurchase Agreements, Certificates of Assignment/
Participation with Recourse and Securities Lending and Borrowing
Transactions, By Counterpart |
| (17) | Schedule 15 | : | Equity Investment in Subsidiaries, Associates and Joint Ventures |
| (18) | Schedule 19 | : | Other Assets |
| (19) | Schedule 20 | : | Breakdown of Due from/to HO/Branches/ Agencies Abroad – Philippine
Branch of a Foreign Bank |
| (20) | Schedule 22 | : | Deposit Liabilities Classified as to Type of Deposit |
| (21) | Schedule 23 | : | Due to Other Banks |
| (22) | Schedule 24 | : | Bills Payable |
| (23) | Schedule 28 | : | Other Liabilities |

The solo and consolidated FRP shall be prepared on a quarterly basis, except for the solo balance sheet and the following selected schedules which shall be prepared on a monthly basis.

All schedules shall be available to any type of reporting bank. Hence, schedules that do not apply to a particular bank should only be left blank when submitted.

Frequency of Reporting

The solo FRP, shall be submitted quarterly within fifteen (15) banking days after the end of the reference quarter. The solo balance sheet and the selected schedules listed above shall be submitted monthly within fifteen (15) banking days after the end of the reference month. The consolidated FRP, on the other hand, shall be submitted quarterly within thirty (30) banking days after end of reference quarter.

The following schedules or columns of particular schedules of the solo and/or consolidated FRP, however, are required to be submitted and/or accomplished only annually (i.e. end December of each year):

- | | | | |
|------|------------------------|---|--|
| (1) | Schedule 6b to 6b(3) | : | Financial Assets ("Collateral and Other Credit Enhancements Received as
Security for the Related Impaired and Past Due Assets" column) |
| (2) | Schedule 6c to 6c(3) | : | Available for Sale Financial Assets Movements in Allowances for Credit
Losses |
| (3) | Schedule 7b | : | Fair Value of Held to Maturity Financial Assets |
| (4) | Schedule 7c to 7c(3) | : | Held to Maturity Financial Assets ("Collateral and Other Credit Enhancements
Received as Security for the Related
Impaired and Past Due Assets" column) |
| (5) | Schedule 7d to 7d(3) | : | Held to Maturity Financial Assets Movements in Allowances for Credit Losses |
| (6) | Schedule 8a | : | Fair Value of Unquoted Debt Securities Classified as Loans |
| (7) | Schedule 8b to 8b(3) | : | Unquoted Debt Securities Classified as Loans ("Collateral and Other Credit
Enhancements Received as Security for the Related Impaired and Past Due
Assets" column) |
| (8) | Schedule 8c to 8c(3) | : | Unquoted Debt Securities Classified as Loans Movements in Allowances for C
Losses |
| (9) | Schedule 11e to 11e(3) | : | Loans and Receivables-Others Classified as to Status Per PAS 39 |
| (10) | Schedule 15a | : | Investment in Subsidiaries, Associates and Joint Ventures (Fair Value
Column) |
| (11) | Schedule 18 | : | Tax Assets and Liabilities |
| (12) | Schedule 26 | : | Fair Value of Financial Liabilities |

Rules of Consolidation

In preparing consolidated financial statements, only investments in financial allied subsidiaries except insurance subsidiaries shall be consolidated on a line-by-line basis in accordance with PAS 27 "Consolidated and Separate Financial Statements", while insurance and non-financial allied subsidiaries shall be accounted for using the equity method. Financial/non-financial allied/non-allied associates shall be accounted for using the equity method in accordance with the provisions of PAS 28 "Investments in Associates".

For purposes of preparing solo financial statements, financial/non-financial allied/ non-allied subsidiaries/associates, including insurance subsidiaries/associates, shall also be accounted for using the equity method.

For purposes of preparing consolidated reports, the "Peso accounts", "Foreign accounts", "FCDU/EFCDU" and "Foreign Offices", and their supporting schedules shall not be filled-up/accomplished.

Amounts Reported

All amounts reported in the FRP must be in absolute figures including two (2) decimal places, except for "Losses" columns/rows which shall be reported in negative figures, i.e., enclosed in parentheses.

STRUCTURE OF THE FRP

- (1) The FRP is designed to reflect the two (2) types of books as follows¹: (1) regular banking book, which shall be comprised of (a) peso accounts; and (b) foreign accounts and (2) FCDU/EFCDU as allowed under Circular No. 1389 dated 13 April 1993, as amended. Transactions in the foreign regular and FCDU/EFCDU books shall be recorded at their foreign currency amounts and their local currency equivalent using the Philippine Dealing System (PDS) Peso/US Dollar closing rate and the New York US Dollar/Third Currencies closing rate.
- (2) The FRP generally groups transactions into the different counterparties of the reporting bank. Foreign offices and branches of local banks abroad shall classify their counterparties from the perspective of the Head Office. Counterparties are broadly classified as to residents and non-residents and further sub-classified into the different sectors and institutional units defined as follows:
 - (a) *Residents* – This refers to individuals or institutional units that have a center of economic interest in the economic territory of the Philippines.
 - (a.1) Government
 - (i) *National Government* – This refers to the Philippine National Government and its agencies such as departments, bureaus, offices, and instrumentalities, but excluding local government units and government-owned and controlled corporations.
 - (ii) *Local Government Units (LGUs)* – This refers to the Philippine government units below the level of national government, such as city, provincial and municipal governments.
 - (iii) *Government-Owned and Controlled Corporations (GOCCs)* – This refers to any agency organized as a stock or non-stock corporation vested with functions relating to public needs whether governmental or proprietary in nature, and owned by the government directly or indirectly or through its instrumentalities either wholly, or where applicable as in the case of stock corporations to the extent of at least fifty-one percent (51%) of its capital stock: *Provided*, That GOCCs may be further categorized by the DBM, the Civil Service Commission and the COA for the purpose of the exercise and discharge of their respective powers, functions and responsibilities with respect to such corporations.
 - Social Security Institutions (SSIs) – This refers to the social security agencies such as the Employees Compensation Commission (ECC), Government Service Insurance System (GSIS), Philippine Health Insurance Corporation (PhilHealth) and Social Security System (SSS).
 - Other FIs – This refers to GOCCs that are primarily engaged in financial intermediation or in auxiliary financial activities that are closely related to financial intermediation but are not classified as banks such as the PGC.
 - Non-FIs – This refers to GOCCs that may not be classified as a social security institution nor other FIs.

¹ Provide Columns (in US\$ and Peso Equivalent) for foreign accounts, where applicable.

(a.2) Bangko Sentral

(a.3) Banks

- (i) *UBs/KBs* – This refers to UBs and KBs as defined under existing laws and regulations.
 - *Government Banks* – This refers to UBs/KBs owned or controlled by the national government such as the DBP, the LBP and the Al-Amanah Islamic Investment Bank of the Philippines.
 - *Non-Government Banks* – This refers to private UBs/KBs, which are neither owned nor controlled by the national government, including branches of foreign banks licensed as UBs/KBs operating in the Philippines.
- (ii) *Other Banks* – This refers to banks other than UBs/KBs i.e., TBs, RBs and Coop. Banks.

(a.4) Private Corporations

- (i) *Financial* - This refers to private corporations that are primarily engaged in financial intermediation or in auxiliary financial activities that are closely related to financial intermediation but are not classified as banks. This shall include among others, insurance corporations, pension funds that are constituted as separate from the units that have created them, NSSLAs and QBs. Except in the case of “Loans and Receivables – Interbank Loans and Receivables” where QBs shall be a separate line item.
 - (ii) *Non-Financial* – This refers to private corporations whose principal activity is the production of goods or non- financial services for sale.
- (b) *Non-Residents* – This refers to individuals or institutional units that have a center of economic interest outside the economic territory of the Philippines.

Central Government/Central Bank – *Central Government* refers to the central government of a foreign country which is regarded as such by a recognized banking supervisory authority in that country. *Central Bank* refers to the national FI (or institutions) that exercises control over key aspects of the financial system and carries out such activities as issuing currency, managing international reserves, and providing credit to other depository corporations.

Public Sector Entities – This refers to entities which are regarded as such by a recognized banking supervisory authority in the country in which they are incorporated.

Banks

- (i) *Off-Shore Banking Units (OBUs)* – This refers to a branch, subsidiary or affiliate of a foreign banking corporation which is duly authorized by the Bangko Sentral to transact offshore banking business in the Philippines.
- (ii) *Other Banks* – This refers to the non-resident banks other than OBUs.

Corporations – This refers to non- resident corporations.

- (c) *Multilateral Agencies* – This refers to the World Bank Group comprised of the IBRD and the IFC, ADB, AfDB, the EBRD, the IADB, the EIB, the NIB; the CDB, the CEDB and such others as may be recognized by the Bangko Sentral.
- (3) The supporting schedules in the FRP contain an Additional Information section which requires disclosure of information necessary for validating compliance with The supporting schedules in the FRP contain an Additional Information section which requires disclosure of information necessary for validating compliance with other Bangko Sentral requirements and for statistical purposes. Among the information required to be disclosed are the following:
- (a) Classification as to Original Term, which shall be reported only for solo reports

- (a.1) Short Term (1 year or less)
- (a.2) Medium Term (>1 year to 5 years)
- (a.3) Long Term (> 5 years)

(b) Geographic Regions of Non-Resident Counterparties

Advanced Economies – Australia; Austria; Belgium; Canada; Cyprus; Denmark; Finland; France; Germany; Greece; Hong Kong SAR; Iceland; Ireland; Israel; Italy; Japan; Korea; Luxembourg; Netherlands; New Zealand; Norway; Portugal; Singapore; Slovenia; Spain; Sweden; Switzerland; Taiwan Province of China; United Kingdom and United States

Regions Excluding Advanced Economies

(i) Africa – Algeria; Morocco; Tunisia and Sub-Sahara

Of which: Sub-Sahara – South Africa; Djibouti; Ethiopia; Sudan; Burundi; Congo, Democratic Republic of; Kenya; Rwanda; Tanzania; Uganda; Angola; Botswana; Comoros; Lesotho; Madagascar; Malawi; Mauritius; Mozambique, Republic of; Namibia; Seychelles; Swaziland; Zambia; Zimbabwe; Cape Verde; Gambia, The; Ghana; Guinea; Mauritania; Nigeria; Sao Tome and Principe; Sierra Leone; Benin; Burkina Faso; Cameroon; Central African Republic; Chad; Congo, Republic of; Cote d’Ivoire; Equatorial Guinea; Gabon; Guinea – Bissau; Mali; Niger; Senegal; and Togo.

(ii) Central and Eastern Europe – Albania; Bulgaria; Croatia; Czech Republic; Estonia; Hungary; Latvia; Lithuania; Macedonia, FYR; Malta; Poland; Romania; Slovak Republic and Turkey. Commonwealth of Independent States – Armenia; Azerbaijan; Belarus; Georgia; Kazakhstan; Kyrgyz Republic; Moldova; Mongolia; Russia; Tajikistan; Turkmenistan; Ukraine and Uzbekistan.

(iii) Developing Asia – Bangladesh; Bhutan; Cambodia; China; Fiji; India; Indonesia; Kiribati; Lao PDR; Malaysia; Maldives; Myanmar; Nepal; Pakistan; Papua New Guinea; Samoa; Solomon Islands; Sri Lanka; Thailand; Tonga; Vanuatu and Vietnam.

(iv) Middle East – Bahrain; Iran I.R.; Kuwait; Libya; Oman; Qatar; Saudi Arabia; United Arab Emirates; Yemen, Republic of; Egypt; Jordan; Lebanon and Syrian Arab Republic.

(v) Western Hemisphere – Mexico; Argentina; Brazil; Bolivia; Chile; Colombia; Ecuador; Paraguay; Peru; Uruguay; Venezuela; Costa Rica; El Salvador; Guatemala; Honduras; Nicaragua; Panama; Antigua and Barbuda; Bahamas, The; Barbados; Belize; Dominica; Dominican Republic; Grenada; Guyana; Haiti; Jamaica; St. Kitts and Nevis; St. Lucia; St. Vincent and the Grenadines; Suriname and Trinidad and Tobago.

Definition of the other items and instructions for filling-out the Additional Information section of each supporting schedule are presented in the Line Item Instructions.

(Circular No. 890 dated 02 November 2015)

**GUIDELINES ON THE PROHIBITION AGAINST THE USE OF FUNDS FROM
NON-RESIDENT SOURCES FOR PLACEMENTS IN THE BANGKO SENTRAL'S
TERM DEPOSIT FACILITY (TDF) AND OVERNIGHT DEPOSIT FACILITY (ODF),
AND BANGKO SENTRAL SECURITIES FACILITY (BSP-SF)**

*[Appendix to Sec. 601 (Prohibition against funds from non-residents
being accepted in the TDF, ODF, and BSP-SF)]*

The TDF, ODF, and BSP-SF are monetary policy instruments deployed by the Bangko Sentral for the purpose of managing domestic liquidity in the financial system. These facilities should not be made available for opportunistic investment activities funded from non-resident sources. Furthermore, placements in the TDF, the ODF, and BSP-SF are contractual in nature and thus, shall be governed by the intent of the contracting parties. In keeping with the nature of this facility, all eligible banks shall not place in the TDF, ODF, and BSP-SF (primary and secondary markets) funds obtained, directly or indirectly, from non-residents: *Provided*, That funds inwardly remitted by a foreign bank intended as capital of its branch or subsidiary in the Philippines shall be eligible for placement in the TDF, the ODF, and the BSP-SF (primary and secondary markets) of the Bangko Sentral.

An eligible bank is required to submit to the Bangko Sentral's Financial Market Operations Sub-Sector a notarized Letter of Undertaking (LOU) (Annex "A") committing it is qualified as a counterparty of the Bangko Sentral TDF, ODF and BSP-SF.

It is the responsibility of an eligible bank to have in place the appropriate internal policies and monitoring and assurance mechanisms consistent with its LOU.

The Bangko Sentral reserves the right to verify compliance with the above conditions. Whenever the Bangko Sentral has reason to believe that an eligible bank is unable or unwilling to comply with the terms and conditions for the access to the TDF, the ODF, and the BSP-SF, the Bangko Sentral may limit, suspend, or deny access by the subject bank to the TDF, the ODF and/or the BSP-SF.

The eligible bank shall report to the appropriate supervising department of the Bangko Sentral all existing TDF, ODF, and BSP-SF placements not consistent with these guidelines. Such placements shall not be renewed and shall be terminated upon maturity.

(Circular Nos. 1095 dated 8 September 2020, 995 dated 5 February 2018, 961 dated 02 June 2017, M-2016-016 dated 18 November 2016, and Circular No. 913 dated 02 June 2016)

GUIDELINES IN DETERMINING COMPLIANCE WITH CEILINGS ON EQUITY INVESTMENTS
(Appendix to Secs. 373, 374, 375, 376-A and 378)

The following are the guidelines in determining compliance with ceilings on equity investments prescribed under Sections 373, 374, 375, 376-A and 378, in view of the adoption of the PFRS/PAS:

- a. Components of equity investment. Equity securities booked under the Designated at Fair Value Through Profit or Loss (DFVPL), Available-For-Sale, Investment in Non-Marketable Equity Securities (INMES) and Equity Investments in Subsidiaries/Associates/Joint Ventures categories shall all be considered in computing for compliance with the ceilings on equity investments prescribed under Secs. 378 and 374: *Provided*, That Underwritten equity securities booked under the Available-For-Sale category shall be excluded from total equity investments for a period of ninety (90) calendar days from the date of issuance thereof: *Provided, further*, That upon prescription of the 90- calendar day period, such equity securities shall be booked according to intention and shall then be included in the computation of compliance with the prescribed ceilings.

For this purpose, the following financial instruments shall likewise be included in the computation of compliance with the prescribed ceilings:

- (1) Equity securities including those accounted for as debt instruments booked under the Held for Trading (HFT) category, which remain unsold for more than one (1) year.
 - (2) Mandatorily redeemable preferred shares and preferred shares of similar nature that are accounted for as debt instruments, which may also be booked under the HTM or Unquoted Debt Securities Classified as Loans (UDSCL) categories.
 - (3) Investments in Hybrid Tier 1 securities that are issued in the form of perpetual preferred shares.
- b. Shares of stock acquired in settlement of loans. Shares of stock of another corporation acquired in settlement of loans shall be excluded from total equity investments for purposes of determining compliance with the prescribed ceilings on equity investments under Secs. 373, 374, 375, 376-A and 378: *Provided*, That confirmation of the Monetary Board shall be required in the following cases within thirty (30) days from the date of acquisition thereof:
- (1) Acquisition of shares of stock of non-allied enterprises by banks without universal banking authority, otherwise prohibited in Section 376-A;
 - (2) Acquisition of shares of stock of non-allied enterprises other than those specified under Section 376-A by banks with universal banking authority, otherwise requiring prior Monetary Board approval;
 - (3) Acquisition of shares of stock of non-allied enterprises by UBs in excess of limits provided in Section 376-A;
 - (4) Acquisition of shares of stock of venture capital corporation in excess of limits provided in Sec. 374;
 - (5) Acquisition of shares of stock of financial allied enterprises by banks, in excess of limits provided in Sec. 373;
 - (6) Acquisition of shares of stock of non-financial allied enterprises by TBs and RBs in excess of limit provided in Sec. 375; and
 - (7) Acquisition of shares of stock in excess of limits provided in Sec. 378;

Provided, further, That said confirmation shall be subject, among others, to the condition that such shares of stock shall be disposed of within a reasonable period not to exceed five (5) years from the date of acquisition thereof.

- c. Basis of computation. Compliance with the prescribed ceilings on equity investments shall be determined at each time additional equity securities are acquired or shall be considered in the computation as in the case of prescription of the two (2) year period for underwritten equity securities or in the case of equity securities booked under the HFT category, which remain unsold for more than one (1) year. Further, this shall be computed using the carrying amount of the equity securities, which shall be the fair value (marked-to-market amount) for those investments booked under HFT, DFVPL and Available- For-Sale, amortized cost for those investments booked under HTM and UDSCL or the cost and adjusted cost for those booked under INMES and Equity Investment in Subsidiaries/Associates/Joint Ventures, respectively, net of Allowance for Credit Losses where applicable.

For this purpose, adjusted cost shall refer to the acquisition cost of Investments in Subsidiaries/Associates/Joint Ventures adjusted for the investor's share of the profit or loss of investee after the date of acquisition and other adjustments to the carrying amount of the investment.

- d. Transitory Provisions. Banks with acquired shares of stock in settlement of loans that fall under any of the following cases, which have not been previously confirmed by the Monetary Board, shall seek confirmation by the Monetary Board of such acquisition not later than ninety (90) banking days from 05 October 2007.

- (1) Those without universal banking authority with acquired shares of stocks of non-allied enterprises in settlement of loans prohibited in Sec. 376-A;
- (2) Those with universal banking authority with acquired shares of stock non- allied enterprises in settlement of loans other than those specified under Sec. 376-A;
- (3) Those with universal banking authority with acquired shares of stock of non-allied enterprises in settlement of loans that are in excess of limits prescribed in Sec. 376-A;
- (4) Those with acquired shares of stock of financial allied enterprises in settlement of loans that are in excess of limits provided in Sec. 373; and
- (5) TBs and RBs with acquired shares of stock of non-financial allied enterprises in settlement of loans that are in excess of limit provided in Sec. 375.

Provided, That said confirmation shall be subject, among others, to the condition that such shares of stock shall be disposed of within a reasonable period not to exceed five (5) years from 05 October 2007.

**GUIDELINES AND PROCEDURES GOVERNING CURRENCY DEPOSITS AND WITHDRAWALS OF BANKS FOR CREDIT
TO AND DEBIT FROM THEIR DEMAND DEPOSIT ACCOUNTS WITH THE BANGKO SENTRAL
(Appendix to Section 1111)**

The Bangko Sentral Cash Department (CD) and Regional Offices/Branches shall accept all types of currency notes (i.e., fit, unfit, mixed)/coins (i.e., fit, unfit) for deposit except mutilated currency notes/coins, which must be presented for determination of redemption/exchange value by the Currency Issue and Integrity Office (CIIO).

Banks are encouraged to arrange direct exchange of their accumulated excess new/fit currency notes/coins with other banks to optimize circulation of said notes/coins and to deposit only unfit currency to their DDAs with the Bangko Sentral.

To facilitate the expeditious receipt of banks' cash deposits and servicing of their cash withdrawals by the Bangko Sentral, all banks, including their provincial branches shall observe the following guidelines and procedures when making cash deposits and/or withdrawals with the Bangko Sentral CD or any of the Bangko Sentral Regional Offices/Branches:

- a. The operating hours for currency transactions are as follows:

Transactions	CD	Bangko Sentral Regional Offices and Branches
Deposit	8:00 AM-3:00 PM	9:00 AM-2:00 PM
Withdrawal	9:00 AM-4:00 PM	9:00 AM-12:00 PM

- b. The Bangko Sentral shall accept new/ fit, unfit and mixed banknote deposits (for CD only) only after conducting bundle and wrapper count. New/fit notes need not be verified piece-by-piece by the Bangko Sentral before the same shall be re-issued to service cash withdrawals of banks.
- c. Bank deposits of new/fit currency notes referred to in Item "b" above not withdrawn by the banks shall be scheduled for piece-by-piece verification by the Bangko Sentral.
- d. The Bangko Sentral may accept coin deposits in standard quantity per denomination in containers prescribed by the Bangko Sentral.

CURRENCY DEPOSITS

- e. Head Offices/Cash Centers of banks in Metro Manila or their designated cash centers/main branch in the provinces shall make direct deposits (on a cash basis) of currency notes and coins with the Bangko Sentral CD or the nearest Bangko Sentral Regional Office/Branch, respectively. The currency notes shall be duly classified as new/fit, unfit, or mixed in accordance with the "Currency Guide for Bank Tellers, Money Counters and Cash Custodian" prepared by the Bangko Sentral CD, and by denomination.
- f. In areas with no immediate access to the Bangko Sentral Regional Offices/ Branches, provincial branches of banks shall arrange with their respective Head Offices the shipment of their unfit notes/coins for deposit with the Bangko Sentral CD. Cost of shipment and other related expenses to be incurred shall solely be for the account of the bank concerned.
- g. Banks shall provide securely sealed transparent plastic bags prescribed by the Bangko Sentral for their deposits at the Bangko Sentral CD; separately for the new, fit, unfit and mixed notes. Each plastic bag shall have uniform quantity of twenty (20) bundles¹ of same series, denomination and classification with the following dimensions: Length - 45.67"; Width - 12.99"; and Height - 5.12". The deposit slip for each type/category of currency notes shall be clearly labeled as "NEW", "FIT", "UNFIT" or "MIXED" as the case maybe.

At the Bangko Sentral Regional Offices/Branches, banks shall deposit notes using securely sealed transparent plastic bags containing twenty (20) bundles¹ of one (1) or various denominations, stacked vertically.² Each plastic bag shall exclusively contain either fit or unfit notes, and shall have dimensions as follows: Length - 47"; Width - 12.50"; and Height -

¹ Each bundle of banknotes consists of 1,000 pieces, or ten (10) wrappers of 100 pieces of banknotes of same denomination per wrapper.

² The measure prescribing the use of transparent plastic bags for banknote deposits relative to the Bangko Sentral Regional Offices/Branches shall be effective the first banking day of January 2017.

5.25," or as may be specified by RMASS. Each plastic bag shall also have a deposit slip indicating the type/category of notes contained (i.e., "FIT" or "UNFIT").

A deposit slip for each type/category shall be prepared in advance (properly and accurately) by the bank representative to facilitate smooth flow of transactions and avoid errors in accomplishing the forms. Amount in words and in figures should be consistent and all details should be provided.

h. To facilitate handling of cash deposits, notes and coins shall be deposited in the following manner:

(1) Banknotes

(a) *Type of banknote deposits*- Banks can deposit banknotes to the Bangko Sentral, either through:

- (i) *Regular Deposits*- refer to deposits which do not bear any restriction as to volume and amount. These banknote deposits should be placed in the prescribed clear plastic bags, with each containing exactly twenty (20) bundles of banknotes; and
- (ii) *Over-the-Counter Deposits (for CD only)*- refer to deposits which range from a minimum of one (1) wrapper to a maximum of four (4) bundles.

(b) *Classifications of Banknote Deposits*- Deposits must be sorted by series and denomination, as follows:

- (i) *New/Fit Banknote Deposits* refer to:
 - (aa) Clean notes such that the prints are clear and the genuineness is obvious;
 - (ab) Notes without writing and/or heavy creases; and
 - (ac) Notes that can maintain their upright position when held at the mid- portion of one of the shorter borders.
- (ii) *Unfit Banknote Deposits* refer to banknotes that do not qualify as fit banknotes.
- (iii) *Mixed Banknote Deposits* (for CD only) refer to deposits which consist of combination of fit and unfit banknotes in a bundle or wrapper.

(c) For deposits at the Bangko Sentral CD, each standard currency bag shall contain currency notes amounting to:

Denomination	Value per Prescribed Bag
1000-Piso	₱ 20,000,000.00
500-Piso	10,000,000.00
200-Piso	4,000,000.00
100-Piso	2,000,000.00
50-Piso	1,000,000.00
20-Piso	400,000.00

However, the Bangko Sentral Regional Offices/Branches shall accept deposits in uniform quantity of twenty (20) bundles of one (1) or various denominations per plastic bag.

(d) *Wrapper strap*- The wrapper strap binding the 100 pieces of notes should be white in color and plainly marked with:

- (i) the denomination and amount of currency;
- (ii) the date of bank's verification;
- (iii) the printed name(s) and signature(s) of depositing bank's verifier; and
- (iv) the name of the depositing bank.

(e) Tags in each plastic bag, indicating the date of deposit, name of bank, classification, tag number, denomination, quantity, amount, name and signature of depositor/bank representative, and, name and signature of the Bangko Sentral accountable officer (for CD)/Teller (RMASS), shall be placed inside and

attached outside the plastic bag, using the following color coding:

- (i) *New/Fit Notes*- brown tag for CD; and white tag for Regional Offices/Branches.
- (ii) *Unfit Notes*- pink tag for CD; and blue tag for Regional Offices/Branches.
- (iii) *Mixed Notes*- green tag for CD.

- (f) Pins, clips, staple wires, and stickers/ adhesive residue, if any, must be removed prior to deposit.

(2) Coins

- (a) *Type of coin deposits*- Banks may deposit coins to the Bangko Sentral through:

- (i) *Regular Deposits* - refer to coin deposits that are in multiples of fifty (50) bags¹ per denomination for CD, while for RMASS, twenty (20) bags of one (1) or various denominations and by classification (fit or unfit) and placed in the prescribed bag².
- (ii) *Over-the-counter Deposits (CD only)* - refers to deposits which range from a minimum of one (1) bag to a maximum of four (4) bags.

- (b) Coin deposits shall be sorted into fit and unfit with the latter defined in Section 1111. Coin deposits shall be free from adhesive tapes, and shall not be inserted with foreign coins, token coins or other objects.

- (c) Individual bags shall contain standard number of pieces and amount per denomination as follows:

Denomination	Color of Tags (Cash Department)	Color of Tags (Bangko Sentral Regional Offices and Branches)	Quantity (pieces)	Value	Approximate Weight per bag (in Kgs)
10-Piso	green	green	1,200	P12,000.00	10.44
5-Piso	pink	green	1,500	7,500.00	11.55
1-Piso	brown	green	2,000	2,000.00	12.20
25-Sentimo	brown	green	3,000	750.00	11.40
10-Sentimo	brown	green	4,500	450.00	11.25
5-Sentimo	brown	green	5,000	250.00	9.50
1-Sentimo	brown	green	5,000	50.00	10.00

- (d) For CD, the tag in each coin bag, indicating the date of deposit, name of bank, classification, tag number, denomination, quantity, amount, name and signature of depositor/bank representative, and name and signature of the Bangko Sentral accountable officer, shall be placed inside and another tag attached outside the coin bag.

For the Bangko Sentral Regional Offices and Branches, a tag shall be placed inside, and another tag attached outside each bag. The tags shall contain the date of deposit, name of the bank, classification denomination, quantity, and amount/value of notes deposited. A separate deposit tag (format prescribed by the Bangko Sentral) shall be prepared for every deposit of twenty (20) coin bags of one (1) or various denominations. The deposit tag shall contain the name of the bank, date of deposit, tag number, denomination, quantity, amount of coins deposited, name and signature of bank representative.

- i. Upon delivery of the currency notes/coins to the Bangko Sentral CD/Regional Office/Branch, the representative of the depositing bank shall witness the bundle and wrapper count for notes and bag count for coins made by the Bangko Sentral CD accountable officer and the Bangko Sentral Regional Office/Branch teller. If found in order, the said Bangko Sentral officer/teller shall acknowledge receipt of the currency note/coin deposits.
- j. Deposits of currency notes at the Bangko Sentral CD and/or Regional Offices/Branches need not be taken out of the container since contents are seen and can be counted through the transparent plastic bag.

¹ Each bag shall contain coins of the same denomination.

² The measure prescribing the twenty (20) bag-limit per tag number for coin deposits relative to the Bangko Sentral Regional Offices/Branches shall be effective the first banking day of January 2017.

- k. The CD/Regional Offices/Branches of the Bangko Sentral may refuse acceptance of deposits that do not conform to the foregoing guidelines and procedures, such as, but not limited to, the following:

(1) Banknotes:

- (a) Shortage or overage in bundle and/or wrapper count;
- (b) Misclassification and insertion of other denomination/s and series;
- (c) Discrepancies in denomination and/or amount against the Deposit Tags and/or Cash Deposit Slip;
- (d) Worn-out, damaged, tampered and/or unsealed transparent plastic bag; and
- (e) Arrival of bank representatives and armored vehicles beyond the designated time.

(2) Coins:

- (a) Coin bags for deposit contain dust/flour/residue;
- (b) Discrepancy in the number of bags against the deposit tag and/or cash deposit slip; and
- (c) Arrival of bank representatives and armored vehicles beyond the designated time.

CURRENCY WITHDRAWALS

- l. The Cash Department (CD) and the Bangko Sentral Regional Offices/Branches shall service cash withdrawals of banks from unverified fit currency deposits and/or from verified fit/new currency in stock. In case of withdrawals using unverified fit currency deposits (that are still sealed), any discrepancy found during verification shall be for the account of the depositing bank.
- m. Only the authorized representative of the depositor-bank may open the sealed bag(s) of unverified fit note deposits, from which the Bangko Sentral shall service the cash withdrawal of another bank. It is understood that said representative, who upon at least one (1) day notice, shall make himself available to service the withdrawals of another bank, whenever assigned to the Bangko Sentral CD/Regional Office/Branch to effect cash withdrawals.
- n. The manner of withdrawal shall be as follows:

- (1) At CD, cash withdrawals of banks shall be effected using the Electronic Cash Withdrawal System. On Day 1, Cash Order Slip (COS) shall be sent by banks through fax to CD not later than 12:00 noon. COS shall be accurately prepared and submitted without alterations/ erasures. If there are corrections to the detail/s in the COS, at least one of the two (2) signatories to the COS shall validate the correction/s on Day 2.

On Day 2, cash withdrawal shall be settled through PhilPaSS and bank representatives shall present to CD the original and authenticated COS with their final order.

For banknotes, banks may opt to withdraw these in bundles/boxes (new or fit notes) and/or in cassette-ready form (consisting of two (2) bundles or 2,000 pieces reissued banknotes; for CD only).

At the Bangko Sentral CD, emergency withdrawals may be allowed but not to exceed two (2) times a week.

- (2) At the Bangko Sentral Regional Offices/Branches, cash withdrawal shall be made using the electronic cash transaction system of RMASS [e.g., Integrated Regional Information System (IRIS)]. Banks shall transmit their withdrawal transactions via the system not later than 4:00 pm, one (1) business day prior to the date of actual withdrawal³. On the day of the withdrawal, required documents (such as Authority to Debit, the Bangko Sentral demand deposit check/s, and Authority to Withdraw) shall be presented by the bank not later than 12:00 noon. Otherwise, the withdrawal shall no longer be processed.

Cash withdrawals that were not transmitted within the prescribed period shall only be considered on a case-to-case basis, upon formal written request/explanation from the bank, at the discretion of the Bangko Sentral Regional Office or Branch Head.

³ The requirement for banks to submit their withdrawal transactions thru the electronic cash transaction system of RMASS (e.g., IRIS) not later than 4:00 p.m., one (1) business day prior to the date of actual withdrawal shall be effective the first banking day of January 2017.

(3) Bank Representatives

- (a) Bank representatives must wear the prescribed uniform, i.e., pocketless pants (for both CD and RMASS); and T-shirt with the bank's logo and name printed at the back (for CD only).
 - (b) Personal belongings, including cell phones, are not allowed in the loading bay area.
- o. The authorized representative of the withdrawing bank shall conduct box/bag/bundle/wrapper count of the notes, and bag/box count of the coins withdrawn from the new/verified fit/unverified fit currency note/coin deposits witnessed by authorized representative of the Bangko Sentral. Additionally, for withdrawals of unverified fit notes and coins, the representative of the bank from whose deposits the unverified notes/coins are withdrawn shall witness the count.

(Circular No. 931 dated 09 December 2016)

**APPRAISAL AND LOAN VALUATION FRAMEWORK FOR
RIGHTS-BASED SECURE TENURE ARRANGEMENTS AS COLLATERAL SUBSTITUTES
(Appendix to Sec. 314 on Housing Microfinance Loans)**

In the appraisal of real properties or rights offered as collateral substitutes under the housing microfinance program, the form of the secure tenure instrument must be considered. Generally, two (2) appraisal methodologies or approaches may be applied: the market value must be determined using the market data or sales comparison approach for properties under freehold and right to occupy and/or build (in respect of the housing unit or improvement to be used as collateral substitute), and for properties under Lease agreement and usufruct, the value of the Leasehold interest of the borrower must be determined.

I. Market value

Market value is the most probable price that a property should obtain in a competitive and open market under all conditions requisite of a fair sale, with the buyer and seller each acting prudently and knowledgeably, and assuming that the price is not affected by undue stimulus. In determining the market value of the property, the appraiser must use the Market Data or Sales Comparison approach. This approach attempts to compare the subject property's value with similar properties and adjust its value according to the presence or absence of value determining characteristics. This approach is based upon the principles of supply and demand and upon the principle of substitution.

II. Valuation of leasehold

A leasehold is the real right of the lessee acquired from an owner (the lessor) of a piece of real estate to occupy and use it for a fixed term or period at a stipulated rental rate, and subject to conditions set forth in a written document of lease. The lease may include the right of the lessee to improve the land, mortgage the building, sublet all or part of the property, and assign or sell his leasehold.

The task of the appraiser is to estimate the present worth or "market value" of the imputed rental income of the lessee derived from the property over and above the rent required to be paid by him to the lessor under the terms of the lease and his interest in any improvements made by him. In evaluating a leasehold, the appraiser must have a thorough knowledge of all the salient terms and conditions of the primary or main lease and any subleases, for these affect the value of the leasehold considerably, such as:

- a. Rental. If the rental to be paid under the terms of the lease is below the rental prevailing in the market, the leasehold may have a substantial value. Where the rental actually paid is the prevailing rental value of the property, the leasehold may have no value. Prevailing rental rates refer to the rental rates of comparable properties within comparable locations.
- b. Term of Lease. A long-term lease or the right of the lessee to renew the lease at the expiration of the original term of the lease may add value to the leasehold.
- c. Payment for Improvement
- d. Option to Purchase
- e. Leasehold Restrictions

III. Loan Valuation Based on Appraisal Valuation Framework or Methodology

The valuation of properties under the housing microfinance loan program will be based on prevailing market values of real estate properties (freehold and right to occupy and/or build) or prevailing rental rates (leasehold/usufruct). The standard practice of participating banks in determining the loan to collateral ratios shall be adopted. The following terms provided in the table below may be applied:

FORM OF SECURE TENURE OR PROPERTY RIGHT	NATURE AND DESCRIPTION OF ACCEPTABLE INSTRUMENT	TERMS AND CONDITIONS	APPRAISAL METHODOLOGY	LOAN VALUATION
Usufruct	<i>Usufruct agreement or contract</i> – Duly executed contract executed by the owner of the property granting the usufructuary/beneficiary/ client the right to use, possess, and enjoy the real property including its fruits and other rights or benefits	The Term of Lease must not be less than the term of the loan.	Valuation of Leasehold Interest	70% of the appraised value of the collateral
Lease	<i>Lease agreement or contract</i> – Duly executed contract granting the lessee the right to use and possess the real property for a fixed long-term period in consideration of rental payments	The Term of Lease must not be less than the term of the loan	Valuation of Leasehold Interest	70% of the appraised value of the collateral
Freehold	<i>OCT/TCT</i> – Torrens title issued by the Register of Deeds evidencing absolute ownership of real property <i>Interim Title, Contract to Sell or Conditional Sale</i> – Duly executed contract or other legal instrument issued by the appropriate government agency indicating full payment for the purchase of the property or its conditional sale or conveyance to be perfected upon full payment of the purchase price and/or the fulfillment of other conditions	Adjustment of appraisal value due to documentary nature or status of instrument must be taken into account	Market Data Approach	90% of the appraised value of the collateral
Right to occupy and/or build	(1) Certification validly issued by the appropriate government agency stating that the borrower/client has the right to occupy, build and/or acquire the property he/ she is possessing being an eligible beneficiary of a public or private social housing program or a Presidential proclamation, or (2) certification or written acknowledgment from the owner of the property that the borrower/client has the owner's consent and permission to occupy and build on such property	Adjustment of appraisal value due to documentary nature or status of instrument must be taken into account	Market Data Approach (as to the improvement or housing unit)	70% of the appraised value of the collateral

**BASIC STANDARDS IN THE ADMINISTRATION OF TRUST,
OTHER FIDUCIARY AND INVESTMENT MANAGEMENT ACCOUNTS
(Appendix to Sec. 401)**

I. Introduction

Trust and other fiduciary business and investment management activities have evolved with the changes in the financial market and advancement in technology. These innovations have allowed trust entities to expand the scope of trust products and services offered to customers, thus increasing their exposure to various risks. As trust entities grow more diverse, necessarily policies and procedures as well as risk management practices must keep pace. The basic standards would provide common processes for an efficient operation and administration of trust, other fiduciary and investment management activities across the trust industry.

II. Statement of policy

It is the policy of the Bangko Sentral to provide adequate level of protection to investors who, under a fiduciary arrangement, engage the services or avail of products of trust entities which are required to observe prudence in the exercise of their fiduciary responsibility. Along this line, the Bangko Sentral prescribes basic standards for the efficient administration and operation of trust and other fiduciary business and investment management activities.

III. Standards

The basic standards in the administration of trust, other fiduciary and investment management accounts are meant to address the significant areas of operations and provide minimum set of requirements and procedures:

A. Account acceptance and review processes

1. Pre-acceptance account review

This review must document that the trust entity can effectively administer the account. It shall be covered by a written policy which shall contain, among other things, the types of trust, other fiduciary and investment management accounts that are desirable and consistent with the trust entity's risk strategies and the specific conditions for accepting new accounts, and approved by the Trust Committee, or the Trust Officer, or subordinate officer of the trust department, authorized by the board of directors or its functional oversight equivalent, in the case of foreign banks and institutions.

The review process entails the thorough and complete review of the client's/account's characteristics and investment profile, including the assets/ properties to be contributed/delivered. Non-financial/non-traditional assets (i.e., real estate and the like) which are more likely to be illiquid shall be carefully reviewed prior to acceptance to ensure that the trust entity only accepts accounts which hold assets it may be able to properly manage.

Prior to the acceptance of a fiduciary account, the trust entity shall review the underlying instrument (trust agreement or contract) for potential conflicts of interest. If such conflict exists, the trust entity shall take appropriate action to address such condition before the account is accepted.

In cases where the trust entity is chosen as a successor trustee or investment manager, the trust entity shall perform a review and evaluation of all assets to be delivered to the trust entity to determine how these would serve the client's objectives, whether the trust entity can properly handle such assets and to assess any possible issue/problem which may arise with respect to such assets before acceptance of such assets and/or assumption of the trust, fiduciary or investment management relationship.

2. Establishment and post-acceptance review

Acceptance policies for new accounts shall, at a minimum, include the following processes and/or requirements:

- a. *Account opening process*¹. This process defines the trust entity's policies and procedures for client/account identification, consistent with the trust entity's KYC policy for compliance with anti-money laundering regulations; identification of the needs of the client; the objective(s) of the

¹ Trust entities (TE) shall be given six (6) months from 01 August 2017 to make appropriate changes in their policies, processes, and procedures in order to comply with the above requirements.

engagement; the vehicle to be used; and the account's investment parameters. The trust officer or other authorized personnel of the trust department shall conduct the account opening process for trust, fiduciary and investment management accounts. In the case of UITFs, only authorized branch managers/officers as well as UIT marketing personnel, who have all successfully undergone the required certification/accreditation/licensing process, may perform said process for UITF clients. The account opening process shall at least involve the following:

- (1) As a general rule, client profiling shall be performed for all UITF and regular trust, other fiduciary and investment management accounts via a duly acknowledged Client Suitability Assessment (CSA), which aims to provide the trust entity with information leading to the prudent design of investment packages, suited to a particular client or investment account. The CSA, however, shall not be required for the following trust and other fiduciary accounts:
 - (a) court trust;
 - (b) legislated and quasi-judicial trust;
 - (c) trust under indenture;
 - (d) facility/loan agency;
 - (e) transfer agency;
 - (f) depository and reorganization;
 - (g) escrow;
 - (h) custodianship;
 - (i) safekeeping; and
 - (j) institutional trust – pre-need plans.

The profiling process, to be documented through a CSA Form signed by the concerned parties, shall be undertaken on a per client basis, which shall emphasize the level of risk tolerance of the client.

(i) CSA

The trust entity shall obtain adequate information from the client to determine the appropriateness of the fiduciary product/ service to be provided and ensure the suitability of the investment product/ portfolio/strategy to be recommended to each client. It shall provide prospective clients with client suitability questionnaire and require them to accomplish the same prior to the acceptance of the account and execution of a transaction.

For this purpose, the trust entity shall make an assessment of the client's level of financial sophistication and consider factors relevant to the creation and management of, or participation in, an investment portfolio, such as but not limited to, the specific needs and unique circumstances of the client and/or beneficiary/(ies), basic characteristics of the clients' investment and experience, financial constraints, risk tolerance, tax considerations and regulatory requirements.

The same CSA process shall be applied by the trust entity for directional accounts.

(ii) Minimum information required for CSA¹:

- (aa) Personal/Institutional data. Minimum personal/institutional information that are unique to a natural or juridical client, which shall also cover demographics and KYC information; the identity of beneficiaries, where applicable, and approximate portion of total assets administered/managed.
- (bb) Investment objective. A clear statement or definition of the client's investment goals/purposes to be achieved through a particular trust, fiduciary or investment product or service. The client may opt to open several accounts, each one (1) with specific investment objectives separate and distinct from the other accounts.

¹ TEs may already invest their existing money market UITFs for conservative clients in securities issued by the National Government: *Provided*, That the amended plan rules have been approved by the TE's board of directors, and that existing participants in the said money market UITFs shall be immediately notified and shall be allowed to withdraw their participations within reasonable time prior to such investment but in no case less than ten (10) banking days from notification.

The Bangko Sentral shall be notified of the amendments to the Plan Rules within thirty (30) banking days from approval of the amendments by the board of directors of the TE. The notice and the amendment to the Plan Rules shall be considered as "Category A-3" reports.

- (cc) Investment experience. A list of various types of investment the prospective client is familiar with, acquired from actual/personal investment experience, or of similar investment circumstances.
- (dd) Knowledge and financial situation. For complex transactions where the level of risk involved is greater, the trust entity must take into account the knowledge, experience and financial situation of the client or potential client to assess the level of investment sophistication. This may include the careful assessment whether the specific type of financial instrument/service/ portfolio/strategy is in line with the client's disclosed financial capacity. Such assessment is necessary as there are significant risks involved on financial investments (e.g., derivatives), the type of transaction (e.g., sale of options), the characteristics of the order (e.g., size or price specifications) or the frequency of the trading.
- (ee) Investment time frame and liquidity requirement. The trust entity is able to organize the portfolio in a manner that will provide for anticipated liquidity requirement through redemption of principal contribution or earnings.
- (ff) Risk tolerance. Allow the trust entity to classify clients in accordance with its own pre-set internal risk classification.

Based on the results of the CSA, classification of clients by the TE may include, but need not be limited to the following:

- i. *Conservative.* Client wants an investment strategy where the primary goal is to prevent the loss of principal, and where the client prefers investment grade and highly liquid assets, government securities, Republic of the Philippines' bonds (ROPs), deposits with local banks/branches of foreign banks operating in the Philippines, and/or deposits with financial institutions in any foreign country: *Provided*, That said financial institution has at least an investment grade credit rating from a reputable international credit rating agency. For purposes of investing in a UITFs, a client wants an investment strategy where the primary objective is to prevent the loss of principal and where the fund is invested in securities issued by the National Government and/or deposits with local banks/branches of foreign banks operating in the Philippines and/or with financial institutions in any foreign country: *Provided*, That said financial institution has at least an investment grade credit rating from a reputable international credit rating agency.
 - ii. *Moderate.* Client wants a portfolio which may provide potential returns on investment that are higher than the regular traditional deposit products and client is aware that a higher return is accompanied by a higher level of risk. Client is willing to expose the funds to a certain level of risks in consideration for higher returns.
 - iii. *Aggressive.* Client wants a portfolio which may provide appreciation of capital over time and client is willing to accept higher risks involving volatility of returns and even possible loss of investment in return for potential higher long-term results.
- (iii) Investment policy statement

Trust entity managing discretionary accounts shall have in place a method by which suitability of investment is determined based on the results of the CSA and formulated via an Investment Policy Statement (IPS). It shall communicate to prospective clients the results of the assessment, recommend the investment product/portfolio/strategy, and explain the reasons why, on the basis of the given information, its recommendation is to the best interest of the client as of a defined timeframe. The trust entity shall make a recommendation only after having reasonably determined that the proposed investment is suitable to the client's and/or beneficiary's risk profile/tolerance, financial situation, investment experience, and Investment objectives.

The IPS is a clear reference frame for investment decisions and must be based on the investment objectives and risk tolerance of the client. It must include, at a minimum, a description of the following:

- (aa) Client's risk tolerance;
- (bb) Investment and/or return objectives;
- (cc) Liquidity requirements;

- (dd) Investment horizon;
- (ee) Investment strategy and rebalancing;
- (ff) Portfolio construction process, including asset allocation and security selection criteria;
- (gg) Investment restrictions - identifying any limitation which the client may have for the portfolio such as, but not limited to, single/group exposure limits, investment restrictions (e.g., prohibited investments), and client's consent for taking losses; and
- (hh) Investment performance review- indicating proposed market benchmarks and the desired frequency of the performance review reporting.

A trust entity shall review the IPS of each client, offer suggestions on clarifying any necessary changes in the IPS, and discuss with the client various techniques and strategies to be used to meet the client's investment goals. A trust entity shall have a mechanism in place to ensure that this review is done periodically and that only appropriate investments and investment strategies are included in a client's portfolio and are aligned with the IPS.

For UITF, the IPS is equivalent to the investment objective of the fund specifically stated in the Declaration of Trust.

(iv) Option of client to re-classification

Generally, the trust entity shall recommend the investment product/ portfolio/strategy suitable to the client based on the results of the CSA. The trust entity may, however, provide a process for allowing clients to invest in investment products/ portfolio/strategy with a higher risk than those corresponding to the CSA profile results. A client who exercises the option to be re-classified outside the CSA process thereby waives some of the protection afforded by these guidelines. Such re-classification may be allowed subject to the observance of the following:

- (aa) The client shall state in writing to the trust entity that –
 - He does not agree with or accept the recommendation of the trust entity on the investment product/portfolio/strategy appropriate to the client's profile based on the results of the CSA;
 - He would like to avail of the investment product/portfolio/strategy other than that which is consistent with the results of the CSA;
 - He requests/intends to be re-classified, either generally or in respect to a particular investment/service/ transaction/product; and
 - He fully understands and is willing to take the risks incidental to the investment product/portfolio/strategy to be availed of.
- (bb) The trust entity shall issue a clear written warning to the client of the protections he may lose and conversely, of the risks that he is exposed to.
- (cc) The trust entity shall have taken all reasonable steps to ensure that the client meets all relevant requirements as provided for in the trust entity's written policies.

For non-discretionary accounts, the trust entity shall observe the above requirements for every transaction allowing clients to invest in products/portfolio/strategy with a higher risk than those corresponding to their CSA profile results.

(v) Frequency of CSA and IPS

- (aa) The CSA shall be performed and the IPS shall be formulated and executed prior to the opening of the account;
- (bb) The trust entity shall update the CSA and the IPS at least every three (3) years except in the following instances:

- Whenever updates are necessitated by the client, upon notice/advise to the trust entity, on account of a change in personal/financial circumstances or preferences, the trust entity shall adjust/modify its investment strategy/portfolio and recommendation, subject to the conformity of the client;
 - Whenever managed trust, other fiduciary, and investment management accounts express intention to invest in complex investment products such as financial derivatives, the entity shall ensure that the CSA and the IPS are updated at least annually. Otherwise, the trust entity shall not make new/additional investments in complex investment products;
- (cc) The trust entity shall ensure that periodic written notices given to clients reminding them of such updates are received/acknowledged by clients or their authorized representatives;
- (dd) Updated CSA and IPS shall be acknowledged by the client;
- (ee) The frequency of review shall be included as a provision in the written agreement; and
- (ff) The latest CSA and IPS will continue to be applied for any subsequent principal contributions to the account, until these are amended or updated by the client.
- (2) Identification of degree of discretion granted by client to the trust entity. This process involves the determination of the extent of discretion granted to the trust entity to manage the client's portfolio.
- (a) Discretionary. The trust entity has authority or discretion to invest the funds/ property of the client in accordance with the parameters set forth by the client; and
- (b) Non-discretionary. Investment activity of the trust entity is directed by the client or limited only to specific securities or properties and expressly stipulated in the agreement or upon written instruction of the client.
- (3) Documentation. The trust, fiduciary or investment management relationship shall be formally established through a written legal document, such as the trust or investment management agreement. The engagement documents shall clearly specify the extent of fiduciary assignments/ responsibilities of the trust entity and articulate the nature and limits of each party's status as trustor/principal or trustee/ agent. Policies and procedures shall provide that trust or investment management agreements are signed by the trust officer, or subordinate officer of the trust department, or in the case of UITF, branch managers/officers duly authorized by the board of directors.

The documentation process must also consider the following:

- (a) The Agreement must conform to the requirements provided under Sec. 413 (*Minimum documentary requirements*) for trust and other fiduciary accounts and Sec. 415 (*Minimum documentary requirements*) for investment management accounts. In addition, the Agreement shall contain the following provisions:
- A description of the services to be provided;
 - All charges relating to the services or instruments envisaged and how the charges are calculated;
 - The obligations of the client with respect to the transactions envisaged, in particular his financial commitments towards the trust entity; and
 - For engagements involving management of assets or properties, the degree of discretion granted to the trustee or agent must be clearly defined and stated in the agreement;
- (b) The Agreement shall be in plain language understandable by the client and/ or personnel of the trust entity responsible for explaining the contents of the agreement to the client.
- (c) For complex investment products, such as financial derivatives instruments or those that use synthetic investment vehicles, the trust entity shall disclose to the client and require client's prior written conformity to the following:
- Key features of investment services and financial instruments envisaged, according to the nature of such instruments and services;

- The type(s) of instruments and transactions envisaged;
 - The obligations of the trust entity with respect to the transactions envisaged, in particular, its reporting and notice obligations to the clients; and
 - An appropriate disclosure bringing to the client's attention the risks involved in the transactions envisaged.
- (d) In order to give a fair and adequate description of the investment service or financial instrument, the trust entity shall provide a clearly stated and easily understood Risk Disclosure Statement to its clients, which forms part of or attached to the trust, fiduciary or investment management agreement. The Risk Disclosure Statement shall contain, among other things, the following provisions:
- Cautionary statement on the general risks of investing or associated with financial instruments, i.e., if the market is not good, an investor may not be able to get back his principal or original investment. Such statement must be given due prominence, and not to be concealed or masked in any way by the wording, design or format of the information provided;
 - If the investment outlet is exposed to any major or specific risks, a description and explanation of such risks shall be clearly stated; and
 - Advisory statement that for complex investment products, said instruments can be subject to sudden and sharp falls in value such that the client may lose its/his entire investment, and, whenever applicable, be obligated to provide extra funding in case it/he is required to pay more later.

Additional risk disclosures may be provided as appropriate.

The trust entity must ensure that the trust, fiduciary and investment management agreements and documents have been reviewed and found to be legally in order.

B. *Account administration*

It is the fundamental duty of a fiduciary to administer an account solely in the interest of clients. The duty of loyalty is a paramount importance and underlies the entire administration of trust, other fiduciary and investment management accounts. A successful administration will meet the needs of both clients and beneficiaries in a safe and productive manner.

Account administration basically involves three (3) processes, namely; (1) periodic review of existing accounts, (2) credit process and (3) investment process.

1. Periodic review of existing accounts

The board of directors and Trust Committee shall formulate and implement a policy to ensure that a comprehensive review of trust, fiduciary and investment management accounts (including collective investment schemes such as UITFs) shall be conducted. The periodic review of managed accounts shall be aligned with the provisions on the review and updating of the CSA and IPS. The board of directors may delegate the conduct of account review to the Trust Officer or Trust Department Committee created for that purpose. The policy shall likewise indicate the scope of the account review depending upon the nature and types of trust, fiduciary and investment management accounts managed.

A comprehensive accounts review, which shall entail an administrative as well as investments review, shall be performed on a periodic basis to ascertain that the account is being managed in accordance with the instrument creating the trust and other fiduciary relationship. The administrative review of an account is taken to determine whether the portfolio/assets are appropriate, individually and collectively, for the account, while an investment review is used to analyze the investment performance of an account and re-affirm or modify the pertinent investment policy statement, including asset allocation guidelines. Whether the administrative and investment review are performed separately or simultaneously, the reviewing authority shall be able to determine if certain portfolio/ assets are no longer appropriate for the account, (i.e., not consistent with the requirements of the client) and to take proper action through prudent investment practices to change the structure or composition of the assets.

The periodic review process also involves disclosure of information on the investment portfolio and the relevant investing activities. Regardless of the degree of discretion granted by the client to the trust entity, the former assumes full risk on the investment and related activities, and counterparties. Relevant changes in the trust entity's organization or investment policies that may affect the client's decision to continue the services of the trust entity shall be disclosed to the client. In the case of non-discretionary public interest accounts such as employee benefit/ retirement or pension funds, due diligence review of the investment portfolio by the trust entity shall include providing investors with appropriate information needed to make an informed investment decision and avoid possible conflict of interest and self-dealing situations.

The trust entity should be able to show (in addition to the specific written directive from the client) what it has done in the exercise of due diligence and prudence on its part to protect the interest of the client and/or beneficiaries, especially for accounts of public interest like retirement/pension fund accounts.

The trust entity shall keep its clients informed of the investment and related activities by rendering periodic reports and financial statements prescribed under Sec. 435 and as necessary. The types of reports and statements and the frequency of their submission must be clearly specified in the trust entity's written policies and procedures.

The trust entity shall also establish a system that enables a trust account representative or officer to periodically contact clients and/or beneficiaries to determine whether their financial objectives and circumstances have changed.

2. *Credit process*

Each trust entity shall define its credit process in relation to the discharge of the trust entity's investment function. The process ensures credit worthiness of investment undertakings including dealings and relationship with counterparties. It also serves to institutionalize the independence of the credit process of the trust entity. The credit process must at least cover the following:

- (a) *Credit policies.* Trust entities must clearly define its credit policies and processes, including the use of internal and external credit rating and approval process relative to the delivery of its instrument function. The trust entity can share credit information with the bank proper subject to proper delineation and documentation. The credit process shall show the following at the minimum:
 - i. Clear credit process flow, from initiation of the lending activities envisioned by the trust entity up to the execution of actual investment;
 - ii. Credit criteria and rating used;
 - iii. Manner by which the trust entity handles the information, including confidential and material data, which is shared between and among the departments, subsidiaries or affiliates of the trust entity; and
 - iv. Clear delineation of duties and responsibilities of each of the departments, subsidiaries and affiliates of the trust entity, where such groups or entities share the credit process.
- (b) *Counterparty accreditation process.* The trust entity must clearly define the policies and the processes it will undertake to accredit counterparties, including the bank proper, and its subsidiaries and affiliates, for their investment trading functions. It may use or avail itself of the accreditation process of its bank proper provided there is proper delineation of functions. The counterparty accreditation process shall show the following at the minimum:
 - i. Clear accreditation process flow from the initiation of credit activities up to the actual usage of lines;
 - ii. Credit criteria and rating used;
 - iii. Manner by which the trust entity handles the information, including confidential and material data, which are shared between and among the departments, subsidiaries or affiliates of the trust entity;
 - iv. Usage, duties and responsibilities of each of the department, subsidiaries and affiliates of the trust entity, where there is sharing of credit lines between and among these concerned groups/entities; and
 - v. Clear delineation of duties and responsibilities of each of the departments, subsidiaries and affiliates of the trust entity, where such groups or entities share the accreditation credit process.

3. *Investment process*

This process defines the investment policies and procedures, including decision-making processes, undertaken by the trust entity in the execution of its fund/asset management function. The primary objective of such process is to create a structure that will assure trust entities observe prudence in investment activities at all levels, preservation of capital, diversification, a reasonable level of risk as well as

undivided loyalty to each client and adherence to established structure for the trust entity's investment undertakings. The investment process covers a broad range of activities; thus, the investment policies shall clearly outline the parameters that, at a minimum, include the following:

- (a) *Overall investment philosophy, standards and practices.* A general statement of principles that guides the portfolio manager in the management of investments outlined in the board-approved policy, along with a discussion on the practices and standards to be implemented to achieve the desired result.
- (b) *Investment Policies and Processes.* Defines the policies and the processes undertaken to create the portfolio to ensure the proper understanding of the client's preferences.
 - i. Profiling of client. Aims to understand the level of maturity of the client relevant to the creation of an appropriate portfolio.
 - ii. Portfolio construction for custom- made portfolios. Includes the process of researching and selecting recommended portfolio and setting objectives or strategies for diversification by types and classes of securities into general and specialized portfolios.
 - Asset allocation. Outlines the process and criteria for selecting and evaluating different asset classes identified to be appropriate for the client's profile and investment objective. It includes the allocation of desired tenors in conjunction with the client or portfolio profile based on the CSA or IPS. The asset allocation may be based on percentage to total funds managed by the trust entity or stated in absolute amount whichever is preferred by the client.
 - Security selection. Policies and procedures on the selection of investment outlets, including investment advisory, must be in place. This involves the selection of issuers for each of the identified asset classes. The process provides for the review of investment performance using risk parameters and comparison to appropriate benchmarks. It shall also identify the documentation required for all investment decisions.

If the trust entity uses approved lists of investments, there shall be an outline of the criteria for the selection and monitoring of such investments, as well as a description of the overall process for addition to and deletion from the lists.

- Benchmark selection/creation. Selects or crafts the benchmarks to reflect the desired return of the portfolio and to measure the performance of the portfolio manager. The trust entity shall be required to measure performance based on benchmarks to gauge or measure the performance of the account. The trust entity must have clear definition of its benchmarking policy.
- Limits. Identifies any limitations on portfolio management which the client may impose on the trust entity. These limitations have to be specific as to the nature of the portfolio, such as but not limited to, core holdings, investment in competitor companies, and companies engaged in vices.
- Risk disclosure statement. A clear and appropriately worded statement/s to disclose different risks to clients of the various investment undertakings of the investment manager done in behalf of the client.
- iii. Internal policies on trade allocation. Defines the institution's policies in ensuring timely, fair and equitable allocation of investments across investing portfolios.
- iv. Diversification of discretionary investments. The trust entity shall have a policy on the general diversification requirements for asset administration, as well as the process implemented to monitor and control deviations from policy guidelines.
- v. A trust entity shall have access to timely and competent economic analyses and forecasts for the capital markets and other products in which its clients will be investing. Trust entities engaged in more complex transactions may consider providing an economic and securities research unit that continually monitors global trends and capital markets. This unit provides necessary forecasts of capital market expectations, currency relationships, interest rate movements, commodity prices, and expected returns of asset classes and individual investment instruments, which help the trust entity establish appropriate investment policies and strategies, select appropriate investments, and manage risks effectively.

- vi. The trust entity shall have a process that will confirm trust personnel with investment functions know and follow the board-approved investment policies and processes.
- (c) *Selection and use of brokers/dealers.* The quality of execution is an important determinant in broker selection. In selecting brokers/dealers, a trust entity must consider the following minimum standards and criteria:
- i. Execution capability and ability to handle specialized transactions;
 - ii. Commission rates and other compensation;
 - iii. Financial strength, including operating results and adequacy of capital and liquidity;
 - iv. Past record of good and timely delivery and payment on trades;
 - v. Value of services provided, including research; and
 - vi. Available information about the broker from other broker customers, regulators, and self-regulated organizations authorized by the SEC.

The trust entity with large portfolio may opt to evaluate broker performance using a formalized point scoring system. A list of approved brokers shall be made available by the trust entity, reviewed periodically and updated at least annually.

- (d) *Best practices.* The trust entity shall document best practices policies and processes to institutionalize proper safeguards for the protection of its clients and itself. At a minimum, the policies must include the following standards:
- i. Best execution. The trust entity shall use reasonable diligence to ensure that investment trades are executed in a timely manner and on the best available terms that are favorable to the client under prevailing market conditions as can be reasonably obtained elsewhere with an acceptable counterparty. For related counterparties, no purchase/sale must be made for discretionary accounts without considering at least two (2) competitive quotes from other sources. The policy on best execution must document processes to warrant such execution is readily and operationally verifiable.
 - ii. Chinese Wall. A clear policy on Chinese Wall aims to protect the institution from conflict of interest arising from varying functions carried by the trust entity in relation to credit (debt), shareholder, and investment position taking. The policy shall state the duties and responsibilities of the trust entity and each department including that of the bank proper and subsidiaries and affiliates should transactions involve the concerned departments and entities.
 - iii. Personnel investment policies. These policies aim to ensure honest and fair discharge of investment trading functions of all qualified personnel. Qualified personnel are those that may have access to information on clients and investment position-taking of clients, investment manager or portfolios. The use of such information may be abused and detrimental to the clients. The policy shall state the duties and responsibilities of each qualified personnel in relation to trading and portfolio management activities including allowed and not allowed transactions as well as sanctions in case of violations.
 - iv. Confidentiality and materiality of Information. The trust entity must keep information about past, current and prospective clients confidential, unless disclosure is authorized in writing by the client or required by law and the information involve illegal activities perpetrated by the client. It must ensure safekeeping of confidential and material information and prevent the abuse of such information to the detriment of the institution or its clients.
 - v. Fair dealing. The trust entity shall document dealing practices to ensure fair, honest and professional practices in accordance with the best interest of the client and counterparties at all times and for the integrity of the market. It must ensure that any representations or other communications made and information provided to the client are accurate and not misleading. The trust entity must also take care not to discriminate against any client but treat all clients in a fair and impartial manner.
 - vi. Diligence and reasonable basis. In conducting its investment services, the trust entity shall act with skill, and care and diligence, and in the best interests of its clients and the integrity of the market. The duty of due diligence is intertwined with the duty to maintain independence and objectivity in providing investment recommendations or taking investment actions. When providing advice to a client, the trust entity shall act diligently and make certain that its advice and recommendations to clients are based on thorough analysis and take into account available alternatives.

- The trust entity shall take all reasonable steps to execute promptly client orders in accordance with the instruction of clients.
- The trust entity, when acting for or with clients, shall always execute client orders on the best available terms.
- The trust entity shall ensure that transactions executed on behalf of clients are promptly and fairly allocated to the accounts of the clients on whose behalf the transactions were executed.

Where a client opts not to accept the recommendation of the trust entity and chooses to purchase another investment product which is not recommended, the trust entity may proceed with the client's request/instruction, provided it shall document the decision of the client and highlight to him/her that it is his/her responsibility to ensure the suitability of the product selected.

- vii. In-House or related party transactions handling. The trust entity shall define the policies in handling related-interest transaction to ensure that the best interest of clients prevails at all times and all dealings are above board. It must conform to the requirements of Sec. 413 and Sec. 415.
- viii. Valuation. The trust entity shall document the institution's valuation process to show the sources of prices, either market or historical value, and the formula used to derive the NAV of investment portfolios. Valuation shall be understood, compliant with written policies and operating procedures, and used consistently within the trust entity. The trust entity must ensure that the valuation processes of service providers, custodians, and other subcontractors are compatible with those of the trust entity and in compliance with relevant statutory or regulatory valuation standards.

Risk officers shall document the accuracy and reliability of all valuation processes and data sources and ensure that valuations are completed as required by internal policies and procedures and regulatory reporting standards.

- (e) *Conflicts of interests.* These may arise when the trust entity exercises any discretion where mutually opposing interests are involved. The most serious conflict of interest is self-dealing, which could include transactions such as an investment in related interests of the trust entity or purchase of securities from or through an affiliate. Such transactions must be fully disclosed and authorized in writing by clients. Because of the complexity and sensitivity of the issue, a trust entity must develop policies and procedures to identify and deal with conflicts of interest situations.

C. *Account termination*

Accounts may be terminated for a variety of reasons, including the occurrence of a specified event or upon written notice of either the client or the trust entity. The trust or investment management agreement shall provide for the terms and manner of liquidation, return and delivery of assets/portfolio to the client. Generally, the trust entity's responsibilities include distribution to the client, the successor trustee and/or beneficiaries of the remaining assets held under trusteeship/ agency arrangement, preparation and filing of required reports. The trust entity must ensure the risk control processes are observed when terminating accounts just as when accepting them.

The trust entity must have a general policy with respect to the termination of trust accounts, which policy shall take into consideration the general processes to be observed in the return or delivery of different types of assets, the possible modes of distribution, fees to be paid, taxes to be imposed, the documentation required to effect the transfer of assets, the provision of terminal reports, and whenever applicable, the timing of distribution, needs and circumstances of the beneficiaries. Should the trust entity anticipate possible issues or problems with respect to the termination of the account, such as the liquidation of certain assets or the partition or division of assets, these issues shall be disclosed to the client for proper disposition. The policy on the termination of trust, fiduciary and investment management accounts shall likewise include the approval process to be observed for the termination of these accounts as well as the reporting requirements for accounts terminated and closed.

(Circular Nos. 1020 dated 07 November 2018 and 966 dated 11 July 2017)

**RISK MANAGEMENT GUIDELINES FOR TRUST AND OTHER FIDUCIARY BUSINESS
AND INVESTMENT MANAGEMENT ACTIVITIES
(Appendix to Sec. 401)**

I. Introduction

Recent changes in the nature and complexity of fiduciary activities have underscored the need for an effective and sound risk management process. With the deepening of the capital market and the increasing complexity of the financial environment, the risk management practices and techniques employed by financial institutions should continuously improve and adapt to these evolving financial landscape.

These guidelines aim to provide principles- based guidance in the implementation of sound risk management practices for trust, other fiduciary business, and investment management activities. As such, the applicability of these guidelines shall depend on the size, complexity, and risk profile of the institution's fiduciary activities.

II. Statement of Policy

It is the policy of the Bangko Sentral ng Pilipinas to support the development of the Philippine financial market and promote adequate level of protection to investors through, full and fair disclosure on financial instruments covering banking and fiduciary activities. With the continuous emergence of complex financial products, investor protection is a significant concern in building investors' confidence in the Philippine financial market. It is in furtherance of this policy that Bangko Sentral prescribes risk management guidelines for fiduciary activities aligned with the basic standards in the administration of fiduciary products and services by trust entities.

III. Risk Management Principles for Fiduciary Activities

Risk management practices must be designed to ensure that exposures are well within trust entities capacity to manage and risks taken by the trust entity and its clients are consistent with their respective risk tolerance. Risk management practices shall also promote efficiency in the administration and operation of the fiduciary business; ensure adherence and conformity with the terms of the instrument or contract; and maintain absolute separation of property free from any intrusion of conflict of interest.

As fiduciary activities become more diverse and complex, an institutions' ability to effectively identify, measure, monitor and control risks should keep pace and continue to evolve. There is no single risk management framework that would effectively work for all trust entities due to differing size, business model, complexity of activities, and risk profile. Nevertheless, regardless of the structure in place, the framework shall cover the following key elements of sound risk management system:

- a. Active and appropriate oversight by the board of directors/Trust Committee or its functional oversight equivalent in case of foreign banks/institutions;
- b. Adequate risk management processes, policies and procedures;
- c. Appropriate risk measurement system, prudent risk limits, monitoring and management information system; and
- d. Comprehensive and effective internal control system, audit, and compliance program.

IV. Risks Associated with Fiduciary Activities

For purposes of these Guidelines, the following definitions of risks are adopted:

- a. *Credit/counterparty risk* is the current and prospective risk to client's earnings or principal contribution arising from an obligor's failure to meet the terms of any contract with the trust entity or otherwise perform as agreed. Credit risk is found in all activities where success depends on counterparty, issuer, or borrower performance. It arises anytime fiduciary funds are extended, committed, invested, or otherwise exposed through actual or implied contractual agreements, and reflected in the client's financial statements. Credit/counterparty risk exists in the loan portfolio and other forms of credit accommodations.
- b. *Market risk* is the current and prospective risk to client's earnings or principal contribution arising from changes in the value of the trust entity's holdings of investment portfolios. Market risk arises from dealing and position-taking activities in interest rate, foreign exchange and equity markets.
- c. *Liquidity risk* is the current and prospective risk to client's earnings or principal contribution arising from a trust entity's inability to recognize or address unplanned changes in client's and/or beneficiary's needs

thereby affecting the ability to liquidate assets quickly with minimal loss in value. The trust entity shall determine and maintain adequate level of liquidity in each accounts based on client-defined constraints/circumstances or product specifications.

- d. *Operational risk* is the current and prospective risk to the bank's earnings or capital arising from fraud or error, and the inability of the trust entity to deliver products or services, maintain a competitive position and manage information. Operational risk is evident in each fiduciary product and service offered. As the fiduciary products and services become sophisticated or volume of activities expands, so does the level of operational risk. This risk encompasses product development and delivery, operational processing, systems development, and the internal control environment. Operational risk is present in the day-to-day operations of trust entities and in all aspects of fiduciary activities.

A part of operational risk is legal risk which arises from non-adherence with the terms of the fiduciary agreement and the potential that unenforceable contracts, lawsuits, or adverse judgments can disrupt or otherwise negatively affect the operations of a trust entity.

- e. *Compliance risk* is the current and prospective risk to the bank's earnings or capital arising from violation of laws, rules and regulations of regulatory authorities, prescribed practices or sound fiduciary principles, internal policies and procedures, and prudent ethical standards. Compliance risk also arises in situations where the laws or rules governing certain fiduciary products or activities of the trust entity may be ambiguous or untested. This risk exposes the trust entity to fines, payment of damages, and the voiding of contracts. Compliance risk can lead to limited business opportunities, reduced expansionary potential, unenforceability of contract or even adversely affect trust entity's reputation.
- f. *Strategic risk* is the current and prospective risk to the bank's earnings and capital arising from adverse business decisions, improper implementation of decisions, or lack of responsiveness to industry changes. Strategic risk is a function of the compatibility of a financial institution's strategic goals, the business strategies developed to achieve those goals, the resources deployed in support of these goals, and the quality of implementation. The trust entity's internal characteristics must be evaluated against the impact of economic, technological, competitive, regulatory, and other environmental changes. Financial success requires a sound strategic planning process embraced by the board and senior management.
- g. *Reputation risk* is the current and prospective risk to the bank's earnings and capital arising from negative publicity regarding the financial institution's fiduciary business practices. The negative public opinion can cause (a) clients to question or doubt the trust entity's integrity to engage in fiduciary activities which can result in the termination of fiduciary relationships, (b) litigation costs to increase, or (c) revenues to decline. Reputation risk affects the trust entity's ability to establish new fiduciary relationships or services, or continue servicing existing relationships. Since public's perception is critical in the fiduciary business, trust entities should exercise an abundance of caution in dealing with clients and the public in general.

V. Risk Management Process

A trust entity shall develop and implement a formal, comprehensive, and effective risk management program that outlines, among other things, the risk management processes that effectively identify, measure, monitor and control risks affecting the clients and the trust entity. These processes shall also recognize and address the differences in the needs, objectives and risk tolerance of the clients and the trust entity. An effective risk management program can serve as an early warning system that enables the trust entity to anticipate and/or pro-actively identify potential problems from arising which may result in unanticipated loss to the clients and the trust entity. A risk management program should:

- a. *Identify risk.* Trust entities shall recognize and understand existing exposures or those that may arise from new products/services, acceptance of new clients, and changes in operating environment. They shall establish procedures that identify and address such risks prior to initiation of the activities. Risk identification is a continuing process that should be embedded in all phases of trust entity's activities and shall cover both the individual investment transactions and portfolio activities. Identifying risk also involves the determination of the desired level of exposures both for the trust entity and client after taking into account the willingness and the ability to absorb risks.
- b. *Measure risk.* Trust entities shall have appropriate systems or tools in place that could adequately quantify or measure both their client and their own risk exposure/s. It shall be the trust entity's responsibility to ensure that the risk measurement tools can adequately and reliably capture and quantify exposures. Risk measurement tools shall be subjected to independent and periodic validation and review to ensure that they remain reliable and appropriate. Effective risk measurement systems assess the risks of both individual

transactions and portfolios and ensure that the sophistication of the risk measurement tools remains proportionate to the complexity of exposures.

- c. *Monitor risk.* Trust entities shall monitor risk levels to ensure timely review of risk positions and exceptions. Monitoring reports should be frequent, timely, accurate, and informative and should be distributed to clients/individuals and appropriate level of management to ensure corrective action, when necessary.
- d. *Control risk.* Trust entities shall establish and communicate risk limits through policies, standards, and procedures that define responsibility and authority. The types and sophistication of control processes shall be consistent with the risk tolerance standards defined by the board of directors/Trust Committee and the client. Trust entities shall implement a process for tracking and reporting exposures to monitor the trust entity's compliance with risk tolerance standards.

The risk management process for fiduciary activities should be structured and incorporated in the required basic standards in the administration of fiduciary products and services.

VI. Sound Risk Management System

Consistent with the guidelines on supervision by risk set forth under *Appendix 69* (Appendix to Sec. 141), the Bangko Sentral shall assess the suitability and adequacy of a trust entity's risk management system in accordance with the following elements:

A. Active Board and Senior Management Oversight

- a. The board of directors (or its functional oversight equivalent which may include the country head in the case of foreign banks/ institutions) and the Trust Committee shall perform their responsibilities in accordance with the applicable provisions of this Manual.
- b. Independent Risk Management Function. To uphold the principles of undivided loyalty and impartiality, and discourage possible conflicts of interest, the process of measuring, monitoring, and controlling risks shall be managed as independently as practicable by a body or personnel apart from those individuals who have the authority to initiate transactions. The Board- designated body or personnel performing independent risk management on fiduciary activities shall either be part of or directly report to the risk management unit/department of the bank proper to ensure holistic implementation of enterprise-wide risk management framework. Nevertheless, the Board-designated body or personnel tasked to perform risk management function for fiduciary activities is not precluded to freely communicate with the trust officer or relevant trust committee any information relative to the discharge of its function.

B. Adequate Risk Management Processes, Policies and Procedures

The trust entity shall have Board-approved written risk management policies and documentation standards which provide detailed guidance for the day-to-day implementation of the trust entity's strategies and generally include risk limits, operating procedures and control processes designed to safeguard the trust entity and its clients from excessive and imprudent risks. Terminologies relevant to trust, other fiduciary and investment management activities shall be specifically defined and clearly described through appropriate sample documents/exhibits to avoid the likelihood of incomplete communication, ambiguities and misinterpretations.

Policies shall provide an outline on the formal process for the board of directors/Management's review (at least annually), amendment and approval. In the case of personnel management, the policies and procedures shall provide for personnel recruitment, training, performance evaluation, and salary administration that must address staffing needs, and compensation programs. Effective risk management requires experienced and competent officers and supporting staff.

Policies and procedures shall delineate lines of responsibility and accountability. Copies of policies and procedures, including updates and changes, shall be promptly transmitted to all concerned personnel who are directly or indirectly involved in fiduciary activities. Policies and procedures shall, at the minimum, include:

- 1. Scope of fiduciary products and types of services offered to clients with clear description of each product and service
- 2. Organizational structure
- 3. Authorities and responsibilities of the:

- (a) Board of directors
 - (b) Trust committee
 - (c) Trust investment committee and other related committees
 - (d) Trust officer¹
 - (e) Trust Department/Branch/Unit Heads¹
 - (f) Account officers/Marketing personnel, including those assigned in branches¹
 - (g) Trading or Dealing officers and staff¹
 - (h) Backroom officers and staff¹
4. Basic standards in the administration of trust, other fiduciary business and investment management activities
 5. Accounting and records maintenance
 6. Policy review
 7. System of financial and regulatory reporting
 8. Client-oriented safety nets

C. Appropriate Risk Measurement System, Prudent Risk Limits, Monitoring and Management Information System

The process of measuring, controlling and monitoring fiduciary risks shall be carried out independently by personnel not directly involved in fiduciary activities. Results of this process shall be reported to the board of directors, or to the appropriate Board-level committee, thru the risk management unit/department of the bank/institution proper in a timely and comprehensive manner. In the same manner, the trust officer or relevant trust committee should be apprised of the results of these processes and relevant risk management issues.

Risk Measurement System

In formulating the risk measurement models and methodologies for its fiduciary risk-taking activities, the trust entities shall be guided by the minimum requirements prescribed in *Appendices 70* (Appendix to Sec. 142) and *71* (Appendix to Sec. 144), and the guidelines provided under *Appendix 22* (Appendix to Sec. 613) as applicable.

Trust entities are expected to adopt models/ methodologies commensurate to the size, complexity and nature of the fiduciary activities undertaken. In addition, the trust entity's risk measurement system shall provide detailed guidelines on the:

- a. Frequency of risk measurement
- b. Sources of data, i.e., market prices
- c. Appropriateness of risk measurement tools given the complexity and level of risk assumed (including the reasonableness and validity of assumptions)
- d. Frequency of validation of risk measurement tools
- e. Ability to measure risk at both transactional and portfolio levels
- f. Frequency of review of the risk measurement system by the board of directors and the trust committee

Trust entities shall develop a liquidity contingency plan for its investment portfolios especially for the UITFs to demonstrate how liquidity funding needs will be handled in times of crises, as well as supplement their market and liquidity risk measurement models with periodic stress testing.

Prudent Risk Limits

Risk limits shall be established, approved and periodically reviewed by the board of directors or trust committee. In setting limits, the risk management policy shall include the determination of the experience, background and authority of individuals involved in setting portfolio limits, and the processes for setting and changing individual and portfolio limits; and shall recognize the restrictions/constraints that the client may impose on the trust entity. The risk management policy should also indicate when excess over approved limits may be allowed and the appropriate approving authority for such excess. Limits must be documented and promptly communicated to all concerned personnel. Portfolio limits must be reviewed at least annually, but client-set limits must be reviewed at least quarterly to ensure consistency with the investment objectives set by the client and conformity to the terms of the contract.

¹ Including minimum qualification standards.

Risk Monitoring and Management Information Systems (MIS)

Effective risk monitoring and control is dependent on accurate, timely, reliable, and relevant information processing and reporting systems. Rapid technology advancements create new risk monitoring and control issues, thus, the board of directors should ensure that the impact of emerging technologies on fiduciary activities is properly considered. The board of directors and Trust Committee shall be afforded with adequate information on the trust and investment management activities to properly fulfill their responsibilities. Accordingly, the trust entities shall have policies and procedures in reporting information on fiduciary activities to the board of directors and trust committee specifying, among other things, the type, amount and timing of information reported; methodology to ensure all identified risks are monitored; frequency, timeliness, accuracy and clarity of monitoring reports; report distribution to management and staff; and comparability of output against predetermined limits.

The sophistication of MIS shall be commensurate with the complexity and diversity of the trust entity's operations such that a complex trust entity shall have a more comprehensive MIS.

Because of the cost involved in developing technology, a trust entity may opt to purchase information technology rather than develop its own internal system. Nonetheless, regardless of the source of information system, the board of directors and Trust Committee shall exercise the proper level of control and oversight to appropriately fulfill their fiduciary duties. Service Agreements or vendor contracts shall be thoroughly reviewed by legal counsel to ensure that they include appropriate indemnification and recourse language. In addition, contracts shall contain specific language recognizing the authority of the trust entity's regulators to conduct reviews of third-party vendors as part of their overall supervisory activities.

D. Comprehensive and effective internal controls, audit, and compliance program

Internal Control Systems

A comprehensive internal control is the foundation for the safe and sound functioning of a trust entity and its fiduciary risk management system. It shall form an integral part of the trust entity's overall system of controls and shall promote effective fiduciary operations and reliable financial and regulatory reporting, safeguard assets and help ensure compliance with relevant laws, regulations, and institutional policies.

Effectiveness of the internal control system shall be periodically tested by an independent party (preferably the auditor, or at least an individual not involved in the process being reviewed) who shall submit a formal report on the results of such testing/review directly to the board of directors or the audit committee. The review shall cover all material controls and shall consider:

- The change in the nature and extent of significant risks, and the trust entity's ability to respond to such changes;
- The scope and quality of management's ongoing monitoring of risks and of the system of internal control, and the work of its internal audit function;
- The extent and frequency of the communication of results of the monitoring to the board of directors or appropriate committee;
- The incidence of significant control failings or weaknesses that have been identified, and the extent to which they have resulted in losses or potential losses; and
- The effectiveness of the trust entity's reporting processes.

Given the importance of appropriate internal controls to an organization, management's response to results of the test/review should be documented.

The system of internal control shall set forth clear lines of authority and appropriate segregation of operational duties and functions to ensure independence of the control areas from the business lines. An organizational chart shall specify the reporting lines for risk management, compliance, and internal audit groups.

Audit Program

A well-designed and executed internal audit program is essential to effective risk management and provides an independent assessment of the efficiency and effectiveness of the internal control system.

An effective audit program shall be based on an appropriate risk assessment methodology that documents the trust entity's significant fiduciary activities and their associated risks, and internal control systems. Such documentation shall be available for review by the Bangko Sentral. It shall describe the objectives of specific audit activities and list the procedures to be performed during the process.

While the frequency and extent of the internal audit review and testing shall be consistent with the nature, complexity and risk of the trust entity's fiduciary activities, existing Bangko Sentral regulations require the conduct of periodic internal audits of the trust entity at least once every twelve (12) months. The board of directors may also require the adoption of a suitable continuous audit system to supplement or replace the periodic audit. In any case, the audit shall ascertain whether the trust entity's fiduciary activities have been administered in accordance with laws, Bangko Sentral rules and regulations, and sound fiduciary principles.

There shall also be a system that allows sensitive findings (e.g., defined non-observance of the basic principles on fiduciary relationships, unsafe and unsound practices, operational lapses/deficiencies resulting to recognition of material losses) to be reported directly to the board of directors. Moreover, the audit committee and/or board of directors shall review the effectiveness of the internal audit and other control review activities on a regular basis.

Bangko Sentral regulations also require annual external audit of the fiduciary activities of trust entities and of each unit investment trust fund by an independent auditor acceptable to the Bangko Sentral.

Compliance Program

The trust entity shall develop and implement a compliance system for its trust, other fiduciary business and investment management activities, and appoint/designate a compliance officer to oversee its implementation in accordance with Section 161. The Board-designated body or personnel performing independent compliance function on fiduciary activities shall either be part of or directly report to the compliance unit/department of the bank proper to ensure holistic implementation of enterprise-wide compliance program. Nevertheless, the Board-designated body or personnel tasked to implement the compliance program for fiduciary activities is not precluded to freely communicate with the trust officer or relevant trust committee any information relative to the discharge of its function.

The compliance system must provide a written and comprehensive compliance program designed to monitor observance with relevant laws, rules and regulations, internal policies including risk limits, internal control systems, fiduciary principles, and agreements with clients. The compliance system shall be periodically reviewed for relevance, effectiveness and appropriate follow-up.

The board of directors must recognize the scope and implications of applicable laws; approve a compliance program that protects the trust entity from adverse litigation, increased regulatory oversight, and damage to reputation; and ensure that the compliance officer primarily undertakes to oversee and coordinate the implementation of the compliance system.

The extent of formality of the compliance program may vary from one trust entity to another. Nevertheless, an effective compliance programs have common elements that include:

- a. A strong commitment from the board of directors and Trust Committee;
- b. A formalized program coordinated by a designated compliance officer that includes periodic testing and validation process;
- c. Responsibility and accountability from line management;
- d. Comprehensive training programs; and
- e. Timely reporting and follow-up process.

**GUIDELINES ON THE AVAILMENT OF US DOLLAR DENOMINATED
REPURCHASE AGREEMENT FACILITY WITH THE BANGKO SENTRAL
(Appendix to Section 601 on Repurchase Agreements with Bangko Sentral)**

The guidelines on the availment of USD denominated repo agreement facility of banks with the Bangko Sentral are as follows:

A. Eligible borrowers

RBUs or FCDU/EFCDUs of banks with FCDU/EFCDU authority who can demonstrate legitimate funding needs can avail of this facility.

B. Qualifying purposes

Proceeds from the borrowings shall be used for legitimate liquidity requirements of FCDU/EFCDU or RBU for local operations as follows:

1. Compliance with FCDU/EFCDU cover requirements;
2. Servicing of withdrawals of FCDU/EFCDU; and
3. Servicing trade-related requirements.

Borrowing shall be for the account of the applicant bank and shall not be used to fund liquidity requirements of foreign head office, foreign branches, affiliates, or subsidiaries.

C. Acceptable collateral

Eligible securities shall cover USD- denominated evidences of indebtedness issued directly by the Government of the Philippines (ROP Bonds) held by the applicant bank. These can be lodged in FCDU/EFCDU's or RBU's Available-for- Sale, HFT and HTM portfolios.

ROP Bonds to be pledged have to be transferred/credited to Bangko Sentral 's designated securities account before availment of the USD repo agreement facility.

The tenor of the underlying security should not be shorter than the overlying instrument.

D. Valuation of securities

The haircut on the underlying securities shall be determined by the Treasury Department, with the concurrence of the Governor. Collateral cover will be maintained through periodic margin calls as specified in the repo agreement.

Said valuation will be subject to periodic review and will be modified when necessary.

E. Available credit line

Credit lines shall be based on outstanding USD-denominated evidences of indebtedness issued directly by the Government of the Philippines (ROP Bonds) held by the applicant bank as of 30 September 2008.

F. Rate, term and trading time

The rates of the USD denominated repo agreement facility shall be set by the Treasury Department, with the concurrence of the Governor, taking into account prevailing liquidity/market conditions.

The term of the USD denominated repo agreement facility shall be set by the Treasury Department, with the concurrence of the Governor: *Provided*, That, should a bank become disqualified for the repo agreement facility, the outstanding repo agreement shall immediately become due and payable.

Trading time for the USD repo agreement transactions shall be set from 10:00 AM to 12 Noon, then from 1:00 PM to 2:00 PM.

G. Application requirements

Applicant bank shall submit the following information/documents, and such other documents as may be deemed necessary, to the Treasury Department, copy furnished the appropriate CPCD and SES, to aid Bangko Sentral evaluate applications:

1. Application for availment of the facility stating therein the amount, requested term, specific purpose of the borrowing, including disclosure of the specific collateral, including source, i.e. RBU or FCDU/EFCDU;
2. Notarized undertaking/certification signed by the bank's president or country manager (in the case of local branch of a foreign bank), compliance officer and head of treasury, indicating the following:
 - (a) Specific purpose of fund utilization;
 - (b) Proceeds of borrowing shall be used exclusively to fund liquidity requirements of FCDU/EFCDU or RBU local operations;
 - (c) That the Bank is not a conduit for another bank nor will the Bank take arbitrage positions on the availment of the repo agreement facility.

H. Reportorial requirements

Banks with outstanding USD denominated repo agreement with the Bangko Sentral are required to submit to the appropriate supervising department of the Bangko Sentral the following:

1. Report on the deployment/utilization of USD repo borrowing and other documents and supplemental information, as may be required, to enable Bangko Sentral to assess the legitimacy of the utilization of such funds, within three (3) banking days from release of the proceeds of the repo agreement; and
2. All documents and records relative to the Bank's availment and use of proceeds of the USD denominated repo agreement facility shall be made available to the Bangko Sentral upon request.

I. Pre-termination

1. The repo agreement may be paid at any time before maturity, subject to mutual agreement of both parties.
2. The Bangko Sentral may unilaterally pre-terminate the borrowing arrangements under the following conditions:
 - (a) Funds are found to have been used for ineligible purposes
 - (b) Collateral margins, if any, are not met.

J. Documentation

The repo agreement between the bank and the Bangko Sentral shall be covered by a master repo agreement, repo agreement confirmation and such other documentation as may be necessary to facilitate the transaction.

K. Accounting treatment

The USD denominated repo agreement facility shall be treated as collateralized borrowings from the Bangko Sentral and shall be accounted for in accordance with the FRP issued under Sec. 172

Eligible securities booked under the HTM category shall be subject to the tainting provision provided under Sec. 381 upon default/non-payment of the amount due three (3) banking days after the maturity of the repo agreement or disqualification of borrowers.

L. Penalty clauses

Violations of the terms and conditions of the USD repo agreement facility are governed by sanctions provided under Sec. 601, including but not limited, to termination of eligibility and pre- termination of any outstanding balance through repayment and/or sale of the collateral.

GUIDELINES ON THE SUBMISSION OF APPLICATION FOR MERGER AND CONSOLIDATION
(Appendix to Sec. 104 on Requirement of Bangko Sentral Approval)

The following guidelines and procedures shall be observed by banks in their application for merger/consolidation:

1. The merging/consolidating entities shall comply with the safety and soundness test requirements as follows:
 - a. Compliance, especially by the acquiring bank, with major banking laws and regulations; and
 - b. Submission to the Bangko Sentral of a satisfactory action plan, if applicable, to address serious supervisory concerns.
2. Submission of the following documentary requirements simultaneously to the Bangko Sentral and the PDIC for merger/consolidation application involving a bank; and to the Bangko Sentral for application involving only banks;
 - a. Articles of Merger or Consolidation duly signed by the President or Vice- President and certified by the secretary or assistant secretary of each of the constituent institutions setting forth the following as required in Section 78 of the Corporation Code:
 - The Plan of Merger or Consolidation;
 - The number of shares outstanding; and
 - The number of shares voting for and against the Plan, respectively.
 - b. Plan of Merger or Consolidation setting forth the following:
 - The names of the constituent institutions;
 - The terms of the merger or consolidation and the mode of carrying the same into effect;
 - A statement of the changes, if any, in the Articles of Incorporation of the surviving institution in the case of merger; and in the case
 - Of consolidation, all the statements required to be set forth in the Articles of Incorporation;
 - Such other provisions with respect to the proposed merger or consolidation as are deemed necessary or desirable.
 - c. Resolution of the Board of Directors of the respective institutions approving the Plan of Merger or Consolidation. The resolution shall be certified under oath by the respective corporate secretaries of the constituent institutions;
 - d. Resolution of the meeting of the stockholders in which at least two-thirds (2/3) of the outstanding capital stock of each corporation have approved the plan of merger or consolidation. The resolution shall be certified under oath by the respective corporate secretaries of the constituent institutions;
 - e. Financial Statements:
 - Latest financial statements and three- year audited financial statements of the merging institutions
 - Three (3) - year financial projections with valid assumptions of the merged or consolidated institutions' balance sheet and income statement.
 - f. List of merger incentives the bank will avail of (see Annex A for the sample list of merger incentives);
 - g. List of stockholdings of each of the constituent institutions before and after the merger;
 - h. List of directors and officers of each of the merging/consolidating institutions;
 - i. List of proposed officers and directors of the merged or consolidated institution and the summary of their qualifications;
 - j. Organizational chart of the merged or consolidated institution including the number of offices and locations thereof;
 - k. Inter-company transactions relative to the submitted Financial Statements;
 - l. Computation of Capital Adequacy Ratio on the submitted financial Statements;

- m. Viable Operational Plan with the following components:
- Marketing Strategies
 - Proposed Loan Portfolio Diversification
 - Deposit Generation
 - Proposed Improvements in Accounting System
 - Operational Control
 - Computerization Plan
 - Communication System
- n. The appraiser's report of reappraisal of bank premises, if any, done by an independent and licensed appraiser;
- o. Proposed increase of capital stock of surviving bank;
- p. Proposed amendments in the Articles of Incorporation of surviving bank;
- q. Director's Certificate (surviving bank) on the proposed amendment of the Articles of Incorporation increasing the authorized capital stock; and
- r. Any other reasonable requirement deemed material in the proper evaluation of the merger or consolidation as may subsequently be requested by the Bangko Sentral and/or PDIC.
3. For merger/consolidation involving a bank, the Bangko Sentral shall wait for PDIC consent before elevating the proposed merger/consolidation to the Monetary Board for approval; and
4. The authority given to merge/consolidate the constituent entities shall be valid within six (6) months reckoned after Bangko Sentral approval.

**SAMPLE LIST OF REGULATORY INCENTIVES FOR
MERGERS/CONSOLIDATIONS AND/OR ACQUISITIONS**

The Bangko Sentral promotes mergers/consolidations and/or acquisitions of majority or all of the outstanding shares of stock of a bank to strengthen the financial capabilities and enhance overall competitiveness of banks.

Concerned banks may request regulatory incentives that are responsive to their specific needs and reasonable given the attendant circumstances. Any request shall be subject to Bangko Sentral's evaluation and approval.

Banks may refer to the following sample list of possible incentives:

- a. Staggered booking of unbooked allowance for credit losses;
- b. Temporary relief from compliance with prudential limits/ratios such as real estate loan limits, capital adequacy ratio (CAR) and single borrower's limit;
- c. Conversion/upgrading of head offices, branches, and branch-lite units;
- d. Condonation of liquidated damages/penalties on loan arrearage to the Bangko Sentral;
- e. Relocation of branches/branch-lite units in cases of duplication in certain areas;
- f. Concurrent directorship/officership between constituent banks; and
- g. Increase in the rediscounting line ceiling that is based on the adjusted capital account.

(Circular No. 1065 dated 03 December 2019)

GUIDELINES ON THE COLLECTION OF THE ANNUAL SUPERVISORY FEES
(Appendix to Sec. 1101)

The following guidelines shall govern the collection by the Bangko Sentral and the payment by banks of the Annual Supervisory Fees (ASF).

1. *Notification of amount due for ASF and mode of payment.* The Bangko Sentral Supervisory Data Center (SDC) shall send a billing notice to the bank for its ASF payment indicating, among others, the computation of the ASF due, including the two percent (2%) creditable withholding tax (CWT) thereon, if applicable, the period covered by the ASF and the specific date when the ASF will be debited from the bank's demand deposit account (DDA) with the Bangko Sentral.

The Bangko Sentral will not accept checks as mode of ASF payment. Banks, upon receipt of the ASF billing notice from the Bangko Sentral, should maintain adequate balance in their DDA to cover the ASF and other daily obligations and, when necessary, make corresponding deposits to fully cover said obligations. In case of deficiency, the provisions on DDA deficiency in Section 1101 shall apply.

2. *Exceptions noted on billing notice of ASF.* Upon receipt of the Bangko Sentral Notice of ASF billing, a bank is encouraged to check the accuracy of the billing and to submit any of the noted exceptions therein not later than ten (10) days before the specified date of collection/debit to DDA as indicated in the billing notice. The said exceptions, together with supporting documents, shall be submitted to:

The Director
Supervisory Data Center (SDC)
Bangko Sentral ng Pilipinas
11th Floor, Multi-Storey Building
BSP Complex, A. Mabini Street
Malate, Manila 1004

Any exceptions received after the cut-off date or any exception not duly substantiated with documents before the cut-off date will be evaluated and considered in the computation of the ASF for the immediate succeeding year.

3. *Withholding tax on supervisory fees.* The following shall apply to banks covered by Sections M and N of BIR Revenue Regulations (R.R.) No. 2-98 as amended by R.R. No. 17-2003 and R.R. No. 2-2006:
 - a. Within seven (7) days from specified date, the bank shall submit a written representation to the Bangko Sentral (at the address indicated in Item "2" hereof), on whether or not it is included among the institutions covered under Sections M or N of R.R. No. 2-98, as amended. If available, a certified true copy of the BIR Notice classifying it under Section M of R.R. No. 2-98, as amended, shall be attached to the written representation. The submission of the written representation or BIR Notice shall no longer be necessary if previously transmitted and received by the Bangko Sentral in connection with previous ASF assessments.
 - b. The ASF, net of the two percent (2%) CWT, shall be debited from their respective DDAs on the specified date referred to in the notice of ASF billing under Item "1".
 - c. Three (3) original signed copies of the BIR Form No. 2307 Certificate of Creditable Tax Withheld at Source which exclusively pertain to the withholding on ASF shall be submitted to the SDC at the address provided in Item "2" above on specified date. The BIR Form No. 2307 shall accurately indicate, among others, the following details:
 - (1) Payee: Bangko Sentral ng Pilipinas
 - (2) Tax Identification Number: 000-354-790-000
 - (3) Address: A. Mabini St. corner P. Ocampo Sr. St., Malate, Manila
 - (4) Zip Code: 1004
 - (5) The BIR-registered name of the payor- bank, as exactly indicated in the BIR Certificate of Registration (BIR Form No. 2303) of the Bank.
 - (6) the amount of income payment pertaining to the gross ASF
 - (7) the tax withheld
 - (8) the period of tax return.

Furthermore, the BIR Form No. 2307 – Certificate of Creditable Tax Withheld at Source covering the withholding on ASF should not include other transactions with Bangko Sentral and should pertain exclusively to the ASF. If the concerned bank has other transactions with Bangko Sentral, a separate BIR Form 2307 for the transaction/s shall be provided to Bangko Sentral.

- d. In case of failure of concerned bank to submit the duly accomplished forms within the deadline stated above or if such forms contain errors and discrepancies that would render the BIR Form No. 2307 invalid for claiming tax credits, the Bangko Sentral shall be constrained to immediately debit an amount equivalent to the two percent (2%) CWT from the DDA of banks concerned, with no obligation on the part of the Bangko Sentral to reimburse said amount in case of late submission. In case of DDA deficiency, the provisions in Section 1101 shall apply.

(M-2019-009 dated 8 April 2019, Circular No. 903 dated 29 February 2016, M-2016-001 dated 24 February 2016, Circular No. 890 dated 02 November 2015, and M- 2015-022 dated 06 May 2015)

REGULATORY RELIEF FOR BANKS AFFECTED BY CALAMITIES
(Footnote to Secs. 143, 255 and 282)

The Monetary Board approved the grant of temporary regulatory relief to banks with head offices and/or branches located in the areas listed in Item "I" of Annex A hereof which were devastated by calamities.

The temporary relief shall be in the form of the following whenever applicable:

For TBs/ RBs/Coop Banks

- a. During a temporary grace period for payment or upon their restructuring and subject to reporting to the Bangko Sentral, exclusion of the loans of borrowers in affected areas, which should have been reclassified as past due loans under Sec. 304 (*Past Due Account and Non-Performing Loans*) on the dates specified in Item "II" of Annex A and those maturing up to the dates indicated in Item "II" of Annex A, from computation of past due loan ratio: *Provided, That* Bangko Sentral documentary requirements for restructuring of loans for this purpose are waived: *Provided, further, That* bank will adopt appropriate and prudent operational controls;¹
- b. Reduction of the five percent (5%) general loan loss provision to one percent (1%) for restructured loans to borrowers in affected areas within the inclusive dates specified in Item "II" of Annex A;
- c. Non-imposition of penalties on legal reserve deficiencies of RBs/TBs/Coop Banks with head office and/or branches/EOs/MBOs in the affected areas incurred within the inclusive dates specified in Item "II" of Annex A: *Provided, That* these reserve deficiencies can be shown to be calamity related as certified by the bank, rather than due to pre-existing condition;
- d. Moratorium without penalty on monthly payments due to the Bangko Sentral until the respective dates specified in Item "II" of Annex A for banks with ongoing rehabilitation programs upon filing of application for extension/rescheduling;
- e. For all types of credits extended to individuals and businesses directly affected by the calamity, allowing, subject to Bangko Sentral prior approval, the booking of allowances for probable losses on a staggered basis over a maximum period of five (5) years on loans outstanding as of dates specified in Item "III" of Annex A;
- f. Non-imposition of monetary penalties for delays in the submission of all supervisory reports due to be submitted within the inclusive dates specified in Item "II" of Annex A;¹ and
- g. Allowing banks to provide financial assistance to their officers and employees who were affected by the calamity even if not within the scope of the existing Bangko Sentral-approved Fringe Benefit Program (FBP) subject to subsequent submission of request for approval of the amendment to FBP to the appropriate supervision and examination department for regularization².

For All Rediscounting Banks

- a. Upon application, granting of a 60-day grace period to settle the outstanding rediscounting obligations as of the dates specified in Item "II" of Annex A with the Bangko Sentral of all rediscounting banks with head office, or with branches/extension offices/MBOs or with end-user borrowers in the affected areas except those with serious violations or findings with the appropriate supervising department of the Bangko Sentral; and
- b. In addition to above, allowing the rediscounting banks to restructure with the Bangko Sentral, on a case-to-case basis the outstanding rediscounted loans of their end- user borrowers affected by the calamity, subject to the terms and conditions stated in the implementing guidelines provided in Item "III" of Annex A; and

For RBs and Coop Banks affected by the El Niño Phenomenon

- c. Allow the affected RBs and Coop Banks up to 31 May 2010 to apply for a special rediscounting line and up to 31 December 2010 to avail themselves of such line. Loans availed by affected RBs and Coop Banks under the special rediscounting lines are subject to renewal based on the original term of the loans but not to exceed five (5) years.

(Circular Nos. 1065 dated 3 December 2019, 974 dated 29 September 2017, 945 dated 06 February 2017, M-2017-002 dated 18 January 2017, M-2016-020 dated 08 December 2016, Circular No. 917 dated 08 July 2016, M-2016-006 dated 17 May 2016 and M-2015-039 dated 04 November 2015, M-2015-035 dated 07 October 2015, M-2015-009 dated 28 January 2015, and M- 2015-005 dated 20 January 2015)

¹ Also available to banks with head offices and/or branches located in Zamboanga City affected by the armed assault/stand-off from 9 September to 8 November 2013: *Provided, That* the bank shall maintain appropriate records on the said loan transactions and pass on such regulatory relief measure to their borrowers.

² Item "g" also covers UBs/KBs affected by Habagat, Helen, Gener, Pablo, Quinta, Labuyo, Habagat, Santi, Earthquake in Sagbayan, Bohol, Yolanda, Agaton, Glenda, Luis, Mario, Ruby, Seniang and Ineng.

**LIST OF AREA COVERED BY THE REGULATORY RELIEF; INCLUSIVE DATES OF
COVERAGE; AND IMPLEMENTING GUIDELINES ON THE RESTRUCTURING SCHEME**
*(Footnote to Sec. 143 on Credit Classification and Provisioning, Sec. 355, Sec. 304 on Past Due Account and
Non-Performing Loans, and Sec. 282 on Rediscount/lending rates and liquidated damages and
Repayments/remittance of collections/arrearages)*

I. Areas that were Declared under State of Calamity:

EL NIÑO

a) 2010

Region I: La Union, Pangasinan, Ilocos Norte and Ilocos Sur

Region II: Cagayan, Isabela, Nueva Vizcaya and Quirino

Region III: Bataan, Bulacan, Nueva Ecija, Pampanga, Tarlac and Zambales

Region IV-A: Cavite, Laguna, Batangas, Rizal and Quezon

Region V: Albay [six (6) municipalities and two (2) cities], Camarines Sur [eighteen (18) municipalities and two (2) cities], Camarines Norte [nine (9) municipalities], Sorsogon [one (1) municipality], Catanduanes [six (6) municipalities], and Masbate [fourteen (14) municipalities and one (1) city]

Region VI: Antique, Guimaras, Iloilo, Negros Occidental and Capiz

Region VII: Twenty-eight (28) mountain barangays in Cebu City, and Negros Oriental Region IX: Zamboanga del Norte, Zamboanga Sibugay and Zamboanga City

Region X: Lanao del Sur, Lanao del Norte, Bukidnon, Misamis Occidental and Misamis Oriental Region XI: Davao del Sur, Davao del Norte and Davao City

Region XII: Cotabato Province, Sultan Kudarat, Sarangani, South Cotabato, and Maguindanao Province [seventy-five (75) municipalities] Cordillera: Ifugao, Kalinga, Apayao, Mt. Province, Abra and Administrative Region

b) 2016

Banks with head offices and/or branches located in areas which were affected by the El Niño phenomenon: Provided, That a declaration of a state of calamity is issued by the National Disaster Risk Reduction Management Council or the local sanggunian, upon the recommendation of the Regional or Local Disaster Risk Reduction and Management Council.

III. Implementing Guidelines on the Restructuring Scheme Covering the Rediscounting Obligations with the Bangko Sentral of Rediscounting Banks in the Areas Affected by Natural Calamities

A. Objectives

The objectives of the loan settlement scheme are, as follows:

- To support the recovery efforts of rediscounting banks in the areas affected by the calamity;
- To enable the rediscounting banks to liquidate their loan obligations with the Bangko Sentral by way of restructuring; and
- To ensure the collection of the rediscounted loans which may become past due in view of the damages caused by the calamity, and maintain if not improve the quality of the loan portfolio of the Bangko Sentral.

B. Qualified banks

- All rediscounting banks with end- user borrowers located in the areas declared as “under state of natural calamity” as enumerated under Item “I” hereof;
- Rediscounting banks with serious violations or findings with the appropriate supervising department of the Bangko Sentral, and/ or which are currently under investigation or subject to legal action by the Office of Special Investigation shall not be qualified to avail of the restructuring scheme.
- In addition to Item No. “B.b”, the DLC shall evaluate each bank to determine if each would qualify for the restructuring.

C. Terms and conditions

a. Maturity

The restructured loan shall have a maximum term of five (5) years;

b. Amount to be restructured

The amount to be restructured shall be equivalent to the following:

- (1) *Principal*. Unpaid outstanding balance of the principal obligation in the books of accounts of the Bangko Sentral; and
- (2) *Accrued interest*. Unpaid interest due on the outstanding principal obligation as of the end of the applicable repayment or amortization date, preceding the approval of the loan restructuring.

c. *Interest rate*

The interest rate to be charged against the outstanding principal balance of the restructured loan shall be based on prevailing rediscount rate. The interest shall be re-priced annually.

d. *Maximum bank lending rate*

The restructured interest rate of the bank to its end-user borrowers shall not exceed six percent (6%) over and above the applicable Bangko Sentral interest rate. Moreover, the bank shall not charge interest on accrued interest.

e. *Terms of repayment*

- (1) *Settlement Value.* The settlement value shall be paid by the bank in equal monthly amortizations: Provided, That the amortization period shall not exceed five (5) years, to wit:

(a) *Principal.* The principal obligation shall be paid in equal monthly amortization plus the applicable rediscount rate; and

(b) *Accrued interest.* The accrued interest on the principal obligation as of the end of the month immediately preceding the approval of the loan settlement scheme shall likewise be paid in equal monthly amortizations. No interest shall be charged on the accrued interest.

- (2) *Grace Period.* The bank shall be given a grace period of six (6) months within which to pay the first amortization.

f. *Collaterals.* The following shall be the acceptable collaterals:

- (1) Restructured promissory notes of end-user borrowers;
- (2) Hard collaterals owned by the bank such as bank premises and government securities; and
- (3) Other collaterals acceptable to the DLC.

g. *Default cause*

- (1) Failure to pay two (2) or more amortizations shall be considered an event of default and shall render the unpaid balance of the loan, plus accrued interest and penalty charges due thereon, immediately due and demandable;
- (2) A penalty charge of twelve percent (12%) per annum shall be assessed on the defaulted amortization payment, reckoned from the amortization due date to date of payment; and
- (3) The DLC may exercise the option to refer to the Office of Special Investigation or to an external lawyer for appropriate legal action, without further need for demand or notice to the defaulting bank.

h. *Required documents.* Qualified banks shall submit the following documents:

- (1) Letter of Understanding (LOU), agreeing to the terms and conditions of the restructuring. The LOU shall be executed by the senior officers of the bank, duly designated by its board of directors; and
- (2) Surety Agreement, if there is collateral deficiency.

D. Application procedures

a. *Filing of application*

The bank shall file with the DLC an application for restructuring of its outstanding rediscounting loans, supported by the following documents:

- (1) Resolution of the board of directors (a) authorizing the bank to enter into a loan settlement arrangement with the Bangko Sentral, and (b) designating authorized senior officers therefor;
- (2) The restructured promissory notes of the end-user borrowers and other supporting documents; and
- (3) Promissory Note with Trust Receipt Agreement and Deed of Assignment executed by the authorized senior officers of the bank, duly notarized.

b. *Notice of approval of application* The DLC shall notify the bank of the approval of its application to avail of the loan settlement scheme. Upon receipt of said advice, the bank shall:

- (1) Execute the applicable document under Item No. "D.a"; and
- (2) Pay the required amortization immediately on the month following the date of approval of the loan restructuring scheme and monthly thereafter until fully paid.

E. Authorized signatories of the Bangko Sentral

Transaction	Authorized Bangko Sentral Officer
Approval of the application to avail of the loan restructuring scheme	Director, DLC, or in his/ her absence, any of the DLC Deputy Directors
Approval to release the collateral documents Execution of Cancellation of Deeds of Real Estate Mortgage Assignment or Pledge	Director, DLC, or in his/ her absence, any of the DLC Deputy Directors Deputy Governor, Monetary Stability Sector

F. Other provisions

- a. Value-Date of the Settlement Scheme. The value–date of the settlement value shall be the end of the month.
- b. Effectivity date. The loan settlement scheme shall be made available, as follows:
 - a) El Niño (2010) - up to 31 May 2010;
 - b) Juan - up to 30 April 2011;
 - c) Landslides and Flooding - up to 30 June 2011;
 - d) Juaning - up to 31 January 2012;
 - e) Mina - up to 29 February 2012;
 - f) Pedring - up to 31 March 2012;
 - g) Sendong - up to 30 June 2012;
 - h) Habagat - up to 28 February 2013;
 - i) Helen - up to 28 February 2013;
 - j) Gener - up to 28 February 2013;
 - k) Pablo - up to 30 June 2013;
 - l) Quinta - up to 30 June 2013;
 - m) Labuyo and Habagat - up to 31 March 2014;
 - n) Santi - up to 30 June 2014;
 - o) Earthquake that originated in Sagbayan, Bohol - up to 3 June 2014;
 - p) Yolanda - up to 30 June 2014;
 - q) Agaton - up to 30 September 2014;
 - r) Glenda - up to 31 March 2015;
 - s) Luis and Mario - up to 31 March 2015;
 - t) Ruby - up to 30 June 2015;
 - u) Seniang - up to 30 June 2015;
 - v) Ineng - up to 29 February 2016;
 - w) Lando - up to 30 April 2016;
 - x) El Niño (2016) - up to 13 November 2016;
 - y) Lawin - up to 30 April 2017;
 - z) Nina - up to 30 June 2017; and
 - aa) Josie – up to 31 January 2019.

(M-2018-024 dated 16 August 2018, Circular Nos. 974 dated 29 September 2017, 945 dated 06 February 2017, M-2017-002 dated 18 January 2017, M-2016-020 dated 08 December 2016, Circular No. 917 dated 08 July 2016, M-2016-006 dated 17 May 2016, M-2015-039 dated 04 November 2015, M-2015-035 dated 07 October 2015, M-2015-009 dated 28 January 2015, and M-2015-005 dated 20 January 2015)

**ADDITIONAL SPECIAL REGULATORY RELIEFS TO BANKS IN
AREAS SEVERELY AFFECTED BY TROPICAL DEPRESSION "YOLANDA"
(Footnote to Sec. 105 on Establishment/Relocation/Voluntary Closure/
Sale of Branches/Branch-lite Units and Other Offices, Opening of branches/branch-lite units,
Sec. 109 on Appreciation or increase in book value, 382, 921, 1101)**

Statement of Policy. The Bangko Sentral aims to provide affected banks a set of additional special regulatory reliefs that are intended to translate into direct, immediate and measurable improvements in the quality of life of calamity victims, particularly bank clients.

Scope and Coverage. All banks¹ with head offices (HO) and/or branches located in the following areas which were "severely affected" by tropical depression "Yolanda" and declared under a state of national calamity under Proclamation No. 682 dated 11 November 2013:

- a. Palawan in Region IV-B;
- b. Iloilo, Aklan and Capiz in Region VI;
- c. Cebu in Region VII; and
- d. Samar provinces and Leyte in Region VIII.

Available Reliefs. The additional special regulatory reliefs shall be in the following form:

a. *Staggered Booking of Losses Arising from Loan Write-Offs*

Banks shall be allowed to book losses on affected loans outstanding as of 07 November 2013 that are condoned and written off (partially or in full), staggered over a period of 5 years.

Banks are required, however, to disclose the regulatory relief in relevant reports in accordance with existing Bangko Sentral rules and regulations.

- b. Borrowers who benefited from the debt relief may be allowed to avail of new loans subject to appropriate credit underwriting standards. Staggered Booking of Losses Arising from Write-Down of Bank Premises, Furniture, Fixture and Equipment and ROPA Impairment losses arising from the need to write down Bank Premises, Furniture, Fixture and Equipment, and Real and Other Properties Acquired (ROPA) as of 07 November 2013 that are rendered economically useless by Typhoon Yolanda, may be recognized on a staggered period of five (5) years. The write-off shall be properly disclosed in the relevant reports in accordance with Bangko Sentral existing rules and regulations.

- c. *Condonation of Annual Supervisory Fees of TB, RB and Coop Banks* Banks with HO in the affected areas may request for condonation of the Annual Supervisory Fee for the assessable year 2014. The Bangko Sentral, after due consideration of the severity of losses incurred by the bank concerned, may condone the supervisory fees for up to 5 years, subject to application.

d. *Flexibility on Branch Relocation and Temporary Offices*

1. *Temporary Relocation of Affected Banking Offices*

Banks may relocate affected offices and branches to more viable locations within the province with a minimum of Bangko Sentral intervention.

Banks availing of temporary relocation of offices to cities/municipalities of higher classification² within the province, for instances where the capital requirement under Sec. 121 (Minimum capitalization) of this Manual is not met, shall be temporarily relieved from compliance with the additional capital requirement for a period of 6 months.

Applications for relocation of affected offices and branches to municipalities outside the province shall be evaluated on a case-to-case basis³.

¹ Universal, Commercial, Thrift, Rural and Cooperative Banks

² E.g., from Medellin, Cebu (4th class municipality with capital requirement of P10 million) to Bogo City (all other cities except Cebu and Davao cities with capital requirement of P25 million)

³ To cover situations such as relocation to an adjoining municipality that is part of another province (e.g., from Tacloban, Leyte, to Basey, Samar, which are adjacent municipalities of different provinces).

The 45-day prior notice requirement for temporary closure of offices⁴ in affected areas is hereby waived for offices that have been de facto closed since 8 November 2013. Banks are directed to post a notice to the effect that said office has been temporarily closed, together with information on the new location to service clients.

2. *Establishment of Temporary Banking Offices in Affected Areas*

Banks in affected areas may be authorized to establish temporary banking offices for a period not exceeding 6 months.

- e. *Relaxation of Reporting Requirements* TBs, RBs and Coop Banks with HO in the affected areas shall be allowed to defer their submission of periodic reports for 6 months.

Banks with branches in the affected areas may defer the submission of branch reports for a period of 6 months. The HO may submit consolidated reports without the report of the affected branches for a period of 6 months.

- f. *Relaxation on the Presentation of Required Clients' Documents*

Industry associations or federations are enjoined to come up with common guidelines for the reconstitution of documents (both clients and banks) for adoption of member banks in the severely affected areas. The common guidelines shall include measures addressing clients' concerns such as relaxation in the presentation of required documents when accessing financial services without sacrificing appropriate controls.

Availment. Banks in the "severely affected" areas may avail themselves of the additional special regulatory reliefs by submitting a letter-request to the appropriate supervising department of the Bangko Sentral, specifying the particular reliefs they will be availing of, together with the justifications therefor.

Sanctions. In the event that the availing bank is found to have abused the policy, the additional special reliefs granted shall be reversed and set aside, and the availing bank shall be subject to appropriate sanctions.

⁴ Required under Sec. 105 (Opening of branches/branch-lite units).

GUIDELINES ON BANKS' INTERNAL CAPITAL ADEQUACY ASSESSMENT PROCESS

(Appendix to Sec. 130)

A. Introduction

1. This document sets out the broad guidelines that UBs and KBs (hereinafter referred to as 'banks') should follow in the design and use of their Internal Capital Adequacy Assessment Process (ICAAP). A bank's ICAAP supplements the Bangko Sentral's Risk-Based Capital Adequacy Framework (the Framework) as contained in existing regulations and, thus, must be applied on a group-wide basis, i.e., it should cover all of a bank's subsidiaries and affiliates.
2. Although the Framework prescribes the guidelines for determining banks' minimum regulatory capital requirements in relation to their exposure to credit risk, market risk and operational risk, a bank's Board of Directors and senior management are still ultimately responsible in ensuring that the bank maintains an appropriate level and quality of capital commensurate not just with the risks covered by the Framework, but also with all other material risks to which it is exposed. Hence, a bank must have in place an ICAAP that takes into account all of these risks.

B. Guiding principles

1. Banks must have a process for assessing their capital adequacy relative to their risk profile (an ICAAP).
2. The ICAAP is the responsibility of banks. Banks are responsible for setting internal capital targets that are consistent with their risk profile, operating environment, and strategic/business plans. The ICAAP should be tailored to a bank's circumstances and needs, and it should use the inputs and definitions that a bank normally uses for internal purposes.
3. Banks' ICAAP (i.e., the methodologies, assumptions and procedures) and other policies supporting it (e.g., capital policy, risk management policy, etc.) should be formally documented, and they should be reviewed and approved by the board. The results of the ICAAP should also be regularly reported to the board.

In addition, the board and senior management are responsible for integrating capital planning and capital management into banks' overall management culture and approach. They should ensure that formal capital planning and management policies and procedures are communicated and implemented group-wide and supported by sufficient authority and resources.

Banks' ICAAP document should be submitted to the appropriate supervising department of the Bangko Sentral every 31 March of each year. A suggested format of the ICAAP submission to the Bangko Sentral is provided in Annex A of *Appendix 94*.

4. The ICAAP should form an integral part of banks' risk management processes so as to enable the board and senior management to assess, on an on-going basis, the risks that are inherent in their activities and material to their bank. This could range from using the ICAAP in more general business decisions (e.g., expansion plans) and budgets, to the more specific decisions such as allocating capital to business units, or to having it play a role in the individual credit decision process.
5. The ICAAP should be reviewed by the board and senior management at least annually, or as often as is deemed necessary to ensure that risks are covered adequately and that capital coverage reflects the actual risk profile of their bank. Moreover, any changes in a bank's strategic focus, business plan, operating environment or other factors that materially affect assumptions or methodologies used in the ICAAP should initiate appropriate adjustments to the ICAAP. New risks that occur in the business of a bank should be identified and incorporated into the ICAAP. The ICAAP and its review process should be subject to independent internal or external review. Results thereof should be communicated to the board and senior management.
6. Banks should set capital targets which are consistent with their risk profile, operating environment, and business plans. Banks, however, may take other considerations into account in deciding how much capital to hold, such as external rating goals, market reputation and strategic goals. If these other considerations are included in the process, banks must be able to show to the Bangko Sentral how they influenced their decisions concerning the amount of capital to hold.
7. The ICAAP should capture the risks covered under the Framework – credit risk, market risk, and operational risk. If applicable, banks should disclose major differences between the treatments of these risks in the calculation of minimum regulatory capital requirement under the Framework and under the ICAAP. In

addition, the ICAAP should also consider other material risks that banks are exposed to, albeit that there is no standard definition of materiality. Banks are free to use their own definition, albeit that they should be able to explain this in detail to the Bangko Sentral, including the methods used, and the coverage of all material risks. These other material risks may include any of the following:

- a. Risks not fully captured under the Framework, for example, credit concentration risk, risk posed by non-performing assets, risk posed by contingent exposures, etc.;
 - b. Risks not covered under the Framework. As a starting point, banks may choose to use the other risks identified under Sec. 141 (*Supervision by Risk*). Some of these risks are less likely to lend themselves to quantitative approaches, in which cases banks are expected to employ more qualitative methods of assessment and mitigation. Banks should clearly establish for which risks a quantitative measure is warranted, and for which risks a qualitative measure is the correct risk assessment and mitigation tool; and
 - c. Risk factors external to banks. These include risks which may arise from the regulatory, economic or business environment.
8. Banks should have a documented process for assessing risks. This process may operate either at the level of the individual banks within the banking group, or at the banking group level. Banks are likely to find that some risks are easier to measure than others, depending on the availability of information. This implies that their ICAAP could be a mixture of detailed calculations and estimates. It is also important that banks not rely on quantitative methods alone to assess their capital adequacy, but include an element of qualitative assessment and management judgment of inputs and outputs. Non-quantifiable risks should be included if they are material, even if they can only be estimated. This requirement might be eased if banks can demonstrate that they have an appropriate policy for mitigating/managing these risks.
9. The ICAAP should take into account banks' strategic plans and how they relate to macro-economic factors. Banks should develop an internal strategy for maintaining capital levels which can incorporate factors such as loan growth expectations, future sources and uses of funds and dividend policy, and any procyclical variation of minimum regulatory capital requirements.

Banks should also have an explicit, board-approved capital plan which states their objectives and the time horizon for achieving those objectives, and in broad terms the capital planning process and the responsibilities for that process. The plan should also lay out how banks will comply with capital requirements in the future, any relevant limits related to capital, and a general contingency plan for dealing with divergences and unexpected events (for example, raising additional capital, restricting business, or using risk mitigation techniques).

In addition, banks should conduct appropriate scenario/stress tests which take into account, for example, the risks specific to the particular stage of the business cycle. Banks should analyze the impact that new legislation/regulation, actions of competitors or other factors may have on their performance, in order to determine what changes in the environment they could sustain.

10. The results and findings of the ICAAP should feed into banks' evaluation of their strategy and risk appetite. For less sophisticated banks in particular, for which genuine strategic capital planning is likely to be more difficult, the results of the process should mainly influence the bank's management of its risk profile (for example, via changes to its lending behavior or through the use of risk mitigants). The ICAAP should produce a reasonable overall capital number and assessment. Banks should be able to explain to the Bangko Sentral's satisfaction the similarities and differences between its ICAAP and its minimum regulatory capital requirements under the Framework.

C. ICAAP Methodologies

1. While banks may use simple or model-based ICAAP methodologies depending on what they think is appropriate for them (please see Annex B of *Appendix 94* for description of the different broad classification of methodologies), at the minimum, the Bangko Sentral expects banks to adopt an ICAAP based on the minimum regulatory capital requirement under the Framework and, where applicable, assess extra capital proportionate to the other risks that are not covered under said Framework. This requires an assessment first of whether the risks covered under the Framework - credit risk, market risk and operational risk - are fully captured, and second, how much capital to allocate against other risks and external factors.
2. Regardless of which methodology a bank decides to adopt, it should compare its actual and future projected capital with the actual and future internal capital need arising from the assessment. The actual calculation and allocation of capital always needs to be supplemented by sufficiently robust qualitative procedures, measures and provisions to identify, manage, control and monitor all risks.

3. The ICAAP will always consist of two parts. One part covers all steps necessary for assessing the risks. The other part covers all steps necessary to assess the actual capital (risk-taking capacity). As these two parts will always meet at the end of the ICAAP and have to be in balance, there is no procedure which says which part has to be assessed first.

4. After choosing its ICAAP methodology, a bank could take its thinking through the following steps in developing the ICAAP:

- a. Risk identification

A bank could prepare a list of all material risks to which it is exposed; for that purpose it may find it useful to identify and consider its largest past losses and whether those losses are likely to recur. The identification of all material risk to which a bank is exposed should be conducted in a forward looking manner.

- b. Capital assessment

For all the risks identified through the process above, a bank could then consider how it would act, and the amount of capital that would be absorbed, in the event that one or more of the risks identified was to materialize.

- c. Forward capital planning

A bank could then consider how its capital need as calculated above might change in line with its business plans over its strategic time horizon, and how it might respond to these changes. In doing so, a bank may want to perform a sensitivity analysis to understand how sensitive its capital is to changes in internal and external factors such as business risks, and changes in economic/business cycles.

- d. ICAAP outcome

Finally, a bank should document the ranges of capital required as identified above and form an overall view on the amount of internal capital which it should hold.

(Circular Nos. 1042 dated 25 July 2019 and 869 dated 30 January 2015)

INTERNAL CAPITAL ADEQUACY ASSESSMENT PROCESS (Suggested Format)

The Bangko Sentral expects that there would be a fair degree of variation in the length and format of submissions since banks' business and risk profiles differ. As such the ICAAP document should be proportional to the size, nature and complexity of a bank's business.

This format has been provided as a starting point. Banks are not required to adopt this format. However, adopting this format may be convenient for banks as it covers the minimum issues which typically would be the subject of review by the Bangko Sentral and may therefore make the review process more efficient for both the bank and the Bangko Sentral. Equally, use of this template is not a substitute for being aware of the relevant rules.

What is an ICAAP document?

An ICAAP document is a bank's explanation to the Bangko Sentral of its internal capital adequacy assessment process. While this may be based on existing internal documentation from numerous sources, the Bangko Sentral will clearly find it helpful to have a summary prepared to communicate the key results and issues to it at a senior level. Since the Bangko Sentral will be basing many of its views on the information contained in the ICAAP document, the bank's board of directors and senior management should have formally approved its contents. As such, the Bangko Sentral would expect the ICAAP document to be in a format that can be easily understood at a high level and to contain all the relevant information that is necessary for the bank and Bangko Sentral to make an informed judgment and decision as to the appropriate capital level and risk management approach.

Where appropriate, technical information on risk measurement and capital methodologies, and all other works carried out to validate the approach (e.g., board papers and minutes, internal or external reviews) could be contained in appendices.

1. EXECUTIVE SUMMARY

The purpose of the Executive Summary is to present an overview of the ICAAP methodology and results. This overview would typically include:

- i. The purpose of the report and which group entities are covered by the ICAAP;
- ii. The main findings of the ICAAP analysis:
 - How much and what composition of internal capital the bank considers it should hold as compared with the capital adequacy requirement under the existing Bangko Sentral Risk-Based Capital Adequacy Framework (the Framework), and
 - The adequacy of the bank's risk management processes given the risks assumed;
- iii. A summary of the financial position of the business, including the strategic position of the bank, its balance sheet strength, and future profitability;
- iv. Brief descriptions of the capital and dividend plan; how the bank intends to manage capital going forward and for what purposes;
- v. Commentary on the most material risks, why the level of risk is acceptable or, if it is not, what mitigating actions are planned;
- vi. Commentary on major issues where further analysis and decisions are required; and
- vii. Who has carried out the assessment, how it has been challenged, and who has approved it.

2. BACKGROUND

This section would cover the relevant organizational structure and business lines, and historical financial data for the bank (e.g., group structure (legal and operational), operating profit, profit before tax, profit after tax, dividends, equity, capital resources held and as compared with regulatory requirements, total loans, total deposits, total assets, etc., and any conclusions that can be drawn from trends in the data which may have implications for the bank's future).

3. CAPITAL ADEQUACY

This section could start with a description of the risk appetite used in the ICAAP. It is vital for the Bangko Sentral to understand whether the bank is presenting its view regarding: (1) the amount of capital required to meet minimum regulatory needs, or (2) the amount of capital that a bank believes it needs to meet its business objectives (e.g., whether the capital required is based on a particular desired credit rating, or includes buffers for strategic purposes, or minimizes the chances of breaching regulatory requirements). A description of the methodology used to assess the bank's capital adequacy should also be included.

The section would then include a detailed review of the capital adequacy of the bank.

The information provided would include:

Timing

- i. The effective date of the ICAAP calculations together with consideration of any events between this date and the date of submission which would materially impact the ICAAP calculation together with their effects; and
- ii. Details of, and rationale for, the time period over which capital has been assessed.

Risks analyzed

- i. An identification of the major risks faced in each of the following categories:
 - credit risk;
 - market risk;
 - interest rate risk in the banking book;
 - liquidity risk;
 - operational risk;
 - compliance risk;
 - strategic/business risk; and
 - reputation risk;
- ii. And for each, an explanation of how the risk has been assessed and, where appropriate, the quantitative results of that assessment;
- iii. Where relevant, a comparison of that assessment with the results of the assessment under the Framework (specifically for credit risk, market risk, and operational risk);
- iv. A clear articulation of the bank's risk appetite by risk category if this varies from the assessment; and
- v. Where relevant, an explanation of any other methods apart from capital used to mitigate the risks.

The discussion here would make clear which additional risks the bank considers material to its operation and, thus, would warrant additional capital on top of that required for credit risk, market risk, and operational risk under the Framework.

Methodology and assumptions

A description of how assessments for each of the major risks have been approached and the main assumptions made.

At a minimum, the Bangko Sentral expects banks to base their ICAAP on the results of the capital adequacy requirement under the Framework and additional risks, where applicable, should be assessed separately.

Capital transferability

Details of any restrictions that may curtail the management's ability to transfer capital into or out of the business(es) covered, for example, contractual, commercial, regulatory or statutory restrictions that apply.

4. CURRENT AND PROJECTED FINANCIAL AND CAPITAL POSITIONS

This section would explain the current and expected changes to the business profile of the bank, the environment in which it expects to operate, its projected business plans (by appropriate lines of business), and projected financial position for, say three to five years.

The starting balance sheet and date as of which the assessment is carried out would be set out.

The projected financial position might consider both the projected capital available and projected capital resource requirements to support strategic/business initiatives. These might then provide a baseline against which adverse scenarios (please see Capital Planning below) might be compared.

Given these business plans, this section would also discuss the bank's assessment on whether additional capital is necessary on top of that assessed to cover their existing risk exposures, as well as future planned sources of capital.

5. CAPITAL PLANNING

This section would explain how a bank would be affected by an economic recession or downswings in the business or market relevant to its activities. The Bangko Sentral is interested in how a bank would manage its business and capital so as to survive a recession/market disruption while meeting minimum regulatory standards. The analysis would include financial projections forward for, say, three to five years based on business plans and solvency calculations. Likewise, a bank should disclose here the key assumptions and other factors that would have significant impact on its financial condition, in conducting scenario analyses/stress testing.

Typical scenarios would include how an economic downturn/market disruption would affect:

- i. the bank's capital resources and future earnings; and
- ii. the bank's capital adequacy requirement under the Framework taking into account future changes in its projected balance sheet.

It would also be helpful if these projections showed separately the effects of management potential actions to change the bank's business strategy and the implementation of contingency plans.

In addition, banks are encouraged to include an assessment of any other capital planning actions that would be necessary to enable it to continue to meet its regulatory capital requirements throughout a recession/market disruption such as new capital injections from related companies or new share issues.

Given the projected capital needs arising from an economic recession or business/market downswings, this section would also discuss the bank's assessment on whether additional capital is necessary on top of that assessed to cover their existing risk exposures and business plans.

6. CHALLENGE AND ADOPTION OF THE ICAAP

This section would describe the extent of challenge and testing of the ICAAP. Banks should describe the review and sign-off procedures used by senior management and the board. It might also be helpful if a copy of any relevant report to senior management or the board and their response were attached.

Details of the reliance placed on any external suppliers would also be detailed here, e.g. for generating economic scenarios.

In addition, a copy of any report obtained from an external reviewer or internal audit would also be included.

7. USE OF THE ICAAP WITHIN THE BANK

This section would describe the extent to which capital management is embedded within the bank including the extent and use of scenario analysis and/or stress testing within the bank's capital management policy, e.g., in business decisions (e.g., expansion plans) and budgets, or in allocating capital to business units, or in individual credit decision process.

Banks should include a statement of the actual operating philosophy on capital management and how this links to the ICAAP. For instance differences in risk appetite used in the ICAAP as compared to that used for business decisions might be discussed.

Lastly, it would be helpful if details on any anticipated future refinements within the bank's ICAAP (highlighting those aspects which are work-in-progress), as well as any other information that would help the Bangko Sentral review the bank's ICAAP could be provided.

ALTERNATIVE INTERNAL CAPITAL ADEQUACY ASSESSMENT PROCESS METHODOLOGIES

This appendix outlines ICAAP methodologies which banks may adopt in lieu of that based on the minimum regulatory capital requirement under the Bangko Sentral Risk-Based Capital Adequacy Framework (the Framework). However, the choice of methodology should clearly be commensurate with banks' ability to collect the necessary information and to calculate the necessary inputs in a reliable manner.

Structured approach - In this case, banks will need to set the internal capital requirement at a starting point of zero capital and then build on capital due to all risks (both those captured under the Framework and those that are not) and external factors. This methodology could be seen as a simple model for calculating economic capital and is not based on the minimum regulatory capital requirement. A sensitivity analysis could form the starting point. The sensitivity analysis should be based on an exceptional but plausible scenario. Risks which are not included in the sensitivity analysis should also be considered in terms of the structured approach.

Allocation-of-risk-taking approach – In this approach, banks might start with its actual capital and break it down to all its material risks. This step in the process requires quantification or at least an estimation method for various risks. The amount of capital provided for each risk category is determined by the current and envisaged amount of risk in each category, a risk buffer and their risk appetite. Banks will decide which type of risk quantification/estimation method is suitable and sufficient for its particular use. If the allocated capital seems insufficient, either the risk has to be reduced or capital has to be raised. The allocated amounts of the capital will therefore work as a limit system, which assists and facilitates banks in balancing their risk-taking capacity and their risks.

Formal economic capital models – These are expected to be used eventually by banks that use advanced approaches in determining the minimum regulatory capital requirement, or those that have substantial derivatives and structured products transactions (i.e., those that have expanded dealer and/or user capabilities).

GUIDELINES ON THE BANGKO SENTRAL'S SUPERVISORY REVIEW PROCESS

(Appendix to Sec. 130)

A. Introduction

1. The Bangko Sentral's supervisory review process (SRP) in the context of this document involves (1) an evaluation of banks' internal capital adequacy assessment processes (ICAAP) and their output, (2) a dialogue with banks with regard to their ICAAP, and (3) the prudential measures that may be taken to address issues identified. These guidelines should be observed mainly by the appropriate Central Point of Contact Department (CPCD) within the Bangko Sentral and, where appropriate for on-site validation during regular examination, by the examination personnel. This therefore supplements the existing guidelines set out in the Manual of Examinations, the CAMELS Rating, and the Risk Assessment System (RAS). The CPCD may draft, for its own use, detailed guidelines on the conduct of the assessment of banks' ICAAP and of the Bangko Sentral - bank dialogue.
2. Although these guidelines are directed mainly at Bangko Sentral supervision and examination personnel, banks will have a clear interest in knowing the approach the Bangko Sentral intends to take in assessing their capital adequacy.

B. Guiding principles in assessing banks' ICAAP

1. As a first step, the Bangko Sentral should evaluate banks' compliance with the minimum regulatory capital requirements as prescribed under the Framework. This would involve the verification of banks' calculation of their risk weighted assets (RWA) and capital adequacy ratio (CAR). The minimum regulatory capital requirements should always be the starting point in the assessment of banks' capital adequacy. The validated CAR should then be compared with the required capital resulting from the ICAAP.
2. Next, the assessment of banks' ICAAP should include an evaluation of their assumptions, components, methodologies, coverage and outcome. This review should cover both banks' risk management processes and their assessment of adequate capital. The Bangko Sentral should review how banks assess the other risks they are exposed to, especially Elements 2 to 4 listed in Item "C.4" hereof, the controls they have in place to mitigate these risks, as well as the adequacy and composition of capital held against those risks.
3. The Bangko Sentral should then identify existing or potential problems and key risks faced by banks, the deficiencies in their control and risk management frameworks, and the degree of reliance that can be placed on the outputs of their ICAAP. This process will enable the Bangko Sentral to tailor its approach for each individual bank and will provide the foundation for the Bangko Sentral's general approach for each bank and its actions.
4. The Bangko Sentral's evaluation of the adequacy of banks' capital in relation to their risk profile would serve as the basis for assigning a rating for the Capital component of the bank's CAMELS rating. It would also serve as the basis for identifying any prudential measures or other supervisory actions required. For example, where there is an imbalance between business and risk controls, the Bangko Sentral should consider the range of remedial supervisory actions that may be needed to rectify a deficiency in controls and/or perceived shortfalls in capital, either as a long-term requirement(s) or as a short-term action(s).
5. The results of the SRP will be communicated to the board and senior management of banks together with any action that is required of them and any significant action planned by the Bangko Sentral. This may be done as part of the dialogue between the Bangko Sentral and each bank on the ICAAP.
6. In evaluating the ICAAP of branches of foreign banks in the Philippines, the Bangko Sentral will refer to the home supervisor's consolidated assessment of the ICAAP of the head office/parent bank. The Bangko Sentral will also take into account the strength and availability of parental support.

C. Guiding principles on Bangko Sentral -bank dialogue

1. A key element of the SRP is the dialogue between the Bangko Sentral and each bank. The dialogue will inform the Bangko Sentral about the way each bank's ICAAP is structured, and the assumptions and methodologies which are used to assess its risk exposures.

2. The ICAAP document, which banks are required to submit to the Bangko Sentral every January of each year (suggested format is in *Annex A of Appendix 94*), will be the basis for the Bangko Sentral -bank (specifically, BSP-CPCD) dialogue. This dialogue may feed into the regular examination, and the findings of the regular examination may in turn feed into the dialogue. The Bangko Sentral will determine the nature and depth of the dialogue, based on the type and complexity of the bank.
3. Banks should be able to justify their processes for identifying and measuring their risks as well as how much capital, if any, they allocate against them, taking into account other qualitative mitigants of risk. Banks should be able to explain any differences between their own assessment of capital needs and targets under the ICAAP and the minimum regulatory capital requirements prescribed under the Framework.
4. The dialogue should embrace the following four main elements:
 - a. Element 1: Risks covered under the Framework (i.e., credit risk, market risk, and operational risk);
 - b. Element 2: Risks *not fully* covered under the Framework (for example, credit concentration risk, risk posed by non-performing assets, risk posed by contingent exposures, etc.);
 - c. Element 3: Risks *not* covered under the Framework (other risks identified under Circular No. 510 dated 3 February 2006); and
 - d. Element 4: External factors, which include risks which may arise from the regulatory, economic or business environment.
5. Aside from these four main elements, the dialogue should also cover the quality of internal governance of banks, including risk controls, compliance and internal audit, as well as operational and organizational structure.
6. For the SRP to be effective, the Bangko Sentral will need to develop a sufficiently thorough understanding of how the ICAAP is determined and the differences between it and the minimum regulatory capital requirement under the Framework. This would help in evaluating the ICAAP outcome. The SRP emphasizes the importance of analyzing the main elements, and understanding the differences between ICAAP assumptions and minimum regulatory capital requirement assumptions.
7. Once the process has begun, the dialogue will provide the opportunity for iteration between the ICAAP and SRP, with each informing the other, i.e., banks may make changes to the ICAAP in the course of the dialogue, in response to challenge and feedback from the Bangko Sentral, and vice versa. Following the dialogue, the Bangko Sentral will reach an assessment.

D. Guidelines on prudential measures

If the Bangko Sentral considers that a bank's ICAAP does not adequately reflect its overall risk profile, or does not result in the bank having adequate capital, then consideration should be given to applying prudential measures.

1. The measures available to the Bangko Sentral include:
 - a. Requiring the bank to improve its internal control and risk management frameworks;
 - b. Requiring the bank to reduce the risk inherent in its activities, products and systems;
 - c. Restricting or limiting the business, operations or network of the bank;
 - d. Limiting or prohibiting the distribution of net profits and requiring that part or all of the net profits be used to increase the capital accounts of the bank; and
 - e. Requiring the bank to increase its capital.
2. The choice of prudential measures should be determined according to the severity and underlying causes of the situation and the range of measures and sanctions available to the Bangko Sentral. Measures can be used individually or in combination. The requirement to increase capital should, however, be imposed on any bank which exhibits an imbalance between its business risks and its internal control and risk frameworks, if that imbalance cannot be remedied by other prudential measures or supervisory actions within an appropriate timeframe.
3. The requirement to increase capital may also be set where the Bangko Sentral judges the existing capital held by a bank to be inherently inadequate for its overall risk profile. It must be acknowledged that there is no 'scientific' method for determining the amount, and that capital is not a long-run substitute for remedying deficiencies in

systems and controls. In practice, the process relies heavily on subjective judgment and peer-group consistency to ensure a level playing field and a defense to possible challenge that may be posed by banks.

4. Prudential measures should be communicated promptly and in sufficient detail. In communicating its decision on prudential measures, the Bangko Sentral should:
 - a. Explain in sufficient detail the factors which have led to the risk assessment conclusions;
 - b. Indicate areas of weakness and the timeframe for remedial action;
 - c. Explain the reasons for any additional capital requirement; and
 - d. Indicate what improvements could be made to systems and controls to make them adequate for the risks and activities of the bank, and for this improvement to be reflected in the bank's capital requirements.

**SUPPLEMENTAL GUIDELINES ON THE INTERNAL CAPITAL ADEQUACY ASSESSMENT PROCESS (ICAAP)
AND SUPERVISORY REVIEW PROCESS (SRP) FOR FOREIGN BANK BRANCHES
(Appendix to Sec. 130)**

In implementing the provisions of Section 130 and *Appendices 94 and 95*, the Bangko Sentral shall consider the following guidelines with respect to the ICAAP and the related SRP for foreign bank branches:

1. The guiding principles for banks' ICAAPs and SRP in *Appendix 94 and 95* respectively shall apply to foreign bank branches on a proportionate basis. In this regard, the Bangko Sentral expects that there will be variation in foreign banks branches' ICAAPs in accordance with the nature, size and complexity of their business in the Philippines;
2. The Bangko Sentral will primarily be interested in finding out how a foreign bank branch assesses its capital in relation to its business plans and operations in the Philippines;
3. The ICAAP of a foreign bank branch should cover risks arising from the occurrence of domestically-oriented scenarios. It should also take into account the specific circumstances of the branch, i.e., regulatory commitments in relation to special licenses or authorities, etc.;
4. The Bangko Sentral acknowledges that a foreign bank branch is likely to make use of the methodology of the head office/parent bank for its own ICAAP or portion thereof. However, the branch should be able to explain that such processes and methodologies are appropriate to its business in the Philippines;
5. A branch must include in its ICAAP how capital is being allocated to the branch and the factors that influence this allocation. It should also be able to illustrate how this capital is managed, and how capital can be made available to the branch in a timely manner when it has been determined that there is a need to do so;
6. In line with *Appendix 95* Item "B.6" the Bangko Sentral will refer to the ICAAP developed at the level of the head office/parent bank, and the home supervisor's assessment thereof. The Bangko Sentral will look at the extent that the head office/parent bank ICAAP covers the risks of its branch in the Philippines, including the possible impact of scenarios that primarily affect the operations of the head office/parent bank on the operations and capital adequacy of the branch; and
7. The ICAAP document¹ of foreign bank branches should be submitted to the appropriate supervising department of the Bangko Sentral on or before 31 March of each year. Banks may refer to Annex A of *Appendix 94* for the suggested format of the document. While a common outline facilitates the Bangko Sentral's evaluation, banks are not precluded from modifying the format and content of the ICAAP document if certain sections or suggested content do not apply to the operations of the branch, or, if presenting the information in another way would best reflect the internal capital assessment process of the branch.

(Circular No. 869 dated 30 January 2015)

¹ A "trial" ICAAP document shall be submitted to the CPCD of the Bangko Sentral on or before 30 September 2011. (Circular 731 dated 28 July 2011, as amended by Circular No. 869 dated 30 January 2015)

EFFECTIVE INTEREST CALCULATION MODELS
(Appendix to Sec. 305 on Method of Computing Interest)

**GUIDELINES ON OUTSOURCING OF SERVICES BY ELECTRONIC MONEY ISSUERS (EMIs) TO
ELECTRONIC MONEY NETWORK SERVICE PROVIDERS (EMNSP)
(Appendix to Section 702 on Outsourcing of Services by EMIs to EMNSP)**

- I. *Statement of Policy.* It is the goal of the Bangko Sentral to achieve a truly inclusive financial system. In line with achieving this goal, the Bangko Sentral recognizes the potential of electronic money (E-Money) as an instrument to facilitate delivery of financial services affordably to the low-income, unbanked or underserved segments of the population, particularly in non-urbanized areas. The Bangko Sentral likewise recognizes that efficient and effective delivery of financial services may necessitate Electronic Money Issuers (EMI) to develop business models that utilize outsourcing arrangements, considering the specialized operational and technological requirements in an E-money business. Outsourcing, however may introduce an EMI to certain operational and reputational risks that need to be properly managed. The Bangko Sentral hereby issues the following guidelines to govern the outsourcing of E-Money related services.
- II. *Definition.* An Electronic Money Network Service Provider (EMNSP) shall refer to a non-financial institution that provides automated systems, network infrastructure, including a network of accredited agents utilizing the systems, to enable clients of an EMI to perform any or all of the following:
 - a. Convert cash to E-money and monetize e-money;
 - b. Transfer funds from one electronic wallet to another;
 - c. Use E-money as a means of payment for goods and services; and
 - d. Conduct other similar and/or related e-money activities/transactions.
- III. *Application to outsource.* An EMI intending to outsource the services contemplated under Item “2” shall limit itself to an EMNSP as an outsource entity, and shall follow the procedures for outsourcing information technology systems/processes as provided under Section 112. In addition to the documentary requirements under said Section, an EMI should also submit a certification signed by its President or any officer of equivalent rank and function certifying that a due diligence review had been conducted and that the selected EMNSP has met the minimum requirements provided under Item “V”.
- IV. *Responsibilities of an EMI.* Relative to the outsourcing of services to an EMNSP, it shall be the responsibility of an EMI to:
 - a. Conduct due diligence review on an EMNSP in accordance with Item “V”;
 - b. Ensure that the relationship/ arrangement with an EMNSP is supported by a written contract that should contain, at a minimum, the requirements prescribed under Section 112. The contract should also stipulate that:
 - (1) the EMNSP shall allow the Bangko Sentral to have access and to examine the E-money system, network infrastructure, operation of the network of accredited agents and all operations related to E-money services being outsourced by the EMI for the purpose of assessing the confidentiality, integrity, and reliability of the E-money system and determining compliance with Bangko Sentral rules and regulations;
 - (2) that the EMNSP shall not further outsource or subcontract the activity being outsourced to the EMNSP; and
 - (3) that interconnection by the EMNSP with other networks shall be limited to networks of other EMNSPs and the Bangko Sentral - recognized ATM consortia.
 - c. Ensure that the EMNSP employs a high degree of professional care in performing the outsourced activities as if these were conducted by the EMI itself. This would include, among others, making use of monitoring and control procedures to ensure compliance at all times with applicable Bangko Sentral rules and regulations;
 - d. Ensure that the EMNSP has an accreditation process in the selection of agents participating in the retail network for the conversion of cash to E-money and its monetization and that the EMNSP has instituted mechanism to manage sufficient liquidity in the system/network.
 - e. Ensure that the EMNSP enforces a program that requires all cash-in and cash out agents under its network to undergo AML trainings and re-trainings every two (2) years; and

- f. Comply with all laws and Bangko Sentral rules and regulations covering the activities outsourced to the EMNSP, especially on compliance with anti-money laundering (AML) requirements.

- V. *Due Diligence and Continuing Operational Review.* Prior to entering into an outsourcing arrangement with an EMNSP, an EMI should conduct appropriate due diligence review to assess the capability of an EMNSP in performing the service to be outsourced. The due diligence should take into consideration both qualitative and quantitative factors affecting the performance of the outsourced service, such as the financial condition and results of operation for the previous year/s, risk management practices, technical expertise which involve monitoring the velocity of e-money transactions and aggregation of monthly limits, among others, market share, reputation (both the company and its stockholders) and compliance with anti-money laundering requirements and Bangko Sentral rules and regulations.

An EMI should make sure that the EMNSP adheres to international standards on IT governance, information security, and business continuity in the performance of its outsourced activities. An EMI should endeavor to obtain independent reviews and market feedback on the EMNSP to supplement its own findings.

Operational review by an EMI of the EMNSP should be undertaken at least on an annual basis as part of risk management. This review should be documented as part of an EMI's monitoring and control process.

- VI. *Delineation of Responsibilities.* The EMI and EMNSP shall identify, delineate and document the responsibilities and accountabilities of each party as regards the outsourcing arrangement, including planning for contingencies. Notwithstanding any contractual agreement between an EMI and an EMNSP on the sharing of responsibility, the EMI shall be responsible to its customers, without prejudice to further recourse, if any, by the EMI to the EMNSP.
- VII. *Confidentiality and Security.* An EMI should review and monitor the security practices and control processes of the EMNSP on a regular basis, including commissioning or obtaining periodic expert reports on adequacy of security to maintain the confidentiality and integrity of data, and compliance with internationally- recognized standards in respect to the operations of the EMNSP. Considering that the EMNSP may service more than one EMI, the EMI should ensure that records pertaining to its transactions are segregated from those of other EMIs.

The EMI and EMNSP shall identify circumstances under which each party has the right to change security requirements. An EMNSP should be required to report immediately any security breaches to the EMI.

In addition, the EMI should make sure the EMNSP have documented business continuity plans in place and that said plan periodically reviewed and tested with no significant test findings. An EMNSP shall provide the EMI with timely and adequate notification on any adverse development that may impact the former's performance and delivery of service to the EMI.

- VIII. *EMI-Others intending to be an EMNSP.* An EMI-Others that intend to be an EMNSP because of its specialized technical expertise shall comply with the requirements for an EMNSP. In addition, an EMI-Others shall undertake risk- mitigating measures to ensure that liquid assets, corresponding to the outstanding balance of E-money issued by the EMI-Others and maintained pursuant to Sec. 702, be insulated from risks arising from its liabilities as EMNSP. These measures may include ring fencing the liquid assets through an escrow or trust account in a financial institution acceptable to Bangko Sentral .
- IX. *Sanctions.* Violations committed by EMIs pertaining to outsourcing of activities to EMNSP shall be subject to monetary penalties as graduated under *Appendix 24* and/or other non-monetary sanctions under Section 37 of RA No. 7653.
- X. *Transitory Provisions.* EMIs that were granted an authority to outsource their E-Money activities to an EMNSP may continue to exercise such authority provided that they have to conform to this guidelines within a six (6)-month period from date of its effectivity.

FORMAT OF CERTIFICATION ON COMPLIANCE WITH RULES AND REGULATIONS ON THE RECLASSIFICATION OF REAL AND OTHER PROPERTIES ACQUIRED (ROPA) TO BANK PREMISES, FURNITURE, FIXTURE AND EQUIPMENT
(Appendix to Sec. 109 on Bank Premises and Other Fixed Assets)

Annex A

Deadline within five (5) banking days
from date of reclassification

CERTIFICATION ON COMPLIANCE WITH RULES AND REGULATIONS ON THE RECLASSIFICATION OF REAL AND OTHER PROPERTIES ACQUIRED (ROPA) TO BANK PREMISES, FURNITURE, FIXTURE AND EQUIPMENT

(Name of Bank)

I hereby certify that the reclassification of Real and Other Properties Acquired (ROPA) to Bank Premises, Furniture, Fixture and Equipment was made in accordance with the provisions of Section 109, in particular, I certify that:

1. The reclassification, which involves the property(ies) described in Schedule 1 was duly authorized by (name of bank)'s board of directors, in a (specify whether regular/special meeting of the board) held on (specify date of board meeting) for the purpose stated therein;
2. The approval of said reclassification was manifested in a resolution passed by the board of directors of (name of bank) during the meeting, a certified true copy of which is attached as Annex A. Said resolution of the board of directors, along with the supporting records and documents involving the reclassified ROPA account, shall be made available for inspection by Bangko Sentral examiners;
3. Only such acquired asset or a portion thereof, that will be (i) immediately used, or (ii) ready and available for use within a two (2)-year period from the date of reclassification (in case of ROPA earmarked for future use) was reclassified to Bank Premises, Furniture, Fixture and Equipment;
4. ROPA reclassified to Bank Premises, Furniture, Fixture and Equipment was recorded at its net carrying amount where the amounts booked as cost, accumulated depreciation and allowance for losses for bank premises, furniture, fixture and equipment corresponds to the balance of these accounts under ROPA at the time of reclassification. As such no gains/(losses) were recognized in our books from such reclassification; and
5. The reclassification did not cause the bank to exceed the prescribed ceiling on investment in real estate and improvements thereon, including bank equipment, under Section 109, as shown below.

Description	Before Reclassification	After Reclassification

GUIDELINES ON THE ADOPTION OF PHILIPPINE FINANCIAL REPORTING STANDARDS 9 (PFRS 9)
FINANCIAL INSTRUMENTS – IMPAIRMENT
(Appendix to Sec. 172)

Section 1. Expected Credit Loss Model

BSFIs shall adopt the expected credit loss (ECL) model in measuring credit impairment, in accordance with the provisions of PFRS 9. In this respect, BSFIs shall recognize credit impairment/allowance for credit losses even before an objective evidence of impairment becomes apparent. BSFIs shall consider past events, current conditions, and forecasts of future economic conditions in assessing impairment.

- a) BSFIs shall apply the ECL model on credit exposures covered by PFRS 9, which include the following:
- Loans and receivables that are measured at amortized cost;
 - Investments in debt instruments that are measured at amortized cost or at fair value through other comprehensive income (FVOCI); and
 - Credit commitments and financial guarantee contracts that are not measured at fair value through profit or loss (FVTPL)
- b) Credit exposures shall classify into three (3) stages using the following time horizons in measuring ECL:

Stage of credit impairment	Characteristics	Time horizon in measuring ECL
Stage 1	– Credit exposures that are considered “performing” and with no significant increase in credit risk since initial recognition or with low credit risk	Twelve (12) months
Stage 2	– Credit exposures that are considered “under-performing” or not yet non-performing but with significant increase in credit risk since initial recognition	Lifetime
Stage 3	– Credit exposures with objective evidence of impairment, thus, considered as “non-performing”	Lifetime

- c) BSFIs shall promptly recognize and maintain adequate allowance for credit losses at all times. It shall adopt the principles provided under the Enhanced Standards on Credit Risk Management¹ in implementing sound and robust credit risk measurement methodologies that adequately considers ECL. In this respect, the ECL methodology shall not be considered as a separate and distinct process but as an important element of the entire credit risk management process.

Section 2. Twelve (12)-Month ECL

- a) BSFIs shall consider reasonable and supportable information, including forward-looking information that affect credit risk in estimating the twelve (12)-month ECL. BSFIs shall exercise experienced credit judgment and consider both qualitative and quantitative information that may affect the assessment.
- b) Zero allowance for exposures under Stage 1 shall be rare. It shall be expected only for exposures with zero percent (0%) credit risk-weight under the Risk-Based Capital Adequacy Framework, such as Philippine peso-denominated exposures to the Philippine National Government and the Bangko Sentral.

Section 3. Lifetime ECL

- a) BSFIs shall evaluate the change in the risk of default occurring over the expected life of the exposures in assessing whether these shall be moved to a lifetime ECL measure.² Although collateral will be used to measure the loss given a default, this should not be primarily used in measuring risk of a default or in transferring to different stages.

¹ Sec. 143

² PFRS 9 paragraph 5.5.9 provides that the assessment should be made in terms of the risk of a default and not on the expected credit loss (i.e., before consideration of the effects of credit risk mitigants such as collaterals or guarantees).

- b) BSFIs shall measure lifetime ECL of the following:
 - exposures that have significantly increased their credit risk from origination (Stage 2); and
 - non-performing exposures (Stage 3).

Section 4. Assessment of forward-looking information

BSFIs shall clearly demonstrate how forward-looking information, including macroeconomic factors, have been reflected in the ECL assessment and how these are linked to the credit risk drivers of the exposures. Experienced credit judgment is essential in assessing the soundness of forward-looking information and in ensuring that these are adequately supported.

Section 5. Transfer from Stage 1 to Stage 2 – Assessment of significant increase in credit risk

BSFIs shall transfer credit exposures from Stage 1 to Stage 2 if there is significant increase in credit risk from initial recognition.

- a) BSFIs shall establish well-defined criteria on what constitutes significant increase in credit risk. BSFIs shall consider a wide range of information, which includes among others, information on macroeconomic conditions, economic sector and the geographical region relevant to the borrower, and other factors that are borrower-specific. The criteria on what constitutes significant increase in credit risk shall consider, at a minimum, the list provided in PFRS 9.
- b) BSFIs shall classify exposures to Stage 2 if the exposures have potential weaknesses, based on current and/or forward-looking information, that warrant management's close attention. Said weaknesses, if left uncorrected, may affect the repayment of these exposures. BSFIs shall also classify exposures Stage 2 if there are adverse or foreseen adverse economic or market conditions that may affect the counterparty's ability to meet the scheduled repayments in the future.
- c) The Bangko Sentral shall apply the following indicators of significant increase in credit risk in BSFIs noted to have weak credit loss methodologies:
 - exposures considered especially mentioned under Sec. 143 (*Credit Classification and Provisioning*);
 - exposures with missed payment for more than thirty (30) days; and
 - exposures with risk ratings downgraded by at least two (2) grades (e.g., exposure with risk rating of "3" on the origination date was downgraded to risk rating of "5" on the reporting date) for BSFIs with below fifteen (15)-risk rating grades, and three (3) grades for BSFIs with fifteen (15) or above risk rating grades.

Section 6. Transfer from Lifetime ECL to Twelve (12)-month ECL

BSFIs shall transfer the exposures from Stage 3 (non-performing) to Stage 1 (performing) when there is sufficient evidence to support their full collection. Exposures should exhibit both the quantitative and qualitative indicators of probable collection prior their transfer. The quantitative indicator is characterized by payments made within an observation period (e.g., regularly pays during the minimum observation period). The qualitative indicator pertains to the results of assessment of the borrower's financial capacity (e.g., improvement in counterparty's situation).

As a general rule, full collection is probable when payments of interest and/or principal are received for at least six (6) months.

BSFIs shall observe the following guidelines for exposures that were restructured:

- a) Non-performing restructured exposures that have exhibited improvement in creditworthiness of the counterparty may only be transferred from stage 3 to Stage 1 after a total of one (1) year probation period [i.e., six (6) months in Stage 3 before transferring to Stage 2, and another six (6) months in Stage 2 before transferring to Stage 1; or directly from Stage 3 to Stage 1, without passing through Stage 2, after twelve (12) months]; and
- b) Restructured accounts classified as "performing" prior to restructuring shall be initially classified under Stage 2. The transfer from Stage 2 to Stage 1 will follow the six (6)-month rule mentioned in Item "a" of this Section.

Section 7. Multiple exposures to specific counterparties

In measuring the ECL to multiple exposures to a single counterparty or multiple exposures to counterparties belonging to a group of related entities, the following shall apply:

- a) *Exposures to non-retail counterparties.* BSFIs with multiple exposures to a non-retail counterparty shall measure ECL at the counterparty level. In particular, the BSFI shall consider all exposures to a counterparty as subject to lifetime ECL when any of its material exposure is subjected to lifetime ECL;
- b) *Exposures to a retail counterparty.* BSFIs with multiple exposures to a retail counterparty shall measure ECL at the transaction level. In particular, the BSFI may classify one transaction under Stage 1 and another transaction under Stage 3. However, BSFIs are not precluded from taking into account the potential of cross default, such that if one exposure is classified under Stage 3 all the other exposures may be classified under Stage 3; and
- c) *Exposures to counterparties belonging to a group of related entities.* BSFIs with multiple exposures to counterparties that belong to the same group of related entities shall measure ECL at the counterparty level (per entity). BSFIs shall likewise consider the status of the other counterparties belonging to the same group in determining the stage under which the exposures shall be classified.

Section 8. Recognition of Income

For purposes of preparing the prudential reports (e.g., Financial Reporting Package and Capital Adequacy Ratio report), BSFIs shall not recognize interest income on non-performing exposures, except when payment is received.

On the other hand, interest income recognized on non-performing exposures (Stage 3 accounts) for purposes of preparing the audited financial statements (AFS) shall be disclosed in the AFS. This shall likewise be included in the list of reconciling items between the prudential reports and the AFS that is being submitted to the Bangko Sentral.

Section 9. Off-balance sheet financial items

As a general rule, BSFIs shall recognize the ECLs on off-balance sheet exposures as a liability and booked as "Provisions-Others".

On credit facilities with partial drawdown (e.g., with loan balance and an undrawn commitment), BSFIs shall observe the following rules in accordance with PFRS 7 (*Financial Instruments: Disclosures*):

- a) If the BSFI cannot separately identify the ECL attributable to the drawn and undrawn commitment, the provision for ECL on the off-balance sheet accounts shall be presented together with the allowance for the financial asset (contra-asset); and
- b) If the combined ECL exceeds the gross carrying amount of the financial asset, the ECL should be recognized as "Provisions-Others" (liability).

BSFIs shall look beyond the contractual date when estimating the expected losses of facilities with both loan and undrawn commitment components such as the credit card portfolio.

Section 10. Application to simple BSFIs

BSFIs with simple operations shall adopt simple loan loss methodologies fundamentally anchored on the principle of recognizing ECL. In this respect, BSFIs shall look beyond the past due/misled amortizations in classifying exposures and in providing allowance for credit losses. On the other hand, BSFIs with credit operations that may not economically justify adoption of said simple loan loss estimation methodology that is compliant with PFRS 9 shall, at a minimum, be subject to the regulatory guidelines in setting up allowance for credit losses prescribed under the *Appendix 15*.

Section 11. General and Specific Provisions for Loan Accounts

- a) BSFIs shall treat Stage 1 provisions for loan accounts as General Provision (GP), while Stages 2 and 3 provisions shall be treated as Specific Provisions (SP).
- b) BSFIs shall set up general loan loss provision (GLLP) equivalent to one percent (1%) of all outstanding Stage 1 on-balance sheet loans, except for accounts considered as credit risk-free under existing regulations. BSFIs are not required to provide a one percent (1%) GP on other credit exposures covered by PFRS 9 such as off-balance sheet accounts and investments.

- c) Allowance for credit losses for Stages 1, 2 and 3 accounts shall be recognized in the profit or loss statement. In cases when the computed allowance for credit losses on Stage 1 accounts is less than the 1 percent GP required, the deficiency shall be recognized by appropriating the Retained Earnings (RE)¹ account. GP recognized in profit or loss as allowance for credit losses for Stage 1 accounts and the amount appropriated in RE shall be considered as Tier 2 capital subject to the limit provided under the Capital Adequacy Ratio (CAR) framework².
- d) BSFIs that use the guidelines provided under *Appendix 15* in determining allowance for credit losses shall book the entire amount of GP in profit or loss.
- e) BSFIs shall charge against RE the increase in ECL – SP as of 01 January 2018 as a result of the change in accounting policy.

Section 12. Expectations from Trust Entities

Consistent with the expectations from BSFIs on the adoption of PFRS 9, as provided under Item “d” of the Sec. 172 (*Philippine Accounting Standards*), the board of directors of a trust entity (TE) shall ensure that the TE appropriately and consistently adopts PFRS 9 as part of its reporting governance process.

In this respect, the board of directors shall approve policies and guidelines relative to the impairment of financial assets under management of the TE.

The TE shall adhere to the requirements of PFRS 9 on impairment and the guidelines provided herein, to the extent applicable to the trust operations. Pursuant to Item “c” of Section 1 of these guidelines (*Expected Credit Loss Model*), a TE shall promptly recognize and maintain adequate allowance for credit losses at all times.

Consistent with the provisions under Section 10 of these guidelines (*Application to simple BSFIs*), the following provisions shall apply to TEs:

- a) A TE with simple operations shall adopt simple loan loss methodologies fundamentally anchored on the principle of recognizing ECL. In this respect, the TE shall look beyond the past due/missed amortizations in classifying exposures and in providing allowance for credit losses.
- b) A TE with credit operations that may not economically justify adoption of said simple loan loss estimation methodology that is compliant with PFRS 9 shall, at a minimum, be subject to the regulatory guidelines in setting up allowance for credit losses prescribed under *Appendix 15*.

(Circular Nos. 1023 dated 04 December 2018 and 1011 dated 14 August 2018)

¹ BSFIs shall use Retained Earnings Reserve – Others as temporary account of Retained Earnings – General Provisions (RE-GP)

² As temporary presentation in CAR reports, the RE included in Common Equity Tier (CET/Core Tier 1 shall be net of RE-GP. In computing Tier 2 Capital, the General Loan Loss Provision (GLLP) shall include the RE-GP. However, the GLLP added back to on-balance sheet assets subject to risk-weight shall not include the RE-GP since when appropriating the RE, total assets is not affected.

REQUIRED CERTIFICATIONS AND EXAMPLES OF SUPPORTING DOCUMENTS FOR THE CONFIRMATION OF THE ELECTION/APPOINTMENT OF DIRECTORS/OFFICERS OF BSFIS¹
(Appendix to Sections 137, 161 and 412 on Confirmation of Election/Appointment of Directors and Officers)

DOCUMENTS REQUIRED UNDER THE REVISED OUTSOURCING FRAMEWORK FOR BANKS
(Appendix to Section 112 on Documentations)

1. A comprehensive policy on outsourcing duly approved by the board of directors of the bank.
2. Service level agreement of contract between the bank and the service provider, which shall, at a minimum, include all of the following:
 - a. Complete description of the work to be performed or services to be provided;
 - b. Fee structure;
 - c. Provisions governing amendment and pre- termination of contract;
 - d. Responsibility, fines, penalties and accountability of the service provider for errors, omissions and frauds;
 - e. Confidentiality clause covering all data and information; solidarity liability of service provider and bank for any violation of R.A. No. 1405, (the Bank Deposits Secrecy Law) actions that the bank may take against the service provider for breach of confidentiality or any form of disclosure of confidential information; and the applicable penalties;
 - f. Segregation of the data of the bank from that of the service provider and its other clients;
 - g. Disaster recovery/business continuity contingency plans and procedures;
 - h. Guarantee that the service provider will provide necessary levels of transition assistance if the bank decides to convert to other service providers or other arrangements;
 - i. Access to the financial information of the service provider;
 - j. Access of internal and external auditors to information regarding the outsourced activities/ services which they need to fulfill their respective responsibilities;
 - k. Access of Bangko Sentral to the operations of the service provider in order to review the same in relation to the outsourced activities/ services;
 - l. Provision which requires the service provider to immediately take the necessary corrective measures to satisfy the findings and recommendations of Bangko Sentral examiners and those of the internal and/or external auditors of the bank and/or the service provider;
 - m. Remedies for the bank in the event of change of ownership, assignment, attachment of assets, insolvency, or receivership of the service provider; and
 - n. Provision allowing the bank to cancel the contract by contractual notice of dismissal or extraordinary notice of cancellation if so required by the Bangko Sentral.

Additional Requirements for IT outsourcing:

- o. Provisions regarding on-line communication availability, transmission line security, and transaction authentication;
- p. Responsibilities regarding hardware, software and infrastructure upgrades;
- q. Mandatory notification by the service provider of all systems changes that will affect the bank;
- r. Details of all security procedures and standards;
- s. Adequate insurance for fidelity and fire liability; and
- t. Ownership/maintenance of the computer hardware, software (program source code), user and system documentation, master and transaction data files.

3. Secretary's certificate on the minutes of meeting of the board of directors of the bank (or a local/regional management committee, in case of foreign banks), explicitly approving the activity to be outsourced, the determination of whether an outsourcing arrangement is considered material or non-material and the specific service provider with which the bank is entering into an outsourcing contract;
4. Profile of the selected service provider; and
5. A central record of all outsourcing arrangements which shall be periodically updated and shall form part of the corporate governance reviews undertaken by the bank.

GUIDELINES FOR THE TREATMENT OF NON-DELIVERABLE FORWARDS INVOLVING THE PHILIPPINE PESO
(Appendix to Section 622 on Non-deliverable Forward Contracts Involving the Philippine Peso)

Statement of Policy. The Bangko Sentral ng Pilipinas is cognizant that Non-Deliverable Forwards (NDFs) may, directly or indirectly, create system-wide risks even if there is no delivery of principal amounts and even when NDFs are used as a hedge. To mitigate the buildup of systemic risks and protect against undue concentration in market usage, the following prudential guidelines are set in place.

Definition of Terms. As used in this Appendix, the following terms are defined accordingly:

- a) *Peso Non-Deliverable Forwards (Peso NDFs)* - refers to a forward foreign exchange (FX) contract involving the value of the Philippine peso against a foreign currency at a specified maturity date on an agreed notional amount. Only the net difference between the contracted forward exchange rate and the spot exchange rate between the Philippine peso and the foreign currency at the fixing date shall be settled. NDFs may be transacted by a bank with offshore or onshore counterparties.
- b) *Peso NDF Purchase with Non-Residents* - refers to an NDF contract undertaken by the bank with a non-resident counterparty to receive foreign currency at an agreed forward exchange rate with the Philippine peso over a specified tenor.
- c) *Peso NDF Sale with Non-Residents* - refers to an NDF contract undertaken by the bank with a non-resident counterparty to deliver foreign currency at an agreed forward exchange rate with the Philippine peso over a specified tenor.
- d) *Onshore Non-Deliverable Forward* - refers to an NDF contract undertaken by the bank with a resident counterparty. It may be an NDF purchase or an NDF sale. All NDF contracts with residents shall be settled in Philippine pesos.
- e) *Fixing Date* - refers to the date at which the difference between the prevailing market exchange rate and the agreed upon exchange rate or the reference rate is calculated. NDF contracts shall not be pre-terminated before their fixing date.
- f) *Settlement Date* - refers to the date by which the payment of the difference is due to the party receiving payment.

Licensing Requirement. A bank must secure a Type 2 derivatives license before it can act as a dealer and/or broker of any NDF contract. The bank must likewise continuously comply with the provisions in *Appendix 22* (Risk Management Guidelines for Derivatives) and *Appendix 22*(Sales and Marketing Guidelines for Derivatives).

A bank duly authorized to transact in and has outstanding exposures of NDF contracts but subsequently has been found to be in breach of:

- a) the requirements of a Type 2 derivatives license;
- b) the provisions of *Appendix 22* (Risk Management Guidelines for Derivatives);
- c) the provisions of *Appendix 26* (Sales and Marketing Guidelines for Derivatives) is immediately prohibited from entering into further NDF transactions. Within five (5) banking days, the bank shall present to the appropriate supervising department of the Bangko Sentral a formal plan that will remedy the cited deficiencies and achieve the plan's objectives within a reasonable period. If the remedial plan is deemed unacceptable by the appropriate supervising department of the Bangko Sentral, the bank shall be directed to close all of its outstanding positions within two (2) months.

Bank Limits on Peso NDF Exposures. To mitigate any potential build-up of systemic risks, bank's total gross exposures to all forms of Peso NDF transactions, *i.e., the sum of sales and purchases for both onshore and offshore transactions*, shall be limited to a fixed percentage of the bank's capital base. Unless otherwise amended, the said limit is twenty percent (20%) of unimpaired capital for domestic banks. Foreign bank branches shall have a limit equal to 100 percent of their unimpaired capital as defined under Section 103 (Capital Requirements).

Bilateral Netting. A bank which has purchase and sell positions against counterparty which are maturing at the same fixing date may consolidate said positions for the purpose of bilateral net settlement.

Reportorial Requirements. All NDF transactions shall be covered by the appropriate reports prescribed by the supervising sector of the Bangko Sentral.

Sanctions. Any violation of the foregoing provisions shall constitute grounds for the imposition on the bank of the following:

a. *First Offense*

- i. Reprimand for the directors/officers responsible for the violation with a warning that subsequent violations will be subject to more severe sanctions.
- ii. Banks in breach of the limits shall be required to submit remedial plan to comply with the limits.

b. *Subsequent Offense* - Bank will be subject to any or all of the following, as may be recommended by the SES to the Monetary Board:

- i. Restriction or prohibition on the bank from requesting new authority and/or licenses of any sort;
- ii. Restriction or prohibition on the bank from declaring dividends; and
- iii. Issuance of an order requiring the bank to cease and desist from conducting business in an unsafe and unsound manner and may further order that immediate action be taken to correct the conditions resulting from such unsafe or unsound banking.

Transitory Provisions. Banks which are in excess of the NDF exposure limits shall be given two (2) months from 26 March 2013 to comply with the prescribed limits.

However, banks with Peso NDF exposures as of 26 March 2013 but do not have at least a Type 2 derivatives license are not allowed to enter into further Peso NDF exposures except to close out said positions. Banks must demonstrate to the appropriate supervising department of the Bangko Sentral that transactions under this situation are meant to directly square existing positions.

CERTIFICATE OF COMPLIANCE ON THE PROVISIONS OF HOUSING MICROFINANCE LOAN
(Appendix to Sec. 314)

(Name of Bank)

We, _____, President (or officer of equivalent rank) and _____, Compliance Officer, of (Name of Bank), hereby certify that the following requirements on the offering of housing microfinance loan, as prescribed under Section 314 are complied with:

1. At least two (2) years of implementing a sustainable microfinance program;
2. A housing microfinance product manual incorporating the prescribed product characteristics/features;
3. Appropriate risk management system for housing microfinance loan product;
4. Prudential requirements, to wit:
 - a. CAMELS Rating of at least "3" and Management rating of at least "3";
 - b. Capital adequacy ratio (CAR) of not lower than twelve percent (12%);
 - c. No major supervisory concern that may warrant initiation of Prompt Corrective Action (PCA) under existing regulations; and
 - d. No arrearages on microfinance borrowings.

ACTS TANTAMOUNT TO THE ACT OF ISSUING PRE-APPROVED CREDIT CARDS
(Appendix to Sec. 312 on Minimum requirements for the issuance of credit cards)

- a. Sending of credit cards to consumers with no prior application, written request and supporting documents required for prudent credit card evaluation;
- b. Sending of unsolicited supplementary cards and other cards with added features which are not in replacement or substitute to an existing cardholder's initial credit card;
- c. Unsolicited calls by credit card issuers requesting updated information from selected clients in order to be entitled to receive credit card as a reward for his/her continued patronage of the bank's other financial product;
- d. Unsolicited calls by the bank to its depositors informing them that they already have a credit card from the bank's Credit Card Department due to good standing as a depositor;
- e. Sending of mails with credit card enclosed which will be deemed accepted upon the receipt of such card by a receiver, whether authorized or not;
- f. Sending to a consumer an unsolicited credit card which is deemed accepted unless a request for termination is promptly instructed by the cardholder to the credit card issuer; and
- g. Sending of credit cards as free offers to consumers who availed themselves of the bank's other financial products.

The acts described above and other similar acts are deemed tantamount to the act of issuing pre-approved credit cards notwithstanding any contrary stipulations in the contract.

¹ Circular No. 156 – Applicable to new bank entry

Circular No. 257 – Applicable to new bank entry

Circular Nos. 696 and 715 - Applicable (a) upon establishment of a new bank, (b) upon conversion of an existing bank from a lower to a higher category bank and vice versa, (c) upon relocation of the head office of a TB/RB in an area of higher classification, and (d) when majority of an RB's total assets and/or majority of its total deposit liabilities are regularly accounted for by branches located in areas of higher classification. The minimum capital shall also be required for the grant of the following special banking functions: (i) quasi-banking functions for TBs (ii) trust and other fiduciary business for U/KBs and TBs (iii) limited trust for TBs and RBs/Coop Banks (iv) FCDU/EFCDU (v) issuance of foreign LCs for TBs (vi) acceptance of demand deposit and NOW accounts for TBs and RBs/Coop banks, and (vii) acting as third party securities custodian/registry.

GUIDELINES ON REPORTORIAL REQUIREMENTS FOR BANK INTEREST RATES
(Appendix to Sec. 181 on Reportorial Requirement)

1. For purposes of determining the benchmarks for deposit interest rates, banks shall be required to disclose the nominal interest rates which refers to the walk-in rate being offered to clients for the following peso deposit products:
 - a. *Peso time deposit account* shall refer to interest bearing peso account which requires a specific amount of funds to earn interest at a predetermined competitive rate for a fixed period of time/term and evidenced by certificate issued by the bank.
 - b. *Regular peso savings account* shall refer to interest bearing peso account which is withdrawable either upon presentation of a properly accomplished withdrawal slip together with the corresponding passbook or thru automated tellering machine.
 - c. *Kiddie and teen savings account* refers to interest-bearing savings account of children and teens up to nineteen (19) years old with an initial deposit of P100 and no minimum maintaining balance requirement.
 - d. *Basic deposit account* refers to interest- or non-interest-bearing account designed to promote financial inclusion, as defined in Section 213.
 - e. *Other peso savings account* shall refer to interest bearing special peso savings account which offers tiered interest rates depending on the size of deposit. It usually carries higher interest rate compared to the rate for regular savings account.
2. The bank shall report the number of accounts and amount of deposits for each of the deposit product in the template on a per branch basis as of the reporting period.

(Circular No. 992 dated 1 February 2018)

GUIDELINES ON THE COMPLETION OF THE REPORT ON CROSS-BORDER FINANCIAL POSITIONS¹ ***(Appendix to Section 173 on Report on cross-border financial positions)***

UBs and KBs and their subsidiary TBs shall report their cross-border financial claims² from and financial liabilities³ to non-residents and multilateral agencies according to geographic region/ country, sector and currency on a solo basis. Foreign offices or branches abroad shall classify their non-resident counterparties from the perspective of the foreign bank/branch or domestic bank.

Classification

1. **Geographic Region/Country Classification** - Report financial claims and liabilities according to geographic region/country of residence of the counterparty. Financial claims and liabilities which cannot be classified according to country shall be reported in the "Others" section of the geographic region.

Geographic regions consist of (a) Asia- Pacific, (b) Europe, (c) North America, (d) Offshore Centers⁴, (e) Africa and Middle East, and (f) Latin America and Caribbean.

Financial exposures to multilateral agencies shall be reported under a separate category and shall not be classified according to geographic region/ country. For the Report on Cross-Border Financial Positions, multilateral agencies shall refer to international organizations as defined under the Bank for International Settlements' (BIS') guidelines for reporting international banking statistics. An exhaustive list can be found at the BIS website on international banking statistics⁵.

2. **Sectoral Classification** – Report financial claims and financial liabilities according to sectoral classification of the non-resident counterparty which can either be a bank, an NBFI or from a non-financial sector, as follows:
 - a. **Banks** – This refers to all banks as defined under existing laws and regulations in the countries in which the said entities are located. It also includes financial exposures to/from the following institutions:
 - i. **Central Bank/Official Monetary Authority** – This refers to the national financial institution that exercises control over key aspects of the financial system and carries out such activities as issuing currency, managing international reserves, and providing credit to other depository corporations.
 - ii. **Related Entities** – This refers to the reporting bank's related entities that are situated abroad, namely:
 - a. Branches, agencies and offices, including head office, in the case of foreign banks/branches;
 - b. Controlling parent institution of the reporting bank regardless of its sectoral classification; and
 - c. Subsidiaries that are directly or indirectly majority-owned by the domestic bank and/or head office, in the case of foreign banks.
 - iii. **Foreign Offices** – This refers to foreign branches/offices of domestic banks.

Amounts reported in the "Total" columns refer to positions vis-à-vis banks and the aforementioned entities.

- b. **Non-Bank Financial Institutions** – This refers to public sector entities or private corporations that are engaged in financial intermediation or in auxiliary financial activities that are closely related to financial intermediation, but are not classified as banks. It also includes export credit agencies.
- c. **Non-Financial Sector** – This refers to the central government, public sector entities that are non-financial in nature, non- financial private corporations, and individuals.

The covered banks shall report financial claims and liabilities vis-à-vis multilateral agencies according to sectoral classification as prescribed by the BIS' guidelines for reporting international banking statistics.

Exposures that cannot be allocated by sector shall be reported in the unallocated template.

¹ Based on Bank for International Settlements (BIS) (2013). Guidelines for reporting the BIS international locational banking statistics.

² Consistent with the definition of the BIS in its international banking statistics, cross-border claims consist of loans and deposits to banks and non-banks, holding of securities and other claims.

³ Consistent with the definition of the BIS, cross-border liabilities consists of loans and deposits from banks and non-banks, own issues of debt securities, and other liabilities.

⁴ As defined by the BIS, offshore centers refer to "countries with banking sectors dealing primarily with non- residents and/or in foreign currency on a scale out of proportion to the size of the host economy."

⁵ <http://www.bis.org/statistics/Bankstatsguide.pdf>

3. Currency Classification – Report financial claims and liabilities to non- residents according to the currency in which they are denominated following the minimum recommended currency breakdown of the BIS for international locational banking statistics, namely, US dollar, Pound sterling, Swiss franc, Euro, Japanese yen and the Philippine peso. These positions shall be reported in US dollars at the exchange rate prevailing as of reporting date using the Philippine Dealing System (PDS) Peso/US Dollar closing rate and the New York US Dollar/Third Currencies closing rate.

Relevant Financial Accounts

4. Report financial claims and liabilities in accordance with prudential reporting standards, gross of their related allowance for credit losses, if applicable. All amounts must be in absolute figures, including two decimal places.
5. The following financial claims and liabilities, as defined in the Financial Reporting Package (FRP) shall be reported in the data template:
 - a. Financial Assets
 - i. Foreign Currency Cash on Hand (FCOH) – Report FCOH as claims against the country of the issuing central bank/ official monetary authority. Banks’ holdings of Euro notes and coins shall be reported as claims on the European Central Bank, which shall be reported under Germany for the country classification.
 - ii. Checks and Other Cash Items (COCI) – Report COCI according to the geographic region/country of the drawee institution.
 - iii. Due from Other Banks – Report the amount of Due From Other Banks according to counterparty bank.
 - iv. Debt and Equity Securities – Report debt and equity securities according to the issuer of the security.
 1. Debt and Equity Securities Held for Trading (HFT) – Report the fair value of securities HFT.
 2. Financial Assets Designated at Fair Value through Profit or Loss (FA DFVPL) – Report the fair value of FA DFVPL.
 3. Available-for-Sale (AFS) Financial Assets – Report the carrying amount of debt and equity securities classified as AFS financial assets, gross of allowance for credit losses.
 4. Held-to-Maturity (HTM) Financial Assets – Report the amortized cost of debt securities classified as HTM financial assets.
 5. Unquoted Debt Securities Classified as Loans (UDSCL) – Report the amortized cost of debt securities classified as UDSCL.
 6. Investments in Non-Marketable Equity Securities (INMES) – Report the cost of INMES.
 - v. Derivatives with Positive Fair Value Held for Trading – Report the positive fair value of derivatives according to counterparty. Foreign exchange (FX) derivatives shall be reported in the currency in which the derivatives are to be redeemed or settled.
 - vi. Liability for Short Position – Report the obligation of the bank to return securities purchased/borrowed from the seller/lender under Reverse Repurchase Agreements/ Certificates of Assignment/Participation with Recourse/Securities Lending and Borrowing Agreements, which the former sold to third parties as a reduction in debt and equity securities classified according to seller/lender of security.
 - vii. Loan Portfolio – Report amortized cost of loans according to borrower:
 1. Interbank Loans Receivable
 2. Loans and Receivables-Others
 3. Loans and Receivables Arising from Repurchase Agreements, Certificates of Assignment/ Participation with Recourse and Securities Lending and Borrowing Transactions
 - viii. Derivatives with Positive Fair Value Held for Hedging - Report the positive fair value of derivatives according to counterparty. FX derivatives shall be reported in the currency in which the derivatives are to be redeemed or settled.
 - ix. Sales Contract Receivable (SCR) – Report the amortized cost of SCR arising from the sale of assets acquired in settlement of loans through foreclosure or dation in payment on installment according to buyer of the property.
 - x. Accrued Interest Income from Financial Assets – Report the amount of accrued interest income from financial assets according to the counterparty of the related underlying financial asset.

- xi. Equity Investment in Subsidiaries, Associates and Joint Ventures – Report the adjusted cost of equity investments according to the issuer of the security.
 - xii. Other Financial Assets – Report the amount of financial claims against non- residents, covering the following accounts, as applicable:
 - 1. Servicing Assets
 - 2. Accounts Receivable
 - 3. Dividends Receivable
 - 4. Deficiency Judgment Receivable
 - 5. Sinking Fund
 - 6. Shortages
 - 7. Foreign Currency Notes and Coins on Hand not Acceptable as International Reserves – Report this account according to the geographic region/country of the issuing central bank/official monetary authority.
 - 8. Foreign Currency Checks and Other Cash Items not Acceptable as International Reserves – Report this account according to the geographic region/country of the drawee institution.
 - 9. Miscellaneous Checks and Other Cash Items
 - 10. Petty Cash Fund – Report this account according to the geographic region/ country of the branch/agency abroad where petty cash is situated.
 - 11. Deposits with Closed Banks/Banks in Liquidation
 - 12. Miscellaneous Financial Assets
 - xiii. Inter-office Float Items (with Foreign Offices for Domestic Banks) – Report the debit balance difference between the Due to Head Office/Branches/Agencies and Due from Head Office/Branches/Agencies accounts of branches and agencies located abroad of domestic banks. Amounts shall be reported according to the geographic region/country of the branch/agency abroad as “Foreign Offices” under the “Bank” sector.
 - xiv. Due From Head Office/Branches/Agencies Abroad (Philippine branch of a foreign bank) – Report the amount of Due From Head Office/Branches/Agencies Abroad between foreign bank branches and their head office, branches, agencies abroad. Amounts shall be reported according to the geographic region/country of the branch/agency abroad as “Related Entities” under the “Bank” sector.
- b. Financial Liabilities
- i. Derivatives with Negative Fair Value Held for Trading – Report the negative fair value of derivatives according to counterparty. FX derivatives shall be reported in the currency in which the derivatives are to be redeemed or settled.
 - ii. Financial Liabilities Designated at Fair Value through Profit of Loss (DFVPL) – Report the fair value of financial liabilities DFVPL according to lender.
 - iii. Deposit Liabilities – Report the amortized cost of deposit liabilities according to depositor.
 - iv. Due to Other Banks – Report the amount of Due to Other Banks according to counterparty bank.
 - v. Bills Payable – Report the amortized cost of bills payable according to lender, broken down into the following accounts:
 - a. Interbank loans payable
 - b. Repurchase agreement
 - c. Securities lending/borrowing agreements
 - d. Other bills payable
 - vi. Bonds Payable – Report the amortized cost of bonds payable according to holder. Bonds payable with maturity of up to twelve (12) months and those with maturity exceeding twelve (12) months shall be separately reported.
 - vii. Unsecured Subordinated Debt (UnSD) – Report the amortized cost of UnSD according to holder. UnSD with maturity of up to 12 months and those with maturity exceeding twelve (12) months shall be separately reported.
 - viii. Redeemable Preferred Shares – Report the amortized cost of redeemable preferred shares according to holder. Redeemable preferred shares with maturity of up to twelve (12) months and those with maturity exceeding twelve (12) months shall be separately reported.

Derivatives with Negative Fair Value Held for Hedging – Report the negative fair value of derivatives according to counterparty. FX derivatives shall be reported in the currency in which the derivatives are to be redeemed or settled.

- ix. Accrued Interest Expense on Financial Liabilities – Report the amount of accrued interest expense on financial liabilities according to the counterparty of the related financial liability.
- x. Finance Lease Payment Payable – Report the amount of future lease payments payable under finance leases according to lessee.
- xi. Treasurer/Cashier/Manager's Checks – Report the amount of treasurer/ cashier/manager's checks payable according to designated beneficiaries.
- xii. Payment Orders Payable – Report the amount of payment orders payable according to designated beneficiaries.
- xiii. Margin Deposits on Letters of Credit (LC) and Customers' Liability on Bills/Drafts under LCs and/or Trust Receipt – Report the amount of non-interest bearing deposits or margin deposits on commercial letters of credit arising from movement of goods or services according to depositor.
- xiv. Cash Letters of Credit – Report the amount of import letters of credit issued where the importer pays 100 percent in Philippine pesos.
- xv. Outstanding Acceptances Executed by or for Account of this Bank – Report the amount of liabilities according to correspondent bank arising from customer trade, which calls for time drafts payable within a specified number of days from the date of presentation of the beneficiary, for which the bank has given accommodations in the form of acceptance credit.
- xvi. Unearned Income – Report the unearned portion of income received according to recipient. This includes rentals received in advance.
- xvii. Other Financial Liabilities – Report the amount of financial liabilities to non- residents, covering the following accounts, as applicable:
 - 1. Other Taxes and Licenses Payable– Report the amount of taxes and licenses payable to non-residents.
 - 2. Servicing Liabilities
 - 3. Dividends Payable
 - 4. Accounts Payable
 - 5. Deposit for Stock Subscription – Report according to the geographic region/country of the stockholder/subscriber
 - 6. Miscellaneous Liabilities
- xviii. Inter-Office Float Items (with Foreign Offices for Domestic Banks) – Report the credit balance difference between the Due to Head Office/Branches/Agencies and Due from Head Office/Branches/Agencies accounts of branches and agencies located abroad. Amounts shall be reported according to the geographic region/country of the branch/agency abroad as "Foreign Offices" under the "Bank" sector.
- xix. Due To Head Office/Branches/ Agencies Abroad (Philippine branch of a foreign bank) – Report the amount of Due To Head Office/Branches/Agencies Abroad between foreign bank branches and their head office, branches, agencies abroad. Amounts shall be reported according to the geographic region/country of the branch/agency abroad as "Related Entities" under the "Bank" sector.
- c. **Equity Issuance** – Report the amount received as equity or paid-in capital from non-resident stockholders:
 - i. Paid-In Capital Stock
 - ii. Additional Paid-In Capital
 - iii. Other Equity Instruments
 - 1. Hybrid Tier 1
 - 2. Equity Component of Compound Financial Instruments
 - iv. Deposit for Stock Subscription

- v. Assigned Capital – Report the amount of capital permanently assigned by a foreign bank to its branches operating in the Philippines pursuant to Section 4 of R.A. No. 7721. This amount shall be reported according to the geographic region/country classification of the head office of the foreign bank branch as “Related Entities” under the “Bank” sector.
- d. In the case of foreign bank subsidiaries, report amounts under the following accounts as a financial liability (if a positive amount), or a financial claim (if a negative amount), according to the geographic region/country classification of the controlling parent institution of the foreign bank subsidiary as “Related Entities” under the “Bank” sector:
 - i. Undivided Profits
 - ii. Retained Earnings (Retained Earnings - Reserve and Retained Earnings -Free account)

(Circular No. 890 dated 02 November 2015)

FRAMEWORK FOR DEALING WITH DOMESTIC SYSTEMICALLY IMPORTANT BANKS

(Appendix to Sec. 128 on D-SIBs)

I. Introduction

This document outlines the Bangko Sentral ng Pilipinas' implementing guidelines on the framework for dealing with domestic systemically important banks (D-SIBs) in accordance with the reform packages proposed by the Basel Committee on Banking Supervision (BCBS)¹ and introduced in Basel III: A global regulatory framework for more resilient banks and banking systems.

It is the thrust of the Bangko Sentral to ensure that its capital adequacy framework is consistent with the Basel principles. Hence, the Bangko Sentral is adopting policy measures for D-SIBs, which are essentially aligned with the documents issued by BCBS on global systemically important banks (G-SIBs) and D-SIBs. The broad aim of the policies is to reduce the probability of failure of D-SIBs by increasing their going-concern loss absorbency and to reduce the extent or impact of failure of D-SIBs on the domestic/real economy.

The guidelines shall apply on a consolidated basis to all UBs and KBs including branches of foreign banks established under R.A. No. 7721 (An Act Liberalizing the Entry and Scope of Operations of Foreign Banks in the Philippines and for Other Purposes), as amended by R.A. No. 10641.

Submission of data requirements for the identification of D-SIBs shall take effect starting with 2014 data while compliance with the additional higher loss absorbency requirement shall be phased-in from 01 January 2017 with full implementation by 01 January 2019.

II. Assessment Methodology

A. Indicator-Based Measurement Approach

1. The systemic importance of a bank is assessed in relation to the impact of its failure on the domestic economy using an indicator-based measurement approach.
2. The impact of a D-SIB's failure to the domestic economy shall be assessed based on bank-specific factors, to wit: (a) size; (b) interconnectedness; (c) substitutability/financial institution infrastructure; and (d) complexity. Nine (9) indicators related to these categories shall be used to identify D-SIBs. These indicators reflect the factors or criteria which make a bank significant for the stability of the financial system and the economy.
3. The UBs and KBs operating in the Philippines shall be assessed based on the four (4) categories and on data that relate to the consolidated group (i.e., unit of analysis is the consolidated group). For foreign banks, the computation of systemic importance shall be done on the basis of data that relates to their local consolidated balance sheet. Each individual component (category/indicator) is given differential weights (Table 1). In particular, "size" and "interconnectedness" are given forty percent (40%) and thirty percent (30%) weight allocation, respectively, as these categories remain a key measure in determining a bank's systemic importance in the Philippines. Meanwhile, the remaining categories namely, "substitutability/financial institution infrastructure" and "complexity", each received an equal fifteen percent (15%) weight due to the relatively simple and less complex financial markets in the Philippines.

Table 1. Indicator-Based Measurement Approach

Category (and weighting)	Individual Indicator	Indicator Weighting
Size (40%)	Total Exposures as Defined for use in the Basel III Leverage Ratio	40.00%
Interconnectedness (30%)	Intra-Financial System Assets	11.36%
	Intra-Financial System Liabilities	6.60%
	Securities Outstanding	12.04%
Substitutability/Financial Institution Infrastructure (15%)	Assets Under Custody	7.80%
	Payments Activity	2.38%
	Underwritten Transactions in Debt and Equity Markets	4.82%

¹ The Basel Committee on Banking Supervision consists of senior representatives of bank supervisory authorities and central banks from Argentina, Australia, Belgium, Brazil, Canada, China, France, Germany, Hong Kong SAR, India, Indonesia, Italy, Japan, Korea, Luxembourg, Mexico, the Netherlands, Russia, Saudi Arabia, Singapore, South Africa, Spain, Sweden, Switzerland, Turkey, the United Kingdom and the United States. It usually meets at the Bank for International Settlements (BIS) in Basel, Switzerland, where its permanent Secretariat is located.

Complexity (15%)	Notional Amount of Over-the-Counter (OTC) Derivatives	6.19%
	Financial Assets Measured at Fair Value Through Profit or Loss (FVPL) and Financial Assets Measured at Fair Value Through Other Comprehensive Income (FVOCI)	8.81%

4. For each bank, the score for a particular indicator is calculated by dividing the individual bank's outstanding amount for that indicator by the aggregate outstanding amount for the indicator summed across all banks in the sample. The resulting percentage is then multiplied by 10,000 to express the indicator score in terms of basis points. The individual bank score is then multiplied by the indicator weighting. The category score for each bank is determined by adding the weighted score of each indicator within that category. The resulting category score is then multiplied by the category weighting. The overall systematic importance score¹ for each bank is generated by adding the weighted score for each category.

5. The succeeding paragraphs briefly describe each of the four categories used in the assessment methodology. The specific definition of the indicators can be found in Annex I which sets out the data requirements for the identification of D-SIBs. The guidelines and the line item instructions for the reporting template are set out in Annex II. The specific definition of the indicators can be found in Annex A which sets out the data requirements for the identification of D-SIBs. The guidelines and the line item instructions for the reporting template are set out in Annex B.

a. Size

A bank's distress or failure is more likely to damage the local economy or financial markets if its activities comprise a large share of the domestic activity. The larger the bank, the more difficult it is for its activities to be quickly replaced by other banks and for it to be resolved, therefore, the greater the chance that its distress or failure will cause disruption to the financial markets. The distress or failure of a large bank is also more likely to damage confidence in the financial system as a whole. Size is therefore a key measure of systemic importance. One (1) indicator is used to measure size: the measure of total exposures used in the Basel III leverage ratio².

b. Interconnectedness

Financial distress at one (1) institution can materially increase the likelihood of distress at other institutions given the network of contractual obligations in which they operate. A bank's systemic impact is considered to be positively related to its interconnectedness vis-à-vis other financial institutions. Three (3) indicators are used to measure interconnectedness:

- (i) intra-financial system assets;
- (ii) intra-financial system liabilities; and
- (iii) securities outstanding.

c. Substitutability/Financial Institution Infrastructure

The systemic impact of a bank's distress or failure is expected to be negatively related to its degree of substitutability as both a market participant and client service provider, i.e., it is expected to be positively related to the extent to which the bank provides financial institution infrastructure. At the same time, the cost to the failed bank's customers in having to seek the same service from another institution is likely to be higher for a failed bank with relatively greater market share in providing that service. Three (3) indicators are used to measure substitutability/financial institution infrastructure:

- (i) assets under custody;
- (ii) payments activity; and
- (iii) underwritten transactions in debt and equity markets.

d. Complexity

The systemic impact of a bank's distress or failure is expected to be positively related to its overall complexity – that is, its business, structural and operational complexity. The more complex a bank is, the greater are the costs and time needed to resolve the bank. Two (2) indicators are used to measure complexity:

- (i) notional amount of (OTC) derivatives; and
- (ii) Financial assets measured at FVPL and financial assets measured at FVOCI.

¹ The maximum overall systematic importance score that a bank would have if it were the only bank in the sample is 10,000 basis points i.e., 100%.

² To be computed based on Bangko Sentral guidelines on leverage ratio.

B. Bucketing Approach

6. Banks with overall systemic importance score (produced by the indicator-based measurement approach) that equals or exceeds a threshold (cut-off level) set by the Bangko Sentral shall be classified as D-SIBs. Supervisory judgment may also be applied when warranted under certain circumstances to add and/or remove banks to/from the list of D-SIBs. This judgment shall be exercised in coordination with the supervising departments of the Financial Supervision Sector (FSS) and in accordance with the principles set out in Item "II.C".
7. Banks designated as D-SIBs shall be grouped into different categories of systemic importance using cluster analysis based on the overall scores produced by the indicator-based measurement approach. The allocation of D-SIBs to different buckets of HLA requirement is based on the relative distribution of their systemic scores.
8. The thresholds for the buckets shall correspond to the gaps identified by a cluster analysis of the scores. The use of cluster analysis in grouping the D-SIBs will ensure a meaningful and objective measurement and classification of the systemic importance of domestic banks.
9. Each year, Bangko Sentral shall run the assessment, and reallocate D-SIBs into the categories of systemic importance based on their overall systematic importance scores. It should be noted that the number of D-SIBs, and their bucket allocations, will evolve over time as banks change their behavior in response to the incentives of the D-SIBs framework as well as other aspects of Basel III and Bangko Sentral regulations.
10. An empty bucket shall be added on top of the highest-numbered populated bucket to provide incentives for banks to avoid becoming more systemically important. If the empty bucket becomes populated in the future, a new empty bucket shall be added with a required higher additional loss absorbency level. The size of the empty bucket shall be determined by the average size of the preceding buckets.

C. Supervisory Judgment

11. As stated earlier, supervisory judgment may be applied to add/or remove banks to/from the list of D-SIBs. To ensure a high level of transparency and comparability, result of the annual D-SIB assessment shall be in coordination with the supervising departments. It shall be used on exceptional cases and presumed to be rare. The judgment overlay shall comprise well-documented and verifiable quantitative and qualitative information.
12. Qualitative information is intended to capture information that cannot be easily translated or quantified in the form of an indicator. This may include but not limited to the following: major expansion/contraction of a bank's operation; merger and acquisition; major change in the ownership/structure; and niche market or other aspects which are unique to the concerned bank. Qualitative judgments shall also be thoroughly explained and supported by verifiable arguments.

D. Periodic Review and Refinement

13. The assessment methodology provides a framework for periodically reviewing the D-SIBs status of a given bank. Thus, banks have incentives to change their risk profile and business models in ways that reduce their systemic spillover effect. The Bangko Sentral does not intend to develop a fixed list of D-SIBs. Through the criteria discussed above, banks can migrate in and out of D-SIB status, and between categories of systemic importance, over time.
14. The list of D-SIBs shall be assessed/determined annually based on year-end data submitted by each bank and shall be subject to approval of the Monetary Board. The results shall be released every June. Banks identified as D-SIBs shall be informed individually, including the bucket they belong to and the individual score for each indicator.
15. The assessment methodology shall be reviewed every three (3) years in order to capture developments in the banking sector and any progress in methods and approaches for measuring systemic importance.

III. Higher Loss Absorbency (HLA) and Interaction with Other Elements of Basel III Framework

16. Banks that will be identified as D-SIBs shall be required to have HLA. The HLA requirement is aimed at ensuring that D-SIBs have a higher share of their balance sheets funded by instruments which increase their resilience as a going concern, considering that the failure of a D-SIB is expected to have a greater impact on the domestic financial system and economy.
17. The imposition of HLA shall be based on the degree of domestic systemic importance. This is to provide the appropriate incentives to banks which are subject to the HLA requirements to reduce (or at least not increase) their systemic importance over time.

18. The HLA requirement is to be met with CET 1 capital as defined by the Basel III framework and implemented under *Appendix 59*. This is to ensure a maximum degree of consistency in terms of effective loss absorbing capacity.
19. Table 2 sets out the buckets to which identified D-SIBs shall be allocated together with the corresponding HLA requirement. The minimum HLA requirement for the lower bucket (bucket 1) shall be one and a half percent (1.5%) of risk-weighted assets at all times. For the higher populated bucket (bucket 2), the HLA requirement shall range from above one and a half percent to two percent (above 1.5% to 2%) of risk-weighted assets. An empty top bucket with HLA requirement of two and a half percent (2.5%) of risk-weighted assets shall also be maintained.

Table 2. Bucketing Approach

Bucket	Minimum additional HLA requirement (CET1 capital as a percentage of risk-weighted assets)
3 (Empty)	2.5%
2	>1.5% to 2.0%
1	1.5%

The differentiated HLA requirement for D-SIBs slotted under bucket 2 shall be based on the ranking of a bank's overall systemic importance score produced by the indicator-based measurement approach. The additional loss absorbency requirement on D-SIBs slotted under bucket 2 shall be calculated as follows:

$$HLA\ requirement = 2.0\ percent - \frac{0.5\ percent}{n} (x - 1)$$

where:

2.0 percent = maximum HLA requirement under bucket 2

0.5 percent = difference in HLA requirement under bucket 2 and bucket 1

n = number of D-SIBs under bucket 2

x = ranking of a D-SIB under bucket 2

The ranking shall be assigned in descending order such that a D-SIB with the highest overall systemic importance score shall be assigned a ranking of "1" while a D-SIB with the lowest overall systemic importance score shall be assigned a ranking of "n".

20. If the empty top bucket should become populated in the future, a new bucket shall be added to maintain incentives for banks to avoid becoming more systemically important. Minimum HLA requirement for the new buckets shall increase in increments of a half percent (0.5%) of risk-weighted assets.
21. The HLA requirement shall be on top of the combined requirement for capital conservation buffer (CCB) and Countercyclical Capital Buffer (CCyB) under *Appendix 59*. Table 3 shows a sample total CET1 capital requirement for banks identified as D-SIBs per bucket.

Table 3. Sample Total CET 1 Capital Requirement

A. CCyB rate is at 0%

	Bucket		
	3 (Empty)	2*	1
Minimum CET1 Capital Requirement (a)	6%	6%	6%
CCB (b)	2.5%	2.5%	2.5%
CCyB (c)	0%	0%	0%
D-SIB HLA Requirement (d)	2.5%	2%	1.5%
Total Additional CET1 Capital Requirement (b+c+d)	5%	4.5%	4%
Total Required CET1 Capital (a+b+c+d)	11%	10.5%	10%

* Assuming an HLA requirement of two percent (2%).

B. CCyB rate is at 2.5%

	Bucket		
	3 (Empty)	2*	1
Minimum CET1 Capital Requirement (a)	6%	6%	6%
CCB (b)	2.5%	2.5%	2.5%
CCyB (c)	2.5%	2.5%	2.5%
D-SIB HLA Requirement (d)	2.5%	2%	1.5%
Total Additional CET1 Capital Requirement (b+c+d)	7.5%	7%	6.5%
Total Required CET1 Capital (a+b+c+d)	13.5%	13%	12.5%

* Assuming an HLA requirement of two percent (2%).

To help ensure that the banking sector can meet the higher capital requirements through reasonable earnings retention and capital raising activities, while still supporting lending to the economy, transitional arrangements for the HLA requirement shall be implemented. Thus, in the case of banks included in the first list of D-SIBs (to be released in June 2015 based on December 2014 data), compliance with the HLA requirement shall be phased-in starting 01 January 2017, with full compliance on 01 January 2019 (See Table 4 for the timeline to comply with the HLA requirement). After the phased-in period, banks identified as D-SIBs shall be allowed a period of eighteen (18) months to comply with the required HLA.

Table 4. Timeline of Release of List of D-SIBs and Compliance with the HLA Requirement

Date Cut-Off	Release of D-SIBs List	Compliance Period
Dec-14	Jun-15	Phased-in implementation starting 01 January 2017 until 01 January 2019
Dec-15	Jun-16	Phased-in implementation starting 01 January 2018 until 01 January 2019
Dec-16	Jun-17	01 January 2019 to 31 December 2019
Dec-17	Jun-18	01 January 2020 to 31 December 2020
Dec-18	Jun-19	01 January 2020 to 31 December 2021

22. To determine banks' compliance with the additional CET1 capital requirement for D-SIBs, the minimum ratio shall be complied with by the parent bank and its subsidiary banks and quasi-banks on both solo and consolidated bases.
23. Foreign bank branches operating in the Philippines with head office/consolidated group declared as global systemically important bank (G-SIB) but not declared as D-SIB will not be required to put up in the Philippine branch the required HLA for G-SIB. However, if identified as D-SIB in the Philippines, the required HLA for D-SIBs shall be complied with locally by the Philippine branch.
24. Capital distribution constraints shall be imposed when capital levels fall within certain range as illustrated in Table 5 below. Conversely, a D-SIB shall not be subject to any restriction on distribution if the following conditions are met:
 - a. Has positive retained earnings as of the preceding quarter and has complied with the requirements on declaration of dividends under Sec. 124;
 - b. Has CET1 capital of more than the total required (minimum CET1 ratio of six percent (6.0%) plus the combined requirement for CCB of two and a half percent (2.5%) and the CCyB at the rate determined by the Monetary Board – zero percent (0%) to two and a half percent (2.5%), and D-SIBs HLA requirement) before the distribution; and
 - c. Has complied with the minimum capital ratios (CET1 ratio of six percent (6%), Tier 1 ratio of seven and a half (7.5%) and ten percent (10%) CAR) after the distribution.

Table 5. Restriction on Distributions

A. CCyB rate is 0%

Restriction on Distributions	Level of CET1 Capital	
	Bucket 1	Bucket 2*
No distribution (until the minimum CET1, the combined requirement for CCB and CCyB and more than 50% of D-SIB HLA requirements are met; and conditions "a" and "c" above are complied with)	<=9.25%	<=9.50%
50% of earnings may be distributed (if the minimum CET1, the combined requirement for CCB and CCyB and more than 50% of the D-SIB HLA requirements are met; and conditions "a" and "c" above are complied with)	>9.25% - 10%	>9.50% - 10.50%

* Assuming an HLA requirement of two percent (2%).

B. CCyB rate is at 2.5%

Restriction on Distributions	Level of CET1 Capital	
	Bucket 1	Bucket 2*
No distribution (until the minimum CET1, the combined requirement for CCB and CCyB and more than 50% of D-SIB HLA requirements are met; and conditions "a" and "c" above are complied with)	<=11.75%	<=12.00%
50% of earnings may be distributed (if the minimum CET1, the combined requirement for CCB and CCyB and more than 50% of the D-SIB HLA requirements are met; and conditions "a" and "c" above are complied with)	>11.75% - 12.50%	>12.00% - 13%

* Assuming an HLA requirement of two percent (2%).

During the phased-in implementation period from 2017 to 2019, the general principle above on restriction on distribution shall likewise be applied. Annex C shows the restriction on distributions by year for each bucket during the phased-in implementation from 2017 to 2019, assuming there is no change in the HLA requirement. In case of change in the HLA requirement during the phased-in period, the required HLA shall be distributed equally over the remaining period until the full implementation in 2019.

25. Elements subject to the restriction on distributions include dividends, share buybacks, discretionary payments on other Tier 1 capital instruments and discretionary bonus payments to directors, officers and staff. Payments which do not result in the depletion of CET1 capital are not considered capital distributions.
26. Earnings refer to distributable profits calculated prior to the deduction of elements subject to the restriction on distributions. The earnings are computed after the tax, which would have been reported had none of the distributable items been paid.

IV. Intensive Supervisory Approach

27. Banks identified as D-SIBs shall include in their Internal Capital Adequacy Assessment Process (ICAAP) document concrete and reasonable recovery plans which shall be implemented in case the bank breaches the HLA capital requirement. The recovery plans shall include guidelines and action plans to be taken to restore the D-SIB's financial condition to viable level in cases of significant deterioration in certain scenarios. This shall include specific initiatives appropriate to the Bank's risk profile such as capital raising activities, streamlining of businesses, restructuring and disposal of assets, to improve capital position.
28. Moreover, the banks designated as D-SIBs shall be subject to more intensive supervision, which may include but not limited to, greater intensity of offsite supervision and monitoring, more structured interaction with board and senior management, and higher supervisory expectation on controls for significant businesses/operations, data aggregation capabilities and corporate governance.

(Circular Nos. 1051 dated 27 September 2019 and 1024 dated 06 December 2018)

**DATA REQUIREMENTS FOR THE IDENTIFICATION OF
DOMESTIC SYSTEMICALLY IMPORTANT BANKS (D-SIBs)**
(Appendix to Sec. 128 on D-SIBs)

I. Introduction

Under the indicator-based measurement approach, the nine (9) indicators that relate to the four (4) categories set out under Principle 5 of the Domestic Systemically Important Banks (D-SIBs) Framework shall be used to measure a bank's systemic importance. These quantitative indicators are discussed in detail in the succeeding sections; particularly the data gathering process and the specific definition of factors.

II. Data Sources

The data of all UBs and KBs (universal and commercial banks), including branches of foreign banks established under R.A. No. 7721¹, as amended by R.A. 10641 (collectively referred to as the "covered banks") shall be gathered from different sources, as follows:

1. Financial Reporting Package (FRP)

For covered banks with financial allied subsidiaries, excluding insurance subsidiaries, the data shall be obtained from the FRP prepared on a consolidated basis. Otherwise, the data shall be sourced from the FRP prepared on a solo basis.

2. Report on Selected Accounts and Activities for the Identification of D-SIBs Report.

This report shall be submitted electronically by the covered banks on a consolidated basis² to the Bangko Sentral's Department of Supervisory Analytics on a semi-annual basis, within thirty (30) banking days after the end of the reference period. It shall be submitted starting with the reporting period ending 31 December 2014.

Accuracy of the report shall be subject to verification during on-site examination. Erroneous/Delayed/Erroneous and Delayed/Unsubmitted reports shall be subject to penalties prescribed under Sec. 171 (*Sanctions on Reports for Non-compliance with the Reporting Standards*) for *Category A-1* reports, without prejudice to sanctions provided under Sections 36 and 37 of R.A. No. 7653 or The New Central Bank Act.

The guidelines and the line item instructions for the reporting template are set out in Annex II.

3. Other Reports and Disclosures

Data on other transactions such as payment activities and market capitalization shall be obtained from entities other than the covered banks, such as but not limited to the Philippine Stock Exchange, the Philippine Clearing House Corporation, and other department/s of the Bangko Sentral.

III. Reporting Period/Date

The following reporting cut-off/coverage shall be used for the D-SIBs Report.

Reporting Cut-off/Coverage	
As of/at the reporting date	As of 30 June 20XX As of 31 December 20XX
During the reporting period	For the six (6) month ended 30 June 20XX For the year ended 31 December 20XX

¹ An Act Liberalizing the Entry and Scope of Operations of Foreign Banks in the Philippines and for Other Purposes.

² Consolidated basis shall refer to the combined data of parent bank and subsidiaries consolidated on a line by line basis. Only banks with financial allied subsidiaries, excluding insurance subsidiaries, shall submit the report on consolidated basis.

IV. Summary of Data Requirements for the Identification of D-SIBs

Category	Individual Indicator	Data Source
Size	Total Exposures as Defined for Use in the Basel III Leverage Ratio ¹	Report on Leverage Ratio
Interconnectedness	Intra-Financial System Assets	FRP
		Schedule 1- Outstanding Credit Facilities (D-SIBs Report)
	Intra-Financial System Liabilities	FRP
		Schedule 1 - Outstanding Credit Facilities (D-SIBs Report)
	Securities Outstanding	FRP Philippine Stock Exchange Website
Substitutability/Financial Institution Infrastructure	Assets Under Custody	FRP
	Payments Activity	Report from Bangko Sentral's Payments and Settlements Office
		Report from Philippine Clearing House Corp. (PCHC)
		Schedule 2 – Payments Coursed through Foreign Currency Settlement Banks (D-SIBs Report)
	Underwritten Transactions in Debt and Equity Markets	Schedule - 3 Underwritten Transactions in Debt and Equity Market (D-SIBs Report)
Complexity	Notional Amount of Over-the-Counter Derivatives	FRP
	Financial Assets Measured at Fair Value Through Profit or Loss (FVPL) and Financial Assets Measured at Fair Value Through Other Comprehensive Income (FVOCI)	FRP

V. The Indicators

1. Size Indicator

The size indicator pertains to the total exposures as defined for use in the Basel III leverage ratio as provided under Sec. 129.

2. Interconnectedness Indicators

2.1 Intra-Financial System Assets

This includes funds deposited with or lent to, outstanding credit facilities extended to, holdings of securities issued by, securities lending transactions with, and over-the-counter (OTC) derivatives (positive fair value) with, resident banks and other financial institutions as of the reporting date. This indicator is computed as the sum of the following accounts with resident banks and other financial institutions².

Data Source		Account
Report	Schedule	
FRP*	1	Checks and Other Cash Items
	2	Due from Other Banks
	3	Financial Assets HFT
	4a	Derivatives HFT (Positive Fair Value)
	5	Financial Assets DFVPL
	6	Financial Assets Measured at FVOCI
	7	Financial Assets Measured at Amortized Cost
	8	Unquoted Debt Securities Classified as Loans
	9	Investment in Non-Marketable Equity Securities

¹ Based on guidelines to be issued by the Bangko Sentral on leverage ratio.

² For the purpose of this guidelines, FI shall include those as defined in the Bangko Sentral's Manual of Account.

	10	Interbank Loans Receivables
	11	Loans and Receivables-Others
	12	Loans and Receivables Arising from Repurchase Agreements, Certificates of Assignment/Participation with Recourse and Securities Lending and Borrowing Transactions
	14	Accrued Interest-Due from other banks
	15	Equity Investment in Subsidiaries, Associates and Joint Ventures
D-SIBs Report	1	Outstanding Credit Facilities Extended to Banks and Other Financial Institutions

** For updating relative to Philippine Financial Reporting Standards (PFRS) 9 on financial instruments.*

2.2 Intra-Financial System Liabilities

This includes deposits by, outstanding credit facilities obtained from, securities issued to, securities borrowing transactions with and OTC derivatives (negative fair value) with, resident banks and other financial institutions as of the reporting date. This indicator is computed as the sum of the following accounts with resident banks and other financial institutions:

Data Source		Account
Report	Schedule	
FRP*	4a	Derivatives HFT (Negative Fair Value)
	22	Deposit Liabilities
	23	Due to Other Banks
	24	Interbank Loans Payable
	24	Other Deposit Substitutes
	25	Bonds Payable
	25	Unsecured Subordinated Debt
	25	Redeemable Preferred Shares
D-SIBs Report	1	Outstanding Credit Facilities Obtained from Banks and Other Financial Institutions

** For updating relative to PFRS 9 on financial instruments.*

2.3 Securities Outstanding

This pertains to the outstanding securities issued by the covered bank as of the reporting date. This indicator is computed as the sum of the following accounts:

Data Source	Account
FRP*-Balance Sheet	Long-Term Negotiable Certificate of Deposit (LTNCD)
	Unsecured Subordinated Debt (net)
	Bills Payable (Other Deposit Substitutes and Others)
	Bonds Payable (net)
	Redeemable Preferred Shares
Philippine Stock Exchange/FRP*-Balance Sheet	Equity Market Capitalization/Total Equity (if equity market capitalization is not available)

** For updating relative to PFRS 9 on financial instruments.*

3. Substitutability/Financial Institution Infrastructure Indicators.

3.1 Assets under Custody

This pertains to the value of assets held by the covered bank as custodian on behalf of resident customers, including banks and other financial institutions, as of the reporting date. It includes assets held under custodianship agreement by the bank proper and its trust department or subsidiary trust corporation. This indicator is computed as the sum of the following accounts with resident counterparties:

Data Source		Account
Report	Schedule	
FRP	38	Securities Held under Custodianship by Bank Proper or Trust Department/Subsidiary-Trust Corporation

3.2 Payments Activity

This pertains to the total gross value of all cash payments made by the covered bank via large value funds transfer systems during the reporting period. It is composed of peso- and foreign currency-denominated outgoing payments sent (excluding payments received) by the covered bank as a participant in the payment systems. This indicator is computed as the sum of the following payments activities:

Data Source	Peso-Denominated Payment Activity
Bangko Sentral's Payments and Settlements Office (PSO)	Philippine Payments and Settlements System (PhilPaSS) Transactions
PCHC	Outgoing Checks

Data Source		Foreign Currency-Denominated Payments Activity
BSP's PSO		Payment vs. Payment transactions (Peso vs. USD)
PCHC		USD transactions subjected to end-of-day net clearing
Report	Schedule	Payments Coursed through Foreign Currency Settlement Banks
D-SIBs Report	2	

3.3 Underwritten Transactions in Debt and Equity Markets

This pertains to all underwritten transactions during the reporting period, whether or not the covered bank was obligated to purchase unsold securities. This indicator includes all types of underwritten/distributed equity and debt instruments/securities.

Data Source		Activity
Report	Schedule	
D-SIBs Report	3	Underwritten Transactions Report in Debt and Equity Markets

4. Complexity Indicators

4.1 Notional Amount of OTC Derivatives

Nominal or notional amount outstanding pertain to the gross nominal or notional value of all deals concluded and not yet settled at the reporting date. This indicator is designed to measure the scope of the covered bank's engagement in OTC derivatives transactions. The total notional value of the following derivatives transactions will be used for the purpose of computing this indicator:

Data Source		Activity
Report	Schedule	
FRP*	4	Derivatives HFT
	13a	Derivatives Held for Fair Value Hedge
	13b	Derivatives Held for Cash Flow Hedge
	13c	Derivatives Held for Hedges of Net Investment in Foreign Operations
	13d	Derivatives Held for Portfolio Hedge of Interest Rate Risk (Marked to Market Amount) (i) Fair Value Hedge (ii) Cash Flow Hedge

* For updating relative to PFRS 9 on financial instruments.

4.2 *Financial Assets Measured at Fair Value Through Profit or Loss (FVPL) and Financial Assets Measured at Fair Value Through Other Comprehensive Income (FVOCI).*

This pertains to the market value of all debt and equity securities (excluding any stand-alone or embedded derivatives) measured at FVPL and FVOCI, respectively, less the securities eligible for classification as high quality liquid (HQLA) as of the reporting date. This indicator is computed as the sum of the following accounts less the securities eligible for classification as HQLA as provided under Sec. 145-A:

Data Source	Account
FRP*-Balance Sheet	Financial Assets Measured at FVPL
	Financial Assets Measured at FVOCI
Less:	
Liquidity Coverage Ratio Report	Securities eligible for classification as HQLA

** For updating relative to PFRS 9 on financial instruments.*

(Circular Nos. 1051 dated 27 September 2019 and 963 dated 27 June 2017)

**REPORT ON SELECTED ACCOUNTS AND ACTIVITIES FOR THE IDENTIFICATION
OF DOMESTIC SYSTEMICALLY IMPORTANT BANKS (D-SIBs Report)
(Appendix to Sec. 128 on D-SIBs)**

I. Introduction

The Report on Selected Accounts and Activities for the Identification of Domestic Systemically Important Banks (D-SIBs Report) is one of the sources of data for the quantitative indicators that shall be used to measure a bank's systemic importance.

Structure of the D-SIBs Report

The D-SIBs Report is composed of the following schedules, which shall be accomplished independently of each other:

- a. Schedule 1 – Outstanding credit facilities;
- b. Schedule 2 – Payments coursed through foreign currency settlement banks; and
- c. Schedule 3 – Underwritten transactions in debt and equity markets.

The succeeding sections provide the guidelines and the line item instructions to accomplish the schedules of the D-SIBs Report.

II. Guidelines on the Preparation of the D-SIBs Report

1. Who must report

All covered banks, with or without subsidiary banks or other financial allied subsidiaries, excluding insurance subsidiaries, are required to submit the D-SIBs Report.

2. On what form

Covered banks with subsidiary banks and other financial allied subsidiaries, excluding insurance subsidiaries, shall prepare D-SIBs Report on a consolidated basis, while covered banks that have no subsidiary bank or other financial allied subsidiary shall prepare the report on a solo basis.

3. Amounts reported

All amounts reported shall be in Philippine Peso, unless otherwise specified, and in absolute figures, including two (2) decimal places.

III. Line Item Instructions

Schedule 1 – Outstanding credit facilities

Heading/Line Item	Instruction
Unused credit facilities extended to	Report all unused credit facilities extended to resident banks and other financial institutions, regardless of contractual arrangements, as of the reporting date

The data on unused credit facilities obtained from banks shall be derived from the counterparty data reported by each covered bank in Schedule 1.

For the purpose of this schedule:

1. Credit facilities shall refer to credit lines extended by the different business lines of a bank such as lending and treasury units.
2. Banks shall refer to UBs, KBs, TBs, RBs and Coop banks, whether privately- or government-owned, including branches of foreign banks licensed as UBs or KBs operating in the Philippines.
3. Other financial institutions shall refer to financial institutions other than banks. This shall include government owned and controlled corporations (GOCCs) and private corporations engaged in financial intermediation or in auxiliary financial activities that are closely related to financial intermediation; and GOCCs engaged in social security activities.

4. In case of foreign currency-denominated credit facilities extended or obtained, convert the outstanding balance into Philippine Peso using the closing exchange rate at the reporting date.

Schedule 2 – Payments coursed through foreign currency settlement banks

Report in this schedule the gross amount of outgoing foreign currency payments/transfers sent by the covered participant bank/s (consolidated basis¹) through foreign currency settlement banks (such as Citibank N.A. (Phils.) for US dollar [USD] transactions via the Philippine Domestic Dollar Transfer System (PDDTS); and Bank of China for Renminbi [RMB] transactions via the RMB Transfer Service during the reporting period.

For PDDTS participant banks, the transactions to be reported are the gross amount of USD transfers to another domestic bank and/or to a correspondent bank abroad coursed through the settlement bank. The following USD transactions settled via the PDDTS shall be gathered from other sources, hence, should not be included in the report:

- a. Payment vs. Payment (Peso vs. USD) transactions, where the dollar leg is settled at the PDDTS and the peso leg is settled via the Bangko Sentral's own payment system, PhilPaSS; and
- b. USD transactions subjected to end-of-day net clearing by PCHC and transmitted to the PDDTS system for posting into the bank's PDDTS account.

Heading/Line Item	Instruction
Gross value of payments - in USD - in RMB	Report the gross amount of outgoing payments in USD and in RMB, respectively, sent by the covered/participant bank/s during the reporting period

Schedule 3 – Underwritten transactions in debt and equity markets

Table I – Underwriting of securities on a firm basis	
Report all securities, excluding government securities, distributed and sold on a firm basis during the reporting period, consistent with the definition of "underwriting of securities" under the Securities and Exchange Commission's Omnibus Rules and Regulations for Investment House and Universal Banks Registered as Underwriters of Securities	
Heading/Line Item	Instruction
Issuer	Report the complete names of the issuer of equity and debt securities
Equity securities	Report under the appropriate column the required amount of equity securities underwritten on a firm basis, as defined below
Debt securities	Report under the appropriate column the required amount of debt securities underwritten on a firm basis, as defined below
Total securities	Report under the appropriate column the required amount of the total securities (sum of equity and debt securities) underwritten on a firm basis, as defined below
Amount of commitment	Report the amount of guaranteed selling value of equity and debt securities under the appropriate heading. For the 'total securities', add the amounts reported under the 'equity securities', and the 'debt securities' headings
Actual securities sold	Report the amount of equity and debt securities actually sold under the appropriate heading. This amount may be higher or lower than the amount of commitment. For the 'total securities', add the amounts reported under the 'equity securities' and the 'debt securities' headings.
Amount of underwritten transaction	Report the higher between the amount of commitment and the actual securities sold. For the 'total securities', add the amounts reported under the 'equity securities' and the 'debt securities' headings.
Total	Report the sum of the 'amount of underwritten transaction' column for 'equity securities', 'debt securities', and 'total securities'.

¹ Including the payments/transfers of the subsidiary and affiliate participant banks.

Table II – Distribution/sale of securities on a best-effort basis	
Report all securities, excluding government securities, distributed and sold on a best-effort basis during the reporting period. This includes securities transactions wherein the reporting bank is not obligated to purchase the remaining unsold securities, regardless of the role or designation of the reporting bank in the issuance or offering (e.g., arranger, issue manager, and other similar arrangements).	
Heading/Line Item	Instruction
Issuer	Report the complete names of the issuer of equity and debt securities
Amount of underwritten transaction	For lead arranger or lead issue manager, report the entire amount of equity and debt securities arranged/managed/issued (best effort) under the appropriate column. Otherwise, report only the amount of securities actually sold. For the total, add the amounts reported under the 'equity securities' and the 'debt securities' columns.
Total	Report the sum of the columns under the 'amount of underwritten transaction' heading.

Table III- Participation in the origination/sale of government securities in the primary market	
Report all government securities (GS) sold in the primary market during the reporting period, where the reporting bank participated in the public offering as underwriter, arranger, issue manager, selling agent and other similar role. Report both participations under a firm commitment and a best-effort basis. Exclude GS sold/traded after the public offering period (secondary sale). Exclude treasury bonds, treasury bills, and other GS offering where no underwriting or issue management is involved.	
Heading/Line Item	Instruction
Name of issue	Indicate the complete name of the issue. Avoid acronyms.
ISIN/Series code public offering period issue date	Indicate the details of the issue.
Amount of public offering	Report the result of the public offering, i.e., the total amount raised by the government from the sale of the securities during the public offering period.
Amount of participation	Report the amount of securities allocated or awarded to the reporting bank.

For the purpose of this schedule:

1. Total underwritten transactions in equity and debt markets is referred to in the schedule as the 'total underwriting activity', which is computed as the sum of the equity underwriting activity and the debt underwriting activity, where:
 - a. Equity underwriting activity is the sum of amounts reported under the following headings:
 - Amount of underwritten transaction (A) under Table I; and
 - Amount of underwritten transaction (C) under Table II.
 - b. Debt underwriting activity is the sum of the amounts reported under the following headings;
 - Amount of underwritten transaction (B) under Table I;
 - Amount of underwritten transaction (D) under Table II; and
 - Amount of participation (E) under Table III.
2. Convert foreign currency-denominated securities into Philippine Peso using the average exchange rate for the reporting period.

**Schedule of Restriction on Distribution During the Phased-In Implementation Period
of the Higher Loss Absorbency Requirement***
(Appendix to Sec. 128 on D-SIBs)

Restriction on Distribution	Level of CET1 Capital					
	Bucket 1			Bucket 2		
	01-Jan-2017 to 31-Dec-2017	01-Jan-2018 to 31-Dec-2018	01-Jan-2019 to 31-Dec-2019	01-Jan-2017 to 31-Dec-2017	01-Jan-2018 to 31-Dec-2018	01-Jan-2019 to 31-Dec-2019
No distribution (until the minimum CET1, the combined requirement for CCB and CCyB and more than fifty percent (50%) of D-SIB HLA are met; and conditions "a" and "c" of paragraph 24 of Appendix 110 are complied with)	<= 8.75%	<= 9%	<= 9.25%	<= 8.8333%	<= 9.1667%	<= 9.5%
Fifty percent (50%) of earnings may be distributed (if the minimum CET1, the combined requirement for CCB and CCyB and more than 50% of the D-SIB HLA are met; and conditions "a" and "c" of Paragraph 24 of Appendix 110 are complied with)	> 8.75% - 9%	> 9% - 9.5%	> 9.25% - 10%	> 8.8333% - 9.1667%	> 9.1667% - 9.8333%	> 9.5% - 10.50%

* Assuming there is no change in the bucket/required HLA during the phased-in implementation period, CCyB is at zero percent (0%) and an HLA requirement of two percent (2%) for D-SIBs slotted under bucket 2. In case of change in the HLA requirement during the phased-in period, the required HLA shall be distributed equally over the remaining period until the full implementation in 2019.

(Circular No. 1051 dated 27 September 2019)

**GUIDELINES ON RECOVERY PLAN OF
A DOMESTIC SYSTEMICALLY IMPORTANT BANK (D-SIB)
(Appendix to Sec. 128 on D-SIBs)**

1. Introduction

- 1.1 Given the severity of the impact of a D-SIB's distress or disorderly failure on the domestic financial system and economy, the supervisory policies and process for D-SIBs seek to reduce the probability of a D-SIB's failure, not only to minimize the impact thereof.
- 1.2 Among the supervisory measures aiming to reduce the probability of a D-SIB's failure is the requirement for a D-SIB to come up with a concrete and reasonable recovery plan that sets out the actions that it will take to restore its viability in cases of significant deterioration of its financial condition in different scenarios.
- 1.3 This document sets out the guidelines that D-SIBs should follow in drawing up and maintaining a recovery plan that prepares them for future destabilizing events and/or crises.
- 1.4 The recovery plan shall be applied on a group-wide basis¹, covering all institutions in the banking group, as well as affiliates assessed by the D-SIB as essential to restore, or will have an impact on, the banking group's viability and financial position. If covered institutions have their respective recovery plan, the D-SIB shall ensure that each of the covered institutions' recovery plans is consistent with the group recovery plan.

2. Definition of Terms

For the purposes of these guidelines, the following definitions shall apply:

- 2.1 *Institutions in the banking group* means the D-SIB and the entities that directly or indirectly control or are directly or indirectly controlled by such D-SIB.
- 2.2 *Control* of an enterprise exists when there is:
 - a. Power over more than one-half of the voting rights by virtue of an agreement with other stockholders; or
 - b. Power to govern the financial and operating policies of the enterprise under a statute or an agreement; or
 - c. Power to appoint or remove the majority of the members of the board of directors or equivalent governing body; or
 - d. Power to cast the majority votes at meetings of the board of directors or equivalent governing body; or
 - e. Any other arrangement similar to any of the above.

Control is presumed to exist if there is ownership or holding, whether direct or indirect, of twenty percent (20%) or more of a class of voting shares of a company. The D-SIB, for itself or on behalf of any entity within the banking group, may disclaim or rebut the presumption of control by providing sufficient information or documents to show that:

- a. The shares are owned or held exclusively for investment purposes;
 - b. It will not serve on the board of directors and will not nominate any candidate to serve on the board or otherwise seek board representation;
 - c. It will have only limited contacts with the entity's management that are customary for interested shareholders; and
 - d. It will engage only in normal and customary transactions with the entity.
- 2.3 *Point of non-viability* is as defined under Item "3, Annex F" of Appendix 59 and other relevant regulations.
 - 2.4 *Financial market infrastructure* is a multilateral system among participating financial institutions, including the operator of the system, used for the purposes of recording, clearing, or settling payments, securities, derivatives, or other financial transactions. It includes payment systems, central securities depositories, securities settlement systems and central counterparties.

3. Guiding Principles

- 3.1 The recovery plan shall serve as a guide to the recovery of a D-SIB in distress. It should be capable of being carried out during the recovery stage when the D-SIB has not yet reached the point of non-viability and the prospect of recovery is reasonable if appropriate recovery measures are taken.

- 3.2 The recovery plan shall, at the latest, be activated when the D-SIB breaches the total required Common Equity Tier 1 (CET1)¹ capital and/or the minimum liquidity ratios as may be prescribed by the Bangko Sentral. To ensure timely implementation of appropriate recovery measures and continuous operation of essential and systemically important functions and services, the recovery plan should utilize early warning indicators with specific levels (i.e., quantitative indicators which may be supplemented with qualitative indicators) that will trigger activation of the recovery plan even before the above-said breaches happen. Breach of an internally-set trigger level need not automatically initiate a particular recovery action. Instead, it shall prompt senior management to evaluate the situation and decide whether to take action under the recovery plan or refrain from taking such action. This preparatory mechanism, including the operational procedures, monitoring, escalation and approval process, should be clearly defined in the recovery plan.

However, launch of the recovery plan earlier than planned may be required by the Bangko Sentral when warranted, as approved by the Deputy Governor of the Supervision and Examination Sector, depending on the circumstances at the time.

- 3.3 *Governance and Oversight of the Recovery Plan.* The Board of Directors shall put in place a robust governance structure and sufficient resources to support the recovery planning process, which include the following:

- a. Clearly defining the responsibilities, both in normal times and during a crisis, of the business units, the senior management and the Board of Directors, as well as identifying a senior level executive primarily responsible for ensuring continuous compliance with the Bangko Sentral guidelines and internal policies on recovery plan.
- b. Integrating the recovery planning process into the D-SIB's business-as-usual risk management framework to ensure that the recovery plan shall:
 - Be designed as an extension of existing capital, liquidity and contingency funding plans, but shall have an end view of D-SIB recovering from more severe stress situations; and
 - Cover the contingency arrangements² established to allow the D-SIB to continue to operate and maintain essential and systemically important functions and services as it implements the recovery measures; and
- c. Maintaining adequate Management Information Systems (MIS) which can generate necessary information on a timely basis to enable the Board of Directors and the senior management to effectively discharge their respective responsibilities.

- 3.4 The recovery plan is a detailed list of options or courses of action that will be taken by the D-SIB to address a range of severe stress scenarios to restore its financial strength and viability. It shall reflect the D-SIB's nature, size, interconnectedness, level of substitutability/financial institution, and complexity. It shall have the following components to ensure effective and rapid execution:

- a. *Strategic analysis.* In devising the recovery plan, the D-SIB is expected to conduct and document strategic analysis, which identifies the D-SIB's essential and systemically important functions and services (i.e., mapped to the companies/legal entities that perform such functions or provide such services) and sets out the actions necessary to operate and maintain them in a recovery scenario. The strategic analysis shall also include the following:
 - information on linkages³ between and/or among the parent bank and covered institutions, and operational data such as the extent of asset encumbrance, amount of liquid assets, off-balance sheet activities, etc.;
 - underlying assumptions (exogenous and D-SIB-specific) for each recovery option, stress scenario, and other aspect of the recovery plan;
 - assessment of the viability of any business lines and covered institutions, which may be subject to separation in a recovery scenario, as well as the impact of such separation on the remaining group structure and its viability;
 - processes for determining the value and marketability of the material business lines, operations, and assets; and

¹ 6% CET1 Capital + 2.5% CCB + 0% to 2.5% CCyB + 1.5% to 2.5% HLA

² For continuous functioning of internal processes, IT systems, clearing and settlement facilities, supplier and employee contracts, etc.

³ Core business operations and interconnectedness by reference to business lines, legal entities and jurisdictions, intra-group exposures through intra-group guarantees and loans, and trades booked on a back-to-back basis; dependencies for liquidity, capital or operational support, etc.

- any additional requirements that the D-SIB may potentially be subjected to during crisis situations in order to maintain its membership in financial market infrastructures, for example, as regards pre-funding or collateralizing of positions, and identify options for addressing the additional requirements.
- b. *Stress scenarios.* The D-SIB is required to identify scenarios that are severe enough to activate the recovery plan. It could make use of its existing stress testing program as foundation for building scenarios.

The recovery plan shall include D-SIB-specific (idiosyncratic), market-wide, and combined (both D-SIB-specific and market-wide) stress scenarios. Each stress scenario shall be comprehensively described and assessed as to its impact on capital and/or liquidity.

- c. *Recovery options.* Along with more evident and straightforward recovery options that reduce the risk profile, raise or conserve capital and address liquidity pressures, the D-SIB is expected to seriously consider including specific drastic measures that could modify its structure and/or business model. Range of possible recovery measures may include the following:

- recapitalizations, capital conservation measures such as suspension of dividends and discretionary payments of remunerations;
- sale of subsidiaries and spin-off of business units;
- voluntary restructuring of liabilities through debt-to-equity conversion; and
- measures to secure adequate funding while ensuring sufficient diversification of funding sources and adequate availability of collateral.

Each recovery option should be comprehensively described, including the time needed to implement such option, and assessed as to probability of success or effectiveness to address the stress scenario. For each recovery option, the following should be laid down and discussed:

- estimated benefits¹ or outcome that would be derived from the recovery option, any assumptions made to quantify the benefits, and the time frame within which the benefits would be achieved;
- negative effect, if any, on the financial condition, franchise, credit ratings, as well as relevant stakeholders;
- preparatory actions to ensure that recovery option shall be effectively and timely implemented;
- process to implement or carry out the recovery option, including the escalation and decision-making process, indicating the owner/s of the process to instill responsibility and establish accountability, which is crucial in times of stress; and
- circumstances or factors that could render the recovery option unavailable/infeasible or could hinder the effectiveness of the recovery option, as well the remedial measures to be undertaken to overcome these impediments including the time frame to accomplish the remedial measures. These remedial measures when timely and effectively implemented improve the credibility and the probability of success of the recovery option.

Considering that several key steps may be involved to execute a recovery option and a combination of a number of recovery options may be required to address a stress scenario, the recovery plan should include estimates of the sequencing of actions and time needed to implement each.

- d. *Communication strategy.* The recovery plan shall contain communication strategy with supervisory authorities/regulators, public, financial markets, employees and other stakeholders.
- 3.5 The recovery plan shall not include assumption for any access to or receipt of government/public financial support/aid provided by the Philippine National Government and its offices, agencies and instrumentalities to preserve or restore viability, solvency or liquidity of banks (or any of the covered financial institutions), which may include, among others, financial assistance in the form of loans and advances extended by the Bangko Sentral, pursuant to Sections 83 and 84 of Republic Act No. 7653 (The New Central Bank Act).
- 3.6 The recovery plan and updates thereon shall be approved by the Board of Directors, and in the case of branches of foreign banks, it shall be approved by the Head office or the designated Regional office. On the other hand, the senior management shall be responsible for developing, maintaining and updating, and where necessary, executing the recovery plan.

¹ Impact or effect on D-SIB's financial condition if the recovery option becomes successful, which may be on capital, risk-weighted assets/risk profile, liquidity, leverage and other measures of financial strength, as well as impact on customers, counterparties and market confidence.

The recovery plan shall be updated at least annually, and upon occurrence of events that materially alter the D-SIB's structure, business model or operations, strategy or risk exposure. Updating of the recovery plan shall involve:

- review of the exogenous and D-SIB-specific assumptions the recovery plan is based upon; and
- assessment of the relevance and applicability of the recovery plan.

4. Reporting Requirement and Review by the Bangko Sentral

- 4.1 The recovery plan shall form an integral part of the Internal Capital Adequacy Assessment Process (ICAAP) document to be submitted every 31 March of each year. Thus, the ICAAP document shall also contain discussions on the governance and oversight of the recovery plan as discussed in paragraph 3.3, as well as a summary of any material changes on the recovery plan as provided for under paragraph 3.6, including the reason/s therefor. The first recovery plan shall be submitted on 30 June 2016 as supplement to the 2016 ICAAP document, which is required to be submitted on or before 31 March 2016.

The Bangko Sentral shall review the recovery plan as part of the overall supervisory process for D-SIB, focusing on assessing the recovery plan's robustness, credibility and ability to be effectively implemented.

- 4.2 Relative to paragraph 3.2 on breach of an internally-set trigger level, the senior management shall submit, within three (3) banking days, to the appropriate supervising department of the Bangko Sentral sufficient information about the D-SIB's decision whether or not to implement recovery measures under its recovery plan. The three (3) banking days shall be reckoned from the date of decision by the designated authority, as defined in the recovery plan.

(Circular Nos. 1051 dated 27 September 2019 and 1024 dated 06 December 2018)

GUIDELINES ON RECOVERY PLAN OF A DOMESTIC SYSTEMICALLY IMPORTANT BANK (DSIB)
(Appendix to Sec. 128 on D-SIBs)

(As deleted by Circular No. 1051 dated 27 September 2019 and as amended by Circular No. 1024 dated 06 December 2018)

GUIDELINES ON EUROPAY, MASTERCARD AND VISA (EMV) IMPLEMENTATION
(Appendix to Section 148 on IT Risk Management Systems)

- A. *Background.* In response to the increasing sophistication of frauds perpetrated through magnetic stripe (magstripe), international payment networks have orchestrated the shift towards EMV chip-enabled card. The EMV is an interoperability standard for chip-bearing smart card technology defined by EMVCo in 1994, adoption of which has resulted to significant reduction in card frauds due to skimming¹ and counterfeiting.

To outpace and manage fraudsters' shift towards jurisdictions that are still using magstripe, Bangko Sentral supervised financial institutions (BSFIs) via Section 148 (IT Risk Management Systems) were required to migrate their entire payment network to the more secure EMV chip-enabled cards.

- B. *Statement of Policy.* It is the policy of the Bangko Sentral to foster the development of safe, secure, efficient, and reliable retail payment systems, protect the integrity and confidentiality of customer accounts and information and uphold consumer protection.
- C. *Scope.* These guidelines shall govern the migration to and implementation of EMV of all BSFIs with debit card issuing and acquiring functions. For credit card, only cash advance transaction at Automated Teller Machines (ATMs) shall be covered since other credit card transactions are governed by the rules of the international payment networks.

It is incumbent upon all affected BSFIs to ensure that other key players in the domestic payment network comply with these guidelines.

For purposes of the subject guidelines, payment transactions covered are limited to card present and contact transactions in ATMs, POS terminals and other similar devices. Guidelines governing card-not-present as well as contactless transactions shall be issued separately.

- D. *Definition of terms.*

1. *EMV*, which stands for Europay, MasterCard and Visa, is a global standard for credit, debit and prepaid payment cards based on chip card technology. EMV chip-based payment cards, also known as smart cards, contain an embedded microprocessor, a type of small computer. The microprocessor chip contains the information needed to use the card for payment, and is protected by various security features. Chip cards are a more secure alternative to traditional magstripe payment cards.

Implementing EMV shall address the deficiencies inherent in magstripe by reducing fraud arising from counterfeit, lost and stolen card information through the following features:

- a. Authentication of the chip card to ensure that the card is genuine so as to protect against counterfeit fraud for online-authorized transactions;
 - b. Digitally signing payment data for transaction integrity; and
 - c. More robust cardholder verification to protect against lost and stolen card fraud for EMV transactions in all acceptance environments.
2. *Acquiring institution (acquirer)* is a bank or financial institution that process credit or debit card transactions via ATM or POS terminals.
 3. *Bangko Sentral Supervised Financial Institutions (BSFIs)* include banks, NBQB, non- bank electronic money issuers and other non-bank institutions which under existing Bangko Sentral rules and regulations and special laws are subject to Bangko Sentral supervision and/or regulation.
 4. *Co-branded cards are Philippine-* issued cards affiliated with international payment networks.
 5. *Debit cards* are payment cards linked to bank deposit or prepaid/electronic money (e-money) accounts.
 6. *Domestic payment network* includes BSFIs as well as other key players such as merchants, providers of ATMs, point-of-sale (POS) terminals and similar devices, card vendors, card personalization bureaus and domestic switches responsible for processing and handling domestic transactions.
 7. *Domestic switches* refer to Bancnet and Megalink.

¹ Skimming is the illegal copying of information from the magnetic stripe of a payment card to gain access to accounts.

8. *EMV chip liability shift* means that the liability and responsibility for counterfeit or fraudulent transactions shall shift to the BSFI which is not EMV-compliant.
9. *EMVCo* is the governing body that manages the EMV specification.
10. *Hybrid cards* are payment cards that have both EMV chip and magstripe.
11. *International payment networks* refer to the payment networks that have global establishment. For purposes of subject guidelines, recognized international networks shall refer to Visa, Mastercard, UnionPay, Diners/Discover, American Express, Japan Credit Bureau (JCB).
12. *Interoperability* refers to the ability of Philippine cardholders to transact at Philippine ATM and POS terminals, regardless of network affiliation or branding of the card.
13. *Issuing institution (issuer)* is a bank or non-bank financial institution that issues payment cards, whether proprietary or co-branded, to consumers.
14. *Payment cards* are cards that can be used by cardholders and accepted by terminals to withdraw cash and/or make payment for purchase of goods or services, fund transfer and other financial transactions. Typically, payment cards are electronically-linked deposit, prepaid or loan/credit accounts.
15. *Philippine domestic EMV specification* refers to the specification or standards based on EMV that shall be adopted in the Philippine financial market for the proprietary or non-co-branded cards.
16. *Proprietary cards* are Philippine-issued cards without international payment network affiliation.
17. *Technical fallback* is a state in which a chip cannot be used and another type of entry, such as magstripe, is used to complete a transaction.

E. General rules.

In line with the declaration of policy, BSFIs, in migrating to EMV, shall consider the following:

1. BSFIs shall maintain interoperability of the domestic payment network;
2. The Philippine EMV Implementation shall use established EMV specification as follows:
 - a. Issuers of proprietary cards shall use the Philippine domestic EMV specification; and
 - b. Issuers of co-branded cards shall use the EMV specification of their affiliated international payment network.
3. At a minimum, all debit accepting devices shall acquire/accept Philippine issued proprietary cards using the Philippine domestic EMV specification of members/participants of the domestic switches;
4. The domestic payment network shall ensure continued interoperability and acceptance of Philippine EMV issued cards using the Philippine domestic EMV specification on Philippine EMV deployed acceptance devices¹; and
5. BSFIs shall strengthen consumer protection by adequately handling and containing consumer concerns and complaints arising from fraudulent schemes done electronically.

F. The Philippine Domestic EMV Specification.

With the main objectives of maintaining interoperability and reducing card fraud, BSFIs shall adopt a Philippine domestic EMV specification for proprietary cards. The domestic EMV specification should:

- a. Adopt the EMV specification according to EMVCo;
- b. Apply to ATM and domestic debit POS transactions;
- c. Support contact transactions;
- d. Support online card authentication to ensure that transactions are made using a valid card;
- e. Support online authorization to enable issuer to manage fraud and credit risk at the transaction level;
- f. Support online PIN cardholder verification method; and

¹ Include EMV-compliant ATMs, POS terminals and other similar devices.

- g. Support technical fallback to magstripe in the interim, without prejudice to the issuer's decision to process/approve fallback transactions.

G. Minimum operational requirements.

1. Issuing institutions shall:
 - a. Ensure that they have the technical systems and network necessary to process and handle EMV transactions;
 - b. Support EMV data elements in authorization messages;
 - c. Define chip cards feature, functionality and interface capability;
 - d. Enhance risk management systems to leverage chip;
 - e. Determine the card migration strategy;
 - f. Update customer support and operational systems to support chip cards;
 - g. Be certified for network interfaces and card personalization by a certification body organized by BSFIs pursuant to this Guidelines;
 - h. Replace card base; and
 - i. Educate the consumers.
2. Acquiring institutions shall:
 - a. Ensure that card-accepting devices are EMV-certified to support the acquiring and routing of Philippine-issued debit cards using the Philippine domestic EMV specification;
 - b. Ensure that PIN-entry devices are Payment Card Industry PIN Transaction Security (PCI-PTS1) compliant; and
 - c. Enable a debit POS environment that supports online PIN for Philippine-issued debit cards.
3. Domestic switches shall:
 - a. Establish infrastructure and systems that are EMV-compliant and able to support switched EMV transactions from domestic interconnected networks;
 - b. Ensure continued support to existing transaction sets and functions provided to consumers;
 - c. Enhance efforts to educate their members on EMV collaboration and seek effective alignment of strategy and design principles; and
 - d. Ensure continued ability to support, in the interim, transactions in magstripe format subject to liability shift policies acceptable to Bangko Sentral, the standards of which shall be covered in subsequent guidelines.

H. Detailed guidelines, policies and processes.

BSFIs shall agree on and implement detailed technical and operational requirements, policies and procedures that are acceptable to the Bangko Sentral, the standards of which shall be covered in subsequent guidelines, and aligned with subject EMV Implementation Guidelines, covering but not limited to the following:

1. Philippine Application Identifier (AID);
2. Single Common AID, Single Common Card Personalization Profile and Single Common Technical Configuration for domestic transactions;
3. Transaction routing;
4. Testing and certification;
5. Dispute and fraud risk management; and
6. Other processes affected by the EMV migration.

I. Updated EMV migration plan

Any changes arising from the aforementioned guidelines shall be incorporated in the EMV Migration Plan and all affected BSFIs shall resubmit their updated plan to Bangko Sentral's Technology Risk and Innovation Supervision Department (TRISD) within sixty (60) days from 24 November 2014.

All BSFIs shall support migration to EMV standards. Consequently, all cards issued and card-accepting devices should be EMV-compliant.²

(Circular Nos. 961 dated 02 June 2017, 936 dated 28 December 2016, and 890 dated 02 November 2015)

¹ A security requirement of the Payment Card Industry (PCI) regarding testing of PIN-entry devices using pre-defined standards to get certification.

² This paragraph shall take effect on 01 January 2017.

EMV CARD FRAUD LIABILITY SHIFT FRAMEWORK (ECFLSF) **(Appendix to Sec. 1002)**

I. Introduction

This document outlines the Bangko Sentral's guidelines implementing the EMV Card Fraud Liability Shift Framework (ECFLSF). Pursuant to Section 148 and *Appendix 112*, BSFIs should shift from the magnetic stripe (magstripe) technology to EMV-compliant cards, point-of-sale (POS) terminals and automated teller machines (ATMs). The immediate impact and benefit on the adoption of EMV technology is the reduction in card fraud resulting from counterfeit or skimming attacks.

While migration efforts to shift to EMV technology are ongoing, the use of magstripe in payment cards and/or card-accepting devices shall be allowed subject to card fraud liability shift. This means that the BSFIs which have not yet or have partially adopted the EMV technology shall be held responsible for losses associated with the use of a counterfeit card in a card-present environment.

II. Statement of Policy

It is the policy of the Bangko Sentral to foster the development of safe, secure, efficient and reliable retail payment systems, protect the integrity and confidentiality of customer accounts and information and uphold consumer protection.

Towards this end, the Bangko Sentral requires all concerned BSFIs to migrate to a more secure payment technology and sets forth subject principles for allocation of card fraud liability with the aim of ensuring compliance of the different retail payment system participants with the Bangko Sentral's EMV migration requirement. Pending full migration to the EMV technology, the ECFLSF shall likewise accelerate the dispute resolution and restitution process for customers who have valid claims arising from counterfeit fraud or skimming attacks.

III. Applicability and Scope

These guidelines shall apply to all BSFIs with debit and credit card issuing and acquiring functions and shall govern the allocation of liability associated with fraudulent transactions arising from counterfeit cards beginning 01 January 2017, subject to the conduct of proper investigation by the concerned participant/s of the payment card network. The coverage shall be limited to card-present and contact transactions of Philippine- issued payment cards used domestically in ATMs, POS terminals, and other similar devices routed to either domestic or international payment networks.

Consequently, the ECFLSF shall not apply to card-not-present and contactless transactions. Furthermore, foreign-issued payment cards used domestically and Philippine-issued payment cards used abroad shall not be covered as these are already subject to the existing liability shift and chargeback rules of the international payment networks.

IV. Definition of Terms

For purposes of these guidelines, the following definitions shall apply:

- a. *Acquiring institution (Acquirer)*, is a bank or non-financial institution that processes credit or debit card transactions via ATMs, POS terminals, and other similar devices.
- b. *EMV compliant device or terminal* is a device or terminal that has, or is connected to, a contact chip card reader, has an EMV application, certified, and is able to process EMV transactions.
- c. *Co-branded cards* are Philippine- issued cards affiliated with international payment networks.
- d. *Counterfeit card* is an imitation or falsification of a genuine magstripe card or EMV chip card with track data copied from a hybrid EMV card.
- e. *Debit cards* are payment cards linked to bank deposit or prepaid/electronic money (e-money) accounts.
- f. *Fallback to magstripe* transaction occurs when the chip on the card is not being read by a terminal. This is similar to *technical fallback*, which is defined in *Appendix 112* as a state in which the chip cannot be used and another type of entry, such as magstripe, is used to complete a transaction.
- g. *Hybrid cards* are payment cards that have both EMV chip and magstripe.
- h. *International payment networks* refer to the payment networks that have global establishment. For purposes of subject guidelines, recognized international networks shall refer to Visa, Mastercard, UnionPay, Diners/Discover, American Express, Japan Credit Bureau (JCB).

- i. *Issuing institution (Issuer)* is a bank or non-bank financial institution that issues payment cards, whether proprietary or co-branded, to consumers.
- j. *Payment cards* are cards that can be used by cardholders and accepted by terminals to withdraw cash and/or make payment for purchase of goods or services, fund transfer and other financial transactions. Typically, payment cards are electronically-linked to deposit, prepaid or loan/credit accounts.

V. Guiding Principles

- a. The adoption of EMV technology is designed to reduce and mitigate risks arising from counterfeit card fraud. While it remains virtually impossible to create a counterfeit EMV card that can be used to conduct an EMV payment transaction successfully, the presence of magstripe in a hybrid EMV card makes it still vulnerable to counterfeit attacks.
- b. A BSFI that has enabled the most secure EMV options shall be protected from financial liability arising from losses on counterfeit card fraud. The liability for this type of fraud shall shift to the BSFI which is not or is partially compliant with the EMV migration requirement.
- c. To resolve the issue on the allocation of card fraud liability using the guidelines described herein, the involved parties (such as issuer, acquirer, and payment network) should, first, characterize the fraud committed, and then, assess the technology being employed, in light of the applicable payment network rules. The party supporting EMV technology will prevail and in case of a technology-tie (neither or both parties are EMV compliant), the liability for fraudulent transactions generally remains with the Issuer.

VI. Allocation of Card Fraud Liability

The allocation of liability for counterfeit card fraud is summarized in the following table:

	Card Capabilities	Acceptance Device Support	Scenario	Liability
1	Magnetic stripe only	Magnetic stripe only	Magnetic card transaction was completed	Issuer
2	Magnetic stripe only	EMV compliant	Magnetic card transaction was completed	Issuer
3	EMV compliant hybrid card	Magnetic stripe only	Magnetic card transaction was completed	Acquirer ¹
4	EMV compliant hybrid card	EMV compliant	Fallback transaction Magnetic card transaction was completed	Issuer

The information provided above shall be considered as a general guide as each fraudulent transaction shall be separately investigated on. Likewise, the domestic and international payment networks may come up with other scenarios and probable conditions that illustrate how liability is assigned on counterfeit card fraud using different combinations of card and acceptance device capabilities. However, the resolution of such scenarios/conditions should follow the principles espoused in these guidelines.

VII. Consumer Protection and Complaints Handling and Resolution

- a. The participants in the domestic payment network (such as issuer, acquirer, and payment network) should collaborate and devise detailed rules and procedures including arbitration mechanisms to operationalize the ECFLSF. Accordingly, a body responsible for strictly implementing the above-mentioned detailed rules and procedures on ECFLSF should be constituted.
- b. Cardholders' complaints and/or requests for chargeback as a result of counterfeit card shall be considered as complex complaint/request defined in Sec. 1002 and hence, shall follow the standards provided in such regulations, except for the processing and resolution timeline which should be within ten (10) days instead of forty five (45) days.
- c. Issuers and Acquirers should ensure that affiliated international payment networks align their existing liability and chargeback rules with the ECFLSF insofar as Philippine-issued payment cards used in the domestic payment environment are concerned.

(Circular Nos. 1048 dated 6 September 2019 and 936 dated 28 December 2016)

¹ When an Acquirer accepts a magstripe card that was counterfeited with track data copied from an EMV compliant hybrid card and the counterfeit card is used at a device/terminal that is not EMV-compliant, resulting in a transaction to be successfully processed, the Acquirer is liable for any chargeback resulting from such fraud.

**OPERATIONAL GUIDELINES ON THE ADMINISTRATION OF THE
PERSONAL EQUITY AND RETIREMENT ACCOUNT (PERA)
(Appendix to Sec. 1121)**

Pursuant to R.A. No. 9505 also known as the Personal Equity and Retirement Account (PERA) Act of 2008 (PERA Act) and its Revised Implementing Rules and Regulations (Revised PERA Rules), the following operational guidelines on the administration of PERA are hereby issued. Certain capitalized terms herein used shall have the definitions ascribed to them in the Revised PERA Rules unless the context otherwise requires.

I. ACCOUNT OPENING

A. Eligibility Review and Pre-acceptance Disclosure

- 1) Only a natural person who has the capacity to contract and has a Tax Identification Number (TIN) can be a contributor.
- 2) The administrator shall –
 - (a) Determine the exclusivity of PERA administration through an on-line validation in the PERA contributors' database (PERA System).
 - (b) Observe the following rules prior to any account opening:
 - i. A contributor shall designate and maintain only one (1) administrator for all his PERA;
 - ii. A contributor may create and maintain a maximum of five (5) PERA at any one time; and
 - iii. Each PERA shall be confined to only one category of investment products. For this purpose, the categories of PERA investment products are as follows:
 - a. unit investment trust fund;
 - b. mutual fund;
 - c. annuity contract;
 - d. insurance pension product;
 - e. pre-need pension plan;
 - f. government securities;
 - g. stock or other security listed and traded in a local exchange;
 - h. exchange-traded bond; or
 - i. any other category of investment product or outlet which the concerned Regulatory Authority may allow for PERA purposes: *Provided*, That, the product must be non-speculative, readily marketable, and with a track record of regular income payments to investors.
 - (c) Ensure that the minimum documentary requirements (Annex A) for the proper identification of the Contributor are properly complied with and in adherence with the Anti-Money Laundering (AML) regulations and the PERA Act; and
 - (d) Fully disclose to the potential contributor the following, using the Pre- Acceptance and General Risk Disclosure Statement (PGRDS):
 - i. Nature of a PERA, privileges and conditions of its establishment; emphasis must be placed on the long-term nature of PERA, the conditions for tax exemption and penalties for early withdrawal unless the early withdrawal is allowed under the PERA Act;
 - ii. Category and investor-risk profile classification of PERA investment products available to a Contributor;
 - iii. Risks associated with each category of PERA investment products which shall form part of the General Risk Disclosure Statement;
 - iv. Specific obligations and responsibilities of an administrator, investment manager (Advisor) and custodian; and

- v. Option to either appoint a third-party cash custodian or to be the custodian of his own PERA funds; and
- vi. Option to elect an investment manager (Advisor).

B. Account Opening Process

- 1) The administrator shall –
 - (a) Require the contributor to accomplish a PERA Client Suitability Assessment (PCSA) prior to account opening;
 - (b) Inform the contributor formulate an Investment Policy Statement (IPS) which shall serve as a frame of reference for investment decisions of the contributor. The administrator shall inform the contributor of the full range of PERA investment products with emphasis on the specific category of products corresponding to the contributor's risk profile classification as borne by the results of PCSA. The administrator, however, shall provide a process for allowing contributor to invest in PERA investment products not falling within his risk profile classification; *Provided That*, any such investment may be allowed only upon the prior written instruction of the contributor;
 - (c) Execute the PERA Administration Agreement (PAA) and furnish the contributor copies of the PAA along with the PGRDS and PCSA;
 - (d) Ensure that the contributor's account opening details are lodged in the PERA System; and
 - (e) Facilitate the contributor's appointment of a cash custodian, or a designated depository bank that meets the prudential criteria provided in Sec. 111 (in case of PERA self-custody arrangement); and as necessary, a securities custodian.

Where the contributor elects to be the custodian of his own PERA funds, the administrator shall require the contributor to open a self-custody deposit account with the designated depository bank of the administrator. This account shall be used to custodize all PERA funds except for PERA deposit products.

- 2) The designated depository bank shall ensure that:
 - (a) The PERA self-custody deposit account shall be used exclusively for purposes contemplated under the PERA Rules;
 - (b) All funds under the account are non-transferrable except for instances set forth in the PERA Rules; and
 - (c) Withdrawal or transfer of any amount therefrom that is not consistent with the PERA Rules shall result in the termination of the self-custody account, including all PERA investments.

Moreover, the designated depository bank shall adopt appropriate risk management systems and controls to ensure protection of PERA funds from misuse or misappropriation.

- 3) In the case of a contributor who opts to engage the services of or has engaged an investment manager (Advisor), he shall provide the administrator with a copy of the PERA investment management (Advisory) Agreement. The said agreement shall set forth at a minimum, the overall investment philosophy, standards, and practices of the investment manager (Advisor) and the validation by the investment manager (Advisor) of the contributor's PCSA. The investment decisions made by the investment manager (Advisor) for and on behalf of the contributor shall be in accordance with the authority granted by the contributor in their agreement.
- 4) An entity who is offering a PERA investment product hereinafter referred to as the PERA product provider shall furnish the administrator and/or contributor all relevant documents necessary to facilitate the investment of a contributor in the PERA investment product. Appropriateness of the PERA investment product based on PCSA of the contributor shall be validated by administrator.

II. ACCOUNT ADMINISTRATION

A. Contributions

- 1) The administrator shall –
 - (a) Secure proof of income when a contribution is made and ensure that the maximum aggregate contribution per calendar year as follows has not been exceeded. If in case proof of income is already obtained for a contribution made during the calendar year, the same shall no longer be required for subsequent contributions made during the year:
 - i. P100 thousand or its equivalent in any convertible foreign currency at the prevailing rate for non-Overseas Filipino (non-OF); or

- ii. P200 thousand or its equivalent in any convertible foreign currency at the prevailing rate for OF;

For this purpose, prior to contribution, the status of an OF shall be validated by securing from the OF a sworn certification on his continuing status as an OF for the calendar year;

- (b) Receive and acknowledge all contributions, initial and subsequent, through the PERA contribution and investment instruction Form (PCIIF) which shall also contain the investment directives of the contributor or his designated investment manager (Advisor):
 - i. The administrator shall facilitate and assist the contributor in completing the necessary documents for the chosen PERA investment product/s; and
 - ii. The contributor shall be provided with the copies of the PERA investment product documents such as, but not limited to, specific risk disclosure statement if not yet provided by the product provider to the contributor;
- (c) Ensure that all contributions are directly remitted to the cash custodian or in the case of PERA self-custody arrangement, facilitate remittance of contribution to the depository bank;
- (d) Ensure that the funds credited to the PERA self-custody account are promptly invested in a PERA product after receipt of instruction from the contributor, except for the following instances:
 - (i) when the balance of such account is insufficient for reinvestment; or
 - (ii) in special circumstances, such as due to transfer/change of administrator or investment product. However, in no case shall the investment be made later than fifteen (15) calendar days from receipt of the contributor's instruction; otherwise, the administrator shall be personally liable for the early withdrawal penalties that may be imposed by the BIR
- (e) Maintain a record of all contributions made to the PERA on per account and aggregate basis;
- (f) Ensure that the PCSA is periodically updated or as often as may be necessary, upon notice to the administrator, on account of change in the contributor's personal/financial circumstances or preferences;
- (g) Apply for certificate of entitlements or tax credit certificate on behalf of the contributor and likewise receive the same from the BIR.

In the case of employer's contribution:

- (h) Accept the contributions of an employer only if:
 - i. Its employees have already opened a PERA;
 - ii. Each employee has accomplished a PCIIF; and
 - iii. The maximum aggregate yearly contribution of the contributor has not been exceeded.
 - (i) Issue to the employer a certificate of the actual amount of qualified employer's contributions which shall serve as its basis for deduction on its gross income; and
 - (j) Secure from the employer a certification on the amount of tax not withheld on compensation/fringe benefits as a result of contributing to the PERA of its employees.
- 2) The cash custodian shall –
 - (a) Open a PERA cash account for the contributor which shall be governed by a PERA cash custody agreement;
 - (b) Receive and acknowledge all contributions directly remitted by the administrator; and
 - (c) Custodize all funds of the PERA.
 - 3) In the case of a contributor who has an investment manager (Advisor), the investment manager (Advisor) shall accomplish the investment instructions portion of the PCIIF for and on behalf of the Contributor.
 - 4) The designated depository bank shall ensure that the PERA self-custody account is kept separate from other deposit accounts of the contributor.

B. Choice of PERA Investment Product

- 1) The administrator shall –
 - (a) Execute the contributor's or his investment manager's (Advisor) instruction as indicated in the PCIIF;
 - (b) Based on the PCIIF, facilitate remittance of funds to the chosen PERA product provider;
 - (c) Instruct the PERA product provider to transfer the securities or evidence of investments to the securities custodian and provide details of the PERA cash account of the contributor for the credit of investment proceeds;
 - (d) Maintain a record of all investments including earnings and expenses relative to the PERA.
- 2) The cash custodian shall execute the administrator's instruction as to disposition of the funds.

In case of self-custody of PERA funds, the administrator shall facilitate the execution of the contributor's instruction as to the disposition of funds.
- 3) The PERA product provider shall –
 - (a) Transfer the securities, evidence of deposits or other evidence of investments to the securities custodian chosen by the contributor. In case of self-custody arrangement for securities that are non-transferable, non-negotiable and non-withdrawable, the evidence of investments shall be given to and kept by the contributor;
 - (b) Credit to the contributor's PERA cash account all cash due to the contributor relative to his PERA investment product.
- 4) The securities custodian shall –
 - (a) Open a PERA securities account for the contributor which shall be governed by a PERA Securities Custody Agreement;
 - (b) Receive and acknowledge all evidence of investments; and
 - (c) Custodize all non-cash assets of the PERA except those under self-custody arrangement.

C. Change of PERA Investment Product

- 1) PERA investment product/s may be changed: *Provided*, That the entire PERA assets arising from the sale shall be transferred to another PERA Investment Product/s within fifteen (15) calendar days from withdrawal thereof.
- 2) The contributor or his investment manager (Advisor) shall accomplish the PCIIF and submit the same to the administrator.
- 3) The administrator shall –
 - (a) Execute the investment instructions of the contributor or his investment manager (Advisor) as indicated in the PCIIF; and
 - (b) Coordinate with PERA Product provider, cash custodian/designated depository bank and securities custodian as to disposition of the PERA assets.

D. Suspension or Revocation of Qualification/Accreditation

In the event of suspension or revocation of their qualification/accreditation:

- 1) The former administrator shall –
 - (a) Effect the transfer of PERA assets to the new administrator chosen by the contributor within fifteen (15) calendar days from receipt of contributor's advice; otherwise, the former administrator shall be personally liable for the early withdrawal penalties which may be imposed by the BIR; and
 - (b) Institute a mechanism to monitor and ensure that all contributors have received the notice of suspension or revocation.
- 2) The contributor shall advise the administrator, investment manager (Advisor), or custodian of his choice of a new administrator, investment manager (Advisor), or custodian, as the case may be, within three (3) working days from receipt of the notice of suspension or revocation.

Failure of the contributor within the prescribed period to designate a new administrator or custodian shall authorize his current administrator or custodian to appoint its successor that shall assume all its duties and responsibilities to the contributor.

In the event of suspension or revocation of their qualification/accreditation:

1) The former administrator shall –

- a) Effect the transfer of PERA assets to the new administrator chosen by the contributor within two (2) working days from receipt of contributor's advice; otherwise, the former administrator shall be personally liable for the early withdrawal penalties which may be imposed by the BIR; and
- b) Turn-over to the new administrator the complete and updated files and records (in soft and hard copies) of the contributor's PERA.

While the new administrator shall –

- a) Ensure the completeness of PERA files and records turned-over by the former Administrator that will enable proper performance of its functions; and
- b) Follow all the procedures enumerated in *item II* (account administration) that are necessary to ensure continuity of the PERA.

2) The former investment manager (Advisor) shall advise the contributor and his administrator within the above prescribed period; however, in the absence of any advice from the contributor on his choice for a new investment manager (Advisor), the former investment manager (Advisor) shall turn over to the administrator all the contributor's PERA records and documents.

3) The former custodian shall advise the contributor and his administrator within the above prescribed period and shall –

- (a) Turn over to the new custodian all PERA assets in its custody within two (2) working days from receipt of Contributor's advice; and
- (b) Submit to the administrator a report on all financial transactions and documents in its custody relative to the transferred PERA assets within the same period.

While the new custodian shall –

- (a) Receive and acknowledge the PERA assets turned over by the former custodian; and
- (b) Follow all the procedures enumerated in *item II* (account administration) that are necessary to ensure continuity of the PERA.

E. PERA Records and Reports

1) The administrator shall –

- (a) Possess adequate systems and technological capabilities to ensure proper recording and tracking of contributor's PERA;
- (b) Maintain separate set of books of accounts for all contributions, investments, earnings, expenses, withdrawals and terminations of the PERA;
- (c) Retain documentary proof of contribution/income/withdrawal/termination subject to validation of the BIR whenever requested;
- (d) Monitor and keep track of the contributor's tax credits, privileges and other entitlements; and
- (e) Consolidate and reconcile all transactions/documents with the cash and securities custodians.

2) In addition, the administrator shall submit the following reports:

Recipient	Frequency	Particulars
Contributor	As applicable	Sale and purchase of PERA assets

	Quarterly	Summary of the following information: <ul style="list-style-type: none"> i. Total contributions and withdrawals for each PERA, indicating therein the total amount of contributions entitled to tax incentives; ii. Total income earned on the contributions, indicating those entitled to income tax exemption; iii. Total fees and charges assessed and paid by the contributor to administrator, investment manager (Advisor), if any, cash and/or securities custodians; iv. Purchase and sale transactions of PERA assets implemented and those pending execution; and v. Valuation of the PERA assets and investments.
Employer of a contributor	Annually	Certification on the actual amount of the qualified employer's contribution in case when the employer made contributions to the PERA of its employees
Bangko Sentral	Quarterly	Reports on all PERA assets under its administration which shall form part of the financial reporting package (FRP) of banks and trust entities
BIR	As provided	PERA reports as may be required by the BIR

Furthermore, the administrator shall perform periodic uploading of transactions details to the PERA System.

- 3) The cash and securities custodians shall submit the following reports to –
 - (a) The contributor and the administrator – a quarterly securities and cash activity report of all financial transactions and documents under their custody within ten (10) days after the end of each quarter; and
 - (b) The Bangko Sentral – quarterly reports on all PERA assets and documents under their custody which shall form part of the financial reporting package of banks and trust entities.
The quarterly reporting requirements as provided under Items “3(a)” and “3(b)” shall not apply in case of self-custody of PERA funds.
- 4) All funds received from contributors under a PERA self-custody arrangement shall be recorded as part of deposit liabilities under the “PERA Self-Custody Deposit Account” in the books of the designated depository bank. This account shall be governed by the following guidelines:
 - (a) The account shall have the following features:
 - (i) No dormancy charges;
 - (ii) No minimum maintaining balance;
 - (iii) Non-interest bearing; and
 - (iv) Reserve requirement against deposit liabilities of zero percent (0%)
 - (b) The account shall be used exclusively for facilitating the PERA related transactions of the contributor.
 - (c) All funds debited therefrom shall be in accordance with the written instruction of the contributor and accepted by the administrator.
- 5) The investment manager (Advisor) shall provide periodic reports to the contributor as stipulated in the PERA investment management (Advisory) agreement.

F. Valuation of PERA Investment Product

Each PERA investment product shall be valued in accordance with the valuation methodology, standards and reporting requirements as prescribed by the concerned regulatory authority of that PERA investment product; *Provided, That* such valuation methods and standards are in accordance with internationally accepted accounting and valuation standards.

G. Accounts Review

- 1) The administrator shall conduct a periodic administrative review of all PERA under its administration to ensure that –
 - (a) Transactions involving PERA comply with the contributor's or his investment manager (Advisor)'s instructions, contracts, and applicable laws, rules and regulations;

- (b) Investments of the contributor are aligned with his risk profile and/or IPS, and are authorized by the contributor or his investment manager (Advisor);
 - (c) Books of accounts are correct and updated, and appropriate taxes/penalties are properly accounted and/or paid to the government, when applicable; and
 - (d) PERA assets are kept separate from other assets of the administrator for the purposes of insolvency.
- 2) The administrator or the contributor's investment manager (Advisor), if any, shall conduct at least quarterly an investment performance review of all PERA investment products and/or all PERA assets of the contributor. The results of such review shall be reported to the contributor through his quarterly financial statements, or as frequent as necessary.

H. Collection of Fees

- 1) The administrator, investment manager (Advisor) and cash/securities custodian may charge against the PERA appropriate fees that are commensurate to the services rendered in relation to the contributor's PERA.
- 2) The investment manager (Advisor) and cash/securities custodian shall provide the contributor's administrator with their respective bills for their investment management services and custodial services.
- 3) The administrator may –
 - (a) Correspondingly charge against the PERA of a contributor the appropriate fees such as administration, investment management and custodial fees and report the same to the contributor; and
 - (b) Instruct the cash custodian to pay the administrator, cash/securities custodian and investment manager (Advisor), if any.

III. ACCOUNT WITHDRAWALS, DISTRIBUTIONS AND TERMINATION

A. Early Withdrawal

- 1) The following shall not be subject to early withdrawal penalties:
 - (a) When the contributor had an accident or illness-related hospitalization in excess of thirty (30) days: *Provided, That* there is a notarized doctor's certificate attesting to said event;
 - (b) When the contributor becomes permanently totally disabled as defined under the Employees Compensation Law, Social Security Law or Government Service Insurance System Law: *Provided, That* he has a certification from the pertinent government agency; or
 - (c) Immediate transfer of assets to another eligible PERA investment product and/or another administrator, who have been discredited either by the BIR or the Bangko Sentral, within fifteen (15) calendar days from withdrawal thereof.

Similarly, the transfer of PERA assets to another administrator for reasons other than the suspension or revocation of qualification/accreditation of the previous administrator shall not be subject to early withdrawal penalties: *Provided, That* such transfer shall be made within fifteen (15) calendar days from withdrawal thereof.

- 2) All other early withdrawals not mentioned above shall be imposed early withdrawal penalties.
- 3) The early withdrawal penalties to be imposed shall be those set forth in BIR Revenue Regulations No. 17-2011 and subsequent BIR issuances.

B. Qualified PERA Distributions

The following are considered qualified PERA distributions and shall be exempt from the payment of income taxes or estate tax, if applicable:

- 1) When the contributor reaches the age of fifty-five (55) years and has made contributions for at least five (5) years:
 - (a) The contributor has the option to receive his PERA assets in lump-sum, pension for a definite period or lifetime pension;
 - (b) Notwithstanding this condition, the contributor may opt to continue his PERA and its tax-privileges; or

- 2) Upon the death of the contributor, *Provided*, That a death certificate was presented:
 - (a) The administrator shall terminate the PERA and release the assets to the contributor's designated beneficiary/ies;
 - (b) In case when there is/are no designated beneficiary/ies, the administrator shall release the PERA assets to the contributor's estate in accordance with the laws on succession and rules of court.

C. Release of PERA Assets

- 1) The administrator shall –
 - (a) Secure from the contributor or his designated beneficiary/ies, when applicable, the duly accomplished PERA Notice of Withdrawal/ Termination Form (PNWTF) and other necessary documents;
 - (b) Execute the divestment instructions of the contributor or his designated beneficiary/ies;
 - (c) Instruct the securities custodian to release the evidence of investments to the appropriate parties and remit the divestment proceeds to the cash custodian;
 - (d) Compute the early withdrawal penalties, if any in accordance with the rules set forth by the BIR which shall be deducted from the divestment proceeds and instruct the cash custodian to remit the early withdrawal penalties to the BIR;

In case of PERA self-custody arrangement, the administrator shall ensure remittance of early withdrawal penalties to the BIR.
 - (e) Report the withdrawal/termination transactions and submit the necessary documents to the BIR; and
 - (f) Account for the unwithdrawn portion of the PERA, if any.
- 2) The cash custodian shall –
 - (a) Release the divestment proceeds, net of early withdrawal penalties if any, to the contributor or his designated beneficiary/ies; and
 - (b) Remit the early withdrawal penalties to the BIR as instructed by the administrator.

(Circular Nos. 1081 dated 04 March 2020 and 890 dated 02 November 2015)

**GUIDELINES AND PROCEDURES GOVERNING THE CONSUMER ASSISTANCE MANAGEMENT SYSTEM (CAMS)
OF BANGKO SENTRAL-SUPERVISED FINANCIAL INSTITUTIONS
(Appendix to Sec. 1002)**

(As deleted by Circular No. 1048 dated 06 September 2019, and as amended by Circular No. 890 dated 02 November 2015)

GUIDELINES ON THE IMPLEMENTATION OF THE BASEL III LEVERAGE RATIO FRAMEWORK (Appendix to Section 129)

The Bangko Sentral will adopt a leverage ratio framework that is designed to act as a credible supplementary measure to the risk-based capital requirements. The leverage ratio intends to:

- Restrict the build-up of leverage in the banking sector to avoid destabilizing deleveraging processes which can damage the broader financial system and the economy; and
- Reinforce the risk-based requirements with a simple, non-risk based “backstop” measure.

This framework is largely based on the document issued by the Basel Committee on Banking Supervision (“Basel Committee” or “BCBS”) released in January 2014 entitled “Basel III Leverage Ratio Framework and Disclosure Requirements”.

A. Definition, Minimum Requirement and Scope of Application

Leverage ratio is defined as the capital measure (the numerator) divided by the exposure measure (the denominator), expressed as a percentage:

$$\text{Basel III Leverage Ratio (\%)} = \frac{\text{Tier I Capital}}{\text{Exposure Measure}}$$

The leverage ratio shall not be less than 5.0 percent and will be applied to all universal and commercial banks (U/KBs) and their subsidiary banks/quasi-banks (QBs) computed on both solo¹ and consolidated² bases, similar with the capital adequacy framework, i.e., computed on a daily basis and reported on a quarterly basis.

1. Capital Measure

The capital measure for the leverage ratio is Tier 1 capital calculated in accordance with *Appendix 59*.

Tier 1 capital should be net of regulatory deductions³ applicable to Tier 1 capital. Items that are deducted completely from capital do not contribute to leverage, hence, should also be deducted from the exposure measure.

2. Exposure Measure

a. General Measurement Principles in respect of the Exposure Measure

U/KBs and their subsidiary banks/QBs should generally follow the accounting value of exposure for the purpose of calculating the Exposure Measure for the leverage ratio, except that:

- On-balance sheet, non-derivative exposures are to be included in the Exposure Measure net of specific provisions; and
- Netting of loans and deposits is not allowed.

U/KBs and their subsidiary banks/QBs must not take account of physical or financial collateral, guarantees or other credit mitigation techniques to reduce the Exposure Measure.

b. Total Exposure Measure

The total Exposure Measure is computed as follows:

¹ Pertains to the reporting entity's head office and branches

² Pertains to the reporting entity and its financial allied subsidiaries except insurance companies that are required to be consolidated on a line-by-line basis for the purpose of preparing consolidated financial statements

³ Refers to Regulatory Adjustments to CET1 Capital (Items A.2.1 to A.2.24) and Regulatory Adjustments to Additional Tier 1 (AT1) Capital (Items A.5.1 to A.5.8) of Part II (Qualifying Capital) of the BASEL III CAR Template (Version 3)

$$\begin{aligned}
& \text{On-balance sheet exposures} \\
& + \\
& \text{Derivative exposures} \\
& + \\
& \text{Securities Financing Transactions (SFT) exposures} \\
& + \\
& \text{Off-balance sheet (OBS) Items}
\end{aligned}$$

Exposure Measure =

The methods for calculating the Exposure Measure in respect of the above four main exposure categories are described in greater detail below.

1. On-balance sheet

For the purpose of calculating the Exposure Measure, the on-balance sheet exposure must include all on-balance sheet assets, gross of General Loan Loss Provisions (GLLP).

On-balance sheet derivatives and SFT assets are not to be included under On- Balance sheet exposures as they are subject to different treatment.

2. Derivatives

The Exposure Measure for derivative contracts¹ consists of an exposure arising from the underlying of the derivative contract and a counterparty credit risk (CCR) exposure. In general, the Exposure Measure for derivatives is calculated as follows:

$$\begin{aligned}
& \text{Replacement Cost (RC)} \\
& + \\
& \text{Potential Future} \\
& \text{Exposure (PFE)} \\
& \pm \\
& \text{Adjustments for Written Credit Derivatives}
\end{aligned}$$

Exposure Measure =
for Derivatives

Where:

RC = Positive mark-to-market value of the contract (or zero if the mark-to-market value is zero or negative);

*PFE*² = This represents an add-on arising from the potential exposure over the remaining life of the contract calculated by multiplying the notional principal amount of the contract to the appropriate potential future credit conversion factor; and

Adjustments for Written Credit Derivatives = effective notional amount³ referenced by the written credit derivative

In the computation of the PFE, the following add-on factors shall apply to financial derivatives, based on residual maturity:

ResidualMaturity	Interest Rate Contract	Exchange Rate Contract	Equity Contract
One (1) year or less	0.0 percent	1.0 percent	6.0 percent
Over 1 year to five (5) years	0.5 percent	5.0 percent	8.0 percent
Over 5 years	1.5 percent	7.5 percent	10.0 percent

¹ This approach makes reference to the Current Exposure Method (CEM) which is used under the Basel II framework to calculate the CCR exposure amounts associated with derivative exposures. The Basel Committee is considering alternatives to the CEM. If an alternative approach is adopted as a replacement for the CEM, Basel Committee will consider whether that alternative approach is appropriate in the context of the need to capture both types of exposures created by derivatives.

² No potential future credit exposure shall be calculated for single currency floating/floating interest rate swaps, the credit exposure on these contracts would be evaluated solely on the basis of their mark- to-market valuation.

³ For credit derivative contracts where the stated notional amount differs from the effective notional amount, banks/ non-banks must use the greater of the effective notional amount and the notional amount. The effective notional amount is obtained by adjusting the notional amount to reflect the true exposure of contracts that are leveraged or otherwise enhanced by the structure of the transaction.

For contracts with multiple exchanges of principal, the factors are to be multiplied by the number of remaining payments in the contract. For contracts that are structured to settle outstanding exposure following specified payment dates and where the terms are reset such that the market value of the contract is zero on these specified dates, the residual maturity would be set equal to the time until the next reset date, and in the case of interest rate contracts with remaining maturities of more than one (1) year that meet these criteria, the potential future CCF is subject to a floor of 0.5 percent.

For credit derivatives, which refer to credit default swaps (CDS), total return swaps (TRS) and credit-linked notes (CLN), two approaches shall be applied, as follows:

- a) For single-name credit derivatives, a 5.0 percent add-on factor for the computation of the potential future credit exposure shall be used by both protection buyers and protection sellers if the reference obligation is rated as investment grade by at least two credit rating agencies i.e. rated Baa or higher by Moody's and BBB or higher by Standard & Poor's. A 10.0 percent add-on factor applies to all other reference obligations. However, a protection seller in a CDS shall only be subject to the add-on factor if it is subject to closeout upon the insolvency of the protection buyer while the underlying is still solvent. The add-on in this case should be capped to the amount of unpaid premiums.
- b) With regard to multiple name derivatives, where the credit derivative is a first to default transaction, the add-on will be determined by the lowest credit quality underlying in the basket (i.e., if there are any non-investment grade or unrated items in the basket), the 10.0 percent add-on should be used. For second and subsequent nth-to-default transactions, underlying assets should continue to be allocated according to the credit quality (i.e., the second lowest credit quality will determine the add-on for a second or nth-to-default transaction respectively). On the other hand, where the credit derivative is referenced proportionately to multiple obligations, the add-on factor will follow the add-on factor applicable to the obligation with the biggest share. If the protection is equally proportioned, the highest add-on factor should be used.

Written Credit Derivatives

In addition to the CCR exposure arising from the fair value of the contracts, written credit derivatives¹ create a notional credit exposure arising from the creditworthiness of the reference entity. As such, written credit derivatives shall be treated consistently with cash instruments (i.e., loans, bonds) for the purpose of the exposure measure.

In order to capture the credit exposure to the underlying reference entity, the effective notional amount² referenced by a written credit derivative is incorporated into the Exposure Measure. However, the effective notional amount of a written credit derivative may be reduced by any negative change in fair value amount that has been incorporated into the calculation of Tier 1 capital with respect to the written credit derivative. The resulting amount may be further reduced by the effective notional amount of a purchased credit derivative on the same reference name³, *Provided; That*

- The credit protection purchased on a reference obligation which ranks pari passu with or is junior to the underlying reference obligation of the written credit derivative in the case of single name credit derivatives; and
- The remaining maturity of the credit protection purchased is equal to or greater than the remaining maturity of the written credit derivative.

The Exposure Measure of a written credit derivative may be overstated by the inclusion in the Exposure Measure of both (1) PFE representing counterparty credit exposure and (2) effective notional amount representing reference entity exposure. To avoid double counting, a PFE of zero is assigned to a written credit derivative whose effective notional amount is already included in the Exposure Measure. Hence, the total exposure measure for written credit derivatives equals RC and its corresponding effective notional amount.

¹ Written credit derivatives refer to credit default swaps, total return swaps and credit-link notes where banks act as guarantor.

² For credit derivative contracts where the stated notional amount differs from the effective notional amount, banks/ non-banks must use the greater of the effective notional amount from the notional amount. The effective notional amount is obtained by adjusting the notional amount to reflect the true exposure of contracts that are leveraged or otherwise enhanced by the structure of the transaction.

³ Two reference names are considered identical only if they refer to the same legal entity.

3. Securities Financing Transactions (SFTs)

SFTs are transactions such as repurchase agreements, reverse repurchase agreements, security lending and borrowing and margin lending transactions, where the value of the transactions depends on market valuation and the transactions are often subject to margin agreements.

- a. For bank/non-bank acting as principal, the Exposure Measure calculations for SFTs shall be computed as follows:

$$\text{Exposure Measure for SFTs} = \text{Adjusted SFT Assets} + \text{Counterparty Credit Risk Exposure (E)}$$

Where:

Adjusted SFT Assets = the gross SFT assets¹ recognized for accounting purposes (i.e., with no recognition of accounting netting) will be adjusted to exclude the value of any securities received under an SFT, where the bank has recognized the securities as an asset on its balance sheet².

Counterparty Credit Risk Exposure (E) = the measure of CCR is calculated as the current exposure (i.e., without PFE) with respect of the SFT.

The current exposure for transactions with a counterparty must be calculated on a transaction by transaction basis: that is, each individual SFT is treated as its own netting set, computed as the difference between the fair value of securities and cash *lent* to a counterparty for a transaction and the fair value of securities and cash *received* to a counterparty for a transaction. In other words, it shall follow the formula:

$$E = \max, \{0, [E_i - C_i]\}$$

Where:

E_i = cash and the fair value of securities lent to a counterparty for a transaction, and

C_i = cash and the fair value of securities received from a counterparty for a transaction.

- b. If a bank/non-bank acting as an agent in an SFT provides an indemnity or guarantee to a customer or counterparty for any difference between the value of the security or cash the customer has lent and the value of the collateral the borrower has provided, the bank/non-bank should include in its Exposure Measure only the measure for Counterparty Credit Risk Exposure (E). Otherwise, the treatment when the bank is acting as a principal shall be applied.

4. Off-balance sheet (OBS) Items

The leverage ratio exposure measure for Off-balance sheet (OBS) items is generally calculated by multiplying the notional amount of the OBS item by a credit conversion factor (CCF), as follows:

- a. 100 percent CCF - this shall apply to OBS securitization exposures except an eligible liquidity facility or an eligible servicer cash advance facility, direct credit substitutes, e.g., general guarantees of indebtedness (including standby letters of credit serving as financial guarantees for loans and securities) and acceptances (including endorsements with the character of acceptances) as follows:
- Guarantees issued other than shipside bonds/airway bills; and
 - Financial standby letters of credit.
- b. Fifty (50) percent CCF - this shall apply to OBS securitization exposures that qualify as eligible liquidity facilities³ and certain transaction-related contingent items, e.g. performance bonds, bid bonds, warranties and standby letters of credit related to particular transactions) as follows:

¹ For SFT assets subject to novation, "gross SFT assets recognized for accounting purposes" are replaced by the final contractual exposure, given that pre-existing contracts have been replaced by new legal obligations through the novation process.

² Gross SFT assets recognized for accounting purposes must not recognize any accounting netting of cash payables against cash receivables (e.g., under the Philippine Accounting Standards).

³ These OBS securitization exposures must meet the definition and minimum requirements under Sec. 125.

- Performance standby letters of credit (net of margin deposits), established as a guarantee that a business transaction will be performed;
 - Note issuance facilities (NIFs) and revolving underwriting facilities (RUFs); and
 - Other commitments, e.g., formal standby facilities, commitments with an original maturity over one (1) year and Underwritten Accounts Unsold.
- c. Twenty (20) percent CCF - this shall apply to short-term self-liquidating trade letters of credit arising from the movement of goods¹, e.g., documentary credits collateralized by the underlying shipments, such as:
- Trade-related guarantees:
 - Shipside bonds/airway bills
 - Letters of credit - confirmed
 - Sight letters of credit outstanding (net of margin deposit);
 - Usance letters of credit outstanding (net of margin deposit);
 - Deferred letters of credit (net of margin deposit);
 - Revolving letters of credit (net of margin deposit) arising from movements of goods and/or services; and
 - Commitments with an original maturity up to one (1) year.
- d. Ten (10) percent CCF - this shall apply to commitments that are unconditionally cancellable at any time by the bank without prior notice (i.e., Credit Card Lines), undrawn servicer cash advances or facility² or that effectively provide for automatic cancellation due to deterioration in a borrower's creditworthiness.

This shall also apply to those not involving credit risk, as follows:

- Spot foreign exchange contracts (bought and sold);
- Late deposits / payments received;
- Inward bills for collection;
- Outward bills for collection;
- Travelers' checks unsold;
- Deficiency claims receivable; and
- Others.

B. Reporting and disclosure requirements

Starting 31 December 2014 and every quarter thereafter until 30 June 2018, banks concerned shall submit the Basel III Leverage Ratio reporting template on both solo and consolidated bases for monitoring purposes. The report shall use the prescribed forms and shall be submitted to the appropriate supervising department of the Bangko Sentral. The report submission is summarized below:

Report Date	Reference Date	Deadline of Submission
30 September 2017 31 December 2017	31 December 2017	Fifteen (15) banking days from end of reference date on solo basis, and
31 March 2018	31 March 2018	
30 June 2018	30 June 2018	Thirty (30) banking days from end of reference date on consolidated basis

Upon migration to a Pillar 1 minimum requirement effective on 1 July 2018, the Basel III Leverage Ratio report shall be submitted along with the Basel III CAR report.

The Basel III Leverage Ratio reporting template shall be composed of four (4) parts:

- Part I - Calculation of Basel III Leverage Ratio
- Part II - Derivative Exposures
- Part III - Securities and Financing Transactions
- Part IV - Off-Balance Sheet Items

¹ Applied to both issuing and confirming banks.

² Issued under Memorandum M-2014-044 dated 24 November 2014

In addition to the reporting template to be submitted to the Bangko Sentral, banks will be required to publicly disclose their Basel III leverage ratio on both solo and consolidated bases. The public disclosure requirements include:

- a summary comparison table that provides a banks' total accounting assets amounts and leverage ratio exposures;
- a common disclosure template that provides a breakdown of the main leverage ratio regulatory elements;
- a reconciliation requirement that details the source(s) of material differences between banks' total balance sheet assets in their financial statements and on-balance sheet exposures in the common disclosure template; and
- other disclosures (i.e., material period changes in the leverage ratio from the end of the previous reporting period to the end of the current reporting period).

The public disclosure requirements shall be made either through inclusion of the requirements in the bank's annual reports or published financial statements that are posted in the banks' websites. An ongoing archive of all the reconciliation templates, disclosure templates and explanatory tables relating to prior periods must be made available by banks in their website. All disclosures must be made according to the defined templates.

At a minimum, three (3) items must be publicly disclosed in the quarterly published balance sheet: (i) the numerator (Tier 1 capital); (ii) the denominator (exposure measure); and (iii) the Basel III Leverage Ratio.

(Circular Nos. 990 dated 22 January 2018, 943 dated 26 January 2017, and 881 dated 09 June 2015)

EXAMPLES OF MINIMUM INTERNAL CONTROL MEASURES
(Appendix to Section 162 on Control Activities)

1. Independent balancing

- a. Monthly reconciliation of general ledger balances against respective subsidiary and supporting records and documentation by someone other than the bookkeeper or the person handling the records, or the person directly connected with processing the transactions;
- b. Irregular and unannounced count of teller's/cashier's cash and checks and other cash items and vault cash including Automated Telling Machine's (ATM) cash dispensers by the auditor/control officer or by an officer not connected with cash department or its equivalent;
- c. Monthly reconciliation of due from banks, cash in bank accounts (domestic and foreign) and due from/to head office/branches by someone other than the person handling the records or posting the general ledger entries;
- d. Periodic verification of securities and collaterals by someone other than their custodian; and
- e. Periodic verification of the accuracy of the interest credits to deposit liabilities accounts.

2. Physical handling of transactions

- a. A person handling cash shall not be permitted to post the ledger records nor should posting the general ledger be performed by an employee who posts the depositor's/investor's/ creditor's subsidiary ledgers;
- b. A lending officer shall never be allowed to disburse proceeds of loans, accept payment on loans nor post loan ledgers;
- c. The functions of issuing, recording and signing of drafts/checks shall be separated;
- d. Checks and other cash items shall be maintained either by an employee not handling cash or by the Rack/Distributing Department provided that adequate control as to custody and disposition of funds are properly maintained;
- e. The receipt of statements from depository bank shall be assigned to an employee other than the one connected with the preparation, recording and signing of bank drafts or checks;
- f. Custodians of securities shall not be allowed to handle security transactions;
- g. Collateral appraisal shall be done by an employee/officer who does not approve loans;
- h. Incoming checks and other cash items shall be recorded chronologically in a register by an employee other than the bookkeeper before they are forwarded for posting purposes;
- i. Credit reports shall be obtained by someone other than lending officers;
- j. Mailing of customers' statements and delinquent notices shall be done by an employee other than the one who granted the loan or the one handling the records;
- k. Dispatching and delivery of current account statements shall be done by someone who is not involved in current account operations; and
- l. For QBs, paid checks/drafts should be controlled and maintained by an officer/employee other than the authorized signatory or the cashier.

3. Joint custody

The following shall be under joint custody:

- a. Cash on hand or in vault and in ATM cash dispensers;
- b. All accountable forms;
- c. Collaterals;
- d. Securities;
- e. Documents of title and/or ownership of properties or fixed assets;
- f. Dormant deposit ledgers/EDP print-outs and corresponding signature cards including on-line posting of dormant accounts;
- g. Import documents;
- h. Trust receipts;
- i. Collection items;
- j. Duplicate keys, safe deposit spare locks and keys, and keys to unrented safe deposit boxes;
- k. Safekeeping items;
- l. Vault door and safe combinations;
- m. Unissued specimen signature books;
- n. Correspondent's and bank's own telegraphic and/or electronic fund transfer system or cable test keys currently in use;

- o. Test key fixed numbers unissued;
- p. Unissued and captured ATM cards and similar devices;
- q. Access locks and keys to on-line EDP terminals and similar devices; and
- r. Access locks and keys to EDP mainframes and peripherals.

4. Dual Control

The following accounts/transactions shall be under dual control:

- a. Checks, cashier's/manager's checks, telegraphic transfers (TTs) and electronic fund transfer system (EFTS) – The signature of at least two (2) officers should be required in the issuance of cashier's/manager's checks and payment orders (incoming and outgoing) of TTs and EFTS. The board of directors may, however, prescribe a predetermined amount by which one (1) senior officer can sign checks or payment orders, subject to appropriate control measures.
- b. Certificates of Time Deposit – The board of directors of a bank is given the discretion to determine the number of signatories for the issuance of certificates of time deposit (CTDs). The internal control measures for the issuance of CTDs include, at a minimum, the following activities:
 - (1) Joint custody of unissued CTD forms;
 - (2) Accounting for all issued/ cancelled CTDs;
 - (3) Signature requirement for the issuance of CTDs;
 - (4) Counterchecking of issued CTDs against the tellers' proof sheets/validated slips; and
 - (5) Recording of CTDs transactions.
- c. Bank Drafts – The signature of two (2) authorized officers should be required in the issuance of bank draft.
- d. Borrowings – The signature of the least two (2) authorized officers should be required.
- e. All transactions giving rise to Due to or Due from accounts and all instruments of remittances evidencing these transactions particularly those involving substantial amounts should be approved by two (2) authorized officers.

5. Number Control

The following are the forms, instruments and accounts that shall be number-controlled:

- a. Bank drafts;
- b. Checks, manager's and cashier's checks;
- c. Promissory notes and other commercial papers;
- d. Savings deposit accounts;
- e. Demand deposit accounts;
- f. CTDs;
- g. Letters of credit;
- h. Collection items;
- i. Official and provisional receipts;
- j. Certificates of stocks;
- k. Loan accounts;
- l. Expense vouchers;
- m. Payment orders (incoming and outgoing) of TTs and EFTS;
- n. Transfer requests through EFT involving bank's accounts abroad;
- o. EDP batch transmittal slips of documents; and
- p. Due to/from head office/branches tickets.

6. Confirmation of accounts

At least once a year, the internal auditing staff shall confirm by direct verification with bank clients, the following:

- a. Balances of loans and credit accommodations of borrowers;
- b. Deposit account balances particularly new deposit accounts, dormant accounts and closed accounts;
- c. Outstanding balances of borrowings and other liabilities; and
- d. Outstanding balances of receivables/ payables.
- e. For QBs, collaterals securing said accounts.

7. Internal control procedures for dormant accounts¹

a. Definition of dormant accounts

- (1) Current or checking accounts showing no deposit or withdrawals for a period of one (1) year.
- (2) Savings account showing no deposit or withdrawal for a period of two (2) years.

b. Internal control measures

- (1) As a matter of policy, banks shall exert all efforts to prevent deposit accounts from becoming dormant.
- (2) When an account is about to become dormant, the depositor shall be notified of its potential dormancy at least sixty (60) days prior to the commencement of the dormancy period.

The notification shall contain the following information:

- (a) The effect of dormancy to transfer the account from active to dormant status, and advice on how to reactivate the account; and
 - (b) Reminder that the dormant account will be included in the list of unclaimed balances to be submitted to the Treasurer of the Philippines (Treasurer) for escheat in accordance with the Unclaimed Balances Act, if said account has no activity for ten (10) years.
- (3) The bank shall adopt appropriate internal control measures to ensure that all transactions affecting dormant deposit accounts are legitimate.
 - (4) When an account is about to be subject to dormancy fee, the depositor shall be notified at least sixty (60) days prior to such imposition.
 - (5) For unclaimed dormant deposit accounts considered for escheat, the depositor of such account shall be notified at least sixty (60) days prior to the filing by the bank of the sworn statement to the Treasurer pursuant to the Unclaimed Balances Act.
 - (6) Banks shall permanently retain records of escheated deposits, together with proof of all the relevant notices. For the purpose of this item, records of escheat shall refer to the sworn statement of the bank to the Treasurer regarding the unclaimed balances, and the court order declaring that said unclaimed balances have been escheated to the Government of the Republic of the Philippines and commanding the bank to forthwith deposit the same with the Treasurer. Relevant notices to be retained shall include copies of the notices referred to in Items "(2)", "(4)" and "(5)" of Item "7.b".
 - (7) Individual notifications shall be sent to the client's last known postal address/e- mail address/contact number either through postal or registered mail, courier delivery, electronic mail, text messages, telephone calls or other alternative modes of communication, as may be elected by the client.
- (1) The provisions of Items "2", "4", "5" and "6" of Item "7.b" shall apply, notwithstanding any contrary provisions in the terms and conditions.

8. Other Internal Control Measures

a. Deposit accounts

- (1) All new current accounts shall be approved by a designated officer.
- (2) Signature cards and deposit ledger sheets shall be authenticated by some form of validation. Subsequent changes shall also be validated.
- (3) Signature cards and deposit ledger sheets shall be accessible only to authorized persons.
- (4) Deposit tickets shall be occasionally examined at irregular intervals to determine that postings are made on the actual date deposits are received.

¹ The requirement for additional notification prior to escheat under Item "7.b.(6)" took effect on 11 November 2016.
All other provisions shall take effect on 25 April 2017.

- (5) Checks shall be cancelled as soon as they have been paid and posted.
 - (6) Reports on closed accounts and returned checks shall be prepared daily.
 - (7) All current account statements shall be mailed or sent electronically via electronic mail (e-mail), or such other electronic means direct to depositors: Provided, That banks using the electronic means of sending the current account statements shall have prior Bangko Sentral- approved internet banking service and shall strictly observe the required retention of electronic data messages or electronic documents under Section 13 of R.A. No. 8792, otherwise known as the "Electronic Commerce Act". Undelivered statements shall be retained by an organizational unit not responsible for demand deposit account processing.
 - (8) An officer shall be designated to attend to customers who report differences on their statements.
 - (9) Checkbooks shall be issued only against requisition forms signed by an authorized signatory to the account.
 - (10) Banks shall adopt a system to establish the identity of their depositors.
- b. For QBs: Investments
- (1) Investment limits and a list of accredited companies as approved by the board of directors or by its Credit Committee should be established as a guide for investing in any FI engaged in money market trading.
 - (2) Investments should be secured by assets approved by the board of directors or by its Credit Committee.
 - (3) Checks representing placements of investments should be released only upon receipt of either the deposit substitute instrument or the underlying securities or documents of title.
- c. Miscellaneous
- (1) Loan applications and related documents shall be verified to ensure their authenticity particularly the name, residence, employment and current reputation of the borrowers.
 - (2) Tellers/cashiers paying checks to strangers shall obtain positive identification of the person and the account on which the checks are drawn should be verified.
 - (3) No employee shall be permitted to process transaction affecting his own account.
 - (4) Tellers/cashiers and other employees having contact with customers shall be prohibited from preparing deposit ticket, withdrawal slip or other forms for the customer.
 - (5) All banks shall have a sound recruitment policy.
 - (6) In the case of TBs, all accountable officers and employees shall be bonded.

All QBs shall secure adequate insurance coverages, fidelity and other indemnity protection.

(Circular Nos. 928 dated 24 October 2016, 903 dated 29 February 2016, and 871 dated 05 March 2015)

FRAMEWORK ON THE CONSOLIDATION PROGRAM FOR RURAL BANKS (CPRB) ***(Appendix to Section 104)***

LEGAL BASIS

Sec. 1 of R.A. No. 9576, amending R.A. No. 3591 (PDIC Charter) mandates PDIC to maintain faith and confidence in the country's banking system and to promote and safeguard the interests of the depositing public by way of helping develop a sound and stable banking system.

The Consolidation Program for Rural Banks (CPRB) is in recognition of the need to strengthen and enhance the viability of RBs given their importance in providing financial services to the community and promoting financial inclusion particularly in their specialized or niche markets, and thereby help maintain financial stability in the economy.

Further, pursuant to Section 5 of R.A. 8791 (The General Banking Law of 2000), the Monetary Board may exempt particular categories of transactions from prescribed ratios, ceilings and limitations for banks merging or consolidating.

OBJECTIVES

The CPRB is intended to encourage mergers and consolidation of RBs to bring about a less fragmented banking system by enabling rural banks to:

1. Improve financial strength, enhance viability and generate better return to shareholders;
2. Strengthen management and governance;
3. Generate synergies and economies of scale thru common infrastructure, systems and resources; and
4. Expand market reach.

PROGRAM PERIOD

The CPRB shall be available for a period of two (2) years from 25 August 2015.

ELIGIBILITY

Proponents should be at least five (5) RBs, the head offices or majority of the branches of which, shall preferably be located in the same region or area. RBs whose head office is located in a nearby region may be included, if the program objectives shall be met.

The resulting bank should meet all of the following:

1. Risk-based capital adequacy ratio (RBCAR) of at least twelve percent (12%); and
2. Combined unimpaired capital of at least P100Mn.

PROGRAM SUPPORT

1. Financial advisory services at minimal cost to the proponents. [Countryside Financial Institutions Enhancement Program (CFIEP) will fund eighty percent (80%) of the cost]
 - a. Advisory on the general conduct of the merger/consolidation process in relation to the program requirements
 - b. Engagement of financial and legal advisers on the optimal merger/ consolidation structure
 - c. Due diligence and valuation activities and presentation of the results thereof to the board of directors and the shareholders of the proponent banks
 - d. Documentation of transaction and submissions to regulatory agencies
2. Business process improvement services at a cost of twenty percent (20%) to the proponents for the first year and fifty percent (50%) during the second year [CFIEP will fund the balance of eighty percent (80%) and fifty percent (50%), respectively]
 - a. Integration process (data and records integration, consolidation of backroom activities, financial reporting)
 - b. Development and updating of Manuals
 - c. Guidance on automation/new system requirement as a result of integration

3. Capacity building support services at no cost to the proponents (to be funded by CFIEP, Bangko Sentral, LBP and PDIC)
 - a. Training - credit evaluation and administration, audit and internal control, personnel management, accounting/record keeping, treasury, information technology
 - b. Governance
4. Possible equity participation by the LBP
5. Bangko Sentral to observe full flexibility in the grant of incentives allowable under existing banking laws and regulations including Bangko Sentral Circular No. 237 as amended by Circular Nos. 771 dated 11 October 2012 and 494 dated 20 September 2005.
6. Other incentives as may be approved by the PDIC, LBP, and CFIEP

PROGRAM REQUIREMENTS

1. Letter of intent from the proponent banks, together with board resolutions manifesting their interest to consolidate with the other proponent banks and authorizing their representative for the program;
2. Memorandum of Agreement (MOA) from the proponent banks to include the following, among others:
 - a. Firm commitment of each proponent bank to enter into a consolidation or merger transaction with the other identified banks and to undertake to comply with all program requirements (to be supported by a board resolution);
 - b. Commitment to allow the financial adviser and appraisers to conduct due diligence on their respective banks, provide all information relating to their respective banks' financial condition, and promptly make available all records and disclose all information required by the financial adviser;
 - c. Agreement to abide by the valuation process and results to be conducted by reputable Bangko Sentral-accredited external auditors/valuation experts;
 - d. Infusion of additional fresh capital (from existing shareholders/new investors) if the resulting adjusted capital and RBCAR of the consolidated bank shall fall below the minimum capital requirements;
 - e. Installation of a professional management team for the consolidated bank;
 - f. Nomination of directors committed to adhere to sound governance principles and work to attain the objectives of the program;
 - g. Capacity-building measures;
 - h. Submission of valuation reports of the engaged financial advisers and such other information as may be required by PDIC and Bangko Sentral;
 - i. Submission of business plan including human resource (HR) strategy and composition of management team and board of directors;
 - j. Reimbursement of their proportionate share to program expenses;
 - k. In the event of withdrawal from the program, reimbursement of their proportionate share to costs already incurred.

FLOW OF ACTIVITIES

1. Financial advisory activities
 - a. From among the list of Bangko Sentral-accredited/selected financial advisers, the proponent banks, as a group, selects the financial adviser which will undertake the program's financial advisory activities;
 - b. Engagement of the services of the selected financial adviser;
 - c. Signing of confidentiality agreement by the engaged financial adviser;

- d. Conduct of due diligence/valuation by the financial adviser;
 - e. Preparation of reports by the financial adviser to be presented to the proponent banks and regulators;
 - f. Approval by the proponent banks and their shareholders of the results of the valuation which will contain the basis of ownership/share distribution in the consolidated bank;
 - g. Preparation of necessary documents (Plan of Consolidation, Articles of Consolidation, New Articles of Incorporation and By-Laws) to be submitted to SEC;
 - h. Submission to PDIC of the necessary documents and the request for PDIC consent of the consolidation transaction under Sec. 21(c) of the PDIC Charter, as amended;
 - i. Submission to Bangko Sentral of the necessary documents for approval of the consolidation transaction and for the issuance of certificate to register with the SEC;
 - j. Submission to SEC of the registration documents; and
 - k. Issuance by the Bangko Sentral of the certificate of authority to operate (as new bank).
- 2. Conduct of business integration and process review;
 - 3. Conduct of capacity building activities.

MOA AMONG COOPERATING INSTITUTIONS

PDIC, LBP and Bangko Sentral will execute a MOA in support of CPRB to include provision for the allocation of P25 million to fund the implementation of the program which will be sourced from Module III of CFIEP, the related deed of undertaking signed by the members of the Task Force thereof will be appended for the purpose¹. The cooperation of SEC shall likewise be sought through the Financial Sector Forum (FSF).

(Circular No. 903 dated 29 February 2016 and CL-2015-050 dated 18 August 2015)

¹ Alternatively, a copy of the memorandum of the Technical Committee, recommending the allocation of the amount for the implementation of the CPRB, as approved by the Task Force, may also be appended.

CONSOLIDATION PROGRAM FOR RURAL BANKS IMPLEMENTING GUIDELINES **(Appendix to Section 104)**

Section 1 - Rationale

The Consolidation Program for Rural Banks (CPRB) was established in recognition of the need to further strengthen and enhance the viability of rural banks given their importance in providing essential financial services to the community, particularly in their specialized or niche markets, and in promoting financial inclusion and financial stability.

The CPRB aims to bring about more resilient rural banks and a less fragmented banking system by encouraging rural banks to merge or consolidate in order to: (i) improve financial strength, enhance viability and generate better return to shareholders; (ii) strengthen management and governance; (iii) generate synergies and economies of scale through common infrastructure, systems and resources; and (iv) expand their market reach.

Section 2 - Definition of Terms

For purposes of this Guidelines, the following acronyms, words and phrases shall mean as follows:

- 2.1 "Agencies" refers, collectively, to BSP, PDIC and LBP as authors and advocates of the CPRB.
- 2.2 "CAR" refers to "Capital Adequacy Ratio".
- 2.3 "CFIEP" refers to the Countryside Financial Institutions Enhancement Program which shall provide funding support to the CPRB, consistent with its objectives of improving the long term viability of countryside financial institutions.
- 2.4 "CFIEP TC" refers to the CFIEP Technical Committee which is composed of representatives from Bangko Sentral, PDIC and LBP and is mainly tasked to monitor the implementation of CFIEP projects, including the CPRB.
- 2.5 "Consolidation" refers to the combination of at least five rural banks (RBs) resulting in their dissolution and the creation of a new entity, subject to the provisions of existing applicable and relevant laws and Section 5.
- 2.6 "Day" refers to business day or day other than a Saturday, Sunday or day on which commercial banks in Metro Manila are generally closed for business.
- 2.7 "Financial Adviser" refers to the adviser engaged by the Proponent Banks from among the top audit firms¹ and investment houses² with capability to undertake financial advisory services to the Proponent Banks as set forth under Section 8.7.
- 2.8 "Financial Adviser's Final Report" refers to the written report submitted by the Financial Adviser which includes but is not limited to the: (i) methodology of valuation; (ii) due diligence findings including report on the overall financial condition of the Proponent Banks; (iii) valuation of Proponent Banks which takes into consideration appraisal of assets and legal audit report on pending cases; (iv) proposed ownership and capital structure and proposed consolidation or merger plan of the Resulting Bank; and (v) all reports and documents required to be delivered by the Financial Adviser under this Guidelines and the engagement contract with the Financial Adviser.
- 2.9 "Merger" refers to the combination of at least five RBs, one of which shall be the Resulting Bank, subject to the provisions of existing applicable and relevant laws and Section 5.
- 2.10 "MOA" refers to the "Memorandum of Agreement on the Consolidation Program for Rural Banks among the Proponent Banks" which shall contain the Proponent Banks' agreements as indicated in Section 7(f).
- 2.11 "MOU" refers to the Memorandum of Undertaking in favor of the Agencies duly and jointly executed by and among the Proponent Banks which shall contain the commitments, representations, warranties and other obligations of the Proponent Banks as indicated in Section 7(g).
- 2.12 "Proponent Banks" refers to the participating RBs which qualify under the CPRB pursuant to Section 5.

¹ As listed in the Business World Top 1,000 Corporations

² Members of the Investment House Association of the Philippines, provided they are not subsidiaries or affiliates of, or do not belong to the same business group as, any local or foreign bank.

- 2.13 "SEC" refers to the Securities and Exchange Commission which approves the registration of the Resulting Bank as a consolidated or merged bank.
- 2.14 "Resulting Bank" refers to the consolidated bank or surviving bank after consolidation or merger, respectively, of the Proponent Banks.

Section 3 - Interpretation

The headings in this Guidelines are inserted for convenience of reference only and shall not limit or affect the interpretation of its provisions. References to sections and annexes are to be construed as references to the Sections and Annexes to this Guidelines.

Section 4 - CPRB Availability Period

The CPRB shall be available for two (2) years from approval by all governing boards of Bangko Sentral, PDIC, and LBP. To avail of the CPRB, letters of intent/application duly supported by certification of board and shareholders' approvals of the Proponent Banks and all other required documents enumerated in Section 7 must have been duly submitted to and received by the PDIC on or before the expiration of the two-year availability period.

Section 5 - Eligibility of Proponent Banks to the CPRB

Proponent Banks should be at least five RBs, the head offices or majority of the branches of which shall preferably be located in the same region or area.

The Resulting Bank should meet all of the following:

- a. CAR of at least 12%; and
- b. Combined unimpaired capital of at least P100 million.

If the Proponent Banks are less than five but based on the submitted documents, the Resulting Bank will have CAR of at least 12% and a combined unimpaired capital of at least P100 million, the application may be accepted.

Section 6 - PRB Support

The Proponent Banks may avail of the following:

- 6.1 Funding support, subject to subsidy limits set by the CFIEP TC, for:
 - a. Financial advisory services in accordance with Sections 8.6 and 13.2;
 - b. Business process improvement services in accordance with Section 13.2;
- 6.2 Capacity building support services in accordance with Section 12.3;
- 6.3 Possible equity participation by the LBP as provided under Section 10;
- 6.4 Regulatory Incentives under Section 104 and other existing laws and rules subject to the Proponent Banks' compliance with the requirements therein and approval of the concerned agencies; and
- 6.5 Other CPRB support as may be provided by Bangko Sentral, PDIC, LBP, and CFIEP

Section 7 - Procedures for Application

To avail of the CPRB's incentives, the Proponent Banks shall submit to PDIC, through the Office of the Vice President-Resolution Group, three sets of the following documents:

- a) Letter addressed to the PDIC and the Bangko Sentral indicating their intention to consolidate or merge under the CPRB;
- b) Duly accomplished CPRB application form;
- c) Resolution of the Board of Directors of the respective Proponent Banks approving the consolidation or merger with other Proponent Banks under the CPRB. The resolution shall be certified under oath by the respective corporate secretaries of the Proponent Banks;

- d) Resolution of the stockholders representing at least two-thirds (2/3) of the outstanding capital stock of each Proponent Bank approving the consolidation or merger with other Proponent Banks under the CPRB. The resolution shall be certified under oath by the respective corporate secretaries of the Proponent Banks;
- e) Secretary's Certificate of Adoption of Board Resolutions of each of the Proponent Banks containing the following:
 - i. Approval by the Board of the request for availment of funding support under Section 6.1;
 - ii. Approval by the Board of the MOA among Proponent Banks containing the terms under Section 7(f), the MOU in favor of the Agencies containing the terms under Section 7(g), Confidentiality Agreement, and other documents as may be required under the CPRB; and
 - iii. Designation of the Proponent Bank's authorized signatories to execute and deliver the foregoing documents in relation to the CPRB and attesting to their specimen signatures.
- f) Duly executed joint MOA among Proponent Banks containing, among others, the following:
 - i. Agreement to consolidate or merge under the CPRB, and to comply with the CPRB's requirements.
 - ii. Commitment to: (a) allow the duly designated Financial Adviser to conduct due diligence on the Proponent Banks; and (b) voluntarily disclose and allow access to all records, documents and information pertinent to their respective banks' financial condition and other information as may be required by the Financial Adviser.
 - iii. Agreement to accept the results of the Financial Adviser's due diligence review including the consolidation/merger structure.
 - iv. Infusion of additional fresh capital, as may be needed, to bring the resulting CAR and combined adjusted capital of the Proponent Banks to the required capital level pursuant to Sections 5 and 9.
 - v. Agreement to adopt the human resource and systems integration plan for the Resulting Bank as proposed by the Financial Adviser.
 - vi. Nomination of directors in the Resulting Bank who possess the qualifications and none of the disqualifications under Bangko Sentral regulations, who adhere to sound governance principles and who will work to ensure the viability of the Resulting Bank to attain the objectives of the CPRB.
 - vii. Installation in the Resulting Bank of a professional management team composed of individuals who meet BSP's fit and proper rule.
 - viii. Institution and adoption of capacity building measures.
 - ix. Submission of valuation and appraisal reports, due diligence findings (including report on the overall financial condition of the Proponent Banks) of the Financial Adviser and such other information as may be required by PDIC and Bangko Sentral.
 - x. Submission of the business plan, including strategies, financial projections and proposed organizational structure for the Resulting Bank.
 - xi. Agreement on cost sharing of expenses under the CPRB including dealing with withdrawal (voluntary or involuntary) by any of the Proponent Banks.
 - xii. Agreement to fully reimburse CFIEP for the funding support it extended, in case the consolidation or merger of the Proponent Banks does not materialize.
 - xiii. Designation of a duly authorized representative and his alternate for purposes of communication and coordination with the Agencies.
- g) Duly executed joint MOU of the Proponent Banks' commitments to the Agencies as follows:
 - i. Abide by the terms and conditions of the CPRB as outlined in the Guidelines, and their obligations under the MOA among the Proponent Banks referred to in Section 7(f).

- ii. Abide by their warranties and representations to the Agencies.
 - iii. Grant authority to PDIC to request for proposals from the pool of financial advisers accredited under the CPRB.
 - iv. In case the consolidation or merger of the Proponent Banks does not materialize, fully reimburse CFIEP's share as specified under Section 13.2 in accordance with their agreement on cost sharing, and to shoulder equally any deficiency in the reimbursement of CFIEP's share, in the event of failure of any of the Proponent Banks to pay its corresponding share.
 - v. Grant authority to BSP to deduct from their respective accounts with Bangko Sentral, any amount due to the CFIEP, in case they fail to remit their corresponding share to reimburse CFIEP share under Section 13.2 in accordance with Sections 14.1 and 14.2.
 - vi. Engage a business process consultant for the Resulting Bank in accordance with Section 12.2, with the approval of the Proponent Banks' respective board of directors.
- h) Duly executed Confidentiality Agreement of each of the Proponent Bank; and
- i) Copy of the Proponent Banks' respective latest audited and interim Financial Statements.

PDIC shall only receive complete sets of the foregoing documents from the Proponent Banks. PDIC shall furnish Bangko Sentral and LBP copies of the complete documents which PDIC received from the Proponent Banks.

Section 8 - Engagement of the Financial Adviser

- 8.1 Upon receipt of the complete set of requirements as provided under Section 7, PDIC shall request the top audit firms¹ and investment houses² with capability to undertake financial advisory services under Section 8.7 to submit proposals for engagement of their services. The proposals shall be addressed directly to the Proponent Banks' duly designated authorized representative, copy furnished PDIC.
- 8.2 Within ten (10) days from receipt of all the proposals from the financial advisers, the Proponent Banks shall:
- a. Collectively decide and select the Financial Adviser with the most reasonable and responsive proposal; and
 - b. Notify PDIC in writing of the choice of Financial Adviser.
- 8.3 Within two (2) days from receipt of notice of choice of Financial Adviser, PDIC shall communicate to CFIEP the Proponent Banks' choice of Financial Adviser.
- 8.4 Within five (5) days from receipt of the choice of the Financial Adviser, the CFIEP TC shall issue to the Proponent Banks' authorized representative the notice to proceed with the engagement of the Financial Adviser.
- 8.5 Within five (5) days from the receipt of the notice to proceed, the Proponent Banks shall enter into an engagement contract with the Financial Adviser, copy furnished PDIC.
- 8.6 Within five (5) days from the execution of the engagement contract with the Financial Adviser, the Proponent Banks' authorized representative shall release to the Financial Adviser the initial payment for its services equivalent to 20% of the Financial Advisers' fee as indicated in the said engagement contract. The balance equivalent to 80% of the Financial Adviser's fee, subject to the subsidy limits set by the CFIEP TC under Section 13.2, shall be for the account of CFIEP. Any excess from the subsidy limits set by the CFIEP TC under Section 13.2 shall be for the account of the Proponent Banks.
- The engagement contract with the Financial Adviser shall become effective upon the Financial Adviser's receipt of the 20% initial payment from the Proponent Banks pursuant to the terms of the Financial Adviser's engagement, and such other terms and conditions as may be agreed between the Proponent Banks and the Financial Adviser.
- 8.7 Upon receipt of the 20% initial payment, the Financial Adviser shall immediately commence and render financial advisory services, which include but are not limited to the following:

- a. Conduct due diligence review to determine the financial condition of each Proponent Bank using standard parameters.

The due diligence review shall take off from the Proponent Bank's latest audited financial statements (Balance Sheet, Income Statement and Cash Flow) and supporting schedules and related documents, as well as the latest interim end-of-month financial statements.

The Financial Adviser shall ensure that the financial statements were prepared in accordance with Philippine Financial Reporting Standards (PFRS) and Bangko Sentral rules and regulations for banks, and reflect the latest financial condition of the Proponent Banks which shall be as of the end of the month immediately preceding the date of application under the CPRB. In case it becomes necessary to adjust the books of the Proponent Banks in order to comply with PFRS and BSP rules and regulations, the Financial Adviser shall restate the financial statements accordingly.

- b. Prepare valuation study on each Proponent Bank based on net asset value (NAV) approach, taking into consideration the appraised value of the fixed assets and the estimated contingent assets and liabilities based on the audit of significant legal cases.
 - i. Where updated appraisal of the Proponent Banks' real properties and fixed assets is necessary, the Financial Adviser shall set the parameters for the internal appraisal and/or for the engagement by the Proponent Banks of (an) independent appraiser(s).
 - ii. The Financial Adviser shall also set the parameters for the legal audit by existing retained/in-house lawyers and/or for the engagement by the Proponent Banks of (a) law firm(s) which shall conduct the legal audit.
 - c. Recommend ownership and capital structure of the Resulting Bank based on the results of the valuation study.
 - d. Assist the Proponent Banks in the preparation of the business plan/strategy, financial projections, organizational structure and human resource strategy for the Resulting Bank.
 - e. Assist in coordinating with the SEC, the Agencies and the Bureau of Internal Revenue, if necessary.
 - f. Undertake other functions/activities required to complete and implement the transaction contemplated under the CPRB.
- 8.8 Within fifteen (15) days from the conclusion of their due diligence review, the Financial Adviser shall submit the Financial Adviser's Final Report containing the result of valuation and the Resulting Bank's ownership structure for approval of the Proponent Banks' respective boards of directors and shareholders, copy furnished PDIC and Bangko Sentral.

The due diligence, valuation study and capital structuring shall not exceed six (6) months from the effective date of the engagement contract with the Financial Adviser.

Section 9 - Infusion of Additional Capital

- 9.1 In case the resulting CAR and the unimpaired capital of the Resulting Bank based on the Financial Adviser's Final Report are below 12% and P100Mn, respectively, the Proponent Banks shall infuse additional fresh capital to meet the CPRB's minimum capital requirements in accordance with their commitment under the MOA and MOU.
- 9.2 The Proponent Banks shall cause the infusion of the fresh capital required under the CPRB through any or a combination of the following: (i) the existing shareholders of the Proponent Banks; and/or (ii) a third party investor.

Section 10 - Possible Equity Investment Facility from LBP

- 10.1 In the event that the resulting CAR of the Resulting Bank falls short of the 12% requirement but is at least 10%, the Resulting Bank may avail of LBP's Equity Investment Facility to bring the CAR to 12%.
- 10.2 The Resulting Bank's eligibility under this facility shall be subject to the Guidelines on the LBP Equity Investment Facility for CPRB attached hereto as Annex "A" and made an integral part of this Guidelines.

Section 11- Approval of the Consolidation or Merger

- 11.1 The Proponent Banks shall secure the approval of their respective boards of directors and shareholders on the final plan of consolidation or merger.
- 11.2 Within forty-five (45) days from receipt of the Financial Adviser's Final Report, the Proponent Banks shall secure the regulatory consents and/or approval of PDIC, Bangko Sentral and SEC as provided under existing laws for all banks on consolidations or mergers.
- 11.3 Upon Bangko Sentral's issuance of the Certificate of Authority to operate as the Resulting Bank, the Proponent Banks shall secure from the SEC the Certificate of Registration of the Resulting Bank.

Section 12 - Integration and Other Activities of the Resulting Bank

- 12.1 Within twenty-five (25) days from the issuance by the CFIEP TC of the certificate of completion of the Financial Adviser's Final Report, the Proponent Banks shall conduct:
- a. Integration and business process improvement;
 - b. Capacity building activities; and
 - c. Such other activities necessary to ensure the success and viability of the Resulting Bank.
- 12.2 Should the Proponent Banks decide to avail of the funding support for the business process improvement services, it shall notify PDIC of such decision and the choice of consultant, in which case, procedures for the engagement of the Financial Adviser under Section 8 shall be observed as may be appropriate. Provided, however, that the sharing of expenses shall be subject to Section 13.2.

The business process improvement shall include:

- a. Integration process (data and records integration, consolidation of backroom activities, financial reporting);
 - b. Development and updating of manuals; and
 - c. Guidance on automation/new system requirement as a result of the integration.
- 12.3 The Agencies and CFIEP shall provide capacity building support services such as trainings on credit evaluation and administration, audit and internal control, personnel management, accounting/record keeping, treasury, information technology, and governance at no cost to the Resulting Bank.

Section 13- CPRB's Funding and Expenses

- 13.1 CFIEP shall participate in the CPRB by providing the funding requirements in accordance with this Guidelines.
- 13.2 Subject to the subsidy limits set by the CFIEP TC, the cost of the financial advisory and business process improvement services inclusive of applicable taxes shall be shared by the CFIEP and the Proponent Banks (or Resulting Bank) in accordance with the following proportion:
- | | |
|--------------------------------|-----|
| CFIEP | 80% |
| Proponent Banks/Resulting Bank | 20% |
- 13.3 The Agencies shall not be liable for any amount due to the Financial Adviser in excess of CFIEP's share under Section 13.2. Any additional payment for the financial advisory and business process improvement service providers shall be for the account of the Proponent Banks (or Resulting Bank).
- 13.4 All other fees and expenses related to the consolidation or merger of the Proponent Banks under the CPRB shall be shouldered by the Proponent Banks (or Resulting Bank).
- 13.5 For CFIEP's corresponding share in the fees under Section 13.2, the same shall be remitted to the Financial Adviser and the business process consultant only after the Proponent Banks shall have paid their proportionate share.

Section 14 - Reimbursement to CFIEP

- 14.1 The Proponent Banks shall be under obligation to reimburse CFIEP's share under Section 13.2 in accordance with their agreement on cost sharing within three (3) days from receipt of the demand for reimbursement in case the consolidation or merger does not materialize.

- 14.2 In case a Proponent Bank refuses or fails to remit any payment due to CFIEP under Section 14.1, SSP, after due notice from the CFIEP to the Proponent Bank concerned, shall proceed to debit the Proponent Bank's demand deposit account therewith, corresponding to the amount due for payment as contained in the CFIEP's demand for reimbursement/payment from the Proponent Bank concerned pursuant to the authority granted to Bangko Sentral under the MOU executed by the Proponent Banks. The full amount debited shall be credited to the demand deposit account of the CFIEP with SSP.
- 14.3 Any deficiency due to the failure by any of the Proponent Banks to pay CFIEP in full of its corresponding share shall be divided equally among the remaining Proponent Bank. The procedures set forth under the preceding section shall be observed in the payments/collection of such deficiency. The Proponent Banks shall exercise their rights under their agreement if any, or under the law, to exact reimbursement from any non-paying Proponent Bank accordingly.

Section 15 - Amendments

The Agencies may execute a supplement or amendment hereto for the purpose of adding, changing or modifying provisions of this Guidelines as may be necessary to achieve the CPRB's objectives.

Section 16 - Repealing clause

Previous issuances/guidelines inconsistent herewith are deemed superseded.

Section 17 – Effectivity

This Guidelines shall take effect immediately.

**CONSOLIDATION PROGRAM FOR RURAL BANKS
GUIDELINES ON THE LAND BANK OF THE PHILIPPINES (LBP) EQUITY INVESTMENT FACILITY**

A. Rationale

Upon consolidation or merger of Proponent Banks, and in case the resulting Capital Adequacy Ratio (CAR) and the unimpaired capital of the Resulting Bank based on the Financial Adviser's report are below 12% and P100Million, respectively, the Resulting Bank shall infuse additional fresh capital to meet the capital and CAR requirements of the Consolidation Program for Rural Banks (CPRB), through any or a combination of the following: (i) the existing shareholders of the Proponent Bank; and/or (ii) a third party investor.

In the event that upon capital infusion by the existing shareholders or third party investors, the CAR of the Resulting Bank is at least 10% but below 12%, the Resulting Bank may avail of LBP's equity investment facility under the CPRB.

B. Objectives

LBP equity infusion shall be undertaken to meet the following objectives:

1. Increase the CAR from at least 10% to 12%;
2. Strengthen the capital base of the Resulting Bank;
3. Help sustain long-term viability of the Rural Banking sector.

C. Equity Investment Facility

The Resulting Bank (consolidated or merged bank) under the CPRB may avail of the LBP equity investment facility subject to the following:

1. Eligibility Criteria
 - a. No adverse findings on the principal (Directors/Key Officers);
 - b. CAR of at least 10% but less than 12%;
 - c. Minimum capitalization required by the CPRB;
 - d. Adequate Reserves for the four (4) week period preceding the application (based on the submitted interim financial statements);
 - e. Net past due ratio of not more than 15%; and
 - f. The Proponent Banks shall have no past due obligations with LBP and other banks.
2. Maximum amount: Up to 100% of the total capital requirement in bringing the CAR from at least 10% to 12%;
3. Features
 - a. Maturity of ten (10) years from the date of release, notwithstanding any change in the structure of ownership of the Resulting Bank;
 - b. LBP's entitlement to be represented in the Countryside Financial Institution (CFI)¹ Board pursuant to E.O. 20, series of 2015 "Guidelines on the Designation of LBP representatives to the Board of CFIs as may be amended;
 - c. Preferred shares;
 - d. Cumulative dividends;

¹ CFI shall refer to the Resulting Bank in the consolidation/merger under the CPRB.

- e. To be fully redeemed at maturity at par or book value, whichever is higher plus unpaid dividends, if any;
- f. Non-voting but shall be entitled to vote on corporate acts specified under Section 6 of the Corporation Code;
- g. Dividend Rate of 10-year PDST-R2 plus 2.5%¹ or a floor rate of 6.5%², whichever is higher, fixed at the time of availment, provided in the event that the PDST-R2 rate will be replaced by a new benchmark rate as determined by the Bankers' Association of the Philippines or the SSP, the new benchmark rate will be adopted for purposes of determining the Dividend Rate;
- h. Booking of the equity by the Resulting Bank shall be recognized under Tier 2 Capital; and
- i. The Resulting Bank shall be required to establish sinking fund with the LBP Trust Banking Group where regular annual contribution to build up over time to cover repayment. The specific date during the year and amount of contribution to the sinking fund shall be stipulated in the Escrow Agreement between the Resulting Bank and LBP which is a pre-release requirement.

4. Other Terms and Conditions:

Issuance of the preferred shares under the CPRB shall require compliance with the following in accordance with Section 125 and other requirements:

- a. It must be issued and paid-in;
- b. It must be subordinated to depositors and general creditors of the Bank;
- c. It is neither secured nor covered by a guarantee of the Issuer or related entity or other arrangement that legally or economically enhances the seniority of the claim vis-a-vis depositors and general creditors of the Bank;
- d. With regard to maturity:
 - 1) It must have a minimum original maturity of at least five (5) years;
 - 2) Its recognition in regulatory capital in the remaining five (5) years before maturity will be amortized on a straight line basis as shown in the table below; and

Remaining Maturity	Discount Factor
5 years and above	0%
4 years to <5 years	20%
3 years to <4 years	40%
2 years to <3 years	60%
1 year to <2 years	80%
<1 year	100%

- 3) There are no step-ups or other incentives to redeem.
- e. It may be callable at the initiative of the Issuer only after a minimum of five (5) years:
 - 1) To exercise a call option the Bank must receive prior supervisory approval; and
 - 2) The Bank will not do anything which creates an expectation that the call will be exercised; and

¹ For confirmation approval by the LBP Committees/ Loan Approving Group (LAG).

- 3) The Bank will not exercise a call unless:
- i. The Bank replaces the called instrument with capital of the same or better quality and the replacement of this capital is done at conditions which are sustainable for the income capacity of the Bank; or
 - ii. The Bank demonstrates that its capital position is well above the minimum capital requirements after the call option is exercised.
- f. The investor must have no rights to accelerate the repayment of future scheduled payments (coupon or principal), except in bankruptcy and liquidation;
- g. The instrument cannot have a credit sensitive dividend feature, that is a dividend/coupon that is reset periodically based in whole or in part on the Bank's credit standing;
- h. Neither the Bank nor a related party over which the Bank exercises control or significant influence can have purchased the instrument, nor can the Bank directly or indirectly have funded the purchase of the instrument;
- i. It must be underwritten by a third party not related to the issuer bank nor acting in reciprocity for and in behalf of the issuer bank;
- j. The instrument shall be converted into common equity upon the occurrence of a trigger event subject to the provisions as may be defined by BSP. The trigger event occurs when the Bank is considered non-viable as determined by the BSP. Non- viability is defined as a deviation from a certain level of Common Equity Tier 1 (CET1) Ratio, inability of the Bank to continue business (closure) or any other event as determined by the BSP, whichever comes earlier.

The issuance of any new shares as a result of the trigger event must occur prior to any public sector injection of capital so that the capital provided by the public sector is not diluted.

The requirements on loss absorbency features of Tier 2 capital at point of non-viability as provided in Annex F of *Appendix 59* shall likewise be observed.

Following the provisions of Item "10 of Annex F" of *Appendix 59*, the formula for the conversion of the total outstanding notes into common shares when the trigger event shall have occurred and the Issuer is declared by Bangko Sentral to have reached the point of non-viability, shall be as follows:

$$\text{No. of Common Shares} = \frac{\text{Amount of Investment}}{50\% \times \text{Adjusted Book Value per Share}}$$

where the amount of investment pertains to the preferred shares issued while the adjusted book value per share refers to the book value at the time the capital instrument is issued, and determined using the formula:

$$\frac{\text{Total Stockholder's Equity- Preferred Equity}}{\text{Total Outstanding Common Shares}}$$

The adjusted book value per share shall be the figure that will be obtained from the Financial Adviser's report or from the latest financial statements using the above formula.

The number of common shares obtained using the above formula shall be the minimum number of common shares to be received by LBP.

Other terms/requirement on loss absorbency features include the following:

The issuer must make the necessary adjustments to its Articles of Incorporation to accommodate the conversion of the capital instrument into common shares for loss absorbency at the point of non-viability

- k. The write down will have the following effects:
 - 1. Reduce the claim of the instrument in liquidation;
 - 2. Reduce the amount repaid when a call is exercised; and
 - 3. Partially or fully reduce coupon/dividend payments on the instrument.
- l. The Issuer must submit a written external legal opinion that it has met the requirements on the issuance of the preferred shares, including the subordination and loss absorption features.
- m. It must clearly state on its face that it is not a deposit and is not insured by the Philippine Deposit Insurance Corporation (PDIC).
- n. The existing LBP equity investments and loans in the participating banks, if any, should be recognized by the Resulting Bank.
- o. Issuer must meet all of the following Eligibility Criteria prior to the release of the equity investment proceeds:

Parameters	Benchmark
1. Should be Resulting Bank (merged or consolidated) under the CPRB	Complied
2. No adverse findings on the principal (Directors/Key Officers)	Complied
3. Capital Adequacy Ratio (CAR)	At least 10% but less than 12%
4. Minimum capitalization required by the CPRB	At least P100 million unimpaired capital
5. Adequate Reserves for the four (4) week period preceding the application (based on the submitted interim financial statements)	Complied
6. Past Due Ratio (net)	Not more than 15%

- p. The duly approved equity investment proposal can be availed of one (1) year from the date of approval.
- q. In compliance with Annex G of *Appendix 67*,
 - 1) The Issuer shall provide the appropriate Risk Disclosure Statement for the issuance of additional Tier 2 capital instruments. The said disclosure statement shall explain the loss absorbency features of additional Tier 2 capital instruments as well as the resulting processes that will be effected when triggers for loss absorbency are breached;
 - 2) The LBP, through its Investment Banking Group, shall issue certification stating that:
 - i. it has been provided a Risk Disclosure Statement which among others, explains the concept of loss absorbency for additional Tier 2 capital instruments as well as the resulting processes should the triggers are breached;
 - ii. it has read and understood the terms and conditions of the issuance;
 - iii. it is aware of the risks associated with the capital instruments, and

- iv. said risks include permanent write-down or conversion of the debt instrument into common equity at a specific discount.
 - r. Such other terms and conditions as may be required by LBP
5. Documentary Requirements
- a. Pre-processing Requirements
 - 1) Written endorsement from LBP Servicing Lending Center (SLC) on Resulting Bank's application for LBP equity investment;
 - 2) Original copy of Resulting Bank's application letter signed by its duly authorized signatory;
 - 3) Original copy of Board of Directors Resolution approving the Resulting Bank's authorized representative/signatory to Resulting Bank's application for LBP equity investment with his/her picture and specimen signatures, and the Resulting Bank's application for LBP equity investment;
 - 4) Copy of the merger or consolidation plan;
 - 5) Certified true copy of Legal Reserves Schedule for 4 weeks immediately preceding the submitted latest quarter-ended financial statements of the current year;
 - 6) Financial Statements (FS)- Balance Sheet & Income Statement:
 - a. Certified true copy of audited and Bureau of Internal Revenue (BIR)-filed FS for the past year/s, *if applicable*, stamped received by BIR;
 - b. Certified true copy of latest quarter-ended FS of the current year, stamped received by Bangko Sentral;
 - c. Certified true copy of Computation of Adjusted CAR comprising Part 1: CAR Report and Part II: Qualifying Capital, stamped received by Bangko Sentral:
 - i. For the past year, *if applicable*; and
 - ii. Latest quarter-ended FS of the current year

Note: The required FS cover only the latest audited BIR-filed FS, latest quarter-ended FS of the current year, and CAR as of latest quarter-ended FS of the current year
 - 7) Business Plan;
 - 8) 5-yr. Financial Projection consisting of the following:
 - a) Capital Structure
 - b) Balance Sheet
 - c) Income Statement
 - d) Cash Flow Statement
 - 9) Other documents:
 - a) Certified true copy of Resulting Bank's authority to operate granted by Bangko Sentral;
 - b) Certified true copy of existing registration and articles of incorporation and by-laws;
 - c) list of major stockholders and their stockholdings with their bio-data;
 - d) List of Directors and key officers with their bio-data;
 - e) latest background investigation (BI)/credit investigation (CI) results on Resulting Bank (not more than 6 months from latest quarter-ended FS);

- f) Copy of latest approved Credit Facility Proposal (CFP) on Rediscounting facility granted to Resulting Bank, if applicable; and
- g) Copy of the Financial Adviser's Report.

b. Pre-release Requirements

Original copies of the following:

- 1) Resulting Bank's letter request for the release of proceeds of LBP equity investment;
- 2) Board Resolution designating Resulting Bank's authorized signatory for the execution of Memorandum of Agreement (MOA), Escrow Agreement and other pre-release documents with his/her picture and specimen signatures;
- 3) Duly signed and notarized MOA on equity investment;
- 4) Duly signed and notarized Escrow Agreement;
- 5) Duly approved Investment Facilities Proposal (IFP) for LBP equity investment;
- 6) Investment and loan Committee (ILC)/Board Resolutions approving the LBP equity investment;
- 7) Certificate of stock issued in favor of LBP;
- 8) Written commitment of Resulting Bank to effect the conversion at the point of non-viability;
- 9) Waiver of the respective stockholders of their pre-emptive rights on the common shares to be issued to LBP at the point of non-viability;
- 10) SEC-approved amended Articles of Incorporation and by-laws indicating the features of equity investment, and to accommodate the conversion of equity investment to common shares at the point of non-viability in accordance with the Loss Absorption Features under the Terms and Conditions of the Issuance; and
- 11) Pay/Settle all past due obligations (loans and investments) prior to availment.

c. Post-release Requirements

Resulting Banks commit to comply with the following documentary submission until full redemption of the equity investment:

- 1) Annual Submission to LBP of Audited FS (including Auditor's Opinion and Notes to FS);
- 2) Invitation/Notice and Minutes of General Stockholders'/Board of Directors' Meetings submitted to LBP representatives to CFIs;
- 3) SSP-filed annual reports in accordance to Bangko Sentral Circular No. 956 (April 17, 2017) Guidelines on the Submission of Annual Reports and the Sanctions to be Imposed for Non-Disclosure of Relevant Information;
- 4) Notice of Change in Ownership or composition of stockholders in the Resulting Bank, and other major changes that may have material impact to LBP's investment to be implemented in the Bank; and
- 5) Resulting Bank's disclosure on Material Adverse Events.

(CL-2017-069 dated 17 November 2017)

FORMAT CERTIFICATION ON COMPLIANCE WITH REQUIREMENTS ON DIVIDEND DECLARATION
(Appendix to Sec. 124 on Reporting and Verification)

Name of Bank

We, (Name of Officer), President (or Officer of Equivalent Rank) and (Name of Officer), Chief Compliance Officer, in behalf of (Name of Bank), with office address at (Head/Principal Office), after having been duly sworn to in accordance with law, hereby certify that the bank's dividend declaration as of (date of dividend declaration), as approved by the board of directors (state resolution number and date), to the bank's stockholders of record as of (record date) amounting to (amount of cash/stock/property dividend declaration) complies with the provisions of Sec. 124.

We further certify that at the time of dividend declaration, the bank has complied with the following:

- a. Clearing account with the Bangko Sentral is not overdrawn;
- b. Liquidity floor requirement for government funds; (for banks)
- c. Minimum capitalization requirement and risk-based capital ratios as provided under applicable and existing capital adequacy framework;¹
- d. The combined requirement for capital conservation buffer and countercyclical capital buffer as defined in *Appendix 59*, Part III for universal and commercial banks (UBs/KBs) and their subsidiary banks and QBs and capital conservation buffer requirement as defined in *Appendix 62*, Part II.C for stand-alone TBs, RBs and Coop Banks²;
- e. Higher loss absorbency requirement as provided under Section 128; (for identified Domestic Systematically Important Banks and their subsidiary banks and QBs)
- f. Has not committed any unsafe or unsound banking practice and/or major acts or omissions as may be determined by the Bangko Sentral;
- g. Has accumulated reserves of P _____ for the retirement of the government preferred stock which is at least equal to the amount prescribed in Sec. 124-C (for rural and cooperative banks);
- h. Has complied with the provisions of Article 86 of R.A. No. 9520, its By-Laws and other applicable laws, rules and regulations on the allocation and distribution of net surplus (for cooperative banks);
- i. Has complied with the provisions of Section 43 (Power to declare dividends) of The Corporation Code of the Philippines (Batas Pambansa Blg. 68), as may be applicable; and
- j. Has complied with the provisions of revised implementing rules and regulations to R.A. No. 7656, 'An Act Requiring Government-Owned and/or Controlled Corporations to Declare Dividends Under Certain Conditions to the National Government, and for Other Purposes'(for Government-Owned bank

¹ We also certify that the bank also apply with this requirement even after dividend distribution.

² The capital conservation buffer requirement for stand-alone TBs, RBs and Coop Banks, shall take effect on 01 January 2023.

To the best of our knowledge, the foregoing statements are true and correct.

AGRICULTURE VALUE CHAIN - BUSINESS MODELS
(Appendix to Sec. 313 on Agricultural Value Chain Financing Framework)

The agriculture value chain business models are characterized by the main driver of the value chain, and its rationale or objectives. The following are the typical organizational models for smallholder production:

Model	Driver of organization	Rationale
Producer-driven (Association)	<ul style="list-style-type: none"> - small-scale producers, especially when formed into groups such as associations or cooperatives; - large scale farmers 	<ul style="list-style-type: none"> - access to new markets; - obtain higher market price; - stabilize and secure market position
Buyer-driven	<ul style="list-style-type: none"> - processors; - exporters; - retailers; - traders, wholesalers and other traditional market actors 	<ul style="list-style-type: none"> - assure supply; - increase supply volumes; - supply more discerning customers - meeting market niches and interests
Facilitator-driven	<ul style="list-style-type: none"> - NGOs and other support agencies; - National and local governments 	<ul style="list-style-type: none"> - 'make markets work for the poor'; - Regional and local development
Integrated	<ul style="list-style-type: none"> - lead firms; - supermarkets; - multi-nationals 	<ul style="list-style-type: none"> - new and higher value markets; - low prices for good quality; - market monopolies;

**REPORTING GUIDELINES AND INSTRUCTIONS ON REPORTORIAL TEMPLATE
ON REPURCHASE AGREEMENTS (REPOS)
(Appendix to Sec. 173 on Report on Repurchase Agreements)**

I. Rationale

The creation and design of this Prudential Reporting Template on Repurchase Agreements (Repos) aims to strengthen financial surveillance, particularly in monitoring market trends and vulnerabilities in repo markets, to enable supervisory authorities to formulate effective policy responses to ensure continued functioning and efficiency of the financial system. This prudential reporting template only covers borrowings in the form of repo transactions and excludes Reverse Repurchase Agreements.

II. Definition of Repurchase Agreements for Banks

A repurchase agreement is a contract wherein a bank, in exchange for cash (repo seller/cash borrower), sells the security to another party (repo buyer/cash lender) under a true sale agreement with a simultaneous commitment to repurchase the security at a fixed price at a date certain or on-demand.

Repo sellers/cash borrowers record repos as *“Bills Payable-Repo”*, while repo buyers/cash lenders record repos as *“Loans and Receivables Arising from Repurchase, Certificates of Assignment/Participation with Recourse and Securities Lending and Borrowing Transactions – Matrix of Counterparty and Issuer of Collateral Securities”*.

III. Description, Structure and Purpose of Data Elements

A. Data elements, vulnerability points, and risk detection

The reportorial template is designed to capture timely and comprehensive transactional-level data on repos of banks in order to gauge systemic and firm-level risk.

The template consists of three (3) schedules, namely:

1. End of Day Balance

The ‘End of Day Balance’ schedule provides a snapshot of daily repo transactions. It shows the daily movement of repos as well as the fair value of the securities used in the repo transactions. This schedule aims to obtain an aggregated view of repo turnover as well as gearing/leverage on a daily basis.

2. Month-End Balance

The ‘Month-End Balance’ schedule shows details of outstanding repos as of the end of the month. The information required for outstanding repos include details on the economic terms of the repo transaction, counterparties, and underlying securities.

Transactional details

Transactional details of repos, such as the *outstanding balance*, *repo rate* and *remaining maturity*, are essential to ascertaining the funding/maturity profile of repos of the industry and its exposure to rollover/liquidity and interest rate risk from such funding source. Currency composition of both cash and security components, meanwhile, indicate industry-wide exposure to FX risk related to repos.

Counterparty details

These consist of information on a bank’s counterparty (repo buyer/cash lender) and its sectoral profile. These aid in determining credit, cross-border and concentration risk of the financial system when aggregated.

Counterparty information enables the assessment of interconnectedness and the manner by which vulnerabilities in a bank can be transmitted to other banks or firms.

Security details

The report requires banks to disclose the *type*, *quality* and *fair value* of a repo’s underlying security. Said information are indicators of the potential variation in the value of the *“repoed”* security and concentration in holding of the underlying repo security which may impact on market liquidity of the security. For purposes of determining fair value of securities, banks shall be guided by the Bangko Sentral prescribed marking-to-market guidelines for securities under *Appendix 28*.

3. Repo Transactions for the Month

The 'Repo Transactions for the Month' schedule provides information on repo deals that are availed and which subsequently mature or are pre-terminated within the reporting month. The information required to be disclosed on these repo deals include details on the economic terms of the repo transaction, counterparties and underlying securities.

Banks that have no repo deals with their entire repo term (availment up to maturity/ pre-termination) falling within the reporting month need not accomplish this schedule.

B. Data components

1. Components of End of Day Balance Schedule

The following data fields are provided with the following descriptions:

Category	Standardized Data Fields	
	Data Fields	Description
Transaction Details	Date	Refers to a calendar day (yyyy-mm-dd)
	No. of Repo Deals for the Day	
Economic terms of the repo transaction	Availments	Refers to the number of repo deals availed during the day. Repo availments shall include renewals and rollovers.
	Matured/ Pre-terminated	Refer to the number of repo deals matured/pre-terminated during the day.
	Amount	
	Bills Payable - Repo	
Economic terms of the repo transaction	Beginning Balance	Refers to the ending balance of Bills Payable-Repo of the previous day.
	Availment for the Day	Refers to the total amount of repo transactions availed during the day.
	Matured/ Pre-terminated for the Day	Refers to the total amount of repo transactions which matured or were pre-terminated during the day.
	Other Adjustments/ Transactions	Refers to adjustments/transactions affecting repos, other than those pertaining to availments, maturing and pre-terminations. Examples of other adjustments/transactions affecting repos include, but need not be limited to corrections on balances/amortization.
	End of Day Balance	Refers to the ending balance of the Bills Payable - Repo account for the day.
	Fair Value of Security Subject of the Repo	
	Debt Securities	Refers to the mark-to-market (MTM) value of the security, if these are in the form of debt securities, as of the end of the day.
	Equity Securities	Refers to the MTM value of the security, if these are in the form of equity securities, as of the end of the day.
	Total	Refers to the total MTM of securities subject of the repo.

2. Components of Month-End Balance Schedule

Category	Standardized Data Fields	
	Data Fields	Description
Transaction Details	Entry number	Refers to the unique number that identifies an entry.
Economic terms of the repo transaction	Deal Date	Refers to the date (yyyy-mm-dd) when a repo transaction is availed.
	Maturity Date	Refers to the date (yyyy-mm-dd) when a repo transaction matures. For repos that are on demand, banks shall indicate "on-demand".
Transaction Details		Refers to the market segment of the repo which can either be: bilateral, tri-party or Central Clearing Counterparty (CCP).

Economic terms of the repo transaction	Market Segment	<p><i>CCP</i> refers to repos that are transacted through an entity that interposes itself between counterparties to contracts traded in one (1) or more financial markets, becoming the buyer to every seller and the seller to every buyer and thereby ensuring the performance of open contracts.</p> <p><i>Bilateral</i> refers to repurchase agreements between two (2) institutions.</p> <p><i>Tri-party</i> refers to the repurchase agreements between two institutions where securities serving as collateral are held by a third party that provides collateral management and settlement services.¹</p>
	Financial Market Infrastructures ² such as	Refers to the name of the institution that provides tri-party, CCP or trade exchange services, if applicable.
	1. Tri-party 2. CCP 3. Trade Exchange	
	Purpose	<p>Refers to the purpose/reason of the financial institution for entering into a repo transaction. This can be, but need not be, limited to any of the following:</p> <ol style="list-style-type: none"> 1. cash funding requirement 2. securities requirement for market-making 3. hedging 4. collateral transformation 5. business contingency testing 6. others
	Term	Refers to the length of the contract. (<i>auto-generated by the reporting system</i>)
	Repo Rate	<p>Refers to the cost incurred by the bank (expressed as a % per annum rate) for borrowing cash, classified either as (1) fixed or (2) floating rate.</p> <p>Note: If the repo rate is floating, report the applicable floating rate as of reporting date.</p>
	Margin	Refers to the amount of margin set aside by the repo seller/cash borrower in accordance with margin parameters agreed by both parties in the repo agreement (expressed in Php) classified either as (1) cash or (2) security (fair value of the security) as of reporting date.
	Contractual Currency	Refers to the original currency of the repos.
	Booking Details	Refers to RBU, E/FCDU or Foreign Office.
	Bills Payable under Repurchase Agreement	Refers to the amortized cost of repo borrowings in both original currency and peso equivalent, in the case of foreign currency denominated repos ³ , as of reporting date.
Counterparty Details Data on the individuals or institutional unit to which the entity is exposed.	Resident/ Non-resident/ Multilateral	<p>A <i>resident</i> refers to an individual or institutional unit that has a center of economic interest in the economic territory of the Philippines.</p> <p>A <i>non-resident</i> refers to an individual or institutional unit that has a center of economic interest outside the economic territory of the Philippines.</p> <p>A <i>multilateral agency</i> refers to an international organization defined in the FRP for banks.</p>
	Geographic Region	<p>Refers to the geographic region of the counterparty. This shall consist of:</p> <ol style="list-style-type: none"> a. Northern America b. Latin America

¹ Source: Committee on Payment and Settlement Systems (CPSS), Principles for Financial Market Infrastructures, April 2012; and Federal Reserve Bank of New York, Paper on Repo and Securities Lending, February 2013.

³ Circular No. 494 Series of 2005. Peso equivalent shall be derived from the Philippine Dealing System (PDS) Peso/US Dollar closing rate or for third currencies the New York US Dollar/Third Currencies closing rates.

		c. Europe d. Asia e. Others
	Country	Refers to the country of the counterparty.
Counterparty Details Data on the individuals or institutional unit to which the entity is exposed.	Sector (General)	Refers to the general sector of the following counterparties: 1. <i>Resident counterparty</i> such as government, Bangko Sentral, banks, private corporations and individuals; 2. <i>Non-resident counterparty</i> such as central government, public sector, banks, private corporations and individuals; or 3. <i>Multilateral agency</i> refers to the World Bank Group comprised of the International Bank for Reconstruction and Development (IBRD) and the International Finance Corporation (IFC), Asian Development Bank (ADB), African Development Bank (AfDB), the European Bank for Reconstruction and Development (EBRD), the Inter-American Development Bank (IADB), the European Investment Bank (EIB), the Nordic Investment Bank (NIB), the Caribbean Development Bank (CDB), the Council of Europe Development Bank (CEDB) and other entities that may be recognized by the Bangko Sentral as multilateral agencies.
Counterparty Details Data on the individuals or institutional unit to which the entity is exposed.	Sector (Specific)	This refers to the sub-classification of the following sectors of the counterparty: For Residents <i>Government Sector</i> i. National Government ii. Local Government Units (LGUs) iii. Government Owned and Controlled Corporations (GOCCs) a. Social Security Institutions b. Other financial institutions c. Non-financial institutions <i>Banks</i> i. Universal and Commercial Banks (UBs/KBs) ii. Other Banks <i>Private corporations</i> i. Financial Corporations ii. Non-Financial Corporations For Non-Residents <i>Banks</i> i. Off-Shore Banking Units (OBUs) ii. Other Banks
	Counterparty Name	Refers to the name of the bank's counterparty as stated in its Articles of Incorporation/ Registration, in the case of juridical entities/sole proprietorship, as applicable.
Security Details Information about the security that is the subject of the repo transaction	ISIN	Refers to the International Securities Identification Number (ISIN) of the security.
	Security Type	Refers to the type of security subject of the repo transaction (i.e., debt securities or equity securities).
	Listing Details	Refers to whether the security is listed on a registered exchange or not. Note: Answerable by YES or NO

	Maturity Date	Refers to the maturity date of the security, in the case of debt securities. (yyyy-mm-dd)
	Accounting Classification of the Securities	Refers to the accounting classification of the underlying securities as booked by the bank. Financial assets are classified according to the following categories: <ol style="list-style-type: none"> 1. Held for Trading (HFT), 2. Held to Maturity (HTM), 3. Available for Sale (AFS), 4. Investments in Non-Marketable Equity Securities (INMES), and 5. Unquoted Debt Securities Classified as Loans (UDSCL).
	Currency Denomination	Refers to the original currency of the security.
	Face Value (Debt Security)	Refers to the face value of the security, in the case of debt securities.
	Number of Shares (Equity Security)	Refers to the number of shares, in the case of equity securities.
	Total Fair Value	Refers to the mark-to-market (MTM) value of the security in both original currency and peso equivalent, in the case of foreign currency denominated repos, as of reporting date.
	Net Carrying Amount	Refers to the net carrying amount of the security recorded as HTM, UDSCL and INMES, which corresponds to the amortized cost of securities less any allowance for specific credit losses, in both original currency and peso equivalent, as of reporting date.
	Security Issuer Details	
	Resident/Non-resident Multilateral	<p>A <i>resident</i> refers to an individual or institutional unit that has a center of economic interest in the economic territory of the Philippines;</p> <p>A <i>non-resident</i> refers to an individual or institutional unit that has a center of economic interest outside the economic territory of the Philippines; and</p> <p>A <i>multilateral agency</i> refers to an international organization as defined in the FRP for banks.</p>
	Geographic Region	Refers to the geographic region of the issuer. This shall consist of: <ol style="list-style-type: none"> 1. Northern America 2. Latin America 3. Europe 4. Asia 5. Others
	Country	Refers to the country of the issuer.
	Sector (General)	Refers to the general sector of the following issuers: <ol style="list-style-type: none"> 1. <i>Resident counterparty</i> such as government, Bangko Sentral, banks, and private corporations. 2. <i>Non-resident counterparty</i> such as central government, public sector, banks, and private corporations. 3. <i>Multilateral agency</i> refers to the World Bank Group comprised of the IBRD and IFC, ADB, AfDB, EBRD, IADB, EIB, NIB; CDB, CEDB and other entities that may be recognized by the Bangko Sentral as multilateral agencies.
	Sector (Specific)	<p>This refers to the sub-classification of the following sectors of the issuer:</p> <p>For Residents</p> <p><i>Government Sector</i></p> <ol style="list-style-type: none"> i. National government ii. LGUs iii. GOCCs <ol style="list-style-type: none"> a. Social security institutions b. Other financial institutions c. Non-financial institutions

		<i>Banks</i> i. UBs/KBs ii. Other banks <i>Private corporations</i> i. Financial corporations ii. Non-financial corporations For Non-Residents <i>Banks</i> i. OBUs ii. Other banks
Issuer Details	Issuer Name	Refers to the name of the issuer of the security as stated in its Articles of Incorporation/Registration.

3. Components of the Repo Transaction for the Month Schedule

The definition of each data field is similar to the definitions provided in Section B – Components of Month-End Balance, with the following additional columns:

Category	Standardized Data Fields	
	Data Fields	Description
Maturity and Pre-determination Details Information for matured and pre-terminated transactions	Is it Matured/Pre-terminated?	Answerable by Yes or No.
	Status	Refers to either a matured transaction or a pre-terminated transaction.
	Maturity Date/Pre-termination Date	Refers to the date of maturity/pre-termination of transactions.
	Amount Cancelled/Pre-terminated (Original Currency)	Refers to the outstanding balance of the repo when the transaction was cancelled or pre-terminated. This is in original currency of the transaction.
	Amount Cancelled/Pre-terminated (PhP Equivalent)	Refers to the outstanding balance of the repo when the transaction was cancelled or pre-terminated. This is in PhP equivalent in the case of foreign currency denominated repos.
	Reason for Cancellation/Pre-termination	Refers to the reason why the transaction was cancelled or pre-terminated.

Foreign currency-denominated accounts shall be reported, in their peso equivalent using the Philippine Dealing System (PDS) peso/US Dollar closing rate, or, for third currencies, the New York US Dollar/Third Currencies closing rate.

Banks without repo transactions shall submit the Reportorial Template on Repurchase Agreements (Repos) and the Control Prooflist certifying that there is nothing to report for the month.

IV. Effectivity

The Repo reporting template shall take effect as of the reporting period ending 30 June 2017.

(M-2017-020 dated 28 June 2017 and Circular No. 923 dated 31 August 2016)

**GUIDELINES ON THE HANDLING OF RETURNED CHECKS UNDER THE MICR/AUTOMATED CHECK CLEARING SYSTEM
(Appendix to Item a of Sec. 202)**

a. Checks without sufficient funds/with stop payment orders

To complement the provisions of Batas Pambansa Blg. 22 (An Act Penalizing the Making or Drawing and Issuance of a Check Without Sufficient Funds or Credit), the following regulations shall govern checks drawn against insufficient funds and checks drawn against closed accounts:

1. The drawee bank shall affix to the check a return stamp, indicating therein the date when the check is returned and the reason for the refusal to pay the same to the holder thereof.
2. For checks which shall be dishonored or returned by reason of insufficiency of funds or credit, the drawee bank shall indicate the remark or notation "Drawn Against Insufficient Funds," "No Funds" or "Insufficient Funds" on the return stamp. For checks which shall be dishonored or returned for the reason that such is drawn against a closed account, the drawee bank shall indicate the remark or notation "Account Closed".
3. Notwithstanding receipt of an order to stop payment, the drawee bank shall likewise indicate in the return stamp, the remarks or notations mentioned in Item "2" hereof indicating that there were no sufficient funds in or credit with such bank for the payment in full of such check or the account is closed, if such be the fact. The bank shall also indicate receipt of a stop payment order.

For checks which shall be dishonored for the reason that payment has been stopped, the following shall be observed:

- (a) The drawee bank shall affix to the check a return stamp indicating therein the date when the check is returned and the reason for the refusal to pay the same to the holder thereof.
- (b) The drawee bank shall indicate the remark or notation "Payment Stopped" or "With Stop Payment Order" on the return stamp.

A Checks and Other Cash Item (COCI) dishonored for the reason that such is drawn against insufficient funds or credit, or is drawn against a closed account, or payment thereof has been stopped shall be returned by the drawee bank to the negotiating bank not later than 7:30 AM on the clearing day immediately following the original date of presentation of the COCI to Philippine Clearing House Corporation (PCHC) or RCC.¹

(1) For Local Exchanges

There shall only be one (1) clearing windows for COCI's returned due to insufficient funds or credit, closed account and/or stop payment order in the Integrated GM LX and RLX.

The settlement of interbank transactions vis-i-vis covering reserve requirement/deficiency of banks' DDA is shown in *Appendix 35*.

The AM returned COCI clearing window for COCI's dishonored due to insufficiency of funds or credit, closed account and/or stop payment order in the Integrated GM LX and in the RLX shall be conducted from 2:00 AM to 7:30 AM on the clearing one (1) day immediately following the original date of presentation of the COCI to PCHC or RCC.

Returned COCI in the AM clearing windows shall be given value on the same date as the date of original presentation of the COCI to PCHC or RCC. The amount of debits and credits on the date of original presentation shall be reversed to the extent of the amount of credits and debits arising from the returned COCI. The process restores the balances of the demand deposits of banks with the Bangko Sentral to their position prior to the settlement of the clearing results affected by the COCI later returned due to insufficient funds or credit, closed account and/or stop payment order.

¹ See schedule of revised clearing and settlement process shown as footnote of Sec. 203

(2) *For Integrated GM Outward to Region, Integrated GM Inward From Region and Region to Region Clearing Operations*

A COCI dishonored by reason of insufficiency of funds or credit, drawn against a closed account and/or stop payment order shall continue to be covered by regulations issued by Bangko Sentral and relevant PCHC Clearing House rules and regulations.

(3) *COCI not coursed through the Clearing System*

A COCI dishonored by reason of insufficiency of funds or credit, drawn against a closed account and/or stop payment order which was not coursed through the clearing system shall be returned by the drawee bank to the holder or the negotiating bank, as the case may be, not later than the banking day following the date the COCI is presented for payment with the drawee bank.

The negotiating bank shall, in turn, return a COCI dishonored by reason of insufficiency of funds or credit, drawn against a closed account and/or stop payment order to the holder not later than the banking day following its receipt of the dishonored COCI from the drawee bank.

b. **Checks dishonored due to technical reasons.**

A COCI dishonored due to technical reasons shall be returned by the drawee bank to the negotiating bank not later than the afternoon regular clearing.

(1) *For Local Exchanges*

There shall be two {2} separate clearing windows for COCIs returned due to technical reasons in the Integrated GM LX and RLX.

The settlement of interbank transactions vis-i-vis covering reserve requirement/deficiency of banks' DDA is shown in *Appendix 36*.

- (a) AM Returned COCI Clearing - The AM returned COCI clearing window for COCIs dishonored due to technical reasons in the Integrated GM LX and in the RLX shall be conducted from 2:00 AM to 7:30 AM on the clearing day immediately following the original date of presentation of the COCI to PCHC or RCC.

Returned COCI in the AM clearing window shall be given value on the same date as the date of original presentation of the COCI to PCHC or RCC. The amount of debits and credits on the date of original presentation shall be reversed to the extent of the amount of credits and debits arising from the returned COCI. The process restores the balances of the demand deposits of banks with the Bangko Sentral to their position prior to the settlement of the clearing results affected by the COCI later returned due to technical reasons.

- (b) PM Returned COCI Clearing - The PM returned COCI clearing window for COCIs dishonored due to technical reasons shall coincide with the afternoon regular clearing. Such returned COCI shall be given value on the date the returned COCI was presented to PCHC for the Integrated GM LX or to RCC for the RLX.

(2) *For Integrated GM Outward to Region, Integrated GM Inward from Region and Region to Region Clearing Operations*

A COCI dishonored due to technical reasons continues to be covered by circulars issued by Bangko Sentral and relevant PCHC Clearing House Rules and Regulations.

(3) *COCI not Coursed Through the Clearing System*

A COCI dishonored due to technical reasons which was not coursed through the clearing system shall be returned by the drawee bank to the holder or the negotiating bank, as the case may be, not later than the banking day following the date the COCI is presented for payment with the drawee bank.

The negotiating bank shall, in turn, return a COCI dishonored due to technical reasons to the holder not later than the banking day following its receipt of the dishonored COCI from the drawee bank.

(Circular No. 924 dated 07 September 2016)

GUIDELINES ON GRANTING OF LICENSE/AUTHORITY **(Appendix to Section 111)**

I. Guiding Principle

The Bangko Sentral, the licensing authority, has the power to set criteria and reject applications that do not comply with the criteria/standards set. In this light, the Bangko Sentral is providing the following guidelines on its licensing process to establish accountability and promote transparency to banks and BSFIs wishing to apply for any licenses/authorities within the jurisdiction of the Bangko Sentral. These guidelines also aim to provide more consistency in how risk-focused supervision is applied to licensing process.

The Bangko Sentral will not restrict the scope of risk-taking activities of BSFIs consequent of the licenses and/or authorities granted: *Provided*, That these licenses and/ or authorities are in line with their business model and strategic direction: *Provided*, *further*, that BSFIs demonstrate the capacity and ability to implement these strategies.

As indicated in the new Licensing Policy, applications for licenses and/or authorities are categorized as follows:

- a. *Type "A"* – applications for licenses and/or authorities where compliance with the defined prudential requirements/criteria described in Sec. 111 is a pre- condition for applicants to be considered eligible;
- b. *Type "B"* – applications for licenses and/or authorities processed regardless of risk profile; and
- c. *Type "C"* - activities which no longer require submission of applications and processing but shall be subject to submission of reports/certification/ notification within stated deadlines. However, compliance with pre- qualification requirements is subject to post verification and any false information and/ or misrepresentation may be a basis for the imposition of appropriate enforcement actions described in Sec. 111.

II. Guidelines and Procedures

1. *Process Flow*. The licensing application process involves four (4) stages, to wit:

- a. *Stage 1. Eligibility Test and Assessment*. The Bangko Sentral shall consider an applicant's eligibility for licenses/authorities categorized as *Type "A"* in accordance with the standards and/or prudential criteria described in Sec. 111; and whether approval thereof is consistent with applicable laws, rules, regulations, policies and safety and soundness considerations.

In this regard, BSFIs shall signify to the appropriate supervising department of the Bangko Sentral its interest to apply for a license(s) or authority/ies. However, the Bangko Sentral expects each BSFI to have conducted self-assessment vis-à-vis prudential criteria and/ or requirements to determine whether it is eligible and/or qualified to apply for any specific license/authority, prior to signifying its interest.

BSFIs with CAMELS composite rating of below "3", or under the PCA or rehabilitation may still be considered eligible, on a case by case basis, upon showing valid justifications and/or verifiable evidence of significant compliance with the comprehensive PCA plan (PCAP)/ rehabilitation plan approved by the Bangko Sentral and/or if licenses and/or authorities applied for are vital to the implementation of the PCAP/rehabilitation plan.

- b. *Stage 2. Application*. The BSFI upon receipt of notice and/or confirmation from the Bangko Sentral of its eligibility can now formally submit its application letter together with the documentary requirements, as applicable to the license/authority applied for. Applications with incomplete documentation will be returned without prejudice to re-submission of a complete application and collection of applicable fees.
- c. *Stage 3. Processing*. Upon receipt of a complete application, the appropriate supervising department of the Bangko Sentral shall proceed in preparing the memorandum elevating to the appropriate approving authority of the Bangko Sentral its recommended action/s.
- d. *Stage 3. Decision*. Within five (5) working days upon approval and/or confirmation from the appropriate authority of the Bangko Sentral, BSFI's shall expect to be notified of the decision on their request / application.

The Bangko Sentral may request information and/or documents aside from the minimum documentary requirements for each type of license/authority to arrive at an informed decision. It may also conduct limited inspection or validation, when warranted.

The Bangko Sentral may approve any application of an eligible applicant after evaluating the application and considering relevant factors. Likewise, the Bangko Sentral may deny applications if (a) significant supervisory or compliance concerns exist or (b) the applicants fail to provide material information necessary to make an informed decision.

2. Responsibility

The Bangko Sentral expects each applicant to prepare accurately and completely each application/certification/ reports submitted to the appropriate supervising department of the Bangko Sentral.

By virtue of the application, the applicant authorizes the Bangko Sentral to conduct an on-site evaluation or inspection for the purpose of ascertaining compliance with relevant laws, rules, regulations and/or directives, and/or applicant's risk management capabilities, when warranted.

For this purpose, the applicant shall include in its application letter the authorization in favor of the Bangko Sentral giving its consent to the conduct of on-site verification of the documents and/or representations stated in the application filed in connection with the license or authority applied for.

3. Fees

An applicant, depending on its classification and type of license/authority applied for, shall be assessed the following fees per application:

- i. Processing fee - shall be charged upon filing of an application and is non-refundable. In case of re-submission of application that is returned for incomplete documentation, another processing fee shall be charged anew; and
- ii. Licensing fee - shall be charged to certain application upon approval. The licensing fee shall be net of the processing fee.

For Banks, assessed fees shall be debited from the applicant's demand deposit account with the Bangko Sentral upon the lapse of fifteen (15) calendar days reckoned from receipt of Bangko Sentral's decision on its request/application. For this purpose, banks shall, upon filing of an application, state in its application letter the authority to debit their demand deposit account with the Bangko Sentral for the applicable fees to the license or authority applied for. Otherwise, assessed fees shall be paid to the Bangko Sentral.

4. Post Decision

Unless otherwise prescribed by the Bangko Sentral, an applicant may file a new application for a denied and/or withdrawn application after the lapse of six (6) months reckoned from the date of denial/ withdrawal: *Provided*, That any weaknesses, deficiencies and/or non compliance with any laws, rules, regulations and/or directives that made the applicants ineligible have already been satisfactorily addressed.

(Circular No. 947 dated 15 February 2017)

DISCLOSURE REQUIREMENTS IN THE ANNUAL REPORT
(Appendix to Sec. 175 on Disclosure requirements in the annual report)

Introduction

This Appendix outlines the guidelines on the minimum disclosure requirements of the Bangko Sentral for the Annual Report of banks. The guidelines shall take effect for financial year 2017.

Basic Disclosure Requirements

All banks shall prepare an Annual Report which shall include a discussion and/or analysis of the following minimum information:

1. Corporate Policy – A brief discussion of the following information covering the first page of the Annual Report:
 - a. Brief discussion of bank's vision and mission statements
 - b. Introduction of the bank's brand that differentiates it from other banks
 - c. Business model of the bank
2. Financial Summary/Financial Highlights – A two (2)-year comparative presentation of selected profitability, capital, performance, and balance sheet data/ratios which will serve as a snapshot of the bank's financial condition to be presented after Item "1" above on Corporate Policy. The bank may use the template below:

	Consolidated ¹		Parent Bank (Solo)	
Minimum Required Data	Current Year	Previous Year	Current Year	Previous
Profitability				
Total Net Interest Income				
Total Non-Interest Income				
Total Non-Interest Expenses				
Pre-provision profit				
Allowance for credit losses				
Net Income				
Selected Balance Sheet Data				
Liquid Assets				
Gross Loans				
Total Assets				
Deposits				
Total Equity				
Selected Ratios				
Return on equity				
Return on assets				
CET 1 capital ratio (for UBs/KBs)				
Tier 1 capital ratio (for UBs/KBs)				
Capital Adequacy Ratio				
Per common share data (For UBs, KBs and publicly listed Banks)				
Net Income per share:				
Basic				
Diluted				
Book Value				
Others				
Cash dividends declared				
Headcount				
Officers				
Staff				

For banks with subsidiaries, the Financial Summary/Financial Highlights should be presented side by side on a solo basis (parent) and on a consolidated basis (parent and subsidiaries) as provided under Sec. 174 (Audited Financial Statements of Banks) Financial Condition and Results of Operations.

¹ Consolidated amounts of Parent and Subsidiaries

3. Financial Condition and Results of Operation

A report from either the chairman or president/chief executive officer or officer of equivalent rank addressed to the stockholders and other stakeholders of the bank covering the following information:

- a. Review of bank's operations and result of operations for the financial year including details and explanations for any significant change during the year
- b. Highlight of major activities during the year that impact operations, if any
- c. Major strategic initiatives of the bank and the banking group, as applicable
- d. Challenges, opportunities, and responses during the year, if any

4. Risk Management Framework Adopted

This section highlights the bank's board-approved risk management framework and should include at a minimum the following information:

- a. Overall risk management culture and philosophy (discuss the general mission and goal of the bank's risk management practices and the corresponding risk management policy/principles adopted by the bank's board for the attainment of the said mission and goal)
- b. Risk appetite and strategy (describe the risk appetite of the bank and the factors considered in defining the said risk appetite; and discuss the significant risk areas/exposures of the bank)
- c. Bank-wide risk governance structure and risk management process (Define the roles and responsibilities and the reporting lines for the different business units that composed the risk management group/unit. For better appreciation, illustrate in a chart/ table form the risk management structure and organization of the relevant risk management function. Discuss also the scope and nature of risk reporting and/or measurement systems) AML governance and culture, and description of the overall ML/TF risk management framework to prevent the use of the bank for ML/TF activities

5. Corporate Governance

This section comprehensively discusses the bank's corporate governance framework and corporate culture adopted by the bank and the banking group, as applicable. The following minimum information should be disclosed in this section:

- a. Overall corporate governance structure and practices (describe the overall governance framework adopted by the bank)
- b. Selection process for the board and senior management (describe the bank's process/procedure for identifying, assessing and selecting board and senior management candidates to ensure application of fit and proper standards)
- c. Board's overall responsibility (describe the general responsibility of the board in the approval and oversight of management's implementation of bank's strategic objectives, risk strategy, corporate governance and corporate values, among others)
- d. Description of the major role and contribution of the chairman of the board
- e. Board composition (include the names of the members of the board). For each member, include the following:
 - i. Type of directorship (executive, non-executive, or independent director);
 - ii. The principal stockholder represented if nominee;
 - iii. The number of years served as director;
 - iv. Number of direct and indirect shares held; and
 - v. Percentage of shares held to total outstanding shares of the bank.

- f. Board qualification (provide details of the relevant qualifications and experiences of each member of the board of directors, including current directorship and officership in other companies, their age and nationality)
- g. List of board-level committees including membership and function
- h. Directors' attendance at board and committee meetings (include the total number of board and committee meetings for the election year and the number of board and committee meetings attended by each director¹). A sample template is provided below:

Name of Directors	Board Number of Meetings		(Name of Board Committee) Number of Meetings		(Name of Board Committee) Number of Meetings		(Name of Board Committee) Number of Meetings		(Name of Board Committee) Number of Meetings	
	Attended	%	Attended	%	Attended	%	Attended	%	Attended	%
1										
2										
3										
4										
5										
Total Number of Meetings Held During the Year										

- i. Changes in the board of directors (*for complex banks only*) (indicate the changes in the composition of the board of directors that happened during the period including the reason for said change, i.e., resignation, death, removal).
- j. List of executive officers/senior management (disclose the name, position, relevant qualifications/experience, age and nationality of the officer. *Senior management* refers to the president/CEO or officer of equivalent rank and other persons having authority and responsibility for planning, directing and controlling the activities of the bank).
- k. Performance Assessment Program (describe the process adopted by the bank in assessing the performance of the board and senior management based on established performance standards that are consistent with the bank's strategic objectives).
- l. Orientation and Education Program (disclose the in-house and external training program of the bank for its directors and senior management to ensure that they continuously possess the qualifications for the position).
- m. Retirement and Succession Policy (describe the retirement and succession policy of the bank including the retirement age for the board and senior management; and the term limit for the members of the board).
- n. Remuneration policy
 - i. Remuneration Policy and Structure for executive and non-executive directors (disclose the bank's remuneration policy and the structure of its remuneration package for the board).
 - ii. Remuneration Policy for senior management (disclose the process used for determining the remuneration of the president/CEO or officer of equivalent rank, and the four (4) most highly compensated management officers of the bank).
- o. Policies and procedures on related party transactions.
 - i. Describe the bank's overarching policies and procedures for managing related party transactions (RPT) as defined under Sec. 135 (Profit sharing programs), including managing of conflicts of interest or potential conflicts of interest; and responsibility of the RPT Committee².

¹ Past and present directors during the year.

² As required under Sec. 135 (Item a.7 of Loans, advances, and other credit accommodations to officers).

- ii. Conglomerate structure (for UBs and KBs that are part of conglomerates under Sec. 135 (Compensation and other benefits of directors and officers)).
 - iii. Provide the details of material RPTs as defined under Sec. 135 (Item e of Loans, advances, and other credit accommodations to officers), including the nature, terms and conditions, as well as original and outstanding individual and aggregate balances, including off-balance sheet commitments.
- p. Self-Assessment Function
- i. Describe the structure of the internal audit and compliance functions including its role, mandate/authority, and reporting process
 - ii. Describe the review process adopted by the board to ensure effectiveness and adequacy of the internal control system
- q. Dividend policy (discuss the bank's policies and procedures for declaring dividends and the amount of total dividends declared during the year, if any)
- r. Corporate Social Responsibility Initiatives (discuss any initiative undertaken or proposed to be undertaken by the bank during the year)
- s. Consumer Protection Practices¹
- i. Describe the role and responsibility of the board and senior management for the development of consumer protection strategy and establishment of an effective oversight over the bank's consumer protection programs;
 - ii. Describe the consumer protection risk management system of the bank, i.e., means by which a bank identify, measure, monitor, and control consumer protection risks inherent in its operations; and
 - iii. Describe the consumer assistance management system of the bank which shall include the consumer assistance policies and procedures as well as the corporate structure for handling complaints.

6. Corporate Information

- a. Present the organizational structure, including the name and position of key officers
- b. List of major stockholders² of the bank, including nationality, percentage of stockholdings and voting status
- c. List and description of products and services offered
- d. Bank website (as applicable)
- e. List of banking units (such as branches, extension offices, other banking offices, and representative offices) domestic and abroad including address and contact details (optional for banks that disclose these information in their websites)

7. Audited Financial Statements (AFS) with Auditor's Opinion

The AFS for the calendar or fiscal year including the opinion of the external auditor of the bank should be presented in full in the Annual Report. For banks with subsidiaries, the AFS should be presented side by side on a solo basis (parent) and on a consolidated basis (parent and subsidiaries) as provided under Sec. 174 (Audited Financial Statements of Banks).

For complex banks³ with various business segments, it shall also submit Financial Results of Major Business Segments with a summary report from each business segment (such as corporate banking, consumer banking, treasury, trust, wealth management, among others) highlighting the following minimum information:

- a. Summary of financial performance of the business segment for the year
- b. Contribution of business segment to the total revenue of the bank during the year
- c. Significant developments during the year including major activities
- d. Future plans/targets/objectives

(Circular No. 956 dated 17 April 2017)

¹ As required under Sec. 1001 (Consumer Protection Oversight Function).

² Stockholders owning more than twenty percent (20%) of voting shares of stock of a bank or which enables such stockholder to elect, or be elected as, a director of such bank

³ As defined under Sec. 131 (Policy Statement and Definition of Terms)

NATIONAL RETAIL PAYMENT SYSTEM (NRPS) FRAMEWORK *(Appendix to Section 803)*

A. NRPS Framework

The NRPS is a policy and regulatory framework that aims to establish a safe, efficient, and reliable electronic retail payment system in the Philippines. Given that retail payment systems contribute to the stability and efficiency of the financial system as a whole, the attainment of the NRPS vision will help achieve higher economic growth and enhance overall competitiveness of our economy.

With the rapid evolution of retail payments due to advancements in technology, retail payments related activities of BSFIs introduced a complex interplay of different types of risks. Thus, while the Bangko Sentral promotes the modernization of the country's retail payment system in accordance with the NRPS Framework, it is critical to ensure that enabling policies and a multifaceted approach to strengthening risk management are timely adopted, and greater attention is devoted to retail payments activities of BSFIs such as clearing and settlement.

In carrying out these activities, BSFIs are expected to adhere to the NRPS Framework and measures aimed at strengthening risk management as set forth in Sec. 803 and this Appendix. Hence, the retail payment system and activities that BSFIs participate in should establish the following:

1. Strengthened risk management through a better, holistic and multi-stakeholder approach to governance, and an enhanced transparency of clearing and settlement transactions classified according to risk profile.
2. Augmented efficiencies and effectiveness in the retail payment system by minimizing duplicative efforts, promoting interoperability among retail payment system participants, standardizing clearing and settlement rules, and harmonizing various initiatives towards the achievement of the shared goals of safe, reliable and efficient retail payment system.
3. Continued compliance with Bangko Sentral rules and regulations particularly on information technology, consumer protection, and AML/CFT.

Retail payments under the NRPS Framework are payments that meet at least one of the following characteristics: (i) the payment is not directly related to a financial market transaction; (ii) the settlement is not time-critical; (iii) the payer, the payee, or both are individuals or non-financial organizations; and (iv) either the payer, the payee, or both are not direct participants in the payment system that is processing the payment. This definition of retail payment includes person-to-person, person-to-business, business-to-person, business-to-business, person/business-to-government, and government-to-person/business payments.¹ On the other hand, large-value payments refer to payments, generally of very large amounts, which are mainly exchanged between banks or between participants of financial markets and that usually require urgent and timely settlement.

The Bangko Sentral, as a central bank, generally plays a variety of essential roles in the payment system by being an operator of the real-time gross settlement system (RTGS), an overseer in core payment arrangements, a user and participant of payment services, and, most critically, a catalyst for payment system reform. It is through the performance of these roles that the Bangko Sentral seeks to acquire a broader and holistic perspective on the role and the status of the payment system in the financial system and the economy in accordance with one of the pillars of central banking of promoting safe and efficient payment systems in the country.

1. Key Principles

- a. Governance of the payment system shall be separate and distinct from the actual clearing operations to enable the retail payment system participants to effectively and efficiently deploy resources to focused and specialized activities. The governance of the payment system includes the establishment and implementation of standards and rules among payment system participants.
- b. Sound governance shall be performed by an industry-led self-governing body that is duly recognized and overseen by the Bangko Sentral.

¹ Developing a comprehensive National Retail Payments Strategy, Financial Infrastructure Systems Policy and Research, World Bank, October 2012, available at http://siteresources.worldbank.org/FINANCIALSECTOR/Resources/Developing_a_comprehensive_national_retail_payments_strategy_for_GPW_IO_20%2BvL%29.pdf.

- c. All qualified BSFIs may apply to be direct clearing participants and, as such, participate in the governance structure.
- d. All clearing participants shall subscribe to and comply with the PSMB-formulated principles, policies, and business rules that will govern the payments system.
- e. All clearing shall be done within the NRPS governance structure. Bilateral clearing arrangements outside of the NRPS governance structure are considered as undertakings that carry risks that cannot be identified, measured, monitored and/or controlled, nor can said undertakings be properly considered in attaining a holistic perspective and improving governance of the retail payment system. Hence, bilateral arrangements outside of the NRPS governance structure shall not be allowed and failure to comply therewith shall result in deployment of appropriate supervisory actions from the Bangko Sentral.
- f. All significant retail payment streams shall be covered by an ACH.
- g. Non-discriminatory participation shall be espoused in the retail payment system by allowing all qualified direct clearing participants to participate in the formulation of standards and rules, as well as participate in business arrangements.
- h. A reasonable market-based and transparent pricing mechanism shall be adopted by all BSFIs which are clearing participants. Reasonable service fees shall be allowed only for actual services rendered directly related to the delivery of electronic financial and payment services to clients of a BSFI.
- i. Bangko Sentral policies and supervisory actions, not directly involving payments governance within the scope of the PSMB, shall be addressed directly to the individual payment system participants as BSFIs.

2. Objectives:

- a. To enable effective and efficient interface and interoperability using shared and resilient infrastructure;
- b. To foster innovation and new business models;
- c. To promote fair access and competition amongst NRPS participants;
- d. To facilitate the provision of a wide range of payment products and services with needed certainty, affordability (based on a reasonable market-based pricing methodology) and trust; and
- e. To make relevant information on retail payment system available to concerned stakeholders.

The NRPS Framework espouses the cooperation of different competitors, or what is known as "*coopetition*", in the domestic retail payments by delineating areas to be covered between the cooperative and the competitive spheres.

It is recognized that certain areas are dedicated for cooperation and collaboration among BSFIs participating in the retail payment system towards the common goals of safety, efficiency, reliability and resiliency. This cooperative sphere centers on the clearing and settlement activities of BSFIs which shall collaborate through the formulation and implementation of clearing and settlement standards, rules, and agreements under a formal governance structure that conforms to the NRPS principles.

To complement the cooperative sphere is the competitive sphere where the NRPS principles promote competition through innovation in the delivery of quality and cost-effective financial products and services, the creation of new business models customized to the needs of target consumers, and the development of services with a higher level of security, among others. The competitive sphere shall be governed by reasonable, transparent and effective consumer pricing mechanisms to allow BSFIs cost-recovery and fair financial returns. Each BSFI shall be responsible for prescribing its pricing mechanisms for its financial products and services taking into consideration, among others, the nature of the product or service, the market segment to be served and the costs incurred to provide such product or service.

B. Governance - Payment System Management Body (PSMB)

The PSMB is an industry-led self-governing body that is duly recognized and overseen by the Bangko Sentral.

To attain a holistic perspective and multi-stakeholder organized structure that would bring about good governance in the retail payment system, BSFIs shall adhere to the following key principles when engaging in clearing activities and must do so only within the NRPS governance structure.

1. Key Principles

- a. The retail payment transactions covered under the NRPS governance structure shall be as follows:
 - i. For card-based instruments, the card shall be both issued and acquired locally; and
 - ii. For online, mobile, or other electronic payment instructions/instruments, the account of payer (sender) and account of payee (recipient) shall be both maintained with BSFIs that are licensed to offer EFPS.
- b. The PSMB shall be a not-for-profit juridical entity.
- c. The PSMB shall adopt a Charter in consultation with the Bangko Sentral.
- d. The PSMB membership criteria shall, at all times, be consistent with the NRPS Framework and Bangko Sentral regulations, in addition to the following principles:
 - i. All qualified direct clearing participants should be members of the PSMB.
 - ii. To be a PSMB member, a BSFI shall be a participant in at least one (1) ACH and actively participate in an ACH within one (1) month of joining the PSMB.
 - iii. Each PSMB member shall be entitled to only one (1) vote.
- e. The PSMB shall be funded by the members on an agreed basis.
- f. The PSMB shall be governed by a PSMB board which shall observe the following principles:
 - i. The PSMB board shall have multi-stakeholder representation in accordance with the volume of the risk-taking activities, such as clearing volume, within a specified time frame [e.g., immediately preceding twenty four (24) months]. The basis for computing the clearing volume across all ACHs or payment streams shall include all payment streams with clearing activities as of the date when the election of the PSMB board is called, except if a valid reason is shown to limit the parameters.
 - ii. The PSMB board shall also abide by sound corporate governance practices which may include, but is not limited to, allocating seat/s for independent board member/s or board member/s that represent/s the broader public interest and has/have competence and experience in the payments field.
 - iii. The PSMB board members shall appoint as official representative their chief executive officer (CEO) and designate a formal alternate who can act with full authority (e.g., voting, approval, decision-making, and others).
 - iv. Each PSMB board member shall have one (1) vote.
 - v. No two (2) PSMB board members shall come from the same group of companies where one is majority-owned or controlled by the other company.
 - vi. The Chairperson shall be elected among PSMB board members and shall not serve for two (2) successive terms.
- g. The PSMB shall be independent from the clearing switch operator/s with respect to business operations.
- h. All BSFIs that are part of the NRPS governance structure shall subscribe to and comply with the PSMB-formulated principles, policies, and business rules that will govern the payments system provided such PSMB-formulated principles, policies and business rules are in conformity with the NRPS Framework and principles as well as applicable laws and regulations.

2. Objectives

- a. The PSMB will provide sound governance to the retail payment system and serve as a forum of collaboration for ensuring appropriate conditions for retail payments in the country. Towards this end, the PSMB will perform these functions with respect to its members:
 - i. Ensure compliance by PSMB members with criteria, standards and rules promulgated and adopted by the PSMB's membership and PSMB board, as applicable.

- ii. Set policies and standards on clearing activities of PSMB members.
- iii. Standardize retail clearing agreements across payment streams, which may include minimum guideline on the content of service level agreements with CSOs.
- iv. Manage members' conformance to multilateral retail clearing agreements.
- v. Review applications for establishment of ACHs and to accordingly approve the formation thereof to ensure, among others, that the NRPS principle of a payment stream falling only under one (1) ACH is observed by PSMB members.
- vi. Prescribe policies and rules to promote visibility of retail clearing and resulting settlement positions to manage risks resulting from or associated with clearing and settlement activities.
- vii. Set forth policies, rules and/or standards to ensure that no anti-competitive activities occur in clearing operations of PSMB members.
- viii. Promote fair access to the payment system amongst PSMB members.
- ix. Enable effective and efficient interface and interoperability using shared and resilient infrastructure.
- x. Establish a dispute resolution mechanism for PSMB members on matters not covered or cannot be resolved under the ACH dispute resolution framework.
- xi. Provide a clearing environment that will support payments innovation and the adoption of new business models by the payment system participants.

C. Automated Clearing House (ACH)

The ACH is a multilateral legally binding agreement amongst clearing participants. The ACH shall govern clearing and settlement determination.

To promote interoperability and standardize clearing and settlement rules and procedures, BSFIs are expected to observe the following key principles in forming and participating in ACHs under the NRPS governance structure.

1. Key Principles

- a. ACHs shall be created and differentiated based on payment streams, which comprise of payment instruments or instructions, business rules, clearing activities and risk considerations which are of similar nature or which create similar risk profiles.
- b. A payment stream can fall under only one (1) ACH.
- c. The formation of and participation in an ACH shall be open to all qualified clearing participants.
- d. The formation of an ACH shall be considered a business arrangement to be agreed upon between participants of an ACH.
- e. An ACH shall engage the services of only one (1) clearing switch operator.
- f. PSMB members may be part of more than one (1) ACH Participant Group and/or participate in more than one (1) ACH, provided the PSMB member meets the requirements for participating in such ACH.
- g. At least two (2) direct clearing participants can initiate the creation of an ACH subject to the recognition of the PSMB Board, or in the absence of a PSMB, the Bangko Sentral.

2. Salient Features

- a. ACH participants shall elect representatives to an ACH Participant Group, which once recognized by the PSMB, shall draw up and implement ACH rules and agreements and contract a qualified clearing switch operator. To assist in drafting the ACH agreements, the Participant Group may nominate a Working Group to formulate draft agreements subject to the former's approval.
- b. The assignment of a new ACH to an existing or new ACH Participant Group shall be approved by the PSMB Board.
- c. Where a new ACH Participant Group has to be formed, it shall be recognized by the PSMB Board once its charter has been accepted by the ACH participants and meets the PSMB criteria for an ACH Participant Group.

D. Clearing Switch Operator (CSO)

The CSO provides clearing switch services.

To augment efficiencies in the retail payment system while ensuring a robust and resilient infrastructure underlying retail payment transactions of BSFIs, BSFIs should observe the following key principles in engaging the services of CSOs relative to the delivery of a retail payment product or service within the NRPS governance structure.

1. Key Principles

- a. The operations of the CSO that services an ACH shall be limited to the provision of clearing and other services that do not compete with services offered by BSFIs participating in the ACH.
- b. Clearing switch operations shall be conducted effectively and efficiently consistent with international standards as this is a critical prerequisite for the functioning of all the various systems supporting and underlying retail payment services.
- c. The CSO shall have a reliable, resilient, robust, and secure infrastructure to ensure consistency and continuity of services under different operating conditions.
- d. The CSO shall be a duly licensed entity in the Philippines. Entities organized under the laws of countries other than the Philippines shall secure a license to do business in the Philippines and comply with the Foreign Investments Act of 1991 as well as other applicable laws and regulations.
- e. A CSO can extend service to multiple ACHs.
- f. Each ACH, through their designated CSO, shall individually settle their clearing results through the RTGS system operated by the Bangko Sentral.

(Circular No. 980 dated 06 November 2017)

EXPANDED REPORT ON REAL ESTATE EXPOSURES REVISED GUIDELINES AND LINE ITEM INSTRUCTIONS
(Appendix to Sec. 363)

I. Real Estate Loans

A. Residential-Real Estate Loans to Individual Households for Occupancy

Report required information on residential real estate loans granted to individual households for purposes of financing the acquisition, construction and/or improvement of housing units, which shall refer to houses and lots, homelots or residential condominium units, among others, and acquisition of any associated land that is or will be occupied by the borrower, as follows:

- (1) **Socialized Housing** shall refer to socialized housing units as defined under existing guidelines of the Housing and Urban Development Coordinating Council (HUDCC) for the implementation of various government housing programs, or in such other amounts which HUDCC may prescribe in the future for said housing units.
- (2) **Low-cost Housing** shall refer to low-cost housing units as defined under existing guidelines of the HUDCC for the implementation of various government housing programs, other than those classified as socialized housing units, or in such other amounts which HUDCC may prescribe in the future for said housing units.
- (3) **Mid-end Housing** shall refer to housing units that are worth more than ₱ 3 million to ₱ 10 million.
- (4) **High-end Housing** shall refer to housing units that are worth more than ₱ 10 million.

B. Commercial Real Estate Loans

(1) **For land development as well as acquisition, construction and/or improvement of commercial real estate units**

Report required information on commercial real estate loans or loans granted for purposes of financing land development, acquisition, as well as construction and/or improvement of commercial real estate units intended for own use, sale or lease to the following borrowers:

- (a) Loans to individuals
- (b) Loans to land developers/construction companies.

Commercial real estate loans extended to land developers and/or construction companies shall further be classified according to the following types of real estate projects:

- (i) Residential unit;
- (ii) Office building/condominium;
- (iii) Stand-alone stall/store/shop/supermarket/convenience store;
- (iv) Mall/Shopping Center¹;
- (v) Plant/factory/mill/warehouse/ storage facility;
- (vi) Accommodation, restaurant, resort and other entertainment and recreational facility²;
- (vii) Others, which shall refer to projects other than those classified under Items “(i)” to “(vi)” above and which shall be further broken down into:

- (a) Working capital. This shall refer to short-term loans for purposes of financing the day-to-day real estate development operations of land developers/construction companies; or
- (b) Others

including all project-related amenities/facilities.

In reporting loans intended for the construction/development of property/(ies) under a “mixed-use” concept, the bank shall report the loan under the type of project where most of the loan proceeds will be utilized.

- (c) Loans to other corporate borrowers, including holding companies.

Commercial real estate loans extended to (1) holding companies, and (2) other corporate entities shall further be classified according to the specific types of real estate projects defined under Items “I.B.(1).(b).(i).” to “I.B.(1).(b).(vii).”, except for working capital purposes, of the Line Item Instructions of this Appendix.

¹ Mall/Shopping Center refers to a group of retail and other commercial establishments that is planned, developed and managed as a single property, comprising commercial multi-branded rental units and common areas. For purposes of reporting, a mall/shopping center shall have at least twenty (20) tenant stores.

² Refer to classification under PSIC 2009

Holding companies shall refer to entities owning the equity of subsidiary corporations and whose principal activity is owning the group.

(2) **For ancillary real estate activities such as buying and selling of real estate, lease of real estate and management of real estate/real property**

Report required information on commercial real estate loans or loans granted for purposes of financing ancillary real estate activities such as buying and selling of real estate, lease of real estate and management of real estate/real property, classified as to the following borrowers:

(a) Loans to individuals, including sole proprietors, which are further classified as to the following:

- (i) Real estate brokers,
- (ii) Real estate lessors, and
- (iii) Others; and

(b) Loans to other corporate entities, which are further classified as to:

- (i) Real estate brokers;
- (ii) Real estate lessors;
- (iii) Property management companies;
- (iv) Holding companies; and
- (v) Other corporate entities

Details of Residential and Commercial Real Estate Loans

Report in the appropriate column the following requested information:

- (1) **No. of Accounts** – Report the number of accounts of real estate loans extended.
- (2) **Outstanding Balance** – Report the amortized cost (i.e., gross of allowance for credit losses) of real estate loans extended.
- (3) **Allowance for Credit Losses** – Report the specific allowance for credit losses booked for the real estate loans extended.
- (4) **Net Carrying Amount** – Report the net carrying amount of real estate loans extended as the difference between Items “(2)” and “(3)”.
- (5) **Status of Accounts**

Report the amortized cost (i.e., gross of allowance for credit losses) of real estate loans extended classified as to the following status:

- (a) Current
- (b) Past Due
- (c) Non-Performing
- (d) Items in Litigation

as defined under existing regulations.

(6) **Collateral**

Report the amortized cost (i.e., gross of allowance for credit losses) of real estate loans classified as to the following:

- (a) **Secured by REM** – Report the amortized cost (i.e., gross of allowance for credit losses) of real estate loans to the extent covered by real estate mortgage (REM) on residential and commercial properties.
 - (b) **Secured by Non-Risk Assets** - Report the amortized cost (i.e., gross of allowance for credit losses) of real estate loans to the extent covered by non-risk assets as provided under existing regulations.
 - (c) **Secured by Other Assets** – Report the amortized cost (i.e., gross of allowance for credit losses) of real estate loans to the extent secured by other assets as provided under existing regulations.
 - (d) **Unsecured** – Report the amortized cost (i.e., gross of allowance for credit losses) of unsecured real estate loans extended by the bank as provided under existing regulations.
- (7) **Philguarantee (PGC)** – Report the amortized cost (i.e., gross of allowance for credit losses) of real estate loans to the extent guaranteed by the PGC, regardless of whether these are secured or unsecured.

(8) **Contracts to Sell (CTS)**

Report the amortized cost (i.e., gross of allowance for credit losses) of real estate loans acquired from real estate developers/construction companies that are covered by CTS agreements, executed between the developer and homebuyers, prior to the transfer of underlying real estate properties in the name of the homebuyer and execution of REM on said properties by the bank.

- (a) **CTS without recourse** – Report the amortized cost (i.e., gross of allowance for credit losses) of real estate loans acquired from real estate developers/construction companies by way of purchase of CTS on a without recourse basis.
- (b) **CTS with recourse** – Report the amortized cost (i.e., gross of allowance for credit losses) of real estate loans to real estate developers/construction companies by way of purchase of CTS on a with recourse basis.

(9) **Fair Value of REM Collateral** – Report the fair value of the REM collateral on an annual basis.

(10) **Residual Maturity**

Report the amortized cost (i.e., gross of allowance for credit losses) of real estate loans classified according to the time remaining from the date of report until maturity date of the loan.

- (a) Up to 1 year;
- (b) Over 1 year to 5 years;
- (c) Over 5 years to 10 years; and
- (d) Over 10 years.

Additional Information

A. RELs to Finance Residential Units – This refers to residential real estate loans granted for purposes of financing the acquisition, construction and/or improvement of housing units, which shall refer to houses and lots, homelots or residential condominium units, among others, and acquisition of any associated land.

(1) **Residential RELs for Occupancy** – This refers to residential real estate loans granted to individual households for purposes of financing the acquisition, construction and/or improvement of housing units and acquisition of any associated land that is or will be occupied by the borrower.

(2) **Commercial Real Estate Loans for Land Development as well as Acquisition, Construction and/or Improvement of Residential Units** – Report the required information on commercial real estate loans extended to finance the land development and construction of residential housing units, which are intended for sale/lease to individual households, broken down as to counterparties, and further classified according to type of housing segment as defined under the line item instructions for Item “I.A.” - *Residential Real Estate Loans to Individual Households for Occupancy*:

(a) Land Developers/Construction Companies

- (i) Socialized Housing
- (ii) Low-cost Housing
- (iii) Mid-end Housing
- (iv) High-end Housing

(b) Other Borrowers

- (i) Socialized Housing
- (ii) Low-cost Housing
- (iii) Mid-end Housing
- (iv) High-end Housing

B. RELs to Finance Residential Condominium Units – Report information on residential real estate loans extended to finance the acquisition, construction and/or improvement of residential condominium units.

C. RELs to Overseas Filipinos (OFs) and/or their Beneficiaries – This refers to real estate loans granted to OFs and/or their beneficiaries, where the repayment for such RELs would come from the salary and /or remittances of the OF. These RELs shall be broken down as to the following:

(1) **Residential RELs for Own Occupancy** – Report information on residential real estate loans granted to OFs and/or their beneficiaries to finance the acquisition, construction and/or improvement of housing units and acquisition of any associated land that is or will be occupied by the OF and/or his/her beneficiaries.

- (2) **Commercial Real Estate Loans** – Report information on commercial real estate loans granted to OFs and/or their beneficiaries for purposes of financing commercial real estate activities.
- D. Loans Secured by REM (Other than those reported as Real Estate Loans under Item I)** – Report information on loans secured by REM that are extended, other than for real estate activities, broken down as to the following:
- (1) Secured by REM on Residential Properties
 - (2) Secured by REM on Commercial Properties
 - (3) Secured by REM on Agricultural Properties
- E. Loans for Public Infrastructure** – Report information on loans extended for purposes of financing infrastructure projects for public use as defined under Item “1” of Section 1397.

II. Investments in Securities Issued for Purposes of Financing Real Estate Activities

A. Debt Securities

Report the names of corporations that issued debt securities for purposes of financing real estate activities that are held by the bank.

Further, report under the appropriate column the following information:

- (1) **Acquisition Cost** – Report the acquisition cost of debt securities per line item indicated.
- (2) **Carrying Amount** – Report the carrying amount, (i.e. gross of allowance for credit losses) of debt securities per line item indicated.
- (3) **Allowance for Credit Losses** – Report the specific allowance for credit losses per line item indicated
- (4) **Net Carrying Amount** – Report the net carrying amount of debt securities per line item indicated as the difference between Items “(2)” and “(3)”.
- (5) **Past Due Accounts** – Report the carrying amount (i.e., gross of allowance for credit losses) of past due debt securities as defined under existing regulations per line item indicated
- (6) **Collateral** – Report the carrying amount (i.e., gross of allowance for credit losses) of debt securities as to the following collateral types:
 - (a) Secured by Mortgage Trust Indenture (MTI)
 - (b) Secured by Non-Risk Assets
 - (c) Secured by Other Assets
 - (d) Unsecured
- (7) **Fair Value** – Report the fair value of debt securities held by the bank on an annual basis.

B. Equity Securities

Report the names of land developers/construction companies and other corporate borrowers such as real estate brokers, real estate lessors and property management companies that issued equity securities that are held by the bank.

Further, report under the appropriate column the following information:

- (1) **Acquisition Cost** – Report the acquisition cost of equity securities per line item indicated.
- (2) **Carrying Amount** – Report the carrying amount, (i.e. gross of allowance for credit losses) of equity securities per line item indicated.
- (3) **Allowance for Impairment** – Report the specific allowance for impairment per line item indicated.
- (4) **Net Carrying Amount** – Report the net carrying amount of equity securities per line item indicated as the difference between Items “(2)” and “(3)”.
- (5) **Fair Value** – Report the fair value of equity securities held by the bank on an annual basis.

Additional Information:

Investments in Securities for Public Infrastructure – Report information on investments in securities issued for purposes of financing infrastructure projects for public use as defined under Item “1” of Section 1397.

III. Ratio of REE to Adjusted Capital

- A. RELs** – Report the amortized cost (i.e., gross of allowance for credit losses) of total RELs as computed in Part I of the reporting template.
- B. Investments in Securities** – Report the carrying amount (i.e., gross of allowance for credit losses/impairment) of investments in securities as computed in Part II of the reporting template.
- C. Total REEs** – Sum of Items “A” and “B” above.
- D. Adjusted Capital** – Report the adjusted capital of the bank as provided under Section 121 and Sec. 103 (Capital requirements of foreign banks) Subsection X105.4 (for Philippine branches of foreign banks) of the Manual of Regulations for Banks.
- E. Ratio of REE to Adjusted Capital** – Divide Item “C” by Item “D”.

The adjusted capital that shall be used for the banking group report shall be the adjusted capital of the parent bank.

(Circular No. 976 dated 10 October 2017)

REPORT ON PROJECT FINANCE EXPOSURES
LINE ITEM INSTRUCTIONS ON THE COVERAGE OF PROJECT FINANCE EXPOSURES
(Appendix to Sec. 173)

I. Project Finance Loans Classified According to Type of Infrastructure Projects – Report information on loans extended using the method of project finance as defined under Section 344 (Exclusion from the thirty percent (30%) unsecured individual ceiling for project finance) broken down as to the following type of infrastructure projects:

- A. Highways, expressways, roads, bridges, interchanges, tunnels and related facilities;
- B. Rail-based projects, non-rail based mass transit facilities, navigable inland waterways and related facilities;
- C. Airports, air navigation and related facilities;
- D. Piers, wharves, quays, and other port infrastructure-related facilities;
- E. Power-generation/transmission/distribution related facilities;
- F. Telecommunications, backbone network, terrestrial and satellite facilities and related service facilities;
- G. Government buildings and housing projects;
- H. Information technology (IT) and data base infrastructure-related facilities;
- I. Education and health infrastructure facilities;
- J. Irrigation, water supply, sewerage, drainage and related facilities;
- K. Land reclamation, dredging, industrial and tourism estates/townships including ecotourism projects and other related development facilities/utilities;
- L. Warehouses and post-harvest facilities, markets, slaughterhouses and related facilities;
- M. Public fish ports and fish ponds, including storage and processing facilities; and
- N. Others.

Additional Information on Project Finance Loans –

A. Project Finance Loans Classified According to the Current Phase of the Project Being Financed – Report information on project finance loans as defined under Section 344 of the MORB, broken down as to the following:

- (1) **Project is in its Gestation/Pre-operational Phase** – Report information on loans extended to projects which are at the pre-operational phase or the phase wherein the project does not yet generate cash flows, as of reporting date.
- (2) **Project is Operational** – Report information on loans extended to projects which are operational, or the phase wherein the project is already generating cash flows, as of reporting date.

B. Project Finance Loans for Public Infrastructure Projects Awarded under Public-Private Partnership Contracts/Agreements – Report the name of the infrastructure project awarded under Public-Private Partnership Contracts/Arrangements that is financed by the bank through project finance loans and other required information related to project finance loans for public infrastructure projects awarded under Public-Private Partnership Contracts/Arrangements.

Details of Project Finance Exposures

“Report in the appropriate column the following requested information:

- 1. **No. of Accounts** – Report the number of accounts of project finance loans extended.
- 2. **Total Commitments** – Report the total amount of commitments under committed credit line agreements of a bank with a corporation that fall under a project finance arrangement.
- 3. **Outstanding Balance** – Report the amortized cost (i.e., gross of allowance for credit losses) of project finance loans extended.
- 4. **Allowance for Credit Losses** – Report the specific allowance for credit losses booked for the project finance loans extended.
- 5. **Net Carrying Amount** – Report the net carrying amount of project finance loans extended as the difference between Items “(3)” and “(4)”.

6. Status of Accounts

Report the amortized cost (i.e., gross of allowance for credit losses) of project finance loans extended classified as to the following status:

- (a) Current
- (b) Past Due
- (c) Non-Performing
- (d) Items in Litigation

as defined under existing regulations.

7. Collateral

Report the amortized cost (i.e., gross of allowance for credit losses) of project finance loans classified as to the following:

- (a) **Secured by REM** – Report the amortized cost (i.e., gross of allowance for credit losses) of project finance loans to the extent covered by real estate mortgage (REM) on residential and commercial properties.
- (b) **Secured by Non-Risk Assets** - Report the amortized cost (i.e., gross of allowance for credit losses) of project finance loans to the extent covered by non-risk assets as provided under existing regulations.
- (c) **Secured by Other Assets** – Report the amortized cost (i.e., gross of allowance for credit losses) of project finance loans to the extent secured by other assets as provided under existing regulations.
- (d) **Unsecured** – Report the amortized cost (i.e., gross of allowance for credit losses) of unsecured project finance loans extended by the bank as provided under existing regulations.

8. Fair Value of REM Collateral – Report the fair value of the REM collateral on an annual basis.

9. Residual Maturity – Report the amortized cost (i.e., gross of allowance for credit losses) of project finance loans classified according to the time remaining from the date of report until maturity date of the loan.

- (a) Up to 1 year;
- (b) Over 1 year to 5 years;
- (c) Over 5 years to 10 years; and
- (d) Over 15 years.

II. Investments in Securities Issued for Infrastructure Projects under Project Finance – Report information on investments in securities issued for purposes of financing infrastructure projects funded through project finance as defined under Section 344 (Exclusion from the thirty percent (30%) unsecured individual ceiling for project finance).

A. Debt Securities

Report the names of corporations that issued debt securities for purposes of financing project finance activities that are held by the bank.

Further, report under the appropriate column the following information:

- (1) **Acquisition Cost** – Report the acquisition cost of securities per line item indicated.
- (2) **Carrying Amount** – Report the carrying amount, (i.e. gross of allowance for credit losses) of securities per line item indicated.
- (3) **Allowance for Credit Losses/Impairment** – Report the specific allowance for credit losses/impairment per line item indicated.

- (4) **Net Carrying Amount** – Report the net carrying amount of securities per line item indicated as the difference between Items “(2)” and “(3)”.
- (5) **Past Due Accounts** – Report the carrying amount (i.e., gross of allowance for credit losses) of past due securities as defined under existing regulations per line item indicated.
- (6) **Collateral** – Report the carrying amount (i.e., gross of allowance for credit losses) of securities as to the following collateral types:
 - (a) Secured by Mortgage Trust Indenture (MTI)
 - (b) Secured by Non-Risk Assets
 - (c) Secured by Other Assets
 - (d) Unsecured
- (7) **Fair Value (Annually)** – Report the fair value of securities held by the bank on an annual basis.

B. Equity Securities

Report the names of special purpose entity (SPE) projects that are listed with the Philippine Stock Exchange.

Further, report under the appropriate column the following information:

- (1) **Acquisition Cost** – Report the acquisition cost of equity securities per line item indicated.
- (2) **Carrying Amount** – Report the carrying amount, (i.e. gross of allowance for credit losses) of equity securities per line item indicated.
- (3) **Allowance for Impairment** – Report the specific allowance for impairment per line item indicated.
- (4) **Net Carrying Amount** – Report the net carrying amount of equity securities per line item indicated as the difference between Items “(2)” and “(3)”.
- (5) **Fair Value** – Report the fair value of equity securities held on an annual basis.

Additional Information

- A. Investments in Securities for Project Finance Infrastructure Projects Awarded under Public-Private Partnership Contracts/Arrangements** – Report the name of the project finance infrastructure project awarded under Public-Private Partnership Contracts/Arrangements that is financed by the banks through investments in securities and other required information related to the investments in securities issued to finance public infrastructure projects awarded under Public-Private Partnership Contracts/Arrangements.

SWORN CERTIFICATION OF COMPLIANCE WITH THE MINIMUM LIQUIDITY RATIO REQUIREMENT
(Appendix to Sec. 145 Minimum Liquidity Coverage Ratio for
Stand-Alone Thrift Banks, Rural Banks, and Cooperative Banks)

<Name of Bank>

CERTIFICATION

Pursuant to Section 145 (Minimum Liquidity Ratio for Stand-Alone Thrift Banks, Rural Banks and Cooperative Banks) of the Manual of Regulations for Banks, I/we hereby certify that –

☐ The Bank has fully complied with the twenty percent (20%) Minimum Liquidity Ratio (MLR) Requirement on all banking days of the month/quarter ended <Year>.

☐ The Bank incurred shortfalls on the following days of the month/quarter ended <Year>:

I/We further certify to the best of my/our knowledge that the above statement is true and correct.

(Signature over Printed Name of President, or
Executive Vice President and Compliance Officer/
Chief Accountant/Comptroller)

SUBSCRIBED AND SWORN TO before me this day of 20____, at, _____ Philippines affiant/s exhibiting their government-issued identification cards as follows:

GUIDELINES ON THE BANGKO SENTRAL IMPLEMENTATION OF THE NET STABLE FUNDING RATIO (NSFR)

(Appendix to Sec. 145 on NSFR)

The guidelines on the implementation of the NSFR are aligned with the provisions of the “Basel III: The Net Stable Funding Ratio” document issued by the Basel Committee on Banking Supervision (BCBS). National discretion is exercised in certain areas considering domestic conditions. For purposes of these guidelines, the definitions used in the Liquidity Coverage Ratio (LCR) Framework as provided in *Appendix 72* shall apply, unless otherwise explicitly provided.

A. Available Stable Funding

1. The available stable funding (ASF) represents the portion of the covered bank’s capital and liabilities that are expected to be reliable sources of funds over a one-year time horizon. The amount of ASF is determined by assigning the carrying value of the covered bank’s capital and liabilities to different ASF categories, multiplying each category by an ASF factor and adding the weighted amounts. The carrying value of the covered bank’s capital and liabilities shall refer to the recorded amount before the application of any regulatory deductions and other adjustments.

Characteristics of Funding Stability

2. Under the NSFR framework, liabilities are accorded with presumed degree of stability as reflected in their corresponding ASF factor. The factors are scaled from 100% to zero percent (0%) with 100% representing the most stable account.
3. Three (3) characteristics are identified for funding stability, namely: tenor, type and counterparty:
 - a. *Funding Tenor.* Longer-term liabilities are assumed to be more stable than short term liabilities. As such, funding that matures in more than one (1) year is considered more stable than those maturing in less than a year.
 - b. *Funding type.* The framework recognizes that certain types of funding are inherently more stable than other types without considering the tenor. Retail deposits are generally considered more stable than wholesale deposits.
 - c. *Funding counterparty.* The covered bank’s counterparty influences the stability of funding such that retail customers or counterparties are considered more stable than similar types of funding provided by wholesale customers. Likewise, funds provided by non-financial corporates/entities are considered more stable than those provided by financial corporate/entities.

Maturity of Funding

4. Funding instruments with options to redeem and deposits with withdrawal notice periods shall be assumed to be redeemed through the exercise of an option or withdrawn on the earliest date possible.
5. For long dated liabilities, only the portion of cash flows due beyond six (6) months and one (1) year time horizon shall receive an ASF based on residual maturity of six (6) months to less than one (1) year and one (1) year or more, respectively.

ASF Categories

Liabilities and capital with 100% ASF factor

6. Liabilities and capital instruments receiving 100% ASF factor include:
 - a. Total amount of regulatory capital¹ before the application of regulatory adjustments excluding Tier 2 instruments with residual maturities of less than one (1) year or those instruments with explicit or embedded options that, if exercised, would reduce the expected maturities to less than one (1) year.
 - b. Other capital instruments not included above, that have effective residual maturities of one (1) year or more, but excluding any instruments with explicit or embedded options that, if exercised, would reduce the expected maturity to less than one (1) year.
 - c. Secured and unsecured funding with residual maturities of one (1) year or more.
 - d. Wholesale non-operational deposits with residual maturities of one (1) year or more.
 - e. Retail term deposits with residual maturities of one (1) year or more.

¹ Regulatory capital is the sum of Tier 1 and Tier 2 capital before the application of any regulatory deductions and other adjustments.

Liabilities with ninety-five percent (95%) ASF factor

7. Retail non-maturity deposits and retail term deposits with residual maturities of less than one (1) year and that have an outstanding balance of P500 thousand and below.

Liabilities with ninety percent (90%) ASF factor

8. Retail non-maturity deposits and retail term with residual maturities of less than one (1) year and that have an outstanding balance of more than P500 thousand

Liabilities with fifty percent (50%) ASF factor

9. Wholesale non-operational deposits with residual maturities of less than one (1) year from the Philippine National Government (NG) and other sovereigns, Local Government Units (LGUs), Government Owned and Controlled Corporations (GOCCs), Philippine Stock Exchanges (PSEs) of Foreign Countries, and Multilateral Organizations including Multilateral Development Banks (MDBs).
10. Wholesale non-operational deposits with residual maturities of less than one (1) year from non-financial corporates.
11. Wholesale non-operational deposits with residual maturities of six (6) months to less than one (1) year from the Bangko Sentral, other central banks, banks and financial corporates.
12. Wholesale operational deposits. All Current Account and Savings Account (CASA) including negotiable order of withdrawal accounts are automatically categorized as operational deposits.
13. Secured and unsecured funding with residual maturities of less than one (1) year provided by the NG and other sovereigns, LGUs, GOCCs, PSEs of Foreign Countries, and Multilateral Organizations including MDBs.
14. Secured and unsecured funding with residual maturities of less than one (1) year provided by non-financial corporates.
15. Secured and unsecured funding with residual maturities of six (6) months to less than one (1) year provided by the Bangko Sentral, other central banks, banks and financial corporates.
16. Other sources of funding with residual maturities of six (6) months to less than one (1) year.
17. For foreign bank branches, any balance of "Net due to head office/branches/agencies abroad" excluding accumulated "unremitted profits" and "losses in operations".

Liabilities and equities with zero percent (0%) ASF factor

18. Wholesale non-operational deposits with residual maturities of less than six (6) months from the Bangko Sentral, other central banks, banks and financial corporates.
19. Secured and unsecured funding with residual maturities of less than six (6) months provided by the Bangko Sentral other central banks, banks and financial corporates.
20. Other sources of funding with residual maturities of less than six (6) months.
21. All other liabilities and equity items not included in the above categories. The liabilities shall include those without a stated maturity such as short positions and open maturity positions. Two (2) exceptions shall be recognized for liabilities without a stated maturity:
 - First, deferred tax liabilities, which shall be treated according to the nearest possible date on which such liabilities could be realized; and
 - Second, minority interest, which shall be treated according to the term of the instrument, usually in perpetuity.

These liabilities shall then be assigned either a 100% ASF factor if the effective maturity is one (1) year or greater or fifty percent (50%), if the effective maturity is between six (6) months and less than one (1) year.

22. Trade date payables arising from purchase of financial assets pending actual receipt/settlement of the underlying securities.

B. Required Stable Funding

23. The amount of required stable funding (RSF) represents the amount of funding needed to support a covered bank's assets and off balance sheet (OBS) exposures based on their liquidity characteristics or liquidity risk profile. RSF is calculated by assigning the carrying value of assets and OBS exposures to the relevant RSF category. The carrying value is then multiplied by the corresponding RSF factor to arrive at the weighted amounts. The carrying value of an asset shall be gross of the GLLP and net of specific provisions.

Considerations for Asset Liquidity

24. Similar to available stable funding, a set of standardized weightings shall be used to determine the amount of stable funding a covered bank must maintain. RSF factors shall be scaled from zero percent (0%) to 100% based on liquidity characteristics of asset and OBS exposures.
25. The RSF factor assigned to each asset represents the amount of a particular asset estimated to be funded, either because the asset will be rolled over or because it could not be monetized through sale or be used as collateral in secured borrowing transaction, over the course of one (1) year
26. The following characteristics are considered collectively for each asset, as applicable:
- a. Credit Quality. Asset with higher credit quality are perceived to attract more demand from market participants than those with lower credit quality, and thus more liquid than the latter. Under the framework, assets with lower credit quality shall require more stable funding than those with higher credit quality.
 - b. Tenor. Assets with longer maturities are expected to require more funding than those with shorter maturities. This is in view of the longer time necessary for the asset to be converted to cash or for cash inflows to be realized from the asset. Additionally, assets with longer tenor may liquidate at a discount because of the higher market and credit risks associated with the longer time to wait for cash inflows.
 - c. Counterparty. Relationships with counterparties are critical in continuing business. Covered banks would generally roll over certain exposures to non-financial counterparties to maintain business relationship and generate additional business in the future.
 - d. Market Characteristics. Assets that are traded in an exchange tend to exhibit a higher degree of liquidity, thus, shall require less stable funding.
 - e. Asset Encumbrance. In general, encumbered assets cannot be monetized during the period they are encumbered. The longer an asset is encumbered, the more stable funding it would require.
27. For purposes of determining the RSF, covered banks shall include financial instruments, foreign currencies, and commodities for which a purchase order has been executed and shall exclude those for which a sales order has been executed.

Maturity of assets

28. In determining the maturity of an instrument, it shall be assumed that investors will exercise any option to extend maturity. On the other hand, for assets with options exercisable at the discretion of the covered bank, the reputational factors which may limit a covered bank's ability not to exercise the option shall be considered. For amortizing loans, the portion that comes due within the one-year period shall be classified under the less than one (1) year residual maturity category.

Asset Encumbrance

29. The RSF factor for an encumbered asset is either the same as, or higher than, the RSF factor for an equivalent unencumbered asset. The specific RSF factors for encumbered assets depend on the remaining period of encumbrance. On-balance sheet assets that are encumbered for one year or more shall have an RSF factor of 100% while assets encumbered for a period of six (6) months to less than one (1) year shall have a fifty percent (50%) RSF factor. Encumbered assets with less than six (6) months remaining in the encumbrance period shall receive the same RSF factor as if the equivalent asset was unencumbered.
30. Where beneficial ownership is retained in assets that are encumbered in a repo or other securities financing transactions, and these assets are included in the balance sheet, such assets shall be allocated in their respective RSF category.

RSF Categories

Asset assigned a zero percent (0%) RSF factor

31. Cash on hand, checks and other cash items.
32. Covered bank reserves in the Bangko Sentral and all claims on the Bangko Sentral (including demand), overnight, and term deposits and reverse repos where the Bangko Sentral is the counterparty) with residual maturities of less than six (6) months.
33. Trade date receivables arising from sale of financial assets pending actual settlement/delivery of the underlying securities.

Assets assigned a five percent (5%) RSF factor

34. Eligible securities representing claims on or guaranteed by the NG, the Bangko Sentral, sovereigns, other central banks and PSEs of Foreign Countries, and Multilateral Organizations including MDBs. These securities are assigned zero percent (0%) risk weight under the standardized approach for credit risk and are not direct obligations of a covered bank or any of a covered bank's financial allied undertakings.

Assets assigned a ten percent (10%) RSF factor

35. Loans to banks, financial corporates and other central banks with residual maturities of less than six (6) months and where the loans are secured by Level 1 assets as defined in the LCR rules.

Assets assigned a fifteen percent (15%) RSF factor

36. Eligible securities representing claims on or guaranteed by the LGUs, GOCCs, sovereigns, other central banks, and PSEs of Foreign Countries, and Multilateral Organizations including MDBs. These securities are assigned a twenty percent (20%) risk weight under the standardized approach for credit risk and are not direct obligations of a covered bank or any of a covered bank's financial allied undertakings.
37. Corporate debt securities (including commercial papers) assigned with a credit rating equal or equivalent to at least AA- by a third-party credit assessment agency recognized by the Bangko Sentral, and not issued by a covered bank or any of a covered bank's financial allied undertakings.
38. Loans to banks, financial corporates, and other central banks with residual maturities of less than six (6) months.
39. Non-operational deposits held at other banks with residual maturities of less than six (6) months

Assets assigned a fifty percent (50%) RSF factor

40. Eligible securities representing claims on or guaranteed by the LGUs, GOCCs, sovereigns, other central banks and PSEs of Foreign Countries, and Multilateral Organizations including MDBs. These securities are assigned a fifty percent (50%) risk weight under the standardized approach for credit risk and are not direct obligations of a covered bank or any of a covered bank's financial allied undertakings.
41. Corporate debt securities (including commercial papers) assigned with a credit rating of between A+ and BBB- or equivalent by a third-party credit assessment agency recognized by the Bangko Sentral, and not issued by a covered bank or any of a covered bank's financial allied undertakings.
42. Common equity shares that are included in the main index of an organized exchange and not issued by a covered bank or any of a covered bank's financial allied undertakings.
43. Other debt securities with residual maturities of less than one (1) year.
44. Loans to banks, financial corporates, the Bangko Sentral and other central banks, with residual maturities of between six (6) months to less than one (1) year.
45. Non-operational deposits held at other banks with residual maturities of between six (6) month to less than one (1) year.
46. Operational deposits held at other banks.
47. Loans to the NG, LGUs, GOCCs, sovereigns, PSEs of Foreign Countries, and Multilateral Organizations including MDBs with residual maturities of less than one (1) year.
48. Loans to non-financial corporates and micro, small and medium enterprises (MSME) with residual maturities of less than one (1) year.
49. Consumer loans with residual maturities of less than one (1) year.
50. For foreign bank branches, any balance of "Net due from head office/branches/agencies abroad" excluding accumulated "unremitted profits" and "losses in operation".

Assets assigned a 65.0 percent (65%) RSF factor

51. Loans to the NG, LGUs, GOCCs, sovereigns, PSEs of Foreign Countries, and Multilateral Organizations including MDBs with residual maturities of one (1) year or more and would apply for a fifty percent (50%) or lower risk weight under the standardized approach for credit risk.
52. Loans to non-financial corporates with residual maturities of one (1) year or more and would qualify for a fifty percent (50%) or lower risk weight under the standardized approach for a credit risk.

53. Residential real estate loan with residual maturities of one (1) year or more and would qualify for a risk weight of fifty percent (50%) under the standardized approach for credit risk.

Assets assigned an eighty five percent (85%) RSF factor

54. Loans to the NG, LGUs, GOCCs, sovereigns, PSEs of Foreign Countries and Multilateral Organizations including MDBs with residual maturities of one year or more and would not qualify for a fifty percent (50%) risk weight under the standardized approach for credit risk.
55. Loans to non-financial corporates and MSMEs with residual maturities of one year or more and would not qualify for a fifty percent (50%) risk weight under the standardized approach for credit risk.
56. Residential real estate loans with residual maturities of one (1) year or more, which do not qualify for a risk weight of fifty percent (50%) under the standardized approach for credit risk.
57. Other consumer loans with residual maturities of one (1) year or more.
58. Other traded equity securities and debt securities with residual maturities of one (1) year or more and not issued by a covered bank or any of a covered bank's financial allied undertakings.

Assets assigned a 100% RSF factor

59. Loans to banks, financial corporates, the Bangko Sentral and other central banks, with residual maturities of one (1) year or more.
60. Non-operational deposits held at other banks with residual maturities of one (1) year or more.
61. Non-traded equity shares which are not issued by a covered bank or any of a covered bank's financial allied undertakings.
62. Non-performing loans and securities.
63. Items deducted from regulatory capital; and
64. All other assets.

C. Off-Balance Sheet Exposures

65. For OBS exposures, the covered bank shall apply the RSF factor shown below:

RSF Factor	Off-balance Sheet Items
5%	Guarantees and financial standby letters of credit Irrevocable and conditionally revocable credit and liquidity facilities
1%	Other transaction and trade-related contingent items Unconditionally revocable credit and liquidity facilities
0%	Non contractual obligations

D. Derivatives

66. The amount of the NSFR derivative assets is calculated based on the replacement cost for derivative contracts (obtained by marking to market) where the contract has a positive value. On the other hand, where the contract has a negative value, this shall be reflected as NSFR derivative liabilities. For contracts that inherently require net settlement (e.g., non-deliverable forward exchange contract), the expected derivatives exposure shall be reported on a net basis.
67. NSFR derivative assets are assigned a 100% RSF factor while NSFR derivative liabilities would not be considered a source of stable funding and would be assigned a zero percent (0%) available stable funding factor. When the NSFR derivative assets are greater than the NSFR derivative liabilities, a 100% RSF factor shall be assigned to five percent (5%) of the NSFR derivative liabilities.

(Circular Nos. 1065 dated 3 December 2019 and 1007 dated 6 June 2018)

<NAME OF BANK>

Pursuant to Section 145 (*Net Stable Funding Ratio*) of the Manual of Regulations for Banks, we hereby certify that the Bank has fully complied with the minimum NSFR requirement on all calendar days of the month/quarter ended 20_____.

IMPLEMENTING GUIDELINES OF THE CURRENCY RATE RISK PROTECTION PROGRAM (CRPP) FACILITY
(Appendix to Section 629)

A. Mechanics on the availment of the CRPP facility

1. Qualified applicants shall file with a UB/KB (the "Bank"): (a) Application for the Bangko Sentral Currency Rate Risk Protection Program (The "CRPP Facility") certifying under oath that the underlying foreign currency obligation qualifies under the CRPP Facility and that such obligation is unhedged; and (b) supporting documents in Item "B" hereof.
2. The Bank, after reviewing the application and finding the same in order, shall request the Domestic Market Operations Department (DMOD) under the Financial Market Operations Sub-Sector to quote the CRPP rates between 1:00-2:00 P.M. and 4:00-5:00 P.M. Each application shall be dealt with by Bangko Sentral-DMOD separately.
3. The Bank shall submit to the appropriate supervising department of the Bangko Sentral not later than 5:00 P.M. of the banking day following the date of availment of the CRPP contract:
 - a. Copy of qualified client's Application for the CRPP Facility required in Item "A.1"; and
 - b. Certification and Deed of Undertaking on the Availment of CRPP Transactions with the Bangko Sentral and Details of Availment of CRPP Transactions with Clients. Said certification and deed of undertaking shall be jointly signed under oath by the Bank's authorized signatories who shall at least be a senior vice president or officer of equivalent rank and the compliance officer.
4. The Bank shall keep the original duly accomplished application form and supporting documents, and make these available for inspection upon request by the Bangko Sentral during on-site examination and off-site verification, as may be warranted.
5. It is understood that prior to the application by the qualified client, the Bank has conducted the necessary client suitability assessment procedures and has explained to the client the information, risks and costs associated with the NDF product and the CRPP facility.

B. Documentary requirements

On or before the deal date, the qualified applicant shall submit to the Bank the duly notarized accomplished application for the Bangko Sentral CRPP Facility, together with the following documents:

1. Bangko Sentral-reported short-term (ST) trade-related loans from banks operating in the Philippines [FCDU/EFCDU and RBU], and medium/long-term trade-related FCDU/RBU loans with payments maturing within ninety (90) days as of date of application:
 - a. Promissory note certified as true copy by the Head of the lending bank's Loans Department or equivalent unit; and
 - b. Certification from the lending bank that the loan is trade-related; and indicating the following: (i) date when the loan was reported to the Bangko Sentral-International Operations Department (Bangko Sentral-IOD) under the prescribed form; (ii) total amount outstanding as of date of application; and (iii) amounts payable within ninety (90) days (with due date/s) as of date of application.
2. Bangko Sentral-reported ST trade-related borrowings of oil companies from offshore banking units (OBUs) and offshore sources:
 - a. Proof of reporting to the Bangko Sentral; and
 - b. Certification from the creditor that the loan is trade-related; and indicating the following: (i) date when the loan was reported to the Bangko Sentral-IOD under the prescribed form; (ii) total amount outstanding as of date of application; and (iii) amounts payable within ninety (90) days (with due date/s) as of date of application.
3. Bangko Sentral-registered ST trade-related borrowings of oil companies from offshore banks:
 - a. Bangko Sentral registration letter and accompanying Schedule; and
 - b. Certification from the creditor that the loan is trade-related; and indicating the following: (i) total amount outstanding as of date of application; and (ii) amounts payable within 90 days (with due date/s) as of date of application.

4. US dollar trust receipts (US\$ TRs):
 - a. Shipping document/s [e.g., Bill of lading (BL)] and commercial invoice;
 - b. US\$ TR draft;
 - c. Trust receipt agreement; and
 - d. Letter of credit, as applicable.
5. Foreign currency import bills/customers' liabilities under acceptances;
 - a. Shipping document/s (e.g., BL) and commercial invoice;
 - b. Bill of exchange [import bill or customer's acceptance]; and
 - c. Letter of credit, as applicable.
6. Bangko Sentral-reported Documents Against Acceptance (DA)/Open Account (OA) import obligations:
 - a. Certification from the reporting bank indicating the following: (i) date when the import obligation is reported to the Bangko Sentral under Schedule 10 of FX Form 1; (ii) unpaid balance as of date of application; and (iii) Bank Reference Number for DA; and
 - b. Shipping document/s (e.g., BL) and commercial invoice.

It is understood that the FX obligations to be covered by the CRRP Facility shall not exceed the amounts that are duly reported and/or registered with the Bangko Sentral.

On or before the settlement/maturity date, the qualified applicant shall likewise submit to the Bank a proof showing the amount to be paid (e.g., billing statement) or payment of the underlying FX obligation.

C. Tenors

The maximum tenor of the CRPP contracts is ninety (90) days but not to exceed the remaining tenor of the underlying FX obligation. At the expiration of the contract, the qualified applicant has the option to reavail the CRPP Facility for the remaining eligible unpaid FX obligation (interest or principal amortization). A new application and supporting documents are required for each CRPP reavailing.

D. Pricing

The DMOD will provide forward rates for tenors up to 90 days. Pricing of the non-deliverable forward (NDF) contract under the CRPP Facility will be based on this formula:

$$\text{NDF Rate} = \frac{\text{Spot Rate} \times [1 + (\text{Peso Interest Rate}^* \times \text{Tenor}/360)]}{1 + (\text{US Dollar Interest Rate}^{**} \times \text{Tenor}/360)}$$

**Peso Interest Rate will be determined by the BSP-DMOD*

***US Dollar Interest Rate will be based on the relevant LIBOR*

For the 1:00-2:00 P.M. CRPP window, the DMOD will use the A.M. Bankers Association of the Philippines (BAP) weighted average rate for spot transactions or the weighted average of the last five (5) transactions mapped at the BAP during the morning session (up to 12 noon), whichever is higher, on deal date as the Spot Rate. If both are not available, the previous banking day's BAP weighted average rate or the weighted average rate of the last five (5) transactions dealt in the afternoon session (up to 4:00 P.M.), whichever is higher, will be used as the Spot Rate.

For the 4:00-5:00 P.M. CRPP window, the DMOD will use the BAP weighted average rate for spot transactions or the weighted average of the last five (5) transactions mapped at the BAP during the afternoon session (up to 4:00 P.M.), whichever is higher, on deal date as the Spot Rate.

E. Fixing date

One (1) banking day prior to the maturity date of the CRPP contract, the Fixing Rate will be agreed upon by the Bank and the Bangko Sentral, using the A.M. BAP weighted average rate. The net difference between the NDF Rate and the Fixing Rate will be applied against the Notional US Dollar Amount to compute the Peso Net Settlement Amount. If the Fixing Rate is higher/lower than the NDF Rate, Bangko Sentral pays/receives the Peso Net Settlement Amount.

The Peso Net Settlement Amount will then be paid on the maturity date of the CRPP contract by crediting or debiting the regular demand deposit account of the Bank with the Bangko Sentral.

The applicable formula for computing the Peso Net Settlement Amount will be as follows:

Peso Net Settlement Amount = (NDF Rate – Fixing Rate) x Notional US Dollar Amount

F. Pre-termination of CRPP contract

1. Pretermination requested by client

- a. Pre-termination of a CRPP contract shall be allowed if the corresponding FX obligation will be paid in full or is in default. Pre-termination will also be allowed if a portion of the underlying FX obligation of the CRPP contract is paid. The manner of prepayment should not be done through renewal of the loan under a new promissory note or by another form of FX obligation.
- b. In requesting for the pre-termination of the CRPP contract, the client shall submit to its Bank a document evidencing the creditor's conforme to the proposed prepayment. The proof of payment shall be submitted on prepayment date.
- c. The DMOD shall quote the NDF Reversal Rate upon request of the Banks on behalf of its clients, between 1:00-2:00 P.M. one (1) banking day before the pre-termination date.

The NDF Reversal Rate shall be computed following the NDF Rate formula based on the Remaining Tenor of the CRPP contract and the New Spot Rate.

The DMOD will use the A.M. BAP weighted average rate for spot transactions or the weighted average of the last five (5) transactions dealt during the morning session, whichever is lower, on the date of request, adjusted for the prevailing bid-offer spread, as the New Spot Rate. If both are not available, the New Spot Rate shall be the previous banking day's BAP weighted average rate or the average of the last five (5) transactions dealt in the afternoon session, whichever is lower.

- d. On the pre-termination date, if the NDF Reversal Rate is higher/lower than the original NDF Rate, the Bangko Sentral pays/receives the Pre-termination Peso Net Settlement Amount, as calculated using the formula below. The Pre-termination Peso Net Settlement Amount shall be paid by crediting or debiting the regular demand deposit account of the Bank with the Bangko Sentral.

Pre-termination Peso Net Settlement Amount =

$$\frac{(\text{NDF Rate} - \text{NDF Reversal Rate}) \times \text{Notional US Dollar Amount}}{1 + (\text{Peso Interest Rate} \times \text{Remaining Tenor} / 360)}$$

**Peso interest Rate will be determined by BSP-DMOD*

2. Pre-termination by the Bangko Sentral

For CRPP contracts pre-terminated by Bangko Sentral, settlement on the pre-termination date of the Pre-termination Peso Net Settlement Amount will be as follows:

- a. If the NDF Reversal Rate is lower than the original NDF Rate, the Bank will pay the Pre-termination Peso Net Settlement Amount; and
- b. If the NDF Reversal Rate is higher than the original NDF Rate, the Bangko Sentral shall not pay the Pre-termination Peso Net Settlement Amount.

3. Pre-terminated CRPP contracts

Underlying FX obligations of pre-determined CRPP contracts shall no longer be eligible for the CRPP Facility.

4. Reporting requirements on the pre-termination

The Bank shall submit the Certification on the Pre-termination of CRPP Transaction with the Bangko Sentral and Details of Pre-terminated CRPP Contracts with Clients to the appropriate supervising department of the Bangko Sentral not later than 5:00 P.M. of the banking day following the date of pre-termination of the CRPP contract. Said certification shall be jointly signed under oath by the Bank's authorized signatories who shall at least be a senior vice president or officer of equivalent rank and the compliance officer.

The Bank shall also keep the relevant documentary requirements supporting the pre-termination of CRPP contracts and make these available for inspection upon request by the Bangko Sentral during on-site examination and off-site verification, as warranted.

(Circular Nos. 1065 dated 3 December 2019 and 1015 dated 5 October 2018)

**IMPLEMENTING GUIDELINES ON THE RESTRUCTURING SCHEME COVERING THE REDISCOUNTING OBLIGATIONS
WITH THE BANGKO SENTRAL OF REDISCOUNTING BANKS IN THE AREAS AFFECTED BY CALAMITIES
(Appendix to Sec. 1151)**

1. Objectives

The objectives of the loan settlement scheme are as follows:

- 1.1 To support the recovery efforts of rediscounting banks in the areas affected by calamities;
- 1.2 To enable the rediscounting banks to liquidate their loan obligations with the Bangko Sentral by way of restructuring; and
- 1.3 To ensure the collection of the rediscounted loans which may become past due in view of the damages caused by the calamity, and maintain if not improve the quality of the loan portfolio of the Bangko Sentral.

2. Qualified Banks

- 2.1 All rediscounting banks with end-user borrowers located in affected areas which have been declared as under state of calamity by the proper authorities, i.e., the President of the Philippines or the local sanggunian, upon the recommendation of the National Disaster Risk Reduction and Management Council or Regional/Local Disaster Risk Reduction and Management Council.
- 2.2 Rediscounting banks with serious violations or findings with the appropriate supervising department of the Bangko Sentral and/or which are currently under investigation or subject to legal action by the Office of Special Investigation shall not be qualified to avail of the restructuring scheme.
- 2.3 In addition to Item No. "2.2", the Department of Loans and Credit (DLC) shall evaluate each bank to determine if each would qualify for the restructuring.

3. Terms and Conditions

3.1 Maturity

The restructured loan shall have a maximum term of five (5) years.

3.2 Amount to be restructured

The amount to be restructured shall be equivalent to the following:

- *Principal.* Unpaid outstanding balance of the principal obligation in the books of accounts of the Bangko Sentral.
- *Accrued Interest.* Unpaid interest due on the outstanding principal obligation as of the end of the applicable repayment or amortization date, preceding the approval of the loan restructuring.

3.3 Interest Rate

The interest rate to be charged against the outstanding principal balance of the restructured loan shall be based on prevailing rediscount rate at the date of approval of the restructured loan. The interest shall be re-priced annually.

3.4 Maximum Bank Lending Rate

The restructured interest rate of the bank to its end-user borrowers shall not exceed six percent (6%) over and above the applicable interest rate of the Bangko Sentral. Moreover, the bank shall not charge interest on accrued interest.

3.5 Terms of Repayment

- 3.5.1 Settlement Value.** The settlement value shall be paid by the bank in equal monthly amortizations: *Provided, That, the amortization period shall not exceed five (5) years, to wit:*

- *Principal.* The principal obligation shall be paid in equal monthly amortizations plus the applicable rediscount rate.

- *Accrued Interest.* The accrued interest on the principal obligation as of the end of month immediately preceding the approval of the loan settlement scheme shall likewise be paid in equal monthly amortizations. No interest shall be charged on the accrued interest.

3.5.2 Grace Period. The bank may be given a grace period of six (6) months within which to pay the first amortization if request for such is specified by the bank in the application for restructuring.

3.6 Collaterals

The following shall be the collaterals acceptable:

- Deed of Assignment on restructured promissory notes of end-user borrowers;
- Deed of Real Estate Mortgage on bank premises;
- Deed of Pledge on government securities; and
- Other collaterals acceptable to the Bangko Sentral.

3.7 Required Documents

Qualified banks shall submit the following documents:

- Letter of Understanding (LOU), agreeing to the terms and conditions of the restructuring. The LOU shall be executed by the senior officers of the bank, duly designated by its Board of Directors.
- Surety Agreement executed by the controlling interest (single stockholder, natural or juridical owning more than fifty percent (50%) of the voting stocks) obligating himself/herself jointly and severally with the bank to pay monthly amortizations, if there is collateral deficiency.

3.8 Default Cause

- Failure to pay two or more amortizations shall be considered an event of default and shall render the unpaid balance of the loan, plus accrued interest and penalty charges due thereon, immediately due and demandable.
- A penalty charge of twelve percent (12%) per annum shall be assessed on the defaulted amortization payment, reckoned from the amortization due date to date of payment.

The DLC may exercise the option to refer to the Office of Special Investigation or to an external lawyer for appropriate legal action, without further need for demand or notice to the defaulting bank.

4. Application Procedures

4.1 Filing of Application

The bank shall file with the DLC an application for restructuring of its outstanding rediscounting loans, supported by the following documents:

- Resolution of the Board of Directors a) authorizing the bank to enter into a loan settlement arrangement with the Bangko Sentral, and b) designating authorized senior officers thereof.
- The restructured Promissory Notes of the end-user borrowers and other supporting documents.
- Promissory Note with Trust Receipt Agreement and Deed of Assignment executed by the authorized senior officers of the bank, duly notarized.
- Collaterals under Item No. "3.6" of the Implementing Guidelines.

4.2 Notice of Approval Application

The DLC shall notify the bank of the approval of its application to avail of the loan restructuring scheme. Upon receipt of said notice, the bank shall:

- Execute the applicable document under Item No. "4.1" of the Implementing Guidelines.
- Pay the required amortization immediately on the month following the date of approval of the loan restructuring scheme, or after the grace period, as applicable, and monthly thereafter until fully paid.

5. Authorized Signatories of the Bangko Sentral

Transaction	Authorized Bangko Sentral Officer
Approval of the application to avail of the loan restructuring scheme	Director, DLC, or in her absence, any of the DLC Deputy Directors
Approval to release the collateral documents	Director, DLC, in her absence, any of the DLC Deputy Directors
Execution of Cancellation of Deeds of Real Estate Mortgage, Assignment or Pledge	Deputy Governor, Monetary and Economics Sector

6. Other Provisions

6.1 Value Date of the Restructuring Scheme

The value-date of the restructuring shall be the end of the month immediately preceding the date of approval of the loan restructuring.

6.2 Effectivity Date

The loan restructuring scheme shall be made available for a period of six (6) months reckoned from date of receipt of the appropriate supervising department of the Bangko Sentral of the letter-notification from the bank stating the latter's intention to avail of the relief package.

(Circular Nos. 1065 dated 3 December 2019 and 1017 dated 10 October 2018)

**GUIDELINES FOR THE ADMINISTRATION OF THE UNIT INVESTMENT TRUST FUND (UITF)
CERTIFICATION PROGRAM
(Appendix to Sec. 414 on Minimum disclosure requirement)**

In line with the thrust of the Bangko Sentral to promote the development of the capital markets and to ensure investor protection, UITF Marketing Personnel are required to be certified through a UITF Certification Program (UCP) administered by a reputable financial services industry association/organization (FSIAO) acceptable to the Bangko Sentral.

The UCP is aimed at strengthening the qualification of UITF Marketing Personnel in order to ensure that they can provide sufficient information on UITFs to clients and promote delivery of safe and effective products and services, among others. The requirement is expected to advance the quality of UITF Marketing Personnel and their sales and marketing practices.

In order to ensure that the administration of UCP meets the expectations of the Bangko Sentral, the following guidelines shall be observed:

Section 1: Pre-requisites for the administration of the UCP

1. In order to be recognized by the Bangko Sentral as an administrator of the UCP, the FSIAO should meet the following qualification standard:
 - a. It is formally organized as a FSIAO related to trust, investment funds, collective investment schemes and other related areas;
 - b. It has adequate financial and organizational resources, and the system, to execute the UCP;
 - c. It shall adopt a three-pronged process for the UCP which shall be composed of a qualifying examination, a requirement for continuing education, and the registration and registry to monitor and manage the certified UITF Marketing Personnel;
 - d. It shall adopt an acceptable and relevant curriculum that is aimed at advancing the quality of the UITF marketing personnel; and
 - e. It shall ensure that the UCP guidelines contain, at the minimum, provisions on the governance mechanism, operational requirements, complaints handling, and provisions on Data Privacy and/or confidentiality of information, among others.
2. The FSIAO, through its authorized representative, shall submit to the appropriate supervising department of the Bangko Sentral the following:
 - a. Letter of its intent to administer the UCP;
 - b. By-laws of the association/organization;
 - c. Notarized Secretary's Certificate on Board of Directors/Trustees' resolution approving the application;
 - d. Board-approved UCP guidelines; and
 - e. Certification that it meets the requirements enumerated in these Guidelines.
3. Only the FSIAO that meets the criteria and requirements enumerated in these Guidelines shall be recommended for approval.
4. Upon the recommendation of the appropriate supervising department of the Bangko Sentral, the appropriate approving authority shall act on the FSIA's application. If approved, the authority to administer the UCP shall remain valid until revoked.

Section 2: Administration of the UCP

1. The FSIAO shall be responsible for ensuring that the administration of UCP is properly conducted and in accordance with the Board-approved UCP guidelines.
2. The FSIAO shall maintain the integrity and confidentiality of the UCP.
3. The FSIAO shall report to the Bangko Sentral any significant development and/or concern in the administration of the UCP.
4. In case of significant changes in the UCP guidelines, the FSIAO shall submit to the appropriate supervising department of the Bangko Sentral the revised Board-approved UCP guidelines for clearance.
5. The FSIAO shall ensure that the UCP guidelines are adequately disseminated to the FSIAO's members/member-institutions for information.

6. The FSIAO shall ensure that the UCP guidelines provide adequate transitory arrangements for existing Certified UITF Marketing Personnel, if necessary.
7. The FSIAO shall make the UCP guidelines, including the examination questions, available for review by the Bangko Sentral.
8. The FSIAO shall maintain records of the certified UITF Marketing Personnel which shall be made available to the Bangko Sentral upon request.
9. The FSIAO shall post the list of certified UITF marketing personnel in its website.
10. The appropriate supervising department of the Bangko Sentral shall undertake the monitoring and periodic review of the administration of the FSIAO of the UCP to ensure that the UCP remains relevant and at par with the requirements of the Bangko Sentral.

Section 3. Withdrawal or Suspension of Administration of UCP

1. The Bangko Sentral reserves the right to withdraw or suspend the administration of the UCP of the FSIAO not complying with the provisions enumerated in these Guidelines, after compliance with due process requirements.
2. The FSIAO may likewise voluntarily withdraw the administration of the UCP, subject to the approval of the Bangko Sentral.
3. The FSIAO that intends to withdraw as administrator of the UCP shall ensure proper transition of operational arrangements to minimize or eliminate potential disruption of the UCP administration.
4. The withdrawal or suspension of the FSIAO as administrator of the UCP shall be approved by the appropriate approving authority upon the recommendation of the appropriate supervising department of the Bangko Sentral.

(Circular Nos. 1065 dated 3 December 2019 and 1018 dated 26 October 2018)

**RULES OF PROCEDURES ON ADMINISTRATIVE CASES
INVOLVING DIRECTORS AND OFFICERS OF BSFIs
(Appendix to Sec. 137 on Rules of procedures on administrative cases
involving directors and officers of BSFI)**

RULE I – GENERAL PROVISIONS

Section 1. **Title.** – These Rules shall be known as the ***Bangko Sentral ng Pilipinas (BSP) Revised Rules of Procedure on Administrative Cases Involving Directors and Officers of Bangko Sentral - Supervised Financial Institutions.***

Section 2. **Applicability.** – These Rules shall apply to administrative cases filed with the Office of Special Investigation (OSI), Bangko Sentral, involving directors and officers of BSFI in relation to Section 37 of Republic Act No. 7653 (The New Central Bank Act) and Section 16 of Republic Act No. 8791 (The General Banking Law of 2000).

These Rules shall also apply to administrative cases arising out of the fact-finding investigation conducted by OSI.

Complaints against BSFI, as a juridical entity shall not be covered by these Rules.

Supervisory and enforcement actions shall also not be covered by these Rules.

Section 3. **Nature of Proceedings.** – The proceedings under these Rules shall be summary in nature and shall be conducted without necessarily adhering to the technical rules of procedure and evidence applicable to judicial trials.

In the absence of applicable provision in these Rules, and pursuant to the summary nature of these proceedings, the pertinent provisions of the Rules of Court may be applied suppletorily.

Section 4. **Appearance of Counsel.** – The parties, if they so desire, may be assisted or represented by counsel.

Section 5. **Confidentiality of Proceedings.** – Proceedings under these Rules shall be confidential and shall not be disclosed to third parties, except to the extent as may be provided under existing laws. All communications relating to these proceedings shall be made in writing, copy furnished the other party.

RULE II- DEFINITION OF TERMS

Section 6. **Adoption.** – The terms as defined in the Manual of Regulations are hereby adopted in these Rules.

RULE III - PLEADINGS AND NOTICES

Section 7. **Complaint.** – The complaint shall be in writing, and subscribed and sworn to by the complainant. No anonymous complaint shall be entertained.

Section 8. **Where to file.** – The complaint shall be filed with OSI, in as many copies as there are respondents, including two (2) copies for OSI.

Section 9. **Contents of the Complaint.** – The complaint shall contain the ultimate facts of the case, and shall include the following:

- a. The full name and address of the complainant;
- b. The full name and address of the respondent;
- c. The position of the respondent, in the BSFI;
- d. A specification of the charges against the respondent;
- e. A statement of the material facts;
- f. A statement as to whether or not a similar complaint has been filed with the Bangko Sentral, the Supreme Court, the Court of Appeals, any other tribunal or agency;
- g. Except for complaints arising from factual investigation conducted by the OSI or the appropriate supervising sector of the Bangko Sentral a statement that the complaint was previously referred to appropriate supervising department of the Bangko Sentra for appropriate action of the Financial Institution where the bank officer or

director complained of belongs, with a copy of the response of said Financial Institution that failed to settle or resolve the complaint, or upon the lapse of thirty (30) calendar days from referral of the complaint by the appropriate supervising department of the Bangko Sentral to the Financial Institution in case of the latter's failure or refusal to respond.

The complaint shall include copies of documents and sworn statements of witnesses, if any, in support of the complaint.

Section 10. **Action on the Complaint.** – Upon a determination that the complaint is sufficient in form and substance, and complies with Rule III, Section 9 of these Rules, OSI shall issue a notice requiring the respondent to file a sworn answer to the complaint.

However, if the complaint fails to comply with the immediately preceding section, OSI shall dismiss the complaint, without prejudice, or take such appropriate action as may be warranted.

Section 11. **Answer.** – Within ten (10) days from receipt of the notice to file answer and a copy of the complaint, respondent shall submit a sworn answer, copy of which shall be furnished the complainant.

The respondent, in the sworn answer, shall specifically admit or deny all the charges specified in the complaint, including evidence in support thereof.

The failure of the respondent to file an answer within the prescribed period shall be considered as a waiver of the respondent's right to file the same, and the case shall be resolved based solely on the evidence presented by the complainant.

Section 12. **Prohibited Pleadings and Motions.** – The following pleadings or motions are prohibited:

- (i) Motion to dismiss, except on the ground of lack of jurisdiction;
- (ii) Motion for bill of particulars;
- (iii) Motion for the issuance of *subpoena duces tecum* and/or *ad testificandum*, provisional remedies, modes of discovery, and similar reliefs;
- (iv) Dilatory motions for postponement or extension of time; and
- (v) Other pleadings or motions of a similar nature.

RULE IV- MODES OF SERVICE

Section 13. **Modes of Service.** Service of pleadings, motions, orders or processes may be made by personal delivery, registered mail, courier, or other modes of service as defined under this Rule.

Personal service shall be made by delivering to the parties a copy of the pleading, motion, order or process.

Service by registered mail or courier shall be made by sending a copy of the pleading, motion, order or process in a sealed envelope, addressed to the parties' residence, office or regular place of business.

Section 14. **Other modes of service.** – For processes or pleadings other than the notice to file answer and a copy of the complaint, service may also be made by electronic mail or other electronic form that provides a record of delivery.

Section 15. **Completeness of service.** – Personal service is complete upon actual delivery. Service by registered mail shall be deemed complete upon actual receipt by the parties, or after five (5) calendar days from the date of receipt of the first notice of the postmaster, whichever date is earlier.

Service made via courier shall be deemed complete on the date of the actual delivery by the courier.

For other modes of service, the date indicated in the electronic record of delivery or the transmission report shall be the effective date of receipt.

RULE V- JURISDICTION OVER THE RESPONDENT

Section 16. **Acquisition of jurisdiction over the respondent.** – Jurisdiction over the respondent is acquired once service of the notice to file answer and a copy of the complaint is completed.

Should the respondent refuse to receive the notice to file answer and a copy of the complaint, the service may be effected by leaving the same at the respondent's residence, office or regular place of business.

Should the respondent no longer be connected with the BSFI at the time of the filing of the complaint, service may be effected by leaving the notice to file answer and a copy of the complaint at, or sending them to, the respondent's last known address.

RULE VI - PROCEEDINGS BEFORE THE HEARING OFFICER

Section 17. **Submission of Position Papers.** – The Hearing Officer shall direct the parties to simultaneously submit their verified position papers with supporting documents and affidavits, if any, on a date to be set by the Hearing Officer.

Section 18. **Submission of Comment.** – A party may file a comment on the position paper within ten (10) calendar days from receipt thereof.

Section 19. **Issuance of Clarificatory Order.** – The Hearing Officer may issue a clarificatory order to elicit facts or information necessary for the prompt and just resolution of the administrative case.

RULE VII - RESOLUTION OF THE CASE

Section 20. **Submission of Report.** – Within sixty (60) calendar days from issuance of an Order declaring that the case is submitted for resolution, the Hearing Officer shall submit a report to the Monetary Board, which shall contain a recommendation stating clearly and distinctly the findings of facts, determination of issues and conclusions of law on which it is based. The period of time to resolve the case may be extended, for good cause, only upon approval of the General Counsel.

In case the report recommends the dismissal of the Complaint, the Report shall be submitted for approval by the Governor. The dismissal of the Complaint shall not be subject to appeal to the Monetary Board.

Section 21. **Issuance and Finality of Resolution.** – After consideration of the report, the Monetary Board shall issue its resolution which shall become final and executory upon the lapse of fifteen (15) calendar days from receipt thereof by the parties, unless a motion for reconsideration has been timely filed.

Section 22. **Motion for Reconsideration.** – A motion for reconsideration, on the ground of grave errors of fact or law, may be filed by the parties within fifteen (15) calendar days from receipt of the resolution with the Monetary Board.

No second motion for reconsideration shall be allowed.

Section 23. **Enforcement.** – The resolution shall be referred to the concerned department of the Bangko Sentral, for appropriate action.

RULE VIII - APPEAL

Section 24. **Appeal.** – An appeal from the resolution of the Monetary Board may be filed before the Court of Appeals within the period and in the manner provided under Rule 43 of the Rules of Court.

Interlocutory orders of the OSI shall not be subject to appeal to the Governor or the Monetary Board.

Section 25. **Effect of Appeal.** – The appeal shall not stay the enforcement of the resolution sought to be reviewed, unless the Court of Appeals shall direct otherwise upon such terms as it may deem just.

RULE IX- MISCELLANEOUS PROVISIONS

Section 26. **Repeal.** – All existing rules, regulations, orders or circulars or any part thereof inconsistent with these Rules are hereby repealed, amended or modified accordingly.

Section 27. **Separability Clause.** – If any part of these Rules is declared unconstitutional or illegal, the other parts or provisions shall remain valid.

Section 28. **Effectivity.** – These Rules shall take effect on 1 January 2019.

Section 29. **Transitory Provision.** – All pending administrative cases filed with the Supervised Banks Complaints Evaluation Group (SBCEG), Office of the General Counsel and Legal Services, shall be resolved by the SBCEG in accordance with the provisions of Sec. and App, prior to the effectivity of these Rules. Upon the effectivity of these Rules, all pending cases with the SBCEG shall be resolved in accordance with the new Rules in so far as applicable.

(Circular Nos. 1065 dated 03 December 2019 and 1012 dated 12 September 2018)

GUIDELINES ON LICENSING OF ELECTRONIC PAYMENT AND FINANCIAL SERVICES (EPFS)
(Appendix to Sec. 701)

A BSFI intending to provide EPFS shall comply with the following requirements in conjunction with the Guidelines on the Granting of License/Authority provided in *Appendix 124*.

1. Advanced EPFS

A BSFI that offers advanced EPFS shall undergo the licensing process and provide the documentary requirements, as follows:

Processing and Documentary Requirements	Type A ¹	Type B ²
<p>(1) Eligibility Test and Self-Assessment</p> <p>A BSFI must conduct a self-assessment vis-a-vis the defined prudential criteria described in Secs. 111-Q (<i>Prudential criteria</i>).</p> <p>Should the BSFI meet the prudential criteria, it shall submit a letter of intent with a certification signed by its president or officer of equivalent rank, and chief compliance officer (CCO) stating that the BSFI satisfies said requirements.</p> <p>If the Bangko Sentral concurs with the certification, the BSFI shall receive a confirmation of eligibility (COE) to offer EPFS.</p>	✓	
<p>(2) Application for the license</p> <p>The BSFI shall formally submit the following application documents to the appropriate department of the Bangko Sentral within six (6) months from the date of the COE.</p>		
(a) Application letter signed by the president or officer of equivalent rank specifically indicating the justification/reason for the application to provide EPFS	✓	✓
(b) Notarized Secretary's Certificate (or equivalent document in the case of foreign bank branches) attesting that the Board of Directors (or equivalent management committee in the case of foreign bank branches) has approved the application to provide EPFS	✓	✓
<p>(c) Certification signed by the president (or officer of equivalent rank) and the CCO to the effect that the BSFI has met the following minimum pre-conditions:</p> <p>(i) An adequate risk management process is in place to identify, assess, monitor, and control the risks arising from the proposed EPFS;</p> <p>(ii) Appropriate policies and procedures in the following areas have been adopted to address all security risks and concerns affecting the EPFS platform and application system/s:</p> <ul style="list-style-type: none"> • <i>Authentication</i> – establishes the identity of both the sender and the receiver; uses trusted third parties that verify identities in cyberspace; • <i>Non-repudiation</i> – ensures that transactions cannot be repudiated or presents undeniable proof of participation by both the sender and the receiver in a transaction; 	✓	✓

¹ This applies to BSFIs that can be assessed against the prudential criteria provided in the Policy and Regulations on Licensing. These applicants must have been examined by the Bangko Sentral.

² This applies to proponents that cannot be assessed against the prudential criteria provided in the Policy and Regulations on Licensing. These include new-established BSFIs and new applicants for an authority to operate as "Electronic Money Issuer-Others".

<ul style="list-style-type: none"> • <i>Authorization</i> – establishes and enforces the access rights of entities (both persons and/or devices) to specifies computing resources and application functions; also locks out unauthorized entities from physical and logical access to the secured systems; • <i>Integrity</i> – assures that data has not been altered; • <i>Confidentiality</i> – assures that no one except the sender and the receiver of the data can gain access to clear data; and • <i>Availability</i> – assures that the system is operating properly during the time it is expected to be available; <p>(iii) The EPFS system has been tested prior to its implementation and that the test results are satisfactory. As a minimum standard, appropriate system testing and user acceptance testing should have been conducted; and</p> <p>(iv) A documented business continuity planning process covering EPFS, among other areas of operation, has been adopted.</p>		
(d) Details of the features and functionalities of the proposed EPFS, including the security controls and measures	✓	✓
(e) Process flow/brief narration of how transaction and data flow through the network	✓	✓
(f) Diagram of the configuration of the system supporting the proposed EPFS, showing the linkage between the host systems and network infrastructure	✓	✓
(g) Pro-forma client application form and terms and conditions for the availment of and/or use of the EPFS	✓	✓
<p>(h) Brief discussion on the following topics in relation to the particular EPFS being applied for:</p> <ul style="list-style-type: none"> • Oversight management process; • Business continuity plan/disaster recovery plan; • Incident response/problem management; • Consumer protection/awareness program; and • Information security policies and security features of the proposed EPFS 	✓	✓
(i) Results of the user acceptance testing (UAT)	✓	✓
(j) Report on the independent assessment of the proposed EPFS, if applicable.	✓	✓
(k) Articles of Incorporation/By-Laws of the BSFI		✓
(l) Photocopy of the marketing materials for the proposed EPFS		✓
(m) Pro-forma agreements with accredited agents for the delivery/issuance of EPFS;		✓
(n) Anti-money Laundering (AML) Policy/Manual of Procedures; and		✓
(o) Latest Audited/Interim Financial Statements		✓

2. Basic EPFS

The BSFI shall notify the appropriate department of the Financial Supervision Sector (FSS) by submitting the following documents thirty (30) days prior to the launch/implementation of its EPFS:

- (1) Notification letter signed by the institution's president or officer of equivalent rank;
- (2) Details of the features and functionalities of the EPFS, including security controls and measures adopted relative to the offering of the EPFS; and
- (3) Process flow/brief narration of how transaction and data flow through the network including the clearing switch in case the service involves participation in an Automated Clearing House (ACH).

3. Fees

A BSFI applying for an advanced EPFS shall pay processing and licensing fees as shown below:

Type of Fee	Classification				
	Banks			Non-banks	
	UBs/KBs	TBs	RBs and Coop. Bank	EMI-Others	Other Financial Inst.
Processing	50,000	20,000	10,000	20,000	10,000
Licensing	100,000	60,000	25,000	60,000	25,000

The assessment and collection of fees shall be made in accordance with the guidelines on fees provided in *Appendix 124*.

(Circular No. 1033 dated 22 February 2019)

<Name of BSFI>

**CERTIFICATION ON
COMPLIANCE WITH THE CONDITIONS FOR
PARTICIPATION IN AN AUTOMATED CLEARING HOUSE**

We, <Name of Officer>, President (or Officer of Equivalent Rank) and <Name of Officer>, Compliance Officer, on behalf of the <Name of BSFI>, with head/principal office address at <complete address of Head/Principal Office>, after having been duly sworn to in accordance with law, hereby certify to the best of our knowledge, that <Name of BSFI>:

- a. Has satisfactorily met the prudential criteria provided under Sec. 111 (*Prudential criteria*);
- b. Obtained a satisfactory assessment in the areas of Information Technology (IT), Anti-Money Laundering (AML), and Consumer Protection, as applicable, in the last examination conducted by the Bangko Sentral; and
- c. Is capable of complying with the specific rules applicable to transactions performed under the National Retail Payment System Framework as provided in Sec. 803 (*Specific rules applicable to transactions performed under the NPRS Framework*).

We certify further that <name of BSFI>, as a BSFI licensed to offer electronic payment and financial services (EPFS), has complied with the provisions under Sec. 701 (*Documentary requirements*).

We also certify that all relevant documents in support of the foregoing statements are kept on file and are readily available for verification by examiners of the Bangko Sentral during onsite verification/examination or when a written request is made to verify compliance.

This certification executed on <date of execution> is being submitted in compliance with the requirements of the Bangko Sentral.

**CERTIFICATION ON
THE RE-REGISTRATION OF
ELECTRONIC PAYMENT & FINANCIAL SERVICES**

We, <Name of Officer>, President (or Officer of Equivalent Rank) and <Name of Officer>, Compliance Officer, on behalf of the <Name of BSFI>, with head/principal office address at <complete address of Head/Principal Office>, after having been duly sworn to in accordance with law, hereby certify that to the best of our knowledge, all the information contained in the attached documents supporting the institution's re-registration for electronic payment and financial services (EPFS) are hereby true and correct.

We certify further that <name of BSFI> complies with the provisions under Sec. 701 (*Documentary requirements*) except for: <enumerate provisions that have not yet been complied with>. Aforementioned provision/s shall be complied by <target date for compliance>.

We also certify that all relevant documents in support of the EPFS activities and operations are kept on file and are readily available for verification by examiners of the Bangko Sentral during onsite verification/examination or when a written request is made to determine compliance.

This certification executed on <date of execution> is being submitted in compliance with the requirements provided in the BSP Circular No. _____.

(Circular No. 1033 dated 22 February 2019)

PRUDENTIAL REGULATIONS FOR ISLAMIC BANKS AND ISLAMIC BANKING UNITS (Appendix to Sec. 102)

Following are the minimum prudential rules and regulations governing the establishment and organization of an IB and an IBU:

Sec. 1 Licensing of an IB. Applicants which intend to engage in Islamic banking business (IBB) shall comply with the prudential and documentary requirements provided under Secs. 102 and 103 as well as *Appendices 2 and 33*, as may be applicable, including the supplemental requirements contained herein.

The establishment of an IB shall also be subject to the payment of appropriate application and license fees for universal banks UBs as prescribed under Sec. 102 and *Appendix 2*, as applicable.

Supplemental Requirement for an IB. The applicant shall submit a deed of undertaking to establish a Shari'ah Governance Framework (SGF) as prescribed by the *Bangko Sentral* appropriate to the risk profile of the IB.

The authority to establish an IB shall be automatically revoked if the IB is not organized and opened for business within one (1) year after receipt by the organizers of the notice of approval by the Monetary Board of their application in accordance with *Appendix 33*.

Sec. 2 Licensing of an IBU. Applicants which intend to engage in IBU are required to comply with the following minimum requirements:

- a. The applicant must be compliant with the prudential criteria prescribed under Sec. 111; and

The applicant shall submit a certification stating that:

- (i) It has a system for segregating the Islamic banking transactions of the IBU from its conventional banking business; and
 - (ii) It commits to establish an appropriate SGF as prescribed by the *Bangko Sentral*.
- b. The applicant shall submit a corporate plan which describes the organizational and business model to be used in delivering Islamic banking products and services to its clients.

The establishment of an IBU shall also be subject to the payment of appropriate processing fees applicable to UBs as prescribed under Sec. 105.

The authority to establish an IBU shall be automatically revoked if the IBU is not commenced for business within one (1) year after receipt by the bank of the notice of approval by the Monetary Board of their application.

Sec. 3 Commencement of Operations. The IB or IBU are expected to ensure that the following are in place on the first day of operations:

- a. Appropriate Shari'ah Governance Framework. An IB or IBU shall constitute a Shari'ah Advisory Council as prescribed by the *Bangko Sentral*;
- b. Adequate risk management systems and internal controls; and
- c. Necessary policies and procedures, information system and documentation that support the offering of Islamic banking products and services. The products and services should be duly certified as Shari'ah compliant by the IB/IBU's Shari'ah Advisory Council.

Sec. 4 Definitions of Terms. The following terms shall apply in relation to Islamic banking:

Shari'ah refers to the practical divine law deduced from its legitimate sources: the Qur'an, Sunnah, consensus of Muslim scholars, analogical deduction and other approved sources of Islamic law. Shari'ah defines a set of rules and principles governing the overall Islamic financial system.

Current account refers to the total deposits at an IB which are repayable on demand and compliant with Shari'ah principles.

Investment account refers to the total funds placed by an investor with an IB or IBU for a fixed period of time under an agreement to share the profits and losses on the investment of such funds in accordance with the principles of Shari'ah.

Islamic banking system refers to the Al-Amanah Islamic Investment Bank of the Philippines, Islamic banks, either domestic or foreign, and designated Islamic banking units of conventional banks that are authorized to conduct business in accordance with the principles of Shari'ah.

IBs refers to the Al-Amanah Islamic Investment Bank of the Philippines and Islamic banks, either domestic or foreign.

IBU refers to a division, department, office or branch of a conventional bank that conducts business in accordance with the principles of the Shari'ah.

Islamic banking business (IBB) refers to a banking business with objectives and operations that do not involve interest (*riba*) as prohibited by the Shari'ah and which conducts its business transactions in accordance with Shari'ah principles.

Participation refers to any agreement or arrangement under which the mode of joint investments or specific transactions shall not involve the element of interest charge other than as percentage share in profits and losses of business and which is conducted in accordance with the principles of the Shari'ah.

Riba generally refers to the receipt and payment of interest, including in the various types of lending and borrowing and in the exchange of currencies on forward basis.

(Circular No. 1069 dated 27 December 2019)

GUIDELINES ON CORRESPONDENT BANKING RELATIONSHIPS

(Appendix to Sec. 923)

I. Introduction

These guidelines articulate the specific regulatory expectations with respect to different types of correspondent banking relationships to enable banks to have improved understanding and management of money laundering (ML) and terrorism financing (TF) risks associated with correspondent banking relationships. The inherent nature and structure of transactions and relationships in correspondent banking renders it vulnerable to money laundering/terrorist financing activities. Correspondent banks execute financial transactions on behalf of customers of another bank (the respondent bank). As a result of this indirect relationship, the correspondent bank provides services for individuals or entities whose identities it has not actually verified. Meanwhile, the cross-border nature and amount of transactions involved in correspondent banking pose material threat to financial institutions. The layers involved in transactions processed through correspondent banking relationships pose a challenge in monitoring transactions and in identifying suspicious transactions. These should be considered in implementing a robust risk management system for correspondent banking relationships.

II. Applicability and Scope

These guidelines shall apply to covered persons engaged in correspondent banking as defined herein.

Banks shall perform the applicable customer due diligence on accounts and relationships opened upon the effectivity of these guidelines. For existing relationships, the requirements shall be applied upon updating as part of ongoing monitoring.

By virtue of the arrangements in correspondent banking services wherein the respondent bank is the customer of the correspondent bank, the rules on outsourcing under Sec. 112 shall not apply to correspondent banking relationships.

III. Definition of Terms

- a. *Correspondent banking* refers to the provision of banking services by one bank (the correspondent bank) to another bank (the respondent bank)¹ whose relationship can be domestic or foreign, as provided in Part V (Forms of Correspondent Banking Services) hereof.
- b. *Correspondent bank* refers to the bank which processes and/or executes transactions for customers of the respondent bank, wherein the latter's account is used to process and/or execute the transactions of its customers. The correspondent bank generally does not have direct business relationships with the customers of the respondent bank, unless it provides payable-through-account services.¹
- c. *Respondent bank* refers to the bank that is the direct customer of the correspondent bank.¹
- d. *Relationship Management Application (RMA)* refers to the messaging capability enabling members of the Society for Worldwide Interbank Financial Telecommunication (SWIFT) network to exchange authenticated messages over the network.²
- e. *Customer RMA* refers to a relationship which is established for SWIFT message exchanges involving transactional or liability accounts.
- f. *Non-Customer RMA* refers to a relationship which is generally created when there is a request that the bank sends or receives messages to/from a third party (the non-customer) in support of a client's business and where the bank has no other relationship with that third party.
- g. *NOSTRO/VOSTRO Account* –Nostro, from the perspective of the depositor bank, refers to the account that a bank (i.e., accountholder, respondent bank) maintains with another bank (correspondent bank) to facilitate financial transactions, such as treasury or trade finance related payments and remittances. Vostro, from the perspective of the depository bank, is the account that the bank (correspondent bank) holds or manages for another bank (respondent bank).
- h. *Counterparty Financial Institution* refers to the financial institution where the bank maintains a relationship and wherein a counterparty limit is established for transactions coursed through the bank's Treasury, Trust or other relevant units.

¹ FATF Guidance on Correspondent Banking Services, October 2016

² Wolfsberg Guidance on SWIFT Relationship Management Application (RMA) Due Diligence

- i. *Nested or Downstream correspondent banking* refers to the use of a bank's correspondent relationship by a number of respondent banks through their relationships with the correspondent bank's direct respondent bank to conduct transactions and obtain access to other financial services¹.
- j. *Payable-through-account* refers to a correspondent account that is used directly by third parties to transact business on their own behalf.¹
- k. *Shell Bank* refers to a shell company incorporated as a bank or made to appear to be incorporated as a bank but has no physical presence and no affiliation with a regulated financial group. It can also be a bank that (a) does not conduct business at a fixed address in a jurisdiction in which the shell bank is authorized to engage; (b) does not employ one or more individuals on a full time basis at this fixed address; (c) does not maintain operating records at this address, and (d) is not subject to inspection by the authority that licensed it to conduct banking activities.²

IV. Nature of Correspondent Banking Relationships

Correspondent banking facilitates global payments and transactions. The transnational nature of financial transactions, driven by trade, payments, remittances, and other financial activities, necessitate correspondent banking relationships. Through correspondent banking relationships, financial institutions are able to access international financial services and provide a wide-range of banking services, including wire transfers, cash management services, check clearing, payments, trade services and trade finance, and foreign exchange services, to their customers around the world. These relationships consist of a bilateral arrangement and are generally reciprocal in nature, wherein each bank provides services to the other. It often requires the exchange of authenticated messages between financial institutions to settle transactions. In correspondent banking, the customer of the correspondent bank is the respondent bank.

Domestically, activities of geographically dispersed customers, the nature of financial institutions and their delivery channels, may also require correspondent banking services. The developments in financial market infrastructure and electronic or digital payments affect the demand for domestic correspondent banking.

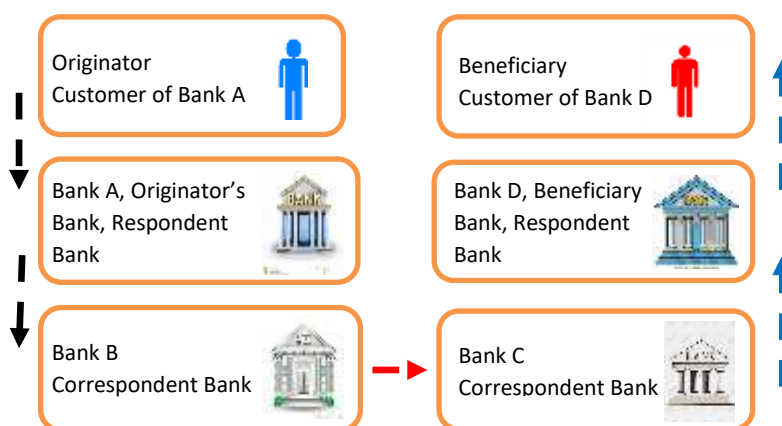

Correspondent banking is characterized by the continuing or recurring nature of the relationship. Consequently, it does not include one-off transactions or the simple exchange of SWIFT RMA in the context of non-customer relationships.¹

V. Forms of Correspondent Banking Services

Correspondent banking services can be traditional or non-traditional.

- A. *Traditional correspondent banking* is established when a correspondent bank enters into an agreement with the respondent bank to execute payments on behalf of the respondent bank and its customers. The respondent bank's customers transact indirectly as they do not have direct access to the correspondent account. This is illustrated in Figure 1.

Figure 1

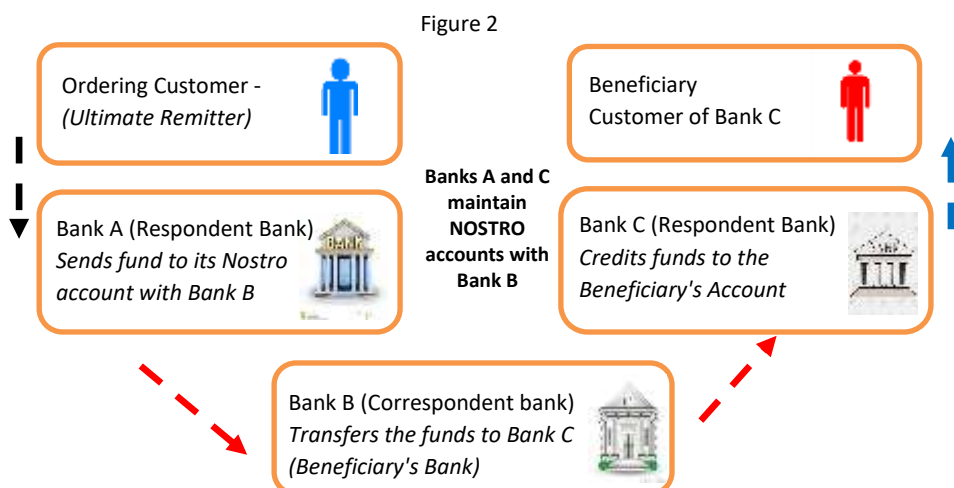

- (1) *Relationship Management Application (RMA)*. Correspondent banking usually involves the exchange of authenticated messages between parties to settle transactions. One such facility is the RMA which is used for sending and receiving SWIFT messages. RMAs can be established for both customers and non-customers.

¹ Basel Committee on Banking Supervision (BCBS) *Guidelines on Sound management of risks related to money laundering and financing of terrorism* issued June 2017

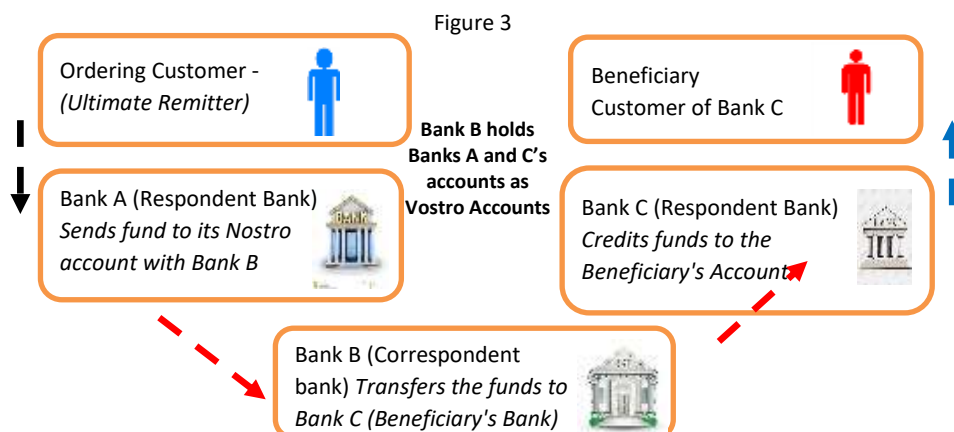

² Sec. 904.

For this purpose, the interactions for non-customer RMA are limited to non-transactional messages, such as document exchanges, receipt of balance and transaction information on a customer's account at another bank (cash management), or exchange of messages with banks that have no direct payment relationship. The settlement of any transaction is decoupled from the document exchange and always made via a customer bank².

- (2) NOSTRO account is used to facilitate financial transactions of the respondent bank in another bank (correspondent bank), on its own or on behalf of the respondent bank's customers. This is treated as an asset account in the books of the respondent bank. Transactions processed may include cross-border treasury and/or trade finance related payments and remittances. This is illustrated in Figure 2:

VOSTRO account is an account used for settlement of the transactions of a domestic/foreign counterpart (respondent bank). It is an arrangement under which one bank (correspondent bank) provides payment and other services to the local and/or foreign respondent banks. This is treated as a liability account in the perspective of the correspondent bank. This is illustrated in Figure 3:

- (3) Counterparty Financial Institution (CFI)

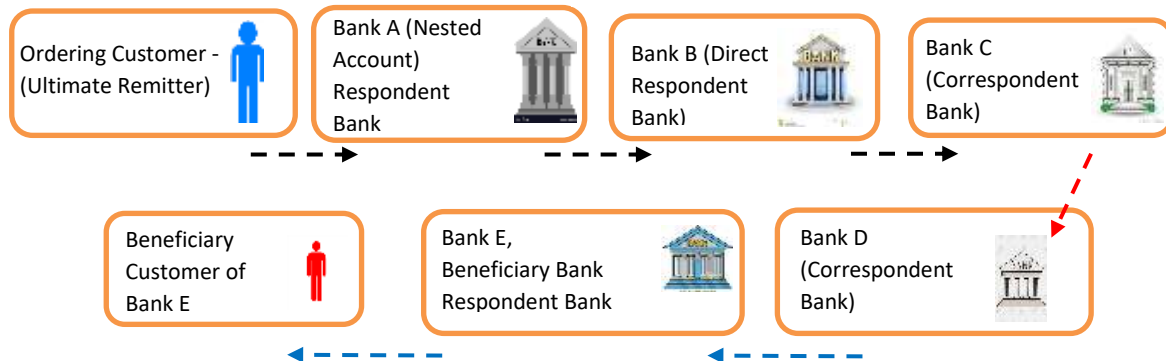

Banks may establish relationships with CFIs for the transactions of the various business units through its Treasury, Trust or other relevant units. This involves setting of counterparty limits or credit lines informed by credit risk and business needs assessment, as warranted. This is illustrated in Figure 4:

- B. *Non-traditional correspondent banking* is established when a correspondent banking relationship is extended to the respondent bank's customers to obtain access to other financial services. This type of relationship takes the following forms:

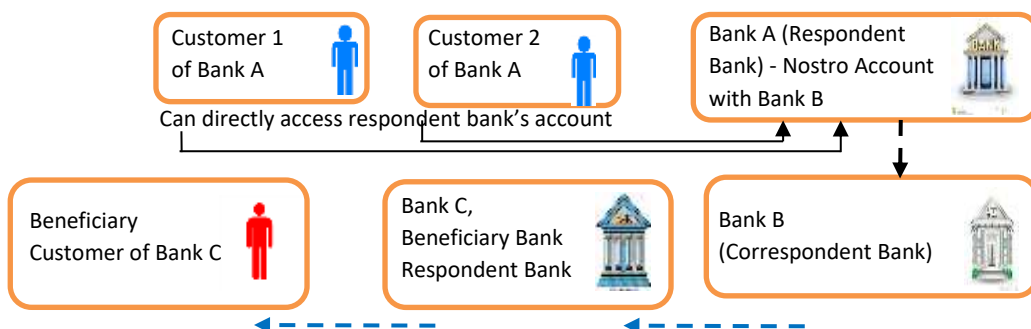

1. *Nested correspondent banking relationship* wherein the respondent banks conduct business through their relationships with the direct respondent bank to execute transactions and obtain access to other financial services. Nested or downstream correspondent banking relationships is a way for larger banks to help small local or domestic banks obtain access to the international financial system or to facilitate transactions where smaller banks do not have direct relationship with correspondent banks abroad. This is illustrated in Figure 5.

Figure 5

2. *Payable-through accounts* are similar to nested correspondent banking, but in this case, the respondent bank allows its intermediate customers to access the correspondent account directly to conduct business on their own behalf. This is illustrated in Figure 6.

Figure 6

VI. Requirements for Correspondent Banking Relationships

A. Risk Assessment of Correspondent Banking Relationship

In accordance with Part 9, banks shall identify, understand and assess the ML/TF risks in correspondent banking relationships. Given the diverse nature of correspondent banking relationships, some correspondent banking activities may pose higher degree of risk than others. The results of the risk assessment will enable banks to establish bespoke risk mitigation measures to manage the identified ML/TF risks in its correspondent banking relationships and define appropriate due diligence procedures. Where the correspondent bank has identified higher risk correspondent banking relationship, it should apply enhanced measures that are in line with the risks associated to that relationship, such as closer interaction with the respondent bank.

Correspondent banks shall assess the risk posed by their respondent banks, and consider all relevant risk factors, including, but not limited to the following:

1. Nature of the service to be provided, such as:
 - (a) Type, purpose and intended nature of the correspondent account;
 - (b) Expected correspondent account activity;
 - (c) Manner of offering the correspondent banking services to customers of respondent bank, such as existence of nested accounts or use of payable through accounts which pose higher risk.
2. Profile of the respondent bank, such as:
 - (a) Management and ultimate beneficial owners of the respondent bank, including whether it is owned or controlled by an individual with public or high-profile position;
 - (b) Business model or significant activities, products/services offered;

- (c) The customer segment or types of customers the respondent bank intends to service through the correspondent banking relationship;
 - (d) Quality of the respondent bank's AML/CFT controls, including regulatory status and history, criminal or adverse regulatory actions, based on publicly available materials; and
 - (e) Nature and duration of the respondent bank's relationship with the correspondent bank.
3. The respondent bank's operating environment, which includes:
- (a) Respondent bank's and/or its Parent Bank's jurisdiction (such as whether it operates in a sanctioned country);
 - (b) Quality of AML/CFT regime and regulatory framework of the jurisdiction that issued license to the respondent bank; and
 - (c) Jurisdiction in which its subsidiaries and branches operate, as well as the location of third parties who use the correspondent banking relationships.
- B. Due Diligence on Respondent Banks

Traditional Correspondent Banking

1. Establishment of RMAs with NOSTRO/VOSTRO Accounts

Banks shall develop risk-based policies and procedures in establishing RMAs and Nostro/Vostro accounts. In establishing customer RMAs, correspondent banks shall:

- (a) Identify and verify the identity of the respondent bank using reliable, independent source documents, data or information. This includes gathering sufficient information and performing due diligence checks about the respondent bank, including the ownership and management structure, to understand fully the nature of the respondent's business, and determine the reputation of the institution and the quality of supervision, including whether it has been subject to ML/TF investigation or regulatory action. Sources of information include the respondent bank, publicly available references, such as the FATF or FATF-style regional bodies mutual evaluation reports and statements on countries having strategic AML/CFT deficiencies, or reliable third-party databases that contain relevant information on banks;
- (b) Assess the respondent bank's AML/CFT controls. These may include: (i) evaluating the respondent bank's responses to AML/CFT Questionnaire, such as the Wolfsberg Correspondent Banking Due Diligence Questionnaire; (ii) assessing the respondent bank's AML/CFT processes and systems; (iii) reviewing internal and external audit reports; (iv) interviewing compliance officers; and (v) conducting on-site visit to have an overview of the respondent bank's ML/TF risk management framework, as warranted. The correspondent bank shall assess the ML/TF risks associated with the relationship, and document results of such assessment;
- (c) Obtain approval from senior management when establishing new correspondent relationships; and
- (d) Clearly understand and document the respective AML/CFT responsibilities of each institution.

A correspondent bank may rely on the customer identification process undertaken by other banks (third party that may already have correspondent relationship with the respondent bank), provided that the rules on third party reliance are satisfied. The ultimate responsibility for customer due diligence (CDD) still remains with the correspondent bank.

2. Establishment of CFI Relationships

In establishing CFI Relationships, a correspondent bank shall conduct risk assessment and perform the applicable customer due diligence requirements as provided in the table below.

In case of NOSTRO/VOSTRO Accounts and CFI Relationships, the correspondent bank shall ensure the authority of the officer or person representing the respondent bank or counterparty. This may include requiring a Board resolution duly certified by the Corporate Secretary authorizing the signatory to sign on behalf of the entity, or other appropriate measures applicable for electronic platforms or messaging facility.

3. Establishment of Non-customer RMAs

Banks shall segregate RMA requests between customer and non-customer relationships and adopt risk-based due diligence policies for each. Where an RMA holder has a customer relationship, CDD requirements under this rule will apply. In case of non-customer RMAs, banks may apply a lower level of due diligence, as follows:

- a. Obtain name and address;

- b. Conduct sanctions screening against relevant sanctions list;
- c. Conduct a review against red flag lists which may include, but not limited to, prior unusual transaction/message history and negative media reports;
- d. Evaluate risks of the potential RMA based on the above information to identify whether a financial institution may require further review based on internal risk tolerance; and
- e. Obtain Management approval as defined in the bank's policy.

The table below summarizes the CDD requirements for different types of accounts and relationships. The role of the bank in the CBR and type of transactions that will pass through the account, among other factors, determine the level of due diligence.

CDD Requirement	RMAs		RMAs with Accounts		Counterparty Financial Institution*
	Customer	Non-customer	NOSTRO	VOSTRO	
Customer Information	✓	✓**	✓**	✓	✓
Identification Documents ¹	✓			✓	✓
Identification of the Ultimate Beneficial Owner (UBO) (as defined under Sec. 904)	✓			✓	✓
Management Structure ²	✓			✓	✓
General Profile, information on the respondent's reputation, major business activities, customers, location, target markets and customer base	✓			✓	
Condition and quality of banking regulation and supervision (AML/CFT laws and regulation) in the respondent bank's country ³	✓			✓	
AML Questionnaire or equivalent document such as the Expanded Wolfsberg Questionnaire	✓			✓	✓
Risk Assessment with corresponding AML Risk Score/Rating	✓			✓	✓
Senior Management Approval	✓			✓	✓
Correspondent Banking Agreement or equivalent document	✓		✓	✓	✓
Sanction Screening	✓	✓	✓	✓	✓

* Banks may conduct credit due diligence in addition to the required due diligence for AML/CFT.

** Name and address of the counterparty FI

For this purpose, the customer information, except for non-customer RMA and NOSTRO account, includes those provided in Part 9. The required specimen signature of authorized signatories need not be obtained for transactions executed through electronic trading platforms with embedded security controls to authenticate transactions.

Non-traditional Correspondent Banking

1. Nested Correspondent Banking Relationships

Correspondent banks, shall develop policies and procedures in identifying and assessing risks involving nested correspondent banking relationships (i.e. downstream banking). In addition to the due diligence on respondent banks, correspondent banks should understand the respondent bank's control framework and assess risks posed by the nested relationships. It should be informed of nested relationships and the operations and transactions of customers of the nested institutions. The locations in which the nested institutions conduct business should be transparent and understood by the correspondent bank. The payment instructions should include all involved parties for monitoring and screening purposes.

The correspondent bank should have measures in place to detect any undisclosed nested relationship. Appropriate follow-up actions should be taken when a respondent bank does not disclose nested relationships.

¹ Proof of company registration, certificate of incorporation/memorandum of association, banking license or equivalent document

² List of directors and senior officers (such as President, Treasurer).

³ Information may be gathered from FATF mutual evaluation reports and statements on jurisdictions identified by the FATF as either being subject to countermeasures or having strategic AML/CFT deficiencies

2. Payable-through accounts

“Payable-through accounts” pose high risk considering that control or access to account is shared with customers. In this respect, correspondent banks shall ensure the presence of a robust risk management system and satisfy themselves that the respondent bank:

- (a) Has performed customer due diligence obligations on its customers that have direct access to the accounts of the correspondent bank; and
- (b) Is able to provide relevant customer due diligence information upon request to the correspondent bank.

The correspondent bank shall apply enhanced controls to monitor transactions/ activity that are commensurate to the identified risk, and policies to enable it to identify the ultimate user of the account. It should be satisfied that the respondent bank has necessary controls to identify and monitor the transactions of those customers with access to the account.

Prohibition on dealing with shell banks

Banks are prohibited from entering into, or continuing, correspondent banking relationships with shell banks and should have measures to satisfy themselves that respondent banks do not permit their accounts to be used by shell banks.

Correspondent Banking Relationships within the Group

Considering the risk posed by correspondent banking even when services are offered to the correspondent bank’s branches, subsidiaries and affiliates, wherever they may be located, correspondent banks shall assess the risks posed by the respondent banks and undertake risk-based customer due diligence measures on correspondent banking relationships within financial groups.

In situations where the respondent banks belong to the same banking group, the correspondent bank should consider the parent or group controls, and also independently assess the ML/TF risks presented by each business relationship, considering relevant factors, such as the specific jurisdiction involved or customer types served by the respondent bank.

C. Ongoing Due Diligence

1. Ongoing Monitoring of Correspondent Banking Relationships

Correspondent banks shall conduct ongoing due diligence of the correspondent banking relationship which shall include periodic due diligence reviews and sanction screening of CDD information on the respondent bank, its owners, directors, senior management and authorized signatories, based on materiality and risk. Risk re-assessment of the respondent bank should be performed whenever reviews reveal relevant changes in CDD information.

2. Ongoing Transaction Monitoring

Depending on the risks associated with correspondent banking relationships, correspondent banks shall develop an appropriate transaction monitoring system that will enable them to understand the usual or expected activities of the respondent bank and detect any unusual or suspicious transaction pattern of activity that is inconsistent with purpose of services provided to the respondent banks. Detection scenarios and parameters specific to the correspondent banking activities should be set in the transaction monitoring systems.

Correspondent banks shall establish relevant red flag indicators based on its risk assessment and monitoring of the correspondent banking relationship, such as:

- a) Purpose of transaction (transactional details) is not commensurate with expected account behavior and /or nature of business of underlying customers;
- b) Missing information in the transactional details;
- c) Transactions pass through multiple jurisdictions without legitimate purpose;
- d) Structured transactions such as transactions which are executed in multiple payments to avoid detection;
- e) Unexplained changes in account activity levels and underlying customers;
- f) Detection of nesting activities for high risk financial institutions and /or for an institution with which the bank has previously terminated its relationship; and
- g) Omission of required payment information for fund/wire transfers and re-submission of previously rejected transfers.

Correspondent banks shall develop policies and procedures in handling any flagged unusual activity, such as conducting further review and requesting transaction information from the respondent bank to justify the identified transaction. Examples of request for information (RFI) may include the following:

- a) Purpose of the respondent bank's customer's transaction, including supporting documents, as warranted;
- b) Risk profile of the customer and duration of customer's relationship with the respondent bank;
- c) Source of fund, and consistency of the transaction with the declared financial profile of the respondent bank's customer;
- d) Beneficial owner of the respondent bank's customer; or
- e) Affiliation of customer with a third party.

Respondent banks, as part of the correspondent banking agreement or other equivalent document, must respond to the RFI in a timely manner and ensure that supporting documents/information about the transaction and/or customer is available. In this regard, a respondent bank must have procedures to obtain the consent of customers regarding disclosure of information to the correspondent bank. Failure of the respondent bank to respond to RFIs may raise a concern on the ability of the respondent bank to identify and know its customers and manage its risk. It may lead to filing of suspicious transaction report by the correspondent bank, followed by a reassessment of the correspondent banking relationship and respondent bank's risk profile. As part of regular review or reassessment of the relationship, the correspondent bank should take into consideration the respondent bank's past behavior on the relationship, particularly any unsuccessful RFI.

For cross-border correspondent banking services, banks should be able to monitor the funds flow to sanctioned entities and countries and conduct necessary due diligence procedures and measures.

(Circular No. 1078 dated 09 March 2020)

IMPLEMENTING RULES AND REGULATIONS (IRR) ON SOCIALIZED CREDIT TO QUALIFIED AGRARIAN REFORM BENEFICIARIES, SMALL FARMERS AND FISHERFOLK
(Appendix to Sec. 334)

Republic Act (R.A.) No. 10878, otherwise known as “An Act Strengthening and Institutionalizing Direct Credit Support of the Land Bank of the Philippines to Agrarian Reform Beneficiaries, Small Farmers and Fisherfolk, Further Amending R.A. No. 3844, Otherwise Known as the “Agricultural Land Reform Code, as Amended” was issued to strengthen and institutionalize direct credit support of the Land Bank of the Philippines (LBP) to qualified agrarian reform beneficiaries (ARBs), small farmers and fisherfolk. Thus, the Bangko Sentral ng Pilipinas (Bangko Sentral), in consultation with LBP, formulated and hereby promulgates the following IRR to guide LBP and all other departments, agencies and sectors concerned in the implementation of the provisions of R.A. No. 10878.

Section 1. Definition of Terms. As used in this IRR, the term:

- a. **Act** shall refer to R.A. No. 10878, otherwise known as “An Act Strengthening and Institutionalizing Direct Credit Support of the Land Bank of the Philippines to Agrarian Reform Beneficiaries, Small Farmers and Fisherfolk, Further Amending R.A. No. 3844, Otherwise Known as the “Agricultural Land Reform Code, as Amended”.
- b. **Agrarian Reform Beneficiaries (ARBs)**, as defined under item (b), Definition of Terms, Sec. 331, shall refer to farmers who were granted lands under P.D. No. 27 or the “*Emancipation of Tenants from the Bondage of the Soil, Transferring to Them the Ownership of the Land They Till and Providing the Instruments and Mechanism Therefor*”, R.A. No. 6657 or the “*Comprehensive Agrarian Reform Law*”, as amended, and regular farmworkers who are landless, irrespective of tenurial arrangement, who benefited from the redistribution of lands, regardless of crops or fruits produced, to include the totality of factors and support services designed to lift the economic status of the beneficiaries and all other alternative arrangements to the physical distribution of lands, such as production or profit-sharing, labor administration, and the distribution of shares of stock under the stock distribution option scheme, which will allow beneficiaries to receive a just share of the fruits of the lands they work, which farmers and farmworkers shall be endorsed by the nearest office of the Department of Agrarian Reform (DAR).

The term shall, likewise, include ARBs under other existing agrarian laws, and registered ARB’s cooperatives/associations/other farm groups respectively endorsed as comprising of ARBs by the nearest office of the DAR.

- c. **Agricultural Projects** shall refer to the following undertakings or activities listed under Item (f), Definition of Terms, Sec. 331:
 - i. Agricultural production;
 - ii. Promotion of agri-business and exports;
 - iii. Acquisition of work animals, farm and fishery equipment and machinery;
 - iv. Acquisition of seeds, fertilizers, poultry, livestock, feeds and other similar items;
 - v. Acquisition of lands authorized under the Agrarian Reform Code of the Philippines and its amendments;
 - vi. Construction, acquisition and repair of facilities for production, processing, storage, and marketing and such other facilities in support of agriculture and fisheries; and
 - vii. Efficient and effective merchandising of agricultural and fishery commodities stored and/or processed by the facilities aforecited in domestic and foreign commerce;

It shall also include agro-industrial projects that promote the provision and delivery of the abovementioned agricultural activities.

- d. **Credit Cooperative** shall refer to a cooperative that promotes and undertakes savings and lending services among its members. It generates a common pool of funds in order to provide financial assistance to its members for productive and provident purposes.
- e. **Crop insurance premiums** shall refer to the amount paid by the small farmers to the Philippine Crop Insurance Corporation (PCIC) or other insurance companies for crop insurance coverage.
- f. **Guarantee fees** shall refer to the amount paid by the Participating Financial Institutions (PFI) to the Guarantee Fund (such as the Philippine Guarantee Corporation), to enroll the unsecured agricultural loans granted by the PFI to its sub-borrower/farmers for guarantee coverage.
- g. **Multipurpose Cooperative** is a cooperative duly registered with the Cooperative Development Authority (CDA) which combines two (2) or more of the business activities of agricultural and non-agricultural cooperatives.

- h. **Non-agricultural Cooperatives (credit and multi-purpose)** shall refer to organizations duly registered with the CDA composed of members who voluntarily join together to form business enterprises or non-business organizations which they themselves own, control and patronize.
- i. **Regular loan Portfolio** shall refer to the sum of all loan accounts outstanding, net of loans to the Bangko Sentral, interbank loans, availments from domestic bills purchase line but gross of allowance for credit losses.
- j. **Risk-Asset Acceptance Criteria (RAAC)** shall refer to the minimum set of parameters which the borrowers should comply with for LBP to process their loan application. It serves as initial measurement in assessing the credit worthiness of the borrowers.
- k. **Small Farmers and Fisherfolk**, as defined under Section 4, Definition of Terms of R.A. No. 8435, otherwise known as the "Agriculture and Fisheries Modernization Act of 1997", shall refer to natural persons dependent on small-scale subsistence farming and fishing activities as their primary source of income.
- l. **Small Farmers' and Small Fisherfolks' Cooperatives** shall refer to cooperatives duly registered with the CDA which are composed primarily of small agricultural producers, farmers, farmworkers, agrarian reform beneficiaries or fisherfolk who voluntarily join together to form business enterprises or non-business organizations which they themselves own, control and patronize.
- m. **Farmers' and Fisherfolks' Organizations or Associations**, as defined under Item (o), Definition of Terms, Sec. 331, shall refer to farmer's and fisherfolk's associations or corporations duly registered with appropriate government agencies and which are composed primarily of small agricultural producers, farmers, farmworkers, ARBs or fisherfolk who voluntarily join together to form business enterprises or non-business organizations which they themselves own, control and patronize.

Section 2. Socialized Credit Facility. LBP shall allocate at least five percent (5%) of its regular loan portfolio for socialized credit to qualified small farmers, small fisherfolk and ARBs. This facility shall solely finance agricultural projects pursuant to the provisions of Section 4 of R.A. No. 10000, otherwise known as "The Agri-Agra Reform Credit Act of 2009".

Credits extended to the beneficiaries named under this socialized credit facility shall be based on the feasibility of the project and their paying capacity, their estimated production, and/or securities they can provide, as well as assets as may be acquired by them from the proceeds of the loans.

This facility will be funded through the operations of LBP itself and will not require additional government funding.

All loans extended through this special socialized credit facility shall qualify as part of LBP's direct compliance with the mandatory agricultural and agrarian reform credit pursuant to R.A. No. 10000.

The base amount for purposes of determining compliance with the five percent (5%) allocation is the regular loan portfolio reported as of the end of the previous quarter.

Section 3. Eligible Borrowers and Sub-Borrowers. Credits under this special socialized credit facility shall be extended through the following conduits:

- a. Cooperatives (i.e., Small Farmers' and Small Fisherfolk's Cooperatives & Non-Agricultural Cooperatives);
- b. Farmers' and Fisherfolk's Organizations or Associations;
- c. Countryside Financial Institutions (CFIs) (i.e., Rural Banks, Cooperative Banks, Thrift Banks);
- d. Agri-business firms or anchor firms providing credit support to ARBs, and small farmers and small fisherfolk; and
- e. Duly accredited microfinance non-government organizations (NGOs) by the Microfinance NGO Regulatory Council.

The proceeds of the credit facility shall be used by these conduits for on-lending to finance the agricultural projects of Small Farmers, Small Fisherfolks and ARBs.

Section 4. Eligibility Criteria and Basic Lending Terms and Conditions

- a. Eligibility Criteria

The approval/renewal of loans to the conduits under the program shall be subject to LBP's established RAAC for each type of borrower in accordance with LBP's existing policies and procedures.

b. Basic Lending Terms and Conditions

Purpose	To finance the working capital requirement of the conduits to Small Farmers and Small Fisherfolks, and ARBs to finance the latter's agricultural projects pursuant to the provisions of Section 4 of R.A. No. 10000, otherwise known as "The Agri-Agra Reform Credit Act of 2009".
Credit Facility	<ul style="list-style-type: none"> • Short Term Loan Lines - Loans with maturity of up to one (1) year; • Term Loans - Loans with maturity of more than one (1) year or up to ten (10) years; and permanent working capital for a maximum of three (3) years; and • Rediscounting Line – Loans to supplement or augment working capital requirements of borrowers (conduits). Availments on rediscounting line are made based on the promissory notes (PNs) of sub-borrowers.
Maximum Loanable Amount	Based on LBP's existing lending policy
Nominal Interest Rate (from LBP to conduit borrower)	Loans under this special socialized credit facility shall have an interest rate equivalent to not more than seventy-five percent (75%) of LBP's prevailing rates for loans to cooperative borrowers of similar or comparable loan terms. The interest rate shall be exclusive of other charges (i.e., cost of documentary tax, gross receipt tax, insurance, if any, etc.).
Repayment Term	<ul style="list-style-type: none"> • Short term Loan Line – based on the project's cashflows, may be payable up to 180 or 360 days PN; • Term Loan – based on the crop cycle/project's cashflows, may be payable monthly, quarterly, semi-annually, annually; and • Rediscounting Line – based on the maturity date of the sub-PNs for rediscounting with LBP.
Collateral/ Security	Real and personal securities as may be acceptable to LBP.
Minimum Loan Covenants	<ol style="list-style-type: none"> The conduit borrower shall not charge sub-borrowers an interest spread exceeding five percent (5%) over the interest rate charged by the LBP for the loan under the special social credit facility. Said interest spread shall exclude reasonable fees and charges such as, but not limited to, crop insurance premiums and guarantee fees that may be imposed; and The conduit borrower shall not lend proceeds from the socialized credit facility to another conduit.
Documentary Requirements	Standard documentary requirements of LBP shall apply.
Fees and Charges	Standard fees and charges shall apply as may be deemed necessary by LBP.
Penalties	The LBP will charge penalties at a rate not exceeding twenty-four percent (24%) per annum.

Except for the purpose of the loan and the nominal interest rate, LBP may amend the foregoing terms and conditions without prior approval from the Bangko Sentral: *Provided*, That said amendment shall be consistent with the provisions of R.A. No. 10878: *Provided further*, That LBP shall notify the appropriate supervising department of the Bangko Sentral of such amendments within 30 banking days from approval of the Board of Directors.

Section 5. Issuance of LBP's Common and Preferred Stocks. LBP may offer and issue common and preferred shares of stocks to ARBs, small farmers and small fisherfolk through their organizations, cooperatives, federations and cooperative banks; development partners and strategic investors such as multilateral and bilateral institutions; rural banks and their associations, either through private placement, public offering or otherwise, in quantities to be determined by the Board of Directors of LBP and in accordance with applicable laws, rules and regulations; *Provided*, however, that the National Government shall maintain, at all times, at least two-thirds (2/3) ownership of the total outstanding common shares of LBP.

Preferred shares of stock shall be non-voting. Other features of preferred shares shall be determined by the Board of Directors of LBP in accordance with applicable laws and regulations.

Section 6. Documentation and Disclosure. LBP shall assess, on a quarterly basis, its compliance with the provisions of this IRR and the Report thereon shall be made available upon request of the authorized representative of the Bangko Sentral. Further, compliance with this IRR shall be disclosed in LBP's Annual Report.

Section 7. Transitory Provision. LBP shall have a period of six (6) months from the effectivity of the IRR to monitor its compliance with the provisions provided in the Act. Thereafter, LBP is expected to fully comply with the requirements of the Act.

(Circular No. 1090 dated 20 July 2020)

CASH SERVICE ALLIANCE (CSA) GENERAL GUIDELINES

(Appendix to Sec. 1113)

The CSA General Guidelines is issued to formalize the direct exchange of fit currency among banks, and to serve as a general reference guide that participating banks shall adopt in drafting their bilateral agreement.

CSA transactions shall cover fit currency. These are legal tender Philippine banknotes and coins of good quality such that genuineness is obvious. Specifically, to be considered fit for circulation, banknotes and coins should not exhibit the characteristics of unfit, mutilated and counterfeit currency as stipulated in Sec. 1111.

I. Stakeholders

Primary stakeholders associated in this CSA:

- a. *Source bank* – supplier of fit currency from their available currency holding;
- b. *Client bank* – requesting party and recipient of fit currency; and
- c. *Bangko Sentral ng Pilipinas Cash Department (Bangko Sentral CD)* – the unit that manages the CSA System and coordinates CSA transactions of banks servicing the Greater Manila Area.

Secondary stakeholder:

- d. *Cash-in-Transit (Cit) companies* – third-party service providers hired by banks to transport/deliver fit currency. Banks shall ensure compliance with Sec. 112.

II. Order and Acknowledgement Protocol

Banks with intention to deposit fit currency or withdraw from the Bangko Sentral CD shall utilize the CSA System to provide information on their available fit currency or to place fit currency orders. The CSA transaction will take precedence over direct deposit to or withdrawal from the Bangko Sentral CD.

All *Source banks* and *Client banks* shall comply with the provisions enumerated below:

- a. From 8:00 am to 10:00 am, Mondays to Fridays, except holidays, *Source bank* and *Client bank* shall submit the following information to the Bangko Sentral CD through the CSA System:

Source Bank	Client Bank
Available fit currency holdings (per denomination, number of pieces/ bundles/bags, and amount)	Fit currency requirements (per denomination, number of pieces/bundles/bags, and amount)

Source bank shall also provide information on reasonable service fee for the CSA transaction.

- b. Bangko Sentral CD shall have CSA Account Managers (AMs) who will monitor and manage information provided by *Source bank* and *Client bank*. CSA AMs shall match fit currency requirements with available fit currency holdings from 10:00 am to 12:00 nn, Mondays to Fridays, except holidays;
- c. The CSA AMs shall inform *Client bank* through email or phone call of the available fit currency from the *Source bank* between 10:00 am to 01:30 pm, Mondays to Fridays, except holidays;
- d. Both the *Source bank* and *Client bank* shall confirm approval of the matched CSA transactions via e-mail to csa@bsp.gov.ph and/or through the CSA System, once functionality is available. The CSA AM shall acknowledge confirmation from both parties;
- e. Upon receipt of confirmation from the CSA AM, the *Source bank* shall directly communicate with *Client bank* for the facilitation and completion of payment not later than the following banking day;
- f. No cancellation of order after confirmation shall be accommodated; and
- g. Should there be no available CSA match:

(1) The *Source bank* may:

- (a) deposit its available fit currency with the Bangko Sentral CD as regular deposit until 03:00 PM of the same day or next banking day, if so desired; or
- (b) update its available fit currency for CSA transaction the following day within prescribed time.

(2) The *Client bank* may:

- (a) proceed with regular currency withdrawal transaction with the Bangko Sentral the following banking day, if so desired; or
- (b) update its fit currency requirements for CSA transaction the following day within the prescribed time.

III. Currency Quality and Packaging

CSA transactions shall cover fit currency and banks shall comply with provisions of Secs. 1111 and 1112. Currency that will be serviced under the CSA shall conform with the following standards:

- a. Must not include unfit, mutilated and counterfeit currency;
- b. Must be free from pins, clips, staple wires, and stickers/adhesive residue;
- c. Banks shall abide with fitness level set by the Bangko Sentral, properly shrink-wrapped per bundle¹, sorted by denomination and properly labelled;
- d. Coins shall be sorted by series, and in accordance with standard quantity per denomination; and
- e. In transporting fit currency, banks must use clear plastic or duffle bag for banknotes, and canvas bag for coins.

Source bank shall issue a certification that it is complying with the above standards for every CSA transaction.

IV. Settlement Options

Upon confirmation by both *Source bank* and *Client bank* of their transaction, they have the following settlement options to choose from:

- a. Bangko Sentral Philippine Payment and Settlement System (PhilPaSS)

Client bank shall issue payment instruction through the Real Time Gross Settlement (RTGS) or PhilPaSS of Bangko Sentral to debit its Demand Deposit Account (DDA) and credit the DDA of *Source bank*.

- b. Direct debit to a maintained deposit account

The *Client bank* may agree to open/maintain a deposit account with the *Source bank* to facilitate automatic debit to settle CSA transactions.

- c. Issuance of Managers Check (MC)

Client bank shall issue an MC which can be presented directly to the *Source bank*.

The Bangko Sentral urges banks to settle CSA transactions mainly through PhilPaSS (Option “a”). Settlement Option “b” (opening of account with the *Source bank*) and Option “c” (MC) shall be considered only if the same are more convenient and cost effective to both parties.

V. Delivery and Completion of CSA Transaction

- a. Transport of fit currency under the CSA shall be arranged and coordinated between the *Source bank* and *Client bank*, e.g., thru CIT services or bank’s own armored vehicle service. Banks shall abide with Sec. 275 in defining and setting operational standards for CIT companies.
- b. Upon settlement confirmation, the *Source bank* shall deliver/the *Client bank* shall pick-up (whichever is applicable) the requested fit currency at the designated delivery/pick up point. The place of delivery/pick up, as well as the period within which to deliver/pick up the requested fit currency shall be agreed upon by the *Source bank* and *Client bank*.
- c. Upon delivery of *Source bank* of its fit currency holdings and receipt of *Client bank* of its fit currency requirement, both *Source bank* and *Client bank* shall inform via e-mail to csa@bsp.gov.ph and/or thru CSA System, once functionality is available, Bangko Sentral CD on the day of the transaction to tag it as “completed”. Information to be provided are time of delivery receipt, amount and denomination/s delivered/received.

¹ Each bundle of banknotes consists of 1,000 pieces, or 10 wrappers of 100 pieces of banknotes of same denomination of wrapper.

- d. The obligation and responsibilities of the *Source bank* and *Client bank* in case of any delay in the delivery and completion of the CSA transactions shall be governed by their contractual agreements.

VI. Dispute Management

Both *Source bank* and *Client bank* shall take all precautionary measures to safeguard the integrity and accuracy of the transactions. They shall be responsible in providing, agreeing, and complying with a dispute resolution mechanism, which shall be included in their contractual agreements. They shall exert earnest efforts to settle any currency discrepancy dispute. The following shall serve as guide in resolving disputes relating to CSA transactions:

- a. Closed Circuit Televisions (CCTVs), which should be regularly checked and maintained, must be strategically positioned in the areas where currency bags are to unloaded and opened;
- b. Both *Source bank* and *Client bank* are required to designate their authorized representatives to witness the opening and inspection of currency bags;
- c. Reporting of any currency shortage or overage by the *Client bank* to the *Source bank* shall be made upon discovery during delivery date or within two (2) banking days from date of delivery if not done within the prescribed period, *Source bank* or *Client bank* is deemed to have waived its right to seek remedy. The *Client bank* shall inform *Source bank* through email of the alleged discrepancy and details of the transaction (i.e., amount, denomination, number of pieces, name of Authorized Representative or Witness) copy furnished the Bangko Sentral CD. *Source bank* needs to confirm receipt of report on discrepancy within two (2) banking days and discuss course/s of action to resolve the issue.
- d. The *Client bank* or *Source bank* may request viewing of CCTV footages and/or recount of delivered currency within the prescribed period, or as may still be deemed practical under the circumstances, and with witnesses from both parties;
- e. Restitution of the shortage or return of the overage shall be made based on the validation results from CCTV footage and religious compliance with quality and standard packaging; and
- f. *Source bank* shall provide the Bangko Sentral CD with information on the resolution of the case (e.g., shortage replaced; overage returned) within two (2) banking days after resolution.

Upon receipt of complaint from *Client bank* of the *Source bank's* non-adherence with the prescribed banknote quality, the Bangko Sentral CD shall look into the matter and endorse to the appropriate supervising department of the Bangko Sentral to ascertain if enforcement actions may be deployed for non-compliance with provisions of Secs. 1111 and 1112, and other pertinent Bangko Sentral regulations.

VII. Directory of Banks' Authorized Representatives/Witnesses and CiT Companies

All banks shall submit to the Bangko Sentral CD the names of their authorized representatives/witnesses and hired CiT Company, together with contact information, company ID and endorsement from Senior Officer of cash operations, before the implementation of this CSA Guidelines and every first banking day of the year or whenever there are replacements. It shall be the responsibility of both *Source bank* and *Client bank* representatives to validate the authenticity of documents presented to establish the identity of their counterparts.

This Directory shall be updated by the Bangko Sentral CD each time banks submit the names of their authorized representatives/witnesses and CiT Companies.

VIII. Amendment and Separability Clause

The CSA general guidelines may be amended or modified by the Bangko Sentral upon consultation with *Source banks* and *Client banks*. Each provision of this CSA Guidelines shall be considered separable. If, for any reason, any provisions hereof are determined to be invalid, unenforceable or contrary to any existing or future Bangko Sentral regulations or law, such invalidity shall not impair the operation of or affect those portions of the guidelines that are valid.

(Circular No. 1099 dated 06 October 2020)
